

## Alternate 771

### Chapter 771 battle

After the foreign cultivators appeared, they did not hesitate and pounced straight at Tang Zhen's position!

Tang Zhen's heart trembled when he saw this. He knew that these cultivators were definitely coming for him. Without any hesitation, he directly purchased the paid application options in the application store.

Following the successful payment of the brain Pearl, a terrifyingly large meteorite fell from the sky, smashing straight at the position of the foreign cultivators!

Those foreign race cultivators had originally discovered Tang Zhen's traces and were still excitedly following his path. However, they suddenly discovered the strange change in the sky.

Seeing that the meteorite wrapped in flames was coming straight for them, the cultivators immediately screamed in horror and fled in all directions.

However, the speed of the meteorite was extremely fast. The group of non-human cultivators had just dispersed when the meteorite suddenly fell from the sky and smashed into the ground!

With a loud bang, it seemed as if the entire land was shaking. The surrounding area of several kilometers instantly turned into a sea of fire.

Dozens of foreign cultivators were hit by the shock wave of the meteorite because they dodged slowly. Not only were they instantly killed, but not even a bone was left.

A dozen foreign cultivators flying in the sky were also touched by the meteorites' flames, and their bodies were turned into charcoal in mid-air.

In just this attack, the group of foreign cultivators who were chasing after Tang Zhen had lost nearly one-third of their manpower!

"Tang Zhen, it's Tang Zhen!"

Everyone, look! The human King is there! We can't let him get away!"

A high-level Lord cultivator who was dodging the meteorite attack suddenly noticed Tang Zhen's figure in the distance and immediately shouted out a warning.

As the alarm was sounded, the expressions of the foreign cultivators who were still in shock changed. Their faces were filled with greed as they quickly rushed toward Tang Zhen's position.

if you want to take advantage of me, you must be prepared to lose your life. Come on, let's see who will have the last laugh!

Tang Zhen coldly laughed as he raised the soul destroying saber to meet the attack.

When the foreign tribe cultivators saw that Tang Zhen was advancing instead of retreating, they were all invigorated as they drew their weapons and rushed forward.

Perhaps they were afraid of Tang Zhen's two-star King tier cultivation. Therefore, when they attacked, they formed a standard cultivator battle team with five people in a group.

The three one-star King tiers had even gathered together and used their cultivation techniques the moment they met.

One of the one-star King tiers let out a loud roar, and his body suddenly expanded to more than twice its original size. Dense black scales also appeared on the surface of his body.

His head had also changed, making him look like a lizard. Two huge fangs were revealed from the sides of his lips.

The most eye-catching thing was his pair of sharp claws. At this moment, they had become level with his feet. They were thin and bony, and the nails were as sharp as knives, shining with a metallic luster.

It was obvious that this King-level cultivator's cultivation skill was a special cultivation skill that allowed him to use the monster's power by fusing the monster's blood essence into his body!

The advantage of this skill was not obvious in the early stages, but as the cultivator's level increased, there was a chance to obtain the innate magical ability of this monster ancestor. Its power could not be underestimated!

At this moment, as the king-grade cultivator completed his transformation, his huge body immediately turned into a black shadow and rapidly attacked Tang Zhen. His sharp claws slashed across the air, as if even the air was being cut apart.

The two King level cultivators at the side each held a saber and attacked Tang Zhen from the left and right. The power of their sabers was enough to split mountains and break rocks!

As for the foreign cultivators who were assisting him, they used all kinds of methods. Throwing knives, javelins, and weapons similar to firearms all rushed toward Tang Zhen, leaving no gaps.

Tang Zhen, who was in the center of the group of foreign cultivators, had already taken out his black ball-like flying Daggers. With a wave of his hand, he turned them into nearly a hundred small balls and threw them at the Overlord-grade cultivators.

As countless Flying Daggers shot out in all directions, killing the foreign cultivators and causing them to scream in pain, Tang Zhen held the purple lightning short sword in his left hand and the soul annihilating saber in his right hand as he charged towards the monster-like King-grade cultivator.

"Tang Zhen, go to hell!"

The monster-like King-grade cultivator relied on his astonishing physical defense to meet Tang Zhen's saber. A translucent protective shield suddenly appeared on the surface of his body.

The soul annihilating saber struck the monster cultivator's body heavily, but it only broke the protective shield on the surface of his body. It was blocked after cutting an inch into his flesh, and it was clamped by his muscles, unable to go deep.

The monster laughed hideously. It actually ignored the soul destroying saber in its body and waved its terrifying sharp claws to sweep at Tang Zhen.

Tang Zhen furrowed his brows. He didn't expect that this King level cultivator's physical defense would be so abnormal. No wonder he was so conceited as to use his body to resist the soul destroying blade.

However, this alone was not enough to make him retreat.

At the same time, the two King level cultivators who followed closely behind also launched an attack at Tang Zhen. One of the king level cultivators slashed his saber at Tang Zhen, while his other hand clenched tightly. Suddenly, a purple-red metal powder scattered towards Tang Zhen.

The other King level cultivator laughed evilly and slapped a bulge on his waist. Then, an extremely soft and flexible metal net covered Tang Zhen's face.

"Let's see where you can run to now. Just surrender obediently!"

At the same time as the thin net was spread, a four star horde leader nearby raised a six-inch thick metal cylinder in his hand and pressed the button on it.

A plasma ball the size of a soccer ball shot out from the cylinder. It emitted a terrifying force as it headed straight for Tang Zhen.

Under heavy siege, Tang Zhen suddenly roared and directly pulled out the soul annihilating saber from the monstrous cultivator's body. At the same time, the purple electric short sword stabbed along the wound and directly sank into it!

Without waiting for the monstrous cultivator to scream, Tang Zhen directly grabbed his shoulder and pulled him in front of him.

Suddenly, the purple-red metal powder and the thin metal net fell on the monster cultivator's body. As he screamed in horror, he was hit by the plasma ball.

There was an explosion and sparks flew in all directions. The surface of the monstrous cultivator's body had already been carbonized and he was no longer breathing.

At the same time, the soul annihilating saber in Tang Zhen's hand quickly swept across and ruthlessly slashed at the king level cultivator who had released the metal net.

The blade split his body in half, and his liver and intestines were turned into meat paste by the force of the blade. He screamed and fell to the ground.

The other King level cultivator's saber slashed at Tang Zhen's body, but it was blocked by the protective barrier around his body. Before the king level cultivator could withdraw his saber, an extremely terrifying flame rose from the surface of Tang Zhen's body. It was as if it could even ignite the air!

After feeling this terrifying temperature, the king grade cultivator who released the metal powder had an expression of shock. Just as he was about to retreat, a dark blue ice blade suddenly shot out from Tang Zhen's elbow and directly slashed at his heart.

The king-level cultivator's eyes widened, and his skin immediately turned blue like ice. However, a strange translucent flame burned at his wound, slowly burning his body to ashes!

With Tang Zhen's two star King tier cultivation and his endless methods, even if the other party came prepared, they were still killed by Tang Zhen!

Chapter 772 surround! chase! and intercept

In the blink of an eye, three one-star King tiers who could be said to be overlords of a region had been cleanly killed by Tang Zhen!

When the foreign cultivators who had managed to escape the killing of the magnetic Flying Daggers saw this, they were all scared out of their wits. Without any hesitation, they turned around and fled.

"You want to run? it's too late!"

Tang Zhen, who was flying in the air, shouted angrily. He took out a modified anti-aircraft gun from his storage space and aimed at the foreign cultivators who were fleeing in all directions.

This type of machine gun was close to three meters in length, and its caliber reached more than 20 millimeters. With an ammunition box, its weight was about 350 kilograms. It was an abnormal single-soldier weapon specially designed for Holy Dragon City cultivators with storage equipment!

Its lethality was extremely strong. Even a high-level Lord could not withstand the shot of this kind of bullet. Once hit, one would almost certainly die!

If it were not for the fact that it was too heavy and could not be carried without storage equipment, it would have been common in the entire sacred Dragon Legion.

As Tang Zhen pulled the trigger, a series of muffled gunshots rang out. Bullets that were even thicker than a thumb whizzed out like life-taking arrows, landing on the bodies of these foreign race cultivators one after another.

Under the control of Tang Zhen's abnormal strength, none of these bullets were wasted. All of them landed on the bodies of the foreign race cultivators.

Any foreign cultivator who was hit by the machine gun exploded into a mist of blood. Broken pieces of flesh were scattered everywhere, making the scene extremely bloody.

The remaining foreign cultivators were scared out of their wits when they saw the terrifying power of the machine gun. They fled in all directions with all their might, the fear in their hearts reaching its peak.

However, no matter how fast they were fleeing, how could they compare to Tang Zhen's flying speed?

Tang Zhen carried a huge single-soldier machine gun as his figure flashed continuously in the air. It didn't take long for him to kill all of these fleeing foreign race cultivators!

Tang Zhen slowly landed on the ground after sweeping his eyes across the grassland that was covered with corpses. After picking up a few very special weapons, he continued to move forward on the flying magic carpet.

Having just experienced a massacre, Tang Zhen's body was still trembling slightly due to his excessive excitement. The scene of life and death being decided in a split second earlier had caused even him to feel shaken to the core!

Tang Zhen took out a bottle of wine from his storage space and gulped it down in one go. Then, he threw the bottle away and stood on the flying magic carpet, laughing out loud.

So what if there are thousands of enemies in front of me? no one can stop me! This time, even if I have to turn this battlefield upside down, I must destroy the foreign invaders' city on the icy Plains!

I have a body full of abilities, whoever wants to try, feel free to use their lives as the bet!

The battle intent all over Tang Zhen's body boiled when he thought of this. The purple cloak behind him danced in the wind, giving him an indescribable carefreeness and passion!

The little monster under his feet did not know what was going on. However, when it saw Tang Zhen laughing at the sky, it could not help but join in the fun. It raised its small neck and let out a "Wu Wu" howl. It was childish and ridiculous!

Tang Zhen continued to laugh when he saw this. He completely ignored his own situation as he continued to fly forward on the flying carpet, heading straight for the thousand mile ice field in the distance!

Just as Tang Zhen had imagined, his current route had been completely grasped by the foreign cultivators. By relying on the cornerstone platform and some special communication means, they could obtain information about Tang Zhen in the shortest time possible.

Not long after Tang Zhen had killed the first group of people blocking the way, the news had already reached the ears of the foreign race cultivators.

Three one-star Kings, dozens of advanced Lords, and hundreds of ordinary cultivators were all killed by Tang Zhen in just a few minutes!

Countless cultivators were shocked when they heard about Tang Zhen's achievement. They became even more afraid of Tang Zhen.

They had even begun to hesitate as to whether they should continue to intercept and chase after Tang Zhen.

When a murderer killed someone, they had to be prepared to be killed in return. The foreign cultivators who were killed by Tang Zhen were the best examples.

No matter how conceited these pursuers were, they did not dare to guarantee that their existence would not be on the list of enemies that Tang Zhen would counter-kill next!

As for those foreign tribe cultivators who were extremely confident in their own strength, they were not affected by this news. They were only surprised by Tang Zhen's super strong combat power. At the same time, they also began to make more preparations.

Those foreign invaders that were coincidentally in Tang Zhen's path of advancement had also moved upon hearing the news. They had all sent out their strongest formation to intercept Tang Zhen.

These non-human loucheng deeply believed in the concept of ants biting an elephant to death. They firmly believed that no matter how strong Tang Zhen was, he would not be able to stop the siege of countless cultivators in the loucheng. He was destined to be killed by them!

.....

Tang Zhen rode on the flying carpet for another few hundred miles before he saw a black mass of foreign races. The moment they saw Tang Zhen appear, they immediately pounced over.

In addition to the alien cultivators on the ground, there was also a group of cultivators riding on a vehicle-like vehicle. They were pulled by a dozen flying monsters with ropes and were flying toward Tang Zhen in the air.

There were more than 200 similar air chariots, which covered most of the sky. It was a spectacular scene.

A cultivator wearing demonic armor on the leading air war chariot looked at Tang Zhen and let out a thunderous voice.

“Tang Zhen, remember this. The tower that killed you is called Blue Moon Tower!”

As soon as the foreign cultivator’s voice fell, a metal pipe as thick as a bowl’s mouth poked out from the air chariots. Then, countless black featherless arrows rained down on Tang Zhen.

Under the sunlight, the surface of these arrows actually flashed with a colorful luster. Clearly, they had been fed with poison.

If there were no accidents, these poisons would definitely kill the victim the moment they saw blood. Once they were injured, they would not have the time to take the antidote!

Upon seeing the dark cloud-like arrows flying towards him, Tang Zhen immediately formed a protective barrier around him. At the same time, he controlled the flying carpet to rapidly Dodge.

At the same time, Tang Zhen took out his single unit machine gun once again and fired continuously at the air tanks.

With the muffled sound of gunfire, the air tanks were hit one after another, and the cultivators sitting inside were also turned into mincemeat, leaving trails of blood in the air!

The bodies of the cultivators and the flying monsters that were dragging the sky chariots fell to the ground and turned into a pile of meat.

At this moment, Tang Zhen suddenly discovered that the protective shield was in imminent danger. It turned out that the poison on these arrows actually had the effect of corroding the energy protective shield!

Tang Zhen did not dare to be careless. He once again raised a new protective barrier and continued to move in the air, shooting down those air combat vehicles one by one.

Just as Tang Zhen shot down an aerial combat vehicle and shattered the loucheng cultivators inside, the loucheng cultivators on the ground also launched their attacks. Fist-sized metal balls that were thrown into the air by the mechanical force also came smashing towards him from all directions!

Under such an intense attack, the protective barrier that had just been propped up shattered once again. A few metal balls nearly smashed onto Tang Zhen’s body.

Tang Zhen was just about to activate the protective barrier again when he saw this. However, he suddenly felt a wave of killing intent assault him. He did not hesitate to pull the little monster and enter The Dark World with a flash.

At this moment, a Black Dagger suddenly pierced at the position where Tang Zhen was previously at. A faintly discernible figure was also revealed as he involuntarily let out a soft “huh” from his mouth.

Chapter 773 the arrival of powerful enemies

This vague figure had been there for a long time, but it had been hiding all this time, looking for an opportunity to kill him in one blow.

In the end, Tang Zhen had already dodged his sneak attack the instant he launched it. Only a cold smile was left in the air.

By right, if the assassin had missed his first attack, he should have gone into hiding again and looked for the next opportunity to attack.

However, that assassin felt a life-threatening threat. He knew that if he was the slightest bit careless, he would suffer a fatal attack from Tang Zhen.

At this moment, the identities of the two people had already been reversed. The Hunter had become Tang Zhen, while the assassin had become the prey!

Realizing this, the assassin didn't dare to act rashly. At the same time, he waved his hand to signal the foreign cultivators to stop their attacks.

Then, the assassin lifted his hood, revealing an old and ugly face.

His face was covered in strange tattoos, fangs and teeth, and his eyes were as black as ink, with a cold glint in them.

At first glance, one would feel that this head was like that of an evil ghost, causing one to shiver.

The strange thing was that only the Assassin's head appeared, and his body was nowhere to be seen. He was floating alone on the flying carpet.

However, from the way he lifted his hood and revealed his head, it was obvious that the cloak he was wearing covered his body and had the special function of blocking spiritual perception!

In fact, if Tang Zhen's map did not show the Assassin's trail, Tang Zhen would not have been able to discover the Assassin's existence before he was stabbed by the dagger!

From the aura he was exuding, he was also a King-level cultivator!

At this moment, the assassin was looking at the spot where Tang Zhen had disappeared. A cold glint flashed in his eyes, but it also carried a trace of doubt.

He was extremely curious in his heart. He was trying to guess what method Tang Zhen had used to actually instantly disappear without a trace.

An invisible enemy was the scariest, especially since he was used to hiding in the dark, so he had a deeper understanding of it.

However, this assassin did not dare to act rashly at this moment. This was because he knew that Tang Zhen was hiding in the dark and observing him. Once he revealed a flaw, he would definitely suffer a sharp attack from Tang Zhen!

The assassin rolled his eyes and sneered. He then said in a shrill voice, "Sir Tang Zhen is quite alert to actually avoid this old man's killing move. As expected of a cross-realm expert who destroyed a national-level city single-handedly. I'm really impressed!

After the old head said this, it sneered and said coldly, "Your Excellency, you've acted so wantonly in my Warzone and even used despicable means to destroy a national-level city. Do you really think that there's no one in my spirit battle zone?"

However, with the appearance of the three-star Bounty mission, no matter how strong you are, you will not be able to leave this battle zone alive. Otherwise, it will be a great humiliation to all cultivators in the spirit battle zone!"

When that assassin said up to this point, he still did not see any trace of Tang Zhen. He could not help but frown slightly as he continued to ridicule, "Hiding your head but showing your tail, it seems that you are only so-so, do you dare to show yourself and confront me?"

"You still don't dare come out? Good, good, good!"

"Let's see how long you can hide. Do you know that there are countless powerful cultivators waiting for you in the spirit Warzone?"

You won't be able to escape death even if you go to heaven or hell!"

The Assassin's voice had just faded when he saw Tang Zhen's head suddenly appear in front of him. It was also suspended in the air like him, but there was no trace of his body.

"Who said I was going to hide?"

Tang Zhen coldly laughed. He similarly used a mocking gaze to look at the other party.

The old Assassin's face was filled with horror. Just as he was about to attack, he suddenly felt a pain in his heart and his body began to tremble violently.

At the same time, an arm suddenly appeared between the two of them.

It was Tang Zhen's arm. At this moment, it had deeply pierced into the Assassin's body.

What made people feel strange was that there were no scars on the surface of the Assassin's body. It was as if Tang Zhen's arm had originally grown inside his body!

you can freely switch between illusion and reality. Your Excellency is really powerful!

When the assassin saw this, his face revealed a look of envy and enlightenment. Then, he coughed out a mouthful of blood. His face turned pale and his body suddenly retreated, as if he was planning to escape from this place!

This old fellow was quite formidable. He was actually still able to continue moving even after his heart was crushed by Tang Zhen!

However, how could Tang Zhen allow his enemy to escape? therefore, the old man only retreated a few meters before he was pulled back by Tang Zhen. At the same time, the purple lightning short sword also directly slashed across the old man's neck.

Blood spurted out, and the assassin let out a "giggle" sound. His eyes were filled with unwillingness.

Then, a pungent smoke rose from his body. His legs could no longer support his body, and he fell limply on the flying carpet.

Tang Zhen held his breath. He pulled off the cloak that covered the Assassin's body, revealing a stooped corpse that was wearing leather armor and was continuously rotting.

This Assassin's methods were extremely sinister. Even after he was killed, he was still thinking of ways to scheme against the enemy, releasing poisonous smoke to cause trouble for the enemy.

Of course, there was another possibility. The assassin didn't want anyone else to get his body. So, after he died, the poison in his body took effect and instantly rotted the body into pus!

Tang Zhen's face was filled with disgust. He lifted his leg and kicked the Assassin's corpse away. Then, he once again activated the protective barrier and rushed towards the battle formation formed by the foreign race cultivators.

At the same time, the black metal ball made of magnetic Flying Daggers reappeared in his hand and he threw it directly at the foreign cultivators.

The metal ball exploded in mid-air, and countless black streams of light shot out, stirring up a bloody mist. Screams of pain were also heard.

Seeing this, the leading foreign cultivator immediately blew the bugle in his hand, producing a rhythmic melody.

After hearing the horn, the air tanks quickly gathered together and launched another attack at Tang Zhen.

The black arrow, which had been dipped in poison, shot at him again, but this time, it was even faster than before!

In addition to these arrows, the foreign race cultivators were also constantly throwing black metal javelins. The power of these javelins was enough to penetrate hard rock, and they continuously smashed into the protective barrier that Tang Zhen had erected.

Upon seeing this, Tang Zhen once again raised his cannon and began to rapidly fire at the air combat vehicles that had gathered together, shooting them down one by one.

However, at the same time as he attacked, Tang Zhen also had a feeling in his heart. That was that he truly lacked a powerful killing ability in his hands.

In the face of such a large group of cultivators who didn't care about the consequences and went all out to attack him, his killing efficiency was clearly somewhat lacking.

Of course, with his current abilities, it was more than enough to deal with these foreign cultivators.

Just as the two sides were engaged in a fierce battle, Tang Zhen was switching the map perspective when a group of cultivators riding on flying monsters rushed towards his position.

Looking at their cultivation auras, the weakest of them was a three star horde leader. There were even ten King level cultivators among them!

If there were only two or three king level cultivators, Tang Zhen would be able to deal with them. However, there were ten King level cultivators in this group of cultivators. Who knew where they came from?

Of course, one thing was undeniable. The overall strength of the cultivators in Lou Cheng was indeed stronger than that in the wilderness. Therefore, the number of King level cultivators here was obviously much higher.

Of course, this didn't mean that King level cultivators could be seen everywhere. This time, there were so many King level cultivators. It was obvious that they had all gathered because of Tang Zhen's wanted mission!

Tang Zhen did not dare to be overconfident when he saw this. He no longer fought with those air war chariots. Instead, he kept his flying magic carpet and rapidly flew into the distance!

Chapter 774 relentless pursuit

This group of foreign cultivators came with a menacing momentum. The king level cultivators in the lead even teleported away immediately, afraid that Tang Zhen would escape again.

It didn't take long before their figures were already in sight!

However, Tang Zhen, who had a map view, had already discovered their existence before they even arrived. Moreover, he had directly retreated far away!

As a result, these foreign cultivators who had accumulated their momentum and were ready to fight Tang Zhen as soon as they came up, all pounced on empty air.

When they arrived at the place where Tang Zhen and the cangyue tower had fought, all they saw was a devastated battlefield. The ground was covered in broken corpses and when they looked up, the originally green grass had actually changed color because of the blood.

The foreign cultivators' eyes narrowed at the sight of this, and their faces darkened.

Although he was used to seeing life and death, he still felt uncomfortable seeing so many corpses.

One of the king level cultivators glanced at the Assassin's corpse and shook his head. He sighed and said, "old ghost is a stubborn old man. I told him not to act rashly, but he didn't listen. Now, he's dead!"

The other foreign cultivators had different expressions, but most of them were indignant. It was obvious that they were familiar with the assassin.

“Where is Tang Zhen? has he already run away?”

A burly man who was nearly three meters tall and wearing heavy armor roared. His voice was like muffled Thunder, and with his huge body, he looked like a giant war god!

When the leader of the cultivators in blue Moon Tower heard this, he immediately stood up and said, “This subordinate is incompetent and did not stop Tang Zhen.

After he discovered the various King tiers, he had already fled in that direction!”

After speaking, the leader pointed in the direction that Tang Zhen had left in, and pleaded loudly: dear Kings, please take us with you to avenge our dead brothers!

The king level cultivators all had weird expressions on their faces. No one knew what they were thinking.

you’re really a piece of trash. Nearly 2000 cultivators attacked him at the same time, but you still couldn’t hold him back. You’ve really disappointed me!

A long-robed King grade Holy master snorted coldly and reprimanded the leader of the cultivators.

When the leader of the cultivators heard this, he looked ashamed, but he did not explain anything.

No matter what, it was an undeniable fact that Tang Zhen had escaped. Even if he felt wronged, he did not dare to explain in front of these King level cultivators. Otherwise, the consequences would be unimaginable.

After all, the ten King level cultivators in front of him were the most influential people in their Tower City Alliance. With their amazing strength, they didn’t need any reason to kill him!

Different from the wilderness Warzone, the buildings in the fallen spirit Warzone would form alliances either voluntarily or by force.

The size of the alliances was different. The smaller alliances only had a few or a dozen towers, while the larger forces had dozens or even hundreds of towers, and they were extremely powerful.

Blue Moon City was a medium-sized City Alliance, which included dozens of ordinary buildings, a high-grade city above level 6, and a national-level city!

This Tower City Alliance was extremely concerned about killing Tang Zhen. That was why they had intercepted Tang Zhen twice in a row in their controlled area!

Unfortunately, the two interception attempts had failed completely. Putting aside the ordinary cultivators, they had lost four King level cultivators!

Even their medium-sized Tower City Alliance couldn’t bear such a tragic loss. Therefore, these King level cultivators began to worry about whether they should continue to pursue Tang Zhen. They were afraid that they would lose more King level cultivators.

Once they lost too many high-level combatants and became weak, they would definitely attract the covetous eyes of the surrounding loucheng alliances, and they might even be invaded on a large scale!

If things really developed to that stage, it would definitely not be worth it.

It was precisely because they had this apprehension in their hearts that they had subconsciously stopped here. Otherwise, they would not have stopped earlier. Instead, they would have continued to chase in the direction that Tang Zhen had fled in.

“Do you guys think we should continue chasing?”

A King with brown skin and the appearance of a long turtle asked his companion.

of course we have to chase him. He killed so many of our Alliance’s cultivators. We can’t let him go so easily!

Hearing this, the huge King tier cultivator roared with a muffled Thunder-like voice. He glanced at the crowd and revealed a trace of hatred, “I don’t care what you think, I won’t give up!

This had nothing to do with the reward. He just wanted to let this cultivator know that he had to pay a heavy price for killing Lou Cheng!

You guys continue to dawdle, I’ll take my leave first!”

His voice had just sounded when he was already taking large strides in the direction that Tang Zhen had disappeared in. Every step he took covered a distance of tens of meters. His speed was shockingly fast.

When the other King level cultivators saw this, they smiled bitterly and looked troubled. They gently shook their heads and led their men to chase after him.

The leader of the cultivators from Blue Moon Tower clenched his teeth and shouted to the cultivators behind him, “ we can’t let our brothers die in vain. Everyone, follow the ten kings and continue to hunt down that cultivator who has crossed the boundary. We’ll take revenge for our dead brothers!

The pained foreign cultivators immediately roared in unison upon hearing this. They then jumped onto the air chariots and chased after the enemy.

At this moment, the group of foreign cultivators covered the sky and the ground, charging forward with soaring killing intent. The monsters along the way were so frightened that they dodged, afraid that they would be killed by the Furious foreign cultivators!

Just as these foreign tribe cultivators were charging over, Tang Zhen had already flown over a hundred kilometers away. At the same time, he was constantly switching the perspective of the map to observe the actions of those foreign tribe cultivators.

At this moment, the chill in Tang Zhen’s eyes became increasingly dense when he saw the foreign tribe cultivators charging over in a large scale. He began to ponder on how to kill these enemies.

Although he had mastered many skills and weapons, other than the nuclear bomb, which he couldn’t use easily, the remaining weapons were not weak. They were still not enough to deal damage to a group of King level cultivators.

The only ones that could be used were those expensive but lethal one-time payment applications.

Tang Zhen did not care about the high usage fee. It was merely some brains. Although the price was a little high, Tang Zhen, as the Lord of a city, could still easily pay for it!

When he thought of this, Tang Zhen no longer hesitated. He directly chose the combined meteorite attack from the application store, which could also be called meteor shower!

However, Tang Zhen had to pay a total of 5 million brain beads for this powerful attack!

After the payment of the brain Pearl was completed, the color of the entire sky behind Tang Zhen suddenly changed. The clouds were red as if they were dyed in blood. After that, countless meteors the size of human heads fell from the sky, covering the sky and earth as they smashed towards the foreign tribe cultivators!

Chapter 775 killing the pursuers again

The alien cultivators who were about a hundred kilometers away also noticed the change in the sky.

Seeing the countless meteorites coming at them, the foreign cultivators immediately fell into chaos. They either covered their heads and fled like rats, or put up protective shields and quickly moved to a safe place.

Once they were hit by the meteorites falling from the sky, even if they were made of steel, they would probably fall apart in an instant!

In the face of this natural disaster-like scene, the king level cultivators were shocked. At the same time, their fear of Tang Zhen increased.

He recalled the news that he had heard back then. When the first group of cultivators in the building city were chasing after Tang Zhen, there was once a meteorite that fell from the sky and smashed into the group.

At first, these King level cultivators thought that it was an accident. They thought that it was just a coincidence that the meteorite fell.

In some special areas of the spirit battle zone, meteorites would fall frequently all year round. These areas were full of shattered meteorites, some of which even contained Special Metals that could be used to forge magic weapons and equipment.

Some Wanderers and wild cultivators often risked being killed by meteorites to collect these special meteorites and sell them at a high price, making a lot of profits.

However, such rare coincidences couldn't happen in succession, especially when he was tracking a cultivator who had crossed the border.

Therefore, now that they saw a similar scene, how could the foreign cultivators not guess that these meteorites were made by Tang Zhen!

The king level cultivators who realized this were extremely puzzled. Tang Zhen was only a two star King tier. Even if his strength wasn't weak and could be called an Overlord, he shouldn't be able to do this?

There were indeed cultivators in Loucheng who could cause changes in the world and shake the earth and mountains with their movements, but the strength of such cultivators was by no means comparable to that of ordinary King level cultivators. They were all Super Masters who had understood the true meaning of the laws!

In other words, this kind of cultivator had already surpassed the king tier and stepped into a higher level.

If Tang Zhen was really such a super expert, he would not be the slightest bit afraid even if there were ten times more people chasing after him. Why would he choose to flee at this moment?

In that case, the only explanation was that Tang Zhen had a special technique that could activate the power of laws. This was why he was able to summon the meteorites to attack!

For King level cultivators who hadn't mastered the power of laws, this technique was heaven-defying. It was a piece of cake for them to be invincible at the same level, and it wasn't impossible for them to fight above their level!

After thinking of this, the hearts of these King grade cultivators couldn't help but become fiery. Originally, they were only carrying a perfunctory attitude in hunting down Tang Zhen. However, at this moment, they were truly displaying their true abilities.

If he could obtain such a technique, he would definitely be able to increase his strength by a large margin!

Although these meteorites were powerful, they weren't impossible to Dodge for King level cultivators.

However, the Lords who weren't King class were unlucky. Even though they were fast, they couldn't avoid being hit. They were covered in dirt and injuries.

As for the cultivators who had yet to reach the Lord-tier, they had no way to resist this natural disaster-like attack. They were smashed into meat paste one after another, and their remains were ignited by the terrifying flames on the meteors. In a short while, they were turned into a pile of charcoal!

The foreign cultivators who had been led by their leader all cried out in pain as they were hit by meteorites of various sizes with the air war chariots they were riding. They were all killed in an instant!

The eyes of the leader of the cultivators were blood red. He shouted Tang Zhen's name before he died. A meteorite smashed into his head, and half of his body was smashed into meat paste!

The meteorite attack came and went quickly, but in less than a dozen seconds, more than sixty percent of the pursuing foreign cultivators were killed or injured!

This kind of terrifying killing effect was definitely ranked among the killing techniques that Tang Zhen could grasp. It was just that the consumption was too great and he would not easily use it!

At this moment, the foreign cultivators who had dodged the attack of the meteorites but were in a sorry state had extremely ugly expressions. They glanced at the ground that was riddled with holes and no longer paid attention to the burning corpses. They continued to chase in the direction that Tang Zhen had flown in like crazy.

The cultivators of Loucheng city were really angry when they saw their close friends and confidants die like this. Even the king level cultivators were furious!

Now that things had come to this, they could not let Tang Zhen off no matter what. Otherwise, how could they feel at ease?

However, these foreign race cultivators were destined to be disappointed. This was because after Tang Zhen released the fiery meteor shower, he didn't even take a look at it before he once again sped in the direction of the thousand li ice field!

However, he didn't get very far before he heard the sound of something breaking through the air behind him. In the distance, a tall King of the non-human race was running toward him while roaring and throwing rocks the size of a human head at him!

Those rocks carried a whistling wind as they continuously passed by Tang Zhen's side. There were a few times when they almost smashed into Tang Zhen's body.

Although Tang Zhen's strength could easily crush these stones into powder, he didn't dare to touch them after being thrown out by this huge cultivator.

With the power of these stones, even an Armored Infantry vehicle could easily penetrate it!

If they were to fight head on, even Tang Zhen would find it somewhat unbearable.

Although these rocks couldn't hurt Tang Zhen, he still felt a little annoyed with such an enemy behind him. After another rock flew past, he turned around and gave the king level cultivator a vicious blow!

Miniature death ray weapon!

This was one of the skills that Tang Zhen had mastered. It had the longest cooldown time, but it was also extremely powerful.

A dazzling ray of light shot out from Tang Zhen's finger. The miniature death ray that emitted a terrifyingly high temperature arrived in an instant and landed on the body of the foreign King.

The king level cultivator couldn't Dodge in time and was hit by the miniature death ray.

A furious roar was heard. One of the non-human King's Arms had been burned off. He was half-kneeling on the ground as he gritted his teeth and looked at Tang Zhen in the sky.

"You're lucky. If you continue to pester me, I'll definitely kill you!"

Tang Zhen coldly swept his eyes at the foreign King. His face was filled with disdain as he turned around and continued to fly.

The king-level cultivator stood up from the ground. His huge body was trembling because of the pain and anger.

Seeing Tang Zhen's figure disappear, the king level cultivator suddenly raised his head and let out a roar of unwillingness.

After the roar, the king level cultivator's huge body tilted slightly and he fainted on the ground.

It was obvious that the attack just now did not just take away one of his arms!

Chapter 776 The alien cultivators "technological weapons (1)

On the flying magic carpet, Tang Zhen was eating big mouthfuls of food to replenish the energy he had just used up.

Even Tang Zhen felt that he was unable to endure such a high-intensity battle. Although relying on eating was the lowest method, Tang Zhen would definitely not let it go as long as it was effective.

For the first time, he also had a large number of items in his storage space that could replenish his stamina and spirit, which he could Use at any time.

However, these items were only suitable for critical moments. Even if he had reserves in his original world, Tang Zhen would not waste them easily. Moreover, he had no use for them at the moment.

While eating, Tang Zhen was deep in thought.

Based on Tang Zhen's current flying speed, if there were no accidents, those foreign race cultivators could only eat dust behind his butt.

However, according to his calculations, this place was still very far from the thousand-mile icy plain, and it would still take some time to reach it.

In this period of time, who knew how many more battles he would have to go through?

After all, Tang Zhen had already been wanted by the entire battle region on the cornerstone platform. Countless cultivators in loucheng wanted to kill him and obtain the tempting battle merit reward as well as the legendary storage equipment.

Tang Zhen didn't believe that his killing would scare off all his enemies. This was because there were too many greedy and overconfident people. There were even more powerful cultivators. After killing one wave, another wave would soon come!

As a result, after Tang Zhen ran for several hundred kilometers, he was once again intercepted by powerful enemies!

However, the interception this time around occurred without Tang Zhen noticing it. He only realized that he had been ambushed after he collided with it.

Following Tang Zhen's collision, the originally empty sky suddenly turned into a several meter large, hexagonal energy field that formed a translucent shield. It was like a barrier that reached the sky and blocked the entire sky.

After being struck by Tang Zhen, this giant energy barrier that was similar to a protective shield trembled for a moment. It was like a surging wave that flickered continuously before it disappeared into the air.

It seemed to have disappeared, but in fact, it was still in the same place. As long as any living creature touched it, it would still appear to block it!

Tang Zhen's heart skipped a beat when he collided with the energy barrier. He relied on his instinctive reaction and teleported a hundred meters away.

At the same time he teleported, hundreds of foreign cultivators wearing cloaks with constantly changing patterns on the originally empty grass suddenly jumped up from the ground. They knelt on one knee, raised the weapons in their hands, aimed at Tang Zhen, and launched an attack.

The weapons in their hands were similar to the firearms in the original world, but they were faster and more lethal. They were similar to weapons like railguns.

The penetrative power of this weapon was extremely strong. It could penetrate through ordinary concrete walls easily. When it hit the physical body, it would definitely cause extremely terrifying damage!

At this moment, the sky was filled with the bullets fired by these weapons. As they crisscrossed, even the air was left with faint traces of impact compression!

In addition to these firearms, the equipment on these foreign cultivators was also full of technological aura. Whether it was the holographic cloak that could provide invisibility or the modular battle armor and helmets on their bodies, they were all like replicas of the Holy Dragon City Army!

Tang Zhen was slightly stunned when he saw these foreign race cultivators equipped with technological weapons. He immediately regained his senses and continuously dodged the bullets that were shot at him.

At the same time when these foreign race cultivators were shooting at Tang Zhen, a strangely shaped war chariot suddenly rushed out from a cave not far away. A special tube-shaped weapon was set up on top of it.

This kind of device had been tracking Tang Zhen and trying to lock onto him. However, Tang Zhen's speed was too fast. Hence, it was impossible to successfully capture his trajectory.

The driver of the vehicle seemed to be a little anxious. In the end, when Tang Zhen's speed was slightly reduced and he took out his weapon to counterattack, he suddenly activated the weapon device on the vehicle.

At the empty space in front of the tube-shaped weapon, a phenomenon of air contraction and collapse suddenly appeared. Then, the collapsed air vortex rapidly advanced forward, swallowing all the items in its path!

It turned out that this weapon actually had a terrifying absorption effect similar to a miniature black hole!

Tang Zhen did not dare to be the slightest bit careless when he saw this weapon that was similar to a miniature black hole coming his way. He dragged the huge single soldier machine gun and teleported to an empty ground at the side.

If he were to stop in the air at this moment, he would undoubtedly be a living target. Therefore, Tang Zhen simply landed on the ground.

The moment he landed on the ground, more than 20 alien cultivators in mecha-like vehicles suddenly jumped out of the empty ground. They operated their five-meter-tall mechas and charged toward him while waving their humongous battle swords.

In the process of charging towards Tang Zhen, beams of light shot out from the outer shells of these mecha cultivators. They quickly locked onto the area around Tang Zhen and moved along with his body.

By relying on this kind of light ray to lock on and track, miniature missiles with blue light shadows continuously shot toward Tang Zhen. They exploded after coming into contact with his protective shield and easily destroyed it!

The series of attacks from the enemy caused Tang Zhen to be slightly dazed. However, he quickly recovered. With a loud shout, he flew into the air and threw out countless high-explosive bombs like a heavenly maiden scattering flowers!

This was a special design by the Holy Dragon city's researchers. It was a powerful bomb that relied on spiritual energy to detonate. It relied on fragments and a special metal ball to kill armored targets. Even armored vehicles could not withstand the destruction of this bomb!

As soon as these bombs exploded, they immediately set off a storm of death. The alien cultivators on the ground who were shooting with guns fell to the ground one after another. Even a few mecha cultivators who pounced on Tang Zhen were affected by the bombs and staggered to the ground.

Tang Zhen's figure flashed as he rushed forward. He did not care if the mecha cultivators were Dead or Alive. He directly grabbed two complete mechas and quickly threw them into the storage space.

If the cultivator in the mecha was not dead, he would not have been able to escape death after being stored in the storage space!

After putting away the two mechas, Tang Zhen's figure did not hesitate and once again rushed to the group of alien cultivators who were shooting with guns. He grabbed two of them along with their weapons and directly threw them into the storage space.

As for the vehicle that could launch a blackhole-like weapon, it began to attack Tang Zhen again. At the same time, Tang Zhen had a premonition that this group of enemies might have more powerful weapons and were currently in a state of waiting to be launched.

Tang Zhen could teleport away when the other party used a more powerful weapon, but there was still a small monster in his backpack. If he brought it along during the teleportation process, Tang Zhen would only get a corpse that looked like a dead dog!

Since he could not teleport, he might even suffer a terrifying attack if he stopped. In this case, Tang Zhen could only choose to escape from this place.

Moreover, he had already seen through the map that the king level cultivators were not far from this place. If these two forces cooperated, no matter how powerful Tang Zhen was, he would have to pay a price!

Since that was the case, there was no need to hesitate!

When he thought of this, Tang Zhen completely ignored the protests of the little monster and directly entered The Dark World. He swiftly bypassed the energy barrier and continued to advance into the distance.

As for the little monster that was screaming wildly because of The Dark World Energy, Tang Zhen had already stuffed a leaf from the mother tree into his mouth. The leaf contained a large amount of life energy.

After discovering that eating this kind of leaf could resist the corrosion of The Dark World Energy, the little monster directly became a vegetarian and chewed the leaf to pieces!

However, the sense of danger in Tang Zhen's heart did not weaken. This was because the [ intelligent digitized combat interface ] had been constantly reminding him that there was a tracking signal that had been locking onto him. Even if he was in the dark World, he was still unable to escape from the tracking signal!

In this case, there was not much meaning in staying in the dark World. Therefore, Tang Zhen simply came out of the dark World. He dodged the attacks of several aircraft behind him while continuing to escape rapidly!

Chapter 777 shooting down the enemy mecha (1)

The cultivators in the tower City had high-tech weapons and were quite familiar with them. It was obvious that it was not their first time using them.

However, Tang Zhen wasn't surprised by this. He didn't even need to guess to know that these technological weapons were definitely spoils of war from the invasion of the foreign world. They were used by the foreign race cultivators because they were quite powerful.

In fact, in the hands of foreign merchants, there were often all kinds of strange technological items from unknown foreign worlds, most of which came from wild buildings and city ruins.

However, most of these items had been scrapped and basically had no use.

The loucheng natives didn't like these kinds of items. If they saw them occasionally, they would basically ignore them, because there were many unknown substances that could kill people.

Although the natives of Lou city did not value these items, the residents of Holy Dragon City, especially the researchers, valued them very much!

The Holy Dragon City had even set up a Department to collect all kinds of strange items, which were then handed over to scientific researchers to identify and pick out the useful items, and then crack the technology behind them.

After a long time, not to mention a lot of unexpected gains, some of the technology had even been put into use, bringing a lot of convenience to life.

To be able to turn waste into treasure was indeed something worth being happy about. Those researchers also felt a special sense of achievement.

However, in the entire world of loucheng, probably only the Holy Dragon City liked to collect such "junk", and they never got tired of it!

As for the foreign cultivators, they either didn't know how to use these technological items or threw them away after they broke them. Most of them didn't believe in these technological items at all. Instead, they believed in their own cultivation and the swords in their hands!

Asking them to repair and manufacture these technological items was no different from a joke!

Of course, nothing was absolute. There were still some races in the world of loucheng that were quite studious. For example, the race of the Goblin Lutner was very interested in this kind of technological item.

However, some of them were seriously biased toward certain subjects, and the things they created were extremely strange. It was unknown what influence they had, but they were all full of magical styles!

Back to the main topic. At this moment, there were three streamlined silver-white front-sweeping wing aircraft that were chasing after Tang Zhen. They were light and Swift.

The flying speed of this kind of aircraft was extremely fast. It flew silently in the air and easily caught up with Tang Zhen.

As a last resort, Tang Zhen could only return to the dark World.

However, even though Tang Zhen was in the dark World at this moment, the surveillance equipment of the aircraft still locked onto Tang Zhen. However, it was unable to attack him.

Although The Dark World was attached to the surface world, they were two completely different dimensions. It was not a pure three-dimensional space, but it had not reached the level of a four-dimensional space. Strictly speaking, it could only be regarded as a three-dimensional space!

In this space that was only suitable for the existence of energy bodies, Tang Zhen could easily penetrate the wall and see through the energy nodes. At the same time, he could launch an attack on the three-dimensional space that was lower than The Dark World dimension.

The enemy in the three-dimensional space, on the other hand, was at his wit's end. They could only lock onto him, but they could not see or touch him, because the place where he was was empty!

The three alien cultivators who were piloting the aircraft were also at a loss. After trying to attack twice, they completely gave up on the idea and followed closely behind Tang Zhen, speeding into the distance.

Tang Zhen involuntarily frowned after discovering this situation.

The Dark World was different from the surface world. Tang Zhen did not belong to this world. If he continued to stay in this space, he would definitely suffer great harm. Therefore, he had to leave this place in an hour at most.

The little monster that was curled up in his backpack could not withstand the corrosion of The Dark World Energy for such a long time. Its smooth and shiny fur had begun to turn yellow and wither.

This was even after Tang Zhen had fed it a leaf from the mother tree. That was why it had persisted for such a long time. Otherwise, this little fellow would have long turned into dust!

Tang Zhen's eyes swept over the three flying devices before he suddenly stopped on the spot and closed his eyes.

The moment he stopped, the three aircraft also stopped in mid-air and surrounded him.

Even if he couldn't attack, he had to tie Tang Zhen up and let the cultivator who came later find a way to capture and kill Tang Zhen!

At this moment, Tang Zhen, who had stopped in the dark World, suddenly had a dim light flash on top of his head. Soon after, a small person made of pure energy slowly crawled out from the Baihui acupoint on Tang Zhen's head.

That little person's eyes were exactly the same as Tang Zhen's. However, he had a pleased expression at this moment, giving off a feeling like a fish in water.

It was just as Tang Zhen had predicted. This dark world was a world where energy bodies existed. This was because energy bodies would not suffer from any rejection or corrosion when they were within it. In fact, there was even a faint comfortable feeling of being able to move freely in the world!

At this moment, the tiny energy figure bent its knees and leaped, quickly pouncing toward an aircraft. In the blink of an eye, it was attached to the surface of the aircraft.

As for the three foreign race cultivators who were piloting the aircraft, they did not notice anything unusual at all. This was because, according to the display on the operation interface, Tang Zhen was still at his original position and had not moved an inch.

Therefore, the tiny energy person did not have to worry about being discovered. It easily climbed up the hovering aircraft and then went through a gap that did not seem to exist on the surface of the aircraft, heading straight for the cockpit of the aircraft.

After breaking through the interior of the cockpit made of unknown materials, the tiny energy figure that Tang Zhen's spiritual energy transformed into immediately saw a foreign race cultivator in the cockpit who was wearing special clothes. His body was illuminated by countless light spots.

In addition to these light spots, his body was also wrapped in something similar to a dogskin plaster, and it seemed to be led by transparent wires.

Every time the alien cultivator made a move, he would be captured by these light spots, making his driving movements smooth and fast, as agile as his hands and feet!

The foreign cultivator didn't notice the existence of Tang Zhen. At this moment, he was fully focused on observing the image projected on the screen in front of him. From time to time, he would also sweep his gaze across the transparent metal cockpit that was similar to a two-way glass to observe the situation outside.

As for the tiny energy person that was sticking its head out and observing the environment of the cockpit, the foreign cultivator did not see it at all.

Tang Zhen didn't hesitate. He rapidly climbed up along the inner wall of the cockpit and quickly arrived at the back of the foreign cultivator's head to ambush him. He then slowly extended his arm.

A short energy sword longer than his body suddenly appeared in front of his arm, and he stabbed it at the back of the foreign cultivator's head!

At the same time that the energy short sword was thrust out, Tang Zhen directly controlled it to leave The Dark World. After which, it transformed into a physical body and killed the foreign race cultivator before he could react!

The alien cultivator's head drooped forward as white foam spewed out of his mouth. The aircraft he was piloting fell to the ground.

"Number two, what's wrong?"

His companion asked immediately when he noticed something wrong with his companion's aircraft.

Oh, Yingluo is fine. It's just a mistake!

Tang Zhen mimicked the foreign cultivator's language and replied in their own language. At the same time, he quickly activated the [ all-purpose electronic kit ] and instantly cracked the control system of the aircraft!

At the same time, Tang Zhen had also unlocked the weapon system of the aircraft and directly locked onto the other two aircraft.

"Damn it, number two, are you crazy?"

"Bastard, what are you doing? why are you aiming at us?"

Two questions were asked one after another. At the same time, the two aircraft activated their weapons, as if they would return fire if they realized something was wrong.

Unfortunately, they were still a step too slow. The [ all-purpose electronic kit ] had already hacked into their aircraft through the communication channel and locked their weapon attack system!

Amidst the panicked screams of the two foreign cultivators, Tang Zhen opened fire. Two extremely high-power photon cannons opened fire and directly destroyed the two aircraft!

Chapter 778 emerging in an endless stream

Seeing that the two aircraft were destroyed, Tang Zhen's energy clone quickly controlled the aircraft to land on the ground. After which, he returned to his body in the dark World and brought the sick little monster out of the dark World.

After storing the wreckage of the two aircraft, Tang Zhen jumped onto the aircraft that was still in good condition. Under the shouts of the pursuers in the distance, he directly controlled the aircraft to float up and fly forward at lightning speed.

When the pursuers behind him saw this, they were all dumbfounded.

The nine King-class cultivators who had just caught up were already exhausted. Their breathing was unstable, and they couldn't continue the pursuit.

Moreover, with their speed, how could they catch up with such a high-tech aircraft that disappeared in the blink of an eye?

As for the alien cultivator who was equipped with technological weapons, he was extremely surprised and depressed.

No wonder these alien cultivators were depressed. There were only three intact flying devices left in Lou Cheng. The rest of them were left in the warehouse to eat dust for various reasons!

Dozens of years ago, when they invaded the other world, they had looted a batch of weapons, but they were sent back to the world of Loucheng by the natives of the other world.

Fortunately, this tower had previously invaded a foreign world on its own and had accumulated enough world origin to complete the task. Thus, before the tower was destroyed, it had successfully returned and escaped the disaster!

It could be said that their invasion had completely failed, and the only gain was a large pile of weapons from the Otherworld's Aboriginals.

Normally, Lou Cheng cultivators rarely used this kind of weapon and equipment. First, they were not used to it. Second, although it was powerful, if they did not take good care of it, it would break down very quickly.

If there was a problem at the critical moment, it would really be a trap!

Similar things had happened countless times. Therefore, the attitude of the cultivators in Loucheng towards technological weapons was to try them, but at the same time, they were extremely distrustful!

It was the same for the cultivators in this city. However, these weapons and equipment were their greatest harvest from this trip. It would be a pity if they abandoned them!

After thinking about it, the Lord of this city decided to use these Otherworld weapons to equip a group of soldiers and see what they could do.

However, it was not easy to operate these weapons. Ordinary Loucheng natives had not even seen them before, so how could they be familiar with them?

Fortunately, during the invasion, these cultivators had forced the natives of the foreign world to teach them how to operate it, leaving behind video records and rote them.

The reason why they did this was because they were afraid that they wouldn't be able to use it after returning to the world of towers. They didn't expect to actually use it.

In fact, if it weren't for the fact that they couldn't bring the Aboriginals back, why would the cultivators in this city spend so much effort?

As for the flying device, there were also restrictions. It had to be bound to the user's identity in advance, and outsiders couldn't fly it. In the entire foreign race's building, only the three cultivators could operate it.

On the other hand, the cultivators of Lou Cheng loved the guns and weapons. There was even a group of cultivators who used them as their main weapons, including the alien cultivators in the holographic camouflaging cloaks.

They were the ones who planned this ambush and didn't even invite any King-level cultivators. They were obviously very confident in the power of these technological weapons!

However, never in their wildest dreams would they have imagined that Tang Zhen's experience in playing these things was much richer than theirs!

These foreign cultivators had overreached themselves with the big axe in front of Lu ban's door. After today, this special Legion of loucheng would probably disappear!

It was also because of this that the cultivators in the tower were extremely depressed.

God knows how Tang Zhen, a cultivator who crossed the border, managed to fly. Not only could he pilot an aircraft, but he was even more skilled than the cultivators in his own city?

But if you drove one away, it was fine. You should at least leave the other two behind. Why did you destroy them first and then pack up the wreckage?

All the cultivators were filled with anger and resentment. However, through this matter, all the cultivators had already confirmed that Tang Zhen did indeed possess a storage equipment. Moreover, the storage capacity was frighteningly large. Otherwise, how could he have easily stored the wreckage of the two aircraft?

After confirming this, the foreign cultivators' eyes were burning with passion, but they were quickly replaced by disappointment.

Only the heavens knew how far Tang Zhen had run. At the very least, based on their current speed, they would definitely be unable to catch up to him!

These foreign cultivators were filled with unwillingness. After thinking for a moment, they immediately decided to record the entire process of their encounter and spend a large number of points to put it on the cornerstone platform so that the entire tower in the spirit battle zone could see it.

In particular, the fact that Tang Zhen possessed a super-large storage equipment had been wantonly exaggerated by these foreign race cultivators, causing people to inevitably feel greedy after seeing it.

The purpose of this group of people was clearly because they were resentful because they had lost their troops in Tang Zhen's hands. Therefore, they used this method to take revenge on Tang Zhen.

He believed that the interceptors in front of him had obtained this information and had the means to deal with it. In that case, there was an extremely high possibility that Tang Zhen would be killed!

As long as Tang Zhen could be killed, even if he didn't die in their hands, these foreign race cultivators would also be very happy to vent their hatred!

.....

Tang Zhen was flying at a speed of 2000 kilometers per hour while piloting this aircraft that relied on brain-controlled technology and a small number of manual assistance.

While they were flying, the [ universal electronic kit ] was also constantly analyzing and cracking all kinds of information about this aircraft. Then, it would be stored separately as supplementary information for the Holy Dragon city's research on aircraft in the future.

Tang Zhen had always insisted on equipping the Holy Dragon city's cultivators with high-tech weapons. This way, their combat strength would increase by several times!

With a complete logistical support, the Holy Dragon City cultivators could use it without worry. They would not have to worry like the cultivators in other loucheng, where they would have to throw it away if they encountered a technical weapon failure.

Of course, while flying, Tang Zhen had also slightly shifted his direction. This way, he could more or less avoid being blocked by the enemy.

However, Tang Zhen also knew that under the stimulation of benefits, even if he turned around and returned, the cultivators in the city would still chase after him and would not give up easily!

Tang Zhen had already seen more than ten waves of enemies on the ground who tried to intercept them as he flew the aircraft. As for the cultivators who tried to intercept them in the air, they were all killed by Tang Zhen!

These cultivators weren't strong and Tang Zhen didn't put them in his eyes. What he was really afraid of was the king level cultivators.

After estimating his speed, Tang Zhen had a premonition in his heart that it would not be long before he would once again encounter a powerful attack from the enemy!

The truth was as Tang Zhen had expected. Just as the aircraft he was piloting passed by a large wasteland, the aircraft that was originally flying at high speed suddenly malfunctioned. After that, it rolled and fell to the ground!

At the same time, in the sky above him, a huge metal disc that had the appearance of a disc suddenly bounced away the clouds and mist that enveloped his surroundings. It continued to spin and descend above Tang Zhen's head.

The metal disc had a diameter of two kilometers. It looked ancient and heavy.

However, it just had to float in the air like this. There were no propulsion devices around it, so how did it float?

The surface of the huge metal disc was densely engraved with tens of billions of runes, forming a special array that was constantly flashing with colorful lights.

Not only did the gravity in the area covered by the metal disc increase by several times, but it also had the ability to restrict flight. Even the free energy in the air dissipated!

It was also because of this that the aircraft had fallen without warning!

Chapter 779 dilemma and counterattack

Although he had suddenly encountered an accident, there was no panic on Tang Zhen's face. He directly jumped out of the flying device and kept it in his storage space.

However, after doing this, he felt that the accumulated energy in his body had been consumed a lot, and the energy in the air had not been replenished in time!

Such a situation was extremely rare and was extremely disadvantageous to Tang Zhen.

Tang Zhen used his spiritual energy to sense it slightly. He was already certain that there was no energy in the air around him. It had completely become a “devil-restricting land”!

This kind of special energy isolation situation was clearly caused by the giant metal disc above his head. If Tang Zhen was to remain in this kind of environment, the energy within his body would most likely only be enough for him to barely use his cultivator skill twice!

Even though the cultivator skill he used came from the application store and belonged to a more advanced super skill, it still required energy support, and it even consumed more energy!

Tang Zhen did not dare to rashly waste the energy in his body before he could figure out the exact situation. Therefore, he simply allowed himself to fall from the sky.

It was only when he was about to hit the ground that he slightly used his skill to let himself land slowly.

Tang Zhen shot a glance at the enormous metal disc above his head. He coldly swept his eyes around and coldly shouted, “Are all the cultivators in the spirit fall battle zone so timid?”

If that’s the case, I’m truly disappointed!”

As soon as he finished speaking, dozens of cultivators with different appearances suddenly appeared in the surrounding area. More than half of them were King-level cultivators.

At this moment, they were all in a state of storing power, and the energy fluctuations around them were constantly surging, ready to launch a fatal attack at any time!

This kind of attack was sufficient to destroy the heavens and earth. If Tang Zhen were to forcefully receive it, it would be no different from seeking death.

Among these foreign cultivators, there were three two-star King tiers who were on the same level as Tang Zhen. All of them were exuding a terrifying aura as they sneered at Tang Zhen.

They were arranged in a circle, and they were just around the metal disc.

This position was not only unaffected by the metal disc, but it could also freely use the energy in the air to attack Tang Zhen who was in the center of the devil prohibition zone.

Moreover, this position just happened to be the maximum distance of teleportation. As long as Tang Zhen used teleportation to escape, they would be able to intercept him and instantly launch a fatal attack!

No matter how one looked at it, it was difficult for Tang Zhen to escape this place!

Therefore, in the eyes of these foreign race cultivators, Tang Zhen was a turtle in a jar. It was only a matter of time before he was killed.

However, in the eyes of these foreign cultivators, there were many secrets hidden on Tang Zhen’s body. Before they interrogated him, these foreign cultivators would definitely not act rashly.

At this moment, a two-star King tier laughed out loud and said to Tang Zhen, “ you’re still so stubborn even when you’re about to die. I really want to see what your true ability is like. Is it even more powerful than your mouth? ”

Tang Zhen sneered as he indifferently looked at the two-star King tier. "If you want to try, this tang can accompany you to the end, but I'm afraid you don't have the courage?"

"You're looking for death!"

The two star King tier's expression immediately sank when he heard this. After taking a deep breath, he said to Tang Zhen, "I won't argue with you. I'll only ask you one question. How did you activate the power of law, and more than one at that?"

Also, why are your cultivation skills so powerful? give me an explanation immediately!"

Tang Zhen laughed softly and hooked his finger when he heard this, if you want to know, then come over here. I'll tell you in secret!

"If you want to trick this old master, you'd better give up!"

The two-star King tier laughed in disdain and said in a cold voice, "I can tell you clearly that after being locked on by the anti-magic disc made by this foreign world's cultivator, it will follow you wherever you go!

Before the anti-demon plate is taken back, don't even think about borrowing a trace of the world's energy, and don't even think about using any cultivator skills!

If that's the case, you're no different from a good-for-nothing!"

When he spoke until here, the two-star King tier swept his gaze at the smiling Tang Zhen. He then slowed down his tone and said, "As long as you tell me your secret, I can't promise to let you go, but I can promise to give you a decent death!"

Tang Zhen nodded. He seemed to have listened to the two-star King tier's advice. He then asked in a curious tone, "Can you tell me how you determined that I would pass by here and set up an ambush?"

The non-human King laughed as he pointed at the two-star King next to him, "You might not know this, but this two star King tier beside me is proficient in divination and divination techniques.

He was the one who confirmed that you would pass by here after casting the spell. Now it seems that he was really clever and you walked into the trap yourself!"

Tang Zhen's gaze swept over the haggard foreign tribe cultivator whose hair had been braided into countless small braids. He then nodded slightly.

Under the gazes of everyone, Tang Zhen was silent for over ten seconds before he suddenly laughed out loud!

He laughed as he pointed at the king level Holy master who claimed to be good at divination. hahaha, I'm dying of laughter. Since you're so good at divination and predicted that I would pass by here, did you predict that I would be captured by you? "

The clairvoyant's brows furrowed slightly. He spoke in a hoarse voice, your fate is covered by the fog. I can't predict it!

The other foreign cultivators' expressions changed when they heard this. Some of them even prepared to kill Tang Zhen immediately.

What they were most afraid of right now was for some unforeseen event to occur. After all, the current Tang Zhen was like a ferocious tiger in a cage. Once he broke free, someone would definitely pay a terrible price!

Just as these foreign race cultivators were hesitating whether to make a move, Tang Zhen suddenly took out an item from his storage space and smashed it on the ground with a 'bang'.

This item was actually a super bomb, just like the one that destroyed the three-eyed man's Tower earlier, and it had an extremely terrifying power!

When the foreign cultivators saw this, they seemed to have thought of something and took two steps back in horror.

The three two-star King tiers were also staring at Tang Zhen. They had already prepared their terrifying skills, but they did not dare to release them.

hehehe, you see? you've guessed it, right? that's right, I used this thing to destroy the three-eyed race's city!

Tang Zhen held the huge bomb with one hand as his eyes flickered. There was a trace of madness in his tone as he grinned at the surrounding foreign race cultivators.

as long as I think about it, this super bomb will explode instantly. Then, the surrounding tens of kilometers will be razed to the ground in an instant!

no matter how fast you run, you can't escape its shock wave. You'll die!

now, let me ask you. Are you afraid? do you still naively think that this Tang will be at your mercy? "

Tang Zhen's tone immediately became incomparably cold when he said this. It even carried a trace of arrogance as he loudly laughed, "Hahaha, if you dare to attack, we will die together!

To be able to drag dozens of King level cultivators down with me before I die is more than enough for this Tang!"

After hearing this, the foreign cultivators' expressions changed rapidly, and some of them even showed fear.

They had all heard of the tragedy that had befallen the three-eye tower. Not even a chicken or a dog had been left behind. It had been completely reduced to ruins.

If that disaster-like scene was really caused by the bomb beside Tang Zhen, these foreign cultivators would definitely not dare to act rashly because they had scruples in their hearts. They didn't want to lose their lives!

In the eyes of those foreign tribe cultivators, Tang Zhen did not have the slightest fear at this moment. He did not have a trace of nervousness as though he was surrounded by strong enemies. On the

contrary, he was proud and Savage, causing people to gnash their teeth in hatred. However, they did not dare to act rashly!

Tang Zhen seemed to smile even more happily when he saw the expressions of the foreign cultivators. He asked the cultivators, " how about it? do you want to try this super bomb? I guarantee you'll never forget it!

enough! Do you really think that we will believe you? this so-called super bomb is definitely fake!

The two-star King tier who had spoken first snorted. He suppressed the panic in his heart and roared at Tang Zhen.

Tang Zhen turned his head around when he heard this. He looked directly at the foreign King as a trace of disdain was contained in his voice.

"Old man, if you're not afraid of death, you can try!"

Chapter 780 Deadlocked, detached \_When Tang Zhen's words came out, the leading two-star King tier was so angry that he almost collapsed.

Up until now, not only did Tang Zhen, who was surrounded by them, not show any fear, but he had even counterattacked them by surprise. His mouth was even more unforgiving.

It could be said that this was the first time in so many years that this two-star King tier had been so angry!

He glared at Tang Zhen while blowing his beard. There were a few times when he wanted to kill Tang Zhen. In the end, he could not help but secretly warn himself when he saw the eye-catching super bomb beside Tang Zhen. At the same time, he suppressed the anger in his heart.

As a cultivator of a national level, this two-star King tier wasn't ignorant. So far, he had participated in several missions to invade other worlds.

It was also because of this that he clearly knew that almost every foreign world had a very powerful super weapon to deter enemies from the same world.

These super weapons had different styles and effects, but once used, almost all of them would cause a catastrophic effect.

For example, the foreign world where he obtained the anti-demon compass had a world-destroying divine weapon that was enough to make the cultivators of the loucheng Kingdom tremble in fear. When it was activated, three of the ten National loucheng that participated in the invasion mission were instantly destroyed!

That apocalyptic scene was still fresh in this King's memory even after nearly a hundred years!

Therefore, when Tang Zhen took out this super bomb, this two-star King tier already knew that Tang Zhen was definitely not trying to scare them. The three-eyed tower had definitely been destroyed by this metal lump!

If Tang Zhen was really forced to detonate this super bomb, none of the cultivators present would be able to live!

This King had lived for hundreds of years, and he knew how to avoid harm. He definitely wouldn't give up his life for this matter, because it wasn't worth it!

Taking a deep breath, the two-star King tier coldly said to Tang Zhen, "You have good means, are you really fearless?"

If that's the case, I can let you go, but you have to hand over your storage equipment and your method of controlling the power of law!"

Tang Zhen shook his head and said with a disdainful expression, "I advise you to give up as soon as possible. Don't even think about this!"

"So you're saying that you want to die?"

"I'll still say the same thing, you can try?"

After Tang Zhen finished speaking, he no longer paid any attention to the two-star King tier. Instead, he raised his hand and pulled the Super bomb from the ground. After placing it on his shoulder, he walked forward with a swagger.

The anti-demon plate that was suspended above his head had also started to slowly move at this moment. It had ultimately covered Tang Zhen in the middle of the anti-demon plate.

When the foreign cultivator in front of him saw this, he immediately retreated with a wary expression in case he entered the devil sealing grounds and couldn't use his cultivation skills.

Seeing this, the two-star King tier immediately roared in anger, "Tang Zhen, you are forcing me to kill you!"

If you dare to move again, this old man will completely kill you even if it means a life and death struggle!"

Who would have thought that Tang Zhen would completely ignore these words? he didn't pay any attention to this two-star King tier as he continued to walk forward.

"You should die!"

Seeing this, the two-star King tier was so angry that he almost crushed his teeth. His eyes were spewing fire, and he was extremely depressed.

He really could not figure it out. They were clearly the ones who ambushed Tang Zhen and surrounded him. However, why was it that they were the ones who were being suppressed and completely controlled by Tang Zhen?

If he had known this earlier, he would have used all his strength to kill him. Then, there wouldn't have been so much trouble!

This two-star King tier was depressed in his heart. The other foreign cultivators were also the same. At this moment, they were all glaring at Tang Zhen, wishing that they could slap him to death!

However, they were also afraid that Tang Zhen would detonate the Super bomb. Therefore, while they warned themselves not to make a move, they were even on guard against their companions 'sneak attacks.

These complicated feelings tangled in their minds, causing the faces of some of the foreign cultivators to turn dark and twisted. The gazes they shot at Tang Zhen were like knives, as though they wanted to tear him into a thousand pieces!

Tang Zhen was in the middle of a group of foreign race cultivators with terrifying strength. However, it was as if he was taking a leisurely stroll in his courtyard. He had a smile on his face as he continued to walk forward. It was as if he was walking in his backyard.

When the foreign cultivators saw this, they were even more furious!

However, Tang Zhen was not as carefree as he appeared on the surface. At this moment, his mind was spinning rapidly as he continuously thought of a way to escape.

In fact, although this group of foreign cultivators was strong, they couldn't do anything to Tang Zhen who could teleport between two worlds. They might even be killed by Tang Zhen's super bomb!

However, Tang Zhen couldn't do this. This was because he was extremely clear that although this super bomb was powerful, it might not be able to kill all of the foreign race's cultivators. At the very least, those three two-star King tiers would most likely be fine!

However, Tang Zhen would expose his ability to teleport between the two worlds in this way. He would still be unable to eradicate the hidden danger.

If the anti-demon plate above his head hadn't disappeared, he wouldn't have been able to use any of his cultivation techniques after he returned, and the three two-star King tiers who hadn't died from the explosion would definitely have tried to kill him!

At that time, even if Tang Zhen was teleported back to his original world, he couldn't guarantee that these three foreign cultivators wouldn't wait for him on the spot and reveal his teleportation ability to the public.

Therefore, the best way to escape was to not detonate the Super bomb or use the teleportation ability in front of these foreign cultivators.

It would be even better if he could take advantage of this opportunity to kill all these foreign Kings!

However, it would be extremely difficult to escape from the encirclement of these foreign cultivators!

What method should he use to escape successfully?

Tang Zhen's brows were slightly furrowed. When he was considering whether he should enter The Dark World to give it a try, he was surprised to discover that there was no energy present in the devil sealing grounds. He was actually unable to enter The Dark World!

In this case, Tang Zhen was really in a difficult position. He did not know what to do.

However, at this moment, he accidentally discovered that at the edge of the map view, there was an area covered in clouds and clouds, with lightning and thunder constantly appearing.

Although that area was on the edge of the map and Tang Zhen was unable to see its specific area, Tang Zhen was certain that it was not small because the edge of the map was already covered by this lightning cloud.

Tang Zhen's eyes immediately brightened when he saw this scene. He randomly swept his eyes over the devil suppressing plate above his head.

Not only did this strange thing isolate all the energy in the air, but it also served as a constant reminder to the enemy that the person they wanted to catch was here, so they had to come quickly!

Therefore, this thing was quite insidious. With such a broken thing on his head, Tang Zhen didn't feel good.

However, with the existence of this misty region, a thought suddenly appeared in Tang Zhen's heart. Perhaps, he could use the mist in this special region to cover the devil suppressing plate and achieve the goal of concealing his whereabouts.

Tang Zhen similarly did not lack a method to reach that region. This was because by relying on the remaining energy in his body, he was completely able to teleport once and arrive at his destination in a snap of his fingers!

When he thought of this, Tang Zhen no longer hesitated. He sneered at those foreign race cultivators and directly activated the map teleportation plug-in.

Tang Zhen suddenly disappeared from his original spot under everyone's gazes, leaving behind a sentence that was filled with killing intent.

"I'll wait for you guys, I won't rest until you die!"
