

## Alternate 591

### Chapter 591 Exterminating an ant with a single strike (1)

The spiked club was so huge that it was no exaggeration to say that it was as big as a mountain!

Such a brutal and terrifying weapon was being wielded by a giant. The destructive power it possessed was simply unimaginable.

Under the attack of such a weapon, anyone who touched it would definitely die!

With a scream, a foreign cultivator who was running for his life with a bag on his back was the first to be hit by the mace.

His body was like a balloon filled with red ink. The moment it touched the mace, it exploded. Before the bloody mist and minced meat could spread, they all stuck to the mace.

After that, a dozen more foreign cultivators who couldn't Dodge in time were smashed into meat paste. They didn't even have time to scream before they were completely turned into a pool of rotten meat, their bones and internal organs mixed together!

For a moment, blood splattered in the sky as countless foreign cultivators were smashed into meat paste by the club. Like mosquitoes in summer, they were smashed to death in the blink of an eye, and a mist of blood quickly spread out.

The entire Valley was filled with a fishy smell!

When the cultivators in the distance saw this, their eyes were filled with endless fear. They ran with all their might, trying to avoid the attack range of the mace.

The foreign cultivators at the front dodged the mace, but the giant waved its other arm and whipped them hard.

The speed of the whip was as fast as lightning, and it was even faster than sound. It was not until the whip had left a ravine on the ground that the sharp sound of the whip breaking the sound barrier rang out in the sky!

Before the group of foreign cultivators could even react, they were turned into meat paste by the whip!

The rest of the foreign cultivators who had just escaped from death were scared out of their wits. They wailed and ran for their lives, scurrying around the valley.

Seeing how brutal this giant was, killing people as easily as cutting grass, some of the foreign cultivators who were closer to the ground burrowed into the soil, trying to avoid the mace and whip.

It was as if the giant had killed these ants to vent its anger after being woken up. As such, it didn't plan on letting the cultivators who had burrowed into the ground go.

It raised its huge foot, which was as large as a mountain rock, and stomped on the ground in front of it.

"BOOM!"

The entire ground began to tremble, and countless rocks rolled down. The hard ground was actually left with a big and deep footprint by the giant's stomp.

Those foreign cultivators who thought they were smart still couldn't escape death even if they were hiding under the ground. In the end, they were trampled into meat patties by the giant's foot.

However, compared to the other foreign cultivators who had been killed, these people who were hiding in the mud had profited from this misfortune because they didn't need to leave their corpses in the wilderness!

"BOOM!"

Another cudgel smashed over. The mountain peak where Tang Zhen's group had stopped at earlier was actually directly smashed into two. Countless rocks and dust soared into the sky.

This attack was truly like a landslide. The entire Valley was almost directly flattened!

The unlucky ones who were hiding in the valley were also crushed to death at this moment. Under the giant's terrifying attack, not even their bones could be found!

After several consecutive attacks, more than half of the foreign cultivators were killed or injured. The rest went into hiding, too scared to even breathe.

After venting his anger from having his beautiful dream disturbed, the giant let out a long roar and began to stride forward with his mountain-like legs.

Although it didn't take many steps, it had already left the range of the valley, leaving only a terrifying figure for everyone.

When the cultivators who were lucky enough to survive saw this, they began to slowly walk out from their hiding places. After looking at each other, they all heaved a sigh of relief.

The valley was completely unrecognizable now. The air was filled with the thick smell of blood, and broken limbs and all sorts of items were scattered on the ground.

When the cultivators saw this, they forgot the fear in their hearts and began to search the corpses in the valley quickly!

Looking at the items on the ground, the cultivators sighed in their hearts. It seemed that only those who survived to the end were qualified to enjoy these spoils of war!

It was also at this moment that Tang Zhen and situ Yuanzhi returned and joined the search at the same time!

Although the scene was like hell on earth, the two of them were used to life and death, so they didn't disturb their minds at all. They just focused on collecting useful items.

Compared to the other foreign race cultivators who were still in shock, Tang Zhen and his partner could be said to be completely unscathed. Moreover, the two of them were King level cultivators. No one in the area dared to fight for them.

Tang Zhen saw that there was a lot of junk on the ground and simply activated the [ advanced treasure detector ] again. His figure continuously shuttled through the valley and only picked the valuable items.

At this moment, another group of figures flew over. Red Shield's group of three and the two King level cultivators who were Tang Zhen's enemies were among them.

It was clear that when the giant was massacring the people, they had also successfully escaped, so they did not suffer much losses.

Only a few of the two King level cultivators 'subordinates were left. The rest had probably died in the attack.

After these people landed in the valley, they didn't say a word and quickly began to collect the scattered items.

When the red Shield saw Tang Zhen and situ Yuanzhi, it looked as if it wanted to say something but stopped. However, it didn't say anything in the end and continued to search for various items in the wreckage. From time to time, it would kick the passing cultivators.

The Lord cultivators didn't dare to say anything. They could only try to stay away from Red Shield and the others.

It didn't take long for the items beside the cultivators to pile up into a small mountain. The empty-handed Tang Zhen once again became the object of everyone's attention.

When these cultivators saw the scene of Tang Zhen collecting the items, they had long guessed that he had a storage equipment. At this moment, their eyes were filled with envy and jealousy, as well as a trace of greed.

If Tang Zhen wasn't a King level cultivator, he would have been surrounded and killed by those foreign cultivators!

After all, storage equipment could only be found by chance. Some cultivators in loucheng city might not even have one in their entire lives. For such a rare treasure, they would definitely take risks!

Situ Yuanzhi already knew that Tang Zhen had a storage equipment. Therefore, other than being envious, he didn't reveal any other emotions.

Red Shield and the other two felt even more complicated when they saw this. Tang Zhen's performance time and time again had caused the three of them to begin to doubt just how careless their decision was back then. A trace of regret had even faintly appeared in their hearts.

Whether it was the fact that he had casually broken the defensive light curtain of the building or the storage equipment that he had just displayed, it proved that Tang Zhen was no ordinary person.

Recalling what situ Yuanzhi had said earlier, the three of them were even more convinced that Tang Zhen came from a continent-level city and had an extraordinary identity.

Otherwise, it would have been impossible for him to rise so quickly in a remote place like the Wildlands with his own strength. At the same time, he would not have mastered a magical ability and had an endless supply of all kinds of goods.

For such a person, one should either try their best to befriend him or stay away from him. If one really wanted to become an enemy, one should also be prepared to lose their life.

This was because no matter if it was Tang Zhen himself or the continent-level city behind him, they were both existences that could not be easily provoked!

After thinking about this, Red Shield and the other two looked at each other and made a decision in their hearts.

Tang Zhen did not see the eye contact between the red Shield and the other two. Instead, he kicked a huge rock away. After which, he extended his hand and sucked. A leather bag was then placed into his storage ring.

After glancing at the content displayed on the [ advanced treasure detector ], Tang Zhen realized that the remaining items were not of much value. He simply stopped searching and found a clean place to flip through the books he had obtained from the giant tower.

Not long after, situ Yuanzhi walked over with the round monster, but his expression was a little strange.

Behind him were red Shield and the other two who were carrying their bags. They cupped their hands together and greeted Tang Zhen.

“City Lord Tang, we were in the wrong earlier. Please be magnanimous and don’t hold it against us. How about we continue our cooperation?”

The red Shield said in a very sincere tone.

Lu ha and Hui, who were standing at the side, were also staring at Tang Zhen. Lu ha was full of smiles as he handed the flying carpet to Tang Zhen.

“Since city Lord Tang likes this, I’ll give it to you!”

Tang Zhen kept the book and glanced at the three of them. He then looked at the troubled situ Yuanzhi and suddenly smiled.

“It’s not impossible to cooperate, but you have to agree to one condition first!”

Chapter 592-lure them with benefits \_1

After hearing Tang Zhen’s words, Red Shield and the other two exchanged glances with each other. They thought in their hearts that it was indeed the case!

Situ Yuanzhi decided to be a mute. He did not raise his head or speak, but there was a hint of helplessness in his eyes.

When Tang Zhen was confronting the two King level Masters, Red Shield and the other two chose to stand by and watch. As teammates, they couldn’t stand out at the critical moment. This matter itself was very unrefined.

It was also because of this incident that the five-man team was completely broken!

Anyone would definitely have a grudge if this kind of thing happened to them. Therefore, it would not be overboard for Tang Zhen to reject their request at this moment.

He didn't expect that Tang Zhen didn't seem to mind this matter. Instead, he agreed to cooperate again, but he also made a request.

Fortunately, Tang Zhen's request was already within the expectations of the three of them because this was also considered human nature.

At this moment, a thought flashed across the hearts of the three of them. As long as Tang Zhen's request was not too excessive, they would agree to it immediately in order to avoid causing Tang Zhen to be unhappy.

If they missed such an opportunity again, the three of them would definitely be filled with regret, because situ Yuanzhi's harvest had already seriously agitated them!

The area they searched at the bottom level was occupied by ordinary residents of the building, so the quality of the items was naturally not that high.

Compared to situ Yuanzhi's gains in the middle section, the items that they had obtained were several grades lower!

It was also because of this that they had looked for Tang Zhen, hoping to borrow his ability to enter the middle layer.

Tang Zhen swept his eyes over Red Shield's group of three. His face was filled with confidence as he spoke in a clear voice, I'm not trying to boast, but the defensive light curtain of the giant tower is just so-so, and I can even break the protective light curtain of the upper area easily!

Red Shield and the other two were overjoyed when they heard this. Compared to the middle and lower levels, the items in the upper level were undoubtedly more precious!

If he could really enter it, he would definitely make a lot of money!

It wasn't that they didn't have the intention to attack the upper level of the tower, but the defensive light curtain there was too strong. It was definitely not an easy thing to enter.

The reason why the group of cultivators had chosen the lower level was that the defensive light curtain here was easier to break. They could enter before the giant woke up.

Currently, Tang Zhen had actually said that they could easily break the light curtain in the upper layer. This also meant that they would be able to obtain even more rewards. How could this not cause Red Shield and the other two to feel excited?

Moreover, the three of them did not doubt these words in the slightest. This was because Tang Zhen's performance in casually breaking the defensive light curtain in the middle layer earlier had left an extremely deep impression on them.

At this moment, Tang Zhen appeared to be even more unfathomable in everyone's hearts!

city Lord Tang, if you have any requests, please speak. As long as it's within our means, we will do our best to complete it!

Red Shield promised. The other two also nodded at the same time, as if saying "you can say whatever you want."

Tang Zhen no longer hesitated upon seeing this. He directly said, "You may not know this, but I suspect that there is a special monster lurking in the giant tower. They look very similar to the giant, but the difference is that this monster has two heads and four arms!

"Previously, I had fought with a King-tier monster like this and killed it. It was at that time that I noticed the abnormality!

They don't seem to have any abnormalities on the surface, nor do they have any brains. If this Tang hadn't seen similar monsters before, I'm afraid he wouldn't have been able to discover them."

Seeing red Shield's group of three in deep thought, Tang Zhen continued, I want to figure out the specific origin of this monster, so I have to capture a few more for research. My request is to help me capture those monsters alive and send them to me for careful research.

Although they could level up by killing the dying monsters of the same level, Tang Zhen deliberately increased the difficulty as a punishment for their previous behavior.

After hearing Tang Zhen's request, Red Shield and the other two pondered for a moment before nodding and agreeing.

To the three of them, this task wasn't too difficult. With the three of them, capturing an Emperor monster alive wasn't a difficult task.

However, there was a problem. He would need a few monsters to meet Tang Zhen's request.

city Lord Tang, as you know, killing King-tier monsters is easy, but capturing them alive is a little difficult. How many monsters do you need to kill to satisfy your requirements? "

If it was just one or two, it would not affect their exploration of the city. But if there were eight to ten, Red Shield and the other two would have to consider it!

After all, they were in a hurry to explore the city. If they were to waste all their time on capturing monsters, it would be meaningless for them to enter the city.

Tang Zhen laughed softly when he heard this. He swept his eyes over Red Shield's group of three. He naturally knew what they were thinking in their hearts.

However, he already had a solution to this problem. He would make these three king level cultivators work for him willingly.

Under the gazes of the four people, Tang Zhen slowly extended his palm and displayed the item in his palm.

Ten multi-colored rings were quietly lying on Tang Zhen's hand. At first, they appeared ordinary. However, if one were to look carefully, one would discover that there was a trace of strange spatial strength attached to the Rings.

However, only King level cultivators could notice the abnormality of the ring. Ordinary cultivators couldn't see anything because their lives hadn't undergone a qualitative change.

Situ Yuanzhi, who had been silent all this while, suddenly widened his eyes at this moment. He stared intently at the ring on Tang Zhen's finger. A hint of excitement appeared on his face.

"Is this a Pixiu storage equipment?"

As soon as situ Yuanzhi said this, the three people's expressions changed. They all fixed their eyes on the Rings and refused to move.

Even though they were King level cultivators, they didn't have a single storage equipment in their hands. They had never even seen one before they met Tang Zhen.

Now that they suddenly saw ten of them, it was normal for them to be excited. If Tang Zhen was an unfamiliar cultivator, the four of them would definitely kill him and snatch his treasure.

However, in front of Tang Zhen, situ Yuanzhi and the others did not dare to act rashly. Putting aside his own strength, just the continent-level city behind him was not an existence that they could provoke.

Once an accident happened to Tang Zhen because of this, the four of them could forget about having a good life. They would definitely be crazily hunted down by the faction behind him!

Moreover, Tang Zhen had displayed this storage equipment in order to arouse their desire. After which, he would use this as a condition to request them to do something.

They were all sly old foxes who instantly figured out the key point!

Tang Zhen saw that the four people's expressions were uncertain, but the greed and desire on their faces could not be concealed. The corner of his mouth revealed a trace of an unnoticeable smile.

"Elder situ is right. These rings are indeed storage equipment!"

Everyone's breathing became heavy again when they heard this. Their eyes stared intently at Tang Zhen, waiting for him to continue explaining.

"These Ten Rings are of the same specifications. Each ring has a total of five slots for storage, and each slot can hold one cubic meter of items!

In the next operation, I will help you break the defensive light curtain of the giant tower for free, and for every monster you send, you will be qualified to buy this storage equipment once!

There are only Ten Rings, and whoever can get them will have to rely on their own abilities!"

After Tang Zhen said this, he sat back on the rock and continued to read the book in his hand.

He had a vague feeling that these ten storage rings of the lowest grade made from scraps would probably set off a bloody storm again!

## Chapter 593 The caravan of the city of ten thousand treasures

After Tang Zhen took out these ten storage rings, the atmosphere of the scene immediately turned heavy.

If it was an ordinary item, these King level cultivators wouldn't have been so flustered. But when it came to storage equipment, they couldn't keep their calm.

After all, storage equipment had always been an extremely precious item in the tower world. It could only be found by luck.

Tang Zhen didn't know about other places, but at least to his current knowledge, he had never heard of anyone selling storage equipment among all the top towers, including heaven battling city!

Therefore, it was reasonable for this thing to make situ Yuanzhi and the others feel shocked.

Red Shield took a deep breath and cupped his hands toward Tang Zhen, "City Lord Tang, you mean what you say? Are you trying to make us happy?"

"Don't worry, I won't joke about this kind of thing!"

After hearing Tang Zhen's words, the hearts of the four people relaxed. Soon after, they were filled with joy as their faces revealed a determined expression.

"In that case, let's set off now!"

Everyone acted decisively, and since they had already made up their minds, there was no more delay in their actions.

Following the incantation that Lu ha had told him, Tang Zhen unfurled the flying carpet. Everyone jumped on it and sat down. Then, they went straight in the direction where the giant tower had disappeared.

As for the items they had obtained, they had already picked out the most precious ones and carried them with them. The rest were all hidden with a secret technique and would come back for them in the future.

This was the inconvenience of not having a storage item. Even a King level cultivator didn't have a good solution to this problem, and could only carry large and small bags.

When Tang Zhen saw this scene earlier, he also felt that it was a little funny. After all, this image was really damaging to the identity of a King rank cultivator!

However, they had just flown a short distance when they suddenly saw a large group of strange mounts galloping towards them. Looking at the direction they were heading, it was the valley where the giant's building was.

Those strange mounts were huge and looked like tortoises with sunken backs, but they were extremely fast.

There were also some huge boxes in the places where the mounts had caved in. There seemed to be doors and windows, and they looked like moving houses.

When Lu ha, who was sitting on the flying magic carpet, saw this, his brows slightly furrowed. He turned to Tang Zhen and said, "City Lord Tang, please stop for a moment. Let's return to the valley for the time being!"

Tang Zhen was startled when he heard this. He turned his head and looked at Lu ha, not knowing what he meant by these words.

At the side, situ Yuanzhi, Red Shield, and the other two also saw the mounts. They nodded slightly, clearly agreeing with what luha had said.

Seeing Tang Zhen's puzzled expression, situ Yuanzhi immediately explained, "city Lord Tang might not know this, but this group of mounts come from the myriad Treasure Tower. They specialize in doing business on the continent, and it's an extremely special national-level tower!"

When Tang Zhen heard the words "ten thousand treasures tower," he immediately came to a realization. When he looked at the Mount on the ground, he revealed a trace of contemplation.

He had once heard the name of this myriad Treasure Tower from fatty. It was said that this national-level tower was famous for its business. Many high-end goods transactions could not be without the shadow of this myriad Treasure Tower.

A thousand years ago, this ten thousand treasures tower had already appeared on the continent. Because the goods it sold were all of high quality, its reputation grew bigger and bigger!

It was said that the myriad Treasure Tower had connections with many secluded National towers, and they could also buy all kinds of goods from other worlds. In terms of supply channels, almost no one could compare with them.

If you wanted a special item but couldn't spend it, you just had to find the merchants of the ten thousand treasures tower, and you would most likely get it.

When many foreign merchants mentioned the city of a thousand treasures, their faces were full of envy and admiration, as if that was the highest realm of merchants!

The reason why fatty knew so much about the myriad Treasure Tower was that he had once signed up to be a Caravan Guard in the myriad Treasure Tower in order to enter the national-level tower. In the end, he had successfully infiltrated this national-level tower.

It was a pity that after the failure of that operation, fatty was chased by the cultivators of the ten thousand treasures building. Although he managed to escape in the end, he was seriously injured.

And the elder of heaven battling city who had helped fatty to heal was situ Yuanzhi, who was beside him!

Because of its poor and remote environment, the caravans of myriad treasures store didn't even bother to come here. Even in places like heaven battling city, caravans of myriad treasures store were rarely seen.

Therefore, the caravans of the myriad treasures store would usually appear in rich and prosperous places, or in places where there were national-level stores, or in places like this, where a large number of items from national-level stores appeared.

Because the foreign worlds invaded by each national-level tower were different, the items produced were also different. The myriad treasures tower, known for having the most comprehensive and best goods, naturally would not miss such an opportunity to purchase.

Everyone had obtained a lot of items earlier. It would be too troublesome if they brought all of them back. Now that the myriad Treasure Tower had appeared, it gave them the best solution.

Moreover, it was rare to see the ten thousand treasures tower on normal days. Everyone also wanted to see if there were any goods they needed. If there were, they would buy it directly, because they didn't know when they would next see the caravans of the ten thousand treasures tower.

Tang Zhen himself was also extremely interested in this ten thousand Treasure Tower. Since he had encountered it, there was no reason for him to miss it.

In any case, he couldn't lose this giant's Tower, and he didn't know when the next giant would fall asleep. He might as well experience the caravans of this ten thousand treasures tower!

When he thought of this, Tang Zhen immediately controlled the flying magic carpet and quickly caught up with the group of Mount.

At this moment, the group of mounted beasts had already arrived outside the valley. As soon as the mounted beasts stopped, hundreds of cultivators appeared in an instant. Each of them had a strong cultivation.

After they jumped out of the huge carriage carried by the mounts, they quickly drove the mounts to the side and gathered them.

The houses carried by these mounts were about fifteen meters long. The cultivators of the ten thousand treasures building worked together to carry them down and stack them together, making them wider and looking like a huge shop.

There were dozens of similar temporary houses, arranged in a neat row, looking very spectacular.

A cultivator walked to the front of these houses and stuck the metal rod in his hand into the ground. Then, a ray of light shot up into the sky, revealing a strange pattern.

Even from dozens of miles away, one could see the flashing patterns in the sky.

This pattern was like a rune, but also like some kind of object. Tang Zhen glanced at it, but he was unable to understand the meaning it represented.

Situ Yuanzhi told Tang Zhen that this was the sign of the myriad Treasure Tower. As long as it appeared, it meant that the caravans of the myriad Treasure Tower were doing business there!

As he controlled the flying magic carpet to slowly land, many cultivators had already gathered around him. They were carrying large and small bags on their backs and were curiously sizing up the caravan from the city of ten thousand treasures.

A King level cultivator in demonic armor walked out and glanced at the surrounding cultivators. He said in a low voice, "Friends, I'm the leader of the guards of the trade caravan of the ten thousand treasures building. I'm here today to buy items from the giant's Tower.

You have gained a lot. If you sell it to my ten thousand treasures building, you will certainly get a satisfactory price!

At the same time, our myriad treasures store has a wide range of products and fair prices. We can also accept the order service of special items. Welcome, everyone!”

After the king level cultivator finished speaking, he cupped his fists and sat down on a chair.

With a King level cultivator here, no one would dare to cause trouble.

Almost all the cultivators present had heard of the name of the city of ten thousand treasures. At this moment, seeing that they wanted to buy the items they had obtained, they all went forward to ask for the price.

It was inconvenient to carry these things around, and it was easy to attract the covetous eyes of greedy people. It was far better to sell them directly in exchange for the brains and goods he needed.

Several white-robed cultivators from the ten thousand treasures Pagoda’s caravan sat in front of the table. They looked at the items handed over by the cultivators and then reported a price.

They were the appraisers who had followed the ten thousand treasures tower’s caravan. They had seen countless strange items and each of them had extremely rich experience.

Hearing the price announced by the appraiser, the cultivators’ eyes brightened slightly. The trade caravan of the ten thousand treasures tower was indeed rich and generous, and the price given was extremely fair.

After confirming this, the cultivators no longer hesitated and sold all the items they had no use for!

Chapter 594 The powerful loucheng merchant team (1)

Tang Zhen was deeply touched in his heart after seeing this scene.

No matter if it was the original world or the loucheng world, merchants were the most sensitive existences. Driven by profit, they could appear anywhere without fear of danger.

Therefore, when the giant’s Tower appeared, they rushed over as soon as they heard the news. It was obvious that they wanted to monopolize the items from the giant’s Tower.

As time went on, when their business reached a certain level, their signboards would be worth thousands of gold and would be known by countless people.

Now, cultivators were flocking to the places where the caravans of the myriad treasures store went, which indirectly made the myriad treasures store famous!

The business district of the Holy Dragon City had gradually established its own brand, but compared to the myriad Treasure Tower, it was more than a grade worse!

Situ Yuanzhi and the other three looked at each other and ran in different directions. It was obvious that they wanted to retrieve the items they had hidden earlier.

When Tang Zhen saw this, he chose to stand at the side and wait quietly. At the same time, he constantly observed the details of the ten thousand Treasure Tower's caravan.

As it was a national-level city, the guards recruited by the trade caravan were all Lord-level experts. With these cultivators, no one would dare to have any evil ideas about the trade caravan.

Other than these Lord-ranked cultivators, Tang Zhen also felt three obscure mental energy fluctuations from the caravan. These were the mental fluctuations that only King-ranked cultivators would have.

When Tang Zhen sensed the presence of these three cultivators, the other party had obviously noticed him as well. After his mental energy swept over his body once, it quickly shifted to the side.

The person who came was a guest. Even if Tang Zhen was a King level cultivator, the other party didn't have any precautions and acted very casually, treating him as an ordinary cultivator.

However, if Tang Zhen were to make a move, he would definitely suffer a lightning-like attack from the other party!

The ten thousand treasures building sold countless treasures, and with this convenience, it also had endless means of attack and defense.

At this moment, situ Yuanzhi and the other three had already returned. They used their mental energy to carry the packages and ran over at lightning speed.

Seeing the four King level cultivators, two appraisers immediately stood up and provided their services.

Lu ha and the cultivator named Hui placed the packages on the table. The appraisers took them out one by one and quickly reported the price.

The assistants at the side were in charge of recording. They used a square item to click on it like a calculator and calculated the final price.

Ten minutes later, both of them had finished counting their items. Then, a merchant team member came forward and asked them which payment method they would like.

The first method was to pay the brain Pearl, but most cultivators wouldn't want it. After all, as long as one was willing to spend time, they wouldn't have to worry about getting their hands on something like a brain Pearl.

The second method of payment was the world's origin companion beast, which was only used between national-level buildings. This companion beast existed in every world, called the origin stone. The number and quality of the stones varied.

Tang Zhen had also heard of this origin stone. It was said to be a multi-colored crystal. After a King level cultivator used it for a long time, not only could it increase their cultivation, but it could also help them to comprehend a trace of the existence of laws.

Even a low-grade origin stone could be exchanged for a million brain beads. It was really expensive!

Even so, the supply of origin stones was in short supply. Apart from myriad Treasure Tower, there were really not many forces that used it to pay for the purchase.

When a cultivator reached the king class, they would no longer be limited to their skills. They would use their own understanding of the laws to gradually create their own attacks.

When he completely comprehended the existence of the laws, he would advance to another mysterious realm, and the wind and clouds would change with a raise of his hand!

Tang Zhen didn't know about this at first. He thought that after advancing to king class, he would still have to rely on skills to fight. It was only after he read the book he got from the giant Tower City that he came to a realization.

In fact, unknowingly, he had gradually embarked on this path. In his daily battles, he mostly relied on his instinctive reactions to deal with his enemies!

Unfortunately, he didn't have much clue about the comprehension of laws. He didn't even have the concept.

Although he had been relying on hunting to level up, if he only focused on leveling up and ignored his comprehension of the laws after reaching king class, then his combat power would gradually decline.

Laws were like a sharp sword. When two evenly matched brawny men fought, the one holding the sharp sword would naturally have a great advantage!

Tang Zhen sucked in a breath of cold air when he first learned of this knowledge. At the same time, he secretly rejoiced that he had discovered this book.

If he waited until his cultivation had risen to a certain level before he discovered that something was wrong, it would be too late for Tang Zhen to regret it.

Because at this point, he would definitely be far behind other cultivators of the same level!

Therefore, Tang Zhen was extremely interested in this kind of origin stone. This time around, he was prepared to bring some back and try to comprehend some laws.

As for the third method of payment, it was to convert it into a certain amount of points. Cultivators could use these points to buy the items they needed from the trade caravans of the city of ten thousand treasures.

Luha chose the origin stone, while Hui chose to Pay with Points.

After the two of them completed their transaction, situ Yuanzhi and the red Shield walked forward and placed their items on the table.

When the appraiser saw situ Yuanzhi's item, his eyes lit up slightly. Compared to the other cultivators, his item was obviously of a higher grade.

Red Shield, who was beside him, also had a helpless look on his face. There was even a hint of envy.

Especially after hearing the price from the appraiser's mouth, Red Shield even took a deep breath and faintly glanced at Tang Zhen.

If it wasn't for the fact that he was acting together with Tang Zhen, how could this old man situ possibly have so many gains?

After all the items were appraised, the total price of situ Yuanzhi's items was much higher than the total price of the three red Shield's items. He was so happy that he squinted his eyes.

The two of them chose to Pay with Points. After which, they turned their heads and looked at Tang Zhen.

Tang Zhen had a storage equipment on him. Moreover, it was definitely better than the storage ring that he had taken out. Therefore, his searching speed was definitely much faster than theirs. Therefore, the combined harvest of the four of them would most likely not be as much as Tang Zhen's!

When the appraiser by the side saw situ Yuanzhi and the other three looking at Tang Zhen, he smiled and said, "if you also have something from the giant tower, please bring it over. I promise to give you a satisfactory price!

Tang Zhen shook his head when he heard this. He turned to the appraiser and said, "I don't plan on selling it for the time being, but I'd like to ask if you have any void iron. I want to buy some back!"

When the appraiser heard the name void iron, he frowned slightly, as if he was thinking about what it was.

Sir, why don't you go to the shop behind me and check it out? if you don't have it, we can also accept custom-order services!

When the appraiser said this, he turned around and pointed to the house behind him, indicating for Tang Zhen to go there.

Tang Zhen gave his thanks and walked toward the row of houses.

Seeing this, situ Yuanzhi and the other three hurriedly followed and prepared to take a look around the shop.

Tang Zhen came to the house that the appraiser pointed at and discovered that it was a store that sold all kinds of materials. The walls inside seemed to be embedded with countless small lenses, and each lens showed an item.

When the customer's eyes were focused on an item, the lens that showed the item would quickly enlarge and display the item in detail.

After Tang Zhen took a glance, he frowned slightly. This was because he had discovered traces of the runic magic formation's operation on it. Moreover, all of the items were merely images. They were not real objects!

The ten thousand treasures tower was extremely famous, and they would definitely not do anything that would damage their reputation. These items must be very precious, so they used images instead to avoid unnecessary losses.

After the customer had purchased the item, they would definitely hand over the real item.

There were too many items on display here, and Tang Zhen decided to check them out later. He ignored situ Yuanzhi and the others and directly walked towards the boss of the alien race who was sitting in the shop.

Chapter 595 The strange black crystal sand \_The owner of this shop was a resident of the myriad Treasure Tower, and his appearance was very unique.

His head was big and round, and there was a white jade-like horn on top of his head. His skin was white and clear, and he had a big head and big ears. His eyes were round and full of spirit.

Like humans, the shop owner had two arms, but they were extremely long. Each hand had seven long and narrow fingers with all kinds of rings.

On his neck, there were four or five different brands made of different materials. Their styles were completely unrelated, and they were obviously from different worlds.

Unless there was a special need, the natives of the world of towers didn't like to wear accessories. However, this resident of the million treasures tower was covered in accessories, and the aura of a local tyrant was coming from him!

Tang Zhen glanced at his finger. He discovered that one of the Rings was faintly emitting spatial energy.

As for the other ring brands, they were not ordinary decorations either. They obviously had special functions.

After seeing the arrival of Tang Zhen's group of five, the owner of the shop grinned. However, his large face was really strange. When he laughed, it was extremely comical.

welcome, distinguished guests. Just tell me what you want. I guarantee that it's cheap and of good quality!

As this shop owner spoke, his body also walked out from behind the counter. Tang Zhen discovered that this fellow's body was round. Coupled with that large round face, he was simply like a gourd!

What surprised Tang Zhen was that the shop owner was actually sitting on a Spider-like metal chair. A few long metal legs were moving alternately, appearing extremely flexible.

"I'm planning to buy some void iron. Do you have it here?"

Tang Zhen glanced at the shop owner's legs that had been cut off and asked in a seemingly random manner.

When the smiling shop owner heard about the void iron, his smile froze slightly. There was an inquisitive look in his eyes as he looked at Tang Zhen.

Tang Zhen involuntarily revealed a faint smile on his face when he saw this. The owner of this shop had revealed such an expression. Clearly, he knew about the void iron.

"Pardon me for asking, but what do you need the void iron for?"

The shop owner looked at Tang Zhen and asked with a smile on his face.

Oh, could it be that there's such a rule in the trade caravans of the myriad Treasure Tower that you have to tell me the use before you can buy it? "

Tang Zhen swept his eyes over the shop owner as a trace of doubt appeared on his face.

“Sir, you’ve misunderstood. I’m just curious. After all, there are too few cultivators who know about void iron, and very few people buy it!”

Tang Zhen nodded his head, indicating that he understood. He continued, “I’m just curious about this thing, so I’m going to buy some to study. Do you have it?” he asked.

The smile on the shop owner’s face did not change when he heard Tang Zhen’s perfunctory reply. He did not seem to be dissatisfied.

“We do have void iron. If we sell it, we’ll sell it for 50 low-grade origin stones per 50 grams. How much do you want?”

Tang Zhen’s heart involuntarily twitched when he heard the shop owner’s price. He did not expect that the void iron would actually be so expensive!

According to the calculation that one low grade origin stone could be exchanged for one million brain beads, fifty low grade origin stones would be worth a total of fifty million. Even with Tang Zhen’s current wealth, he would feel the pain of taking them out.

From this, it could be seen how rich the myriad Treasure Tower was. The extent of its wealth was already unimaginable!

However, this one tael of void iron could be used to make several storage rings. If he were to sell it, he would definitely be able to make a profit of more than ten times.

Tang Zhen only felt a little more balanced when he thought of this.

then I’ll have two units of body of the void. However, I don’t have an origin stone. Can I use items to exchange for it? ”

When the shop owner heard this, he nodded his head slightly. Compared to paying the brain Pearl and origin stone, they preferred bartering.

This way, not only could it increase profits, but it could also make the goods in the myriad Treasure Tower more abundant.

After Tang Zhen saw that the boss had agreed, he took out two items and placed them on the table in front of the boss.

The first item was the fragment of the crystal Space wall that had fallen to the ground when the magic eye Tyrannosaurus had crashed into the sky.

The demon-eye Tyrannosaurus was definitely not an ordinary King-tier monster. It might have even mastered the power of laws. It was precisely because of this that it could rely on special means to turn space into a physical entity and easily open up a spatial tunnel.

Tang Zhen estimated that this should be a good thing, but he didn’t know how much it was worth.

As for the second item, it was the black crystal sand he had collected from the ruins of the Super warship. Back then, he had only used half of it to exchange for hundreds of thousands of recruitment contracts from the ghost bank.

Therefore, this black crystal sand must have a special value that he didn't know about. Unfortunately, the female manager of the ghost bank didn't explain its origin.

After the shop owner saw the two items that Tang Zhen took out, he first observed them with rapt attention for a while. Only then did he order someone to call an appraiser in with a solemn expression.

The person who had just arrived was the old man who had spoken to Tang Zhen. After he entered the shop, he glanced at the two items on the table and softly let out an "Yi."

Situ Yuanzhi and the other three also came over and whispered to each other from time to time.

Even with their knowledge and experience, they were unable to recognize the origins of these two items. They were clearly extraordinary.

The appraiser first picked up a black crystal sand and carefully looked at it. After smelling it, he said to Tang Zhen, "I seem to know the origin of this thing, but I still need to do some experiments. I wonder if you are willing to consume one?"

When Situ Yuanzhi and the others heard this, they were curious and immediately confirmed that the black crystal sand was definitely not an ordinary item. Otherwise, the appraiser would not have been able to tell that from the smell.

When he looked at Tang Zhen, he saw him nodding his head slightly, indicating for the appraiser to continue.

Seeing this, the appraiser immediately grabbed the satchel on his back and took out some powder from it.

Seeing that everyone was looking at him, the appraiser explained, "This is a type of bone powder obtained from underground monsters. After it is ignited, a green flame will appear. We call it Yin Fire!

This kind of flame doesn't seem to be able to burn anything, but once it touches a spirit-type item, it will quickly ignite it. This is also the basis for us to appraise certain items."

After saying that, the appraiser twirled his fingers and the pile of powder immediately burned, releasing a faint green flame.

At the same time, the appraiser used his spiritual power to control the black crystal sand, making it float closer to the green Yin Fire.

The moment the two came into contact, the black crystal sand suddenly burst into flames, and a thick gray smoke spread out.

No one could have imagined that a grain-sized crystal sand could release a pillar of smoke as thick as a water tank!

The thick smoke looked shocking, but if one looked carefully, they would find that the smoke did not exist in reality. It was like an image, visible but not tangible!

However, when he reached out to grab it, even though he clearly didn't grab anything, the smoke would also disappear.

However, when one's spiritual power came into contact with the smoke, one would feel a trace of warmth, as if one's soul was immersed in warm water. It was so comfortable that one would want to moan.

However, when his mental energy came into contact with the smoke for more than ten seconds, Tang Zhen discovered that his body temperature had started to drop. It was as if all the blood and Qi in his body were about to be absorbed by his soul.

After discovering this situation, Tang Zhen immediately withdrew his spiritual force. A trace of bewilderment faintly appeared in his eyes.

Chapter 596 Soul-gnawing beast and out of body sand

This black crystal sand was really strange. To ordinary cultivators, it was definitely a harmful substance. However, to spirit bodies, it was extremely precious.

In such a smoky environment, the growth speed of a spirit body would definitely be greatly increased. It could be called a peerless medicine!

It was no wonder that the ghost bank, which had always been haggling over every single detail, would agree to exchange hundreds of thousands of valuable contracts for such crystal sand. It was obvious that this thing was very useful to them.

This was because the beautiful employees of the ghost bank were all similar to spirits!

After the appraiser saw the smoke, he observed it carefully for a while before putting it out.

He then waved his hand at the floating gray mist, and a burning flame whizzed out, attacking the gray mist floating in the air.

This was obviously a fire-controlling skill. Under the skilled control of the appraiser, the gray smoke was completely dispersed in the blink of an eye.

After doing all this, the appraiser turned around and said to Tang Zhen, "According to this old man's judgement, this crystal sand should be called aperture sand, condensed from the sweat of a strange beast called soul-gnawing beast.

Once the meteorite sand was burned, it would not dissipate. Only by using raging flames could it be removed!

If an ordinary person breathed in one or two mouthfuls of this gray mist, they would immediately pass out. Then, their flesh and blood would wither and turn into nutrients to nourish the soul, causing the soul to continue to grow.

However, the smoke would only last for a day. After that, it would be turned into nutrients for the spirit body and would no longer have the effect of forcing the soul to leave the body.

When the body of the person who inhaled the gray fog completely withered, the soul in the body would leave the body. Because of the out-of-body sand and the nourishment of the body's qi and blood, these special spirits had completely condensed and would not slowly dissipate with the passage of time.

This kind of soul-gnawing beast fed on spirits and usually lived in places with dense spirits. The higher the level of the soul-gnawing beast, the better the effect of the out of body sand!

The out of body sand that you've taken out should be condensed from a King-tier soul-eating beast, and it's not an ordinary King-tier!

This kind of soul-gnawing beast was a very vicious beast. Wherever it appeared, it would quickly become a land of death.

This place is filled with all kinds of spirits. They will gradually grow in the gray fog and eventually become food for the soul-gnawing beasts!"

Tang Zhen immediately came to a realization when he heard this. He recalled the gray fog near the warship wreckage and the endless number of spirit monsters. It was clearly in line with the situation that the appraiser had described.

The only difference was that the soul-gnawing beast wasn't at the king rank. Otherwise, it wouldn't have fled in defeat in front of Tang Zhen.

There had to be some secret behind this. Otherwise, how could a soul-gnawing beast that wasn't even King-tier condense such a high-level out of body sand?

Of course, what he was most concerned about was the value of the out of body sand.

The appraiser lowered his head and pondered for a moment before he slowly said, " "This kind of out of body sand is very rare, and there are very few people who need it. Therefore, the price for 500 grams is 100 low-grade origin stones!"

Tang Zhen's brows slightly furrowed after hearing the price given by the appraiser.

Although the other party's offer wasn't low, he still felt that it wasn't worth it.

Back then, he had tried to use the brains to buy the recruitment contract from the ghost bank, and the other party had offered 10000 brains for one piece, so 500000 pieces would be 5 billion brain pearls!

In the end, when he handed over half of the sand to the female manager of the ghost bank for her to help him identify it, the other party took the initiative to find him not long after and expressed that she was willing to use 500000 contracts to exchange for the sand in Tang Zhen's hands!

Tang Zhen was curious and asked about the origin of this out of body sand. However, the female supervisor didn't tell him and only said that it was a secret of the ghost bank.

Since the other party didn't want to say, Tang Zhen didn't force him to ask. Moreover, he didn't hesitate in this matter and directly used the other half of the aperture sand to carry out the transaction.

After all, no matter how precious this kind of item was, it was far less useful to him than the contract. Tang Zhen made the choice that was most beneficial to him at that time!

As for the out of body sand that Tang Zhen had collected, the total amount was only about 50 catties. He gave half of the amount to the ghost bank's female manager, which was about 20 catties.

In other words, the exchange price that the ghost bank gave him had already reached 200 million brain beads per 500 grams!

The price given by the appraiser, after converting into brain beads, was more than double the price!

Although merchants pursued profits and were used to buying low and selling high, it was extremely normal for them to lower the purchase price. However, Tang Zhen was still unwilling to suffer such a loss.

At most, he would sell the meteorite sand to the spirit Bank. He believed that the rich and powerful spirit Bank would definitely give him a satisfactory price.

As for the void iron, Tang Zhen didn't really want it. He just wanted to see if it was for sale and how much it was worth!

After having an idea in his heart, Tang Zhen looked at the appraiser and said, "The price you're offering is too low. I want 200 low-grade origin stones!"

When the appraiser heard this, he glanced at the shop owner with an undetectable look and shook his head gently.

"Your price is too high. I can only give you 110 low-grade origin stones at most!"

Tang Zhen didn't waste any more words when he heard this. With a wave of his hand, the meteorite sand and the spatial crystal wall fragment instantly disappeared and entered his storage ring.

The reason why he haggled just now was because he didn't want to break the rules between these merchants. Since he had asked for a price, he had to haggle to show his sincerity. Otherwise, he would be treated as a joke by the other party!

He had already made up his mind to keep the out of body sand. Because of its unique effect, he felt that it would definitely be useful in the future.

After the appraiser and the shop owner by the side saw the scene of Tang Zhen collecting the items, they were all slightly stunned. There was a slight change in their eyes.

Their ten thousand treasures tower dealt with tens of thousands of resources. Naturally, they could tell that Tang Zhen had a storage equipment with a single glance. Therefore, they all glanced at the ring on his finger.

don't worry, Sir. If you're not satisfied with the price, we can continue to discuss.

When the shop owner saw Tang Zhen turning around to leave, he hurriedly spoke to retain him. His face was filled with a sincere smile.

"The price of 200 low-grade origin stones is really too high. Why don't we each take a step back? 150 low-grade origin stones. We'll take as many as we have. What do you think?"

Tang Zhen's footsteps slightly paused. He turned around and looked at the shop owner as he said with a smile, "180 pills, I'll sell you one Jin, how about it?"

The shop owner hesitated for a moment and nodded, "Deal!"

Tang Zhen smiled as he walked to the front of the shop owner. He took out a portion of the out of body sand and handed it to him. The other party then handed him a bag of low grade origin stones.

After counting the number and confirming that there were no problems, Tang Zhen turned around and left.

“Sir, don’t you want the void iron anymore?”

The shop owner hurriedly asked when he saw that Tang Zhen was about to leave. His eyes carried a trace of anxiety.

“The price of your void iron is too high. I can’t afford it. I’m sorry!”

After saying these words, Tang Zhen made a gesture of wanting to leave. However, he knew in his heart that the shop owner would definitely try to keep him.

As expected, Tang Zhen had not taken three steps when the shop owner suddenly said, “Mr. Tang, are you buying this void iron to make a storage equipment?”

As soon as he said that, everyone in the shop was stunned, especially situ Yuanzhi and the others. They recalled the storage rings that Tang Zhen had taken out and confirmed in their hearts that Tang Zhen could make storage equipment.

Tang Zhen had a smile that was not a smile as he swept his eyes over the shop owner. He did not say anything and merely quietly looked at him.

Seeing this, the shop owner immediately said, “If Mr. Tang can really make storage rings, I’m willing to provide you with the void iron for free and buy it back at a high price. What do you think, Mr. Tang?”

Just as everyone was looking at Tang Zhen and waiting for his answer, they saw him casually throw a storage card into the hands of the appraiser.

“Take a look at this storage card first, then we’ll talk about the price!”

Chapter 597 Wholesale of storage cards \_As Tang Zhen took out the storage card, everyone’s gazes immediately followed and looked over.

Red Shield and the other two had a puzzled look on their faces. They didn’t understand why Tang Zhen would take out this card. However, after they carefully observed it, their eyes revealed a trace of shock and realization.

However, there were clearly some indescribable emotions in his eyes when he looked at Tang Zhen again.

Situ Yuanzhi glanced at the card, and a look of understanding flashed in his eyes. He had the same storage card in his hands, but he would never use it easily.

When the shop owner saw the storage card, his eyes seemed to flash, and the smile on his face became even brighter.

Under everyone's gaze, the appraiser raised the storage card in his hand. He was slightly stunned at first, and then his face turned serious. He quickly walked to a bright place and put it in his hand to look at it carefully.

After a while, the appraiser raised his head, his face full of admiration.

"I can't recognize the material of this card, but it seems to have the power of space. The craftsmanship is very strange and delicate, and it should be a special storage equipment.

It's just that this card seems to require a special method to activate. If I'm not wrong, I'm afraid that this card also has a limit to the number of times it can be used!"

The appraiser was very experienced, and at this time, he had also seen the beauty of the storage card, and his tone naturally revealed a trace of admiration.

After saying these words, the appraiser and the others looked at Tang Zhen at the same time, waiting for his answer.

that's right. This is indeed a kind of storage card. There are big and small spaces, but the flaw is that it can only be used once.

Tang Zhen swept his eyes over the shop owner beside him. He explained in a faint voice when he saw the interested expression in his eyes.

although it can only be used once, it's still a storage equipment. It's definitely a good product!

The shop owner at the side continued the conversation and smiled at Tang Zhen, "I don't know how many of these cards you have, Mr. Tang. It would be better to sell them all to us, and we guarantee that the price will satisfy you!"

Tang Zhen was waiting for the shop owner to say this. Therefore, he immediately reported a series of numbers that corresponded to the storage cards of different volumes.

However, compared to the starting price of the Holy Dragon City Auction house, Tang Zhen's price had clearly increased by more than a few times. The price of the storage card with the largest storage capacity had directly increased by more than ten times!

Even so, Tang Zhen was not worried that he would not be able to sell it.

As the saying goes, the rarer something is, the more expensive it is. Good things naturally have to be sold for a good price. If it was too cheap, the caravans of the city of ten thousand treasures might not even take a fancy to it!

Situ Yuanzhi remained silent at the side. After all, no matter what price Tang Zhen was selling for, it had nothing to do with him.

However, the eyes of Red Shield and the other two beside him lit up. They began to secretly calculate in their hearts how they should ask Tang Zhen to buy a few more storage cards as a backup.

After the shop owner heard the price that Tang Zhen reported, he didn't hesitate at all and directly agreed to the deal!

What Tang Zhen wanted was the brain. To the caravans of the ten thousand treasures building, this was something that was only carried for the convenience of transactions. Moreover, if this storage card was properly managed, it would definitely bring a considerable return to the shop owner.

It was also because of this reason that he was able to quickly complete the transaction. He was afraid that Tang Zhen would leave with a flick of his sleeves if he haggled again.

After handing over a large pile of storage cards to the shop owner and taking back a large number of brain beads from his hands, Tang Zhen was finally satisfied and prepared to leave the shop.

Although Tang Zhen didn't have any restrictions when he bought storage cards from the application store, he always controlled the number of cards that were sold out. After all, the rarer something was, the more valuable it would be. Once it was overused, it would be worthless.

He had sold the cards to the ten thousand treasures store's caravan because their business scope was too wide. Even if he sold the cards, it would not affect the Holy Dragon city's business.

Moreover, with this deal, not only would the Holy Dragon City get a big customer, but they could also use the caravans of the ten thousand treasures building to promote the Holy Dragon city's reputation.

After all, these cards had the Holy Dragon city's coat of arms on them. Those who wanted to know the Holy Dragon city's location would only need to inquire carefully.

Seeing that Tang Zhen was about to leave, the shop owner clearly did not want to give up. He still wanted to obtain information about the storage equipment from Tang Zhen.

In the end, he was told by Tang Zhen that if he was really interested in working together, he could go to the Holy Dragon City in the Wildlands to find him.

Although the shop owner had travelled from north to south and boasted that he had been to countless places, he did not know where the Wildlands was. Only after he asked for the specific location did he look at Tang Zhen with a strange expression.

He didn't expect that this Mr. Tang in front of him would actually build a city Tower in the desolate Wildlands, and it seemed that he intended to make a trip there personally.

It was just that the profit in that kind of place was really too little. On normal days, even if a trade caravan from the myriad Treasure Tower was invited to go there, the shop owner would also scoff. Because if one specially went there once, they were afraid that they would not even be able to earn back the travel expenses.

However, the storage equipment was extremely attractive to him, which made him very hesitant.

It was also at this moment that Tang Zhen whispered something into the ear of the shop owner. The other party's eyes suddenly widened as he asked Tang Zhen with a trembling voice, "Is Mr. Tang's words true?"

"Of course it's true. As for whether you want to go or not, it's up to you!"

Tang Zhen replied in a light tone, then turned around and left.

At this moment, the shop owner's voice suddenly sounded, " a year later, my ten thousand treasures tower's caravan will definitely head to Holy Dragon City. I hope that Lord city Lord will not close the door and refuse to see us!

"I'm in Holy Dragon City, and I'll be waiting for your arrival at any time!"

As soon as his voice fell, Tang Zhen had already walked out of the shop, leaving the shop owner alone in deep thought. When his gaze fell on his incomplete lower body, a trace of haze flashed across his eyes and he could not help but sigh.

However, when he recalled Tang Zhen's earlier words, a glimmer of hope flashed across his eyes!

In the following time, Tang Zhen's group of five strolled around the shops one by one. While their horizons were broadened, they also bought the items they liked.

The caravans of the ten thousand treasures tower indeed lived up to their reputation. The goods they sold were either rare items from the world of the tower or special spoils of war from another world. Each of them was extraordinary.

Tang Zhen bought a few items and prepared to take them back to study them in detail. He wanted to see if he could obtain anything useful from them.

However, during the process of purchasing, Tang Zhen also discovered a situation. The vast majority of these products from the other world did not have the shadow of technology.

In other words, most of the foreign worlds that were invaded by countries used cold weapons and close combat. He did not know why.

After visiting all the shops, the five of them rode on the flying carpet and continued in the direction of the giant tower.

Compared to the silence when they first met, the red Shield and the other two were clearly much more enthusiastic this time around. They would occasionally chat with Tang Zhen about all kinds of things they had seen and heard, thereby increasing the favorable impression between them.

Even the taciturn "Hui" would occasionally let out a hoarse voice to chat with Tang Zhen.

In a short period of time, Tang Zhen's performance had already made them feel shocked and jealous. However, at the same time, the three of them also realized that becoming friends with Tang Zhen would definitely bring them unexpected gains.

He was powerful and had a shocking background. If he didn't take the opportunity to befriend such a person, then he must have a problem with his head.

Tang Zhen secretly felt that the actions of these people were funny in his heart. However, he appeared to be very easy-going on the surface.

They were on good terms with Tang Zhen because of benefits. In turn, Tang Zhen could also use benefits to rope them in and make them help him.

There were no eternal enemies or friends in this world, only eternal interests. It was the same in the original world and the world of towers!

After all, King level cultivators were not cabbages. In the world of loucheng, they were all big shots. If used well, they would be a great help.

For example, this time, Tang Zhen had used the storage ring as bait. He had used them to capture the king-tier monsters in the giant Tower City to help him complete his level up.

On the other hand, situ Yuanzhi and the others were not unwilling. Instead, they were all eager to try and did not have any thoughts of being tricked.

Because in the eyes of both parties, they had obtained the benefits they wanted!

#### Chapter 598 The Giants "siege (1)

The flying magic carpet was very fast, and it continued to fly over the endless plains. But even so, there was still no sign of the giant tower.

However, the five of them were not in a hurry. After all, the giant tower was so huge that its speed was naturally extremely amazing. They had been delayed for a long time in the encampment of the thousand treasures tower's caravan, so the giant tower must have already traveled a long distance.

After flying for a while, just as the sun was about to set, everyone finally saw the giant city Tower at the end of their sight.

However, at this time, the giant was attacking a tower. Countless shouts and shouts could be heard faintly. From time to time, the light of divine arts could be seen in the sky, which constantly fell on the giant tower.

As for the arrows and javelins from the heavy defense weapons, they were frighteningly dense, like dark clouds, constantly attacking the giant.

When Tang Zhen and the rest saw this, they immediately controlled the flying carpet to float in the air and observe from a distance.

The city looked like a stone Forest. Countless stone pillars rose into the sky, and there was a giant building on each pillar.

Between the buildings on the stone pillars, there were many iron chain bridges that were connected to each other, floating hundreds of meters above the ground!

At this moment, giant's face was filled with malevolence, and his eyes were filled with a cold light. From time to time, there would be a flash of hatred.

It waved the weapon in its hand and continuously attacked the tower. Almost every attack carried a power that could destroy the world, and even the earth seemed to be shaking!

There was clearly a protective screen of light outside the stone pillars. It was also because of this that the giant's attack had been blocked.

However, as the giant continued to attack, the protective light curtain began to flash violently. It looked like it was on the verge of breaking!

At the same time, countless cultivators of the giant loucheng were fighting back with all their might in the light curtain. All kinds of attacks were landing on the giant loucheng. They had already used their strongest means!

Unfortunately, the giant tower was a national-level tower, after all. Putting aside the suppression of levels, its abnormal defense alone was not something that these cultivators could easily break through.

And this giant with the city on his back was an even more insane combat weapon!

It could be said that the attacks of these cultivators were just their final struggles, trying to find a chance of survival in the desperate situation of certain death.

In addition to the cultivators hiding in the protective light curtain, there was also a group of cultivators attacking the giant outside, as if they were trying to lure it to another place.

These people were all true men of sacrifice. Even in a situation where they knew they were going to die, they still launched a desperate attack without any hesitation.

They had already cast aside the fear of death in their hearts, but they hoped to sacrifice themselves in exchange for the safety of their families.

Unfortunately, the giant only had Lou Cheng in its eyes and didn't care about the ant-like cultivators of Lou Cheng. Only when it was annoyed would it spare an arm and wave the long whip to kill those who harassed it!

It didn't take long for the cultivators of loucheng who tried to lure the giant to die in battle. The ground was covered with broken corpses.

On a huge building in the middle of these stone pillars, a man in demonic armor waved his hand at the people around him with an ashen face.

bring the residents and get ready. Once the protective light screen shatters, we'll leave this place immediately!

After saying this, the man's spirit seemed to be exhausted in an instant, and his whole body began to hunch.

The foundation left behind by his ancestors was destroyed in a day in his hands. This made him feel a kind of pain that made him wish he was dead.

It was a pity that he couldn't find a target to vent his anger on, because the three-headed and six-armed giant attacking Lou Cheng was definitely a disaster from the heavens!

As soon as he said that, the cultivators of Lou Cheng beside him spread out with grief and indignation on their faces. They quickly descended to the ground with the rope and entered the crowd.

When the attacking cultivators of loucheng saw this, they all roared and began to attack with all their might, their eyes as red as blood!

When the city Lord of the tower City was attacked, he had already guessed that this would be the result. Therefore, he had gathered all the residents on the ground in advance to prevent them from dying pointlessly when the city was broken.

It was also at this moment that countless cracks finally appeared on the protective light curtain that had been struggling to hold on under the giant's attack. It could shatter at any moment.

On the flying magic carpet in the distance, Tang Zhen's group of five were silent as they watched the scene in front of them.

In fact, from the point of view of Tang Zhen and the others, it was only a matter of time before this city was destroyed!

If it wasn't for the fact that the tower was of a higher grade and had a protective light screen, it would have been destroyed by the giant long ago. The residents would have no chance of escaping and would have to be destroyed along with the tower!

In fact, at this time, the best choice was to abandon the city and escape. After going far away, he would wait for the opportunity to make a comeback.

However, the competition in the world of loucheng was very cruel. Those former enemies would never give their opponents a chance to become stronger again. When they encountered such a situation, it was already very benevolent of their enemies not to hit them when they were down and kill them all!

Although in most cases, it was difficult for the rebuilt city to recover its former glory, there was still a glimmer of hope, after all, and no one was willing to give up so easily!

Although Tang Zhen and the others had expected the final outcome, they chose to watch from the side with cold eyes.

First, the other party had no relationship with the five of them, so there was no need to make a move.

Second, even with their King level strength, if they were not careful, they would not be able to escape death!

This giant represented the strength of a national-level city. Coupled with its terrifying body of three heads and six arms, it was impossible to estimate its specific combat power!

While the five of them were watching the battle, situ Yuanzhi and the others did not notice that there was a glint in Tang Zhen's eyes.

Ever since he had witnessed the terrifying combat power of the giant city, Tang Zhen had an idea in his mind. He wanted to obtain the cornerstone of this national-level city and cultivate a super war machine for the Holy Dragon City!

If the Holy Dragon City also had such a terrifying giant, it would become one of the most powerful forces whether it was to conquer other towers or to descend into another world.

Its terrifying combat strength and the advantage of being able to move at will proved that this was a top-grade city!

However, everyone knew that the giant tower had outstanding combat strength. There were many people who wanted to obtain the foundation stone of the tower. It would not be as easy as they had imagined if Tang Zhen wanted to get it!

In fact, Tang Zhen already had a plan in his heart. However, now was not the time to execute it. He was waiting for himself to advance to a two-star King tier. Only then would it be the best time to make a move!

It was also at this moment that a loud noise was heard. The protective light curtain of the tower was shattered by the giant's Mace. It flickered twice and then completely disappeared!

A wave of wailing came from the residents of the city. They were led by the cultivators of the city and ran into the distance like crazy.

At this critical moment of life and death, the only thought in their minds was to run faster, and faster. Only then would they have a chance of survival!

During this period, there were people who constantly slipped and fell to the ground. Before they could get up, they were trampled by countless feet, and they would occasionally let out painful screams.

Wherever the residents of Loucheng ran to, there were unrecognizable corpses left behind. Most of them were bleeding from their seven orifices, and some even had their internal organs squeezed out.

Even so, no one dared to stop, because once they stopped, it would mean that they had chosen death, and there was no possibility of escape!

Wails, screams, and curses were all mixed together, echoing in the sky.

As the residents of the City Tower fled for their lives, the cultivators who stayed behind to stall the giant and buy time for the residents of the City Tower burst out with the last trace of light in their lives and rushed toward the ferocious giant.

They jumped onto the giant's body and continued to climb up, trying to get close to his head and give him a fatal blow.

A series of loud explosions rang out as the cultivators of the building detonated something on their bodies. While their bodies were crushed, they also successfully pinned down the attacking giant.

A cloud of black smoke exploded and wrapped around the giant, blocking his vision completely!

The giant roared and waved his six arms at the same time. His whole body started to spin like a windmill and he rushed into the stone pillars.

With a rumbling sound, the massive stone pillars were all broken, and the buildings above them collapsed, sending dust and dirt into the air.

This city that had been built for who knew how many years and had raised who knew how many people in it was completely destroyed at this moment!

Chapter 599-the city is destroyed and the people are dead

As the billowing smoke and dust soared into the sky, the City Tower had been completely reduced to ruins.

Tang Zhen and the others inhaled a breath of cold air after personally witnessing the destructive power of this giant. Their faces were filled with shock.

They all knew that this giant was extremely powerful. When they were in the valley, it killed advanced cultivators as if it was cutting grass. It was extremely terrifying!

However, when they saw the giant attacking the city, they knew that they had underestimated the giant's combat power!

After the tower was upgraded to a national level, there would still be a gradual process of upgrading. The giant tower in front of him was definitely a high-level existence even in a national level tower!

Of course, it was also possible that it was a special building that was better at attacking, which was why it had such an abnormal combat power.

In this regard, those buildings that were promoted to the national level in the form of buildings simply couldn't be compared with it!

Although this foreign-Race City couldn't be compared to the top-tier cities, its combat power was still strong. At least ten thousand cultivators had participated in the defense against the giant's attack.

Tang Zhen saw at least a few hundred Lord-tier cultivators!

Even so, the cultivators in the buildings were still powerless in the face of this terrifying giant. Even when they unleashed their strongest attacks, they still could not stop the giant's destruction.

Of course, one of the reasons for their defeat was the lack of powerful long-range weapons, which allowed the giant to attack at close range and easily break the defensive light curtain of the building.

In terms of close combat, Tang Zhen had yet to see an existence more terrifying than this giant!

If the current Holy Dragon City encountered such a situation, they would definitely use artillery, missiles, or fighter jets to attack before the giant tower could get close.

No matter how strong the giant was, it would not be able to last long under such an attack. It was only a matter of time before it fled!

As for killing this giant, Tang Zhen did not have the confidence. This was because the defense of this giant's body was too strong.

No matter how powerful the weapons in the original world were, their lethality would be greatly reduced when faced with an energy shield like the defensive light curtain.

Of course, if it was a nuclear-level weapon, it would be a different story. Even if the giant was not killed directly, he would be seriously injured and dying!

No matter what, the giant's combat power was undeniable. No matter which city it targeted, it was destined to be in big trouble.

Tang Zhen's eyes were still staring intently at the three-headed six-armed giant while these thoughts flashed in his heart. However, he discovered that it was currently standing in the ruins of the city and had casually picked up a broken stone pillar.

"This is Yingluo's fault!"

Tang Zhen's eyes narrowed as he felt a sense of danger. Without any hesitation, he controlled the flying carpet and fled into the distance.

The expressions of situ Yuanzhi and the other three changed drastically as well. They tried their best to stabilize their bodies while flying and turned to stare at the giant who was lifting the stone pillar.

One of its huge heads was facing the direction of Tang Zhen's group. Its eyes were staring at Tang Zhen's group with hatred.

"Whoosh!"

The sound of something breaking through the air was transmitted over. The giant sinisterly laughed as he threw the stone pillar in his hand, smashing it directly towards Tang Zhen and the others.

"Sit tight, don't fall down!"

Seeing the stone pillar rapidly flying over, Tang Zhen controlled the flying carpet he was sitting on and suddenly lifted it up. At this moment, the stone pillar streaked past the place where they had stopped and continued to fly into the distance.

When situ Yuanzhi and the other three saw this, cold sweat broke out on their foreheads, and they had lingering fear on their faces.

Even though they were all King level cultivators, they couldn't guarantee that they could survive the impact of the stone pillar. After all, the giant's strength was extremely terrifying. The stone pillar that it threw out was like a small mountain, so one could only imagine its power!

Tang Zhen steadied the flying magic carpet and glanced in the direction of the giant. However, he discovered that the giant's six arms were simultaneously swinging in a criss-cross manner. The giant was continuously throwing rocks, and its targets were the loucheng residents who were fleeing in all directions.

As for Tang Zhen's group, they were like insignificant insects in the eyes of the giant. After chasing them away, it no longer paid any attention to them.

The sound of breaking the air rang out continuously, and the sky was filled with huge rocks thrown out by the Giants, which blotted out the sky and covered the earth as they smashed towards the desperate residents of the city.

The smallest of these rocks was the size of a truck. Every time they were thrown by the giant, they would fly past like meteorites, and no living creature nearby would survive!

Looking down from the sky, many large pits had suddenly appeared on the plain, and the soil was mixed with countless pieces of flesh and internal organs!

The fleeing residents of the building wailed in pain. The Black Mass of people on the ground had been reduced to a mess, like a piece of paper full of holes gnawed by rats.

At least half of the residents in Lou city were smashed into meat paste by the rocks thrown by the giant. Tens of thousands of vengeful souls lost their lives in the process of running.

In this kind of random Boulder attack, whoever could survive in the end depended more on luck!

The remaining residents of Lou city who were lucky enough to survive were running around like headless flies. They had a mental breakdown and were in complete chaos!

The city Lord of this city was not very lucky. He had also lost his life in the attack just now. He was hit by a piece of the city's wreckage that the giant had casually thrown out, and he and his own people were completely turned into a pool of meat paste!

After continuously throwing rocks for a while, the giant seemed to feel a little tired. After slowly stopping its attack, it actually sat down in the ruins.

When the fleeing residents of Lou city saw this, they immediately shouted a few times in excitement and pulled their exhausted companions with all their might to continue running.

When they passed by the big pits created by the boulders and saw the flesh and blood mixed with the dust, their eyes flashed with deep sadness, but it was quickly replaced by determination.

Although the city was destroyed, the residents of the city were not all dead. What they had to do now was to try their best to survive and wait for the day when the city was rebuilt.

Just as the less than 10% of the city's residents successfully escaped, the giant also seemed to change.

It turned out that Tang Zhen had suddenly discovered a trace of abnormality when the giant had stopped attacking. The originally cold and stern eyes of the giant had suddenly become dazed. His eyelids had also begun to drooped slightly.

However, in the blink of an eye, the confusion disappeared and he returned to his original cold and cruel look. His drooping eyelids began to lift up.

However, this situation only lasted for a few minutes. The giant's eyes returned to their dazed state, and at the same time, a trace of fatigue appeared.

Under Tang Zhen's observation, the giant's eyes changed several times before they finally became completely empty. His eyelids continued to droop.

haha, I didn't expect that the giant would fall into a deep sleep after a great battle. It seems like we don't have to wait for too long!

The red Shield said with a smile. At the same time, she stared at the upper area of the giant tower with a hint of passion in her eyes.

It wouldn't take long for him to enter. In the residential area of those towers, he would definitely obtain countless precious materials!

If he was lucky, he could find some precious items that could improve his cultivation and combat power. This trip would not be in vain!

Situ Yuanzhi and the others had their own thoughts as they waited for the giant to fall into a deep sleep.

Tang Zhen saw that it was still early and simply landed the flying carpet on a high hill. He took out a book and continued to read.

During this time, cultivators came from all directions one after another. Some of them were survivors from the valley, some of them had just heard the news, and even many Wanderers had come.

When they saw the ruins of the giant's Tower, they couldn't help but sigh!

As time passed, more than 10000 cultivators gathered around the giant at noon the next day!

The giant sitting in the ruins finally closed his eyes!

Chapter 600 Exploring the upper area (1)

While the giant was sleeping, the cultivators who had been waiting for a long time rushed toward the giant's building like lightning.

As far as the eye could see, be it in the sky or on the ground, there were figures constantly sprinting and jumping everywhere, as if countless ants were swarming towards a huge cake.

Because the giant was sitting in the ruins this time, the cultivators didn't have to struggle to climb up. They only needed to use the ruins to easily approach the lower layer of the armor.

As a result, many low-level cultivators who had not reached the Lord level had the opportunity to explore the interior of the tower.

For a moment, the ruins were filled with flashing figures. They were madly attacking the protective light curtain outside the tower, their eyes filled with greed and vigilance.

Many high-level Lord-level cultivators chose the streets that were slightly higher in the lower-level areas. They divided the work among themselves and worked together. Compared to the chaotic cultivators, they were several times more efficient.

Tang Zhen and the others didn't hesitate. The flying carpet they were sitting on rose into the sky, heading straight for the upper layer of the giant tower.

All five of them were King level cultivators, and their current target was the residential area of the tower city's dignitaries, so they immediately attracted the attention of countless onlookers.

These people were discussing animatedly. They were all guessing that Tang Zhen and the others would be able to enter. Even the few King level cultivators who had just appeared would look at them from time to time.

At this moment, Tang Zhen and the rest had already arrived at the bottommost level of the upper area. When the flying carpet stopped in the air, situ Yuanzhi and the other three looked at Tang Zhen at the same time.

Tang Zhen's expression remained the same. After sweeping his gaze over the defensive light curtain, both of his hands were like lightning as he used his energy to draw a series of symbols.

The last time he had entered the central region, he had already secretly observed the defensive light curtain of the upper region, which was why he had said that breaking the light curtain was as easy as turning his hand!

For one, he wanted to attract the attention of Red Shield and the others, and for two, he was confident that he could do it!

At this moment, the movements of Tang Zhen's hands were as smooth as floating clouds and flowing water. There was no obstruction at all as a special rune was gently drawn. After which, it was smashed onto the protective light curtain.

At the same time, the defensive light curtain outside the tower suddenly appeared. Then, with a shake, it quickly melted to form a hole for people to enter and exit!

city Lord Tang, what a brilliant move. I'm convinced!

Red Shield and the rest immediately laughed out loud when they saw this. They cupped their hands toward Tang Zhen and quickly entered the hole.

After all five of them had entered, the entrance quickly closed and blocked the king level cultivators who were rushing over.

Their expressions were dark and solemn as they stared at Tang Zhen's group. After attempting to attack for a while, they finally helplessly chose to give up. They turned their heads and ran toward the central region.

However, they had already remembered Tang Zhen, who had casually broken the defensive light curtain, in their hearts.

Inside the tower, Tang Zhen's group of five immediately spread out after entering the upper area. Each of them searched an area.

If they discovered any monsters in the meantime, they would immediately send a signal, and then everyone would attack at the same time.

With regards to Tang Zhen's storage ring, situ Yuanzhi and the others were even more concerned about it than searching for resources. They couldn't wait for more monsters to appear!

In that case, they would be able to buy all the storage rings in Tang Zhen's hands.

They would never forgive themselves if they missed out on such a precious item.

Compared to the middle and lower levels, the decorations on the upper level were much more luxurious. The items sold in the shops and the treasures in the residents' homes were not on the same level as the residential area below!

Tang Zhen's eyes lit up. He quickly cleared the items in a shop. Just as he was about to head to the next shop, he suddenly received a message from the red Shield.

Unless they encountered a King-tier monster and subdued it, Red Shield and the others would not send such a signal!

Tang Zhen's heart was slightly happy. He immediately locked onto the position of the red Shield and rushed over at lightning speed.

About ten seconds later, Tang Zhen saw red Shield and Lu ha. At this time, their clothes and armor were a little messy, and there was a trace of killing intent in their eyes.

On the ground beside them, a monster with two heads and four arms had been cut into a human stick and was struggling on the ground.

After seeing Zhen Tang appear, Red Shield pointed at the monster on the ground and said, Mayor Tang, this monster is really hard to capture alive, so I cut off all its arms and legs. This won't delay your research, will it? "

These guys knew how to play tricks. They knew that it was not easy to catch a complete monster, so they simply made it look like this during the fight, which made it easier to capture.

Tang Zhen had previously stated that he wanted the monster alive. Therefore, even though the monster's appearance was extremely miserable, it did not die. Red Shield and the others did not break their promise.

Tang Zhen did not wish to waste his breath on this matter as it was related to his advancement. He gently nodded his head and acknowledged this method of capturing.

"Not bad, this is one!

After we leave, I'll sell you a storage ring, but it's not cheap, so you'd better bring enough brain beads!"

As soon as Tang Zhen said this, Red Shield and luha's faces lit up. After promising that they would not be short of money, they immediately separated and continued to search for resources.

Tang Zhen took a few steps forward after sweeping his gaze at the ferocious-looking monster. He directly extended his hand and pressed it on the monster's head.

What he said before was not entirely a lie to Red Shield and the others. Other than killing these monsters to level up, he did have a special way to find out some information from the monster's memory.

The moment Tang Zhen's palm pressed on the monster's head, the monster that had a pained expression immediately turned malevolent. It continuously growled at Tang Zhen while the killing intent in its eyes soared to the sky.

Tang Zhen simply ignored this fellow. He merely focused his attention on the scattered images while his expression continued to change.

A minute later, Tang Zhen let out a long breath. His face was a little pale as he slowly stood up.

Tang Zhen swept a glance at the somewhat lifeless monster. He waved his blade and chopped down. The two huge heads of the monster directly rolled down.

Sure enough, the upgrade progress bar flashed slightly, and it moved forward by one more square!

Tang Zhen's face revealed a strange expression after he tidied up the scene earlier. He turned around and continued to search.

Not long after, Tang Zhen received a signal from situ Yuanzhi. When he arrived, he saw that he and the foreign cultivator named Hui were trapping a King-tier monster that was roaring non-stop.

Compared to Red Shield and the others who had cut off the monster's limbs, the monster that situ Yuanzhi and the other two had given to Tang Zhen was really alive!

Tang Zhen did not hesitate when he saw this. He directly went up and read the other party's memory. After which, he killed the other party with a single slash!

As time continued to pass, Tang Zhen immediately sent a message to the four of them when he felt that the mental energy that was present everywhere began to show signs of abnormality. He then quickly opened the protective light curtain.

Situ Yuanzhi and the other three, who were carrying big and small bags, returned quickly and rushed out of the exit one after another.

Without any hesitation, the five of them immediately got on the flying carpet and fled into the distance!

Just as they ran more than ten kilometers away, they heard an angry roar. The giant sitting in the ruins suddenly woke up, waved the weapon in his hand, and began to kill again!

Seeing countless cultivators die in pain, the five of them looked at each other and laughed.

This time, all five of them had gained a lot, and they were completely unscathed. They were even qualified to buy two storage rings!

If this situation continued to develop, they would definitely have a full harvest when they returned. They would not have to worry about cultivation resources for decades.

And a few decades was enough for situ Yuanzhi and the others to advance from one-star King tiers to two-star King tiers!

As for Red Shield, who was already a two-star King tier, it would be up to fate if he could become a three-star King tier in these few decades.

When the giant finished venting his anger and turned to leave the ruins of the tower, the caravan of the thousand Treasure Tower came back and continued to buy all kinds of items from the cultivators.

Tang Zhen also sold the two storage rings to Red Shield and situ Yuanzhi according to the original agreement. As for Lu ha and Hui, they would get the next chance to buy them!

After selling the useless items to the trade caravans of the ten-thousand treasures tower, the five of them rode the flying carpet and once again headed towards the place where the giant tower disappeared.
