

# Am I A God 801

## Chapter 801: Cheeks

Looking at this, Zhao Yao rubbed his chin and thought to himself, “If I go and save them now... We still will not be able to escape this space and we will alarm Project X.

If I don’t save them and wait here, Project X will come sooner or later.”

Thinking of this Zhao Yao clenched his fist and said, “However, that way, I will have to risk the other cats being caught by Project X and having their powers and intelligence taken from them.”

“Especially Matcha, if his powers are taken away...”

“I will have to try and see if I can attract Project X over.”

Zhao Yao crushed the wall beside him with his palms, restrained his intentions to kill and retreated into the darkness.

Then, he sneaked in and approached the cage. He stopped at a hole near the cage and looked at the supercats in the cage. He saw that except for Lucifer and Zhao Xue, all the other cats were unconscious.

Lucifer was only closed in a cage, whereas Zhao Xue was tied down by hundreds of metal wires and her skin was bleeding constantly and healing.

Zhao Yao’s gaze grew cold and he resisted the temptation to kill. He chatted with the cats privately. “Don’t say anything. It’s me.”

Lucifer let out an excited expression but concealed it quickly. Zhao Xue was slightly startled. Ever since she had become a feline girl, she gained the ability to communicate telepathically.

As for the other cats, they were still unconscious on the floor.

Zhao Yao asked, "How did you guys get caught?"

"It is the two cats who control shadows and gravity." Lucifer was agitated. "They attacked me together. If not, how could I have been captured? Ares, Dust Ball, Noodle, and Zhao Xue were all caught this way."

Zhao Yao nodded. Looks like Coffee, Slaughter, and Shadow's original bodies were in this strange dimension. All of them had powers perfect for combat.

And for the three cats and the dog that had been captured, only Ares had the ability to fight with them. Although Zhao Xue had strong defense, physically she had too many weaknesses.

After being sent into the dimension, Ares had been attacked by the two cats. Ares was careless and it was normal that he lost. Even if it had been Zhao Yao, he couldn't have been on guard for every attack from the shadows.

Zhao Yao nodded. "What about Ares and the rest? Can they wake up?"

Zhao Xue said, "I think they have been injected with tranquilizers. They can't wake up now."

"Lucifer is fine?" Zhao Yao asked in surprise.

Lucifer answered, "They probably think that I am not a threat, hence they did not inject me with it."

Zhao Yao nodded. "Okay, you guys listen up..."

...

In the complex Fortress Nightmare, Xiao Yu and Nekomata turned into spirit form and were passing through the walls.

"Why is there no end?" Xiao Yu complained. "Where are we?"

Nekomata looked at the surrounding dimension curiously. "I think we have been transferred into another dimension."

Then, countless ghosts chased them and Momo looked at Xiao Yu and Nekomata as he ordered. "Rip them apart!"

...

Meanwhile, after Matcha got rid of Coffee, he sat down in fear.

Lightning was shouting from afar. "Wow, Matcha you are powerful."

Matcha patted his chest and said, "Of course. I am always joking around you guys. Do you really think I am useless?"

"Okay I get that you are powerful." Lightning said, "Come and help me quickly. I can't move."

Matcha walked up, looked at Lightning who had turned into a sea urchin and fell silent.

Lightning asked anxiously. "How? Do you have any way to help? It hurts whenever I move."

Matcha said, "Why not I look for something and I shall push you around."

"Do you want me to die from the pain!" Lightning exclaimed.

Matcha said helplessly. "Then, how long will it take for you to return back to normal."

"As long as the power depletes itself."

"How long is it going to take?"

Lightning answered proudly. "You charge me for five minutes, I have power for ten hours."

Matcha turned and wanted to leave. Lightning panicked. “Matcha don’t leave me! Save me!”

When Matcha heard him, he ran even faster. Lightning raged. “Stupid cat! Stop there!”

“You still want to escape? I am going to go back and tell Zhao Yao how much money you took from the store!”

Then, Matcha halted and ran back to Lightning.

Lightning was delighted. “Matcha! I knew you wouldn’t leave me!”

“No!” Matcha panicked. “There’s another one!” Then, he hid behind Lightning.

Lightning looked at the direction where Matcha came from and saw a shadow emerging from the darkness. It got nearer and nearer, larger and larger.

Matcha and Lightning swallowed their salivas and stared at the shadow tensed.

“At least my Time Freeze has cooled down.” Matcha thought to himself. “When this guy appears, I can hammer him till he dies.”

Then, when the figure walked out, Matcha and Lightning relaxed.

Fish Ball ran over to Matcha and Lightning. He exclaimed in joy, “Matcha! I have finally found you!”

Fish Ball hugged Matcha and looked shocked when he saw Lightning. “What a huge durian!”

“It’s me!” Lightning answered in exasperation. “How bad is your eyesight?”

“What!? It’s Lightning?” It was the first time Fish Ball saw Lightning in this state. He looked at Lightning curiously. “What power is this? Do you play with the female cats like this?”

Matcha looked at Fish Ball disapprovingly. “Chey, he has to be one of the most useless cat. If we were to meet Sphynx cat, Elizabeth, or Ares we would be good. Of course, it would be better to meet Zhao Yao.”

The three cats exchanged their experiences and Matcha called the final shots. “Staying here is not a solution. We have to find the others.”

Lightning asked, “What about me? I can’t move now.”

After a few minutes, there was a rope on Lightning and Fish Ball and Matcha was biting on the rope, pulling Lightning along.

After a while, they stopped again.

They saw a cat walking towards them in the darkness.

Matcha was alarmed. “Fish Ball, you need to shine in his face. The moment you shine on him, I will launch my Time Freeze. By then, I will throw Lightning over...”

When Matcha turned, he saw that Fish Ball had retreated by about thirty meters.

“What! So unreliable.” Matcha turned and stared into the darkness. Then, Matcha saw a cat in blue fur standing in front of him. The blue cat was sticking his face on Matcha’s face.

Chapter 802: Saving The World Depends On You

Looking at Project X, Matcha swallowed hard and smiled awkwardly. “You are awesome.”

As Zhao Yao had shared his intelligence to other supercats, they were aware of Project X’s Active Superpower Rip and Passive Superpower Duplication. Judging his distance from Project X, Matcha understood that Project X had duplicated his Time Freeze so he had no intention to use it.

Project X sized up Matcha carefully and said, “You know Time Freeze?”

Matcha said sorrowfully, “Big Brother, you got the wrong cat. I am Fish Ball and my superpower is to give off light. The cat with Time Freeze has fled. If you chase him, you might be able to catch up with him.”

Project X smiled and found this tomcat rather interesting. He lifted Matcha’s mouth and said, “You can give off light? Show me.”

Matcha opened his mouth and gave a forced smile, revealing his shiny teeth.

Project X sneered but found Matcha’s smile photogenic.

A ray of light beam shot over and covered Project X’s eyes.

Fish Ball blinded Project X with his light and charged towards him with a small hammer.

“Let go of Matcha!”

Fish Ball roared furiously and smashed the hammer on Project X as Matcha exclaimed in shock, “Don’t!”

Bam!

Fish Ball’s body was penetrated by Project X’s claws and the hammer in his mouth fell to the ground.

Project X said emotionlessly, “Trash.” He flung his claws and tossed Fish Ball away like a torn flour sack.

Ah! Matcha roared and activated Time Freeze to save Fish Ball. However, he was grabbed by Project X who also activated Time Freeze.

“Don’t try anymore,” Project X said. “His artery’s bleeding profusely so he can only last slightly more than ten seconds. And... don’t waste my Time Freeze.”

He looked at the still environment and shut off the Time Freeze. He was puzzled as he thought, “Why are we sharing the same cooling down period? Perhaps... it isn’t an ordinary Time Freeze?”

After Project X had duplicated Time Freeze, he was sharing the same duration of the Time Freeze as Matcha and Zhao Yao.

Matcha struggled wildly in Project X’s grasp as he wanted to save Fish Ball.

Fish Ball lifted his head to look at the sky and said in a daze, “Ma... Matcha... I am in pain...”

“Argh!!!” Matcha opened his mouth and bit Project X’s palm viciously.

Project X looked indifferently as Matcha bit his palm and said, “Are you sad?”

Matcha continued biting Project X and glared at him with extreme hatred.

Project X frowned. For some unknown reason, he felt uneasy and said unexpectedly, “Do you want him to live?”

Matcha was dumbfounded and said, “Are you able to save Fish Ball?”

Project X smiled and said, “Piece of cake.” He extended his finger towards Fish Ball and the tip of his finger cracked open. A drop of fresh blood dripped on Fish Ball’s body.

The blood multiplied and grew rapidly into large pieces of flesh, sealing Fish Ball’s wounds, as though they were Fish Ball’s own flesh and blood. Even the fur grew and Fish Ball looked intact.

“Fish Ball!” Matcha pounced over to Fish Ball as Project X released his grasp.

Seeing Matcha’s joy, Project X curled up the sides of his mouth and thought, “Interesting orange cat.”

Fish Ball looked at himself in disbelief and looked at Project X and Matcha in shock.

Matcha said, “Don’t look anymore! Your wounds have healed! You scared me!”

“Nope.” Fish Ball said telepathically, “I am not astonished by my healing. Didn’t you discover that Project X...”

“... likes you a lot.”

Matcha exclaimed, “What?” He quickly shook his head and said, “What crap is that? He is the final BOSS, the most evil and destructive monster. Why would he go for such things?”

“I am not wrong.” Fish Ball patted Matcha’s shoulders and said, “With my rich experience, he is definitely interested in you. We shall see.”

Matcha looked back with hesitation and saw Project X walk to Lightning’s side. He looked at Matcha and asked, “Is he your friend? Shall I heal him?”

Seeing Matcha nod, Project X lifted his right hand and shed all of Lightning’s fur with his scissors hand. As Project X had the electromagnetism superpower, he was immune to super static electricity.

“Matcha!” Fish Ball looked seriously at Matcha and said, “The responsibility of saving the world and safeguarding righteousness is in your hands.”

“Why am I given the responsibility?” Matcha shouted telepathically. “What about you? Why don’t you take over instead?”

“I will be behind you giving support. When the time comes, I will help push your buttocks.” Matcha’s face turned sour as Fish Ball quickly added, “Of course, if you aren’t happy with the arrangement, I can push his buttocks.”

Matcha turned to look at Project X and yelled, “Hey, there is a trash can here. Could you help me to clear it?”

Project X was bewildered.

Fish Ball quickly said, “Nothing, it’s alright! Matcha is a bit shy today!”

Matcha jabbed Fish Ball’s chest with his claws.

Fish Ball cried out in pain, “Don’t jab me. I was seriously wounded! What if it causes an internal injury?”

After being healed, Lightning quickly ran behind Matcha and Fish Ball and said puzzled, “After shedding all my fur, I find Project X leering at me.”

Suddenly, Project X’s face turned sour and murderous intent filled his eyes.

Fish Ball quickly pushed Matcha out and said, “Sorry! Please forgive us! You can do what you want with this orange cat!”

Project X ignored them and turned his head to look in the direction of the imprisoned supercats.

“You are such a scoundrel!”

“Would he dare?”

“No, he wouldn’t dare!”

...

Meanwhile in the middle of the Fortress Nightmare.

Zhao Yao walked out and looked at the prison wardens and said, “Tell Project X that he had no chance to steal the supercats’ superpowers.”

Zhao Yao extended his finger and flicked it in the air.

Powerful forces were emitted from his fingertip and shot out like bullets. Upon impact, the prison wardens flew out.

Zhao Yao activated Rapid Speed and charged into the cell room.

Blood splattered from the bodies of the supercats.

Lucifer's brain flew out a hundred meters and landed beside a supercat's feet. He heaved heavily and said, "I... I... I feel so good... Oops, it is so painful!!"

"Ah!" The supercats fainted when they saw the decapitated head.

In the cage, Ares, Noodle, and Dust Ball fell to the ground, their bodies full of blood.

The remaining supercats were stunned by the bloodbath. Seeing Zhao Yao's approach, they screamed in terror and fled in all directions.

Chapter 803: Each Encounter

Seeing the fleeing cats, Zhao Yao nodded but didn't pursue them as he wanted them to bait Project X into confronting him.

Project X's intention was to capture and rip the supercats of their superpowers. If he knew Zhao Yao was killing the supercats, he would rush over immediately.

Even if Lucifer were decapitated, he was in no danger because of his superpower.

Dustball, Noodle, and Ares had Zhao Yao's blood on their bodies.

During Ultra Rapid Regeneration, Zhao Yao managed to obtain large amount of his blood. By activating Time Freeze, he splattered blood all over their bodies to create a false bloodbath.

Zhao Yao did not want to help Lucifer and the rest to get up. They were better off pretending to be dead as it gave them the opportunity for sneak attacks or self preservation, which was much better than moving around.

Zhao Yao flashed and entered a side passageway. He appeared to have fled but he was hiding to ambush Project X.

...

Using Fortress Nightmare superpower, Project X had a real-time view of the fortress and discovered that his targeted supercats in central prison were killed. His anger boosted his murderous intent.

He turned to look at Matcha, Fishball, and Lightning and said, "Zhao Yao killed your supercat friends. I am going to stop him. All of you will follow me."

"What?!"

The three cats were dumbstruck to hear the news.

Matcha said telepathically to Fishball and Lightning, "It is impossible for Zhao Yao to kill his own cats as he would not do things to his disadvantage."

Fishball thought and replied, "Project X doesn't seem to be lying. Perhaps he was deceived?"

"He must have been deceived by Zhao Yao!" Lightning said with confidence, "Zhao Yao is a great liar and a master cat manipulator. He must have planned to trick Project X into confronting him before capturing Project X."

Seeing the three cats looking at each other strangely, Project X felt frustrated and asked, "What's with you? Is there any problem?"

"Nothing, nothing." Matcha quickly replied and thought, "Let's follow him and coordinate with Zhao Yao to trick him into defeat."

The three cats agreed to follow Project X and he nodded. Suddenly, the back of Project X protruded with large pieces of flesh and three clones squirmed out and landed on the ground.

Project X ran towards the central prison while the three clones carried the cats and followed behind.

Matcha shouted indignantly, “Hey! Please behave yourself and stop touching my buttocks! I am almost s\*itting myself.”

...

30,000 meters in the sky above Jianghai.

A silver streamlined flying object flew at a high speed. In the flying object, numerous sophisticated components were installed on a feline robot.

The grey feline robot’s chest was imprinted with the large words “Doll”. Doll created this anti-electromagnetic mecha with astonishing speed.

“The processes of transportation, development, design, and construction are finally completed.” Doll’s consciousness floated around in the feline robot and he ordered, “Headless, did you find Kun Wu or Project X?”

“I found them, Master, but their situations are not good.”

Surveillance images of the Cat Wonderland turning into a dark huge castle appeared in front of Doll. Two of the images showed Kun Wu entering the wonderland and Project X leading a siege of the wonderland with the prison cats.

Doll frowned and asked, “What kind of castle is this?”

“It has the structure of an unknown dimension,” Headless said. “It absorbed all electromagnetic waves and radiation to prevent all types of probing. We have lost contact with all our robot scouts.”

“Prepare the smart backup,” Doll said, “... for a deeper look inside the castle.”

Headless reminded him, "If we lose the internet and long range connection to the server, the mecha's computing power will fall by more than 99%. Master, are you sure you want to do this?"

"Not 'we', you," Doll said. "Back yourself up before entering. I will wait for good news from you outside."

Headless was dumbfounded.

...

Kun Wu was running and came to a stop as her body quivered.

"How could this have happened?"

She saw the horrifying image in the middle of the fortress via Project X's vision just now.

Lucifer's head was cut and three other cats fell to the ground, their bodies full of blood.

"The Headless Horseman is a devil!" Kun Wu's eyes were filled with hatred. To stop Project X, he killed his own cats?"

"What shall I do? What shall I do?" Kun Wu was feeling hopeless as she thought, "The Headless Horseman is a devil and Project X is not a good cat either. Why are the powerful apostles bad eggs in this world?"

As Kun Wu was sighing and feeling hopeless, suddenly her vision became dark. She saw ghostly shadows emerging from the walls in front and diving headlong into the opposite wall.

"What's that?" Kun Wu jumped in fright and backed up. "Doll's nano robots are here?"

A small girl's head popped up from the floor and looked at Kun Wu as she said, "Oh! Such a beautiful cat."

Kun Wu jumped in fright again and retreated as she asked bewildered, “Who are you? Why did you come out from the ground?”

Xiao Yu was pleasantly surprised and said, “Ah? You can speak?” She happily said, “My name’s Xiao Yu and this is my superpower. Little cat, what’s your name?”

The small girl’s smile was so innocent that Kun Wu let down her guard. She touched her chest and said, “Kun Wu, I am the God of Cats. Why is a small kid like you appearing here?”

Xiao Yu said sorrowfully, “I don’t know. I was separated from my parents and came here accidentally.”

“Huh?” Kun Wu said with concern, “Follow me then, this place is too dangerous for a young kid like you. You will be safer if you follow me.”

Xiao Yu happily nodded in agreement and her head climbed out of the floor smiling.

In the space below the ground, Xiao Yu pinched firmly on the struggling Momo and a few spirits who had just escaped.

Xiao Yu popped her head back underneath the floor and scolded them fiercely, “Stop struggling! If you move again, I will stew you!”

Momo felt exasperated. Looking at Xiaoyu, Momo thought angrily, “If was in my tip top condition, would I be afraid of a student? This is infuriating!”

Chapter 804: Encounter, Confusion, and Discovery

After threatening Momo and the spirits, Xiao Yu threw them on the ground, “Nekomata, keep a close watch on them! If any of them dares to escape, chop off her cat head first!”

Momo screamed, “You devil!!”

Xiao Yu stuck her head back in and said to Kun Wu, “Kun Wu, you’re so nice. Can I hug you?”

Kun Wu saw the innocent look on her face and nodded. Xiao Yu emerged fully from the floor and hugged Kun Wu.

Kun Wu thought to herself, “Children are so innocent and kind. Perhaps children are the only people we can trust in this world?”

Behind Kun Wu’s back, Xiao Yu smiled devilishly.

“What a unique-looking cat. You should be able to fetch a high price with your looks.”

“No, selling her off at once would be a loss. Maybe I should hand her over to Zhao Yao and let this cat serve customers at the Cat Wonderland. That would surely earn a lot more money.”

...

Zhao Yao crawled quietly in the darkness, concentrating on the main hall in front of him as he listened intently to all that was happening within a one kilometer range.

In the main hall, Dust Ball, Ares, and Noodle were still unconscious after being tranquilized. Zhao Yao had no intention of waking them up either.

Lucifer had already found his head and fixed it back on before lying in a pool of blood.

Zhao Xue’s body looked like it was still wrapped in countless steel bands but in actual fact they had already been cut open by Zhao Yao.

At that moment, meowing sounds came from afar. Zhao Yao’s eyes focused as he stared at the hole where the meowing sounds came from.

“Are you here, Project X?”

What appeared before Zhao Yao was not Project X. It was Catherine and Elizabeth, who were tied up by Shadow.

He saw hundreds of shadow threads wrapped around the two ragdoll cats' bodies as they were being dragged towards the cage prison.

Earlier on, Project X gave up chasing Elizabeth and the rest as he wanted to catch Matcha, who had the power of Time Freeze. He left the job of catching them to Shadow, who did not disappoint as he succeeded in his mission and caught them.

Afterall, the ability to control shadows had the upper hand over Catherine and Elizabeth's powers.

Especially since Project X forewarned Shadow of Catherine's ability to induce sleep, Shadow could just avoid looking at Catherine in the eye.

Furthermore, Elizabeth's power of illusion had a slower precedence rate. For a supercat that could turn into a shadow, her powers were effectively useless against him.

Zhao Yao frowned, "It's not Project X? Is this a trap?" He sniffed and listened for a bit but did not sense any other cats nearby.

When he saw Shadow scream in shock and quicken his pace upon seeing the unconscious supercats, Zhao Yao knew he could not hesitate any longer.

Zhao Yao activated Time Freeze as soon as he flew off. In the world of Time Freeze, where everything came to a standstill, Zhao Yao used his shocking physical abilities to rip apart the shadow threads on Catherine and Elizabeth's bodies, rescuing both cats.

He placed Catherine in front of Shadow.

When time resumed its flow, the first thing Shadow saw was Catherine, who had appeared in front of him all of a sudden. He fell into a nap at once, revealing his physical form. Zhao Yao caught him at once and twisted him unconscious before throwing him aside.

Zhao Yao did not let his guard down after doing all this. The muscles on his body tensed up as he switched to the power of Ultra Rapid Regeneration, expecting a surprise attack. However, nothing happened.

Only Elizabeth and Catherine pounced on Zhao Yao, meowing incessantly at him.

Zhao Yao frowned, "It's really a coincidence? My luck is not bad, I actually managed to get rid of one of Project X's henchmen."

...

At the moment when Zhao Yao had just activated Time Freeze...

Project X, who was running with the three cats in his arms, felt the effects of the Time Freeze as well.

"What's going on? I didn't activate Time Freeze." Project X was confused for a moment as he turned to Matcha, "There's no need for him to activate Time Freeze as well..."

Matcha thought, "Is Zhao Yao activating Time Freeze?" Seeing Project X turn his gaze on him, Matcha immediately laughed out loud as he understood at once, "No, I must cover for Zhao Yao, I can't let Project X know Zhao Yao has recombination abilities..."

Matcha immediately responded to Project X's questioning look, "What's wrong? I activated Time Freeze for fun just to test it out, in case anything's wrong with it..."

Project X narrowed his eyes. Although he did not have the ability to read minds, he had Sphinx cat's training abilities and Sang Biao's physical evolution powers which was constantly enhancing his physique and perceptiveness by leaps and bounds. Hence, he could easily sense Matcha's uneasiness.

"He's... lying?"

Next, Project X focused his vision on the whole of Fortress Nightmare, giving him a bird's eye view of everything that was happening within the fortress.

The situation in the center of the fortress immediately caught Project X's attention. Zhao Yao's actions were too obvious in a world of standstill.

“Zhao Yao activated Time Freeze? But... why?” Project X recalled how Zhao Yao activated the Ultra Rapid Regeneration power back in the Cat Wonderland.

“He was also the one who blasted Slaughter right? At that time, besides the Ultra Rapid Regeneration, he had a very strong physique as well. Even if he was concealing his physical prowess, what explains the Time Freeze now?”

Project X frowned, “Apostles should only be able to borrow one kind of power, but this guy seems different from a normal apostle. Besides his strong physical capabilities, he also has the power of Ultra Rapid Regeneration and Time Freeze at the same time?”

...

Under Doll’s command, the anti-electromagnetic mecha arrived near Cat Wonderland.

Looking down, the whole area where the Cat Wonderland had been was surrounded by numerous police cars and even military troops. However, there was nothing they could do about the black castle that had suddenly appeared in front of them.

Doll chuckled to himself. The anti-electromagnetic mecha flew out amidst cries of astonishment as it went head-first into Fortress Nightmare.

Doll lost all contact with the anti-electromagnetic mecha the moment it entered the fortress.

Headless remained in the smart backup of the mecha. He felt the camera flash black before turning bright again. He realized that he was in a strange building.

“What a weird place,” Headless thought to himself. “What am I supposed to do next? I should just turn off the mecha and take a break since Master can’t see me. I’ll go out after the incident is over.”

The next moment, Doll’s will suddenly rang shrilly inside the mecha, “Headless, what are you doing?”

“Eh??? Master, didn’t you decide not to come?”

“I installed a temporary backup of myself so I can see what’s going on in here. Who knows if you would actually do your work diligently,” Doll said. “Start exploring this space and locate Kun Wu and Project X.”

The next moment, 16 openings opened up as nano detectors flew out from them, spreading out at super speed across all the channels around the mecha. Sonar and electromagnetic waves radiated from these detectors to detect the layout of the place, transmitting the information gathered to the mecha.

Every time it reached a fork, the nano detectors would split into two, venturing into different forks as they continued to detect the layout of the place.

In Doll’s vision, a giant construction diagram of Fortress Nightmare quickly materialized and expanded continuously as it became more and more detailed, more and more complex.

Headless: “Master, I received an electromagnetic signal. It seems to be a phone.”

“Send a nano detector over.”

Looking at the huge missing block that suddenly appeared in the diagram, Doll asked, “What’s going on there? Send the video signal over.”

The next moment, a large area of holed walls and debris appeared before Doll’s eyes.

Chapter 805: The Time Freeze Duel

“This...”

Looking at the floors that seemed to have been destroyed by a monster, Doll remarked in astonishment, “Did a huge battle happen?”

“Headless, resume motion path.”

All sorts of images of broken ceilings and destroyed walls appeared before Doll.

“Such speed and power is something even Project X can’t achieve. Who was the one fighting?”

At that moment, the nano detector stopped in front a phone in the debris.

Doll glanced at the phone screen and commanded, “Unlock the phone and see what’s inside.”

Very soon, Project X and Sphynx cat’s battle appeared in front of Doll.

“This...”

Sphynx cat’s speed was insanely fast. The video could not capture his body at first. Only Project X stood on the spot, looking like he was actively defending himself against something.

What followed was Sphynx cat’s ultimate attack, Project X’s counter, Shadow’s attack, his fake death, Project X’s return and a string of continuous battles.

Doll’s face became even more sombre as he watched the battle through the video.

“This Project X... his capabilities became even stronger.”

Doll analyzed the battle. The more he did, the more astonished he was.

“Project X’s body can now have many other duplicates. The more duplicates he have, the weaker his power becomes. However, by merging the shadow ability and gravitational ability, he could successfully reassemble at any time even if he was injured. Unless he is smashed to pieces, normal injuries will not affect him at all.

Now that he has taken Sphynx cat’s abilities, his physical prowess has increased to the point that he can leap around like Sphynx cat did, which is as good as flying.

Furthermore, this guy has very strong detection abilities within this space. It’s as if he could see whatever was happening in other parts of this space. That’s why he came back to kill Sphynx cat who feigned death.”

“If I want to kill Project X, I must kill all his other doppelgangers.”

“But I have to do that in such a huge space where each of his doppelgangers have the ability to merge into the shadows.”

“How am I supposed to do that?” Doll fell into despair. “Project X can spot us from afar. This is obviously a losing battle.”

...

Da!

Da!

Da!

Da!

Footsteps of paws tapping against the floor rang continuously.

Zhao Yao subconsciously took a deep breath as the hair on his body stood on its ends.

At that moment, his super intuition gave him a super strong repressive urge. That limitless, lawless evil assaulted his senses, as if it disregarded all life on Earth.

Zhao Xue, who was still trying to put up a strong front as first, could not help but fall to her knees and started panting heavily.

Her eyes stared straight ahead as her mind turned blank at this moment. Her body froze up as if she was a mouse dangling from a tiger’s mouth.

Zhao Xue thought, “This guy... what exactly is he? Why does he have such a strong suppressive aura?”

Zhao Yao was similarly stunned, “Is that you, Project X? But even if he absorbed Sphynx cat’s abilities, it’s impossible for him to achieve such astounding effects through training. What exactly is going on?”

At the same time, Project X slowly walked out from the corridor, appearing alone in the main hall.

His ears twitched when he saw the supercats lying in a pool of blood and immediately sensed that they were still alive.

“Humph, so you’re faking murder to lure me over here?”

“Is he here?” Zhao Yao narrowed his eyes as he exchanged for the Cat Princess Dress and switched to the powers of Time Freeze and illusion. He activated the Power Up Card as well.

Counting the previous Cat Princess Dress, once the Cat Princess Dress and the Power Up Card this time round expires, Zhao Yao would be left with only one more chance to activate the Power Up Card.

In the world of Time Freeze, Zhao Yao did not attempt physical attacks as he fully understood Project X’s abilities. He simply went slightly closer to Project X before casting the power of illusion.

“The Great Flow of Idleness!”

However, to Zhao Yao’s astonishment, Project X’s body flashed before charging towards him as he threw out his paw, raining punches on Zhao Yao’s face ruthlessly.

Project X shouted telepathically, “Zhao Yao, you think you’re the only one who can activate Time Freeze?”

On the way here, Project X had obtained the power of Time Freeze from Matcha. He just did not take away Matcha’s ability and intelligence for the time being.

Zhao Yao grabbed his paw but immediately felt how insanely strong his opponent's powers had become. His whole body flew out at once and crashed into a wall hundreds of meters away.

“Hahahahaha!” Project X let out a long, raucous laugh. The ground beneath his feet started breaking apart layer by layer as his whole body leapt out, catching up almost instantaneously. His paw lashed out towards Zhao Yao's chest again.

“Go to Hell! Zhao Yao!”

Zhao Yao stretched out both hands to block the blow. At that moment, his body dropped downwards as he cast the power of illusion, blasting the Great Flow of Idleness towards the other party again.

Project X's body shook again before his ears completely closed off. “Sound wave illusions? That stuff is useless on me. Show me your true capabilities!”

Bam! He stamped hard against the wall behind him and flew out like a cannonball as the wall behind exploded him, crashing directly into Zhao Yao.

Zhao Yao blocked Project X's paw with one hand as he grabbed him by the head with his other hand and screamed, “Project X!!” The next moment, he crashed his head ruthlessly against Project X's head. With a loud explosion, both cat and man fell through the ground, breaking through three storeys at once and landing in darkness.

However, the two did not stop fighting in the dark. Enormous waves of power crossed between cat and man, destroying everything in their path.

The destructive power from their battle was 10 times scarier than that of Sphinx cat's explosive power.

However, Zhao Yao could feel that Project X's fighting power was constantly upgrading. His power, speed, explosiveness, and reaction time was improving every second, suppressing Zhao Yao bit by bit.

“I can do all that you can!” Project X screamed wildly telepathically. “My powers are constantly improving. What right do you have to fight against me?”

Bam! His paw slammed mercilessly on Zhao Yao's face, sending him flying outwards. However, Project X caught up in no time and continued blasting an avalanche of attacks on him.

"Too weak, too weak, too weak! Zhao Yao, you're too weak!" Project X unleashed a blizzard of attacks while bellowing telepathically, "Do you see this? This is undefeatable power and an ever-evolving body!"

I can no longer perish and can even control time! This whole planet is destined to be mine!"

Zhao Yao was focused on defense as he cowered up. There was no sign of panic on his face.

Seeing as the 12 seconds of Time Freeze was about to run out, Zhao Yao finally smiled.

"Project X!" Zhao Yao taunted him, "How long is the duration of your Time Freeze?"

Project X paused for a moment, but his punches still showed no mercy. His tail swept Zhao Yao flying out and he pursued right after, following up with a chain of attacks.

Zhao Yao continued, "12 seconds? Or 96 seconds?"

"But now, 10 seconds have passed..."

Zhao Yao counted, "11 seconds..."

Project X thought, "His physical prowess is completely suppressed by me, and we share the same power of Time Freeze. Does he have something else up his sleeve?"

"12 seconds..."

Project X's frown creased deeper and deeper as an ominous feeling swelled in his heart, "This guy... what is he trying to do?"

The two fought on intensely, conversing telepathically at super speed as they fought beyond hundreds of meters in the blink of an eye.

However, at the next moment, Project X came to a complete standstill before Zhao Yao. His paw was only 0.01cm away from Zhao Yao's face.

“Project X, you can't move now right?” A murderous glint flashed in Zhao Yao's eyes, “But I now have more than 100 seconds of time to strike.”

“Project X!!”

“Go to Hell!”

Zhao Yao, who had activated the Power Up Card, had his power of Time Freeze extended to 120 seconds, amounting to an astonishing total of 960 seconds of time.

At the same time, the muscles all over Zhao Yao's body spontaneously expanded as rays of golden light symbolizing the Deflective Field wrapped around his body. His fist was glazed with golden light as well as he rained down blows on Project X's head mercilessly.

Bam! As Project X's face slowly contorted and deformed, Zhao Yao turned into an avalanche of shadow punches that swallowed the immobilized Project X whole.

Thousands of tons of energy and power compounded mercilessly on Project X's body, as if to burst every chunk of flesh, blood, and even his cells into dust, wiping any chance of revival for him.

Chapter 806: The Strongest vs The Weakest

In the world of Time Freeze, Zhao Yao's blows rained mercilessly on Project X. The power of six cats coupled with the Power Up Card-enhanced Deflective Field was enough to blast a building with one punch, while the power of one kick was enough to flatten a fortress.

Shadows of his kicks and punches enveloped Project X as his face contorted and deformed. The mad bursts of energy in each blow turned Project X's face backwards as his four limbs and torso started to deform and each of his bones and muscles started to rupture.

“You guessed it.”

A hint of confidence flashed across Zhao Yao’s eyes as he watched Project X deform and break apart under his punches.

“Project X’s duplicating ability is split into active and passive duplication. He can even replicate a supercat’s Time Freeze ability just from the apostle that borrowed the supercat’s powers.”

“Just like what he did previously, replicating Matcha’s ability from my body.”

“However, there was something he could not do.”

“Based on his performance, attitude and battle tactics, it seems that after replicating the ability from me, he had never seen the panel, never seen missions, never seen the diamond hall, nor the rewards equipment.”

“This means that Project X could only replicate the abilities of supercats. He can’t replicate my abilities, neither can he replicate my Book.”

“So he has no missions, no experience points or rewards, no ability to upgrade supercats, no equipment and no additional powers like the Cat Princess Dress or Power Up Card that he could use.”

At that moment, Zhao Yao had figured out the limits to Project X’s replicating abilities.

He could replicate a supercat’s abilities to its maximum potential, even with Matcha, whose Time Freeze ability was upgraded to 12 seconds. As long as it was Matcha’s ability, Project X would be able to replicate it.

However, when Zhao Yao used the Book’s Power Up Card to extend the lasting power of Time Freeze from 12 to 120 seconds, Project X was unable to replicate this effect. Hence, Project X only had Matcha’s Time Freeze ability and could not replicate the Book’s powers.

Bam! Landing one last punch on Project X, Zhao Yao had at this point used up 40 seconds of Time Freeze, including the 12 seconds from earlier on.

When time resumed its flow, Project X only felt a sudden, extreme pain in his body before he lost all feeling in his organs, blood and flesh, exploding in a cloud of blood and flesh.

“Despicable!!”

“After my Time Freeze ended, his Time Freeze actually continued to run?”

“Why did this happen? How did his Time Freeze exceed 12 seconds?!”

Flames of anger raged in Project X’s heart at the thought of being bashed into pieces alive by a mere human.

“Zhao Yao! I want to swallow you whole!”

Whoosh! In that instant when his physical body was battered into dust, the shadow beneath Project X’s feet contorted and shot out countless shadow spikes that reached for Zhao Yao’s shadow.

However, right at the moment Project X attacked, he saw a cute ragdoll cat in Zhao Yao’s arms.

“It’s that cat... d\*mn it!!”

Project X’s vision blacked out as he emerged from the shadows. However, Project X’s physique was far stronger than her powers, hence he immediately awoke from the nap he fell into.

However, this tiny lag in time was enough for Zhao Yao to activate Elizabeth’s controlling power as his eyes flashed red. Project X was immobilized on the spot, much to his astonishment.

“One down.” Zhao Yao sighed in relief but did not attack the Project X that was held in control immediately. Instead, he shifted his attention elsewhere.

Just as he expected, once this Project X had been caught from the shadows, footsteps echoed through the passageway as three other Project X’s walked towards him.

Especially after seeing the last Project X, a murderous glint flashed across Zhao Yao's eyes.

Three cats, Lightning, Fish Ball and Matcha, were held tightly in that Project X's arms, unable to escape. However, judging from the three cats soulful eyes and expressions, their intelligence seemed to be intact.

"So he caught Lightning, Fish Ball, and Matcha?" Zhao Yao frowned slightly. Although he was very happy that the three cats appeared unharmed, he was puzzled as to why Project X did not just take away their intelligence.

"If I'm Project X, even if I don't kill my opponents, I would want to rob them of their abilities and intelligence and turn them into normal cats. So why is this happening? Or is he trying to threaten me?"

The three Project Xs walked over and stared at Zhao Yao at the same time, "Zhao Yao, your capabilities were indeed beyond my expectations. However the attack you did during the Time Freeze just now, how many times can you continue doing that? If you can kill one of my doppelgangers each time you did that, how many of me can you continue to kill?"

Another Project X continued, "And this targeted controlling superpower. It can only control one cat at a time right?"

As they said that, the two Project Xs had slowly advanced forward, flanking Zhao Yao on both sides.

"Elizabeth, don't strike first, I will test the capabilities of these doppelgangers first," Zhao Yao told Elizabeth telepathically as he narrowed his eyes, controlling the Project X that he had subdued as they moved towards the other two Project Xs.

In an instant, the two doppelgangers of Project X and the Project X that was being controlled by Zhao Yao fought against him. The three cats and one man scuffled amidst howling blows as intense energy crossed between them. Huge chunks of walls broke apart, stirring shock and fear amongst the supercats that were watching the battle from the side.

However, Zhao Yao was more shocked than any of them.

“The fighting power of these two doppelgangers are about the same as the Project X in the Time Freeze previously.”

“No, they’re actually slightly stronger. Is it because of the training ability?”

“But, how exactly did he do it? Can each doppelganger be as strong as his actual self?”

“No, fighting them head-on like this won’t work. Fighting each doppelganger head-on like this is too much a waste of time and energy. It’s impossible to kill Project X like this, especially since his body is constantly evolving.”

Between blows, Project X smiled and taunted, “What’s wrong? Feeling hopeless? Do you understand how undefeatable I am now? You’re a mere human. How could you win against me?”

Bam! As they exchanged blows, Project X merely retreated a few steps while Zhao Yao was sent flying out more than hundreds of meters.

As Zhao Yao flew out, Project X activated Time Freeze again.

Looking at the immobilized Zhao Yao, Project X’s lips curled into a smile.

“Your strongest point is also your weakness,” Project X slowly walked up to Zhao Yao. Looking at his immobilized body, he said calmly, “Matcha’s Time Freeze ability lasts as long as its lasting time. Although I don’t know how you managed to extend the duration of the Time Freeze, you showed me that your Time Freeze lasts longer than mine.”

“12 seconds have passed. I can still activate Time Freeze again, but you?”

The next moment, both Project Xs stood to the left and right of Zhao Yao in a flash. They extended their paws, pressing on Zhao Yao’s face and chest.

Slaughter’s laser beam ability was activated and white blasts of high-energy laser beams shot out from the paws of both Project Xs, blasting his face mercilessly. The laser beams reached thousands of degrees in temperature as they spread out instantly, enveloping Zhao Yao’s body entirely.

## Chapter 807: Affection

Under Time Freeze, Zhao Yao's Time Freeze ability was still in its cooling off period, hence he was unable to activate the Ultra Rapid Regeneration ability. Zhao Yao's body visibly melted and dissipated into puffs of bloody smoke in the air as the high-energy laser beams blasted his body.

For Project X, Zhao Yao's strong physique withstood the attack for 10 seconds under Time Freeze. Relative to his own Time Freeze, Zhao Yao actually withstood the attack for 80 seconds.

The next moment, Zhao Yao had completely turned into ashes.

However, much to Project X's surprise, it was as if the clock turned back as Zhao Yao's physique reassembled itself from the ashes and materialized in thin air. He grabbed Project X by the head and threw him out before turning to the other Project X to fight.

"He can still regenerate and revive?" Project X was shocked. "He could enter the Time Freeze mode immediately after regeneration. Is this a derivative power of Matcha's? This orange cat is getting more and more interesting."

After Matcha's regeneration ability was activated, it would immediately enter the Time Freeze mode. Zhao Yao made use of this special characteristic to activate Time Freeze again, even as his body was being burnt into pieces.

Project X's 12 seconds of Time Freeze passed in a flash. Using his own extended duration of Time Freeze, Zhao Yao crushed the two doppelgangers of Project X into puddles of flesh and blood. Even so, he did not look happy at all.

"I can't continue fighting like this. Fighting with Project X based on regeneration and brute force is meaningless. I have to change to a different fighting style."

Time resumed its flow. Another two doppelgangers emerged from Project X's shadows.

"This is never-ending. What's up with Sang Biao's physical evolution abilities? Can he really create physical doppelgangers endlessly?"

As Zhao Yao and the other Project Xs fought beyond a thousand meters, breaking walls and destroying everything in their path, Elizabeth slowly sat up in the main hall as she stared at Matcha, Fish Ball, and Lightning, who were still in Project X's arms.

The three cats were, however, unconscious. Project X seemed to sense Elizabeth's gaze as he turned towards her and spoke calmly, "You better stay where you are and not move an inch. Or else I will have no choice but to rob you of your ability and kill you on the spot."

Elizabeth had no intention of moving. Although she could control the other party right now, she could not be sure that there were no other Project Xs around them.

She just activated her power of illusion and removed Matcha, Fish Ball, and Lightning's five senses before transmitting her own voice into their consciousness to awaken them and drag them into her illusion.

The three cats woke up very quickly. When they opened their eyes, it was pitch-black all around, except for the glowing Elizabeth before them.

Matcha asked, "What's going on? How did you appear, Elizabeth? Am I dreaming?"

Fish Ball replied, "You idiot, it must be an illusion! Elizabeth, what's the situation now?"

Elizabeth briefly explained to them before she asked, "What are you guys doing? Why is Project X hugging you all? And he hasn't even took away your intelligence?"

Matcha laughed awkwardly as he said, "Maybe he thinks we're handsome and smart so it would be a waste if we turned into normal cats..."

"Idiot! Do you think this is a time to tell lies?" Fish Ball smacked the back of Matcha's head with his paw as he told Elizabeth, "Based on my experience in dating cats, I am 99% sure that Project X is in love with Matcha."

"What?!" Elizabeth was in disbelief, "That weird cat won't even spare a second glance at me, why would he like Matcha?"

...

Outside the illusion...

Project X glanced at Elizabeth from afar. Seeing that she remained on her spot, he frowned and thought to himself, “This female cat is so annoying. Why does she keep staring at me?”

...

In the illusion...

Fish Ball explained the situation before he concluded, “I am very sure about this. This guy is gay and he likes the ordinary-looking, next-door orange cat type, just like Matcha.”

Matcha was annoyed when he heard Fish Ball’s words. He pointed to his droopy ears and said indignantly, “Look at this pair of folded ears. Look at them! Look at these ears and touch your heart before you speak. How could you say they’re ‘ordinary-looking’?”

Fish Ball walked up to him and chomped down on Matcha’s ears, straightening them at once. “Don’t touch your ears so carelessly. What if Project X doesn’t like your folded ears.”

“What the f\*ck!” Matcha burst out in rage. “I don’t care if he likes it or not! No one is allowed to touch my ears!”

Fish Ball got into a tussle with Matcha as he said angrily, “Can’t you see Zhao Yao is about to lose the fight? Whether we can save the world depends on you now!”

“Noooo!” Matcha screamed angrily, “Even if I’m beaten to death or robbed of my intelligence and turned into an idiot I would never ever turn gay for this!”

Lightning rambled at the side, “Like what you guys said, Project X can manipulate his physical form and turn it into anything he wants. Does that mean he can turn into a male or a female or basically any kind of cat he wants to turn into?”

When he realized Fish Ball, Matcha, and Elizabeth were all staring at him disdainfully, Lightning immediately shook his head in defense as he tried to explain himself, “Hey! What are you guys thinking of... Don’t look at me like I’m perverted. I’m just making guesses!”

...

On Doll’s side, a mass of new data appeared in front of him.

Headless reported, “A 3.2 magnitude earthquake was detected. It originated from...”

Doll interjected, “Is Project X fighting someone else now?”

Headless exclaimed, “The machine detector located Kun Wu! But, there someone else with her.”

Doll asked, “Where? Bring me to her!”

...

Bam! Bam!

As sounds of the ground exploding boomed, Zhao Yao and Project X burst through the wall once again and returned to the center of the main hall.

Project X smirked, “Even regeneration is not endless, how many times will Matcha’s ability allow you to regenerate? Twice? Once? Or none at all? We will know in the next Time Freeze.”

“D\*mn it!” Zhao Yao gritted his teeth in anger. He did not expect Project X to become so hard to deal with after Project X gained Sphynx cat’s abilities.

Right at this moment, Elizabeth communicated to him telepathically, “Zhao Yao! Project X has a liking for Matcha.”

“What?” Zhao Yao’s first reaction was disbelief, but the next moment, his eyes flashed as he recalled, “It’s not impossible. Sphynx cat’s abilities includes reversing his sexual orientation. Since

Project X robbed his abilities, he would definitely suffer from the side effects of this power. That's why he didn't kill Matcha and the rest but carried them here with him.

He's not using Matcha and the others as hostages. He's trying to protect them."

However, affection alone was useless. From Project X's behavior, the fact that he could knock Matcha and the rest unconscious and want Zhao Yao's life showed that he was not the kind of supercat that would stop fighting just because of his affection for Matcha.

Moreover, such affection was mainly based on Matcha's abilities. Once Project X realizes the significance behind this, even Zhao Yao would not be able to predict what Project X would do.

"But, we may be able to make use of this point."

Chapter 808: Medusa

"We can make use of this point."

As Zhao Yao pondered, his eyes filled with cold light.

Matcha felt his fur shedding and asked, "What's happening? Why do I feel like someone's going to harm me?"

In the next moment, Zhao Yao charged towards Elizabeth.

Project X pursued Zhao Yao and discovered that he had dropped all defenses and braced himself for all attacks. Zhao Yao ran to the front of Elizabeth, whom Project X found disgusting and grabbed her.

Project X wondered, "What's he up to?"

To Project X's surprise, Zhao Yao swiveled and dashed towards Matcha while holding Elizabeth.

"Huh?" Project X jumped in fright. He was worried for Matcha and readied all his superpowers as he chased after Zhao Yao.

The shadows underneath the three clones emerged from the ground, surrounded Zhao Yao and edged towards his body.

“I think he is going to dodge the shadows.”

To Project X’s amazement, Zhao Yao neither defended nor dodged the shadows. He bolted towards Matcha at full speed and braced against Project X’s attacks.

Project X was unaware of Zhao Yao’s intentions. However, Project X was not going to miss capitalizing on Zhao Yao’s weakness.

Bam!

Numerous shadow spikes landed on Zhao Yao’s shadow. Two of the clones pincerred Zhao Yao from his left and right and penetrated his chest and stomach with their claws, immobilizing him.

Although Zhao Yao’s Ultra Rapid Regeneration was healing him, Project X’s claws grabbed onto his bones, immobilizing him and preventing full recuperation of his wounds.

The two combat clones and the shadows underneath locked Zhao Yao firmly in place. The clone holding Matcha flicked out his claw to explode Zhao Yao’s head.

Zhao Yao’s eyes emitted crimson rays and controlled the clone holding Matcha.

The other clone lost control and bit Zhao Yao’s neck with his sharp teeth and continued gnawing to break his neck.

“Is he suicidal?”

Seeing Zhao Yao seriously wounded and unable to move, Project X looked puzzled at his clone that was controlled by Zhao Yao.

The clone did not attack Zhao Yao. Instead, he received a scarf from Zhao Yao and covered Matcha’s neck with it.

Project X was stunned when he saw the scarfed Matcha. He was unaware that the scarf was transformed by Elizabeth, who had taken a Spicy cat strip. After wearing the scarf, Matcha would be able to entice everyone around him.

“Another... illusion? This feeling... is so pleasing...”

Project X possessed superior constitution and body control. He was able to hear sound waves that normal people could not and shut off his five senses any time.

He had acquired the Sound Wave Control superpower from the Kujyo's supercat in Japan.

So he could shield himself from Elizabeth's illusion attacks.

Seeing the scarfed Matcha, he had no intention to stop the illusory sound waves.

Zhao Yao was glad he had succeeded.

Project X was subjected to both Sphynx cat's superpower and Elizabeth's power of illusion.

Sphynx cat's superpower changed Project X's character and Elizabeth's scarf boosted the effect of the change, which was part of his nature so he didn't notice it.

Previously Zhao Yao only attacked physically and now he used psychological attacks which were harder to detect.

“Sphynx cat's sacrifice is not in vain as he left a large loophole in Project X's defenses.” Seeing Project X's dazed look, Zhao Yao said, “Thank you, Sphynx cat.”

He shouted telepathically to Matcha, “Matcha, Project X is controlled by the illusion. Repeat what I am going to say next. Don't screw up.”

Matcha frowned and replied, “May I opt out?”

“If you don't obey me, I will castrate you.”

Matcha thought, “What a selfish Zhao Yao!”

In Project X’s eyes, Matcha smiled and said, “Project X, would you show me your true self?”

“My true self?” The effects of the illusion, compounded by Sphynx cat’s superpower, made the words of Matcha extremely convincing.

Project X shrugged his shoulders and said, “My current self is my true self.”

“Those are your clones.” Matcha followed Zhao Yao’s words and said, “When you merge all your clones that will be your true self. May I see it?”

“Merge them together?” Project X hesitated as his instincts wanted to screen off the sound wave illusion and finish the battle. However, a voice from the deepest part of his heart told him to follow Matcha’s words.

At this critical moment, a spirit, who was a subordinate of Momo, barged into the main hall.

The spirit of Momo did not have powerful superpowers, however, she was able to collect spirits to form the Spirit Army by using debts.

Project X made Momo useful by asking her to collect debts to form a small spirit unit.

This spirit charged in and shouted, “My lord! Bad news! Lady MOMO was captured!”

Project X’s eyes flashed with clarity. Using his superior willpower, he cut off the sound wave illusion and grabbed Zhao Yao’s head.

“Are you fooling me?”

Zhao Yao looked at the angry Project X and sighed as he thought, “I have no choice but to resort to this.”

Zhao Yao was very clear about Project X's superpowers. Besides Time Freeze, he prepared a trump card to deal with Project X.

If the trump card was used, Project X would be wary against similar attacks. Hence, Zhao Yao was waiting for a good opportunity, the greater the number of clones the better the effect.

At this time, he had to use the trump card. In the next Project X's Time Freeze, he would not be able to defend himself using his regeneration.

Project X attacked the immobilized Zhao Yao who braced the attacks with boosted Ultra Rapid Regeneration. At the same time, Zhao Yao focused on his mission panel.

Catherine, Level 6 (0/10000)

Zhao Yao upgraded BOOK so he was able to contract new supercats.

Before Shadow captured Catherine and Elizabeth and the arrival of Project X, Zhao Yao had contracted Catherine.

With the upgrade of BOOK and completion of the successful contract, he obtained 6000 experience points. Together with his previous 3287 experience points, he upgraded Catherine to Level 6.

To avoid Project X's suspicion, he browsed the skill tree and made Level 2 to Level 6 skill selections but didn't touch the screen.

In order to deal with an infuriated Project X, Zhao Yao used up Catherine's skill points in one go, pushing her superpower to an astonishing level.

Sleep Medusa Level 6: Any living things who viewed your body within 1000 meters will fall into a deep sleep for 6 seconds. After waking up, they will be in fear for 6 seconds.

Chapter 809: The End of Project X (1)

Upgrade the superpower, activate Catherine's superpower and then close his eyes.

Zhao Yao completed all these actions in a blink of an eye and activated Sleep Medusa. Every living thing that gazed at him fell into a deep sleep.

Four clones of Project X fell to the ground. Another four shadowed clones, who were underneath their legs, returned back to their normal state and fell into a deep slumber.

Everywhere in the main hall, countless shadowed clones of Project X returned to their normal state as they fell to the ground in a deep sleep.

Even Matcha, Fish Ball, and the rest were induced into a deep sleep.

In the main hall, only Zhao Yao was unaffected.

As Project X was able to duplicate his superpower, he closed his eyes beforehand in order not to fall asleep.

“Project X’s Passive Superpower Duplication is able to duplicate superpowers within his effective range.”

“Even if he is in a deep sleep, however, his passive superpower is still in effect. If I look at him, I will fall asleep.”

Zhao Yao leaped gently and jumped to a height of over 30 meters in the sky.

“There should be no clones of Project X here.” He opened his eyes, surveyed the ground, saw more than a hundred clones and felt discouraged.

“There are too many clones.”

“Each clone has steel-like constitution and a hundred of them will take me a long time to kill.”

Zhao Yao had underestimated the number of Project X’s clones. There might be other clones located outside the main hall to be used as reinforcements.

Fortunately, these clones were defenseless. Zhao Yao activated Great Flow of Idleness that engulfed them in the hall.

Clones after clones stopped breathing.

As the clones were not living things, they only lost their mobility. They did not die due to asphyxiation.

Zhao Yao also knew that Project X would cut off his links with the clones to protect himself. The Great Flow of Idleness was only useful for sealing off these clones.

He felt it was a great achievement to immobilize hundreds of clones.

“It is a pity... if only Matcha had managed to recall all of Project X’s clones. The battle would have ended when he sealed all of them in one go.”

Zhao Yao infused his seals with the Great Flow of Idleness and sealed all the clones so that he did not have to activate the superpower all the time.

The seals of illusion was Elizabeth inherent ability, which allowed an illusion to be sealed on an object. Even if Zhao Yao did not maintain the illusion, the seal would provide the illusion.

After sealing, he was able to activate other superpowers.

Zhao Yao grabbed a steel column to create his seal of illusion as the six seconds of deep sleep elapsed. Matcha, Fish Ball, and the rest woke up meowing and running around in fear.

This was the six seconds fear induction of the Sleep Medusa superpower.

Matcha sprawled on the ground and said, “It is finally over. I am almost scared to death.”

Fish Ball and Lightning laid on the ground, their faces filled with terror.

Elizabeth and Catherine gathered around Zhao Yao and meowed, “How’s it Zhao Yao? Is Project X defeated?”

“Not yet.” Zhao Yao finished the sealing and shoved the supercats behind him. Then he carried Matcha and said, “He’s here again.”

“Back again?” Fish Ball said dejectedly, “Why is he invincible? Is he too powerful? How do we defeat him?”

Matcha, who was being carried in Zhao Yao’s arms, felt wonderful and thought, “Hmmm, Zhao Yao loves me the most. At this critical moment, he is protecting me in his arms.”

Project X walked out from the middle of the passageway and gazed at Zhao Yao and the cats as he smiled sarcastically. “Any more gimmicks?”

Zhao Yao sneered and raised up Matcha as he said, “Don’t come over. One more step and I will strangle this cat.”

Matcha was stunned.

Project X furrowed his brows and laughed. “He is your cat and the Time Freeze is a valuable superpower. I don’t believe you will kill him.”

“Don’t believe?” Zhao Yao said grimly, “I have killed countless cats without any reason. You don’t believe I will kill him? Good, I will burn him now!”

Zhao Yao scratched the floor with his steel column, creating fire sparks that jumped on Matcha’s tail.

Matcha panicked and screamed, “I’m on fire! Extinguish the fire!” He was puzzled and thought, “Huh? Why is the fire not painful? Is my willpower so powerful?”

Zhao Yao said telepathically to him, “I had activated my superpower to shield your feelings of pain. Pretend to scream in pain.”

Matcha said anxiously, “Zhao Yao, don’t burn anymore. I am almost toasted!”

Zhao Yao reassured Matcha and said, “Don’t worry, once the cooling down period of the Reborn superpower is over, I will beat you to death so that you can be revived. I guarantee that your tail will be better than new.”

Matcha said, “You want to beat me to death?”

Zhao Yao coaxed, “It’s alright. I will numb your feelings of pain. Once you shut and open your eyes, you will be a new cat.”

Project X stared at Matcha’s burning tail wide-eyed, ready to charge out.

He was stopped by Zhao Yao, who squeezed Matcha’s neck and shouted, “Don’t come over. I will kill this cat!”

Project X clenched his fists and gazed at Matcha’s tail that was burning with increasing ferocity. “I don’t believe you will kill him!”

“Try me!” Zhao Yao yelled, “There is no cat in this world that I will not kill!”

“Be careful!” Fish Ball blinked his eyes at Matcha and shouted, “Project X, don’t come near. Zhao Yao will kill Matcha!”

Elizabeth added, “Zhao Yao ate a kitten who was just into his first month! Don’t force him. He is willing to do anything!”

Project X’s face turned very grave.

Matcha fumed as he said, “Are you all done? Is it time for idle chat? I am on fire! Whatever decision you are making, could you make it quick?”

Project X narrowed his eyes and his murderous intent rose within him as he uttered word by word, “What do you want?”

Zhao Yao said, "Merge all your clones into your body!"

Project X smiled wryly and said, "Impossible."

Matcha screamed, "Project X! Follow his orders! My bottom's toasted!"

Project X looked grave as he pondered for a while. He gazed deeply into Zhao Yao and shouted, "Okay, I hope you do as promised."

Clones came in from the darkness outside the main hall and merged into Project X.

## Chapter 810: The End of Project X (2)

Though Project X claimed he had recalled all clones, Zhao Yao was not convinced.

Project X insisted he had recalled all clones so Zhao Yao was at a loss.

The situation was in a deadlock when Bai Quan brought Roly Poly and Sheriff into the main hall.

Bai Quan met Sheriff on his way to find Zhao Yao and he encountered the escaped supercats. With Sheriff's mind reading, he obtained information from the supercats and found his way there.

Zhao Yao's eyes lit up when he saw Sheriff in Bai Quan's arms. He immediately ordered Sheriff to check if Project X was telling the truth.

As Sheriff had to be close to Project X to read his mind, Project X was able to duplicate his mind reading. As such, both parties were reading each other's mind.

Project X was unable to hide the truth that he had not recalled all his clones.

With Zhao Yao pressuring him, Project X smiled wryly and recalled all his clones for merging.

Zhao Yao took in a deep breath as he felt an immense pressure that he had not experienced before.

The merged Project X felt as though he was a mountain that appeared from the clouds, its strength was setting off alarms in Zhao Yao, warning him of Project X's superiority.

Matcha said, "Zhao Yao, I know you are busy. Do you mind helping me extinguish the fire?"

"Oh!" Zhao Yao quickly snuffed out the fire and said with embarrassment, "Sorry, sorry, I am so stressed I forgot about you."

Matcha was burnt bald and his tail charred. He looked at his dismal state and said sadly, "D\*mn... my tail doesn't look like a tail."

"It's alright, it will be as good as new after Reborn superpower is activated."

Project X yelled, "Have I done my part? I had merged all my clones. Will you release Matcha now?"

Zhao Yao looked at Project X and said, "Yes, please catch him..." At the same time, he said telepathically to his cats, "Close your eyes!"

He activated Sleep Medusa.

None of the cats fell asleep, not even Project X who stared wide-eyed at Zhao Yao.

Zhao Yao was surprised. "You..."

Project X said, "The same gimmick will not work on me twice. I have shut off the connection to my optic nerves. My eyes are looking at you but I can't see you."

Zhao Yao squinted his eyes as Elizabeth's Control superpower activated. Project X's body immediately stiffened.

Before Zhao Yao and the cats could gloat, a small clone came out from Project X's chest. Project X's clone smiled wryly and said, "Don't think I'm not prepared for this? I have a lot more clones in my body. How many can you control?"

Seeing Zhao Yao's face turn sour, Project X swiped his tail and said, "Enough, don't resist anymore. You survived so many of my attacks. You can be proud of yourself. Release Matcha and I promise you safety."

"I haven't used hundreds of my superpowers. Do you think you have a chance?"

Project X's body grew by a few inches and his muscles strengthened as a result of his body's training and evolution.

Zhao Yao gritted his teeth as he fell into an emotional turmoil. All possible solutions flashed through his mind but were quickly shot down.

Zhao Yao pondered when he heard Matcha's voice. "Zhao Yao, I will stay with Project X."

Zhao Yao lifted his head and stared at Matcha as he firmly said, "No, I will not leave anyone behind."

"We have no other choices." Matcha opened his eyes widely and gave a forced smile. "It's alright. He likes me a lot. He wouldn't harm me."

"Zhao Yao..." Matcha gently pushed Zhao Yao's palm and stepped on his chest nipple. "Let me go. I am the strongest supercat and the savior. If I don't save all of you, who will?"

"Enough Matcha." Zhao Yao noticed Matcha's body trembling and caressed Matcha's head as he said, "It's alright, don't worry..."

As Matcha and Zhao Yao were conversing, Project X took advantage of Zhao Yao's distraction.

Crimson rays radiated in all directions from Project X.

The Divine Rays of Terror engulfed the entire hall.

When Kaede Hattori dominated the Japanese supernatural realm, the power of the Divine Rays of Terror held numerous apostles in terror.

Project X committed heinous crimes in the United States, Japan, and China and terrified countless people. His Divine Rays of Terror were like a blood tsunami, pungent and reeking of blood with a stench that permeated everyone's body.

Zhao Yao lost his composure for a moment, fortunately, his strong constitution helped him recover within a tenth of a second. He instinctively grasped Matcha firmly.

That tenth of a second was sufficient for Project X to do a lot of harm.

Zhao Yao's right arm and shoulders were broken and fresh blood gushed out like a fountain.

Matcha, who was resting on Zhao Yao's broken arm, was gently placed in Project X's arms.

"Let him go!" Zhao Yao roared in anger as golden rays covered his body and his severed right hand regenerated. Zhao Yao grasped towards Project X with his left hand.

Project X merely glanced at Zhao Yao as he held Matcha firmly in his hands. A paw grew out from his stomach and sent Zhao Yao flying with a punch.

Zhao Yao was shocked. "His power... has increased... to a stage where he can subdue me? Is it due to merging of all his clones?"

A strong gravitational force caught Zhao Yao and suspended him in mid air.

Meow! Seeing Project X approach Zhao Yao step by step, Elizabeth rushed forward to intervene as crimson rays flashed from her eyes. She controlled Project X.

"I am prepared for this move." Project X's body stiffened but his stomach erupted and a clone squirmed out. He punched in the air and sent Elizabeth flying and bleeding profusely.

"Stop!" Matcha yelled wildly.

Bai Quan and Zhao Xue flashed behind Project X, their hands were like four pythons that slithered towards him.

Before they were able to touch Project X, their faces were hit with high-energy lasers that were ten times more powerful than Slaughter's. Both of them fell to the ground, their bodies charred. They would require some time for their Ultra Rapid Regeneration to heal their wound.

Matcha cried sorrowfully, "Stop! Did you hear what I am saying?"

"Don't worry Matcha." Project X caressed Matcha's head but was bitten by him. Project X smiled indifferently and said, "I thought about it. Once things are done over here, I will help you remold your memories."

A shadow spike underneath Project X extended and penetrated the trembling Catherine.

Matcha was full of tears as he screamed, "Stop! Stop for goodness sake!"

Lightning and Fishball watched everything in a daze. After a series of blurred images, everyone fell to the ground. Their vision blurred as Project X came to their front.

Fishball said, "I..."

After two popping sound, Fishball and Lightning fell to the ground.

"Meow!!" Matcha scratched fiercely at Project X but his claws broke and blood flowed out profusely. "Stop! Stop! Stop!"

Project X said calmly, "Don't worry, I won't kill them. I am keeping them quiet so that I can take away their superpowers." Project X grasped for Lightning.
