

Alternate 761

Chapter 761 The legendary battle

To the controller of this Wanderer market, maintaining the stability of the market and protecting their own status and safety were the things they were most concerned about.

If Tang Zhen was an ordinary lord cultivator, he would not be able to leave safely today. He would probably be surrounded by countless cultivators before he could even leave the Wanderer market!

After all, the person he had killed wasn't an ordinary cultivator, but a three star horde leader, an important member of the market's management.

It was reasonable for the manager of the Wanderer market to step forward and kill Tang Zhen to pay with his life!

However, when they found out that Tang Zhen was a King level cultivator, the situation changed. After all, everyone knew the strength of a King level cultivator. They also knew how much a price they had to pay to make Tang Zhen yield!

They didn't have the confidence, and they couldn't afford to lose it!

Therefore, the two King level cultivators who were hiding behind the scenes immediately made the decision that was most beneficial to them. They would put on a show to silence the crowd and then secretly ignore this matter as if it had never happened.

Of course, the premise of this matter was that Tang Zhen had to have no intention of getting involved with the benefits of the Wanderer market. Otherwise, even if he was a fierce dragon crossing the river, those local snakes would not let him off. They would even think of ways to kill him!

.....

At this moment, Tang Zhen was already very far away from the Wanderer market. He was heading straight for the three-eyed man's building area according to the information provided by the foreign merchants.

According to the foreign merchant, the three-eyed man's city was at least 10000 miles away. Near the city was an ancient battlefield, surrounded by ruins.

It was said that back then, more than ten towers had joined forces to attack a giant tower, and an extremely fierce battle had taken place.

Of course, this legendary giant city wasn't a three-headed, six-armed humanoid city that could move. Instead, the residents of the city were all Giants over ten meters tall!

The city that these Giants lived in was a city of steel that was as tall as a mountain, and its walls were indestructible.

Ever since these Giants had built the city, they had been occupying a rich plain for thousands of years and had become the overlords of this area!

Countless foreign races were under the control of these Giants. They lived in fear every day, afraid that they would be captured by these Giants and become their food!

In order to escape the fate of being food, some races directly moved away from this place. Some were reluctant to part with their homeland, so they secretly planned how to escape from the control of the giant city.

Of course, it would be best to destroy the tower of Giants. That way, it would be done once and for all!

Perhaps the heavens had eyes. When a few foreign races 'buildings joined forces to explore a wild building, they encountered a very terrifying thing, but they also accidentally discovered some special items.

After the alien cultivators 'research, they found that if these special items were used well, they might be able to escape their tragic fate and escape from the control of the giant tower.

Therefore, these non-human race buildings conspired and formulated a special plan, which was quickly implemented.

They first captured thousands of Wanderers and tricked them into consuming a special item that had been cultivated. Then, they used them as food and sent them all to the giant tower.

Since they had entered the giant tower as food, the fate of these Wanderers had long been decided. In the end, they would all become the main ingredients for the Giants 'soup and barbecue.

However, the Giants, who had already let their guard down, did not know that this batch of food had been added with " seasoning ", and an extremely deadly item was hidden in their bodies.

Even though these Giants had terrifying digestive and resistance, they still couldn't do anything to this special creature from a foreign world.

Sure enough, it didn't take long for the residents of the giant city to be infected with a strange disease. All of them lost their appetite and their bodies quickly became thin, looking like withered bones!

The noble of the giant city realized that things were not good. Just as he was about to find out the reason, the residents of the city suddenly died one after another. Their deaths were very ferocious and miserable.

When they examined the bodies, the Giants were horrified to find that a huge parasite had appeared in the bodies of the dead, occupying their entire digestive system!

It was also because of the existence of these parasites that the residents of the giant towers quickly became thin. When the parasites ran out of nutrients, they began to devour the blood essence of the Giants!

After discovering this situation, the entire giant tower immediately fell into chaos. All the patients were gathered together and examined one by one.

The final result of the examination shocked the city Lord of the giant tower. It turned out that among the thousands of residents in the giant tower, more than half of them had been infected by the parasite.

Their faces were yellow and their bodies were extremely weak, as if a gust of wind could blow them away!

He tried to use drugs to repel the parasite and even cut open its stomach to remove it, but it was useless. This was because if the parasite died, it would release a poison that would kill the host immediately!

Originally, according to the parasite's normal size, even if it released that kind of deadly poison, the amount would be extremely limited. It would not be able to do anything to these strange Giants with abnormal physiques.

However, after the parasite entered the giant's body, a mutation occurred. The giant's body began to grow rapidly, and it was now countless times larger than its original size!

The death toxin that they were releasing was something that even the Giants could not withstand!

It could be said that the combat power of the giant's Tower had been weakened to the limit. If a war broke out, the giant's Tower would not be able to hold on for long.

At this moment, even the Giants, who didn't like to think the most, realized that they had been set up by someone and had fallen into a huge conspiracy.

If there were no accidents, it wouldn't be long before a large number of enemies attacked!

From this moment on, the giant city had fallen into a critical juncture of life and death. The slightest carelessness would lead to the destruction of the city and the death of people.

Therefore, the Giants whose digestive organs had not been invaded by the parasites, or who still had the strength to fight after being infected, all began their pre-battle preparations.

At the same time, the city gates were tightly shut, not allowing any information to leak out.

However, at this moment, the Army of more than ten towers, as well as a large number of wild cultivators and Wanderers, suddenly arrived at the city!

Without any hesitation, the cultivators of the Allied forces launched a fierce attack on the giant tower. For a moment, the sky and the ground were filled with cultivators.

The giant city, which had not yet been upgraded to a national level and did not have a protective shield, was broken through in an instant. Then, the cultivators of the Allied forces marched straight in and fought with the remaining residents of the giant city!

The residents of the giant city were huge and strong. In addition, they were wearing heavy armor that was several fingers thick. Each of them was like a moving fortress. Every attack would kill countless cultivators of the Alliance Army.

However, since the Allied forces dared to attack the giant's Tower, they must have made preparations. At this moment, countless cultivators of the Allied forces took out a kind of earthy yellow fruit and threw it at the Giants.

As the fruits shattered, sticky and slippery vegetable oil seeped out of the broken fruits and stained the Giants' armor and bodies.

Then, as long as he touched it with flames, the fat on the Giants' bodies would burn rapidly, turning the Giants into moving torches!

The entire giant tower was immediately plunged into a sea of fire. The Giants were burning everywhere and roaring in pain. They stepped on the corpses of the Allied cultivators and desperately pounced on the enemies who were throwing fat fruits!

Every attack meant the death of a large number of cultivators from the Allied forces. However, the residents of the giant city Tower who launched the attack would also fall to the ground and never get up. The sound of burning fat kept coming from their bodies.

The pungent smell of barbecued meat filled the entire sky above them, making them want to vomit!

When the last giant fell, the entire giant tower had been turned into ruins. There were burning corpses everywhere, and the iron walls that had been burned red by the flames!

As for the cultivator Alliance, they had suffered even more losses. Corpses were stacked on top of each other. Many of them had been trampled on and turned into meat paste, or they had been burned into black charcoal along with the Giants!

Chapter 762 Arrival, bombing

After this battle, this giant city was completely destroyed. The powerful race that originally dominated a region had become history.

In fact, there were many similar things, even more so in the world of Loucheng. Countless races of the world of Loucheng, which were once extremely powerful, were eventually buried in the dust of history and were rarely mentioned in the future!

This was the true and cruel reality of the world of Loucheng. Everyone who knew the truth was shocked.

It was said that the three-eyed man was the winner of the war. After receiving the wealth of the giant tower, they began to grow rapidly and became more and more powerful.

As for the other buildings, they had declined due to various reasons. In the end, they served as a foil for the three-eyed man's rise and gradually disappeared from the plain.

From then on, the three-eyed being became the sole ruler of the area!

It was also for this reason that many foreign merchants knew of the existence of this National Tower City, allowing Tang Zhen to easily find out its specific location.

From this point of view alone, it was not a good thing to be too famous. Although it could better intimidate the surrounding areas, it was equivalent to exposing oneself to the outside world.

If there were more King level cultivators like Tang Zhen who tried to find trouble, even a national-level city might not be able to handle it!

However, every city that was promoted to a national level had to go through countless conquests and massacres, and there would never be a lack of enemies!

At this moment, Tang Zhen was hurrying with all his might. His speed had already been raised to the limit. His entire person was like a Phantom in the clouds that disappeared in an instant.

Judging from his current speed, it wouldn't be long before he reached the three-eyed being's Tower.

He crossed thousands of mountains and rivers along the way and passed by countless buildings of different sizes. Even though some places were as beautiful as a Fairyland, Tang Zhen did not stop for a moment.

Only when the undulating ground became incomparably flat and a giant skull wearing an iron helmet suddenly appeared on the grass did Tang Zhen's heart become happy. He knew that he had already arrived at his destination.

He glanced at the giant skeleton on the ground and saw that it was almost petrified. Its two black eye sockets were staring at the sky listlessly, and the huge iron helmet on its head had long been rusty.

Around the skull, there were some huge pieces of metal armor. They were like stone tablets stuck in the ground. They had been eroded by the wind and rain.

After countless years, this place had become a paradise for small animals. Wild rats were going in and out of the skull's open mouth, and a few colorful birds were resting on the top of the metal armor.

They didn't realize that the owner of the skeleton under their feet used to be a powerful alien cultivator.

These were obviously the remains of the Great War. Even after countless years, they still seemed to be silently telling the passersby the glory of a fallen race!

At this moment, a dozen Wanderer-dressed men and women were resting in front of the giant skull. It seemed that they had traveled a long way, and all of them had travel-worn expressions.

One of the middle-aged men was sitting on a rock, holding an unknown instrument in his arms, plucking the strings and singing.

The song was bleak and distant, as if it was filled with the memory of happiness and the confusion of the future. Coupled with the surrounding environment, it made people feel a sense of desolation.

After Tang Zhen listened to the story, he descended from the sky and landed in front of the Wanderers.

The Wanderers were startled when they saw Tang Zhen's sudden appearance. They immediately stood up and bowed to Tang Zhen.

"Respected Lord cultivator, is there anything we can do for you?"

The middle-aged man who was playing the zither earlier had a respectful expression. After bowing and standing up, he carefully asked Tang Zhen.

"I'm just asking for directions. Do any of you know where the three-eyed man's Tower is?"

Tang Zhen glanced at the middle-aged man and asked in an indifferent tone.

The middle-aged man immediately replied, "If we walk from here to where the sun rises for two days, we'll be able to enter the three-eyed being's building area.

However, no one is allowed to get close to that place now, and there are often soldiers patrolling there. Once they find an intruder, they will kill him without even asking!"

That middle-aged man kindly reminded Tang Zhen, letting him know of the dangers near the three-eyed man.

Tang Zhen was not surprised when he heard this. After all, the three-eyed foreign being was preparing to invade their original world. During this period of time, it was reasonable to impose a curfew in the surrounding area to prevent any unforeseen circumstances.

Tang Zhen simply did not put these servant races that were vassals to the three-eyed man in his eyes. This was because they simply did not have the qualifications to stop him.

Nodding to the middle-aged man, Tang Zhen's figure once again soared into the sky and disappeared in the blink of an eye.

That middle-aged man was stunned as he looked in the direction that Tang Zhen had disappeared. It was a long time before he withdrew his gaze. He frowned and pondered for a moment before signaling everyone to leave this place as soon as possible.

Someone asked the middle-aged man, confused. Why did he look so worried?

The middle-aged man heard this and explained to the crowd, "The cultivator who fell from the sky just now must be very powerful. I think he's probably a King level cultivator.

He asked me about the location of the three-eyed being's Tower, and even though I told him that the tower was heavily guarded, his expression didn't change at all. He was obviously fearless!

Although we've only met for a short while, I could feel a suppressed killing intent from him. Coupled with his question, I'm certain that he's going to the three-eyed being's Tower to seek revenge!"

At this point, the middle-aged man sighed and said in a serious tone, "Compared to these cultivators with astonishing strength, the lives of us Wanderers aren't much more valuable than that of ants. Therefore, it's best to hide as far away as possible when we encounter such an incident.

After all, only by staying away from the source of the disaster can one live a safe and healthy life!"

In just a few short sentences, the middle-aged man's sharp judgment was revealed, as well as his way of survival that was summed up with blood and tears.

The middle-aged Wanderer's cautiousness and experience had allowed them to escape with their lives.

It was a pity that this person didn't have any cultivation, and he was restricted by his identity as a Wanderer. In this special world where strength was respected, it would be difficult for him to achieve much.

Tang Zhen did not know that his intention of coming had already been seen through by others. However, the killing intent that had accumulated on his body was indeed getting heavier and heavier. It had practically condensed to the point where it was almost material.

The strength of the three-eyed demonic man's city was extraordinary. No matter how conceited Tang Zhen was, he knew that with his current strength, he was still unable to take on a national-level city.

Therefore, he had to succeed in one strike and severely injure the enemy. Then, he would pursue and completely destroy the three-eyed being's building!

As for the Super bomb used for attack, Tang Zhen had already prepared it long ago and could throw it into the enemy's base from the sky at any time.

At this moment, he was soaring in the clouds, constantly searching for the three-eyed man's Tower. His face was as serious as water, but his eyes were terrifyingly bright.

It didn't take long for a huge city to appear on the map. It covered an area of dozens of square kilometers, like a huge monster lying quietly on the ground.

In front of this huge tower, a huge vortex was spinning continuously. It was the plane transmission channel to the original world!

Tang Zhen's pupils shrank when he saw this. After placing the little monster in his backpack properly, he once again rose into the air and entered The Dark World.

Without any hesitation, he took out the Super bomb, locked onto the center of the building, and threw it down!

Chapter 763 destruction

A bomb of such a size falling from the sky could be said to be difficult to miss!

The moment Tang Zhen threw the bomb, the three-eyed demonic tower on the ground immediately let out a piercing alarm.

In fact, as soon as the bomb appeared in the sky above the three-eyed man's building, the cultivators in the building had already discovered it and activated all the anti-air measures.

Several teams of cultivators in charge of air defense soared into the sky with serious expressions, trying to intercept the Super bomb.

As expected of a national-level city, its reaction speed was so fast after an unexpected situation occurred!

After most of the towers had been upgraded to a certain level, they would start to pay attention to the all-round defense of the towers. Whether it was in the air or underground, they would be included in the defense range of the towers.

After all, the enemies they were facing were no longer just monsters. They had become more diverse, more brutal, and more cunning.

When these enemies moved, they would not attack according to your settings at all. Instead, they would try their best to take advantage of all possible loopholes.

Many towers were not destroyed in the war of invading the Otherworld, but instead fell under the plot of other towers. The fundamental reason was that they had neglected the defense of the towers.

Therefore, after upgrading to a national-level building, no matter how many Battle Points he had to spend, he had to get a defensive shield to protect the building in all aspects.

However, there were different grades of defensive barriers. The most common low-grade defensive barrier was the basic defensive barrier that could be exchanged for with Battle Points after the tower was upgraded to a national level.

Although this kind of basic protective shield could defend the city, there was still a limit to its defense. Under normal circumstances, it would not be able to withstand high-intensity attacks for long.

You get what you pay for. If they were not satisfied with the current protective shields, they could spend more Battle Points to exchange for higher grade protective shields.

The advantages and disadvantages could only be seen through comparison. Compared to the general low-level protective shield used by the upgraded national-level buildings, the special buildings that could activate the protective shield had unlimited potential, even though their initial defense was weak and the investment was quite huge.

There were even some buildings that could activate protective shields. When they were promoted to a national level, their protective shields would be as strong as the intermediate protective shields sold on the cornerstone platform!

In fact, the purpose of the defensive shield was to help the city block unexpected attacks. Then, the cultivators of the city would counterattack fiercely!

Of course, if it wasn't activated in time, no matter how powerful the protective shield was, it would just be a decoration. It couldn't protect the building at all.

Most of the time, the defensive shield would not be turned on. After all, it consumed too much energy and no rich man could turn it on all day.

The three-eyed being didn't activate the defensive barrier, because they didn't realize how terrifying the metal lump that fell from the sky was!

It was also because of this negligence that they had to pay an unimaginable price!

In the city of the three-eyed being, many cultivators and residents on the streets couldn't help but raise their heads to observe the situation in the sky because of the alarm.

As the Overlord of this land, there were almost no cultivators who dared to provoke the three-eyed being. Even if there had been, they had been killed at all costs.

Moreover, loucheng's invasion into the other world was imminent, and the entire loucheng had entered a state of war. It was not an exaggeration to say that all the people in the city were soldiers.

Under such special circumstances, there was still someone who dared to provoke them. They really didn't know how to spell the word 'death'!

The residents of these buildings seemed to have already seen the scene of the intruders being captured and killed, and their eyes were filled with anticipation.

It was not a bad thing to relax once in a while when he was under high pressure!

At this moment, the Super bomb was only a few hundred meters away from the three-eyed demonic human's building, and a cultivator battle team was already in the air.

The cultivators were all at a loss as they looked at the industrial-looking metal lump. They couldn't figure out what it was.

However, their mission was to intercept the unknown object that fell from the sky. As for its specific use, there was no need to worry about it for the time being.

One of the three-eyed alien cultivators let out a loud roar and activated his cultivation skills. His arm instantly expanded several times in size as he threw a punch at the Super bomb.

With his advanced horde leader cultivation, this was not an act of arrogance. Instead, he was confident that he could send her flying!

However, how could Tang Zhen, who was hiding in the dark World, let him do as he wished? at the same time as the foreign cultivator launched his attack, Tang Zhen held a Super Sniper rifle and directly locked onto his body.

After a muffled gunshot, the foreign cultivator's body suddenly shattered into a large cloud of blood mist.

The cultivators of Lou Cheng who were following closely behind were shocked and hurriedly dodged to the side. At the same time, they looked at the place where the gunshot was just heard.

However, before they could lock onto their target, muffled gunshots rang out in succession, causing the cultivators of the loucheng to flee like rats with their hands covering their heads. From time to time, a large cloud of blood mist burst out in the air!

While the cultivators were hesitating, the Super bomb continued to descend, and it was less than a hundred meters away from the three-eyed being's building.

At this time, the electric detonator inside the Super bomb had already been detonated, and the amount of nuclear fuel filled in it had reached a critical value in an instant, causing an extremely terrifying power to burst out.

It was as if a sun had appeared out of thin air, completely engulfing the entire three-eyed being's building. Under the terrified gazes of the residents, the buildings were destroyed like pieces of paper.

At this moment, the three-eye tower was like hell on earth. Whether it was cultivators or ordinary residents, they were all turned into ashes by the terrifying impact of death. The ground was like a wave in the sea, constantly surging and spreading to the surrounding area!

The domineering three-eyed man's city had been reduced to ashes in just a few seconds!

Tang Zhen was not afraid of danger and came over from thousands of miles away. In fact, it was for the eruption at this moment!

When the huge mushroom cloud rose into the sky, countless living beings in the surroundings were shocked. At the same time, Tang Zhen's figure suddenly appeared at the center of the explosion. His gaze was as cold as a blade as his mental energy continuously scanned the three-eyed demonic human's ruined building.

With his current strength and the special protective equipment, he could completely ignore the terrifying radiation at the center of the explosion.

When he sensed the faint presence of life in the ruins, Tang Zhen immediately descended and found a three-eyed alien cultivator whose body was completely charred and his flesh had all fallen off.

The foreign cultivator was already on the verge of death. He was struggling in the ruins and growling hoarsely.

At this moment, it was like a trapped beast on the verge of death, constantly letting out the cries of death.

Perhaps he still had endless questions in his heart, unable to understand what had happened. Why was the entire city completely destroyed in the blink of an eye?

Tang Zhen glanced at the foreign cultivator. He took out a specially made pistol from his storage space and pointed it at the other party's head. He then gently pulled the trigger!

Chapter 764 Killing enemies as if cutting grass (1)

"Bang!"

After a muffled gunshot, the foreign cultivator's skull was directly split open. His body was also thrown back by the huge impact, and red and white matter splashed all over the ruins below him.

However, a look of relief appeared on his twisted and ferocious face.

Tang Zhen glanced at the dead three-eyed alien cultivator and turned his head away expressionlessly. He then quickly headed to the next location and another gunshot was heard.

The gunshots came and went, but they lasted for a long time.

Due to their extremely strong physiques, there were nearly a hundred high-level cultivators who were lucky enough to survive in the three-eyed demonic human's building. They were currently struggling and roaring in the ruins.

The voice was mournful and desolate, as if it contained endless anger and sorrow.

To them, who were suffering from both mental and physical torture, the feeling at this moment was worse than death!

"You demon, beast, Who are you?"

"You destroyed my three eye race's city, what are your intentions?"

A foreign race cultivator with broken armor and skin all over his body, but his head was strangely intact, was lying on his back on a huge rock at this moment. He was looking at Tang Zhen with an extremely vicious gaze.

He used his palm that only had the bones of his fingers to point at Tang Zhen. Because of the intense pain and anger, his arm was constantly trembling. Pieces of flesh, pus, and blood continued to fall down.

Tang Zhen merely sneered in the face of his self-reproaching question as he gently pulled the trigger.

The cultivators of loucheng must have this realization in their hearts. What was there to ask when they were about to die?

After another gunshot, all the life auras that Tang Zhen could sense had been completely wiped out!

However, Tang Zhen did not let his guard down. Instead, he became more and more cautious. He took out the soul annihilating saber. The tip of the saber touched the ground and dragged, bringing along sparks along the way.

He clearly knew that he was attacking a nation's city, and King level cultivators were an indispensable part of it.

However, Tang Zhen had yet to see the figure of a King level cultivator so far. It could be seen that they didn't die in the explosion.

However, one thing was for sure. The king level cultivator in the three-eyed demonic human's building was severely injured and was hiding somewhere in the ruins, waiting to give him a fatal blow!

Of course, there was also a possibility that these King level cultivators saw that the situation was not good and decided to avoid this fiend, Tang Zhen. Then, they would wait for an opportunity to escape from this place and wait for their injuries to recover before retaliating.

With the strength of a King level cultivator, if they were to deliberately hide, they would be no different from grass, wood, or stone. Even Tang Zhen would not be able to easily discover their traces.

It was a headache to think about being hated by an unknown number of King level cultivators, who would then secretly take revenge until one of them was dead.

Therefore, in order to prevent any future trouble, Tang Zhen would never let any one of them go. He must eliminate them at the root!

He extended his hand and shook it gently. The reincarnation mirror appeared in his hand before the overseer's figure appeared before Tang Zhen.

some enemies have hidden their auras and can't be discovered unless they are close. Can you control your spirit body to search and determine the location of those hidden enemies? "

The overseer pondered for a moment after hearing this. He then nodded to Tang Zhen and said, although the environment here isn't suitable for spirit bodies to move around, it's not like they can't move. There shouldn't be any problems!

Tang Zhen nodded. He casually took out a portion of the aperture leaving sand, placed it into the incense burner, and lit it up. When the smoke that was actually made up of pure yin energy rose, he indicated to the overseer that he could begin to move.

good stuff! Those guys have earned a lot this time!

When the guard saw the emergence sand, he immediately recognized its origin. He first praised it, and then he saw the reincarnation mirror suddenly rise into the air, floating in the middle of the smoke.

Under the control of the guard, the reincarnation mirror door opened. Countless spirits flew out of the mirror like wild horses.

When they passed through the smoke from the burning of the out of body sand, these spirit bodies had a look of enjoyment on their faces. When they wanted to stay a little longer, they were pushed to the side by more and more spirit bodies behind them.

In the blink of an eye, thousands of spirits had appeared and surrounded the reincarnation mirror.

They were all recruited by the overseer to help maintain the order of the mirror world. They were the elites that the overseer had selected from countless spirits!

No matter how powerful they were in their past lives, they were just ordinary spirits in the mirror world. They didn't have any special treatment!

The overseer did not show the slightest bit of the humility he had shown to Tang Zhen when facing these subordinates. Instead, he loudly berated those spirit bodies, "All of you, listen up! There are many enemies hidden in these ruins!

Since they're enemies, there's no need to hold back. So, even if you have to dig three feet deep, you have to find these hidden guys!"

As soon as he finished speaking, the spirit bodies suddenly scattered in all directions and shuttled through the ruins.

Ghosts could not be seen, so it was definitely the best choice to search the ruins and find hidden enemies!

Tang Zhen, on the other hand, was ready to attack. Black flames curled around the soul annihilating saber in his hand, while the black metal ball with a special magnetic property was floating above his head and continuously rotating.

Suddenly, there was a shrill cry. Then, several spiritual bodies rushed up from the ruins, their faces full of panic.

Tang Zhen's pupils shrunk. His entire body was just like an arrow that had left the bow as he suddenly appeared at that spot. The soul destroying blade was raised high before it was ruthlessly hacked down.

With a muffled sound, smoke and dust filled the air as the ruins on the ground were cut through by the saber!

A blood-curdling screech resounded from the ground. Soon after, a figure leaped out while pushing against the shattered rocks. His face was filled with madness as he furiously glared at Tang Zhen.

The skin on his face had already fallen off, and the third eye on his forehead had long been blind. His body was covered in terrifying burns, making him look like a demon.

At this moment, he was holding a wide-bladed sword in his hand, but it was already badly damaged. The armor on his body was also in a mess, making him look extremely miserable.

“Bastard, I’m going to kill you!”

The foreign cultivator roared in anger and swung his sword at Tang Zhen. It was as if he had poured all his hatred into it and vowed to split Tang Zhen into two!

However, even though he was a one-star King tier, he had been severely injured by the explosion just now, and his combat power had been reduced by more than ten to twenty percent.

Therefore, this sword attack that seemed to be filled with hatred was easily dodged by Tang Zhen without even injuring his body.

“Go to hell!”

Tang Zhen shouted in a low voice. The metal ball above his head quickly flew out and turned into countless Flying Daggers in the blink of an eye, covering the king grade cultivator who was struggling on the brink of death.

Countless Flying Daggers flew back and forth, forming an impenetrable net of daggers. In less than a breath’s time, this non-human King was sliced into meat paste!

Chapter 765 To get rid of evil! you must get rid of the roots

After killing the king-level cultivator, the spirits that had been waiting for a long time rushed forward and greedily devoured the energy that had dissipated into the air.

The energy accumulated by a King level cultivator was far purer than ordinary energy. It had a deadly attraction to spirit bodies.

It was equivalent to a special elixir that was only suitable for spirit bodies.

In some legends, it was often said that ghosts devoured people’s yang qi and blood essence. In fact, that kind of essence was a low-level energy that could make the spirit body that existed in the form of energy become more solid and stronger.

However, compared to the energy condensed by a King level cultivator, the energy was nothing!

Tang Zhen, however, turned a blind eye to this. Instead, he continued to observe the entire building ruins, waiting for the next hidden target to appear.

After all, the three-eyed man was a national-level city. It was impossible for there to be only one king level cultivator. Therefore, Tang Zhen was sure that there were still King level cultivators under the ruins!

Sure enough, it didn't take long for another sharp cry to be heard. Clearly, another spirit body had discovered the hidden King level cultivator.

However, this time around, before Tang Zhen could act, those spirit bodies that had tasted the benefits had a crazed expression on their faces. They were like a group of man-eating fish that had seen those who had fallen into the water as they all rushed in the direction of the sharp cry.

Although the level of these spirit bodies was not high and could not be seen with the naked eye, they had the means to kill people and could not be underestimated.

Their nature was unruly. Although they were submissive when facing Tang Zhen and the overseer, it did not mean that they were the same towards other creatures.

The injured high-level cultivators were the most delicious food for the spirits. They all rushed toward the king level cultivator like flies.

The king-level cultivator who had been hiding in the ruins had crawled out of a pile of charred bodies and was screaming in pain.

He was like a trapped beast, constantly waving his heavily injured limbs in an attempt to drive away the dense and ferocious spirit bodies.

If he wasn't injured, he might be able to easily resist the siege of these spirit bodies, and at the very least, he could escape.

But now, his legs were broken and they were crossed at a strange angle. The White bones had pierced through his skin and were exposed to the air. He was clearly completely crippled.

Just like all the other foreign cultivators, this King level cultivator's skin and flesh fell off his body. With a light shake, a large piece of skin and flesh fell off his body. His face was as unsightly as a demon's.

As for his eyes, they had been completely destroyed and he could not see anything.

"Ah, get lost, get lost, all of you get lost!"

The king-level cultivator screamed and used all his skills, but he couldn't stop the spirits.

In the eyes of the spirits, this King-class cultivator was a delicious piece of meat. Even if their souls were in danger of being destroyed, they still rushed forward without fear.

Every time the spirit body touched the king level cultivator, a piece of his flesh would be torn off. Then, the spirit body would fly to the side and quickly absorb the energy contained in the flesh.

Sinister and sinister laughter came from the mouths of the spirits who had obtained flesh and blood. They could not suppress the look of enjoyment on their faces.

Under the siege of the spirit bodies, the dying king level cultivator's flesh and blood were torn off in the blink of an eye, leaving only his skeleton.

Tang Zhen coldly looked at this scene. After confirming that the king level cultivator was dead, he turned his eyes to a corner.

In that place, Tang Zhen could feel the auras of a large number of brain beads and origin stones. It was likely that this place was the treasure room of the three-eyed demonic human.

However, after a terrifying explosion, most of the treasures had been reduced to ashes, and there were very few items left.

No matter how small a mosquito was, it was still meat. Moreover, there were origin stones within. Tang Zhen naturally would not miss this opportunity.

Tang Zhen's eyes suddenly narrowed just as he was about to lift up the shattered rock and store these treasures. His entire person instantly disappeared from his original spot.

“BOOM!”

The instant Tang Zhen disappeared, a huge pit suddenly appeared at the spot where he was standing. It was as though an invisible giant's foot had directly stepped on the spot where Tang Zhen had been.

If Tang Zhen did not retreat in time, he would most likely be crushed into meat paste by this terrifying force!

Five figures of different heights appeared at the same time, each of them exuding the terrifying aura of King level cultivators. They were the three-eyed demonic humans who had survived the explosion!

It turned out that during the explosion, these King level cultivators had been cultivating in Lou Cheng's basement. That was how they had escaped death.

However, they were still in a sorry state. They were all injured, and two of them even had missing limbs. damn it, he's not invisible. He's using a special method to escape!

A King level three-eyed being roared. The third eye on his forehead that could see through the dark World was slowly closing.

The other King level cultivators' faces were also gloomy. They looked as if they couldn't wait to swallow Tang Zhen alive as they gritted their teeth.

can anyone tell me who this human King is? why did he attack our Lou Cheng? ”

A three-eyed man wearing a strange robe snorted coldly as he looked at the ruins of the city.

He was the three-eyed being's clan leader and also the city Lord of this building. He was the only two-star King amongst the five King level cultivators present!

The other King level cultivators looked at each other. Their eyes were also filled with confusion. They clearly couldn't guess Tang Zhen's purpose.

“No matter what, this bastard destroyed our tower. We can't live under the same sky!

So even if we have to chase him to the ends of the earth, we can't let him go!”

The other King level cultivator said viciously. He couldn't hide the sorrow on his face. His family and friends had all died in the explosion.

After all, they weren't King level cultivators. They couldn't resist this kind of destructive attack!

"Well, it's too late to say anything now. Let's search carefully to see if there are any survivors and then leave immediately.

There seems to be some kind of poison in the air that is extremely harmful to us!"

The king level cultivator said in a decisive voice.

The other King-level cultivators nodded in agreement and began to move in different directions.

However, before they could disperse, they suddenly saw more than ten streaks of light flying toward them from the sky.

The speed of the light was extremely fast, and it seemed to contain a strong killing intent.

Chapter 766 Repenting _ "Not good, quickly Dodge!"

A few King level cultivators roared in unison. Their faces were filled with fear as they quickly dodged the attacks of the light.

However, the light was like a maggot in their bones. It was tightly biting the five King level cultivators, and they couldn't get rid of it!

By now, the king level cultivators had discovered that the light was actually a small sword that was less than half a foot long. It was shining brightly and was obviously extremely sharp!

As they dodged, they also used various techniques to stop the small sword from chasing them.

However, before they could escape from the pursuit of the small sword, another group of black dots appeared in the sky and locked onto the king level cultivators.

"Bastard, what the hell is this?"

One of the king level cultivators had to Dodge the flying sword behind him and also guard against the falling strip-like object. He was in a very difficult position.

The king level cultivator's eyes scanned the items that fell from the sky. His mouth was wide open, and his face was filled with shock.

The black dots that fell from the sky were actually tungsten steel bars as thick as a child's arm. They had enough power to penetrate metal and stone, and they smashed into the ground, creating huge pits!

One of the king level cultivators was already heavily injured, and he had used up a lot of his energy to Dodge the flying sword. Now that he was faced with this tungsten steel bar, he couldn't completely Dodge it.

The phantom-like tungsten steel bar whistled through the air, brushing past his body, directly ripping off his shoulder, and then continued to pierce through his body.

After a scream, the king-level cultivator was smashed into meat paste!

The king level cultivator had died a miserable death. Not only did he not have an intact corpse, but the energy within his body had also dissipated!

This time, he was truly dead, his soul completely destroyed!

The rest of the king level cultivators were all shocked. They didn't dare to be distracted, and they used all their strength to avoid the deadly pursuit from behind and above.

What made them feel the most depressed was that these flying swords and tungsten steel bars seemed to be controlled by someone, completely trapping them in a very small area, making it impossible for them to escape!

Just as the king class cultivators were trying to figure out how to escape, the spirit bodies that they had previously ignored suddenly attacked. They swarmed toward the king class cultivators and blocked their escape route.

This scene was like a high-speed car suddenly running into a ground full of gravel. The consequences were simply unimaginable!

The king level cultivators' eyes were bloodshot. They were extremely angry. They used all their techniques, including fire, gravity, lightning, and ice spears, in an attempt to get rid of the spirits in their way.

Who would have thought that at the same time, a dozen more streams of light would come from the horizon, and at the same time, the black dots in the sky would come again like a rain!

When the king level cultivators saw this, their hearts were filled with endless despair and sorrow.

The continuous appearance of the flying swords, coupled with the tungsten steel bars and the frenzied spiritual bodies, had already formed a fatal situation, making it impossible for the seriously injured to escape.

"I hate you, Yingluo."

A flying sword pierced through a King level cultivator's body. A hole the size of a human head appeared in his chest, and his internal organs were all shattered in the blink of an eye.

After the flying sword pierced through the king class cultivator's body, it nimbly changed its direction again. It continued to shuttle back and forth with the other flying swords, cutting his body like a sieve.

"Plop!"

The king-level cultivator's corpse fell heavily to the ground. At the same time, a translucent energy figure rushed out of the body. Its face was exactly the same as the king-level cultivator's!

Unlike the low-level spirits that could only be seen in the dark World and the gray fog, this King-level cultivator's energy body appeared in broad daylight and could be seen with the naked eye.

When the other spirit bodies saw this, they all rushed towards the king-level energy body and formed a huge ball.

The cultivator's energy body that was trying to escape let out a miserable howl and was torn into pieces in the blink of an eye, swallowed by the wolf-like spirit bodies.

Unknowingly, there were a few especially powerful existences among these spirit bodies that could be faintly seen with the naked eye!

The other King level cultivators weren't doing any better. Two more were shot by the flying swords and the tungsten steel bars. They didn't even have time to scream before they were ground into meat paste!

In the smoke-filled ruins of the three-eyed being's Tower, there was only one king class cultivator who was struggling to hold on, desperately avoiding the pursuit of the flying swords and tungsten steel bars.

He was the city Lord of the three-eye tower, the only two-star King tier!

However, city Lord Lou's face was twisted, and his eyes were so red that they were almost bleeding. His heart was filled with hatred and fear.

At this moment, he still couldn't figure out who was attacking his tower with such cruel and brutal means.

In the process of avoiding the flying sword, his gaze unintentionally swept past the location of the plane's transmission channel. Tang Zhen's figure and appearance suddenly flashed in his mind. He immediately had a flash of inspiration and came to a sudden realization.

"Bastard, how did this happen?"

Scenes of the past suddenly appeared in his mind, giving him a flash of understanding, but he also felt as if his heart was being twisted by a knife!

There was only one thought in his mind at the moment, and that was, 'if you knew this would happen, why did you do it!'

It turned out that by chance, Lou Cheng of the three-eyed race had obtained the plane coordinates of his original world without much effort.

After the exploration, it was confirmed that the original world was rich in resources, and the energy ratio between heaven and earth was extremely low. It was destined that no cultivators could exist in the original world. No matter how one looked at it, it was an alluring cake that one could not help but take a bite of!

The three-eyed race's leaders didn't hesitate to apply for the opening of the plane transmission channel on the cornerstone platform and began to prepare for the invasion of the original world.

As a result, the entire city had entered a state of combat readiness. Once the dimensional portal was opened, they would invade the original world on a large scale!

During this time, everything went smoothly, and it seemed that the three-eye tower would win this invasion.

As for whether the original world would be destroyed after being invaded, it was not within the three-eyed being's consideration.

However, the destructive catastrophe that happened today made the heart of this King level cultivator tremble. He subconsciously connected the two events together.

This disaster must have started because of the invasion of the original world. Otherwise, the three-eye tower wouldn't have been annihilated even though it had made countless enemies!

Only when the other party was in a life-and-death crisis would they use such a crazy method to destroy their own City Tower in order to prevent future trouble.

The more the city Lord of three-eye tower thought about it, the more he felt that this was very likely. His heart began to bleed.

Now that he thought back to the scene, he realized that it was not a cake at all, but a piece of highly toxic bait with a huge trap hidden behind it!

It was because he was too greedy that he couldn't wait to swallow the poisonous bait. As a result, he brought disaster to Lou Cheng!

Chapter 767 The mysterious platform (1)

damn it! If I find out who did this to Lou Cheng, I'll burn his bones and scatter his ashes to relieve the hatred in my heart!

The king-level cultivator was so depressed that he let out a roar while being chased.

"Don't worry, I will definitely take revenge, but it won't be your turn!"

Just as the three-eyed city Lord roared, a man's deep voice suddenly rang in the king level cultivator's ears, causing him to tremble in fear.

He didn't need to turn around to know that the owner of this voice was the human cultivator who had just disappeared!

City Master three-eye looked around and saw Tang Zhen floating in the air, staring at him with a cold gaze.

At this moment, the killing intent in Tang Zhen's eyes was unconcealed. The soul annihilating saber in his hand was even spitting out black flames. It could attack at any moment.

"Damn it, tell me, Who are you?"

Even if I die today, I want to die clearly!"

The three-eyed city Lord, who had been affected by the explosion and was on the verge of death, roared at Tang Zhen.

Tang Zhen, the main culprit who destroyed his own tower, had his lower abdomen pierced by a flying sword while his mind was in a state of excitement!

The power of the flying sword was terrifying. After piercing through the demonic armor on his body, it still managed to dig a bloody hole in his abdomen!

The three-eyed city Lord's body trembled violently. He did not care about his injuries and stopped running. Instead, he turned around to face Tang Zhen and laughed wildly.

Tang Zhen frowned and slightly reduced the speed of the flying sword. However, it also made it impossible for the three-eyed city Lord to escape.

However, the three-eyed city Lord completely ignored the flying swords. Instead, he glared at Tang Zhen with blood-red eyes.

"Hahaha, I wanted to invade the world that is related to you, but you turned around and destroyed my city. This is perfectly justified!

However, I never thought that because of this, my three eye race would suffer such a disaster. It's all my fault and I can't blame anyone else!

Now, I only regret that I didn't have the chance to personally kill the mastermind who framed my three eye race. Otherwise, I won't be able to rest in peace!"

The three-eyed city Lord knew that he would die for sure. Therefore, at the last moment of his life, he shouted at Tang Zhen with all his might, "That damned mastermind behind the scenes schemed against you and me, planning to make both of us suffer. I can't just let this matter go!

Promise me, you must take revenge on them. Since you can destroy my three-eyed race's Tower, you can definitely destroy their tower as well!"

Before he could finish his sentence, more than a dozen flying swords shot over at the same time, cutting the three-eyed city Lord's body into countless pieces. Only his head remained intact, and his eyes were wide open with anger, full of regret and unwillingness!

"I've said it before, I'll definitely take revenge for this. It's just that it's not your turn to make a move!"

Tang Zhen looked at the energy body that had been condensed from the remains of the corpse and spoke in a faint voice.

The three-eyed city Lord's energy body let out a miserable laugh. He no longer tried to Dodge or escape. Instead, he cupped his hands toward Tang Zhen. Immediately after, he was torn into pieces by the swarming spirit bodies!

Even if the three-eyed city Lord had a thousand tricks up his sleeve, he would not be able to come back to life after his soul was devoured!

Tang Zhen looked at the three-eyed city Lord's head, which was still open, and shook his head.

This cultivator's strength was similar to his. Even if he didn't have as many magical and sharp means as his, as a city Lord, he must have an extremely powerful trump card in his hands!

Unfortunately, the three-eyed city Lord was suppressed by Tang Zhen from the beginning and did not have any chance to fight back.

If he knew that the Super bomb that destroyed the three-eye tower came from the original world where he thought it was extremely low-risk, what would he think?

Tang Zhen slowly walked to the center of the ruins. He kept the remaining treasures into his storage space and then carefully searched the entire ruins.

After confirming that there were no more survivors of the three eye race, Tang Zhen's voice and figure soared into the sky and disappeared in the blink of an eye.

The whole process took less than two hours. Under normal circumstances, it would not even be able to break through the basic defense of a national-level building.

However, under the bombardment of the Super bombs in his original world, in addition to Tang Zhen's unexpected attack, the national-level city was destroyed without any resistance.

This didn't mean that the weapons in the original world were powerful, but that the three-eye tower lacked the corresponding defensive means and was caught off guard!

If they had realized the danger of the Super bomb and activated the protective shield in time, they would have suffered a lot of damage, but they would not have been annihilated!

The nature of war was this cruel. No mercy was allowed. Even though Tang Zhen had long known that countless foreign races would lose their lives, he did not have any choice.

After all, once the war started, it was either you die or I die. Any kind of soft-hearted behavior could cause unimaginable losses to one's side!

From this moment on, the three-eye city that had dominated this area for countless years was completely wiped out of this war zone. Not a single resident of the city survived!

However, Tang Zhen did not know that half an hour after he left, a mysterious stone wall had suddenly slowly risen from the ruins of the huge building. It was emitting a dazzling light.

If one could see the main body through the light, they would find that this mysterious object was the cornerstone platform that every tower had!

However, Tang Zhen had already searched for the three-eye tower's foundation stone platform and discovered that it had long been destroyed by the shock wave of the explosion. Then, where did the foundation stone platform that was rising come from?

It was different from the normal foundation stone platform. At this moment, the foundation stone platform was actually in a semi-transparent state, as if it had no physical body.

When it was about ten meters above the ground, it suddenly shot out beams of light, sweeping through all the corners of the ruins.

This process was like using a special method to search for residual information, and then constantly feeding it back to the cornerstone platform.

As the light searched, groups of runes flashed on the foundation stone platform, as if it was a supercomputer calculating some data.

By the time these runes stopped flashing, three photos of Tang Zhen had actually appeared on the stone wall of the cornerstone platform!

One of the photos was Tang Zhen's true appearance, and the other two were his disguised appearance.

There was a line of text at the bottom of the photo.

[foreign cultivator Tang Zhen, a two-star King tier. His battle prowess is shocking, and his methods are strange. He single-handedly destroyed the city of the three-eyed race, which is ranked 750th in the battle zone, with a special method!

[the cultivator is now wanted in the entire Theater of Operations. After killing him, you will be rewarded with 10 million Battle Points and your access to the platform will be increased by one level!]

In fact, other than the photo, there was even the fluctuation of Tang Zhen's soul aura. Moreover, there was no difference with the person himself.

In this way, even if Tang Zhen had changed his appearance, a high level cultivator only needed to use his mental energy to carefully sense and he would still be able to distinguish him.

As a result, Tang Zhen's situation was worrying.

When the picture and the subtitles appeared, the same mission content also appeared on the countless towers and platforms in the entire battlefield. At the beginning of the mission, there were three dazzling star-shaped marks!

Any mission that could be rated as a star was definitely not simple. When the Holy Dragon City was being upgraded, it had once received a star-ranked mission, and it was only a one-star Mission.

Tang Zhen's actions this time had actually caused the cornerstone platform of this battle region to issue a three-star wanted mission. This was enough to cause a sensation in the entire battle region.

Chapter 768 the target of public criticism

Just as Tang Zhen was on his way to the ice field region, the various cities in this battle region were in an uproar because of this three-star 'bounty mission'!

Although many small Lou cities didn't know the meaning of crossing the boundary and didn't have the concept of a war zone because of the level and the lack of information, they were extremely tempted by the rich rewards given by the cornerstone platform.

Battle Points and points were different. Points could be exchanged with brain pearls, but Battle Points could only be obtained in overseas battlefields or in the wars of invading foreign worlds.

Simply put, points could be used to purchase ordinary goods, while battle merits could be used to purchase goods that points could not.

These items included high-level cultivator skills, the upgrade of the tower, and special items such as protective shields.

The cornerstone platform was like this. Points were easy to exchange, but battle merits were hard to come by. To obtain ten million battle merits was even harder than ascending to the heavens!

Now, as long as he killed Tang Zhen, he would be able to easily obtain these ten million Battle Points. Even the level of the cornerstone platform could be upgraded by a grade!

For ordinary Lou Cheng, this was like a pie in the sky. As long as they could complete this task, Lou Cheng's strength would rise to a new level!

However, Tang Zhen's strength was there for all to see. The cultivation of a two-star King tier was an existence that ordinary loucheng city cultivators had to look up to!

For those small cities, this matter could only be thought about in their hearts. If they wanted to put it into action, they simply did not have the strength.

Therefore, only those top-tier cities and national-level cities were truly tempted and had the ability to hunt down and kill Tang Zhen.

Except for those national-level powerhouses who were executing the invasion mission and those top powerhouses who thought that they were not powerful enough, there were still many cultivators in the Theater of Operations who were very concerned about this mission.

However, this Warzone was vast and boundless. Who knew where Tang Zhen would hide after he learned of the news?

They were extremely far away from the three-eye tower. If they were to search aimlessly, they would definitely waste a large amount of time. Who knew if they would be able to meet Tang Zhen in the end?

As a result, a large number of cultivators in loucheng heaved a long sigh and had to give up on this mission.

However, there was no wall in this world that was airtight. After the disguise that Tang Zhen used before was displayed on the cornerstone platform, it was also painted by many towers and placed in the Wanderer market around the towers. There was a huge reward for finding his traces.

The wild cultivators quickly recognized Tang Zhen as the human cultivator who had killed a three-star horde leader in one move in the Wanderer market and then left.

After this news was spread, it was quickly known by those who were interested. After that, they combined it with the fact that Tang Zhen destroyed the three eye race's Tower and easily determined the exact location of his crossing and the rough route.

If they continued to investigate this clue, they would soon receive good news, and it was extremely important.

It turned out that a stowaway who had crossed the dangerous mountain range with Tang Zhen had also been accidentally discovered.

After torture and interrogation, it was confirmed that Tang Zhen had the strength of a King level cultivator. Moreover, he seemed to have a storage equipment on him.

When this news spread, countless cultivators were envious. Even some powerful King level cultivators who had planned to watch from the sidelines couldn't help but secretly plot.

After all, a storage equipment could only be found by chance. If Tang Zhen really had such a treasure on him, then adding the battle merits that could be obtained by killing him and the increase in the

cornerstone platform's level, all these benefits added together would be completely worth it for them to chase after him.

The influence of these King level cultivators was huge, far beyond the ordinary cultivators.

Under the interference of their investigation, it did not take long before more and more information about Tang Zhen was gathered and placed before their eyes.

According to the questions Tang Zhen asked in the Wanderer market, he could determine that his target was the three-eye city and the foreign race's city on the icy Plains.

Now that the three eyed race's city had been destroyed by him, Tang Zhen's next target would definitely be the foreign race's city on the icy Plains!

If he were to follow this route to track him, the chances of him discovering Tang Zhen would also increase substantially.

With the convenience of the cornerstone platform, this news was quickly spread out. Immediately after, the cultivators of loucheng city who wanted to kill Tang Zhen rushed towards the possible locations where he might appear.

The cultivators of loucheng city who were closer to this area quickly gathered in a short period of time. It was as if they had opened up a large airtight net as they continuously searched for Tang Zhen's traces.

Even the Wanderers and wild cultivators were informed by the surrounding towers that they would receive extremely high rewards if they discovered Tang Zhen's traces and reported it.

Because of Tang Zhen's appearance, the entire war zone was filled with undercurrents. All the forces came onto the stage and wanted to be the first to intercept and kill Tang Zhen to obtain the platform's reward and his storage equipment.

Tang Zhen, who was hurrying on his way, was unaware of this. He also did not know that the foundation stone platform, which had been destroyed by the explosion, would actually appear in such a form!

The most important thing was that the cornerstone platform had actually collected all the information about him after he appeared in this war zone, and then issued a three-star wanted mission!

However, even if Tang Zhen knew about this matter, he would not be too surprised.

Tang Zhen had always held an inquisitive attitude towards this mysterious cornerstone platform. However, he had never been able to figure out the principles behind its operation.

If the tower was the most unique building in this world, then the foundation stone platform's function was even far above the tower.

It could provide limited food to the residents of loucheng through teleportation so that they would not starve to death due to lack of food.

The most important point was that it could provide cultivation resources and the most basic cultivation skills for cultivators, so that their strength wouldn't be limited by the lack of resources and skills during the process of advancement.

For example, the basic function of a building was to provide a place for cultivators to cultivate in peace.

The cornerstone platform was like an online shopping mall that provided long-distance shopping services. It allowed cultivators of loucheng to obtain the items they wanted without leaving the loucheng.

Although this process required a certain fee, it was extremely convenient for the cultivators of Lou Cheng.

Therefore, in the beginning, the cultivators of loucheng needed to hunt monsters around the loucheng as a way to train themselves and improve their strength. After the loucheng was promoted to a certain level, they could be self-sufficient without even taking a step out of the loucheng.

The fundamental reason was nothing more than to provide these cultivators with enough comprehensive cultivation guarantee, so that they could improve their combat effectiveness with peace of mind and greatly increase the number of cultivators in the city, in preparation for the invasion of the foreign world in the future.

Such a magical upgradable building, together with an even more magical cornerstone platform, formed countless cultivation bases in the world of loucheng, providing an endless supply of combat strength for the world of loucheng to invade the other world!

This cornerstone platform was spread all over the towers and had such a magical function. Tang Zhen would never believe that it did not have a monitoring function.

He even had reason to believe that the subtle changes in each tower were actually under the supervision of the cornerstone platform, but no one had noticed it!

Chapter 769 the situation is not good

On the rapidly flying magic carpet, Tang Zhen was controlling the flying magic carpet while thinking.

Although the exact location of the ice plains alien race was still unknown, Tang Zhen already had a specific direction to advance in.

According to the foreign merchants, there was an extremely high-altitude Area on the Western edge of this Warzone. The climate there was harsh, and no one walked there. The icy Plains and snowy regions stretched for thousands of miles, but there were still some foreign races living and reproducing there.

It was extremely likely that the ice plains foreign tribe's city that Tang Zhen was searching for was built in that region. Otherwise, other than this region, only a dangerous place like the mountain range would have such a large ice plains.

Although it was impossible to confirm the specific location of the target, it was related to the life and death of the original world. Tang Zhen absolutely could not miss any possible clues.

Therefore, he had to personally go to the plateau. Even if it was a wasted trip, it would only be a waste of time.

Fortunately, with the destruction of the three eye race, he had already completed half of his goal. The pressure on his body had been reduced by a lot, and even his mood had become much more relaxed.

On the flying magic carpet that was hundreds of meters above the ground, the little monster was cowering by Tang Zhen's legs. From time to time, it would stick its head to the edge of the flying magic carpet, looking down at the mountains and rivers that constantly passed by, and making "Wu Wu" sounds.

No one knew if it was happy or scared, but it always had a silly look on its face. Even on the flying magic carpet, it still couldn't stay idle.

Back then, Tang Zhen had taken in this little fellow on a whim. The main reason was that the little monster's appearance and habits caused Tang Zhen to feel a very close and familiar feeling.

With such a little fellow accompanying him during the long journey, Tang Zhen was not particularly bored.

Moreover, with it being mischievous by the side, Tang Zhen's originally somewhat nervous and depressed mood had also unconsciously become much more relaxed.

The weather was good today. The sun was high in the sky, the clouds were light, and the wind was gentle. It was indeed a pleasant thing to travel on the flying carpet in such weather.

As he passed by a city, Tang Zhen inadvertently saw a few foreign cultivators gathered at the top of the city. They were pointing at him and the flying carpet, as if they were discussing something.

Tang Zhen had seen such a situation more than once. Therefore, he was not surprised. He merely casually glanced around before continuing on his way.

Who would've thought that not long after Tang Zhen passed through the city Tower area, he would actually see three foreign cultivators rising into the sky from a distance and quickly flying towards his position.

Tang Zhen frowned slightly upon seeing this. However, he did not say anything. He merely coldly watched their actions.

The three foreign cultivators were using something similar to a glider. A strange flesh worm was tied to it, which was the biological power of this aircraft.

Every time these non-humankind cultivators kicked these meat sacs, a strong stream of air would be released from the end of these meat sacs, pushing the glider forward rapidly.

After the three foreign cultivators approached Tang Zhen, they didn't approach him. Instead, they kept a distance of tens of meters away from him and constantly sized up Tang Zhen, who was sitting on the magic carpet. Their eyes revealed excitement and vigilance.

At the same time they were observing Tang Zhen, they were also using hand gestures to continuously carry out simple communication. Their eyes even carried a trace of greed.

Tang Zhen's heart jolted when he saw this. He seemed to have thought of something. Just as he was about to approach and ask, the expressions of the three foreign race cultivators changed greatly. They quickly dodged and quickly flew back to the tower they had just been in.

"It's not that easy to escape!"

Tang Zhen coldly snorted when he saw this. He controlled the flying carpet and quickly gave chase.

The flying magic carpet was as fast as lightning and caught up with a foreign cultivator in the blink of an eye.

When the foreign cultivator saw Tang Zhen chasing after him, he was so scared that his soul almost left his body. He desperately kicked the flesh sac worm.

&Nbsp; after suffering from the pain, the meat sac worm continued to spew out strong air currents, increasing its speed by more than two times.

The other two foreign race cultivators were the same. They controlled their gliders and quickly fled from Tang Zhen as if he was some man-eating demon.

The doubt in Tang Zhen's heart became even denser when he saw this. He snorted coldly and shot off the flying carpet. As if he didn't care about the distance between them, he teleported in front of a foreign cultivator in the blink of an eye and stopped him in mid-air.

When the foreign cultivator saw this, he immediately roared in panic. Without any hesitation, he took out a few fruit-like objects from his pocket and threw them at Tang Zhen's head,

That thing exploded in mid-air, shooting out a large area of cotton-like objects, causing Tang Zhen to be surrounded by these things.

Seeing this, the other two cultivators also threw out similar items. Then, one of the foreign cultivators roared and spat out a fireball, which directly hit the cotton-like objects.

With a muffled "boom," the cotton-like objects burst into flames in an instant. The temperature of the flames was extremely high, turning the entire area into a sea of fire.

However, this small trick was unable to harm Tang Zhen. Just as the flames erupted, he had already appeared in front of a foreign race cultivator like a ghost and directly broke his glider.

As the foreign cultivator screamed, she pulled him by the collar and landed on the flying carpet.

Seeing this, the other two cultivators didn't try to save their companion. Instead, they glided away.

How could Tang Zhen allow them to leave? he casually took out a heavy sniper rifle from his storage space and fired two shots in succession, blowing them up in the air!

"Tell me, who are you guys? do you know me?"

Tang Zhen landed the flying magic carpet on the ground and casually threw the foreign race cultivator on the ground. He coldly snorted and asked when he saw the terrified expression on the foreign race cultivator's face.

"I don't know. Don't ask me. I don't know anything!" He said.

When the foreign cultivator saw Tang Zhen asking him, the fear on his face became more and more intense. He kept waving his hands and his body kept rubbing backward.

Looking at his actions, he was clearly waiting for an opportunity to escape.

“If you still don’t tell me the truth, I will make you wish you were dead. You can try!”

As Tang Zhen spoke, he gently pointed at the leg of the foreign cultivator. His mental energy condensed into a sword and directly pierced a bloody hole in the leg of the foreign cultivator!

The foreign cultivator let out a blood-curdling screech as the fear in his eyes intensified. He immediately crawled up from the ground and tried to escape, ignoring the injury on his leg.

“You want to run? if you don’t tell me the truth today, I’ll make sure you can’t walk for the rest of your life!”

Tang Zhen’s expression was extremely gloomy. He once again waved his hand and a force was emitted.

The fleeing alien cultivator let out a blood-curdling screech as blood spurted out from the back of his knee. His legs gave way and he knelt on the ground.

“Are you going to tell me or not? if you don’t tell me, your legs won’t belong to you anymore!”

Tang Zhen looked at the pained and fearful foreign cultivator and spoke with an expressionless face.

“You devil bastard, what do you want? I’ve already told you that I don’t know anything. What do you want me to tell you?”

The foreign cultivator gritted his teeth and refused to answer Tang Zhen’s question.

“You’re looking for death!”

Killing intent flashed in Tang Zhen’s eyes as he coldly said to the foreign race cultivator, “Although I’ve killed countless people, I’ve never killed the innocent. You’re seeking your own death, so you can’t blame me!

However, do you know that you are bringing trouble to your tower by being stubborn?

If I were to go to your tower to investigate, even I don’t know what the result would be!”

The foreign cultivator’s expression changed drastically. Just as he was about to say something, he saw Tang Zhen wave his hand.

A beam of blood-red light flashed across the air, and the cultivator’s head flew up into the sky. After a few rolls in the air, it fell heavily on the grass.

Tang Zhen didn’t even look at the corpse of the foreign race cultivator. Instead, he turned his head to look at the foreign race building not far away. A cold glint faintly flashed in his eyes.

With a flap of its wings, it immediately charged in the direction of the foreign clan’s city.

Chapter 770 the pursuers come

Before Tang Zhen could even approach the foreign clan’s building, the latter had already taken a defensive stance.

Not only was the gate tightly shut, but even the huge city wall was already filled with people.

They controlled the heavy city defense weapons and pointed them in Tang Zhen's direction from a distance. Bows and crossbow-like weapons were nocked.

Even though they had powerful weapons in their hands, these foreign beings were still extremely nervous.

After all, this human cultivator with wings on his back was a genuine two-star King tier. He had terrifying means that they couldn't even imagine. He could destroy a National City with a wave of his hand!

The low-level city that he was in could be razed to the ground by the other party with just a finger!

Therefore, there was a trace of unconcealable fear in their eyes when they looked at Tang Zhen. Their legs could not help but tremble.

Tang Zhen's eyes narrowed when he saw this.

On the surface, it seemed that these foreign races were afraid of him. However, this was the first time he had met these foreign races. Where did their fear come from?

Therefore, the uneasiness in Tang Zhen's heart became increasingly obvious after he saw this scene.

He was now aware that many people knew what he had done in the three-eye tower.

That was why these foreign races, who knew what had happened, looked at him with such a look.

If Tang Zhen's guess was right, there might already be cultivators investigating him. It wouldn't be long before he would be surrounded and blocked by cultivators in this battle area!

This kind of terrible situation was actually what Tang Zhen did not want to see the most.

Because in this way, his journey to the icy plain would be full of twists and turns, and it would greatly slow down his speed.

If there were more King level cultivators involved, then the situation would be even worse. It could even be life-threatening!

Since that was the case, he had to figure out the cause and effect of this matter.

"Listen up, I'm only here to ask you a question. I'll leave after I'm done!"

Tang Zhen swept his eyes over those foreign people who acted as though they were facing a great enemy. He continued, "If you answer me obediently, then you and I will live in peace.

But if you don't know what's good for you, then don't blame me for being ruthless!"

"Now, get your city Lord to come out and see me!"

After Tang Zhen finished speaking, he swept his gaze across the foreign cultivators. His eyes stopped on the foreign cultivator with the highest cultivation base as he waited for the other party's reply.

When the foreign cultivator heard this, he revealed a struggling expression. After hesitating for a moment, he stood up and bowed to Tang Zhen, "This Lord King, I am the city Lord of zuolou city.

I'll answer all your questions, but before that, I'd like to advise you to leave this place as soon as possible. Otherwise, I'm afraid it'll be too late."

Tang Zhen frowned when he heard this. He looked at the non-human city Lord and said, "So, you guys really know me?"

The non-human city Lord nodded and said, "That's right. I'm not the only one who knows Tang Zhen. I'm afraid that all the cultivators in the surrounding area have already heard of your name.

And as far as I know, many powerful cultivators in Loucheng city have formed a cultivator team and are ready to kill you on the way.

That's why I advise you to leave as soon as possible, in case those cultivators chase you here and a battle erupts that will affect my tower.

Please forgive me for my rudeness!"

The non-human city Lord pointed at the two cultivators kneeling on the ground and said, "The three people chasing you just now were purely their own actions and had nothing to do with our city. So I hope you don't take your anger out on the innocent residents.

If you wish to punish them, please do so, we will not complain!"

This city Lord was very sincere, and his words and actions were very polite. He even seemed to be trying to please him.

Through the information on the foundation stone platform, this non-human city Lord already knew of Tang Zhen's cultivation and strength. He even knew that if he were to anger Tang Zhen, the city under his feet would probably be razed to the ground in a short period of time.

Even a powerful national-level city like the three-eye tower collapsed in a moment in front of Tang Zhen!

Therefore, the non-human city Lord didn't have any doubts about Tang Zhen's terrifying strength. The thing he hoped for the most was for Tang Zhen, this God of plague, to leave as soon as possible.

Tang Zhen's brows furrowed together. After musing for a moment, he asked city Lord Lou, "How did you get your hands on my information?"

Tell me the details, or don't blame me for being impolite. I'm sure you know my methods, and it's definitely not as simple as I said!"

Hearing this, the non-human city Lord forced a smile and said to Tang Zhen, "You might not know this, but ever since you destroyed the three-eyed race's Tower, almost all the cornerstone platforms in the entire war zone have issued wanted missions related to you.

Not only does this mission information have your picture, but it also has the fluctuations of your soul's aura. There's also a high reward.

As long as I kill you, I can get 10 million Battle Points and upgrade the level of the cornerstone platform once.

There's also a rumor that you have a storage equipment on you."

When the non-human city Lord said this, he looked at Tang Zhen with a probing look. After seeing that Tang Zhen didn't have any reaction, he continued, "I believe you know the value of storage equipment. In fact, many cultivators joined the ranks of hunting you because they heard this information!"

Tang Zhen was shocked when he heard this. He did not expect the cornerstone platform to actually issue this kind of 'bounty mission'. If that was the case, it would be really difficult for him to move an inch in this battle zone!

Tang Zhen did not have the mood to stay any longer after he swept his gaze over the trembling residents of Lou city. Instead, he quickly turned around and left.

When the foreign kinds saw this, they heaved a long sigh of relief, their faces filled with fear.

Compared to those foreign tribes who were relieved of a heavy burden, Tang Zhen's expression was very serious.

He was very clear that from now on, he would be caught in an endless battle!

If it was really as the foreign city Lord had said, that there was his own soul fluctuation aura on the foundation stone platform, then even if Tang Zhen had changed his appearance, he would still be unable to escape the detection of the spiritual energy of a high-level cultivator.

Therefore, there was no point in changing his appearance. What he had to do next was to be ready for battle at all times and rush to the ice field as fast as possible.

If possible, he would choose a remote and hidden route to advance. This way, he could avoid encountering the foreign cultivators who were trying to intercept him.

As he thought of this, Tang Zhen immediately kept the flying magic carpet. He then put the little monster into his backpack and soared into the sky.

This time, he really increased his speed to the extreme. He could only hear the wind whistling in his ears and the scenery under him flying past quickly. In the blink of an eye, he had already covered a very long distance.

After flying in this manner for around two hours, Tang Zhen felt that his body was a little tired. Hence, he found a hidden spot on the ground and ate some food to replenish his strength.

The little monster bounced around Tang Zhen's side. It seemed to be extremely happy as it captured the insects in the grass.

Tang Zhen teased it for a while before preparing to get up and continue on his way.

However, at this moment, a large group of foreign cultivators suddenly appeared in the distance. They covered the sky and the ground, looking very dense.

Apart from the dozens of Lord-tier cultivators, there were three one-star King tiers leading the group!
