

Alternate 601

Chapter 601! taking advantage and cooperation

In the next month, Tang Zhen's group of five stayed far behind the giant tower and never approached it to avoid the giant's attack.

Every time the giant fell into a deep sleep, they would use their fastest speed to break through the light screen and then quickly enter the building to search.

After three similar operations, the cooperation of the five people became more and more tacit.

With all of them equipped with storage rings, they would complete the search in the shortest time possible, and then quickly retreat before the giant woke up.

Moreover, now that the five of them had improved their vision, they no longer wanted everything like they did at the beginning. Instead, they chose the high-value items and ignored everything else.

The benefit of this was that although the number of items that situ Yuanzhi and the others brought back decreased, they could obtain more origin stones after selling them.

Every time they counted their loot, Red Shield and the others would smile so widely that their teeth could not be seen.

Now, they all had a feeling that cooperating with Tang Zhen to explore the tower was simply a delightful thing.

In reality, they had already made up their minds. If they encountered a similar matter in the future, they would pull Tang Zhen along no matter what. Only then would they be able to guarantee a huge harvest!

After all, the four of them had worked together several times before, but none of them had been as easy as they were now, and their gains far exceeded their expectations.

He was extremely powerful, knowledgeable, and had endless means. There were not many King level cultivators like him in the world of loucheng!

If there were no accidents, this cooperation model would continue for a long time!

During this period, they also discovered the pattern of the giant's movements. Every time the giant attacked, it would fall into a deep sleep until it was awakened by the cultivators.

As it was awakened from its deep sleep time and time again, the giant became more and more violent. Once, it even chased the cultivators for more than a hundred kilometers, leaving a Path of Blood and flesh before it stopped with a roar.

At this moment, Tang Zhen was sitting on a flying magic carpet. He coldly looked at the Furious giant in front of him as he continued to plan something in his heart.

During this period of time, with the help of Red Shield and the others, he was only a hair's breadth away from becoming a two-star King tier. He only needed to kill one more monster to break through.

As he continued to gather information, he had a vague guess about the cause of the change in the giant city and formulated an action plan.

However, this plan could not be implemented with just the five of them. Therefore, Tang Zhen still needed some helpers!

If there was really no one to help, Tang Zhen could only use a nuclear bomb and detonate it inside the giant tower. He believed that the giant would be seriously injured even if he didn't die!

However, this was only when he truly had no other choice. Tang Zhen would definitely not use his final trump card so easily!

At this moment, in the sky in front of the giant, there were two streams of light constantly galloping. From time to time, they would turn around and attack the giant, causing it to roar towards the sky and even grab the soil on the ground and throw it out.

It was just that the speed of those two streams of light was extremely fast. Every time the giant's attack came, they would easily Dodge it.

Under the attraction of the two streams of light, the Furious giant was constantly running in the direction of a tower. The killing intent in his eyes was getting stronger and stronger, and his speed was also getting faster.

In fact, when the giant saw the tower, he didn't need the two streams of light to attract it. He rushed over like a madman.

It was as if the giant was born to be the mortal enemy of Lou Cheng. Once they saw it, they would be unable to control the anger in their hearts and rush forward to destroy it!

The two streams of light that had attracted the giant's attention stopped at that moment, revealing the figures wrapped in the light. They were two King-level Holy Masters in long robes!

The two King level cultivators looked like humans, but there were strange patterns on their cheeks. Their faces were extremely withered, as if they were skin and bones.

They had also discovered the characteristics of the giant's Tower and directly used this to attract it to the nearby tower. Then, they quietly waited for the giant to fall asleep after destroying the tower, and then entered the tower to explore.

By using this method, they had successfully put the giant to sleep three times!

Even though the giant had terrifying combat power, it was still being led by the nose by the king level cultivators.

As for the buildings that were used as bait and the lives of the residents, these King level cultivators didn't care at all.

Perhaps in their eyes, the residents of the buildings were nothing more than ants, and their lives had nothing to do with them. Their attitude toward the residents of the buildings was as cold and emotionless as how Giants looked at cultivators!

The strong preyed on the weak, and there was no logic to it. This was the sorrow of the weak!

Tang Zhen coldly looked at the king grade cultivators "performance. An undetectable killing intent flashed in his eyes, but it was quickly hidden.

As for why he was feeling this way, it was because he didn't like the way these people did things. The second reason was that the two King-level cultivators who had been his enemies were now in the camp of these two King-level Holy Masters.

The other party had a total of six King level cultivators, one more than Tang Zhen's group. During this period of time, the two opposing cultivators had provoked Tang Zhen many times.

As for the other four foreign cultivators, they didn't do anything out of the ordinary and just watched on coldly.

Tang Zhen sneered in response. However, the killing intent in his heart was getting stronger and stronger. He had already marked the two enemy cultivators who had intentionally killed the human Wanderers in front of him with the seal of death!

At this time, the giant had already rushed to the bottom of the tower and began to kill and destroy again. Wails of pain could be heard from time to time.

The building in front of him was only level four and did not even have a protective light curtain. As a result, when the giant's staff smashed down, a small part of the entire building collapsed.

At this rate, it would not take long for the entire city to be reduced to ruins!

It was also at this moment that the two Holy Masters were seen charging straight at Tang Zhen and the others. The strange flying monsters under their feet once again left two streams of light in the air.

Not far away, there were four King level cultivators. They were coldly looking at Tang Zhen's group as their eyes flickered.

The stream of light stopped in front of Tang Zhen and the others. The two Holy Masters bowed and appeared to be rather polite.

"Mr. Tang, I admire your high attainments in runes. May I ask if you are interested in the treasure room and the city Lord's Hall of the giant tower?"

One of the Holy Masters asked in a rhythmical voice. His question was very direct, and his gaze fell on Tang Zhen with a hint of inquiry in his eyes.

"Of course I'm interested, but what does that have to do with you?"

Tang Zhen looked at the foreign Holy master who was wearing a strange long robe and asked expressionlessly.

"Of course it's related because we're also interested in the treasure room and the city Lord's Hall. But our rune attainments are not as good as Mr. Tang's, so we can't break the protective light curtain there.

Although you can break the defensive light curtain, the five of you can't fight against the increasing number of monsters in the tower. So we should work together!"

The Holy master stated his purpose for coming and waited for Tang Zhen's answer without blinking.

Tang Zhen glanced at situ Yuanzhi and the others. When he saw that they were all tempted, he frowned and fell into deep thought.

Seeing this, the other party was not in a hurry. Instead, he began to wait quietly.

After about ten seconds, he glanced at the Holy master and said, "We can cooperate, but how do we split the harvest?"

"Of course it's half for us and half for you. That's fair and reasonable!"

The Holy master replied with a matter-of-fact expression, but Tang Zhen sneered in return.

"How about this? you guys are responsible for breaking the protective light curtain, and we only want 40% of the harvest. What do you think?"

The two Holy Masters were displeased when they heard this. They knew that Tang Zhen was mocking them on purpose.

However, the two Holy Masters also knew that in a situation where they were unable to kill the giant, breaking the protective screen of light was the most crucial part.

On this point, Tang Zhen had an irreplaceable role. This was also the reason why they decided to cooperate in the end!

King level cultivators had firm willpower. Once they decided on something, they wouldn't easily change it. Therefore, their words would only attract Tang Zhen's sneer and contempt.

The two Holy Masters were also decisive people. After a brief discussion, they decided to give Tang Zhen and the others 55% of the harvest and expressed that they would not give in at all!

Tang Zhen put on an act and discussed with situ Yuanzhi and the others. When he saw that they were willing to cooperate, he nodded and agreed.

However, Tang Zhen secretly sneered in his heart.

After waiting for so many days, these guys finally took the bait!

Chapter 602-killing the giant

After the two sides decided to cooperate, they began to work out a detailed plan.

According to everyone's understanding of the giant, the closer they got to its core, which was the upper layer and head area, the faster the giant would awaken from its deep sleep.

One more thing to note was that the giant's life force was weakening, and its aura was weakening. This was the main reason why it kept falling into a deep sleep.

The good stuff was all in the core area, but it was not easy to enter. Not only would it take longer to crack the protective light curtain, but the number of monsters inside might also increase significantly. Before the giant woke up, it was impossible to reach the target location.

Therefore, if he really wanted to obtain the item he wanted, he had to stay inside the tower for a long time. Otherwise, everything would be empty talk!

Therefore, the best way was to directly trap or kill the giant. At the very least, he had to torture it until it was exhausted before waiting for an opportunity to enter the interior of the tower.

However, it was definitely not an easy task to trap such a terrifying giant. This was also the first problem that everyone had to solve!

Tang Zhen and the others raised their doubts, but the Holy master in charge of the negotiations smiled confidently and claimed that he had already thought of a solution, which made Tang Zhen and the others very curious.

As the Holy master told them about the plan, Tang Zhen and the others came to a sudden realization.

It turned out that there was a place a thousand miles away, where not a single blade of grass grew. From time to time, black liquid could be seen bubbling on the ground.

Once this liquid came into contact with an open fire, it would quickly burn up. The fire was fierce and would not be extinguished for a long time!

In addition to this terrifying flammable liquid, there was another feature of this land. Some places would sink like a swamp if one stepped on it. Very few people could escape from it successfully.

It was for these two reasons that there were very few living beings in that place, and they would usually take a detour when they passed by.

According to the Holy master's plan, they would build a tower in that place and then draw the giant over, causing it to sink deep into the place covered in black liquid.

After the giant was trapped, he could ignite the black liquid and use the sea of fire to burn the giant to death!

Even if the giant couldn't be burned to death, he could at least severely injure it and then find a way to put it into a state of deep sleep.

The giant was already in a bad state, and now he was exhausted to the extreme. If he overexerted his physical strength again, he would definitely fall into a state of collapse!

Once the exhausted giant fell into a deep sleep, he would not wake up easily.

After everything was carried out according to the plan, he could break through the defensive light curtain of the tower and enter the city Lord's Hall and the treasure room!

After Tang Zhen and the rest heard the Holy master's plan, they fell silent and exchanged glances.

Although the plan seemed feasible, there were a few uncertain factors that made the execution full of suspense.

First of all, could the quagmire that could trap monsters trap the terrifying giant? It must be known that the two legs of this guy were almost as big as two Giant Mountains!

Moreover, the question was whether the flames could harm the giant. One had to know that the surface of the giant's building was protected by a protective light curtain.

It did not only exist on the tower formed by the giant's armor, but also on the surface of the giant's body, blocking the attacks for the giant!

Otherwise, even if the giant's skin was made of copper and its bones were made of iron, it would have been riddled with holes by the cultivators of the city gate. It was impossible for it to be unscathed!

The most important point was that when they went to the central area of the giant tower, they would inevitably be blocked by a large number of monsters. There were only eleven of them, so how could they resist those crazy King-tier monsters?

Therefore, although Tang Zhen did not object, he was not confident in his heart whether this cooperation would be successful or not.

However, he could use this opportunity to do some things he wanted to do, including killing the two annoying enemy cultivators!

Tang Zhen slightly nodded when he thought of this.

Seeing that Tang Zhen and the rest had agreed to their plan, the other Holy master who had been silent the whole time immediately turned and left. He turned into a stream of light and ran into the distance.

It was obvious that he was heading towards the location of the ambush.

The Holy master would build a city Tower in the shortest time possible. Then, Tang Zhen and the others would attack and lure the giant to that place.

The rest of the time was spent quietly waiting for the giant to fall into a deep sleep again. Then, everyone would attack the giant at the same time.

The purpose of this was to make the giant unable to get an effective rest and exhaust his physical strength as much as possible!

The combined attack of ten King level cultivators was absolutely terrifying. The giant that had just fallen into a deep sleep was immediately awakened, and its eyes were filled with anger.

The giant's anger had already reached its limit in the face of these ants that had repeatedly disturbed its sleep. It roared towards the sky, waved the weapon in its hand, and smashed it towards Tang Zhen and the others.

Tang Zhen and the others, who were already prepared, easily dodged the attacks. After which, they retreated in the same direction. During this period of time, they continuously attacked the giant, causing the giant to follow behind them.

Tang Zhen's group rapidly flew in the air as the monster roared. They were getting closer and closer to the ambush location.

Then, in the vast wilderness, a towering giant roared continuously. His six arms were constantly waving, attacking Tang Zhen and the others as if he was swatting flies.

However, Tang Zhen and the others were extremely agile. Even though this giant had six arms, it was still unable to successfully kill them!

Tang Zhen controlled the flying carpet and constantly dodged the giant's attacks. At the same time, he opened the map view and constantly observed the surroundings to prevent any accidents from happening.

It didn't take long for him to find a piece of black land in front of him, as if it had just been burned by a wildfire.

As the previous Holy master had said, this place was truly barren!

In the middle of this black land, a "mountain" shaped building appeared in front of Tang Zhen's eyes. It was extremely abrupt in this barren land!

In fact, if it wasn't for the giant, no one would have built a city here.

"Let's slow down a bit. We must get this guy to that place!"

The Holy master who had previously discussed the cooperation with Tang Zhen flew past. After giving a few instructions, he shot another icicle that was a few meters long at the giant.

The icicle landed on the giant's head, but was blocked by the protective light screen, not causing any damage to the giant.

Tang Zhen immediately slowed down when he heard this. At the same time, he threw a punch at the giant. Soon after, a dark blue light appeared and smashed into the giant's body.

"Crack!"

As the blue light struck the barrier, a large amount of frost immediately spread out, freezing and cracking the light barrier.

The cultivator skills that had been upgraded to the limit by the application store were incomparable to the skills exchanged from ordinary platforms. Once they were used, the difference between them was obvious!

When this kind of high-intensity attack fell into the eyes of everyone, they immediately felt overwhelmed with shock. A casual strike was able to destroy the giant's defensive light curtain. This proved that Tang Zhen's combat strength was absolutely extraordinary!

They knew that if they attacked, they would not be able to gather such a powerful attack!

The Holy master and the other four King-level cultivators narrowed their eyes. While they continued to attack the giant, they also began to pay attention to Tang Zhen's movements.

A trace of fear flashed across the eyes of the two King level cultivators who were fighting against Tang Zhen earlier. Their expressions became uncertain.

Although Tang Zhen's attack was powerful, it was unable to cause much damage to the giant. In the blink of an eye, the shattered protective light curtain had recovered.

On the other hand, the giant's body seemed to have suffered a slight frostbite. Although it was insignificant, it still made the giant even more furious. The eyes on one of its heads stared at Tang Zhen.

It was also at this instant that Tang Zhen suddenly felt his hair stand on end. It was as though a life and death crisis was about to strike him!

Chapter 603-soaring flames

A thought suddenly flashed across Tang Zhen's mind at this moment.

Situ Yuanzhi had once said that other than having an extremely strong defense, this giant seemed to have some magical abilities!

For example, electric eels releasing electricity and geckoes breaking their tails were all innate abilities.

If it evolved to a certain level, this talent could turn into some kind of magical power!

This kind of magical ability was different from the skills of cultivators. It was the innate ability of some species. It was either extremely strange or extremely lethal.

However, no matter what kind of innate divine ability it was, it was a truly powerful attack method!

In the beginning, this giant might not even be worth mentioning. However, as it continued to advance, its innate abilities also began to show.

At the same time this thought appeared in his mind, Tang Zhen saw a glint flash in the giant's eyes. Soon after, the air around him suddenly trembled as a terrifying life and death crisis instantly struck.

Tang Zhen loudly shouted "not good!" As he warned his companions, he immediately teleported away from the flying magic carpet. His figure was like lightning as he rapidly streaked across the sky!

A pair of energy-formed wings suddenly unfurled on his back. With just a slight flap, he was already nearly a thousand meters in the air. He continued to fly without looking back.

When Situ Yuanzhi and the others heard this, they scattered and fled in all directions without any hesitation. They had already completely believed in Tang Zhen's sense of danger.

It was also at this moment that the giant's gaze once again locked onto Tang Zhen. His eyes were constantly flickering with light.

Its Divine Art completely erupted, and wherever the giant's gaze landed, the air immediately changed as if it was boiling water.

Following Tang Zhen's continuous dodging, a series of explosive sounds actually rang out behind him. The invisible air instantly exploded and collapsed.

If they were in the explosion zone, even a King level cultivator would be blown to pieces!

Tang Zhen's heart was filled with shock when he saw this. His speed was raised to the limit as he would occasionally teleport and Dodge.

The speed of the air explosion was extremely fast. In just a short second, it exploded thousands of times, as if it was going to destroy the world.

Behind Tang Zhen, a series of spatial cracks that were slowly closing up were left in the originally empty sky!

What kind of terrifying power was this? it was actually able to tear open the void. It was indeed worthy of being an innate divine ability!

When situ Yuanzhi and the others saw this scene from afar, they all gasped in unison!

Although the giant's attack only lasted for a short second, it caused extremely terrifying destructive power. It was shocking to see.

If this attack was not targeted at Tang Zhen but at all of them, it was likely that some of them would have already lost their lives!

People were divided into three, six, and nine grades. There were also strong and weak cultivators of the same grade. Not every cultivator was like Tang Zhen, who had an abnormal combat strength that was invincible among cultivators of the same grade.

No one could guarantee that they would be able to escape alive from such a terrifying attack.

At the same time, they had a new understanding of Tang Zhen's strength, especially his terrifying speed when he dodged earlier. If it was situ Yuanzhi and the others, they would definitely not be able to do this!

After seeing that Tang Zhen was fine, everyone made their move at the same time and began to attack the giant that was clearly dispirited after releasing the divine ability.

The giant had not slept or rested during this period of time, and now that he had released a divine ability that consumed a great deal of his energy, he was probably not far from being completely exhausted.

Tang Zhen, who was a few thousand meters away, stabilized his body. At the same time, he inhaled a deep breath of air. He still felt a lingering fear in his heart as he looked at the giant that was roaring furiously.

This giant's strength was truly terrifying. If he had not been on guard earlier, he might have really been injured by this giant's Divine Art Attack!

Even if he could transmigrate back to his original world at any time, he would need time to activate it!

After witnessing the giant's divine ability, everyone became more cautious when they attacked again. They also deliberately controlled the strength of their attacks, afraid that the giant would do the same thing again.

The destructive power of this divine ability was truly astonishing, causing everyone to feel a chill in their hearts. They didn't dare to be the slightest bit careless.

Not everyone was able to escape safely like Tang Zhen under that terrifying chain of attacks. The slightest carelessness would result in the loss of one's life!

Tang Zhen had suffered a loss in silence earlier. Now, he intentionally lowered the lethality of his attacks. He directly took out a specially made rifle from his storage ring and continuously fired at the giant!

As a result, he became the most relaxed one among them!

The people who were attacking heard the gunshots and saw Zhen Tang lying on the flying carpet leisurely. He would fire a shot from time to time. They were stunned and speechless.

As the attacks continued, it didn't take long for the newly built city to appear in everyone's view, striking against the barren land.

After being soaked in the black liquid, the soil here also turned into black mud and was also on fire!

Sure enough, it was as they had expected. When the giant saw the tower that appeared in front of it, it immediately ignored Tang Zhen and the others. It also ignored the fatigue of its body and madly rushed towards the tower.

Only God knew how deep its hatred for Lou Cheng was. It was probably deep in its bones!

The eyes of Tang Zhen's group immediately stared intently at the giant upon seeing this. They wanted to see if it would be able to sink into the black mud.

As expected, the moment the giant stepped into the black soil, his feet immediately sank in, and black mud and liquid covered his calves.

However, with the protection of the light curtain, these things could not stay for long, and they quickly slid off its body.

The giant didn't seem to care. He pulled out his leg and continued to rush towards the tower with killing intent in his eyes!

One step, two steps, three steps ...

After the giant took a step, it covered a very long distance. Although the area of the black land was not small, it only needed to take a few more steps to reach the front of the city.

The deepest part of the black land in front of him was only up to the giant's knee, so it didn't affect his movement at all.

The Holy master who had suggested the plan earlier had a dark expression. The eyes of the other cultivators flickered as they considered whether they should set the black soil on fire right now!

It was also at this moment that the roaring giant suddenly staggered. Its huge body suddenly sank by a section, causing everyone's hearts to jump!

It turned out that the giant was already deep in the black mud. Everything below its chest was buried in the ground, and it was constantly struggling to move forward.

Because of the existence of the protective light curtain, the sticky black mud could not wrap around the giant at all, which also made it not as miserable as everyone had imagined. It continued to move forward like water.

“Now, light the fire!”

The Holy master snorted coldly and a flame shot out from his hand, striking the black soil beneath his feet.

“BOOM!”

A muffled sound was emitted. The black soil where Tang Zhen was attacked immediately turned into a sea of fire. Soon after, the fire quickly spread. In the blink of an eye, it had already wrapped around the giant that was swimming in the black soil!

The scorching hot air pounced over. Tang Zhen and the others retreated a distance as they stared at the giant within the flames without blinking!

Across the soaring flames, roars of anger could be heard. The giant that had been struggling in the mud had now become a huge fireball, its six arms waving constantly.

Under such scorching flames, the energy used to support the protective light curtain was constantly being consumed at a terrifying speed!

After all, the burning flames were also a kind of attack. The destructive power it caused was not inferior to the combined attack of Tang Zhen and the others. Moreover, compared to the attacks of Tang Zhen and the other cultivators that were separated, the destructive power formed by this kind of flame attack could be said to be endless!

Even if the giant tower was rich and had a lot of energy to support the protective light curtain, it would not be able to support such a terrifying consumption!

When the energy of the protective light curtain was depleted, the giant would lose its most powerful protective barrier. It would not be far from destruction.

The giant seemed to have realized this as it began to struggle in the sea of fire. Under the shroud of life and death, it actually ignored Lou Cheng, who was in the center of the sea of fire, and turned to move toward the edge of the sea of fire where Tang Zhen and the others were.

How could Tang Zhen and the others allow the giant to do as he wished? they all unleashed their strongest attacks in an attempt to stop the giant from continuing to return.

For a time, everyone displayed their own abilities, and an endless stream of attacks fell on the giant in the sea of fire, making it even more furious.

“Roar!”

The giant was forced into a corner. He actually threw away his weapon and grabbed the burning black mud before ruthlessly smashing it towards Tang Zhen and the others.

Chapter 604 A strange alien species _Tang Zhen and the rest became anxious when they saw the giant attempting to charge out of the sea of fire. They began to attack crazily.

They had spent so much effort in hopes of using the sea of fire to exhaust the energy of the protective light barrier around the giant's body. At the same time, they had also taken the opportunity to continuously exhaust the giant's energy, causing him to fall into a deep sleep from extreme fatigue.

In this way, everyone could enter the core area of the giant tower more safely without worrying about the giant waking up at any time.

However, if the giant were to rush out of the sea of fire now, the damage it would suffer would be negligible, and all the previous arrangements would be in vain.

Cultivators were extremely stubborn about their own thoughts, and the king class cultivators were even more so. After the plan was implemented, how could they let the giant walk out of the sea of fire?

Without any hesitation, everyone immediately used their trump cards. All kinds of attacks were launched at the fire mage like a storm. Under the double attack of the flames, the defensive light curtain on the giant's body would crack from time to time.

At this moment, the giant's body finally suffered real damage. The flesh on the surface of his body exploded under the attack, and the minced meat and blood mist flew into the sky. In the blink of an eye, they were burned to ashes by the flames!

Even though the giant's body was huge and the damage they caused was reduced to the level of mosquito bites due to the defensive light curtain, it still made the giant furious and let out an earth-shaking roar!

Being injured by an ant yet unable to kill it, when the giant saw Tang Zhen and the rest of the cultivators moving about in a disorderly manner, he was so furious that he stomped about like a bolt of lightning.

At this moment, the giant had been completely enraged by the crowd and began its fierce counterattack.

It threw away the weapon in its hand, then grabbed in a direction with all its might, and a ball of black mud spewing flames was caught in its hand.

The giant's palm was so huge that every ball of black mud it grabbed and threw was the size of a small mountain!

The giant glanced at the people in the sky and roared. All six arms waved at the same time, throwing things at them.

Everyone saw a huge fireball coming towards them like a meteor falling from the sky. They were so scared that they quickly dodged to avoid being hit by it.

The flames were unable to harm Tang Zhen and the others within a short period of time. However, the terrifying strength contained within the soil was definitely able to cause them to vomit blood!

After Tang Zhen's group successfully dodged, the burning black soil landed on the grass in the distance. It was like lava erupting from volcanoes, igniting the sea of flames once again.

The giant actually took this opportunity to rush out of the deep pit. Its huge body stood in the sea of fire as it roared and charged towards Tang Zhen and the others.

The wave of fire that had been soaring into the sky now could not even reach the giant's waist. Only the black mud that had been left on its body was still burning fiercely, turning the giant into a moving fireball!

The godlike figure could be seen from far away.

Seeing the giant rush out of the black mud, the expression of the Holy master who had been discussing the plan changed. He threw something into the sea of fire.

Just as this object fell into the sea of fire, there was a crisp " PA " sound, and then a strange object fell into the sea of fire.

These things were not afraid of fire, and they quickly took root in the sea of fire. Then, countless translucent, fiery red Vines danced out. There were flames flickering inside, and they looked like sea anemones.

This thing seemed to like fire very much, and it grew bigger and bigger in the sea of fire. In a short time, it had turned into a giant vine nearly a thousand meters long, swaying freely in the flames!

"This is a special species from the Otherworld. The people from the Otherworld call it the fire vine and view it as a sacred object.

This kind of fire vine feeds on fire and grows when it sees fire. I obtained it by chance in my early years.

The largest fire vine I've ever seen was nearly 10000 meters tall. It grew at the mouth of a volcano and was extremely powerful.

Whether or not we can trap this giant today will depend on its ability!"

The Holy master explained indifferently, his eyes fixed on the giant in the sea of fire and the Otherworld's fire vines that had grown to over a thousand meters long in an instant.

It was also at this moment that the giant passed by the fiery red Vines and accidentally touched one of the vines that extended to the ground.

It seemed to be a trigger. The moment the vine was touched, countless vines writhed wildly and suddenly attacked the giant's legs, quickly coiling them up.

The giant, who was about to walk out of the sea of fire, was suddenly attacked. His feet were tied up, and he couldn't move at all. He couldn't help but roar in anger.

It reached out to pull at the fiery red fire vines, only to discover that the vines were burning with green flames that had a terrifying corrosive power against the protective light curtain.

The moment the giant grabbed the vine, the defensive light curtain on the surface of its body began to flicker, as if it could be burned through by the flames released by the fire vine at any time.

The giant didn't pay much attention to this. Instead, he reached out and pulled the vine with all his might. Immediately, the vine that was several meters thick was torn apart!

Then, the giant raised his foot again, and the fiery red Vines that were binding his calf made cracking sounds as they were continuously torn off and fell to the ground.

Seeing this, situ Yuanzhi and the rest could not help but shake their heads. Although this vine could survive in the sea of fire and was considered a wondrous object, its strength was disappointing!

Of course, this wasn't because the vines weren't strong. After all, how weak could something that could withstand the burning of flames be?

If it wasn't for the fact that it was facing a terrifying prey like the giant tower, the vines would be invincible in the sea of fire. Even if it was trapped, it could trap the enemy and wait for them to be burned to ashes.

However, when it faced the giant tower, it seemed to be a little disobedient!

Just as everyone was feeling disappointed, Tang Zhen was slightly startled as he looked at the broken vines that the giant had pulled off.

It turned out that after the broken fiery red Vines fell to the ground, they didn't turn to dust. Instead, after twisting a few times, they quickly took root and sprouted, then continued to absorb the flames and grew stronger.

In less than ten seconds, the vine had grown to a few hundred meters long and wrapped around the giant's leg.

It was the same for the other broken vines. They all grew rapidly after absorbing the flames, spreading along the giant's legs.

This sudden change stunned everyone at first, then they immediately came back to their senses and continued to attack.

At this moment, the giant's legs had been completely bound by the fiery red Vines on the ground, and he could not move at all.

&Nbsp; the giant roared and pulled at the vines, but more and more of them broke. Soon, the giant was surrounded by the fiery red Vines.

However, Tang Zhen frowned slightly. This was because he discovered that the growth speed of these vines seemed to have slowed down. They were far from being as Swift and violent as before.

Sweeping his gaze at the thin flames around the giant, Tang Zhen came to a sudden realization. He shouted to everyone, those vines feed on fire. We have to make the fire burn stronger. Otherwise, we can't trap the giant!

As his voice fell, Tang Zhen's large hand suddenly grabbed. A large piece of burning black soil was sucked up into the air and thrown onto those vines.

Sure enough, with the arrival of the burning black mud, the vines immediately became much more lively, and the speed of their growth suddenly accelerated a lot.

When everyone saw this, they didn't hesitate at all. They all grabbed the burning black mud and threw it at the vines.

The fiery-red Vines, which had been lacking in strength, suddenly erupted at this moment. They grew crazily and had already reached the giant's waist.

Seeing this, the giant began to struggle even more.

However, no matter how much the giant struggled, it could not break free from the vines. It could only watch as the vines grew thicker and longer, and its aura began to weaken.

It was also at this moment that a trace of consciousness flashed in the giant's eyes. Then, it roared and slashed at the vines beside it.

Half of the vines were cut off and thrown far away. Then, the giant waved his blade again and cut all the vines in front of him!

Before the remaining vines could grow again, the giant had already shot out of the sea of flames and stood in front of Tang Zhen and the others. It was as if he was looking down on ants as he ruthlessly threw a punch!

Chapter 605 The last strike _“BOOM!”

Before Tang Zhen and the rest could react, the giant's fist had already been ruthlessly thrown out!

This attack was as if a mountain had collapsed and the sky had changed color. It made people feel a sense of despair that there was nowhere to hide.

The giant was extremely furious after being tricked by these ant-like cultivators. He threw out his fist with hatred and the speed was extremely fast, completely out of line with his size.

In order to launch this attack, it even extracted the energy used to maintain the defensive light curtain, so that all of it was concentrated into this punch, and the surface of its body no longer had any protective measures.

The entire tower that was hanging on the surface of its body also let out a rumbling sound at this moment. Countless items in the tower were thrown out one after another because the defensive light curtain had disappeared. Debris fell like rain from the sky.

It seemed that the defensive light curtain not only had a protective function, but it could also provide a similar balance and stability to the constantly moving tower while it was in existence, so that the items inside the tower would not be shaken by the bumps.

However, the moment the protective light screen disappeared, they all flew out due to inertia!

The cultivators who had been attacking non-stop in the air felt their hearts tremble when they saw the mountain-like fist coming at them. The sense of danger of death suddenly enveloped their bodies.

The power of this punch was so terrifying that it seemed to envelop the entire world and seal off the surrounding space. The air also seemed to become tangible, firmly binding their bodies!

It was as if they were ants trapped in this space, about to be smashed into meat patties by the giant's fist!

In fact, everyone could even faintly sense the shadow of an innate divine ability on this huge fist!

If it was an ordinary cultivator, under such a terrifying attack, their mind would have been in a state of chaos and they would have been waiting for death in despair.

However, for King level cultivators, they didn't believe in ghosts and gods. The only thing they believed in was their own strength. Therefore, even though the giant's attack was a sure-kill attack, they still fought for a chance of survival in death!

The expressions of Tang Zhen and the rest changed the moment the giant's killing blow was unleashed. They began to Dodge with their own techniques.

Even though the air around them was as heavy as a mountain, it was torn apart by their desperate struggle, and cracks appeared out of thin air.

The two Holy Masters from before roared and fused with the light beneath their feet. They were like two huge fireworks that suddenly shot into the sky, creating a terrifying Sonic Boom!

The two foreign cultivators who were Tang Zhen's enemies also abandoned their flying monsters at the same time. They let out long howls with grave expressions and quickly teleported backward.

As for situ Yuanzhi, Red Shield, and the others, they had already used all their strength to escape in all directions when the giant attacked!

Tang Zhen's eyes were grave as he stared intently at the giant who had lost his protective light barrier. At this moment, he did not retreat. Instead, he advanced and directly rushed towards the building on the giant's body.

The heavy air didn't seem to have any effect on him, and he moved forward like lightning.

Just as he was about to make contact with the giant's fist, he suddenly activated teleportation and appeared in the original world in an instant, avoiding the giant's killing blow!

In the original world, Tang Zhen only stayed for less than ten seconds before he activated the teleportation again and reappeared in front of the giant.

However, at this moment, Tang Zhen was in a serious state of consideration. He had already activated the [dark world stealth technique] and placed himself in a strange dark world.

Tang Zhen inhaled a breath of cold air when he observed the surrounding environment again!

The area they were in earlier had long since turned into a Wolf's Den. An incomparably terrifying large pit had appeared on the ground, and the air was filled with traces of being torn apart by the violent energy!

Anything in this area was turned into fine powder by the giant's attack. It was an indiscriminate attack.

Tang Zhen's eyes focused. He could sense a trace of dense blood Qi at the edge of the large pit. He wondered which unlucky fellow had been smashed into a meat patty by this giant.

If it was just one of them, they could only blame themselves for not being strong enough!

He turned to look at the giant beside him, only to find that it had already sat down cross-legged, its huge head slightly lowered, and its eyes were constantly alternating between rationality and confusion.

Just as Tang Zhen was observing the giant, the giant, who was in a rational state, suddenly looked at the void where Tang Zhen was. A trace of doubt and ferocity flashed in his eyes.

At the same time, the extremely exhausted giant slowly raised the saber in his hand, and his eyes revealed a trace of killing intent.

Clearly, the giant had a special ability. It could easily discover Tang Zhen who was hiding in the dark World and was prepared to kill him at the same time.

However, just as it raised its saber, the rationality in the giant's eyes was replaced by confusion and a strong sense of fatigue.

Tang Zhen, who was originally planning to Dodge, had a glint in his eyes when he saw this. He swiftly rushed towards the giant's body.

Because the energy supporting the defensive light curtain had been exhausted, the giant's body no longer had any defensive power, and anyone could easily enter it.

Even though the giant did not fall into a deep sleep immediately, it had exhausted too much of its energy and had no power to expel the intruders.

Situ Yuanzhi and the others had yet to return. Tang Zhen revealed a happy expression and flew straight towards the giant.

Tang Zhen naturally would not miss such a good opportunity. Therefore, he hurriedly seized the time and began to arrange his plan.

His figure suddenly barged into an area on the upper floor, then turned around twice on the street, and directly entered a residential house at the end of the alley.

Not long after, Tang Zhen's figure walked out of the resident's house and tightly closed the door behind him.

Soon after, Tang Zhen headed to the middle section. He stayed there for a few minutes before he rushed out of the building and flew to the sky that was about ten kilometers away from the giant.

When the figures appeared in the sky and flew straight towards the giant who was sitting cross-legged, Tang Zhen finally retreated from The Dark World. He flapped his wings and flew over.

When Tang Zhen arrived at the sky in front of the giant, he discovered that situ Yuanzhi and the other three were safely suspended in the air. However, their expressions were a little miserable, and their clothes and armor were damaged to varying degrees.

The two Holy Masters and the two opposing cultivators were also uninjured. It was just that the stream of light under the feet of one of the Holy Masters had disappeared, and the flying monsters of the two opposing cultivators had long been turned into meat paste.

The three of them were standing on a disc each, using their spiritual power to float in the air, their faces slightly pale.

The most important point was that their original team of six had now become five people, and they were missing a cultivator with a dark skin like an ape.

It was obvious that the trace of blood Qi that Tang Zhen had felt earlier had come from that foreign cultivator. Even though his cultivation had reached the king tier, he still couldn't escape the giant's attack!

The loss of one of their own made the leading Holy master's expression turn extremely ugly, and there was a faint flash of anger in his eyes.

Originally, they had a slight advantage in numbers and suppressed Tang Zhen's group.

However, with the unexpected death of a companion, the number of people on both sides was equal. Even if he was a two star King tier, there was also a two star King tier among Tang Zhen's group of five.

In this way, they no longer had any advantage!

The Holy master glanced at Tang Zhen and the others. His expression was neither sad nor happy. He nodded gently and then turned to look at the monster sitting cross-legged.

"This giant has used up a lot of his energy and is now in a deep sleep. I believe he won't wake up anytime soon.

We can't miss this opportunity. Let's go in and head straight for the core area!"

As soon as the Holy master finished speaking, everyone rushed to the top of the giant's head. As they floated in the air, they all looked at the strange building hidden behind the three heads.

In fact, Tang Zhen had long discovered this special area that looked like a skull and was covered by a thick protective light curtain.

This was the core area of the giant tower. Whether it was the city Lord's Hall or the tower's treasure room, they were all hidden in this building!

Chapter 606 Entering the core area (1)

From the sky, the appearance of the giant head building looked very similar to the three-headed giant.

The only difference was that the top of the head did not have bone spikes, but a strangely shaped blood crown that faintly emitted a strange aura.

After Tang Zhen swept his gaze over, he followed the crowd and slowly descended. They surrounded the mouth of the giant head.

This head was extremely eerie, and its mouth was also extremely sinister. Its top and bottom were filled with crisscrossed canine teeth!

There was a pitch-black entrance on top of the open mouth, from which a faint mist of blood floated out, as if it was choosing a person to devour.

With just a glance, everyone felt a chill all over their bodies, as if there was great danger here.

But in any case, everyone had to enter it, because the most precious items in the entire giant's Tower could be hidden in this building.

"Sir, please break this defensive light curtain!"

The leading Holy master cupped his hands at Tang Zhen and spoke in a hoarse voice.

Tang Zhen gently nodded his head upon hearing this. He took a few steps forward before extending his hand and pressing down. He immediately felt an invisible barrier blocking his path.

Compared to the protective light screen of the tower below, the defensive power of this building was actually self-contained. Even if the tower below lost its barrier, this place was still safe and sound!

Tang Zhen closed his eyes and felt the operating process of the protective light curtain. He then retracted his hand and turned to look at the Holy master.

"Are you going to open up an entrance here, or are you going to completely destroy this protective light screen?"

The Holy master muttered to himself for a moment before he replied with certainty, "If we can completely destroy this protective light curtain, that would naturally be the best!"

Tang Zhen nodded and indicated for everyone to raise their heads. He extended his hand and pointed at one of the giant's eyes.

that red eyeball is the key to activating this protective light curtain. Later, I will open a crack on the protective light curtain, and then you will work together to break it!

Everyone nodded when they heard this. At the same time, they followed Tang Zhen and rose to a position in the air, standing parallel to one of the eyes of the giant building.

Tang Zhen did not say any unnecessary words. Both of his hands were like lightning as they rapidly waved. They guided the energy within his body and the surrounding heaven and earth, gathering them into numerous unique symbols.

In just a short time, his body was surrounded by runes of various colors, and there were thousands of them!

The eyes of the cultivators flickered when they saw Tang Zhen casually drawing countless runes. Most of them were filled with envy and jealousy.

The most criticizing thing about the world of towers was that they liked to do things for themselves, which led to many things not having the opportunity to be developed and basically lost with the destruction of the towers.

Because they couldn't obtain an orderly inheritance, cultivators could only rely on exchanging skills from the cornerstone platform to strengthen their combat power.

Due to the lack of inheritance and creativity, and the lack of knowledge to absorb the strengths of other civilizations, the cultivators of Loucheng gradually became boorish men with only brute force.

Out of the ten cultivators in the world of loucheng, nine of them were good at fighting, but they only had a little knowledge of things outside of fighting.

Even the knowledge that the Holy master, who was known to be knowledgeable, had was only so-so in Tang Zhen's eyes!

It was also for this reason that a complete skill inheritance was extremely rare in the world of loucheng, and its value was simply immeasurable!

It had to be said that this was an extremely laughable and sad thing.

The cultivators of loucheng, who were good at fighting and plundering the fruits of other foreign civilizations, had never had their own civilization because of the strange way of survival in this world.

Even if they had, they would be destroyed by all kinds of changes in the dark and let them be annihilated in the long river of time.

Tang Zhen loved to read, especially the various books passed down from the loucheng world.

Because of the existence of [mysterious word decryption], Tang Zhen could read without any hindrance. This had a great impact on Tang Zhen. Almost no cultivator could compare with Tang Zhen in this aspect.

The reason why he studied so diligently was to find the lost skills in it, so that he could benefit himself after mastering them.

This matter had already shown some results. Unknowingly, Tang Zhen knew more and more secrets. His understanding of the world of loucheng was also getting deeper and deeper!

It was this kind of accumulation that allowed him to draw inferences from one case when drawing runes, and seemed to be at ease.

After about three minutes, Tang Zhen had already finished drawing all the runes. He then pulled them and rearranged them to form a huge runic magic circle.

"Now, activate!"

Following Tang Zhen's low cry, the huge runic magic circle suddenly stuck onto the defensive light curtain. The strange thing was that it did not cause the defensive light curtain to reject it. Instead, it was like a dog's skin plaster that slowly merged into it.

At the same time, the thick defensive power within a huge ring in the center of the runic magic circle suddenly became thin.

"What are you waiting for? attack!"

Tang Zhen, who was maintaining the operation of the runic magic circle, roared loudly. Everyone, who had been waiting for a long time, immediately took action. Nine Swift and fierce attacks whistled and landed in the middle of the ring.

"Crack!"

The energy barrier shattered under the attacks of the nine king class cultivators, revealing a circular hole.

The runic magic circle drawn by Tang Zhen immediately blocked the energy that was intended to fill up the gap. It continuously diverted it to the side before connecting it to the surrounding.

&Nbsp; as a result, the energy from the two ends of the gap had been connected, successfully deceiving the protective light curtain and making it think that the hole had been filled.

When situ Yuanzhi and the others saw this scene, they did not even have time to exclaim. They immediately started to attack the giant's eyeballs one after another, causing them to make " Boom Boom " sounds!

In less than ten seconds, the huge eyeball let out a loud noise and shattered.

The protective light barrier that had enveloped the building also disappeared at this moment, revealing the entire building before everyone's eyes.

"Haha, let's go in now!"

The cultivators' eyes lit up and they immediately rushed toward the entrance of the building.

Of course, the first thing they had to do before entering was to use various means to open up a path to avoid being ambushed and sneak attacked!

Tang Zhen followed behind everyone in a neither hurried nor slow manner. He would occasionally sense his surroundings as though he was searching for something.

The interior of this skull building was extremely large. Not long after they entered, they saw countless will-o-wisps flickering around them, and at the same time, a huge throne appeared in front of them.

It was unknown what material this throne was made of, but it glowed with a purple light. It looked bright and lively, and a deathly aura constantly rose from it.

A huge monster with three heads and six arms was currently sitting on the throne. It coldly looked at the arrival of Tang Zhen and the others.

"You ants, you're really seeking your own death!"

The three-headed and six-armed monster snorted coldly, and a terrifying aura spread out. It was filled with the smell of blood and slaughter!

As soon as it finished speaking, ten armored monsters with two heads and four arms appeared in the shadows behind it.

They held all kinds of weapons in their hands and were full of killing intent. Their eyes were full of bloodthirst and hatred!

Just as Tang Zhen was squinting his eyes to size up his surroundings, the leading Holy master suddenly said in a low voice, "Before I came here, I've already inquired about it. The residents of this giant city are like zombies and don't have two heads and four arms. So, these two heads and four arms cultivators are not residents here.

As Mr. Tang said, they are likely to be some kind of special monster, so we must be careful!”

Tang Zhen by the side revealed an expression of “as expected” when he heard this. In fact, he had already guessed something in his heart. He had already completely confirmed it at this moment!

He could even vaguely guess the reason why the giant’s Tower had such a change today.

However, this was not the best time to think about these problems. At this moment, the three-headed and six-armed monster waved its hand, and ten two-headed and four-armed monsters pounced on them.

Chapter 607 Battle, advancement (1)

Seeing these two-headed and four-armed monsters coming for them, everyone drew their weapons one after another, and they were also full of killing intent.

The brave would win when they met each other on a narrow road. The cultivators of Loucheng city didn’t lack courage, so the more they fought, the crazier they became!

In a battle of life and death, if one lacked this kind of indomitable mentality, it was very likely that they would be the one killed!

The situation in front of him was not too bad, there were only ten monsters.

Moreover, these monsters were merely one-star King tiers. They couldn’t pose too much of a threat to Tang Zhen and the others. Therefore, when they attacked, the cultivators also shouted and charged forward.

Compared to these monsters, the cultivators’ combat skills were undoubtedly more skilled. As soon as they started fighting, they had the upper hand!

For a moment, the entire Hall was filled with flickering figures. The sounds of weapons clashing and angry roars could be heard constantly, and blood would occasionally spurt out.

The monster that had rushed in front of Tang Zhen was holding two long spears in each hand. Its other two hands were holding a hard bow and a sharp arrow.

While it was attacking Tang Zhen, the monster shot out three arrows in succession. Their speed was as fast as lightning as they headed straight for Tang Zhen’s vital points.

Tang Zhen easily dodged this sharp arrow that was not inferior to a bullet in speed. His body shook and he instantly entered The Dark World.

Tang Zhen, who had previously used The Dark World’s ability to easily kill a King-tier monster, was now using the same trick again as he quickly entered the monster’s body.

With an explosive sound, the monster was immediately torn into pieces, turning into a pool of minced meat!

This was the first monster that had been killed in this area. It naturally attracted everyone’s attention. Moreover, they quickly discovered that this monster was Tang Zhen’s target.

Seeing Tang Zhen kill a King-tier monster so easily, the cultivators' eyes narrowed slightly. Their gazes turned grave as they looked at Tang Zhen.

The cultivators had never heard of this human King before. They had thought that he was just an ordinary person.

But now, everyone realized that he had refreshed everyone's knowledge of him again and again. While they were shocked, they also wondered how many more powerful cards this guy had.

However, they were in the middle of a great battle, so they couldn't be distracted. They suppressed the shock in their hearts and continued to fight the monsters.

They didn't want to lose face in front of others, so their actions became more and more fierce.

Tang Zhen did not care about the gazes of the others. Instead, he forcefully suppressed the mutation of his body when he leveled up. He swiftly entered The Dark World and suddenly let out a carefree low roar!

At the same time, his body flickered slightly and burst out with waves of energy fluctuations.

His head and the exposed skin and flesh on his body actually became transparent for a moment. His blood vessels and meridians slowly disappeared, completely turning into energy!

However, this phenomenon quickly returned to normal. Clearly, his strength was not enough to permanently energize his body!

At the same time, a violent force exploded in his body. It was as if his strength had increased several times in an instant!

Tang Zhen faced the sky and took a deep breath. His eyes suddenly opened and stared intently at the three-headed six-armed monster that was still sitting on the throne.

As he was in the perspective of The Dark World, the monster was merely an empty shell in Tang Zhen's eyes. A wisp of blackish-gray energy chain was penetrating from the ground and entrenched itself on the head of the monster.

It was obvious that the pressure and the words the monster had said were the doing of the mastermind behind the scenes!

"The fellow on the throne is not the one controlling the giant's body from behind the scenes. He's just a puppet!

I'd like to see how long you can keep hiding."

Tang Zhen's voice had just sounded when he charged towards the three-headed six-armed monster. The soul annihilating saber was like a cold glint as it slashed towards the energy chain that was controlling the puppet!

It was also at this moment that the mastermind behind the scenes seemed to have sensed Tang Zhen's killing intent. He actually controlled the energy chains to withdraw from the puppet's body and rapidly transformed into a three-headed six-armed monster.

The monster's eyes were blood-red in color and looked extremely terrifying. It let out a strange chuckle when it looked at Tang Zhen.

I've underestimated you, to be able to enter this place. However, as long as you're a cultivator of loucheng, you must die!

At this point, the monster's tone was filled with malevolence, and its eyes were filled with monstrous killing intent!

Tang Zhen sneered when he heard this. stop talking nonsense. I've long seen through the tricks you played. Let's see who will have the last laugh!

In the dark World, after Tang Zhen and the monster exchanged a glance, they immediately started fighting.

The front end of the monster's arm turned hazy for a moment before it transformed into six types of strange weapons. Its entire body was like a windmill as it continuously attacked Tang Zhen.

This attack was like a storm, not giving anyone a chance to catch their breath. If the speed of blocking was slightly slower, they would be hit by the weapon.

Tang Zhen's eyes focused. Even though he had already advanced to a two star King tier, he still felt that it was a little difficult to block.

The most crucial point was that the existence of the energy chain caused the monster's power to be endless. Under such a high-intensity attack, it did not show any signs of weakness!

If the monster continued to attack like a storm, Tang Zhen would definitely lose if he defended for a long time. It was only a matter of time before he suffered a loss!

After realizing this, Tang Zhen suddenly teleported and retreated. At the same time, he raised his hand and pointed at the monster.

An incomparably dazzling ray of light suddenly appeared and landed on the monster's body. It then passed through without any resistance, causing the monster to let out a miserable scream!

This was the miniature death light weapon that Tang Zhen was using. It might have a long cooldown period, but it was a trump card that could be used to kill!

The monster that was hit screamed in pain as a terrifying hole was burned in its body. It was a shocking sight.

However, this fellow did not have a physical body. Moreover, it had an energy chain for it to use. Therefore, although Tang Zhen's attack was extremely heavy, it was unable to take its life!

Seeing that the hole was slowly healing, Tang Zhen's hands suddenly shook and took out two war blades that were engraved with demon killing runes from his storage space!

As soon as the two blades appeared, they began to heat up uncontrollably. At the same time, the demon-killing runes engraved on the blades flickered and a dark gray mist rolled around the blades.

Because of the characteristics of the demon killing rune, it was in an extremely intense conflict with The Dark World. It was like fire and water!

The monster that was looking at Tang Zhen with hatred in its eyes also revealed a deep fear on its face the moment it saw the demon exterminating saber. It actually turned around and fled without the slightest hesitation!

“Where are you running to?”

Tang Zhen saw that the monster’s body was beginning to shrink. The energy chains had also started to shrink toward the ground. He immediately let out a furious cry and slashed his blade toward the energy chains on the ground.

argh! a scream was heard as the energy chain was cut off by the demon exterminating saber. It made a human-like sound and quickly disappeared into the ground.

The escaping monster’s body stopped for a moment, and its body began to show violent fluctuations, then suddenly exploded.

Tang Zhen put away the demon killing battle blade and glanced at the spot where the energy chain had disappeared. After letting out a soft cold snort, he quickly left The Dark World.

At the same time, the battle had ended, and everyone was injured.

The ground was littered with the remains of the monsters. Severed heads and arms were scattered in the hall, but no one paid any attention to them.

After seeing Tang Zhen appear out of thin air, all the cultivators glanced at him. Seeing that he was completely unharmed, they secretly guessed where he had gone just now.

The greater Tang Zhen’s ability was, the more they feared him. They could not help but start to ponder over his words and actions.

Tang Zhen ignored this group of people. He merely pointed at the three-headed six-armed monster on the throne and said, this monster is a puppet controlled by someone. I’ve already injured the controller just now, and what’s left is just an empty shell!

Everyone was slightly stunned when they heard this. When they looked at the monster on the throne again, they found that it indeed had no power at all. It was like a mud and wood sculpture!

From the looks of it, the truth was really as Tang Zhen had said. This fellow who seemed to have an extraordinary cultivation was merely something to scare people with. Although his combat strength was definitely not weak, he was similarly not that strong!

However, this Tang Zhen had first killed a monster and then injured the person controlling the puppets behind the scenes without anyone knowing. This caused people to be unable to help but wonder just how high his true cultivation was.

When they thought of this, everyone looked at Tang Zhen again and discovered that his aura seemed to have undergone some kind of change, causing one’s heart to palpitate slightly.

When Red Shield and the Holy master looked at Tang Zhen, their expressions changed slightly.

This was because the two of them had already faintly sensed that Tang Zhen's cultivation was the same as the two of them. He was a genuine two-star King tier!

Chapter 608 Flesh channel (1)

The two of them were puzzled. Did this guy just advance, or had he been hiding his cultivation all along?

Red Shield looked at Tang Zhen with a trace of inquiry in her eyes. The corner of her mouth twitched slightly as if she was trying to recall the places where she had never offended Tang Zhen.

The leading Holy master's expression was complicated, and there was a hint of fear in his eyes.

As Tang Zhen revealed his two-star King tier cultivation, the original balance between the two sides was broken. This caused the Holy master, who had gained the upper hand in the beginning, to feel as uncomfortable as if he had eaten a fly.

Originally, the Holy master saw that Tang Zhen's group of five was slightly weaker and could not help but have some small calculations in his heart. He was even prepared to make some moves when distributing the spoils of war.

If the plan was successful, then all the spoils of war would be given to them. As a two star King tier, the Holy master would naturally get the most out of it!

It was a pity that as the situation developed, his plan had changed one after another. First, one of his cultivators was killed by the giant. Now, Tang Zhen revealed his two star King tier cultivation, causing the five of them to instantly be at a disadvantage.

At this moment, what he needed to consider was no longer whether they would scheme against Tang Zhen. Instead, he had to be wary of Tang Zhen scheming against him!

As for situ Yuanzhi and the other one-star King tiers, they were temporarily unable to determine Tang Zhen's true cultivation level. They placed most of their attention on searching for the hidden treasure room in the building.

Tang Zhen didn't have the ability to read people's minds, so he naturally didn't know what the Holy master was thinking. Otherwise, he would definitely sneer and trick them even more thoroughly!

Although Tang Zhen knew that this group of foreign cultivators didn't have good intentions from the beginning of their cooperation, he also had his own plans.

As all the monsters were killed, the cultivators immediately began to explore and find the location of the treasure room in the building. After all, this was the key to their trip.

The ten King level cultivators spread out their spiritual energy and covered the entire building. No secret could be hidden from them.

Sure enough, in less than a few minutes, the cultivators found the treasure room on the upper level of the building.

As for the cornerstone of the giant's Tower, there was no trace of it, and no one knew where it was hidden.

No matter what, it was a good thing that they had found Lou Cheng's treasure room. The cultivators no longer hesitated and immediately headed for the treasure room.

However, when the cultivators arrived in front of the treasure room, it was as if they had been struck by lightning. The treasure room's door was not locked and was in a half-open state.

A bad feeling welled up in their hearts. The cultivators immediately rushed in, only to find that there was nothing on the ground of the treasure room. It was so clean that not even a brain was left!

"Bastard, where did all those treasures go?"

The eyes of the cultivators were burning with fire as they growled in unison.

They had tried their best to attract the monsters, and some of them had even died at the hands of the monsters. In the end, when they arrived at the treasure room, they didn't even get a single treasure. How could they not be angry?

Red Shield, who was full of anticipation, slashed at the wall to vent his frustration.

Tang Zhen swept his gaze over the expressions of all the cultivators as a thought flashed through his heart.

He could vaguely guess the whereabouts of these treasures. He wanted to take all the treasures for himself, but he felt that this was not appropriate.

Tang Zhen did not know the strength of the fellow controlling the giant behind the scenes. However, there was one thing that Tang Zhen was extremely certain of. There were definitely countless monsters guarding this fellow.

Although he had a backup plan, if it really came to that point, there would be nothing left in the giant's Tower after he activated it.

Due to the lack of time, Tang Zhen didn't collect many good things in this building. These items could help him to have a deeper understanding of the National Building, so he couldn't bear to destroy them.

Moreover, he was going to use the monsters in this building to kill the two enemy cultivators. Naturally, he could not hide his discovery.

After thinking up to this point, Tang Zhen took a step forward and looked at the cultivators. "Everyone, don't be discouraged. Those treasures shouldn't have gone missing. Perhaps this Tang has already discovered the location of the hidden treasures!"

As soon as he said this, the eyes of all the cultivators lit up at the same time and looked at Tang Zhen in unison!

They had risked their lives for the sake of profit, but the empty treasure vault had given them quite a big blow.

At this moment, when he heard Tang Zhen say that he might know the whereabouts of Lou Cheng's hidden treasure, he immediately felt invigorated and his eyes flashed with hope.

Tang Zhen did not beat around the bush when he saw this and directly stated his own judgment.

if I'm not wrong, there must be something else in the giant's body. Both the foundation stone and the treasure that disappeared are probably in the stomach of the giant!

All the cultivators frowned slightly when they heard Tang Zhen's words. They felt that it was somewhat inconceivable.

After all, the giant was made of pure flesh and blood, and there was nothing unusual about its appearance. Under normal circumstances, who would stuff a bunch of things into its body?

However, when he saw Tang Zhen's confident expression and thought about the incomparably huge body of this giant, it seemed that it was not something worth making a fuss over.

After thinking through this point, all the cultivators nodded their heads in unison, clearly agreeing with Tang Zhen's guess.

Even if some of them still had doubts, they would rather kill the wrong person than let him go. They had to check it out no matter what. They were not willing to return empty-handed.

So, the next thing to do was to find a way to enter the giant's body.

Although the defensive light barrier on the giant's body had disappeared, its skin was still as hard as steel. It would take a long time to break it from the outside.

Moreover, once a hole was cut in the giant's body, it would cause severe pain. Even if the giant was sleeping like a log, it would wake up from the pain.

Therefore, all the cultivators agreed that there must be a secret entrance in the giant's body that led directly to the inside of its body!

With a clear search target, the next thing was much easier. Sure enough, it didn't take long for someone to find something unusual in the upper area of the tower.

After receiving the signal, Tang Zhen and the rest did not hesitate and immediately ran towards the location of the signal.

In the blink of an eye, Tang Zhen and the others arrived at the end of an alley on the street. After entering a resident's house, they saw cultivator Hui who had sent the signal.

Hui was still silent. Seeing that the cultivators had arrived, he raised his hand and pointed to a wall in front of him.

All the cultivators looked over at the same time and discovered the abnormality of the wall. There seemed to be signs of closing on the wall, and there were abnormal wear and tear in some places.

When Tang Zhen and the rest were searching the other streets, they did not see any similar places. Clearly, there was something wrong with this wall.

With a sweep of his mental energy, he found that there was indeed another world on the wall, and there was a huge space behind it!

According to the position, the giant's body should be behind the wall, and the huge space should be the inside of the giant's body!

Seeing that there was indeed a hidden entrance on the giant's body, all the cultivators were overjoyed and looked forward to it.

"Don't hesitate, open it!"

As the leading Holy master spoke, two more cultivators stepped forward and each grabbed one side of the wall.

With a loud shout, the two cultivators exerted their strength at the same time and directly tore the secret door off the wall, revealing a blood-colored passage with a faint smell of blood.

The passage looked like it was made of real flesh and blood. It was translucent and emitted a faint red light. There were blood vessels and meridians in it.

If one observed it carefully, they would notice that the flesh tunnel was constantly squirming, proving that it was not dead.

The cultivators looked at each other and slowly walked in. At the same time, they were on guard in case something unexpected happened.

It was not until they entered the passage that the cultivators realized that the ground under their feet was soft and slippery. It was also slanted downwards like a sliding ladder.

When an ordinary person stood on top of the passage, they would not be able to stabilize their body at all.

The wriggling force was trying to send the cultivators into their bodies. The sticky liquid appeared from time to time in the tunnel, making it impossible to stay there.

After discovering this abnormality, the cultivators immediately floated up and continued to venture deeper.

Chapter 609 The reason and the scheme (1)

After walking along the flesh tunnel for about 500 meters, they saw that the tunnel had reached its end. At the same time, it suddenly began to bend downward.

When he looked down, he saw an extremely huge space.

At the same time, an extremely sour and disgusting smell hit their faces. It was like rotten meat that had been accumulated for many years, making them want to vomit.

The expressions of Tang Zhen's group changed. They used all sorts of methods to hide this scent. Only then did they exchange a glance with each other before they directly descended into the space below.

There was also a red light flashing inside this huge space. However, it looked very dark and was filled with a strange and sinister aura.

A series of drum-like sounds began to ring in the ears of the cultivators, making them feel like their blood was boiling.

At this moment, the cultivators realized that there was a huge blood-red Lake under their feet!

The liquid in the blood Lake was deep red and looked extremely viscous. At this time, it was constantly boiling. During this period, there were bubbles popping and releasing an unpleasant smell.

The phosphorus fires danced on the blood Lake like countless ghosts!

Just by looking at the appearance of the blood Lake, one could tell that the blood-colored mucus was similar to stomach acid. It must be extremely corrosive!

The cultivators' eyes were sharp. Before they even got close to the blood Lake, they had already discovered that there were countless human-shaped remains floating in the blood Lake.

Although most of these remains had been corroded, and some only had bones left, one could still vaguely recognize their appearance when they were alive.

"These are the residents of the bi 'an giant city!"

Someone at the side cried out in surprise, and a look of horror flashed in his eyes.

At first, they had been curious about where the residents of the giant city Tower had gone. Now that they saw the scene in front of them, the cultivators finally had an answer in their hearts.

It turned out that the residents of the giant city had all been 'eaten' by the giant!

Tang Zhen and the others exchanged glances with each other. Their expressions were also grave. They immediately became cautious when they thought about how this Blood Lake had devoured countless residents of the tower.

After all, the controller behind the scenes was hiding inside the giant's body, so they had to be on guard.

After looking for a while, he did not find anything unusual.

"we're in the air, so we can't detect those hidden places. Why don't we go down and take a look? if we encounter danger, we can immediately ask for help?"

Tang Zhen spoke in a faint voice. At the same time, he swept his gaze across the border of the blood Lake. When he used the map view to observe earlier, he discovered that there seemed to be a trace of light flickering at that place.

The cultivators nodded in unison and split into ten directions in the air, flying toward their respective targets.

The direction that Tang Zhen had chosen was the place where the light had flashed earlier. He arrived at that location in an instant.

With a wave of his hand, the shiny object that was half-submerged in the blood Lake appeared before him and floated in the air.

Tang Zhen observed it for a moment and discovered that it was a strange metal object. It was square in shape and looked extremely light.

On the surface of this item, there was a thin crystal screen. The stream of light was emitted from this crystal screen, and it seemed to flash once in a while.

Tang Zhen looked at the item in front of him and discovered that it actually had a faint technological aura. It was clearly not a product of the loucheng world.

He controlled the temperature of the air around him to rapidly increase. After the blood-colored mucus on the item evaporated, Tang Zhen activated the [all-purpose electronic kit] and chose to crack the connection.

In practically the blink of an eye, a prompt sound of successful cracking was transmitted into Tang Zhen's ears. The crystal on the surface of the object also suddenly lit up.

Sure enough, it was just as Tang Zhen had thought. This was something similar to a mobile phone that came from an unknown foreign world.

Only God knew how this thing appeared in the giant Tower City because from the beginning to the end, Tang Zhen only found this item with a technological aura in the tower City.

This also proved that in the world that the giant tower had invaded, there was no world that was based on technology. The appearance of this item was purely accidental!

It was also at this moment that the item that looked like a mobile phone was completely activated. Tang Zhen glanced at the text icon on it and randomly clicked on it.

A video suddenly appeared. After Tang Zhen looked at it a few times, his pupils slightly contracted and a trace of shock flashed on his face.

It was only at this moment that he finally knew what was wrong with the residents of the building city. They actually collectively jumped into the blood Lake to commit suicide!

At the beginning of the video, it was obviously a scene of a family reunion, which looked very happy.

Although the residents of these buildings were all of a different race, Tang Zhen could still feel a strong sense of kinship through the content of the video. It wouldn't change because of the difference in race.

However, after a few minutes, the person in the video suddenly stood up and slowly walked out of the door.

The person who recorded the video was in a similar state. He followed his family with stiff steps and walked to the wide street.

At this time, the streets were filled with dense crowds of people. They were also walking forward with blank expressions, forming a torrent.

Among the residents of the buildings, there would occasionally be a flash of struggle in the eyes of some cultivators, but they were quickly suppressed and returned to their silly appearance.

After that, the residents of the City Tower slowly moved forward and finally arrived at the door that Tang Zhen and the others had just entered and entered the passageway.

What followed was a scene of shaking and rolling. Countless people were sliding through the flesh tunnel, but strangely, no one screamed.

After sliding out of the tunnel, they fell into the huge Blood Lake like dumplings and disappeared without a trace!

However, the phone from the alternate realms that was rolling in the air still managed to capture a group of two-headed and four-armed monsters standing by the river at the moment before it landed. There was also a strange blood-red creature that looked like a giant octopus floating in the blood Lake!

The two-headed four-armed monsters on the shore seemed to be pouring something into the blood Lake. However, the scene flashed by and Tang Zhen did not see it clearly.

However, when he thought of the empty treasure room in the loucheng, Tang Zhen estimated that those treasures had most likely been poured into the blood Lake. As for the reason for this, he was still unable to determine it!

It was also at this moment that the cell phone fell to the soft ground, and the whole picture came to an abrupt end!

Tang Zhen mused for a moment. He paused the scene at the instant before he landed and carefully observed the huge octopus-like figure.

He had a vague feeling that this strange guy was the one who controlled the giant's body and caused all the residents of the tower to jump into the blood Lake!

The reason why it slaughtered the residents of the buildings, other than the possible hatred, must be related to the cultivation of these two-headed and four-armed monsters!

After all, the other party's actions were similar to that of the spirit brain corpse King.

Tang Zhen suddenly turned his head to look at the blood Lake beside him when he thought of this. A cold glint flashed in his eyes as he faintly guessed a possibility.

Tang Zhen carefully observed for a moment as he slowly flew along the edge of the blood Lake. Suddenly, his eyes focused as he stared intently at a certain spot in the blood Lake.

On the [monster detector] that had been activated long ago, a set of words suddenly jumped out, causing a trace of shock to flash in Tang Zhen's eyes.

However, Tang Zhen's eyes quickly flickered. Without anyone noticing, he secretly threw out a pile of items and slowly sank them into the blood Lake.

Next, Tang Zhen stopped at that spot. He would occasionally frown and ponder, and occasionally reveal a happy expression, causing others to mistakenly think that he had discovered something in the blood Lake.

Sure enough, in the following time, people kept looking at him with a sense of exploration, and occasionally glanced at the blood Lake in front of him.

As for the two foreign cultivators who were hostile to Tang Zhen in the distance, after searching for a while with no results, they actually flew directly toward him. They wanted to see what he had found.

Tang Zhen, who had his back facing the two opposing cultivators, had already opened his map view. After discovering their arrival, an unnoticeable sneer appeared on the corner of his mouth.

“Eh, what is this thing?”

Following Tang Zhen’s cry of surprise, he immediately extended his hand and grabbed at the blood Lake in front of him. After which, he pulled with all his strength.

He only heard a light “Hua la” sound as dozens of items the size of quail eggs covered with blood-colored mucus appeared in front of Tang Zhen.

The cultivators’ expressions changed when they saw this scene. They immediately locked onto Tang Zhen and began to quietly observe.

After wrapping them up with his mental energy, he shook them slightly. The sticky liquid on the surface of these items was immediately swept away, revealing the true appearance of these items. They were low-grade origin stones!

Chapter 610 The alien cultivators who were tricked to death _Seeing this, the cultivators were immediately overjoyed and turned their eyes to the stinky Blood Lake.

It was obvious that the treasure of the giant tower was most likely hidden in the blood Lake!

Even though the blood Lake had a strange rotten smell, as long as there was a treasure hidden inside, these cultivators could still turn it upside down!

The two foreign cultivators who were Tang Zhen’s enemies looked at each other. Their figures were like lightning as they flew directly to the sky above the blood Lake where Tang Zhen had fished out the origin stone.

The rule of the tower world was first come, first served. Even if Tang Zhen had discovered the secret of this place, someone else had occupied this place before him. Even Tang Zhen could not say anything.

Of course, if they were not satisfied, they could just fight and chase them away. This place would still belong to Tang Zhen.

Unfortunately, Tang Zhen’s goal was to attract these two fellows. How could he make a move to chase them away?

Even though Tang Zhen had become a two star King tier and had the ability to kill these two foreign cultivators at the same time, he still didn’t choose to do it himself.

There were clearly better choices, so why should he be stained with blood?

The other people didn't know what Tang Zhen was thinking. Seeing the actions of these two foreign cultivators, the surrounding cultivators shook their heads.

The leading Holy master furrowed his brows tightly, afraid that he would anger Tang Zhen.

The current situation was different from the past. The strength of the five of them was no longer as good as Tang Zhen's group. It was best not to find Tang Zhen's group.

Moreover, from the Holy master's point of view, Tang Zhen's skills were unpredictable. Even he did not have the confidence to win the battle.

Tang Zhen by the side merely sneered when he saw this scene. However, he did not say anything.

The foreign Holy master was relieved when he saw that Tang Zhen did not have any reaction. However, he felt that something was not right.

Tang Zhen put away the origin stone in his hand and turned around to walk toward the Wall of Flesh and blood not far from him. He began to study it carefully as if he didn't care about the fight between the two foreign race cultivators.

The two foreign cultivators didn't pay attention to the reactions of the other cultivators. After flying above the blood Lake, they controlled their psyche power to scoop down and then lift it up.

With the sound of water, two large balls of objects dripping with blood-red mucus were directly pulled out from the bottom of their Blood Lake.

90% of the items were bones and remains, but there were still some random items and brains of different levels mixed in.

Apart from that, there was also a half-corroded box, which was filled with sparkling origin stones!

The two foreign cultivators immediately burst into laughter upon seeing this.

Tang Zhen, who was a short distance away, noticed this scene. The corner of his mouth involuntarily twitched as an expression of not knowing whether to laugh or cry appeared on his face.

He really didn't expect that the place where he had casually thrown the bait was actually the place where the two-headed monsters had dumped their treasures. Could this be considered lucky?

However, when he thought of the things hidden in that place, a stern look flashed in Tang Zhen's eyes. When he looked at the two excited foreign race cultivators, it was as if he was looking at two dead people!

Ever since these two hostile cultivators deliberately killed a few Wanderers in front of him in order to provoke him, Tang Zhen had already put these two on the death list.

At this moment, these two fellows had already stepped into the trap that Tang Zhen had set. They were completely unaware of their situation. They were still looking at the origin stones with a triumphant expression. Their eyes were filled with pride as they swept towards Tang Zhen.

Although Tang Zhen's group could obtain more than half of the harvest according to the previous agreement.

However, according to the conventional rules of the world of loucheng, everyone had the right to choose the items they found first when distributing the loot, and they would count them as a part of their share.

The expressions on the two foreign cultivators' faces indicated that they had already made up their minds to give the origin stones to them.

However, what made them the happiest was that Tang Zhen was the first to discover this location. They were a step faster and snatched this opportunity from Tang Zhen's hands.

To be able to make Tang Zhen suffer a loss while he obtained a large amount of origin stones was naturally an extremely happy matter.

When the other cultivators saw this, their eyes revealed a trace of envy. However, they did not go forward. Instead, they began to search other areas of the blood Lake.

However, other than using the map view to observe Tang Zhen, no one discovered that a shadow had quietly floated up from the bottom of the surging Blood Lake.

The two foreign cultivators laughed out loud. They were still immersed in the joy of obtaining half a box of origin stones. From time to time, they would glance at Tang Zhen with a trace of ridicule in their eyes.

They had long found Tang Zhen an eyesore. Adding to the conflict they had earlier, they had always felt extremely deep enmity toward him.

At this moment, the two of them were cleaning up their harvest while talking in a low voice. They were talking about Tang Zhen.

"Haha, don't you think that guy is going crazy now?"

that goes without saying. Can't you see that he's studying the wall? I'm guessing that he's already wishing he could bang his head against the wall!

"Since that's the case, let's continue to salvage and let him watch from the side!"

When he said this, one of the foreign race cultivators coldly glanced at Tang Zhen. His tone was filled with killing intent.

"It's best to find an opportunity to kill him to relieve the hatred in my heart!"

The other foreign cultivator's eyes also flashed with an ominous glint. He said in a cold voice, don't worry. Let's make enough money first. Then, we'll make our move when he's alone!

that guy has a storage equipment in his hands. We'll take it with us when the time comes.

"Of course, hahaha!"

Because Tang Zhen had deliberately suppressed his cultivation aura, other than Red Shield and the leading Holy master, the rest of the cultivators were unable to determine Tang Zhen's level. They only treated him as an experienced one-star King.

This was also the reason why the two foreign cultivators dared to boast shamelessly and plot against Tang Zhen. If they knew of Tang Zhen's true cultivation, how would they dare to be so unbridled?

However, just as the two of them laughed, there was a sudden wave in the blood Lake. Then, two blood-red wrists shot out from the bottom of the lake and wrapped around their bodies at lightning speed.

Even though the two foreign cultivators wanted to teleport away, they were still a step too late. Their bodies stiffened, and they were tightly wrapped by the slender wrists and feet!

"Damn it, what the hell is this!"

its strength far exceeds ours. Let's run!

The two foreign cultivators screamed in horror. Their faces turned pale as they began to attack the wrist with all their might in an attempt to escape.

Unfortunately, the tentacles were extremely tough. No matter how the two foreign cultivators attacked, they didn't suffer much damage.

On the contrary, a cracking sound could be heard when it twisted gently. The two foreign cultivators who were entangled by it revealed a painful expression and spat out a mouthful of blood.

The blood was black, and there were pieces of internal organs mixed in!

It was obvious that the powerful force of the tentacles had broken their ribs and spines, and their internal organs were also shattered!

The two foreign cultivators hanging in the air had completely lost their ability to resist. Their faces were ashen, and they were like Ragdolls as they swayed under the tentacles.

Just at this moment, Tang Zhen, who had been studying the Wall of Flesh and blood, suddenly turned around. He tilted his head and looked at the two foreign race cultivators who were on the verge of death.

However, there was a mocking smile on his face. He looked at the two foreign cultivators as if they were idiots.

After the two foreign cultivators saw Tang Zhen's expression, their hearts trembled violently. They seemed to have thought of something as they looked at Tang Zhen with extremely venomous eyes.

At this moment, how could they still not know that they had already been schemed against by Tang Zhen?

Anger, hatred, fear, regret, and all sorts of other emotions welled up in his heart. In the end, they all turned into a sad smile.

If they had known this earlier, why would they have provoked this fellow?

If he had been more decisive back then and used all his strength to kill him, he would not have ended up like this today!

In their endless regret, the two foreign cultivators' heads drooped down and were pulled into the rolling Blood Lake by the tentacles. They were no longer alive.
