

Alternate 661

Chapter 661 The pressure and the new residential area _As the commander of this battle, Tai Seng knew that he had a heavy responsibility on his shoulders. How to win this battle beautifully was the question that he had been thinking about day and night.

As a core figure of the Holy Dragon City, few people understood the strength that the Holy Dragon City currently possessed better than him.

Before he followed Tang zhenhe and became a resident of Holy Dragon City, he would never have dreamed of the effects of many weapons and technological equipment. Even now, he would often be secretly amazed and shocked.

It could be said that aside from the Holy Dragon city's low level, its combat power was not inferior to any of the top-tier towers in the vicinity.

If the Holy Dragon City were to go to war with one of the surrounding top-notch towers one day, Tai Seng had absolute confidence that the Holy Dragon City would be the final Victor!

As the tower grew stronger, the residents of the tower would benefit a lot, but the pressure would also come.

As the soul teleportation began, a large number of elites from their original world entered the world of loucheng, injecting new vitality into the originally dead wild land.

Under the efforts of these transmigrators, in a very short time, the Barbarian land completely changed. Roads were laid out one after another, and low-level buildings appeared one after another.

It was the existence of these low-level buildings and roads that allowed the entire Wildlands to be unimpeded. At the same time, it was also firmly controlled, leaving no opportunities for the foreign races to take advantage of.

On the originally desolate and empty wilderness, there were now carriages shuttling back and forth from time to time, as well as various buildings under construction.

Although the buildings in the city were very convenient, there were also many restrictions. For the transmigrators from the original world, they still preferred to build their own houses!

It could be said that the entire Wildlands had now gathered into a large net, and the grid was gradually being filled up to become a habitable area.

As the second home of the original world's humans, they had reason to build it better so that it would be in line with the name of their future home!

It was the same for Holy Dragon City. Under the construction of these new residents, changes were happening almost every day.

The original business district had become even more prosperous. The building area had also become neater and more beautiful. With Tang Zhen's permission, a large area of building complex that could accommodate hundreds of thousands of people had already begun construction in full swing!

With Tang Zhen's help, the construction speed of this large area of buildings increased by more than ten times. It wouldn't take long for them to move in!

At that time, the residents who were unwilling to live in the city Towers could apply to move to that area, and the increase in their own attributes would not be affected at all!

Other than the improvement in their lives, the Holy Dragon city's military strength had also increased rapidly. A group of new talents who were proficient in military combat had also begun to stand out and become the backbone of the Holy Dragon City Army.

It was these situations that caused the natives to feel a sense of urgency. They began to involuntarily improve their strength and constantly work hard in their respective jobs.

Although compared to the new residents, the indigenous residents' basic education and knowledge were much worse, through acquired efforts, they were still not inferior in any way. They even had stronger potential.

Tai Seng had also realized this situation, so even though his position was unshakeable, he still felt a sense of urgency.

And this battle to conquer the overseas lands was an important operation for him to prove himself and stabilize his position. Failure was absolutely not allowed!

Fortunately, the battle situation was extremely advantageous to the Holy Dragon City. The barbarians had already become grasshoppers after autumn and could not pose any threat to the Holy Dragon City at all.

Even if the Holy Dragon City did not get rid of them, the terrifying nuclear radiation damage was enough to completely cripple them for the next six months!

And now, the Holy Dragon city's primary battle target had changed to the totem master. As long as they could capture and kill him, they could declare victory in this battle!

However, the totem Lord seemed to have realized the danger and had hidden without a trace. With its strange ability, even the tracking card could not lock onto it!

Only the heavens knew which corner this fellow was hiding in. He was using a cold gaze to continuously spy on the Holy Dragon city's search party.

.....

Holy Dragon City, outer city construction site.

The once barren gravel plain was now filled with the roar of machines. Huge high-rise buildings appeared out of thin air on this land.

With Tang Zhen's help, these buildings were successively erected in less than half a month, shocking the eyes of countless people.

According to some people's calculations, the total area of these buildings had already reached several million square meters. If it was used for living, it could definitely accommodate all the residents of the entire Holy Dragon City!

Of course, it had been proven that not all residents of the Holy Dragon City were willing to move here. Compared to the buildings, these ordinary buildings really did not give people a sense of security.

Therefore, during the calculation, less than 30% of the city's residents were willing to move here. The remaining residents would still stay in the Holy Dragon city's inner city area.

Even though the Holy Dragon city's population had already reached several hundred thousand, the incomparably huge city Tower could still accommodate them.

Moreover, not all the residents stayed in the city Tower, but because of work, a large number of them were distributed throughout the outer city, only occasionally coming back to rest for two days.

No matter how many residents of the city were willing to come here, the building was still built and was being carried out at an extremely fast speed.

Under normal circumstances, building a building in the world of loucheng was definitely an extremely difficult thing to do.

Be it building materials or supporting facilities, the building world was basically unable to produce them. They could only rely on Tang Zhen to transport them from the original world!

In order to prevent himself from becoming a Porter again, Tang Zhen directly relied on the [terrain transformation plug-in] to replace the main body of the building, which originally needed to be built with reinforced concrete, with rocks comparable to steel.

This would save him a lot of manpower and resources. After that, he only needed to build the road and then directly renovate it.

Although it looked a little rough, as long as they put in some effort in the post-processing, it was basically not much different from the normal high-rise buildings in the original world.

At this moment, a large number of hired non-human Wanderers and loucheng residents were working on the construction site, making the entire construction site extremely lively.

The outer walls and interior were refurbished and painted, water and electricity entered the house, elevators were set up, and the site was flat and green.

The work was carried out in an orderly manner, and soon the appearance of these buildings changed greatly, appearing in the eyes of the endless stream of non-Lou city residents outside the wall.

They weren't here to watch the show, but because they had a new home in these buildings.

After the construction was completed, the buyers would move in and become non-residents!

After the Holy Dragon City was upgraded to a level 6 city, Tang Zhen finally launched his real estate plan. However, his original purpose was to make money, but now it was to retain more non-city residents.

Although Tang Zhen no longer had to worry about the source of residents, the composition of human residents was not conducive to the long-term development of the Holy Dragon City.

Therefore, at the right time, Holy Dragon City would still take in some elites from other races.

The original world's material supplies were only of obvious help to Holy Dragon City in the early stages. They complemented each other's strengths and made use of the advantages of other towers and Otherworld races. This was one of the main reasons Holy Dragon City had become stronger.

Only by making these foreign tribe elites have a sense of belonging to the Holy Dragon City would they be unwilling to leave. Home was the most powerful tie!

Chapter 662 the nouveau riche buying! house and the wandering siblings

At this moment, a group of people from different races were wearing hard hats and wearing expensive clothes sold in the commercial district. They were visiting a building that had been completed under the guidance of a few girls with sweet smiles.

Whether it was the architectural style of the original world or the internal structure and decoration of the building, these foreign races were full of admiration and kept looking around.

the building that you are looking at has a total area of 200000 square meters. The area of each household is more than 200 square meters. The layout is spacious and bright.

One of the girls led the way as she introduced the place, leading the group into a well-decorated room.

As the foreigners' eyes lit up at the renovation, she smiled and continued, "after you purchase the property here, we can also provide you with renovation services. We will decorate your new home according to your wishes and guarantee that the quality will satisfy you!

An elf-like alien with slightly red skin suddenly interrupted the girl's introduction. "There's no need for further introductions. I'm very satisfied with this place. You just need to tell me how much effort it would take to move in."

Hearing this, the other foreign kinds also perked up their ears, wanting to hear the specific price.

The girl smiled and said in a clear voice, "Because this is the best house for sale, according to our budget, if you want to live here, you will need at least a million brain beads!"

After the girl said this, all the aliens present were stunned. Then, the red-skinned elf frowned and asked, "A million brain beads, are you sure you can live here with that money?"

The other foreign races also revealed the same expression, waiting for the girl's answer.

After all, from what they had just seen and heard, the living environment here was definitely top-notch. Even some city Lords would not be able to live in such a place.

Moreover, living here was equivalent to receiving the Holy Dragon city's protection. This was the most important point!

In the world of loucheng, the safety of one's residence was very important, and the Holy Dragon City could obviously provide them with this sense of security.

Due to various reasons, the foreign races present had a very high valuation of the property here. So when this girl said that she needed a million brain beads, their first reaction was that they had heard wrong!

A million brain beads was an astronomical figure for ordinary loucheng natives, but it was nothing to these foreign merchants!

In fact, the gap between the rich and the poor was more obvious in the world of loucheng. The level gap was also common, and the natives of loucheng had long been used to it.

For example, the red-skinned elf in front of him was a merchant who sold weapons and precious items. He didn't belong to any city, but he had many powerful cultivators under him.

He had been attracted by the Holy Dragon city's reputation, and after opening his eyes in the commercial district, he had bought all kinds of goods worth nearly ten million brain beads in one go!

These goods couldn't be bought on the cornerstone platform at all. They were special products of the Holy Dragon City, so when these goods were brought to the distant city to be sold, it would bring him at least ten times the profit!

There were many rich merchants like the red-skinned elves in the Holy Dragon city's business district, and they were also the most ideal customers for these real estate sales!

When the girl saw that these foreign people were silent, she thought that they were frightened by the price. She couldn't help but feel a little nervous.

However, when she understood the meaning behind their expressions and words, she immediately chuckled and said, "One million is just the base price. If you want to make your house more beautiful, you might need more than one million brain beads!"

The red-skinned elf nodded, and an expression of "I knew it" appeared on his face. After all, this price was considered normal. If it was too cheap, they wouldn't dare to buy!

After that, he stopped talking and kept looking at the interior decoration. The more he looked, the more satisfied he was.

After the tour ended, none of the foreign merchants left out their money. They all bought a house and handed it over to the Holy Dragon city's construction team to renovate!

They might not live here for a long time, but they had to keep one for themselves when they encountered such a good house, right?

The red-skinned elf even bought three sets at once. He was prepared to bring his family here and live here for a long time!

After sending off the foreign nouveau riche, the few girls immediately laughed out loud. After all, the more houses they sold, the more Commission they would get!

However, there were very few of these upstarts. Their main customers were actually non-loucheng residents who had a skill.

This was the city Lord's order, and it must be strictly carried out!

Just as everyone was discussing the foreign race's rich men, a young man and woman in plain clothes pushed open the door and slowly walked in.

They awkwardly glanced at the surrounding decorations, then quietly came in front of the girls, with an expression of inquiry.

Judging from their appearance, they seemed to have some elven bloodline. The man was strong and tall, and the girl was young but had a full chest and a perky butt. They didn't have the washboard-like bodies of the elves, and they obviously had some characteristics of other races.

Judging from their clothes, they should all be Wanderers if he was not mistaken.

I want to ask, can you really live in those newly built houses without paying first? ”

The man asked the girl who was selling the house. Even though he was as strong as a bull, he still seemed a little unconfident at this time, and his eyes were avoiding her.

The girl standing next to him had similar features to him, so she must be his sister. At this moment, her eyes were also full of anticipation as she looked at the girl in charge of selling the house.

The daughter smiled and asked the brother and sister to sit down. She said in a gentle and loud tone, ” “That's right, we can indeed provide such services, but the premise is that you must have a skill!

As long as you can prove that you have the talent in this area, you can apply for a house loan. Then, you only need to pay a portion of your brain beads every year and you can live there for a long time.

Once the 20 years are up, this house will be yours!”

When the brother and sister heard this, they immediately looked surprised. After looking at each other, the girl asked, ” “Sister, what is a skill?”

the so-called strength of a skill means that you have a certain skill or a certain special talent. Do you understand? ”

The girl nodded and said to the sales girl, ” “I have a skill, and so does my brother! Sister, can you help us with the loan?”

The saleswoman smiled and asked the two to wait. Soon, she brought in two Holy Dragon City residents in black uniforms.

One of them was holding a camera, while the other was holding a form, asking for the siblings 'names and races.

It was only then that everyone knew the names of the brother and sister. The man was called da Niu and the girl was called Xiao mang. They were both orphans and did not know their race.

After the registration, the staff asked the brother and sister to show off their skills.

Under everyone's watchful eyes, Xiao mang was clearly a little nervous, but with her brother's encouragement, she pursed her lips and slowly closed her eyes.

Just as everyone was wondering what the girl was up to, they suddenly discovered that a Black Vortex had suddenly appeared about a meter in front of the girl. It was constantly spinning and expanding.

Just as everyone was in shock, a group of furry things the size of volleyballs suddenly jumped out. They kept looking around with their big eyes and made “Ji Ji” sounds.

This kind of creature was extremely cute, silly, and cute. It made people want to keep it as a pet at first sight.

A cute appearance didn't mean that it wasn't dangerous. No one knew if this creature was aggressive, so even though this kind of furball was extremely cute, no one dared to touch it.

Only Butchie reached out to pick one up and tossed it around like a ball, causing the furball to squeak as if it were quite happy!

Just as the crowd was attracted by the girl's actions and stared at the cute fluffballs, a tall figure suddenly appeared in the hall.

Chapter 663 Special ability (1)

The figure appeared without a sound, as if it had been standing there all along.

He stood tall and straight, holding an ancient book bound with animal skin in his hand. He was looking at the vortex in front of the girl with great interest.

This person was Tang Zhen, who had returned to the Holy Dragon City not long ago. He had rushed over to see what was going on because he had sensed an abnormal spatial fluctuation.

Since no one noticed his presence, the test continued.

The vortex lasted for about half a minute before it collapsed and dissipated into the air.

Not long after the vortex disappeared, the little furballs that were running around all over the place seemed to have melted into the air, leaving no trace of their existence!

Although he did not know the use of the girl's ability, the staff of the Holy Dragon City still nodded, indicating that the girl had passed the test.

The girl cheered. Although her delicate little face was filled with exhaustion, her expression was still excited.

brother, we have a house now. We finally don't have to wander around anymore!

The muscular man beside her was also excited. He nodded at the girl and smiled.

“Sir, please show me your skills. If you and your sister both have special skills, we'll have even more preferential measures!”

After the Holy Dragon City staff explained, the man nodded and stood in the middle of the hall.

Then, he groaned and knelt on one knee, pressing his palm on the ground.

A shocking scene appeared. The originally hard ground began to gradually become transparent, allowing everyone to see the scenery below the ground.

Rocks, grass, and a pile of bones of unknown monsters were all clearly visible as if they were placed under a glass panel!

However, the range of the transparency was only a few meters, and the depth was only about one or two meters. Looking at the man's serious expression, it was obvious that he had reached his limit!

Alright, you've passed the test as well. Congratulations to you and your sister!

The staff member smiled and nodded. After shaking hands with the siblings, he took the form and the camera equipment and left.

In the eyes of the two staff members, although the siblings' abilities were special and rare, it was a pity that they were not combat-related abilities, so they did not pay much attention to them.

Da Niu's ability was pretty good. At least, when the siblings were wandering around to make a living, they could check if there was any food buried underground.

Butchie's ability, on the other hand, was a bit of a chicken rib. Although it looked very magical, according to Butchie, that kind of furball couldn't be eaten at all, and could only make "Ji Ji" sounds, and it wouldn't take long before it disappeared!

In any case, the brother and sister had passed the test and were qualified to buy a house.

Everyone who had witnessed this scene came forward one after another, asking if Xiao mang's fluffball was fun. Some people also asked da Niu if he could see through stones, wanting him to try his luck at the place where the Holy Dragon City sold spiritual Jade raw stones!

It was also at this moment that an indifferent voice sounded from behind everyone.

Your talents are very interesting. I'll take you to a place, which can also be considered as providing you with a job!

When the excited siblings heard this, they immediately turned to look in the direction of the voice, only to see a man in purple standing there, sizing them up with interest.

He was tall and had broad shoulders. With the gorgeous purple robe, he naturally exuded a dignified aura.

His eyes were particularly eye-catching, like a vast ocean or an unfathomable ancient pool. It was as if his eyes could see through everything, making people with weak minds avoid them subconsciously.

The brother and sister were slightly shocked. They didn't know who this person was and why he would say those words.

However, the people around him were stunned at first. Then, they immediately bowed and saluted with a trace of extreme piety and respect on their faces.

"Greetings to the city Lord!"

As the crowd greeted them in unison, the siblings finally knew the identity of the young man in front of them. He was actually the Holy Dragon city's city Lord!

All kinds of rumors about this legendary city Lord instantly appeared in their minds. The brother and sister were suddenly at a loss, but they also awkwardly bowed to avoid their rudeness from angering the powerful city Lord.

"No need to be so polite. I just felt something strange here, so I came to take a look."

Tang Zhen indifferently explained before walking out of the door. At the same time, he indicated for the brother and sister to follow behind him.

The brother and sister looked at each other and hesitated, not knowing if they should follow.

Just as he was feeling troubled, he saw the envious looks in the eyes of the people around him. The sales girl who had received them earlier even looked at the siblings with encouraging eyes.

Xiao mang gritted her teeth and grabbed her brother, who was in a daze, and quickly chased after Tang Zhen.

After walking outside, Tang Zhen casually waved his hand and a magic carpet that was originally tied into a cylinder instantly spread out in front of them.

It was floating half a meter above the ground, gently wriggling as if it was alive, faintly emitting an excited aura.

The brother and sister looked at this scene in surprise. Their eyes were filled with curiosity and envy as they kept sizing up the magical carpet.

"Get on, I'll take you to a place!"

After hearing Tang Zhen's words, the brother and sister no longer hesitated. Instead, they obediently sat on it.

They had finally understood that if Tang Zhen wanted to harm them, there was no need for him to go through so much trouble. He only needed to give an order and countless people would rush out to do it for him.

It was likely that his special ability, which wasn't of much use, had attracted the attention of the high and mighty city Lord. Perhaps he was going to do some research on it.

Since that was the case, she would listen to his arrangements. Perhaps she could even use this to change her fate.

The lives of Wanderers were as cheap as dirt. If they could make some sacrifices to change their fate, no one would refuse!

The three of them sat on the flying magic carpet and slowly rose into the air under the gazes of a group of onlookers, heading straight for the huge mountain in front of Holy Dragon City.

It didn't take long for Tang Zhen to land the flying magic carpet outside the spiritual race's inheritance Hall on the mountainside. He saw lingxu Zi, who was guiding the disciples in their cultivation.

In order to cultivate a group of true close-combat experts, Tang Zhen had specially selected a group of people with excellent qualifications from the residents of the Holy Dragon City. They would formally acknowledge Ling xuzi as their master and learn the true cultivation techniques and secret techniques of the spirit race!

Lingxu Zi was bored to begin with, and he had his own plans. Therefore, he agreed to Tang Zhen's request without hesitation.

Lingxu Zi had always paid close attention to the transmigrators who had taken over the bodies of the elites of the spirit clan. In order to meet the new generation of the spirit clan as soon as possible, he even disguised himself as the moon elder to create as many opportunities for the young men and women to be alone as possible.

This kind of thing was explicitly forbidden in many places, and even strictly restricted the contact between male and female disciples. However, lingxu Zi seemed to encourage it.

Senior brother and Junior Sister interacted with each other day and night, and with constant contact and understanding, some things naturally happened.

&Nbsp; several female disciples were already pregnant, and the unborn children all had pure spirit race blood!

After learning about this, lingxu Zi was so happy that his face bloomed. He studied all kinds of nourishments every day, afraid that the hope of the spirit clan would be lost.

After seeing the continuation of the spiritual race's bloodline, the resentment he had for the injustice of the heavens gradually disappeared. It was as if he had been reborn.

Chapter 664 The special usage of special abilities _Lingxu Zi and his disciple did not dare to delay when they saw Tang Zhen. They quickly stood up and bowed to him.

Both Tang Zhen's identity and cultivation base made lingxu Zi respect him. He didn't dare to be rude.

As his understanding of the world of loucheng deepened, he also became more aware of Holy Dragon city's potential. He also knew that Tang Zhen's future would definitely not stop here.

Lingxu Zi, who was trying to use Holy Dragon City to revive the Eldars, naturally hoped that Holy Dragon City would be as strong as possible!

If the spirit race wanted to rise again in the future, they would definitely need Tang Zhen's help. Otherwise, it was difficult to guarantee that they would be like the countless races in this world of towers, quietly annihilated in the long river of time.

"Greetings to the city Lord, may I know why you have come here?"

Lingxu Zi asked Tang Zhen as he glanced at the curious Daniu siblings behind him.

I just discovered two young people with special talents, so I brought them here for you to see.

As Tang Zhen spoke, he slowly sat down at the table beside him. Lingxu Zi's disciple immediately poured him tea with a respectful expression.

This disciple was a martial arts fanatic. He worshipped the strong, and Tang Zhen was one of the cultivators he admired the most!

“Daniu, xiaomang, this is Mr. Lingxu Zi. Show him your abilities.”

The Daniu siblings nodded and immediately displayed their abilities one by one. Then, they stood aside silently.

Lingxu Zi’s eyes lit up, but he seemed to be in deep thought. After pondering for a while, he looked at Tang Zhen.

“Da Niu’s ability should be an innate ability of a certain race. However, because he’s a mixed-blood, some kind of mutation occurred, which allowed him to turn the ground transparent!

If this ability is strengthened and the range of my x-ray vision continues to increase, it will definitely have an unexpected scouting effect!”

Tang Zhen nodded. It was obvious that he agreed with lingxu Zi.

as for Butchie’s ability, Chi Chi.

Lingxu Zi paused for a second and frowned. Then he continued, “This should be an extremely rare spatial summoning ability that can summon creatures from unknown worlds.

As long as the summoning channel is kept open, the summoned creatures from other planes will not disappear!”

“It’s just that Xiao Mahn doesn’t have any cultivation at the moment, which makes it impossible for her to maintain this summoning state for a long time. Moreover, the creatures she summons are all creatures with no combat power.

If she becomes a cultivator and continues to increase her level, I estimate that the creatures she summons in the future will all have powerful combat power, even far beyond her own cultivation!”

Lingxu Zi said with a slight nod, “The abilities of these two siblings are not bad. Once they become advanced cultivators, they will definitely be a great help to our Holy Dragon City!”

Then, lingxu Zi paused and said with a trace of doubt, “ there’s just one thing I don’t understand. My Holy Dragon City doesn’t lack cultivators with superb combat strength. Why does the city Lord value these two siblings so much? ”

Tang Zhen put the teacup aside and said to lingxu Zi, “ you only saw the most basic performance of this special ability, but have you ever thought about how to fully utilize it? ”

“I’m slow-witted, please advise me, city Lord?”

let’s talk about da Niu’s ability first. You should know the characteristics of the world’s origin. Some will hide in the body of the indigenous people, and some will hide deep underground. They can’t be detected by spiritual power skills and can only be discovered in close proximity!

Lingxu Zi nodded and glanced at Daniu. He said thoughtfully, “You’re talking about Yingluo?”

“That’s right, I want to develop all of da Niu’s potential and let him use his special ability to help us search for the world’s origin hidden underground!

Even though his detection range was pitifully small, that was because he had no cultivation.

Once he became an advanced cultivator, the range of his detection would expand limitlessly. It could be a few kilometers, or dozens of kilometers, or even hundreds of kilometers!

With this ability, the chances of discovering the world’s origin will be greatly increased, and it will save us a lot of time!”

Tang Zhen paused when he said this. He picked up the teacup and took a sip before looking at Butchie, who was looking around with a curious expression.

“As for Butchie’s summoning ability, it’s also extremely useful. Let’s not talk about her combat power, just her ability to summon creatures from other planes has great value!

Whenever a country’s Lou Cheng invades a foreign world, Lou Cheng must also enter it and descend into the foreign world with his main body!

Before he obtained enough origin of the world, unless the city was destroyed to the point of destruction, he would never be able to teleport back to the world of the city!

It was just that because they had to slowly break through the space wall of the Otherworld, the process of descending was very long. It could be as short as a few days, and as long as it was a few years. This also caused many of the Otherworld’s Aborigines to be on guard and even make preparations to attack in advance!

Therefore, when loucheng enters the other world, they will inevitably be attacked by the Aborigines. Some unlucky loucheng might not even be able to launch an invasion before their city is almost destroyed by the Aborigines, and they will be directly teleported back to the loucheng world!”

When Tang Zhen said this, he pointed at Xiao mang and said, ” “In the world of loucheng, the strong preyed on the weak. If you don’t advance, you’ll fall back. So, if the Holy Dragon City wants to exist for a long time, it’s inevitable that it will invade other worlds. This is the limit of the law and can’t be changed at all!

However, that kind of passive way of descending wasn’t suitable for Holy Dragon City, so I was preparing to change to a new method, and Butchie’s ability could be used.

As long as she appeared in the invaded world and used her ability to summon the Holy Dragon city’s cultivators, the situation of being passively beaten would immediately be reversed. It could even directly cause the invading world to be in chaos!

This way, the Holy Dragon City will be able to obtain the heart of the origin that invades the world at the lowest cost!”

Lingxu Zi nodded. He now completely understood Tang Zhen’s thoughts and knew that the only problem now was how to get Butchie to target the Holy Dragon City cultivators.

If it really succeeded, then this would become an extremely powerful ability, and he could summon the cultivators of Holy Dragon City anytime, anywhere.

Even in the world of towers, this ability could shine. Using this kind of spacetime tunnel-like ability, it could send the Holy Dragon City cultivators millions of miles away in an instant!

If there were a few more cultivators with Xiao mang's ability, then the Holy Dragon City would be able to send out a few cultivators and instantly summon countless troops to attack the enemy's Square city. They could even save the time of traveling!

The more lingxu Zi thought about it, the more he felt the importance of Xiao mang's ability. He also guessed the reason why Tang Zhen had brought the brother and sister to him.

He had done a lot of research on spatial magic, and the abilities of Xiao mang and da Niu were closely related to spatial magic.

Tang Zhen wanted to discover the potential of this pair of brother and sister by himself. At the same time, he wanted to see if there was any possibility of replicating this ability and use it to nurture more cultivators in this aspect!

It seemed that the city Lord in front of him had a big plan. He had already begun preparations before the city was promoted to a national level.

However, it made sense. After all, with the Holy Dragon city's current strength, conquering the overseas region was only a matter of time.

When the Holy Dragon City was promoted to level 9, it would officially begin to invade the other world and obtain the qualifications to upgrade to a national-level city, so it was not too much to make early preparations!

Tang Zhen looked at lingxu Zi's understanding expression and cupped his hands with a smile. "Sir must have already guessed the purpose of this trip, so this Tang won't say any more nonsense. I'll have to trouble Sir to deal with everything!"

Lingxu Zi hurriedly replied, " you're too kind, city Lord. I'm also a part of the Holy Dragon City. These are things that I can't shirk from. How can you say it's troublesome? "

Tang Zhen nodded and did not speak any more nonsense. After having the DA Niu siblings stay here, he turned around and returned to the Holy Dragon City.

Chapter 665 The battle situation and the development of loucheng's technology

In the Holy Dragon city's Lord's Hall, Tang Zhen looked at the large pile of information and battle reports in front of him, and his brows slightly furrowed.

The first thing he picked up and read was the battle report on the Kobold loucheng area.

The Army from the original world had invaded the territory of the dog-headed people and had now fallen into a stalemate. Under the guerilla harassment of the dog-headed people, the well-prepared Army from the original world had actually suffered quite a number of casualties.

This situation was expected, but when it really happened, it was still hard to accept.

At this time, the total number of people in the Army in the original world had exceeded 500000, and most of them were combat personnel.

There were more than 200000 Warriors taking part in the siege of the dog-headed people's city, and they attacked from four different directions!

It was unbelievable that such a powerful combat force couldn't deal with a group of natives in the tower.

However, if one were to analyze it carefully, one would realize that this was an inevitable situation. It was simply unavoidable.

More than 200000 people sounded like a lot, but when scattered in this vast area, it did not cause much of a wave at all.

The unique conditions of the world of loucheng also forced the Army in the original world to use human wave tactics to ensure that they could launch an effective attack on the enemy!

This was because after being bombarded by the cannons, these kobolds would not stay in one place at all. Instead, they would scurry around like rats, taking a bite whenever they found an opportunity.

If they wanted to deal with such an enemy, they would simply be sending themselves to their deaths if they had fewer people!

Although the Army in the original world had already conquered one-fifth of the territory controlled by the kobolds, it was starting to become extremely difficult for them to advance on a large scale.

The world of loucheng was different from the original world. The logistics here was extremely difficult. If it wasn't for the storage card provided by Tang Zhen, these Army's chariots and weapons would have found it difficult to move even an inch!

Moreover, under the fearless attacks of the kobolds, fierce battles often broke out in the occupied and defended areas. After killing one wave, another wave would come. It was truly endless!

In the process of fighting with the Army in the original world, these kobolds had also been constantly improving. The initial suicidal charge had long since ceased.

They attacked with blow darts, traps, and all sorts of weapons, catching the soldiers off guard.

Even though the bodies of the transmigrators were very strong, they could not withstand such attacks. This caused more and more soldiers to recuperate from their injuries, and the number of patrolling guards became more and more tight.

The frontline commander wanted to seek reinforcements, but after some consideration, he could only give up.

This was because the other occupied areas also needed troops to defend and suppress the bandits. It was impossible to transfer enough reinforcements to help!

Due to this situation, some people suggested using missiles to attack the Kobold capital city. As long as they could destroy the core controller of the kobolds, they would not hesitate to destroy an entire area.

Regarding this proposal, the supporters and the oppositions each accounted for half, and there was no definite decision at the moment.

However, from Tang Zhen's point of view, the possibility of the Army in the original world using missiles to attack the Kobold Kingdom was extremely high. After all, compared to the vast world of towers, there were countless lands that could be occupied. The existence of a wasteland could be completely ignored.

However, they were also afraid in their hearts because Tang Zhen had once warned the heads of their cooperative partners about the dangerous anomalies that might occur after the large-scale use of nuclear bombs.

The world of loucheng was strange and unpredictable, and such a change could even occur in the legions of the original world, turning these Legion soldiers into powerful monsters!

If that situation really happened, it would be a destructive blow to the Army in the original world!

Therefore, although missile attacks might be used, it was absolutely impossible to use it on a large scale. This was already a matter of course, and there would definitely be no deviation.

In fact, from Tang Zhen's point of view, these business partners who had the support of their respective interest groups were a little anxious at this moment. All of them could not wait to eat until they became fat before dividing up the areas under their control.

Unfortunately, due to the limitations of the teleportation ability and various other aspects, they could not invest more troops, which led to the current situation of a lack of stamina.

Of course, this was only a short-term problem. With the full support of the original world, there would be more armies from the original world that would transmigrate in the future. It was only a matter of time before the kobolds were destroyed.

In fact, their partners in the original world had also realized many problems and were actively making improvements. Some factories that used construction robots had also begun to be built in the world of loucheng, so that some logistics supplies could also be produced in the world of loucheng.

When it came to this, it was necessary to mention the Holy Dragon city's current technological power.

Due to the terobo technology provided by Tang Zhen, the intelligence level of these factories had been greatly improved. Sometimes, only a few workers were needed to manage the entire factory!

Moreover, these modular factories could be moved at any time. They were extremely flexible and were comparable to mobile production bases.

If this trend continued, perhaps one day in the future, a soldier with a storage card would be able to build a base in a resource-rich area and carry out invasion and occupation activities!

Tang Zhen was also extremely interested in this kind of mobile factory. Therefore, during the research process, the Holy Dragon city's scientific researchers also participated and obtained satisfactory results!

After the expected plan was realized, he would be able to carry a war base with him and carry out conquest operations in the foreign world, just like Tang Zhen had envisioned!

In addition to this automatic production base, the Holy Dragon city's experiments on the use of the brain pearls had also made amazing progress.

Under the research of the Goblin luta and many researchers, the Holy Dragon City had successfully developed a long-lasting and powerful propulsion device by combining the energy conversion device that Tang Zhen had brought back from the ruins of the wizard World with the technology of the terobo people.

The fighting robots that were tested some time ago were driven by this power device. It was not only safe but also extremely long-lasting!

When the power device was put into production, the original engine of the tank could be replaced, so that it could have a longer lasting power, and the weight and space would also be greatly improved!

Now, the researchers were trying to design an upgraded version with more powerful mobility. If they were successful, it would no longer be a dream for the Holy Dragon Army to be equipped with passenger aircraft on a large scale.

Therefore, for the current Holy Dragon City, the more brain pearls they had, the better. They were important strategic resources in the future!

In addition to this kind of power device, the Holy Dragon city's war robot research had not been interrupted. The more lethal and intelligent all-weather fighting robot had also entered the experimental stage.

It was just that the cost of these robots was too high. Even with the Holy Dragon city's current resource reserves, they could not mass produce them. Perhaps they could only wait until they occupied a certain foreign world and plundered all its resources. Only then would it be possible to mass-produce them!

Other than that, the Holy Dragon City was also developing mech exoskeleton armors, more powerful laser electromagnetic guns, personal shields, individual support equipment, quick healing injections, and other important items.

Currently, city Building No. 2 was filled with busy scientific researchers, who were all engaged in war-related research work.

This place had also become the area with the highest level of security in the Holy Dragon City. Almost every corner was under the strict surveillance of the Holy Dragon city's cultivators. Even a mouse could not easily sneak in!

Tang Zhen was also paying close attention to this place. As long as he had free time, he would come here and discuss some problems with the researchers.

After all, other than technological abilities, there were also some mysterious abilities that could be combined with technology to produce unbelievable magical effects!

For example, the Holy Dragon City was currently developing a type of battle armor. It was the product of the combination of technology and runic magic circles. Not only did it have an extremely strong defense,

but it could also achieve invisibility, shield against detection, adjust the internal environment, and other functions.

The runic magic circle was one of the few functions that improved the stealth and the internal environment. It also greatly improved the safety and comfort of the user of the armor!

To the Holy Dragon city's soldiers, wearing such a high-tech battle armor was undoubtedly a form of enjoyment. They did not have to worry about the battle armor sticking to their clothes in the cold, and when the weather was hot, it was as if they were in a steamer!

Just as Tang Zhen was deep in thought, his assistant gently walked in and said to Tang Zhen, city Lord, commander Tai Seng sent a message saying that he has already locked onto the totem master's exact hiding place!

Tang Zhen's brows twitched when he heard this. A trace of a cold smile was revealed on the corner of his mouth as he directly stood up from his chair.

inform all the Lieutenant Colonel (two star feudal lord) cultivators in the Holy Dragon City to put down their work and immediately gather at the back Valley.

While he was speaking, Tang Zhen had swiftly changed into a purple-gold battle armor. A faint killing intent was faintly visible on his body.

"This time, I will make it impossible for the totem master to escape even if he has wings!"

Chapter 666 all the elites are out (1)

The city Lord's words carried enormous weight, and he practically carried out his orders strictly. No one dared to disobey.

In addition to the city Lord's control over the city and its residents, a powerful strength was also a guarantee of the city Lord's dignity. While it made the surrounding powerful enemies fear him, it also had a certain deterrent effect on the residents.

If the city Lord gave an order but was not effectively executed, it meant that the tower was in danger and could be destroyed by the enemy and their own people at any time!

Of course, this kind of unstable situation in the current Holy Dragon City could not be seen at all!

Following Tang Zhen's orders, from time to time, there would be figures as fast as lightning in various areas of the Holy Dragon City. They would quickly rush to the valley area at the back of the Holy Dragon City.

After arriving at the back Valley, these people revealed their true appearances. They were all high-level cultivators of the Holy Dragon City!

All of them were wearing black battle armors and exuded a terrifying aura. Just by standing there quietly, they gave off a huge sense of oppression.

It was to the extent that when these cultivators appeared, the workers in the back Valley all dodged to the side and heaved a sigh of relief.

When they looked at these powerful cultivators again, they were shocked to find that none of them were lower than Level 7!

Seventh grade cultivators were enough to become the Overlord of a small area. In the outside world, they were even enough to be the Lords of a city. However, there was a large group of them in the Holy Dragon City!

Everyone was stunned. Since when did Holy Dragon City become so powerful and have so many powerful cultivators?

While the residents were puzzled, a strong sense of pride and honor rose in their hearts. They were proud to be a citizen of Holy Dragon City!

At this time, the cultivators who were being watched by the residents of the City Tower did not feel uncomfortable at all. After all, they were all residents of the Holy Dragon City and had more or less interacted with each other.

While waiting, they saw acquaintances passing by. These powerful cultivators were like ordinary people, casually chatting with them, not caring that they were just ordinary residents.

Fatty, mo ran, lingxu Zi, and the others were all high-level cultivators that everyone in the Holy Dragon City knew. Even lingxu Zi was a one-star King!

Other than these people, there were also a few Holy Dragon City cultivators who had advanced to sixth level Lord.

They were the Holy Dragon city's Secret weapon. If they had not received Tang Zhen's orders, these cultivators would not have appeared so easily. Instead, they would have continued to cultivate and consolidate their cultivation.

In addition to these cultivators, there were also some high-level foreign cultivators who had joined the Holy Dragon City for various reasons, but were usually very low-key.

Although most of them were not residents of Holy Dragon City, they still did not treat themselves as outsiders. They were very familiar with the residents.

Even the foreign cultivators who had been captured by the Holy Dragon City and forced to sign a soul contract were no longer as dejected as before. On the contrary, their faces were glowing, and it was clear that they were living a very comfortable life.

There were even some foreign cultivators who had secretly pondered about how to stay in Holy Dragon City after the contract period ended!

However, there was only a single thought in their hearts at this moment. Why did Tang Zhen gather all of them together?

With so many high-level cultivators gathered together, it was definitely a terrifying force. Even if they launched an attack on a top-tier city, they would have at least a 30% chance of winning!

With such terrifying combat power, the enemy he was dealing with was definitely not simple!

Just as everyone was mulling this over, a figure suddenly descended from the sky and appeared in front of everyone.

Tang Zhen was currently wearing a purple-gold heavy armor. The wings on his back were slowly retracted. His aura was as steady as a mountain as his gaze slowly swept across the cultivators present.

“Everyone, I’ve gathered you here this time because the traces of the totem master have been found on the overseas battlefield.

If the Holy Dragon City wanted to upgrade to a level Seven city, it would have to kill the totem Lord. This was a mission that could not be avoided.

I don’t need to say it, everyone should know that the totem Masters are strange and unpredictable, and their ability to escape is extremely amazing!

In order to ensure that we can capture and kill him in one shot, we must step into an inescapable net and strive to succeed in one strike!

Everyone’s main task is to set up a defensive circle on the periphery, clean up the barbarians and monsters, and stop the totem master from escaping at the critical moment. Mister lingxu Zi and I will deal with the totem master personally!”

Tang Zhen gently waved his hand at everyone when he said this.

“Everyone, let’s go!”

After speaking, Tang Zhen quickly turned around and directly stepped through the huge bronze door.

The cultivators followed closely behind. Under the gazes of the Holy Dragon city’s residents, they headed to the overseas region one after another!

.....

In the overseas region, there was a Valley area surrounded by giant trees.

Just as the troops were advancing towards the position of the totem master and surrounded the area, Tang Zhen and the Holy Dragon city’s cultivators suddenly appeared and went straight for the center of the encirclement.

Looking down from the sky, a huge ruin appeared in everyone’s eyes. Even though it was covered by countless green vines, it was still difficult to hide its former glory.

There were huge stone buildings, strange stone statues, and a huge but now pockmarked square. Traces of the battle from back then could still be seen.

This was once the territory of another barbarian tribe that had ruled the overseas region before the Mang ya tribe had taken over the land. However, with the invasion of the cultivators in the tower and the rise of the Mang ya tribe, this place had been completely abandoned!

According to the Holy Dragon City cultivators’ investigation, they could basically confirm that the totem master was hiding here!

Although he didn't know why it chose to hide here, this wasn't important, because no matter how much the totem master struggled to hide, it would still be difficult to escape death!

After all, if they didn't kill it, Holy Dragon City wouldn't be able to upgrade to a level Seven city. How could Tang Zhen allow it to continue to exist?

With the arrival of Tang Zhen and the rest, the encirclement had already been completely closed. Countless guns were pointed in their direction.

The five thousand Holy Dragon City cultivators quickly followed Tang Zhen and the rest. They drew closer to the giant ruins, their weapons unsheathed and filled with killing intent.

Just as everyone stepped into the ruins, strange figures kept flashing from within the collapsed stone buildings. They frantically pounced toward Tang Zhen and the others.

They were no strangers to these figures because they were the remaining enemies of the Barbarian race who had been forced to the end of the road.

However, the barbarians' appearances were extremely ferocious and terrifying. They looked like evil ghosts and monsters. The hatred in their eyes was almost tangible.

Its blood-red eyes, messy hair, and the strange growls that it kept letting out made people frown.

What was even more shocking was that most of their bodies had rotted, and their skin was full of pustules and blood blisters, from which pus and blood kept flowing. The stench was even more nauseating.

Only God knew what kind of method the totem master had used to turn these barbarians into such a state that was neither human nor ghost. Even their consciousness had been completely lost.

However, the advantage of this was that these barbarians had become even crazier and fearless of death. They were determined to kill the Holy Dragon City cultivators!

After these monsters appeared, in the blink of an eye, they were already engaged in a battle with the Holy Dragon City cultivators.

For a moment, the entire ruins were filled with Flashing Blade lights and splattering blood and flesh. The Holy Dragon City cultivators' roars and monsters' howls were mixed together, and the sound almost resounded through the clouds.

Tang Zhen and the others took the lead. They completely ignored the monsters that were blocking their way as they headed straight for the center of the ruins.

Any monster that tried to block their way was killed by them before they could even get within ten meters of them, leaving a path of minced meat, dirty blood, and internal organs.

No matter how crazy the Barbarian monsters were, they couldn't stop these terrifying high-level cultivators. They would die in vain if they rushed over!

Before they knew it, they had already rushed out of the area where the monsters were ambushing and arrived at a huge square.

Chapter 667 The great formation of flesh and blood

On this huge square, there were deep holes everywhere, which had smashed the thick stone slabs into pieces!

These were all traces of the war from back then. Just from this, one could tell how brutal the battle was.

Today, another battle was about to break out here!

A series of deep roars sounded, and super Giants with twisted bodies walked out from behind dozens of huge stone pillars one after another!

Although they were called Giants, they were actually giant monsters!

Their appearances were all different. Some were in the shape of humans, some were completely in the shape of monsters, and some were simply stitched together!

These monsters strode forward with their thick and huge legs, emitting a nauseating stench of decay as they quickly pounced on the crowd.

As they ran, Blood and Oil dripped from their bodies, attracting groups of strange insects that were chasing after them, constantly crawling back and forth on their bodies.

Most of the monsters had weapons in their hands. Although they looked crude, their destructive power was definitely not to be underestimated!

There were also some monsters that were either lifting huge rocks or uprooting large trees, constantly throwing them at Tang Zhen and the others.

The rocks smashed into the ground with a " Bang Bang " sound, and the gravel kept shooting in all directions. The power was no less than that of bullets.

Without waiting for Tang Zhen to speak, the Lord-tier cultivators beside him roared and rushed out like lightning. They waved their sabers and charged at the giant monsters.

They were constantly moving around, nimbly circling around the monsters and attacking them with ease.

The sharp battle blade continuously slashed across the monsters' bodies, causing them to howl in pain. However, as they could not attack the Holy Dragon City cultivators, they could only smash around madly.

Tang Zhen scanned his surroundings. After seeing that the huge monsters were being held back by the Holy Dragon City cultivators, he continued to move forward.

After passing through a broken wall, they saw a broken Hall and hundreds of different totem statues placed in the square in front of the hall!

It turned out that the missing totems and statues were all gathered here!

At this moment, a blood-red mist spread out in the air above these statues, covering the entire Hall and the small square.

From time to time, this blood mist would transform into malevolent-looking spirit bodies that would continuously roar at Tang Zhen and the others. Their eyes were filled with endless greed and ferocity!

Within this blood-colored fog, there seemed to be countless shadows of different heights that were appearing and disappearing from time to time. They seemed to be looking at Tang Zhen's group with vicious gazes. There seemed to be a tangible hatred and killing intent within them.

There was obviously something wrong with the blood mist. Even though they were not close to the blood-red area, they could still feel their hearts beating wildly and negative emotions constantly emerging.

It was obvious that the blood mist formation set up by the totem statues had some strange effect. Everyone knew that they must not rashly enter it before they figured it out!

Seeing this, Lingxu Zi slightly raised his eyebrows and stepped out of the crowd, pointing at the totem stone sculpture.

A moon-white force suddenly appeared and instantly bombarded the blood mist.

A blood-red light screen appeared, trying to block the attack. But the king level attack was too powerful. The blood-red light screen couldn't block the attack, and it burst like a bubble.

The greatly reduced power of the Qi penetrated the blood mist and directly fell on a totem statue. With a "Chi" sound, a piece of the statue was instantly cut off.

It was almost as if a scream had just been heard, coming from none other than the totem statue!

A strange scene appeared. It turned out that after the totem statue was damaged by the Qi force, a foul-smelling and sticky blood flowed out from the damaged area, as if it was made of flesh and blood.

At the same time, a large amount of blood mist gathered near the wound, and the wound instantly recovered!

Lingxu Zi pondered for a few seconds and disappeared instantly. Soon, he returned quickly with a monster that looked like a wild boar in his hand.

He casually threw the struggling monster into the blood mist. This time, the monster was not blocked by the blood-red light curtain and was directly thrown in.

At this moment, the monster let out a blood-curdling screech. Then, everyone saw the monster run madly out of the blood mist, its skin and flesh withering at a speed visible to the naked eye.

By the time the blood mist reached the edge, the monster had already become as thin as a stick. It fell to the ground and no longer moved. It was obviously dead.

At the same time, countless blood-colored worms flew out from the monster's body. They were shaped like earthworms, but they had a myriad of strange heads. They were looking at Tang Zhen and the others with a strange expression.

At the sight of this, Lingxu Zi turned to Tang Zhen and said, "These totem spirits must've constructed a blood and flesh protection formation that uses the blood and flesh offered by the barbarians as power

and the seven emotions and six desires as a means of attack. Once you enter it, your blood essence will be sucked dry by the strange insects in the blood mist!

And the more extreme the emotions of the sacrifice, the more powerful the formation will be. Just by looking at the towering resentment and killing intent, I know that the power of this formation can not be underestimated!”

Tang Zhen frowned slightly. He glanced at the large hall that was covered by a blood fog. This was because, according to the information, it was very likely that the totem master was hiding within it!

However, Tang Zhen did not see it this way. This was because this did not match the rumors of the totem master!

Although he had never come into contact with the totem master, from all kinds of rumors, the totem master had always been known for his strange means. Many buildings had been schemed against by the totem master in the overseas lands.

Therefore, it was unknown whether the totem master was here or not. At least, Tang Zhen was certain that the totem master would not just sit in the hall and wait for death. He would definitely use a method that he could not imagine to play tricks!

“If I were to force my way through, would I be able to get through?”

Tang Zhen’s eyes narrowed as he looked at the blood fog that was continuously churning and asked.

“I don’t suggest you force your way in. After all, the totem master is also a cultivator from another world. His cultivation is definitely not inferior to you and me. The flesh and blood protection array he built is definitely not as simple as it looks!

However, I estimate that even if we use cannons to attack, the flesh and blood protection array will not last long. As long as we consume the array’s supply of flesh and blood and stop it from absorbing more blood essence, the array will collapse due to the lack of energy!”

Lingxu Zi explained with a serious expression.

Tang Zhen gently nodded his head and ordered everyone to retreat. After which, he informed the cannons to lock onto the location of this flesh formation and prepared to blast it apart!

In fact, he could still summon meteorites and flying swords to attack with the help of the mobile phone, but it was not the right time to show them.

Following Tang Zhen’s order, the cannons that had been waiting outside for a long time immediately began to fire. Under the guidance of the heavenly eye, they accurately bombarded the flesh array. The violent explosion was earth-shaking.

After the flesh array was attacked, a thick blood-colored light screen immediately appeared on the surface of the array in an attempt to block the bombardment of the cannonballs.

While blocking the bombardment of the cannonballs, the blood-red light screen flickered continuously. The faces of the Barbarian men and women, who were either growling ferociously or crying in grief, appeared continuously.

Tang Zhen's group quietly watched this scene. At the same time, they also focused their attention to observe the minute changes on the blood-colored light curtain.

Needless to say, the weapons in the original world were powerful. Even though the blood-red light curtain had amazing defensive power, it relied on the flesh and blood of the barbarians in the array as energy. Every time it suffered a blast, it was unknown how many barbarians would exhaust their blood essence!

Cannonballs continued to land on the flesh array one after another. The protective light curtain thinned at a speed visible to the naked eye. A faint wail seemed to penetrate the rumbling explosion and entered everyone's ears clearly.

Two minutes later, a Cannonball suddenly pierced through the protective light curtain and landed directly in the middle of the flesh array!

Chapter 668 fleeing without a trace _Although the flesh array had the ability to confuse and suck blood, its most important function was still protection!

Tang Zhen still needed to study the specific reason for protecting the hall.

It relied on the sacrifice of barbarians, the absorption of the blood essence of intruders, and even the cultivation of the totem spirits to form a blood-red light curtain to firmly protect the hall.

If the protective light curtain lost its protective function, it was basically equivalent to being scrapped. This also meant that the Barbarian sacrifice had reached the bottom of the oil lamp and could no longer provide a large amount of energy.

After the cannon landed, it suddenly set off a huge wave in the array of flesh and blood. Countless shriveled corpses flew out of the blood mist, sent flying everywhere by the shock waves of the explosion.

They were the barbarians who were hiding in the flesh formation and providing energy for the formation. However, their blood essence had been sucked dry by the formation and they had become completely dried corpses!

In fact, before these barbarians entered the formation, they already knew their final fate. However, no one refused.

As long as they could kill their enemies, the barbarians would enter without any hesitation and sacrifice their lives!

As long as they can deal a heavy blow to the invaders and take revenge for their families, they will die without any regrets!"

As the blood-red light-curtain was completely shattered, more and more cannonballs fell into the flesh array, setting off a wave of blood and flesh. Countless pieces of corpses flew into the sky!

Even the barbarians who had not died from the sacrifice earlier were smashed into pieces by the cannonballs at this moment.

The blood and flesh array that the totem Lord had meticulously set up could definitely kill countless cultivators in Lou city. At this moment, under the bombardment of the Holy Dragon city's cannons, it was completely destroyed before it even worked!

The cultivators at the side sighed with emotion after witnessing this scene. They wondered if they could withstand the bombardment of such a terrifying weapon with their own bodies!

At the same time the flesh array was broken, the totem spirits who had participated in the construction of the flesh array but were actually trapped in it were suddenly in a mess.

They flew out from the broken statues, screaming in fear, their bodies slowly turning into monsters.

There were also some totems that were not affected by the explosion, and they were controlling their tribesmen who were not completely dead, running for their lives with their own statues in their arms.

Tang Zhen's eyes turned cold when he saw this. He ordered them to stop firing the cannon before he took the lead and charged forward.

"Stop these totem spirits, don't let a single one go!"

While he was speaking, Tang Zhen had already waved his arms and killed the two barbarians who were the furthest away. The totem statue also rolled to the ground!

Tang Zhen's action did not stop after he had casually killed the two barbarians. Instead, he quickly rushed past the bluestone square that was filled with corpses and directly rushed towards the dilapidated Hall.

Lingxu Zi followed him closely with a flying sword circling around him. He was holding a green long sword, which was obviously not an ordinary sword.

There was no cover at the entrance of the huge stone Hall. Tang Zhen's speed advantage was extremely fast. Therefore, he had already rushed into the hall in the blink of an eye.

At this moment, an extremely tragic scene appeared in front of Tang Zhen's eyes!

Countless corpses of barbarians were lying in the hall. They had either died from poisoning or suicide. The corpses were piled up densely and were all twisted in pain.

In the center of the hall, there was a huge mountain of corpses. It was piled up by countless barbarian corpses, almost touching the top of the hall.

A dark and strange totem statue was at the top of the mountain of corpses. Countless roots that looked like blood vessels were spreading out from the bottom of the statue, deeply piercing into the blood of the corpses.

The statue had four huge teeth, and its body looked like a crocodile. This was the body of the totem Lord!

Tang Zhen coldly looked at the statue. He kept feeling that there was something wrong. It was as if this statue was a dead object and did not have the aura of a spirit body at all!

He waved his hand at the statue. After which, the statue suddenly flew up from the mountain of corpses and slowly floated in front of Tang Zhen.

At the sight of this, Tang Zhen and Lingxu Zi's faces turned grim at the same time!

Looking at the totem statue again, one would discover that at the top of the statue, there was actually an egg-sized hole!

We were a step too late. The totem master has indeed run away!

Tang Zhen sighed, but he faintly felt that something was not right. The totem master could have hidden himself even more secretly, making it impossible for the Holy Dragon City soldiers to discover his tracks.

But now it seemed that the totem master's hiding place had been discovered on purpose!

At this moment, a low and deep groan was heard. Tang Zhen's brows flickered. He immediately discovered that it was the corpse of a barbarian who had yet to die!

Tang Zhen waved his hand and the barbarian who was lying in a pool of blood with a sharp knife in his heart was directly lifted up and fell on the ground in front of Tang Zhen.

The barbarian was already on the verge of death. At this moment, he opened his eyes with great difficulty. When he saw Tang Zhen in front of him, his face turned strangely red and he sneered at Tang Zhen.

Tang Zhen knew that this was the phenomenon of the final radiance of the setting sun. It would not last for long. The barbarian in front of him was already unable to escape death!

"Damned intruders, you will all die a terrible death and be buried with our fellow barbarians!

And our great totem master has already made preparations to make sure that you will not be able to return."

Tang Zhen originally didn't plan to pay attention to this dying barbarian. Instead, he was constantly thinking about the possible hiding place of the totem master. However, when he heard the curse of this barbarian, his heart trembled slightly. He suddenly turned his head and looked at that barbarian.

The barbarian was so frightened that his body trembled when he was swept by Tang Zhen's blade-like eyes. However, when he thought that he was going to die, the fear in his heart disappeared. He began to look at Tang Zhen with a mocking gaze.

Just when the barbarian thought that Tang Zhen would definitely ask about the whereabouts of the totem master, he saw Tang Zhen suddenly wave his hand at him. Then, his fingers firmly clasped the top of his head!

The barbarian didn't even have time to resist before his eyes turned blank. He, who was already a lamp without oil, died in an instant!

Tang Zhen threw away the barbarian's corpse and coldly laughed. His face was filled with killing intent.

“This totem master is really good at scheming. He actually used the special blood Qi after the collapse of the flesh and blood formation to attract the monsters and at the same time, use these monsters to besiege and kill us!

If I’m not wrong, I’m afraid that there are traces of monsters everywhere outside the ruins!

If the Holy Dragon city’s strength is average, then even if they were not completely annihilated, there would definitely be some places that they missed!”

He switched to the map view and saw that there were indeed monsters everywhere. The Holy Dragon City Army was already engaged in battle with them, constantly shooting at the monsters that showed expressions!

Lingxu Zi did not think much of it. He knew the strength of the Holy Dragon Army and knew that those monsters would not be able to cause much of a stir. At most, they would just add a batch of brain pearls to the Holy Dragon City.

He glanced at the broken totem statue and said in a calm tone, “Although the totem master’s move is not brilliant, it still has a certain effect. If you are caught off guard, it is possible to let it succeed!

The cultivators of Loucheng probably died in a similar way a hundred years ago. Otherwise, how could the 200,000 soldiers of Loucheng be killed so easily?

It’s a pity that it chose the wrong target this time, and it’s destined to be happy for nothing!”

Tang Zhen nodded upon hearing this. He looked at the totem statue and muttered to himself, this totem master probably doesn’t want to continue to exist as a spirit body. He even wants to get rid of his identity as the totem master, so he used some kind of secret technique to get rid of his dependence on the statue. Now, I don’t know where he has escaped to.

Speaking up to this point, Tang Zhen thought for a moment before using a doubtful tone, but how did this guy escape from his restraints? where did he escape to? ”

Tang Zhen, who had sunk into deep thought, frowned. He inadvertently saw a broken corpse and suddenly revealed an expression of sudden realization!

Chapter 669 The means of the totem master _The corpse in front of him was badly damaged. Its chest and abdomen had been cut open by a sharp weapon, and its liver and intestines were already scattered out, but they were still wriggling.

Such a cruel and disgusting scene was very common on the battlefield. There were also many scenes that were even more tragic than these corpses!

Tang Zhen didn’t pay attention to the state of the barbarian’s death. Instead, he suddenly remembered the tricks that these “stowaways” used!

They seemed to always like to use some disgusting means to breed all kinds of creatures to avoid the laws of the world of Loucheng and no longer need to become monsters!

Whether it was The Spiritual Brain corpse King or the two-headed four-armed female vengeful spirit in the giant tower, they had all used similar means and seemed to have achieved obvious results.

Even Tang Zhen's soul lodging method had a similar effect. However, his method was more mature and reliable!

Then, would the totem master, who was limited by the law, also constantly look for opportunities to get rid of the restriction, and even use this method of cultivating creatures to obtain a new life, and then have no more scruples in the world of loucheng?

When he realized this point, Tang Zhen immediately came to an understanding in his heart when he looked at the hole on the totem statue!

Usually, the totem master relied on the blood and Qi of the Barbarian race to nourish himself, so his strength could not be underestimated. Under such circumstances, it was not impossible to use the blood and Qi to condense a flesh embryo and then integrate himself into it.

In that way, the totem master could use special means to be born in the world of loucheng, and no longer be bound by the laws!

There were still some problems that needed to be solved, but it was clear that the totem master had found the perfect method. Even before he was surrounded by the Holy Dragon City, he had already completed the entire reincarnation process.

The reason why it exposed this hidden area was nothing more than to plot against the Holy Dragon City and let those monsters and the Holy Dragon City cultivators kill each other.

After thinking through this point, Tang Zhen finally came to a realization. It turned out that the group transporting the totem statues that was intercepted by the goddess of freedom mercenary group was just a bait. Their goal was to attract the Holy Dragon city's Army to gather here.

The remnants of the Barbarian tribe had obviously been abandoned. At the same time, the totem master had used the means he had mastered to turn these barbarians into monsters that were neither human nor ghost, in an attempt to cause even greater trouble for the Holy Dragon City!

The totem Masters had to rely on the blood and Qi of the Barbarian race to survive and improve their cultivation. But now, they had easily abandoned the foundation of their survival. This proved that they had found a better way to survive!

These thoughts appeared in Tang Zhen's mind at lightning speed. He frowned slightly and quickly activated the [universal electronic kit]!

With Tang Zhen's mind control, this application was instantly connected to the Holy Dragon city's heavenly eye system!

At present, the unmanned aircraft used by the Holy Dragon City for reconnaissance and armed support could all be connected and controlled through the all-purpose electronic kit, which was equivalent to Tang Zhen having countless pairs of eyes.

As he connected to the heavenly eye system, a row of function options immediately popped up in front of Tang Zhen.

He chose to read the recent video of the nearby area. More than a dozen small screens immediately popped up in front of Tang Zhen. All of them were videos taken by the sky Eye and the drone.

speed up the progress. Automatically filter out the fragments with the appearance of the barbarians!

As soon as he finished speaking, the small screens flickered a few times and then quickly split into dozens of small screens.

As long as Tang Zhen's line of sight fell on something, the screen would immediately zoom in and clearly display the scene in front of Tang Zhen.

The images that were taken were extremely clear, allowing Tang Zhen to clearly see any details that he wanted to see. There was no need to worry about the image being blurry.

Tang Zhen's eyes flashed as he swept his gaze over these videos that were being played on loop. He directly locked onto an image.

As the image was zoomed in, a group of barbarian cultivators could be clearly seen shuttling through the dense forest. Their movements were swift, and their expressions were very serious.

Although it was impossible to determine the level of these barbarian cultivators through the video, they were definitely a group of elite barbarians judging from their complete armors and excellent weapons.

What attracted Tang Zhen's interest were a few barbarian women among the barbarian cultivators. They seemed to be cultivators as well, and each of them was carrying a sword.

However, one of the women was pale and seemed to need someone to support her as she walked, as if she had just recovered from a serious illness.

And if one looked closely, they would discover that this woman's appearance was extremely similar to a human's. She should be a rare descendant of the barbarian race in the endless sea!

This video was shot a few days ago, and on the same day, the goddess of freedom mercenary group had just intercepted the totem statues!

Tang Zhen already had a faint guess in his heart after seeing this scene. A trace of a cold smile surfaced on the corner of his mouth.

Tang Zhen had heard that the totem master was cunning and had an astonishing cultivation base. Therefore, he had no choice but to find the soul-gnawing beast first to be on the safe side. He had to let it help restrain the totem master during the battle.

He had even sent a message to the three spirit body sisters when he arrived, asking them to help him and hide in the dark, waiting for an opportunity to attack.

No matter how powerful the totem master was, he would definitely not be able to gain an advantage under such an attack. The possibility of him being killed was definitely more than 80%!

However, Tang Zhen, who had made complete preparations, only discovered at this moment that the totem master had already predicted this life and death crisis because of his innate talent that was similar to prediction. He had directly escaped like a cicada shedding its shell!

Even if this kind of method might cause his strength to be greatly reduced, the totem master still did it without hesitation, because this was his only way out!

If he successfully carried out his plan, then from now on, he would be like a fish in the ocean, a bird in the sky, free to fly!

However, this fellow was related to the Holy Dragon city's advancement. Even if Tang Zhen dug three feet deep into the ground, he would definitely capture and kill him. It was absolutely impossible for him to let his plan succeed!

Thinking of this, Tang Zhen immediately gave orders to the heavenly eye and the drone, asking them to carefully explore the direction that the group of cultivators was moving in.

After so many days, those barbarian cultivators might have already escaped without a trace. However, Tang Zhen still could not let go of any possibility!

At the same time, Tang Zhen also quickly mobilized the Holy Dragon city's cultivators who were good at tracking and had them immediately gather at his place.

He was going to follow the direction that the cultivators had fled in. He hoped that the Barbarian cultivators had not carefully planned their escape route. That way, he would be able to find something!

If it wasn't for the strange ability of the totem master that could block the tracking card's lock, why would Tang Zhen need to go through so much trouble!

Not long after, five stern-looking Holy Dragon City cultivators appeared and solemnly saluted Tang Zhen.

"This subordinate greets the city Lord!"

The five Holy Dragon City cultivators were of different levels. The highest was a Lord-tier cultivator, while the lowest was a level four cultivator.

They were tracking experts carefully selected from all the cultivators in the Holy Dragon City. Even if tracking the enemy was a basic skill for the cultivators in Loucheng, these few people were still outstanding existences.

"I'm going to track down a group of barbarian cultivators who escaped a few days ago. They may be proficient in anti-tracking techniques. Are you sure you can find their traces?"

Tang Zhen looked at the residents in front of him and asked in a low and deep voice.

"Don't worry, city Lord. Tracking doesn't only require traces. There are many other auxiliary methods. We're confident in catching up to them!"

The leader of the Horde leader said to Tang Zhen. Although he didn't reveal much of his expression, he was clearly confident in his own methods.

Tang Zhen was waiting for these words. He nodded his head in satisfaction when he heard this, "Alright, as long as we catch up with the Barbarian cultivators, I'll give you a great merit!"

Hearing this, the five of them immediately looked happy and wanted to immediately start moving.

Tang Zhen didn't hesitate. He let Mo Ran, Lingxu Zi, and the others return first while he led dozens of Holy Dragon city's elite cultivators to the place where the Barbarian cultivators had appeared.

As for the monsters that were fighting with the Holy Dragon city's soldiers, Tang Zhen did not care about them at all. Perhaps in a few minutes, these monsters would all escape.

After all, this was not a monster siege. After suffering such a huge number of casualties, why would the monsters with the ability to think continue to die?

Chapter 670 thousand-mile tracking

After passing through the Holy Dragon City Army's defensive position, a pungent smell of smoke, blood, and internal organs immediately assaulted his nose.

The smell was nauseating. If one could not control the feeling of disgust, they would definitely vomit the dinner they had last night.

The cultivators of the Holy Dragon City were already used to this. In such an environment, they did not show any unusual behavior.

The battle was coming to an end. The monsters that were attracted by the blood had already fled with their tails between their legs, leaving behind a dense pile of corpses.

Among the countless trees that had been violently broken, the corpses of various monsters were scattered everywhere. Those that were not dead were wailing continuously, no longer in their previous ferocious state.

The Holy Dragon city's soldiers showed no mercy to these man-eating monsters. Whenever they found one that was not completely dead, they would immediately shoot it to prevent it from killing people.

Large numbers of monsters were cut down by the soldiers using the saw. The useful materials on their bodies were also collected and transported back to the Holy Dragon City for in-depth processing.

Although the monsters in the world of Loucheng were the biggest threat to the survival of the natives, the various materials on their bodies were also the greatest treasures. If used properly, it would definitely bring a huge surprise.

Different from the crude use of the other towers, the Holy Dragon City had a variety of processing methods, which could increase the value of these materials by countless times!

This was the power brought by technology. The primitive Loucheng natives could not compare to this!

After Tang Zhen and the others passed through the battlefield, they quickly found the place where the Barbarian cultivators had appeared based on the video records.

The five cultivators in charge of the pursuit turned around for a while, pointed in the same direction, and quickly entered the dense forest like leopards!

Tang Zhen didn't doubt the judgment of the residents and immediately followed closely behind.

The five cultivators in charge of tracking would stop and search every time they walked a certain distance. After discussing in low voices, they would point out the direction they had determined.

Tang Zhen had also tried to find the traces of these barbarians during this period of time. Although he could vaguely find some clues by relying on his profound cultivation, he was far from being able to catch up with the searching speed of these tracking cultivators.

Through his observation, he also discovered that these five cultivators could either sense plants or had an extremely terrifying sense of smell. Some even had super strong intuition.

When these tracking abilities were gathered together, they made it impossible for the fleeing enemy to hide. Even if there were anti-tracking experts among them, they still could not hide all the traces left behind.

Every ruler had its shortcomings and its strengths. There was no such thing as a useless ability in this world. It only depended on how to use it.

After witnessing the performance of these five Holy Dragon City cultivators, Tang Zhen secretly sighed in his heart. Even with his current cultivation, he did not dare to say that his tracking ability was better than these few residents of his.

Since that was the case, he would just patiently do whatever he wanted!

The group walked and stopped along the way. It didn't seem fast, but the speed of cultivators was not something ordinary people could compare to. Not to mention that there were no weaklings among them.

Unknowingly, Tang Zhen and the rest had already travelled a distance of over a hundred kilometers. However, the five tracking cultivators had pale faces and their expressions were somewhat dispirited.

Obviously, this kind of tracking wasn't as simple as it seemed. The continuous tracking for hundreds of kilometers had consumed a lot of physical strength.

After Tang Zhen saw that they were not in good condition, he casually took out some potions that nourished mental and physical strength and gave them to these five cultivators as a reward so that they could recover to their best condition as soon as possible.

After all, time waits for no man. An unforeseen event might occur if they were a day late. It might even cause the battle in the overseas region to fail. This was an outcome that Tang Zhen absolutely did not want to see.

The drugs he gave to the five cultivators were the latest products extracted from the Holy Dragon City, the loucheng world, and the technology of his original world.

The price of this medicine was shocking. It was still in the research stage and could only be produced in small batches.

Its main ingredients were all sorts of strange plants from the world of towers, as well as materials harvested from monsters. Its performance in certain aspects could be said to be miraculous!

If an ordinary person took a bottle of this medicine, under special circumstances, it was even possible for them to be completely exhausted and recover to a healthy state.

However, its greatest use was still to increase the combat power of the Holy Dragon City cultivators!

After the five tracking cultivators took the special medicine, they quickly regained their energy and spirit. With a surprised expression, they once again searched for traces of the enemy in the dense forest.

From time to time, monsters would appear and harass them. However, the elite cultivators accompanying them had already equipped their swords and sabers in their hands. Once the monsters appeared, they would kill them instantly.

The special firearms on their backs had not been removed, for fear that the gunshots might alert the hidden enemies.

Time slowly passed by. When the sky had completely turned dark, Tang Zhen and the others had already tracked for hundreds of kilometers. However, they still did not discover any traces of these barbarians!

Seeing that everyone was a little tired, Tang Zhen ordered them to rest and set up a camp beside a Valley.

Tang Zhen's storage space had enough food and wine. The Holy Dragon city's cultivators had also captured a fat wild beast. After washing and skinning it, they directly roasted it.

Although he was the city Lord, Tang Zhen had always been very kind and friendly in front of these residents. It was completely different from the cold and ruthless attitude he had when facing the enemy.

It was for this reason that the residents of Loucheng were in awe of him, but they didn't feel particularly distant from him. They chatted with him very naturally.

At this moment, by the bonfire, a group of iron-blooded cultivators in cold battle armor who didn't even blink their eyes when killing enemies were holding wine bottles and chatting enthusiastically, no different from the ordinary people in the city.

The newly opened shops in the business district, the newly released movie, and the rumors in the wilderness had all become the topics of everyone's bragging.

Some cultivators even directly used their wrist-guards to play some simple games. From time to time, they would blow their beards and glare, as if they were going to play the game.

After chatting idly with the cultivators for a while, Tang Zhen agreed to visit their homes when he was free. Only then did he arrange for the guards on night duty and let everyone enter their tents to rest.

As for Tang Zhen, he sat alone beside the fire. He took out a book from his storage space and slowly began to read it.

Another night passed by.

Early the next morning, the cultivators tidied up the items in the camp and once again embarked on the tracking journey.

After recuperating, the efficiency of the five tracking cultivators was surprisingly high. In addition, because the traces left by the enemy were left for a short time, the number of times they stopped to search was also decreasing.

Tang Zhen was also controlling his heavenly eye to continuously search above his head. He would occasionally switch to the map view and not miss any movements in his surroundings.

Another day passed, but they still did not discover any traces of those barbarian cultivators. This caused Tang Zhen to be suspicious in his heart, but he did not give the order to stop the pursuit.

Unknowingly, Tang Zhen was shocked to discover that they had already reached the edge of the void sea!

The so-called Void Ocean didn't seem to be much different from a normal ocean. It was boundless and surrounded the entire ocean.

When standing on the beach, it was said that one could often see traces of fish, shrimp, and sea monsters, which made the place look full of vitality.

However, the Barbarian tribes living overseas knew that this was just a Mirage-like scene. The true form of the vast and surging ocean of nothingness was just a layer of mist that resembled seawater.

Once they stepped into the sea of nothingness, they could fall into the bottomless pit under the fog at any time, and there was no possibility of survival.

It was said that strange monsters would often swim out of these deep holes. They swam in the sea of nothingness formed by fog, and their bodies were as large as mountains!

Moreover, there was a strange power in the sky above the sea of nothingness. It was like a space-sealing array that prevented normal flight!

This strange and unpredictable sea of nothingness became a natural barrier that prevented the barbarians from escaping. They were trapped here with no possibility of escaping.

Tang Zhen had long heard of the void sea, but he had never had the chance to see it. Now, he was here in person.

Since that was the case, he had to observe carefully no matter what!
