Chapter: 2174

Even with Lin Ziming's psychological quality, seeing this scene still felt a little dumbfounded, because this was too far from his perception.

Although he is a martial artist, his scientific knowledge is not bad, whether it is biology, physics, chemistry, and astronomy.

However, he never knew that there is still such a magical place on the earth, which can already be called weird.

What makes him most incredible is that here, gravity is actually different from the earth!

The gravity here is obviously much stronger than on the earth.

In other words, on the earth, he weighs two hundred catties, and here, he weighs three hundred catties.

In addition to the more inconvenient actions, the biggest impact is that the load on the internal organs is even greater.

Fortunately, he is a powerhouse with a half-step approach to the Divine Realm. If he is replaced by an ordinary person, he will not be able to support it for long under such gravity, and he will be dizzy and even die.

However, after all, he still has a very strong psychological quality. Whatever comes will come. Soon, after taking two deep breaths, he also adjusted his mentality and put his mind on the exploration of the secret realm.

Anyway, this secret realm was not opened for the first time. Many people had already come in before. Just like Huangpu Road, it was only in the secret realm that they broke through to the realm of God.

In fact, most of the masters of the God-passing realm on the earth successfully broke through to the realm of God-passing when they came to the secret realm. As for the specific principle, no one has researched it.

According to Huangpu Dao's guess, it should be on the earth, and it does not yet possess the nature of breaking through to the realm of the gods.

So people like Xiaoyao King, Bu Jingyun, Sakyamuni, and others all waited until the secret realm was opened before they came in, seeking a breakthrough in the realm of communication.

After adjusting his mentality, Lin Ziming embarked on the journey.

He discovered that this is a whole new world, not only the gravity is greater, but even the species here are different from those on the earth.

Whether they are plants or animals, they are much larger than those on the earth.

This is similar to the Titans in some sci-fi movies. Everything is enlarged. Just now, he even saw a bird whose size is comparable to an elephant flying through the air, causing a gust of wind.

This kind of situation reminded Lin Ziming of the dinosaur civilization that once appeared on the earth. At that time, the earth should be almost the same as it is now, right?

Because the oxygen content here is obviously more than that on the earth. Lin Ziming probably visually observed that the oxygen content here at least exceeded 40%!

After breathing for a long time, there will be a feeling of discomfort.

As he walked, Lin Ziming suddenly jumped his brows twice. He noticed a sparse movement coming from behind him to the left!

And accompanied by a crisis, something is eyeing him!

His footsteps have slowed down a bit, and his spirit has been lifted to the extreme, always waiting for the opponent's shot!

Finally, after another minute, the objects behind moved, slammed, and let out a huge roar. Lin Ziming saw that his feet were covered by a huge shadow, and at the same time he could feel it., I am full of crisis.
