

Alternate 801

Chapter 801 pressing forward with indomitable will _A thousand miles of icy plain, ten thousand feet of icy peaks, everything was white.

The cold wind whistled, and drops of water turned into ice. Looking back, the path had been cut off!

The cold wind above the ice field was surprisingly powerful. It was like an invisible blade that could easily cut through the skin and even freeze people to death!

Traveling in the biting cold wind was a kind of painful torture, especially when driving the flying carpet.

In such a bad situation, the little monster on the flying carpet was so cold that it kept howling. It tried to curl up its body into a ball, trying to warm itself up.

Upon seeing this, Tang Zhen controlled the flying carpet and slowly descended. After which, he stepped on the soft snow and raised his head to look at the road ahead.

The wind and snow continued. Although he could not see any traces of the enemy, Tang Zhen knew that the enemy was right in front of him.

However, there was no fear on his face, only a faint calmness.

Tang Zhen took a big step forward. His feet left no traces on the snow as he slowly walked in the direction of the foreign clan's city.

Nothing could be seen from a distance of over ten meters in the snowstorm. However, Tang Zhen had determined a direction from the beginning to the end and walked without any hesitation.

After crossing a Hill that was piled up with snow, dozens of cultivators with powerful auras suddenly appeared on the snow in front of Tang Zhen. They were holding swords and standing still in place as if they had been waiting for a long time.

These foreign race cultivators had cold expressions. They were wearing crystal-like battle armors and blocked Tang Zhen's path.

The leader of the group was a foreign cultivator with a tall stature, and his crystal armor was covered in exquisitely carved patterns, giving him an extremely noble appearance.

At this moment, his eyes were as sharp as knives. He coldly looked at Tang Zhen, who had walked over, through the heavy snow. He used a tone that contained killing intent and roared, "Tang Zhen, do you really think that you can destroy my ice wind tower with your own strength?"

The ice wind tower has been standing on the icy Plains for thousands of years. We have relied on our true strength.

What a joke!

That's why I was ordered to wait here. I kindly advised you to treasure your life and leave as soon as possible. That way, you can still save your life!

If you continue to be stubborn, the ice wind tower will no longer be polite. This vast icy plain will be your burial ground!”

As soon as he finished speaking, Tang Zhen sneered and casually waved his hand at the foreign cultivators of the ice wind tower.

if you want to fight, then fight. Why do you have so much nonsense to say?!

Following Tang Zhen’s actions, the incomparably thick clouds above their heads suddenly became bright, as though they were on fire.

Then, several meteorites burning with terrifying flames pierced through the clouds and smashed toward the foreign cultivators!

The foreign cultivators who were in charge of intercepting the cultivators were all shocked by this scene. A trace of determination flashed across their faces.

Next, they advanced instead of retreating. They shouted out in unison and did not Dodge. Instead, they pounced rapidly towards Tang Zhen.

At the same time, on the snow-covered ground to the side, four vortexes suddenly appeared, sweeping up large pieces of snow and ice.

After the snow disappeared, the ground was revealed. It was a mountain and a Lake covered in thick ice!

As if hit by an invisible force, the ice in the four areas burst instantly. Then, four thick water dragons soared into the sky and gathered in the air in the blink of an eye, forming a huge Ice Dome!

The falling meteorites immediately collided with the ice Dome, creating a deafening sound.

Countless flaming meteorites splattered like molten iron, and as they fell into the snow, a large amount of water vapor rose!

The ice Dome, which had been on the verge of shattering after being hit by the meteorite, was restored to its original state by the continuous supply of lake water. It continued to resist the impact of the next meteorite!

In order to maintain the stability of such a giant dome of ice crystals, powerful Holy Masters were required to do so. Therefore, there had to be a Holy master somewhere around.

The ice wind tower’s cultivator, who didn’t need to worry about being hit by the meteorites, had already rushed in front of Tang Zhen and launched his strongest attack!

They were clearly aware of Tang Zhen’s strength and naturally knew that they only had one chance to attack. Therefore, this attack was actually the combination of the attacks of dozens of cultivators, forming a terrifying Ice dragon-like meat grinder!

Once this attack landed, the victim would definitely be crushed into pieces!

Faced with such a powerful attack, Tang Zhen used his strongest attack as he dodged. Not only did he summon his flying sword to assist him, but he also slashed out with the soul destroying saber in his hand. A black fire Dragon whizzed out.

The Ice Dragon and the black fire Dragon collided with each other in the air, creating a deafening sound. The destructive power caused the mountains and ice Lakes to crack!

Huge cracks appeared one after another, revealing the ice Lake water that could instantly freeze a person. A few cultivators of the ice wind tower were caught off guard and fell into the ice Lake while screaming.

It was also at this moment that a terrifying flying sword came, setting off waves of blood among the cultivators of the building.

Tang Zhen took the opportunity to close in. He controlled the black magnetic Flying Daggers to circle around his body and charged forward. Broken limbs flew up wherever he passed.

From the moment the battle began, his body had been constantly moving forward without taking a step back. Even when the foreign cultivators rushed at him like moths to a flame, he still didn't stop.

Shuo Feng bellowed in anger. Boiling hot blood splattered on the battle armor and instantly froze into ice. It made Tang Zhen look like he was wearing a blood-colored battle armor, making him look like a fiend!

The enemy's screams became weaker and weaker, and the road ahead became smoother and smoother.

After slashing out with his saber and beheading the king level cultivator leading the group, Tang Zhen continued to walk forward.

Behind him were the corpses of the foreign cultivators. They looked at Tang Zhen walking toward the tower with their listless eyes. Their eyes were filled with unspeakable pain and helplessness.

They might still want to stand up and continue to fight with Tang Zhen to protect their homeland and territory.

Unfortunately, although his heart was warm, his blood was cold.

Perhaps, the moment before they died in battle, they had already foreseen the ice wind tower's ending. Their hearts must have been filled with endless regret and sorrow.

After Tang Zhen's figure left, nearly a thousand foreign race cultivators arrived. They were all silent as they looked at the corpses on the ground.

They had all witnessed the scene of the battle earlier. At the same time that they were amazed, they also had a clearer understanding of Tang Zhen's combat strength.

Especially the king class cultivators among the spectators. They were extremely envious of Tang Zhen's ability to control flying swords and summon meteorites to attack!

It could be said that these two methods of attack could be regarded as his ultimate killing moves, and there was no doubt about their power.

Some of the king level cultivators had seen similar flying swords before, so they didn't find it strange after explaining it to them. At most, they thought it was a powerful weapon for cultivators from another world.

However, this method of summoning meteorites was closely related to the power of laws. If one did not master the corresponding power of laws or have an item that could trigger the power of laws, then it was absolutely impossible to do this!

Regardless of how Tang Zhen did it, just this point alone was enough for him to look down on all the two-star King tiers!

For a moment, all the king level cultivators present had their own thoughts. After thinking for a moment, they followed Tang Zhen's footsteps.

The exciting show had just begun!

Chapter 802 be on guard

There were many giant peaks on the ice field, and they were all polished by the cold wind until they were crystal clear, without a trace of snow.

On a sunny day, these ice peaks would reflect a seven-colored light, looking quite gorgeous and charming.

This was why this thousand li ice field was filled with monotonous ice and snow, but at the same time, it also had shocking wonders!

At this moment, there were two giant peaks in front of Tang Zhen. Between the two giant peaks, there was a Wind Gap. The year-end cold wind here was piercingly cold, causing the surface of the ice Lake to not have a single trace of snow.

Walking on the transparent Lake, it felt like walking in the sky. When he looked down, he could often see huge water monsters swimming past.

Tang Zhen's footsteps slightly slowed when he arrived here. He raised his head and looked in front.

He didn't slow down because of the cold wind that was strong enough to blow boulders. Instead, several square arrays in neat armor had appeared in front of him. They were all cultivators of the ice wind tower who had fierce auras!

There were more than 10000 cultivators in total. In the wilderness, Jue di would be an invincible army!

They wore white cotton armor on the inside and crystal armor on the outside. They rode on bear-like war beasts and looked like moving fortresses.

At this moment, all the cultivators were boiling with killing intent. Their condensed aura soared into the sky and even the cold wind could not blow it at all. They were truly as unmoving as mountains!

The blades glittered and the long Spears were like a forest. The sharpness of the spears was even colder than the wind.

In front of these cultivators, there were ten cultivators with strong auras. Without looking carefully, one could see that they were all King level cultivators!

Although they were only one-star King tiers, this number was enough to shock people!

The strength of a national-level city was not to be underestimated. Furthermore, the strength of this ice wind city was far above that of the three-eyed race's city.

If it wasn't for this race

However, Tang Zhen was already mentally prepared for this. Therefore, he did not feel surprised.

What really attracted his attention were two cloaked elders a hundred meters in front of the ten King tiers.

These two old men were both two-star King tiers. One of the cultivators had a sparkling and translucent little snake wrapped around his body. It had red eyes and purple horns. At this moment, it was staring at the little monster in Tang Zhen's backpack. It was constantly flicking its tongue and letting out hissing sounds.

The little guy, who had been looking around to watch the fun, was shocked when it saw the situation. It shrank its neck and let out a low growl of guilt, then directly went into the backpack.

There was an old man next to him, but he had opened an ice cave in the lake. He was fishing quietly, as if he didn't care about his surroundings at all.

An inconspicuous black shadow swam under the ice. When it passed by the bait the old man had thrown, it couldn't help but take a bite.

The old man, who had been as silent as an ice sculpture, suddenly stretched out his hand and a fiery red figure was lifted up. It landed on the surface of the lake and rolled continuously.

It turned out to be a fiery red creature that looked like an eel. Its entire body was emitting high temperatures, and the ice that its body came into contact with quickly melted. Then, it directly burrowed into the ice hole in an attempt to escape.

Seeing this, the old man casually grabbed the eel. This fiery red eel was confined by his mental power and was directly lifted up and thrown into the fish basket at the side.

After doing all of this, the old man finally turned his head around. He looked at Tang Zhen, who was less than twenty meters away from him, and gently smiled.

"Your Excellency Tang Zhen came from afar, so this old man specially caught a few fire spirit eels from the ice Lake in the high mountains to treat Your Excellency!

This thing is extremely delicious, but it is also extremely cunning. It is extremely difficult to capture it, so I hope that Sir Tang Zhen will not reject this old man's good intentions!"

Tang Zhen smiled when he heard this. He said to the old man, "This Tang appreciates your good intentions, but if you say that these fire spirit eels are not easy to catch, this Tang can not agree with you!"

After he finished speaking, Tang Zhen waved his hand and the reincarnation mirror suddenly appeared. Then, countless spirits swarmed out.

Most of the cultivators couldn't see these spirit bodies, but the king level cultivators could. When they found out that these spirit bodies were quite strong, a hint of fear appeared in their eyes.

If these spirit bodies were used well, their destructive power could not be underestimated!

do you see those red eels? catch as many as you can!

Tang Zhen waved his hand after he finished speaking. An astonishingly high temperature erupted from his palm, melting a huge hole in the ice.

The spirit bodies did not hesitate at all. They dived into the frozen lake beneath their feet and began to swim around freely, looking for the fire spirit eels.

There was no change in the expression of the foreign tribe old man when he saw this. He merely looked at Tang Zhen quietly.

Tang Zhen had a smile on his face. He did not show the slightest nervousness. He was so calm that it was as though he was in his own territory.

This scene made more and more onlookers in the distance click their tongues in wonder.

Facing the enemy's thousands of troops, he didn't flinch at all. Just this courage alone made these foreign cultivators admire Tang Zhen!

Just as everyone was silent, a spirit body suddenly broke out of the ice hole that Tang Zhen had melted and threw a lively fire spirit eel on the empty ground in front of Tang Zhen.

Very soon, the second spirit body appeared. It also dragged a fire spirit eel and threw it at the same spot.

Then, the ordinary cultivators who couldn't see the spirit bodies saw the fire spirit eels jump out of the lake one after another and land on the ice as if they had gone crazy.

It didn't take long for the fire spirit eels on the ground to pile up!

Tang Zhen's face was filled with ridicule as he glanced at the old man opposite him. He coldly laughed, "First, he was in full armor and ready to fight, and then he used as many random fish as he wanted to fool people!

Tsk, tsk, tsk, I have to say, this is the first time I've seen such a treat!"

After he finished speaking, he swept a glance at the gloomy and uncertain expression of the foreign tribe old man. Tang Zhen waved his hand generously and said in a mocking tone, this Tang isn't as petty as you guys. Since you think that these fire spirit eels are very precious, then take them all and divide them up. It's just enough to make a pot of soup, and everyone can get a spoonful!

After hearing Tang Zhen's words, the two-star King tier with the small ice crystal snake coiling around his body immediately became furious. He roared at Tang Zhen, "Tang Zhen, don't be so shameless when I give you face. My big brother thinks highly of you. That's why he said so much nonsense to you.

If it was me, I would have already chopped you into meat paste and fed you to the fish!”

Tang Zhen’s expression turned cold when he heard this. He looked at the two-star King tier holding the snake and spoke in a dense and cold tone, “Then I’d like to see who will feed the fish!”

When he said this, it was equivalent to completely tearing off all pretense of cordiality, and there was no room for reconciliation.

However, that fishing old man was extremely shrewd. He did not reveal his anger at this moment. He merely looked at Tang Zhen coldly and asked in a soft voice, “Sir Tang Zhen, could it be that there’s no room for negotiation?”

Tang Zhen looked at the other party when he heard this. He spoke word by word, “It’s not that it can’t be eased, but the problem is, can you bear to do it?”

I’m not a bloodthirsty person, so it’s not impossible for me to leave you and your people a way out!

Disband Lou Cheng and give me compensation. This is my only request!

If you can’t do it, then there’s no need to talk about reconciliation between the two of us. In the end, one of us is destined to die Here!”

The old man who was fishing shook his head.

Once a plane teleportation channel was opened, it would never close unless the city was destroyed.

Thus, disbanding Lou Cheng was the only solution.

However, he would never agree to this request, because that would be destroying his own Foundation.

In that case, perhaps this battle was inevitable!

Chapter 803 Battle of Ice Lake (1)

“In that case, please take care of yourself, Sir Tang Zhen!”

The foreign tribe elder softly sighed. He gently cupped his hands towards Tang Zhen before turning around and walking towards the wind Gap in the distance with his hunched body.

Tang Zhen had a faint feeling that this old man was emitting a sorrowful feeling. His back was also incomparably bleak.

His current state was as if he knew that some things could not be changed, but he was still unwilling to give up the last trace of hope, hoping that things would turn around.

From this, it could be seen that Tang Zhen’s weight was extremely heavy. Unknowingly, he could actually make a national-level city Lord so afraid and helpless!

This was the benefit of strength. If it wasn’t for Tang Zhen destroying buildings and killing strong enemies along the way and having a terrifying super bomb in his hand, he wouldn’t have encountered such a scene.

The moment they met, they would probably start killing each other without any explanation.

In fact, no matter what the final outcome of this battle was, there was one thing that could not be confirmed. Countless cultivators of the ice wind tower would die in battle!

After all, Tang Zhen's strength was there for all to see. If he didn't pay a painful price, the ice wind tower wouldn't be able to harm him at all!

However, the problem was that the ice wind tower was about to invade the original world, and it was the time when their combat power was the most tense. If they suffered losses because of this, then even if they successfully invaded the original world, they would probably end up in a crushing defeat due to their lack of combat power.

If they were not careful, the city would be destroyed and people would die!

In particular, the cultivators of the ice wind tower who had risked their lives to report everything they knew had made the rulers of the ice wind tower realize that they might have fallen into a trap.

They were shocked and angry, but there was nothing they could do.

The enemy they were about to face next, in addition to the original world that had billions of natives and powerful and terrifying weapons, there was also an abnormal King with astonishing strength who could easily destroy buildings!

It was just that the dimensional teleportation channel had already been opened, and it was like an arrow that had been nocked on the bow and had no choice but to be fired. Therefore, the ice wind tower could only brace themselves and endure!

However, the strength that Tang Zhen had displayed had caused the ice wind tower's city Lord to be extremely worried. He didn't have high hopes for victory.

Even if they won in the end, it would be a tragic victory!

Moreover, even if they defeated Tang Zhen, the ice wind tower, which had suffered a great loss in strength, would still have to face the foreign experts who were watching the battle. They had to be wary of them abandoning their principles for benefits and taking the opportunity to attack the tower!

No matter what, the current situation was extremely disadvantageous to the ice wind tower.

Therefore, the ice wind tower's city Lord had tried to make peace. However, he was destined not to accept Tang Zhen's request. After all, this city had been in operation for countless years. How could it be disbanded just like that?

In this way, there was only one battle. Even if he lost in the end, he would have no regrets!

At the moment when the ice wind tower's city Lord turned around and left, the snake-wielding monarch's body suddenly rose into the air. He raised his hand and waved it at Tang Zhen with all his might.

"Kill!"

A roar filled with killing intent was heard. Following that, thousands of cultivators from Lou Cheng moved in unison. In addition, there were tens of thousands of servant cultivators. With a soaring killing intent, they charged straight at Tang Zhen!

The scene of the charge was really majestic. With an indomitable momentum, even if there was an iron wall in front of them, it would be smashed into powder by these cultivators of Lou Cheng who were boiling with murderous intent!

Tang Zhen heard the heaven-shaking battle cries and looked at the foreign tribe cultivators that were surging over like a moving wave. A cold smile appeared on the corner of his mouth as he waved his right hand forward.

In the blink of an eye, a row of over 50 square-shaped metal objects appeared on the surface of the frozen lake in front of him!

After appearing on the surface of the lake, the metal bodies began to flash with light. Then, they quickly transformed into ferocious-looking metal robots.

Looking at their appearance, they were the killing monsters codenamed " Rangers, " a war weapon developed by the Holy Dragon City!

In just a dozen seconds, the metal slaughter monsters had completed the transformation process and entered free combat mode.

The black muzzles of the fifty killing machines pointed at the heavy cavalymen who were charging at them and began to fire without any hesitation.

The scorching hot pellets were shot out rapidly, piercing through the cold wind and landing in the camp of the foreign cultivators.

At the same time, highly-explosive fragment bombs the size of fists were launched one after another, causing a series of violent explosions.

The charging formation immediately turned into chaos. Even though they raised their shields to block, nearly 100 cultivators of the ice wind tower were still shot and fell to the ground. They fell one after another in the charging path.

After the high-explosive fragment bombs exploded, the foreign cultivators screamed in pain and were covered in blood. The ice Bears, in particular, were running around crazily.

Holy Masters immediately jumped out from the charging cultivators of Lou Cheng, continuously releasing protective barriers to block the dense rain of bullets!

When the killing robots that were attacking saw this, they immediately changed their attack method. They actually lifted the protective plates on the surface, revealing rows of firing ports.

Then, a series of bombs with special runes carved on them and spiritual jades as bullets were launched with colorful tails.

When these bombs landed on the protective shields, they exploded with a blinding light, causing the energy to be in chaos and directly shattering the protective shields!

The foreign cultivators didn't expect this at all, so they were shot down one after another, and their formation was once again messed up!

In addition, the ice was constantly broken during the charge, and many foreign cultivators accidentally fell into the ice Lake, struggling and swimming in a sorry state.

The blood on the ground flowed into the lake continuously, attracting many water monsters to attack the cultivators who fell into the water.

Just as the killing machines were fending off these cultivators, Tang Zhen had already started fighting with the ten one-star King tiers who were the first to rush over.

These ten King level cultivators had a tacit understanding. Five of them formed a battle team. They were like an extremely precise machine as they surrounded Tang Zhen and kept fighting.

Tang Zhen, who was surrounded, was like a burning God of War. His entire body was covered in searing flames as he fought with these Kings of the foreign races. His figure appeared and disappeared at times!

The sound of weapons clashing was already as dense as rain. The light of skills flashed continuously in the sky, and from time to time, screams could be heard.

At this moment, Tang Zhen's entire body was covered in blood. The killing intent in his eyes was so real that it seemed to have taken form. He had a stance that was ready to go all out.

Under his crazy attacks, these foreign race Kings were unable to resist at all and were killed by Tang Zhen one after another!

However, at this moment, the snake-wielding monarch, who had been standing guard at the side and had not taken any action since the beginning, suddenly appeared behind Tang Zhen like a ghost. He silently launched a sneak attack on Tang Zhen.

That little crystal snake opened its mouth wide and directly bit towards Tang Zhen.

Who would have thought that Tang Zhen had long been on guard against this sinister fellow. Therefore, the instant the snake-wielding King launched a sneak attack, Tang Zhen sneered and suddenly threw an object into the air!

"Old man, all of you can go to hell!"

Tang Zhen's body suddenly disappeared after he finished speaking. Clearly, he had activated the teleportation function.

At the same time, the killing machines that were shooting rapidly all shot at their feet and fell into the frozen lake.

"Not good, quickly Dodge!"

The snake-wielding King roared as he felt a sense of death approaching. He did not hesitate to teleport away.

The injured one-star King tiers' expressions also changed drastically. They also scrambled to teleport away, afraid that they would be affected by the terrifying bomb!

As for the charging foreign cultivators, they didn't have time to retreat and hide. They could only roar in anger.

At this moment, the terobo people's planet-destroying bomb that Tang Zhen had thrown out suddenly exploded with a shocking wave, enveloping the entire mountain and ice Lake Region.

Under the terrifying impact, the entire Ice Lake immediately set off monstrous waves. All the cultivators of the ice wind tower who were riding the giant bear war beasts were not spared. They were all wrapped up.

If he didn't die in this situation, he would be extremely lucky!

Even a few ice peaks that had stood for countless years in the distance collapsed at this moment, creating a loud noise that echoed throughout the silent ice field!

Chapter 804 kill, self-destruct

Just a dozen seconds before the shocking explosion, the foreign cultivators who were watching the battle from a distance also saw the scene on the battlefield without missing a single detail. Their faces instantly changed in horror!

Although they didn't know what kind of weapon it was, they were very clear that it must have destructive power!

Perhaps the three-eyed race's city was destroyed by this thing, and even the defensive barrier of the city was not opened before it was completely annihilated!

Therefore, the moment the explosion occurred, the foreign cultivators who sensed the impending danger used all means to escape.

For a time, the light of the protective barrier continued to rise. There were even cultivators who directly broke open the ice Lake and jumped in. They ignored the bone-piercing cold and swam directly to the bottom of the lake.

Of course, while these foreign race cultivators were dodging, they were also cursing Tang Zhen.

Never in their dreams did they think that they would be implicated so quickly when they were only there to watch the show!

Of course, it was useless no matter how angry he was. This was because Tang Zhen would simply ignore this group of people. In fact, he had long wanted to chase these people away.

Only the heavens knew how many of these foreign cultivators had impure thoughts. It was even possible that they were secretly eyeing Tang Zhen and wanted to reap the benefits.

It could be said that the foreign cultivators who were watching the battle were like a pack of hyenas following behind a Lion. Once they encountered the right opportunity, they would definitely step forward and take a bite without hesitation!

Therefore, from this point of view, it was not too much to give them a profound lesson!

The explosion occurred in an instant and ended in the blink of an eye. Then, the ice on the lake was completely lifted, and the mountain fell into a dead silence!

This was the unique feature of the teroboros 'zone-destroying bomb. It was fast and efficient. Destroying buildings was only secondary. Its main purpose was to kill ordinary living beings on a large scale.

If one's cultivation base was not at the level of a Lord, there was no way they could survive in the center of the explosion. Even if one's cultivation base was above the level of a Lord, it was destined that they would not be able to remain unscathed!

This was only the power of one bullet of the star destroying bomb. If the mother bomb landed, the entire thousand li ice field would be completely turned into a ghost land!

As soon as the explosion ended, a large amount of gray fog appeared out of thin air and quickly spread across the entire explosion area, as if there was a violent chemical reaction.

Even the biting cold wind could not blow it away, as if it did not exist at all. It only changed the color of the air in the area!

Tang Zhen's figure suddenly appeared in the endless gray fog. After looking around, he quickly entered The Dark World and began to move stealthily.

Using the cover of the gray fog, he could clear out the surviving enemies one by one and then head straight to the Icewind tower to settle the score.

At this time, about ten kilometers away from the center of the explosion, a non-human King was hiding in a crack under the ice Mountain. He gritted his teeth and endured the intense pain that came from the impact of the bomb.

The injuries on his body were nothing to him, but at this moment, his mind felt as if it was being strangled by a rope, as if it would explode at any time.

This was a sign of a damaged soul. If it was not treated in time, it was very likely to leave behind extremely serious trauma!

As the foreign race cultivator gritted his teeth and endured the pain while cursing Tang Zhen, a spirit body's figure flashed past behind him.

It stared at the figure of the foreign cultivator, and a strange smile flashed across its pale face.

After that, it used some unknown method to inform Tang Zhen. In the end, in less than a minute, Tang Zhen had already appeared here and quietly launched a fatal blow towards the foreign King.

The blade light flashed, and the non-human King's expression froze. He clutched his heart and slowly fell to the ground.

"The first one!"

Tang Zhen muttered softly as his figure once again disappeared within the gray fog.

On a huge piece of floating ice on the lake, a non-human King treated his wound and prepared to return to the tower.

The operation to kill Tang Zhen had already failed. The next thing to do was to fight with their backs to the water. The life and death of the ice wind tower would depend on this battle.

In fact, the cultivators of the ice wind tower didn't underestimate Tang Zhen's power. On the contrary, they attached great importance to it. After all, the information that they had carefully collected couldn't be false.

It was also because of this reason that the ice wind tower's city Lord had asked Tang Zhen to return three times. He had tried his best and finally had no choice but to take action.

Due to the special situation in the ice wind tower and Tang Zhen's menacing approach, they were unable to bear the consequences of the battle.

The scene of destruction caused by the explosion just now was enough to prove that the ice wind tower's city Lord's worry was indeed reasonable!

Thinking up to this point, the non-human King sighed. He couldn't help but worry about the ice wind tower's fate.

However, the moment he thought about how his home would be destroyed, his eyes turned sharp as killing intent gushed out from his body.

"We must kill Tang Zhen. Otherwise, the entire city will be destroyed by him!"

Thinking up to this point, the non-human King didn't care about his bleeding wound at all and headed straight for the city.

However, after he had rushed out for a few miles, he saw a figure slowly appear in the gray fog in front of him. A saber surrounded by black flames slashed at him.

Despair appeared on the non-human King's face. He knew that he would not be able to escape death.

Not to mention that he was already injured, even if he was at his peak condition, he would definitely not be able to defeat Tang Zhen, who was a two-star King tier.

At this moment, the foreign King did not have any intention of retreating. Instead, he laughed out loud and charged straight at Tang Zhen.

Tang Zhen's face was expressionless as the soul annihilating saber in his hand fiercely slashed at the enemy.

The foreign King's body trembled slightly. After avoiding his vital parts, he allowed the soul annihilating saber to pierce into his body. He then desperately hugged Tang Zhen's body.

"Tang Zhen, die with me!"

The non-human King's expression was indescribable as he roared.

Tang Zhen's heart jolted and he immediately felt that something was amiss. He pushed with all his might and entered The Dark World in a flash without the slightest hesitation.

Who would have thought that the arm of the foreign King was like cast iron. Even though Tang Zhen had used all his strength to smash a large hole in the chest armor of the foreign King, he was still unable to shake him off.

Even after entering The Dark World, he still tightly hugged Tang Zhen as if he had already harbored the determination to die.

"Bastard, go and die!"

The non-human King spat out a mouthful of blood as a strange smile appeared on his face. Then, his entire body exploded!

He had actually used a self-detonation method that had no possibility of survival to launch a life-or-death attack on Tang Zhen!

Tang Zhen was completely unable to Dodge. He could only activate his protective shield and forcefully resist this suicidal attack by the other party, which had detonated all the energy in his body.

At the same time, his body was also sent flying nearly a kilometer away.

"Bang!"

Tang Zhen's body trembled and he half-knelt on the ground. His face was pale as he spat out a mouthful of blood!

The power of a King level cultivator's self-destruction couldn't be underestimated, let alone in such a close proximity. Therefore, even with Tang Zhen's two-star King level strength, he still suffered a great impact!

Fortunately, his internal organs were not injured. With his abnormal recovery ability and the cooperation of special potions, he would probably recover very soon.

Tang Zhen wiped the blood from the corner of his mouth and slowly stood up. He casually took out a bottle of medicine from his storage space and directly swallowed it.

Tang Zhen swept his eyes over the corpse that had fallen not far away. He frowned slightly and softly said, "The second one!"

As soon as he finished speaking, he left The Dark World and started to search for the enemy again!

Chapter 805 retreat, hope

At the same time as the explosion, in a snowfield behind the ice Lake in the mountains, a giant protective shield suddenly rose up from a Crystal Palace-like tower.

The shield looked like a thin and transparent eggshell, as if a light poke would make a hole. However, when the shock wave of the star-destroying bomb hit, it was easily blocked by the shield, so the entire Icewind tower was not damaged at all!

In fact, this situation was very normal. The star destruction bomb relied on a special energy to kill living creatures. The damage to buildings was much less, especially when it came into contact with the energy shield.

However, Tang Zhen did not expect to rely on this star destroying bomb to deal with the ice wind tower. Therefore, he would not be surprised even if he knew that the ice wind tower was safe and sound.

At this moment, in the ice wind tower, the old man who had been fishing in the mountains and lakes was standing on a huge ice tower at the highest point of the tower. He looked at the collapsing ice peaks and the rolling gray fog. He couldn't help but let out a sigh.

The thing that he was most afraid of had still happened. Tang Zhen had detonated that terrifying bomb and razed the entire mountain and ice Lake Region to the ground!

Although Lou Cheng's protective shield had blocked the shockwave of the explosion and he was safe and sound, he was not happy at all.

After all, the real crisis of the city being destroyed had not yet officially begun!

Only the heavens knew how many of these super bombs Tang Zhen still had in his hands. After all, he possessed a storage equipment. There was no need for him to expose the bombs to the outside.

Moreover, the explosion just now had happened in the ice Lake on the Mountain. Not only was the area wide, but there was also a huge Ice Peak blocking the explosion, so the impact of the explosion was greatly reduced!

If Tang Zhen threw more than one bomb in front of the ice wind tower, it was still unknown whether the tower's protective shield could withstand it.

When he thought up to this point, the ice wind tower's city Lord turned his head to look at the back of the tower. At that position, there was a vortex that was slowly revolving.

This was the plane transportation channel that led to the original world. Originally, the ice wind tower's city Lord thought that this invasion would bring rich rewards to the tower. Who would have thought that they would almost welcome a disaster of extermination!

If he had known this earlier, he would not have applied for an independent invasion without careful consideration after obtaining the plane coordinates of his original world.

Looking back now, there was indeed no such thing as a free lunch in this world. The Icewind tower had finally tasted the evil consequences of greed!

Now that things had come to this, the only way was to put himself to death and then live. Otherwise, once the city was destroyed, the fate of the entire clan would be worrying.

Sighing again, the city Lord turned his head and looked behind him. He beckoned to a couple of cultivators who were waiting quietly.

Two young cultivators walked forward and bowed to the city Lord. There was a trace of anger and unwillingness on their handsome faces.

“Have you done what I asked you to do?”

The icy wind city’s Master’s Voice carried a hint of desolation. From his body, one couldn’t see the might of a two-star King tier at all. Instead, he seemed like an old man in his twilight years.

everything has been prepared according to the instructions. As long as we find a suitable location, we can guarantee that the new building will be promoted to rank 6 within ten years!

The young male cultivator replied. He hesitated for a moment before asking the master of the ice wind city, “City Lord, has the situation really reached such a critical point that we have no choice but to activate an emergency plan?”

As far as I know, although Tang Zhen isn’t weak, he’s only a cultivator who has crossed the cultivation realm. Could it be that I, a national level cultivator, really can’t do anything to him?”

The female cultivator next to him nodded. She seemed to have the same question. After hearing her companion’s question, she also waited quietly for the master of the ice wind city to answer.

The city Master of ice wind city shook his head gently. He pointed at the gray fog that was getting thicker and thicker around the tower and said in a low voice, “You only know how powerful national level loucheng is, but you don’t know that there are different levels of national level loucheng, and the difference in strength is extremely huge!

At the same time, among the cultivators in the city, there were some who had heaven-defying strength. They could support the entire city by themselves and laugh at all the heroes in the battle zone!

This Tang Zhen is one of those rare people. Otherwise, how could he cross the war zone and destroy a national-level city before killing all the strong enemies and coming straight to my ice wind city?”

The master of the ice wind city sighed and continued, “What I’m afraid of is not his bravery alone, but the Super bomb he has!

According to the information that we have obtained and after careful analysis, if Tang Zhen has more than three super bombs in his hands and all of them are detonated, then even the protective shield of our building will not be able to withstand it!

the ice wind tower is destined to be unable to escape this calamity. That’s why I told you all to make preparations and quickly retreat through the underground ice cave. The further you go, the better.

No matter what, we have to leave a seed of hope for our race. Only then will we have a chance to rise again!”

When the master of the ice wind city said this, he seemed to have aged a few decades. His hunched body seemed to have become even weaker.

When the young cultivator heard this, he couldn’t help but say, “I heard that Tang Zhen’s super bomb came from the foreign world that we invaded. Why don’t we send cultivators there to snatch it and deal with Tang Zhen instead?”

The master of the ice wind city shook his head.

“It’s not that no one has suggested this method before, but the other side of the dimensional portal has long been guarded by the Aborigines like an iron wall. Sending people over would only be courting death!

Furthermore, with the power of the Super bomb, it would definitely be heavily guarded, and it would be impossible to snatch it in a short time.

Even if we did get it, I’m afraid that our tower wouldn’t have been able to wait that long and would have long since ceased to exist, right?”

The two young cultivators were disappointed. They finally knew why the old city Lord had made this decision.

This was because no matter how he looked at it, the ice wind tower would not have the chance to avoid this calamity unless the old city Lord agreed to Tang Zhen’s request and disband the ice wind tower!

However, this was the foundation that had been passed down by his ancestors. If it was destroyed because of this incident and the ice wind tower became history, how would he be able to face the residents of the tower and his ancestors?

However, if he fought to the death, all the residents of the tower City would be buried with him. Hundreds of thousands of living beings would die because of his decision, so how could he bear to do that?

Thus, at this moment, the pressure on the shoulders of the master of the ice wind city was as heavy as a mountain. Outsiders simply could not understand it!

Moreover, this pressure only became heavier and heavier as time passed.

The two young cultivators no longer spoke. They both bowed to the master of the ice wind city. When they stood up again, their eyes were filled with tears.

“City Lord, don’t worry. We will not let you down. We will make it our responsibility to revitalize our race and will not regret it even if we die!

In the future, if I have enough strength, I will definitely make Tang Zhen pay for his blood!”

The master of the ice wind city shook his head and waved his hand at the two cultivators. Hurry up and go, don’t think about revenge, never!”

After saying that, the master of the ice wind city turned around and looked ahead without saying a word. He looked into the distance with his muddy eyes.

He wanted to see the icy plain that he had lived on for more than three hundred years again, because he might not have the chance to see it again in a short time.

Chapter 806 The divine Kingdom’s Tower _As the Lord of a city, no matter how dangerous the situation was, he would choose to persist until the last moment and never retreat!

In fact, when the city was destroyed, it was not that they did not have a chance to escape, but when it really came to that, only a few city Lords would choose to escape. Most of the city Lords would choose to live and die with the city!

This wasn't because of the restrictions of the tower's rules, but because to these city Lords, the tower that they had invested their entire lives into was almost equivalent to their lives.

Since Lou Cheng no longer existed, there was no meaning in their lives.

This was what the city Master of the ice wind city was thinking at the moment. Ever since he had become the city Master, he had been in this position for more than two hundred years. He had experienced countless ups and downs, and he had deep feelings for this city.

It was also because of this that he was unable to make a decision at this moment.

He didn't know if he agreed to Tang Zhen's request to disband loucheng because he wanted to fight to the death for the glory of loucheng or for the lives of hundreds of thousands of residents.

There wasn't much time left for the ice wind tower. As long as Tang Zhen eliminated the hidden danger, he would definitely rush here without hesitation and destroy the only tower that was a threat to his original world.

From then on, there was no need to worry about the invasion of foreign races in the original world, which had been covered by the runic magic circle!

However, just as the residents of the ice wind tower were feeling nervous and all the cultivators and Warriors were ready to fight to the death, a huge special aircraft suddenly flew over the sky of the icy plain.

The aircraft was like a terrifying King-tier monster as it rapidly approached the Icewind tower's location.

It completely ignored the gray fog's obstruction and accurately locked onto the ice wind tower's location. Then, under the ice wind tower's residents' shocked gazes, it slowly descended to the ground.

The beetle-like flying device landed and an exit slowly appeared on its belly. A dozen white-robed King level cultivators walked out.

These cultivators' bodies emitted a white light, making it impossible to see their faces clearly. However, they gave off an extremely peaceful feeling!

After seeing these white-robed cultivators, the master of the ice wind city's eyes suddenly narrowed, as if he had thought of something. Then, he revealed a bitter smile with unknown meaning.

Then, the white-robed cultivators floated in mid-air and formed a special array. They muttered something and then let out a loud shout.

A dozen white rays of light burst out from their bodies and quickly soared into the sky, forming a huge runic magic circle in the sky.

The runic magic circle was also emitting a white light. Suddenly, like a dazzling sun, it scattered countless white rays of light that pierced into the thick gray fog.

The gray fog that was originally unable to be blown away by the wind actually rapidly disintegrated and disappeared without a trace after encountering this white light.

Even the continuous Blizzard had slowly stopped, and the sun once again shone on the ice field. It was a bright scene everywhere.

The haze in the hearts of the city's residents after the explosion seemed to slowly dissipate after seeing the bright sun, and their bodies and minds also relaxed.

After all that was done, a King-level Holy master with a golden crown and a staff in hand stepped out of the white-robed cultivators and said to the master of the icy wind city, "I am the special envoy of the divine Kingdom Tower. Are you the master of the ice wind city?"

The master of the ice wind city nodded and said in a faint voice, "It's this old master!"

our divine Kingdom's loucheng has already investigated the grudges between your loucheng and Tang Zhen, a cultivator who has crossed the cultivation realm. That's why we've specially come to stop this tragedy from happening. Are you willing to do so?"

The master of the ice wind city asked, "The divine Kingdom Tower is famous and is ranked in the top ten of the war zone. I've heard of its name long ago!

I wonder how the special envoy will resolve this matter and what price the ice wind tower will have to pay?"

The divine Kingdom envoy glanced at the icy wind tower and said with a calm but confident tone, "The dispute between you and Tang Zhen is because you are preparing to invade a foreign world that he regards as a resource base. Therefore, the key to resolving this matter is here!

you only need to disband the towers and give them enough compensation. Then, you can lead all the residents to join my divine Kingdom's towers and become my subordinate's towers. That will solve this problem perfectly.

"Moreover, after joining my divine Kingdom's city, you can continue to serve as the city Lord. Your city will also receive the maximum support of resources. It probably won't take many years before it regains strength no less than it does today!"

This is my solution. What do you think?"

The master of ice wind city laughed helplessly. It seemed that he had already guessed the solution of the divine Kingdom's Ambassador.

To put it bluntly, this divine Kingdom was even more despicable than Tang Zhen. After all, it was the ice wind tower that provoked Tang Zhen first. It was only natural for him to seek revenge!

However, this kingdom was simply taking advantage of the situation. It wanted to accept the combat power of a national-level Kingdom without any effort, but it still said it so arrogantly.

Even without the special envoy, he could still disband the divine Kingdom. However, if he did that, he would not be able to settle down the hundreds of thousands of people in the divine Kingdom. Food alone would be a huge problem.

Although joining the tower of the divine Kingdom would save him from a similar problem, he would still be living under someone else's roof and would no longer have the freedom he once had!

Moreover, the special envoy of the divine Kingdom had said that they would provide all the resources to increase the strength of the ice wind tower, but in the end, it was all sheep's wool that came out from its body.

The cultivators of the ice wind tower would not just sit around and wait for death. The resources they had obtained were enough to maintain the operation and upgrade of a low-level tower!

In this way, all the advantages would be taken by the divine Kingdom. Not only would they not have to pay anything, but they would also get a cultivator who used to be a national-level building as a fighter for free, which would provide great convenience for their invasion of the Otherworld!

In fact, this was not the first time the divine Kingdom had done something like this. There were even rumors that many of the towers that had encountered danger had been planned by this group of sanctimonious guys. They were truly despicable to the extreme!

However, there was one thing that could not be denied, and that was that it was easier to enjoy the shade by leaning against a big tree. If the ice wind tower had a relationship with a super tower like the divine Kingdom Tower, there would also be many non-substantial benefits.

At the very least, on the cornerstone platform of the divine Kingdom's Tower, he could exchange for higher grade items and cultivator skills. The quality and grade of these items far exceeded the current ice wind tower!

In this way, when the ice wind tower recovered to its current scale, its combat power would probably increase more than twice!

It was also because of this that the master of the ice wind city, who had originally wanted to die, began to hesitate.

After all, his decision could affect the lives of hundreds of thousands of residents in the building, so he had to consider it carefully.

The special envoys from the divine Kingdom's buildings weren't in a hurry. While waiting for the ice wind City Master to think, they gave an order to the cultivators of the buildings beside them.

Soon after, a two star King tier and nine one star King tiers walked out of the giant white beetle and rushed toward the location of the explosion!

Chapter 807 The conditions for! ceasefire

It was also a coincidence. Just as the cultivators of the divine Kingdom were looking for Tang Zhen, he was already holding the soul destroying saber and heading toward the ice wind tower.

However, in the sky in front of him, there was a flustered King level cultivator running for his life. From his appearance, it was the two-star King level cultivator with the snake in his hand!

Compared to his previous majestic appearance, the snake-wielding King's current appearance could no longer be described as pathetic, but rather miserable!

His armor was broken, and he was covered in blood. There were fatal penetrating wounds on his neck and abdomen. If it weren't for the king level cultivator's incredible endurance and recovery speed, he would have died!

Even the little ice snake on his body was dispirited. A section of its tail was broken, and most of the scales on its body had fallen off. Its head was drooping, and its tongue hung limply at the side of its mouth!

Under Tang Zhen's pursuit, the king class cultivator was already running with all his might. From time to time, he had to Dodge the flying swords that were constantly attacking him. While he was angry, his heart was filled with fear.

Only now did he know that this cultivator named Tang Zhen was a monster. He actually had so many terrifying means!

No wonder he was so bold. He first destroyed the three-eye tower alone, then ran for thousands of miles alone, killed a large number of cultivators who intercepted him, and headed straight for the ice wind tower.

It was no wonder that even the city Lord himself feared it like a tiger, and was even prepared to destroy the city!

In fact, he had never dreamed that he would be completely suppressed when he faced Tang Zhen and was unable to fight back. He was even almost killed!

His heart continued to pound wildly when he thought of those elusive methods and the strangulation light curtain formed by over twenty flying swords. He was afraid that Tang Zhen would do that again!

At that time, he would have no way to escape and would be cut into pieces by those flying swords!

He turned his head and glanced at Tang Zhen who was in hot pursuit. The king level cultivator quickly thought of a way to escape. From his point of view, even if he entered the ice wind tower, he would not be able to escape from this terrifying fellow's pursuit!

However, even though the icy plain was vast, where could he escape to?

At this moment, he suddenly realized that the gray fog around him was disappearing. Then, he saw ten King level cultivators in white robes flying toward him.

In front of the tower in the distance, the master of the ice wind city was standing with another group of white-robed cultivators. Their expressions were calm, and they didn't seem to be enemies.

After discovering this, the two-star King tier was overjoyed. He shouted at the white-robed cultivators with all his might, "Everyone, please help me! Stop the enemy behind me!"

As soon as he finished speaking, these white-robed cultivators had already rushed to the opposite side. After letting him fly over, they blocked in front of Tang Zhen who had followed closely behind.

The man with the Snake King heaved a sigh of relief. He didn't hesitate and dashed toward the ice wind tower like lightning.

Tang Zhen, whose face was filled with killing intent, frowned slightly when he saw this. He slowly slowed down and did not say a single word as he looked at this group of foreign race cultivators whose bodies were glowing.

When the cultivators in the divine Kingdom's buildings saw Tang Zhen stop, the two-star King tier in the lead took the lead and said, " "This old man is the divine Kingdom's Lou Cheng Duo lie. Is this the Holy Dragon city's city Lord, His Excellency Tang Zhen?"

"That's this Tang." Tang Zhen nodded.

The two-star King tier named duo lie smiled and explained, " my divine Kingdom has already heard of the grudges between you and the ice wind tower. We have also done a detailed investigation of this matter. Because we discovered that there was a misunderstanding, we have specially rushed over to mediate!

Tang Zhen nodded. A trace of consideration flashed across his eyes as he indicated for the other party to continue.

"From the beginning to the end, this matter was caused by someone who set up a trap with extremely sinister intentions.

The ice wind tower was also tricked and didn't discover it in time, which was why it unintentionally violated you.

In fact, after learning the truth of the matter, the ice wind tower was also very regretful. However, they were unable to close the dimensional teleportation channel, so they could only choose to confront you.

after our divine Kingdom's Tower's persuasion, the master of the ice wind city has agreed to disband the tower. At the same time, the plane's transfer channel will close on its own. In this way, your goal has been achieved!

I wonder if you are satisfied with this arrangement?"

After that duo lie King finished speaking, he quietly waited for Tang Zhen's reply. However, he blocked Tang Zhen's path and did not allow him to approach the ice wind tower.

Tang Zhen's brows twitched when he heard this. He looked at the king cultivators of the divine Kingdom Tower, the giant beetle flying machine under the ice wind tower, and the other ten or so King cultivators. He immediately fell into deep thought.

The appearance of these divine Kingdom cultivators was extremely sudden and had clearly exceeded Tang Zhen's expectations.

Moreover, the other party's intention was very obvious. They were here to support the ice wind tower. Fortunately, their actions weren't too excessive and were even very beneficial to Tang Zhen!

After all, the purpose of Tang Zhen's trip was to close the plane's transmission channel to prevent the Lou Cheng cultivators from invading the original world through it.

As long as the dimensional channel was closed, Tang Zhen would still be able to accept the fact that there would still be residents of the ice wind tower.

The reason why he was so murderous before was that he felt that he could only solve this problem by destroying the ice wind tower. In the end, he didn't expect that the ice wind tower's city Lord would actually have such boldness to directly disband a national-level city that had been operating for countless years.

Although this was the wisest way to do it, to make such a decision, it undoubtedly required a great deal of determination!

Tang Zhen glanced at the cultivators of the divine Kingdom. He was very clear that the reason why the ice wind City Master, who had revealed an attitude of fighting to the death, had made this decision was related to the divine Kingdom.

Even ants would covet their lives. Although the cultivators of loucheng city were not afraid of death, it did not mean that they would still seek death when there was a way out!

When he thought of this, Tang Zhen looked at duo lie and said, "As long as the dimensional portal is closed and the other party is sincere in compensating us, I can let this matter go.

I'm just curious, if I refuse, would you do this?"

When duo lie heard this, he knew that Tang Zhen had already agreed to reconcile this matter. However, he still gave an answer to Tang Zhen's question.

"The Icewind tower is naturally very sincere. I guarantee that you will be satisfied!

Sir Tang Zhen might not know, but my divine Kingdom is a three-star country. We control four one-star national level towers and more than a dozen top-level towers. As for the towers of different levels, we have a total of more than 150!

We also have a number of ways to defend against your super bomb that can easily destroy buildings, so it can't pose a fatal threat to us!

Once you make a move, you'll be hunted down by at least a million cultivators in Lou city. Even if you have extraordinary means, you're destined to be unable to escape unscathed from such a pursuit!"

When Duoduo said this and saw Tang Zhen's excited appearance, he didn't mind praising his Lou Cheng a little more. At the very least, it would have a deterrent effect on Tang Zhen.

the most important thing is that not only do we know where you come from, but we also know the location of your tower. When the time comes, we just need to use some small tricks and I believe it will bring you a lot of trouble!

Tang Zhen coldly laughed when he heard this. Duo lie's words appeared to be explaining, but in reality, they also faintly contained a trace of threat.

The purpose was nothing more than to signal Tang Zhen to stop while he was ahead, and then everyone would go their own way in peace. Otherwise, if they met with weapons, Tang Zhen and the Holy Dragon City would definitely suffer a big loss!

After all, compared to the strength of the divine Kingdom, the ice wind tower was nothing!

Chapter 808 boiled fish, private deal

As long as one had enough strength, they would be respected by other experts. Otherwise, why would duo lie, who had the divine Kingdom's Tower behind him, waste his breath on Tang Zhen?

The reason for this was that Tang Zhen indeed had something that they were afraid of. In addition, they could use this matter to control the ice wind tower. Therefore, the scene of negotiation and settlement had happened.

As for the issue of compensation, it was nothing more than taking advantage of others. No matter how much compensation was given, duo lie would not feel any heartache!

Of course, if Tang Zhen did not agree to reconcile, the divine Kingdom would naturally not let him off.

Thinking about how they still dared to rush to such a dangerous place despite knowing that Tang Zhen was carrying a super bomb, one could tell that they must have made full preparations to protect themselves when the explosion occurred!

Therefore, it was extremely unwise to reject the divine Kingdom's Tower's request for reconciliation. Since he had achieved his goal, Tang Zhen would not look for trouble.

He was very clear in his heart that unless he really had the strength to ignore everything, he must not blindly fight with courage and ruthlessness. Otherwise, sooner or later, he would be covered in injuries and might even lose his life!

As for why the other party came all the way here to be a peacemaker, it must have involved the issue of interests. After all, compared to the inanimate treasures, hundreds of thousands of cultivators and residents were the real wealth!

When he thought of this, Tang Zhen nodded his head. He turned to the king and said, "In that case, I'll have to trouble you, Sir!"

Duo lie laughed when he saw this and asked Tang Zhen to wait for a moment. He then gave a few instructions to the cultivator beside him before turning around and flying towards the ice wind tower.

Tang Zhen didn't say anything else. He knew that the other party was still on guard against him and didn't allow him to get close to the ice wind tower. This was to prevent them from suddenly destroying the tower.

Although the other party's actions were a little inappropriate, there was nothing wrong with it. Therefore, Tang Zhen laughed softly and patiently waited.

In fact, if Tang Zhen wanted to destroy the ice wind tower, even if the cultivators in the divine Kingdom Tower doubled in number, they would not be able to block his way!

It didn't take long for the king-level cultivator to return. He whispered a few words to duo lie and then retreated to the side.

Duo lie turned his head around and smiled at Tang Zhen, "I'm afraid I'll have to Trouble City Lord Tang to wait for a while because the residents of the ice wind tower need time to evacuate and the compensation given to you also needs to be sorted out."

The entire process will take about a day, what do you think?"

Tang Zhen nodded. After he said "it's fine," he slowly descended from the sky and casually cleared out an empty space.

He took out a tent from his storage space and set it up. After placing the little monster inside, Tang Zhen actually took out a pot and stove-like item and placed it in front of him.

Duo lie also descended from the sky upon seeing this. He slowly walked to Tang Zhen's side.

When he saw Tang Zhen casually light up a fire and mix out a portion of soup ingredients before washing the fire spirit eel and putting it in, duo lie's face, which was covered in light, couldn't help but reveal a trace of surprise.

This Tang Zhen was indeed interesting. He actually still had the mood to cook and enjoy delicious food in such an environment?

He must have extreme confidence in his own strength, which was why he would do such a thing. He was truly bold!

However, when he thought of the information he had obtained earlier, duo lie had no choice but to admit that Tang Zhen did indeed have the capital to look down on a strong enemy. This was because even he was most likely not a match for Tang Zhen!

After all, the abilities that Tang Zhen had displayed along the way had long surpassed the category of ordinary King level cultivators. He had faintly touched on a higher level of cultivation.

After thinking up to this point, naduo lie laughed out loud and walked in front of Tang Zhen, "I'm a little hungry after such a long journey. I wonder if city Lord Tang could share some good food with me?"

Tang Zhen smiled when he heard this. He made a "please" hand gesture. Duo lie casually waved his hand and gathered the accumulated snow into a stool before directly sitting in front of Tang Zhen.

At this moment, an extremely alluring fragrance was already floating out of the pot. It turned out that the fire spirit eels, which had just been put into the pot not long ago, were already cooked and were rolling in the soup.

Tang Zhen sniffed it and immediately felt a fragrance that refreshed one's heart assault him. It was likely that the most delicious fragrance in the world was nothing more than this.

It seemed that the ice wind City Master was right. This kind of fiery red fish was indeed an extremely rare and delicious dish!

Reaching out with his chopsticks to pick up a piece of fish, Tang Zhen discovered that the fish meat of the fire spirit eel was actually extremely special. It was actually like a red, translucent jelly. After picking it up, it constantly trembled and mixed with the steam emitted from the surface, just like a ball of trembling and burning flames!

As soon as he put it into his mouth, the fish immediately turned into a sticky soup. An indescribable delicious taste spread out, making people drool.

“Not bad!”

After Tang Zhen praised, he casually took out a pot of blood-red wine and took a big gulp. His face was filled with satisfaction!

Duo lie also took a bite of the fish and was similarly full of praise. He waved his hand at Tang Zhen, took the pot of strong wine, and drank a mouthful before laughing out loud.

city Lord Tang knows how to enjoy life. You’re much better than an uncouth fellow like me!

Duo lie didn’t seem to have any scruples at all. He ate big mouthfuls of meat and drank big mouthfuls of wine. He appeared to be very forthright, completely different from his previous performance.

Tang Zhen laughed out loud when he saw this. He felt that the other party’s actions were extremely to his liking.

This was the first time that both parties had met, yet duo lie could eat the food he had prepared and drink the wine he had provided without any fear of Tang Zhen’s tricks.

Perhaps the other party had something to rely on, or perhaps they thought that Tang Zhen would not dare to do so. Hence, they made such a move.

Tang Zhen wasn’t in the mood to care about the specific reason. It was just a delicious meal. Wouldn’t thinking too much destroy his mood?

While eating the delicious fire spirit eels and drinking the special beast blood wine of the alien race, the two King level cultivators began to chat.

Tang Zhen was very interested in the massive divine Kingdom, so he casually asked a few questions. When he learned that the divine Kingdom’s Tower was actually in the top ten of the spirit battle zone, he was not surprised.

Dorie had already briefly introduced the composition of the divine Kingdom’s Tower City. If this kind of terrifying strength couldn’t be ranked on the cornerstone platform’s Warzone rankings, then Tang Zhen really didn’t know what to say!

If the top ten were so powerful, what would the first-ranked Lou Cheng do?

Following that, Tang Zhen asked a few more questions. They were all questions that were not related to secrets. Duo lie smiled and answered them one by one.

As they chatted, duo lie looked at Tang Zhen’s storage ring more than once with an envious expression.

Castellan Tang, you’re really lucky to have such a storage equipment. You must know that this kind of treasure is very rare even in the spirit fall battlefield. Only those stronger battlefields or higher-ranked towers will occasionally sell a few of them, but all of them have been fought over crazily!

Duo lie’s words weren’t nonsense. In fact, Tang Zhen also had some understanding of this situation. After careful analysis, he felt that there were two possible reasons for the scarcity of storage equipment.

The first was the first possibility.

Storage equipment was by no means common. Even in the thousands of different worlds, it was considered a treasure. Ordinary cultivators could not possess it.

Moreover, the strength of these foreign worlds was quite strong, and the difficulty of invading them was extremely high. It was extremely difficult to obtain storage equipment from these foreign worlds!

It was for this reason that the price of storage equipment was extremely high, but the price fluctuations were too large.

It might be worth a hundred million brain beads in this region, but it would exceed a billion in another region. The more powerful the region, the higher the price!

As for the second reason, it might be that the sellers of the storage equipment had deliberately increased the price of the storage equipment. After all, the rarer something was, the more expensive it would be. Moreover, it was the kind that could not be bought with money!

It was extremely normal for duo lie to be envious of Tang Zhen's storage equipment.

When he thought of this, Tang Zhen's heart stirred. He softly said to duo lie, According to the previous agreement, the ice wind tower needs to pay compensation to me, right? "

When Dorie heard this, he gently nodded his head. that's only natural. This is the usual practice. Do you have any other requests? "

"Request, hehe, of course I have one!"

Tang Zhen looked at the pensive duo lie on the opposite side as he smilingly said.

Chapter 809 death (1)

Seeing duo lie's eyes fixed on him, Tang Zhen once again lowered his voice and said, if the ice wind tower's compensation is all in the form of origin stones, I still have a storage ring that I can use.

After Tang Zhen spoke up to this point, he no longer spoke. He picked up a piece of fish and took another bite.

However, duo lie's body trembled. He used a complicated expression to look at Tang Zhen. A moment later, he laughed out loud again.

Clearly, he had already understood Tang Zhen's intention. From the looks of it, he was also very tempted.

As for how he would do it, it was up to him. Tang Zhen only needed to see the results.

Just as Tang Zhen and duo lie were conversing, the protective barrier above the ice wind tower suddenly flickered and disappeared.

Then, the tightly shut city gate opened, and a group of cultivators from Lou city appeared first. They drove the big carriages pulled by war beasts with all their might, and they lined up in a long line to leave.

At this moment, the cultivators of the Loucheng city had gloomy expressions on their faces as they followed closely behind the carriage. However, their strong bodies seemed to be unable to carry their staggering footsteps.

All the cultivators in the city knew that they would never have the chance to see its majestic appearance again after they stepped out of the city gate!

Some cultivators still couldn't believe that the ice wind tower, which had once dominated the thousand-mile icy plain, would disband just like that!

However, this was the truth, and they could not ask or question too much. They could only silently follow the city Lord's orders and began to move the valuable items in the city.

The Lou Cheng cultivators were used to hiding their emotions, so even if they knew that their home would no longer exist, they did not show too much emotion.

However, the pain and anger in his heart could not be easily quelled.

The ice wind tower's cultivators who knew the real reason for the matter couldn't wait to cut Tang Zhen into a thousand pieces to vent the anger in their hearts!

However, he could only think about this matter. After all, Tang Zhen's strength was there. If his impulsiveness caused him to attack, hundreds of thousands of residents in the city would be buried with him!

In that case, not only would it be a futile effort, but he would also become a sinner through the ages, unable to absolve himself of the blame even with ten thousand deaths!

It was precisely because of this concern that they did not dare to act rashly even though their hearts were bleeding.

However, a wave of resentment that was so thick that it was almost impossible to disperse was emitted without any concealment, filling the sky above the ice wind tower.

Compared to these cultivators who were as silent as mountains, the residents of the ice wind tower who were carrying large and small bags were wailing and sobbing. Many of the residents' eyes were red and tears kept rolling down.

They supported the old and took care of the young as they walked out of the ice wind tower with a face full of reluctance. Along the way, their cries shook the sky and really resounded through the clouds.

From time to time, some of the residents of Loucheng would cry and fall to the ground after reaching the city gate, refusing to take another step out.

At this time, the soldiers of the city would walk up and drag him to the side so as not to affect the residents behind him leaving the city.

Some of the older residents knelt on the snow in front of the city, their eyes filled with tears as they stared blankly at the city that they had spent their entire lives in.

They stretched out their hands and choked on their words, but they felt that their throats were blocked and they couldn't say a word.

After letting out a long sigh, these old residents stood up and took one last look at the ice wind tower before turning around and joining the crowd.

However, there were some elderly residents who didn't choose to leave. Instead, they staggered to the foot of the tall city wall and gathered together, talking about the past in the cold wind.

At that time, they were young, braving the wind and rain, living a life of blood on the blade all day long. They had seen all kinds of strange scenery in the other world, and at the same time, countless companions had died in battle and left.

Now that they were old and could no longer walk, they did not want to leave their homeland.

Therefore, even if the ice wind tower was destroyed, they would still stay and guard the ruins of the tower until they died. Then, they would be buried under the snow and become one with the land!

Some of the young and strong residents of Loucheng were also not ready to leave. There were about thousands of them. At this moment, they were gathered together like the mountains on the snowy plains. They were silent and strong, quietly watching their friends and family gradually leave.

No one jumped out to question the choice of the residents of the city, and no one forced them to leave. Instead, they were allowed to stay.

Of course, the vast majority of the people in the towers chose to leave. The divine Kingdom had promised that they would be allowed to build a new tower ten thousand miles away, and they would still be residents.

As long as they didn't become Wanderers, it didn't matter even if they had to travel thousands of miles. It was much better than living a precarious life!

In the following time, the stream of people at the city gate never stopped. They formed a long snake whose head and tail could not be seen, slowly moving in the cold wind.

Tang Zhen quietly watched the scene in front of him. His eyes flickered with a faint glow as he occasionally drank a mouthful of strong wine that burned his throat.

If the divine Kingdom hadn't suddenly appeared at the last moment and the ice wind City Master hadn't promised to get rid of the scattered towers, the residents of these towers would have been buried deep under the ruins of the towers!

Tang Zhen wasn't a bloodthirsty person. Up until now, all the people he had killed had a reason for their deaths.

Although some of them were implicated, they could only blame their bad luck for being in Tang Zhen's enemy camp.

Now that he could save hundreds of thousands of lives, it could be considered a merit, and it would not make him feel guilty.

However, if these things didn't happen and the ice wind City Master still chose to fight to the death, Tang Zhen would have simply detonated the Super bomb. He would definitely not show any mercy for any reason!

After duo lie had eaten and drunk his fill, he smiled and flew to the ice wind tower. He must have gone to deal with some matters.

Tang Zhen held quite a bit of hope for duo lie. After all, what he lacked the most right now was origin stones. Moreover, he had dozens of storage rings of various sizes. It was truly the most appropriate for him to come here to make a deal!

With how much Dorie cared about the storage equipment, he would probably spare no effort to make this happen.

As the sun rose and the moon set, more than ten hours had passed. Finally, no more residents appeared at the gate of the ice wind tower.

hahaha! dolleahaha laughed as he walked over. Behind him were two large carts with a few huge boxes.

A trace of a smile was similarly lifted on the corner of Tang Zhen's mouth after he saw this scene. He stood up and walked over.

this is the ice wind tower's compensation for you. You can check it. It's all origin stones!

After speaking, Dollie pointed to another big carriage."I've fought for these extra things for you. They're all good things that can be used!"

As he spoke, Dorian opened one of the boxes. As expected, it was filled with origin stones of various sizes and colors, emitting a heterogeneous origin aura.

"In that case, many thanks, old brother!"

Tang Zhen cupped his fists and bowed. He stepped forward to check and confirmed that these boxes were indeed filled with origin stones!

He was slightly happy. With this amount of origin stones, this trip was worth it.

However, he did not know how many law master stars he could activate after using all these origin stones.

Under everyone's gaze, Tang Zhen casually waved his hand and these boxes disappeared into thin air, all of them being stored in his storage space.

Soon after, under duo lie's expectant gaze, Tang Zhen flicked out a ring. It drew an arc in the air and landed in duo lie's hand.

Holding the ring in his hand, Dorie sensed it for a while. After confirming that there was no mistake, he laughed out loud, his voice full of joy.

It was clear that because he had obtained this storage ring, dolet's mood had also become extremely good.

I, Dolito, call you little brother. I owe you a favor for this matter. When I have the opportunity to pass by the kingdom of God in the future, I will definitely treat you with great hospitality!

From Dollie's point of view, the storage equipment that Tang Zhen had given him was extremely valuable. If it was used to thank him for this small matter that he could casually do, he would feel a little embarrassed.

It was also because of this that he said these polite words.

Tang Zhen also replied courteously. After which, he turned his gaze towards the ice wind tower as his eyes flickered.

Duo lie naturally knew what Tang Zhen was thinking. After all, he had yet to achieve his goal this time around. The plane's transmission channel had yet to close.

don't worry. The ice wind tower will definitely be destroyed. It's just a pity that it's a bit of a pity.

When duo lie said this, he paused for a moment. When he saw Tang Zhen looking at him, he continued, "It's a pity that the ice wind city's master, a dignified two-star King tier, is unwilling to leave the tower.

Looking at him, I'm afraid he'll have to defend this city ruins until he dies!"

When Tang Zhen heard this, the hunched figure of the fishing old man flashed in his mind as he gently nodded.

The destruction of the ice wind tower was equivalent to losing the support of one's life and spirit. To the ice wind tower's city Lord, perhaps living and dying together with the tower was the best ending for him!

Chapter 810 end, return

At this moment, at the highest point of the Icewind tower, a figure was looking down at the entire tower.

This person was the city Lord of the ice wind tower. When the residents of the tower were evacuating earlier, he had stopped here and watched silently. He was still standing there even after all the residents had evacuated.

However, as the building became empty, his heart also became empty.

At this moment, there was no longer any trace of the aura of a two-star King tier on his body. The dignity of a city Lord had also disappeared long ago.

At this moment, the master of ice wind city was like a hunched old man in his twilight years. His muddy eyes were filled with sorrow that couldn't be melted.

After a while, this magnificent city that looked like a Crystal Palace would completely "die" and be covered by the raging wind and snow in the days to come.

After all, after losing the building's foundation, the building's original special ability would disappear and it would become no different from an ordinary building. In fact, the speed of erosion would be several times faster than an ordinary building!

Especially in the harsh environment of the thousand miles of ice field, it couldn't survive for long.

However, thousands of years later, who would remember that there was once a national-level city in this position?

"It's over, it's all over!"

The master of the ice wind city let out a long sigh and shook his head.

The matter had already become permanent residence. This time, the ice wind tower had been defeated. It had been defeated to the point that it had lost its home!

He glanced at the residents of loucheng who were leaving. The long black Dragon they had formed had gradually disappeared into the snow.

At this moment, they were like homeless Wanderers, struggling to move forward in the bone-piercing cold wind, just to reach a new home.

In any case, the lives of hundreds of thousands of residents in the city were saved. He hoped that these residents could live a better life in that strange land thousands of miles away!

He took another look at the tower under his feet and waved his hand. Then, a rotating cornerstone of the tower appeared in the air in front of him. It was full of complicated and dense runes, and it exuded a mysterious aura.

The Lord of the ice wind city thought of something. Then, the light of the foundation stone dimmed, and it turned into a strange-looking black stone. It slowly fell into the palm of the Lord of the ice wind city.

It was also at this moment that the residents of the ice wind tower, who were already far away, felt a pain in their hearts. It was as if an unknown power in their bloodline had been drawn out in an instant.

"This is a Kasaya."

The ice wind tower's residents who were silently hurrying on their way all stopped in their tracks at this moment. Then, they turned their heads to look in the direction of the ice wind tower, and their eyes were filled with tears once again.

loucheng is destroyed. Our home is gone. We can't go back anymore, Yingluo!

Countless residents of the ice wind tower fell to the ground, wailing and kowtowing in the direction of the ice wind tower. No matter what they did, they couldn't stop the ice wind tower.

The cultivators of loucheng city clenched their fists so tightly that cracking sounds could be heard. They raised their heads and let out angry roars.

The sound was like a group of injured wild beasts that were powerless to drive away the enemy that was destroying their nest. They could only let out sorrowful roars filled with endless sorrow and grief!

The master of the ice wind city seemed to have seen this as well, but he only sighed and turned his head.

However, when he looked at the lifeless Lou Cheng, he still felt as if a knife was being twisted in his heart.

The towers were not inanimate objects. As their levels increased, they would gradually possess their own consciousness, especially national-level towers.

Ever since he took over as the city Lord, he had been in contact with the tower spirit. It had been more than two hundred years and they were already as close as partners.

But just now, he had personally killed his old friend. That feeling was even worse than killing him.

Even though she knew that she was about to face death, the tower spirit of the ice wind tower remained calm and even tried to comfort him. She didn't want him to be too sad. After all, this was the best choice.

The master of the ice wind city could only laugh bitterly.

Walking down from the tower, the city Master of ice wind city walked slowly on the street that he had walked on countless times before, heading straight to the ice cave below the tower.

At this time, in the empty tower, only the sound of his footsteps reverberated, and his back looked extremely bleak.

The underground ice cave that he was heading to was the place where the city Lords of the ice wind tower slept. Ordinary people were not allowed to approach.

However, there was no one standing guard outside the ice cave. It was obvious that the previous guards had all left.

The city Lord of the ice wind city stood at the entrance of the underground ice cave and looked back at the tower again. Then, he slowly turned his head and walked into the depths of the ice cave. His old figure was soon swallowed by the endless darkness in the ice.

It was also at this moment that the highest ice crystal Tower in the ice wind tower City suddenly crumbled and shattered. Like a broken pillar that supported the sky, it heavily crashed onto the ground.

As if it was some kind of chain reaction, all the tall buildings in the ice wind tower City collapsed one after another. The loud rumbles were endless.

In less than a dozen minutes, the once glorious Icewind tower was completely reduced to ruins!

.....

Tang Zhen suddenly had a feeling of being relieved of a heavy burden as he looked at the plane transmission channel that was slowly disappearing.

During this period of time, he had not slept or rested, crossing the war zone and traveling thousands of miles. Now, he had finally completely resolved the crisis of his original world!

The hardships were not worth mentioning to outsiders.

Fortunately, the dust had settled and everything had been resolved. It was time to return to Holy Dragon City.

After thinking up to this point, Tang Zhen cupped his hands towards duo lie, "This Tang's goal has been achieved, so I won't stay any longer.

Old brother duo lie, the mountains are high and the rivers are long. We will meet again!"

After he finished speaking, Tang Zhen's figure flashed and suddenly disappeared without a trace!

Duo lie waved his hand in the direction where Tang Zhen had disappeared. His eyes revealed a pensive expression.

"He's gone?"

A two-star King tier slowly walked over and spoke to duo lie in a soft voice. It was the white-robed cultivator who had come into contact with the master of the ice wind city earlier.

"He's gone. He's very straightforward and didn't drag things out at all!"

Hearing this, the two-star King tier nodded his head. it's good that he left. After all, Tang Zhen's strength can not be underestimated. I will feel more at ease if he leaves earlier!

Speaking up to this point, the two star King tier glanced at duo lie's storage ring with an envious look. He shook his head and sighed, "If I had known that Tang Zhen still had a storage equipment in his hands, I would definitely not have let you come into contact with him back then. In the end, you got off easy!"

Duo lie laughed out loud, raised his hand, and waved it. He said, "Come on, do you want to take all the benefits?"

Since you also want a storage equipment, you can just grab the one in Tang Zhen's hand. I guarantee it'll be better than this!"

The two-star King tier shook his head and sighed, " "If it wasn't for the fact that I don't have the strength to keep him here, do you think I would let him go so easily?"

After all, this human King has too many secrets. After killing him, we can even exchange him for a generous reward. I don't think many people wouldn't be tempted, right?"

Duo lie coldly snorted and disdainfully said, "Everyone wants this benefit, but you should also consider your own ability and see if you can take it.

If he accidentally lost his life, it would be too late for him to regret!

I advise you to throw away those unrealistic thoughts and quickly arrange the migration work for the residents of the ice wind tower. After all, this place is too far away from our tower. If you don't take care of them well, it'll be good enough if half of these residents can reach their destination alive!"

When that two star King tier heard this, he looked at the spot where Tang Zhen had disappeared with a somewhat unwilling expression and nodded his head.
