

## Alternate 941

### [Chapter 941](#)

941 The simple yet not simple wild building

Ten minutes later, they arrived at the scene of the incident.

An Otherworld-style building built with rammed earth and rocks, which looked like a bandit's hideout, suddenly appeared in the dense forest.

The building area was not small, and the style was ancient and unsophisticated. It looked quite desolate and somber. One look and one could tell that this was not the place where good people lived!

In this game Valley with beautiful mountains and rivers, there was actually a building with such a bloody smell. It really spoiled the scenery.

The style of this game Valley was mainly for leisure and entertainment. It was designed to create a relaxing environment for players.

Fighting and killing could not be seen here at all!

Of course, in the days to come, Holy Dragon City would also build some new game valleys one after another. They would put monsters in appropriate places for players to kill.

The game valleys where the monsters were placed would be personally built by Tang Zhen to be in a completely sealed state. If one wanted to enter, they would need to use a short-distance teleportation array!

With all the information they had, the Holy Dragon City had successfully completed the experiment in this area. The single person teleportation circle within a hundred kilometers had already been built and used.

The style of the wild house in front of him was similar to the style of the game valleys that were to be built. They all had a trace of iron-blood related to killing.

Tang Zhen, under the protection of a few cultivators, walked into the wild building that had been cleaned up.

It could be seen that this was a very functional bandit camp. There were carefully repaired deep-water wells, storage rooms, training grounds, prison cells, and other buildings.

On the surrounding earth walls, there were also wooden towers for easy observation and shooting.

Looking at the size of the building, it could accommodate at least four to five hundred people.

Skeletons could be seen everywhere in the corners of the village. They were tied to pillars and imprisoned in cages. This proved that these bandits were not good people. They probably killed people and robbed people on a daily basis.

Perhaps it was because evildoers were doomed to destruction, the bandits had provoked some kind of powerful enemy that caused the stronghold to suffer a fatal blow and be completely destroyed in an instant!

It was also because of this that it was able to become a wild building and appear in the world of loucheng.

After walking around the village that was filled with the smell of sulfur, Tang Zhen walked out under everyone's gaze.

However, there was a trace of doubt in the corner of his eyes, as if he was thinking about something.

However, he did not say anything from the beginning to the end. Instead, he walked to the pile of items from the wild building.

Tang Zhen sized up the pile of tattered weapons and armors, as well as the scattered coins and miscellaneous items. He then casually picked up a gold coin made of gold.

Tang Zhen's body trembled unnoticeably the moment the coin entered his hand. A surprised expression flashed across his eyes.

With another wave of his hand, he kept all the items on the ground into his storage ring.

since the hidden danger has been dealt with, let's keep this building. Those monsters are useless. Get rid of them all!

Tang Zhen's figure soared into the sky after he issued the order. He then headed straight in the direction of the inner city.

He had a lot of questions in his heart that needed to be verified.

According to his observation, the world where this building was located was somewhat similar to the medieval era of his original world, which was a generation of cold weapons.

And this type of world was the most suitable world for doing newbie missions after Holy Dragon City was upgraded to level 9!

In this kind of low-energy world, there was no need to worry about encountering powerful native cultivators, nor did they have to worry about coming into contact with the highly destructive high-tech weapons of the technological world.

With the Holy Dragon city's current strength, they could practically sweep the world in this low-energy world!

For such a wild building to appear under such circumstances, it was only natural for Tang Zhen to be suspicious.

After arriving at the Holy Dragon City, Tang Zhen did not stop and went straight to the room where the foundation stone platform was located.

In the room, there were a few Holy Dragon City residents who were trading in front of the cornerstone platform. After seeing Tang Zhen, they immediately retreated, leaving Tang Zhen an independent and quiet space.

Tang Zhen took out a coin from a Random House and fiddled with it in his hand. He then raised his head and looked at the foundation stone platform in front of him.

“The Holy Dragon City was about to be promoted to a level 9 city and accept the mission to invade a foreign world. However, at this critical moment, a wild tower appeared in the Holy Dragon city’s outer city area.

This situation is a little abnormal no matter how you look at it!”

There was no one in the entire room when Tang Zhen was speaking. However, the contents of his words did not seem like he was mumbling to himself. This situation was rather strange.

“And looking at the items in this building, I reckon that the other world it’s in is also a world that specializes in cold weapons.

There was no lack of resources or opportunities to train in this foreign world. Even if there were cultivators, the level of danger was still acceptable.

And this kind of Otherworld is the most suitable choice for Holy Dragon City to do the advancement quest.”

When Tang Zhen said this, he randomly tossed the gold coin in his hand and stared at the foundation stone platform in front of him.

I just want to ask you now. Did you deliberately bring this to Holy Dragon City to show the world? ”

After waiting for a long time, there was no response from the cornerstone platform.

This situation was within Tang Zhen’s expectations. However, even though this was the case, he was still like a lunatic as he asked the foundation stone platform.

This was because he always had a feeling that this cornerstone platform was definitely not simple. It must be hiding some unknown secret.

Moreover, the wild tower that appeared this time was indeed too abnormal. The place where it appeared was clearly recognized by the cornerstone platform and was already under the control of the Holy Dragon City.

Such a situation should not have happened. Otherwise, what difference would there be between Lou city, a safe zone, and the wilderness?

Unfortunately, the cornerstone platform remained silent as usual. It directly ignored his probing. Tang Zhen was also helpless in this regard.

Tang Zhen was not discouraged even though his probing did not yield any results. He would not reject such a benefit that was delivered to his door. That would instead appear somewhat unwise.

In fact, one of the problems that Tang Zhen urgently needed to solve at the moment was how to choose which foreign world to invade.

There was more than one alternative world. For example, he already had clear plane coordinates for the wasteland world.

However, the wasteland world could be transported through mobile phones. If it was chosen as the Holy Dragon city's invading world, it would undoubtedly be a great waste of resources.

One had to know that every Otherworld was like a huge treasure, so naturally, the more one had, the better.

...

It wasn't unheard of for a national-level building to repeatedly clear an Otherworld, but rather, it was quite common.

For one, this could maximize the benefits. A familiar foreign world was always easier to control than an unfamiliar foreign world. For another, the coordinates of a foreign world were extremely precious. Once it was analyzed and confirmed by other towers, items from the same foreign world would no longer be able to analyze the plane coordinates.

The most common way to obtain the coordinates of a known Otherworld was to trade, and it also depended on whether the other party was willing to sell it to you.

Therefore, none of the towers would give up on this one-time free gift.

After receiving the notification from the cornerstone platform, although Tang Zhen was somewhat regretful and reluctant, he decided to choose the foreign world he wanted to invade.

In this way, the safety and success rate would be greatly improved!

For this Holy Dragon city's novice mission, he even planned to go to heaven battling city and pay some benefits in order to obtain the world coordinates he already knew.

After that, he would filter out a relatively safe world from these coordinates to complete the first show of Holy Dragon City!

However, it seemed that these plans were no longer necessary.

Chapter 942 Another special world? \_1

It wasn't easy to obtain plane coordinates from other towers, because plane coordinates were priceless.

One more city knowing about it was equivalent to one more city sharing resources. If it wasn't for the benefits, no one would do this deal!

With these items obtained from the wild building, Tang Zhen could spend a certain amount of Battle Points to analyze the plane coordinates through the cornerstone platform.

If the matter was really as he had guessed and this was a foreign world that had never been located and invaded, then Tang Zhen would have made a big profit!

Although wild buildings often appeared in the world of loucheng, many of them came from the same foreign world, but they appeared in different areas.

The other worlds were like containers full of holes. From time to time, buildings belonging to that world would enter the world of loucheng after being destroyed.

After that, Lou Cheng invaded these foreign worlds and plundered the world's origin wantonly, which made the situation worse!

There were also some wild towers from other worlds that would only accidentally enter the tower world during destruction under rather special circumstances!

In any world like this, there was no experience in dealing with the invasion of Lou Cheng. The most common reaction was chaos.

In the past, there had even been a national-level city that had invaded this world and completely plundered the world's origin in just one year!

Whether it was true or not, it wouldn't take long to know.

With a wave of his hand, a portion of the items from the wild building that he had just put away appeared and were placed in front of the cornerstone platform.

After Tang Zhen's level of authority was upgraded, he already had the qualifications to analyze and locate the items in the wild building.

He quickly found the option to analyze the plane coordinates and chose to confirm.

A white light appeared and enveloped the items. It only faded away after about ten seconds.

At the same time, his personal Battle Points were almost all deducted, leaving him with a pitiful three-digit number.

All he had to do was wait until the cornerstone platform analyzed the plane coordinates of the items in the wild building.

After leaving the room where the foundation stone platform was located, Tang Zhen came to his own training room and casually took out a handful of coins.

After gently bringing it close to his phone, the mysterious star hidden in the law star suddenly reacted.

[ discovered an item with a special world's origin aura. Do you wish to absorb and analyze the plane's coordinates? ]

Tang Zhen's eyes slightly narrowed after seeing this set of words. A bright glint continuously flickered within them.

After the discovery of the item in the wild building, the location, and the transmission to the wasteland world, Tang Zhen had once ordered people to collect a large number of items from the wild building to test the reaction of the mysterious star. In the end, they were busy for a long time without any effect.

Tang Zhen did not insist. He also temporarily gave up on this kind of time-consuming and laborious matter.

However, the sudden appearance of the items in the wild tower had once again triggered a strange reaction on the mysterious star.

When he had first encountered these items in the game Valley, Tang Zhen had already discovered the changes in the mysterious star. Although he was a little shocked at that time, he did not show it.

However, he kept thinking in his heart. Could it be that this wild building in front of him also came from a special world?

At the same time, he also wanted to find out whether it was the influence of the cornerstone platform or the mysterious star that caused such a wild building to appear in such an illogical way.

Of course, Tang Zhen himself was more inclined to the former. This was because although the ability of this phone was magical, it might not be able to interfere with the time and location of a building's appearance. After all, there were too many things involved in this.

If the phone could really do this, it was impossible for Tang Zhen not to notice it at all, so the possibility of this was minimal.

On the other hand, the mysterious cornerstone platform might be able to do this easily!

Regardless of who did it, the one who would ultimately benefit was him. When Tang Zhen thought of this, he no longer felt conflicted.

The reaction of the mysterious star allowed Tang Zhen to be extremely confident that this was another special world.

As for the specific origin of this foreign world and whether it was related to the original world, the staff of the technology Department would need to analyze and verify it before they could finally determine its specific origin.

What Tang Zhen needed to do now was to use his phone to retrieve the plane coordinates. Then, before Lou Cheng activated the teleportation, he would first teleport to that other world and prepare for the next invasion mission.

After all, the teleportation of loucheng was too loud, while the teleportation of mobile phones was silent. If he wanted to investigate, he would obviously choose the latter.

Furthermore, it would be more convenient for him to teleport back and forth if he chose this world!

Another 1,000 origin stones were consumed. At the same time, a long progress bar appeared, indicating that the analysis was in progress.

However, when he continuously enlarged the mysterious star, he was very surprised to discover that the mysterious star seemed to have changed!

Originally, only the single-person teleportation option was lit up, but now there was a group teleportation option, which was emitting a faint light.

Tang Zhen was slightly stunned when he saw this. He was actually completely unaware of the changes in this mysterious star!

However, during this period of time, he had indeed been extremely busy. It was reasonable that he had not discovered the changes in the mysterious star.

There was nothing to worry about. The key was to see if there were any other changes besides this.

So far, among the three teleportation options on this mysterious star, other than the tower teleportation option, which was not lit up, the single and group teleportation options were all lit up, which was definitely good news.

Although his strength was not weak, when he was in the other world, it was inevitable that he would feel a little lonely and helpless, and his hands and feet were bound when doing things.

If there was a helper accompanying him, it would undoubtedly provide him with great convenience!

Even though the group teleportation would consume a certain amount of origin stones, it was still within Tang Zhen's acceptable range. However, the effect was definitely worth it.

Looking at the group teleportation option that was flashing with light, Tang Zhen really wanted to test it out immediately. What was the upper limit of this group teleportation?

However, the Holy Dragon city's promotion was imminent, and Tang Zhen could not leave at all. Moreover, teleporting once would consume a large number of origin stones. Hence, he decided not to try it unless it was necessary.

Even the wasteland world that he had teleported to twice, Tang Zhen would not easily teleport it without great confidence.

This was because the strange situation he had encountered during the second teleportation still left him with lingering fear.

That mysterious time reincarnation Whirlpool seemed to contain great danger. Once he fell into it, only God knew if he could escape.

Such uncontrollable and dangerous situations were naturally avoided as much as possible.

After pondering for a while, Tang Zhen's gaze shifted away from the phone's interface and he began to calm his heart and cultivate.

...

## [Chapter 943](#)

### 943 The highly anticipated real game

In the days before Lou Cheng's advancement, all kinds of work in Holy Dragon City were carried out in an orderly manner.

Although it looked busy, it was also a rare peaceful day, because there would be no war or killing during this period.

Although the cultivators of Loucheng City were brave, it did not mean that they were lunatics who liked to kill. When they encountered such a rare peaceful death, they would try their best to enjoy the fun of life.

Hence, men who had taken off their battle armor could be seen everywhere around Holy Dragon City today. They brought their entire families to go shopping, and it was a happy and harmonious scene.

At this moment, the decisiveness and fierceness of a bloody battle could not be seen on their bodies at all. The warm and rough smiles were always on their faces.

This was also a festival for the foreign merchants in the commercial district, because the Holy Dragon City's soldiers who were not short of money would come here in an endless stream to buy all kinds of goods.

In addition to the residents of Holy Dragon City, the Wanderers from various small towns in the outer Urban area and the residents of the new residential areas would also appear here to participate in the lively scene.

The flow of people also proved the prosperity of the commercial district. The desolate place that no one used to visit had now become famous in the entire war zone.

To be able to do this was truly not easy!

Outsiders were mesmerized by the Holy Dragon City's beauty and prosperity, while the residents of the tower City felt honored, especially when the foreign races and Wanderers looked at them with envious eyes, which made them feel proud.

It was almost evening, but the wide streets were still crowded with people. In the taverns by the side of the road, people of different races and identities were gathered together, enjoying a leisurely time.

The night in the commercial district was always so unforgettable!

At the same time, a large group of people had gathered in the former world of the Asian Alliance.

Among this group of people, there were eight people who were drinking and toasting. They were the eight players who had chosen to stay and fight to the death when they had faced the bandit monsters!

Now that the host body had been damaged, they had temporarily lost the qualification to continue the game. They could only wait for a new host body to arrive before they could continue the game.

To them, this was undoubtedly a very depressing matter.

It was a good thing that their previous battle results had already been exposed, and they had received the envy and admiration of many people, which also made them a little vain.

Therefore, after some discussion, they decided to hold a gathering to discuss the next step of the game.

After experiencing an unforgettable life and death battle, they had fallen deeply in love with this realistic game and were determined to continue playing it!

They even had a plan, which was to establish an organization and continuously improve their strength. Then, they would find an opportunity to contact the Holy Dragon City and participate in the real battle!

That life-and-death battle made them realize their own shortcomings, so while waiting for the allocation of host bodies, they would receive real combat training.

This time, it wasn't like before, where they were just having fun out of interest. They really intended to become killing experts!

Because they used The Game Capsule, it was not a real soul lodging. Therefore, the game players could not only withstand two soul lodgings in most cases like real soul hosts. Instead, they could stay and exit without limit!

Under such circumstances, the player's strength could never be improved, but their combat experience could be continuously accumulated, and they would not fear death.

Therefore, they were prepared to use this advantage to continuously improve their combat strength, and then become mercenaries who could step onto the real battlefield!

In fact, they weren't the first group of gamers to do this. There were similar organizations in the original world, and they were very active in the game Valley.

Among these player organizations, there were some true combat experts. They also hoped to attract the Holy Dragon city's attention in this way and participate in the real battle!

Moreover, their efforts had already begun to show results.

The Holy Dragon City seemed to be very interested in these outstanding players and had even contacted them in private.

There were even rumors that, under suitable circumstances, the Holy Dragon City would sign contracts with outstanding performers and hire them to work for the Holy Dragon City!

Although the source of the news was still uncertain, it was enough to make countless people excited!

The Holy Dragon corporation's influence was growing in the original world, and moving to the loucheng world to settle down had become the first choice for countless people!

Under normal circumstances, it was very difficult to do this, so the residents of the original world took a step back and began to look forward to the real game that could also transmigrate to the world of loucheng.

The high-level game teleportation pods and low-level game teleportation helmets that the Holy Dragon Corporation was selling were now out of stock, and countless people were fighting to buy them!

However, even with the gaming equipment, these players still couldn't immediately participate in the game because of the limited number of hosts and the lack of game space, so they could only wait.

This incident triggered countless complaints. On the Holy Dragon corporation's website, there were countless messages every day, urging the Holy Dragon City to improve the hardware facilities of the real game as soon as possible so that they could participate in the game as soon as possible!

There were even people who threatened the Holy Dragon Corporation, saying that if they were not allowed to participate in the game as soon as possible, they would take extreme measures to vent their anger.

The Holy Dragon City announced that they would buy back the gaming equipment at a high price. Unfortunately, no one returned the equipment, even if the price was double.

The Holy Dragon corporation's real gaming operations Department could not express their pain in this chaotic situation.

Although the operation of the real game was not entirely for the purpose of profit, the operation of the game would indeed bring unimaginable profits to the Holy Dragon Corporation, so it was necessary to persist.

According to the original plan, each set of gaming equipment had a corresponding host body. According to the original plan, the first batch of players would add up to 200000!

However, due to the war in the water world, all of these hosts were used. After all, everything had to make way for the war.

It was also because of this incident that a large number of players were affected and could not enter the game according to the scheduled time.

Under such circumstances, it was reasonable for the players to be angry. According to their expectations, they were already very restrained by not setting the Holy Dragon Corporation on fire!

As for those who had obtained a compatible host body, they became the object of envy and jealousy of others. From time to time, they would upload pictures and videos from their soul memories, which attracted countless onlookers and comments!

Fortunately, the cultivation of the host body had not stopped. It was estimated that this problem would be solved after a while.

However, there was another problem, and that was that there was not enough space for the game!

#### [Chapter 944](#)

##### 944 Constructing the game Valley

Holy Dragon City, Tang Zhen's office.

An application for the expansion of game Valley submitted by the staff of the Holy Dragon Corporation was displayed in front of Tang Zhen in the form of a holographic image.

This application was full of pictures and text, and all the game content in the game Valley was written in it. It was really rich.

After seeing the content, even Tang Zhen wanted to be a game player and participate in the game to experience it!

Tang Zhen shifted his gaze away from the holographic image and nodded his head. He looked at the young lady who was wearing a white-colored leather armor standing in front of him.

Her appearance and figure reminded him of Yue qianhua, the elf woman who was the current city Lord of moon god Tower City.

When Yue qianhua first came to the Holy Dragon City, she was dressed in a similar way. She looked quite fresh and refined, which left a deep impression on Tang Zhen.

Everyone loved beauty. Tang Zhen was naturally not immune to it. However, it was more out of an appreciation mentality.

He didn't want to be tied down by too many matters of the heart. It would distract his energy, wear down his fighting spirit, and even lose the courage to move forward!

The gentle village was the tomb of a hero. How would Tang Zhen be addicted to it?

Tang Zhen slowly opened his mouth as he looked at the young lady with long, straight legs and an exquisite face that carried a trace of heroic spirit.

there are actually 100000 players in the first batch of players. You've made quite a big move!

"However, with so many players coming to the world of loucheng, can you guys afford the various kinds of material consumption?"

After all, the Holy Dragon City was about to be upgraded to a level 9 city, and then it would participate in the mission to invade the Otherworld, so it was now a critical stage for material storage.

I can't give you too many supplies at this time!"

After Tang Zhen turned off the holographic image, he slowly raised his question.

The problem of the players' meals was not a concern since the semi-mechanical host body was mainly sustained by the Super batteries made by terobo technology, and it was fine even if they did not eat.

Of course, after the players ate, they would also be absorbed and converted into energy to maintain the host body's operation. After all, its structure was only slightly different from a real living creature.

However, in the process of the players participating in the game, it was inevitable that they would need a lot of resources, which was a big problem!

Although the players would produce a large number of resources due to the game's missions in the process of participating in the game, the amount was ultimately limited and could not solve the actual problem.

The material consumption of more than 100000 people would be an extremely terrifying number. If there was no sufficient logistics supply, it was estimated that in less than three days, all the players would cause a ruckus!

If this problem was not solved, the real game could only reduce the number of players involved in the game.

The young lady opposite him smiled and explained to Tang Zhen, "City Lord, don't worry. All the game items needed for the real game have been prepared in the original world, and they won't consume any materials from the world of loucheng.

Before I was teleported here, these resources have already been sealed with a storage card. You only need to go to the original world and bring them back!

We've already made sufficient preparations and considered all kinds of possible situations. So, there shouldn't be any unexpected situations during the operation of the game!"

When she said this, The Woman in White leather armor looked at Tang Zhen. A trace of crystal clear water faintly flickered in her eyes.

"It's just that the game venue must be built as soon as possible. Although the existing game Valley is not small, it can't accommodate more than 100000 players at the same time.

This problem had to be resolved as soon as possible. Otherwise, all their plans would be thwarted, and the Holy Dragon corporation's reputation would be greatly affected.

So the purpose of my visit this time is to hope that you can take some time to select and circle out the location of the valley for future games.

After these game valleys are built, our staff will immediately go in to build and deploy, so as not to delay the players "entry into the world of loucheng!"

The young woman bitterly laughed when she said this. She stared unblinkingly at Tang Zhen while her tone more or less contained a trace of complaint.

"City Lord, I guess you don't know how much pressure we've been under these days.

That's because the players are complaining and want to eat us alive, and the main reason is that you transferred all the host bodies!

We've suffered so much for you, shouldn't you compensate us?"

When she said this, the young lady looked at Tang Zhen with a smile. Her eyes contained a trace of naughtiness.

"Do you want to eat it raw? It must be very fresh and delicious!"

Tang Zhen laughed softly. He made a rare joke. The face of the young lady opposite him became slightly flushed when she heard this. She gently pouted her mouth.

"Alright, I already know about the matter. It just so happens that I have some time these few days, so I'll deal with this matter.

The relevant construction personnel should also be prepared. If there are no accidents, you can officially start work tomorrow!"

The young woman nodded. She extended her hand and took out a photo from her pocket before handing it to Tang Zhen.

"City Lord, you don't mind giving your fan an autograph, right?"

Tang Zhen took the photo and glanced at it. He realized that it was a scene of him wearing purple-gold armor and commanding the battle in the water world. Looking at the angle from which the photo was taken, it should have been taken by a Holy Dragon City warrior.

“It’s my honor!”

Tang Zhen took the signature pen and left his name on the photo before handing it to the young woman opposite him.

thank you, city Lord. We’ll meet again next time!

The young woman smiled slightly. Her eyes met Tang Zhen’s for a few seconds before she walked out with light and quick steps.

After the other party left, Tang Zhen took out the map of the Holy Dragon City and glanced at it before slowly walking out of his office.

A pair of wings that had turned into energy suddenly appeared. With a gentle flap, Tang Zhen’s figure soared into the sky and rapidly flew toward the outer Urban area.

Holy Dragon city’s first gaming Valley was built on the edge of the outer Urban area, occupying a large area.

More game valleys would be built in the future. If they were all built in the outer city area, it would make the outer city area extremely narrow.

As the number of people gathered in Holy Dragon City increased, there would eventually be a time when the land would be in short supply even though the outer city was vast. Tang Zhen had to consider this problem.

In order to prevent this situation from happening, Tang Zhen decided to build the game Valley in a straight line and extend it outside the city wall!

This way, they would not occupy the land in the outer city, and the land in the wilderness could be used.

...

It didn’t take long for Tang Zhen to reach the top of the valley in the game. Moreover, he hid his figure and observed for a while.

The game Valley was a busy scene. The players were doing quests in high spirits and interacting with the Holy Dragon City residents who played various roles.

Everyone was having fun, which meant that the real game was very popular!

After Tang Zhen watched for a while, he continued to fly forward. He stopped in mid-air at the outer city wall that was about five kilometers away from the head of the game Valley.

As he observed his surroundings, he slowly activated the [ terrain transformation plug-in ]!

As he controlled it with his mind, the originally flat land suddenly rumbled like thunder!

Then, huge stone walls rose from the ground and continued to climb. They soon exceeded a hundred meters, but there were no signs of stopping!

These stone walls surrounded a large piece of land, starting from the Holy Dragon city's outer city wall, and continued to extend beyond the city wall.

While the land was surrounded by stone walls, it was also divided into individual areas, and the area of each area was extremely impressive!

This place would become the New Valley for the game, allowing the players to play games here. They could even raise a group of low-level monsters for the players to kill when they were carrying out missions!

During this period, Tang Zhen also added some strange-shaped mountains, caves, and suspended stone bridges to the game Valley according to what he had seen and heard, making the game Valley even more magical!

...

The application's usage time was over, and his terrain transformation work was completed. The rest would be completed by the staff.

After glancing at the results of his work, Tang Zhen turned around and flew toward the game Valley.

#### [Chapter 945](#)

945 The game player wants to "jailbreak"

The game Valley was like a paradise. It was extremely lively at this time!

Ever since the players had transmigrated to the world of loucheng, they felt that their bodies had become lighter by more than ten pounds. They were so energetic that even they themselves were afraid!

They felt that their youth had returned, and even their personalities seemed to have changed. They threw away the disguises they wore in the original world and were all very active.

Now, many players were running around the valley, busy with their own missions.

Transporting resources from the original world was not a long-term plan, so the Holy Dragon City had long tried to be self-sufficient. This real-life game had also fully inherited this style.

Many things in the game Valley needed the players to make by themselves, and some simple buildings were slowly built by the players.

"It's not a problem if you lack weapons. You can collect the materials yourself and forge your own equipment!"

It was not a problem even if he did not know how to do it. As long as he visited the Holy Dragon City residents who played various non-player characters, he could get a mess of missions. When he had accumulated a certain amount of points, he could get a set of novice equipment!

Although the equipment didn't look very good, it was still a decent weapon and equipment, much better than the self-made bow and wooden spear!

Of course, there were also some players who were very confident in their weapon-making skills. They ran around the valley in the game, collecting all kinds of strange materials, trying to make a set of beginner's godly equipment that suited them!

Therefore, in the valley of the game, from time to time, players could be seen cutting down trees, mining, and weaving. All of them were so busy that their feet didn't even touch the ground!

Even so, they still enjoyed it.

According to the Holy Dragon corporation's explanation, this Valley was a novice village for players. Before the players had enough power to protect themselves, they were not allowed to leave this place!

Why? because they were surrounded by steep mountains. Other than wings, there was no way to cross them!

Some players protested, saying that the Holy Dragon City was imprisoning them in disguise. They demanded that they be released immediately and let them experience the real world of loucheng!

In response, the management staff gave the players two choices. One was to ask the players to leave the game, and the Holy Dragon City would not keep them. The second was to satisfy the requirements of leaving the novice village, and then they could go to the next game area.

In order to meet the requirements to leave the novice village, one had to complete all the novice quests once, and then bring the proof to the novice village chief.

In front of the novice village chief, using a crude weapon to kill a guard, to prove that his strength was enough to go to the outside world!

In the end, it all meant the same thing. If you didn't follow the rules, you couldn't leave the restricted area of the game.

If you're not convinced, say I'm overbearing. Hehe, bite me!

Therefore, these unruly players were helpless against the management staff of the valley. They could only find another way.

However, there were still some players who did not give up. After they explored the entire Valley and made sure that it was surrounded by mountains, they began to prepare to use other means to sneak out.

In the eyes of these gamers, this was like a Prison Break. It was challenging and worth a try.

As for completing quests, farming equipment, and obtaining the right to leave the novice village like other players, that was not the style of these elites.

If they didn't cause trouble, they would feel uncomfortable all over!

At this time, by a River at the edge of the mountain, more than a dozen players who were very keen to cause trouble were thinking about how to escape from the river.

After all, this waist-deep clear river flowed out from the water cave at the bottom of the mountain. The source should be outside, passing through the mountain and flowing into the game Valley.

If he entered from the river at the bottom of the mountain, he might really be able to leave this place!

However, according to their visual inspection, the thickness of the surrounding mountains was at least a hundred meters. That meant that they had to go against the river flow for at least a hundred meters before they could reach the other end of the mountain!

Thinking about it carefully, the difficulty level was not just high!

When the dozen or so players who were bent on causing trouble realized this, they were suddenly at a loss. They all squatted by the river and looked at the water in a daze.

“What’s there to be afraid of? it’s not like he’s going to die.

Even the Pirates couldn’t kill me back then, I don’t believe I’ll capsize in this Little River. Just you wait!”

Just as everyone was about to give up, a big black man in a rattan outfit jumped up and shouted with an unwilling face.

As soon as he finished speaking, he took a step into the river. His strong body was like a bear, causing waves in the water as he ran toward the hole where the river water came out.

When the players beside him saw this, they immediately cheered for his courage. What “wise and divine! What “more courageous than others”! “I’ll wait for your triumphant return!” Words of praise flew out of their mouths continuously.

When the burly man heard this, he immediately felt a little light-headed and plunged into the water cave.

Seeing this, everyone held their breath and waited for the final result.

There were only three possibilities. The first was that the strong man could not hold on and retreated. The second was that he successfully snuck out. As for the third?

He believed that it wouldn’t be long before the game Valley’s staff collected his corpse!

In fact, the troublemaking team originally had a lot of members. However, after repeated failures, many of them had died, which led to their rapid shrinking of members.

Of course, the main reason for the reduction in members was that those members with weak willpower saw that it was impossible to sneak in, so they obediently went back to do their missions!

The remaining players were all extremely persistent. They had already regarded sneaking out of the game Valley as their greatest pleasure and pursuit!

By right, only a few ordinary people would be qualified to play the first batch of games, but it was these guys who insisted on doing this, which made people not know whether to laugh or cry.

To achieve success in a situation where it was impossible to succeed, perhaps this was where their joy lay!

At this moment, the troublemaking group members were staring at the hole where the river water was gushing out from while talking to each other.

it's been so long. Did that black guy drown? "

I don't think so. I heard that this guy used to be a boatman. He's very good at swimming!

"I have a feeling that we might lose another comrade!"

f \* ck, this guy is still the fiercest. I've been struggling for a few hours, but I still don't dare to get in!

hehe, I think he's just courting death. Anyway, I don't think he'll win!

Everyone was discussing at once, but the content was obviously not optimistic about the burly man. They had completely forgotten how they had encouraged him to die just now!

If the dark-skinned man were to hear these words, he would definitely lament about how careless he was in making friends!

...

"Tom, who died the day before yesterday, came to my company yesterday and said he wanted to fight me. He said I encouraged him to force his way out of the village.

In the end, when he wanted to come back in after dying, he couldn't apply for a host body at all. He was so anxious that he came to vent his anger on me!

Don't you think I'm being a little bit wronged? I was also part of the exploration at that time, okay? if he died, it's his fault. Why did he have to pull out a sword from the roadside? he was killed by a skeleton monster and he's blaming me?"

A man wearing a wild style of self-made bamboo plate armor suddenly said with a depressed expression.

When the other players heard that, they immediately recalled the scene of the player named thomp being dismembered by a skeleton monster that had suddenly emerged from the ground and chained up. They could not help but shiver.

Although players could turn off their sense of pain, the scene of them being cut into pieces was too devastating!

Come to think of it, ever since they decided to sneak into the valley of the game, none of them had ever succeeded. Almost every time, a member would be killed by all kinds of strange things!

In fact, the first time a member died, a few of the cute girls in the team were so scared that their faces turned pale, and they resolutely left the jailbreak team.

This also made the group of men secretly sad. After all, female players were now a rare breed. They did not lack women in their original world, but it did not mean that they did not need women to affirm their adventurous spirit!

Of course, this didn't affect their firm will. In fact, on the road to courting death, this group of troublemakers had already gone further and further!

Therefore, those who could still persist until now could really be called pure men!

...

However, with a cry of alarm, these men immediately lost their calm and revealed looks of fear.

They saw a figure rushing out of the hole that the big dark-skinned man had entered earlier, wailing for his parents. His originally dark face had now turned pale.

The man was the big black man who had just entered the water hole. He didn't seem to have suffered any injuries, but a huge monster's head with a diameter of one meter came out of the water hole behind him. It looked like an ugly giant snake with a single horn!

Its head poked out of the water hole, and then half of its body, which was more than ten meters long, suddenly rose up from the river. Its black scales were covered with patterns, which gave a strong visual impact.

After the giant serpent monster appeared, it did not immediately attack the players. Instead, it swept its cold gaze over the players and flicked its long tongue.

The members of the trouble-making group, who wanted to see the world in chaos, looked at this scene with their mouths agape. They were so scared that they peed their pants!

Without any hesitation, the group of disloyal people turned around and ran, completely ignoring the big black man who was running desperately towards the shore.

Oh my God, is the Holy Dragon City playing with us? they actually hid such a huge monster in the underwater cave!

f \* ck, that's a flood Dragon, right? it's definitely a flood Dragon. This is too scary!

"Complaint, I want to complain!"

what complaint? they asked you to sneak in through a water cave. It's clearly you who wanted to cause trouble, okay? "

In the chaos, the members of the trouble-making group ran away without a trace in the blink of an eye!

## [Chapter 946](#)

### 946 Brawling (1)

Humans were naturally afraid of such huge creatures, not to mention that this snake-like monster was obviously a fierce beast. Eating a human was like eating a snack between one's teeth!

They knew that there were many monsters in the world of loucheng. During the past few days of constant smuggling and jailbreak, the players of the trouble-making group had encountered and learned a lot. However, it was the first time they had encountered such a huge and terrifying monster.

If he didn't run now, when would he?

Therefore, at this moment, the members of the trouble-making group were not in the mood to care about the safety of their companions behind them. They scattered and ran faster than one another!

The unlucky big black man was under a lot of pressure. He felt sad and angry when he saw his comrade disappear in front of him.

This group of disloyal guys, even if I die, I will not let you off when I become a ghost!

Uh, right, I'm using a host body, so it seems that I won't die even if I die. At most, I'll be frightened a little!

After realizing this, the fear in the big black man's heart dissipated a lot. Since he couldn't die, what was there to be afraid of?

The big black guy subconsciously looked back, and his heart was even more assured. It turned out that the huge monster had already retreated back into the water cave, leaving only ripples behind.

"Damn it, you scared me to death!"

When the black man saw this, he let out a long sigh of relief and sat down on the ground.

It was only then that he realized that all his equipment had fallen off, and his protective underwear was damaged. It must have been damaged when he was struggling in the water.

Fortunately, the protective underclothes were of excellent quality and blocked the important areas of his body. Otherwise, the big black man would have completely returned to his natural state!

After sitting for a while, the dark-skinned man seemed to have thought of something and couldn't help but smile.

Originally, he had only participated in this realistic game to appreciate the scenery of the other world and experience the feeling of transmigration.

However, after arriving in the world of loucheng, he felt that his body had become abnormally strong and full of energy. He didn't even have such a strange feeling when he was young.

Unknowingly, the middle-aged man's personality had undergone a strange change. He was not afraid of anything and was curious about his surroundings.

This was also the reason why he joined the trouble-making group to vent his excess energy.

Even the big black man himself didn't expect such a huge change in his personality. However, he didn't reject such a change.

What was there to be dissatisfied about being able to regain her lost youth?

After resting for a while and recovering his strength, the dark-skinned man immediately jumped up from the ground and prepared to teach those disloyal guys a lesson!

After teaching them a lesson, of course, he would continue to cause trouble!

.....

The group of disloyal people only felt that something was wrong after running for a distance.

By right, this was the Holy Dragon city's territory. Under normal circumstances, it was absolutely impossible for such a terrifying monster to exist. It would definitely pose a fatal threat to the players!

Even if the players used a host body, it was inevitable that they would be frightened in the process of being killed, so this kind of thing was naturally avoided.

Of course, there was a possibility that the Holy Dragon City had done this on purpose. After all, there were many places in this game Valley that had made the players curious after transmigrating suffer.

However, when they thought about how they had been causing trouble all this while, they suddenly thought of a possibility. This huge and terrifying monster was most likely left there by the Holy Dragon City to scare the players!

That's right, it must be like this!

I knew something was wrong. How could there be such a scary monster in this game Valley!

this Holy Dragon City is too hateful. They actually scared us like this!

"Guys, are we still going to continue?"

"Continue, of course we'll continue. I don't believe we can't escape from here!"

Everyone chimed in and regained their fighting spirit in the blink of an eye. Their sorry appearance just now had also been swept away.

just as everyone was trying to figure out the next possible way to leave the valley, a group of players suddenly appeared from the forest opposite them.

There were men and women among these players, and there were less than 20 of them in total. They were all wearing self-made weapons and equipment, with a strong ethnic style.

When they saw the famous troublemaker in game Valley, they all looked over and sized him up. At the same time, a faint look of disdain flashed across their eyes.

There were faint murmurs. Although it was in another language, some of the members of the trouble-making group knew several languages, so they naturally understood the content of the words.

"A bunch of trash!"

Although the eyes and voice were obscure, players' senses had become extremely sharp after entering the world of the tower, so the other party's words and actions were immediately captured by the troublemakers.

The group of troublemakers who had become fearless suddenly exploded!

look, these guys are looking down on us and calling us trash!

"F \* ck, if you look at me again, do you believe I'll dig your eyes out?"

eh, the style of this equipment is so familiar. Have I seen it somewhere before? "

of course it's familiar. Isn't that the traditional Japanese pajamas? "

f \* ck, it's actually this group of people. Brothers, beat them up!

As one of the players raised his weapon, the rest of the players who wanted to see the world in chaos responded one after another and rushed forward like wolves.

When the players from the archipelago nation saw this, they did not show any weakness. They raised the wooden swords in their hands and fought with the troublemakers.

Because they had turned off their pain sense, these guys were really fearless when they attacked. In an instant, their skin and flesh had been torn open, and the ground was full of figures rolling around!

In the beginning, the trouble-making group deliberately avoided the female players from Japan and targeted the male players. However, they were soon attacked by these female players.

After a member of the trouble-making group was hit in the head by the other party's wooden sword, he suddenly felt dizzy and almost fainted.

Although he had turned off the sense of pain, some of his physiological reactions were still present. When he overused his strength, his hands and feet would be weak. When his head was hit, he would faint. When he bled heavily, he would also faint!

The other female players 'frequent sneak attacks completely angered the troublemaking group. The next moment, their pot-sized fists also smashed on the bodies of these Japanese female players without hesitation!

...

Aiyo, I'm sorry, miss. Your left chest is swollen. Don't worry, I'll just punch your right chest evenly!

this woman looks familiar. I think I've seen her in a movie before? "

that's right, I've seen her before too, but she seemed to be riding a horse at that time!

what horse? it's long been lost. Didn't you see that it's already changed to infantry? "

he's still the best. His business has even expanded to the other world!

A bunch of guys with swollen faces and bruised noses were fighting while talking without restraint. The Japanese players were so angry that they almost vomited blood and died!

## [Chapter 947](#)

### 947 The curtain falls (1)

The game Valley wasn't big, but it wasn't small either. Although there weren't many players here, the footprints of exploration were all over the valley.

Soon, people saw the two groups of players fighting. When they saw the shocking scene, they quickly used their wristwatch communication devices to inform the game Valley Management Office.

At this time, the two teams of players were fighting in full swing. Each of them had bruises on their faces and blood on their faces, but they still did not give up.

Fortunately, they knew the severity of the situation and did not really kill the person. Even if this was a host body, it still involved some of the inherent moral bottom lines of humans.

They really couldn't bear to kill a player just because of a small conflict!

Although he couldn't be killed, it was very likely that he would be crippled!

The battle did not last long. Just as the big black man arrived and joined the battle, the Holy Dragon city's drone suddenly appeared above them.

all the players below, listen up. Please stop fighting immediately and leave. Otherwise, you will be severely punished!

At the same time, a black gun barrel extended from the bottom of the drone and locked onto the players who had stopped fighting.

All the players had some understanding of this high-tech flying weapon. They knew that it could shoot high-speed electromagnetic acceleration bullets, and its lethality was extraordinary.

If they were hit by this thing, they would really be dead!

Now that there was a shortage of hosts, if he accidentally died, who knew when he would be able to continue playing the game?

The charm of this realistic game was huge. Once they started playing, they couldn't let go. If they didn't participate, it would be worse than killing them!

So, both sides stopped at the same time. They stood up from the grass and looked up at the patrollers above.

They had thought that the drone would announce their punishment, but who would have thought that the drone would turn around and fly away after circling for a while!

"What the hell is this?"

The expected punishment didn't come. This confused the players. Were they going to let this matter go just like that?

It seemed that the management of this game Valley was very loose. As long as it was not too excessive, the Holy Dragon City would not interfere too much. Even if these guys were beaten up until their faces were covered in blood, they would still ignore it!

However, in this case, the players could do whatever they wanted and do things that weren't too excessive.

At the thought of this, the members of the trouble-making group began to sneer, because they suddenly found something more interesting than smuggling!

The Japanese players, who were also badly battered, suddenly felt a gaze with ill intentions sweeping over them. While they were vigilant, they also glared back without showing any weakness.

After staring at each other for a while, both parties turned around and left at the same time. However, from their expressions, it was clear that this matter would not end here!

It didn't take long for the fight to be known to all the players, but many people didn't take it to heart and treated it as an ordinary conflict between players.

However, no one had expected that an invisible undercurrent was beginning to surge in the valley of the game, and it was getting more and more intense.

In the days to come, players from different countries would form different teams, and from time to time, there would be fights of different levels and scales.

Even if the Holy Dragon City had adjusted the pain-shielding function of the host body so that the player would feel normal pain after being injured, it still could not stop these crazy players.

Later on, as more and more players entered the game, their combat skills continued to improve, and it was common for players to be seriously injured and fall unconscious.

Fortunately, the host body that had been adjusted wouldn't die easily, which made many players feel relieved.

However, the cost of repairing the body must be borne by them. Otherwise, they could only wait for the body to recover slowly!

.....

Tang Zhen had witnessed the entire process of this fight, but he did not stop it.

It would be good to properly cultivate the guts of these players. After all, in the Holy Dragon city's plan, they had the intention of selecting outstanding talents from among them.

In the Holy Dragon city's future invasion, it was very likely that they would need a large number of combatants. The Holy Dragon City had a limited population, so Tang Zhen could only turn his attention to these players.

Once they got used to the killing in the game and set foot on the real battlefield, they would probably get used to it quickly.

At the same time, in order to encourage these players, the Holy Dragon City would also give them a large number of material rewards, so that they could have their own land and homes in the tower world, and their descendants could also live there.

At the same time as they invaded the other world, the Holy Dragon city's territory in the tower world would also gradually expand, becoming bigger and bigger.

The world of loucheng becoming the second home of the original world's humans was not just a saying.

After walking around the game Valley, Tang Zhen returned to the inner city and continued to work.

In a few days 'time, there would be a large number of new residents arriving, and he had to prepare a place for them to live.

The current Holy Dragon city's inner city, as well as the newly built residential areas, did not have many empty rooms. It was obvious that they could not accommodate so many residents.

Therefore, after a discussion, Tang Zhen and the others decided to build a new residential area near the new residential area. Those new residents would participate in the construction and personally build their homes.

This was another huge project with a construction area of over a million square meters. If Tang Zhen didn't have a magical mobile application, who knew how many years it would take to build?

However, with Tang Zhen's help, things became much simpler. He only needed to construct the main body of the building, and the following renovation work could be completed with the cooperation of the new residents and Holy Dragon city's Holy Masters!

As time passed, the Holy Dragon city's Warriors who had participated in the water world's war returned to the Holy Dragon City one after another. The natives who had obtained the Holy Dragon city's resident slots had all gathered near the teleportation portal.

In the surrounding waters, there were garbage warships that covered the sky and the earth. They were all natives who had gathered here on their own accord in an attempt to witness this scene that they had been looking forward to day and night for countless years.

They were filled with envy and jealousy towards their fellow tribesmen who were able to leave the water world. They wished they could bring them along.

Under everyone's anticipation, the time to leave had finally come.

As the Holy Dragon city's Overlord cultivator roared, the new residents who were waiting began to form a long line and approached the teleportation gate.

After seeing this scene, a clamor immediately sounded from all directions. It was the discussion of the natives of the water world, which contained various emotions.

The new resident at the top of the list suddenly took a deep breath and stepped through the barrier that was right in front of him but actually separated the two worlds. He became the first lucky person to leave this place among the natives of the water world in countless years!

When he passed through the portal and stepped on solid ground, he saw the plants all around him. His legs suddenly went soft and he knelt on the ground, kissing the ground under his feet like crazy.

Hot tears flowed from his eyes, but his face was filled with a happy smile.

"The ancestors of the tribe, I have finally realized the dream of our generations. I have left the water world and come to the land!

...

Did you see this scene from the heavens?"

As he shouted at the top of his lungs, the survivors of the sea who came out behind him also turned around and knelt on the ground, kowtowing in the direction of the portal.

### [Chapter 948](#)

#### 948 Level 9 City Tower (1)

Every time a Water World native arrived, a portion of the accumulated Battle Points would be consumed. As they entered the back Valley through the teleportation gate in batches, the points on the cornerstone platform would also shrink rapidly!

Fortunately, the purpose of accumulating these Battle Points was to use them to redeem the “sinners” after winning the victory on the rank-8 overseas battlefield. Tang Zhen didn’t feel any heartache when he spent them.

This time, the Holy Dragon city’s advancement quest could be said to be quite successful. The number of battle merits obtained had already exceeded his original expectations.

In this case, the number of new residents would also increase greatly, and many things would need to be prepared.

This was actually a good thing, and many loucheng wanted it more than anything. They even wanted to take away all the natives on the overseas battlefield!

Of course, this was just a thought. So far, no tower had achieved this, and the cornerstone platform didn’t allow it.

It’s good enough to give you eggs for free. If you take away the hen that’s hatching the eggs, how will the cornerstone platform provide soldiers for Lou Cheng who’s promoted later?

To put it bluntly, the overseas area was just a breeding ground. The useless ones could be killed, but the useful ones could not. The rules were there, and no one could violate them.

The Holy Dragon City was able to get so many new residents at once. In fact, it was already a big profit. Tang Zhen was quite satisfied.

However, with the arrival of a large number of new residents, one thing was certain. In the near future, the Holy Dragon city’s stewards would be so busy that their feet wouldn’t touch the ground.

However, they would not complain, because the increase in the number of residents in the city also meant that the strength of the city would increase. As a member of the Holy Dragon City, they felt full of energy!

At this moment, the new residents were lining up in a long line to receive their personal items. It was considered the first benefit that the Holy Dragon City gave them.

As they stepped on the solid ground and felt the rich energy in the air, many new residents who were barely clothed couldn’t help but burst into tears.

The scene in front of them made them feel like they were in a dream, and realizing the wish of their ancestors also made them feel relieved.

It was a pity that after this, they might not be able to see their family for the rest of their lives. This had also become a wound in their hearts that could not be healed.

However, they were helpless in this situation. They also knew that in order to realize the ideals of their ancestors, some things had to be abandoned.

There were many new residents who had this thought, and a slightly sad atmosphere spread around them.

As time passed, after the last new resident stepped into the teleportation gate, Tang Zhen waved his hand and kept the remaining warships and the metal floating island. He took a deep look at the countless remnant clans of the sea who had complicated expressions on their faces in the surrounding sea before stepping into the teleportation gate.

After Tang Zhen's figure disappeared, the enormous teleportation gate flickered a few times. After which, it suddenly disappeared under the gaze of the remnant clan on the sea!

The two worlds were now separated!

At this moment, the back Valley of Holy Dragon City was filled with a dense crowd. In this environment, even though the voices of their conversations were not loud, when they gathered together, they were like a noisy wave.

Many of the depressed new residents also fell into Tang Zhen's eyes, causing him to frown slightly.

Although the sadness of parting was human nature, Tang Zhen was still unwilling to see it. He did not wish for them to be affected because of this.

Therefore, he had to do something at this moment!

Thinking of this, his body slowly floated up and suspended in the air dozens of meters high.

This scene was immediately seen by others. When they realized that it was Tang Zhen, they immediately stopped what they were doing and lifted their heads to look at the sky in unison.

The originally noisy Back Valley had miraculously become extremely quiet in a dozen seconds.

new residents of Holy Dragon City, I am Tang Zhen, your city Lord. Welcome to Holy Dragon City!

Tang Zhen's voice was neither hurried nor slow. However, it reverberated throughout the entire back mountain Valley, causing everyone to be able to hear it clearly.

"You've realized the dream that your ancestors have never forgotten. You've escaped the cage of the water world and returned to the land.

If they could see this scene, they would be extremely gratified, because this also meant the beginning of hope.

I know that many of you are sad that you won't be able to see your loved ones, so I'll give you hope!"

After Tang Zhen said this, he suddenly raised his voice, "From today onwards, as long as you are willing to work hard to accumulate points and battle merits, when you have reached a certain level, I will give you an exchange quota and help you bring back a relative from the water world!

Even if I enter the water world again, it might be unimaginably difficult. I, Tang Zhen, will never go back on my word and will do as I say!"

When the new residents heard this, they were all stunned. After more than ten seconds, some of them came back to their senses and half-knelt on the ground without hesitation.

thank you, city Lord, for your kindness. We will definitely go through fire and water for the Holy Dragon City, even if it costs us ten thousand lives!

After this sentence was spoken, countless new residents knelt on the ground at the same time. They placed their hands on their chests and loudly repeated the same words.

The voice resounded through the clouds and reverberated in the back Valley for a long time.

.....

The emotions of the new residents had stabilized, and the next thing they needed to do was to proceed according to the plan.

The next thing that Tang Zhen had to deal with was naturally the upgrade of the level 9 building.

In fact, compared to the previous upgrade of the city, the upgrade of the level 9 city was actually very low-key. Other than the large number of new residents, the other changes were not obvious, but the benefits were real!

For example, the strength of the buildings in the city would be greatly increased, and energy would be injected into them. Even the other auxiliary cities in the area of the city would also be strengthened.

When night fell, fluorescent light and runes would appear on the surface of these buildings, making them look quite beautiful!

If they were to use cannons to bombard the Holy Dragon city's buildings, unless they were bombarded by large-caliber cannons, they would not be able to easily build level 9 buildings.

Of course, it would be a different story if a weapon like a nuclear bomb was detonated.

Just like in the game, these buildings would also seem to have a durability of their own. Before the durability ran out, the buildings would not be damaged!

As the defensive strength of the tower increased, the speed at which the tower gathered energy was also greatly improved. Even ordinary people would feel the difference between the tower and the outside world after entering it.

In such a blessed land, the speed of cultivation of the cultivators in loucheng was extremely amazing. It was estimated that another group of cultivators in loucheng would suddenly advance tonight!

In fact, it wasn't just the Holy Dragon city's residents who benefited from this. Even the Wanderers and foreign cultivators who gathered near the Holy Dragon City benefited a lot. Although they couldn't get

the attributes of residents, they stayed in such a good place all day long. How could they not get any benefits?

Therefore, even if the Holy Dragon City chased them away now, these guys would shamelessly stay. At the same time, they would think of ways to find the right to become residents of the city!

Even the flowers and trees in the tower area began to show strange changes. They were faintly developing in the direction of exotic flowers and plants, but it was not too obvious now.

However, they used their own way to celebrate the arrival of this moment. In an instant, hundreds of flowers bloomed both inside and outside Holy Dragon City. The fragrance filled the air, making people feel as if they were in a sea of flowers!

...

Especially in the commercial district, the flowers were in full bloom, and it was a scene of colorful flowers!

The foreign races who could not figure out the reason clicked their tongues in wonder, while those who guessed the reason kept sighing, thinking, " what's wrong with the Holy Dragon City? why is it advancing so quickly? "

It had not been long since the Holy Dragon City was promoted to a grade 8 city!

#### [Chapter 949](#)

##### 949 Storing power\_1

At the same time as the new residents arrived, Holy Dragon City had already completed the process of upgrading to a level 9 city.

The area of the main tower expanded once again, but because it was hidden deep underground, it did not cause any waves.

Many of the Holy Dragon city's residents did not even know that the land beneath their feet was already being carried by a super floating warship. Once the Holy Dragon City started the mission to invade the Otherworld, this super warship, which had been hidden for a long time, would truly be revealed to the world.

Looking down from above and dominating the sky, this in itself held a great advantage. Some of the foreign world's Aborigines who did not have the ability to fly could only passively endure the invasion, but were unable to launch a counterattack at all!

It was also for this reason that Holy Dragon City placed great importance on the development of weapons such as aircraft. There was even a type of Helicarrier that could be used in conjunction with the floating island, which was currently in the process of testing and manufacturing.

Relying on the foreign world's technology that they had obtained from the wild buildings, the Holy Dragon city's technological level had already far exceeded the original world's in some aspects.

At present, the biggest obstacle that limited development was still the lack of resources, which made many of Holy Dragon city's plans unable to be carried out.

However, as the Holy Dragon City was upgraded to a level nine city, this situation would quickly improve. It would embark on a bloody path of invasion, and at the same time, it would become more powerful.

That day was not far away!

Holy Dragon City, which had completed its upgrade, seemed to be full of energy, and the situation in loucheng was also very stable.

The old residents of the Holy Dragon City welcomed the new residents of the loucheng, because the increase in the number of residents also meant the increase in the strength of the loucheng.

In the world of towers, the huge number of residents was also a reflection of the overall strength of a tower.

If a city had few residents, no matter how high its level was, it would give people a feeling of emptiness. It was very likely that after a fierce battle, most of the residents in the city would die.

On the other hand, a city with many residents was destined to have no lack of brave warriors and had great potential.

Holy Dragon City belonged to the latter, because its current population had already exceeded a million!

There were 3000 towers in the world War zone, and there were countless level 9 towers. Moreover, for a level 9 Tower City, one million residents was not a lot. For example, the population of heaven battling city had already exceeded 10 million, which was an even more shocking number!

However, if there were millions of residents in the city, in addition to their powerful combat strength, it would be a different story. At least, the strength that the Holy Dragon City possessed was not inferior to those old towers of the same level.

This was also the reason why the cornerstone platform had determined that Holy Dragon City had great potential. No matter what level they were at, they had the strength to crush most turrets of the same level!

Now, with the arrival of new residents, Holy Dragon City had become even more lively. There were streams of people coming and going everywhere, leaving all the foreign merchants who had just arrived in Holy Dragon City dumbfounded.

Such a lively and bustling scene was extremely rare in the boorish Warzone. They even couldn't understand how the human race, which had always been looked down upon by other races in the boorish Warzone, had built such a powerful city!

Relying on the Holy Dragon city's prestige, the situation of the human race in the savage Wars zone was much better. Although their days were still poor, at least they had less unfair encounters.

The reputation of the city Lord of the Holy Dragon City, the king of laws, Tang Zhen, had already spread throughout the Wildlands Warzone. Countless cultivators in Loucheng were filled with curiosity and fear towards him.

A lot of information about Tang Zhen was collected by people with intentions and more and more cultivators in Lou city knew about it.

He had built the Holy Dragon City in a remote place and rapidly upgraded the level of his towers. Before his towers reached level five, they had destroyed six towers in a row.

After he advanced to grade five, he even wreaked havoc in the interdimensional passage, killing the other four alien races' towers and ransacking all their treasure rooms!

From these things, it could be seen that this Holy Dragon City Master was definitely a figure who was both good and evil!

The things that happened after that made those forces that were paying attention to Tang Zhen even more secretly shocked.

First, the Cold Moon City had descended and killed tens of thousands of foreign cultivators who harbored ill intentions towards the Holy Dragon City. Then, he had broken into the spirit battle zone alone and destroyed two national-level cities in a row, earning the title of the uncrowned king!

Such a terrifying battle record shocked everyone who had just heard about it, because it seemed so unreal.

However, the facts had proven that these things were not false. Tang Zhen had indeed completed these battle results that they thought were impossible to accomplish!

This also made the people watching sigh in unison. As expected, cultivators of Loucheng who could become Law Kings were not simple people.

Due to various purposes, the forces in these towers also began to send people to the Holy Dragon City in an attempt to understand more about Tang Zhen and the Holy Dragon City.

Of course, most of the outsiders were foreign merchants and cultivators who had come because of the city's reputation. Their arrival made the Holy Dragon City even more lively and prosperous.

Just the income from the brain beads in this area alone had already made the Holy Dragon city's wealth pile up like a mountain. Even though the expenses of buying special materials were increasing, the total wealth had always been increasing steadily.

These brains were more than enough to upgrade Holy Dragon city's auxiliary city.

Once all the auxiliary cities were upgraded to the national level, the strength of the Holy Dragon City would be raised to an extremely terrifying level. At that time, Tang Zhen's goal might be the entire Savage wildland!

Of course, this matter was not urgent, because the road ahead was still long. Holy Dragon City had enough time to do these things!

The most important thing now was to settle down these new residents and prepare for the invasion of the other world.

Just these things were enough to make Tang Zhen extremely busy!

.....

Countless people were busy at the construction site of the new residential area. A huge super-building had already been built.

Tang Zhen once again performed a miracle in front of the Holy Dragon city's residents. However, other than the outsiders who were inexplicably shocked, the Holy Dragon city's residents had long been immune to it.

After all, they had seen similar things with their own eyes more than once!

However, the new residents' residences that were built this time really made many people's eyes light up.

It was a giant building with an area of more than a million square meters. It looked like a towering mountain that spiraled into the sky. A wide street meandered up along the mountain peak.

This huge mountain building was the residence of the new residents. The space inside was huge and there were many high-tech equipment installed, enough to accommodate these new residents.

There were also countless exotic flowers and plants planted on the mountain, making it look like a magnificent garden in the sky instead of a cold building!

Once it was completed, it would definitely become another scenery in Holy Dragon City, attracting the envy and jealousy of countless outsiders.

The new residents obviously thought so too, so they put in extra effort in the construction process because this was their future home!

## [Chapter 950](#)

950 Group teleportation! 1!

The items found in the wild building some time ago were sent to the cornerstone platform for analysis by Tang Zhen. After a few days, there were results.

The truth was as he had expected. This wild building came from a foreign world that had never been discovered before. It was also because of this that Tang Zhen obtained the plane coordinates that he was most in need of at this time.

At the same time, the mysterious star had also analyzed the plane's coordinates. This also meant that Tang Zhen could enter the other world first. It would not cause a huge commotion like the teleportation of the tower City, which would alert the natives of the other world!

As for the difference between the two sets of plane coordinates, Tang Zhen was still not too clear for the time being. This was because he simply could not understand the runes that formed the plane coordinates!

Of course, to Tang Zhen, these things were not important. The key was that he had already obtained the plane coordinates. The Holy Dragon City could launch an invasion into the foreign world at any time.

The cornerstone platform would not give the new loucheng too much time to prepare. Within a year, the Holy Dragon City must take action, or else the cornerstone platform would punish them!

Fortunately, the Holy Dragon City had already made all the preparations. They only needed to wait for Tang Zhen's order to immediately take action!

As for the analysis of the origins of these wild buildings, there was already a preliminary result.

It was just as Tang Zhen had guessed back then. They did indeed come from a special world. At the same time, one could also find some clues related to them in the original world.

It seemed that only items from special worlds could activate the law stars!

Since he had already set this Otherworld as the target of his invasion, it was very necessary for him to go to that Otherworld to take a look and understand the specific situation of that world before he took action!

The war of invading a foreign world was no child's play, and there could not be any carelessness during this period. If there was even the slightest bit of carelessness, the entire city Tower would be destroyed in an instant.

After all, they were going to face the enemy of the entire world!

After dealing with the work at hand, Tang Zhen summoned ten Lord-level cultivators of the Holy Dragon City and gathered them in the underground tower.

These Holy Dragon city's feudal lords were all armed to the teeth. Each of them was extremely brave and astute, and their combat strength far exceeded cultivators of the same level.

They would follow Tang Zhen to the mission world to carry out the initial exploration and information gathering. As they had been informed of the destination of this trip in advance, all the feudal lords had excited expressions.

For them, the greatest glory of being cultivators of loucheng was to be able to participate in the battle of invading foreign worlds, not fighting in the world of loucheng!

For ordinary cultivators, any senior who had participated in the war of invading the Otherworld was enough to make them respect and worship him.

However, it was not easy to realize this dream. Just the level limit of the building was enough to block their dreams!

There were countless towers of different sizes in the entire boorish desolate war zone. However, less than one in a hundred towers had been upgraded to level 9 and above.

As cultivators in these low-level buildings, they were destined to have no fate with such glory!

It was also because of this that the Holy Dragon city's cultivators felt that they were extremely lucky. Following the legendary city Lord Tang Zhen, they had only used a few short years to successfully achieve this goal.

Now that he thought about it, he still felt like he was dreaming!

Now, under the leadership of the city Lord, they would be the first to set foot on that glorious land and realize their dreams. How could the Lords not be excited?

"Are you all ready? if there's no problem, we'll leave now!"

Tang Zhen was wearing a black cloak that covered his purple-gold battle armor as he looked at the Lords in front of him and asked.

The Lords who were also wearing black cloaks nodded in unison, indicating that they were ready and could set off at any time.

Tang Zhen nodded when he saw this. He activated the group teleportation option in the mysterious star.

Two thousand origin stones were instantly deducted. At the same time, a light door rapidly appeared in front of Tang Zhen and the others.

It turned out that other than himself, each Overlord would need to consume 100 low-level origin stones during group teleportation, and his teleportation price was ten times that of them!

The fee for teleportation probably depended on one's cultivation level. The higher the cultivation level, the higher the price!

Although the price was very high, it was still within Tang Zhen's acceptable range. However, he would feel a heartache if the price was any higher.

"Let's go!"

After Tang Zhen finished speaking, he took the first step into the light door. The other Lords followed closely behind and quickly followed.

After everyone had entered, the light door flashed and disappeared!

.....

A door of light suddenly appeared by a small stream in the mountains. Then, a muscular figure in a black cloak stepped out.

He raised his head slightly, revealing his eyes that were covered by the hood. He scanned his surroundings coldly.

The mountains and rivers were verdant, and it was filled with a primitive style, as if it had never been disturbed by humans.

The air quality here was not inferior to that of the world of loucheng, and the purity of the energy here was only inferior to that of the world of loucheng. This also meant that there was a high possibility that there were powerful cultivators in this world!

However, such a world did not lack precious resources. It was more in line with Tang Zhen's expected goal.

So what if there were cultivators around? he could just use his powerful strength to crush them!

The only thing that surprised Tang Zhen was that the laws of the world in front of him seemed to be extremely chaotic. They interfered and rejected each other. It was impossible to effectively control this world.

It was for this reason that the outsiders were not affected by the will of the world's laws at all after they arrived. They could also fully display their strength in battle.

This situation was extremely advantageous to the Holy Dragon City. Otherwise, when the city's residents fought in this world, not only would they have to bear the attacks of native enemies, but they would also have to bear the rejection and suppression of the power of the natural law. It would be extremely frustrating!

Taking a deep breath, Tang Zhen glanced at the ten Overlord cultivators behind him and took the lead to quickly advance along the river.

The other Lords also moved quickly and followed Tang Zhen's figure as they ran downstream.

Their mission this time was mainly to figure out the specific situation of this world, so they had to keep a low profile as much as possible to avoid alerting the native forces.

After all, divination and divination techniques were not rare among cultivators. Perhaps, the moment Tang Zhen and the rest entered this world, some experts had already noticed the abnormality.

As for how they would deal with it, Tang Zhen was temporarily unclear. However, there was one thing that he was certain of, and that was that both sides would definitely meet with weapons!

Tang Zhen's group, which was following the river, had unknowingly arrived at the edge of the mountain range. At the same time, a simple and crude bridge that stretched across the river faintly appeared in front of them.

Beside the bridge, a large area of wooden houses was hidden by the trees, and green smoke rose in spirals.

Tang Zhen immediately stopped his body after seeing this scene. He began to slowly walk along the Rocky beach by the river.

...

Two villagers dressed in simple clothes were fishing barefooted by the river. They also noticed Tang Zhen and the rest who were walking towards the village.

When they saw Tang Zhen and the others wearing black cloaks, a trace of nervousness and vigilance appeared on the faces of the two villagers as they constantly sized them up.

Their village was remote and could be said to be close to the edge of the mountain range. Although there were usually outsiders, they were all ordinary travelers and adventurers.

Those people's faces were covered in dust and their clothes were tattered. They were definitely not like Tang Zhen and the others. One look and one could tell that they were not ordinary people.

In a short while, Tang Zhen and the rest had already arrived in front of them. They stopped in front of the two villagers.

"Who are you? what do you want?"

The elderly villager looked at Tang Zhen and asked with a trembling voice.

Tang Zhen, who had long been waiting for the villagers to speak, immediately used his mobile application to crack and analyze this foreign world's language. At the same time, he spoke with a smile.

"Hello, we are travelers from a distant place. We have traveled a long way and now we are looking for a temporary place to rest.

May I ask what this place is, old brother?"

After hearing Tang Zhen's explanation, the vigilance in the elderly villager's eyes dissipated a lot. At the same time, he answered Tang Zhen's question.

...

"This is hewang village, Sir!"
