

Alternate 891

Chapter 891 The Ghost Army (1)

In the quiet night, the sound of the car's roar would attract more zombies, and the debris everywhere on the road would make it more difficult to drive.

Fortunately, Tang Zhen was able to observe from a map perspective and choose a relatively unobstructed path. As a result, his speed was not affected too much.

During this period, whenever they encountered a large number of zombies blocking the road, the bald man would take the initiative to jump down and clean up, and the others would cooperate to shoot and kill them. The efficiency was also unusually fast.

Everyone was in awe of the bald man's combat power. Even Alice looked at him with a hint of vigilance.

Alice, who had just begun her evolution, was not the bald man's opponent now, but she was more than enough to protect herself!

As for Tang Zhen, who had yet to make a move, he was an existence that she was unable to reach. It was likely that he could easily insta-kill her.

Fortunately, they were in a cooperative state. Otherwise, they would have become corpses by now!

With everyone working together, it didn't take long for them to reach the destination.

However, just as Tang Zhen and the rest jumped down from the car, a pale white figure suddenly appeared from the Green Belt not far away. He was coldly staring at them.

The cold air around it drifted and its eyes were incomparably cold. After staring at Tang Zhen and the others for a few seconds, it hid behind the tree and disappeared.

Almost everyone at the scene saw this scene, and the timid ones were shocked!

After all, this thing was too similar to the ghosts in the legends. It could even be said that The White Shadow was a ghost!

Being in a city full of zombies and suddenly encountering the legendary spirits and ghosts, everyone's heart began to beat wildly.

"Buddy, I think we must be seeing things, right?"

The black man laughed dryly at the mercenary beside him, as if he was trying to find an excuse to not be nervous. However, as soon as he finished speaking, his eyes widened and he pointed to the square not far away with his mouth wide open.

"A large group of ghost beasts!"

In fact, he didn't need to say it. Everyone had already seen the dozens of translucent figures that suddenly appeared in the square and slowly approaching them.

The ethereal body, the ferocious face, and the constantly spreading cold air all made people shudder.

Numerous cold glints shot out from his empty eye sockets as he stared intently at Tang Zhen's group.

A roar that seemed to come from the depths of the soul rang out. Behind the Roman Pillar next to them, a pale energy body suddenly appeared and rushed toward them like the wind.

stop it! Remember not to touch its body!

Tang Zhen's voice was transmitted over as he gave an order to the bald man.

The bald man didn't dare to disobey. He immediately let out a loud roar and swung the battle-ax in his hand directly at the spirit body, cutting it in half as it approached!

"Aiyo, I'm freezing!"

The bald man who had cut the energy body in half cried out in alarm. The battleaxe in his hand also fell to the ground, and at the same time, a crisp sound was heard.

Everyone looked down and saw that the extremely hard alloy battleaxe had shattered like glass, and its surface was covered with a thick layer of frost!

Seeing this scene, Alice and the others suddenly gasped.

be careful, this thing's body temperature is close to absolute zero. Once you're touched by it, you'll immediately become a popsicle!

Tang Zhen looked at the half corpse that was continuously wriggling on the ground as he spoke in an indifferent tone.

After hearing Tang Zhen's reminder, everyone immediately revealed a cautious expression. The weapons in their hands were also pointed at the energy bodies on the square.

After all, the firearms in their hands were their greatest life-saving reliance.

Unfortunately, this kind of energy body made up of metal atoms was not afraid of bullet attacks at all. Even the energy body that had been cut in half by the bald man was still alive and kicking, crawling around!

"So this is the Ghost Army of umbrella, interesting!"

Tang Zhen swept his eyes over the energy bodies that were continuously approaching. However, he revealed a disdainful smile and waved his hand at the bald man's group.

wait for me at the back. Don't act rashly. They've already set up a trap for us!

The bald man, Alice, and the others immediately retreated in the direction of the City Hall and got ready for battle.

Since Tang Zhen said that there was an ambush here, he naturally had to be careful!

In this short period of time, the ghost Warriors had already crossed the square and were getting closer and closer to Tang Zhen.

let's see if you man-made Ghost Warriors or my spirit body Army is stronger!

After Tang Zhen's voice sounded, a black object suddenly appeared and floated between Tang Zhen and those spirit bodies.

It looked like a strange sculpture, and its surface was carved with strange runes. It constantly emitted an aura that made the undead warriors' hearts palpitate.

With a flash of light, a crystal clear mirror suddenly appeared in front of an undead warrior, reflecting its appearance.

The undead warrior looked at the mirror that had appeared out of thin air in front of him. Just as he was about to take a closer look, he was shocked to find that behind the mirror, there were countless ferocious faces stuck to it.

They looked at the world outside the mirror with greedy eyes, and their lips curved into a bloodthirsty and strange smile.

The undead warrior's heart thumped wildly, and it subconsciously dodged to the side to avoid the feeling that made its heart jump.

"Huala!

With a crisp sound, the mirror door shattered, and a group of ghosts swarmed out.

Their silhouettes were continuous, like a torrent, spiraling up and spreading over the square of the City Hall.

For a time, there were gusts of cold wind and ghostly howls. As far as the eye could see, there were spirits of all shapes and sizes everywhere, constantly circling and dancing.

These spirits were nourished by the reincarnation mirror and their levels rose like a rocket. Now, they could even reveal their physical forms and let ordinary people see them.

Compared to them, these man-made Ghost Warriors were as weak as children. At this moment, they were surrounded by thousands of ghosts and were trembling in despair.

kill them, then spread out and search. Even if you have to dig three feet deep, you have to find the origin stone!

Tang Zhen gave an order to the guard beside him. The latter hurriedly smiled and agreed. After which, he waved his hand at his subordinates.

The spirits who had received the order immediately laughed hideously and pounced directly at the energy bodies that had turned around to escape. As the undead warriors screamed in pain, they tore them apart and swallowed them.

The ghost Warriors that could easily freeze anyone who came into contact with them were completely vulnerable in front of these true spirits from the world of towers. They had even become the food of these ferocious spirits, being devoured without leaving any residue behind.

The secret weapon that ambreira thought could dominate the world couldn't even withstand a single blow from Tang Zhen!

After devouring the man-made Spirit Warriors, the spirits turned their gazes to Alice and the others. After all, to them, the blood essence and vitality of living creatures were the true delicacies!

However, following Tang Zhen's cold snort, these spirit bodies immediately became well-behaved. They all quietly floated around the square, waiting for the next instruction.

Under the Guard's orders, the spirits laughed and flew around Raccoon City to search for the origin stone.

The appearance of these spirits would make Raccoon City even worse. After all, with the nature of these spirits, they definitely wouldn't let go of this opportunity to feast.

Tang Zhen was naturally aware of this. However, he had no way to control it. He could only choose to turn a blind eye.

However, if this group of people only cared about filling their stomachs and were unable to find the origin stone, Tang Zhen would have plenty of ways to deal with them!

Tang Zhen turned his head and glanced at the Dark City Hall. He knew that ambreira had set a trap for them, but so what?

In this world, there seemed to be nothing that could stop him!

Chapter 892 success, departure

Sure enough, as Tang Zhen had expected, as soon as they entered the parking area, the armed personnel of umbrella could not wait to come out.

At the same time, a biochemical monster carrying a six-barreled machine gun appeared in front of everyone's eyes. It roared at Alice in a deep voice!

But different from the original plot, besides Alice, who had begun to evolve, there was also Tang Zhen and a purification Knight among the people that ambreira had to deal with.

If they were ordinary people, it would be fine. With the firepower of the umbrella organization's armed forces, they could definitely subdue them easily.

Unfortunately, Tang Zhen and the bald man were not ordinary citizens.

Facing three extremely powerful enemies, the armed personnel of umbrella were doomed.

Although they kept pulling the trigger, it didn't take long for them to be put down one after another, and broken limbs were all over the place.

Even the biochemical monster that was modified from the honeycomb survivors was knocked to the ground by Tang Zhen's punch. It struggled for a long time but couldn't get up.

Since the mission was completed, the next step was simple.

Tang Zhen had obtained what he wanted. Although it wasn't the real information from the origin stone detector, he still had a way to obtain it.

As for Alice and the others, they all boarded the plane. The siblings and the bald man also boarded the plane under Tang Zhen's orders to prevent it from affecting their next action!

Tang Zhen swept his eyes over Alice who was sitting in the cabin. He knew that this woman would accidentally lose her life in a short time.

Perhaps, the Alice that would appear in front of Tang Zhen would become her clone when they met again.

But then again, this woman was also a clone, just that she didn't know it.

Tang Zhen wasn't interested in Alice's background. Instead, he was very concerned about the clone cultivation equipment. If there was a chance, he would naturally get his own loucheng back.

Because even he had to admit that the level of technology in this world was ahead of the original world in many places, so he naturally had to make use of it!

Tang Zhen glanced at the person in charge of umbrella beside him and a trace of disgust flashed in his eyes. He opened the sealed iron door.

Under the terrified gaze of the person in charge, countless zombies were rushing towards him.

experience the feeling of being torn apart bit by bit. You will never forget it even in death!

Tang Zhen's figure suddenly disappeared after throwing down these words.

"Damn it, don't leave me behind!"

In the pitch-black night sky, the person in charge of the umbrella Corporation suddenly screamed, but it soon stopped. Only the low growls and the sound of zombies eating could be heard.

Tang Zhen slowly walked on the street. Because of his natural instinct to seek advantages and avoid disadvantages, none of the surrounding zombies dared to approach.

The next thing he had to do was naturally to continue searching for origin stones.

Tang Zhen suddenly obtained an unexpected piece of good news just when he thought that he would have to search for a period of time.

During the search of Raccoon City, a few spirits had accidentally found traces of the origin stone. At the time, two groups had been fighting over it.

However, when groups of spirit bodies heard the news and rushed over, both sides of the battle turned pale with fright and chose to escape in unison.

However, even when they were retreating, these people still refused to let go of the boxes that contained the origin stones.

As a result, they were targeted by the ferocious spirit bodies. After tearing several people apart, the combatants immediately realized that the true target of these spirit bodies was the origin stone.

In order to save their lives, the combatants could only abandon the boxes and flee for their lives under the pursuit of countless spirit bodies!

As the overseer said this, the spirit bodies returned one after another, bringing back the boxes.

As the boxes were very heavy, it was very difficult for the spirit bodies to move them. Therefore, they controlled some zombies to act as the porters.

Tang Zhen looked at the row of zombies carrying Alloy Boxes and seemed to have thought of something. He turned his head and gave a few instructions to the guard.

His eyes lit up and he nodded his head vigorously, as if he was very excited!

At this moment, the zombies had already put down the boxes. Tang Zhen opened one and the dazzling origin stone inside immediately appeared in front of Tang Zhen.

However, Tang Zhen's expression changed slightly after he saw these origin stones. He picked up an origin stone with a solemn expression and carefully sensed it in his palm.

A few seconds later, Tang Zhen's face revealed a trace of surprise!

He didn't expect that this batch of origin stones from the umbrella Corporation weren't ordinary low-grade origin stones that only contained a small amount of magical power, but top-grade origin stones that had yet to mature!

Origin stones were divided into different grades. Low-grade origin stones only contained a small amount of power of laws, while mid-grade origin stones contained more power of laws and even a trace of the world's origin!

However, compared to Supreme-grade origin stones, they were not worth mentioning. This was because they were real origin stones!

Because among these Supreme-grade origin stones, there was the world's origin that had yet to break out of its shell. It was absolutely priceless!

In fact, it was only possible to find this kind of top-grade origin stone in this kind of incomplete world. Unfortunately, the probability of being discovered was extremely small. Even Tang Zhen himself did not expect that he would actually obtain this kind of top-grade origin stone by accident!

Suppressing the excitement in his heart, Tang Zhen opened the rest of the alloy Boxes. The joy on his face became more and more intense.

Holding the shiny top-grade origin stone in his hand, Tang Zhen knew that he had made a big profit this time!

Because it contained the world's origin, the exchange ratio between low-grade origin stones and Supreme-grade origin stones was naturally different. He believed that after obtaining this batch of Supreme-grade origin stones, Tang Zhen would definitely be able to completely light up his law stars!

Tang Zhen carefreely laughed a few times. He kept all the origin stones and left the city that was about to disappear without the slightest hesitation!

His next target would be the large and small ships in the Naval base!

.....

Two days later, Tang Zhen's figure appeared in the vicinity of a military port. There was a faint smile on his face.

Ever since he left Raccoon City, Tang Zhen had been rushing to the Naval base in this world. He boarded the ships at night and stored all the ships he saw in his storage space.

As for the crew members on the ship, they had long been scared out of their wits by the spirit bodies that had wreaked havoc. They had fled without a trace.

Tang Zhen swept his eyes over the empty dock and sighed emotionally in his heart. The last time he collected old and used ships, it was also at this military dock!

Compared to the previous dilapidated scene, this place was undoubtedly much more prosperous, and there were military facilities everywhere.

Unfortunately, it wouldn't take long for this place to be abandoned, and then gradually turn into ruins in the wind and rain!

When the next cycle began, the place would return to its former prosperity.

Tang Zhen's goal had already been achieved. Moreover, he had also obtained a large number of top grade origin stones. He could definitely be considered to have returned with a full load!

Moreover, he had a faint premonition that if he stayed any longer, there might be unexpected danger!

He switched to his phone's interface and chose the reply option, leaving the wasteland world.

The moment he left, lightning flashed and Thunder rumbled in the sky. A huge bolt of lightning appeared out of nowhere and struck the place where he had just been.

Soon after, the sea water rapidly condensed and formed a huge water giant. It let out a silent roar at the spot where Tang Zhen had disappeared.

Far away in front of the water giant, a mushroom cloud was slowly rising into the sky.

Chapter 893 Powerful law application _1

Tang Zhen slowly walked out of the teleportation gate and sat in the central area of the training room with a grave expression.

With a wave of his hand, a pile of Alloy Boxes appeared in front of him. The lid was opened, revealing the neatly arranged Supreme-grade origin stones inside!

In an instant, the entire cultivation room was illuminated by the light emitted by this Supreme-grade origin stone. The brilliance was flowing and full of fascinating colors!

If this scene was seen by other King level cultivators, they would be completely shocked and would rush forward to snatch it!

To any King level cultivator, this was a fortune!

Unfortunately, this wealth only belonged to Tang Zhen. The others did not have the opportunity to see this shocking scene.

After admiring it for a while, Tang Zhen changed his perspective and turned to his phone's interface.

With a mental command, the box of Supreme-grade origin stones on the ground instantly disappeared. At the same time, in the area that displayed the number of origin stones, a set of numbers that shocked Tang Zhen appeared!

Sure enough, just as he had expected, the difference between low-grade origin stones and top-grade origin stones was huge. It would not be an exaggeration to say that it was one for ten thousand!

With these Supreme-grade origin stones, lighting up law stars was no longer a problem.

However, because they came from an incomplete world, there were only four types of origin stones, earth, water, fire, and water. There were very few other types of origin stones, or even none at all!

If such a situation was placed in the complete world, it would definitely not happen. However, with Tang Zhen's appearance, the entire world had already begun to undergo a great change!

However, Tang Zhen was extremely clear in his heart that no matter which type of origin stone was discovered, there would still be a few other light sources!

However, this did not have much of an impact on Tang Zhen. He only needed to light up the law stars that he could currently light up.

As for the origin stones required by the other law stars, he could slowly collect them in the future!

When he thought of this, Tang Zhen directly locked onto the fire law star and chose to light it up!

The origin stone that had just been filled in immediately shrank. At the same time, the runes on the fire law star shone brightly. At the same time, Tang Zhen seemed to hear a loud sound and his consciousness space was instantly enveloped by a sea of fire.

Tang Zhen seemed to be in the middle of it as he continuously comprehended the wondrous aspects of the fire-type laws. A smile that seemed to have been enlightened appeared on his face!

A layer of seven-colored flames rose from the surface of his body, like a small dragon constantly swimming, appearing extremely lively.

An unknown amount of time had passed before the flame slowly disappeared. Tang Zhen finally opened his eyes.

There seemed to be two balls of seven-colored flames burning in his pupils. However, they disappeared in the blink of an eye.

The fire-elemental star on the interface of the phone was completely lit up at this moment, emitting a scorching light!

Tang Zhen's gaze swept past this fire law star and looked at the star that extended behind it. Immediately, groups of words appeared in front of his eyes.

[sea of fire (upgradeable), elementary use of the law of fire. Can form a sea of fire with a radius of five kilometers, burning everything. Exchange price: 100000 origin stones!]

[smelting furnace (upgradeable), elementary usage of the fire rule. Sticky flames will turn into liquid, sealing a designated area. Exchange price: 100000 origin stones!]

[fire slave (upgradeable), basic use of the law of fire, can form a flame giant about 20 meters tall, lasts for 10 minutes, exchange price 100000 origin stones!]

[burning body of desire, mid-grade use of the law of fire. Ignite desire and burn broken bodies. Effective range is five kilometers. Exchange price: one million origin stones!]

[ultimate combustion, a high-level application of the law of fire. Within sight, metal, water, and stone can all be burned, incinerating the world. Exchange price: 10 million origin stones!]

The smile on Tang Zhen's face grew wider and wider as he looked at the introduction of the fire attribute laws that continued to appear in front of his eyes as his gaze moved.

When he finished reading the introduction of the fire law, he was immediately shocked by the terrifying power it contained. This was because even the Basic Law of fire application wasn't something that ordinary cultivator skills could be compared to.

No wonder all King level cultivators were determined to master the power of law. It was so powerful!

Tang Zhen glanced at the remaining number of origin stones. Without any hesitation, he chose to top up the remaining half of the fire attribute Supreme-grade origin stones.

Looking at the skyrocketing number of origin stones, Tang Zhen chose the two basic applications of sea of fire and flame slave. At the same time, he also chose the burning of desire and an intermediate law application called "fire domain."

fire domain, intermediate rule application. In the area, other than retaining fire-type energy, it will repel all other energy. It can increase the power of the fire rule by several times. Exchange price: one million origin stones!

At this point, Tang Zhen had already consumed more than half of the fire attribute origin stones he possessed. The remaining ones were left behind in case of an emergency!

Tang Zhen, who had grasped the application of four different levels of fire-type laws, was not in a hurry to test the power of these laws. Instead, he turned to another law star.

This was a water elemental law star. To Tang Zhen, who was currently conquering the water world, it was very important to master the water elemental law.

However, among the Supreme-grade origin stones he had obtained this time, most of them were Yellow Earth-type origin stones. There were not many Water-type origin stones.

Of course, it was more than enough to light up the law stars!

After absorbing these water attribute top-grade origin stones, Tang Zhen looked at the water attribute law star and chose to light it up.

It was as if a torrent had descended from the sky, devouring all living beings and then the entire world.

Wherever it went, it instantly turned into a vast ocean!

Just like when he lit up the fire elemental star, Tang Zhen also entered a state of enlightenment during the process of lighting up the water elemental star. His understanding of the laws also became deeper and deeper!

Tang Zhen's comprehension also ended when the water law star was completely lit up. He began to check the various super applications that the water law star was connected to.

Similar to the usage of the laws of fire, the laws of water were also extremely powerful.

[Sky River weak water, elementary use of the law of water. It's hard for a great feather to float, and nothing in the area it covers can't sink. Exchange price: 100000 origin stones!]

[corrosive poison, mid-grade use of the law of water. Ordinary water will immediately become a highly toxic and corrosive solution. It's difficult for metal and stone to block it. Upon contact, you will die. Exchange price: 1000000 origin stones!]

[Sky River downpour, a high-level application of the law of water. It can cause the water of the sky River to pour down, instantly turning a thousand li into a waterswamp Kingdom. Exchange price: 1000000 origin stones!]

After checking the number of water origin stones he had left, Tang Zhen sighed. He could only exchange for the sky River ruoshui elementary law application.

As for the other applications that made Tang Zhen envious, he could only wait until he had enough water origin stones in the future to exchange for them!

Chapter 894 the warship sets out

What Tang Zhen did not know was that while he was lighting up the law stars one by one, that mysterious star was also silently undergoing a change that no one knew.

Under normal circumstances, it would only change when it absorbed the world's origin.

However, Tang Zhen was currently using a top-grade origin stone. It was precisely because of the existence of this stone that the mysterious star had changed.

The reason for this situation was that there was a large amount of world origin in these Supreme-grade origin stones.

Although the world's origin and the origin stone were related, their value could not be compared at all.

Although Tang Zhen used Supreme-grade origin stones to top up, it didn't mean that the world's origin contained in the origin stones would also come with it.

If that was the case, it would really be a great loss to his grandmother!

The truth was that when the Supreme-grade origin stone was absorbed by the phone, the world's origin was also separated and absorbed by the mysterious star.

Just as Tang Zhen was focusing his attention on the application of those laws, the mysterious star flickered slightly. Soon after, it returned to its previous state.

Tang Zhen, who was completely focused, did not notice this point.

At this time, he had already completely lit up the fire and water law stars, and a large number of top-grade origin stones were also about to be exhausted.

“It’s a pity. It seems that we can only stop here!”

Tang Zhen sighed. He reluctantly shifted his gaze away from the phone’s interface and casually kept the remaining top-grade origin stones.

He had already mastered many powerful nomological laws. Once he used them, he was bound to become an enemy’s nightmare.

It could be said that Tang Zhen’s current strength was absolutely unrivaled among those of the same rank. Even if the enemy’s rank was higher than his, as long as the enemy did not control the power of law, they would definitely not be his match.

Unknowingly, Tang Zhen had gained the capital to run amuck in the world of loucheng.

The next thing he had to do was to head to the water world and have a real clash with the sea’s lost race.

Tang Zhen was extremely looking forward to this battle. Only by beating them up and letting the remnant clan on the sea know that he was no match for the Holy Dragon City would his bartering plan work!

Otherwise, even if the Holy Dragon City offered the best exchange items, they would not be able to achieve their desired goal!

Stepping out of the secret cultivation room, Tang Zhen directly issued the order to go to war. The entire Holy Dragon City also fell into a busy state because of this.

All the Navy personnel that had been teleported to the tower world were in position. They immediately headed to the valley behind the Holy Dragon City to receive and adjust the ships that Tang Zhen had brought back.

A total of one hundred thousand Holy Dragon City soldiers, upon receiving the order, quickly began to gather in the valley behind the Holy Dragon City.

Under the shocked and envious gazes of the foreign races, teams of fully armed Holy Dragon City soldiers marched into the inner city in high spirits.

As far as the eye could see, the wide road in front of Holy Dragon City was filled with black silhouettes. That scene made one’s blood boil with excitement!

At this moment, more and more Warriors had gathered in the back Valley. They had formed a square formation of 10000 people and were waiting to pass through the teleportation gate.

The first team to enter the portal was the Navy personnel mobilized by their partners from their original world. At the moment, they were standing on a platform modified from old ships, staring at the huge warships that appeared out of thin air.

If it wasn't for the feeling of the sea water splashing on their faces, they would have thought that they were dreaming!

To them, this scene was a true miracle!

Even though they knew that the world of Loucheng was a magical place with all kinds of incredible things, the navies from all over the world were still shocked when they saw it with their own eyes.

"Oh my God, I love this world to death!"

An officer from the Ice Bear Alliance couldn't help but mutter to himself as he looked at the brand new warship floating on the sea.

Navy personnel who shared the same sentiment could be seen everywhere at this moment.

Everyone, please board the ship. After the inspection, our soldiers will board the ship!

A Holy Dragon City cultivator in black battle armor retracted his fanatical gaze from Tang Zhen and said to the Naval officer beside him with a smile.

When the Naval officers heard this, they immediately jumped onto the ship in front of them and began to seriously size up the extremely unfamiliar warship.

In fact, as a professional soldier, they were very clear about the main warships of each country. They only needed one look to tell where they were from.

However, these majestic warships in front of him clearly had traces of service and maintenance, but they were definitely not warships owned by any country in his original world!

Then where did these warships come from? Other than these warships, what other unknown trump cards did the Holy Dragon City have?

Touching the weapons on the warship, the soldiers couldn't help but let their imagination run wild.

However, these thoughts only flashed through their minds. Their main task now was to thoroughly inspect these ships, and then directly set off for the battlefield!

When they thought about how they were going to ride a warship and gallop on the vast blue ocean, these soldiers who had dedicated almost half of their lives to the ocean and had no chance to participate in a real naval battle felt their blood boiling!

"Hahaha, I've been waiting for this day for a long time!"

A Navy officer from the Asian Alliance laughed heartily, his face full of anticipation. At the same time, he raised his head and glanced at another warship not far away.

It was the warship that another partner was in charge of. At this moment, there was also a soldier looking in their direction, his eyes filled with fanaticism and a sense of challenge.

"All of you, listen up. This mission must be completed in an outstanding manner. No one is allowed to drop the ball."

We have to let those guys know that our combat power is the first in the joint Army in land battles, and we still won't lose to anyone in naval battles. Are you confident?"

The man in the Asian Alliance Navy uniform shouted at the soldier standing in front of him.

What he got in response was a firm and firm answer!

Similar scenes could be seen on every warship. These specially selected soldiers were all holding back their strength, not willing to be compared to the soldiers of other countries.

For a time, these warships were filled with busy figures. They checked the entire warship from inside to outside and finally came to a conclusion.

These warships were in good condition. As long as they familiarized themselves with the situation, they could immediately set sail and participate in the battle!

Of course, in the process of inspection, the soldiers also found many clues, which made them have a vague guess.

However, this idea was too sensational, and even they did not dare to believe it.

...

The Holy Dragon City cultivators, who had been waiting for a long time, immediately sent the news back to the Holy Dragon City after confirming that there was no mistake.

Following the orders of the commanders of the various armies, the Holy Dragon city's soldiers, who had been waiting for a long time, began to slowly pass through the teleportation gate like a long Dragon whose head and tail could not be seen.

After crossing the portal, they boarded the warship and began to wait quietly for the departure!

After one warship was full and slowly left the offshore platform, the second warship began to carry the Holy Dragon city's soldiers.

At the same time, many small ships also formed a long line and followed these warships. They were all loaded with weapons!

After all the Holy Dragon city's soldiers had boarded the ship, the mighty warship cut through the waves and slowly sailed toward the depths of the water world!

Chapter 895 The nine-headed snake tribe (1)

At the same time as the Holy Dragon city's Army set out, the maritime remnant race in the water world also began to enter battle mode.

As the news of the Mastiff Dragon tribe's destruction spread, coupled with the widespread propaganda of the fleeing sea beast riders, many sea tribes learned of the Holy Dragon city's existence.

The other tribes were extremely cautious of this unknown enemy who had easily destroyed a tribe on the sea. While they sent out Scouts to investigate, they also made preparations for war.

In the end, the information that the spies had sent back was basically the same, and it also confirmed the existence of this mysterious force.

However, at this time, the metal floating island did not continue to move forward. Instead, it quietly stopped in the middle of the sea. It was unknown what it wanted to do.

Since the existence of the enemy had been confirmed, it was obviously an extremely stupid thing to passively wait for the enemy to attack.

Therefore, the best way was to take advantage of the fact that he had yet to gain a stable foothold and give him a head-on blow.

If the tactics were reasonable and the timing was right, it was not impossible to destroy the enemy directly.

The problem was that although the surrounding tribes were not weak, they did not have the confidence to win against the Holy Dragon city's terrifying weapons.

The fleeing sea beast riders described the might of the Holy Dragon city's weapons as an apocalyptic catastrophe, an existence that could not be resisted by flesh and blood.

It was for this reason that the tribe leaders were hesitant, afraid that they would suffer great losses if they went against the Holy Dragon City!

In this way, even if they defeated the enemy, their own tribe would suffer huge losses, which was not worth it.

However, if they didn't take action, the enemy would definitely take them down one by one, leaving them with nothing.

The Mastiff Dragon Tribe was a good example, and they had no choice but to be on guard!

Just as these tribe leaders were making their own plans, a group of huge garbage warships suddenly appeared, surrounded by a large number of small garbage ships. They were like a moving land, covering a large area of the sea.

Finally, they stopped in front of the sea Spirit tribe's Gate, making the entire tribe feel as if they were facing a great enemy.

but when the sea Spirit race chief saw the totem mark on the trash warship, his body trembled and he quickly went up to greet it.

welcome, Lords of the nine-headed snake tribe. Please enter the tribe and rest for a moment!

Several cultivators with astonishing auras nodded their heads slightly and jumped off the huge garbage warship.

Some of the sea Spirit tribe members who knew the origin of these trashy warships couldn't help but whisper among themselves, trying to guess the other party's goal.

As one of the three strongest tribes in the water world, the nine-headed snake tribe would definitely not come here for no reason, let alone dispatch such a large number of warships.

Just as everyone was guessing, someone suddenly noticed that there were more shadows of ships appearing on the sea around them. They seemed to be densely packed.

It didn't take long for these garbage ships of different sizes to approach, filling up the sea around the sea Spirit tribe. All kinds of totem symbols also appeared in their eyes.

Seeing the familiar patterns, the sea Spirit people couldn't help but gasp. Only now did they realize that all the nearby sea tribes had sent a large number of warships and Warriors.

are these tribes going to join forces to fight against those mysterious enemies? ”

The clansmen of the sea Spirit tribe thought in horror as they looked at the sea's surface that was filled with the remnant races.

After roughly estimating the number of people in these tribes, the sea Spirit tribesmen could not help but be shocked to discover that the number of people gathered here had already exceeded 100000!

However, this was not the final number of people who were participating in the battle. At the intersection between the sea and the sky, there were still a large number of trash warships that were approaching the sea Spirit tribe!

.....

At this moment, the square in the sea Spirit tribe was already filled with the patriarchs of various tribes who had arrived one after another. Many of them were familiar with each other and were discussing something in low voices with solemn expressions.

Even some of the tribe leaders who had grudges with each other in the past pretended not to see it. Instead, they looked at the few cultivators sitting in the center of the square, who had powerful auras and nine-headed snake tattoos.

They were the important figures sent by the nine-headed snake tribe to take charge of the situation. Each of them had a cultivation level that exceeded the Horde leader level, and the leader was even a 4-star horde leader!

It was said that the cultivators of the nine-headed snake tribe all had noble bloodlines and could summon powerful creatures from other worlds to help them in battle!

The strongest summoned creature of their tribe was a nine-headed snake. It had a terrifying body and unimaginable power!

It was for this reason that they named their tribe the nine-headed snake, which showed how much they valued and trusted the nine-headed snake!

In fact, even without the summoned creatures, the strength of a 4-star horde leader was enough to make these tribal chiefs not dare to take him lightly.

After all, such a terrifying cultivator was already a legendary figure in the water world, and it was impossible to see him on normal days.

But now, he had appeared here. This was enough to prove how important this matter was to the nine-headed snake tribe!

This was a matter of life and death, so the nine-headed snake tribe had to take it seriously. Besides, they had other plans.

If anyone dared to disobey at this time, they would definitely be punished by the nine-headed snake tribe. They might even be killed by the nine-headed snake tribe before the Holy Dragon City arrived!

When they thought of this, the tribe leaders who had been forced to come here immediately put out their dissatisfaction and acted very cooperative.

When the four star horde leader saw this, he couldn't help but nod his head slightly. He seemed to be very satisfied with the performance of these clan leaders.

However, he was not as calm as he looked on the surface.

In fact, the nine-headed snake tribe, one of the three major tribes of the water world, was far more concerned about the Holy Dragon city's invasion than ordinary tribes.

The nine-headed snake tribe had a long history. Although they had gone through countless storms, their knowledge and inheritance had been well preserved.

It was also because of this that the nine-headed snake tribe was even more aware of the Holy Dragon city's invasion and what it meant.

In the water world, Lou Cheng's advancement was held in the trial arena, and the remnant races of the sea were like prey that were kept in captivity. Every time Lou Cheng's cultivators descended, it represented the beginning of a massacre.

There was no room for discussion in this matter. It was either you die or I die!

However, the arrival of this disaster had also opened the sealed Water World at the same time, giving them, the remnant race of the sea, a chance to escape.

If they could grasp this rare opportunity, the nine-headed snake tribe would no longer be trapped in this world of water, and they would be able to escape from this cage-like place!

According to the records passed down by their ancestors, the Holy Dragon City was not the first city to enter the water world. In the past, there had been other cities that had entered the water world.

The most recent one was more than two hundred years ago.

At that time, the tower City was extremely arrogant and invincible. Many tribes were destroyed by them, and none of them were their match.

...

It was also at this moment that the nine-headed snake tribe stood out and began to gather the various tribes on the sea to form a joint Army.

Taking advantage of the individual advantages of the sea's lost race, this joint Army planned an ambush and finally defeated the tower!

Chapter 896 The vestigial tribe united army

The battle was so intense that the sky turned dark and the earth darkened. Blood flowed like a river. Countless native clan members on the sea surrounded Lou Cheng's warships like countless small fish.

The corpses on the sea were stacked on top of each other, and in the end, the sea was completely blocked. Ships could not move, so the two sides simply jumped onto the floating island made of corpses and continued to fight!

Under the attack of these crazy and fearless sea remnants, the cultivators in the tower fell one after another. Unknowingly, the number of cultivators in the tower who could continue fighting decreased.

They were like an isolated island surrounded by a flood. In the end, they couldn't resist the raging waves and were devoured ruthlessly!

After the battle ended, all the survivors were stunned by the tragic scene in front of them.

As far as the eye could see, the surrounding sea surface had long disappeared, and in its place were countless corpses of the sea's native clan.

After a rough estimation, the total number of casualties of the Allied forces in this battle exceeded 100000, and the clansmen of several tribes were completely wiped out!

As for Lou Cheng, who was being attacked by the human wave tactic, due to the limited means of transportation, the total number of people barely reached 10000!

The formidability of Lou Cheng's cultivators was still fresh in the memory of the sea's remnant race.

In any case, the final Victor was the sea's lost race.

After the battle ended, a group of severely injured cultivators from Lou Cheng city were captured by the tribes on the sea and tortured cruelly.

It was through the mouths of these captives that the vestigial tribe at sea knew of the existence of the tower world. They also knew that when the cornerstone platform chose the water world as the level 8 overseas battlefield, a huge teleportation gate would be opened at the same time.

Cultivator Lou Cheng had used this huge teleportation gate to cross the ends of the earth and arrive at the water world, which was far away from Lou Cheng's world!

When the nine-headed snake tribe members heard this, they were shocked at first, but then they were overjoyed. They immediately realized that their chance to escape the cage of the water world had come.

Without any hesitation, they immediately sent all the elite warriors of the tribe to rush to the location of the portal. They wanted to see if they could leave the water world through the portal.

However, when the sea's lost race came to the portal and tried to pass through it with excitement, they found that they were happy too early.

The teleportation gate that the cultivators in the city could easily enter and exit was an impassable barrier for the remnant race in the sea. No matter how hard they tried, they could not get close to the thin light film.

This matter made the nine-headed snake tribe leader extremely vexed, but the only chance to get rid of the water world was in front of them. How could they give up so easily?

In the following period of time, the nine-headed snake tribe began to try everything they could, but they made no progress.

The teleportation gate was like a dream in front of him, but it was beyond his reach!

Time passed slowly. During this time, something had happened that caused the tower to give up on the overseas battlefield. Until the time limit, it still did not appear in the water world.

During this period, the nine-headed snake tribe had not given up on the research of the teleportation gate, but they had not gained much.

As a result, the moment the portal closed, all the cultivators who were captured by the nine-headed snake tribe and stayed in the water world for many years turned into monsters and started to attack them crazily.

In order to avoid causing more damage, the nine-headed snake tribe had no choice but to kill all the cultivators who had turned into monsters.

This matter had temporarily come to an end. However, the thought of leaving the water world had become the nine-headed snake tribesmen's biggest dream.

They wanted to experience the feeling of stepping on land and see the boundless land that the cultivators of Lou Cheng had mentioned, as well as the flowers and trees all over the place!

They were nine-headed snake tribesmen who had never left the water world since they were born. He had an extremely strong desire for land, which originated from the memory in his blood.

After all, the nine-headed snake tribe didn't belong to this world. The hometown of their ancestors was also a vast continent. There were birds chirping and flowers blooming there. There were huge mountain ranges and magnificent cities.

Unfortunately, they were destined to never return to their homeland. They could only experience the fascinating life from the books that were passed down.

Almost every generation's clan leader would be repeatedly urged to find a way to lead the clan out of this cage and set foot on real land when they took over the position!

The water world would trap them to death sooner or later, and only when they set foot on real land would the nine-headed snake tribe's clansmen and their descendants have a chance to continue living.

So when the news of the Holy Dragon city's invasion came, the nine-headed snake tribe's first reaction was not fear or hesitation, but joy!

For them, another chance to leave the water world had finally come after their prayers.

Therefore, the nine-headed snake tribe immediately reorganized their troops and sent out all the warships and cultivators.

At the same time, a large number of emissaries rushed out from the tribe, heading to the small and medium-sized tribes that were ruled by them. They ordered them to send all the Warriors and warships of their tribes to fight together with the nine-headed snake tribe's Army!

Those small and medium-sized tribes were no match for the nine-headed snake tribe, so they had no choice but to obey their recruitment orders.

Within the time given by the nine-headed snake tribe, a large number of Warriors and garbage warships were gathered. They brought weapons, equipment, and supplies, and followed the nine-headed snake tribe's fleet. They marched toward the sea Spirit tribe's territory in a mighty manner.

The nine-headed snake tribe knew how powerful the cultivators in Loucheng were, so they were not satisfied with their current lineup. Instead, they continued to expand their Army, encouraging all the tribes along the way.

As long as there were any tribes that did not obey, they would immediately take forceful measures, either conquering or pillaging, forcing those tribes to participate in the war.

Due to the abundance of resources in the sea, the nine-headed snake tribe had many cultivators, and the proportion of high-level cultivators was extremely high. Almost every giant garbage warship that set out for an expedition had a Lord-level cultivator in charge of commanding different numbers of cultivator teams that were skilled in sea combat.

Other than the other two tribes, there were few in the water world who could match up to such a powerful force!

In the process of mandatory conscription, there were naturally many who disobeyed orders, so battles were inevitable.

Although they were all descendants of the sea tribe, the nine-headed snake tribe did not show any mercy to these sea tribes that disobeyed orders.

Almost every battle would result in rivers of blood. The sea was filled with floating corpses and scattered garbage. These incomplete corpses also became food for the sea monsters that the Hydra had raised. Not a single bit of them was wasted.

Especially during the period when Tang Zhen had left, the nine-headed snake tribe had slaughtered their way here. During this period, they had destroyed 15 tribes in succession. Although they had wasted some time, the results were quite obvious!

After many tribes on the sea knew what had happened to the tribes that disobeyed the order, they all took the initiative to jump out and participate in the nine-headed snake tribe's Alliance Army.

In the case of a lack of tribal warriors, ordinary tribesmen would be used to make up the numbers. In the eyes of the nine-headed snake tribe, they were just cannon fodder on the battlefield.

However, when the number of cannon foddors reached a certain number, they could also have a huge impact on the battle situation. Therefore, the nine-headed snake tribe would not easily give up on this tactic.

It was also for this reason that the sea area in front of the sea Spirit tribe was filled with all kinds of garbage warships. At a glance, it seemed that there was no end to them!

Chapter 897 The dream and determination of the sea's lost clan (1)

The sea Spirit people were at a loss when they saw this spectacular scene.

Surrounded by countless garbage warships, the sea Spirit tribe was like a small tree that could not withstand the wind. It seemed that as long as the other side charged, the tribe would be razed to the ground!

After all, there were too many of the sea Spirit race's remnant races at this time. There were people everywhere, and the sea Spirit race's eyes had long been dazzled.

Although there were also disputes and battles in the water world, the scale was generally very small. A scene like the one in front of them was definitely one that would not be seen in 100 years!

Many sea spirits had never seen so many outsiders in their entire lives, so it was easy to imagine how shocked they were.

In fact, it was not only the sea Spirit tribe that was shocked, but the small and medium-sized tribes that were forcibly recruited by the nine-headed snake tribe were also shocked.

They really couldn't understand what kind of enemy they were facing this time that would make a top tribe like the nine-headed snake move out in full force.

Was this not enough? he even wanted to use all kinds of methods to force them to participate in the battle?

Just by thinking about it, one would know that the enemy they were facing this time was Beila, who had quite a powerful strength!

And looking at the current situation, there was bound to be an earth-shaking battle soon. In this situation, insignificant small tribes like theirs were completely targets that could be sacrificed at will.

It was because of this that the tribesmen of these small tribes were so worried that they had already cursed the ancestors of the nine-headed snake tribe for eighteen generations!

However, they had no way out. They could only continue to wait. At the same time, they were secretly praying that when the war began, they would be more careful and not be used as cannon fodder by the Hydra tribe.

Although the nine-headed snake tribe had also sent out a large number of trash warships and Warriors with high cultivation, it was still not a serious injury to a top tribe like this.

However, those small tribes were different. Under the coercion of the nine-headed snake tribe, they had almost exhausted all the power of their entire tribe, sending out all their warships and Warriors.

The battlefield was merciless, and if they were not careful, the crisis of extermination would descend upon them!

The tribesmen who had been forced to come here were all very unwilling, and their Chiefs were also very depressed.

They looked at the ten or so nine-headed snake tribe cultivators sitting in front of them. They wanted to question them, but when they thought about their status and strength, they could only pretend to be mute and listen to their battle plan.

As for whether he was cursing the other party in his heart, that was unknown.

the enemy we're going to face this time is quite strong. They don't belong to any tribe in our Water World, but from a place called the world of towers!

The leading four-star horde leader was the first to speak. He swept his gaze over the various tribe leaders and spoke in a calm tone.

As soon as these words came out, the expressions of the clan leaders immediately changed. They were nervous, excited, and suspicious at the same time. Some people even began to feel uneasy, as if they wanted to say something but stopped.

"My Lord, is what you said true?"

what's going on?" a middle-sized tribe leader suddenly stood up and asked the leader of the four-star tribe. There was a trace of urgency and doubt in his tone.

For many years, the lost race on the sea had been working hard to leave this Water World Cage, but all of them had failed without exception.

Unknowingly, they had slowly given up on this plan and had resigned themselves to their fate.

However, the resources in the water world were limited. Even if they had done their best, they could only barely make sure that their people could live a life of food and clothing. Even if there were any slight movements, they would face the danger of death and hunger.

At the same time, the sea monsters that were hidden in the deep sea would appear from time to time, devouring the tribesmen without restraint.

Even with the Guardian's aura, there were still some powerful Hydra that could ignore the aura and destroy the tribe that they had worked so hard to build.

In fact, these tribes that were envied and envied by the vagrants on the sea were also living in misery. However, their lives were better than those of the vagrants on the sea!

To the clan leaders, they had had enough of such a life. However, because they could not leave the water world, they could only grit their teeth and bear with it.

But now, the nine-headed snake tribe had told them that the enemies they were about to face were a group of enemies from outside the water world. This meant that they had a chance of leaving this cage.

If that was the case, then even if the nine-headed snake tribe didn't force them to join the battle, they would still fight for this chance!

However, was he telling the truth?

The eyes of the other tribal chiefs were also shining as they looked at the four star horde leader of the nine-headed snake tribe with great anticipation.

Everyone held their breath, waiting for his answer.

Although the four star horde leader was being questioned, he didn't show any signs of displeasure. Instead, he smiled and said indifferently, "I'm not going to lie about this, I'm 100% confident!

Perhaps you don't know, but more than 200 years ago, our nine-headed snake tribe had a fierce battle with the cultivators of Lou Cheng and captured a group of them!

It was from their mouths that we learned about the situation in the outside world. There are tall mountains and rivers there, and an endless amount of food. It's a vast land that can allow us to gallop!"

The four stars horde leader's face was flushed red, and there was a hint of longing in his eyes. It was obvious that he was also looking forward to such a scene!

"And the enemy we are about to face is from that world!

As long as we can defeat them, we will have a chance to leave the water world!

There aren't many opportunities like this. Who knows how many two hundred years it'll be before the next one comes?"

At this point, the four star horde leader's expression turned grave. He glanced at the tribe leaders present and said in an extremely serious tone, "Patriarchs, I believe that you all know very well that this Water World is definitely not a place for us, the maritime race, to stay for long.

Although it looks like we can barely survive for the time being, once something happens, we won't be able to escape. We'll all be buried under the endless sea!

Therefore, in order to ensure that the bloodline of the sea's vestigial tribe will not be cut off, we must find a new way out, and the enemy that appeared in front of us is our only chance!

Moreover, the purpose of this enemy's appearance is to exterminate all of us, the vestigial tribe of the sea. Therefore, even if we don't make a move, they won't let us off!

This battle was destined to be unavoidable!

We must win this battle, or we'll be doomed eternally!"

At this point, the surrounding tribe leaders were already excited. Each of them clenched their fists tightly, their eyes bloodshot, and their fighting spirit soared. They could not wait to start a decisive battle with the Holy Dragon City.

During that time, the process of their conversation was spread by a Holy master beside them using a secret spell, so that all the remaining maritime races in the surrounding seas could hear them clearly.

An inexplicable emotion surged in the hearts of all the sea vestigial tribe members. Then, it spread and gathered above the sea around the sea Spirit tribe, making the air seem to become oppressive and heavy.

All the sea remnants were filled with excitement. Their eyes were filled with desire, and they emitted a frightening fighting spirit.

The words of the nine-headed snake tribe's 4-star horde leader had already aroused the desire of all the remnant races on the sea for land and rich food.

...

At this moment, their fighting spirit was high. They were extremely eager to defeat the Holy Dragon City and escape from this water cage that made them feel despair and collapse.

"Defeat the Holy Dragon City and charge out of the water world!"

It was unknown who shouted this sentence, but it suddenly received the response of countless people. Then, these voices joined together, causing more and more people to join in. They stretched their necks and roared, their voices resounding through the clouds.

Hearing the roar, the Chiefs of the tribes looked at each other and made up their minds.

When the four star horde leader heard this earth-shaking roar, he revealed a smile and slowly stood up from his chair.

All of a sudden, a frightening aura burst out from his body. He ignored the power of the water world and relied on the water pillar to lift him up to a height of nearly 30 meters.

He glanced at the garbage warships around him and the sea vestigial tribe members who had an expectant look on their faces. He raised his arms and shouted loudly.

"Defeat the Holy Dragon City and leave the water world!"

"We will definitely win!"

When the sea tribe members heard this, they immediately cheered and waved the weapons in their hands. They continuously thrust the weapons into the sky and roared in response.

"Defeat Holy Dragon City and leave the water world!"

...

"We will definitely win!"

"We will definitely win!"

"We will definitely win!"

Chapter 898 thousands of soldiers and horses

If there were more than ten thousand people, there would be no end to it. If there were more than a hundred thousand people, it would tear the earth and the sky!

The nine-headed snake tribe was determined to win this battle. With all their strength, they had gathered more than 100000 people in the Allied army!

There were more than 10000 trashy warships alone. When they gathered together, they looked like a Moving Continent, which made people's hearts jump.

Moreover, these garbage ships were carrying a large number of sea vestigial creatures. The total number was estimated to be more than three hundred thousand!

Once such a huge Army set out, the scene was truly magnificent.

As far as the eye could see, there were all kinds of garbage warships everywhere on the sea. With the giant warship of the nine-headed snake tribe as the center, they spread out on the sea of the water world and kept moving forward.

In addition to the garbage warships on the surface of the sea, there were also a large number of sea monsters swimming slowly under the sea, following the garbage warships.

They were all sea monsters tamed by the tribes on the sea, and they had strong combat power. Naturally, they were brought along for this battle.

Among them, there were dozens of sea monsters that were the size of small mountains and were covered in thick scales.

Looking down from the surface of the sea, one could only see a huge black shadow moving slowly. Its body was even bigger than the giant warship of the nine-headed snake tribe!

The sea remnants who were advancing with the Army were moved by the majestic lineup in front of them and immediately felt a sense of heroism.

There was still a trace of fear in their hearts, but after knowing the origins of Holy Dragon City and seeing their powerful lineup, they threw it all out of their minds.

What these tribal warriors wanted to do the most now was to immediately meet with Holy Dragon City and start a bloody battle to their heart's content. They wanted to completely defeat them!

Many of the sea's remnant race had this thought, causing the entire Army to be filled with fighting spirit and murderous intent!

On the deck of the nine-headed snake tribe's garbage warship, a group of tribe leaders were looking at the sea in front of them with serious expressions.

This time, the battle formation was huge. There were hundreds of thousands of sea remnants. Just the number alone was enough to make people feel frightened.

But even so, they still didn't let their guard down.

Whether it was the nine-headed snake tribe that had fought with the cultivators in the city or the tribe leaders who had heard of the terrifying power of the weapons in the Holy Dragon City, they all knew that the battle that was about to happen would not be as easy as they had imagined.

In the face of absolute strength, numbers could not play a decisive role.

The greatest use of these tribal warriors was to pin down the Holy Dragon city's weapons, giving the tribal cultivators enough time to launch a decisive attack on the Holy Dragon City.

In this kind of battle, cultivators were the main fighting force!

Even though they knew that countless clansmen would lose their lives in this battle, they had no choice but to grit their teeth and make sacrifices in the face of the temptation to leave the water world.

I hope the nine-headed snake tribe didn't lie to us. Otherwise, even if they are one of the three main tribes, I won't let them go easily!

One of the tribe leaders said with a dark expression. He looked down at the long bundle on his back. His eyes revealed confidence and reluctance.

The item in the bag was a special weapon that their tribe had obtained by chance from the treasure-spraying beast hundreds of years ago. It was extremely powerful.

Other than being the tribe's protector, this weapon was another treasure used to deter the enemy!

This time, when he was forced to participate in the war, the clan leader had brought this treasure out to prevent any mishaps.

However, although this treasure was powerful, there was a limit to the number of times it could be used. Now that there was only one chance left, the tribe leader was really reluctant to use it.

However, facing the temptation of leaving the water world, he had already made up his mind. Once the Allied forces fell into a disadvantage, he would not hesitate to use this treasure to fight for a chance of victory for the Allied forces.

In order to escape the cage of the water world, he decided to go all out!

In fact, it wasn't just this tribe leader who had brought powerful weapons. All the other tribes, big and small, had their own trump cards, and they had also brought them along for this joint operation.

As for the nine-headed snake tribe, they had far more war weapons than these small tribes because of their deep heritage. However, the battle had not yet begun, so they would not easily show them to others.

However, these tribal chiefs were very clear that the giant objects covered in black cloth on those garbage warships were probably the secret weapons of the nine-headed snake tribe.

Just as the Alliance Army was slowly advancing, a cultivator on a garbage ship at the forefront suddenly cast his gaze into the sea.

He stretched his hand into the sea and caught a strange fish that looked like a Dolphin with a long tail but was only the length of an arm.

After the strange fish was caught, it immediately opened its mouth and made cries of different lengths at him, as if it was saying something.

The cultivator nodded, took out a piece of dried fish-like food from his pocket, and stuffed it into the strange fish's mouth. Then, he turned around and raised a small flag, sending a message to the command ship in the distance.

The tribal warrior in charge of communication on the command ship saw this and immediately said to the four-star Lord beside him, "traces of the enemy have been discovered ahead. They are about four hours away from us. The exact number of warships is unknown!"

The sea tribe in the water world had their own way of keeping time, which was similar to the original world.

The four star horde leader, who was the Commander-in-Chief, pondered for a moment before turning to his subordinates. "Tell them to continue their investigation and to report back any information about the enemy."

After the cultivator in charge of leading the way saw the signal, he immediately stretched out his hand and rhythmically tapped on the strange fish for a while, then released it into the sea.

However, as soon as the fish was released into the sea, another strange fish rushed to him against the waves.

The cultivator was bewildered and quickly picked it up. He then carefully listened to the fish's cry.

report, there's more news. The number of enemy warships has been confirmed. There are twenty large warships, two floating island warships, and hundreds of small ships. At the same time, there are countless garbage ships following!

When the 4-star horde leader heard this, he nodded his head slightly. From the current situation, at the very least, they had the advantage in terms of the number of warships.

At the thought of this, he could not help but relax a little. He ordered his men, "order the scouts in front to continue hiding and find out the enemy's exact information without missing a single detail!"

Following the order, another strange fish was released into the water, and then it sped towards the sea ahead at an extremely fast speed.

This strange fish that looked like a Dolphin was a communication sea beast used by the nine-headed snake tribe to send messages. They were extremely fast in the ocean, and it didn't take them long to travel a distance of dozens of miles.

At the same time, a huge fleet was slowly advancing in the sea in front of the Allied forces.

Compared to the tribal Coalition's spectacular scale, although this fleet was slightly inferior in terms of numbers, their momentum was not any weaker.

Twenty warships that Tang Zhen had used various means to get were breaking through the calm sea surface. There were large and small ships guarding them.

On these warships, Holy Dragon city's soldiers with serious expressions had already entered a state of battle readiness.

In the middle of the warship, two metal floating islands were leading the giant wooden rafts loaded with hack machines.

...

At this moment, these wooden rafts were also filled with human figures. They were the servant army wearing simple armor.

Further away were the garbage ships that followed closely behind the Holy Dragon city's Army. There were thousands of them!

There were even some travelers on the sea who paddled in the sea because the garbage ships could not fit them, closely following the Holy Dragon city's constant advance.

The moment the Allied forces discovered the Holy Dragon City, the Holy Dragon City, which had long sent out reconnaissance equipment, had also discovered the traces of the Allied forces.

Looking at the vast fleet that almost covered the entire sea, everyone's face revealed a grave expression.

Chapter 899 The collision before the final battle

"Oh, this bunch of sea barbarians are really ruthless!"

On the metal floating island, looking at the holographic image on the giant screen, an officer of the Holy Dragon City shook his head and said in disdain.

He had a Golden Star on his chest. According to the military ranking system of the Holy Dragon City, he was a major, and his strength was that of a 1-star Lord!

As for the sea barbarians, it was what the Holy Dragon city's Warriors called the remnant race of the sea. From the words, it could be seen that the Holy Dragon city's residents were somewhat disdainful of these enemies.

No matter when, the invader would always be on the stronger side. When faced with a Conqueror, they would naturally have a faint sense of superiority.

This was a common problem of intelligent creatures, even the soldiers of Loucheng city were not immune to it.

After hearing the words of this Holy Dragon City officer, everyone smiled.

Among the people present, other than the Holy Dragon City soldiers recruited from the original world who were in charge of operating all kinds of technological equipment, the rest were all Lord-level cultivators, and their own strength was beyond doubt.

To them, numbers were not the deciding factor in a battle, especially the ordinary people, who could only be regarded as cannon fodder.

Only the cultivators in the tribes were worthy of their attention!

However, due to the lack of cultivation resources in the water world, the number of cultivators here was also very small, and their average level was not high. Against the Holy Dragon City, which had excellent equipment and many high-level cultivators, they did not have any advantage!

Amidst the laughter of the officers, a Lieutenant Colonel in black armor with two golden stars on his chest laughed and said, "Although the ships of these sea barbarians are broken, their combat strength is not to be underestimated!

As the saying goes, many ants can kill an elephant. Once these cannon fodder swarm us, even if we have the advantage in weapons, we'll definitely be flustered. If we're not careful, the tribal cultivators will find an opportunity.

According to the analysis of the information we've gathered over the past few days, these tribes also possess a large number of weapons from the Otherworld that they've obtained from the rifts in the sea. They're powerful and strange.

If those tribal cultivators get close to the warships and use these weapons, we will definitely suffer casualties, so we have to be careful!"

When everyone heard this, they immediately fell into deep thought.

"If that's the case, why don't we make use of our weapon advantage and launch an attack before they get close?

This way, before the sea barbarians get close, we will suffer huge losses. First, it can affect their morale, and second, it can reduce the pressure of the battle!"

A young Holy Dragon City officer said. When he saw everyone looking at him, he continued,"So my suggestion is to first use the remote-controlled automatic weapons to give these sea barbarians a taste of their power.

Then, when they got close, they would use thundercloud bombs, incendiary bombs, and other weapons to bombard them.

When they were within the range of the machine guns and grenades ... We'll launch a large-scale attack, then quickly pull away and form an encirclement. This way, we'll be able to form a Crossfire net and suppress them until they can't even lift their heads!"

"As for the surprise attack launched by the enemy's cultivator teams, as well as the underwater defense work, we must not neglect it to avoid unnecessary losses!

As long as we can do this, we'll basically be invincible!"

When Tang Zhen, who was conversing with Tai Seng and the others, heard this, he smiled and nodded at the officer. He then looked at the crowd and said,"Do you have any different opinions on this attack plan? if not, we will do it this way!

They're just a bunch of sea barbarians, you don't have to put them in your eyes!"

Everyone smiled after hearing Tang Zhen's words. The trace of pressure that had originally been in their hearts had completely disappeared at this moment.

In fact, this was indeed the case. With the current armed forces of the Holy Dragon City, how could these remnant races of the sea be a match for them?

Looking at the confident Holy Dragon City cultivators, Tang Zhen smiled and walked to the deck outside the conference room with his hands behind his back. He looked at the fleet that was constantly moving forward.

those tribal cultivators are indeed not worth mentioning, but we must pay attention to their guardians. Otherwise, we will easily suffer a big loss!

Tang Zhen looked at the sea region ahead as a trace of solemnness appeared in his eyes as he spoke indifferently to Tai Seng who was behind him.

At this moment, he could clearly see the Horde Army that almost covered the entire sea area.

The truth was indeed as he had said. Although these temporarily pieced-together tribal Allied forces looked extremely astonishing, they were merely a motley crew in the end. Tang Zhen did not place them in his eyes.

However, the Guardians that these tribes might summon were not to be underestimated.

After all, according to the captured Black Dragon, the more powerful the sea tribe was, the higher the concentration of the bloodline, and the more powerful the tribe's Guardian would be.

This time around, there were dozens of tribes joining forces. Who would be able to know in advance if there was an existence that even Tang Zhen was unable to fight against among the protectors that they had summoned?

In fact, before this battle, Tang Zhen had already made preparations to use a nuclear bomb. It was to prevent guardians that exceeded his level from appearing in this battle to display his strength!

However, after Tang Zhen lit up his law stars and mastered over ten kinds of rather powerful law applications, his confidence had become incomparably sufficient!

With the use of these laws as his backing, Tang Zhen was confident that he could defeat or even kill those extremely powerful guardians even if they appeared at the same time!

Those who didn't comprehend nomological laws were mortals, but those who understood nomological laws were stronger than the heavens!

After obtaining the application of these laws and his comprehension of the laws becoming deeper and deeper, Tang Zhen knew that his strength was no longer the same as before.

King level cultivators who hadn't mastered the power of laws were no match for him, even if they were one level higher.

In fact, the increase in strength after reaching king class was just a helpless way for cultivators who couldn't master the power of laws to increase their strength.

Even if one's cultivation level increased, there was still a limit. Once one's cultivation reached three star King tier, the advancement of King tier would also reach its limit.

If one couldn't comprehend the power of laws, they would forever remain at the three star King tier stage and wouldn't be able to advance an inch in their life, unable to enter the next level!

And a three-star King tier who had grasped the power of law would enter a special level that was still a King tier, but higher than the king tier!

What Tang Zhen didn't know was that after the loucheng cultivators advanced to the king tier, they no longer advanced purely for the sake of leveling up. Grasping the power of laws and comprehending the power of laws had already become the ultimate pursuit of these cultivators.

After all, as long as they didn't die, their levels would increase sooner or later. However, comprehending nomological laws required opportunities and resources. That was why Origin stones that could help with comprehending nomological laws were widely used among King level cultivators.

According to the rules set by the cornerstone platform, once a king-level cultivator mastered a law, he could use the law he had mastered to give himself a King-level title.

For example, after mastering the power of metal laws, one could add words related to the power of metal laws to one's King rank title. This would allow one to know what kind of law power one had mastered with just one look at the title.

If the cornerstone platform confirmed the strength of a King-level cultivator and acknowledged his title, his name would be glorious on the cornerstone platform and known to all cultivators in the battle area.

However, such a situation was extremely rare. It could be said that it would not appear once in decades or even centuries. For example, in the savage war zone where Tang Zhen was located, there had not been a King with a law Title for nearly two hundred years.

It was also because this kind of matter was rarely mentioned that Tang Zhen, who was about to comprehend the power of law, still did not know about this information.

While Tang Zhen was deep in thought, the battle plan had already been formulated in the command room of the metal floating island.

...

the Deputy commander of this operation was Tai Seng. After seeing it, he approved of this battle plan and immediately gave the order to attack!

Chapter 900 A blood-colored meeting gift (1)

With the order to attack, a large number of busy figures appeared on the two huge metal floating islands.

Huge wooden boxes were opened one after another, and strange-looking aircraft were carried out and arranged on the deck.

These aircraft were about two meters long, silver-white in color, and shimmered with a dazzling luster. They could be remotely controlled to take off and land vertically.

As the technician activated the aircraft, the aircraft immediately buzzed and rose from the deck, covering a large area of the sea like dark clouds.

Due to the water world's restriction of not being able to fly high, these aircraft were only able to maintain an altitude of about ten meters above the sea surface and could not go any higher.

If one were to look down from the sky, one would see that these flying machines were like a school of fish swimming in the air, charging towards the Allied forces.

It didn't take long for the images sent back by the aircraft to appear on the display of the ship's technical staff.

A large number of trash warships were heading towards the Holy Dragon City Army.

Through the images on the screen, everyone saw the remnant clan members on the sea who were driving the garbage warships and the shocked expressions on their faces.

As if they had realized that these aircraft were very dangerous, the moment they approached, the garbage warships also launched dense arrows and harpoons at the aircraft.

The actions of the sea vestigial tribe were obviously to smash the aircraft into the sea.

It was also at this moment that the aircraft flying at the front suddenly exploded. With a muffled sound, countless steel balls shot out.

These spattering steel balls were like a storm, enveloping all the sea vestigial creatures below. The steel balls with terrifying kinetic energy also entered the bodies of the sea vestigial creatures!

Amidst the sound of rain hitting banana leaves, a bloody mist suddenly rose up. Countless sea tribe descendants screamed and fell, their bodies full of dense bloody holes.

The originally clear seawater instantly changed color!

As the first aircraft exploded, the other aircraft that followed seemed to be infected as well. They exploded one after another over the garbage warships.

It was like the sound of firecrackers during the new year, rising and falling one after another!

What accompanied these explosions were waves of painful wails!

The two sides had not even met yet, but the Holy Dragon City had already used a large number of flying machines to give the Allied forces a fierce show of strength!

The cost of such a micro-drone was not very high. Compared to the missiles that cost millions, it was undoubtedly more affordable.

The weapon on the aircraft was actually a small fuel-air explosive.

Although the fuel-air explosives were mainly used to kill indoor targets, they were still quite lethal when used in the open.

Moreover, these small fuel-air explosives were not ordinary weapons. They had been specially modified by the Holy Dragon city's researchers, and their lethality had been raised by more than one level.

In the face of such a terrifying weapon, the sea vestigial tribe, which only had a small amount of protection, could not resist effectively at all.

The aircrafts exploded one after another, causing blood-red splatters in the middle of the Allied forces. As the ships flipped over, people screamed in pain!

Even though the sea's native clan had raised their shields to defend, how could their simple shields block the penetration of such a terrifying weapon? many people raised their shields and screamed in pain, blood spurting out of their bodies.

"Hurry, hurry, hurry up and shoot them down!"

One of the tribe leaders was so furious that he roared as he picked up the harpoon beside him and threw it at the sky.

A series of crisp sounds rang out, and all the aircrafts that came into contact with the harpoon were sent flying by the huge force before falling back into the sea.

The Holy Masters of the tribe on the trashy warships even activated their protective shields to protect themselves and the people around them.

After the initial shock and panic, the Allied forces had already recovered from the panic.

At this time, the sea's lost race, who had recovered from their shock, launched attacks at the aircraft that were flying in the sky, almost throwing everything around them.

As more and more weapons were thrown into the sky, the aircraft that arrived behind them were destroyed one by one and fell into the sea.

Due to the water world's no-fly restriction, the power of these weapons, which could only fly close to the sea, was greatly reduced. As a result, only two or three out of ten planes would successfully detonate when they approached the tribal Coalition forces.

Even so, it still caused extremely heavy casualties to the Allied forces. The psychological pressure it brought made the Allied forces a little scared even before the battle.

By the time the last aircraft was shot down, the sea around the Allied forces was covered with floating corpses. The garbage warships were riddled with holes, and wails and moans could be heard.

The two sides had yet to come into contact, but the Holy Dragon City had already caused such a large number of casualties to the Allied forces. If they were to officially come into contact, the casualties would probably be even more serious.

For a moment, many of the tribe members couldn't help but think of retreating.

However, in the hearts of many of the sea tribe's descendants, there was an uncontrollable anger. This was because the death of their friends and family had seriously provoked them.

&Nbsp; one of the tribe leaders grabbed a flying device that had been broken into two and smashed it into pieces. His eyes were bloodshot as he let out a furious roar.

He turned around and looked at the sea behind him, his eyes filled with pain and hatred.

In just a few minutes, half of his tribesmen had been affected, and hundreds of them had been killed or injured.

As for his son, he had also been shot in the heart by the steel ball in the explosion just now and was now dead!

And that was only the casualties of his tribe. The other tribes also suffered varying degrees of casualties. In fact, almost the entire tribe was injured by the steel balls shot out by the aircraft!

Looking at the corpses and injuries of his clansmen, the chief of the tribe was so angry that he was trembling.

damn Holy Dragon City, I swear that I will definitely make you pay with your blood!

It was a pity that no one cared about the oath of the chief of this small tribe at this moment, because they were all busy treating the wounded and repairing the damaged garbage warship.

However, there were still many cultivators in the tribe who were shocked by this tragic scene. They were all so angry that their eyes were about to pop out. They looked at the blood-stained sea and gritted their teeth.

defeat Holy Dragon City and avenge our clansmen!

A tribesman stood up from beside the corpse of his companion, raised the simple weapon in his hand, and roared through gritted teeth.

When the lost race on the sea heard this, they also raised their weapons and shouted the same slogan. Their eyes were bloodshot, and they could not wait to kill their way to the Holy Dragon City and fight to the death!

In the blink of an eye, the entire sea was filled with cries for revenge. This caused the originally gloomy nine-headed snake tribe commander to slowly reveal a faint smile.

He waved his hand and shouted in the direction of the Holy Dragon City, " all troops, speed up. We'll fight the Holy Dragon City to the death and avenge our clansmen who just died!

...

As soon as he finished speaking, all the trashy warships charged forward at the same time, their speed more than twice as fast as before.
