

Alternate 841

Chapter 841 Conflict, breaking bones _After walking out of the house, Tang Zhen and the other man chatted as they walked. They soon arrived at the bustling Street.

Tang Zhen slightly shook his head as he swept his gaze at the women standing at the side of the street. They were wearing revealing clothes and posed in various poses.

If that young woman was not in such a hurry to leave, with Tang Zhen's methods, he could completely guarantee that she would not have to worry about food and clothing here!

After all, they were acquaintances. It was no big deal for him to take care of her. Moreover, to Tang Zhen, this was something that he could do casually.

However, for the young woman, this was definitely a chance to change her fate!

Unfortunately, some things often don't go according to your plan. This was the so-called "most of the time, things don't go your way."

The problem was that many things that didn't go well were actually related to the choices that he had made. It was just that he didn't have the chance to regret it!

The young woman might regret her choice today one day in the future, but it would be too late.

In fact, Tang Zhen didn't care too much about this young woman. After all, if it wasn't for Allie's insistence, everyone wouldn't have brought her here.

However, looking at Ellie, it was obvious that she wasn't willing to give up. Perhaps she would go find that young woman again and try to pull her back from that place.

Judging from the young woman's current profession, if Ellie really brought her back rashly, she might get into unnecessary trouble!

After telling qiaoer to look after Allie, the two of them continued walking.

After passing through two bustling streets, Tang Zhen saw a four-story building. A wooden sign that was several meters wide hung on it. A skull with a sword drawn on it was currently suspended above a pile of gold coins.

Just by looking at the sign, he knew that this was the bounty hunter Association!

A few men and women in different attires were entering and exiting the main entrance. They were basically all fully armed with knives, guns, and auxiliary equipment. Their faces were stern and ferocious.

There were also some bounty hunters who seemed to have just completed their missions. With the bounty in their hands, they were calling their friends to relax at the pleasure grounds!

After all, for these bounty hunters, they were often walking on the line between life and death, and there was no telling when they would lose their lives.

That was why they believed in enjoying life while it was still possible. They earned money quickly and spent it quickly as well. When there were no missions, it was more like they were living in a drunken dream!

Qiaoer had been here before and basically understood the situation here. Therefore, he directly brought Tang Zhen to an administrative window.

One could complete the bounty mission at this window. The procedure was very simple. One only needed to state the mission requirements and pay the deposit.

Tang Zhen was just about to sit down by the window when a low roar suddenly sounded from behind him. Moreover, it was clearly coming toward him.

“Yellow-skinned brat, get the hell out of my sight!”

Tang Zhen frowned after hearing this.

When he turned around, he saw a strong man with a Mohican hairstyle reaching out his tattooed arm to grab him. He seemed to be trying to pull him off the chair.

Qiaoer, who was beside him, saw this and suddenly waved his palm, splitting the brawny man’s arm.

The brawny man felt the pain and immediately pulled back his arm to charge at qiaoer. At the same time, he roared, “Are you looking for death, you bastard? are you in cahoots with this guy?”

As he shouted this, four other men came up from behind the brawny man, and they were dressed exactly like the brawny man!

There was no doubt that they were members of the same force.

Tang Zhen did not know why this strong man had the guts to cause trouble in the bounty Association. He was also too lazy to investigate the reason why the other party had targeted him. However, since the other party dared to provoke him, he could forget about ending it easily!

Pushing the chair beside him, Tang Zhen and Qiao er moved to the side and squinted their eyes at the brawny man.

The other party was also looking at him with bloodthirsty eyes and a sinister smile on his lips.

yellow-skinned brat, if you kneel down and beg for mercy, I might consider letting you go. Otherwise, I’ll break your bones today!

After he finished speaking, the brawny man laughed wildly. The accomplices behind him also laughed without restraint, as if they had Tang Zhen in the bag!

“Breaking bones? actually, I know how to do it too!”

Tang Zhen had a smile on his face as he looked at the strong man and spoke in an extremely serious tone. However, there was a faint ridicule in his eyes.

“Bastard, you’re looking for death!”

After seeing Tang Zhen's expression, the brawny man immediately flew into a rage. He swung his fist and smashed it towards Tang Zhen.

At this time, the surrounding bounty hunters were all folding their arms to watch the show. They might have guessed the reason why the brawny man looked for Tang Zhen, but no one went forward to dissuade him.

There were even people who guessed that Tang Zhen would lose a few teeth if this punch landed.

Although Tang Zhen's body was also very strong, he still appeared a little thin and weak compared to the nearly two-meter tall strong man. Therefore, not many people had high hopes for him.

However, just as the fist of this burly man was about to touch Tang Zhen's face, the scene of teeth flying out did not appear. This was because Tang Zhen had extended his hand and directly blocked the burly man's attack.

"I told you, I know how to break bones too!"

Tang Zhen's voice had just faded when he extended his hand and touched the burly man's shoulder. Everyone only heard a "crack" sound before a miserable cry was transmitted over.

When they looked at Tang Zhen again, the entire Hall immediately became silent. Everyone was dumbfounded as they looked at the item in Tang Zhen's hand. They immediately felt a chill rush to their heads.

It turned out that he was holding a complete arm bone in his hand, and the front end was a soft palm!

In just the blink of an eye, Tang Zhen had actually broken the bones of that strong man!

This kind of method was simply unheard of!

At this moment, the brawny man was continuously emitting blood-curdling screeches. The arm that had attacked Tang Zhen earlier was actually like noodles at this moment, swaying unceasingly along with his twitching!

"Kill him, bastard!"

The brawny man was in so much pain that he almost went crazy. He didn't even think about how Tang Zhen had done it. Instead, he let out a hysterical roar and at the same time, his other hand directly pulled out the pistol on his waist!

"Since you want to die, I'll fulfill your wish!"

A trace of anger flashed across Tang Zhen's eyes. His body was as fast as lightning as he suddenly rushed to the front of the strong man. After which, he waved his hand and hacked at the man three times.

Then, he grabbed the man's arm and twisted it. The skin and flesh on the man's wrist were torn apart. At the same time, he wrapped his spirit around the man's arm muscles and easily pulled out the bone in his other arm!

The entire process was astonishingly fast. By the time Tang Zhen returned to his original position, the brawny man had already fainted from the pain. His arms and legs were strangely folded in half and were placed on his abdomen like noodles.

Beside the brawny man were four white bones that were connected to his hands and feet!

The four bounty hunters who had followed the brawny man earlier were already scared out of their wits. After cursing " crazy ", they no longer paid attention to the unconscious brawny man and directly pushed the crowd aside to escape.

The bounty hunter at the side also regained his senses. His eyes were filled with fear and dread as he looked at Tang Zhen.

When Tang Zhen's gaze swept over, they all turned their heads away, not daring to meet his gaze!

Clearly, Tang Zhen's ruthless methods and terrifying skills had already made these bounty hunters completely understand that the man in front of them was an extremely terrifying existence. They must not easily provoke him!

However, there were also bounty hunters who knew the brawny man and gloated. They secretly scolded the brawny man for being blind and provoking such a monster-like existence. He really deserved to be unlucky!

This fellow had always been a bully and had committed all sorts of evil. Now that he had finally received his retribution, he would probably be " dealt with " by the force he belonged to very soon!

Tang Zhen ignored the gazes of the bounty hunters and slowly walked back to the window. He smiled at the freckled blonde girl who was currently panicking.

"I'll have to trouble you, I want to post a bounty mission!"

Chapter 842 Sky-high bounty (1)

Sir, please state the mission you want to issue. I'll record it for you!

The golden-haired girl said with a trembling voice after hearing Tang Zhen's words. After which, she quickly picked up a pen and paper and started to record.

However, judging from her shaking shoulders and arms, he knew that the blonde girl was not calm.

In the bounty hunter Association, there were often similar quarrels and fights, and even people would die from time to time. But in many cases, the bounty hunter Association would only expel them.

Whenever they encountered a team seeking revenge, especially when a vicious fellow attacked, even the Guild's guards would turn a blind eye to it. They would not take the initiative to cause trouble.

This time, it seemed that it was still a team seeking revenge. As a result, the brawny man had his eyes on Tang Zhen. He originally thought that he did not have the mark of a bounty hunter on him and could easily humiliate him. However, he did not expect to kick an iron plate directly!

The golden-haired girl swore that even though she had seen many bloody scenes, she had never seen anything as shocking as this.

Although Tang Zhen did not directly kill that provoking strong man, he had directly pulled out the bones of his four limbs, causing him to wish that he was dead!

Perhaps only the evil demons in the legends could have such chilling means?

Thinking of this, the blonde girl's fingers trembled again, and she poked the paper that she was recording.

Tang Zhen's words did not stop after taking a glance. He continued, yes, I'm looking for an item. Its form is not fixed, but it will disappear after seeing it.

He described the behavior of the world's origin parasite in great detail, so that the bounty hunters could recognize it at a glance!

After the golden-haired girl recorded down Tang Zhen's description, she repeated it to him and asked, then how much are you going to set up for the reward? the minimum standard for issuing missions here is 100 bottle gaiers!

Tang Zhen smiled when he heard this. He said to the girl, "If anyone finds the items I need and sends them here, I can pay one million bottle gaiers for each item!

If you want other items of equivalent value, I can also satisfy you, and I won't go back on my word!"

As soon as these words were spoken, not only was the golden-haired girl shocked, but even the bounty hunters at the side also stopped in their tracks in shock and looked in Tang Zhen's direction.

Tang Zhen's previous brutal performance had been completely forgotten by these bounty hunters. They all looked at Tang Zhen as if they were looking at a mountain of gold.

He didn't expect this perverted guy to be a big financial backer!

A million-dollar bounty or any item of equivalent value. Many of them had never heard of such a high bounty mission!

Many bounty hunters thought that there was something wrong with their ears, but when they found out that everyone else was in the same state, they knew that they had not heard wrong!

The young man in front of him, who could easily pull out human bones with strange means, had indeed issued an extremely shocking bounty mission!

For a moment, all the bounty hunters' imaginations ran wild, and their eyes shone.

If he could get this reward, he would become rich overnight. He would definitely be able to enjoy his dream life every night in this safe zone!

For a moment, these bounty hunters became short of breath. They subconsciously approached Tang Zhen's position, wanting to figure out what kind of reward mission Tang Zhen had issued.

However, after hearing about Tang Zhen's mission details, these bounty hunters had a strange feeling. They had no idea how to complete the mission!

Although Tang Zhen's description was extremely clear, the special feeling that would be produced after seeing the item, there was no specific form. Therefore, the scope of his search was infinitely expanded!

The area of this world was too large, and there were countless types of items. To search for the mission target in this situation was no different from looking for a needle in a haystack, or even worse!

As a result, 90% of the bounty hunters were disheartened. At the same time, they turned around regretfully and lamented that they would not be able to participate in this mission.

After all, no one wanted to waste a lot of time and energy to find something that they didn't know what it looked like. In the end, it would be a waste of time!

Therefore, no matter how high the bounty was, in the end, not many bounty hunters would accept this mission. At most, they would search for it while carrying out other missions!

Tang Zhen had already anticipated this. Therefore, he had already prepared a solution before he was transported.

After a period of research on the world's origin, coupled with the method mentioned in the dream city Master's Note, the Holy Dragon city's researchers finally worked together to create a special tool to sense the world's origin after some experiments.

This was an item similar to a compass that was made by using the mutual attraction between the origin stone and the world's origin, coupled with some special runes.

It could sense the aura of the world's origin within a few kilometers and lock onto it through the origin stone needle on it!

This kind of item was a military secret of the Holy Dragon City. It was one of the special search tools for the cultivators in the city when they invaded the other world in the future!

Now that he still had to rely on these bounty hunters to run errands for him, he naturally would not be stingy with the search tool, which was not complicated but had become extremely expensive because of the use of origin stones.

Therefore, if one wanted to use such an item, they had to pay a deposit at the bounty hunter Association. This was to prevent these guys from not cherishing it when they got it.

After hearing Tang Zhen's conditions, the bounty hunters, who had already given up, immediately began to be moved again. They began to discuss with their companions whether they should accept this heart-racing mission or not!

After the mission registration was completed, the golden-haired girl said to Tang Zhen, "Next, please pay the handling fee and the mission security deposit. The total is creak creak."

At this point, the golden-haired girl paused. She looked at Tang Zhen and explained, "Because this is a special mission, it might involve multiple mission items. That's why it's a waste."

"You don't need to explain, just tell me how many bottles of lids you need!"

Tang Zhen interrupted the golden-haired girl's words and indifferently said.

“There are two million bottle caps in total, and they must be handed in before the mission is issued!”

After hearing this number, the bounty hunters all gasped and imagined how big a pile two million bottles of lids would be!

Tang Zhen nodded. He estimated that the volume of the two million bottle caps should not exceed two cubic meters!

After telling the other party to wait, Tang Zhen left the bounty hunter Association with qiaoer and went straight to the place where they parked their Jeep.

Qiaoer had some doubts in his heart. He didn't know where Tang Zhen had gotten so many bottle caps. After all, along the way, he didn't see any trace of nuclear bottle caps on Tang Zhen's body!

In the end, Tang Zhen didn't explain. He only asked qiaoer to buy some cloth bags before the two of them drove away from the area controlled by the blood Fist.

After leaving the control area for a distance, Tang Zhen had qiaoer stop the car. Then, he reached out and pulled a cloth bag. At the same time, he put his hand inside.

“Hualala!”

Just as qiaoer was wondering what Tang Zhen wanted to do, he saw the cloth bag in his hand rapidly swell up at a speed visible to the naked eye. At the same time, a dense sound of collision was heard.

Jyle curiously glanced at the item in the cloth bag. He was immediately shocked and dumbfounded. His eyes were also filled with bewilderment as he looked at Tang Zhen.

It turned out that the thing that propped up the cloth bag was a nuclear bottle cap. At this moment, it was flashing with a strange luster, which made people's hearts jump!

To the natives of the wasteland world, this was true wealth, and qiaoer was no exception. It was just that the scene of this wealth appearing was sensational and domineering!

“Oh my God, did you make these nuclear caps, Yingluo?”

Qiaoer's voice was trembling as he stammered. He pointed at the cloth bag and asked Tang Zhen. His face was filled with disbelief.

If these nuclear bottle caps were really conjured out of thin air by Tang Zhen, then what was the difference between Tang Zhen and a God?

Tang Zhen seemed to be very satisfied with qiaoer's shocked reaction. However, he did not explain any further. He only tightly tied the cloth bag and casually threw it to the back seat of the car.

Clang! Clang!

The sound of a bag of bottle caps being smashed made qiaoer's heart Twitch. He finally had a deep understanding of the word “nouveau riche”.

A real nouveau riche would definitely put money in a big cloth bag and then throw it around in the car as if it was garbage!

Then, under qiaoer's somewhat numb eyes, Tang Zhen took another cloth bag and poured it down again!

Chapter 843 wealth moves the heart

Looking at the money bags behind the Jeep, qiaoer suddenly had a feeling that he knew too little about this world!

He had never thought that a person like Tang Zhen would actually exist in this world!

In the past, if someone had told him that he could make a pile of nuclear bottle caps out of thin air, he would have laughed in disdain, thinking that it was just some magic trick.

But now that he'd experienced it for himself, qiaoer had completely believed that there were things in this world that couldn't be understood by common sense!

Who knew how many more jaw-dropping mysterious methods this mysterious guy who had suddenly appeared had?

Exhaling a long breath, qiaoer suppressed the shock in his heart. Then, he drove back under Tang Zhen's instructions.

The car sped all the way and soon entered the gate of Blood Fist safe zone. This time, qiaoer drove the Jeep directly to the entrance of the bounty hunter Association.

At this time, the bounty hunter Association was still crowded with people. When the Jeep drove over, they all looked in their direction.

At this time, the people who stayed here were the bounty hunters who had just witnessed the scene of Tang Zhen's attack. At the same time, there were also some people from various forces who had rushed over to inquire about the situation after hearing about the sky-high bounty mission.

Tang Zhen jumped down from the Jeep under the gazes of many people with different expressions. He swept his gaze over the crowd in the surroundings and beckoned to a guard of the bounty hunter Association.

"Get a few people to help me remove the nuclear cap from the car!"

The guard had just witnessed Tang Zhen's display of divine power. He didn't dare to refuse when he heard this. He quickly returned to call his companions and came to the Jeep together.

As Tang Zhen opened the car door, a few cloth bags that were deliberately not sealed slipped from the car and directly fell to the ground.

"Huala"

A large number of nuclear bottle caps fell to the ground, making a crisp sound when they hit the ground, causing the surrounding crowd to suddenly fall silent.

Almost everyone's eyes were focused on the nuclear bottle cap that was still rolling after landing, and the envy and greed could not be hidden.

Especially when they saw that the Jeep was stuffed with similar cloth bags, they couldn't help but start to breathe faster and their hearts beat faster. Some bounty hunters even started to have red eyes.

Some bounty hunters subconsciously reached for their weapons, wanting to take advantage of the chaos to grab one!

If he could really get his hands on this Hill-sized nuclear bottle cap, he would not have to worry about the rest of his life!

However, most people only thought about it and didn't really dare to make a move.

This was because the blood Fist force that controlled this place would never allow them to do such a thing, because this was a provocation to them.

Blood Fist would never be polite to this kind of unruly guy!

Therefore, even if they succeeded in the robbery, they would be killed by the members of the blood Fist before they could leave the area!

Even if there were people who weren't afraid of the blood Fist, after careful observation, they gave up the idea of robbing.

They saw qiaoer sitting in the Jeep and the automatic machine gun on the top of the Jeep. They knew that if they were to snatch it, the machine gun would lock on to them in an instant.

After being hit by this large-caliber machine gun, there was basically no need to collect the corpse, because the entire person would be completely shattered!

Tang Zhen shook his head, as if he was disappointed that no one was snatching the nuclear bottle cap. He originally planned to take the opportunity to kill some ignorant fellows and let them know his methods!

However, after the bone-breaking performance just now, these bounty hunters were already apprehensive and did not dare to be impudent in front of Tang Zhen.

Although Tang Zhen was an unfamiliar face, these bounty hunters knew that one could not judge a book by its cover. An outsider like him, who had strange skills and a rich family background, must have a strong background.

Once he was retaliated against, there might be a disaster!

At the moment, as the guards of the bounty hunter Association were busy, the cart of nuclear caps was quickly moved in, and then the staff began to count them.

He saw the staff opening the nuclear caps in the bags and pouring them into a few strange-looking machines. Then, they began to shake the handles on the side, making a "Hua la Hua la" sound.

Then, the caps were rapidly spat out, and the mechanical counter on it kept jumping, recording the number of nuclear caps.

As a result, the work of counting was simple. Tang Zhen did not wait long before he obtained the number after counting.

Two million nuclear bottle caps were enough, and there was still half a bag left. After confirming that the number of nuclear bottle caps was enough, the blonde girl directly issued the mission.

The bounty hunters, who had been waiting for a long time, immediately swarmed forward and began to ask about the specific details of the mission.

A quest item worth a million bottle caps was a temptation that few bounty hunters could resist!

Tang Zhen did not stay any longer when he saw this. He called Qiao er and left together, directly returning to their residence.

As for the tool used to probe the world's origin, qiaoer would send it over later. After all, after Tang Zhen left, he would still be responsible for this matter.

Of course, qiaoer's strength alone was still unable to deal with the coveting of those greedy people. Therefore, Tang Zhen still had to find some helpers for him before leaving.

If Tang Zhen's guess was correct, it was likely that the other party would come looking for him in a short time!

After returning to their residence, Ai Li was fiddling with a rifle and was skillfully cleaning and maintaining it. After seeing Tang Zhen, she greeted him and continued to play with her toy.

Tang Zhen sat on the sofa and slightly crossed his legs. He seemed to be in deep thought.

Qiaoer sat on the balcony and habitually looked around to prevent any unexpected situations from happening.

Time slowly passed. When night fell, a few oil lamps were lit in Tang Zhen's room, emitting a dim light.

In the wasteland world, electricity was a very precious resource. Blood Fist would never use it for the residents to light up.

However, the shops that were open at night and the streetlights on the side of the street were all lit up at this moment, shining on the people who were shuttling back and forth.

The safe zone that seemed a little depressing during the day seemed to have come alive at that moment. It gave off a feeling of vitality and laughter could be heard from time to time!

It was also at this moment that a few figures quietly arrived at Tang Zhen's residence and gently knocked on the door.

"Who is it?"

A deep man's voice came from behind the door. It was qiaoer, who had been guarding the door under Tang Zhen's orders.

The person at the door was just about to reply when he heard Tang Zhen's voice, "No need to ask, let them in!"

As soon as he finished speaking, the door was opened. Qiaoer, who was holding a large caliber pistol, glanced at the person and made a gesture of invitation.

Two of them were standing guard at the door, while the other two walked in.

With the help of the dim light, one could see that both of them were tall men wearing black jackets and had the same skin color as Zhen Tang.

because of our matter this morning, we've implicated you. Please forgive us!

The man in the lead was about thirty years old. He had a square face and his eyes flickered. At this moment, he was smiling as he explained to Tang Zhen.

Chapter 844 -deal

"You're welcome, please take a seat!"

Tang Zhen did not stand up. He merely randomly pointed to the sofa beside him.

The other party nodded, took a few steps forward, and sat down.

The young man next to him should be a bodyguard. At this time, he was holding a small box and guarding by the side. From time to time, he would also size up Tang Zhen.

He was similarly extremely curious about Tang Zhen's methods.

"I don't like to beat around the bush, so just tell me your intention."

Tang Zhen looked at the square-faced man and spoke in a faint tone.

When the square-faced man heard this, he laughed, " "Since you're so straightforward, I won't waste any more time!

I'm the fifth son of the family, the second-in-command of the fierce dragon Hall. How should I address you, Sir?"

"My surname is Tang. You can call me Mr. Tang!"

Wang Wu nodded his head and said to Tang Zhen, "We had some disputes with NOx's men before, so the other party retaliated against us. And Mr. Tang may have been targeted by them because of his skin color!

If there are no accidents, NOx's people will probably take revenge on you soon. After all, the guy you killed wasn't an ordinary member of NOx!"

Tang Zhen nodded his head as he looked at Wang Wu, "So, are you here to remind me, or do you have another purpose?"

"It's secondary to remind you to pay attention to your safety. My main purpose is to get to know Mr. Tang and then cooperate with him in the future."

Tang Zhen nodded his head and said to Wang Wu, "My goal is very simple. I'm just looking for that special item. I'm not interested in anything else, and I won't interfere.

If you can find that special item, I can consider cooperating with you. Even if it's helping you deal with your opponents, I can consider it!"

Wang Wu's eyes lit up when he heard that as he said to Tang Zhen, "Is Mr. Tang's words true?"

Tang Zhen glanced at Wang Wu and a trace of disdain was revealed in his eyes, I can say it, and I can do it. Of course, the premise is that you have what I want!

When Wang Wu heard this, his face lit up. He waved to the young man beside him and the young man handed him the box.

A surprised expression flashed across Tang Zhen's eyes when he saw this.

At this moment, Wang Wu took the box and looked at Tang Zhen. After obtaining his permission, he slowly opened the box.

As the box was opened, a strangely shaped metal box appeared before Tang Zhen's eyes.

"Mr. Tang, please take a look at this item first. Is it what you're looking for?"

In fact, Tang Zhen had already been attracted by the special runes on the surface of the metal box when it appeared. At the same time, he had carefully identified it.

In different worlds, the appearance and shape of runes were different, but their effects were not too different. At most, the strength of their power was different.

The metal box in front of him was engraved with a rune with a concealment function, which seemed to protect the item inside the box from being discovered!

After Wang Wu confirmed his purpose, he took out the metal box. It was obvious that the thing inside was related to the origin of the world!

When he thought of this, Tang Zhen flicked his finger. Soon after, the metal box was directly opened under Wang Wu's shocked gaze.

Rays of light suddenly appeared, illuminating the top of the metal box. However, the light seemed to be solid. It only existed in a fixed area and then stopped abruptly!

As for the object that emitted the light, it was a strange-looking bone!

It was just like what Tang Zhen had described in the mission. With just a glance, one could tell that this bone was definitely not an ordinary object!

Tang Zhen casually beckoned. That bone automatically floated up and landed in his hand.

A trace of a smile surfaced on the corner of Tang Zhen's mouth after he sensed it slightly.

He had searched high and low for it, but it had come back to him without much effort. He did not expect to receive such a surprise at night after he had just posted the task in the day.

Tang Zhen nodded to Wang Wu as he sensed the world's Origin Energy contained within the special bone.

"The item is correct. Now you can state your request!"

The other party obviously didn't come for the nuclear bottle cap, so Tang Zhen simply didn't mention the money and directly asked Wang Wu about his true purpose.

Wang Wu's face was filled with joy when he saw that the item he had brought was confirmed. He hurriedly explained his true intention to Tang Zhen.

It turned out that after witnessing Tang Zhen's strange methods during the day, Wang Wu was shocked. At the same time, he immediately thought of the problems that the fierce dragon Hall had encountered during this period of time.

Some time ago, the members of the fierce dragon Hall accidentally discovered an underground facility near the port of City X. After analysis, they confirmed that this should be a refuge that had not been used in time back then!

This discovery made the members of the fierce dragon Hall overjoyed. For the survivors of the wasteland world, this kind of unused sanctuary was undoubtedly a huge treasure. There must be a huge amount of resources hidden inside!

If they could open up the sanctuary and obtain the material reserves inside, or directly use it as a base, then the fierce dragon Hall's strength would definitely increase greatly and become one of the major forces in City X!

However, the mutated parasite beast lurking near the entrance of the shelter poured a bucket of cold water over the heads of the excited fierce dragon Hall.

Out of the fifty members who participated in the exploration, only a few were lucky enough to survive. The rest were all killed by the mutated parasite!

Unwilling to give up, the fierce dragon Hall began to use various means to try and kill the mutated parasitic beast. In the end, not only did they not kill the monster, but they also lost a lot of people!

The members of the Nox gang, who were already at odds with the fierce dragon Hall, took the opportunity to launch a sneak attack on the fierce dragon Hall.

Who would have thought that the fierce dragon Hall, which had suffered heavy losses from the mutated monsters, would rely on a batch of weapons found during the exploration to beat NOK's members into a pulp. In the end, they could only escape in a sorry state!

Unable to take this lying down, the NOK members started to cause trouble for the fierce dragon Hall members in the safe zone. Fights would break out from time to time.

The Blood Fist organization, which controlled the safety zone, was eager for all the members of these forces to die. Therefore, as long as it did not affect the operation of the safety zone, it would ignore them!

That was why the brawny man provoked Tang Zhen, but no one came forward to stop him from the beginning!

Of course, up until now, the other organizations still didn't know that the fierce dragon Hall had discovered the fallout shelter. Otherwise, they would have long taken action to snatch it!

However, there was no such thing as an impervious wall in this world. The other organizations would find out about the fierce dragon Hall's discovery of the sanctuary sooner or later. Therefore, they had to take down the sanctuary before that happened!

Wang Wu's real purpose here was to hope that Tang Zhen would kill the mutated parasitic beast. Only then would they have a chance to enter the shelter!

Chapter 845 Easily done _An unused shelter definitely had a huge attraction, enough to make countless survivors go crazy!

This was a matter of great importance, so the fierce dragon Hall was extremely cautious in their actions, hoping to keep this secret for a longer time.

Therefore, even though he had invited Tang Zhen to help, Wang Wu did not mention anything about the sanctuary. This was to prevent Tang Zhen from having any ill intentions or leaking the information about the sanctuary.

Fortunately, the cave that led to the sanctuary had collapsed and was completely covered by gravel.

This way, when Tang Zhen was killing the mutated monsters, as long as he did not deliberately observe, he would not discover any abnormalities in the karst cave. The chances of the shelter being exposed would be greatly reduced!

Of course, the most crucial point was how to invite Tang Zhen to take action!

Tang Zhen wasn't lacking in money. One had to know that the car full of nuclear bottle caps made even Wang Wu feel a little shocked and envious.

Even the Treasury of the fierce dragon Hall didn't have that much cash in reserve!

Therefore, using money to invite Zhen Tang to take action was not within King fifth's consideration. Moreover, he didn't know how much money was appropriate.

However, when he saw Tang Zhen's mission requirements, Wang Wu suddenly had a flash of inspiration. He recalled an item stored in the nest of the fierce dragon Hall. It seemed to be very similar to Tang Zhen's description.

They had found it in the ruins of a Museum. Other than its unique style and its unique feeling, it had no other use.

Therefore, ever since it was discovered, it had been left in the storage room. It was only now that Wang Wu remembered it.

With the intention of giving it a try, Wang Wu took out the dusty item. After confirming that it was the item that Tang Zhen was looking for, he paid a visit with the excuse of an apology.

Now, it seemed that he had made the right move!

Then, the next thing would depend on whether this Tang Zhen had the ability to kill the mutated monster!

.....

City X, somewhere about 20 kilometers away from the blood Fist safe zone.

Tang Zhen looked at the quiet port in the distance. He spoke to Wang Wu beside him, what's going on with those ships anchored by the shore? are they occupied? "

Wang Wu was currently wearing a black combat suit with a bulletproof vest on the outside. When he heard Tang Zhen's words, he glanced at the direction that Tang Zhen was pointing at and explained with a smile, it used to be a military port, but it has been abandoned for many years. No one has occupied it!

Upon seeing the doubt on Tang Zhen's face, Wang Wu continued,"You may not know this, but there are many monsters near this military port, and there is a thick fog from time to time. Once you are in the middle of it, you will most likely die!

What's more, all the good things on this Starship have been taken away, and now there's only an empty shell left. No one will care even if it's there!"

After hearing King fifth's explanation, Tang Zhen nodded his head. He then switched to the view of the map and sized up these warships with interest.

This kind of thing might be very useful to him!

Of course, what they needed to do now was to head to the location mentioned by King fifth and get rid of the mutated parasite that had been bothering them!

At this moment, there were a total of 15 youths following Tang Zhen. Each of them was fully armed, and their faces were filled with vigor.

These young men were the elites of the fierce dragon Hall, and their combat power was far beyond that of ordinary minions. Even so, they were still not a match for the mutated parasite!

After suffering heavy casualties, Tang Zhen, who possessed extraordinary skills, had already become their greatest hope!

Following the fierce dragon Hall members, Tang Zhen quickly entered a hidden cave and continued to move forward along the passageway full of bones.

These skeletons were all old. They were obviously the survivors who had taken refuge here, but for some unknown reason, they all died here!

However, other than this, Tang Zhen also discovered some fresh blood stains. It was obvious that they were left behind not long ago.

Looking at the nervous expressions of the fierce dragon Hall members, Tang Zhen knew that they must have suffered a great shock here!

After walking for some distance, Wang Wu stopped and pointed to a cave entrance. "That mutated parasite is hiding in the tunnel ahead, and its speed is extremely fast. Our bullets can't lock on to it, and the bombs can't hurt it!

However, I estimate that with your speed, you should be able to deal with it!"

At this point, Wang Wu's face revealed a trace of solemnness as he said to Tang Zhen, "However, if you see that the situation is not good, you should also retreat as soon as possible to avoid being injured by this mutated monster!"

Tang Zhen nodded his head. Then, he walked past the members of the fierce dragon Hall and headed straight for the entrance of the cave.

When the fierce dragon Hall members saw this, they looked at Wang Wu in unison. After seeing him nod gently, they followed him in.

After walking along the tunnel for a distance, a huge cave suddenly appeared in front of them.

Tang Zhen smelled the stench of blood and decay as soon as he entered the spacious cave. At the same time, he also saw a large number of broken limbs.

It was obvious that this was the place where the mutated monster had occupied. The members of the fierce dragon Hall had been hunted here and had paid a painful price.

Tang Zhen spread out his mental energy to search. Very quickly, he felt a brutal and violent aura from behind a huge rock. At this moment, it was staring at his position with a dark and cold gaze.

Perhaps, it had sensed the dangerous aura from Tang Zhen's body. Therefore, this monster did not take the initiative to attack like it had in the past. Instead, it hid and observed!

From this, it could be seen that this mutated monster had the ability to think and judge the situation. It was no wonder that the fierce dragon Hall had suffered such a huge loss!

Tang Zhen did not hesitate after discovering the monster's hiding spot. His body suddenly flashed and he headed straight for the monster's hiding spot.

When the hidden mutated monster saw this, it actually let out a cry and turned around to escape without hesitation.

This was because the instant Tang Zhen launched his attack, the mutated monster immediately felt an irresistible sense of danger. With its intelligence that was not inferior to a child's, it decisively chose to turn around and flee.

Unfortunately, in front of Tang Zhen, this parasitic beast that was equivalent to a level five monster had no possibility of escaping!

The fierce dragon Hall members, who were originally worried and prepared to attack, only saw a blur in front of their eyes. Then, they saw the huge monster, which was more than three meters tall, suddenly freeze on the spot.

"Bang!"

The muffled sound of flesh being torn apart could be heard. The mutated monster that had killed dozens of members of the fierce dragon Hall had exploded into a pile of meat paste!

"This Yingluo is too exaggerated!"

A member of the fierce dragon Hall was dumbfounded when he saw this scene. He was stunned for a long time before he could speak.

The other members were the same, all with shocked expressions. After hearing their companion's sigh, they all nodded in unison.

It was obvious that such a clean and bloodied killing had far exceeded their expectations!

Wang Wu's expression was a little gloomy. In his original plan, regardless of whether Tang Zhen succeeded or not, he did not intend to let him leave this place. Only then would he be able to better protect the secret of the sanctuary.

However, the abnormal speed that Tang Zhen had displayed earlier, as well as the ability to easily kill the mutated monster, had made him clearly realize that this Tang Zhen was likely even more difficult to deal with than the mutated monster!

If he really attacked Tang Zhen, Wang Wu did not dare to guarantee that he would be able to kill him. On the contrary, he might end up provoking an even more terrifying enemy.

The fierce dragon Hall might suffer a destructive blow because of this!

After thinking about it, Wang Wu could only sigh in his heart and temporarily give up on the idea.

Chapter 846 Cultivating! local force

At this moment, the deep cave was filled with a rancid and strong smell of blood, which made people want to vomit.

After getting rid of the mutated parasitic beast, Tang Zhen didn't return directly. Instead, he walked to the monster's side and took a look.

The monster's body was huge, and even after its body was torn apart, it was still wriggling. It was a sight that made people's scalps numb.

Upon closer inspection, one would discover that there was a white mycelium-like object in the broken flesh, dancing in the air!

Tang Zhen suddenly felt a sense of déjà vu when he saw this scene. This was because he had seen a similar special species in the ruins of the giant tower in the spirit fall battle zone.

However, the difference between the two was that the strange mycelium in the ruins of the giant tower was more aggressive. In addition to being afraid of fire, it was almost immortal and could control mummies better.

In comparison, the parasitic beasts in the wasteland world were much weaker. Once the parasite died, they would no longer be a threat!

However, compared to the survivors of the wasteland world, the mutant monster was still an extremely terrifying existence.

If Tang Zhen was not wrong, this monster should have been an ordinary creature before it was parasitized. An ordinary person would be able to kill it easily with a weapon.

However, after the mutation, the monster's strength had greatly increased. Even in the face of the violent attacks of rifle bombs, it could still use the terrain to effectively Dodge.

Unless they used heavy weapons and surrounded the mutated monster in the right place, it was impossible to kill it!

The most terrifying thing was that these mutated monsters had simple intelligence, which greatly increased their danger.

From the previous encounter with the fierce dragon Hall, one could see the combat power of these mutated monsters.

If there were more of these monsters, or if they were spread across the wilderness like the world of towers, the survivors of the wasteland world would not be able to hold on for long before they were completely slaughtered!

At that time, these monsters would probably be the ones to rule the wasteland world.

If such a situation really happened, then the difficulty for Tang Zhen to obtain the world's origin would undoubtedly increase by a lot.

Moreover, compared to killing the monsters in the dungeon World, the monsters in the wasteland world didn't have any useful items, so the cost and reward were not proportional.

However, the problem was that as his plunder began, things began to develop in an unknown direction.

Tang Zhen had a premonition that when the amount of the world's Origin Energy he had plundered reached a certain limit, the world's Origin Energy would produce a self-protection consciousness. This kind of thing might happen!

This wasn't a wild guess, but because there were countless examples in the past. This was also one of the reasons why Lou Cheng's invasion of the other world wouldn't be smooth sailing.

Tang Zhen revealed a pondering expression after taking out the special bone that Wang Wu had given him and taking a look.

As expected, plundering the world's Origin Energy was not as simple as he had thought. Perhaps he needed to think about it carefully!

At first, he had thought of ending the battle quickly, but now it seemed that he had taken it for granted. If there was such a shortcut, then the countless cultivators in the world of Loucheng, as well as the countless geniuses, would have solved this problem long ago.

This was a task that required painstaking effort and couldn't be rushed at all. As the saying went, "haste makes waste." This was the truth.

In that case, should he consider establishing a force in the wasteland world to slowly collect the world's origin power for him?

Under the gaze of Wang Wu and the rest, Tang Zhen turned around. At the same time, he swept his gaze across a certain collapsed cave entrance. A trace of understanding was revealed in his eyes.

There was indeed a reason why the fierce dragon Hall wanted to take down this place even at the cost of their soldiers!

Through the coordination of his mental energy and the map, Tang Zhen had already discovered that there was a tightly shut metal safety door hidden behind the collapsed cave.

There must be something hidden behind the metal door that would tempt the fierce dragon Hall. That was why they had made such a move.

However, Tang Zhen didn't care about that little thing. After all, the treasure-like material reserves in the wasteland world were nothing to Tang Zhen.

With his original world as a logistics base, Tang Zhen would not lack these things!

On the other hand, what Tang Zhen wanted to do the most at this time was to cultivate a local force and let them help him collect the world's origin.

When he thought of this, Tang Zhen looked at Wang Wu, who was walking towards him, as a glint flashed across his eyes.

Perhaps this fellow in front of him was a good candidate!

When he thought of this, Tang Zhen suddenly charged towards Wang Wu and the rest. Under their terrified gazes, the corner of his mouth revealed a sinister smile.

After killing the mutated monster, these bastards still loaded their guns and aimed their muzzles at him. Their intentions were clear!

Tang Zhen would never be polite to people who tried to scheme against him. The alien race's Tower that he destroyed was one of them. The black prison tower that was invading the Otherworld was another.

If it wasn't for the fact that the other party's Tower was no longer in the tower world, with Tang Zhen's temper, he would have long killed his way to the lair of the black prison tower!

At this moment, Wang Wu's face was filled with fear. He did not hesitate to raise his rifle in an attempt to shoot to stop Tang Zhen from approaching.

Wang Wu, who had been through countless battles and escaped death several times, felt a great danger. His heart was not only full of fear, but also a little bit of regret.

If he had known this would happen, he would not have provoked this monster!

Just as Wang Wu had this thought, Tang Zhen had already made his move and knocked out everyone from the fierce dragon Hall.

next, I'll try out the newly learned method of enslaving spiritual force and see what the specific effects are.

Following Tang Zhen's casual wave of his hand, the already limp Wang Wu swiftly floated up from the ground. He arrived in front of Tang Zhen and was directly grabbed by his head.

A faint layer of light appeared on Tang Zhen's hand. Soon after, a seemingly solid mental energy gushed out and wrapped around Wang Wu's head.

At the same time, a strange mental power entered King fifth's mind, causing his facial muscles to twitch and his body to shake.

A mysterious and strange incantation was also emitted from Tang Zhen's mouth. It reverberated unceasingly in this cave that was filled with the smell of blood.

If King fifth saw this, he would definitely regret it.

It was likely that even he himself did not know how ridiculous it was to rashly use Tang Zhen to kill the mutated monster and even think of taking action after the matter to prevent future trouble.

After all, they had provoked a two-star King tier, the famous uncrowned King of the spirit fall battle zone!

He had come here to destroy the world!

From the point of view of the Aborigines, Tang Zhen was the devil King who tried to destroy this world. He was The Public Enemy of the World that was more terrifying than zombies and parasitic beasts!

So, King fifth was actually making a deal with the Demon King. If he followed the rules and didn't have any crooked thoughts, it would be fine. However, if he thought he was smart, he was destined to have a bad end.

Chapter 847 Collecting the warship, undercurrents surging

At this moment, Wang Wu was floating in the air. The expression on his face kept changing as if he was immersed in a dream made up by Tang Zhen.

Due to the influence of the secret technique, King fifth would treat his dream experience as a real experience, and he would not doubt it.

At the same time, under the influence of Tang Zhen's mental energy, Wang Wu would follow Tang Zhen's orders and would not have any thoughts of betraying.

This spiritual power enslavement secret technique from the ghost bank actually had the same principle as that contract, but it was more convenient and direct to use, and the effect was more obvious.

The higher the strength of the spell caster, the lower the strength of the slave, and the better the effect of this enslavement secret technique!

Wang Wu was only an ordinary person. He was as small as an ant compared to Tang Zhen. Therefore, unless Tang Zhen removed his slave state, he would never be able to escape from Tang Zhen's control!

After dealing with Wang Wu, Tang Zhen turned his eyes to the elites of the fierce dragon Hall. After thinking for a moment, he also used the secret skill of mental enslavement on them.

With the presence of these people, he could carry out his plan without worry.

.....

An hour later, outside the cave.

At this moment, Wang Wu and the rest were following behind Tang Zhen. There was nothing unusual about their expressions. However, there was a hint of admiration in their eyes when they looked at Tang Zhen.

“Remember what I told you to do. Take action immediately after you go back. No mistakes are allowed during this period!

If you encounter any danger, you can also use the items I gave you to save your lives. Do you understand?”

don't worry, master. We've already memorized it!

Wang Wu and the others answered in unison, their expressions extremely serious.

Tang Zhen waved his hand without even turning his head when he heard this, “Since that's the case, you can all go back!”

“Yes!”

yes, ” Wang Wu and the others replied. They turned around and left at the same time, heading for the headquarters of the fierce dragon Hall.

Tang Zhen pondered for a moment as he watched Wang Wu and the rest leave with a respectful expression. After which, he directly ran towards the abandoned military port.

With his current speed, he could walk very quickly, so it didn't take him long to reach the military port.

The military port was in chaos. There were signs of damage everywhere, and corpses could be seen in the corners.

The prosperity of the past had long disappeared, and perhaps it would never return to its former glory.

While looking at the mottled warships, Tang Zhen took out a storage bracelet that lingxu Zi had carefully made and rubbed it with his finger.

As Tang Zhen's finger drew across, numerous strange symbols began to appear on the storage bracelet. A gentle light continuously flickered, allowing one to know that this storage bracelet was definitely not an ordinary item.

This was indeed the case. The space in this specially-made storage bracelet was extremely large, and it could easily store three to five damaged warships in front of them!

He had spent a lot of origin stones on this trip to the wasteland world. In addition to the world's origin that he was determined to get, he had to collect some interest.

These big, mottled, and old things in front of him were obviously worth his time. Because, other than their damaged appearance and some damaged equipment, there were still many things that could be used!

Now that he had encountered Tang Zhen, there was naturally no reason for him to miss it.

When he thought of this, Tang Zhen directly flew up. He stimulated his mental energy and locked onto one of the warships. At the same time, he activated his storage bracelet.

In the blink of an eye, the huge warship disappeared, leaving only the waves on the surface of the sea.

A giant monster that was hidden at the bottom of the warship appeared. A huge black shadow could be seen through the water surface. It was forced by the might emitted by Tang Zhen and fled into the deeper waters in a panic.

Tang Zhen ignored the water monster that was enough to make an ordinary person scream in fear. He flew to the top of the next warship and carefully observed it.

The warship was about 300 meters long and had a long flight deck. It looked flat and spacious. Although its surface was mottled, it still could not hide its past glory!

If Tang Zhen didn't recognize it wrong, this should be an aircraft carrier!

Tang Zhen was naturally extremely interested in this kind of moving fortress on the sea. Therefore, he kept it into his storage bracelet without any hesitation!

One, two, three Pixiu.

Only when Tang Zhen felt a slight headache and the mental energy he had accumulated was nearly exhausted did he finally stop his actions.

At this moment, his storage bracelet was already filled to the brim with all kinds of warships that were previously parked in the military port!

Tang Zhen nodded his head in satisfaction as he looked at the empty military port that was now empty. He got up and headed towards the blood Fist safety zone.

.....

Time passed slowly, and in the blink of an eye, half a month had passed.

During this period of time, the undercurrents in the blood Fist safety zone were turbulent. Many major events had happened one after another, causing the survivors to be frightened.

First, the leader of the fierce dragon Hall changed. The original second-in-command, Wang Wu, became the new leader. The original leader of the fierce dragon Hall suddenly died of an illness.

During the competition for the new leader, Wang Wu, who was already the second-in-command, was extremely domineering. He directly pulled out his gun and killed a backbone of the fierce dragon Hall who dared to challenge him!

When the other competitors who had their own plans saw this, they immediately shut their mouths obediently and expressed their support for Wang Wu to preside over the fierce dragon Hall.

After Wang Wu became the leader, he immediately issued a batch of new military weapons, which improved the combat power of the fierce dragon Hall by a large margin.

Then, relying on the advantage of their equipment, the fierce dragon Hall launched a surprise attack on the secret headquarters of the NOK gang outside the safe zone and killed all their leaders!

More than half of the hundreds of members of the nock gang had died in the battle, and the rest were captured by the fierce dragon Hall.

After this battle, the fierce dragon Hall's morale was greatly boosted. Everyone was united, and the members were even more supportive of King fifth.

However, after this matter spread, it immediately caused a huge uproar!

Many people knew that the fierce dragon Hall and the Nox gang had been at odds with each other for a long time. However, for a long time, even if there were conflicts between the two sides, it rarely caused too many casualties to avoid further escalation of the conflict.

Some time ago, the NOK gang launched a surprise attack on the headquarters of the fierce dragon Hall, but they returned in failure. Unexpectedly, the fierce dragon Hall launched their revenge in the blink of an eye, directly destroying the NOK gang!

It had been many years since such an intense battle had taken place. The last time it had happened was when the blood Fist organization was fighting for the safe zone.

It was also because of the powerful strength that the blood Fist organization had displayed that the other forces had chosen to bear with it and silently acknowledged it as the controller of this area!

However, this safe zone had great value. The blood Fist organization had controlled this place for a long time and had constantly suppressed the other forces, which had long made many forces dissatisfied.

Those with discerning eyes could already tell that the fierce dragon Hall was not content with being alone and wanted to fight with the blood Fist!

However, before the survivors could recover from their shock, the fierce dragon Hall had mobilized all of their members with great fanfare and entered the safety zone with weapons. They were really arrogant.

The strangest thing was that during this process, the manager of Blood Fist did not come forward to stop it!

Things were getting interesting!

Although there were many members from different forces in the blood Fist safety zone, it was the first time that someone had dared to do such a thing!

How could they allow others to sleep beside their beds? furthermore, the fierce dragon Hall was in the limelight now. Letting them enter the safety zone just like that was almost equivalent to letting a fierce tiger in!

Could it be that the bosses of the blood Fist organization had collectively lost their minds and actually ignored this matter?

Chapter 848 -change of master, temporary return

This extremely abnormal scene immediately attracted the attention of the survivors. An atmosphere of impending storm enveloped the entire safe zone.

Many forces also began to quietly make preparations, trying to profit from the changes.

As expected, on the night the fierce dragon Hall entered the blood Fist safety zone, there was a fierce battle. The gunshots did not stop all night, and corpses could be seen on the streets from time to time.

However, what was surprising was that the powerful Blood Fist organization was actually being beaten back in this battle. They had no power to resist at all!

At the same time, a huge metal monster appeared and turned the headquarters of the blood Fist into a river of blood. Rapid gunshots were like a rain in the middle of the night, constantly ringing in people's ears!

When the Restless forces saw this scene, they immediately put away their unwanted thoughts and obediently watched the show.

The next morning, when people saw the fully armed members of the fierce dragon Hall on the streets, they realized that the blood Fist safety zone had probably changed hands.

As expected, the blood Fist safety zone was soon renamed to "City of Hope", and King fifth became the new ruler of the city, but he was always followed by a strange man.

This person was qiaoer. He would be responsible for assisting King fifth in managing this safe zone. At the same time, he would help Tang Zhen collect the origin of the world.

Under the leadership of Wang Wu, the members of the fierce dragon Hall killed all the forces who dared to oppose them. They were extremely ruthless!

Although many survivors escaped the safety zone during the whole process, as the situation completely stabilized, a large number of supplies from the fallout shelter were taken out and distributed. After a large number of survivors were recruited, the number of people here did not decrease but increased instead, and it began to become more and more lively.

The blood Fist organization's headquarters had now become the residence of Hope city's Castellan!

Tang Zhen stood by the window and looked at the people on the street. Behind him were Wang Wu and qiaoer, who had already become the city Lord.

"According to the plan I've given you, it won't take long for hope City to become a paradise for countless survivors!

I'll come here regularly to bring you enough supplies to ensure that the early development won't be affected."

After Tang Zhen said this, he turned his head to look at qiaoer and qiaoer. His expression carried a trace of seriousness,"And all my actions only have one purpose, which is to make it easier for me to search for the items I need. You Must Remember This!

Therefore, no matter what you encounter, you must prioritize this matter. Understand?"

Beside him, Joel nodded. Even if Tang Zhen didn't say it, he had already guessed this.

Although he was very curious about the purpose of Tang Zhen's collection of those items, qiaoer was also extremely clear that knowing too much might not be a good thing for him.

The more one knew, the faster one would die, especially the secrets of a mysterious person like Tang Zhen!

So, qiaoer only needed to run Hope City well and let Allie live a stable life. As for the other things, what did they have to do with him?

Tang Zhen nodded his head in satisfaction after seeing qiaoer's reaction.

With qiaoer and King Five's men running errands for him, in addition to the weapons and equipment he provided, the speed of collecting the world's origin would be much faster!

Tang Zhen seemed to have thought of something as he continued to warn, "When I'm not here, don't come into contact with the other major forces for the time being to avoid any accidents.

However, if the other party can help me collect the things I want, I can cooperate with him. But be careful not to fall into his trap!

It's fine even if I suffer a little loss for the time being. When I come back, I'll definitely get back at you with interest!"

The reason why Tang Zhen said this was because although the wasteland world was vast and sparsely populated, there were still some powerful forces existing. Compared to them, Hope City was not their match at all!

People like umbrella and inkley were powerful forces that could not be ignored in the wasteland world!

Tang Zhen's purpose was not to fight with them for territory. Therefore, unnecessary disputes should be avoided. However, if the other party dared to obstruct his plan, Tang Zhen would definitely not let it go.

The morning passed quickly. After Zhen Tang arranged everything, he left ten more fighting robots and entered a secret room, temporarily returning to the loucheng world!

.....

In Holy Dragon City, a plane transportation channel suddenly appeared. Tang Zhen's figure slowly appeared from within.

Tang Zhen could not help but take a deep breath after he sensed his body and confirmed that there was nothing unusual.

When he was in the wasteland world earlier, the energy there was really too thin. It caused Tang Zhen to have a feeling of having difficulty breathing at all times, causing him to feel extremely displeased.

Now that he had returned to the world of loucheng, the situation had finally eased. It was as satisfying as drinking a large bucket of ice water in the hot summer.

Tang Zhen pushed open the door that had been closed for a long time. He appeared in his study and began to listen to the assistant's report on the events that had happened during this period.

In the time he was away, the Holy Dragon city's situation was basically normal, and it had become even more lively.

The reason was that more and more transmigrators had come to Holy Dragon City to participate in the testing of the real game, causing excited players to be seen everywhere inside and outside of Holy Dragon City.

These transmigrators, who were curious about everything they saw, added a lot of vitality to Holy Dragon City.

After upgrading to a grade 8 city, Holy Dragon City had completely changed. It was like a paradise on earth, making people forget to leave.

These transmigrators had never seen such a beautiful scene before, so they were all shocked for a long time before they came back to their senses. They repeatedly said that this trip was not in vain!

With this kind of mood, they participated in the game testing, so naturally, they were full of joy and laughter along the way.

Other than this matter, the other two matters that the assistant had mentioned had also aroused Tang Zhen's interest.

The first was the news from the Allied army in his original world. They had completely occupied the dog-headed people's Tower area and were now clearing out the remaining enemies.

The arrogant kobolds, who had dominated the rich land for countless years, had now become stray dogs. Almost all the members of the royal family had died in the most intense battle of the royal city!

After this battle, the Alliance Army won a huge victory. The Kobold King City was destroyed, and the ruins were everywhere.

Perhaps it wouldn't take long for the dog-headed people, who were on the verge of extinction, to be completely annihilated.

From the moment this arrogant race provoked the Holy Dragon City, they were destined to be destroyed!

The next thing to do was to distribute their own benefits.

Tang Zhen didn't have much interest in how his partners would divide this rich land. He only needed to manage the Wildlands well and didn't want to get involved in other areas for the time being.

As for the other matter, the residents of Holy Dragon City had asked him more than once to open the level 8 overseas battlefield as soon as possible. This would also speed up the upgrade of the tower!

With the rapid development of the Holy Dragon City, the strength of the city kept increasing. The residents of the Holy Dragon City were full of confidence and had already begun to work hard to promote the city to a national level!

Becoming a resident of a national-level building was the wish of almost all the residents of the building. Because, in addition to the real benefits, it was also a very high honor for the residents of the building.

It was a good thing that such a situation had occurred. Tang Zhen naturally wouldn't dispel the enthusiasm of the residents.

Therefore, after some consideration, Tang Zhen made a decision to open the level 8 overseas battlefield soon!

As soon as this news spread, the entire Holy Dragon City immediately burst into cheers. The cultivators in the towers excitedly arranged their equipment, preparing to earn a lot of battle merits in the overseas battlefield!

The cultivators of Lou Cheng had already tasted the sweetness of the level 7 overseas battlefield, which was why they were so excited about the level 8 overseas battlefield.

Following the announcement, the entire Holy Dragon City once again entered a state of preparation for war. For a time, fully armed Holy Dragon City cultivators were everywhere, making the final preparations for the expedition.

Chapter 849 Overseas battlefields, naval battlefields? _In the business district of the Holy Dragon City, there was a bar that had just opened. It was filled with guests who had come because of its fame, and many of them were transmigrators with curious expressions.

The three lady bosses here were beautiful, the food was delicious, and the wine they brewed had a long aftertaste, so they attracted a lot of returning customers.

The fragrance of wine didn't fear the depths of the alley. Moreover, although the business district was large, there were also many people of all kinds. Almost every street was full of people, so it wasn't difficult to find this small shop.

Although the store was not big and had not been open for long, it was famous for its cheap and good quality dishes.

Eating delicious food and listening to the music played by the lady boss was really a kind of spiritual enjoyment!

At this moment, Tang Zhen brought his family, Qian Long, Tai Seng, and the others to a private room upstairs. They were eating and chatting.

The table was full of sumptuous dishes, and everyone was full of praise.

At this moment, the door was opened and Three Tall Women walked into the room with smiles on their faces.

Seeing this, everyone immediately stopped talking and looked at the three women, deep in thought.

They were the three king level spirit body cultivators from the overseas region. However, they no longer had any cultivation and were only a little stronger than ordinary people.

However, looking at their expressions, they didn't look regretful at all. Instead, their brows were filled with the joy of being reborn.

The woman in the lead was dressed in red. She bowed to the crowd and then brought out a few dishes and placed them on the table.

this is my specialty. Please have a taste and give me your valuable opinions!

When she spoke up to this point, the red-clothed lady looked at Tang Zhen and revealed a grateful expression.

"The city Lord has helped us three sisters escape from the sea of suffering and even allowed us to live in Holy Dragon City. We will never forget his great kindness!

We didn't have the chance to thank you before, but now that you've come to our store, we're very flattered. At the same time, we'd like to take this opportunity to thank you!"

When she spoke until this point, the red-clothed lady bowed to Tang Zhen. The black-clothed and white-clothed ladies standing behind him also did the same. Their expressions were solemn and sincere.

you're welcome. After all, you and I have an agreement. There's no need to say that we owe each other anything!

Tang Zhen shook his head. He looked at the three spirit body sisters who were staying in the specially made bodies and spoke with a faint smile.

When the woman in red heard this, she no longer mentioned this matter. Instead, she smiled and introduced the few dishes that had just been served to everyone. From time to time, she would raise her glass and toast.

The white-robed lady took out a unique piece of music and directly performed it live to liven up the atmosphere for Tang Zhen and the rest.

The wine was good, the dishes were fragrant, and the melodious music floated in the air, causing the room to be filled with joy!

.....

Holy Dragon City, Back Valley.

Under calm circumstances, the Holy Dragon city's level 8 overseas battlefield quietly opened.

The whole process did not alarm too many people. Other than the residents of Holy Dragon City who had more important positions and were lucky enough to participate, the rest of the residents of the building did not know about this at all.

The Holy Dragon City was now being watched by countless forces. Their every move would be reported by the spies, so some things had to be low-key.

At this moment, Tang Zhen cut off the spiritual link with the cornerstone platform and turned to look at the giant teleportation gate that had just appeared in front of him.

Compared to the teleportation gate of the level 7 overseas battlefield, the teleportation gate of the level 8 overseas battlefield was undoubtedly more majestic and mysterious!

The Holy Dragon city's residents behind Tang Zhen were also unblinkingly sizing up the teleportation gate in front of them. From time to time, they would whisper to each other.

"What do you think a level 8 Ocean Land will look like?"

I don't know, but I heard that the area and danger level of the level 8 overseas battlefields are different. I wonder what kind of battlefields will we be randomly assigned to? "

hey, aren't you guys tired of guessing? anyway, the portal is already open. You'll know when you go and take a look!

let's not talk about it for now. Look, the cultivators in charge of scouting the enemy have already entered!

While the crowd was discussing, twenty fully armed Holy Dragon City Lord cultivators had already walked to the front of the transfer gate and cupped their fists towards Tang Zhen.

Then, the Overlord cultivators stepped into the teleportation gate with excitement on their faces!

It was an enviable honor for them to be the first to enter the rank-8 overseas battlefield and investigate the enemy's situation!

At this moment, their fighting spirit was high, and they had already made up their minds. They had to complete this mission beautifully.

Tang Zhen placed his hands behind his back as he watched the scene before him. In his heart, he was also quietly guessing what the overseas battlefield would be like this time around.

Seeing that the twenty Overlord cultivators in charge of investigation had all entered the teleportation gate, Tang Zhen sat on a chair at the side. He was prepared to wait here until they brought back specific information.

In fact, Tang Zhen could personally complete this kind of investigation work. However, as the Lord of the city, he had to learn to delegate some things and let others do it.

This way, the residents under him would be able to train and be able to take charge as soon as possible!

After all, the strength of a City Tower ultimately depended on its overall strength, and not the martial strength of the city Lord alone.

After all, the strength of one person was limited. However, in a powerful city, the cultivators were as strong as dragons and could definitely make the enemy cower before the battle!

Just as he was thinking about this, Tang Zhen suddenly noticed that the light on the teleportation gate flashed slightly. His heart immediately jumped.

This was obviously a sign that someone had sent a message back. However, the cultivator in charge of the investigation had just gone there, so how could he have sent a message back so quickly?

Could it be that there was a great danger on the other side of the teleportation gate that even the Lord cultivators couldn't resist?

Tang Zhen suddenly sat up when he thought of this. His body flashed and he had already appeared in front of the teleportation gate.

Once there was a change, he would immediately take action to help!

The Holy Dragon city's higher-ups had also noticed the abnormality. They all stopped talking and looked at the teleportation gate.

"Yi!"

At this moment, a dozen Holy Dragon City cultivators suddenly rushed out of the teleportation gate and appeared in front of Tang Zhen.

They didn't seem to be injured, but they were in a very sorry state. They were all wet from head to toe, and water was dripping from them!

Tang Zhen was extremely curious. He opened his mouth and asked, "What's the situation on the other side? how did you guys end up like this?"

The faces of the Overlord-grade cultivators turned red as they explained to Tang Zhen, city Lord, after we passed through the teleportation gate, we didn't even get a clear look at the situation. The result ...

Speaking up to this point, the Lord cultivator paused for a moment. When he saw Tang Zhen staring at him without any intention of blaming him, he braced himself and continued, "In the end, we all fell into the water and struggled for a long time before we managed to swim back!"

The Lord cultivator cried and said unwillingly, we're all non-swimmers and can't swim at all. If it weren't for our cultivation levels, we might have been fed to the fish!

Tang Zhen did not know whether to laugh or cry when he heard this. He looked at the other party and said, then won't you guys be suspended in the air for a while? this shouldn't be difficult for you, right? "

city Lord, you don't know this, but there's no way to fly on the other side. The water is vast and boundless, and there's no sign of land at all!

When Tang Zhen heard this, he felt that things weren't as simple as he had imagined. He glanced at the Holy Dragon city's cultivators, who were all drenched, and said softly, "There are still a few people left. Why aren't they back yet?"

they know how to swim. They said they wanted to take a look and collect as much information as possible. Otherwise, it would be too embarrassing!

The Lord cultivator awkwardly smiled and explained to Tang Zhen.

nonsense! What if we encounter a powerful water monster? we can't fly, so we'll just be courting death in the water!

Tang Zhen snorted. Under everyone's gaze, his figure directly charged into the teleportation gate.

“Don’t act rashly, wait for me to come back and make a decision!”

After hearing Tang Zhen’s words, the Holy Dragon city’s people, who were originally planning to follow them in, immediately stopped in their tracks.

It was just that their current expressions all became very strange and helpless.

Before opening the level 8 overseas battlefield, they had many speculations. However, no one had expected that the Holy Dragon city’s level 8 overseas battlefield was actually a vast and enormous water surface!

This was too surprising!

Chapter 850 The water world (1)

On the other side of the teleportation gate, Tang Zhen looked at the boundless sea surface before him. He was also shocked and surprised in his heart.

He had never dreamed that the Holy Dragon city’s level 8 overseas battlefield would be in such a special terrain that would make people speechless!

The terrain of the overseas battlefield was unpredictable, and the most troublesome thing for the cultivators of Lou Cheng was undoubtedly this special terrain, because it would cause a huge restriction to the battle!

Although the foundation stone platform had a profound meaning, perhaps it was more to allow Lou Cheng’s cultivators to adapt to different combat environments, it had to be said that this special terrain was really a scam!

There was once a Tower City that was randomly assigned to a battlefield full of volcanoes when the level 8 overseas battlefield was opened. It was really dusty inside, like a steamer!

Being assigned to the overseas battlefields with such a harsh environment, the tower City was also very unlucky. It spent a lot of manpower and resources, and it took a few decades to barely complete the advancement mission.

Therefore, when completing the upgrade mission of the level 8 tower, it would more or less depend on luck. If the terrain was not too restrictive, the mission would be easier to complete, and after the victory, they could get a good piece of land!

However, if they encountered a special terrain, they would have no chance of getting the two mentioned above.

However, the proportion of overseas battlefields in this kind of special terrain was not high. Tang Zhen could only blame his luck for being too bad. He had actually been randomly assigned to such a special battlefield by the cornerstone platform!

Although he was depressed, since the teleportation gate had been activated, it meant that the mission had already begun. There was no reason to stop it!

In that case, his next step would be to investigate the enemy and complete the promotion mission as soon as possible.

Tang Zhen once again looked at the surrounding sea when he thought of this.

Just as the cultivators of the tower City had said, all they could see was the vast sea. Other than the teleportation gate standing on the sea behind them, there were no signs of islands or land!

He tried to fly, only to find that even with his two star King tier strength, he could only fly about three meters. After that, he would feel a mountain-like pressure coming at him, forcing him to maintain his balance to prevent himself from falling.

This place was indeed strange. It seemed that this loucheng's advancement mission would be a bit difficult!

When he switched to the map view, Tang Zhen discovered that he could only see as far as his line of sight could reach. This was clearly another restriction of some kind!

Tang Zhen had already discovered this strange phenomenon when he was heading to the wasteland world. Now that he was entering the rank-8 overseas battlefield, this situation appeared again.

It seemed that such a situation would appear when one entered an unfamiliar world. As Tang Zhen's floating range continued to expand, the area of the map would gradually expand!

Therefore, in this case, if Tang Zhen wanted to activate the map teleportation function and run a few hundred kilometers at once, he must first "unlock" the map of that area.

In other words, Tang Zhen had to personally go to the areas that were not shown on the map. Then, his mobile phone could be used to map and supplement the area, so that the area covered by the map would continue to expand!

After sweeping a glance at the map, Tang Zhen discovered the few Holy Dragon City cultivators that were swimming in the water. They were about five kilometers away.

However, there was a huge Hydra's corpse floating beside them. It was surrounded by a large amount of blood, which was very eye-catching.

"You guys, come back immediately!"

The Holy Dragon city's cultivators had their own special communication tools. At this time, with Tang Zhen's order, the Holy Dragon city's cultivators, who had just joined forces to kill the water monster, immediately swam towards the teleportation gate like big fish.

"Greetings to the city Lord!"

A few Lord cultivators swam in front of Tang Zhen and stood up from the water. They relied on their mental strength to support their feet, allowing them to stand on the water for a short period of time.

As for the other Lord cultivators who didn't know how to swim, they probably wouldn't use this move. That was why they fell into the water one after another and were in a sorry state!

"The few of you, don't go back yet. Come with me to investigate first!"

As he said this, Tang Zhen waved his hand. The cultivators' vision blurred and a military speedboat appeared on the sea. When it landed, it splashed a large amount of waves!

When the cultivators saw this, they jumped onto the assault boat one after another. Tang Zhen also landed on it.

The Holy Dragon City cultivators were already very familiar with this kind of equipment from the original world, so they activated it very easily. Then, they began to sprint forward like arrows!

At the same time, all the cultivators looked in different directions, hoping to find something unusual.

However, there was nothing on the vast sea. Even though they had sailed for a long distance, they still did not see any signs of life!

Could it be that there were no alien races in this area, or that they lived under the sea?

There was more than one cultivator from the Holy Dragon City who had this thought. However, Tang Zhen was not one of them. This was because he was certain that the target of this battle was above the sea.

The cornerstone platform wouldn't give Lou Cheng an unsolvable mission, so the enemy couldn't possibly hide under this deep ocean. Otherwise, other than the water tribe's Lou Cheng, the other Lou Cheng had no possibility of completing the mission!

After all, the sea was thousands of meters deep. Without any equipment, it was impossible for cultivators of Loucheng to enter such a deep sea. They would be crushed!

In fact, when the level 8 overseas battlefield was opened, Tang Zhen had already seen the requirement for the tower upgrade mission, which was to kill all the Guardians of the tribes!

Other than that, these tribes also had different plants, seeds, and soil. At the same time, they also had some special items. If they obtained them, they could hand them over to the cornerstone platform and obtain a large amount of battle merits!

As for the foreign tribes, they weren't included in the mission, and killing them wouldn't give them any battle merits.

If the Holy Dragon city's cultivators heard this news, they would be very disappointed, because it meant that their gains from the war would be greatly reduced!

Fortunately, the mission mentioned that some items from the foreign tribes could be exchanged for battle merits, and it was very generous, so the cultivators in Lou city still had a chance to make a fortune.

Tang Zhen suddenly raised his brows while the military speedboat was aimlessly moving forward. He extended his hand and pointed in a certain direction.

there's a situation thirty miles ahead. Let's go and take a look!

When the Holy Dragon City cultivators heard this, their spirits were instantly lifted. They looked in the direction that Tang Zhen was pointing in, their eyes filled with anticipation.

The military speedboat was traveling at a speed of more than 100 kilometers per hour, quickly heading towards the target. It didn't take long for a strange but spectacular scene to appear in front of everyone!

It turned out that on this vast sea, there were countless strange ships of different shapes and sizes. They were gathered together, and on them stood many alien races who were only wearing a few clothes.

As soon as they got close, they would discover that these ships were completely pieced together with a variety of materials, looking extremely simple and crude. If it wasn't for the fact that they had the function of floating and carrying people, it would be more appropriate to call them floating garbage piles!

In the middle of these ships, there was a huge monster the size of a small island floating. It was dark brown in color and covered in huge scales.

A group of alien cultivators had gathered on top of the giant water monster. They were holding something in their hands and waving it around in the hole on the monster's body.

At this moment, the foreign tribe members on the ships were observing the reaction of the huge sea monster without blinking. Even when Tang Zhen and the others approached, they did not pay much attention to them. There was only a trace of vigilance and vigilance in their eyes.

It was as though from their point of view, the arrival of Tang Zhen's group was equivalent to them snatching benefits from them!

As the foreign cultivators moved, the huge monster seemed to be affected and began to tremble slightly.

The demonic humans on the other ships immediately cheered when they saw this, as if they were extremely excited!

At this moment, the huge water monster suddenly shook. Then, a huge water pillar with a height of over a hundred meters and a diameter of five meters shot out from the huge hole on its body!

The pillar of water shot up into the sky and then scattered in all directions like a heavy downpour.
