

## Alternate 931

### [Chapter 931](#)

931 Doomsday for the tribal guardians

The vast sea area in front of the sea Spirit tribe had been completely cleared.

The natives of the water world who had gathered here were now all gathered in the distance, looking over.

Looking at this scene, the Holy Dragon City was obviously going to make a big move!

At this time, in the center of the sea Spirit tribe, a huge summoning altar was shining, as if it had been activated.

A group of fully armed Holy Dragon city's feudal lord cultivators were standing on the warships around the altar with weapons in their hands. Each and every one of them looked at the altar with a serious expression.

All sorts of highly destructive high-tech weapons that had been transported from the laboratory were all activated, locking down the space around the summoning altar!

"It's almost time, let's start!"

Tang Zhen glanced at the summoning altar as he spoke to the fatty beside him.

"Alright, I've been waiting impatiently for a long time!

Damn, I'm so bored in the water world!"

Fatty shouted excitedly. In a flash, he rushed to a warship at the side.

At this moment, the warship was filled with Guardian Summoners from various tribes. Their expressions were different, and it was obvious that they were in a complicated mood.

After all, the Holy Dragon City was going to kill the protectors of their tribes in a while, and they would be forced to do so. Under such circumstances, it would be strange if they could be in a good mood!

Fatty stood in front of the summoners and pointed at a young man.

"Come with me, I'll start with you!"

The young Summoner nodded with a complicated expression and followed the fat man to the center of the altar.

start summoning now. Remember not to play any tricks, or you know the consequences!

After warning the summoner, the fat man quickly retreated to the side and picked up a magic spear, his face full of anticipation.

Under everyone's gaze, the summoner took a deep breath and muttered something. Wisps of World Energy began to gather around him.

The altar under his feet also bloomed with light at this moment. It seemed that the summoning altar had some kind of enhancement effect on the summoner. The young Summoner was immediately invigorated.

At the same time, all the energy exploded, tearing a huge black hole in the sky above the summoning altar, emitting shocking spatial fluctuations!

“Get ready to attack!”

The Holy Dragon city’s overlords on the surrounding warships all stared unblinkingly at the black hole in the sky above the altar, a hint of excitement flashing in their eyes.

“Roar!”

A muffled roar was heard. Then, a huge black shadow passed through the black hole and descended!

After the spatial fluctuations around it disappeared, a summoned creature with tentacles all over its body and a huge mouth in the center of its body appeared. It was scanning its surroundings with a cold gaze.

Judging from its aura, it was a summoned beast with the strength of a King.

“Lowly Summoner, why did you summon the great bi an?”

A loud and strange voice came out of the king-tier summoned creature’s mouth. However, before it could finish its sentence, the nearby close-range defense cannons were activated, and a flood of metal fell on the king-tier summoned creature’s body!

“Whoosh!”

The laser cannon on the warship suddenly shot out a blinding light. In a second, thousands of light bullets hit the king-class summoned creature.

The king-level summoned beast let out a blood-curdling screech as its body was instantly burned with countless terrifying holes. It fell toward the sea with a loud crash.

“Kill it!”

Tang Zhen waved his hand with an expressionless face as he watched the struggling King rank summoned creature.

The Holy Dragon City cultivators, who had been waiting for a long time, swarmed forward, and all kinds of weapons fell on the king-level summoned creature.

In the blink of an eye, the king-tier summoned beast was chopped into a pile of meat.

“Very good, next!”

Fatty sneered and shook off the blood on his demon spear. He then turned around and waved at the other tribe Summoner.

What happened next was exactly the same as the previous process. This tribe Summoner also successfully summoned the tribe Guardian, but was killed by the Holy Dragon City cultivators!

As time passed, the tribal guardians were summoned one after another. Against the Holy Dragon City, which was well-prepared, their resistance was completely ineffective. In the end, they could not escape the fate of being killed.

During this period, some of the summoned creatures were powerful and realized the existence of danger. They began to resist with all their might and were reluctant to descend into the water world.

Every time such a situation occurred, Tang Zhen would activate the runic magic circle on the summoning altar and instantly increase the summoner's level and vitality, causing him to forcefully summon the tribal Guardian!

When these powerful otherworldly creatures descended, Tang Zhen would personally take action and kill them with the cooperation of the Holy Dragon City cultivators!

Fortunately, there weren't many of such powerful summoned creatures. The three tribes each had one, and one of them was the nine-headed snake that Tang Zhen had cut off its head!

However, the nine-headed snake was already on the verge of collapse from the flames of the laws. Its entire body was covered in charred marks.

After being forcefully summoned, this fellow did not hesitate to get up and escape. However, he was immediately stopped by Tang Zhen.

A minute later, with the cooperation of the Holy Dragon city's Lords, the nine-headed snake also became a corpse. All of its heads had been cut off, and the huge headless corpse floated up and down in the sea.

As for the other tribe guardians, they would be easily summoned and killed in a few moves!

By the time the last tribe Guardian was killed, the sea around the sea Spirit tribe had been dyed red by blood, turning into a real sea of blood!

Giant corpses of strange shapes were also floating on the surface of the sea, like floating islands. It was a shocking sight.

Tang Zhen let out a long breath after seeing this scene. His face revealed a trace of relief.

At this moment, the Holy Dragon city's grade 8 city upgrade mission should have been completed perfectly!

The next thing to do was to filter the natives here and make them Holy Dragon city's residents so that they could participate in the battle when they did not have enough troops!

...

With sufficient battle merits, it was naturally better to bring as many people as possible. The Holy Dragon City currently had a lot of resources, so it was not a problem to feed more than a hundred thousand people!

After careful training, the combat power of the water world's natives would be greatly improved. They would definitely participate in battles in the future and become one of the Holy Dragon city's main forces in conquering the other world.

As for whether these natives of the water world would remain loyal to the Holy Dragon City, Tang Zhen did not have any worries.

as long as one became a resident of the holy dragon city, their life and death would be in tang zhen's hands. as for those who harbored evil intentions, tang zhen could completely kill them without anyone knowing!

Of course, only Tang Zhen himself knew of this matter. Moreover, he planned to never tell anyone else!

### [Chapter 932](#)

#### 932 Sea of fire (1)

In the roar of guns and cannons, the powerful tribal guardians were killed by the Holy Dragon City one after another. The indigenous people of the water world who were watching the show from afar fell into a strange silence.

After personally witnessing the Holy Dragon city's formidable strength, their hearts were still filled with great shock, and they did not recover from their shock for a long time.

The mysterious weapons with terrifying power and hundreds of high-level Lord cultivators were an eye-opener for the natives of the water world.

No wonder those two large tribes would choose to compromise with the Holy Dragon City. Perhaps they had already known that they were no match for the Holy Dragon City!

"Alright, clean up the battlefield, and then send the corpses of these summons to Holy Dragon City.

That bunch of mad scientists are stretching their necks and waiting for these Otherworld beings!"

Tang Zhen said with a smile. After which, he turned around and returned to the metal floating island that had stopped at the side.

He didn't need to ask about the rest of the matters. The residents of the tower City would naturally handle it. Tang Zhen only needed to wait for the results.

At this moment, Tang Zhen was deep in thought as he sat on a chair.

When the mission was over, Holy Dragon City would be upgraded to a level nine City Tower, and then officially accept the mission of invading the other world, plundering the world's origin for the cornerstone platform!

It could be said that at this moment, Holy Dragon City could be considered a real city. Before this, it was just a novice growing stage.

From now on, Lou Cheng would no longer receive special training and care. After being teleported to the battlefield in the Otherworld, his life and death would be up to fate!

Tang Zhen seemed to be deep in thought as he looked at the huge corpses that were floating on the sea. Soon after, his entire person descended into an almost empty state.

Suddenly, a change occurred!

A faint power of law spread out from his body, and in an area of about ten meters, countless flames seemed to have become active spirits, constantly dancing.

Unknowingly, the power of the fire-elemental laws became stronger and stronger, and the area it radiated became wider and wider.

The surrounding cultivators of the Holy Dragon City all noticed this change. Feeling the terrifying power, their expressions changed.

Tai Seng, hurry up and order everyone to retreat three kilometers away. If you don't want to die, then move faster!

The fat man seemed to have thought of something and immediately jumped up to warn Tai Seng.

When he turned around and looked at Tang Zhen again, his eyes were filled with envy and admiration. At the same time, there was also a trace of worry.

When he first met Tang Zhen, the two of them had similar cultivation. However, only a few years had passed, and Tang Zhen had actually already reached such a height!

Even fatty, who boasted of his outstanding talent, could not help but be deeply impressed!

After hearing the Fatty's warning, Tai Seng, who was also staring at Tang Zhen, gave his order without any hesitation.

everyone, listen up. Retreat three kilometers immediately and take action!

The Holy Dragon city's soldiers, who had always obeyed orders, executed the military Order with unparalleled decisiveness and quickly retreated into the distance.

Not long after, the surrounding Sea area became empty. Only Tang Zhen was left in the huge Sea Spirit tribe.

At this moment, Tang Zhen seemed to have turned into an enormous volcano's mouth. The surrounding air seemed to have already started burning and was flowing unceasingly like liquid.

The searing flames caused the sea water to rise continuously, and the rolling water vapor rose into the sky. However, after floating to a certain height, it spread out like a wave.

This strange scene was caused by the water world's no-fly law!

As for the metal floating island beneath his feet, it was now like a wax figure, constantly melting in the high temperature.

"BOOM!"

In the blink of an eye, an even more berserk flame spread out with Tang Zhen at the center. It was as if it was going to burn a black hole in this Water World!

Tang Zhen's figure slowly floated up from within this terrifying flame. He was just like a king, proudly looking down on all life!

Tang Zhen had actually completely grasped the fire law without any preparation, and had become a true law King!

From this moment on, all the king-level cultivators who hadn't mastered the power of laws would be completely crushed in front of him!

Tang Zhen let out a breath and shook his head with a smile as he looked at the completely destroyed Sea Spirit tribe and the metal floating island that had turned into a pile of scrap metal under his feet.

As he controlled it with his mind, all the flames in the surrounding sea disappeared instantly!

His figure flickered and appeared before Tai Seng and the others, and he slowly spoke under everyone's reverent gazes.

"Clean up this place, I have something to do and need to leave for a while!"

later on, organize more people and collect as many treasures at the bottom of the sea as possible according to the map of the sea eye I gave you. Use them to exchange for battle credits.

it'll be over in half a month. We'll return to Holy Martial city then.

Tang Zhen's figure had already disappeared after his voice sounded, leaving behind countless bystanders who were immersed in the world-destroying might from earlier.

All the tribe's guardians were killed, and all kinds of work began one after another. The Holy Dragon City compensated the tribes on the sea according to their initial promise.

Batch after batch of resources were sent to the various tribes. One by one, the indigenous people obtained the right to leave the water world, and they were all overjoyed.

His only regret was that he was unable to bring his family out of this place. However, this was something that could not be helped. After all, the Holy Dragon City had a limited number of spots, and they could not waste them easily.

Under such circumstances, the Holy Dragon City issued another order.

From this day on, every chosen one could choose to hand over a set amount of treasures in exchange for the right to allow their family and friends to leave the water world. The limit was seven people.

When this news spread, not only were those who were selected ecstatic, but those who were not selected were also extremely excited.

After all, there was a lot of room for manipulation. If he could do it well, leaving the water world would no longer be a dream.

Overnight, those who had been selected had become hot figures. Countless eyes fell on them, and private transactions were carried out continuously.

There were even people who took the initiative to bear all the expenses in order to obtain a quota.

In just a few days, the number of treasures received by Holy Dragon City soared again.

At the same time, the fishing teams made up of the Holy Dragon City cultivators and the sea's remnant race also began to rush to the areas where the various Eye of the Sea were located, going deep into the sea to collect the scattered treasures.

...

In the past, the sea tribe did not have any underwater oxygen supply equipment, so even if they knew that there were countless treasures at the bottom of the sea, they could only look at the ocean and sigh.

However, now that the Holy Dragon City had provided them with the underwater breathing worms, the natives of the water world were like tigers that had grown wings. They were like sea beasts, constantly shuttling back and forth near the Eye of the Sea.

As time passed, ship after ship of treasures were sent to the Holy Dragon City, which were then exchanged for a large number of battle achievements. Under the continuous accumulation, the number of battle achievements obtained by the Holy Dragon City was quite considerable.

The day of the Holy Dragon city's withdrawal from the water world was getting closer and closer.

### [Chapter 933](#)

#### 933 The king of the laws

After Tang Zhen left the sea Spirit tribe, he continued to advance in one direction until he reached an uninhabited Sea region.

Having just grasped the fire-elemental laws of nature, he was extremely excited. He really wanted to test out the true power of this fire-elemental laws of nature.

However, there were too many people around the sea Spirit tribe to experiment with such a destructive method. If they lost control, it would definitely cause tragic casualties.

This area was just right.

After confirming that everything in the surrounding area was normal, a wisp of flame suddenly appeared in Tang Zhen's pupils. Following a low roar, an indescribable terrifying force spread out with him as the center.

The area within a few kilometers was completely covered in a sea of fire. The liquid flames were extremely pure and emitted a shockingly high temperature.

In this area filled with pure flames, any life would be instantly burned to ashes, with no possibility of escape!

The powerful Lou Cheng cultivators had a chance to escape, but the terrifying thing about the power of law was not its destructive power, but its ability to seal space!

Only one type of energy could exist in an area enveloped by the power of the law. All other energies would be expelled.

Therefore, when the power of law was used, the space would be completely locked. Even the teleportation ability of a king class cultivator would no longer have any effect.

Therefore, unless they escaped before the power of law erupted, they were doomed to die!

This was only the most basic use of the power of law. The law applications that Tang Zhen downloaded and purchased belonged to the flexible use of the power of law. Under normal circumstances, it would take a long time to explore and study it before it was possible to master one or two.

However, because of the magical application store, Tang Zhen completely omitted the steps of exploring and researching. As long as he had enough origin stones of various elements, he could completely exchange for all kinds of law applications!

There were very few cultivation inheritances in the world of loucheng, and they almost completely relied on the exchange of the cornerstone platform. The strongest and most complete cultivation inheritance apart from the cornerstone platform was now in the hands of Tang Zhen.

Only Tang Zhen could experience the benefits of this.

Currently, Tang Zhen's combat strength had already reached an unfathomable level. It was just that he did not have a suitable opportunity to test it. This caused him to be unclear of his true strength.

With a thought, the flames that covered the surrounding sea disappeared instantly, and the scorching temperature also returned to normal in an instant.

Only a law King could pull off such a magical technique!

After having a rough understanding of the power of the fire attribute law, Tang Zhen stood on the spot and pondered for a moment before turning around and returning to the Holy Dragon city's fleet.

The war in the water world had already entered the final stage. The remaining matters could be left to the residents of the loucheng to handle. Tang Zhen did not have to worry about everything.

Since he had spent most of his time in the water world, many things in Lou Cheng had been piled up, waiting for him to take time to deal with them.

There were three main things.

The first thing was related to the elven Kingdom.

During this period of time, the war in the elf clan's territory had become more and more serious. The flames of war spread everywhere, and battles of various scales would break out from time to time.

The elves were now divided into two camps. The rebel camp hoped to be independent and no longer under the control of the elven royal family. Unfortunately, their strength was far inferior to the opposing Royal camp.

The Royal faction hated these rebels and had already given the order that they would never let them go!

After the elven royalty paid an unknown price, the advanced towers that had previously besieged the elven tower chose to stop their attacks. This allowed the elven royalty to take a breather.

However, they did not rest and recuperate. Instead, they decided to resolve the internal strife first.

The battle between the two sides gradually entered a stalemate!

Yue qianhua's moon god tower was part of the rebellion, and because of geographical reasons, it had been besieged by the surrounding towers. Their current situation was not good.

Under such circumstances, Yue qianhua suddenly thought of Tang Zhen, who had magical means, and the powerful weapon of the Holy Dragon City.

The increasingly powerful Holy Dragon City might be the only hope for the moon goddess Pavilion to turn the tide!

Under such circumstances, Yue qianhua sent her subordinates to the Holy Dragon City, hoping that Tang Zhen would forget about the past and provide some help to the moon goddess brothel.

Of course, Yue qianhua's main purpose was to get enough firearms from Tang Zhen. She hoped to suppress and defeat the enemy with this!

In order to ensure that Tang Zhen wouldn't reject her, she showed enough sincerity and brought all of them over using a storage card.

After Tang Zhen heard this news, he didn't look surprised at all. This was because the monitoring of the fairy city had never stopped!

Tan Zhen didn't have a good impression of such a woman. Moreover, she had once schemed against him. Therefore, if it was possible, Tang Zhen simply didn't want to bother with him.

However, from the perspective of the city Lord, Tang Zhen knew that this matter would be of great benefit to the Holy Dragon City. He should not easily shirk away from it.

What's more, there were many things in the elf clan that were very useful to Tang Zhen. Now that the other party was in a critical situation and needed his help, it was natural to take the opportunity to extort.

In fact, the simplest method was for Tang Zhen to personally make a trip to the elf race's control area and directly snatch back what he wanted!

Although Tang Zhen's current strength was unparalleled in the entire Savage barren territory, the elven clan's loucheng had been passed down for thousands of years. Who knew what special means it had that could pose a fatal threat to Tang Zhen?

Even a nomological King was not invincible. He could still be injured and die!

After experiencing and hearing a lot of things, Tang Zhen gradually understood a truth. That was, the National loucheng was basically very powerful. Although some loucheng had not been promoted to the national level, they still had strength that could not be underestimated.

In fact, some loucheng were even stronger than the National loucheng, but due to some special reasons, they had not been promoted!

The elven Kingdom was one of the powerful kingdoms mentioned just now. It had a strong foundation, and ordinary national-level kingdoms might not be able to do anything to it!

Tang Zhen would not act rashly against such a clan even if there was a war within it.

Therefore, Tang Zhen did not agree or reject Yue qianhua's request. He just ignored the messenger from moon god Tower City.

When he was in a good mood, he would discuss the details of the deal with him.

In addition, there was another matter related to the elf race.

As the flames of war rose in the elf-controlled area, all kinds of Wanderers living there chose to escape. A large number of them came to the Wildlands and settled down in the forest outside Holy Dragon City.

The Holy Dragon City had strict management of this group of people. The purpose was to let them know whose territory this was!

### [Chapter 934](#)

#### 934 The platform's mutation (1)

In the entire Wildlands, only the Holy Dragon City had a large forest around it. This was also the reason why the foreign tribes had moved here.

In the beginning, they were still very unconvinced of the Holy Dragon city's management. Each and every one of them was unruly, as if they were certain that the Holy Dragon City could not do anything to them.

There were even some foreign races who had conflicts with the Holy Dragon city's soldiers, and even fought!

The Holy Dragon city's soldiers opened fire on the spot, killing several troublemaking foreign tribes. However, they did not expect to attract even more foreign tribe Wanderers, who launched an attack on the Holy Dragon city's soldiers in the dense forest!

The Holy Dragon City would naturally not show any mercy to those who tried to take over the place.

After receiving the distress signal from the Holy Dragon city's soldiers, the Holy Dragon City immediately sent out more than 20 assault helicopters, as well as a large number of combat troops, and rushed to the battle site in an extremely short time.

What followed was a bloody massacre. The foreign Wanderers who thought they were invincible in the forest revealed themselves one after another under the Holy Dragon city's high-tech weapons, and then they were attacked mercilessly!

That battle had frightened the foreign Wanderers who had tried to take over the territory, and it had also completely intimidated the other foreign tribes who had the same idea but had not taken action.

It was this battle that made these foreign tribes realize that if they wanted to live here, they had to accept the Holy Dragon city's management. Otherwise, they could either leave or die!

In a very short time, these foreign tribes were quickly counted and registered, and proof of residence was issued. They were also regularly paid rent with the harvest in the forest.

With the existence of these foreign tribes, the rich resources in the forest around Holy Dragon City could be used, which was not a bad ending.

The second matter was related to heaven battling city!

Back then, when Tang Zhen was at the giant's Tower, he had casually promised situ Yuanzhi that he would help him complete the upgrade mission for the level 9 tower.

He was indeed confident in solving this problem, but the premise was that he had the time.

After such a long time, if no one mentioned it, Tang Zhen would have even forgotten about this matter.

Now that heaven battling city might have met with great resistance, situ Yuanzhi recalled what Tang Zhen had said back then. Perhaps he was just giving it a try, so the other party sent an envoy to Saint Martial city, hoping that Tang Zhen could make a trip to heaven battling city when he had the time.

The other party didn't mention a specific time; after all, this matter had troubled heaven battling city for many years, so there was no rush!

Tang Zhen really wanted to see the foreign world's battlefield in the level nine Tower City. This way, he could also gain some experience, which was greatly beneficial to the Holy Dragon City!

For the towers, level 9 was a dividing line. Whether or not they could cross this step and become a national-level tower was of great importance to each tower.

Moreover, the newbie battlefield wasn't as simple as he had imagined.

Under normal circumstances, the foreign world invaded by the level 9 building city was basically a battlefield that provided resources and equipment for the building city. Although the comprehensive strength might not be very high, it was still full of unknown dangers.

If he was not careful, it was not impossible for him to suffer a crushing defeat on this newbie battlefield!

As a result, heaven battling city had been troubled by this task for many years, but it was not strange that they had not made any progress.

If he had the opportunity, Tang Zhen would really like to pay a visit to heaven battling city.

He had indeed yearned for this human city, which was inextricably linked to his original world!

The third matter was related to the black prison tower!

The cultivators of the Holy Dragon City who went to investigate the black prison tower had returned with detailed information.

Just like the information he had received earlier, the underground space where the black prison tower was located had long been empty. Only a small number of residents were left to guard the territory.

As there was no time limit for the invasion of the Otherworld, it was not rare for it to take decades or even centuries. Therefore, it was unknown how many years it would take for the black prison tower to return.

The previous plan against the Holy Dragon City was carried out by the residents of the black prison tower. Unfortunately, under Tang Zhen's efforts, their plot did not succeed!

Tang Zhen hated the black prison tower that had almost destroyed the original world and the Holy Dragon City. He had long planned to take revenge on it.

Unfortunately, the heavens did not grant his wish. Because of the departure of the black prison tower, his plan was temporarily foiled.

However, this matter was just like a thorn that had pierced into Tang Zhen's heart. If he did not resolve this matter, he would ultimately feel uncomfortable in his heart.

Therefore, after becoming a law King, the thing he wanted to do the most was to head to the area where the black prison tower was located and turn its lair upside down.

When the black dungeon tower was transmitted back to the world of towers, they would be greeted by a wasteland!

To make a powerful National City homeless, this kind of thing was very exciting to think about!

The most important point was that the underground space was extremely important to the black prison tower. It was an important supply point for their strategic materials. If it was destroyed, the black prison tower would definitely be furious!

.....

After returning to the Holy Dragon City, Tang Zhen went to the cornerstone platform alone to check the total number of Battle Points he had exchanged.

As all the tribal guardians had been killed, the tower's upgrade mission had been successfully completed. As long as the natives of the water world were brought back to the Holy Dragon City, the teleportation gate would be completely closed.

After completing the upgrade mission, Holy Dragon City could also be upgraded to a level 9 city at any time!

Standing in front of the foundation stone platform, Tang Zhen took out his identity card and placed it on the stone wall beside him.

However, the moment his identity card touched the wall, a strange light suddenly burst out. The entire foundation stone platform seemed to be like a huge light bulb, illuminating the entire room!

"Hmm, what's going on?"

Tang Zhen's brows twitched. He stared at the foundation stone platform that was undergoing an unusual change without blinking. A trace of caution flashed across his eyes.

Tang Zhen had always had a sense of distrust towards the cornerstone platform that every tower had. Therefore, he would try his best not to use it unless it was necessary to do so without the cornerstone platform.

The change in the foundation stone platform lasted for a very short time. In the blink of an eye, the entire platform had returned to normal.

However, at this moment, a line of bold text suddenly appeared in the public advertising area on the cornerstone platform.

[ Holy Dragon city's city Lord Tang Zhen has successfully been promoted to a law King. Special notice to the entire battle zone! ]

Tang Zhen's expression changed slightly after seeing those conspicuous large words. His eyes contained a trace of a strange expression as he stared at the foundation stone platform for a long time.

He seemed to have thought of something, but he wasn't sure, so he shook his head from time to time.

### [Chapter 935](#)

#### 935 An unusual cornerstone platform (1)

Tang Zhen originally had a premonition that all the residents of the building world were actually under the monitoring of the cornerstone platform.

Although the foundation stone platform was usually inconspicuous, it was likely to be the first to know if there was any movement.

For example, this time, Tang Zhen had just advanced to become a law King. Just now, he had only provided an identity card, and the cornerstone platform had already sensed the change in Tang Zhen's strength. It even did not mind that it was a big deal and made a platform announcement that covered the entire Savage war zone.

In this case, even if Tang Zhen wanted to keep a low profile, it was likely that he would not be able to do so!

It was conceivable that many people in the wilderness would see the announcement and spread the news quickly.

Tang Zhen's name would also resound throughout the entire wild war zone.

The world of loucheng was vast, and news spread very slowly. Perhaps before today, they did not know much about the Holy Dragon City, or even had never heard of it.

However, from today onwards, they would definitely remember the name of Holy Dragon City. They must also firmly remember that the Lord of Holy Dragon City was a powerful ruler of laws.

If he came into contact with the other party in the future, he had to be careful to avoid provoking a terrifying law King.

The king level was the dream of countless cultivators in loucheng, and becoming a law King was the goal of King level cultivators.

However, comprehending nomological laws was countless times more difficult than raising one's level. Only a few King level cultivators could cross this threshold!

This also caused the loucheng world to occasionally have three-star Kings who had reached the limit of the king level, but no king level cultivators who had mastered the power of law!

Even in the higher level loucheng, three-star Kings could be found everywhere. Only the Kings of laws were the true elites!

The wilderness Warzone was weak and ranked at the bottom of the 3000 warzones. Tang Zhen's sudden appearance would have a huge impact on the situation in the wilderness Warzone.

Sometimes, when the cornerstone platform judged the true strength of a building, the cultivation base of the cultivator in the building was also an important reference standard.

It could be said that Tang Zhen had directly elevated the Holy Dragon city's status with his strength alone.

Just as Tang Zhen was silently thinking, another notification popped up on the cornerstone platform. However, this notification was only for him and not for the entire wilderness battle zone.

[ the Holy Dragon City Lord has been promoted to a law King, and his authority has been upgraded. You can now view the information of the platform for the corresponding level. ]

This kind of change was something that had never happened before. Ever since Tang Zhen came into contact with the cornerstone platform, its performance had always been like a passive trading device. It had never actively interacted with Tang Zhen.

But just now, it had two unusual performances in a row.

cornerstone platform, do you have your own independent thoughts? "

Tang Zhen looked at the foundation stone platform in front of him and asked in an indifferent tone.

After a long silence, the cornerstone platform did not react, as if nothing had changed.

"Could it be that I'm overthinking it?"

Just as Tang Zhen was prepared to give up, the foundation stone platform flickered with light and two sets of words popped up.

[ Lou Cheng, who has a law King, will have the opportunity to be qualified to participate in the mission of the entire theater of Lou Cheng world. Please upgrade Lou Cheng's level as soon as possible and become a national level building! ]

[ the Holy Dragon City is far more powerful than ordinary loucheng, and its comprehensive ranking in the war zone is close to the top ten. ]

[ as the Holy Dragon city's potential index is extremely high, as a reward, after the Holy Dragon City is upgraded to a level 9 City Tower, you can choose to designate a foreign world to carry out an invasion mission. ]

Tang Zhen let out a long breath when he saw this. However, a bright light flickered in his eyes.

This was indeed a pretty good reward. Because in this way, Tang Zhen only needed to find a world that was on the weaker side and he would be able to easily complete the advancement mission.

Compared to the uncertainties of the cornerstone platform's assignment of tasks, choosing to invade the world on their own was undoubtedly more secure.

Even so, the series of changes on the cornerstone platform still caught him off guard.

However, Tang Zhen still remained calm as he secretly analyzed the reason for the change in the foundation stone platform.

This situation showed that the Holy Dragon city's rocket-like rise might have already attracted the attention of the cornerstone platform.

Or perhaps the reward just now had already been prepared by the cornerstone platform, and the reason why it hadn't been released earlier was that it was lacking in maturity.

However, after Tang Zhen advanced to a law King, this reward was given to Holy Dragon City in a timely manner.

Just like a boss who didn't keep useless employees, the cornerstone platform provided Lou Cheng with all kinds of benefits and training. The ultimate goal was to plunder the origin of the world.

With the cornerstone platform's nature, it would never allow a super helper like the Holy Dragon City to do nothing. It must have long thought of how to get the Holy Dragon City to help.

Tang Zhen had yet to make sufficient preparations for the invasion of the other world. Therefore, this notice had caught him somewhat unprepared.

However, what was done could not be undone. There was no possibility of withdrawing the missions issued by the cornerstone platform. Otherwise, they might suffer unknown punishments.

Therefore, while using the cornerstone platform, he would also be restricted by it. This was something that could not be helped.

What Tang Zhen needed to do was to think of a way to actively respond.

Tang Zhen was very interested in the increased authority. After thinking for a moment, he started to operate on the cornerstone platform.

As expected, after his privileges were upgraded, the things he saw were completely different from before!

On this cornerstone platform, the ranking of the towers in the entire war zone appeared. As mentioned in the notice, Holy Dragon City was currently ranked tenth.

As for the top nine floors, Tang Zhen had only heard of one. It was the seventh-ranked black prison tower!

Tang Zhen's eyes slightly narrowed after seeing the other party's ranking.

Just as he had predicted, his opponent's strength was not simple. He was actually ranked seventh in the entire battle zone.

From this, it could be seen that the black prison tower must have a very powerful trump card, which was not an ordinary cat or dog.

Tang Zhen could not help but secretly rejoice that he had not rashly taken any extreme actions against them. Otherwise, he might suffer a great loss if both parties were to clash head on!

Tang Zhen moved his eyes away from Lou Cheng's strength ranking and glanced at the material exchange and skill exchange area.

There were also changes in the system. There were many more items suitable for high-level cultivators, but the price was still extremely expensive.

Tang Zhen was very interested in some of the items on the list. However, the high prices caused Tang Zhen, who was embarrassingly short of money, to shrink back.

...

The pitiful amount of Battle Points on his identity card was not enough to do anything at all!

During this period of time, he had been trying to collect treasures from the water world and had accumulated a lot of battle merits. However, these battle merits were very useful and could not be used easily.

Fortunately, it was not necessary to buy these things. Therefore, after Tang Zhen took a glance, he turned his gaze to other areas.

As he looked around, he finally found something that interested him.

It was a teleportation stone tablet used to activate teleportation. In the past, the divine Dragon was unable to purchase it because he did not have enough authority. Now that Tang Zhen's authority on the platform had been raised, he finally had the right to purchase it.

With this thing, he could activate the teleportation in front of his house in the future, and he would be able to travel ten thousand miles in an instant!

After buying two cards and two teleportation stone cards as a backup, Tang Zhen took off his identity card. After taking a deep look at the cornerstone platform, he slowly walked away.

After Tang Zhen left, the foundation stone platform suddenly flickered twice before quickly returning to its original appearance.

### [Chapter 936](#)

#### 936 A disgusting weapon (1)

Tang Zhen returned to the hall where he handled his official Affairs after walking along the long passage inside the building.

The afterglow of the setting sun shone on the huge viewing balcony, and the mother tree's magnificent figure was draped in the glow of the sun, looking magnificent.

This was his own city, and every blade of grass and tree was so fresh and beautiful.

Putting aside the true purpose of the towers, just by looking at their environmental transformation and energy gathering functions, it could be said that every tower was qualified to be called a paradise!

Cultivating in the tower was much faster than cultivating outside.

In the process of admiring the beautiful scenery, his eyes inadvertently fell on the huge statue of the six-armed giant. Tang Zhen stopped and took a few careful glances.

The original form of this giant statue was a building of a national state. The huge figure that covered the sky and the terrifying combat strength that could kill countless cultivators with a raise of his hand was something that Tang Zhen could not forget.

Under normal circumstances, such a national-level city was almost invincible!

However, even such a powerful building could not avoid the fate of destruction. This made Tang Zhen a little more worried about the future of the Holy Dragon City.

Especially when he was being watched by the cornerstone platform, this kind of worry faintly increased a bit.

Tang Zhen shifted his gaze away and walked to his carved desk made of mind refreshing incense wood. He slowly sat down on the large chair.

"Go and call Zhang Jiukui, who has just returned from the black prison tower. I have something to ask him."

The assistant at the side nodded. After fiddling with the communicator for a while, he turned around and walked into the room at the side, serving Tang Zhen a cup of fragrant drink.

This was a type of precious seaweed that was a specialty of the water world. After washing and drying it, it was crushed into powder and had a unique flavor when drunk.

When the two tribes visited Tang Zhen, they had given him a lot of them as gifts.

Tang Zhen sipped his seaweed tea and flipped through the information on the table. His brows would occasionally furrow.

Not long after, a burly man wearing standard battle armor pushed open the door and entered. He gave a military salute to Tang Zhen.

Holy Dragon City cultivator squad, scouting team captain Zhang Jiukui, greets the city Lord!

Zhang Jiukui, who had given himself a name in the style of his original world, looked straight at Tang Zhen with a hint of fanaticism in his eyes.

"You've had a long journey, please sit!"

tang zhen walked out from behind the table and brought zhang jiukui to sit on a chair with a smile of admiration on his face.

The black prison tower was ten thousand miles away from the Holy Dragon City. The environment was dangerous and the terrain was complex. The other party was able to make two round trips in a short time, which was enough to prove his ability.

Tang Zhen had always attached great importance to such subordinates. At the same time, he would try his best to compensate them.

He wasn't a miser. Whenever there was something good, he would always think of his residents first. He wouldn't hesitate to pay anything.

After all, this was his own city, and the people who enjoyed the resources were his own residents.

With effort, there would naturally be returns.

On the other hand, what Tang Zhen had obtained was a group of loyal elite cultivators who would go through fire and water just because of a single sentence from him!

"City Lord, do you want to go to the black prison tower again?"

After Zhang jiukui sat down, he placed the drink his assistant had brought to the side and asked in a tone filled with anticipation.

This man's face was dark, and there was a strong look between his brows. Even though he was seriously injured during the mission, he still completed the mission perfectly.

He did want to return to the black prison tower and find the guy who attacked him and take revenge!

He, who had a straightforward personality, had faintly guessed Tang Zhen's goal. Hence, he impatiently opened his mouth and asked.

Tang Zhen nodded when he heard this. He took out the information that Zhang jiukui and the others had gathered and scanned through it before saying, you're right. I do need you to go to the black prison tower for something. How is it? is there any difficulty? "

Hearing this, Zhang jiukui's muscular body suddenly stood up. He looked ahead and shouted, " please give the order, city Lord. This subordinate will definitely not let you down and will resolutely complete the task!

There was no complaint, no hesitation, and his straightforward answer had already shown his attitude.

Tang Zhen nodded his head and stood up from his chair as well. He patted Zhang jiukui's shoulder.

"Good, as expected of the Holy Dragon city's elite!"

"I have an item here that I need you to send to the black prison tower and then find a time to detonate it!

Although this kind of weapon is not very destructive, it is enough to disgust the abyss prison tower for a long time. It can be considered a small punishment for them!"

Looking at the curious Zhang Jiukui, Tang Zhen explained with a relaxed expression.

“Don’t worry, city Lord, I won’t let you down!”

Although Zhang Jiukui wanted to ask what kind of weapon it was, he knew that if Tang Zhen didn’t say anything, he didn’t have the authority to ask.

This was a secret operation against a national-level building. It was of great importance, so they had to be careful!

don’t worry, I’ll remember what you and the other brothers have done. When we return from this mission, I’ll personally welcome you back!

Hearing this, Zhang Jiukui’s face lit up with excitement. It was an honor to be welcomed by the city Lord personally!

If his brothers knew about this, they would probably be even happier than him!

At the thought of this, he suddenly raised his fist and pounded it on his chest. He shouted, “I’m willing to go through fire and water for city Lord, even if it means death!”

After another military salute to Tang Zhen, Zhang Jiukui turned around and walked out of the door with vigorous steps.

Tang Zhen looked at the figure of the other party as he left. He smiled softly and called his assistant over.

“Go to the weapons laboratory and take out five of the Super Skunk bombs that those guys made. Hand them over to Zhang Jiukui along with the instruction manual.

These five bombs aren’t small. Go to Murong Ziyang’s place and take out two storage cards, then give them to Zhang Jiukui as well!”

The young assistant nodded and immediately turned to leave. He went to handle the matter according to Tang Zhen’s instructions.

However, when he heard that Tang Zhen was going to use a stink bomb, the assistant’s expression was extremely interesting. He seemed to have thought of something as the corner of his mouth twitched slightly.

...

The skunk bomb developed by the Holy Dragon City was even more overbearing than similar weapons in the original world!

The smell of this kind of weapon was more pungent, and it would remain for a longer time. Moreover, it had a stronger permeability, making it extremely difficult to remove once it was contaminated.

Even if the contaminated object was soaked in water, it would take several years to completely remove it!

Therefore, although this kind of weapon looked soft, its destructive power was more lasting and annoying.

If the five Super Skunk bombs were detonated in the underground space where the black dungeon was located, it would definitely become a real hell, because even the dirtiest creature could not stand the smell.

It was estimated that from now on, there would be no living things in that place!

One had to admit that the city Lord's move was simply too disgusting.

### [Chapter 937](#)

#### 937 An accident in the valley (1)

The power of the Holy Dragon city's skunk bomb had already been tested on live humans. When the terrifying smell spread, normal creatures would definitely not be able to withstand it!

During the experiment, a group of ferocious monsters were thrown around by the stench. They wailed and ran around in the cage, trying to get rid of the horrible smell.

Although the effect of this thing was not bad, it had to be used with caution, or it would definitely be a disaster!

Therefore, after this thing was developed, it had been stored in the warehouse and had never been used.

Tang Zhen had also read the information that mentioned that there were many strange creatures in the underground space of the black prison tower. They were inseparable from the lives of the black prison tower's residents. Only then did he suddenly think of the special weapon, the skunk bomb.

He did plan to use this Super Skunk bomb to disgust the black Dungeon World. This was also a big gift he had prepared for the other party since they were not in the dungeon World and could not fight face to face!

This method might seem like child's play, but if used properly, it would definitely be more effective than directly using lethal weapons.

One day, when the obelisk finished the war to invade the other world and returned to the Holy Dragon City through the transmission channel, they would suddenly find that their home had become a place with a terrible stench that could almost kill people. How wonderful would their expressions be?

Perhaps this group of dark-skinned guys' faces would definitely be as black as the bottom of a pot, and they would definitely be furious.

Tang Zhen could not help but burst into laughter when he imagined the miserable appearance of the residents of the black dungeon floor covering their noses and running away without a care for anything.

After laughing, Tang Zhen lowered his head and looked at the unfinished official business on the table. He could not help but scratch his head and continued to work on the table.

As the Lord of a city, he was not as relaxed as he had imagined. At this moment, Tang Zhen felt that it was very tough for him.

.....

Just as Tang Zhen was busy dealing with official business, Zhang Jiukui received his weapons and equipment. He led a group of Bandit-like Holy Dragon City cultivators and headed straight for the black prison tower.

Last time, they had suffered a small loss at the black prison tower. The residents of the black prison tower who had stayed behind to guard the place had used their familiarity with the terrain to their advantage and ambushed them. This time, they had to get back at them no matter what.

Who knew what would happen to the black prison tower after they got Tang Zhen's approval?

At the same time, in a certain area outside Holy Dragon City, a group of young men and women in simple clothes and armor were gathered together excitedly.

The real-life game launched by the Holy Dragon Corporation had already started operating on a small scale. These curious young men and women were the first players to come to the world of Loucheng.

The magical Soul transmission technique and the magnificent scenery of the other world shocked them and made them exclaim in admiration!

The only thing that made them unhappy was that other than the designated area, the Holy Dragon City did not allow them to go to other places.

If one looked down from above, they would find that the activity area of these players was actually a place surrounded by mountains. However, there were mountains and water, and the area was very large!

The mountain peak that surrounded the venue was Tang Zhen's handiwork. Only he could do such a thing overnight.

And according to the plan, a total of twelve such game venues that were enclosed by mountains had to be built, surrounding a large area outside the Holy Dragon City.

The main purpose of this was to prevent these players from running around and disrupting the normal order of the Holy Dragon City.

Moreover, the safety of the players could be greatly guaranteed in such a completely sealed venue.

In fact, with Holy Dragon City's current strength, they did not care how much income this realistic game could bring in.

The other purpose of its existence was to observe these players and select the most talented ones. Then, the Holy Dragon City would step in and recruit them as residents of the Holy Dragon City.

This was also a method that Holy Dragon City had no choice but to come up with in order to ensure that they had sufficient manpower.

After all, the game was based on the real world. When the players participated in the game, they could bring out their natural talents as much as possible. Therefore, the quality of their talents could be seen at a glance during the game.

He believed that in the days to come, those who participated in this game and performed well would be recruited by the Holy Dragon City with high benefits. At the same time, they would be qualified to migrate. This wave would spread to the entire original world and become the goal of countless people.

Moreover, through this game, the residents of the original world could understand the world of loucheng as much as possible, gradually turning the original world and the world of loucheng into an inseparable whole!

Just as they had expected, after seeing the magical scenery of the world of loucheng and feeling the comfortable natural environment, the players were deeply fascinated by the world of loucheng!

At this time, a team of players was constantly advancing in the dense forest, ready to find a special herb needed for a quest.

They laughed as they walked, not noticing that there were shadows flashing in the grass around them.

“Whoosh!”

A sharp arrow pierced through the grass and flew over with the wind. A young man who was walking in front of the team was directly shot in the chest by this sharp arrow.

He looked at the grass in front of him in horror and fell to the ground with a face full of unwillingness.

“F \* ck, why does this game really kill people?”

Before the young man lost consciousness, he roared unwillingly.

With the death of the host body, the young man’s soul was quickly extracted, and then guided by the soul transmission array, he was sent to the world of wishes.

In a residential building in a certain city in the Asian Alliance, an indignant roar was heard.

A young man sat up from the soul transfer cabin and ruffled his messy hair in frustration. He looked exactly like the young man who had just “died”.

“Damn it, I’m having fun, why do you want to kill me?”

The young man was filled with grief and indignation. After shouting a few words, he quickly applied for a new host body.

The first host was free, but the second one would cost money. However, the young man was not short of money. He just wanted to get a new host as soon as possible and then transfer to the world of loucheng to continue the game!

However, when he saw the seven-digit number on the application list, the young man suddenly felt dizzy.

The Holy Dragon City had a limited number of hosts. Who knew when it would be his turn?

”

The young man roared towards the sky, his face full of grief and indignation.

In the world of Loucheng, in the game Valley.

The sudden attack caused the players to panic, their faces filled with fear.

Fortunately, they all knew that the death of the host body did not mean the death of the main body.

Therefore, despite the chaos, most of the players still quickly drew their weapons and got into a defensive posture.

...

Who are you? how dare you kill people? aren't you afraid of being discovered by the patrol team? ”

The leader of the group was a female student with a long sword in her hand. She looked fearless.

As for the other players, they quickly issued a danger alert and informed the Holy Dragon city's patrol team to come as soon as possible.

However, what answered them was a series of sharp arrows.

A few players could not Dodge in time and were shot by the arrows. They screamed in pain and fell to the ground.

The girl was also shot in the shoulder. Fortunately, the protection of the leather armor was good, and the arrow only penetrated half an inch into her flesh!

A series of gibberish shouts came from the forest, and dozens of bandits in tattered clothes suddenly emerged from the forest. They held crude bows, arrows, sabers, and spears in their hands, and pounced toward them with ferocious expressions.

Vaguely, they seemed to see a dilapidated building, faintly visible in the forest.

When the bandits got closer and their faces came into view, everyone's expression changed.

“This is a Suan ni monster!”

...

### [Chapter 938](#)

#### 938 I only ask for a battle (1)

The appearance of the large group of bandits in tattered clothes and armors and armed with weapons could only be associated with monsters!

A normal human being would not be covered in smoke and fire, and the skin on their body would not fester and fall off. They would not be covered in fatal wounds, and one could even see the broken internal organs through the wounds!

The most important thing was that their eyes were dead gray. They were not the eyes of a living person at all, but a feature that only dead creatures had!

When the bandit monsters charged at the players, a putrid smell of decay hit them head-on, making them want to vomit.

Without a doubt, they were a group of pure monsters!

However, in this Valley built for the players of the original world, how could there be such a monster that would take the initiative to attack them and even kill them?

This situation didn't make sense at all?

Although in order to deliberately pursue the realism of the game, some real battles would be added in the process of the game, they would try to avoid casualties as much as possible, and they would not actively kill the players.

Firstly, he was afraid of causing psychological trauma to the players. Secondly, it was also a waste of resources and money to recover and repair the host body. Therefore, he wanted to avoid damage as much as possible.

Therefore, no matter what, Holy Dragon City would never do such a thing.

Just as the players were wondering, the group of Bandit monsters had already rushed up.

Their numbers far exceeded the group of players, and their movements were quite fast and their cooperation was very tacit.

Even though they had turned into monsters, they still retained their combat instincts from when they were alive.

If one ignored their obvious signs of death and covered their faces, they could be treated as a group of normal Raider team members.

"What are you waiting for? everyone, run!"

It was unknown which player shouted, but as soon as he finished speaking, several players in the party immediately turned around and ran without hesitation!

In a situation where they couldn't win, they had to learn to immediately turn around and escape. This was something that their instructor had deliberately instructed them to do during their training.

This was the wisdom of survival, the best way to deal with danger.

Therefore, their current actions were not shameful. On the contrary, they were very wise choices.

Among the remaining players, a few of them tried to turn around and escape. However, when they saw that there were still seven or eight players who did not retreat, they hesitated and shouted loudly.

"Are you guys stupid? why aren't you running?"

Looking at the seven or eight companions who were excited and eager to fight the bandit monsters, they were extremely confused.

Could it be that the few of them had suffered brain damage during the process of transmigration, so much so that they didn't know how to escape when they encountered danger?

He was really unreasonable!

Although they were using a host body and did not have to worry about real death, it did not mean that they were willing to experience the taste of death!

After calling out a few times and seeing that their companions still ignored them, the few players shook their heads and quickly fled into the distance.

Those bastards, just wait to be chopped into meat paste by the monster!

At this moment, the players who were still standing in their original positions could only feel their bodies trembling uncontrollably. That exciting feeling made them unable to help but roar in excitement.

The reason why they dared to stay here was that they would not really die, and the patrol team in the valley had already arrived. As for the third reason, they wanted to really experience the feeling of fighting in the cold weapon battlefield.

This was something that they had planned before they headed to the world of towers. Unfortunately, plans could not keep up with changes. The Holy Dragon City had actually confined them in a Valley, not allowing them to leave at all.

This also made them extremely depressed. They kept feeling that something was missing from this trip!

However, the situation took a turn for the better. A large number of Bandit monsters unexpectedly appeared in the valley. This made the few of them feel hot-headed for some reason, and they all chose to fight against the bandit monsters!

At this moment, their companions were running for their lives behind them, and the enemies were swarming in front of them. They stood between the two, and they felt their blood boil.

"You guys run, we'll cover you!"

"For the sake of your comrades, for the sake of justice, you can die!"

"Glory is my life, a true knight will fight to the death!"

Words that sounded like Chuunibyouto words suddenly came out of the players' mouths. At the same time, they roared and pulled out their weapons, clashing with the bandits and monsters that were charging at them!

The sounds of weapons clashing could be heard as the players in armor held their sharp swords and quickly engaged the bandit monsters in battle.

Before entering the world of loucheng, every player had to go through the most basic Combat Training, which included boxing and machine fighting.

Therefore, even if they weren't proficient in this field, they had some understanding of cold weapon combat. They had some understanding of how to make a few decent moves, attack the enemy, and protect themselves.

Moreover, among the players who stayed, there were indeed a few fighting experts. Otherwise, they would not have wanted to experience a real battle!

They stood back to back, facing the attacks from all directions. Blood was constantly splashing on the grass.

The battle was still going on. After a few rounds of fighting, the players had already made some gains. At this time, on the ground around them, there were nearly ten corpses of Bandit monsters.

This kind of realistic combat experience made these players extremely excited, even their eyes became blood red.

However, as the battle continued, their good luck came to an end!

A Bandit monster with a battleaxe rushed up and swung the huge battleaxe at the back of a player's neck while he was not paying attention.

Although the axe was full of rust and covered in dark red blood, the blade was unusually sharp.

In the blink of an eye, the battle-ax landed on the neck of the player. There was no resistance in the process, and the battle-ax cut off the neck of the player.

A head with an expression of unwillingness and shock rose into the sky as the battle axe streaked across!

“Plop!”

The headless corpse fell to the ground, but its limbs were still struggling. There were still sparks on the wound on its neck.

This player was using a semi-mechanical host body. If pain perception was turned off, he would not feel any pain at all.

However, in that case, the players would feel like they were trapped in an iron can, no different from playing a holographic game.

...

This kind of experience naturally wasn't as satisfying as the real touch!

However, in a battle, this function could make the players even more powerful, greatly increasing their combat power!

This was another main reason why the players chose to stay. Without the interference of pain, they believed that they could become superhumans!

However, ignoring pain didn't mean that the host wouldn't die. As the head was cut off, the host body would automatically determine the death of the host and stop working completely!

In the host body that was killed, the player's soul was filled with unwillingness. However, in the blink of an eye, his soul was instantly sucked away by the teleportation circle and thrown back into the game teleportation cabin in the original world!

[Chapter 939](#)

939 Why fear death?

After the first player was killed, the second player left the team and was surrounded by several Bandit monsters, who pierced his body with Spears.

As the bandit monsters roared excitedly, the player's body was lifted high up and thrown onto the grass.

A Bandit monster with a machete rushed up and cut it in half.

"Damn it, I actually died so tragically!"

The player who had been cut in half roared in grief and indignation before falling to the ground, dead!

Unsurprisingly, his soul was thrown back into his original body in the original world. He rushed out of the game's teleportation cabin and looked at the ceiling, gasping for breath.

Soon after, the third player also paid a heavy price because of a small mistake.

One of his eyes had been blown up by the stone attacks from the bandit monsters. Just as he was about to retreat to his comrades, one of the bandit monsters shot an arrow that went through the back of his head.

The player's movements were frozen, and he fell head first onto the blood-stained grass.

At this moment, there were only five players left in the game.

They had been surrounded by the bandits 'monsters, and their bodies had suffered a large amount of damage. If they hadn't turned off their sense of pain, they would have fainted from the pain.

"No, we have to retreat immediately. If this continues, we'll all die Here!"

A brawny man in light armor used the broadsword in his hand like a baseball bat. After smacking away a knife-wielding criminal monster, he roared at his companions.

"But there are so many monsters around us. How are we going to retreat?"

The five players gathered back to back, facing the bandit monsters 'attacks while shouting loudly, discussing how to retreat.

A true warrior not only needed to know how to kill enemies, but also how to protect themselves. What they needed to do now was to kill their way out of the enemy's encirclement. Only then could it be considered a perfect fighting experience on the battlefield.

If they were all killed, that would definitely not be the result they wanted!

how do we retreat? we'll just charge out. Do you expect these monsters to open a path for you? "

A pale-faced player roared. At this moment, his appearance was quite funny. There were no less than seven or eight sharp arrows stuck in his body, and even his head was staring at a sharp arrow that had pierced through his scalp!

Fortunately, these sharp arrows did not hit any vital points, so it was not enough to make the host body he was using meet the death standard and stop working!

“Damn it, what is Holy Dragon City thinking? Why didn’t he design the host body to be a metal shell? that way, he wouldn’t be afraid of the monsters “attacks!”

One of the players was seriously injured and probably wouldn’t be able to hold on for long. At this moment, he looked at his body that was covered in wounds and couldn’t help but curse.

“Come on, you’re talking about Transformers!

We’re here to participate in a real game, so naturally, we have to use a body that suits our physical condition the most. If I give you a metal lump, what’s the deal with that?”

The group resisted the attacks of the bandit monsters as they slowly advanced in the direction they came from.

Although three of their comrades had already died and they were covered in injuries, they were no longer nervous at this moment.

After all, it was not their bodies that were injured, so they did not fear death. On the contrary, this life-and-death battle scene made their hearts burn with pride!

They were even prepared to be killed, but before they died, they had to drag a few more Bandit monsters down with them!

When he returned to his original world, he would have enough to brag about this to his friends.

Hehehe, ask those guys who went to the world of loucheng, how many of them have killed monsters with their own hands?

This bro was one of them, and I’ve killed more than one.

The scene of being envied, jealous, and hated by his friends made him excited just thinking about it!

Therefore, what they had to do now was to break out of the enemy’s encirclement alive!

However, in the process of retreating, their defense once again made a mistake. As a result, another player was seriously injured. A javelin pierced through his chest, and his heart was instantly shattered.

brothers, I’ll be leaving first. Remember to kill a few more monsters for me!

A bitter smile appeared on the player’s face as he spat out a mouthful of blood. Then, with a loud shout, he pulled out the javelin that was stuck in his chest and killed the bandit monster that had attacked him. He then fell to the ground.

“Don’t worry, I won’t let you die in vain!”

The remaining four players laughed and cursed. Looking at their companion’s body on the ground, their fighting spirit erupted again, and they cut down several Bandit monsters in succession!

However, these Bandit monsters were not afraid of death. Even though they left countless corpses on the path of the players’ retreat, they still rushed toward the players.

After another round of fighting, two of the remaining four players were exhausted and pierced by the spears of the bandit monsters.

“Brother, take care. I’ll be leaving first.”

brothers, hang in there! I’ll treat you to a drink later. We won’t stop until we’re drunk!

The two players’ tone was full of unwillingness, as if they were full of regret that they could not continue to fight. Unfortunately, the host body judged them dead according to the degree of damage.

Just as the host body stopped working, the two players were sent back to their original world at the same time.

The remaining two players looked at each other. Their faces were covered in blood, but their tired eyes were still burning with fighting spirit.

“Hahaha, I like this feeling!”

that’s right, this is a real man’s battle. It’s worth it to have this once in a lifetime opportunity!

The two who had managed to hold on to the very end had no part of their bodies intact. Their clothes and armors had long been torn to pieces, and their arms that were holding onto their weapons were constantly trembling.

But even so, the two of them still did not give in. They still stood back to back so that they would not fall down because of their weak legs.

At that moment, seven or eight spear-wielding Bandit monsters gathered together and thrust their Spears at them at the same time.

To the two exhausted players, this attack was a killer move that they had no way of dealing with!

“Pfft!”

The sound of sharp blades piercing into bodies rang out as seven or eight Spears pierced through the two players. The light in their eyes gradually disappeared, and the swords in their hands fell.

...

“Brother, I’ll see you later!”

“Definitely!”

The two of them spoke in a weak tone, and a weak but proud smile appeared on the corners of their mouths. Their two hands, which were covered in blood, held together with all their strength.

“Whoosh, whoosh, Whoosh!”

All of a sudden, a series of whistling sounds came through the air. A strange-looking aircraft suddenly appeared in the sky above the two of them. At this moment, it had already locked onto the criminals and monsters. The gun barrel that popped out from below began to shoot continuously.

Every bullet that carried powerful kinetic energy had extremely high accuracy and speed!

In front of the aircraft, there were only Level 1 and Level 2 Bandit monsters that had no way of resisting.

In just a dozen seconds, all the criminals and monsters in his sight were shot, and the ground was covered with mutilated bodies.

After the two players saw this scene, their eyes flashed with shock and envy, and they fell to the ground with a bang.

The players who had escaped earlier were leading a group of Holy Dragon city's patrol members and rushing towards them at full speed.

...

## [Chapter 940](#)

### 940 Something's wrong \_1

what did you say? a wild building suddenly appeared in the valley in the game!

Tang Zhen was originally at the Holy Dragon city's monster experimental base, strolling around with da Xiong and the four-armed little boy. He was also checking if the researchers had made any special discoveries after obtaining the corpse of the tribal Guardian.

In the end, he suddenly heard this news not long after he arrived!

"Under normal circumstances, although there will be wild buildings in Lou Cheng's control area, the probability is undoubtedly much smaller.

But this building is so close to Holy Dragon City, and it's even in our outer Urban area. This is a bit surprising!"

"I have a feeling that this matter isn't that simple!"

Tang Zhen said to Qian Long as he looked at the real-time video on the wrist-mounted computer.

"Actually, I've heard of something similar. There was once a wild building that blocked the gate of a certain city building, making it impossible for the residents to enter and leave.

It was said that the monsters in the wild building were very powerful. It took a long time and more than half of the soldiers were killed before the building was destroyed!

Of course, I don't know the exact details. In fact, whether this is true or not still needs to be verified!"

Qian Long spoke to Tang Zhen after pondering for a moment.

"If that's the case, then perhaps I'm just overthinking it!

Let's go and see what kind of building it is this time!"

After Tang Zhen said this, he let da Xiong lead the four-armed little boy to the side to play. Then, the two of them prepared to take a helicopter to the game Valley.

Before he left, Tang Zhen seemed to have thought of something. He suddenly stopped and said to Big Bear by the side, "Big Bear, do you know how many ogres you have now?"

The big Bear, who was sucking on its finger, immediately touched its shiny bald head with its fan-sized palm and answered with a puzzled look, "Three hundred, five hundred, seven hundred, how many hundred is it?"

Grandpa Wan told me a few days ago, but da Xiong can't remember. I'll go ask Grandpa Wan now!"

As da Xiong spoke, he pulled on the four-armed boy, clearly planning to escape.

you, remember to learn more about culture and knowledge when you have nothing to do. Don't just play all day. You're such a worrisome fellow!

Tang Zhen pointed at da Xiong and jokingly scolded. After which, he looked at the little boy standing to the side and extended his hand to rub his similarly shiny little bald head.

"And you too, remember to learn more things from big brother, or the next time I come, I won't bring you candy to eat!"

This sentence was more effective than any order!

When they heard Tang Zhen's warning that if they didn't study hard, they wouldn't give them candy, da Xiong and the four-armed little boy immediately patted their chests and promised that they would study hard and strive to read the numbers from one to one hundred smoothly!

Tang Zhen smiled when he heard this and walked out of the monster research base with Qian Long.

In fact, he was very concerned about da Xiong's Ogre army. He had only said that to tease this simple-minded man.

Da Xiong clearly knew how many pieces of candy he had, but he still didn't know how many subordinates he had, because he couldn't count!

However, this didn't affect da Xiong's leadership talent. He believed that it wouldn't be long before the ogre army that Tang Zhen had carefully trained would show off their strength on the battlefield!

At this moment, Tang Zhen and the rest had already flown into the sky.

The game Valley was some distance away from the Holy Dragon city's inner city, but if they took the military helicopter, it would not take long to reach it.

Looking down from above, the game Valley was surrounded by a square-shaped mountain range. The trees inside were tall and green, making the valley look like a huge potted plant.

The Fairyland-like scenery made this place look like a paradise!

If someone were to build a city Tower here, they would probably not have to worry about being harassed by monsters before the City Tower reached Level 4 or 5.

This was because the surrounding thousand-meter-high steep mountains were the best safety barriers.

However, its current use was to prevent players from leaving this place to avoid unnecessary trouble!

It could be said that the game Valley was a completely closed game world. Even if the players crossed into the world of loucheng, they could only participate in the game and experience the scenery of the other world. During this period, they would not have any contact with the real world of loucheng.

This was also the decision that Tang Zhen made after careful consideration.

Because the situation in the world of loucheng was complicated, and loucheng itself was inextricably linked to plunder and occupation, Tang Zhen didn't want the residents of the original world to come into contact with too many things related to this.

Therefore, what was shown to them was only a beautified world of loucheng!

After all, the real world was much crueller than one could imagine, and people might not like it!

The Holy Dragon Warriors on duty had already seen the arrival of the helicopter and immediately guided it. Then, the helicopter slowly landed on a lawn.

Tang Zhen and Qian Long jumped down from the plane and slowly walked to a cave below the cliff.

The cave was over a thousand square meters in size, and there were many electronic devices in it. Through these devices, one could monitor every move in the entire game Valley.

The staff would analyze all kinds of data and remotely command the patrol drones to deal with all kinds of accidents in time.

Currently, there were a few dozen Holy Dragon City residents in charge of the daily work here. Most of them were technical talents recruited from the original world.

At the same time, there was also a security force used to maintain order. They were on standby at all times. When they received an alarm, they would respond in an instant and arrive in the alarm area in a very short time.

However, the accident this time was a slap in the face for the security guards.

The sudden appearance of the monster had caused a total of ten players to die. This was no small incident. Although the players did not really die, the nature of this incident was very serious.

It was not an exaggeration to say that the Holy Dragon City cultivators in charge of security were negligent in their duties!

After seeing Tang Zhen and Qian Long appear, a Holy Dragon City cultivator wearing black Standard battle armor walked up to them. He stood straight and had a look of shame on his face.

"City Lord, this was an accident, but I'm indeed responsible. Please punish Wufu."

The Holy Dragon City cultivator tried to explain, but was stopped by Tang Zhen.

alright, you don't have to explain. It's not a big deal anyway. Just be careful next time!

In fact, even Tang Zhen didn't expect that a wild building would appear in the outer area of his Tower City. This situation was too special. It was reasonable for his subordinates to not be on guard.

...

There were many buildings in the game Valley, so no one would notice the sudden appearance of a building. Moreover, the building was located in the forest, so it would be difficult to notice it if it appeared in the blind spot of the surveillance.

If not for the sudden appearance of the monsters, it might have taken some time for the patrollers to discover the building!

“What’s the specific situation? tell me in detail!”

Tang Zhen and Qian Long mounted their mounts in the valley and asked the Holy Dragon City cultivators beside them.

In order to make the game as realistic as possible, technological tools were not used in the valley, and the main mode of transportation was also riding beasts.

Even if they were using technological equipment, they would try their best not to let the thousands of players in the valley see it. After all, that would be too out of place and affect the gaming experience.

“A total of eight players have died, and their damaged host bodies have been recovered. However, these players are quite powerful, they actually killed more than 40 monsters!

As for the building, it has been cleared out and all the monsters have been subdued. The items in the building have also been sorted out and sealed.”

The Holy Dragon City cultivator said to Tang Zhen as he controlled the war beast he was riding.

well, there shouldn’t be any problems now. Let’s go and take a look now!

The group of people rode on their mounts, kicking up a trail of dust as they galloped towards the location of the wild building.

...
