Chapter 811 Return, the uncrowned king (1)

The mountains were tens of thousands of feet high, the water was thousands of feet wide, and the road was filled with endless magnificent scenery!

It was only at this moment that Tang Zhen finally had the leisure to appreciate the scenery of the spirit fall battle zone. Every time a unique scenery entered his sight, he would let out a heartfelt exclamation.

It wasn't an exaggeration to say that some of the scenery was the work of the gods. It was really the creation of heaven and earth!

Compared to the desolation of the boorish Warzone, the spirit fall Warzone was indeed more than one level stronger, both in terms of strength and resources.

Even the Wanderers here were living a much better life than the Wanderers in the wilderness. At the very least, as long as they were diligent, they would not lack food.

Of course, joining Lou Cheng was still the only choice if he wanted to live a better life. Lou Cheng had a firm control over many resources, and The Drifters couldn't get in touch with them at all.

On the way back, Tang Zhen deliberately took a detour. Firstly, it was to avoid unnecessary trouble. After all, this route was already known by countless cultivators in loucheng. It was inevitable that there would be an ambush and interception that was not afraid of death.

Secondly, he wanted to visit a human city in the spirit fall battle zone. When he had parted with old Lei from the celestial sword city, he had said that he would stay there for a while.

Moreover, from what he said, this city seemed to have been built by the residents of immortal sword city and had always maintained a close relationship with immortal sword city.

It could be said that it was a subordinate city of the immortal sword city, but it was in a different war zone!

Along the way, although Tang Zhen also met some foreign cultivators, they all passed by in a flash. The other party also did not recognize that the person riding the flying magic carpet was the cross-realm expert that countless cultivators had been talking about during this period of time!

However, even if they knew about it, they did not dare to act rashly. They were afraid that if they provoked Tang Zhen, they would implicate their own building and cause it to suffer.

After all, this man had destroyed two National towers and killed countless cultivators. He was truly ferocious!

It was said that even the kingdom of God, which was ranked in the top ten and had incomparably powerful strength, did not dare to act rashly because of fear of Tang Zhen's strength.

Therefore, if you don't have enough strength, don't come forward. Otherwise, it would be no different from seeking death!

It was also because of these rumors that Tang Zhen's reputation became more and more famous. The cultivators in Lou city who dared to have designs on him became fewer and fewer, to the point that they avoided him like the plague!

There were even some well-known cultivators in Loucheng who claimed that with Tang Zhen's strength, he could definitely win the glory of a titled King!

As soon as he said that, it immediately caused an uproar!

The so-called titled Kings referred to those who had outstanding combat strength, had brilliant battle records, and had been recognized by the cornerstone platform as powerful King level cultivators. Every titled King was an absolute powerhouse!

It was extremely difficult to obtain such a title. Even in the top-ranked cities of the country, there were only a few titled Kings. Even if there were, it would have been many years ago.

The number of King level cultivators who had been conferred titles and were still in good health in the spirit battle zone could be counted on one's fingers!

Therefore, when the news that Tang Zhen had the qualifications to obtain the title of King spread, it triggered a debate among many powerful cultivators. They collected all of Tang Zhen's actions to determine whether Tang Zhen really had the strength to obtain the title.

However, the strange thing was that all the cultivators in Loucheng who had come into contact with Tang Zhen shut their mouths at this moment. Even if someone asked, they would look at the questioner as if he was an idiot.

In fact, only they were clearly aware of Tang Zhen's true strength. They already had the answer in their hearts. However, they disdained to argue with those self-righteous fellows.

Looking at Tang Zhen's actions after he entered the spirit battle zone, if he couldn't get a title with this kind of strength, then it was likely that no one else could get this honor!

It was a pity that Tang Zhen was not a cultivator from the spirit fall battle zone. Otherwise, this glory would be destined to fall on his head, and his name would spread throughout the entire battle zone!

However, even if Tang Zhen was unable to obtain the title of King in the spirit battle zone, the cultivators in the tower City still gave him a title in private, "Savage King"!

This title had two meanings. First, it was because Tang Zhen came from the wilderness in a backward war zone. This was also a name often used by the cornerstone platform's title.

Secondly, it was also the cultivators of the fallen spirit war zone who were secretly mocking Tang Zhen. After all, the word "barbarian" had a certain derogatory meaning.

However, no matter what, this uncrowned King was not something that anyone could obtain. This also proved that the cultivators in the spirit battle zone had completely recognized Tang Zhen's strength.

After flying at a steady pace for two days, Tang Zhen finally saw the human race's Tower that old Lei had mentioned.

From a distance, the human city looked like a dam that stretched across a huge Lake. From time to time, boats could be seen crossing the water.

A few bare-chested muscular men stood on the boat, using all kinds of fishing gear to catch fish. From time to time, singing and laughter could be heard.

A trace of a smile appeared on the corner of Tang Zhen's mouth after he saw this scene. He controlled the flying carpet and slowly approached.

Compared to the countless alien races in the world of towers, the human race was just one of them. Because of innate reasons, they were inferior to the alien races in many aspects, which caused the human race to be bullied for a long time.

However, the human race was extremely resilient. No matter how many hardships they went through, they still maintained the continuation of their race. Compared to the countless races that had disappeared in the world of loucheng, this was already an extremely difficult thing!

The city in front of them was obviously a place where the human race lived. Otherwise, such a scene would not have appeared.

At this moment, as Tang Zhen approached, the men who were fishing also noticed his existence. They stopped their work and raised their heads to constantly size up Tang Zhen. A trace of worry was revealed on their faces.

After all, a cultivator who could fly in the air was definitely not weak. What was he doing in Lou Cheng?

Just as these fishing men were secretly guessing, three Overlord-grade cultivators rode on a giant water bird and soared into the sky from the dam, heading straight for Tang Zhen.

Tang Zhen stopped his flying magic carpet upon seeing this. He indifferently looked at the other party.

The three Lord-grade cultivators quickly arrived in front of Tang Zhen and shouted, "May I know where you are from and why you have come to my underwater city?"

When Tang Zhen heard this, he used a voice that could be clearly heard by the other party and indifferently said, "I'm here to see old Lei. Is he from the immortal sword city?"

"Old Lei?"

The cultivator who asked the question frowned and immediately came to a realization. He said to Tang Zhen, so you're looking for Lord Lei Jue. What a coincidence. He left alone a few days ago after he finished his business!

Tang Zhen nodded his head when he heard this. The other party had already admitted that he knew old Lei. In that case, there was no need for him to lie to him. It was obvious that he had arrived a few days late and had missed the meeting with old Lei.

However, Tang Zhen was on the way and it did not matter if they met. Since the other party was not here, there was no need for him to continue disturbing him.

After thinking up to this point, Tang Zhen cupped his hands towards the three overlords and said “sorry to disturb” before he rode the flying magic carpet and disappeared!

Looking at Tang Zhen’s distant figure, a Lord cultivator beside him suddenly said, “Did you guys think of anything when you saw that cultivator’s outfit?”

The two cultivators beside him couldn’t help but ask curiously, “ what do you mean by dressing up? what are you thinking about? can you be more specific? ”

“This person’s cultivation is extraordinary, and he’s riding a magic carpet with a little monster sitting beside him. He doesn’t look very old,”

At this point, the Lord-tier cultivator seemed to have thought of something, and his eyes flashed with horror.

The other two looked at each other and then at their companion who was still in a daze. They whispered, “You’re saying that person is Yingluo?”

“That’s right, it’s the king of the wilderness, Tang Zhen!”

Hearing this, the three Lord cultivators all trembled with excitement and surprise.

At this moment, when he looked in the direction that Tang Zhen had disappeared in, he was actually speechless for a long time. Only after a long while did he bow from afar!

Perhaps this was the only way to show their respect. After all, Tang Zhen was a human cultivator. His powerful strength had long been worshipped by all the human cultivators in the spirit fall battle zone.

Only a person like this could intimidate the alien races and stop the human race from being bullied, and even have the qualification to become a powerful race!

Chapter 812 Information about the black prison tower (1)

Tang Zhen didn’t know that the three cultivators had already recognized his identity after he left.

What he didn’t know was that his name had spread throughout the entire Spirit fall battle zone, especially among the high-level buildings. Almost everyone knew him!

Of course, in these rumors, he was often described as a demon who killed without blinking an eye. All the foreign cultivators who were targeted by him were not spared.

There were also cultivators from Lou Cheng who claimed that they had seen Tang Zhen with their own eyes and that he was covered in bombs.

Once Tang Zhen found the tower to be an eyesore, he would not hesitate to rush in and detonate all the bombs on him, razing the tower to the ground!

However, Tang Zhen did not suffer the slightest damage as he was located at the center of the explosion. It did not take long before he appeared again, alive and kicking!

Unknowingly, those rumors had already completely turned Tang Zhen into a demon!

If Tang Zhen were to hear these rumors, it was likely that he would not be able to laugh or cry. This was because some of the rumors were really too ridiculous.

After leaving the city in the water, Tang Zhen rode the flying magic carpet and headed towards the dangerous mountain range.

Now that he had nothing else to do, he naturally had to speed up and return to his City Tower as soon as possible.

A City Tower was like a miniature country, and there were many miscellaneous matters. Although many things were handled by his trusted confidants, there were some things that he had to personally take care of, and others couldn't handle them.

Moreover, he was a symbol of the Holy Dragon city's strength. It was precisely because of his existence that many foreign tribes who coveted the Holy Dragon City did not dare to act rashly. If he was not around for a long time, the other party might try to play some tricks in private.

At the same time, the battle at the level 7 overseas battlefield had come to an end. All the enemies there had been wiped out.

The entire overseas region was already under the Holy Dragon city's Army's control. They were currently cleaning up and transporting the spoils of war.

After Tang Zhen returned to the Holy Dragon City, he only needed to follow the rules and turn in the battle achievements he had obtained to the platform. Then, he would be able to successfully upgrade the Holy Dragon City to an eighth-grade city!

After Lou Cheng was officially promoted to level 8, Tang Zhen would focus on dealing with the work of the hidden plane coordinates in the original world and completely eliminate all hidden dangers.

After that, the Holy Dragon City would recuperate for a period of time. When the time was right, they would start the level eight overseas battlefield.

At the same time, he had to be prepared to give the black prison tower a fierce counterattack and let these guys know that he was not someone to be easily bullied!

Those who dared to bite him also had to be prepared to lose their teeth.

Of course, if possible, it would be best to get rid of this powerful enemy once and for all!

If they really couldn't face them head-on, they would use the Super bombs to finish them off. If one didn't work, they would use two. If two didn't work, they would use three.

However, ever since he had chatted with the Kings of the kingdom, Tang Zhen already knew that in fact, weapons like nuclear bombs might not be able to have a certain destructive effect when facing the Kingdom's Kingdom's Kingdom's Kingdom's Kingdom's Kingdom's Kingdom's Kingdom's Kingdom's Kingdom.

In this world, there were both indestructible Spears and unparalleled shields. However, the chances of them clashing were extremely small, and the moment they did, it would be earth-shattering!

Therefore, in the hands of some countries, they possessed world-destroying weapons that were even more terrifying than nuclear bombs. They could carry out cause-and-effect and dimensional attacks, but they would not use them easily.

If the black prison tower also had similar defensive methods, then after withstanding the initial nuclear attack, once they recovered, they would definitely take revenge on the Holy Dragon City.

With Holy Dragon city's current strength, if they were to encounter such a mode of attack, they would definitely not be able to resist. The final result would only be the destruction of the city and the death of people!

Tang Zhen would definitely not allow such a terrible situation to happen!

Therefore, it was best to use a silent method to let the black prison tower fall into the trap without Tang Zhen being implicated.

There were many similar methods, such as plague, poison, flooding, and so on, all of which could produce unexpected results.

As for how to operate it, he still needed to plan it carefully and execute it secretly!

&Nbsp; in this case, the black prison tower could only suffer in silence.

In short, no matter what method he used, Tang Zhen must make the black prison tower pay a heavy price!

Otherwise, if he were to find an opportunity to plot some other schemes, Tang Zhen would not be able to guard against it!

When there was a great difference in strength between the enemy and himself, the best strategy was to outwit them!

Tang Zhen did not get carried away just because he had destroyed two national-level towers. This was because he clearly knew that although the black prison tower was located in a backward Warzone like the wilderness Warzone, its strength was definitely not weak.

After all, there were a million cultivators who attacked the black prison tower in the past, but more than half of them were killed.

After so many years, no one could tell how strong the black prison tower was.

Moreover, the potential value of the black prison tower was very high, and potential also represented strength. After all, this kind of special tower had a higher starting point than ordinary towers!

If he had to compare it to a national-level building to determine the strength of the black prison tower, then the divine kingdom building would be a good reference.

However, in terms of strength, the black prison tower might not be much weaker than the divine Kingdom Tower in the spirit fall battle zone.

&Nbsp; to be more accurate, due to some special circumstances, the black prison tower should have one-third of the God Kingdom Tower's strength!

One should not underestimate this one-third. After all, the strength of a divine Kingdom was there. Ten percent of its combat power was almost not inferior to an ordinary National Kingdom!

This was Tang Zhen's basic understanding of the black prison tower after he had collected and analyzed the information during this period of time.

It was also because of this that he was sure that this was a tough bone to chew.

According to the information obtained, the black prison tower was located in a volcanic hilly area. Due to the nature of the race, the black prison tower was not built on the surface but deep underground.

Although that place was dark, it was the favorite living environment for the residents of the black prison tower. In addition to providing a comfortable living environment for the residents of the black prison tower, there were also a large number of special underground monsters.

They were tamed by the black prison tower and became its right-hand men in the battle against other worlds!

These underground monsters were brutal by nature, and their bodies were covered in hard scales. They were almost invulnerable!

Moreover, due to the vast underground space, the number of these monsters was also extremely shocking.

Under the control of the cultivators of the black prison tower, these monsters became fearless and attacked the enemy.

Under such a terrifying attack, almost no opponent could easily withstand it. Without exception, they all retreated in defeat!

As for the cultivators of the black prison tower, they were not easy to deal with either.

They were tall and strong, with an average height of 2.4 to 2.5 meters. Their skin was as dark as ink, and their vital parts were covered with fine scales.

These cultivators of the black prison tower had amazing strength. During a battle, if they were in their peak state, they could easily defend against three cultivators of the same level.

Furthermore, every citizen in the black dungeon tower was a soldier, regardless of gender or age. Any resident was a qualified soldier.

Therefore, when facing such an enemy, he had to be careful!

Chapter 813 The transmigrator at the city gate

Holy Dragon City, Back Valley.

At this moment, in front of the huge teleportation gate, there were many Holy Dragon City Warriors with serious expressions and full armor.

They were armed with special firearms and completely blocked the road, preventing any unrelated people from approaching.

On the road in front of them was a continuous convoy filled with all kinds of spoils of war collected from the overseas battlefields.

Looking at the valuable items, some of the more experienced cultivators nodded. Just by looking at the gains, they knew that the Holy Dragon City had made a big profit this time.

Compared to the cities with strong backgrounds, the Holy Dragon city's speed of clearing the level 7 overseas lands was not the fastest, but it was not slow either.

Moreover, this was done by the Holy Dragon City with its own strength without any external help, so it was enough to be proud of.

On an open space not far away, Qian Long and Tai Seng were sitting in a strange-looking off-road vehicle, talking to each other from time to time.

"Is there any news from the City Lord?"

I've just received a message from my original world. The city Lord has finished dealing with the matters in the spirit battle zone and is now on his way back.

it's good that you're back. Our Holy Dragon City will soon be promoted to a grade 8 city!

"Hmm, it seems that I'll be busy again soon!"

The two of them were now in high positions and had endless things to deal with every day. It could be said that ever since Tang Zhen left, they had to deal with almost half of the things in Holy Dragon City.

Fortunately, with Tang Zhen's imminent return, the burden on the shoulders of the two of them had been unloaded and they were about to relax.

Right at this moment, a notification rang out from Qian Long's communicator. He picked up the call and a deep male voice sounded.

"Commander, there's a group of people outside the city. They said they wanted to visit the inner city, but we stopped them.

Who knew that these people wouldn't listen to our advice and insisted on entering the inner city. We didn't let them in, so they just stayed at the city gate and didn't leave!"

Qian Long's brows furrowed as he spoke to his subordinate, you even have to trouble me with this kind of thing. Why don't you just drive them away? if they dare to resist, the leader will arrest them!

Qian Long's voice was calm, but it could easily determine a person's life and death.

"But they are all transmigrators. I'm afraid that if we don't handle it well, the city Lord will be unhappy!"

The other party explained in a low voice with a troubled tone.

After Qian Long heard this, he lightly shook his head and smiled bitterly at Tai Seng.

damn, another group of transmigrators from the original world. How annoying!

hahahaha! Tai Seng laughed and jumped out of the car while Qian Long started the car and drove towards the gate of the inner city.

.....

At this moment, at the entrance of Holy Dragon city's inner city, there were over a hundred young men and women in tank tops and shorts, their faces filled with anger. They were staring at the city guards.

"Hey, uncle, just let us in and take a look. I promise I'll come out after a while, okay?"

As they spoke, the two girls reached out to grab the Holy Dragon City soldier's arm, but they were flung away.

"I've already told you, non-Holy Dragon City residents are strictly prohibited from entering!"

The loucheng soldier looked at the young woman in front of him and coldly shouted.

"Unless you receive an order, don't even think about entering!"

When the crowd heard this, they immediately began to clamor, and some even tried to rush over.

The soldiers in charge of guarding the city saw this and shouted, raising the large-caliber rifles in their hands.

At the same time, the hundreds of Holy Dragon City soldiers on the city wall pointed their guns at them. If anyone dared to break through the city gate, they would shoot them to death.

A chilling murderous aura spread out from the soldiers of Lou Cheng, as if they had turned into ferocious beasts that were about to devour people!

After seeing this, the originally noisy scene suddenly became quiet. Then, all the young men and women took a few steps back, afraid that the soldiers would really open fire.

Once hit by this special rifle, even if the body was made of iron, it would be torn into pieces.

Although they were using a host body, it was no different from controlling their own body. After being injured, they would still feel pain and bleed, so no one would want to experience the feeling of being shot!

"Hey, can you guys be more reasonable?"

A woman in the lead stood out and shouted at the leading Holy Dragon City warrior, "Our Guild spent a lot of effort to get this batch of test slots, just to look up to the Holy Dragon City that we yearn for the most!

It wasn't easy for us to get here, but you don't allow us to go in. Then wouldn't we have made a wasted trip?"

Speaking of this, the young girl said angrily, "If you don't let us in, then when I return to my original world, I'll definitely write down everything that happened here so that everyone won't be fooled again!"

Hearing this, the other young men and women immediately echoed in unison, trying to pressure the Holy Dragon City soldier.

In the end, the soldier remained unmoved. With a cold expression, he did not allow them to enter.

Everyone's hearts sank. They knew that they would not be able to enter Holy Dragon city's inner city this time, because the city guards would not fall for this trick.

However, they still wouldn't give up so easily. After all, it wasn't easy to come to the world of loucheng, and they really didn't want to miss this opportunity.

At this moment, a man's voice suddenly sounded, " "Why do you have to enter the inner city? give me a reason. If I'm satisfied with it, I can let you in!"

Everyone's eyes lit up when they heard this, and when they turned to look, they saw a man in battle armor walking over, exuding a terrifying aura.

Looking at the man's appearance, someone immediately shouted, " it's the thousand Dragons, the thousand Dragon Commander!

"Boss, you're my idol, please accept my humble knees!"

boss thousand Dragons, I can't survive in my original world anymore, so I came here to seek shelter with you. Please don't look down on me!

Qianlong, I love you! I'm going to make love to you!

Upon seeing the thousand Dragons appear, the young men and women immediately revealed excited expressions. Many of them began to shout nonsense, and there were even girls who were shouting and charging toward the thousand Dragons, but they were held back by their companions.

This wasn't the game world, where they could make a scene as they pleased, so they had to be careful.

After all, the person in front of him was the commander of the Holy Dragon city's cultivators, and a powerful Overlord-level cultivator at that. It was fine to make a few harmless jokes, but if he suddenly got close, he might be mistaken for a sneak attacker and be kicked away!

Qian Long's face darkened as he walked over. He felt a slight headache as he looked at the overly enthusiastic young men and women before him.

As one of the main characters of the only virtual game in his original world, thousand Dragon was extremely well-known. Almost every time traveler from his original world would be able to recognize him at a glance.

He had come across more than one request for autographs and pictures.

In the beginning, Qian Long was still a little pleased with himself. He didn't expect to be liked by so many people.

However, as more and more similar things happened, he became numb to it. Whenever he saw similar scenes, he would reflexively want to escape.

It couldn't be helped, being too famous was also a kind of trouble!

Facing the group of transmigrators who were looking at him with fervent gazes, Qian Long couldn't put on a sour face anymore. She could only reveal a stiff smile as she looked at the men and women in front of her.

Chapter 814 The ultimate game testing begins _“Thousand Dragon Commander, we are members of the raging flame games Guild from our original world. We are all hardcore supporters of world of buildings! this time, the Holy Dragon Corporation set up the beta testing qualification for the ultimate game, world of the building. Our Guild was very lucky to get one hundred and fifty beta testing slots. We also spent a lot of effort to get the chance to teleport in advance!

We were extremely fascinated by the Holy Dragon City, so after we came to the tower world, we rushed here directly, but we were stopped and not allowed to enter.

Please help us and let us in to take a look!”

The tall woman stood up once again and stared at Qian Long as she explained with a clear voice.

The woman was tall and slender, her facial features were exquisite and straight, and she looked no worse than those celebrities.

With a single glance, Qian Long could tell that the body the woman was using was a host body created based on the transmigrators 'real appearance, so her own appearance should be the same as well.

Even if he had spent money to adjust his appearance during the customization, there would still not be much difference.

As for the other men and women, they also used this kind of body that was created according to the host's true appearance. This also avoided the situation of one thousand people meeting each other.

As for the ultimate game of world of buildings, it was a special game launched by the Holy Dragon Corporation. As someone of thousand Dragon's status, he naturally knew about it.

In fact, the purpose of this ultimate game was nothing more than to make money for these players, and at the same time, use them to work for the Holy Dragon City for free.

At the same time, he could use this game to strengthen the connection between the original world and Holy Dragon City, until everyone accepted it!

The Holy Dragon city's job was to help provide missions and give out rewards.

After knowing the other party's background, Qian Long couldn't drive him away anymore. After all, the Holy Dragon Corporation was also Tang Zhen's property. As a subordinate of the city Lord, he had to support the other party's work no matter what!

“Alright, I can allow you to go in and look around for an hour. After that, you must leave!”

After saying that, Qian Long no longer paid any attention to the others and left in his off-road vehicle.

“Thank you, commander thousand Dragons!”

don't go. Can you leave me your contact information? she's here to see you.

“Get lost, you love-struck fool!”

The group of young men and women cheered and made faces at the city guards. Then, they rushed in like a swarm of bees, their faces filled with uncontrollable joy.

And since they entered, exclamations of surprise kept coming. The real Holy Dragon city’s inner city was much more beautiful and spectacular than the game world!

.....

Just as these young men and women entered the Holy Dragon City inner city for a tour, over a hundred employees from the Holy Dragon Corporation from the original world were currently surrounding the holographic electronic map, pointing and discussing it.

This map actually covered more than half of the Wildlands, and it was full of all kinds of marks. After clicking on it, groups of video images and text introductions would pop up.

The main content was all related to the ultimate game that the Holy Dragon Corporation was promoting and testing!

all the chain quests have been sorted out. There are a total of 320 main quests and more than 6000 side quests. The random quests can not be counted at the moment.

the storyline characters are all in place. They can interact with the players at any time and issue the corresponding missions.

we’re still short of some of the required materials, but I heard that the city Lord is coming back soon. When the time comes, I’ll submit an application and ask him to help bring them back from the original world!

all the data of the second batch of test subjects has been received. The body manufacturing factory has begun production. It is estimated that the work will be completed in about a week.

the monitoring nets above snares below has been activated. All the actions of the players will be under surveillance. Once there is an accident, drones will immediately go to support and enforce the law!

Everyone started discussing and reporting the progress of their respective work. They would deal with the problems that appeared in a concentrated manner.

After a full five hours of discussion, the meeting finally ended. At the same time, the testing of the ultimate game of world of buildings officially began!

At the same time, in a certain area outside Holy Dragon City, ten simplified soul teleportation arrays began to flash. Then, one after another, excited transmigrators from the original world walked out of the huge metal building.

They came from all the major cities in the original world and had different skin colors. They were only wearing simple tank tops and shorts. At this time, they were constantly looking at the sky above their heads and the land under their feet.

To them, every blade of grass and every tree here was full of attraction, enough for them to observe for a long time.

“Oh my God, this place is so beautiful!”

as expected, you didn't disappoint me. World of Loucheng, here I come!

hey, pretty lady, do you want to form a team? I'm a boxing expert!

There were more than three thousand men and women gathered in the square, and all kinds of voices rang out from time to time, giving people a feeling of clamor.

don't talk nonsense. Hurry up and do the task to level up. I'm going to become a cultivator of Lou Cheng!

A man shouted and immediately ran to the edge of the square.

Because there was an old man with a white beard standing there, looking at them with a smile.

Just by looking at the old man's expression, he knew that he would definitely be able to get a mission from him!

When the other transmigrators saw this, they immediately split into groups and quickly ran around the square.

After asking around, as expected, the transmigrators received the old man's mission.

The nearby Valley was plagued with an insect disaster, and Warriors were needed to eliminate the insects. Because these transmigrators had Strange bones and bones, it was obvious that they were not ordinary people. Therefore, this difficult task was handed over to them.

The transmigrators excitedly received the mission, then carried a free wooden stick and rushed in the direction pointed by the old man.

In other places of the square, there were also missions issued, so it didn't take long for the transmigrators to get busy.

However, there were also some transmigrators who did not accept the mission. Instead, they were walking around and looking around, as if they were here to see the scenery.

After about an hour, a group of transmigrators each saw the insect the size of a watermelon return. After handing it over to the old man, they received a short sword, dry food, and clean water.

“Go, Warriors. Walk in this direction. Holy Dragon City is a hundred miles away. That's where you should go!

There, you'll definitely be able to achieve great things!”

When the group of transmigrators heard this, they immediately nodded in agreement. They tied their short swords to the grass rope at their waists and set off in a group valiantly and spiritedly.

When the transmigrators who had not received the mission heard this, they immediately panicked. After all, a distance of more than a hundred miles was not close. Without weapons and food, they would not be able to reach the place at all.

Hence, they had no money on hand and could only run to accept the mission. After getting the reward, they hurriedly chased after him.

Chapter 815 The ultimate game's tester _Under the blue sky and white clouds, there was a soft green carpet-like grassland. It had soft undulating lines and colorful flowers everywhere, extending to the end of the line of sight.

A bird with five-colored wings flew across the sky, curiously looking at the strangers on the ground and letting out a crisp chirping sound.

In the crystal clear stream, fish of different sizes would occasionally swim by, looking very strange.

The transmigrators looked at the beautiful scenery around them, which was like a painting, and felt extremely comfortable.

After leaving the teleportation square, they followed the direction the old man had pointed out and headed towards Holy Dragon City without stopping.

Since the virtual game in their original world had restored the scenery of the building world to a high degree, they did not feel too strange when they saw these strange animals and plants.

They were even more familiar with the Holy Dragon city's every blade of grass and tree than some of the city's residents!

However, a game was still a game. Compared to a real world, the virtual scenery still lacked realism.

When they were truly in the world of the tower, this feeling became more obvious, especially the comfort that came from the depths of their souls. It made the transmigrators feel as if they had thrown away the hot quilt above their heads and were breathing freely.

The difference between the two was that the world of buildings was a world of true energy, which was extremely beneficial to living beings.

The transmigrators lived in their original world, which was barren of energy, and their souls were in a state of hunger and thirst all day long. That was why they had such an obvious reaction after coming to the world of loucheng.

Of course, as time passed, this state would gradually disappear, because by then, the soul of the transmigrator would have adapted to this environment.

However, during this period, the soul power of the transmigrator would be greatly nourished, and his entire person would become radiant and full of energy!

However, there were also disadvantages. Once he got used to the high-energy environment in the world of the tower, he would feel an extremely obvious sense of restraint when he returned to his original world.

This was the instinctive rejection reaction of the soul to low energy environments. Although it was not fatal, it made the transmigrators more dependent on the tower world!

Let's talk about the ultimate game.

The so-called "ultimate game" was a manifestation of the game's evolution to the extreme. The players were truly involved in the entire process, coming into contact with real scenery, using real props, and playing the role they wanted to play in a game world that was different from reality, experiencing a real game life.

It wasn't easy to achieve this, so even though the idea of an ultimate game had been proposed long ago, it couldn't be realized due to various restrictions.

However, with the emergence of the world of loucheng and the introduction of soul teleportation and body lodging to civilian use, this idea finally became possible.

The Holy Dragon Corporation had taken advantage of their own advantages to launch this kind of trial first and quickly launched this ultimate game!

The developers were very confident in this game because the charm of the world of loucheng was not something that could be displayed by a virtual game.

Only by experiencing it personally could one feel the wonder and vastness of the world of loucheng!

When they first heard that the Holy Dragon Corporation had launched a real version of the ultimate game, almost all the players were excited. Even the original world's residents who were not particularly fond of games joined the ranks of fighting for the beta testing qualification, hoping to get the opportunity to travel to the world of loucheng.

As the world of loucheng became more and more famous, the original world knew more and more about it. It became the wish of countless people in the original world to go to the World of loucheng and have a look.

However, some things couldn't be done with money. This was the case for the world of loucheng. No matter how much money one had, one might not be able to obtain a special pass.

Therefore, the opportunity to test the game this time naturally became a target for many people. Many people did not hesitate to use their connections and spend a large amount of money just to get the qualification to participate in the test.

After a month of random screening, a total of more than 3000 applicants from all over the world were selected.

As the first batch of testers, they were officially teleported to the world of loucheng after a simple training!

The real identities of these people were different. There were ordinary white-collar workers, workers, students, and even celebrities and politicians.

However, at this moment, they were only players who were participating in the game's testing. They did not have any special treatment.

.....

Sun Xiaotao was wearing a tank top and shorts as he walked barefoot on the soft grass. The comfortable feeling made him happy, as if he had returned to the carefree days of his childhood memories.

Looking at the strange and unique scenery around him, sun xiaotao had an indescribable sense of excitement.

Unlike the other well-off game testers in the original world, he was just an ordinary worker who lived in a small city in the Asian Alliance.

For a long time, he lived a simple and plain life. Although he didn't lack food and clothing, there was still an inexplicable sense of emptiness.

Ever since the information about the world of loucheng became known to ordinary people, sun xiaotao's heart seemed to have been touched, and he began to become obsessed with this special and magical world.

He paid special attention to any information related to the world of loucheng, especially when the virtual reality game was launched. He bought a game helmet without hesitation and entered the game at the first moment.

Although he had spent a lot of money playing the game, sun xiaotao didn't feel any regret. Instead, he said that it was worth it.

Because in that virtual game, he had ignited his long-extinguished passion. He wielded his sword and lived an unrestrained life!

Some time ago, when sun xiaotao heard that the Holy Dragon Corporation had launched the ultimate version of the virtual game, which meant that players would personally go to the tower world to participate in the real game, he was immediately excited, so he immediately clicked on the application option on the official website.

However, when he saw the total number of applicants, he felt a chill in his heart. The total number of applicants had exceeded 300 million!

This was only the beginning of the registration. Who knew how many people would compete for this spot after the registration was over?

After estimating his chances of being selected, sun xiaotao felt that the chances were slim.

It was only a one in a million chance. It was simply unbelievable that he could still be selected under such circumstances.

So while sun xiaotao continued to pay attention to the progress of this ultimate game, he no longer cared about his initial registration.

Who would have thought that just a few days ago at noon, he would suddenly receive a call from an unfamiliar man, saying that he had passed the screening and was officially qualified to participate in the final game testing!

After hearing the news, sun xiaotao's first reaction was that he had been deceived.

He knew his own abilities very well. His qualifications were average, and he was far inferior to the other competitors in the Guild. However, he had actually been selected under such circumstances, which made him feel suspicious.

In the end, the man told him that if he didn't believe him, he could check on the official website to see if he was lying.

If sun xiaotao decided to give up this qualification, he could also call this number to inform him. After all, the test qualification was in high demand now.

if you accept the test qualification, please prepare immediately and take a bus to a place in the Asian Alliance for a short training. After that, you will be teleported to the loucheng world.

After sun xiaotao hung up the phone, he immediately logged into the official website to check. Sure enough, he saw his name on the list.

When he logged into his game account, he did see a text message from him. It was an invitation letter from the Holy Dragon Corporation to qualify for the ultimate game's closed beta, which proved that he had indeed passed the screening.

Sun xiaotao was extremely excited. After jumping up and shouting, he immediately told the good news to his gaming friends, causing a lot of envy and jealousy.

Without any hesitation, he took a long leave of absence and began to prepare for the game testing.

After packing his luggage, sun xiaotao immediately took the high-speed rail and headed to the location indicated in the invitation.

After arriving at the scheduled location, sun xiaotao and the other selected participants began a training session that would last for a few days. Then, they entered the teleportation Hall, which was newly developed by the Holy Dragon Corporation, and officially arrived at the loucheng world.

Walking together with his friends from the training camp, sun xiaotao couldn't help but think back to his experiences during this period of time. He suddenly felt like he was in a dream.

He didn't expect that he would come to the world of loucheng so easily, this was a place that he had always dreamed of coming to!

Chapter 816 Discussion _On the verdant grassland, everyone was talking and laughing as they moved forward. They were in a very good mood.

"What mission do you think we'll be assigned after we reach Holy Dragon City?"

"Will it be like the game, where we have to clean up the monsters wandering around the floors and hunt down the Raiders?"

A delicate-looking woman swung her ponytail and asked in a clear voice.

She had fair skin, a tall figure, and exuded a young, healthy, and youthful vitality.

Sun xiaotao only knew that the girl's name was Annie. She came from a big city in the Asian Alliance and was an employee of a multinational company. She usually loved sports.

Just like sun xiaotao, Annie was also a fanatical fan of world of towers. She was also extremely lucky to be qualified for the closed beta.

Because she was a cheerful and lively person, she did things cleanly and had a bit of a tomboy's style, so she had a good relationship with people.

Upon hearing Annie's question, the dozen or so Asian transmigrators who were hurrying on their way turned around and looked at her.

At this moment, Annie was wearing a tank top and shorts, completely revealing her impressive figure. She had full breasts and perky buttocks, and her long and straight legs were dazzling white, attracting everyone's eyes to sweep over them.

I think so. After all, this ultimate game is based on the original virtual reality game. If we don't have those tasks, it will lose its original fun. In that case, it would be more realistic to create a one-day tour of the world of buildings!

The man who spoke was about 30 years old and was the boss of a company. It was said that he was very rich.

Perhaps it was because he was used to being stern, but even when he was chatting, he was still used to pulling a long face, giving people a feeling that he was unapproachable.

When everyone first got to know him, they thought that he was not easy to deal with. However, after getting along with him for a long time, they realized that this was just his habitual expression.

In fact, this man, who was called brother Chen by everyone, was a warm-hearted person and was easy to get along with.

"I don't think so, because we're not strong enough!"

Sun Xiaotao said casually. When he saw everyone looking at him, he continued, "This isn't a virtual game, but the real world. Those monsters and bandits are all extremely vicious and have rich combat experience!"

If we were to face such an enemy, I'm afraid that even if ten of us were to attack him together, we would still not be his match!"

Sun Xiaotao then shrugged his shoulders and said, "The Holy Dragon Corporation will definitely not send us to our deaths for nothing. So, those missions should not appear in the early stages of the test!"

When everyone heard this, they felt that it made sense and couldn't help but nod.

At the same time, everyone began to guess what kind of mission the Holy Dragon City would assign them.

"Hey, after you arrive at Holy Dragon City, can we go into Holy Dragon city's inner city to take a look?"

If we can meet the Holy Dragon City Lord, that would be even better. At that time, we can ask him for help and give them a super high mission. Wouldn't that be awesome!"

The one who spoke was a young man who looked to be about 18 or 19 years old. His name was Su Qiang, and everyone called him little Qiang.

According to his age, he should be studying in school, but this kid obviously didn't have this awareness. Not only did he take a long leave to participate in the game test, but he was also quite cooperative during the training process.

He was also a good person, but his only weakness was that he was a little conceited and hot-blooded, and that kind of energy was quite difficult to withstand.

In the training camp, this kid had claimed more than once that once he reached the tower world, he would definitely display his intelligence and leadership skills to let the Holy Dragon city's native cultivators see what a true promising youth was!

At that time, they would definitely look at him in a new light, and then make an exception to recruit him into the team of cultivators!

Sun Xiaotao had also heard Cockroach's bold words several times, but he felt that this kid had no chance.

After all, the cultivators of the Holy Dragon City were all real people. Although they might not be as knowledgeable as the transmigrators from the original world, they would not be too bad after gradually integrating with the original world.

Although the person in front of him had also been fighting in the shadows of blades for nearly ten years, that was only in the game. Sun Xiaotao didn't know what to say to Su Qiang, who compared his in-game experience with his fighting experience in reality.

If he really fought with Lou Cheng, he would probably be able to easily deal with a large group of self-righteous guys with just one hand.

Unknowingly, the travelers had gradually widened the distance between them and divided into groups of different sizes. They seemed to be in a mess.

Just as they were walking and chatting, a strange sound suddenly came from the grass beside them, attracting the attention of some transmigrators.

Immediately after, the sound of panting could be heard. It seemed to be made by some kind of living creature, and it was obviously not small.

When the transmigrators heard the sound, they were slightly stunned at first, then they looked suspicious. They quickly drew out the short swords at their waists and looked in the direction of the grass with vigilance.

At that moment, there was a soft whooshing sound, and a group of green monsters about one meter tall quickly emerged from the grass and pounced on the group of transmigrators.

Looking at the ferocious appearance of these monsters, it was obvious that they were not good people. In particular, some of the monsters were even waving huge leg bones in their hands, which were full of bite marks.

At this moment, the monsters were looking at the transmigrators as if they were looking at a pile of delicious food. Some of them were even drooling!

"Damn it, what the hell is this? everyone, be careful!"

Brother Chen shouted loudly. He held a short sword in front of his companions and warned them. At the same time, he locked on to a green-skinned monster that was approaching and slashed at it fiercely!

After a light sound, the monster held its broken neck and glared at brother Chen. Soon, there were no casualties!

After the initial panic, the other transmigrators quickly recovered and pulled out the short swords at their waists to join the battle.

During their time in the training camp, the instructors had given them special training to deal with this kind of unexpected situation.

The memory of the training back then was still in his mind, and now he just had to copy it.

What's more, the bodies they used were not their own bodies. Although they felt the same sense of touch, even if these hosts died in battle, their real bodies could still be guaranteed to be safe and sound.

It was also because of this that they had no scruples. As long as they overcame the fear in their hearts, they would all become vigorous and fierce, fighting to be the first.

&Nbsp; these monsters looked very fierce, but their combat power was only so-so, not even comparable to 1-star monsters.

At this moment, under the siege of nearly 3000 transmigrators, it did not take long for these monsters to be cut down one after another.

The transmigrators who had defeated the enemy suddenly felt uncomfortable when they saw the bloody bodies in front of them. Some of them even squatted on the ground and started to vomit.

“Damn it, I finally know why this is called a real game. How is this a game? This is clearly a massacre!”

One of the transmigrators wiped the dirt from the corner of his mouth and said to his companion, “ this bloody scene alone is enough to make countless people stop. I wonder what the game developers are thinking.

Chapter 817 ambition and coveting

In another team not far away, two young men from the American Alliance were looking at the monster's corpse on the ground and exchanging their opinions.

One of the weak-looking young men pushed his glasses out of habit, only to find that the vision of his host body was so excellent that he did not need to wear glasses at all.

The technology that the Holy Dragon City possessed made even a technology fanatic like him sigh in admiration. Because in some areas, the Holy Dragon city's technology level had already far exceeded that of the original world!

However, due to certain considerations, most of these technologies were used for military purposes, and not many were used for civilian use.

this must be a monster deliberately released by the Holy Dragon City. Did they do this to give us a surprise? ”

The weak-looking young man shook his head and said in a questioning tone.

After all, this was the Holy Dragon city's outer Urban area. Although the land was vast and the population was sparse, it was absolutely impossible for a large number of monsters to exist here. Therefore, the only explanation was that these monsters were placed here by humans.

Although many of the transmigrators' eyes were shining after the battle just now, and they were obviously very surprised and reminiscing about this "surprise," there were still some transmigrators who felt that this was too cruel.

The weak-looking young man belonged to this kind of person. He had a natural resistance to killing and conquering.

After hearing his companion's words, a blond transmigrator beside him shook his head and expressed his opinion.

"I really like this feeling. After all, this is the true meaning of a real game!

If it was like other games, where virtual weapons were used to kill virtual monsters, then this so-called ultimate game was nothing more than this.

However, the adrenaline rush of wielding a real sword and killing a real monster like this is not something you can experience in a virtual game!"

At this point, the golden-haired man looked at his companion and said in an intoxicated tone, "that's why I have the exact opposite opinion from you. I think that's why countless players are attracted to this realistic game!

Hearing the blond man's words, the weak-looking young man shook his head. but this is too bloody. It also feels particularly cruel. Don't you feel that way?"

The blond man looked at the weak-looking young man with a strange look, and then said with a hint of ridicule in his tone, "Cruel, hehehe, don't joke with me, brother!

You're actually being kind to the monsters? do you think that if you're kind to them when they eat you, they'll let you go?"

the best way to deal with these monsters is to completely annihilate them. There's no need to hold back!

At this point, the blond man saw that his companion was still unconvinced, so he could not help but continue, "There's one thing you have to be clear about. Conquering is the nature of human beings, but when technology has developed to today's level, it was stopped by a small planet.

Even if there were some infighting, it would be carried out under limited circumstances and received global attention to prevent things from developing to an irredeemable stage.

Otherwise, if they were allowed to do whatever they wanted, the entire planet would have been destroyed!"

When the golden-haired man said these words, his eyes flickered, as if he was filled with passion.

“However, the appearance of the world of loucheng gave people hope, and also gave mankind another chance to develop and grow.

This is an extremely rare opportunity. If you don’t grasp this opportunity, you’re destined to be eliminated by history!”

At this point, the golden-haired man looked at the surrounding scenery, his eyes full of greed. “This is an extremely rich and vast piece of land. If we can develop and make use of it, we will be able to obtain endless resources and wealth!

I believe that anyone with great vision would not miss this place!”

With a cold look in his eyes, the golden-haired man continued, “if we want to conquer such a place, we can’t avoid blood and slaughter. This is the truth that history has told us, and there is no doubt about it!

Fortunately, our butcher’s knife isn’t aimed at our own kind, but at the Otherworld creatures that are hostile to us!”

The golden-haired man turned to look at the weak-looking young man with a trace of eagerness in his eyes.

“You might not know this, but I’ve already submitted a request to my family to develop in the world of loucheng, and my family has already approved it. At the same time, they promised to support me to the best of their abilities!

Perhaps after a few years, my family will become an unimaginably huge entity because of this choice!”

When the golden-haired man said this, he seemed to be immersed in the scene of success, and his face was full of intoxication.

The weak-looking young man glanced at his friend and asked in a somewhat puzzled tone, “However, the environment in the world of loucheng is not stable and there are many restrictions. If you really want to achieve your ideal goal, I’m afraid it will be extremely difficult.

Moreover, this is the Holy Dragon city’s territory. Would they allow you to do this?”

The golden-haired man opposite him nodded and said in a serious tone, “Of course I know that, but it’s also because of this that it’s even more challenging!

As for the Holy Dragon City, you don’t have to worry. According to the information I know, the Holy Dragon City has already acquiesced to our actions.

One would never be able to imagine how much influence the hidden families would have in the original world when they United in the face of such huge benefits!

Even the Holy Dragon City had no choice but to compromise when faced with such a situation. Otherwise, it would be very difficult.”

The golden-haired man glanced at the transmigrators around him and laughed. “You might not know this, but this game test is just a chance for those families to get a closer look at the world of loucheng.

I dare say that one-third of the transmigrators here have the shadows of those families and forces behind them, and they shoulder their own missions.”

Looking at the dumbfounded young man, the blond man smiled and ignored his simple-minded friend. He continued, ” “After this inspection ends, I will apply to the administrative Bureau for migration to the loucheng world, and I will also bring my team along.

My dear friend, I don’t know if you’re interested in staying here and starting a glorious career that belongs to us together?”

Looking at the serious and expectant eyes of the blond man, the weak-looking young man hesitated for a moment and shook his head. I’m sorry, buddy. You should know my dream, so I’m sorry that I may not be able to help you.

“It’s a pity, but it doesn’t matter. Even if we can’t work together, it still can’t affect our friendship, right?

“Of course, my friend!”

At this point, the two of them looked at each other and smiled.

Although their personalities and ideals were different, the two of them had known each other for many years. This kind of thing would never affect their deep friendship!

Chapter 818 On the way, relics (1)

On the vast grassland, a large group of transmigrators was slowly moving forward. At this time, most of them looked tired, and the original noisy conversation had gradually disappeared.

A journey of more than a hundred miles was definitely not a small test for the traversers who walked.

For travelers who were used to the convenient means of transportation in their original world, a distance of a hundred miles was actually not far. If they were to take a car, they would be able to reach it in less than an hour!

However, in the world of loucheng, transportation was definitely a rare tool. Even most cultivators in loucheng didn’t have a convenient means of transportation.

Even if the Holy Dragon City had a large number of mobile vehicles, they would not be specifically dispatched for these transmigrators. After all, before the use of new vehicles in large quantities, fuel was still a very precious thing, and it must not be wasted.

As for those mounts, they were the Holy Dragon city’s Warriors ‘treasures. They were all treated like Lords, and were hoped to breed more offspring.

If anyone dared to ride them without permission, they would definitely be hunted down by the Holy Dragon city’s soldiers without any hesitation!

Compared to those vehicles that drank oil, the Holy Dragon City soldiers trusted these mounts more. Some soldiers even had a big brain and armed some of the war beasts to the teeth, making them a mobile fortress.

It was just that this kind of equipment method had not been promoted, but all the equipment on this kind of Mount was bought by its Owner at his own expense.

Therefore, it was impossible to expect the Holy Dragon City to send transportation to pick them up!

If he wanted to go to Holy Dragon City, he could only rely on his legs. There was no other way.

The travelers, who were slowly moving forward, suddenly felt that the distance of a hundred miles was so long and far. If it were not for the fresh and strange scenery that appeared along the way, which distracted most of their attention, the travelers might have fallen to the ground.

However, the most important point was that the world of loucheng had an extremely abundant amount of energy, which unconsciously helped the transmigrators to recover their physical strength.

This greatly enhanced the physical strength and endurance of the transmigrators. Even they themselves didn't realize that they had unknowingly walked half the distance before they chose to stop and rest.

If it was in his original world, many transmigrators would not be able to do this!

However, at this moment, the transmigrators realized another disadvantage of the real game. The destination that they could reach in an instant in the game had to be measured step by step after it became a real game. There were no shortcuts.

If the missions they received after reaching Holy Dragon City were all this kind of running work, then the transmigrators would probably want to die!

.....

Next to a small mound, sun xiaotao and his team were resting.

There were many transmigrators lying on the soft grass, not caring about their image. They sniffed the fragrance of the grass and wildflowers, unwilling to get up no matter what.

This kind of long journey was the first time for many game testers. If it were in the original world, people would have quit long ago.

I really miss the teleportation circle in the game. As long as I go in and stand inside, I can go wherever I want. I don't have to walk step by step towards Holy Dragon City like I am now!

Su Qiang sat on the ground and rubbed his legs as he spoke. There was a hint of complaint in his tone.

This master with a heart as high as the sky had just arrived in the world of loucheng, but he was already complaining endlessly about the hundred-mile journey, completely forgetting his own bold and heroic words.

"I don't know what the Holy Dragon City is thinking. Can't they arrange for vehicles or mounts for us to ride?"

Could it be that they're doing this to deliberately make things difficult for me?"

Su Qiang saw that no one was speaking, but he continued to talk non-stop, his tone filled with malicious speculations.

When sun xiaotao heard this, he couldn't help but interject, " "We're participating in a real game, so we naturally have to complete it according to the situation in the real world.

Why don't you think about it? you're a tester who has just arrived in the Dragon City world. If I prepare transportation tools and weapons for you as soon as you arrive, is there any meaning in the test? it's no different from a trip, right?

Besides, I'm just giving you a Mount. Are you sure you can ride it?"

After Su Qiang heard this, he turned his head to the side and no longer said anything. However, from his expression, it was obvious that he did not listen.

Seeing this, sun xiaotao did not say anything more. He took out his own dry food and water and slowly chewed.

The other transmigrators also took out food and ate it, one bite at a time, to replenish the energy they had consumed earlier.

After eating and drinking to his heart's content, sun xiaotao felt an urge to pee, so he stood up and looked around for a suitable place.

He saw a dirt slope not far away and quickly ran over to the back of the slope.

Being in the wilderness of the world of loucheng, sun xiaotao couldn't care much and happily took a bath.

It had to be said that the Holy Dragon city's level of technology was extremely high. Just the various technologies used in this host body had already exceeded the imagination of ordinary people. If one did not dissect and study it, they would definitely not be able to see any difference!

At this time, sun xiaotao, who was relaxed, pulled up his pants and was about to leave. However, his eyes inadvertently swept over the place where the water was released. He was surprised to find an item shining in the soil!

Sun xiaotao's curiosity was piqued. He didn't care if the ground had been flooded before. He pulled out his short sword and dug the soil away.

Very quickly, a metal mask was revealed. It was thick and ancient, looking extremely mysterious and strange.

Looking at the strangely shaped metal mask in his hand, sun xiaotao thought for a moment, then wiped it clean with weeds, and then carried it back to the team of transmigrators.

"Come over and take a look. What did I find?"

Sun xiaotao showed the mask in his hand to the crowd, which immediately attracted the curious eyes of the crowd. They all came forward to take a look.

The metal mask was dark purple in color and its surface was full of strange runes. It was full of the style of the Otherworld and looked quite eye-catching.

However, upon closer inspection, everyone realized that the mask did not have a nose or mouth. Instead, it extended all the way down from the eye sockets, covering the area in front of the neck.

There were also two sharp metal horns on the temples of the mask. At first glance, it looked like the skull of a goat.

No one had ever seen something like this before. Although they kept talking about it, it was basically all based on their own guesses. As for whether they were correct or not, it had yet to be verified.

But no matter what, this mask looked quite extraordinary. It should be an item with a great origin.

Someone suggested going to the place where sun xiaotao found the mask. There might be other items there.

Sun xiaotao thought that it was indeed the case, so he immediately led his team members to the back of the hillside.

It didn't take long for them to arrive at the place where sun xiaotao had found the mask.

Chapter 819 Arriving at Holy Dragon City_Behind the small slope, sun xiaotao pointed to the soil that had been excavated and said to everyone, "Look, I found the metal mask here just now. At that time, a part of it happened to be exposed on the ground. After I dug it out, I didn't search it carefully.

Why don't we use this place as the center and search carefully?"

The others did not object. They all squatted down and began to search the grass carefully.

It didn't take long for brother Chen to make a soft "Yi" sound. He dug a few times with his short sword and then reached out from under the grass to pull out a battle sword that seemed to be about to break at any time. It was full of dark red cracks, and it was unknown if it was dried blood.

Brother Chen waved his blade around, his eyes filled with joy. He was obviously very satisfied with his harvest.

Soon after, someone found some armor fragments, a dozen or so low-level brain beads, and a few other items.

In the end, they found a decayed corpse under the grass. It didn't look like a human, because there was a black horn on its head.

Looking at the skeleton in the soil, everyone looked at each other, not knowing what to say.

However, when they thought about how the items in their hands all belonged to a skeleton, they felt very uncomfortable.

"Why don't we just give up on these things?"

One of the transmigrators looked at the item in his hand and asked the others hesitantly.

Su Qiang held a weapon that looked like an axe in his hand and said to the crowd with a face full of joy, "Don't think too much, everyone. Even if we can't use these things, we can still take them to the Holy Dragon city's market and see if we can sell them.

You must know that the currency in the tower world can be exchanged with real money. If this thing is worth a million or so, then we'll be rich!"

Everyone chuckled when they heard this and did not dwell on this issue. After burying the skeleton again, they continued to chase after the team of transmigrators who had already gone far away and continued to move forward.

Along the way, some transmigrators saw the items in their hands and couldn't help but ask a few questions out of curiosity. After getting the answers, they had different expressions.

Obviously, many transmigrators would keep a respectful distance from the relics of the dead and try not to touch them as much as possible.

However, through this incident, the transmigrators, who were used to the peace and quiet of their original world, saw the cruel side of the world of loucheng.

Who knew how many skeletons of unknown people were buried under this vast and endless land that would not be discovered until they were completely rotten?

After an unknown period of time, the exhausted travelers finally arrived at Holy Dragon City after a long and arduous journey. When they saw the tall city walls of Holy Dragon City, they could not help but cheer.

After that, the transmigrators ignored the curious gazes of the residents and foreign races passing by and sat down on the wide road without any care for their image. Their tired faces were filled with the pride of victory.

dear testers who are participating in the real game, welcome to Holy Dragon City!

A few staff members of the Holy Dragon Corporation, dressed in white robes, were looking at the exhausted transmigrators with smiles on their faces. At the same time, some medical staff came over and used various equipment to perform physical examinations on them.

After a careful inspection and confirming that there were no abnormalities with the test subjects 'bodies after a long journey, the staff members of the Holy Dragon Corporation heaved a sigh of relief and immediately recorded it.

This long journey was actually one of the tests. The Holy Dragon City was not deliberately toying with them.

This was because the host bodies used by the test-takers this time were low-cost bodies redesigned and cultivated by the Holy Dragon Corporation according to existing technology. They had to go through strict tests before they could be used by the transmigrators.

According to the current situation, this kind of host body was still qualified. At least three thousand contestants had trekked for a hundred miles, and none of them had any physical abnormalities.

Of course, he would never tell the tester about this to avoid their dissatisfaction.

everyone, please enter the arranged venue to rest. Tomorrow, we will officially start the game testing. Thank you for your support!

After bowing to the many test subjects, the staff members of the Holy Dragon Corporation began to lead the transmigrators to a resting area.

It was only at this moment that the transmigrators had the chance to look at their surroundings, and they cried out in alarm from time to time.

Compared to the virtual game's castrated version of Holy Dragon City, the real Holy Dragon City was undoubtedly more magnificent. Whether it was the various alien races that came and went, or the tall and majestic buildings, they were all amazed.

In the distance, the towering mountains, the wreckage of the terobo people's battleships, and the newly built high-rise buildings all gave the transmigrators quite a visual impact.

Moreover, after the planning by a professional landscape architect, the scenery around the Holy Dragon City was well-arranged, no different from a carefully decorated garden.

Living in such an environment every day was definitely a kind of spiritual enjoyment!

Many transmigrators fell in love with this land in a short period of time and began to consider if they could immigrate here.

Following the path full of strange flowers, the transmigrators came to a Valley not too far from the Holy Dragon City. On the surrounding hills that seemed to be covered with green carpet, there were hundreds of special houses that looked like scorpions.

Other than the doors and windows, the rest of the houses were all hidden in the hills. After entering, one would realize that the space inside was actually very spacious.

In the valley in the middle of these houses, there were more than a dozen long tables filled with all kinds of delicious food from the world of loucheng.

It was obvious that the Holy Dragon Corporation had prepared this food for the transmigrators. If they were hungry, they could come forward and take it at any time.

There were many gluttons among the transmigrators, and they were really hungry, so when they saw the food, they automatically gathered in front of the table without anyone calling them.

However, when they saw the food on the table, their eyes suddenly widened. They had no idea how to eat these strange-looking food!

Fortunately, when the staff of the Holy Dragon Corporation saw this, they immediately came forward with a smile and explained to the transmigrators how to eat these delicacies.

Sun xiaotao and the others had also encountered a similar problem. At this time, they were staring at the staff member of the Holy Dragon Corporation. He picked up something that looked like a bitter gourd and broke it with all his might, revealing three egg-sized objects inside.

this is the seed of the cantaloupe tree. It's very delicious. Whether it's eaten raw or roasted, it won't affect its taste. Everyone can try it.

As he spoke, the staff member of the Holy Dragon Corporation distributed the three seeds to the transmigrators around him, and then gave them an encouraging look to signal them to eat them.

Sun Xiaotao also got one seed. He looked at the seed in his hand, which looked like a peeled egg. He hesitated for a moment, then put it in his mouth and took a bite.

The transmigrators around him were all staring at him. Now that he had already eaten it, they immediately asked him how it tasted.

Sun Xiaotao's eyes were wide open. He kept nodding his head as he chewed quickly, his face full of enjoyment!

When the other transmigrators saw this, how could they not know that the seeds of the cantaloupe tree were delicious? They all reached out to the big basket on the table and snatched all the cantaloupe seeds in the blink of an eye.

Then, there was a continuous "crack" sound. Then, each of the transmigrators was holding a melon seed in their hands and eating it with great relish!

Chapter 820 The wild tower in the thorny undergrowth (1)

Just as the transmigrators were resting and happily participating in the Holy Dragon Corporation's real-life game testing, Tang Zhen had already reached the edge of the dangerous mountain range.

With the previous experience of crossing the dangerous mountain range, Tang Zhen did not need anyone to lead the way. He could easily cross this natural chasm in the eyes of the tower City natives!

From this, it could be seen that the main purpose of the mountain range was to block the ordinary Loucheng natives so that they couldn't easily cross the battlefield.

For a King level expert, even if the mountain range was dangerous, it wasn't difficult to cross as long as they were careful.

Without anyone holding him back, Tang Zhen's speed of advancement was also extremely fast. In the end, he only used one-third of the time he used the last time to successfully cross the dangerous mountain range.

As there was not enough time, Tang Zhen did not head to the corpse dumping ground. Instead, he directly bypassed the Wanderer market at the foot of the mountain and prepared to return to Holy Dragon City.

However, the world would never always develop in the direction that was set in advance. Tang Zhen, who was on his way back, suddenly encountered an unexpected situation!

In front of him, there was a vegetation that covered several kilometers, and it was filled with huge thorns that were several meters tall.

In the thicket of thorns, there was a modern-style building. It was half-hidden, revealing a slightly broken wall.

The sunlight shone through the grotesquely shaped branches, casting a mottled shadow on the building like countless ghosts, constantly baring their fangs and brandishing their claws on the surface of the building, causing the entire building to exude a faint gloomy aura.

It was obvious that this was a wild building. No one knew when it had appeared, but it was obvious that no one had taken its Foundation.

However, the dozens of broken corpses in the thorn thicket had already told the people who came later that this place had been discovered long ago. Moreover, the first person to enter and explore had paid a heavy price.

Tang Zhen swept his eyes over the surrounding scenery. His brows were gently furrowed as he walked toward the wild building.

Tang Zhen was actually not interested in ordinary wild buildings. Sometimes, he would even turn a blind eye to them.

In fact, not only Tang Zhen, but most of the high-level cultivators were the same. Unless it was a special wild building with a top-grade foundation stone, those ordinary wild buildings were not worth their time.

After all, 90% of the buildings were junk. Even if there were valuable items, they were not worth mentioning to advanced cultivators.

It could be said that the ordinary wild buildings were the welfare of low-level cultivators. The things that high-level cultivators didn't care about could allow them to gain a little bit of profit or be used as a foundation for building a city.

Otherwise, with the strength of these high-level cultivators, what kind of building could stop them? they would be wiped out as soon as they appeared!

This was one of the rules of the world of loucheng. From time to time, wild buildings would appear, giving the wild cultivators and Wanderers a chance to rise.

Countless wild cultivators and Wanderers relied on such opportunities to finally build their own towers and cities. At the same time, they began to embark on the cruel path of advancement.

Only one out of 100 ordinary towers that could pass countless tests and killings and officially become a National tower could survive.

There were 3000 battlefields in the world of towers, and the area of each battlefield was extremely terrifying. As for how many creatures from various races had sacrificed their lives in these endless years, it was simply an uncountable matter.

The wild building in front of him was actually very ordinary. It was the kind of existence that was completely common.

However, the reason why it had attracted Tang Zhen was because of its unique architectural appearance and a kind of special feeling.

There seemed to be a voice telling Tang Zhen that there was something extremely useful to him in this wild building and that he must not miss it!

As Tang Zhen gradually approached the thicket of thorns, the branches with black sharp thorns seemed to have met their nemesis as they began to Dodge with all their might. They were even like living creatures as they emitted sharp cries.

When he saw the corpses among the thorns, Tang Zhen was certain that these foreign tribe Wanderers who had died had been ambushed by these strange thorns.

With a wave of his hand, an invisible blade formed by his psyche suddenly swept across the path in front of him. The branches were immediately cut off, and there were bones and flesh at the cut, dripping with blood!

As if it was stimulated by pain, a large amount of black liquid seeped out of the sharp spikes of the giant thorns, carrying a faint fishy smell.

However, after it fell to the ground, it actually made a sizzling sound, melting the grass on the ground and causing it to quickly wither. There was a constant nauseating smoke.

He didn't know if these strange thorns were born like this or if they were pushed to the edge after entering the world of loucheng. In short, they were quite dangerous.

For ordinary cultivators, this dense thorn forest was an extremely difficult obstacle to pass through. If they couldn't cross it, they wouldn't be qualified to explore the wild building.

Of course, in front of Tang Zhen, these dangerous giant thorns were simply unable to withstand a single blow. They were just like the wild grass on the side of the road. One only needed to lightly step on them and they would be crushed into pieces!

In just a few minutes, Tang Zhen had already crossed the giant thorns and arrived in front of the white building.

This building was not small, and its appearance was like two big hands holding together, but the end was in the shape of wings, like some kind of strange creature spreading its wings to fly, giving people a very uncomfortable feeling.

At the top of the building, there was a huge sign hanging. It seemed to be the trademark badge of some company. Most of it had been separated from the wall and looked like it was about to fall.

For some unknown reason, Tang Zhen felt a familiar feeling after seeing this badge. However, he did not know where he had seen it before.

With his abnormal memory, such a situation should not have occurred. This caused Tang Zhen's curiosity to become even stronger.

Tang Zhen glanced at the broken building and confirmed that it had suffered a destructive blow in an instant. After it was completely destroyed, it was restored to the world of towers under the effect of an unknown force.

When he saw some vague black figures flashing past the broken window of the building, Tang Zhen directly walked in.

The door at the entrance had been completely shattered, and the once clean ground was covered with building debris. Paper and documents were scattered everywhere.

However, the most eye-catching thing was the large amount of blood on the ground that was being dragged into the depths of the building. There was also blood splattered on the walls, like a blooming red plum.

This was a special phenomenon that would only occur when a living being's heart rate increased during strenuous exercise and their arteries were instantly torn apart.

It was clear that before this building was destroyed, a bloody massacre had occurred. The scattered bones on the ground were the best proof!
