

Alternate 791

Chapter 791 Leisure travel (1)

In the next few days, a large number of trucks filled with goods came to the village every day and then quickly left.

This cycle repeated day and night!

The villagers were already used to the constant harassment from the cars. Even if someone protested, the village chief would personally go to their house to persuade them. In the end, they could only obediently shut their mouths.

Because this was something the country wanted to build, and it attached great importance to it. Whoever jumped out at this critical moment to make trouble would be guaranteed to receive a very profound ideological education.

At the same time, a considerable number of villagers felt honored. After all, this kind of thing happened in front of their own house, which meant that their village was not ordinary. Otherwise, why didn't they choose another place?

They were really right. The location of this village was indeed not ordinary. Otherwise, Tang Zhen would not have chosen this place.

Before they knew it, a giant building that was blocked by the protective net had already risen from the ground and was getting taller and taller!

Near noon, Tang Zhen walked out of the temporary temporary simple house at the construction site. He glanced at the special building that was under overtime construction and gently moved his body that was slightly numb due to the design drawings.

Tomorrow would be the day that his phone would be upgraded. By then, he would have to return to the loucheng world and continue to deal with the group of foreign cultivators and the Icefield foreign people.

However, Tang Zhen was much more relaxed compared to his previous anxious mood.

As long as the building in front of him was completed, and the other eight identical buildings in different locations of the original world were activated at the same time, the original world could 'disappear' into thin air, no longer being detected by the other races in loucheng.

In addition, the United States was guarding the interdimensional passage with ten powerful warheads aimed at it. Even if the ice plains alien invaded the original world ahead of time, they were bound to suffer a head-on blow!

Even with the protection of the barrier, it would not be able to withstand such a mutually destructive attack. It was possible that Lou Cheng of the ice field alien race would be severely injured and the news would be transmitted back to the Lou Cheng world!

Of course, this was all an assumption. According to the size of the plane channel, it would take at least half a year to teleport Lou Cheng over.

In such a long period of time, it was enough for Tang Zhen to destroy the ice plains alien race's city over a dozen times!

After chatting with director Tang and the chief engineer in charge of the construction, Tang Zhen slowly walked out of the construction site and planned to go to the mountain to relax.

When the four Secret Service agents saw this, they immediately followed and stood guard by his side.

Tang Zhen did not say anything. After all, this was the responsibility of others, and he could not shirk it.

Tang Zhen slowly walked along the gravel road that was covered with grass. He chatted with the Secret Service personnel beside him as he walked. They were getting closer and closer to the mountain peak.

When they were about to reach the foot of the mountain, they heard the sound of water. It turned out that there was a River here.

At this moment, in the waist-deep River, there was a group of half-grown kids shouting and shouting. They were naked like mud loaches and were using fishing nets to catch fish in the river Bend.

Tang Zhen felt that it was quite interesting when he saw this. He went forward to take a look.

When those kids saw Tang Zhen and the others, they were a little restrained at first. However, when they saw that Tang Zhen and the others were just watching the show, they no longer restrained themselves and immediately became more lively.

This bunch of teenagers were all crazy and didn't mind showing off their "power" in front of strangers.

After Tang Zhen watched for a moment, he suddenly said to the group of teenagers, "You guys, come here and try to fish here. I saw a big fish swimming by!"

The average teenager was skeptical. They did not know how big the big fish that Tang Zhen was talking about was. However, they still ran over and headed towards the place that Tang Zhen pointed out to fish.

When the two sides of the fishing net reached the shore, the water in the net splashed. At the same time, a big carp that weighed seven to eight catties jumped out of the water.

The group of boys were so shocked that they even let go of their fishing net. Their attention was all attracted by the big carp that suddenly jumped up.

Compared to the small fish and shrimp in their buckets, this fish was indeed too big!

Seeing that the carp was about to jump out of the fishing net, Tang Zhen threw out a piece of rice ear that he had previously casually broken, and it pierced the carp's head like lightning.

"Plop!"

Although the big carp had crossed the fishing net and fallen into the water, its belly was facing the sky, and it couldn't be more dead.

The teenagers cheered and immediately rushed over to pick up the big carp. They began to fight for it in the water, each of them extremely happy.

Tang Zhen laughed out loud when he saw this. He turned around and left the Riverside before continuing to walk towards the mountain top.

The mountain was not large and the vegetation was sparse. However, there were huge rocks everywhere. There was a gentle slope not far away, and there were huge flat rocks. Several yellow cattle were lying on top of them and eating their food.

He turned around and looked at the foot of the mountain behind him. Under the blue sky and white clouds, there was a flat and wide land, and golden crops were all over the place.

Under the shade of the Emerald green trees, quiet and peaceful villages were scattered among them. The most were a few hundred families, the least were just a dozen.

Further away, there were straight roads with all kinds of vehicles passing by at high speed, heading straight for the town with tall buildings in the distance!

Tang Zhen quietly watched this scene and did not speak for a long time. He seemed to be thinking about something.

After a long while, he turned to the four Secret Service agents beside him and asked softly, "Look at how beautiful the scenery of this field is. It's quiet and tranquil. Although the people living here have all kinds of troubles to make a living, they don't worry about the world being destroyed.

If you tell them that there's a world-ending crisis right now, they'll probably think you're crazy, right?"

The Secret Service agent beside Tang Zhen immediately laughed when he heard this. However, they also knew that what Tang Zhen said was the truth.

If it weren't for the fact that they had participated in the capture of the foreign cultivators and had seen the dimensional portal with their own eyes, they would've taken it to be nonsense and ignored it with a faint smile.

actually, it's fine to leave this kind of thing to us. There's no need to let ordinary people know. That would only bring unnecessary chaos.

A Secret Service agent casually said. They were specifically in charge of Tang Zhen's security work and were very familiar with Tang Zhen. Therefore, they did not have too many scruples when they spoke.

The other three Secret Service agents nodded, clearly agreeing with this statement.

Tang Zhen chuckled. you're right. There's no need to let ordinary people know about this. After all, if this matter is not handled well, the destructive consequences will not be any less than the crisis itself.

When he said this, Tang Zhen paused. His tone had an additional trace of solemnness, I hope that similar things will not happen again, at least not on the land under our feet. After all, this is our home!

Therefore, whoever dares to covet this place, no matter who it is, will have to pay a painful price!"

A trace of killing intent was contained in Tang Zhen's eyes when he said these words. Clearly, he was targeting the icy Plains foreign tribe's Lou Cheng.

It was impossible to change the rules of the tower world. If Holy Dragon City wanted to continue to develop and grow, it would also have to take the path of invading other worlds and destroy countless similar homes in other worlds.

However, this was something that they had to face in the process of becoming stronger. If they were too soft-hearted, they might not even be qualified to participate in it.

It was just that Tang Zhen could invade other worlds, but he absolutely wouldn't allow the other towers to make a move on the original world. Otherwise, they would be mortal enemies and wouldn't rest until one of them was dead!

These words were Tang Zhen's declaration. He didn't care what others thought as long as he knew it!

The few Secret Service agents could not help but shut their mouths when they sensed the killing intent that was being emitted from Tang Zhen's body. Cold sweat faintly seeped out from their foreheads.

They really could not understand why Tang Zhen's killing intent that he had inadvertently revealed was able to make their legs tremble and their hearts tremble with fear.

How many enemies had he killed to have such a terrifying aura?

Chapter 792 Brand new (1)

In the blink of an eye, another day had passed, and the mobile app store had been officially upgraded.

Tang Zhen returned to the room he was temporarily staying in. After ordering people not to disturb him, his eyes were filled with anticipation as he directly turned on his phone.

Just as the phone was turned on, an indescribable loud sound was suddenly heard. It was crisp and ancient, and it stirred people's hearts.

This voice continued to linger in Tang Zhen's mind. It seemed to have come from the beginning of the ancient times and crossed into the distant future. It continued to be passed down in this manner over the endless years!

It was as if he had been enlightened and enlightened!

Tang Zhen was shocked by this sudden voice until he became absent-minded. It was as though his thoughts had already stopped. The lingering sound reverberated in his ears as he unknowingly sank into an endless and distant comprehension.

This process of enlightenment filled one with joy. There was no beginning and no end. If this state was maintained, it seemed that it could last until the end of time!

Fortunately, Tang Zhen did not get lost. Instead, he kept issuing a warning in his heart, reminding himself that he must leave and must not sink into this!

It seemed as if an extremely long time had passed, but in fact, only a few minutes had passed. Tang Zhen then slowly woke up. His empty eyes also gradually recovered a trace of spirit.

Tang Zhen let out a long breath. A trace of shock flashed across his eyes. He recalled for a moment and seemed to be planning to recall the experience and comprehension he had just experienced.

Only at this moment did Tang Zhen discover that the seemingly long and distant experience in his memory was actually like an illusion. There was no trace of it after he woke up from his dream. He could no longer recall even the slightest bit of it.

However, that inexplicable feeling was real, and the change in him was obvious!

It was as if all the dust had been washed away. His entire heart had become incomparably clear, becoming even purer and more condensed.

This kind of special insight was clearly not ordinary, and it was also extremely beneficial to him. It could help him comprehend the power of laws a step earlier.

No longer dwelling on what he had just experienced, Tang Zhen turned his attention to the upgraded application store to see what kind of changes it had undergone.

Tang Zhen was slightly stunned after he took a look.

The original App Store interface had been completely changed. It had become a strange image.

Above the image was a vast starry sky. Countless stars of different sizes were suspended in the air, but they were all dim and lightless, as if they were "dead."

If one observed carefully, they would find that these stars were not in a mess. They were arranged in groups, and each group had a main star and countless smaller stars behind it.

Tang Zhen looked at one of the groups of stars. He observed the largest main star for a moment and discovered that this main star seemed to be filled with an incomparably hot destructive aura, just like a raging fire.

At the same time, a huge rune loomed on the main star. It was the rune representing fire and exuded a strong power of laws!

Tang Zhen felt joy in his heart when he saw this. If he were to comprehend and observe the traces of the law on this symbol for a long period of time, it was likely that the speed at which he could grasp the flame law would increase by many times!

This was simply a good thing that fell from the sky, and other cultivators couldn't even dream of it!

With some joy, Tang Zhen shifted his gaze away from the main star that represented the flame. His attention once again fell on the other stars of the same color that were of different sizes.

Tang Zhen had a feeling that there was an inseparable connection between them and the same colored flame main star. It was as though there was an invisible chain that was linking them together.

On these branch stars, Tang Zhen also felt traces of the flame law. However, there were many changes. It was similar to the various cultivator skills that used flames as the foundation.

Of course, compared to those flame-type cultivator skills, the power of the stars with traces of laws was bound to be many times stronger!

The surprise on Tang Zhen's face became more and more intense after he looked at these stars one by one. A trace of joy also surfaced on the corner of his mouth at the same time.

If he could master the power of the stars, his combat strength would be unimaginably improved. At the very least, he wouldn't have to run away from the foreign cultivators who were chasing him. He would be able to kill them directly!

The most crucial point was that Tang Zhen suspected that he would not only be able to absorb the energy in the space in the future, but he could also absorb the energy from the stars!

This was purely a feeling that had yet to be verified.

However, if this was really the case, things like the devil suppressing plate would no longer be able to pose a threat to Tang Zhen. If he was unhappy, he could directly charge forward and shatter it!

Although the anti-demon plate could block the attack of the huge rock and release a strange vibration force, it definitely couldn't block the full-powered attack of a two-star King tier!

Even if he could really block a few of them, Tang Zhen was still not afraid.

Because he could absorb the power of the stars, he didn't need to worry about the situation of insufficient energy. He could completely bombard it until it shattered!

Tang Zhen turned his gaze to the other stars at the side and observed them one by one when he thought of this.

After looking at it for a while, Tang Zhen was already certain that these stars represented all the laws that existed in the world. In addition to the laws of earth, water, fire, and wind, there were also laws of space and time.

Other than that, there was actually a special law that existed similar to technology. However, Tang Zhen was unable to figure out what its specific ability was for the time being.

As for how to control and borrow the power of the stars, Tang Zhen already knew that it was to top up origin stones!

Sure enough, it was still the original style of the application store. Although the graphics were quite scary, it still didn't change the nature of wanting money!

However, in this case, the function of the brain Pearl would be greatly reduced. Other than being able to be used to exchange for items and act as a long-lasting energy source, it was no longer of any use to Tang Zhen.

Of course, to the Holy Dragon City, this brain Pearl was essential. After all, it was the main source of points on the exchange platform.

Nothing could be seen in the world of loucheng, but once they began to invade the other world, the effect of the points would be reflected.

If one didn't have any points, the cornerstone platform, a mobile logistics supply base, would definitely not give one any credit for anything.

With money in his pocket, he did not panic. Therefore, he could not stop accumulating brain beads, and he had to increase his efforts!

When Tang Zhen first built the tower, he did not understand the true meaning of points. At the same time, in order to attract foreign merchants to the Holy Dragon City, he did a limited sale on the cornerstone platform for a period of time and rarely used it to earn points.

Now, it seemed that Tang Zhen's actions were not wrong. The Holy Dragon City had also risen rapidly because of this, and its reputation had even spread to thousands of miles away!

However, after the initial capital accumulation, the Holy Dragon City no longer needed such a method to attract foreign merchants. They also began to pay attention to the accumulation of points in preparation for the invasion of the other world in the future!

However, Tang Zhen felt a headache when he thought about the number of origin stones needed to obtain the power of the stars. After all, the value of such an item was extremely high. Even he did not have many origin stones in his possession.

Unless the Holy Dragon City invaded the other world to collect them, who knew how much money Tang Zhen would have to spend to buy them from a trade?

However, this was a mandatory rule of the application store, and Tang Zhen couldn't change it. Therefore, in the days to come, he would have to rack his brains to collect origin stones of various attributes!

Chapter 793 Powerful functions (1)

After studying the first half of the picture, Tang Zhen shifted his gaze to the middle part of the picture.

The first half had already brought him a lot of surprises. What kind of surprises would be waiting for him next?

When his gaze shifted over, Tang Zhen could tell with a single glance that the object floating in the air was a shrunken version of Holy Dragon City!

Moreover, unlike the Holy Dragon City that was hidden from the public, the Holy Dragon City in this image was showing its true form!

A strange-looking super warship carried Holy Dragon City and suspended it in the air. The arms that extended out were filled with weapons of all sizes.

On the warship were the various towers of the Holy Dragon City. The mother tree that covered the sky was extremely eye-catching, and the tall white Wizard defense tower was not even a third of its height!

Outsiders could tell with a single glance that this was a floating city, a mobile super war fortress!

Due to the Super warship's level, the areas outside of the outer walls had not appeared. However, as the Super warship's level increased, those areas would eventually be included.

His consciousness extended towards this miniature version of the Holy Dragon City. After that, Tang Zhen saw that the image was continuously enlarged, allowing Tang Zhen to observe his own city from various angles.

The function of managing the residents was also more comprehensive and detailed.

Tang Zhen was able to clearly understand the other party's physical condition, cultivation, strength, and loyalty!

Even if he wanted to kill a resident, he could do it easily. He could decide life and death with a single word!

However, Tang Zhen knew that he must never let the residents of the City Tower know about this ability. Otherwise, even if his residents were extremely loyal, they would still feel uneasy.

No matter who knew that their lives were being controlled by someone else, they would probably become frightened and suspicious. As time passed, it was not impossible for them to rebel!

Other than this, Tang Zhen was also pleasantly surprised to discover that if he wanted to change the layout of a certain part of the city, he only needed to move his mind to do so.

Of course, the premise was that he had enough origin stones in reserve. This function was the same as the [Map Modification plug-in], where he had to spend money every time he used it!

After studying the functions of this miniature version of the building, Tang Zhen shifted his gaze to the bottom!

What he saw now was a map with neat edges, which looked like a miniature version of the world map.

Tang Zhen was not familiar with this map. However, he had a faint feeling that this map was the area he was at earlier. Or rather, it should be said that this was the battle area he was at!

He tried to shrink it, but he realized that he couldn't do it. It was as if he could only see this area.

However, when he tried to Zoom in, it was very easy. Moreover, it was just as Tang Zhen had expected. This was the map of the spirit battle zone that he was currently in!

Tang Zhen rejoiced in his heart when he saw this. He did not expect that he would actually obtain such a large map that covered the entire war zone after his upgrade. In this case, wouldn't it be much more convenient for him to move around?

As long as he searched carefully, it wouldn't be difficult for him to find Lou Cheng of the foreign tribe.

However, could he teleport on this map? How far could he teleport? The map interface that originally changed according to his environment could be restored?

With many doubts in his heart, Tang Zhen began to conduct the tests one by one.

He first tested the map function on his body. With a thought from Tang Zhen, the map of the spirit battle zone disappeared and turned into the map of the original world he was in. However, it only showed the surrounding area with a diameter of 1000 kilometers.

As the original application icon had disappeared, he could not find the shadow of the [map teleportation plug-in]. Upon seeing this, Tang Zhen could only try to teleport and see if he could do it.

In the end, with a thought, Tang Zhen's figure suddenly disappeared. The next moment, he appeared on a grassland with a herd of cattle and sheep passing by leisurely not far away.

When he looked at his current position, he was actually at the edge of the map 500 kilometers away!

Tang Zhen secretly nodded. So it turned out that the ability he had downloaded could still be used. It was just that he was unable to see it!

However, there seemed to be a voice in Tang Zhen's mind telling him that this teleportation ability that could only be used once a day could be used again. It was just that he would need to pay an increasing amount of origin stones.

In the end, he still needed money!

Tang Zhen suddenly felt that he was very poor. He was just like a person who was in urgent need of weapons and had suddenly entered a weapon store filled with firearms and bullets. His heart would throb and his eyes would turn red no matter which item he looked at. In the end, his pocket was empty.

That kind of feeling was really depressed to death!

He found a patch of grass and sat down. After informing the Secret Service personnel around him of his location and telling them not to worry, Tang Zhen sat down and continued to study the map.

Tang Zhen frowned slightly as he looked at the buildings in the spirit fall battle zone. He seemed to have discovered something.

A thought suddenly flashed in Tang Zhen's heart. He was slightly shocked and quickly found a tower. He continuously enlarged it and soon saw a group of numbers below the tower.

Below the other towers, there were also different numbers. The higher the level of the tower, the higher the number!

However, the frown on Tang Zhen's face grew increasingly tight after he saw these numbers. This was because he discovered that these numbers were all red!

For this mobile phone, anything marked in red could be listed as an enemy.

So what did these buildings, marked with red numbers, mean?

Tang Zhen didn't receive any information regarding this. Therefore, he still needed to find an opportunity to figure out what the red numbers meant.

These were all the changes after the phone was upgraded. What Tang Zhen was originally worried about didn't happen. Even if the previously downloaded application disappeared, it could still be used as usual.

Since the phone had been upgraded, the next thing Tang Zhen had to do was to deal with those foreign cultivators.

Now that he had mastered an even more powerful law star power, although he had not activated the law star and the extension star, as long as he paid the origin stone, it would not be a problem to use it a few times temporarily.

This mode was like a one-time use, but it was more cost-effective, because it could be used for a day!

With enough time, it should be easy for him to kill the foreign cultivators with this skill that contained the power of the law stars!

After studying the phone again, a murderous look flashed in Zhen Tang's eyes. He directly exchanged half of the origin stones he had saved and converted them into a set of 1:1 numbers.

However, all he had were low-grade origin stones. He wondered what the exchange rate would be if he exchanged them for higher-grade origin stones.

Of course, now wasn't the time for in-depth research. Moreover, he didn't have a higher quality origin stone, so this matter could only be put on hold for now.

With a thought, Tang Zhen locked onto a star behind the space law main star. Soon after, the group of numbers that he had just exchanged for kept shrinking. In an instant, they were all gone!

The corner of Tang Zhen's mouth twitched. He did not expect that this thing would be so costly. It had only been used temporarily once, but it had already consumed nearly half of his origin stone reserves!

Who knew how many origin stones would be consumed to activate the law star and the extended law stars?

Since the one-time magical skill had been exchanged, the next thing Tang Zhen had to do was to take revenge!

You bastards wanted to kill me before, but now that I've mastered the powerful power of the star law, I'm going to kill you all!

Just you wait, you'll regret it soon.

When he thought of this, Tang Zhen's figure flashed and instantly disappeared from his original spot, directly returning to the tower world.

Chapter 794 The prelude to! strange death

In the cloud fog ruins, a group of foreign cultivators were surrounding the huge pit with gloomy expressions. It seemed like they had been there for a long time.

The anti-demon disk was still floating in the air, spinning at the top of the pit. It made a buzzing sound that made people feel extremely irritated.

This was the first time this thing would act like this after losing its target.

As for the pit filled with the putrid liquid, it had already been smashed into a mess by the foreign cultivators. Now, the putrid liquid was splashing everywhere, and the nauseating smell lingered in the air.

However, the foreign cultivators didn't care about this. Instead, they were like stone and wood carvings, their eyes and spiritual power were fixed on the big pit, and they didn't move an inch.

They were accumulating their aura, like a powder keg that could be detonated at any time, and could easily blow the enemy into pieces!

Behind these foreign cultivators, the little monster looked dispirited. It lay on the ground listlessly and kept making "Wuwu" sounds as it looked at the pit, as if it was filled with endless grievances.

Its originally smooth and shiny fur had now become messy and dull, covered with dust and dirt.

A rope made of a monster's tendon was tied around its neck. It was held by a foreign cultivator to prevent it from escaping.

"It has already been three days. Don't tell me that Tang Zhen has already escaped?"

After a long silence, one of the non-human Kings asked.

"Impossible, he must still be here. Otherwise, the anti-demon plate wouldn't have been here all this time and sent out a warning!

He must be using a method we don't know to hide, but he'll still show himself eventually. As long as we wait patiently, we'll definitely be able to kill him the moment he appears!"

The leading two-star King tier immediately replied in a cold voice.

When the other foreign cultivators heard this, they didn't say anything. Even if they had objections in their hearts, they didn't dare to say it out loud for fear of angering this two-star King tier leader.

However, when they recalled what they had experienced in the past three days, all the cultivators felt a chill in their hearts. They subconsciously looked around, afraid that the vengeful giant mummified corpse and the invisible invisible evil demon would attack again.

One had to know that nine cultivators had already lost their lives, and the remaining ones were all injured. Even the two-star King tier leading the group had been injured by the invisible demon, and his body was still in intense pain.

In fact, he wasn't the only one in this situation. The other foreign cultivators were in the same situation, or even worse.

It was also because of this that they felt a slight sense of regret in their hearts. They secretly thought that they should not have been so possessed to enter this place.

Thinking back to the sudden death of their companions, the foreign cultivators felt that they were in a very dangerous situation. They had already encountered that kind of curse, and they might die inexplicably at that moment!

However, it was too late for regrets. Therefore, they could only shift this anger onto Tang Zhen. They could only hope that Tang Zhen would quickly appear and then cut him into eight pieces to vent the hatred in their hearts!

In fact, these foreign cultivators didn't know that the invisible demons were activated nanomachines. After they were activated, they immediately launched a frenzied attack on the foreign cultivators.

Although the number was limited, the destructive power could not be underestimated.

If it weren't for the fact that these foreign cultivators were strong, had sharp senses, and had powerful healing abilities, the nanomachines would have killed them all!

But even so, some nanomachines had more or less drilled into the bodies of these foreign cultivators and were destroying their bodies at all times. It was just that the speed was extremely slow.

However, if the damage accumulated, it would eventually become an incurable injury, causing these foreign cultivators to suffer from severe injuries and even lose their lives in serious cases!

Without specialized detection methods, these foreign cultivators had no way of discovering the existence of the nanomachines. They had no idea that the 'demon' was hiding in their bodies!

"Do a divination and see if you can determine Tang Zhen's exact location."

The leading two-star King tier was actually more anxious than anyone else. However, he had to maintain his calm on the surface to stabilize the emotions of the cultivators.

After waiting for a while, he couldn't help but turn his head and speak to the two star King tier who was skilled in divination.

This non-human King with braids on his head and a body full of bone ornaments immediately pulled out a crystal-clear monster skull from his waist. The skull was covered in all kinds of runes.

He mumbled to himself, his eyes glimmering with a divine light, his hands and feet dancing non-stop.

The non-human King struggled for a while, then suddenly raised his hand and waved at the bone. A gray-white dust spread out and attached itself to the surface of the bone.

At the same time, the king opened his mouth and spat out a flame that landed on the bone.

The moment the flame touched the bone, a few of the runes on the bone started to glow.

Seeing this, the non-human King immediately brought the skull in front of his eyes and looked at it carefully.

The non-human King furrowed his brows and said to the two-star King, "According to the divination rune, Tang Zhen is right beside us."

At this point, the divination King paused, his tone hesitant.

"What did we do? continue!"

The king leader frowned, his eyes fixed on the clairvoyant.

The clairvoyant continued. and we'll be in great danger. We might even be annihilated!

As soon as he said this, the surrounding foreign cultivators were stunned. Several of their expressions began to change rapidly.

They all knew the clairvoyant's strength and knew that he would never change the results of a divination. He always said what was on his mind.

However, if what he said was true, then it was definitely not wise to stay here for long. Otherwise, if the prophecy came true, they would really lose their lives here.

"No, I want to withdraw from this operation!"

A foreign cultivator growled and turned to leave, ignoring everyone's reaction.

However, at this moment, the cultivator's figure suddenly disappeared. Where did he go?

"Not good, it's Tang Zhen. Everyone, be careful!"

The leader of the two-star King tiers roared in anger. He immediately released his mental energy to search for Tang Zhen's traces. The other foreign race cultivators were even more on guard. Their cultivator skills were released repeatedly as they launched attacks at suspicious positions.

However, from the beginning to the end, Tang Zhen's figure had never appeared. It was as if he did not exist at all.

At this moment, a foreign cultivator let out a cry of surprise as he landed on the edge of the ruins.

A mangled corpse had appeared there at some point in time, and from the clothes it was wearing, it was the foreign cultivator who had suddenly disappeared.

However, looking at the degree of decomposition of his body, he had been dead for at least two days. It did not look like he had just died!

After hearing the foreign cultivator's exclamation, the other foreign cultivators rushed over and looked around vigilantly while checking the body of the foreign cultivator.

They all frowned and looked confused.

These foreign cultivators were very experienced and had seen countless corpses, so they could tell with a single glance that this corpse had indeed been dead for more than two days, and it was definitely not caused by some special killing effect of a cultivator's skill.

However, this fellow was still alive and well just a moment ago. How could he suddenly appear in such a dead state?

Could this be Tang Zhen's method?

If this was really the case, this Tang Zhen was really too terrifying!

Just as the cultivators were filled with doubt, another scream was heard. The cultivators looked in the direction of the sound and saw that a foreign cultivator had suddenly disappeared.

In the blink of an eye, he reappeared in front of the cultivators. However, he had turned into a corpse and was now lined up with the previous corpses.

Looking at the state of death and the degree of decay, it was exactly the same!

Chapter 795 Pressure, collapse (1)

Seeing that another of their comrades had been killed, many foreign cultivators had strange expressions on their faces and silently retreated a few steps.

At the same time, they didn't dare to move their gazes. They were all vigilantly watching the area that was being attacked.

But this time, the remains did not disappear. Instead, they splattered in all directions, dyeing the ground red.

Perhaps because the foreign cultivator's attack had a fire skill, the pieces of flesh fell to the ground and suddenly sparked, then burned violently.

It didn't take long for all the flesh and blood to turn into ashes, and the unpleasant smell of burning spread everywhere.

Dust to dust, earth to earth, turning into a handful of dust and merging into the earth was still much better than leaving a corpse in the wilderness!

However, the little monster had already disappeared. No one knew where it had gone, and all that was left was a broken rope.

"How is it?"

"Dammit, he ran away again!"

"En!"

The three two-star King tiers looked at the scene in front of them, exchanged glances, and muttered a few words to each other before shaking their heads in unison.

As for the other non-human cultivators, they had already regained their senses. They looked at the three two-star King tiers with a hint of wariness in their eyes.

Obviously, there was something wrong with the alien cultivator who had rushed toward the little monster. He didn't do it on his own will, but someone had controlled his body and mind.

The purpose of doing this was obviously to lure out the hidden enemy!

At this time, the only ones who could do this were these three two-star King tiers!

In the end, the invisible enemy appeared again. However, other than the futile sacrifice of another companion, the enemy was still unscathed!

However, the actions of these two-star King tiers caused the other non-human cultivators to feel a chill in their hearts. They were afraid that they would be the next one to fall into their trap.

Now that things had come to this point, they had already lost interest in obtaining the reward for killing Tang Zhen. They only wanted to escape from this place as soon as possible.

The foreign cultivators looked at each other, then turned around without hesitation and rushed out of the ruins.

As for the roars of the two-star King tier behind them, they completely ignored them and continued to return along the path they had come in from.

With their advantage in numbers, the three two-star King tiers didn't dare to attack on their own. Otherwise, if they were to encounter a group of people resisting, both sides would definitely suffer great losses!

In that case, they would become lambs waiting to be slaughtered, almost at the mercy of others!

However, even if these foreign tribe cultivators wanted to give up on killing Tang Zhen, it did not mean that they would be able to successfully escape. This was because there was still an invisible assassin waiting for them.

The three two-star King tiers were coldly looking at the scene before them. It was different from what the foreign race cultivators had guessed, because they didn't pursue!

Now wasn't the time to worry about these things, not to mention teammates who had lost their fighting spirit. Even if they were found, it would only add to the chaos.

They looked at the place where the bodies were placed in silence. They were obviously waiting for something.

Sure enough, it didn't take long for a body to appear out of thin air and be placed neatly beside the other two bodies.

Seeing this, the three two-star King tiers revealed expressions of 'I knew it'. However, they didn't do anything, and could only look on coldly.

"I can be sure now, he really doesn't plan on letting anyone go!"

"Can you divine his exact location? otherwise, it'll be our turn to be plotted against sooner or later, so we can't just sit back and wait for our deaths."

"I'll try, but I can't be disturbed during this period!"

don't worry. With the two of us here, that guy definitely won't dare to come over. Does he really think that our strength is just for show?"

After a few simple words, the two star King tier who was skilled in divination sat down cross-legged and began the divination ritual under the protection of his two companions.

In this short period of time, another corpse appeared and was placed next to the previous one.

This strange scene that continued to occur made the two-star King tier's heart begin to feel uneasy.

Up until now, he had no choice but to admit that he had underestimated Tang Zhen's strength earlier. He did not realize that Tang Zhen actually possessed so many strange techniques.

If he had known that this would happen, he would have made more preparations before he took action!

However, he did not regret his decision to kill Tang Zhen. As the saying goes, wealth comes from danger. There were many times when benefits and risks were directly proportional. If he did not take the risk, the benefits would definitely not come to him.

Therefore, the current danger was within his expectations. Even if a more dangerous situation appeared, he would have the means to deal with it.

However, he wouldn't use such a method unless he had no other choice, because it was definitely a method to harm himself and the enemy!

At this moment, the number of corpses was still increasing. The fifth, sixth, and seventh Taowu corpses appeared.

After all the corpses were placed in a long row, they waited for a long time before no more corpses appeared.

The leader of the king tiers swept his gaze across the area. It seemed that all the foreign cultivators who had escaped earlier had been killed by the invisible enemy, and their corpses were all laid out here.

No, there was still a one-star King tier from another race who wasn't here. Where had he gone?

Right at this moment, a series of footsteps could be heard. The missing non-human King was stumbling his way toward them.

However, he was in a terrible condition. His armor was damaged and his body was covered in blood.

His green-faced, fanged face was filled with panic and fear. He no longer had the demeanor of a King-level cultivator.

When he arrived in front of the three non-human Kings, his body immediately went limp and he fell to the ground. He even threw his weapon to the side and stared at the row of corpses in a daze.

However, from his trembling body, one could tell that he was not calm at all.

"Didn't you already run away? why did you come back?"

The two star King tier leader looked at the non-human cultivator on the ground and snorted coldly.

The non-human cultivator trembled when he heard this. He turned to look at the leader of the Kings and said in a trembling voice, "that guy has no intention of letting us go at all. He has been chasing after us on the way out of here!

At this point, the non-human cultivator's face was filled with fear as he continued, "other than me, the other companions disappeared in the blink of an eye. There's no way to avoid them!

we're no match for him. Absolutely not!

"Why don't we beg him to let us go?"

The non-human cultivator's expression became extremely excited as he spoke. He crawled up and rushed to the leader of the Kings, hugging one of his legs and begging.

"Useless trash, get lost!"

The leader snorted coldly and kicked the non-human cultivator to the side with a disdainful expression.

The non-human cultivator didn't seem to give up and started to pray to another two-star King tier.

The Silent King was unmoved as well. Like a rock, he guarded the clairvoyant.

However, at this moment, the non-human king who had been performing divination suddenly opened his eyes and spat out a mouthful of blood. He yelled in shock, "It's Tang Zhen! It's him!"

"What happened? can you be more specific?"

The leader turned to the clairvoyant.

“The one who attacked us was Tang Zhen. He dragged the people into the river of time and then killed them!

We’re no match for him, absolutely not. This matter was a mistake from the start!”

The clairvoyant’s face was filled with fear as he spoke. It was as if he had never thought that there would be such a killing technique, so he was still in shock.

To be able to enter the long river of time and even drag the enemy into it, this was no longer as simple as an ordinary cultivator’s skill!

Tang Zhen had indeed mastered the method to borrow the power of law. Moreover, it was not just one method!

It seemed that the terror of this cultivator who had crossed the border had far exceeded their imagination. No wonder he was wanted by the entire battle region of the cornerstone platform!

The leader of the cultivators seemed to be getting impatient. He shouted at the clairvoyant, “Don’t say such useless things. Tell me, do you know where Tang Zhen is?

As long as we can find his location, we can kill him!”

The clairvoyant was taken aback. He looked at the crowd and said, “He should be in Xuanji, he should be in Xuanji.”

“Where is it? why don’t you tell me?”

The king-level leader continued to shout and ask with an anxious look on his face.

“It’s right in front of you!”

A cold voice sounded, and the three non-human Kings were taken aback. When they looked in the direction of the voice, they saw the non-human cultivator who had been scared out of his wits smiling eerily at them.

Chapter 796 fear and bait

This sudden and strange scene shocked all the foreign cultivators!

What kind of special method could cause such a scene of death?

And what was the other party trying to do?

If it was just a simple threat to increase the psychological pressure on the foreign cultivators, the other party had clearly achieved their goal!

At this moment, the threat of death was spreading in their hearts. The invisible enemy was the most terrifying, and this strange way of disappearing and dying had cast a shadow over their hearts.

“Damn it, tell me, what’s going on?”

One of the foreign cultivators looked at his good friend's corpse and trembled. He looked away from the corpse and couldn't help but roar at his companion.

I'm not sure. Anyway, everyone must be on high alert!

The rest of the foreign cultivators were also at a loss. After all, this was the first time they had encountered such an attack. They had no idea what was going on.

Although they were supposed to be on high alert, all the foreign cultivators present were extremely nervous, afraid that the enemy would target them!

"Tang Zhen, it must be Tang Zhen. That damn cultivator who crossed the boundary!"

The non-human cultivator who had been exposed roared. His eyes widened as he searched the ruins around him. The demonic bow and arrow in his hand danced and shot out sharp arrows!

The arrows were so sharp that even the hard rocks were pierced by them!

Some of the arrows even had energy added to them, making them like small bombs after they were shot out, exploding into broken bones and sending them flying. There were also pits of different depths on the ground!

However, what he did could not solve any problems at all. He was just taking the opportunity to vent the anger and fear in his heart. Other than that, he also wanted to see if he could alert the enemy.

"The enemy's methods are strange. Everyone must be careful and not fall for it again!"

The leading two star King tier coldly shouted. After giving another warning, his eyes flickered and fell on the two broken corpses again, trying to find some clues.

But at this moment, a foreign cultivator in the middle of the group suddenly screamed in fear.

"Not good, I'm Yingying!"

Before he could finish his sentence, the foreign cultivator's body began to fade as if he was about to disappear from everyone's eyes.

attack that position! Don't worry about anything else!

The leading two-star King tier saw this and roared with killing intent. He actually ignored the fear and pleading look in the foreign cultivator's eyes and directly swung his fist.

This attack that was filled with hatred had actually turned the air into a liquid and landed on the body of the foreign cultivator as if it had a physical form!

The rest of the foreign cultivators reacted extremely quickly. Under the threat of death, they couldn't care less. All of them took out their most powerful attacks and mercilessly smashed the area around the foreign cultivator!

With a miserable shriek, the foreign cultivator, who was attacked by so many cultivators at the same time, turned into a mass of blood and flesh with despair and hatred on his face!

However, the flesh and blood did not fall to the ground. Instead, it seemed to have been completely absorbed by the transparent air, leaving nothing behind in the blink of an eye!

“Damn bastard!”

The two-star King tier roared at the empty space and charged over. He brandished the saber in his hand and slashed at the air without any resistance.

The other cultivators looked at the same spot where the body was just now, trying to see if the remains would appear again.

One second, two seconds.

After a full minute, there was nothing unusual at the place where the two bodies were placed.

Although they didn't see what they had expected, the foreign cultivators heaved a sigh of relief for some reason, and their tense nerves relaxed a little.

Could it be that he was thinking too much? the appearance of these two corpses was just a coincidence and not to tell them that the other party wanted to kill them all?

However, at this moment, a pile of flesh and blood appeared in the air. It was the remains of the foreign cultivators who had just disappeared. Now, it was smashing down on the heads of the foreign cultivators!

The cultivators were caught off guard and were instantly drenched in the stinky filth. They were all extremely furious!

The leading two star King saw this and turned to look at the king next to the clairvoyant, giving him a meaningful look.

This non-human cultivator was also a two-star King tier, but he hadn't said a single word from the beginning to the end, making it seem as if he didn't exist at all.

At this moment, after seeing the two-star King tier's signal, his cold face twitched. He slowly extended his mind power and locked onto a foreign race cultivator.

At the same time, a tongue-twisting incantation slowly floated out of his mouth.

“Ah, Yingluo.”

The blood-covered foreign cultivator's eyes immediately turned red with madness. As he roared, his eyes fell on the little monster beside him.

“Haha, Tang Zhen, didn't you say that you weren't coming out? Alright, I'm going to kill this little thing. Let's see what you can do about it.”

As the cultivator spoke, he rushed toward the little monster on the ground, intending to crush it to death!

The little monster, who had been watching the fun with widened eyes, suddenly screamed in fear and turned around to escape.

However, the rope tied to its neck pulled it backward and it rolled on all fours!

“You want to run? you’re dead!”

The non-human cultivator’s face was twisted as he glared at the little monster with killing intent. This seemed to be the only way for it to vent its anger and fear.

Just as his sharp nails were about to touch the little monster, an invisible wall seemed to appear in front of him, blocking his momentum.

At the same time, the foreign cultivator seemed to have lost control of his body. He was lifted up by the neck by an invisible force and he let out a painful groan.

The little monster, who had been squinting in fear, now widened its eyes and stared blankly ahead, but there was a trace of joy in its eyes.

he’s been tricked! Attack!

The two-star King tier in the lead revealed a look of joy, and he immediately threw out a skill that he had already prepared. The two two-star King tiers beside him also attacked at the same time.

Looking at them, it was obvious that they had planned this!

The foreign cultivator’s eyes suddenly regained a trace of clarity. He seemed to have realized something and began to struggle.

His eyes were also filled with anger and regret.

“You Wuwu bastards!”

After uttering these words with great difficulty, the foreign cultivator was blasted into pieces by his own people, just like the unlucky fellow just now!

Chapter 797 confinement, annihilation

“Not good!”

When the Three Kings saw that strange smile, their hearts began to race. Without any hesitation, they prepared to use their skills to attack.

However, they were still a second too slow compared to the foreign cultivator.

One slow step meant that every step was slow, not to mention that this was a life and death situation!

Although a second passed in the blink of an eye, it was enough for a King level cultivator to do a lot of things!

At this moment, a blade burning with black flames suddenly appeared in the non-human cultivator’s empty hand. Before the non-human King could react, the blade had already pierced through his abdomen!

Not only could the black flames set everything on fire, but they could also instantly turn his internal organs into charcoal, completely destroying his entire chest and abdomen!

The non-human King's face twisted, and just as he was about to say something, his head exploded.

After killing a two-star King tier, the foreign cultivator's body suddenly disappeared. When he reappeared, he was already next to the clairvoyant.

"Be careful, he's Tang Zhen!"

The clairvoyant tried to attack, but he suddenly felt a sharp pain in his eyes. Two streams of blood shot out.

It turned out that when he had gotten close to the three foreign Kings, Tang Zhen had controlled the nanomachines to attach themselves to the clairvoyant's body. Now that the battle had begun, he had instantly blinded the clairvoyant's eyes!

The clairvoyant roared in grief and indignation, but before he could react, Tang Zhen's purple electric short sword pierced through his head, and his body fell limply to the ground.

At this point, two of the three two star King tiers had already been killed. The remaining two star King tier leader had already let out a wild laugh as he controlled the anti-demon plate to smash towards Tang Zhen.

you can't run away. I'll kill you for sure. Those rewards are all mine, hahaha!

As the non-human King laughed maniacally, the huge anti-demon disk seemed to lose control and smashed toward the two of them.

At the same time, the surface of the anti-magic compass suddenly changed. Countless runes emitted a piercing light and a cylindrical light shield was projected from the edge of the anti-magic compass!

This huge light barrier covered the entire surrounding space. Tang Zhen and the two-star King tier leader were at the center of the light barrier. They were currently looking at each other!

"Tang Zhen, you're about to die!"

This was the ultimate killing move of the anti-magic disc. It sealed the internal space and prevented teleportation. Then, the violent energy accumulated by the anti-magic disc would explode in an instant, destroying everything in the area!

Even if you have heaven-defying means, you will die without a doubt this time!"

The leader of the king tiers revealed a crazed and proud expression. He completely ignored the increasingly dense and violent energy in the surroundings as he loudly roared at Tang Zhen.

Tang Zhen coldly laughed. Because he had changed his appearance, his smile looked extremely sinister.

it's okay. You're here with me, aren't you? at most, we'll die together. I won't lose anything!

Tang Zhen carried a mocking smile as he spoke indifferently to the king tier leader.

"Hahaha, how is that possible? I'm the owner of this anti-magic board, so I'm under special protection!

Even if he was injured, it would not affect his movements!

On the other hand, I'm afraid you'll die a terrible death, hahaha Yingluo."

As the two of them spoke, the energy in the surroundings accumulated more and more, as if it was about to condense into fog.

It was Tang Zhen's first time seeing such a high density of energy. He also knew that once it exploded, it would definitely form an incomparably terrifying destructive force!

Tang Zhen clearly understood that this old fellow had probably been holding back his big move all along. Now that he saw Tang Zhen fall into the trap, he had clearly begun to become complacent!

Clearly, he was clearly aware of Tang Zhen's strength. He knew that Tang Zhen would definitely be unable to kill him within ten moves if he was on guard. Moreover, as long as he detonated his energy during this period of time, Tang Zhen would definitely die!

The reason why he was speaking nonsense with Tang Zhen was to delay time and allow the energy in this space to accumulate even more.

In this way, the confidence of killing Tang Zhen would be even greater!

However, at this moment, Tang Zhen, who had been sneering the entire time, suddenly retracted his smile. He softly said, "Idiot, do you really think you've got me?"

When the king-level leader heard this, his heart trembled violently, and a sense of uneasiness crept into his heart.

"What do you mean by this?"

The king class leader asked as his eyes stared intently at Tang Zhen.

I'm saying you're an idiot. Do you really think that this mere anti-demon plate can trap me? "

Looking at the bewildered expression on the king level leader's face, Tang Zhen casually took out a miniature version of the Super bomb. After tossing it twice, he indifferently said, "Didn't you want more energy to be accumulated here so that the explosion would be more powerful?"

Don't worry, I'll help you again and make the explosion even more powerful. Remember to enjoy it!"

As soon as he finished speaking, Tang Zhen's figure suddenly disappeared under the incredulous gaze of the king-grade cultivator.

At the same time, the miniature version of the Super bomb exploded in an instant. The terrifying shock wave spread out in an instant, spreading and reverberating in the isolated area.

As for the violent energy that had already been compressed into a liquid state, it directly detonated. Its power was far more terrifying than the shrunken version of the Super bomb.

"No, I'm not."

The king-class leader's face was filled with despair. He knew that it was too late for him to do anything now.

With a heart full of unwillingness and regret, his figure was instantly swallowed by the terrifying energy, and he was torn to pieces in the blink of an eye!

At the last moment before his consciousness disappeared, he had been thinking about one thing. How did Tang Zhen escape from the region that isolated the instant transmission?

If Tang Zhen knew his question, he would definitely tell him the real answer, allowing this king class leader to die in peace.

The truth was that Tang Zhen had not been teleported away. Instead, he had entered the long river of time and ran to two days ago!

This was the one-time ability that Tang Zhen had purchased from the time law main star. It allowed him to return to a fixed area 48 hours ago. He had used this ability to kill the foreign cultivators who had been here since two days ago!

This kind of ability was very powerful, but it also had many restrictions. For example, it had a fixed range of influence. If those foreign race cultivators exceeded this range, Tang Zhen would not be able to use this law ability to kill them!

If these foreign cultivators had too much contact with outsiders in these two days and were involved in more karma, the difficulty of killing Tang Zhen would also increase. In serious cases, he would not be able to use this method to kill him!

Fortunately, the above situation did not happen. Therefore, Tang Zhen was able to easily kill them!

Therefore, although this kind of law skill was powerful, there were also many restrictions. Otherwise, Tang Zhen would not be afraid of any enemy just by relying on this ability!

No matter what, the enemy this time around had already been dealt with. Even if he did not see the corpse of the king tier leader for the time being, Tang Zhen also knew that the other party was dead without a doubt!

Otherwise, Tang Zhen would still run as far away as he could. That was because it was definitely better not to provoke an existence that could not be killed.

If news of this battle's result were to spread, it would definitely shake the entire world. It was likely that the number of cultivators who tried to kill Tang Zhen to obtain the reward would be directly reduced by 99%!

After all, no matter how tempting the reward was, one had to be alive to enjoy it. Moreover, they did not have the confidence to win when facing such an abnormal Tang Zhen, alright?

Chapter 798 News and reaction (1)

The wind stopped, and the dust fell. The ruins that were originally shrouded in clouds and mist finally regained their calm.

Perhaps after this period of peace, this place would be completely abandoned, and no one would care about it anymore.

Because the clouds in the sky had begun to dissipate, and without the special powder's maintenance, the metal remains would soon decay, turning into dust along with the bones of the residents of the giant tower!

After a terrifying explosion, the ruins became even more dilapidated. In the center of the explosion, there was even a large piece of crystallized ground that reflected the sunlight that had shone in for the first time in countless years.

Tang Zhen's figure suddenly appeared. He slowly walked through the ruins and quickly arrived at the location of the explosion.

As he had expected, nothing could remain intact under that kind of explosion, so the place had long been beyond recognition, leaving only scorched earth and wreckage.

However, after Tang Zhen searched around, he still discovered the devil suppressing plate that was inserted into the soil in the distance!

However, the surface of the anti-demon plate was covered with huge cracks, revealing the complex internal structure. The runes on its surface had long dimmed.

Tang Zhen clicked his tongue in wonder as he looked at the internal structure of the devil suppressing plate. It seemed that there were too many races with wondrous ideas in the countless other worlds. The items they created were also not to be underestimated.

The anti-magic compass in front of him was an obvious example!

This kind of item had a special effect of catching the enemy by surprise. The only flaw was that it was too large and could not be easily carried.

If he could reduce its size and still maintain its original effect, Tang Zhen would not mind mass-producing it for the Holy Dragon city's cultivators to use as standard equipment.

However, it was precisely because it was too big and the devil suppressing plate had been destroyed that Tang Zhen had given up on the thought of bringing it away.

Therefore, he first carefully studied the operating principle of the anti-magic disc and recorded all the runic magic circles. After that, Tang Zhen carefully broke it down and stored it in his storage space in batches for future research and use.

When he had the opportunity, Tang Zhen might duplicate something similar. After all, if this thing was used well, it would definitely be a sharp weapon to use against the enemy!

In the process of studying it, Tang Zhen discovered that there should be another control panel within this anti-magic disc. It should be on the ruler's body.

However, after that explosion, the ruler-level creature had probably been reduced to dust. Who knew if the control board would survive?

In addition, the ruins had already been completely transformed. Who knew where the control panel had been buried? if they searched blindly, it would be like looking for a needle in a haystack.

Therefore, Tang Zhen directly took out the reincarnation mirror and let the guard Command a large group of spirit bodies to start searching. If they encountered similar or suspicious things, they would bring them over.

A spirit body was a special form of energy. When it reached a certain level, it could use its spiritual power to create illusions, move objects, or turn spiritual power into physical attacks.

Therefore, it was not difficult for them to move small items.

After giving the order, Tang Zhen went to the edge of the ruins and brought back the hidden little monster.

After throwing a large pile of food to the little fellow, Tang Zhen continued to study and break down the devil suppressing plate. While the overseer was observing, he was also continuously directing the spirit body's actions.

It was difficult for those spirit bodies to get outside to let out some air. In addition, there were rewards for doing a good job. Therefore, they were all rushing to be the first and were constantly shuttling back and forth between the ruins.

For a moment, the ruins were filled with ghostly shadows. Countless spirits shuttled back and forth between the bricks and stones, and from time to time, they would gather with an item.

It didn't take long for the items to pile up to the height of a person, and they gave off a faint smell of dirt.

Tang Zhen casually glanced at them and discovered that most of the items were gemstones, pearls, and Jade. There were also some fragments of demonic weapons and equipment. Because they emitted an unusual aura, they were treated as good items by these spirits.

If a Wanderer were to obtain these items, they would definitely be overjoyed. After all, this was a considerable amount of wealth.

However, to Tang Zhen, these things did not have much meaning. They were not much different from trash.

However, he would not waste it. He would pack it up and bring it back to Holy Dragon City for the residents to sort it out. Maybe he could find something good here.

After a while, a spirit body finally flew back, holding a small plate-like object in its hand. It was the control panel that came with the anti-magic plate!

Tang Zhen flipped it over in the air and examined it a few times. After confirming that there was not too much damage, he was satisfied and rewarded those spirit bodies with a handful of meteorite sand.

Everything that needed to be done had been done. There was no need for them to stay any longer. Therefore, Tang Zhen waited for the spirit bodies to finish fighting for the out of body sand before keeping the reincarnation mirror and quickly rushed towards the edge of the ruins.

After he left the ruins, Tang Zhen soared into the sky and disappeared without a trace!

Not long after he left, another group of foreign cultivators arrived at the ruins. Among them were reinforcements and cultivators who had refused to enter the ruins.

After the explosion, they saw that the clouds had dispersed and their vision had become clear. They could not hold back their curiosity and entered the ruins together.

In the end, he didn't walk far before he saw the disaster-like scene.

After a careful search, they even found the remains of some alien cultivators, who had died in terrible ways!

However, from the beginning to the end, they did not find any evidence of Tang Zhen's death. Therefore, the final result of this interception was self-evident.

All of the foreign tribe cultivators sucked in a breath of cold air. They had never expected that Tang Zhen would not be safe and sound under the pursuit of more than twenty experts. On the contrary, he had killed all the enemies who were chasing him!

This kind of terrifying strength could simply be called heaven-defying!

The foreign cultivators who had stayed at the edge of the ruins were secretly rejoicing. If they hadn't been afraid to enter the ruins, they would have been dead by now!

After the foreign cultivators left, the details of the battle quickly spread among the high-level buildings.

When the foreign tribe cultivators heard this result, they were all shocked. Some of the foreign tribe cultivators who had tried to kill Tang Zhen immediately gave up on the idea.

Originally, they thought that no matter how strong Tang Zhen was, he would not be able to defeat the Joint Forces of a group of cultivators. It would only be a matter of time before he was killed.

There were even cultivators who sighed. They were too far away from Tang Zhen's path of advancement. Otherwise, they would have definitely participated and killed Tang Zhen!

However, as the results of this battle came out, those foreign cultivators who had shouted that they wanted to kill Tang Zhen immediately pretended to be mute and no longer mentioned this matter.

After analyzing the strength that Tang Zhen had displayed, he knew that ordinary cultivators in Loucheng city were no match for him. Therefore, it was simply a sensationalism to please the crowd and make people despise him.

Moreover, the cultivators of Loucheng had always respected the strong. Even if Tang Zhen was a cultivator who had crossed the boundary and did not belong to their battle zone, he had won the respect of some true experts with his own strength.

They sternly warned the cultivators of the forces in the city not to provoke Tang Zhen so as not to bring unnecessary disaster to the city!

as a result, there were a large number of interceptors.

However, these experts from the foreign tribes were extremely interested in Tang Zhen's next target. They all headed to the thousand mile icy Plains in an attempt to see Tang Zhen's true strength.

If he was really as powerful as the rumors said, then he would just treat it as a game and watch the battle from the sidelines.

However, if Tang Zhen only had a false reputation, these foreign tribe experts did not mind killing Tang Zhen and obtaining the reward that was considered generous to them.

There were many cultivators in loucheng who had this thought. Hence, a strange scene appeared on Tang Zhen's journey!

Chapter 799 Change and benefits! 1!

Tang Zhen didn't understand the reactions of these foreign race cultivators. He was only prepared to fight at any time.

Although the group of foreign cultivators had been killed, he had experienced the means of these cultivators. Therefore, he did not dare to underestimate his enemy and went all out once they started fighting!

Tang Zhen frowned when he flew over a city on the flying carpet. He saw the figures of more than ten cultivators in the city.

Other than the king level cultivator, the rest were all Overlord level cultivators. They were all floating in the air and looking at him.

Tang Zhen thought that he had encountered an enemy that was trying to stop him. Although there were not many of them, he did not let his guard down.

Therefore, he directly took out his anti-aircraft gun and aimed it at those foreign cultivators, ready to fire at any time.

Who would have expected that Tang Zhen would not sense any killing intent from the other party after he gradually approached. Even the building below did not have any martial law!

This situation was definitely not the posture to face the enemy?

Just as Tang Zhen was feeling puzzled, he saw the only one-star King tier among the group of alien cultivators step out and bow to Tang Zhen from a distance.

"The king tier cultivator on the other side, is it His Excellency Tang Zhen, whose name has recently spread throughout the spirit battle zone?"

Tang Zhen's expression did not change when he heard this. He gently nodded his head, "That's right, I'm tang Zhen. May I know what you need?"

It was useless for him to deny this matter. After all, it was impossible to change his soul aura. The other party only needed to investigate a little to confirm it. Hence, Tang Zhen openly admitted it.

As for what tricks the other party wanted to play, Tang Zhen didn't reject them and just took them all!

In the end, the cultivators in loucheng city still relied on their strength. As long as they maintained this suppression, Tang Zhen would not fear any enemy!

The king from the other race did not reveal any surprise when he heard this. Instead, he laughed out loud at Tang Zhen, "I've long heard of your deeds. You single-handedly destroyed a National City, escaped the pursuit of countless cultivators for tens of thousands of miles, and even killed countless powerful enemies!

Such an amazing battle record is truly admirable. Every time I think about it, I wish I could take his place and experience that kind of grace that disdains all heroes!"

At this point, the king of the foreign race revealed a look of longing on his face. As for the other foreign race Lords behind him, when they looked at Tang Zhen, they also had a trace of respect and vigilance.

Tang Zhen faintly smiled when he heard this. As the saying goes, "one does not slap a smiling person." The words of this King from the foreign race caused Tang Zhen to be unable to continue to maintain a straight face.

"Sir, you're too kind. I just don't know if there's anything I can do for you."

Tang Zhen was in a hurry. If the other party was not an enemy, there was no need for him to delay. Hence, he directly asked.

it's nothing. I just thought you might have passed by my loucheng, so I came out to meet you. Please don't misunderstand!

After explaining, the foreign King took the initiative to open up a path. He cupped his hands towards Tang Zhen and said, "I know that Sir Tang Zhen still has important matters to attend to, so I won't waste your time.

However, if you pass by here on your way back, please come to loucheng as a guest and have a cup of our loucheng's specialty wine to relieve your boredom!"

"Thank you for your kind intentions. This Tang will take his leave then!" Tang Zhen nodded and cupped his fists.

After speaking, Tang Zhen controlled the flying carpet and disappeared into the horizon under the gazes of the group of foreign cultivators.

The non-human King looked at the spot where Tang Zhen had disappeared and remained silent for a long time. No one knew what he was thinking.

One of the Lord-tier cultivators saw this and couldn't help but ask, "City Lord, this Tang Zhen is indeed shockingly powerful. However, there is no need for us to take the initiative to befriend him. After all, the other party is a cultivator from another battle region."

The non-human King shook his head and explained, "Although we belong to different battlefields, it doesn't mean that we can't communicate with each other. In fact, most of the famous National loucheng on the list have connections with the powerful loucheng in many battlefields.

In this way, not only could both parties exchange information and items, but they could also cooperate even when they invaded another world!

This Tang Zhen's strength is astonishing, and the tower he's in is definitely not weak. If we can befriend him, it will only be beneficial to us and not harmful!"

At this point, the non-human city Lord chuckled and said to his trusted subordinate, "Do you think I'm the only one who thinks this way? you're wrong. In fact, many city Lords have this thought in their hearts!

After all, such an opportunity was rare. Once he encountered it, he had to make good use of it.

As for the difference between the warzones and the rewards from the cornerstone platform, they can be completely ignored because an excellent partner will definitely bring unimaginable benefits to loucheng!"

Seeing that his trusted subordinate was still confused, the non-human city Lord continued to explain, "What, you still don't understand?"

In fact, to put it bluntly, Tang Zhen's Tower did not belong to this war zone. Therefore, there would not be too many disputes over interests between them. There was no need to worry that he would stab them in the back!

On the contrary, they could use the advantages of their respective battlefields to let each other obtain more benefits. This was the key to this matter!

After all, there are too many dirty things happening between the loucheng in the same battle zone. Therefore, in comparison, the Allies of the loucheng in other battle zones are more reliable!"

When the other Lords heard this, they all nodded their heads.

Over the years, they had indeed seen and heard of many battles between countries, which were nothing more than fights for territory, resources, and to expand their base as much as possible.

In fact, most of the time, these resources and territories were not used by the National loucheng at all. Instead, they were distributed to the loucheng controlled by the subordinates.

Although invading foreign worlds was something that these national-level towers had to do, and they could also obtain countless resources and battle merits through this method, the world of towers was the foundation of all towers!

Without a steady stream of residents, these National Buildings were like water without a source. Sooner or later, they would dry up!

For the sake of the long term, these towers attacked without any hesitation!

However, some alien races were extremely xenophobic, so there were no other races in the tower, not even servant races.

Once these towers were upgraded to a national level, they would then truly leave the world of towers and rarely show themselves in the outside world.

Only when they encountered something that threatened the interests of the towers would these secluded National towers take action. This time, the black dungeon tower that was plotting against the Holy Dragon City belonged to this kind of situation.

The strong rise of the Holy Dragon City had already made the black prison tower feel threatened. Therefore, they would use unscrupulous means and wanted to use this method to break Tang Zhen's Foundation!

However, the residents of the black prison tower didn't know that they didn't kick an iron plate this time. Instead, they kicked a bomb that was enough to destroy the world!

When Tang Zhen's Fury descended, would they feel regret for their actions back then?

Chapter 800 arrival, first battle

As expected, Tang Zhen not only killed a few waves of assassins who were overconfident, but he also encountered a few waves of foreign tribe cultivators who were deliberately waiting for him.

Without exception, none of them had any intention of making a move. Instead, they took the initiative to go forward and greet him, just to make themselves familiar.

Tang Zhen also welcomed such foreign cultivators with a smile. After chatting with each other for a while, they bade farewell.

Tang Zhen did not expect such a situation. However, after thinking about it, he could guess the thoughts of these foreign race cultivators.

After knowing the plans of these foreign tribe cultivators, Tang Zhen laughed softly in his heart and did not continue to think about it.

In truth, if he could really cooperate with these foreign races, Tang Zhen would not reject it. After all, no one would be against benefits.

Back then, when he was at the Wanderer market at the edge of the dangerous mountain range, Tang Zhen had already clearly known that there were National towers behind these markets. Moreover, there was more than one.

Otherwise, why would a Wanderer market have so many high-level cultivators and even King level cultivators?

Such a situation would never happen in the Wanderer markets in other places!

It was obvious that these National loucheng had sent their men to control this place and made private transactions with their partners. In the market area, this was already a half-open secret.

It was also because of this that the Wanderer market could remain safe and sound under the coveting of countless greedy people, and always maintained its original operation mode.

Therefore, if they didn't understand this and set their eyes on the market without permission, they wouldn't be far from death!

If Tang Zhen were to cooperate with these towers, he would also need to station his men in the Wanderer market and regularly trade with his partners in the spirit battle zone!

With the Holy Dragon city's current strength, they could completely take this piece of fat meat, so it was not impossible to consider it.

After switching to the map interface, Tang Zhen glanced at the foreign race's city on the ice plains and discovered that it was actually very close to him!

When he thought of this, Tang Zhen raised his head and looked in front of him. He immediately discovered that a white line seemed to have appeared extremely far away at the end of his sight.

Tang Zhen's heart immediately rejoiced when he saw this scene. He stood up and looked into the distance, only to see a vast ice field and snow region appear in front of him.

Along the way, Tang Zhen had actually sensed the change in temperature. It was a process of gradually becoming colder. At this moment, even the air that brushed against his face carried a bone-piercing chill.

Therefore, even without the guidance of a map, he could be sure that the foreign tribe's city was getting closer and closer from these signs.

At the same time, Tang Zhen was also constantly seeing traces of foreign cultivators on the ground. They were rushing towards the thousand li ice field in groups.

When they saw Tang Zhen in the sky, these foreign cultivators stopped and pointed at him. Their faces were filled with curiosity and vigilance. They had obviously recognized Tang Zhen's identity.

In fact, these cultivators were going to watch the battle in the city of the alien race on the icy Plains. Their strength was different, so even if the battle started, they would definitely not interfere.

In fact, they really hoped that Tang Zhen would win because if Tang Zhen won, they might be able to take the opportunity to make a small fortune!

After all, after the city was broken, the items in those towers could be taken as much as they wanted. How could they miss this opportunity?

Even if Tang Zhen failed, they would just treat it as a big show. After all, this kind of thing where he challenged a national-level city alone made people's hearts jump just thinking about it!

Moreover, Tang Zhen had already destroyed a national-level city before this. Therefore, these foreign cultivators were full of anticipation for his next action.

As for joining forces against Tang Zhen, that was just a joke. These cultivators didn't have such a high sense of honor and belonging.

Even if they had chased after Tang Zhen earlier, they were only driven by their own interests. It had nothing to do with the dignity of the war zone!

The matter didn't concern them, so they had to leave it high up. What they wanted to do was just to watch from the sidelines!

What happened next was even more outrageous. Even during Tang Zhen's journey, there would be foreign cultivators following behind him from time to time. They didn't care if Tang Zhen was willing or not and just swaggered behind him.

However, even though these foreign tribe cultivators followed closely behind, they still maintained a safe distance from Tang Zhen to avoid any misunderstandings.

From this, it could be seen that they were still afraid of Tang Zhen in their hearts.

Tang Zhen ignored him when he saw this. Instead, his eyes looked at the thousand mile icy plain that was getting closer and closer as killing intent rose in his eyes.

He was about to enter the territory of the alien race's Tower. With the power of the alien race's Tower, it would not be difficult for it to control the ice field. Therefore, it was very likely that the moment he entered the ice field, a battle would break out!

Tang Zhen was already prepared for this. No matter what happened, it would not be able to stop his determination to destroy this ice plains foreign tribe city!

The matter was indeed as he had expected. After Tang Zhen's figure entered the thousand li ice field, countless foreign race cultivators suddenly jumped out from the White snow.

They either formed a battle formation or rode on flying monsters to surround Tang Zhen who was in the air!

Looking at the appearance and equipment of these foreign cultivators, they were clearly the servants of the ice Plain City and were in charge of intercepting Tang Zhen.

Perhaps the other party didn't expect these servant cultivators to be able to kill Tang Zhen. Their true goal was nothing more than to consume his physical strength and weaken his edge. After that, they would wait for an opportunity to launch a fatal attack!

The strength of these foreign servant cultivators wasn't weak either. There were nearly a thousand of them, but Tang Zhen didn't even put them in his eyes.

"Sir Tang Zhen, I've been ordered to wait here. Please return the way you came!"

The leader of the foreign cultivators stepped out from the crowd and cupped his hands towards Tang Zhen as he spoke in a clear voice.

Tang Zhen glanced at the leader of the foreign race cultivators and said in an indifferent voice, "This is impossible, and whoever blocks the way will die!"

The leader of the foreign cultivators was disappointed when he heard this. Then, a strong fighting spirit rose from his body.

"If that's the case, then I'll have to offend you!"

As soon as he finished speaking, the battle began. All the foreign cultivators launched their attacks at the same time.

Tang Zhen's expression remained the same as he casually pointed a finger at the foreign tribe cultivators who were attacking him with ferocious expressions.

More than 20 streams of light suddenly flew over and landed in the middle of these foreign cultivators with lightning speed. Immediately, blood mist sprayed out like blooming blood flowers, emitting a faint mist and floating on the snow-white ground.

The blood-red color that appeared on the snowy plains was truly dazzling!

The foreign cultivators were no match for the flying swords. They didn't even have the time to react before they were cut by the flying swords. They screamed and fell to the snow.

For a moment, the sky was filled with foreign cultivators who screamed and fell. After they fell to the ground, they spat out a mouthful of blood and their eyes were filled with fear and despair.

However, most of the foreign cultivators were instantly killed when they were attacked. They curled up in the cold snow like dead dogs and were gradually frozen into hard ice blocks!

Perhaps it was because too many cultivators' skills had exploded, which then led to a change in the world's energy, so the sky had long been covered with dark clouds, and large snowflakes were falling down like goose feathers.

The White snow covered the bloomed blood-colored flowers on the ground and buried the remains of the dead. It was as if this place had become a Pure Land, without any bloody existence!

The sounds of killing stopped, and the world became abnormally quiet.

Tang Zhen taught him how to fly on the magic carpet. He stood proudly in the blizzard, allowing the wind and snow to brush past him without resisting.

The White snow soon covered his cloak, and even the tip of his eyebrows were stained with snow. There was a slight chill, which made people feel refreshed.

The little monster squatted beside Tang Zhen. It raised its head and looked at the White snow that covered the sky. It was filled with curiosity towards this thing that it had never seen before. It would occasionally let out a "Wu Wu" sound.

Tang Zhen slowly extended his hand and placed it on the falling snow. A vortex appeared on his palm and swiftly gathered the snow together.

Soon after, a snowball was formed in his hand. It slowly fell and was directly grabbed by Tang Zhen.

"The massacre has begun. I'll kill as many of you as you come!

I don't mind a river of blood flowing in this thousand li icy plain!"

His voice had just sounded when that snowball was directly smashed into pieces by Tang Zhen. His figure also swiftly disappeared into the snow that covered the sky.

After he left, the foreign cultivators who had been watching the battle caught up with him. They were still in shock.

The scene that had just happened had allowed them to truly experience Tang Zhen's terrifying strength. That kind of scene where he could travel a thousand miles in an instant and kill his enemies as if he was chopping monsters and vegetables had caused these foreign race cultivators to be incomparably shocked.

Even if he were to face such a situation, he probably wouldn't be able to hold on for long and would become a corpse buried under the snow!
