Chapter 71: killing the cornerstone Guardian monster

“This strange sound came from the inside of the ruins. To be able to survive the billowing poisonous smoke, it must not be a simple character.”

Tang Zhen’s heart tightened. He immediately raised the rifle in his hand and aimed. His eyes were firmly locked on the entrance of the ruins.

“The Wanderers also felt that there seemed to be something dangerous behind the smoke that had yet to dissipate, and it could threaten their lives.”

“A low roar came from the smoke, seemingly filled with anger and mania.”

“Not good, this thing is definitely a monster that guards the foundation stone!”

“As this thought flashed through his mind, Tang Zhen took out a bomb without the slightest hesitation and shouted, “move away immediately!””

“The few people who had seen Tang Zhen use the bomb immediately retreated as if their butts were on fire. The rest of the Wanderers also dodged when they saw this. When they saw that everyone had dodged to the side and a safe area, Tang Zhen immediately threw the bomb that was ignited by the fuse.”

“The bomb fell into the entrance of the ruins, making a soft sound as it landed.”

Boom! Boom! Boom!

“After a loud bang, broken rocks flew everywhere, and the ruins became even more broken.”

“Another roar of anger mixed with pain came from the dust, shaking the dust. At the same time, a figure more than two meters tall walked out of the ruins, looking a little disheveled.”

Tang Zhen involuntarily frowned when he saw this monster that had walked out from the ruins.

“This guy didn’t look like a simple character. His appearance was similar to that of a bloodthirsty Goblin, but his height and body size were three times that of a normal bloodthirsty Goblin. Due to the shock wave of the explosion, this guy was covered in wounds of all sizes, and blood was slowly oozing out. He was dragging a concrete hammer with a steel bar as the handle.”

“Tang Zhen visually estimated that this piece of concrete was over a hundred Jin in weight. However, it was like a small wooden stick in the monster’s hand. This was enough to prove that this monster possessed terrifying strength!”

“At this moment, the monster was looking at Tang Zhen’s group with hatred in its eyes. Its large mouth was opened and its canine teeth were intertwined.”

“Tang Zhen stared at the giant bloodthirsty Goblin, and the data displayed by the monster detector popped up in front of his eyes. [mutated bloodthirsty Goblin, Level 4 (cornerstone Guardian). After

mutation, it has great strength, rough skin, and thick flesh. Its weakness is that its movements are slow. The back of its head is a fatal point.] ”

“After seeing the information of the mutated bloodthirsty Goblin, Tang Zhen no longer had any scruples in his heart. It was just a level 4 monster. Although it had boundless strength, it had a fatal flaw. He believed that it wouldn’t be a problem for so many people present. ”

its weakness is at the back of its head. Attack immediately!

“Without any hesitation, Tang Zhen immediately raised his rifle and opened fire at the monster. Qian Long, who was beside him, drew his bow and arrows. As soon as Tai Seng and the rest heard his command, they also threw their metal rods and short Spears, aiming at the monster’s head! ”

“Nearly twenty people attacked at the same time, and they were all using their full strength. This kind of terrifying destructive power was very difficult for ordinary flesh and blood bodies to withstand. ”

“The mutated bloodthirsty Goblin’s body was instantly covered with terrifying wounds, causing it to howl in pain. But what was shocking was that even after suffering such heavy injuries, this fellow still did not fall. ”

“It let out a furious roar and fiercely swung the concrete block in its hand, directly smashing it toward the two Wanderer Warriors beside Tang Zhen. ”

“““Be careful!”” ”

“Tang Zhen shouted loudly when he saw this. He kicked one of the people and sent him flying. However, the other Wanderer was already too late to save him. The piece of concrete grazed past the Wanderer’s shoulder and actually smashed off his arm. ”

“““BOOM!””” ”

“The bloodied concrete blocks fell heavily on the grass, and the Wanderers who were hit were covered in blood and fainted without a sound. ”

“““You’re looking for death!” ”

“Tang Zhen roared and kicked a blade that had fallen to the ground. His body moved like a gust of wind to the side of the mutated bloodthirsty Goblin. Without waiting for the monster that felt threatened and moved slowly to turn around, he raised his blade and ruthlessly slashed at the back of the mutated bloodthirsty Goblin’s neck. ”

“The current Tang Zhen was incomparably strong. When this powerful and heavy blade slashed down, it actually broke half of this monster’s neck! ”

“The monster roared in pain and waved its large sharp claws at Zhen Tang. However, it was blocked by the big Bear who pounced on it with a shield. Immediately after, the big Bear smashed its Mace on the head of the mutated bloodthirsty Goblin. ”

“The spikes on the mace made several bloody holes in the mutated bloodthirsty Goblin’s head, but it was extremely tenacious. It didn’t die after being hit by the heavy blow. Instead, it spurted blood and struggled with the big Bear. ”

It was also because of this that the mutated bloodthirsty gnomes were firmly controlled by the big Bear and could not move easily.

“The thousand Dragons, who had long been ready, shot three arrows in a row at lightning speed, all of which deeply pierced the back of the mutated bloodthirsty Goblin’s head. The mutated bloodthirsty Goblin, whose vital parts were hit, let out a miserable howl, and its movements became slower and slower.”

“Seeing that Tyson was about to finish him off, Zhen Tang was unwilling to agree. He immediately activated the light body technique on his leather armor and dashed behind the mutated bloodthirsty Goblin like a rocket. The saber in his hand slashed at the mutated bloodthirsty Goblin’s neck, which had already been cut in half.”

“The huge monster’s head flew up, and blood gushed high into the air, splattering all over the face of the big Bear.”

Tang Zhen let out a long breath as he looked at the mutated bloodthirsty Goblin that fell to the ground and died after spurting out blood.

“If it weren’t for the damage caused by the previous bomb and the advantage of being the first to attack, they would definitely suffer heavy casualties once the monster attacked.”

“To Tang Zhen, this easy victory was extremely lucky.”

He checked his level up progress and realized that he was only a step away from Level 3. The rewards for killing monsters of a higher level were indeed generous!

“After Qian Long sized up the mutated bloodthirsty Goblin, he walked to Tang Zhen’s side and spoke with an uncertain tone,” “This monster is very powerful. It is very likely to be the monster guarding the foundation in the wild building. It must be at least Level 4!”

“Tang Zhen nodded his head when he heard this. The truth was just as Qian Long had said. This bloodthirsty Goblin’s lair was indeed an unexplored wild building. And under the ruins, there was an item that was necessary for building a city-foundation stone.”

“The poisonous smoke that filled the air had already dissipated. Tai Seng ordered his men to first treat and bandage the injured Wanderer. Whether he could survive or not would depend on heaven’s will. However, with the medicine that Tang Zhen had brought and the stitching of his wound, his chances of survival had increased by quite a bit.”

“Tyson and the others were already used to this kind of thing, and the sadness on their faces only flashed for a moment. This time, they had killed all the bloodthirsty gnomes and a level-four Guardian monster, but no one had died. It was already a huge victory.”

“The Wanderers didn’t need to be ordered to continue collecting the items on the bloodthirsty gnomes. They were ready to explore the ruins later. After all, this was an unexplored building, and the chances of finding good things were very high.”

“Qian Long used a knife to cut open the mutated bloodthirsty Goblin’s head. He found a red brain and threw it into Tang Zhen’s hand. In his opinion, if Tang Zhen wanted to build a city, he would definitely need this thing. ”

“Unfortunately, Qian Long did not know that Tang Zhen had already emptied the treasure vault of Black Rock City. Those boxes of brain matter might have been the reserves that Black Rock City had accumulated for the next upgrade tower. In the end, it had helped Tang Zhen. ”

“Therefore, the number of brain beads in Tang Zhen’s storage space was shocking. It was enough to cause Qian Long’s jaw to drop. ”

“Following behind Qian Long and Tai Seng, Tang Zhen and the rest slowly walked into the bloodthirsty Goblin’s lair. ”

Chapter 72: Searching the ruins (1)

“As expected, the ruins that the bloodthirsty gnomes used as their nest were dirty and messy. Garbage and bones were everywhere, and a strong stench permeated the air. ”

Tang Zhen covered his nose and swept his eyes over. He discovered that there were quite a number of human skulls among the scattered white bones.

They were indeed damned monsters. Who knew how many people they had eaten?

“The ruins looked dilapidated on the outside, but the space inside was very spacious. There was a lot of food scattered on the ground. Most of the bloodthirsty gnomes suddenly entered the ruins, probably because it was mealtime. ”

It was also because of this coincidence that the group of bloodthirsty gnomes that had wreaked havoc in the valley had been captured by the Wanderers in one fell swoop.

“Tang Zhen walked inside the ruins while observing the structure and the remnants of the building. The more he looked, the more familiar he felt. ”

“It was really familiar, but what was this place? ”

“Tang Zhen, who was filled with doubt, turned his gaze to an item that looked like a counter at the corner. A flash of inspiration appeared in his mind as he immediately came to a sudden realization. ”

“That’s right, this was clearly a bank! ”

“After figuring out the origin of this wild building, Tang Zhen was overjoyed. Could it be that he was going to make a fortune today? ”

“Just as this thought surfaced in Tang Zhen’s mind, he saw Tai Seng running over with a face full of joy. At the same time, he was carrying a huge bag made from monster leather in his right hand. ”

“““This bunch of ugly people really hid a lot of things. Mr. Tang, are these good enough?”” ”

“what’s inside? ”” Tai Seng asked in an excited tone as he opened the bag of the monster leather. ”

“Tang Zhen glanced at it and sure enough, he saw a lot of golden coins and colorful banknotes. At the same time, there were also some things that looked like gemstones. However, these things looked very dirty and emitted a pungent smell. ”

“No matter how bad the taste was, it was still money. Tang Zhen would definitely not dislike it. ”

“After carefully checking it, Tang Zhen nodded his head in satisfaction and asked Tai Seng, ““ ““Have you counted the number? how many are there?”” ”

“Tai Seng’s old face turned red upon hearing this. For someone like him who only knew how to do simple calculations, counting the exact amount of these items was absolutely impossible. Fortunately, Tang Zhen had also noticed Tai Seng’s embarrassment and had him temporarily put the package aside. ”

“At this moment, some Wanderers had already found the entrance to the basement. Tang Zhen immediately rushed over when he heard this. ”

The entrance to the basement was blocked by the collapsed concrete wall. Tang Zhen looked at the huge concrete block and scratched his head. He then ordered someone to call in the big Bear that was squatting outside and swallowing the brain Pearl.

“Under the surprised gazes of Tyson and the others, da Xiong, whose mouth was still stained with blood and brain juice, easily moved the 1000-pound concrete wall away, revealing the entrance to the basement. ”

Tai Seng and the others looked at the big Bear as if he was a monster before following Tang Zhen down to the basement.

“As expected, there was a black foundation stone covered with runes floating above a stone platform in the basement, emitting a mysterious aura. Because Tang Zhen already had a few foundation stones, he wasn’t extremely excited in his heart. On the other hand, Qian Long, Tai Seng, and the others clicked their tongues in wonder. ”

“Tang Zhen glanced at Tai Seng. When he saw that Tai Seng did not have any intention of taking the foundation stone for himself, he smiled and walked forward to keep it. ”

“The foundation stone had been taken away, which meant that the building had been completely cleaned up. It would not be long before it collapsed into real ruins. ”

“After searching the basement and making sure that there was nothing else, the group left. ”

“When they came out of the basement, everyone had already completed a preliminary search of the ruins. Unfortunately, they did not find the gold bar that Tang Zhen desired. ”

Perhaps this was just an ordinary small bank with no gold reserves.

“The vault was also found by Lisa and the others, but it was a pity that it was already a mess and had been used as a place for the bloodthirsty gnomes to sleep and excrete. After rummaging for a long time, the Wanderers only found a dozen bundles of dirty notes. ”

this is so disappointing. The drop rate of these bloodthirsty gnomes is a little low!

Tang Zhen muttered the strange words that everyone heard as he walked out from the ruins.

“Standing outside the ruins, Tang Zhen glanced at Tai Seng who was beside him and asked indifferently, ““ I plan to build a city Tower and allow you to become its residents. What do you think? ““ ”

“Hearing this, Tai Seng’s face revealed an expression of joy mixed with shock. After hesitating for a while, he asked, ““ it’s every Wanderer’s dream to have a City Tower to rely on. It’s easy to build a city Tower, but it’s difficult to defend it. Do you have the confidence to defend against the monster attacks after the City Tower is built? ““ ”

“Tai Seng had wandered the wilderness for many years and had seen many examples of new buildings being destroyed by monster attacks after they were completed. It could be said that less than one in a hundred had survived. There were also some buildings that were lucky enough to resist the monster attacks, but they would be destroyed not long after for various reasons. ”

The destruction of the city and the death of people were not just empty words!

“After the city was broken, the residents of the city who lost their support were even worse off than the Wanderers. Even if they escaped the massacre of the city, it was difficult for them to survive in the wilderness! ”

“But even so, there were still countless Wanderers who were like moths to a flame! ”

“Take Black Rock City as an example. Outsiders only saw how powerful Black Rock City was, but they did not know how many cities had been destroyed by its butcher’s knife during its rise. There were countless vengeful souls. The cultivators that Black Rock City had spent so much effort to train were not just to kill monsters. ”

“If Tang Zhen were to build a city Tower, Black Rock City would definitely become his mortal enemy. There could only be one city Tower left in this area. Even if Tang Zhen wanted to live in peace with Black Rock City, it would definitely not agree. ”

“However, since Tang Zhen dared to build a city, he was not afraid of the threat of Black Rock City! ”

“““I can provide you with sufficient supplies, be it food, weapons, or other things. What you need to do is to protect this home for yourselves and for your descendants. In this way, they can avoid the pain of wandering and can sleep peacefully at night. They don’t have to worry about starving or freezing, and can happily marry and have children in this home!““ ”

“Tang Zhen looked at Tai Seng as he spoke with a faint longing tone. His voice was very calm, yet it was filled with temptation and confidence. ”

“It wasn’t just Tai Seng, all the Wanderers in the surroundings were silent as well. Their hearts were infected by Tang Zhen’s description, and they fantasized about that kind of life. The radiance in their eyes became brighter and brighter. ”

“““Maybe we can try it. With Mr. Tang here, maybe it can really be realized?““ ”

“A Wanderer mumbled in an uncertain tone, but it made everyone’s heart skip a beat. ”

“Yes, didn’t Mr. Tang say that he could provide anything? ”

“even if we encounter monsters attacking the city, we will have weapons and food by then. We will defend the city. Do we have to be afraid of not being able to defeat those monsters?”

“After thinking through all this, the hearts of the Wanderers were filled with confidence in an instant. Then, all of them turned their gazes to the source of this confidence, which was Tang Zhen.”

“In their eyes, this man who had great power and promised to bring them a large number of precious resources might really be able to bring them a safe harbor!”

Chapter 73: Defensive preparations _1

“No Wanderer in the wilderness could resist the temptation of becoming a resident of the tower City, including Qian Long, Tai Seng, Murong Ziyang, and so on.”

“The Wanderers had been wandering in the wilderness for their entire lives. From the beginning of their memories to the end of their lives, they had struggled in the sea of suffering almost every day. When they heard that the residents of the city could live without hunger, without worrying about being eaten by monsters while sleeping, and without having to bear the pain of frost and dew at night without covering their bodies, they even regarded it as a beautiful legend.”

“One day, when they finally confirmed that the beautiful legends they heard were not false, becoming a resident of the city became their greatest pursuit in life. From their fathers to their sons, to their grandchildren, generation after generation, they bitterly hoped that this great fortune would befall them.”

“Now, was the light of luck about to befall him?”

“After exterminating the bloodthirsty gnomes, the Wanderers in the valley Camp knew that Tang Zhen was going to build a city Tower, and they were lucky enough to become residents of this City Tower.”

“This sudden happiness caused them to spend the next few days in a mixture of surprise, worry, and confusion. Many of them were out of their minds.”

“Tang Zhen didn’t care about the Wanderers who were worried about gains and losses. Instead, he began to consider the preparation work before building the tower.”

The rocks of the cliffs in the valley were hard and were very ideal building materials. It was a pity that building a house with such stones would be attacked by monsters because it was not protected by the laws.

“The towers had a natural ability to drive away monsters. Other than the groups of monsters that attacked the city and the powerful wandering monsters that needed to be defended, the monsters in the wilderness would subconsciously stay away from the towers.”

“Even if monsters occasionally broke into the defensive range of the city, they would be killed by the cultivators of the city. Therefore, the city was called a shelter for the Wanderers, and it was not deliberately glorified.”

“Natural rock buildings were not protected by the laws of heaven and earth, but they could effectively block monsters. Tang Zhen wanted to use this natural barrier to allow the newly built building to only face the monsters ‘attacks from one direction. ”

“Three sides were backed by mountains, and one side was facing the enemy. ”

“That’s right, Tang Zhen planned to “”embed”” the newly built City Tower into the cliff! ”

“The cliff had a huge depression in the direction of the valley, and during the construction and upgrade of the City Tower, the city Lord could make some changes to the shape of the tower. ”

“What Tang Zhen had to do was to embed the city into the mountain’s depression when building the city. This way, when the monsters attacked the city, they could only attack the front of the city. ”

“If there was a need in the future, he could also send people to excavate the space inside the cliff, killing two birds with one stone. ”

“Although doing so would affect the city’s future upgrades, it seemed like the benefits outweighed the disadvantages. ”

“Tang Zhen gathered Qian Long, Tai Seng, and the others for a discussion. After Tang Zhen assured them that he could provide them with sufficient resources, they decided to build three defensive lines in front of the city. They hoped that after the city was built, they would be able to effectively block and kill some of the monsters that were attacking the city. ”

“The first line of defense was a trench full of sharpened iron rods. First, the front of the tower was completely dug out, and a large trench three meters wide and two meters deep was dug. After the monster attack was over, it could be used to fill up a section of the tunnel. ”

“After confirming the first line of defense, more than a dozen Wanderers brandished the pickaxes that Tang Zhen had brought and began to excavate while sweating profusely. However, there were only a few people involved in the construction, so it would take some time to excavate the entire trench. ”

“The second one was proposed by Tang Zhen. It was a thorny iron wire wrapped with iron thorns. It was said that this thing was particularly effective in resisting the charge of infantry, but its effect in resisting the charge of monsters was unknown. ”

“Regardless of the effect, Tang Zhen still chose to set it as the second layer of defense because it was simple and fast. ”

“After the thorny iron net was coiled into a circle, it was mixed together densely and formed a long line, which made the Wanderers click their tongues in wonder. This thing was specially bought by Tang Zhen after he was teleported back. At the same time, he also brought hundreds of cement pillars into the valley. ”

“Tai Seng and the other Wanderers were naturally surprised by the large amount of resources that had suddenly appeared in the cave of the valley. They had also asked Tang Zhen about it, but Tang Zhen did not give any explanation. He only smiled, and this unknowingly increased the sense of mystery and respect he had for the Wanderers. ”

“Now that the second line of defense was in sight, it was time for the third line of defense. ”

“The third line of defense was the shortest, but it was the strongest. It was made entirely of concrete and stone. The stone wall was three meters tall and one meter thick, firmly wrapping the area in front of the building. One could only enter and exit from an iron door welded with a thick steel pipe. ”

“The three lines of defense required a lot of work. Even if the Wanderer camp in the valley, Tang Zhen, and the others were included, it would be impossible to complete them in a short time. ”

“However, Tang Zhen didn’t want to delay it any longer. If there was a group of undead and monsters wandering in the wilderness that accidentally entered this place one day, the Wanderers without the protection of the city would be in danger. ”

“When thousand Dragon saw Tang Zhen’s worry, he suggested that they could hire a group of Wanderers to help. If they performed well, they could choose to stay behind and help them fight the monsters. ”

“However, according to Qian Long’s estimation, the prerequisite for the Wanderers outside to stay behind was to understand Tang Zhen’s powerful ability. Otherwise, there would really not be anyone who would easily stay behind to court death. ”

“When monsters attacked the city, there was a 90% chance of death. This was common knowledge that many Wanderers knew. It was also the price that the residents of the city had to pay before they could enjoy peace. ”

“Every time such a time came, the Father would rush to the front and protect the tower with his life to ensure that the later generations could enjoy the comfort that they had exchanged for with their lives. ”

“After Qian Long finished speaking, he waited for Tang Zhen to make a decision. ”

Tang Zhen thought for a moment before he nodded and agreed. He asked Qian Long to arrange this matter and offered a higher reward to attract a large number of Wanderers.

“After seeing Tang Zhen agree, Qian Long led two helpers with weapons and food and set off for the nearest Wanderer gathering area. They were expected to be able to return in five days. ”

“After Qian Long left, Tang Zhen passed the construction of the defensive line to Tai Seng while he entered the cave and activated the teleportation array to return home. ”

“He took out his phone from his storage space. As soon as he opened it, many text messages popped up. After picking out a few important calls, Tang Zhen shook his head helplessly. ”

“Because there was no cell phone signal in the other world, he could only put his phone in his storage space at home. However, it would inevitably make people suspicious after a long time. Why was his phone always turned off and he could not find anyone? ”

“It had to be said that mobile phones made life more convenient, but they also used invisible chains to restrict people’s freedom. ”

“The City Tower was about to be built and the first task was to resist the monster’s attack. Whether Tang Zhen’s grand plan could be implemented or not, defending the city Tower was an extremely important link. It could be said that success or failure depended on this move. ”

“Tang Zhen would definitely not allow his hard work to go to waste. Therefore, he would go all out this time!”

Chapter 74: Material preparation and the completion of the defensive line (1)

“In order to deal with the monster siege, in addition to the three lines of defense, he also made the following plans.”

“First, it was weapons and equipment. He would give each resident armor, sabers, bows and arrows. If possible, he would also give them firearms.”

They would purchase materials to build defensive weapons such as catapults and ballistae to further strengthen the defensive capabilities of the city.

“Steel pipe, gasoline, animal trap, and an graphene glass slide.”

“Tang Zhen’s purchase document listed a large number of materials. In order to build and defend the city, he had racked his brains and used everything he had.”

“Tang Zhen didn’t have any problems with funds. Although he had purchased a lot of materials, he still had a lot of savings. Moreover, he had brought back a lot of property this time, which was enough to support his consumption.”

Wang Daqing had once again recruited more manpower. He had taken advantage of the free time to recruit dozens of people. They were paid by piece and worked overtime to produce the items Tang Zhen had requested.

“A lot of things had already been produced, and they only needed to wait a few days for Tang Zhen to drive back to get them.”

“Tang Zhen slowly walked out of the house and looked around. After making sure that no one was following him, he drove to the market to buy some things.”

“He was busy for a few days in a row. Tang Zhen’s feet almost did not touch the ground. Even though his physical strength was amazing, he also felt extremely tired.”

“Fortunately, the last batch of supplies on the list had been purchased, and he had taken the time to transport the supplies over.”

“Next, they just needed to drive the weapons and armor produced by Wang Daqing back, and then they would have all the materials needed to build the city!”

The hard work that Tang Zhen had put in during this period of time was something that outsiders were unable to understand.

“In a cave in the valley in the other world, all kinds of supplies had already piled up like a mountain. Tai Seng stared at the piles of food and weapons with bloodshot eyes, his expression ferocious as he ordered that no one was allowed to approach, or he would kill without mercy!”

“As for himself, he would often look at the resources and let out a silly laugh, but his eyes were full of hope as if he had been reborn.”

Tai Seng strictly followed Tang Zhen’s orders and was extremely strict with this batch of resources.

“Even if someone wanted to take something, Tai Seng would have to do it himself, and no one was allowed to get close to the cave. As long as any curious Wanderers stuck their heads out to take a look, he would grab them by their clothes and give them a good beating.”

“Later on, Tai Seng was worried that he wouldn’t be able to guard these resources alone, so he even called Big Bear over. The two of them were like door Gods, staring at the Wanderers coming and going, as if everyone was a thief.”

“Tang Zhen didn’t know whether to laugh or cry when he saw it. He told Tai Seng that these things couldn’t be lost, so there was no need to be so nervous.”

“After experiencing the events of the past few days, Tai Seng had almost treated Tang Zhen as a God. Naturally, he nodded his head in agreement. However, he only sent Big Bear to move the stones while he continued to guard the entrance of the cave meticulously.”

“&Nbsp; from Tai Seng’s appearance, it seemed like he wasn’t just protecting the cave, he was also protecting the happy lives of his descendants.”

Tang Zhen did not say anything after seeing this. He merely allowed him to do as he pleased.

.....

“The evening lights had just lit up, and the food stalls by the roadside were doing very well. Tang Zhen, who had been busy for the entire day, rubbed his stomach. He stopped the car, randomly picked a shop, and sat down at an empty table.”

“After ordering a large beer, a portion of spicy crayfish, and dozens of skewers of barbecued meat, Tang Zhen picked up the cold beer and drank it.”

“Tang Zhen’s alcohol tolerance was originally average, but now, his alcohol tolerance had doubled. He quickly emptied a large pitcher of beer, but he didn’t seem to be drunk at all. On the contrary, he felt even more refreshed.”

He was about to wave for the waiter to order two more glasses when he saw a tall girl in skimpy clothes suddenly jump in front of him. Her beautiful bright eyes were smiling and she was sizing him up without blinking.

“Tang Zhen felt a little suspicious in his heart. After sweeping a glance at the other party, he turned around and called for the waiter. After ordering a beer, he turned his head back and discovered that the other party was still staring at him. It was as though his face had blossomed.”

“Tang Zhen frowned. He was just about to ask what the other party wanted to do when the girl suddenly smiled happily. She pointed at Tang Zhen and said in a clear voice, haha, it’s you! I’ve finally caught you!
”

“Tang Zhen was startled when he heard this. The girl’s words had no beginning or end. Moreover, it was very easy for people to misunderstand, alright! ”

“The girl seemed to have already confirmed Tang Zhen’s identity. She directly sat down on the stool opposite him and pointed to the beer glass on the table as she asked, ”“Uncle, are you drinking alone? is there something on your mind?” ”

“”“Uh, I’m just hungry, I’m just ...” ”

“”“Beauty, do we know each other?” ” Tang Zhen asked again after a pause. ”

“”“Of course, how could you forget, uncle?” ”

“”“Hehehe!” ”

“Tang Zhen rubbed his hair. His eyes looked up at the sky as if he was recalling something. In reality, he was telling the other party that he did not know him at all. ”

“The girl pouted and took out her mobile phone to Tang Zhen’s side. She raised her mobile phone and took a photo of the two of them. After opening the photo album and taking a look, she turned to Tang Zhen and asked, ”“Uncle, what’s your phone number?” ”

Tang Zhen hesitated for a moment but did not open his mouth.

“”“Really, do you think I’m going to eat you up?” ”

“The girl pouted and picked up the phone Tang Zhen had placed on the table. She swiped it open and dialed a number. Immediately after, the girl’s phone rang. The ringtone was a pretty good English song. ”

“Her fair and slender fingers quickly operated on the screen. The girl then passed the phone to Tang Zhen. She smiled, turned around, waved her hand, and said, ”“Remember to call me. But I have to warn you, if you still can’t remember who I am the next time we meet, I’ll be angry!” ”

“Tang Zhen stared blankly as the girl’s figure disappeared into the crowd. Then, he looked at the name ‘Shen Weiwei’ on the screen and felt rather confused. ”

“Tang Zhen smiled and shook his head. However, he did not take this matter to heart. He turned around and continued to eat. ”

“After eating, he drove home. After Tang Zhen took a shower, he went to bed. ”

“The next morning, when Tang Zhen appeared in the valley, the Wanderers had already been busy for a long time. ”

“On the evening of the fourth day after the thousand Dragons left, they brought back more than 300 Wanderers, and the originally quiet Valley immediately became lively. ”

“At the same time, Qian Long also brought news from the outside. Tang Zhen fell into deep thought after hearing it. ”

“It turned out that ever since Black Rock City had killed nearly 100000 birds of death, the number of these fragile strange birds had decreased drastically, and they could no longer launch a large-scale attack.”

“However, the Wanderer zombies infected by the death bird began to wreak havoc in the wilderness. They often gathered in the hundreds and thousands and wandered around in the wilderness, causing the Wanderers to avoid them like the plague.”

“The number of corpse soldiers from the corpse race was also increasing. There were even the figures of heavy cavalymen from the corpse race, causing the cultivators of Black Rock City to cry out in pain.”

“However, these were not as dangerous as a monster called the corpse Locust. These fist-sized monsters were also from the corpse clan. They spread diseases and gnawed on weeds and vegetation. Wherever they passed, not a single blade of grass would grow. There were thousands of them. The corpse Locust covered the sky and the earth, completely cutting off the life of all the Wanderers in the area near Black Rock City.”

“When the thousand Dragon appeared among the Wanderers and promised to provide food and a generous reward for completing the work, the Wanderers immediately followed him to the valley and joined the construction team.”

“After the thousand Dragons returned, there were even Wanderers who came after hearing the news. They couldn’t survive outside, so they could only come to the valley to see if they could make a living.”

“With the addition of these Wanderers, the construction speed was greatly increased, and it was now close to completion.”

Chapter 75: a strong Army (1)

“Tang Zhen stood on a high spot and looked at the mountain Valley that was packed with people. Although they were only active in a small area, they still brought a trace of exuberant vitality to the mountain Valley.”

“The completed three lines of defense were in a semicircle, surrounding the depression in front of the cliff with a distance of about 100 meters.”

“Tang Zhen did not build the defense line too far away. This way, when the monsters attacked the city, Tang Zhen and the residents could hide behind the defense line and defend in an orderly manner.”

“Tang Zhen didn’t feel any heartache for the consumption of weapons. What he couldn’t bear to see his future residents die in the mouth of monsters. Therefore, he had spent a huge amount of money on weapons and equipment.”

“Waving his hand, Tang Zhen called over Tyson, who was commanding more than a dozen Wanderers to turn steel pipes into short javelins, and at the same time, he also called over a few brawny men. Tang Zhen began to teach them how to use the ballista and the catapult.”

“These two great weapons of the cold weapon era were currently being produced. In order to not let down Tang Zhen’s trust, the uncultured Wang Daqing even brought his college student cousin who was

involved in machinery over to participate in the research and production. Now, they had already successfully produced several machines. ”

“This was the advantage of the era of technology. As long as there was technology and materials, this small workshop could even build simple planes and armored vehicles! ”

The difference in manufacturing ability between ancient and modern times was so obvious.

“Since Wang Daqing worked hard, Zhen Tang naturally wouldn’t treat him badly. Zhen Tang had raised his monthly salary to 50000 Yuan, which was definitely the top salary standard in this city. ”

The ballistae and catapults had not arrived yet. Tang Zhen had only explained and demonstrated to them to familiarize them with the operation of the ballistae and catapults in advance.

“After the ballistae and catapults were delivered, these weapons would be placed on the roofs and Windows of the buildings to attack the monsters from above. ”

“Tang Zhen had personally witnessed the might of the ballistae in Black Rock City. Therefore, he was looking forward to seeing how this weapon would be able to display its wondrous effects in a city defense Battle. ”

“After leaving Tai Seng who was discussing with his subordinates about what kind of item to use as a crossbow, Tang Zhen arrived at the bottom of the cliff at the Valley’s depression. At this moment, Murong Zi Yan was leading three women and carefully surrounding a square rock that was one cubic meter in size. ”

“This rock was the stone platform that carried the foundation stone, and it was also the sacrificial altar used to sacrifice the brain pearls. ”

“On the rock, there were lines drawn with grass juice and stone powder, filled with a mysterious and desolate atmosphere. Murong Zi Yan was holding an iron hammer and a steel stick, and with three other women who also used iron hammers, they were carefully carving out these lines. ”

“This was as delicate as embroidery, and a rough man couldn’t do it. ”

“Seeing Tang Zhen’s interest in the pattern on the stone, Murong Zi Yan smiled and introduced,”“It’s said that the patterns on this stone platform have been passed down from ancient times. If you want to build a tower, you must carve a stone platform like this to bear the foundation stone. I’ve heard my teacher say that the starry patterns on the stone platform represent thousands of worlds, and the large ball in the middle represents the land under our feet. All the worlds are centered on this land, and it is also the final home of all the souls on the stars.”” ”

“As Tang Zhen listened to Murong Ziyan’s words, he seemed to have some understanding in his heart, but he just couldn’t grasp any clues. ”

“After leaving Murong Zi Yan, who was carefully carving the stone platform, Tang Zhen returned to the cave and teleported back home. ”

“This time, they were going to Wang Qingqing’s village to transport goods. Because there was a lot of goods, Tang Zhen hired a car to go with them to his weapon production base. ”

“After driving into the village, Wang Daqing came up to him and talked to Tang Zhen about work and production.”

“The hired villagers were loading the packed armor and weapons into the car. Everyone had a smile on their faces. They earned a piece-by-piece salary here. These days, they woke up early and worked late at night. They could earn five to six hundred Yuan a day, and they were very satisfied.”

“As for the swords and armors they produced, they were only used as props and decorations. If someone told them that these things were really used on the battlefield, they would definitely scoff. What era was it? how could people still wear armor and wave big blades on the battlefield?”

“After loading the car, the sun had already set. Tang Zhen bid farewell to Wang Daqing and led the way. He let the driver drive the car into a warehouse that he temporarily rented.”

“After sending away the driver and telling him to come and pick up the car the next day, Tang Zhen began to transport the car.”

“The five-cubic-meter space was very big. Tang Zhen only used a few times to move all the armors and weapons into the cave. He then said a few words to Tai Seng and Qian Long, who were standing at the side with sparkling eyes, before he teleported back home to sleep.”

“By the time Tang Zhen returned to the tower world, there were already five mounted crossbows that had been assembled in front of him.”

“Compared to the cumbersome and primitive ballistae, these five three-bow ballistae were redesigned using modern materials. They were easy to operate, but they were far more powerful than the original version.”

“The mounted crossbow used a special crossbow bolt that was about 1.5 meters in height. It had an appropriate weight to ensure a sufficient shooting range, and the sharp arrowhead guaranteed its lethality. In order to ensure the accuracy and stability of the crossbow, the body of the arrow and the tail had also been specially designed.”

“After Tang Zhen saw it, he repeatedly praised it. There were experts in every field. Wang Daqing’s younger cousin was definitely a talent. He had to find a way to make him stay.”

“Now that the ballistae and catapults were in place, they could make other arrangements, such as planting traps, iron dysentery, and horse-tripping ropes.”

“After another two days, with nearly 400 people working overtime, all the work was finally completed. Tang Zhen only heaved a long sigh of relief at this moment as he looked at the defensive line that had already been completely formed.”

“However, he also knew that the challenge had only just begun. The real highlight had not yet been staged!”

“The Wanderers who originally belonged to the valley Camp had already started to familiarize themselves with the new weapons and equipment they had received. They wore bright and solid armor and waved sharp Spears. These Wanderers, who didn’t even have a kitchen knife, were so happy that they couldn’t close their mouths for the whole day.”

“In their words, even if they bought their entire family, they would not be able to exchange for such a set of armor. But now, the city Lord had one set for each person, he was simply a nouveau riche!”

“Now that he had these pieces of equipment, he could be considered a nouveau riche if he estimated their value!”

“Some people were happy, while others were sad. At this time, the Wanderers who came from outside rolled their eyes when they saw a few people walking around to show off their equipment.”

“Seeing the guy who had dug the trench with them yesterday wearing brand new armor and holding a sharp battle blade to show off in front of them, the foreign employers were so envious that they couldn’t even describe their feelings with words.”

“What are you so proud of? you don’t look like a country bumpkin even if you wear the Dragon robe. It’s such an impressive set of armor, but when these guys wear it, it’s like wearing a bucket!”

That city Lord called Tang Zhen was really too prodigal. He actually gave a brand new set of armor and a fine weapon to each of the dozen or so people who weren’t even wild cultivators. This set of armor would cost at least a few hundred brain beads. It could definitely be regarded as a family heirloom.

Rich people were really willful!

“””Damn, these guys are really lucky. Why don’t we have such a good life? I’m a level 1 cultivator, but I can’t even get a short blade. Aiyu, it’s really infuriating to compare people!”””

“The Wanderers sighed and sighed, their eyes red with envy.”

“The Wanderers hired by the thousand Dragons had originally planned to leave immediately after completing their mission. They didn’t want to wait until the monsters attacked the city and get killed. After all, according to the experience of the Wanderers, almost no new buildings were successful, and 90% of them were destroyed by the monsters that attacked the city.”

“However, after seeing the abundant resources and powerful strength in the valley Camp, especially after Tang Zhen displayed the armors and weapons that were piled up like a mountain, a faint trace of Hope was born in their hearts.”

“This person had so many weapons and food, he should be able to survive the monster attack, right?”

The Wanderers held a trace of anticipation and began to hesitate. It was also this hesitation that made them choose to stay in the end.

“Whether they lived or died would depend on this. After all, everyone had enough of the life of vagrants. They would die of hunger, cold, or monsters sooner or later anyway, so they might as well take the risk now!”

“Therefore, these Wanderers also joined the training team. They took the weapons and armor that they had just obtained and began training again and again according to Tyson’s instructions.”

“After wandering in the wilderness for many years and fighting with monsters and their own kind, these surviving Wanderers had the potential to become Warriors. They learned how to operate various weapons very quickly.”

“The catapults and ballistae had been assembled, and the Wanderers were trying to work together. Tyson and Qian Long had even come up with a few tactics based on their experience dealing with monsters. ”

“When Tang Zhen felt that everything was almost ready, he decided to start building the city! ”

Chapter 76: building a city

“When the morning sun shone on the valley in the wilderness, more than four hundred Wanderers had already gathered in the empty space in front of the cliff. ”

“Each of their faces carried a kind of pious expectation, their numb eyes for the first time had light, and their tired bodies seemed to have been injected with a powerful vitality. ”

Something called Hope was taking root and sprouting in their hearts.

“Qian Long had a smile on his face while Tai Seng’s eyes flickered with a crazed adoration. They were all looking at Tang Zhen, who was standing alone in front of the black stone platform, with a fiery gaze. ”

“Everyone held their breath, afraid that they would ruin the solemn atmosphere. ”

“Only the little girl was being carried by the big Bear. Jimmy was standing beside her, and a few little turnips were gathered together. Each of them had a lollipop in their hands. They sat at the outermost position and were indifferent to what was going to happen. The only thing that could arouse their interest was the candy in their hands. ”

“Tang Zhen quietly stood in front of the stone platform. After a moment of silence, he took out a black rune foundation stone from his storage space. It was the building foundation stone from the bloodthirsty Goblin’s lair. ”

“Although he still had a few foundation stones that he had stolen from the treasure room in Black Rock City, Tang Zhen did not know what kind of wild building these foundation stones came from. For safety’s sake, he finally chose to use this foundation stone that he knew the origin of to build his Tower City. ”

“Raising the foundation stone high above his head, Tang Zhen opened his mouth and chanted, to the gods above, your people wish to build a city today. Please show mercy and mercy. May the city be passed down for thousands of years and the residents enjoy eternal happiness and health! ”

may the city be passed down for thousands of years after its construction. May the residents enjoy eternal happiness and health!

“These words were shouted by over four hundred Wanderers in unison, and their voices reverberated throughout the entire Valley. They didn’t die down for a long time. ”

Tang Zhen took a step forward and gently placed the foundation stone on the empty space of the platform. This foundation stone was firmly suspended in the air above the stone platform. The symbols faintly flickered with flowing light.

“Tang Zhen took out a sharp dagger and pulled it out from his palm. After which, he placed it on top of the foundation stone. Fresh blood immediately dripped from his tightly clenched fist and slowly dripped onto the foundation stone.”

The foundation stone that came into contact with the blood instantly turned into a Ruby. Nine ring-shaped runes appeared out of thin air and lasted for a few seconds before disappearing.

“At this moment, a feeling suddenly rose in Tang Zhen’s heart. It was as if his thoughts had already connected with this foundation stone.”

“Tang Zhen had already activated and bound the foundation stone. At this point, he had already established his identity as the city Lord, and he would not be shaken even by Thunder!”

The next thing to do was to use the brain Pearl as a sacrifice.

“Tang Zhen casually waved his hand and a large pile of level one brains filled the stone platform. There seemed to be at least a thousand of them. However, as the light emitted by the foundation stone flashed, those thousands of level one brains instantly disappeared.”

Tang Zhen did not have any hesitation when he saw this. He waved his hand once again and sent out a thousand brain beads before disappearing.

“Releasing the brain Pearl and absorbing it with the foundation stone, this action was repeated ten times!”

“The Wanderers who were watching were extremely shocked. They couldn’t understand how Tang Zhen had conjured the brain Pearl out of thin air, but it didn’t affect the respect they had for Tang Zhen that had quietly increased.”

“After ten thousand level one brain beads were absorbed, Tang Zhen felt a feeling of satiety from the foundation stone. It was as if it was telling him that there was no need to sacrifice the brain beads anymore!”

“Tang Zhen secretly heaved a sigh of relief. This was because he had already used up an entire box of brains earlier. He never thought that the amount of brain pearls consumed during the sacrifice would be so huge. It was also fortunate that he had emptied the treasure room in Black Rock City. Otherwise, God knows where he would be able to find so many brain pearls when he leveled up again.”

“It turned out that just after the sacrifice, the cornerstone suddenly sent a vague message. To upgrade again, he would need 10000 Level 2 brain beads!”

“10,000 Level 2 brains were equivalent to 100000 Level 1 brains. He wondered if there were enough brains left in the storage dimension.”

“Although he really wanted to upgrade the tower to Level 2, Tang Zhen didn’t dare to take this risk. Let’s not talk about whether the number of brain beads was enough, just the scale of the monster attack that had doubled was enough to make him drink a pot of water.”

“Moreover, he still had great use for these brains, so he could not touch them for the time being.”

“Throwing away the distracting thoughts in his mind, Tang Zhen muttered in his heart under everyone’s expectant eyes, “” “”Building a city!”” ”

“” “”BOOM!” ”

“Tang Zhen felt a loud sound coming from his mind. Immediately after, a miniature model of a building appeared in front of him. This building was four stories tall and it looked like a bank from the outside. ”

“At the same time, there seemed to be a voice in Tang Zhen’s heart telling him that this model could be modified to a certain extent according to His will. ”

“Tang Zhen did not hesitate to embed it in the depression of the cliff. At the same time, he made some changes to the door and windows, making it more convenient for defense. He also made some changes to some places that were not suitable for living. ”

“After completing the reconstruction of the City Tower according to his thoughts, Tang Zhen issued the construction instructions! ”

“The model in front of him disappeared, and the depression of the cliff was immediately shrouded in a chaotic light and shadow. Tang Zhen’s eyes blurred as if he saw the past and present life of this building. ”

“It was a building built on the side of a bustling Street. It had been used as a bank since the beginning. It had experienced decades of ups and downs, and countless people had worked and lived in it. ”

“One day, a group of masked men rushed into the building. They waved the guns in their hands and shot the panicked staff and customers to the ground, snatching a large pile of cash. ”

“The scene flashed by, and for some reason, these masked men suddenly went crazy and killed all the hostages. Then, they laughed wildly and tore off their clothes, revealing the explosives on their bodies. ”

“With a loud bang, the scene came to an abrupt end! ”

“This was the memory of this building’s entire life. Now, it was all displayed in front of Tang Zhen’s eyes. ”

Tang Zhen’s heart was silent. He had never thought that a simple building would possess such vivid memories. He could even sense a reluctance to part with life from these memories.

“What the hell, how could these cold things have feelings? ”

“Tang Zhen shook his head and tossed all the messy thoughts out of his mind. After which, he stared at the cliff in front of him without blinking. This continued for five minutes before the large stretch of light disappeared. A brand new building stood in front of everyone! ”

“Three of its sides were embedded in the rock wall, and only the front wall was exposed. The wall was covered with beautiful embossed, which looked very exquisite and elegant. At a glance, almost all the doors and windows were equipped with guardrails, and two heavy bronze doors were erected at the entrance. ”

“” “”Long live the city Lord!”” ”

“Upon seeing this, all the Wanderers cheered in unison. Many of them were in tears, and they couldn’t suppress the ecstasy in their hearts.”

“After all, no one could remain calm in the face of such a miraculous scene, not to mention that this place was about to become their home!”

“Tang Zhen’s heart was similarly filled with shock. This was because as the city Lord, he knew more information compared to the Wanderers who only saw the situation on the outside.”

“This cornerstone from the bloodthirsty Goblin’s lair used to be a bank. It was also because of this that, in addition to its normal functions, this building actually had three exclusive functions.”

“However, what made Tang Zhen feel uncomfortable was that these three functions all belonged to the strange place that the tower must have. For example, the panlos stairs of Black Rock City and the ghost bank of his tower.”

“There were three special functions of the ghost bank. The first function was to deposit. All the brains that belonged to the residents of loucheng could be deposited in the ghost bank of loucheng. After the deposit, they could get 0.5% interest every month, which was a good benefit.”

“The second function was loans. Any resident of Lou city could take a loan from the ghost bank with a monthly interest of 3%. Because of his past life experience, Tang Zhen didn’t comment on this function and even felt a little disgusted.”

“Moreover, this ghost bank could directly extract the soul power of the debtor to repay the loan after the loan was overdue, which was extremely strange.”

“The third function was exchange. All the residents of the city could use their brains to exchange for cash or gold, but they couldn’t use cash to exchange brains.”

“It could be said that the third function was tailor-made for Tang Zhen. After all, other than him, it was simply impossible for anyone else to use their brains to exchange for those useless pieces of paper that did not exist.”

“In addition to the three exclusive functions, the normal functions of the building were the issuing and receiving of World Missions on the cornerstone platform, the exchange of basic cultivator skills, and the monthly food quota.”

“These functions were all very powerful. If it wasn’t for the construction of the tower, Tang Zhen wouldn’t have guessed that the tower actually had these functions. It almost covered all aspects of human clothing, food, housing, and transportation. However, if one wanted to exchange for these functions, one must have enough brain beads or points.”

“In other words, the platform was the internet of the world of loucheng!”

Chapter 77: Defensive preparations before the monsters attack the city

“Just as Tang Zhen was pondering over the various abilities that the tower possessed, Tai Seng, Qian Long, and the others had already started moving. Qian Long shouted out loudly and directed the Wanderers to move the resources needed to defend the city into the tower. ”

“Tai Seng led a group of people to install the weapons while the black fatty da Xiong carried a heavy bed-mounted crossbow and ran up the stairs of the tower like a gust of wind. In the blink of an eye, he appeared on the top of the tower and installed it at the location Tai Seng had pointed out. ”

“According to the Wanderers ‘experience, once the building was built, the nearby monster minions would automatically gather in the direction of the building. When the powerful monsters above level 4 arrived, the siege would begin. ”

Time was of the essence!

“According to the usual practice, the City Tower must be guarded by a cultivator of level four or above to deal with monsters of level four or above. Only when the strength was equal could there be a possibility of victory. Otherwise, the low-level cultivators were no match for the high-level monsters. ”

“It was a pity that grade-4 Wanderers basically belonged to powerful factions, and ordinary Wanderers had no chance of seeing them. ”

“Although Tang Zhen’s cultivation wasn’t at the fourth rank and he didn’t have such an expert under him, he wasn’t the least bit inferior to a fourth rank cultivator. Putting aside the fact that he had once killed a level 4 monster, his magical ability, excellent weapons, and equipment, as well as a large group of fully armed men and sufficient logistics supply, were enough to fight against high-leveled monsters without being at a disadvantage. ”

“Seeing that his residents had started to get busy, Tang Zhen also regained his senses. He quickly stepped into the city that belonged to him. ”

“After Tang Zhen entered the gate, what appeared in front of him was a slightly Old Hall and a business counter installed with bulletproof glass. It looked very similar to the layout of the banks in the original world, but there were no bank staff and customers in the hall, only busy Wanderers. ”

“There were many documents and colorful banknotes scattered on the floor of the lobby. The scene looked messy, as if a disaster had just happened. ”

“In fact, the newly built buildings would appear in their final form before they were destroyed. Other than the living creatures and corpses, everything would be preserved, which was a benefit for the city Lord. ”

“From these scattered items, one could often find items that were extremely useful to Wanderers! ”

“As far as his eyes could see, Tang Zhen saw banknotes, blood, clothes, shoes, and hats, as well as bullet shells scattered on the ground and guns that were casually thrown on the ground! ”

Tang Zhen’s eyes brightened. He took a big stride forward and picked up the weapon on the ground in the blink of an eye.

“With just a glance, Tang Zhen recognized the origin of the rifle. ”

The AK-47 was a well-known killing weapon. It was a powerful automatic weapon with many imitations!

“This rifle was obviously new to the factory, and its original owner had made some minor changes to it. It was equipped with a picatiny guide, but its original lethality was not damaged at all. ”

“After curiously fiddling with it a few times, Tang Zhen discovered that there were only five bullets left in the gun’s magazine. It seemed that it would not be of much help to the following battle. ”

“Although he was a little disappointed in his heart, Tang Zhen still stored it into his spatial space in a precious manner. After which, he also picked up the other weapons. ”

MP5K?P229?AR15.....

“Tang Zhen carried a pleasantly surprised expression as he picked up all of these weapons. At the same time, he softly called out their names in his heart. This was because these weapons were all good things that he had once dreamed of possessing. However, in reality, he could only look at pictures to satisfy his craving. ”

“Although the bullets of these weapons had been used up, Tang Zhen still kept them very carefully. One day, he would place them in his own weapon storage room. ”

“Through these weapons and the blood splattered on the ground and walls, it was not difficult for Tang Zhen to guess what had happened in this building. Although the owners of these items had disappeared, the traces left behind were clearly displayed in front of his eyes. ”

The bank was robbed by armed robbers. The robbers had no choice but to detonate the bombs on them and die with the building!

“It seemed like a simple description, but it represented the withering of a large group of lives, and it made people sigh. ”

“However, the monster attack was about to begin. Tang Zhen didn’t have time to explore the story inside. Instead, he quickly climbed up the stairs to the rooftop. ”

“Because of Tang Zhen’s modifications, the parapet on the roof had changed greatly and became a suitable bunker for defense and security. At this moment, Tyson and the others were placing the ballista and catapult at the entrance of the crenels and securing them with stones and sandbags. ”

The simple ‘long arrows’ that were made earlier were moved to the side in bundles. There were specially made crossbow arrows placed on the side. Tang Zhen glanced at them. He was very clear that these ordinary-looking things were very lethal. They could easily penetrate wooden boards that were three fingers thick from hundreds of meters away. They were definitely the sharp weapons that the Wanderers used to deal with monsters.

“The catapults ‘ammunition had also been neatly stacked. There were round real bullets, shrapnel made of iron, bombs with fuses, and glass bottles made of’ motorov cocktails’! ”

One could only imagine what kind of terrifying effect these weapons would have when they fell into a group of monsters.

Tang Zhen checked every place to ensure that he did not miss anything.

“Tai Seng’s command was very good. Seeing that he didn’t need to worry about the rooftop, Tang Zhen slowly walked down.”

“When he was on the roof earlier, he had noticed that there were already sporadic monsters entering the valley, but these monsters were just random soldiers in the siege. Once the high-level monsters arrived, it might mean the beginning of the battle.”

“In the rooms on the fourth floor, thousand Dragon was commanding the Wanderers who used bows and arrows to occupy all the windows in the front of the fourth floor. These people had been selected from all the Wanderers, and they were all archers with the best arm strength and accuracy.”

“At the feet of these archers, there were rows of iron barrels filled with carbon hunting arrowheads. These arrows alone were worth a lot.”

“In order to ensure the damage to the monster, Tang Zhen found a bow and arrow seller in the provincial capital. He did not hesitate to pack up his inventory and bought nearly a hundred compound bows and recurve bows at once, as well as all the arrows in the seller’s inventory.”

These archers were the second most powerful long-range attack force after the ballistae and catapults.

“After encouraging everyone with a few words, Tang Zhen opened the fourth floor and entered the third floor, where Murong Zi Yan was in charge.”

“The weapons used by the group were a small number of bows and arrows and a large number of javelins. The Wanderers in charge of defense also occupied all the windows and placed 1.5-meter zinc-plated steel pipes with sharp edges in a position that could be easily reached. When the monsters entered the third line of defense, they only needed to throw them out of the wall.”

“After chatting with Murong Zi Yan for a while and making sure that he didn’t miss anything, Tang Zhen once again headed to the second floor.”

“Compared to the weapons on the first floor, the weapons on the second floor were a little comical and sinister.”

“Some women and children were on this floor. They didn’t need to participate in the entire battle. They only needed to throw out special weapons at the appropriate time. The reason why the weapons on the second floor were comical and sinister was because the containers placed in front of the window were filled with quicklime and iron dysentery, as well as the darts they were used to throwing, which were covered with feces and poisonous pesticides.”

They were only dealing with the fish that had slipped through the net. Tang Zhen did not place too much hope on these groups with weaker combat strength.

“After giving Jimmy and Lisa a few instructions, Tang Zhen slowly walked to the hall on the first floor. This was the only place where he could face the monsters. The monsters that had charged through the three blockade lines would be attacked by nearly 100 Wanderers.”

“These Wanderers were wearing a full set of armor, equipped with Spears, shields, and sharp blades. Their eyes under their helmets flickered with a fierce light, burning with a burning fighting spirit.”

“Tang Zhen nodded his head in satisfaction when he saw this. He casually pulled over a chair and sat down. After which, he took out a cigarette and distributed it to everyone. ”

“After seeing these cigarettes, the eyes of the more knowledgeable Wanderers immediately lit up. They began to brag to their companions next to them, saying that this kind of smoking tobacco from the ruins of the wild building was very valuable and that only the rich and powerful could enjoy it. ”

“Now that the city Lord is actually sharing it with us, how much does he think of us who have suffered? don’t say anymore, quickly and respectfully take it and enjoy! ”

Chapter 78: Defensive battle (Part 1)

“don’t worry, city Lord. I’ve taken a good look at our weapons and equipment. They’re much better than those powerful towers. We can definitely withstand the monsters that attack the city! ”

“Just as Tang Zhen was thinking about something, a voice suddenly sounded in his ear. He raised his head and saw an old Wanderer speaking in a hoarse voice. At the same time, he raised the cigarette in his hand and took a deep puff. It seemed that he was deliberately imitating the smoking appearance of a Big Shot. However, his actions were extremely awkward and artificial, making him look rather comical. ”

“Tang Zhen smiled when he saw this. He had once heard Tai Seng introduce this old fellow. It was said that he was hired by a newly built City Tower when he was young and had participated in a defensive battle of the City Tower. In the end, the defensive battle failed and the city Tower was destroyed by a monster. The Wanderer named old Mike had escaped death and then drifted around like all other Wanderers before joining the valley Camp. ”

“It could be said that among these people, he was the only one who had personally experienced the scene of a monster siege. He also had the most say. ”

“Moreover, this guy was extremely slippery. If it wasn’t because he was confident that Tang Zhen would be able to hold the loucheng, he would have sneaked away immediately. ”

“Tang Zhen suddenly had an interest in chatting as he looked at this comical old man. At the same time, this was also a good opportunity for him to get closer to the residents. ”

“””Old Mike, tell me about your past experience of defending the city?””” ”

“Seeing the city Lord speak, old Mike chuckled and opened his pitch-black Mouth, which only had a few teeth left, and said, “”””My Lord, you don’t know this, but during that battle, there were more than 500 residents in the city. Including us mercenaries, there were nearly 1000 of us. But so what? ”

“First, it was a dense pack of two-headed scavenger dogs that pounced over, leaving a trail of dust in their wake. That building didn’t have a line of defense like us, so only one-third of those scavengers died, and the rest all rushed to the bottom of the building. ”

“It was not easy to kill all the scavengers, but there were zombies, hard-skinned lizards, bloodthirsty gnomes, giant-teeth Tigers, and countless other monsters. It was impossible to kill all of them. ”

“Other than that, there was also a level four horned Earth Dragon commanding the battle. It was five to six meters tall and had shocking combat power.”

“According to the words passed down by the elders, in order to protect the newly built City Tower, one needed to do one of the three things. The first was to hold on for an hour and kill two-thirds of the monsters. The third was to kill the leader monster.”

“Unfortunately, looking at the situation at that time, I’m afraid none of that could have been done, and the final outcome was the city being destroyed and people dying. I was lucky enough to get a four-horned horse, which was why I was able to survive. As for the others, they’re all useless.””

“Old Mike stopped talking, but there was a trace of sadness in his eyes.”

“Tang Zhen didn’t continue to ask about the fate of old Mike and the others. From his expression, he knew that they had most likely died in the battle to defend the city. Perhaps, his friends and family were among them.”

“Tang Zhen threw the remaining pack of cigarettes to old Mike, turned around, and walked to the roof.”

“After he returned to the rooftop, Tang Zhen took out his binoculars and began to observe the gathering of the monsters in the distance. Compared to the scattered monsters that had gathered in twos and threes before, the entrance of the valley could be said to be ‘full of monsters’.”

“All kinds of monsters gathered together, but there was no sign of fighting, even among the monsters that usually ate each other. They just drooled, paced restlessly, and looked at the building with greedy eyes.”

There was a faint stench in the air. It was the smell that would only be released when many monsters gathered together.

“All of a sudden, there was a commotion among the monsters. Then, three figures broke through the weeds and headed straight for the tower. Tang Zhen quickly turned the binoculars and looked carefully. He discovered that there were three monsters that were at least Level 4.”

“damn the SIPs, there are actually three of them!”

Tang Zhen inhaled a breath of cold air. He secretly cursed his bad luck in his heart as his expression became a little ugly.

“He originally thought that when the monsters attacked the city, there would only be one level 4 monster at most. Who would have thought that three of them would come at once? it was probably because of the undead race’s rampage that attracted a large number of monsters. Tang Zhen chose to build the city at this time, which attracted so many high-level monsters.”

“Knowing that it was useless to be angry and complain, Tang Zhen steeled his heart. It was just a mere three monsters. He would just fight it out with them!”

“With the arrival of the three high-level monsters, all the monsters howled in unison. The sharp and ear-piercing sound reverberated through the valley, making people’s scalps numb.”

“The three high-level monsters were like generals in command, each occupying an area. After a while, as they roared, countless monsters were like wild dogs out of their cages, baring their fangs and brandishing their claws as they pounced at the building. ”

“As the monsters began to charge, the battle to defend the city immediately began! ”

All the Wanderers in the building held their breaths and held their weapons tightly. Their eyes were fixed on the approaching monster horde. Some people’s palms began to sweat and their bodies trembled slightly.

The Horde of monsters covered a large area of the valley. These monsters looked ferocious and their roars were terrifying. It was a huge psychological impact on people.

“If it weren’t for the support of their beliefs, their equipment, and the encouragement of their comrades, some of them would have already broken down and fled. ”

“In the blink of an eye, the monsters had already approached the first line of defense. ”

“&Nbsp; seeing that the monsters were about to approach the first spike-filled trench, Tai Seng gave the order, and the six triple-bow ballistae were activated at the same time. Black bolts whizzed out one after another, instantly crossing a distance of nearly a hundred meters and piercing into the group of monsters. ”

“”Pfft! Pfft! Pfft!” ”

“The charging monsters screamed as the arrows with great momentum fell into the dense group of monsters. Each arrow penetrated at least two monsters, causing them to lose their ability to move. Even if these monsters did not die, they lost the ability to continue causing trouble. ”

“good! seeing that this round of shooting had killed quite a number of monsters, Tang Zhen shouted out and gave a thumbs up to Tai Seng and the others before continuing to observe. ”

“After the mounted crossbow was fired, someone immediately began to reload the string and load the arrow. The movement was very fast. ”

“The trebuchets on the side took advantage of the gap between the ballistae and the monsters to fire bullets. The bullets whistled and hit the monsters, turning their targets into minced meat. ”

“A few more bullets were ejected by the catapult, but they were bullets wrapped in explosives and steel balls. They fell into the group of monsters with an ignited fuse and exploded in an instant. ”

“The bullets that Tang Zhen had inserted into the explosives were extremely powerful. In an instant, blood and flesh flew everywhere in the group of monsters. It was unknown how many monsters were affected by the steel balls that flew out from the explosion, leaving deep bloody holes all over their bodies. ”

The first wave of the catapults had killed at least a hundred monsters.

“However, the charging monsters were not frightened by the power of the ballistae and catapults. Instead, they howled madly and jumped over the trenches one after another. ”

“During this period, many monsters did not jump over and fell into the trenches in fear. Some monsters were pushed into the trenches by their companions behind them and then pierced through the heart. Their screams before they died echoed through the valley, but they still could not stop the crazy monsters behind them. ”

“There were too many monsters. When the bottom of the trench was filled with monster corpses, the monsters that fell in could climb out again, and the damage they suffered was reduced. ”

“Seeing this, Tang Zhen took out his walkie-talkie and gave his first order. ”

“After hearing the command from the walkie-talkie, thousand Dragons immediately drew his bow and shot. At the same time, ten archers also raised their sharp arrows wrapped in burning fireballs and fired at the same time. ”

“These fire arrows drew an arc in the air and directly fell into a small pit that was dug out in advance. Immediately after, a flame soared into the sky and quickly formed a line of fire that connected to the huge trench. ”

“”Bang!”” ”

“The flames rose from the trenches and formed a huge wall of fire, blocking the charging monsters!”

Chapter 79: The defensive battle of the loucheng (II) _1

“After the fuel that was poured into the trenches by Tang Zhen’s men was ignited, the blazing flames burned the monsters’ corpses, giving off rolling black smoke and a pungent burning smell. Some of the monsters that could not climb out of the trenches were also wrapped in the flames. They screamed and jumped continuously, rolling and fleeing in the trenches like fireballs. Not long after, they fell to the ground and did not get up, burned into charcoal by the flames. ”

“The fear of fire was the nature of many monsters. Many monsters stopped a few meters away from the wall of fire. However, the three high-level monsters howled again when they saw this. The monsters that were hesitating in front of the fire were immediately knocked into the sea of fire by the monsters that rushed up from behind. Then, countless monsters that were afraid of fire but still had blood-red eyes rushed into the sea of fire. ”

“When the hundreds of monsters’ corpses filled the trench again, the fire that soared into the sky became weaker due to the cover of the corpses. These monsters actually used their own corpses to pave a safe passage. ”

Tang Zhen’s eyes narrowed when he saw these monsters that had almost gone crazy. The eyes that he used to look at the three high level monsters had also turned dark and cold.

“This building was where all of Tang Zhen’s hope lay. Originally, he was only fighting for wealth. However, after possessing wealth, his current goal had become much higher. That was to build the most powerful building in this world. Therefore, anyone who wanted to lay their hands on this building would be viewed as a life and death enemy by him. ”

“These three high-level monsters had to die, but it was not the time for him to make a move yet. ”

“The group of monsters in the valley that had crossed the wall of fire were now met with a sinister trick. The combination of the beast trap and iron favus thorn caused them to scream repeatedly. Some of them had their legs broken, while others had their feet covered in blood. The monsters filled the sprinting path. ”

“Just as Tai Seng was commanding the Wanderers to use the ballistae and catapults to attack, the archers on the fourth floor also drew their bows and nocked their arrows, starting to fire at the monsters that had entered the second line of defense. ”

“A composite bow made with modern craftsmanship, coupled with a bloodthirsty weapon with sharp arrowheads, formed the most deadly tool. At this time and place, it once again reaped the lives of these monsters. ”

Whoosh! Whoosh! The Sound of Arrows piercing through the air could be heard as countless arrows shot out from the windows. The arrows drew a deadly arc in the air and landed on the monster’s body.

“The monsters that were blocked by the wire mesh were immediately thrown into chaos. They were unable to break through the wire mesh in a short period of time. As they tore at the monsters, their skin was cut by the metal spikes, and they kept screaming in anger. The arrows from the Wanderers continued to rain down, causing the monsters in front of the wire mesh to fall in groups. ”

“”Roar!”” ”

“A level 4 monster that was originally sitting and watching the battle roared. This three-meter-tall monster that looked like a giant fatty sewn together with an elephant waved its four arms at the same time and caught four unlucky monsters. Then, it swung them in a circle and smashed them on the barbed wire. ”

“After the monster smashed the barbed wire more than a dozen times, a large area of the barbed wire was flattened. It watched as the monsters rushed through the gaps in the barbed wire. Only then did the high-level monster throw away the four tattered monster corpses in its hands. It opened its mouth and let out a roar to the sky, but it also seemed to be laughing wildly. ”

“However, it did not know that Tang Zhen’s eyes had already turned extremely cold. When he saw that the monster, which was displayed as the [suture butcher] in the monster detector, had joined the battle, Tang Zhen did not hesitate to raise the rifle in his hand. ”

“King against King, general against general. Tang Zhen’s opponents were these three high level monsters! ”

“”Bang, bang, bang!”” ”

“After three consecutive gunshots, three bloody holes appeared on the patchwork monster’s body. Black blood gushed out of the wounds. The patchwork monster’s body trembled and almost fell to the ground. At the same time, it let out a painful roar. ”

“Zhen Tang, who was observing from the top of the building, was overjoyed. The performance of the stitched monsters proved that firearms and weapons had a very strong lethality against this Level 4 monster. When he thought of this, Zhen Tang no longer hesitated and continuously opened fire at the stitched monsters. ”

“Due to the mutation of his body, Zhen Tang’s strength, vision, and reaction speed had all become extremely outstanding. His control of the gun had also become extremely skillful. Therefore, the bullets were all aimed at the heart and head of the patchwork monster. ”

The butcher had five hearts and three brains. It would only truly die if all of them were damaged at the same time!

“If one didn’t know the weakness of this monster, they might not be able to kill it easily. Once the butcher found an opportunity, it was very likely that it would be killed or escape. However, in front of Zhen Tang who had the monster detector, it was destined to die. ”

The combat interface in front of Tang Zhen clearly marked the weak points of the butcher. He only needed to shoot at these vital points in the fastest time possible.

“The butcher brandished its huge butcher knife. Although it was a level 4 monster and its strongest point was its powerful vitality of having three brains and five hearts, its vital points were currently being attacked continuously. No matter how it roared, it was completely helpless against Tang Zhen who was standing on the top of the tower and sniping from a distance. ”

“When only the heart and brain of the butcher were intact, it finally felt fear and began to move its huge body, trying to turn and escape. ”

“Unfortunately, Tang Zhen wouldn’t give it this chance. Since it had evil thoughts about Lou Cheng, Tang Zhen couldn’t let it Live! ”

“””Bang Bang Bang!”” ”

Tang Zhen took out the AK-47 that only had five bullets left and fired a burst of shots at the back of the butcher!

“Five spurts of blood splattered out from the back of the butcher. Its huge, fat body, which was sewn together with hemp thread, fell heavily to the ground. The corpse oil that seeped out from the stitches was crushed by the impact of the fall and splattered everywhere. ”

“Under Tang Zhen’s continuous attacks, the Level 4 monster was killed before it could even break through the second line of defense. ”

“At the same time, Tang Zhen felt a wave of heat Rush into his body. The strength in his entire body instantly more than doubled. This was a clear sign of advancing to a rank 3 cultivator! ”

“Tang Zhen’s heart was filled with joy. Immediately after, he looked at the other two Level 4 monsters with an unkind expression. His eyes were filled with killing intent. ”

“After seeing Tang Zhen’s battle record and his ice-cold eyes, the other two Level 4 monsters seemed to be intimidated. They hesitated for a moment before slowly falling to the back of the group, trying their best to stay as far away from him as possible. ”

“Compared to the minions that only knew how to kill monsters, these two high-level monsters were obviously more intelligent. After they realized the danger, they chose to temporarily avoid the confrontation, allowing these monster cannon foddors to consume the Wanderers ‘weapons and stamina. ”

“Tang Zhen saw that these two high level monsters were like cowards and didn’t pay attention to them. Other than occasionally glancing at them, he placed most of his attention on the monsters that were approaching the building. ”

“At this moment, the monster horde, which had lost a third of its members, had finally reached the last line of defense. They were trying their best to jump up, trying to jump over the high stone wall. ”

“Unfortunately, when Tang Zhen was building the wall, he had already ordered people to wipe the wall until it was shiny. He had also inserted broken glass and wallpaper blades on it. ”

“Even though this arrangement was not fatal, it had a certain killing effect. ”

“Other than a few monsters with amazing jumping ability that managed to cross the stone wall, the rest of the monsters were blocked under the stone wall. The monsters that tried to climb up were also cut on their hands and feet, and they cried out in pain. As more and more monsters gathered under the stone wall, some of the monsters also stepped on their companions’ bodies and crossed the stone wall. ”

“The distance between the wall and the tower wasn’t very far, and every Wanderer’s long-range weapon could reach this position. At this moment, everyone went all out, allowing the monsters to taste the most concentrated attacks. ”

“Long arrow, rock bullet, dart, blow dart, lime, spear throwing Pixiu ”

“The dense barrage of weapons fell on the group of monsters, and a large number of the originally chaotic monsters immediately fell down. It was simply too miserable. After seeing that their attacks had an obvious effect, the Wanderers went all out and threw the weapons in their hands ruthlessly. ”

Chapter 80: Defensive battle (Part 2) _1

The monsters that were unable to cross the stone wall in a short period of time were once again dealt a fatal blow outside the stone wall!

“Fresh blood filled the air, and pieces of flesh flew everywhere. ”

“However, the monsters that were attacking the city had no rationality to speak of. The smell of blood and flesh that filled the air due to heavy casualties made them even crazier. They scrambled over the stone wall, then dragged their wounded limbs and pounced at the gate of the tower! ”

“In the hall on the first floor, the monsters swarmed toward them, but no one retreated. ”

“brothers, it’s all up to us now. After this wave of attack, those sons of b * tches will retreat. Stand up straight and be a man. Don’t be cowards! ”

“Old Mike threw away the cigarette butt in his hand and shouted at the group of men, “” “”Raise your shields and attack!”” ”

“” “”Bang!”” ”

“Dozens of two-meter-tall giant shields blocked the entrance to the first floor, holding back the flood of monsters. Then, sharp metal Spears pierced through the gaps of the shields, leaving countless bloody holes in the monsters’ bodies.”

“The thick and heavy shield was like a rock in the river, firmly resisting the impact of the flood of monsters. The countless metal Spears were like poisonous flood Dragons that came out of their caves, devouring the monsters’ lives every minute and second.”

“Stab, stab, stab!”

“The monsters’ corpses piled higher and higher, but there was no sign of them slowing down. However, the Wanderers’ physical strength was being consumed more and more.”

“Once the Wanderers who were responsible for blocking the shields were exhausted, someone would immediately take over. Even so, there were inevitably mistakes, which led to a few monsters sneaking into the hall.”

“However, none of the Wanderers in the hall retreated. Instead, they all rushed forward and chopped the monsters into meat paste. Even if some of them were injured, they gritted their teeth and persevered without a word.”

“Old Mike looked at the slightly chaotic scene and shouted again, ““ don’t panic, everyone. Stay calm. If you catch a monster, kill it. Remember, we are protecting our own home!”

“““Protect our home and never retreat!”” ”

“““Protect our home and never retreat!”” ”

“““Protect our home and never retreat!”” ”

“After old Mike shouted this slogan, all the Wanderers in the hall began to echo in unison. Their voices were deafening, and their heroic spirits soared to the sky.”

The originally low morale had reached its boiling point at this moment!

“Sensing the high fighting spirit in the hall on the first floor, the Wanderers upstairs attacked with all their might in an attempt to reduce the pressure on the first floor.”

“When the monsters broke through the third line of defense, Tang Zhen had already retracted his gaze and locked onto the two high-level monsters. As long as he killed these two monster commanders, the monsters attacking the city would automatically disperse.”

The beheading operation begins now!

“Tang Zhen activated the quantum stealth light screen. At the same time, several boxes of brains in his storage space were instantly absorbed, and nearly a million gold coins appeared in his mobile phone’s application store.”

Tang Zhen opened the application store and chose to download the application.

“[mini deathlight weapon. Highly efficient, light, and destructive. Can be used for long-range attacks. Can be used once a month. Download cost: 100000 gold coins.]”

“After the download and installation of the application was completed, Tang Zhen immediately launched it. At the same time, groups of data appeared on the combat interface in front of him. Tang Zhen used his consciousness to operate the deathlight weapon and locked onto one of the level four monsters. ”

“Aiming, charging, and firing, an extremely dazzling ray of light suddenly appeared from the void and instantly fell on the head of the long-neck monster that looked like a devil. ”

“”Swish!”” ”

“It was as if a giant red-hot iron rod had pierced the butter-made statue. The Level 4 monster’s head turned into ashes in an instant. Its huge body was still standing in the same place, but it could not be more dead! ”

“After the deathlight weapon was fired, it was immediately shut down and entered a charging state. The next time it was used would be a month later. ”

“Relying on this powerful black technology, the second of the three tall monsters had already been killed by Tang Zhen! ”

“Now that there was only one high-level monster left, Tang Zhen no longer had any effective long-range attack means. The only choice was to fight in close combat! ”

“Another 500,000 gold coins were used up and Tang Zhen’s map was immediately upgraded to intermediate level. The monitoring range was expanded to a radius of one kilometer! ”

The Level 4 monster was now within the range of the map!

“The map teleportation was activated and the invisible Tang Zhen had already appeared behind the monster in the next second. At the same time, the purple electric short sword that was unsheathed was like a shooting star as it stabbed towards the vital part of the lizard monster that had six arms and a bone tail. ”

“This matter was somewhat within Tang Zhen’s expectations. When his purple lightning short sword was about to Pierce into the back of the lizard monster’s head, the lizard monster actually dodged this sure-kill attack. ”

“”Hiss hiss hiss hiss!”” ”

“The lizard monster kept flicking its blood-red tongue. Its body was arched, as if it could launch a sudden attack at any time. Its vertical pupils flickered with a cold light, and its cold eyes stared at the void ahead. ”

“Tang Zhen raised his attention to the extreme. Although he was not afraid of a level 4 monster with his current strength, this did not mean that he could ignore the strength of a level 4 monster. ”

Caution was the key to safety. Tang Zhen’s thoughts had always been extremely calm when facing a life and death battle.

“Just as Tang Zhen was thinking about how to kill this monster, the lizard monster that had been in an attacking state all this time suddenly roared. Its body moved and it turned around and fled at lightning speed!”

“Tang Jing, who was ready to face a life-and-death battle, opened his mouth in shock. He stared at the back of the lizard monster in a daze. After a few seconds, he recovered and took out half of his gun and fired five shots at the lizard monster.”

“f * ck, are you kidding me? you actually ran away at the last minute. Aren't you embarrassed? "" ”

“Tang Zhen, who was surprised and happy, cursed as he fired. He could faintly see the lizard monster's figure staggering a few steps, but it still firmly ran into the depths of the wilderness without the slightest intention to miss.”

“From its appearance, it seemed to be running for its life!”

“Clearly, this lizard monster had already realized that something was amiss in its heart after it had personally witnessed two monsters with similar strength dying in Tang Zhen's hands. This was why it chose to flee in a disgraceful manner after dodging Tang Zhen's fatal sneak attack.”

“No matter what, staying alive was the most important thing!”

He chose to retreat even though he knew that he could not be defeated. Just this point alone made Tang Zhen more vigilant of the monsters in the wilderness.

“The low-level monsters in the valley were in a mess. After the high-level monsters that were leading the attack on the city fled, the remaining monster soldiers also howled and fled the valley on their hands and feet. It was hard to associate their sorry image with those ferocious monsters.”

It was only at this moment that the emotion known as fear was removed from the screen and spread from the hearts of these monsters.

“What was more shocking was that in the process of fleeing, these monsters actually started to devour each other, completely forgetting the tacit cooperation they had when they attacked the city together!”

“The remaining few brainless monsters in the valley were no longer a threat to the building. They could not even break through the last stone wall. Under the attacks of the Wanderers, they were quickly annihilated.”

“The Wanderers, who had been holding back their energy and were planning to fight to the death with the monsters, were stunned at first when they saw the monsters retreat. Then, the Wanderers, who were almost exhausted, cheered in unison. The monsters had been repelled, the new building had been defended, and their future home had been protected.”

“They couldn't help but be excited, because after withstanding the monster's attack, it meant that they could become residents of this building and end their drifting lives. This was the dream of all the Wanderers, and now that this moment had suddenly arrived, there was no longer any suspense. Some Wanderers even burst into tears.”

“In this battle to defend the city, Tang Zhen relied on his unique advantage, and the Wanderers relied on their firm beliefs to finally resist the monster horde that had almost doubled in size!”
