

Alternate 871

Chapter 871 Material supply (1)

In the valley behind the Holy Dragon City, cars with new power passed through the portal and entered the water world.

This type of car used the brain as its energy source and had a long endurance. However, because of the complicated manufacturing process of the power unit, it was rarely used in civilian facilities.

These cars were just experimental products. They had been operating well and were quite popular with the residents of the Holy Dragon City. After all, compared to vehicles that used electricity and fuel, vehicles that used brains had more advantages.

After glancing at the boundless sea around them, the drivers turned around and stopped on a platform built with several warships.

The Holy Dragon city's residents who came along with the truck worked together to sort out the spoils of war that had just been transported here and load them into the truck.

Because there were many plants among these spoils of war, in order to prevent them from withering and dying, which would cause a loss of battle achievements, they had to be sent to Holy Dragon City as soon as possible to be dealt with.

During the entire process, the residents of the city were very careful, afraid that they would damage the fragile plants and other things, which would affect the exchange of battle merits.

After half a day's work, they packed up the spoils of war that looked like rags and drove back to Holy Dragon City.

He drove out of the teleportation gate and slowly walked along the road in the valley behind the Holy Dragon City until he reached the front of the tower in the inner city.

After the car stopped, a group of Lou Cheng's Warriors immediately surrounded the car. Then, boxes of loot were unloaded and sent to the room where the foundation stone platform was.

Some of the Holy Dragon city's residents also stopped to watch after seeing this scene.

Shitou, you guys should be careful. Try not to bump into anything. If you break it, I'll teach you a lesson!

A middle-aged resident of Lou city stood by the road and couldn't help but reprimand them nervously when he saw the young men's clumsy actions.

The young men nodded and replied, "Uncle Sun, don't worry. Even if we were to fall and break, we definitely wouldn't touch these things!"

After all, this is something that our soldiers have exchanged their lives for. How can we not know the severity of this?"

Uncle Sun snorted when he heard this, but his expression eased up a lot. From time to time, he would help out.

At this moment, a pleasant voice sounded.

“Uncle Sun, why are you here? are you feeling better?”

When Uncle Sun heard this, he turned around and a happy smile immediately appeared on his face. He said to the person who came, “So it’s the city Lord’s wife, I haven’t seen you for some time?”

Don’t worry, I’ve recovered a long time ago, thank you for your concern!”

Uncle Sun patted his leg and smiled at Murong Ziyan who was walking over.

The city Lord’s wife, who didn’t put on any airs and was very close to the residents, was well-loved by the residents.

If that guy dared to be disrespectful to Murong Ziyan, there was no need to call out. A large group of people would definitely jump out and beat him up. They might even want to kill him!

This kind of thing had happened once in the commercial district. Those foreign people who had no eyes were beaten up so badly that they almost died.

The uncle Sun in front of her had been accidentally injured in that “battle,” and one of his legs had been broken in two. Murong Zi Yan had even visited him a few times while he was recuperating.

that’s good, but you still need to rest. I’ll get someone to send you some tonics later.

Murong Zi Yan, who was dressed in a long white robe, smiled. After chatting with the ordinary resident of the city, Uncle Sun, she brought her guards and the others to the room where the foundation stone platform was located.

Checking the spoils of war and exchanging them for battle credits had to be done by trustworthy people to avoid any mistakes.

Tang Zhen and the others weren’t in loucheng, so this matter could only be left to Murong Ziyan.

Fortunately, for Murong Zi Yan, who was in charge of the Holy Dragon city’s logistics, she was already very familiar with this kind of thing. She just did it in passing.

After checking the list from the communication device and making sure that there were no problems, Murong Zi Yan operated the foundation stone platform and directly exchanged it for battle merits.

After half a day of hard work, Murong Zi Yan returned to her own office and began to deal with her daily work.

Now that the Holy Dragon City was in full swing in the water world, the transfer of logistics resources was naturally extremely frequent. Although there were people who used storage rings to transport them, supervising the distribution was still a very cumbersome work.

Tang Zhen had once asked Murong Ziyan to hand over her work to someone else, but she was still worried. She was afraid that due to some negligence, it would lead to an accident.

sister Ziyan, the batch of warblades, bows, and arrows that the castellan ordered have been completed. They can be sent to the water world at any time!

A young girl walked in and placed a document on her desk before continuing, "In addition, we've also completed a hundred of those giant rafts made of light wood. The rest will take some time to complete."

Murong Ziyang nodded. She picked up the document and glanced at it. Then, she said to her assistant, "then inform the transport Messenger to send this batch of supplies to the water world first. Currently, the number of remnant races recruited from the sea is about ten thousand. This batch of supplies should be enough for the time being!"

The female assistant nodded. Just as she was about to turn around and leave, she suddenly stopped in her tracks.

"By the way, sister Ziyang, I've asked someone to inquire about the situation of the human race by the sea, especially about Arel, but there was no result!"

However, I heard that heaven battling city has been expanding very quickly and is also recruiting a large number of human Wanderers. I wonder if Arel's tribe has been recruited?"

Murong Ziyang, who was buried in her work, immediately stopped working when she heard this. After thinking for a moment, she raised her head and said, "Go to the commercial district later and find the merchants in heaven battling city. Tell them to send a message to their own towers. Tell them that it's my order and ask them to help find Arel's whereabouts!"

The female assistant nodded, bowed and left.

Murong Ziyang pondered for a while, then lowered her head and continued to deal with the work at hand.

.....

In front of the huge cave where Holy Dragon City stored their resources, there were always special guards. Ordinary people were forbidden from approaching.

At this moment, on the path in front of the cave, ten Lord-level cultivators in black armor walked over slowly. Each of them had an extraordinary aura.

Seeing that someone had come, a Lord-tier cultivator in charge of guarding the door stopped him and said in a deep voice, "please show your identification and the list of supplies!"

Looking at the other party's serious expression, the two Lord cultivators shook their heads helplessly. They raised their communicators and scanned the equipment at the entrance of the cave.

identity verified. You may enter!

A synthesized electronic voice was heard, confirming the identity of the other party.

no problem. Hurry up and get in!

The Lord-tier cultivator in charge of guarding the cave waved his hand as if he was shooing away a fly. He looked impatient.

I say, Wang laoqi, what do you mean? are you pretending not to know this group of brothers? "

Among the ten cultivators, a well-built man stared at the cultivator in charge of guarding the cave and said angrily.

As soon as he said that, the Lord cultivator named Wang laoqi rolled his eyes and said in a strange tone, " don't say that. I, Wang laoqi, don't have the Fortune to know you guys!

After hearing these obviously sour words, the cultivators all laughed and said to Wang laoqi, " "I think you're just jealous. If you're not happy that we're the transportation officer, you can sign up again. Maybe you'll pass this time?

In that case, you won't have to look at the cave, and we won't have to see your ugly face every time we come!"

Wang laoqi's sore spot was obviously touched. He shouted at the Lord cultivator, " "Get lost! If it wasn't for the fact that my technological items didn't pass the test, I wouldn't have let a bastard like you be a transporter!"

After saying this, Wang laoqi looked at the storage bracelets of the ten feudal lord cultivators with envy and jealousy. His face was full of unwillingness.

Everyone laughed and no longer said anything. They walked into the cave together.

It did not take long for the Holy Dragon city's transport agents to walk out of the cave. They were armed to the teeth as they drove to the back of the valley, directly entering the portal.

Chapter 872 Transport, battle strategy (1)

The Holy Dragon city's transport agents were special combat personnel selected from all the cultivators in the city to assist the Holy Dragon city's military operations!

Their main task was to use large-capacity storage equipment to transport supplies to the Holy Dragon city's Army in the front line. They had a rather important responsibility.

There was no doubt about the importance of the transportation of supplies, so the Holy Dragon City also attached great importance to the selection of transportation operators. Only after passing various tests and passing the test would they be qualified to be equipped with storage equipment!

When they first heard that transportation agents were equipped with storage equipment, countless cultivators immediately rushed to sign up. During the test, none of them gave in and they all used their full strength.

After all, for cultivators in loucheng, storage equipment was very attractive, and storage cards could not compare to it!

Moreover, compared to ordinary cultivators in the city, these transport messengers were not only equipped with exclusive weapons, but their welfare benefits were also correspondingly higher. They were even equipped with special skill cards provided by the city Lord himself!

Those special cards were extremely powerful, and there weren't many of them. If one didn't have a certain amount of battle merits, they couldn't be exchanged.

However, once one became a transport envoy, they could be equipped with such a special card for free, which would increase their combat power rapidly.

It would be strange if the Holy Dragon City cultivators did not fight for the various benefits they would receive after becoming a transport envoy!

However, the Holy Dragon city's demand for transportation officers was extremely high. Not only did they have to have combat power that far exceeded that of ordinary cultivators, but they also had to master many special skills to cope with special situations.

Therefore, at the beginning of the selection, 90% of the cultivators from Lou Cheng were eliminated due to the competition of combat power. In the subsequent tests, more cultivators were eliminated one after another.

The ten Lord-ranked cultivators who were going to the water world were the first batch of transportation agents selected.

As for Wang laoqi who was guarding the cave, there was no doubt about his combat power. It was just that his ability to operate technological equipment was very poor, so he was filtered out during the selection.

As the Holy Dragon city's technological equipment gradually became more and more common, and even Warframes and weapons began to be equipped with technological equipment, if one could not operate these equipment proficiently, their combat power would definitely be greatly reduced!

He couldn't pass Wang laoqi's test, so he had no chance of getting the position of transportation officer.

Because of this matter, Wang laoqi had been holding a breath in his heart. Now that he saw that these brothers he was familiar with had become transportation agents, he naturally would not have a good expression!

At this moment, the ten transport messengers had already crossed the door of light. Then, they took a speedboat that could speed on the surface of the water and headed quickly toward the location of the sacred Dragon Legion.

The ten Overlord cultivators looked like they were only carrying weapons and equipment, but in fact, they had a terrifying amount of various materials in their storage bracelets. As long as they could successfully Rob one person and take out those materials, they would definitely become rich overnight!

Of course, compared to those resources, the most precious thing was the storage bracelets that these cultivators carried. In the current Savage war zone, it was definitely a treasure that was hard to find even with ten thousand gold!

In the vast sea, the floating metal Island of the Holy Dragon City was quietly anchored, looking like a Super Monster crouching on the sea.

The Holy Dragon city's floating metal Island didn't continue to advance. Instead, it stayed in the sea area where the Mastiff Dragon Tribe was. They gathered and organized all kinds of information they had just obtained to formulate their next battle plan. They also trained the newly recruited servant army.

At first glance, the Holy Dragon City seemed to want to use the lost clan at sea as cannon fodder to reduce the casualties and material consumption on their side.

However, if one were to analyze it carefully, the matter was not that simple.

It was true that using the servant army in battle could indeed reduce some unnecessary casualties. However, with the Holy Dragon city's current long-range attack ability, they would not give the enemy a chance to approach.

Moreover, compared to obtaining battle credits, the Holy Dragon City could afford the consumption of such weapons and ammunition in the short term.

However, the problem was that the water world's area was extremely large, and there were also many remnant races from the sea. Once they faced the Holy Dragon city's threat and joined forces to launch a counterattack, even the Holy Dragon City would not be able to withstand it.

Once such a situation occurred, Holy Dragon City would be in a very passive position.

According to the information he had just received, the Mastiff Dragon Tribe wasn't very strong, and the sea they were in was a remote area with pitifully few resources.

The tribes with rich sea areas had stronger combat power and were more difficult to deal with. They definitely couldn't be taken down as easily as the Mastiff Dragon Tribe!

Most importantly, it was impossible for Tang Zhen to put hundreds of thousands of Holy Dragon city's soldiers here. If that were to happen, the consumption of logistics and resources would reach an extremely terrifying amount. After a long time, Holy Dragon City would not be able to support it.

As for the use of weapons like nuclear bombs, Tang Zhen directly rejected it.

Firstly, this would destroy the items that could be exchanged for Battle Points. Secondly, if the number of nuclear bombs detonated exceeded a certain amount, it would cause an unknown change, which might make the advancement mission even more difficult to complete!

Therefore, Tang Zhen didn't have many choices. This was also something that gave him a headache.

When the other towers faced the level 8 overseas battlefields, they would use the means of nibbling away at them and complete the advancement mission bit by bit.

It was absolutely normal to spend decades for this.

Tang Zhen did not have much time to waste. Therefore, after careful consideration, he decided to use another method.

That was to recruit a large number of the sea's remnant races, provide them with weapons and food, and make them work for the Holy Dragon City.

At the same time, the Holy Dragon City would also act as a merchant, allowing the sea's lost race to use those special items to exchange for various resources. They would gradually train those vagrants on the sea to become Pirates.

When these Pirates possessed sufficient strength, they would take the initiative to attack those tribes and snatch the items that Tang Zhen needed without Tang Zhen's guidance!

As long as the entire Water World was in chaos, and all the tribes were dragged into it, then the Holy Dragon City would be able to fish in troubled waters. They would definitely receive unexpected results!

In order to carry out this plan, the cooperation of these remnant clans on the sea was necessary. Therefore, old Fisher and some other sea travelers entered Tang Zhen's sight.

These travelers on the sea were extremely hostile to the tribe. If they were given enough benefits, it would not be difficult to get them to cooperate.

If they were the ones to take action, with the Holy Dragon city's Secret support, the plan would undoubtedly progress even more smoothly!

Tang Zhen had already ordered people to do this. It was estimated that in a few days, old Yu and the rest would secretly set off to carry out the operation.

At this moment, a Holy Dragon City cultivator walked in and informed Tang Zhen that the transport envoy had arrived.

Tang Zhen stood up when he heard this. This was the first time the Holy Dragon city's transport Messenger was taking action. As the Lord of a city, he had to show his face no matter what.

When they arrived at the center of the floating island, the ten transport agents were already standing together and respectfully saluted Tang Zhen!

"Everyone, you've worked hard!"

Tang Zhen looked at the ten transport agents in front of him and greeted them with a smile.

Although the transportation mission this time was very easy, it didn't mean that it would be the same in the future. As the battlefield got further and further away from the main camp, especially when the existence of the transportation envoy was known by the enemy, they would definitely think of ways to ambush and kill him!

Therefore, the role of a transporter was considered a high-risk military branch, and ordinary cultivators were really not qualified for it!

After chatting with these transportation officers for a while, Tang Zhen retreated to the side and let the transportation officers release the supplies they had brought.

Soon after, under everyone's gaze, a small mountain of resources appeared out of thin air. Most of them were weapons and ammunition, as well as food and transportation.

Moreover, nearly half of the items here would be provided for the recruited travelers on the sea.

In particular, the huge wooden rafts made of light wood could carry a hundred people. It was the transportation tool that Tang Zhen had specially prepared for the servant army.

Usually, these huge rafts would be pulled forward by the metal floating island, and during battle, they would activate their powerful thrusters and instantly turn into a warship!

As for the light wood used to make the giant raft, it was a kind of tree that was a special product outside Holy Dragon City. The material was light but tough, and it had a pretty good buoyancy.

This kind of tree was originally from overseas. However, after the Holy Dragon City won the level 7 overseas battlefield, Tang Zhen directly moved a large area of the forest outside the city wall.

This kind of light wood was the main tree in the forest. It was tall and straight, and could be seen everywhere in the forest. There were as many as you wanted!

Chapter 873 The threat of the water world

The threat of the water world!

As the carrier activated his storage bracelet, it didn't take long for the metal floating island to be filled with all kinds of supplies.

The sharp blades produced by the assembly line, the half-body armor made of thin steel plates, and a large number of archers' crossbows were all tied up, shooting out cold glints under the sun.

Even if it was a weapon specially prepared for the servant army, the Holy Dragon City still could not cope with it. There was definitely no problem with the quality.

Looking at the small mountain of weapons, the Holy Dragon City soldiers showed no interest. Compared to these cold weapons, the equipment they had was many times better!

On the other hand, the recruited servant soldiers' eyes lit up. When they saw the supplies, they almost drooled.

give them the supplies, and then we'll head to the next tribe as soon as possible.

Tang Zhen looked at Tai Seng who was beside him as he spoke with an indifferent tone.

Tai Seng nodded his head, he also wanted to quickly settle the matters of these servant soldiers and then quickly set off on his journey.

When the next battle began, these servant soldiers would also participate in the battle. He believed that with these weapons and equipment, their combat effectiveness should be greatly improved!

Until they gained the Holy Dragon city's complete trust, the servant army could only use these cold weapons. As for weapons like guns and cannons, they would not be given any for the time being.

Even so, it was far better than the weapons used by the sea's lost race. After all, the resources in the water world were limited, and it was impossible to use metal to forge weapons on a large scale.

"All of you, come here and collect your weapons and equipment!"

A Holy Dragon City cultivator roared at the sea remnants who were accepting the recruitment. They quickly gathered and formed a long line on the deck, walking up one by one to receive their weapons.

In addition to the weapons and equipment, there was also a portion of food enough for their family to eat for a few days, which was filled with bags sewn with coarse cloth.

After seeing the food, the vestigial tribe at sea revealed a look of joy. The gloominess on their faces that had been shrouded by the war also dissipated at this moment.

Then, under the command of the leaders selected from the sea's lost clans, giant rafts made of cork were put into the sea one after another, becoming the rest and combat tools of the servant army in the future.

As for their families, they also approached without being stopped by the Holy Dragon City soldiers, driving the garbage ships to surround these giant rafts.

The food distributed by the Holy Dragon City was mainly to take care of the family members of these servant soldiers, so that they would not starve to death without a source of food.

Using such measures was also beneficial in increasing the acknowledgment of these servant troops, and even forming a reliance on them.

It was estimated that when Holy Dragon City set off, many garbage ships would choose to follow, because only by following the metal floating island could their safety be effectively guaranteed.

After all, the water world that looked calm on the surface was actually full of danger!

Under the sunlight, it didn't take long before the laughter of children could be heard from the raft, easing the originally oppressive atmosphere!

Tang Zhen's expression became much gentler when he saw this scene.

Tang Zhen wasn't too wary of these recruited remnant clans from the sea. Even if some of the Mastiff dragon clan members were unwilling, they couldn't cause much of a stir in the face of absolute strength.

What he was really worried about now was the potential danger hidden in this Water World.

According to the information he obtained from interrogating the powerful members of the Mastiff Dragon Tribe, Tang Zhen had a deeper understanding of the water world.

The water world was not as simple as it looked. It could become a level eight overseas battlefield not only because of its special terrain, but also because it was full of all kinds of dangers!

A large number of sea monsters swam in the water world and attacked the sea tribe from time to time. Only the tribes with guardians emitted a special intimidating aura and were spared from the sea monsters' attacks!

As for the vagrants who didn't have guardians to rely on, they were naturally much more miserable. They would be swallowed up by sea monsters from time to time.

These tribal guardians were all powerful existences from another world, and there were many more who were more powerful than the Black Dragon!

They were the main enemies of Holy Dragon city's advancement. If they wanted to complete the mission issued by the cornerstone platform, they had to get rid of them one by one!

It was also because of the existence of these guardians that the level 8 overseas battlefields were worthy of their name. As for the sea's remnant race, their danger level could only be ranked at the back.

In addition to the sea monsters, there were all kinds of dangerous areas in the water world. It was full of undercurrents and unknown dangers. If one accidentally entered it, it was definitely a deadly situation!

After learning of this information, Tang Zhen also shifted his attention to those guardians and tried to figure out their specific origins.

Tang Zhen also had some gains after sorting out the information he currently knew.

It turned out that the sea tribe didn't belong to this world. They had entered the world of loucheng by mistake countless years ago during a siege.

Due to the special 'immunity' ability of the world of towers, the defeated tower and the outsiders were all exiled to the ocean and imprisoned in a boundless sea.

The ancestors of the sea tribe were very powerful. The moment they entered the world of loucheng, they had already realized that something was wrong. Therefore, they used a secret technique to slow down the speed of their transformation into monsters and then quickly bred the next generation.

Because this batch of newly born sea vestigial creatures didn't carry the aura of the other world, they wouldn't be rejected by the power of the law. They could be considered the Aboriginals of the loucheng world.

But even so, they still couldn't leave this Water World, because there was no exit in this sea.

As a result, these newly born sea vestigial tribe began to live and multiply in this Water World. In the blink of an eye, it was unknown how many years had passed before they finally reached the scale they had today.

In order to fight against the sea monsters in the water world, these sea remnants who had inherited the knowledge of their ancestors began to use secret techniques to summon powerful creatures from the other world and make them the Guardians of the tribe!

The higher the concentration of the inherited bloodline, the more powerful the summoned Guardian would be. Because of the different concentration of the inherited bloodline, the strength of the Guardians of each tribe was different.

Of course, the existence that could be called a Guardian was at least at the king level. Otherwise, it would not be able to form a deterrent force!

In addition to the Guardians that they would not easily summon, there were some awakened ones in the large tribes who had inherited bloodlines and could summon creatures of lower strength to assist in battle.

Compared to ordinary tribal cultivators, these cultivators with summoned creatures were stronger. The abilities of these summoned creatures were still unknown, so they had to be careful!

Compared to those tribes, the Mastiff Dragon Tribe, which was located in the barren sea, was nothing. The only thing they could bring out were their sea beast Knights.

In the end, the moment the battle started, they were completely destroyed by the Holy Dragon City!

From this, it seemed that the location of the portal was not randomly chosen. It was deliberately placed around a weak tribe so that Lou Cheng, who was participating in the mission, could gradually adapt to the situation here.

Otherwise, if they were attacked by powerful tribes from the start, nine out of ten towers would probably be defeated!

It was not easy to upgrade a Tower City to level eight, so why would he deliberately kill it and let his previous investment go to waste?

After all, the overseas battlefield had a special meaning. It was only a training ground for Lou Cheng before he accepted the mission to invade the other world. How could he set up a death trap?

Chapter 874 The sea Spirit tribe

About a thousand li away from the Mastiff Dragon Tribe, there was a rich sea.

The waves here were as flat as a mirror, and the water was extremely clear. There were groups of fish and shrimp in the sea, and they could be seen shuttling back and forth from above.

There was a tribe nearby, and the scenery looked like a painting from a distance. Some docile large fish jumped out of the water from time to time, splashing waves.

Some naughty children were not afraid of these big fish at all, and even swam and chased them in the sea. Sometimes, they would even ride on the back of these big fish, constantly speeding on the surface of the sea, and their laughter rose and fell.

On the small floating island built with various garbage and debris, there were all kinds of strange plants and fragrant fresh fruits.

At the roots of these plants, there were some tender green grass and wildflowers. As far as the eye could see, the green was floating on the sea, giving people a sense of relaxation.

Unlike the Mastiff Dragon Tribe, which was built with garbage ships, this tribe had many roads on the sea, connecting the small houses on the sea to some!

As far as the eye could see, there were more than a thousand of these sea huts arranged in a neat and tidy manner, each one clean and beautiful.

The ships that were anchored around the houses were also made of all kinds of garbage, but they were undoubtedly stronger and more durable!

It was almost dusk. In the clear sea, all kinds of Colorful Luminous aquatic creatures slowly appeared and spread around the sea houses, decorating them like a fairy tale Fairyland.

“Hey, we’re back!”

&Nbsp; a shout rang out, and the tribesmen who were chatting in front of the small houses on the sea immediately saw a massive black shadow swimming over from the distance. On top of it sat a dozen bare-chested, muscular men.

“So the children who went out to trade have returned. I wonder what good things they will bring back this time?”

A white-haired old man said to his clansmen with a smile after taking a look.

I’m guessing they’ll bring back a lot of good things. After all, we’ve got a lot of treasures this time, many of which are worth a lot of money!

A man with tattoos all over his body said with certainty. There was even a hint of suspicion on his face.

This was because he had also participated in the acquisition of those treasures and felt honored.

you two should stop guessing. We have nothing to do anyway. Why don’t we go over and take a look? we can also find out what has happened recently.

Another Clansman beside him laughed and suggested.

The old man and the brawny man nodded, and the three of them walked along the two-meter-wide path on the sea.

At this moment, the huge black shadow had already approached the tribe and stopped in a small square made of debris. A dozen young men jumped off its back.

Under the command of a young man, the huge black shadow, which was actually a strange fish, opened its mouth, revealing the sealed package in its mouth.

The young men moved together and carried the package out. Then, the young man who commanded the big fish whistled, and the big fish, which was more than ten meters long, slowly submerged into the water and played with the glowing aquatic creatures.

At this moment, there were already many clansmen approaching. They surrounded the dozen or so young men and kept asking questions.

To the clan members who lived a boring life, only by learning about some new news and gossip could they make their boring life more fulfilling.

It was just that in this almost closed Water World, the speed of information transmission was very slow. If one wanted to get the latest news, they could only go to a nearby trade market.

The trading market was jointly established by several tribes and would regularly trade. At that time, not only would the surrounding tribes participate, but even the travelers on the sea would also rush there.

This was naturally the best time to gather information!

These youths from the sea Spirit tribe had just returned from the market.

When he heard his clansmen asking for the latest news, the leader of the group, a well-built young man, hesitated for a moment and revealed a difficult expression, as if he didn’t know how to start.

The white-haired old man frowned and said, “Did something big happen? don’t hide it, tell me everything!”

The rest of the clan members also looked at him in unison, their eyes filled with curiosity.

The strong young man shook his head and said, "it's nothing. I just heard that the Mastiff Dragon Tribe was destroyed!

When the white-haired old man heard this, his body trembled and he rebuked, " "This isn't a big deal, this is a big deal!

The Mastiff Dragon Tribe had tens of thousands of people. Although they weren't very strong, they couldn't be destroyed just because they wanted to. After all, their tribe had a protector!

To be able to destroy the Mastiff Dragon Tribe, the other party's strength can not be underestimated. Our tribe is not too far from the Mastiff Dragon Tribe. We might be targeted, so we must be careful!"

At this point, the old man sighed and asked the strong young man, " "By the way, did you find out what destroyed the Mastiff Dragon Tribe?"

In the white-haired elder's heart, he hoped that it was the sea monster that had destroyed the Mastiff Dragon Tribe. Which of them had such powerful guardians? perhaps they wouldn't follow in the Mastiff Dragon tribe's footsteps.

"It's said that it's a group of people who came out of nowhere. They have a huge metal floating island, many powerful weapons, and a large number of cultivators.

The Mastiff Dragon Tribe wasn't their match at all. It didn't take long for them to defeat them. I heard that even their protectors were killed!"

When the white-haired old man heard this, his body trembled and he asked, " you said those guys even killed the Guardians. Are you sure you heard correctly? "

I'm absolutely sure. I heard this from two sea beast riders who escaped from the Mastiff Dragon Tribe. They shouldn't be lying!

The white-haired old man nodded and pulled the strong young man out by the arm.

"Hey, uncle hai, why are you pulling me? I still have a lot of things to distribute!"

Although the well-built young man was quite strong, he did not dare to use brute force against the white-haired elder. After all, he was the previous patriarch and the Father of the current patriarch!

"Cut the crap. This matter is too important. You must inform the patriarch immediately and tell him everything you know. You can't miss anything, understand?"

The white-haired old man's expression was extremely serious at the moment. His brows were tightly knitted together as he spoke in a very serious tone.

Seeing this, the well-built young man also realized that this matter might not be simple, so he quickly nodded.

Under the illumination of the luminous aquatic creatures and the bright moon in the sky, the surrounding scenery was clearly visible. The two of them moved quickly along the sea path, and it didn't take long for them to arrive at a water house with an area of nearly 100 square meters.

At this moment, the room was emitting a faint light. Several men and women were gathered near a glowing bead, discussing something in a low voice.

The cultivator in charge of guarding the door saw someone rushing in and was about to reach out to stop them, but when he saw the white-haired old man in the lead, he immediately turned his head to the side.

He didn't dare to provoke this former clan leader who had abdicated his position in advance because of his lack of energy. After all, when he was young, he had been punished by this old man many times because of his mischievousness and trouble. It had left a psychological shadow.

The white-haired old man ignored the guard at the door and pulled the strong young man into the house. Then, under the puzzled eyes of the crowd, he slowly said, "the Mastiff Dragon Tribe has been destroyed. If I'm not wrong, our Sea Spirit tribe is in grave danger!

Everyone was stunned by his words!

Chapter 875 The worry of the sea Spirit tribe (1)

After hearing the white-haired old man's words, the men and women in the room were stunned and revealed looks of disbelief.

They also knew about the Mastiff Dragon Tribe, and how powerful they were. In fact, they had even communicated with each other before.

The Mastiff Dragon tribe's giant fruit tree was a sapling that they had bought from the sea Spirit tribe many years ago. It had grown to its current size after careful cultivation.

Therefore, when they heard that the Mastiff Dragon Tribe had been destroyed, they were all very surprised.

It must be known that destroying a tribe that had tens of thousands of people and a Guardian was definitely not an easy task. If they were not careful, they might even be killed by the Mastiff Dragon Tribe!

Compared to the sea Spirit tribe, which had many cultivators and special techniques, the Mastiff Dragon Tribe had the advantage in numbers. They were evenly matched.

However, such a tribe had been destroyed just like that. This proved that there must be a powerful enemy!

Therefore, regardless of whether the enemy was a sea monster or a cultivator, they were still a threat to the sea Spirit tribe, which was the closest to the Mastiff Dragon Tribe.

"Father, what exactly happened? sit down and explain clearly!"

The leader of the group, a tall and strong man, stood up and spoke to the white-haired old man with a serious expression. At the same time, he gave up his seat.

He was the patriarch of the sea Spirit tribe, and he was father and son to the white-haired elder. He had only taken over the position for a few years, but he had won the support of the sea Spirit tribe because of his calm and fair conduct.

He knew his father's style very well, and he knew that he wouldn't have such an expression if it weren't for the urgency of the matter.

Although the sea Spirit tribe leader was curious and nervous, he didn't show it, so as not to affect his people.

This was also the experience that the white-haired elder had specially taught him, and it had always been engraved in the Heart of the Sea Spirit clan leader.

"You brat, tell me everything you've heard. You can't hide anything!"

The white-haired old man nodded and turned to the strong youth. He sat on a chair at the side and thought about something without saying a word.

"Tell me, what happened?"

what's going on?" the sea Spirit clan leader turned around and asked the strong youth with a trace of dignity.

Seeing that everyone was looking at him, the strong young man quickly told them what he had heard in the ocean market. At the same time, he also said that the two sea beast riders were still in the ocean market because they had nowhere to go.

If it was necessary, he could go and bring it back now.

After listening to the strong youth's story, the sea Spirit clan leader and the others all looked solemn and exchanged glances.

Through the destruction of the Mastiff Dragon Tribe, they had indeed sensed the approaching danger.

The destruction of the Mastiff Dragon Tribe was a wake-up call for the people of the sea Spirit tribe!

If the mysterious force that destroyed the Mastiff Dragon Tribe turned their sights on the sea Spirit tribe and launched an attack, the sea Spirit tribe would suffer great losses regardless of the outcome of the battle!

How could the sea Spirit tribe, which already had a small population, allow such a thing to happen?

In order to ensure the safety of their tribe, they had to make early preparations.

"Bring some people to the ocean market and bring back the two sea beast riders. Remember to try not to attract attention, understand?"

The sea Spirit clan leader ordered the strong youth, his expression becoming more and more serious.

The well-built young man nodded and immediately left the room, heading towards the small square where he had been.

what do you think about this?" the sea Spirit clan leader looked at the crowd. tell me.

I think we don't have to worry too much. Things aren't clear yet. Maybe the mysterious force will retreat after destroying the Mastiff Dragon Tribe!

A middle-aged man from the sea Spirit tribe laughed drily and made a guess that even he himself could not believe.

If what the sea beast Rider said is true, the Mastiff Dragon Tribe isn't the only target. I think it's very likely that they're targeting our tribe!

A woman with wheat-colored skin and wearing a short shirt shook her head. She also had a worried look on her face.

That's what I'm afraid of. Do you still remember the story the elders told you?"

A man with a tattoo on his face said. Seeing that everyone was staring at him, he continued, "It is said that more than two hundred years ago, a group of mysterious forces of unknown origins appeared in the water world. As soon as they appeared, they destroyed a tribe on the sea!

It's said that this mysterious force is extremely powerful and has many elite cultivators. They even destroyed thirteen tribes of various sizes in succession and were unstoppable!"

The man who spoke revealed a reminiscing expression and said in a deep voice, "After that, the three main tribes saw that the situation was not good, so they led the hundreds of thousands of tribal elites and ambushed the mysterious force near the blood sea.

That battle was earth-shattering, and blood flowed like a river. But in the end, the Allied forces of the sea tribes won a Pyrrhic victory!

During this period, the mysterious force that had been ambushed fought back with all its might. The more than 20 tribal guardians that had been summoned were either dead or injured, which showed how strong the other party was!

If they had not been annihilated in one fell swoop back then, perhaps half of the tribes in the water world would have been annihilated by the other party's attack!

Of course, our Sea Spirit tribe was also included in this. After the investigation, it was confirmed that our tribe was also one of the targets of that mysterious force!"

The sea Spirit clan leader was slightly taken aback when he heard the man mention this. When he looked at his father, he found that he was also nodding slightly.

"Father, do you also think so?"

What's going on?" clan leader Hai Ling's heart trembled as he asked the white-haired elder.

I also hope not, but the other party's behavior makes me think so!

The white-haired old man couldn't help but sigh, looking worried.

Everyone fell silent upon hearing this. They knew very well that if the mysterious force had returned, the sea Spirit tribe alone would not be able to stop it!

The sea Spirit clan leader thought for a while and said to the crowd, " "Since that's the case, we must respond positively and minimize our losses.

His first choice was to obtain more detailed information through the two sea beast riders of the Mastiff Dragon Tribe to determine the other party's specific strength and purpose.

If the other party is really that mysterious force, we definitely can't deal with them alone. We must contact the surrounding tribes to resist them together. Only then can we win.

Because other than us, the other tribes must also be the target of that mysterious force, and it could even be said that not a single one of them escaped!

However, we need to be prepared to avoid the brunt of the attack. In a situation where we can't fight them head-on, we need to move the tribesmen to a safe place!"

At this point, the sea Spirit clan leader began to pace slowly. As he walked, he said, " if possible, we should try to contact this mysterious force and see what they want and if there is a way to reconcile!

The sea Spirit clan's leader laughed wryly and said with a hint of unwillingness, " our Sea Spirit tribe has been operating for countless years before we have what we have today. If we are destroyed because of this, how can I face my tribesmen? "

When the other clansmen heard this, their faces were also gloomy, but they didn't say anything.

After all, their current life could still be considered passable, so who could easily give it up!

Next, they only needed to wait for the two sea beast riders to arrive and figure out the truth of the matter before they could make further plans!

Chapter 876 discussion (1)

Time passed by unknowingly. When the Holy Dragon city's Army of nearly ten thousand servants had completed their training, five days had already passed.

Fortunately, time was not wasted. After the training of the Holy Dragon city's instructors, the mental state of these sea remnants had clearly improved.

Now, with the standard weapons and equipment, he already had a decent combat power. If he trained for a longer time, the effect would probably be even more obvious!

However, Tang Zhen clearly did not want to waste time on this matter. This was because the meaning of the servant Army's existence was not to fight. Otherwise, what would the Holy Dragon city's elite soldiers be for?

Therefore, after checking the drill of the sea's remnant race, he waved his hand and the Army immediately set off!

However, when they set off again this time, there were rows of huge wooden rafts pulled by ropes behind the metal floating island, which were full of members of the servant army.

further away from these rafts, there were many garbage ships, forming a long dragon that stretched out for a long distance.

Together, they looked like a strange fleet of ships, moving in the ocean of the water world!

At this moment, on the metal floating island, Tang Zhen and the others were sitting around a table and discussing the next step of the battle plan.

The map drawn after gathering information was hung on the wall of the room. The Mastiff Dragon Tribe was marked with a red circle, indicating that it had been exterminated.

In the sea far away from the Mastiff Dragon Tribe, most of the area was blank, with only a few places marked with words and pictures.

The tribe closest to the Mastiff Dragon Tribe was the sea Spirit tribe!

At this time, among the people participating in the discussion, in addition to the commanders of the Holy Dragon City, there were two indigenous people of the water world.

One of them was old Yu. Now that he had gotten his revenge, he was full of energy and was doing his best to complete the tasks assigned to him.

The reason why he had such a reaction was actually within reason.

Putting aside the fact that the Holy Dragon City had helped him realize his dream of revenge, the vagrants on the sea and the remnant races on the sea were naturally at odds with each other, like fire and water.

Due to their different physical appearances, the travelers on the sea were not accepted by the native tribes of the sea whose ancestors came from another world. It was also a common thing for them to be killed by the tribe.

At the same time, because they didn't have the summoning bloodline of the sea's lost race, the travelers on the sea couldn't summon guardians and build a tribe that could accommodate them. They could only rely on garbage ships to drift around in the water world.

As a result, the experiences of the travelers on the sea were quite miserable, and they struggled to survive for their entire lives.

Now that the Holy Dragon City had appeared, these travelers on the sea saw a glimmer of hope for a comeback. Naturally, they had to firmly grasp it!

Tang Zhen more or less had some sense of identity with these vagrants on the sea whose ancestors should have been the Aboriginals of the Lou Cheng world. While using them, it could also be considered as indirectly helping them.

If it was possible, Tang Zhen did not mind giving these vagrants a big gift after obtaining victory in the grade 8 overseas battlefield!

The reason why he had such a plan was because of the rewards for Level 7,8, and 9 loucheng. To put it bluntly, it was in seven words.

They were giving away land, people, and resources!

To put it simply, after Lou Cheng was promoted to level six, he would have the qualification to participate in the mission of invading the foreign world in the future. After completing the level Seven mission, he would get a piece of rich land for Lou Cheng's development!

After completing the level eight mission, Lou Cheng could use his Battle Points to exchange for the natives in the overseas battlefield. This would allow them to get rid of their shackles and become Lou Cheng's affiliated residents. They could also be considered as the cornerstone platform's soldiers to supplement Lou Cheng!

Therefore, the more spoils of war he collected, the more overseas Aborigines he could exchange for in the future. If he could really exchange for a large number of talents, it would be extremely beneficial to the development of Lou city.

As for the level nine mission, it was to deliver resources and equipment. This could be put aside for the time being!

Therefore, if these servant soldiers performed well, Tang Zhen did not mind giving them a chance to completely turn things around. It all depended on how they grasped it!

As for the other person, he was a pure remnant of the sea!

He was the brawny man in charge of managing the treasure-spraying beast in the Mastiff Dragon Tribe. When they were collecting the spoils of war in Holy Dragon City, he was the one who had jumped out to comfort the stubborn Mastiff Dragon Tribe members, which had prevented more casualties.

It was also at that moment that Tang Zhen realized that this brawny man had a great influence in the Mastiff Dragon Tribe. This was because almost all the members of the Mastiff Dragon Tribe would listen to his commands!

This was not a good thing, because the greater his influence, the more Holy Dragon City would fear him.

The best way to deal with such a dangerous person was to kill him directly to prevent him from instigating the Mastiff dragon clan to cause trouble.

However, this brawny man was rather straightforward. After appeasing the Mastiff Dragon tribesmen, he actually took the initiative to request to join the servant army. He wanted to use the secret information he had to help the Holy Dragon City Deal with the other remnant tribe tribes on the sea.

His only request was for the Holy Dragon City to keep their promise and not raise their butcher's knife against his clansmen after clearing up the spoils of war!

As for whether the brawny man had any other purpose, it was still unclear.

In truth, Tang Zhen originally did not have the intention to start a massacre. Now that he could gather a hidden danger and obtain the information he wanted, he naturally nodded his head and agreed.

Therefore, when they were formulating the battle plan, the brawny man named nu Tao was directly called over.

At this time, nu Tao was wearing a sea blue camouflage suit and speaking to everyone with fervor and assurance.

“The sea Spirit tribe doesn’t have many tribesmen, no more than five thousand, but we can’t underestimate them just because of this!

As far as I know, the sea Spirit tribe has a very high proportion of cultivators, almost one-fifth of them. This is extremely rare among all the tribes in the water world!

Moreover, because of the high degree of awakening of the innate bloodline, this tribe also had quite a number of Summoners. With the help of the aquatic creatures they summoned from the other world, they could easily bring up the treasures near the underwater fountain.

By selling these treasures, the sea Spirit tribe is one of the richest tribes in the world. At the same time, they must have discovered some powerful weapons from the bottom of the sea. We must be careful!”

When nu Tao said this, he looked at the surrounding Holy Dragon City cultivators, especially Tang Zhen who was meditating. He continued, “Compared to the other tribes, the sea Spirit tribe has a very good reputation among the travelers on the sea. They have never bullied the travelers on the sea.

if we were to start a war with them, the sea Spirit tribe would probably recruit a large number of travelers on the sea to fight against our attack.

Moreover, because they were not weak, other tribes did not dare to provoke them easily, only maintaining long-term trading relations with them.

If the sea Spirit tribe works together with the other tribes that we’re on good terms with to resist us, the battle will be even more disadvantageous for us!”

After nu Tao finished speaking, he sat down in his chair. His expression was as calm as water, and it was impossible to see what he was thinking.

Tang Zhen swept his eyes over everyone in the surroundings and said indifferently, “From what nu Tao told me, we really do need to pay attention to the sea Spirit tribe.

Although they didn’t like to fight with others, they might not be willing to compromise when it involved their own interests.

After all, what we need is their tribe’s Guardian and almost all of their property!

Under such circumstances, the possibility of a battle erupting is extremely high, so we must remain vigilant!”

After Tang Zhen said this, he looked at everyone and said, “This is my opinion. What do you think?”

Everyone was frowning and deep in thought. At this moment, old Yu suddenly opened his mouth and said to Tang Zhen, “City Lord, I actually have an idea, but I wonder if it’ll work?”

“It doesn’t matter, tell me!”

Tang Zhen looked at the somewhat apprehensive old Yu as he spoke with an encouraging tone.

Chapter 877 creating another strange path

After hearing Tang Zhen’s words, old Yu no longer had any concerns and spoke his thoughts.

“First of all, I would like to ask the city Lord one question. That is, why are we attacking these tribes on the sea?”

This question was not easy to answer. After all, it was related to the secret of Lou Cheng’s promotion. It was best not to let these overseas Aboriginals know!

Therefore, Tang Zhen raised his brows and said indifferently, “You don’t need to know what I’m doing. You just need to know that I’m not here to kill. If possible, I won’t even kill a single person!

I had no choice but to fight in the Mastiff Dragon Tribe. Didn’t you see that I didn’t hurt the remaining members of the Mastiff Dragon Tribe after I achieved my goal?

However, the things I want are regarded as treasures by you, and you will not let me get them easily.

“At the same time, the protectors of the tribes are also targets that I must kill. There is no room for discussion!

That’s why a battle is inevitable!”

Old Yu nodded his head when he heard this. He said to Tang Zhen, “Then, can we use other methods, such as using similar or better items, to exchange for the treasures of those tribes?”

Tang Zhen’s brows were slightly raised when he heard this. The corner of his mouth revealed a trace of a smile.

“Although I don’t know where you’re from, but from what I know, the things we see as treasures are almost endless for you!

This is our advantage, and we can use it to trade with those tribes.

Even if the exchange rate was higher, it was still much lower than the cost of war!

“At the same time, we can also provide cultivation resources to the tribes on the sea, as well as sufficient compensation. In this way, those tribes will be willing to hand over their protectors.

After receiving the resources we provided, they wanted to increase the strength of their cultivators and summon New Guardians. It was not impossible.

In that case, your purpose will naturally be achieved!”

Tang Zhen’s eyes brightened when he heard this.

Old Yu’s idea was very interesting. If it really worked, then the Holy Dragon City would not need to make a big fuss and could complete the level 8 city upgrade mission.

However, there was a lack of trust between the Holy Dragon City and the tribes on the sea. The treasure was the most important thing to them, so the other party would definitely not be at ease to make an exchange with the Holy Dragon City.

As for the significance of The Guardian, it was even more important. It was the safety guarantee for the tribe to exist in the water world. It was even more impossible to use it to trade for cultivation resources!

Therefore, based on the current situation, this method would not work!

But even if it didn't work for now, it didn't mean it wouldn't work in the future!

As long as the Holy Dragon City used strong methods to beat these maritime remnant races into submission and fear, they would know that they were absolutely no match for the Holy Dragon City. Then, when they were faced with the Holy Dragon city's demand for a forced exchange, they could only pinch their nose and obediently do it!

At the very least, compared to the extermination of the clan, although they would lose their guardians in the process of the exchange, they would still be able to protect the clan. Even if there were losses, they would still be within an acceptable range!

It was such a simple choice, and the sea's remnant race would definitely know what to choose.

At that time, Tang Zhen would not be polite if there were still any fellows who stubbornly resisted to the end. He would directly destroy them!

Of course, there was still a lot of work to be done in order to carry out this plan. However, compared to before, his train of thought had become much clearer.

Tang Zhen couldn't help but burst into laughter after he thought through this point.

"Good, good, good. Old fish, you're not bad!"

Tang Zhen had a smile on his face as he praised old Yu. Due to the complicated situation in the water world, the worries that had gradually accumulated in his heart were swept away.

Tang Zhen, who was originally worried that the rank-8 overseas battlefield would delay the Holy Dragon City, suddenly felt as if the dark clouds had been parted to see the sunrise. His entire body felt extremely relaxed.

After sweeping his gaze over everyone, Tang Zhen said in a clear voice, "Old Yu's idea is good and highly feasible, but it won't be easy to do.

At the very least, before that, we have to beat those tribes on the sea until they're scared. Only then can this plan be carried out smoothly!"

A cold glint appeared in Tang Zhen's eyes when he said this. He coldly said, "It seems that the original plan needs to be changed. We have to use the next battle to let the enemy know our true strength!

This battle is extremely crucial, we must ensure a beautiful victory!"

"I order!"

At this point, Tang Zhen suddenly stood up. The other cultivators of the Holy Dragon City also stood up.

"The Army will temporarily stop advancing and rest. Keep a close watch on the surrounding tribes in case they take the opportunity to attack.

While we continue to recruit servants, we must also send people to spread our trading method as much as possible. The wider the better!

At the same time, I'll return to Holy Dragon City to prepare for the reinforcements. I'll try to cripple the enemy in the next battle!"

.....

In the valley behind the Holy Dragon City, Tang Zhen's figure suddenly appeared before quickly disappearing.

After a few teleportations, when he reappeared, he had already arrived at the Holy Dragon city's monster training base.

The current domestication base had been expanded again. In addition to the original indigenous people, many researchers from the original world had also been added to the staff.

In the specially modified cave, many experimental equipment from the original world had been installed and put into use, making the cave full of a technological atmosphere.

These workers had been researching and taming all kinds of monsters, and they had achieved good results so far. They had even created some new monsters that could be controlled through high-tech means.

These were the capital that Holy Dragon City had accumulated. Once they were thrown into the battlefield, they would definitely become the enemy's nightmare!

At this time, in an open space in the domestication base, a huge black Dragon was tied up by the neck with rune chains, and was lying on the ground weakly, sleeping.

Even when the Holy Dragon city's researchers extracted its blood, the Black Dragon did not react at all.

After splitting its soul power in half, the Black Dragon, which was no longer restricted by the rules of the tower world, was driven directly to the Holy Dragon City and then imprisoned by special means.

With its current strength, there was no way it could escape.

In fact, in order to save its life, the Black Dragon had no choice but to use a secret technique that had a great backlash. Now, it had become extremely weak and quickly fell into a deep sleep after being imprisoned. Who knew when it would wake up?

Who knew why this guy was so bold? wasn't he afraid that he would be killed in one strike?

However, this way, it would be much more convenient for the Holy Dragon city's researchers to collect the flesh.

After looking around and making sure that the Black Dragon was not up to any tricks, Tang Zhen left and returned to his original world.

Chapter 878 Borrowing troops, abnormal teleportation _Tang Zhen's return to his original world this time was to borrow troops!

According to his plan, he would need to invest at least 200000 combatants to form an overwhelming advantage in this battle with the vestigial tribe at sea.

However, in this case, transportation and fire suppression would become a big problem. Just relying on the floating metal Island would no longer be able to meet Tang Zhen's requirements.

Therefore, the warship that was listed as a backup choice due to operational problems had become Tang Zhen's best choice.

However, to their partners in the original world, the importance of warships was beyond doubt. No matter how close the cooperation between the two sides was, they could not easily hand over a large number of warships to Tang Zhen.

Of course, if they could transfer a few small warships to support them, it would not be a problem!

However, this kind of warship was not suitable for combat in the water world because the cannonballs and missiles could not fly far there. Therefore, even if these warships were handed over to Tang Zhen, they must be modified.

If this was the case, it would be even more troublesome. It was better for Tang Zhen to think of a way to get a warship himself. After that, his partner would send professional naval personnel to operate it!

Of course, if they were willing to give it to him, Tang Zhen would not reject it.

This was an employment-type transaction. Tang Zhen must also pay a certain price for this.

Tang Zhen didn't care about the money. Moreover, his business partners wouldn't ask for money. At most, they would fight for more favorable conditions for themselves in terms of cooperation!

After all, the expansion of their business partners in the loucheng world could not be done without an important figure like Tang Zhen. They would not be too excessive.

Perhaps increasing the number of teleportation personnel was the condition they were going to propose!

The discussion process didn't waste too much time. After Zhen Tang communicated with director Tang, Smith, and several others through the holographic communication device, they quickly received a reply.

This time, the five major cooperation partners would jointly send professional naval personnel in charge of operating the warship to assist the Holy Dragon City in battle.

In addition to these Navy soldiers, the partner would also give away a batch of small warships for free and help complete the modification to adapt to the special circumstances of the water world.

As for the modified weapons and ammunition, they were also free of charge. The service was absolutely on point!

There was no such thing as a free lunch in this world. After Tang Zhen's request was satisfied, the next thing to do was to discuss the price he had to pay.

The matter was indeed as Tang Zhen had expected. The only request of the business partner was to open up another 100000 combat personnel quota and be responsible for transporting the logistics supplies on a regular basis.

Although Tang Zhen had already guessed the other party's request, he still revealed a difficult expression.

Currently, the number of combatants from the original world who were permanently stationed in the world of Loucheng had exceeded 500,000. It had long reached the agreed limit.

Therefore, Tang Zhen no longer allowed his partners to increase the number of troops to prevent unnecessary hidden dangers and burdens.

At least, before the Holy Dragon City was upgraded to a national-level city, Tang Zhen would not allow the number of soldiers in his original world to exceed one million. This was not because he was afraid of being schemed against, but because the pressure on the logistics was too great.

With so many troops, the amount of resources consumed would be extremely terrifying. Before the material transmission experiment was successful, Tang Zhen could only be in charge of transporting between the two worlds.

As the Holy Dragon city's city Lord, there were many things that Tang Zhen needed to deal with. He simply didn't have much free time to transport supplies for the Army. If that was the case, would he be able to do anything?

As such, he had never given in to the idea of increasing the number of troops, and his partners had no choice.

However, because the dog-headed people's city had been completely occupied, the division of land had also been completed. Next, the partner would carry out further actions.

However, in this case, there would be a huge shortage of combat and logistics personnel.

Although this problem was slightly alleviated by the use of the soul teleportation cabin, there were too many restrictions on this temporary teleportation, and it was far less convenient than directly teleporting.

Furthermore, the interplanar soul teleportation portal's coverage was limited. If they were too far away from Holy Dragon City, even the soul teleportation cabin could not be used normally!

Hence, the final solution was to send more troops.

Taking advantage of Tang Zhen's opportunity to borrow troops, the partner took the opportunity to put forward this condition. Because he was afraid that Tang Zhen would refuse, the conditions were also very favorable.

As a result, Tang Zhen could no longer refuse and agreed to the other party's request for more troops. However, the materials and expenses required to create the host body would have to be provided by the partner.

After all, this was not a small expense. Tang Zhen was not willing to do a losing business!

With regards to Tang Zhen's request, the business partner simply had no reason to refuse. Therefore, he very happily agreed.

However, these more than 100000 host bodies were not easy to take out. They had to be manufactured and cultivated step by step.

Fortunately, the host body manufacturing base built by Holy Dragon City and their original World Partners had never stopped operating since its completion. It was barely possible to provide half of the host bodies for the time being.

After the cooperation was reached, both sides got busy.

After the meeting was over, the people in charge of the five business partners began to prepare the small warship to be handed over to Tang Zhen. They quickly mobilized the construction personnel and modified it according to the requirements.

At the same time, a group of experienced naval combatants were also recruited for training, and the newly deployed soldiers were teleported into the tower world!

After Tang Zhen had arranged the main tasks, he returned to Holy Dragon City and entered his secret cultivation room.

.....

Although the partner provided a batch of ships for Tang Zhen's use, it still did not meet Tang Zhen's expected standards.

Although those small warships had good mobility, they were limited in number. When facing large sea monsters, they would no longer have the advantage in size.

Therefore, getting a batch of large warships had become something that Tang Zhen had to do!

The wasteland that he had discovered must have a large number of abandoned warships. After some repairs, they should be able to meet Tang Zhen's needs.

Therefore, he had to go to the wasteland world again!

Tang Zhen shifted his gaze to the mysterious star on the interface of his phone and selected the single person teleportation function.

Soon, a teleportation gate appeared, and Tang Zhen stepped into it.

However, the moment he entered the teleportation gate, Tang Zhen's brows suddenly furrowed. This was because he realized that something was wrong.

It was as if a repulsive force was pushing him out, preventing him from being transported to the wasteland world.

At the same time, the destination was no longer in front of the teleportation gate. Instead, a huge ring appeared out of thin air. Countless tentacles extended from it, and they were constantly spinning and twisting in the dark void.

Upon closer inspection, one would discover that this indescribable huge ring seemed to contain countless three-dimensional images, like scenes from a movie, but it felt extremely real!

Just as Tang Zhen's gaze landed on it, that repulsive force appeared once again, as though it wanted to push him far away.

"What's going on?"

Tang Zhen's heart shook. He began to retreat without the slightest hesitation and prepared to leave the teleportation gate.

However, at this moment, the mysterious star in Tang Zhen's phone began to flash continuously as if it would collapse at any moment.

At the same time, an even more powerful teleportation power appeared from the teleportation gate. It wrapped around his body and pushed him into the ring.

Tang Zhen was actually unable to resist against this kind of power. He crashed into the strange-looking huge ring!

Chapter 879 Time of chaos _This was the first time Tang Zhen had clearly seen the entire transfer process. That kind of shock was simply indescribable.

In truth, with Tang Zhen's current cultivation, he was barely able to see this scene. This was because as his strength increased, he had already broken away from the level of an ordinary life form. He was able to come into contact with some existences that he could not imagine in the past.

As for ordinary living beings, they would never be able to see this scene in their entire lives!

At this moment, Tang Zhen, who had been forcefully teleported, appeared to have his entire body being compressed and stretched endlessly. He turned into a small and long worm before plunging into the circular ring.

At this moment, Tang Zhen only had a single feeling. He felt that he had fallen into the bottom of a sticky deep pool!

You could only look at the strange scene in front of you, but you couldn't do anything else. You could only follow the flow and let it take you to an unknown place.

His vision blurred. When everything finally returned to normal, Tang Zhen discovered that he was in a city that was filled with a modern atmosphere!

Looking at the flow of people in front of him, the bustling and lively scene was completely different from the wasteland world he had known before?

What was going on? could it be that there were still pure lands in the wasteland world that had not been affected by the war?

A trace of doubt rose in Tang Zhen's heart. He immediately activated the [all-purpose electronic kit] and started to connect to the surrounding network in order to collect the information he wanted.

Groups of data that only he could see were flashing rapidly and finally stopped after a few seconds.

Tang Zhen frowned as he looked at the data that had been sorted out.

According to the information he had gathered, the world he was in was indeed a wasteland world, but it had not been destroyed yet!

In other words, he had arrived at a time before the world was destroyed. The zombies and parasite beasts that were everywhere might not have started wreaking havoc at this moment, but only existed in the laboratory!

Tang Zhen had never expected that he would encounter such a situation even after countless calculations. He immediately felt at a loss.

He glanced at the crowd around him and saw that they were all looking at him with strange eyes. Some of them even took the initiative to take a photo with him.

After all, Tang Zhen was currently wearing a purple-gold battle armor and looked abnormally mighty. This caused everyone to think that he was a street artist. They kept sizing him up as they passed by.

Tang Zhen shook his head when he saw this. He changed his clothes while no one was paying attention and directly walked into a coffee shop a short distance away.

After finding a table and sitting down, Tang Zhen began to analyze the abnormal situation he had encountered today.

First, he switched to the interface of his mobile phone and confirmed that the mysterious star could still start the return transmission, which meant that he could return to the world of Loucheng at any time as long as he had enough origin stones.

Tang Zhen could more or less guess why he had appeared at a time that was so far away from the last teleportation. However, he was not certain.

The Dream City Master's Note had mentioned that there was a special world that existed among the countless other worlds. Because the laws were not complete, it would always repeat the same thing.

In other words, the natives of this world might have experienced countless lives and deaths, but they didn't know about it!

This cycle was not long, at most a few hundred years!

As for how this special world was formed, the Dream City Master had no idea.

However, he once mentioned that in order to perfect such an incomplete world, special mental power was needed.

In this case, the special world would intercept a part of the projection of the cycle and spread it to other foreign worlds, presenting it in various forms.

When the natives of other worlds saw the contents of the projection, the spiritual energy that spread out would also be absorbed. At the same time, it would affect the special world that was far away, making the special world more perfect.

One day, this abnormal world would become perfect, from the original endless cycle to a normal world with a beginning and an end!

The wasteland world that he was in might be a special circular world, which was why Caishi waited for him to appear at a time that was completely different from the last time.

If that was the case, as long as Tang Zhen grasped the law of its operation, he could enter any time period to practice driving!

However, this special world was extremely unstable. Once it was destroyed, it would mutate and in serious cases, it might even cause the world to collapse!

Tang Zhen had a faint guess. Perhaps it was because he had taken away some of the world's origin the last time, causing this world to undergo an abnormal change. At the same time, it was rejecting his entry!

However, this was even better. At the very least, he didn't have to pick up scraps anymore. He only needed to bring the warship back in one piece!

When he thought of this, Tang Zhen was prepared to check out the Naval bases in this world and see where it was convenient to make a move.

In any case, it wouldn't take long for this world to be destroyed, and those warships would be abandoned in the ocean, slowly turning into a pile of scrap metal!

However, just as Tang Zhen was about to take action, he suddenly caught sight of a piece of news on the television and immediately stopped.

It turned out that the content of the news was the main culprit that would cause the destruction of the world in the future-the umbrella Corporation!

Tang Zhen looked at it for a while before giving an order to the [all-purpose electronic kit].

collect all the information about umbrella and determine the exact time of the movie plot!

It didn't take long for the results of the analysis to pop up in front of his eyes. At the same time, it also showed the exact date.

After Tang Zhen saw this, he slowly sat back down and revealed a trace of deep thought on his face.

.....

The autumn wind was blowing, and the fallen leaves were everywhere. It was almost evening.

Tang Zhen's figure slowly appeared outside a huge mansion in Raccoon City.

He looked at the pitch-black building in front of him with a blank expression. There was a faint look of anticipation in his eyes, as if he was waiting for something.

It didn't take long for the building to light up. Then, a woman in a red dress and long boots appeared, looking at something with a confused face.

Because of the cold weather and the tension of the surrounding environment, the woman could not help but cross her arms.

The corner of Tang Zhen's mouth revealed a trace of a smile when he saw this from a hidden spot. He was just about to move forward when he suddenly felt an enormous repulsive force attack him once again.

If Tang Zhen did not resist, he would be directly sent out of this world by this force!

Tang Zhen clearly did not expect such a situation to occur. Therefore, he could only erupt with his strength to resist this force that was trying to expel it.

The pressure of a two-star King tier was extremely powerful. As soon as his power erupted, it brought with it a gust of wind. At the same time, it startled all the birds in the forest, causing them to fly into the air.

The power of law that was originally expelling Tang Zhen suddenly disappeared as if it had never appeared.

Right at this time, the woman in red was dragged into the house by a man. At the same time, a helicopter appeared out of nowhere and sped towards the villa.

Some armed Men in Black combat suits also used ropes to kick open the villa's window from the company and threw in a stun grenade!

After that, there was a fight. The woman in red and the man in the suit were both captured by the armed men and then escorted to the underground space below the villa.

After the invisible Tang Zhen saw this scene, he could already confirm that the film he had seen earlier was a fragment of this world's endless cycle!

After confirming this, Tang Zhen slowly walked into the electric train in the basement and found a place to sit down.

He wanted to see if there would be any unknown changes if he were to change the loop of this world projection.

Chapter 880 A mysterious visitor (1)

At this time, the group of armed men had already entered the train with the female protagonist and quickly entered it.

It was also at this moment that Tang Zhen, who was sitting as steady as a mountain, appeared before their eyes.

The armed men's expressions changed when they saw a stranger appear at this rather important base. They raised their guns at the same time.

"Who are you?"

"Cover your head and lie down. Do it quickly, or I'll shoot!"

A few low growls were transmitted over. The nerves of these armed personnel tensed up. Their gazes contained a trace of bewilderment when they looked at Tang Zhen.

None of them had expected that an unfamiliar man would appear in the underground train.

The corner of Tang Zhen's mouth revealed a trace of a cold smile when he saw the scene before him. He said indifferently, I advise you to pretend I don't exist and don't try to attack me. Otherwise, you'll bear the consequences!

After hearing Tang Zhen's words, everyone was first stunned. Then, an armed man directly came forward and tried to control Tang Zhen.

However, at this moment, he felt that his entire body was confined by an invisible force. There was no need to talk about getting close to Tang Zhen. He was unable to even move a finger.

"Damn it, what's going on?"

When the others saw their companion's frozen action, they immediately realized that something was wrong. They roared and pointed at Tang Zhen, as if they could fire at any moment.

Tang Zhen's eyes turned cold as he swept his gaze over those armed men. There seemed to be an endless killing intent in his eyes, causing them to feel as though they had fallen into an ice cave.

The invisible force had also confined their bodies at this moment. It was as if they were trapped in solidified concrete, and even breathing became extremely difficult!

This strange scene caused the woman in red and the man in the suit, who were not restrained by the side, to turn pale with fright. They looked at Tang Zhen as if they were looking at a demon!

I said don't provoke me, or I don't mind killing you directly!

Tang Zhen coldly snorted. He retracted the mental energy that was imprisoning these armed men and had an indifferent expression on his face.

The armed men, who had finally regained their freedom, had a look of fear on their faces. After what they had just experienced, the guns in their hands could no longer give them a sense of security.

Everyone's eyes were filled with doubt as they looked at Tang Zhen.

This was because the other party's mysterious and strange methods were something that they were unable to resist at all. If Tang Zhen had wanted to kill them earlier, they would not have the strength to resist at all since they were completely imprisoned!

After realizing this point, the armed personnel also realized that they were unable to reject Tang Zhen's request!

alright, Sir. We'll do as you say. But please don't affect our operation!

The bald Captain nodded at Tang Zhen and gave his companions a look, indicating that they should not act rashly!

Because of the sudden appearance of Tang Zhen, an uncontrollable person, in the carriage, the atmosphere immediately became subtle. While they were secretly nervous, they were also constantly guessing Tang Zhen's identity.

In the following time, Tang Zhen didn't say a single word. This also caused the matter to not change. It continued to develop according to the content of the movie that Tang Zhen had watched.

Another man appeared. After being questioned, he explained that he had encountered danger. Then, the train slowly drove into the first party's mother's hearing.

Everyone carried a complicated expression as they swept their eyes over Tang Zhen. However, they saw him slowly walk out and stand behind everyone without saying a word.

Everyone felt uneasy as they sensed Tang Zhen's seemingly tangible gaze. It was as though there was a man-eating ferocious beast standing behind them that could take their little lives at any moment.

This was especially true for the armed personnel who were more sensitive to danger. At this moment, they all felt as if there were needles on their backs.

If it wasn't for them trying their best to control their emotions, they would have long been unable to resist shooting at Tang Zhen under the drive of such an enormous sense of danger!

Although there was a mysterious person with an unknown identity, Tang Zhen, the mission still had to continue. So, these armed men, who were umbrella's mercenaries, could only continue to break down the door of the experimental center.

Everyone walked in after the door was opened. Tang Zhen naturally followed behind.

Tang Zhen glanced at his surroundings with interest. His face revealed a trace of satisfaction.

this thing is not bad. This one is good too. I'll take it with me when the time comes!

Compared to the technology of the original world, the technology of this world was much more advanced. Therefore, before Tang Zhen entered this place, he had already made preparations to clean up this top-secret laboratory.

Once the Holy Dragon city's monster taming base obtained this equipment information, it would definitely be like a tiger that had grown wings, and they would be able to cultivate more powerful biological weapons!

However, everyone was surprised when they heard Tang Zhen mumbling to himself. This was because from Tang Zhen's tone, he was clearly planning to move all the items here!

However, he was deep underground, and he was alone. How could he move those heavy instruments and equipment?

Suppressing the doubts in their hearts, the group began to move forward. However, they did not realize that they had entered a hell of death filled with zombies and biochemical monsters!

Tang Zhen clearly knew in his heart that he had not warned them. Only the heavens knew how many times they had experienced such a death scene. In that case, it wouldn't be much of a difference if they did it today!

Of course, Tang Zhen still reminded him before he left.

“When you enter the passage later, you must be vigilant. Be careful of laser beams that will take your little lives.

If you run into a walking corpse, remember not to waste your bullets. Try your best to blow up their heads!”

Tang Zhen no longer paid attention to the crowd as he looked at the corpses floating in the water. He directly walked in another direction.

Since he had already confirmed that what happened here was the same as what he had seen in the film and television, there was no point in staying any longer. He had better do his own things as soon as possible!

After all, the area of the laboratory wasn't small. Even if he had a storage equipment, Tang Zhen would still need a period of time to collect them.

Everyone heaved a long sigh of relief after seeing Tang Zhen leave. They felt as though they had been relieved of a heavy burden.

“Damn it, who is this guy? when I was beside him, he didn't dare to breathe!”

One of the mercenaries shook his head, his face filled with fear.

“Indeed, I feel like I'm facing a sorcerer. Yes, a sorcerer!”

but what did he mean when he said those words just now? what laser passage? and walking corpses? ”

who knows? maybe it's some kind of prophecy. Didn't you say he looked like a wizard? ”

alright, let's move quickly. Otherwise, we won't have enough time!

As everyone was talking, they were walking deeper into the laboratory. They didn't notice that the body in the water suddenly opened its eyes!
