

Alternate 671

Chapter 671 The strange sea of nothingness _He quickly switched to the map view and began to carefully observe the sea of nothingness. At the same time, he also tried to find the traces of the totem master.

Looking down from above, Tang Zhen could see everything in the void sea.

Just as the legends said, the sea of nothingness looked no different from an ordinary sea. There were even monstrous waves surging.

Moreover, the seawater was extremely clear. One could almost see through the scenery tens of meters below the water. Large groups of fish and shrimp would constantly appear, and Russia would quickly scatter and flee.

The exquisiteness of the ocean looked extremely alluring, making people have the urge to jump into it and enjoy it.

However, when these turbulent waves hit the reefs on the shore, they did not make any sound, nor did they cause any splash.

The sea was so vast, yet it was so quiet that not a single sound could be heard. This in itself was an extremely strange thing.

From Tang Zhen's point of view, the void sea was more like a projection of an ocean in the tower world. It was directly superimposed on the floating fog to hide the secret hidden under the fog.

Just as Tang Zhen was observing the scenery of the ocean, a sudden change occurred in the depths of the ocean. A huge ball of light gradually appeared in his vision.

The ball of light was hundreds of meters in size and had an oval shape. It was surrounded by a dozen huge tentacles that were constantly swinging.

After wandering on the surface of the sea for a while, it slowly emerged from the water, revealing its huge body that was hidden under the sea.

It was a huge monster that looked like a jellyfish. Its body was like a transparent crystal, and colorful light spots were constantly flashing inside its body. It looked like a terobo people's aircraft, and it was very beautiful.

The tentacles that were also shining with light were supporting its huge body on the sea. It was even floating a distance away from the sea, slowly moving in the air.

Tang Zhen could not help but feel a little puzzled when he saw this. Wasn't it said that one could not fly on the sea of nothingness? why was this jellyfish-like monster able to walk in the air?

Just as he was feeling puzzled, in the sky not far away, a huge black shadow suddenly appeared and rushed straight at the giant jellyfish.

This black shadow had six pairs of wings, and its huge body was like an elongated cheetah. It had a long and flat tail, and it was attacking at lightning speed.

In the blink of an eye, the giant monster had already approached the sea where the jellyfish was. Tang Zhen also saw the appearance of the monster clearly.

It turned out that on the abdomen of this monster that was covered in tiny scales, there were six pairs of huge claws covered in scales. Its head was even more ferocious and had rows of sharp long horns!

From the greed and ferocity in its eyes, it clearly saw the giant jellyfish as its prey. At this moment, it was rushing down like a Hunter.

The jellyfish also realized that it was in danger. It spurted out a rainbow light from its body like a fountain and quickly dived into the sea with the help of the recoil.

The rainbow light spread across the entire sky in an instant, covering the path of the flying monster, making it impossible for it to see the jellyfish.

However, the flying monster seemed to be very familiar with the jellyfish's means. The moment the rainbow light shot out, it rushed directly into the clear water and blocked the jellyfish's path.

The jellyfish couldn't Dodge in time and was bitten by the monster's sharp claws and bloody mouth. It began to struggle.

The part of its body that was grabbed by the flying monster started to turn black rapidly, as if it was soaked in ink.

On the other hand, after the flying monster caught the jellyfish, the last pair of wings that had not yet entered the water began to flap continuously, and then another pair of wings quickly left the water.

The two pairs of huge wings flapped rapidly, and in the blink of an eye, it lifted its huge body out of the sea. Soon after, the six pairs of wings also flapped rapidly, and it slowly rose into the sky.

As for the giant jellyfish that was caught by it, its struggle became weaker and weaker. It was as if the flying monster's sharp claws had a poison that could paralyze the body, making it unable to resist!

The seven-colored light that looked like blood kept flowing out of the jellyfish's body, scattering in the sky and the sea. Then, it was carried by the flying monster and flew into the distance, leaving a beautiful blood light.

Tang Zhen, who had witnessed the entire process, was dumbstruck. Although he did not sense the aura of this flying monster in close proximity, just from its earlier performance, this monster had definitely reached the king tier. It might even be a rather terrifying existence among King tier monsters!

Even if he was beaten to death, Tang Zhen would not believe that such a terrifying monster existed in the void sea. If that was the case, this overseas region would have long become their back garden!

Those barbarians and monsters would also become their snacks, with no possibility of survival!

Tang Zhen had a faint guess in his heart as he recalled the various legends about the restrictions on flying in the void sea.

The jellyfish and the flying monster just now were probably some kind of special projection. They looked so real, but their real bodies were not here at all!

This was the only reason that could explain why they could fly freely in the sky. The entire battle was extremely intense, but not a single sound was heard!

However, even though he was only seeing a projection, Tang Zhen was still incomparably shocked. This was because he could see the vastness and danger of the tower world.

Compared to the ocean and the mysterious and unknown ocean, the continent where the Holy Dragon City was located was almost a safe haven. They never had to worry about being attacked by such a terrifying King-tier monster!

Even if King tier monsters appeared occasionally, they were restricted to specific areas such as wild buildings. They couldn't wreak havoc everywhere.

Otherwise, once such a monster appeared, it would be no different from a disaster for the ordinary buildings on the continent!

Suppressing the bewilderment in their hearts, Tang Zhen and the others once again swiftly proceeded forward.

This time, it didn't take long for them to rush out of the dense forest. They saw the vast rocky beach that didn't have a single blade of grass growing on it. At the same time, there was also the boundless void sea!

In order to avoid any danger, Tang Zhen did not let his subordinates follow him. Instead, he walked towards the void Ocean alone.

Tang Zhen continuously scanned his surroundings as he walked on the savage-looking rocky beach. He saw countless skeletons and remains during this period of time. However, most of them had already been eroded by the wind.

Tang Zhen seemed to feel an indescribable pressure as he looked at the bones and debris on the Rocky beach as well as the vast yet silent void sea. His mood also faintly became incomparably depressed.

Compared to the land where the barbarians lived behind him, the sea of nothingness in front of him was a dead land. He could not feel any life force.

It was as if this was the border between life and death. Being in this area gave people an indescribable sense of loneliness, as if they were the only one left in the world, suffering endless pain and sadness.

It was as if there was a voice in his heart telling him that as long as he ended his life, all his troubles would disappear and he would never have to suffer any pain again.

If a person with weak willpower heard this voice, they would probably end their own life without any hesitation!

It was obvious that the skeletons by the sea had been tempted by the sound and had chosen to commit suicide!

Tang Zhen frowned tightly. He did his best to stabilize his mind before once again looking at the vast, Silent Sea.

After observing for a while, Tang Zhen seemed to have made some discoveries. With a wave of his hand, he threw a huge rock the size of a millstone into the sea in front of him.

The huge rock fell into the void sea in the blink of an eye with a whistling sound, but it did not cause a single wave.

Just as the huge rock fell, countless blood-colored flowers the size of human heads suddenly appeared on the originally calm sea. They looked extremely beautiful and were constantly shaking.

The entire surface of the sea instantly turned into a sea of flowers. The color of the flowers was like blood, so beautiful that it made people feel a little frightened.

A sweet yet bloody smell was constantly spreading from these blood-colored flowers, and it didn't take long for it to spread into the dense forest in the distance.

All of a sudden, the low growls of monsters could be heard. Then, hundreds of monsters jumped out of the dense forest. Their eyes were filled with greed and madness as they charged toward the void sea without a care.

It was as if these blood-colored flowers were the ultimate delicacy, making these monsters unable to resist at all.

The moment the monsters entered the sea of nothingness, the blood-colored flowers suddenly shot out countless thin threads, dragging the monsters into the sea.

In the blink of an eye, the surface of the sea, which was originally covered with blood-colored flowers, became clean, and nothing unusual could be seen.

Tang Zhen, who had witnessed everything, could not help but inhale a breath of cold air!

Chapter 672 The strange world under the "sea" _The sea of nothingness was indeed a natural barrier that isolated all the barbarians. Not to mention the countless deep holes hidden under the " sea surface, " the strange-looking blood flower just now was a terrifying existence that ordinary cultivators could not resist!

The fate of the group of monsters that had rushed into the sea just now could be guessed without saying. They had probably become the monsters 'food!

Tang Zhen could not help but feel suspicious. The totem master had occupied the overseas lands for countless years. How could he not know the dangers of the void Ocean? however, why did he come here?

Could it be that he had found a way to guard against these monsters, or even a way to leave this place?

The more Tang Zhen thought about it, the more he felt that this possibility was extremely great!

This totem master was related to the Holy Dragon city's promotion. How could Tang Zhen let him escape so easily? otherwise, the manpower and resources that the Holy Dragon City had invested in a while ago would be for naught!

The most crucial point was the special nature of this mission. It was also the true reason why Tang Zhen was so persistent!

Because if the mission of this overseas land failed, no new overseas land would appear for the Holy Dragon City to conquer and open up for at least a hundred years!

Therefore, if the quest was not completed, they could only continue to waste time. There was no other way to solve it.

Therefore, the totem master must die, or else the Holy Dragon City would be the unlucky one!

The rules for upgrading to a national-level building were even stricter, and the time needed to wait for a new world after failure was even longer. This was also the reason why heaven battling city had been spending its time in a new world!

Tang Zhen called over five cultivators in charge of tracking. He asked them to confirm again that the totem master had entered the sea of nothingness from here. Then, he asked the cultivators to retreat to the side and wait.

Now that things had come to this, Tang Zhen no longer had any other choice. He could only take the risk and go into the sea to track down the totem master!

This trip was extremely dangerous. The cultivation of the Holy Dragon City cultivators accompanying them was not high enough. They would only be courting death if they followed. Therefore, Tang Zhen did not plan to let them follow.

Moreover, if he was alone, once he encountered danger, Tang Zhen could also teleport away in time.

Other than feeling a strong wariness in Tang Zhen's heart, there was also a trace of anticipation in the face of this unknown and terrifying sea.

The void Ocean, which was isolated from the rest of the world, must be hiding a great secret that no one knew. If he could spy on it, it might bring him great benefits.

When he thought of this, Tang Zhen no longer hesitated. He immediately teleported back to his original world and found the contact person that his partner had sent.

An hour later, a remote control probe robot was sent to Tang Zhen and he directly brought it back to the loucheng world.

As he appeared on the shore of the void sea, Tang Zhen took out the probe robot and controlled it to slowly sail into the sea.

This type of detection robot was made of a completely sealed shell made of a special alloy. It could work normally in extreme environments such as the deep sea, high temperature, and cold. At the same time, the video images transmitted were extremely clear.

Among Tang Zhen's existing applications, there was actually an application that could see through the water surface, but it couldn't see through the sea of nothingness made of fog, so he could only seek help from the technology of the original world.

Following Tang Zhen's operation, the probe robot slowly submerged into the water. At the same time, the camera also transmitted the image it had captured.

It turned out that there was also a layer of thick fog under the sea of nothingness, which was constantly surging like water waves.

In addition to this mist, there were a few round holes of different sizes on the ground covered in fine stones that were slowly emitting a faint mist.

It was obvious that the mist that formed the sea of nothingness was formed by these small holes.

Other than the small holes and stones, the ground was filled with skeletons of all kinds, most of which were glowing with a light green fluorescence.

Tang Zhen controlled the detection robot to carefully observe. Only then did he discover that the fluorescent light on the surface of the bones was actually a type of worm that was constantly squirming. It was like hair that was firmly fixed on the bones.

In addition to the strange insects attached to the bones, there was also a snake-like creature in the fog. It was constantly swimming in the fog, chasing the scattered green light spots from time to time, as if they were food.

It did not take long for the robot to discover a huge hole, and at the same time, it saw the giant monster that was entrenched beside the hole.

The monster was several hundred meters in size and looked like a huge silver ring sea snake, but it had more than ten flat tails of the same thickness.

The monster seemed to be in a deep sleep. Its huge triangular head was hanging at the edge of the hole, constantly breathing in and out the mist from the black hole. Every once in a while, its body would flash with fluorescent light.

Different from the other underwater monsters, it emitted a purple-red fluorescent light, as fresh and strange as blood.

Beside this huge monster, Tang Zhen also saw the "flowers" that had devoured the monster earlier. It turned out that they were also a group of strange monsters. They were currently floating in a group near the area near the sea.

These monsters looked like huge flower buds with huge bellies. Their four pairs of fin-like limbs would occasionally flap gently.

Once something fell into the water, these monsters would float to the "surface" and open their flower-like mouths to capture and devour the monsters that fell into the water!

After the robot entered the water, it also attracted the attention of some strange monsters. However, because it did not have the smell of fresh blood, these monsters were not interested in it.

After Tang Zhen noticed this scene, he faintly had some thoughts in his heart. Could it be that the totem master had used this characteristic to avoid the killing of those monsters?

When he thought of the three spirit Sisters 'introduction of the totem master's origin and the method he used to turn countless barbarians into corpse monsters, Tang Zhen felt that this possibility was extremely high!

The next thing to do was to confirm where the totem master had gone.

It was impossible for the totem master to Enter the Void sea for no reason, so there must be some secret here that could help him escape the Holy Dragon city's pursuit!

He continued to operate the detection robot and walked forward. Not long after, Tang Zhen suddenly discovered a huge ravine blocking his way.

However, in a flash, he seemed to have seen a pile of ruins at the bottom of the gully, and there were even a few corpses!

It was just that the place was too far away from the detection robot and the image was a little blurry. Therefore, Tang Zhen could not be sure if he was seeing things.

Just as Tang Zhen was planning to control the detection robot to get closer and take a look, a huge black shadow suddenly flashed in front of the camera. Countless electric snakes were dancing around its body.

The instant the black shadow approached the robot, the video in front of Tang Zhen suddenly stopped. The robot was completely uncontactable!

Shifting his gaze away from the video, Tang Zhen let out a long breath and slowly walked toward the void sea.

He had seen what he needed to see, and he had a certain understanding of the situation under the sea of nothingness. Now, it was time to go to the field to investigate!

After thinking up to this point, Tang Zhen quickly entered The Dark World and stepped into the non-existent ocean.

In his opinion, as long as he relied on the special characteristics of The Dark World, he would be able to easily reach the gully at the bottom of the sea.

However, when he reached the bottom of the sea, he was shocked and his brows furrowed.

It turned out that the fog under the void sea was filled with countless spirits of different appearances. Most of them were barbarians who had died miserably!

As far as the eye could see, these ferocious spirit bodies filled every corner of the ocean floor. They were like walking corpses, wandering around with blank eyes.

They had obviously died in the void Ocean, but for some unknown reason, they had been trapped here after turning into spirits. After countless years, their numbers had actually reached such a terrifying number.

At this moment, Tang Zhen, who had entered The Dark World, was as eye-catching as a bright light in the dark night. He attracted the attention of the spirit bodies nearby. After which, they all swarmed towards him in unison.

If other cultivators were to face so many spirit bodies, they would most likely turn around and escape without hesitation to avoid being trapped to death by these spirit bodies.

However, not only did Tang Zhen possess the reincarnation mirror, but he also had the soul-gnawing beast and the overseer, two great killing weapons against spirit bodies. Therefore, the scene where other cultivators avoided him like the plague was simply a benefit that came to him.

In any case, it was done in passing and did not delay the tracking of the totem master. How could Tang Zhen miss this opportunity!

“All of you, come out and start working!”

Following Tang Zhen’s low roar, the reincarnation mirror suddenly appeared in front of him, while the overseer and the soul-gnawing beast simultaneously appeared on his left and right!

When they saw so many spirit bodies, their eyes lit up and they rushed forward without hesitation!

Chapter 673 Capturing the spirit body and the giant snake

At this moment, under the sea of nothingness, countless spirit bodies surged over like a tide, surrounding Tang Zhen and the other two.

Tang Zhen had seen a huge school of fish in the ocean. That spectacular scene left a deep impression on people. However, it was nothing compared to these spirit bodies that were dancing below the sea of nothingness!

And compared to the school of fish, these spirit bodies that had died in various ways were undoubtedly more terrifying!

They kept wailing, and the sound seemed to be able to penetrate the soul, making people feel uneasy.

In the process of approaching, they scrambled to reach out their arms and scratch wildly. Their numb and empty eyes flashed with a thick greed, like hungry wolves that had encountered fresh meat.

On the other hand, Tang Zhen and the other two were like isolated islands in a flood. It was as if they could be submerged by the endless spirit bodies at any time, and their flesh and blood essence would be completely devoured.

However, these spirit bodies didn’t know that among the targets they were attacking, there were two terrifying non-human existences. They were the natural nemesis of spirit bodies.

Moreover, one of these two non-human beings was the reincarnation mirror’s overseer. He had once controlled the life and death of countless spirit bodies!

The other was an existence that specialized in devouring spirit bodies. Not only did he have a terrifying cultivation base, but his appetite was also surprisingly good!

As for Tang Zhen himself, he was a genuine two-star King tier. He was also not afraid of the intrusion of spirit bodies. In fact, he even wished for more spirit bodies to come!

At this moment, before Tang Zhen could make a move, the two fellows had already started to wreak havoc among the spirit bodies, causing a large piece of the tide-like spirit bodies to be instantly torn off!

“City Lord, you’re amazing. How did you find this place?”

My goodness, the quality of the spirits here is frighteningly high, and many of them are thousand-year-old ghosts. This is simply a rare treasure land!”

The overseer continuously praised Tang Zhen as he captured the spirit bodies. His flattery was truly like a tide.

Because he was in the dark World, the overseer could leave the reincarnation mirror freely. He was controlling the countless chains formed by his soul power to chain the spirits together.

As the spirits wailed and howled, strings of them were skewered like candied Haws and were quickly pulled into the reincarnation mirror before being suppressed.

The soul-gnawing beast’s eyes lit up as it held its small waist and laughed. Then, it roared, “ time to eat! and went straight for the strongest spirit.

This four star horde leader spirit body was stunned for a moment. After feeling the aura of the soul-gnawing beasts, which was like the natural enemy of the soul-gnawing beasts, it immediately let out a wild cry and turned around to escape without hesitation.

However, he had only run a few steps before he was caught by the soul-gnawing beast. It laughed and took a bite, nodding its head happily.

“Delicious, it’s really delicious!”

At this moment, the soul-gnawing beast’s expression was exaggerated. It did not care about its original image of a beautiful woman at all. Its big mouth expanded to a terrifying extent. It grabbed the spirit body and rubbed it a few times, then directly threw it into its big mouth.

The soul-gnawing beast began to gobble up the spirit body with a look of enjoyment on its face.

Furthermore, she was extremely picky with her food. Any spirit body that did not suit her taste would be thrown into the reincarnation mirror without even looking at it.

Like a mad Tiger entering a pack of wolves, these spirits had almost no power to resist. They were constantly captured and devoured by the guards and soul-gnawing beasts. The rest wanted to escape, but they were pushed forward again by the spirits that came from behind.

If these spirit bodies had not lost their consciousness, they would definitely be dumbfounded and then loudly curse their companions for being scammers.

Tang Zhen swept a glance at the overseer and the soul-gnawing beast’s performance. He also began to wave his hands and captured those spirit bodies in large groups. Each time, he captured dozens or hundreds of them.

The entrance of the reincarnation mirror was not big, but spirits were being thrown in like a continuous River.

Only God knew how many spirit bodies had been thrown into it in such a short time!

As more and more spirit bodies were captured, the remaining spirit bodies finally realized that something was wrong collectively. Then, they all let out wails and began to escape in all directions.

How could Tang Zhen and the others let these spirit bodies go so easily? they all quickly chased after them, and the speed at which they captured them increased once again!

During this period of time, even if there were spirit bodies that had reached the peak of the Lord tier, they were similarly unable to escape the pursuit of Tang Zhen and the others. In fact, these spirit bodies were the first targets to be captured!

After chasing for about ten kilometers in one go, the number of spirit bodies began to decrease. Upon closer inspection, they realized that the spirit bodies had all jumped into the deep caves!

From the perspective of The Dark World, the black holes in the mist were like the entrances to hell. They were all emitting dark red light, and there were shadows flashing inside. There seemed to be strange sounds coming from time to time.

An intense sense of danger flashed across Tang Zhen's heart after he saw the scene within these black holes. It was as if an extremely terrifying existence was hidden below.

With fear in his heart, he did not dare to approach these black holes. Instead, he quickly changed direction and headed straight for the ravine where he had discovered the ruins.

Both the overseer and the soul-devouring beast had a satisfied expression on their faces as they quickly entered the reincarnation mirror, as if they couldn't wait to enjoy their spoils of war.

After Tang Zhen put away the reincarnation mirror, he moved forward in the dark World at a steady pace. When he passed by the sea snake-like giant monster, he slowed down his movements as much as possible.

At this moment, he was less than a thousand meters away from the sea snake. He could already determine the sea snake's cultivation base from its aura. It was a three star King tier existence!

However, what surprised Tang Zhen was that the [monster detector] did not show any information about the sea snake. This was enough to show that Tang Zhen's previous judgment was wrong.

Perhaps the sea serpent was not a monster, but a rare alien race in the world of loucheng!

The strength of such a sea snake was terrifying. Its methods were also strange and unpredictable. Therefore, Tang Zhen would definitely not take the initiative to provoke this fellow unless it was necessary.

However, just as his gaze fell on the sea snake, the huge body of the sea snake suddenly moved, as if it was showing signs of waking up.

Tang Zhen's heart tightened. He immediately made preparations for battle and directly pulled out the soul destroying saber.

However, under his gaze, the sea snake only moved a little and then returned to its calm state, as if it had not woken up from its sleep.

Tang Zhen sighed in relief when he saw this. He was just planning to continue moving forward when his gaze passed by the head of the enormous sea snake. His body suddenly trembled.

It turned out that in that place, there was a shrunken version of a sea snake that was less than a meter long, but its entire body had been completely energized, and it was staring at him.

This kind of energy body was completely different from spirit bodies that were similar to energy bodies. If the material of ordinary spirit bodies was said to be foam, then the body of this sea snake was steel!

Both of them were not on the same level in terms of density and purity!

Chapter 674 Void snake cultivator and teleportation

Although the other party's size was small, its terrifying aura clearly told Tang Zhen that this was an existence that was not inferior to him.

Moreover, at this moment, Tang Zhen had already recognized that this energy-formed small sea snake was the condensed form of the mental energy of the enormous sea snake!

Tang Zhen was also able to do this. However, he was still slightly inferior to the purity of the condensation of this sea serpent!

This was the unique ability of King level cultivators. The higher the energy level of the body, the higher the cultivation level.

The size of this energy sea snake was not even one-ten-thousandth of its original body, but the aura it emitted was already quite shocking. If it were to double, it would be simply unimaginable!

At this moment, The Man and the Snake looked at each other. Neither of them made any unnecessary movements, and time seemed to have stopped.

However, the hidden confrontation had already begun!

An invisible aura slowly spread between Tang Zhen and sea snake. Then, they quickly collided, causing the fog under the illusory sea to constantly surge. Huge waves suddenly rose on the surface of the sea without a sound!

This was a test between King level cultivators. Due to Tang Zhen's powerful mental energy, he didn't fall into a disadvantageous position in this test. This also caused the sea snake's eyes to be filled with splendor.

After a long while, the energy sea snake opened its mouth and let out a sharp sound that made people feel uncomfortable.

"You don't have that strange aura on you, so you shouldn't be a barbarian here. So, you must be a cultivator of loucheng?"

What are you doing here instead of conquering your overseas land and completing Lou Cheng's advancement quest?"

Tang Zhen's eyes narrowed when he heard this. He looked at the sea snake whose head had revealed a human-like expression and said in an indifferent tone, "I didn't want to come here at first, but the totem master of this overseas land ran here. In order to complete my mission, I had to chase him here.

If I have offended you in any way, please forgive me!"

After giving a simple explanation, Tang Zhen looked at the sea snake. However, his body did not relax in the slightest. He was ready to unleash his strongest attack at any moment!

After hearing Tang Zhen's explanation, the sea snake nodded and seemed to yawn.

Its actions were extremely human-like, and its tone carried a trace of annoyance as it slowly said to Tang Zhen, "There was indeed a strange presence passing by earlier. Perhaps it was the totem master you mentioned.

However, he didn't have that strange aura on him, and I was sleeping soundly, so I didn't pay attention to him at all.

In this ocean, as long as there's something that doesn't have that kind of aura, it's not under my jurisdiction. I don't care if it stays or leaves, but it seems that I've been deceived by this guy!"

Speaking of this, the sea snake revealed a depressed expression and sighed, "I've slept for too long, and my reactions have become slow. I didn't even notice that guy's hidden means. How embarrassing!

"In that case, Your Excellency's mission is to guard the sea of nothingness and not let the barbarians escape?" Tang Zhen asked thoughtfully.

Hearing this, the sea snake immediately let out a sharp laugh. "Young man, I can see that you're quite young, and your cultivation is surprisingly amazing. It's obvious that you have an extraordinary background!

So I have to remind you that the less you know about some things, the better. Otherwise, it will be a disaster, not a blessing!"

The sea snake's true age was unknown. After taking advantage of his seniority, he continued with some pride, "you're right. Our void serpent tribe's mission is to guard these overseas lands and prevent the barbarians from escaping!

Tang Zhen's heart moved when he heard this. This huge sea snake was indeed a foreign cultivator from the loucheng world. However, its body size was truly a little terrifying!

After speaking up to this point, void snake turned to Tang Zhen and said, "Since the totem master chose to escape from this area, he must have found the dusty underwater transportation formation. At this moment, he must have left this isolated island in the sea!

I don't know where this guy got the teleportation stone tablet from, but I didn't bring it with me. If you want to teleport, you can only get it yourself.

If the totem master really escapes from this place, it would be my dereliction of duty. I must capture him back!

However, due to some restrictions, I can't leave this place, so I'll have to trouble you to make a trip!"

After saying this much, the illusionary snake cultivator stared at Tang Zhen, waiting for his reply.

"What are you saying, hunting the totem Masters is my mission, how can I dare to talk about hard work!"

Tang Zhen did not hesitate and immediately agreed.

but I have a question. Isn't the teleportation stone tablet only activated in front of the cornerstone platform? how is it that the totem master can teleport just by using the teleportation array? "

When the illusionary snake cultivator heard this, he glanced at Tang Zhen with a slightly puzzled expression and explained in a calm tone,"Actually, this isn't a secret, so there's no harm in telling you.

Under normal circumstances, teleportation indeed needed to be activated in front of the cornerstone platform, and the teleportation location could also be chosen.

However, as long as one had a teleportation stone tablet in hand, they could also rely on the teleportation array that was operating normally to teleport. However, this way, they would not be able to choose their destination, and they would only be teleported to the nearest teleportation array.

As long as you use the method I told you, you can start the teleportation. Do you understand?"

Tang Zhen nodded his head. He really didn't know about this matter. Situ Yuanzhi didn't tell him about it either. Perhaps, even he didn't know about it.

After void Snake finished explaining the operation of the teleportation array, he said to Tang Zhen,"I won't say any other words of thanks. If you can capture that totem master, I will owe you a favor.

When the time comes, I'll give you an item. When your tower opens a higher level overseas battlefield, you can take it to find the void snake Guardian there and get some information from him.

It must be known that the class 7 and class 8 regions are far from as simple as the class 6 regions!"

After saying that, the illusionary snake cultivator didn't say anything more. Instead, he quickly burrowed into the body of the giant sea snake, and his huge body trembled slightly.

Tang Zhen didn't hesitate. He immediately turned around and charged toward the transfer array at the bottom of the ocean that the illusionary snake had mentioned!

It didn't take long for him to reach the huge ravine and jump down.

From The Dark World's perspective, the underwater transmission array that was emitting a faint energy fluctuation was extremely conspicuous. Tang Zhen had already seen it from midair.

At the same time, he also noticed that there were indeed some corpses near the teleportation array. However, they were all incomplete. It was obvious that they had suffered a violent attack before they died!

Further away, there were also some broken limbs, about twenty people.

Judging from the clothes of these corpses, it was obvious that they were the Barbarian cultivators who had come with the totem Masters!

Chapter 675 discovery and pursuit

These corpses had died in a miserable manner, and almost none of them had an intact corpse.

However, if one were to look closely, one would discover that the skin of these barbarians was a bit strange. They all had a strange metallic color.

Moreover, the blood from the wounds on his body had already congealed, and even emitted a heavy smell of corpses.

Judging from this situation, these barbarians must have been dead for a long time. Moreover, their bodies had been refined by a secret technique before they died!

These barbarian cultivators who were loyal to the totem Masters were ruthlessly abandoned in the end and even became bait to attract monsters!

Tang Zhen also saw a group of monsters that were surrounded by lightning. At this moment, they were holding the corpses of barbarian cultivators in their mouths. They were constantly tearing and shaking in the air as if they were venting their depressed emotions.

It was obvious that the Barbarian cultivators had died under its attack. Perhaps the totem master had used a special method to avoid the monsters, so the monsters did not eat the corpses!

The reason why these monsters attacked the Barbarian cultivators was probably because they were close to the underwater teleportation formation.

As for the totem master, he must have made preparations and used the chaos to activate the teleportation array to escape from this place!

Tang Zhen slowly walked to the front of the undersea teleportation formation. He waved his hand and took out a teleportation stone tablet from his storage space.

This was a gift from situ Yuanzhi. There were five pieces in total, so he could head to heaven battling city at any time.

After exiting The Dark World, Tang Zhen quickly activated the transportation stone tablet. At the same time, he chanted an incantation in a strange language.

Immediately, the entire teleportation array flickered with light and wrapped Tang Zhen within it. In the blink of an eye, he disappeared without a trace.

The monsters that were flogging the corpses noticed this and immediately roared. They quickly surrounded the teleportation array, their bodies flashing with lightning, as if they were extremely angry!

.....

After the feeling of being crushed disappeared, Tang Zhen's figure appeared in a huge ruin.

Beneath his feet was a teleportation formation that was covered in gravel and grass. At this time, all the debris had turned to dust, and the light was slowly dimming.

Looking around, there were broken walls everywhere. The once magnificent buildings had gone through countless years of wind and rain, and now they were mottled everywhere.

There were wild grass and white bones everywhere. There was no life in the ruins!

Tang Zhen switched to the map view and was shocked to discover that he was actually on an incomparably huge mushroom-shaped mountain peak. This ruin was built on the peak of the mountain!

The mountain was probably thousands of meters tall and extremely steep. Other than a few huge vines hanging down and vaguely disappearing into the clouds, there was no other way to go up and down.

He wondered how the people who lived here had left this place.

Tang Zhen quickly scanned the ruins. He did not find any traces of the totem master. He was either hiding in the ruins or had left the giant mountain.

The totem master would definitely not be willing to be trapped in this land of death, so it was obvious that the latter was more likely!

Tang Zhen's mental energy was swiftly spread out as he began to continuously explore every corner of the ruins. He would not let go of any suspicious location.

Not long after, Tang Zhen discovered a location. It seemed that a large number of vines had been cut by swords.

He continued to search along the trail he found and soon found another hanging vine that seemed to be tied in a knot.

He didn't need to guess to know that the totem master was using these vines as a rope to leave the ruins of the City Tower that was built in the air!

The sky was high and the earth was wide, and the surroundings were desolate.

Looking down from above, all he could see was wild grass and broken stones. Occasionally, he could see a few lakes, but they were also deathly silent, without even the slightest ripple!

In such an environment, one would feel an indescribable sense of loneliness in the bottom of one's heart, at a loss and at a loss.

Tang Zhen didn't know what this place was. After all, the world of Loucheng was incomparably vast. Up until now, he had never heard of anyone who had the knowledge to describe the entire continent!

According to Situ Yuanzhi, there was once someone who traveled millions of miles away but still could not see the other end of the continent.

There were countless secrets in the tower world. Tang Zhen had long been accustomed to this and was somewhat used to it.

For example, the unknown land in front of them was filled with a strange aura.

The most inconceivable thing was that there were no living creatures on this land. Tang Zhen had not even seen an ant-like insect!

It could be said that other than the monotonous plants, this place was a dead land.

Tang Zhen continued to search for the traces of the totem master. He advanced quickly and soon flew more than a hundred miles.

It was also at this moment that the flying Tang Zhen's body trembled as a trace of joy appeared on his face.

It turned out that in the field of view covered by the map, a lone woman had suddenly appeared, looking around in the wild grass.

Tang Zhen recognized her with a single glance. She was the foreign female cultivator who had appeared in the video and was protected by the Barbarian cultivators!

And the totem master who had escaped overseas was most likely hidden on her.

Tang Zhen's spirit was immediately jolted when he finally discovered the target that he had been chasing all the way. He suddenly activated his instant movement.

In the next second, his body appeared directly beside the foreign woman, and he suddenly launched a fatal blow!

However, just as Tang Zhen was about to attack, the foreign woman seemed to have already predicted his appearance. She actually disappeared without a trace in this critical moment!

The instant before the foreign woman disappeared, Tang Zhen saw a sinister and distorted face looking at him with sinister and fearful eyes.

Tang Zhen frowned slightly when he saw the foreign woman fleeing. He hurriedly switched to the map's view and indeed, he discovered the figure of the foreign woman a hundred kilometers away.

However, from her expression, she seemed to be completely oblivious to what had just happened. She was looking around with a blank expression, not knowing why she had suddenly appeared here.

However, she was only stunned for a few seconds before she continued on her way!

Tang Zhen cursed in his heart after he had used up his daily teleportation across the entire map. Both of his wings suddenly flapped rapidly and he charged straight towards the foreign tribe woman like a stream of light.

In order to increase his speed, Tang Zhen would even occasionally use short distance teleportation techniques. His figure continuously flashed in the sky and disappeared into the horizon in the blink of an eye!

At the same time, his eyes were fixed on the woman, afraid that she would play some tricks and escape again under his eyes.

However, what one feared would happen. Just as Tang Zhen was rapidly approaching the lady and there was less than half of the distance between them, the lady who was hurrying on her way suddenly stopped. A trace of fear was revealed on her face.

Then, she casually took out an item and threw it on the ground.

As soon as the object landed on the ground, a burst of light erupted, and a strange-looking four-legged puppet appeared in front of the woman.

Judging from the structure and style of the puppet, it didn't belong to the world of loucheng, but rather the cultivation world where the three spirit Sisters were.

The woman quickly climbed onto the puppet and chanted an incantation. The puppet's hooves kicked up a gust of wind and it began to run at an incredible speed!

Chapter 676 dead end

"Damn it!"

Tang Zhen cursed in his heart and activated the paid attack method on his phone without hesitation.

[meteorite descent, attack strength can be adjusted. Lowest level meteorite attack, 100000 brain beads once!]

Apart from the time when he killed the elder of blood Sand City, Tang Zhen had used the [flying sword strike] to attack. In his daily battles with the enemy, he rarely used this kind of attack application that charged by the time.

The first reason was that the consumption was too great, and it was not worth it to use it. The second reason was that this type of attack could not distinguish between friend and foe, and it was basically an indiscriminate attack!

If they accidentally hurt their own residents while using such an offensive application, it would not be worth it.

However, Tang Zhen currently did not have any other long-range attack methods. Moreover, there was no need for him to have any scruples in this place. Therefore, Tang Zhen did not have any hesitation when he used it!

Following the deduction of the stored brain beads, Tang Zhen immediately felt another bright light suddenly flash across the sky. It slanted and fell straight in front of him.

It was a meteorite that was glowing with a bright fiery light. It was carrying a destructive power as it hurtled toward the direction that the foreign woman had escaped!

The seemingly slow descent was actually extremely fast. In the blink of an eye, the meteorite had already landed on the head of the foreign woman.

The expression of the foreign woman who was riding on her puppet changed drastically. She gritted her teeth and looked in Tang Zhen's direction. Then, she reached out and removed an ornament from her head before throwing it into the sky.

The ornament exploded in mid-air, quickly turning into a ferocious giant beast!

The giant beast did not have a physical body, but it exuded a shocking aura. It roared at the meteorite that was coming at it and collided with it without fear.

An earth-shattering boom rang out, and the meteorite that had locked onto the woman exploded in the air like a super firework. Countless bright sparks scattered on the ground.

A Prairie Fire was ignited at this moment and quickly spread in all directions.

Seeing this, the foreign woman, who had managed to escape with her life, began to activate the puppet even more crazily, and it sped off into the distance.

It was unknown what kind of method she had used, but she had actually caused the speed of this puppet to be similar to Tang Zhen's. It had also caused the distance between the two of them to be maintained at a range of tens of kilometers.

Tang Zhen, who was flying in the sky, immediately sneered when he saw this scene. He did not hesitate to purchase a few more meteorites from the sky to attack!

The totem master's cultivation was profound, and he came from the same cultivation world as the three spirit Sisters. He had extraordinary knowledge and cultivation.

After it entered the world of loucheng, it had taken the opportunity to plunder the inheritance of the cultivators who suddenly turned into monsters after entering the world of loucheng. It must have many means of defense and attack.

Tang Zhen had already guessed this point. Therefore, his initial plan included using all sorts of methods to attack the totem master, causing him to exhaust all of his life-saving trump cards.

When the master of the totem no longer had a trace of support, it would be the moment of his death!

Following Tang Zhen's purchase, several meteorites of the same size once again appeared in the sky. They seemed to have appeared out of thin air and directly smashed towards the totem master.

The foreign woman who was madly running suddenly turned her head. When she saw the meteorites streaking through the sky, a trace of fear and resentment flashed across her face. With some pain, she reached into her pocket again and took out a few black beads that flickered with black light.

The beads seemed to have the ability to float by themselves. Without the woman even having to throw them, they quickly rose into the air and rushed toward the meteorites.

After the two came into contact, a series of terrifying explosions rang out. The originally blue sky immediately turned black, and at the same time, countless lightning snakes slithered wildly.

As soon as the meteorites entered the lightning net, they exploded one after another, turning into fine dust!

The corner of Tang Zhen's mouth curled into a cold smile when he saw this scene from a distance. He waved his hand once again and a dark-colored tungsten steel bar suddenly shot down from the sky.

These tungsten steel bars were shaped like sharp arrows and were quite heavy. When they fell from the sky, their speed was almost 10000 kilometers per hour!

At this moment, the steel beams were all locked onto the foreign woman. If they hit her, she and the puppet she was sitting on would instantly be turned into blood and flesh!

damn cultivators of loucheng, if Dong mountain rises again, I will definitely tear you into pieces and turn all the residents of loucheng into zombies!

When the foreign woman sensed the threat above her head, her pretty face turned deathly pale, and she suddenly opened her mouth to let out a deep, male voice.

This expression was completely different from her previous gentleness. It was as if she had two souls that would switch from time to time, making people feel extremely strange.

However, that ferocious expression disappeared in a flash, and was replaced by a look of panic and decisiveness, with a hint of weakness and loneliness unique to women!

The change in her expression was so natural that she didn't seem to notice the abnormality in her body.

Seeing that the falling steel bar couldn't be dodged, the foreign woman roared again and spat out a mouthful of blood. Then, she turned into a cloud of blood mist and fled several kilometers away in the blink of an eye.

At the same time, the large stretch of tungsten steel bars fell from the sky and landed on the ground without any resistance. They were like countless cannonballs, smashing a large pit in the ground.

The four-legged puppet that the female was riding on was also struck by the tungsten arrow and instantly shattered into countless pieces!

However, before the woman could recover from her shock, a stream of light suddenly appeared in the sky and headed straight for her.

"This is the Suan ni flying sword!"

The woman let out a man's roar again, and a look of fear appeared on her face as she dodged as if she had gone mad.

In the face of this life and death crisis, he no longer held back and used all his trump cards.

Barriers appeared before her, but in the blink of an eye, they were shattered by the flying swords, revealing the non-human woman hiding behind them.

The flying sword pierced through the non-human woman's body amid her shrill cries, causing a cloud of blood to spray out!

However, as the flying sword had shattered countless protective barriers, it had used up all its power. Therefore, it only stayed for less than a second before it turned into a stream of light and quickly dissipated.

The foreign woman who had been pierced by the flying sword fell to the ground. Blood continued to flow from the huge wound, but as her muscles squirmed, the blood quickly stopped flowing.

She took out a pill from her pocket and swallowed it. Then, she struggled to get up and tried to escape.

Chapter 677 A secret race (1)

“Still not giving up? do you think you can escape?”

A faint voice suddenly sounded. The body of the foreign lady stiffened as she slowly turned around. She looked at Tang Zhen behind her with a complicated expression.

At this moment, her face was pale and she was biting her lips. It was obvious that she was suffering extraordinary pain!

“You demons, not only did you destroy my tribe, but you also killed my parents and husband. You’re inhumane! You’re all destined to die a terrible death!”

The foreign woman seemed to think that she had no chance of escaping. She simply opened her mouth and cursed at Tang Zhen. She had an expression that looked as if she wanted to eat his flesh raw. She even brandished her battle blade and slashed at Tang Zhen.

Tang Zhen expressionlessly looked at the foreign tribe woman who had almost gone mad. He casually waved his hand and a huge force struck, knocking the foreign tribe woman who was charging at him to the ground.

After the female fell to the ground, the wounds on her body were pulled open again, and blood continued to flow out, soaking her entire robe.

The woman groaned in pain as she struggled to get up. However, she accidentally touched her slightly bulging abdomen, and the determined expression on her face instantly softened.

“I beg you, please let me go, let my child go. He’s not born yet, he hasn’t even seen the world yet!

I don’t hate you anymore, and I won’t take revenge. As long as you let me go, I’ll definitely go far away and never let you see Hanhan again!”

The foreign woman suddenly knelt down and begged Tang Zhen. Tears and snot were streaming down her face, and her face was filled with grief.

I don’t want to kill you, but the thing in your stomach. It’s not your child, but a real demon!

The foreign woman didn’t believe Tang Zhen’s words at all. She just kept kowtowing and begging Tang Zhen to let the mother and son go.

Tang Zhen shook his head. His expression gradually turned ice-cold as he spoke with a mocking tone, “Enough. You’re a King level cultivator and a totem master, yet you’re using such underhanded methods. Do you really think I’ll let you go?

I’d like to know how a woman whose body has been completely destroyed can give birth to a child!

Even if she does give birth to him, he’s definitely not her son, but a freak like you!”

Tang Zhen's voice had just sounded when the body of the foreign tribe woman, who had her head on the ground, stiffened. After being silent for a moment, she slowly raised her head and raised her neck to look at Tang Zhen.

However, a strange smile appeared on the woman's face. Coupled with the tears and dirt on her face, it was a strange and terrifying sight.

if you want to see it, you can wait for a while. You'll see what I look like when I'm born!

A strange voice came out of the female's mouth. It sounded like the voices of a man and a woman were intertwined, and it had a slight tremble to it, which made people feel uncomfortable.

forget it. I feel extremely disgusted when I look at you now, so you'd better die early!

Tang Zhen's voice had yet to fade when the soul annihilating saber in his hand suddenly swung out and directly slashed towards the foreign tribe woman.

The foreign woman shrieked and was about to get up and Dodge. However, with her current seriously injured body, how could she avoid Tang Zhen's sudden attack?

As the saber passed by, a bloody light appeared, and the female's body was instantly split into two!

A sharp screech came from the woman's severed abdomen. Immediately after, an egg-sized meatball flew out at high speed, trying to escape with a shocking blood Qi.

Tang Zhen casually stretched out his hand and that meatball was immediately fixed in midair. It was no longer able to move in the slightest.

"Damn it, just a little more time and I'll succeed!

If I have another chance, I will definitely kill all of you cultivators and turn you into zombies, enslaved by me forever."

A baby's face suddenly appeared on the meatball. It was roaring at Tang Zhen with hatred and madness on its face.

unfortunately, you won't have the chance anymore. Enjoy your remaining time, because your soul will soon be scattered!

Tang Zhen coldly snorted. He no longer paid any attention to the struggling meatball and directly kept it into a box with a demon killing rune drawn on it.

This box was carefully crafted by lingxu Zi. As long as the totem master was locked in this box, he could forget about escaping.

Tang Zhen glanced at the foreign tribe woman's corpse that had been broken into two pieces and her internal organs had long been completely destroyed. He casually dug a hole and buried her in this uninhabited land.

This foreign woman was also a pitiful worm. From the beginning to the end, she was only a tool used by the totem master!

The totem master wanted to use this to complete the process of reincarnation and completely avoid the restrictions of the laws of the world of loucheng. From then on, he would no longer be bound by any restrictions.

The real child of this foreign woman had long been replaced by the totem master. The day the totem master was born would be the day of her death!

However, the actions of the totem master also gave Tang Zhen an opportunity to defeat him easily. Otherwise, it was absolutely impossible for Tang Zhen to capture him so easily with the strength and means of the totem master alone!

From Tang Zhen's point of view, the totem master was already prepared. It was just that this reincarnation process was full of variables and dangers. Moreover, his strength would be greatly reduced!

It was precisely because of these unknown dangers and drawbacks that he could not make up his mind.

It was only when the Holy Dragon City invaded the overseas lands that the totem master finally made up his mind. He quickly launched his reincarnation plan, wanting to completely control his own fate.

Although he had the ability to predict, he had never imagined that Tang Zhen would actually chase him all the way here!

One wrong step led to many more wrong steps. This also determined the totem master's final outcome!

After capturing the totem master, Tang Zhen no longer hesitated and immediately set off to return to the overseas region.

He quickly flew over the land that had no living beings under his feet, heading toward the teleportation formation on the mountain.

Although he was very curious about this land, it was not the best time to explore it.

After all, he was still carrying the totem master, who was temporarily trapped.

This guy's ability was strange, and it was possible that he had some other means of escape. Therefore, the wisest thing to do was to immediately hand it over to the cornerstone platform and Exchange it for the battle credits required for the upgrade!

Tang Zhen quickly arrived at the peak of the mountain and activated the teleportation array.

Not long after Tang Zhen's figure disappeared into the teleportation array, over a dozen strange-looking plants suddenly appeared near the teleportation array.

In fact, even Tang Zhen did not expect that it was not that there were no living creatures in this area. Instead, it was because the living creature that controlled this place was really special.

They had actions that were similar to living creatures, but they were real plants. There was no doubt about that.

It was unknown what kind of method they possessed. They were actually able to shield themselves from Tang Zhen's mental energy detection and perfectly hide their figures among the countless plants!

When these plants saw the teleportation formation that Tang Zhen had used earlier, they continued to dance with their hands and feet. They seemed to be communicating with each other.

As their branches and leaves danced, they would occasionally reveal brightly colored poisonous stingers, as well as special organs that looked like sharp teeth.

From time to time, there would be powerful energy fluctuations spreading from their bodies, proving that they had the same cultivation as the cultivators in Lou Cheng!

From this, it could be seen that these plant life forms were by no means good. They should have the ability to easily kill people!

There were countless races in the world of Lou Cheng, and many of them could not be measured with common sense, which could be seen from these plant races!

Chapter 678 Exterminating the lightning-type monster (1)

All the changes in this unknown place temporarily had nothing to do with Tang Zhen.

After the dazzling and distorted scene disappeared, Tang Zhen's figure had already appeared on the teleportation array under the sea of nothingness.

Tang Zhen did not relax his vigilance. This was because he knew that before he was teleported away, several electric monsters had furiously rushed over here!

Those barbarian cultivators were killed by them. After they died, they were devoured and torn into pieces!

Those monsters seemed to treat the teleportation portal as their reverse scale, forbidding any other living beings from touching it!

The reason for this might be related to the special nature of the teleportation formation.

After all, even when the teleportation portal was not in operation, it would still emit a faint energy. To the monsters, this was the best place for them to rest and improve their strength.

In the sea of nothingness, there were definitely not many similar places. Once they were discovered, they had to guard them with all their might and not let other creatures touch them!

Therefore, it was understandable that the electric-discharge monster regarded this place as a forbidden area!

The matter was just as Tang Zhen had expected. Those monsters had been loitering in the vicinity. When they saw the light from the teleportation array flickering again, they immediately rushed over as if they had gone mad.

Tang Zhen had long been on guard. At this moment, the soul annihilating saber instantly appeared in his palm when he saw over ten enormous monsters flickering with lightning pouncing toward him.

Those monsters with the cultivation of four-star horde leader or so completely ignored the terrifying aura emitted by Tang Zhen. They opened their huge mouths and bit at him ruthlessly.

Tang Zhen coldly snorted. The soul annihilating saber in his hand was accompanied by a cold light as it directly hacked at the body of the nearest monster.

With a miserable howl, a large piece of flesh was cut off from the monster's head, and a pit appeared on its head.

Dark green blood gushed out like a fountain, soaking the nearby mist.

The injured monster rolled around in pain. Its huge body leaped out of the sea of nothingness, bounced up a dozen meters high, and then fell back down heavily.

After lying on the ground and twisting a few times, the monster stopped moving.

The other dozen or so monsters seemed to have been stimulated by the blood. They immediately charged at Tang Zhen as if they had gone mad. The lightning snakes that wreaked havoc continued to wave around, enveloping the entire area around him.

Tang Zhen hurriedly released an energy barrier when he saw that the situation was not good. It instantly collided with those electric snakes!

Tang Zhen immediately felt that something was amiss when this electric snake touched his body.

An extremely uncomfortable numbing, swelling, and pain assaulted him, causing his limbs to instantly harden and tremble. It seriously affected Tang Zhen's movements.

Fortunately, Tang Zhen was wearing the femme combat suit. The specially made purple-gold battle armor had an extremely good insulation property after several tests.

Coupled with the strengthened protective shield of the mobile phone, the damage of the terrifying electric current was actually infinitely weakened!

Although his limbs had become sluggish due to the electric current's assault, Tang Zhen's mental energy had burst out at this instant and covered the entire surrounding area.

those monsters also felt the mental energy that was everywhere. their speed increased once again, and they ruthlessly crashed towards tang zhen!

It was also at this moment that Tang Zhen began his Swift and fierce counterattack.

Several jet-black daggers suddenly shot out from around his body. They were like spiritual snakes that continuously spat out astonishing cold glints.

Soon after, under the control of Tang Zhen's terrifying mental energy, those black daggers were like red Hot iron that had come into contact with butter as they softly and easily drilled into the bodies of these monsters.

These monsters let out painful roars. However, their attacks became increasingly frenzied, forcing Tang Zhen to continuously teleport and Dodge!

A life-and-death battle between high-level cultivators was actually just a matter of seconds. There wasn't much of a back and forth.

Killing the enemy in one move was the most common scene in a life and death battle!

In the blink of an eye, the Black Daggers shot out from the monster's body and pierced into it again, turning its internal organs into a pool of mud.

The monster that was attacked howled in pain. Its huge body struggled in pain, and countless gravel and dust were lifted up. The sea of nothingness formed by fog began to surge violently.

Under Tang Zhen's control, these tiny black daggers actually unleashed an incomparably terrifying killing power. In a flash, they had killed these monsters until their bellies faced the sky and their bodies heavily fell to the ground.

In less than half a minute, all the electric-discharging monsters that surrounded Tang Zhen were killed!

Dark green blood splattered everywhere, emitting a faint fluorescent light in the dark environment.

Seeing that these few monsters were already dead, Tang Zhen retracted his black short sword and quickly inserted it into the groove at the back of his battle armor!

Not only did the purple-gold armor look mighty and domineering, but the materials used to make it were also extremely precious. Ordinary cultivators had never even heard of it, let alone seen it!

Many secret forging techniques, runic magic circles, and a series of technological achievements were used to make this set of armor!

Once all the functions were activated, the wearer of this armor would immediately transform into a terrifying combat weapon, and their combat power would soar!

As Tang Zhen's special equipment, the purple-gold battle armor's value could no longer be measured by money. This was because one could not buy it even if one had the money.

If they had to set a price, it could only be said to be priceless!

After taking out the brains of these monsters, Tang Zhen walked toward the void snake cultivator.

Previously, this guy had promised that as long as he captured the totem master, he would give him the token of the void Snake Clan as thanks.

With this special token, he would be able to find the void snake cultivators of the same race and ask them for the information he needed when he opened the grade 7 overseas battlefield.

According to what the void snake cultivator had said earlier, the mission of their race was to guard the sea of nothingness, which was the prison of the endless sea, and to prevent any barbarian or spirit body from secretly leaving.

As the local tyrants of these overseas battlefields, Tang Zhen believed that he would definitely be able to obtain useful information from their mouths!

When two armies were fighting, the accurate and timely information could even be compared to millions of soldiers!

Therefore, Tang Zhen attached great importance to this promise of the illusionary snake cultivator. Otherwise, with his personality, why would he be greedy for such a small reward?

Because the previous battle was quite loud, the monsters nearby had all dodged. Even the fluorescent insects on the bones had all dimmed, making the nearby area dark.

At this moment, the green lights were like the first light of a lantern, revealing the strange Halo in the sea of fog!

The body of the illusionary snake cultivator, which was like a small mountain, also appeared in Tang Zhen's field of vision at this moment.

Following Tang Zhen's continuous approach, the illusionary snake that was originally in a deep sleep also trembled slightly.

Chapter 679 Void snake cultivator's token

With the strength of the illusionary snake cultivator, it was impossible for him not to sense Tang Zhen's appearance. It was even possible that the illusionary snake cultivator had already sensed Tang Zhen's arrival when he was teleported back.

As for the battle between Tang Zhen and those electric monsters, the void snake cultivator would definitely have witnessed the entire process!

As Tang Zhen stopped his footsteps, the illusionary snake's body once again trembled. A mist was spat out from its huge head.

At the same time, the shrunken illusionary snake formed from pure energy also appeared in front of Tang Zhen. Even though he had not entered The Dark World, he could still clearly see it.

"Your Excellency's strength is extraordinary. As expected, you captured the totem master, and your speed far exceeded my expectations.

Since that's the case, I can't go back on my word. You can take it!"

The illusionary snake cultivator's mental power was very strong. With a slight sweep, he could sense the aura of the totem master.

After confirming that Tang Zhen had captured the totem master, the illusionary snake cultivator didn't waste any more words and directly controlled an item beside him to throw into Tang Zhen's hands.

It was a palm-sized scale that had been buried in the soil beside the illusory snake's body. It looked like it had been there for quite a few years.

Tang Zhen took a careful look and discovered that there were fine and complicated patterns on the scales. It appeared extremely complicated.

this is my scale, and it contains my aura. When you need it, you can take it out!

After saying that, the illusory snake cultivator's energy body dissipated again. It was clear that he had fallen into a deep sleep.

Tang Zhen originally had a few questions he wanted to ask, but the void snake cultivator didn't give him the chance. This made him feel quite depressed.

No longer paying attention to the void snake cultivator who was pretending to be asleep, Tang Zhen turned around and rushed to the edge of the void Ocean. It didn't take long for him to reach the shore.

The Holy Dragon City cultivators, who had been waiting for a long time, immediately surrounded him. After confirming that Tang Zhen was fine, they secretly heaved a sigh of relief.

Previously, Tang Zhen did not allow them to follow him because their cultivation was insufficient. Although this was out of consideration for the cultivators, it also made them feel a kind of self-blame for not being strong enough.

After all, Tang Zhen's strength far exceeded them. Therefore, how could ordinary cultivators in Loucheng City deal with those who could be regarded as his enemies?

However, as a cultivator of Loucheng, it was his duty to go through fire and water for the interests of Loucheng.

However, when the enemy's strength exceeded them by too much, even if the cultivators were prepared to sacrifice themselves, Tang Zhen would definitely not allow it. This was because he would not make a losing deal.

This kind of thing had happened more than once. Although Tang Zhen did not take it to heart, the cultivators of the Holy Dragon City firmly remembered it.

Many Holy Dragon City cultivators were secretly reminding themselves that they must work hard to improve their cultivation, in case they encountered similar situations again and couldn't help because of their lack of strength, causing the city Lord to be in danger alone!

After Tang Zhen swept his gaze over the cultivators, he casually released the flying magic carpet. At the same time, he chanted an incantation to enlarge it!

When the flying magic carpet expanded to about ten meters, it stopped expanding. This was its limit.

The totem master had been captured. There was no longer a need to stay here. Tang Zhen and the rest jumped on the magic carpet and directly ran towards the sacred Dragon Legion's encampment.

They galloped all the way. When Tang Zhen and the rest arrived at their destination, the moon was already hanging high in the sky. Everything seemed to be silver-plated, revealing a different kind of charm.

Tang Zhen did not have the time to admire the moving moonlight. Instead, he headed straight for the teleportation gate and returned to Holy Dragon City.

.....

let me go. I know many big secrets of the world of Loucheng. As long as you let me go, I'll tell you everything!

In front of the foundation stone platform, the totem master that had turned into a meatball was still making his final effort, trying to bewitch Tang Zhen.

Previously, he had been trying his best to escape the ocean and had almost succeeded. Unfortunately, Tang Zhen had still ruined his plans.

Now that Tang Zhen had taken him away from the overseas region as the city Lord, the totem master was no longer restricted by the rules. He easily passed through the bronze door.

This was something that the totem master had always dreamed of. Unfortunately, leaving the overseas land in this way did not mean that the totem master had obtained freedom, but that he would face death at any time!

The totem master hadn't lived long enough, so he naturally wouldn't be satisfied.

Tang Zhen really wanted to know the secrets mentioned by the totem master. However, he was even more afraid that his greed would cause the totem master to escape, causing the Holy Dragon city's previous efforts to be in vain.

What was even more fatal was that with the existence of such an enemy, Tang Zhen might not even be able to sleep well!

Only when he handed the ferocious-looking totem Lord, whose tone was filled with unwillingness and fear, to the cornerstone platform and confirmed that the mission had been completed, did he slowly heave a sigh of relief.

Although he had already captured the totem master, Tang Zhen was really afraid that this guy would escape again.

Now that the dust had settled, Tang Zhen had finally put down a stone in his heart.

So far, the Holy Dragon city's fight for the level six overseas land was nearing its end.

It was estimated that in about a month's time, after the overseas land was completely cleaned up, Holy Dragon City would be able to upgrade to a level Seven city!

This speed could be said to be extremely fast. At least, in the history of top towers that Tang Zhen knew, no tower had completely controlled an overseas land in such a short period of time.

The Holy Dragon city's combat strength and Tang Zhen's cultivation base had played a crucial role in this battle.

Although Tang Zhen was pleased with such a proud result, he did not feel the slightest bit of pride.

Through this battle for the overseas lands, Tang Zhen had a further understanding of the tower world.

The destroyed buildings of nations, the barbarians who were abandoned and became prey, the totem spirits, and the illusionary snake cultivators all let him see a scene that few people knew about in the world of buildings.

Brutal and merciless, only the strong could live forever!

Tang Zhen did not want this scene to happen to the Holy Dragon City. Hence, only by continuously becoming stronger and surpassing all the other buildings could he prevent this from happening.

Especially when the Holy Dragon City was strong to a certain extent, they might be able to break this rule and even become the rule maker!

Tang Zhen returned to his room and sat on the soft sofa. He was slightly lost in thought as he looked at the three-headed six-armed giant statue.

Murong Zi Yan poured him a cup of tea while Xiao die carried a plate of fruits sold by the foreign merchants and gently placed it in front of Tang Zhen.

The two of them could tell that Tang Zhen seemed to have something on his mind. Therefore, neither of them said anything to disturb him. They only quietly sat on his left and right.

After over ten minutes, Tang Zhen recovered from his shock. He picked up the cup of tea in front of him that had already turned cold and drank it in one gulp.

let's go to the residential area together. It seems that we haven't been there for a long time!

The two women naturally did not refuse. After changing their clothes, the three of them walked towards the residential area.

Chapter 680 dominate the inter-plane passage

The Holy Dragon City was now overcrowded. The originally empty houses were also full of residents. Although it looked a little noisy, it was full of people, not as cold and quiet as before.

As the Holy Dragon city's military camp and residential area were separated into two places, most of the moving figures within the area where Lou Cheng was located were also residents of Lou Cheng.

Walking up the stairs, the three of them talked as they walked. It didn't take long for them to reach the residential area.

The area of each tower in the Holy Dragon City was extremely large. It took a long time to reach the end of a corridor, and this was the place where the Holy Dragon city's residents had their leisure time.

Under the bright lights, a wide area appeared in front of the three of them. Many residents of the city were gathered here, and it seemed very lively.

Some of them were playing cards, some were chatting, and some were gathered together, watching the video on the big screen.

It was now the entertainment time for the Holy Dragon city's residents every night. After a busy day, they would enjoy a relaxing time before going to bed.

After seeing Tang Zhen's figure appear, those residents were first stunned. Soon after, they immediately surrounded him with enthusiasm.

The residents on this floor were all the Aborigines of the tower world. Towards Tang Zhen, who brought them a happy life, these residents were filled with respect and love from the bottom of their hearts.

After chatting with these residents for a while, Tang Zhen was also invited to join the residents' card game that had just begun. He casually played for a while.

The Holy Dragon City resident who had given up his seat stood behind Tang Zhen in excitement. It was as if it was a great honor for Tang Zhen to sit here.

For some unknown reason, his luck was astonishingly good, and he won almost every single round!

Ten minutes later, Tang Zhen glanced at the other three loucheng residents who had lost all their money. He laughed and stood up, leaving with Murong Zi Yan.

Next, Tang Zhen and the other two took a look at the building where the new residents lived. After chatting with the transmigrators who had already adapted to the world of the building, they returned to their own residence with smiles on their faces.

Another sunny day had arrived. The Golden rays of the sun shone on every corner of the Holy Dragon City, and even the air was filled with a sense of comfort and relaxation.

The Holy Dragon city's residents welcomed the bright sun and began a new day of work with smiles on their faces. Each and every one of them was full of energy.

Because the more powerful the Holy Dragon City was, the better their lives would be!

This change was so obvious that everyone saw it and was happy in their hearts. They were also willing to contribute their own strength.

Unlike the residents of the Holy Dragon City, Tang Zhen, who had always been diligent, slept a little more today.

After coming back from loucheng's residential area last night, he tossed and turned in bed for most of the night before he slowly fell asleep.

Lou Cheng's advancement to Level 7 was not far away, and the pressure on him had been reduced by a lot, so he slept especially soundly.

After having a simple breakfast, Tang Zhen changed into a set of light clothes and began to stroll around the tower.

Tang Zhen was bathed in the warm sunlight as he walked on the lush green grass. He was pondering over a problem as he walked.

War was the most costly and costly thing. In order to go overseas, the Holy Dragon City had used up a lot of their reserves. Fortunately, they had won in a short time.

If Holy Dragon City was stuck in a quagmire of war like heaven battling city and couldn't break free for hundreds of years, then even if Holy Dragon City had the resources of the original world, it would not be able to bear the burden!

Therefore, after Lou Cheng's upgrade, Holy Dragon City would definitely need to rest for a while before starting the level 7 overseas battlefield.

Although Tang Zhen was very anxious for the Holy Dragon City to become stronger, he also knew that everything had its priorities. The road ahead was still very long, so there was no need to be in a hurry.

Unknowingly, Tang Zhen had already walked to the end of the grass field and arrived near the white-colored Mage Tower.

Tang Zhen swept his gaze over this city building that towered into the clouds before he walked in.

As soon as he entered, Tang Zhen felt a wave of energy that was so dense that it was almost viscous was slowly floating within the wizard Tower.

This was a type of energy formed after the brain Pearl was transformed. It was extremely beneficial for the advancement of cultivation. It could be said that this was a treasured land for cultivation!

The strength of the Holy Dragon city's cultivators had advanced by leaps and bounds, and the great Mage Tower's contribution could not be overlooked.

Of course, the consumption was also very huge. So, if one wanted to enter here to cultivate, they had to pay a certain amount of points!

Only by entering and exiting the city could the normal operation of the city be guaranteed. It could also allow the cultivators in the city to remain enthusiastic and continue to work hard to complete the missions and earn enough points!

At this moment, in the hall on the first floor of the mage Tower, there were a few Holy Dragon City cultivators in long robes sitting cross-legged, all of them meditating.

The energy here was the gentlest and most suitable for ordinary cultivators to cultivate. As for Lord-ranked cultivators, they could cultivate on the higher levels of the wizard Tower!

These cultivators were too focused on their cultivation. Therefore, they did not notice Tang Zhen's arrival. Tang Zhen did not intend to disturb them. He only quietly walked to the upper level of the wizard Tower.

On the second floor of the mage Tower, there were many items brought back from the mage junkyard. They were displayed like merchandise.

There were books, artifacts, and many strange materials.

The reason why these items that originally belonged to the wizard World appeared in the wizard Tower was naturally due to the Holy Dragon city's cultivators who were doing missions in the interdimensional passage!

Currently, the Holy Dragon City cultivators were famous for being overbearing in the world of ruins that was connected to the interdimensional passage. They relied on their strength and occupied almost 70 – 80% of the entire world of ruins!

If they heard that there were good things in other areas, the Holy Dragon City cultivators would charge over aggressively and snatch them without a second word.

If those foreign cultivators were not convinced, the Holy Dragon City cultivators would laugh hideously and chase after them!

In terms of cultivation, those foreign cultivators could not compare to the Holy Dragon City. In terms of weapons and equipment, they were even more inferior. Hence, every time there was a battle, those foreign races would suffer heavy losses.

As time passed, these foreign tribes had no choice but to unite and work together to resist the Holy Dragon city's oppression.

But even so, those foreign races were still no match for the Holy Dragon City cultivators, and were beaten until they fled like rats.

In the end, they had no choice but to swallow their anger and let the Holy Dragon City cultivators run amok in the world of ruins. They pretended not to see them!

Of course, the Holy Dragon City was not unforgiving. After defeating these foreign races, they immediately stated their conditions, asking the foreign races to use the items they found in the world of ruins to exchange for a monster hunting ground.

The higher the value of the item, the more land area he could exchange for!

The main purpose of the ruins was to provide brain pearls to the level 5 towers. The items found in the ruins were just side benefits.

Therefore, the non-human loucheng agreed to the Holy Dragon city's condition after some consideration.
