

Another World 1361

Chapter 1361: The End of the Yin Wind Ghost Emperor

The Yin Wind Ghost Emperor's recent days haven't been great. A few years ago, he obtained a treasure in the market, a piece of Prime Yin Stone. This Prime Yin Stone was a stone with a pure yin attribute. It provided great benefits to Ghost Cultivators.

But what the Yin Wind Ghost Emperor didn't expect was that someone saw him acquiring the Prime Yin Stone. And this person was also a Ghost Cultivator. After the Yin Wind Ghost Emperor left the market, this person tried to kill him.

The Yin Wind Ghost Emperor wasn't a good-natured person. He was cruel and couldn't stand being slighted. The two fought and in the end, the Yin Wind Ghost Emperor killed him and made him a ghost servant.

However, the Yin Wind Ghost Emperor didn't expect that the man he killed had a great background. He was the grandson of a powerful being in the Devil Realm. He attracted huge trouble this time. The powerful being ordered him to be chased and slaughtered. Fortunately, the Yin Wind Ghost Emperor was able to find a secret cave and hid inside it. Because of this, he was able to escape the fatal disaster.

But this also caused the Yin Wind Ghost Emperor to hide himself in recent years. He knew that once he was seen heading out, people would certainly hunt him down.

It was because of this that the Yin Wind Ghost Emperor acted cautiously. He silently collected faith power from the lower realms to increase his potential. Although he was now a Nascent Soul Expert, he's still a man with his tail clipped. He didn't dare to leave his cave. And if he wanted to buy something, it would be through a slave he previously acquired.

The Yin Wind Ghost Emperor's original plan was to continue cultivating and reach that powerful being's level. Once that happens, he would no longer be afraid to go out into the World of Cultivation. After all, people who knew how to collect faith power were very few. And even fewer people put it in practice. This was his trump card. As long as this trump card was in his hand, he would become a powerful expert sooner or later.

However, he didn't expect Zhao Hai to snatch his trump card. Actually, Zhao Hai was only part of the reason. The real reason was the huge heart. However, the Yin Wind Ghost Emperor was unaware of the heart's existence. Therefore, in his mind, all of it was Zhao Hai's fault.

It's a pity that when he met Zhao Hai, he was already beginning to lose control of the Underworld. Therefore, he wasn't able to get a clear image of his opponent's face. Even if he wanted revenge, he wouldn't be able to.

When he thought about this, the Yin Wind Ghost Emperor clenched his jaws. Then he ruthlessly said, "Don't let this old man know who you are. Otherwise, this old man will take out your soul and let you suffer in the fires of hell forever!"

Then suddenly, a voice was heard, "Who might have made the Emperor so angry?"

This sudden sound caused the Yin Wind Ghost Emperor to be terrified and startled. He turned his head towards the direction of the voice and saw a person wearing a silver mask. This person was wearing cultivator robes and was looking at him through the hole in the mask. The person's eyes were sparkling, and terrifying.

The Yin Wind Ghost Emperor looked at the masked person. He calmed himself down and said, "Who are you Mister? What can this Emperor do for you?"

Naturally, the person who came was Zhao Hai. He smiled faintly and replied, "The Emperor is an old acquaintance of this one back in the lower realm. I even fought against the Emperor. I came this time to get something from you."

Upon hearing Zhao Hai, the Yin Wind Ghost Emperor's pupils shrank. Then he said, "You're that person? Is it you that broke this Emperor's good luck?"

Zhao Hai smiled faintly and said, "The Emperor over praises me. It's not that I intend to break the Emperor's good luck. I just happened to meet you on the road."

The Yin Wind Ghost Emperor looked at Zhao Hai, then he sneered and said, "Why would someone who wouldn't even dare show their face deal with this Emperor? Although I don't know how you found me,

now that you're here you can only die. How long has it been since you ascended? Three years? If you're planning to kill me in such a short amount of time, then you're dreaming."

Zhao Hai smiled faintly and said, "I have dealt with the Emperor before, so why can't I do it now? The Emperor should know why I came here today. I think the Emperor should give me what I want."

The Yin Wind Ghost Emperor coldly snorted and said, "You want the method to collect and use Faith Power? Hahaha, do you want to control the Underworld? Let this Emperor tell you, stop dreaming. Not only will this Emperor not tell you the method, I will also extract your soul and make it into a soul lamp so that you can suffer from the fires of karma forever."

Zhao Hai laughed, "The Emperor is really confident. This is also good. Then I'll have to ask the Emperor to accompany me to play." Then he took a step forward and released a punch.

The Yin Wind Ghost Emperor didn't think that Zhao Hai would suddenly attack. Moreover, he didn't use a magic artifact but instead sent out a punch. The Yin Wind Ghost Emperor paused for a short moment before he quickly responded. He waved his hand as he took out a ghost face shield to block his front.

However, the Yin Wind Ghost Emperor underestimated the power behind Zhao Hai's fist. Zhao Hai went serious immediately because of how important faith power was. He couldn't make any mistake. Therefore, he also mixed astral qi and evil qi in his fist.

The Yin Wind Ghost Emperor simply hasn't thought about these. He's only a Rogue Cultivator. Being able to practise to his current level can be attributed to his luck. Condensing astral qi and evil qi was a method that the Great Sects monopolized. Therefore, he didn't have any special qi in his body. Without the method to condense qi into his body, along with insufficient understanding about astral qi and evil qi, the Yin Wind Ghost Emperor expected his ghost face shield to block the full powered fist from Zhao Hai.

However, how can Zhao Hai's punch be easily defended? Once the fist struck the Yin Wind Ghost Emperor's shield, a dull sound was heard before the shield completely disintegrated. It simply couldn't bear the power of Zhao Hai's punch.

The Yin Wind Ghost Emperor let out a grunt, his face showing that he might be injured. However, this wasn't the end. After his first attack, Zhao Hai sent another one on its way. He waved his hand as a flying

sword appeared beside him. Then the flying sword proceeded to strike towards the Yin Wind Ghost Emperor. Although this flying sword was a transformation of Liquid Silver, it adapted the form of the Plum Blossom Sword, the standard weapon of the Plum Blossom Sect in West Cold City. When the Yin Wind Ghost Emperor saw this sword, his eyes couldn't help but shrink.

The Yin Wind Ghost Emperor coldly snorted. He waved his hand and took out a magic artifact. This was the famous Ten Thousand Ghosts Scepter, the Yin Wind Ghost Emperor's life source weapon.

The Yin Wind Ghost Emperor never got complacent again. If he doesn't use his full strength today, then it might be his end. This was why he took out his life source weapon.

Zhao Hai smiled when he saw this. While his sword was still in motion, he waved his hand and sent two ghost disks towards the Yin Wind Ghost Emperor. Just like the Ten Thousand Ghosts Scepter, the ghost disks were also Ghost Artifacts. When these two weapons were taken out, a howling of ghosts was heard. This caused the entire cave mansion to turn into a ghastly region.

Zhao Hai wasn't affected by the changes. He kept throwing magic artifacts out from time to time. Of course, these were magic artifacts that he looted along his journey. This caused the Yin Wind Ghost Emperor to be thrown into confusion.

Zhao Hai did this to attract the attention of the Yin Wind Ghost Emperor. As long as the emperor focused on him, then the emperor was surely to die.

The Yin Wind Ghost Emperor was really putting his focus on Zhao Hai. He didn't dare shift his focus away just for a moment. Zhao Hai was stronger than him, plus Zhao Hai had astral qi and evil qi. Naturally, the emperor couldn't hold on. If he didn't have the Ten Thousand Ghosts Scepter, then he might have already been killed by Zhao Hai. After all, this Ten Thousand Ghosts Scepter was an artifact that the emperor had nurtured for many years. And it showed how powerful it was.

The two people fought for a while. When Zhao Hai felt that the time was right, he shouted and sent out more ghost disks. To be honest, the ghost disks were great weapons and caused headaches to the enemy. The two ghost disks that Zhao Hai released before were already enough to cause problems to the Yin Wind Ghost Emperor. Now that more was being sent out, the Emperor was having more of a hard time.

If these were common ghost disks, then the Yin Wind Ghost Emperor might not have any problems. He had used ghost disks before. These were weapons that lower-leveled Devil Cultivators used. Even Cultivators in the Cultivation realm use ghost disks. This was because its attacks stick right close to its target. It was very hard to throw them off.

As the Yin Wind Ghost Emperor was focused on dealing with the ghost disks, he suddenly felt pain in his head. Then his vision turned black. He didn't even know how he died.

The strike that ended everything was naturally Liquid Silver's needle. Zhao Hai placed this silver needle on the Yin Wind Ghost Emperor. One must know that Nascent Soul Experts have formidable spiritual force. If the silver needle was sent casually, then the Yin Wind Ghost Emperor would certainly discover it. Therefore, Zhao Hai made sure to distract the Emperor by going at full power. Then he would wait until the silver needle was ready to strike.

Although Zhao Hai can kill the Yin Wind Ghost Emperor with his attacks, he didn't dare waste too much time. The longer the fight drags on, the more uncertain elements would come out. Therefore, Zhao Hai had to use the silver needle.

Seeing that the Yin Wind Ghost Emperor was dead, Zhao Hai waved his hand and received his corpse. Then he returned to the Space. At the same time, the Yin Wind Ghost Emperor's cave residence was swept up by a strong force. Not a thing was left inside, everything was taken to the Space.

Naturally, this wasn't due to Zhao Hai. While Zhao Hai and the Yin Wind Ghost Emperor were fighting, Cai'er already commanded the Undead to dig up the cave mansion. Cai'er believed that Zhao Hai would win, so she would naturally be impolite. Moreover, this way, they wouldn't be wasting time.

Chapter 1362: Unexpected Level Up, Taking The Assistant As A Concubine

Upon returning to the Space, Zhao Hai immediately called the Yin Wind Ghost Emperor. He didn't take the Emperor's artifact and allowed him to continue using it. What he wanted from the Yin Wind Ghost Emperor was the method to use Faith Power.

When the Yin Wind Ghost Emperor appeared, he immediately bowed and said, "This one has seen the Young Master."

Zhao Hai nodded and said, "Write down the method to collect and use faith power." The Yin Wind Ghost Emperor immediately complied. He went to Cai'er and then recited the method. Cai'er proceeded to write it down.

It can be seen that the method to use faith power wasn't very complex. The Yin Wind Ghost Emperor finished reciting it in less than an hour.

After he was done talking, Zhao Hai waved his hand and had the Yin Wind Ghost Emperor leave. Then he read the method to use faith power. This method was actually a set of mother-child formations. There's only one mother formation while the child formation could be unlimited. The child formation would collect the faith power and transmit it to the mother formation. The user can then extract faith power from the mother formation.

Zhao Hai looked at the child formation and then turned to Cai'er and said, "Cai'er, you take care of this. Have it set up on the various backgrounds as soon as possible."

Cai'er nodded. Actually, they don't need to do anything much. The various planet backgrounds already had churches built in them. These churches were essential to each planet. They provide things that the planet's inhabitants need. As long as they install the child formation on these churches, then it's already enough.

Zhao Hai was now looking at how faith power could be used. From what he can see, faith power was truly magical. Not only could it help in cultivation, it had other uses as well. It can be used to control magic artifacts and strengthen its attacks.

Zhao Hai carefully analyzed the method of using faith power. He discovered that faith power needed to be cultivated first before it could be used. It was like astral qi and evil qi which needed to be condensed inside the body.

Moreover, it seems like faith power wasn't initially used for offense. Instead it was an eye technique first. This technique was divided into two parts. The first part was seeing faith power. Naturally, you can only see your own faith power and not others.

The second part of this eye technique enabled your eyes to see the strength of other people. It would allow the user to see various qi in the world. If your faith power was very strong, you could even see the

level of a magic artifact, along with the energy that its user used in controlling it. The user would also be able to see the essence of an object. This technique might not seem much, but Zhao Hai could see how important it could be.

This eye technique can make your eyes see the strength of your enemy as well as their attributes. And if you have more faith power, then you would discover hidden treasures. This was very important for Cultivators.

But this was only the first part of the utilization of faith power. The second part was cultivating faith power into one's body. Faith power would transform the user's body and make their meridians more suitable for cultivation. It would also remove hidden injuries and sort out spiritual qi. In turn, this allowed faster cultivation.

The third part of using faith power was to bless your weapon with faith power and making it more powerful. It could increase the artifact's offensive strength, defenses, speed, rigidity, and other properties.

And the fourth part, and most important part, was the complete combination of one's strength and faith power. This stage removes any obstacles to one's cultivation. It would make one's road ahead extremely clear.

For any Cultivator, the last benefit was extremely good. For practitioners, their path of cultivation wasn't without its problems. Countless Qi Refining Practitioners were unable to progress to Foundation Establishment. Foundation Establishment Experts unable to reach Core Formation. Core Formation Experts unable to get to Nascent Soul. And Nascent Soul Experts failing in their tribulation. This was the treacherous path of cultivation.

But as long as one cultivates faith power and reaches the perfect union, these obstacles would vanish. One only needed to practice. The bottlenecks to reach Foundation Establishment, Core Formation, Nascent Soul, Transcending Tribulation, would all disappear. The only thing one needed to do was accumulate.

Seeing the benefits of faith power, Zhao Hai couldn't help but be overjoyed. Faith power was indeed extremely powerful. As long as one cultivates faith power, any Cultivator would have a smooth path ahead.

Naturally, one needed to collect faith power in order to gain these benefits. Only then can one start cultivating the technique. Moreover, the more faith power you acquire, the more benefits you would gain.

Seeing this, Zhao Hai let out a long breath and said, "Good, faith power is really good. Hahaha. Now I want to see how far I can get in Cultivating it."

Laura and the others were also startled when they saw the benefits of faith power. They didn't expect it to be this mystical.

At this moment, Megan suddenly turned to Zhao Hai and said, "Brother Hai, have you forgotten something? The Yin Wind Ghost Emperor indicated that he has something that could probably be related to the Underworld. He relied on that thing to control the Underworld. If it weren't for the huge heart, he would have already succeeded. You should go look for that thing and send it back to the Underworld."

Upon hearing Megan, Zhao Hai couldn't help but stare. Then he patted his head and said, "Right, I forgot about that. But the Underworld has no more need for that thing. The plane has been controlled by the huge heart. However, it's also better to send it back." After he said that, he called the Yin Wind Ghost Emperor again.

The Yin Wind ghost Emperor appeared and then bowed and said, "I have seen that Young Master. Does the Young Master have any orders?"

Zhao Hai nodded and said, "Hand over the thing from the Underworld. Right, when you return to the Hell Space, go teach the Undead about Cultivation. You cultivate the ghost dao, it'll be helpful for those fellows."

The Yin Wind Ghost Emperor complied and then waved his hand to take something out and gave it to Zhao Hai. When he saw the item, Zhao Hai stared. It was a small statue. It was a statue of a Titan. Although the statue was small, one could see that it depicted a huge being that was capable of holding up the heavens and the earth.

Zhao Hai didn't expect to see a Titan. But Zhao Hai immediately changed his mind as he began to understand. The huge heart in the Underworld must have been left behind by the Titan that created the world. It wasn't just the remains of a Titan.

When he thought of this, Zhao Hai let out a long breath and then sent the statue over to the Underworld. Just as the statue entered the Underworld, something happened. The entire Underworld seems to turn alive. The beat of the huge heart became stronger. And along with it, the spiritual qi in the Underworld became denser. And it seems like every time the heart beats, the spiritual qi gets richer.

Then a loud rumbling noise was heard in the Underworld. With the huge heart in the center, the entire plane shrank down before it totally vanished. The only thing left was the huge heart.

Zhao Hai was beyond shocked at what happened. Then the huge heart moved and entered the opening that Zhao Hai sent the statue through. It entered the Space!

Just as the huge heart entered the Space, Zhao Hai heard a prompt, "Primordial Spirit Vein has been discovered inside the Space. This spirit vein is favored towards the dark attribute. Spirit Vein has unified with the Hell Planet. Original Hell Planet has become the Hell System and would slowly become a Hell Universe. The spirit vein would automatically produce spiritual qi for the Space. The Space has leveled up to level 200. Dark-attribute items inside the Space will undergo promotion. Manufacturing capability of the Universal Processing Machine has been increased. The Universal Scanner is now more intelligent. The Hundred Spirits Tree has been promoted. Now, the Hundred Spirits Tree will bear fruit every 100 years. A thousand fruits will be created each time. Ten will become their own planets. These fruits can be used as a spatial item, a weapon, an independent garden, and a beast pen. The union between the spirit root and the Hundred Spirit Tree has been strengthened ten times."

Zhao Hai sat in awe as he listened to the prompt. He didn't think that the statue would bring forth this much progress to the Space. Moreover, it gave him so many benefits.

Laura and the others were also dumbfounded. This was an unexpected surprise. They were currently focused on faith power. They didn't expect the Underworld to bring such a surprise. Moreover, the Hundred Spirits Tree, the Universal Processing Machine, and the Universal Scanner had been upgraded. There's also the huge heart causing the spiritual qi density in the Space to increase. Although it couldn't yet compare to the Cultivation Realm's spirit veins, it would catch up soon. And it might even surpass it.

Now the Space has an equivalent to a growing spirit vein. In the past, because it only had one spirit root, the speed of spiritual qi density increase was very slow. With the addition of the huge heart, this

increase has accelerated. It wouldn't be long before the Space's spiritual qi density to be comparable to the Cultivation Realm.

After some time, everyone recovered their senses. Zhao Hai laughed and said, "Good, good. Hahaha. This is fantastic!"

Laura and the others were very happy. Zhao Hai smiled and said, "We have experienced double benefits today. I won't be cultivating this day, it's time to celebrate!"

Naturally, Laura and the others didn't oppose. Meg immediately went to the kitchen to prepare a feast. Although Laura and the others weren't needed in the kitchen, they also went there to busy themselves. Zhao Hai also went with them.

Just as everyone was chatting, Laura looked at Zhao Hai and said, "Brother Hai, where's Cai'er? She went to set up the child formations, will she be finished soon?"

Then at this time, Cai'er's voice was heard, "It's done."

Zhao Hai turned his head and saw Cai'er smiling at him. But Zhao Hai couldn't help but be dumbfounded by what he saw. Not only Zhao Hai, Laura and the others were also stunned. They all looked at Cai'er with a silly expression. They were all speechless.

Cai'er had grown considerably. In the beginning, Cai'er was only as tall as a person's arm. Then after the Space upgraded, she became a meter tall, like a small dwarf. Although she looked beautiful, she was very short nonetheless.

But now, Cai'er has changed. She was now as tall as a normal person. Although she was still petite compared to Laura and the others, nobody would think that she was a dwarf by looking at her.

Zhao Hai stared at Cai'er. Cai'er was currently wearing colorful clothing. If other people wore it, they would look too dazzling. But when Cai'er wore it, the clothes seemed like it blended well with her. It made her look more lovely.

Laura and the others were also staring at Cai'er. They didn't expect the grown-up Cai'er to be this beautiful.

Being stared at by everyone, Cai'er couldn't help but turn red as she lowered her head.

Suddenly Laura exclaimed, "Cai'er you look too beautiful that we got lost. Brother Hai, isn't Cai'er beautiful?"

Zhao Hai recovered, then he smiled at Cai'er and said, "Yes. Cai'er, you're beautiful." Then he pulled Cai'er's hand and said, "Come help us prepare the feast."

Cai'er cheerfully complied as she jumped to Zhao Hai's side and helped prepare the food. Laura and the others looked at Cai'er's appearance with happy expressions in their eyes.

Laura and the others already regarded Cai'er as one of them. In the past, they pitied Cai'er. Among them, she provided the biggest help to Zhao Hai. This was due to her ability to control everything inside the Space. It was only because of her size that Zhao Hai wasn't able to take her in as a concubine. It wasn't only Cai'er who took it as a pity. Laura and the others were also regretful for her.

However, everything turned out well. Now that Cai'er's issue has been solved, it was logical for Zhao Hai to take her in. Moreover, Zhao Hai also had heavy sentiments towards Cai'er. Otherwise, he wouldn't have taken the initiative to hold Cai'er's hand. With Zhao Hai's temperament, he was usually passive, he rarely took the first step.

Chapter 1363: Faith Power, Nascent Soul Stage?

Cai'er was very happy. Like the women in the villa, her heart also belonged to Zhao Hai. It was only because of her size that she wasn't able to act on her feeling.

Speaking of which, among the women in the villa, Cai'er was the closest to Zhao Hai. This was because the two of them were one. Zhao Hai's life was connected to her's. If Zhao Hai dies, then she would die as well. The two just weren't able to have a closer relationship because of Cai'er's size.

Now that this barrier has been cleared, it's given that the two would get together. Laura and the others didn't feel that there was anything wrong with it.

After the feast, Zhao Hai went to rest. Naturally, Cai'er followed him. On the other hand, Laura and the others remained outside. This was bound to happen. In fact, Laura and the others were happy to see this happen. This way, Zhao Hai and Cai'er would be closer.

Needless to say, Zhao Hai's room that night was very warm. Because of her special physique, Cai'er was able to get up very early the next day. Although this was her first time, she didn't suffer the same outcome as others.

Laura and the others got up quite early as well. The Space was very peaceful that day. The air was very good since it was filled with spiritual qi. This allowed everyone's sleep to be very good. So naturally, none of them felt like they needed more time to sleep.

Zhao Hai also got up at the same time as the others. After eating breakfast, Zhao Hai monitored the state of the Pirate Paradise and the Cultivation Realm. The two places didn't have any problems. Yalei 2 was also doing very well.

Zhao Hai felt relieved and then he sat underneath the Hundred Spirits Tree and calmed down his mood. Then he closed his eyes and recalled the method to utilize faith power.

Feeling that there weren't any problems, Zhao Hai began to cultivate. The first step was his eyes. He first drew his spiritual qi toward the eye acupoint in his head. Then according to his meridians, he slowly circulated the spiritual qi to unlock the accupoint. At this time, he became able to see faith power.

This wasn't an easy feat to do. First, one would need to delicately operate their eye acupoint. Any mistakes that happen during this period would lead to an unmentionable outcome. And if one couldn't unlock the eye acupoint, then they wouldn't be able to continue circulating spiritual qi to that place and in turn they wouldn't be able to see faith power. Not seeing faith power meant that one wouldn't be able to make use of it. Therefore, this was the very first hurdle that someone who wanted to use faith power needed to overcome.

But for Zhao Hai, this thing wasn't very difficult. After his body underwent multiple transformations, his cells were now as tenacious as steel. His meridians were able to take a beating. Before long, he was able to unlock his eye acupoints.

After that, Zhao Hai moved his spiritual qi to follow a certain rule. This rule was quite demanding. A single hair of failure in the path would destroy the cycle. Only once the cycle was completed would the connection be established.

As the connection was being established, Zhao Hai's eyes began to change. Zhao Hai slowly opened his eyes. Then he took out Liquid Silver and took a look at it.

Yesterday, Cai'er installed the mother formation to collect faith power inside Liquid Silver. Not only would this mother formation collect faith power, it could also store it for Zhao Hai to use at any time.

Since this would be the first time that he would see faith power, Zhao Hai was somewhat curious. He wanted to see what faith power looks like. He looked at Liquid Silver and stared. Then he couldn't help but squint his eyes.

It's no wonder that Zhao Hai's reaction was this. This was because Liquid Silver's glow wasn't the same as before. This time, it was as if there was a small sun inside it.

It was pointed out in the method that faith power had strong and weak forms. Weak faith power looked like a thread of hair. Only when thousands upon thousands of these hairs were together could faith power be considered strong.

However, most faith power was white, they didn't shine. These were the most ordinary faiths. In other words, people had faith in you but they wouldn't sacrifice themselves for your sake. This was the most ordinary expression of faith.

The next stage was a silver-colored faith thread. This faith was more powerful. Generally, followers that offered contributions had this faith.

The strongest type of faith power were the shining golden faith threads. This kind of faith couldn't be given by average people. This faith could only belong to fanatic believers. They would contribute all they

have for you. They wouldn't allow anyone to speak badly of you. They would give their heart and soul for you. For them, sacrificing to you was the greatest honor.

The faith power in Liquid Silver was akin to the radiance of the sun. This was extremely dazzling even for Zhao Hai. Therefore, he had no choice but to squint his eyes. However, he didn't feel that there's any problems. This was because he felt comfortable under the illumination of this radiance.

Zhao Hai let out a long breath as his heart became excited. This was because he understood that the people in the Space were his most loyal believers.

Zhao Hai calmed down his mood. He felt extremely grateful to the Space and the people in it. After he calmed himself down, Zhao Hai looked at the dazzling light and then slowly guided it towards his eyes.

Under Zhao Hai's gaze, the clump of golden faith threads unraveled and slowly flew towards his eyes. Zhao Hai's heart became excited. But this caused the threads to withdraw back into Liquid Silver.

Zhao Hai stared, then he let out a long breath as he gave a self-ridiculing smile. He was quite good at meditating. However, the sight of faith power caused him to be excited. If people saw him like this, then they would have laughed at him.

Zhao Hai calmed himself down once more as he restarted his cultivation. In the end, he was able to guide the faith threads towards his eyes.

Zhao Hai felt a warm current go through him as the threads flowed through his eyes. His eyes felt more and more comfortable. The uncomfortable parts of his eyes that he didn't think of before became better as time passed.

This time, Zhao Hai was completely calm as he patiently guided the faith threads. As more and more faith power entered Zhao Hai's eyes, he began leading it towards his body and uniting it with his spiritual qi. Through his spiritual qi, he united the faith power to his physique.

Whenever faith power passed through an acupoint, Zhao Hai could feel his absorption quicken. When faith power completed one circulation through Zhao Hai's body, it began to integrate to Zhao Hai's physique.

At this time, the golden light from Liquid Silver suddenly flew out and entered Zhao Hai's body. Zhao Hai was taken aback. One must know that this phenomenon wasn't stated in the method to use faith power. Zhao Hai looked down on himself and found out that the golden light had settled right at the shanzhong acupoint in his chest.

Zhao Hai stared. Then he immediately closed his eyes and felt his chest acupoint. Zhao Hai knew that his dao lotus was at that acupoint. Moreover, after practicing the Stellar Transformations Art, starlight began appearing above the Dao Lotus. Faith power was now running along this scene. Zhao Hai wanted to see what changes would happen in his shanzhong acupoint.

As Zhao Hai used his spiritual force to look at his acupoint, he was stunned. This was because changes began to happen in his body. The gold core that was originally in his dantian has flown towards the shanzhong acupoint. Then the gold core dissolved and turned into a faint miniature Zhao Hai. The spirit Zhao Hai which was originally in his head also sank into the shanzhong point. The two merged together and became a miniature Zhao Hai that had extremely long hair.

After that, the miniature Zhao Hai fell down and sat cross-legged on top of the Dao Lotus. The hair of the miniature was connected with the faith threads. The starlight now became golden and formed a huge magic circle. This was the mother formation that collected faith power.

At this moment, Zhao Hai suddenly had an inkling in his mind. Nascent Soul Stage!

In the past, Zhao Hai didn't quite understand what a Nascent Soul Expert was really like. He thought that Nascent Soul was just another division of level and wasn't anything remarkable. But now, he discovered that he was wrong. Experts of the Nascent Soul Stage were different from Core Formation Experts. Core Formation Experts were called like that because of the gold core in their body. All of their spiritual qi would be inside the gold core. Whether it be in battles or in cultivation, it all depended on their gold core.

As for Zhao Hai, his cultivation was somewhat different from the others. Because he practiced the Myriad Stellar Transformations Yin-Yang Art, the spiritual qi in his body was ten times more compared to other Cultivators. Therefore, he was able to reach Nascent Soul-level strength while only being at Core Formation. Additionally, he had astral qi and evil qi in his body, increasing his offensive strength even more. This caused him to be unbeatable among Nascent Soul Experts. Even Huang Daoran wasn't able to do anything to him.

At that time, everyone thought that Zhao Hai was already in the Nascent Soul Stage, not Core Formation. Even Zhao Hai thought that he was already a Nascent Soul Expert. But he didn't expect that he was actually still at Core Formation.

Upon drawing faith power, Zhao Hai's cultivation progressed further. And since he was only one step away from Nascent Soul, faith power pushed him to overcome that threshold and become a Nascent Soul Expert in one go. Now, he can be regarded as a true Nascent Soul Expert. If he was placed in the Cultivation Realm, he would become a very powerful expert. At this point, even general Transcending Tribulation Experts wouldn't be his match.

Chapter 1364: Stellar Sword Control Technique

Zhao Hai really felt different upon entering Nascent Soul Stage. The spiritual qi in his body has been compressed once more and its quality has increased by a lot. The original misty qi has become a silvery liquid. Mixed in this liquid qi were the astral qi and the evil qi, turning it into a light blue color. Then with faith power, the liquid turned golden.

After eighty-one cycles, the Nascent Soul turned golden yellow. At this point, faith power and his spiritual qi have been integrated.

Zhao Hai knew that he had now accomplished the first two parts of using faith power. What he needed to do now was to practice the third part, using faith power to reinforce his weapons.

Zhao Hai was very satisfied with this result. Zhao Hai placed Liquid Silver down and slowly guided faith power towards it. But what made Zhao Hai feel strange was that even though he injected faith power into Liquid Silver, there seems to be no reaction from it whatsoever.

Zhao Hai looked at Liquid Silver in confusion. He injected faith power into it according to the method. And as he can see, Liquid Silver shone with a corresponding light. So why was there no reaction now?

After trying once more and getting no response, Zhao Hai was confused. He began to carefully recall the method. But he did according to the instructions. In the end, he still couldn't yield any results.

ZhaoHai stared at Liquid Silver. He injected faith power into it one last time, but the result was the same. When he injected faith power into Liquid Silver, it would emit a golden light. But as soon as Zhao Hai stopped, the faith power returned to his body and Liquid Silver would go back to its original state.

Zhao Hai placed Liquid Silver down and thought hard. Then he suddenly thought of something. In the past, Liquid Silver was emitting golden light on its own. But after the mother formation entered Zhao Hai's shenzong acupoint, the golden light from Liquid Silver disappeared. Was that it?

Although this reason was somewhat vague, Zhao Hai couldn't think of anything else to explain it. And since he only had this one method to utilize faith power, then it must be the reason.

Zhao Hai put aside training faith power in the meantime and focused on another thing. When he stepped into Nascent Soul Stage, another technique related to the Stellar Transformations Yin-Yang Art appeared in his mind. Now Zhao Hai wanted to see what technique it was.

He quickly found the technique when he dove into his mind. When he read the name of the technique, Zhao Hai couldn't help but be elated. The name of the technique was, Stellar Sword Control Technique!

Just by its name, it was clearly a technique to control flying swords. This was what Zhao Hai needed the most right now. His current technique was an amalgamation of different flying sword techniques that was analyzed by the Universal Scanner. Although this sword technique was strong, Zhao Hai felt that it couldn't utilize his complete strength. Now that the Stellar Sword Control Technique has come out, it was like giving a pillow to a sleepy person.

Zhao Hai immediately read through the Stellar Sword Control Technique. The technique was much more complex compared to the Stellar Body Tempering Technique. Not only was it more demanding in the amount of spiritual qi, it also required perfect control over spiritual qi.

The Stellar Sword Control Technique was divided into four parts. The first part was the control over spiritual qi. This method for controlling spiritual energy wasn't for cultivation. Instead, it was for improving attacks using flying swords. The second part of the technique was control over spiritual force. Just like the first part, this was used for the flying sword instead of for cultivation. The third part was the sword technique. Naturally, this was the method to control the flying sword. The fourth part was actually a sword formation. A sword technique can utilize one sword to make an attack. But if a sword formation was used, dozens even a hundred swords could be used. The might of this was certainly much better than a single sword.

However, the Stellar Sword Control Technique's sword formation attack was extremely demanding for spiritual force. At the same time, not any sword could be used with it. The efficiency of the sword formation relied on the swords used alongside it. In other words, you need to branch out your spiritual force to control each sword. It was just like the multiple sword attacks by other people. They would inject spiritual force to the mother sword and then control the other swords through it. To be honest, this was very similar to having one artifact that had other auxiliary parts.

But if the Stellar Sword Control Technique used more powerful swords, then more powerful and flexible the attack would be. And in turn, the offensive strength would be greater.

When he understood this, Zhao Hai couldn't help but be happy. This Stellar Sword Control Technique was specifically tailor-made for him. His spiritual force was already very powerful compared to other people. And then there's the Space. Not to say about producing thousands of powerful swords, he could also control these swords freely.

Now that he had the sword formation, controlling his spiritual force and spiritual qi has become simpler. Zhao Hai could already control thousands of swords through his spiritual force and massive reserve of spiritual qi. With the sword formation present, his control would be more effective.

The biggest difference between this sword formation and the way Zhao Hai used flying swords before was that whether the sword formation was sent out or received, it stayed as a sword formation in the end. Moreover, this sword formation was actually from a larger sword formation. The name of this large sword formation was the Ten Thousand Stellar Transformations Great Formation.

This large formation was arranged according to the changes of the stars and the transformation of yin-yang. This sword formation could be composed of two swords or ten thousand swords. The more swords there were, the more transformations it could undergo. However, these transformations still needed to follow the stars and the flow of yin-yang.

Also, even if the Ten Thousand Stellar Transformation Great Formation lacked a few swords, it can still be used while its power would reduce accordingly. This was the real essence of the formation.

But this wasn't the only thing about the Ten Thousand Stellar Transformations Great Formation. Not only was it a sword technique, it was also a very powerful formation on its own. If a magic staff could use this great formation, then its power would also be immense.

Zhao Hai let out a long breath. Then he calmed himself down before taking Liquid Silver out and transforming it into two swords to train in the simplest form of the Ten Thousand Stellar Transformations Great Formation. Actually, the simplest form was also the most foundational form of the formation. As long as one grasps control over two swords, they could slowly increase the number as well as the changes that could happen to them.

Operating the great formation wasn't very difficult. The most difficult part was arranging the formation amidst the presence of the enemy. Naturally, with the Space, Zhao Hai could set-up this formation instantaneously. However, he couldn't show this ability out in the open. Therefore, Zhao Hai needed to be familiar with the method of setting the formation. Then he received the other swords leaving only one to use for practicing the method of controlling a flying sword.

The method of controlling the flying sword was also very complex. The changes involved in it were too many. Although only one sword was used, the sword technique's power couldn't be underestimated.

Zhao Hai spent more time practicing the sword technique compared to the sword formation. Unfortunately, he couldn't find someone to spar with. Nobody inside the Space could be his opponent. If he sparred with these people, he wouldn't be able to utilize the full might of the sword technique. He might as well not have a spar.

The best place to examine a cultivation technique was in a battlefield. Only after undergoing a life and death experience can one fully understand their technique.

Although this was the case, Zhao Hai still practiced the sword control technique for a long time. This was because he knew clearly that only once the technique comes naturally to him could he use the technique in the battlefield.

There was a saying in martial arts that goes like: You shouldn't be afraid of an opponent that has 1000 moves. You should master one move to perfection and defeat 1000 moves with one move.

The more Zhao Hai practiced the sword technique, the more deep his understanding of it. This sword technique's attack could endure the strength of numerous stars. Once the sword technique was used, Zhao Hai could see that it was stronger compared to the flying sword techniques that he had seen before.

Zhao Hai forgot the time and continued practicing until he felt that he had a thorough understanding of the technique. Every stab of the sword has become an instinct for him. It was at this time that he stopped.

However, there was one thing that made Zhao Hai frown. It was the reinforcement of faith power. If he wanted to reinforce his sword with faith power, then he would need to use his spiritual force to do so. And it needed the same amount as the sword technique. Using these two at the same time caused Zhao Hai to be dissatisfied.

Zhao Hai sighed as he received Liquid Silver. Then he returned to the Space's villa. Upon entering the living room, he saw Laura and the other staring at the screen. But the image on the screen caused Zhao Hai to be confused. This was because there was a battle currently ongoing. The scale of the battle wasn't very big. One side was composed of 5 medium-sized battleships while the other were ten Foundation Establishment Cultivators.

Zhao Hai asked, "What is that? A battle?"

Laura and the others noticed Zhao Hai. Laura turned her head to Zhao Hai and said, "Brother Hai, you're done? Yes, it's a battle happening in the Pirate Paradise. It's not Louis and the others. Instead, it's a conflict between two pirate groups. We're just watching for fun."

Chapter 1365: Faith Weapon, Buddhist Technique

Zhao Hai became interested and looked at the monitor. To be honest, he hasn't really seen a battleship fight before. So this scene was new to him.

At this time, the five medium-sized battleships were lined-up in a neat formation. The weapons were also ready to fire. Their magic cannons were divided into several groups. Each group had 10 to 20 cannons each. Generally, a single volley of 20 cannons could end the life of a Foundation Establishment Expert.

Besides the magic cannons, the battleships also had Mechs to help them control the battle. These mechs wouldn't leave too far from the battleships. They were mainly meant to protect them by blocking the

attacks sent by artifacts. In addition to mechs, the ships also had missiles that they could fire. This made the ships difficult to deal with.

On the other hand, the Cultivators also weren't simple. Although they were at Foundation Establishment, their individual strength was formidable. And with them being people, they were very small targets. Aiming for them wouldn't be easy for the battleships.

For these Cultivators, magic cannons weren't the biggest threat. Although these magic cannons weren't slow, they were still far from being able to catch Cultivators. Therefore, the cannons would generally miss.

What these Cultivators were wary of were the missiles. These missiles could track its targets and change directions mid-flight. Cultivators wouldn't be able to avoid them even if they hide. In the end, the only thing they could do was use their artifacts to explode the missiles before they hit.

Missiles had small nuclear bombs and cluster bombs in them. If these hit a Cultivator, they would no doubt die. To prevent this, the Cultivators would get as far away as missiles as possible. They were afraid of being hit by a nuclear bomb.

Needless to say, nuclear bombs had explosive strength enough to kill a Foundation Establishment Expert. As for cluster bombs, as their name suggests, they would explode into one or missiles that were similarly lethal to Cultivators.

Actually, when a battleship fights against a Cultivator, it would usually drag things out. The fight would be finished once the Cultivator dies from a nuclear bomb or a cluster bomb. On the other hand, Cultivators wanted to finish their fight with a battleship as soon as possible.

At this time, the five battleships were doing their best to drag the ten Cultivators. It was also too late for the Cultivators to run away. If they really did turn their backs, then the battleships wouldn't just let them retreat in peace.

After watching for a while, Zhao Hai felt bored and stopped watching. He began to understand why the Cultivators couldn't progress. The combat between battleships and Cultivators seemed like a siege. These were Foundation Establishment Cultivators. If they met a stronger Cultivator, then they would just

run away. However, although battleships weren't very agile, their speed in a straight line was greater than Cultivators.

Because of this, the battleships and the Cultivators were dragging on. There's also the mechs that needed to keep the situation stable. If the battle turned chaotic, then the battleships would be in danger.

Zhao Hai turned his head to Laura and the others and said, "I'll go Cultivate."

Upon hearing Zhao Hai, Laura was puzzled so she asked, "Brother Hai, you're going to cultivate? Didn't just just cultivate earlier?"

Zhao Hai smiled and said, "I still have a lot of things that I don't understand about faith power. By the way, why don't you try cultivating faith power as well?"

Laura forced a smile and said, "We have tried but it's useless. We can't use faith power."

Zhao Hai nodded, then he smiled and said, "Alright. In any case, you don't need to fight. If you can't practice, then you can't."

Laura smiled and said, "It's okay. We don't care about it anyways. Brother Hai, go cultivate. We won't disturb you." Zhao Hai nodded before turning around and leaving towards the Hundred Spirits Tree.

Zhao Hai took Liquid Silver and looked at it. Naturally, he knew that he couldn't see anything just by doing this. He wanted to engrave the mother formation on it again. However, he found out that engraving was useless. This was because the mother formation on Liquid Silver looked like a faulty formation. There was no faith power seen on it at all.

Zhao Hai looked inside him and saw that his shenzong acupoint was still receiving a lot of faith power every minute. Zhao Hai could even see his body radiating golden light if he used his faith eyes.

Faith power was different from other energies. If you don't practice regularly, then spiritual qi would regress, the same was true for spiritual force. Even crystal stones would overflow with energy if left

alone. However, faith power was different. As long as people don't lose faith in you, then you could keep absorbing faith power. Moreover, you don't even need to use faith power and it wouldn't overflow. It would just be stored in the mother formation.

Seeing that there was no response from Liquid Silver, Zhao Hai sighed. Then he received it and took out the Crescent Moon Spade. Zhao Hai would take out the Crescent Moon Spade to appreciate it from time to time ever since its transformation. This was because the Crescent Moon Spade made his mind tranquil once he held it.

Looking at the Buddha statue on the Crescent Moon Spade, Zhao Hai couldn't help but sigh. Then he began injecting faith power into it. As he injected faith power, Zhao Hai smiled bitterly. These days, he has been injecting faith power into Liquid Silver, he didn't take out the Crescent Moon Spade. He expected that the same thing would happen. But just as he was about to stop, something happened.

When faith power entered the Crescent Moon Spade, the spade seemed to become alive. The entire Crescent Moon Space shook gently. Then starting from the Buddha, a straight of golden light flashed through its entire body. Then the Buddha opened its eyes, shooting two bright swastikas(卐) towards Zhao Hai's eyes.

Zhao Hai closed his eyes, but the two swastikas still shot towards him before vanishing in sight.

Just as Zhao Hai wanted to check his own state, a prompt was heard from the Space, "Host has obtained a Faith Weapon. This weapon can use faith power and amplify its power to extinguish ten thousand evils. Since the Host has Liquid Silver as his life source weapon, the Faith Weapon will be fused with it. Fusion has started. Fusion will be completed in 108 minutes. Timer starts now."

Zhao Hai stared, then at this time he suddenly felt a spiritual force drill into his own mind. However, he couldn't feel any ill intent from it. Therefore, Zhao Hai unlocked the Five Element Killing Formation and allowed it to enter his mind.

Just as this spiritual force entered his mind, Zhao Hai's head shook. Then a Buddha Statue appeared.

Zhao Hai stared. Then he saw the Buddha split into two, then into four. After a while, there were countless Buddhas. However, these Buddha statues had different expressions and positions. As Zhao Hai was confused, the Buddhas vanished. The only thing left was the sound of Buddhist chants.

These chants sounded both ethereal and tangible. I made Zhao Hai calm down instantaneously. After a while, the chanting disappeared, then a long Cultivation Method entered inside his mind. This cultivation method was composed of 18 smaller methods. These methods were the Enlightenment Technique, Alms Bowl Lifting Technique, Happiness and Fear Sound Technique, Pagoda Technique, Great Demon Subjugation Technique, Imperial Water Technique, Beast Control Technique, Vajra Technique, Instinct Technique, Sword Breath Technique, Bright Sword Technique, Six-senses Purification Technique, Cloning Technique, Infinity Technique, Blazing Staff Technique, Descending Dragon Technique, Crouching Tiger Technique, and Cosmos Technique!

Besides these 18 techniques, there was also a passage about the origin of the Crescent Moon Spade. This was out of Zhao Hai's expectation.

Zhao Hai looked at the 18 Cultivation Methods. Not one of these 18 was simple. These were all the most profound techniques of the Buddhist Sects. However, why were these in the Crescent Moon Spade? Also, how did the Crescent Moon Spade become possessed with evil qi and lost its original form? What's the secret behind this? Could it be that a Buddhist powerhouse has been defeated by his enemies, and then sealed his techniques inside the Crescent Moon Spade? If that's the case, then could he be recognized if he cultivated these techniques? And if Zhao Hai were to be recognized, then wouldn't he be hunted down?

Zhao Hai was in a dilemma as he looked at the 18 cultivation methods. He knew clearly that these 18 techniques and the Crescent Moon Spade held a huge secret. And Zhao Hai didn't know what this secret was.

None of these 18 techniques were simple. Not to mention all of them at once. Zhao Hai hasn't fought a Buddhist practitioner until now. Therefore, he didn't know what level they were in. Even the Six Realms Beginner Competition didn't have any Buddhists participating in it.

Not having any Buddhist participants didn't mean that the Buddhists were a weak group. In fact, the Buddhists were very powerful. However, the Six Realms Beginner Competition was a contest for ascendants. Unfortunately, almost none of the ascenders were Buddhists. Because of this, Buddhist Sects would select talented people from the ascenders and lecture them in the Buddhist Dharma.

However, cultivating Buddhist Dharma required one to suffer for 9 years. Because of this, no Buddhist participated in the Six Realms Beginner Competition.

Fortunately, the Cultivation Realm made up for the losses of the Buddhist Sects. After the Six Realms Beginner Competition, the Cultivation Realm would share some of the benefits to the Buddhists. Otherwise, the Buddhists would have to send their own disciples to participate.

One could see from this information how terrifying the Buddhist Sects were. The Great Sects were afraid of the Buddhists sending their disciples.

This was something that Zhao Hai heard from the high-level Undead that he acquired. These were things that were unknown to him before.

It was also because of this that Zhao Hai was wary towards the Buddhists even though he hadn't met one before. For the Daoist Sects to give them face was enough to show how formidable they were.

The Cultivation Methods that Zhao Hai acquired were actually the Buddhists' most orthodox methods. Average Buddhists might not even have their hands on these methods. This made Zhao Hai hesitate. If he studied these methods, then Buddhists might go after him.

Buddhists was actually a general term for all who practice the Buddhist Dharma in the Cultivation realm. However, there's something special about Buddhism compared to the Cultivators, and that was their unity. Compared to other Cultivators, Buddhists were extremely united. One could see this from their stance on the Six Realms Beginner Competition.

Back when the Six Realms Beginner Competition was being discussed, the Buddhists proposed to do it every ten years. However, the other practitioners didn't agree. In the end, they decided to have one every five years. Naturally, the Buddhists didn't agree to this. So in turn, the other practitioners agreed to give the Buddhists a share of the benefits. Only then did the Buddhists agree.

The reason for the Buddhists' unity, besides the benefits, was the existence of the Ancient Buddhist Temple. This Buddhist Temple was a very special existence in the Cultivation Realm. Its location could be said to be very remote and its spiritual qi density was too thin to be suitable for cultivation. However, all Buddhists in the Ancient Buddhist Temple didn't need to Cultivate. The only thing they needed to do was study the Buddhist Dharma.

The monks in the Ancient Buddhist Temple never learned any Cultivation Methods. So when they fought, they wouldn't be able to beat Cultivators. However, their attainment in Buddhism was very high.

As far as the world of Buddhism is concerned, only the people in the Ancient Buddhist Temple were the real Buddhists. The others were just monks following the Buddhist path.

Because of this, people from the Ancient Buddhist Temple were admired by all Buddhists. The Ancient Buddhist Temple also became a sacred land to all Buddhists. No matter which temple they came from, Buddhists would have to go to the Ancient Buddhist Temple for a pilgrimage and record their names in the ancient scroll. This ancient scroll was purely made of paper. Nobody knew how old this ancient scroll was. Also, the Ancient Buddhist Temple holds a Buddhist meeting every ten years. All Buddhists could participate in it. This was also an opportunity for various temples to exchange ideas.

With the fact that the 18 techniques were the most orthodox Buddhist Techniques, as long as Zhao Hai uses Buddhist Techniques, the Buddhists would certainly know it. It would be hard to say what would happen then. Don't think that the Buddhists in the World of Cultivation were monks who fast and recite Dharma. Instead, the monks were all demons who could kill people just by looking at them.

Because of these worries, Zhao Hai was very hesitant to practice the 18 techniques.

Chapter 1366: Mudra!

The Buddhist Sects could be tyrannical in the Cultivation Realm precisely because they were strong. To be honest, Zhao Hai wasn't willing to provoke them.

On the other hand, the 18 techniques were very powerful. So powerful that people couldn't help but try practicing them. Even Zhao Hai felt the same.

Although Zhao Hai was worried, he couldn't neglect the appeal of the 18 techniques. If he studied all 18, then his offensive might would certainly increase.

After thinking over it for half a day, Zhao Hai finally decided to practice the 18 techniques. These 18 techniques could be seen as one of the highest-level Cultivation Methods of the Cultivation Realm. From the body, to the six senses, spiritual force, sword qi, magic artifacts, hands and feet, everything was covered. It was enough for a person to Cultivate their entire lives.

When he thought about this, Zhao Hai returned to the villa. In order to practice the 18 techniques, he would need to make some preparations. Cultivating them wouldn't just take 1 or 2 days.

Closing up, he wanted to close up for some time. Otherwise, it would be impossible to practice these Cultivation Methods. Not only would he need to practice these techniques, he would also need to integrate them to his own fighting style. Only through this way could he bring his fighting strength to another level. Zhao Hai believed that by the time he finishes his seclusion, his strength wouldn't be any lower than Huang Daoran.

Zhao Hai entered the villa and talked about going into seclusion with Laura and the others. When Laura asked what happened, Zhao Hai told them that he obtained a few techniques and he wanted to practice them. Only then were Laura and the others relieved.

Zhao Hai went out of the villa and went to an uninhabited planet in the Space. Then he sat down and began recalling the 18 techniques.

Among the 18 techniques, the Enlightenment Technique, Bright Sword Technique, Instinct Technique, and the Infinity Technique, were in line with spiritual force. The Happiness and Fear Sound Technique was a method of using sound attacks. The Alms Bowl Lifting Technique, Pagoda Technique, and the Blazing Staff Technique, had something to do with using magic artifacts. The Demon Subjugation Technique, Descending Dragon Technique, Crouching Technique, were methods to use the hands and feet. The Imperial Water Method, Beast Controlling Technique, Sword Breath Technique, and the Cloning Technique were spell-class methods. The Vajra Technique and Six-senses Purification Technique were body cultivation methods. As for the Cosmos Technique, it was quite special. This was an escape technique. With the body as the universe, one could use it to form a channel for escape. It can also be used to attack, like movement techniques that Warriors use. However, the Cosmos Technique had much more movements compared to movement techniques. It was an escape technique specifically for practitioners.

It could be said that these 18 techniques were methods that a Cultivator would need. But in the present Cultivation Realm, Buddhist could only learn some of them, and not everyone was talented enough to practice one of the 18.

Zhao Hai looked at the techniques and decided to start with the body cultivation methods. This was because he practiced a body tempering technique before, the Stellar Body Tempering Technique. Zhao Hai was still practicing the Stellar Body Tempering Technique. This was because he discovered that the technique was really powerful. Even at Zhao Hai's current level, it could still be utilized.

Because of this, Zhao Hai decided to go with the Vajra Technique and the Six-senses Purification Technique first. The Vajra Technique could increase a person's recovery, making their regeneration reach a terrifying degree. Even if Zhao Hai was severely injured, as long as he was given enough time, then he could become healthy again. It can be said that by reaching the Indestructible Vajra state, one would gain an immortal body.

This type of cultivation method was the most enticing to Zhao Hai. His body was originally formidable, and his regeneration was great as well. As long as he cultivates this technique, then his regeneration would increase even more. When the time comes, he might not need to hide inside the Space when faced with a strong enemy. He might even be able to fight back.

As for the Six-senses Purification Technique, the only thing that Zhao Hai understood was that it could exercise a person's six senses: sight, hearing, smell, taste, feel, intuition.

If Zhao Hai manages to practice his six senses, then he would become a very perceptive person. The faith eye that Zhao Hai acquired before was actually one of the techniques to develop the six senses.

When he understood this, Zhao Hai became even more aware of how terrifying the 18 techniques really were. Zhao Hai expended a large amount of effort in order to get the method to utilize faith power. As for the 18 techniques, they were actually no more than foundational techniques.

Upon seeing this, Zhao Hai understood that the 18 techniques were all supplements to faith power. If you don't have faith power, then there's simply no way for you to learn the 18 techniques.

Zhao Hai decided to start with these two techniques, but he focused on the Vajra Technique first. Buddhist cultivation methods have a special characteristic. When practicing Buddhism techniques, one needed an accompanying mudra(hand-seals). Otherwise, you would be wasting your efforts. As long as you coordinate the mudra, you would get twice the result with half the effort. To practice the Vajra Technique, one needed the Vajra seal. This seal involves your left hand in an upward-pointing fist, index finger raised. Right hand grips index finger, and thumb is pressed onto left index's nail.[1]

Zhao Hai's two hands formed the seal while silently reading the mental part of the Vajra Technique. He felt a warm current tying both hands and then flowing into his entire body. His body felt like it was soaked in a hot sprint. Zhao Hai felt intoxicated with the feeling that he forgot how long it had been.

Currently, Zhao Hai couldn't see the state of his body. If he could, then he would be surprised. When he started cultivating the Vajra Technique, a burst of light broke out of his hands. This golden light was like a small sun, dazzling everyone who looked at it.

Then this golden light spread out from his hands and into Zhao Hai's body. In the end, his entire body was turned into a Vajra. Zhao Hai's figure looked dignified, just like another version of Tathagata.

Zhao Hai had a timer on when he began to Cultivate. However, he didn't have the time to care about it. His heart and soul was immersed in cultivation. Zhao Hai felt a warm comfort as his body was continually nourished.

After an unknown amount of time, Zhao Hai's heart moved and he woke up. He opened his eyes and exhaled. Then he let go of his hand seal and calmed down. Then he turned to look at the timer and couldn't help but be startled. He had been Cultivating for 49 days!

However, Zhao Hai had some doubts. He couldn't believe what just happened. Has he mastered the Vajra Technique? Although he cultivated for 49 days, this was the Vajra Technique. Being able to master it in 49 days seems like a cheat. How is this possible?

Zhao Hai scanned the Vajra Technique one more time to see where he went wrong. In the end, he discovered that there was nothing wrong. The reason why he was able to practice the technique so quickly was because of his faith power.

Zhao Hai understood that the degree to which the 18 techniques could be practiced relied on faith power. The more faith power you have, the quicker you could cultivate and the higher you could reach. What Zhao Hai didn't lack was faith power, so it's natural for his cultivation to be fast.

Zhao Hai stood up and felt relieved. Then he began to move his body. Although he sat in meditation for 49 days, his body didn't feel stiff. Conversely, he felt extremely good about his body. Then Zhao Hai walked and returned to the villa.

Zhao Hai also knew that his seclusion this time has been special. And he doesn't know how long he would cultivate in the future. In the end, he needed to explain things to Laura and the others. Otherwise, they would worry.

Sure enough, Laura and the others were extremely worried. However, Cai'er comforted them by saying that nothing has changed in the Space. This relieved their worries slightly. Seeing Zhao Hai return, they were all very happy. Zhao Hai explained everything to them and then spent some time relaxing before returning to the empty planet and practicing the Six-senses Purification Technique.

The Six-senses Purification Technique also had its own mudra, the Six-senses Purification Mudra. It was much more complex than the Vajra Mudra. Two hands would form the fearless seal!

The fearless seal was also called the seal of the body. The left hand would be kept in front of the navel forming a partial vajra seal. Then the right hand would face outward, the second and middle finger would bend to the palm while the thumb and little finger would extend upright. The ring finger would be bent. This was the complete set of the fearless seal. Naturally, it's also possible to treat it as two mudra.

Zhao Hai felt something different when he practiced the Six-senses Purification Technique. While Cultivating the Vajra Technique, his body felt very comfortable. On the other hand, the Six-sense Purification Technique cleansed the senses starting with the eyes, then the ears, nose, tongue, body, and finally the mind. It wasn't easy to follow through with this path. It can be said that the mind was the most difficult part of this technique. Once you practice this technique to its fullest, one would feel the impurities and evil from their body being expelled. And from that point on, any evil would find it hard to invade the body.

7th of the Nine Seals, Retsu(japanese). Vajra seal, also known as the thunder gesture. Picture here(<https://upload.wikimedia.org/wikipedia/commons/thumb/d/d9/VajraMudra.JPG/404px-VajraMudra.JPG>)

Chapter 1367: Flying Phoenix Pavilion

After another 49 days, Zhao Hai was able to completely study the Six-senses Purification Technique. After he got up, he went to Laura and the others and asked about the situation in the Cultivation Realm and the Pirate Paradise.

Everything in the Cultivation Realm has been prepared. Under the support of the Profound Clear Sect and Huang Daoran, Zhen Ling left the Pink Clouds Pavilion in order to do business alone. She gave her merchant group a new name, the Flying Phoenix Pavilion. It's origin came from Zhen Ling's nickname,

the Pink Cloud Phoenix. The Pavilion Master of the Pink Clouds Pavilion was now the Master of the Flying Phoenix Pavilion.

This matter caused a stir in the Cultivation Realm. In some way, Zhen Ling was a celebrity in the Cultivation Realm. Her leaving the Pink Clouds Pavilion was unexpected for a lot of people.

The other families in the Pink Clouds Pavilion were also taken by surprise when Zhen Ling left the Pavilion. They were caught off-guard. As they were busy electing the next Pavilion Master, Zhen Ling approached shopkeepers, staff, and followers of the Pink Clouds Pavilion and poached them for the Flying Phoenix Pavilion.

After some time, when the battle for the Pavilion Master was finished, the families in the Pink Clouds Pavilion suddenly discovered that their business wasn't like before. Their staff and shopkeepers had been recruited by the Flying Phoenix Pavilion. And with these families focusing on the fight to control the Pavilion, they neglected learning about the business. In the end, the Pink Clouds Pavilion suffered a disastrous decline. The once famous merchant group of the Cultivation Realm has been reduced to a second-grade merchant group.

Moreover, the chosen Pavilion Master of the Pink Clouds Pavilion didn't have Zhen Ling's business skills. What he was good at was grasping power. When it comes to business, he was still far from Zhen Ling. In the future, the Pink Clouds Pavilion would sink further and become a third-grade merchant group.

The Flying Phoenix Pavilion's trajectory was the opposite. With Zhen Ling as the face of the merchant group, storekeepers and assistants came in large numbers, along with Elders with keen perceptions. Then there was Zhao Hai's spirit wine and the backing of a Great Sect. Suddenly, the Flying Phoenix Pavilion showed unlimited potential. It didn't take long before it became famous in the Cultivation Realm. Other merchant groups don't have any spirit wine to sell. This meant that the spirit wine market of the Cultivation Realm was completely under the Flying Phoenix Pavilion's control.

The Flying Phoenix Pavilion took advantage of this auspicious wind. Not only did they expand their business, they also extended their tentacles beyond the Cultivation Realm. However, Zhen Ling didn't become complacent with this progress. Not only did he open several branches in the other realms, she also spent a lot of money to install transmission formations on these shops. If something happens, the people in the shop could use the transmission formations to return to the Cultivation Realm. It must be known that there were still people who weren't afraid of the Profound Clear Sect.

At the same time, Zhen Ling showed her talent in controlling the supply of spirit wine. It was impossible for her to take out the 100 thousand bottles of spirit wine in one go. This would make people's eyes turn red. Therefore she would only take out a hundred bottles every ten days or so. The spirit wine was just the signboard of the Flying Phoenix Pavilion, it wasn't its main profit source.

Zhao Hai might suffer some losses because of this. However, this wasn't the case. The Flying Phoenix Pavilion's growth was Zhao Hai's gain. Zhao Hai, Zhen Ling, and the Profound Clear Sect jointly owned the pavilion. But since Zhao Hai and the Profound Clear Sect don't participate in the management of the business, the income allocation of the pavilion went like this: Zhao Hai gets three parts, Zhen Ling gets four parts, and the Profound Clear Sect gets three parts. The sale of spirit wine wasn't included in this allocation. It was still kept as 4:3:3.

In other words, it can be said that Zhao Hai gained 30% ownership of the Flying Phoenix Pavilion in exchange for nothing. Zhao Hai was embarrassed about this, but Zhen Ling said that this 30% share wasn't free. Don't forget that Zhao Hai once gave Zhen Ling a spatial bag full of high-grade crystal stones. Although Zhen Ling got Zhao Hai a lot of good things back in the Pink Clouds Pavilion, it was still very small compared to the total amount of crystal stones that Zhao Hai gave. In the end, Zhen Ling decided to give Zhao Hai 30% of her new business.

However, to say that those high-grade crystal stones were equal to 30% of the Flying Phoenix Pavilion was also wrong. That spatial bag wasn't worth partial ownership. But since Zhen Ling wanted to tie Zhao Hai onto her ship, she decided to give her part ownership of the pavilion.

With Huang Daoran and Feng Baiming accounting for the Profound Clear Sect, Zhen Ling had to give them face and give them 30% as well. Naturally, this came with the condition that they support the business.

The Flying Phoenix Pavilion was on the right track, and the spirit wine would last for a long time. Therefore, Zhao Hai didn't need to worry much about things there anymore. However, he still sent some spirit wine for Huang Daoran and Feng Baiming and also some for the Profound Clear Sect. This was also Huang Daoran and Feng Baiming's plan. They want Zhao Hai to garner a good relationship with the sect through these spirit wines. Zhao Hai was also happy to do it. Establishing good rapport with a Great Sect just for some spirit wine, he was naturally glad.

But since Zhao Hai was in seclusion, he had Cai'er deal with these things. Naturally, it was Cai'er who sent the goods to the pickup point. But she didn't show up. Instead, she left a letter for Huang Daoran telling him that Zhao Hai was in seclusion.

Seclusions were very important to Cultivators. Naturally, Huang Daoran had nothing to say about it. Conversely, he was very happy. In the past, when he saw Zhao Hai doing business with Zhen Ling, he was afraid that Zhao Hai was putting the cart before the horse. Everything in the World of Cultivation is fleeting, only Cultivation is permanent. If Zhao Hai abandoned his cultivation in exchange for business, then he would be focusing on the wrong thing.

The Cross Sword Pirate Group's situation was also doing well. Under the arrangements of Laura and the others, people from the pirate group migrated to Yalei 2 and were replaced by Undead. After three months of migration, about 1 million people from the pirate group have moved to the planet. If Louis and the others weren't keeping the migration a secret, then this number might have been much larger.

Naturally, not every member of the Cross Sword Pirate Group managed to move to Yalei 2. There were still spies from the other powers that managed to hide. Their actions and movements have been monitored by Cai'er. If one member made a suspicious move, they would be captured. This allowed the migration to be kept secret for so long.

As for the Six Realms Battlefield, things were also doing well. Zhao Hai already informed Yuan about his seclusion. Naturally, Yuan wouldn't say anything. However, Zhao Hai didn't leave the Six Realms Battlefield alone. He asked Jia Ding Shan and Li Lin's group to defend the Lock Mountain Range. This would prevent troublemakers from causing a disturbance in the Machine Field's territory.

Actually, Zhao Hai's worries were unnecessary. At this point, everyone in the Six Realms Battlefield knew about Zhao Hai's seclusion. It was said that he was preparing to face his tribulation. Before obtaining any news about Zhao Hai's seclusion, nobody dared to make any move. After all, angering a powerful expert like Zhao Hai wasn't a smart idea.

Zhao Hai didn't have much to do with these rumors. Actually, it was Cai'er and the others that did it. It was to allow Zhao Hai to cultivate in peace. The outside affairs have been handled in an efficient manner.

Seeing this, Zhao Hai felt relieved going into seclusion for the third time. This time, he was planning to cultivate the techniques that had to do with the hands and feet. These techniques were the Demon Subjugation Technique, the Descending Dragon Technique, and the Crouching Tiger Technique. Strictly speaking, the Demon Subjugating Technique wasn't a technique that used the hands and feet. It was a technique that increases one's strength. But besides the method to increase strength, it had exercises that involved the hands and feet. However, it was behind compared to the Descending Dragon

Technique and the Crouching Tiger Technique. It was only when the three were practiced together that one could use their body as a weapon. A body that can face artifacts was something that Body Cultivators pursue.

Zhao Hai's Stellar Body Tempering Technique was a peak Body Cultivation Technique. In other words, the Stellar Body Tempering Technique gave Zhao Hai a very solid foundation. And with this foundation, he could practice any Body Cultivation Method.

It can also be said that the Stellar Body Tempering Technique was an extremely powerful technique. If Zhao Hai was originally a piece of iron, then his body has become indestructible steel because of the technique. But even if Zhao Hai's body was like the strongest steel, it wasn't necessarily lethal. In the end, steel ingots weren't weapons.

However, the Demon Subjugation Technique, Descending Dragon Technique, and the Crouching Tiger Technique would transform Zhao Hai's body, the steel ingot, into a weapon meant for slaughter!

This was especially true for the Demon Subjugation Technique. Zhao Hai didn't care much for this technique in the beginning. He was already strong. In his opinion, the Demon Subjugation Technique wouldn't be of much use. And with how shallow the moves of the technique were, Zhao Hai didn't have much interest in it. If not for the other two techniques, then Zhao Hai would have skipped practicing the Demon Subjugation Technique.

Only after practicing the Demon Subjugation Technique did Zhao Hai discover how formidable it was. This technique wasn't like the others. He only needed two mudra in order to practice it. One mudra was the karma seal while the other was the samaya seal. He only needed to sit in meditation and perform these hand-seals according to the methods described. Then his body would become stronger.

After practicing the Demon Subjugation Technique, Zhao Hai understood why the moves of the technique looked shallow. It was because the moves were compressed ten times!

When one's strength reaches a certain level, one would start seeing the mysteries of the world. There would come a time where 1000 punches would not hurt you, but one of your punches would kill them. One fist, one life. This was the essence of the Demon Subjugation Technique!

Chapter 1368: The Six Realms Battlefield Isn't Peaceful

The Demon Subjugation Technique took more time compared to the Vajra Technique and the Six-senses Purification Technique. In total, Zhao Hai took 64 days to complete his practice. At this point, Zhao Hai could break a medium-grade artifact with his hands. It might even be possible for him to shake a mountain with his fist. This was all due to the Demon Subjugation Technique.

After practicing the Demon Subjugation Technique, Zhao Hai let out a long breath. To be honest, the mysticism of the Demon Subjugation Technique has exceeded Zhao Hai's expectations. If he didn't have enough faith power, then he might not have been able to complete the technique.

Zhao Hai can relax now that he has finished practicing the Demon Subjugation Technique. Cultivation lies in alternating tension and relaxation. Only by doing so could the practice bring some benefits. If he kept practicing, then he might end up dying or possessed by a devil. Therefore, Zhao Hai stopped cultivating to take a breather.

After resting for several days, Zhao Hai proceeded to start practicing the Descending Dragon Technique. The Descending Dragon Technique was actually a leg technique. In order to practice the technique, Zhao Hai had to practice the dragon seal. He used his right hand to bend his left hand back while grasping the left palm.

The reason why the dragon seal was used in the Descending Dragon Technique was because the leg movements associated with the technique was derived from the posture of a dragon. Therefore, one needed to understand the dragon first. The dragon seal evolved from the four dragons in Buddhism. The first dragon guarded the temples, holding the order and fixing chaos. The second dragon brings rain and clouds to benefit the world. The third dragon lived in the rivers. The fourth dragon keeps the wheel of the four seasons spinning.[1]

The leader of the dragon clan was called the Dragon King. This mudra was made from the posture of the four dragons as well as the power of the Dragon King. It was extremely powerful. If one wants to learn the Descending Dragon Technique, then they need to learn the dragon seal first. If the dragon seal couldn't be accomplished, then there's no chance to practice the technique.

Zhao Hai didn't have much difficulty in studying the dragon seal. Zhao Hai came from China so he was already familiar with the dragon seal and its form. Therefore, he only used 36 days to learn the seal. Then it took a short period of time before he learned the Descending Dragon Technique. As stated in the technique, learning the dragon seal meant learning the Descending Dragon Technique. If you fail in the

dragon seal, then even if you can do the movements of the technique, they would just be mere decorations.

Zhao Hai didn't go out upon finishing the Descending Dragon Technique. Instead, he went on to practice the Crouching Tiger Technique. This Crouching Tiger Technique was composed of a mudra and a set of boxing techniques. This mudra is a combination of three mudra, the lotus seal, zhutapo seal, and the cheng yi seal. After completing these three mudra, one would begin to see the essence of the technique. However, these three techniques weren't easy to learn. Zhao Hai used 49 days to learn it and another 10 days to practice the boxing techniques.

After learning the Crouching Tiger Technique, Zhao Hai began merging the Demon Subjugation Technique, Descending Dragon Technique, and the Crouching Tiger Technique. This used up 30 days. When Zhao Hai went out of seclusion, five months had already passed.

At this point, Laura and the others were used to Zhao Hai closing up. They were aware that Zhao Hai was practicing a powerful Cultivation Method. Therefore, they didn't disturb him. The only thing they could do was manage the outside matters to help Zhao Hai.

Unknowingly, two years have passed since Zhao Hai ascended to the Machine Field. In two years, he went from an ordinary ascender to become one of the Machine Field's most powerful experts. But after nearly 1 year of seclusion and the World of Cultivation rarely hearing any information, people began to forget about him.

However, this was something that Zhao hai wanted. If people forgot about him, then he would be able to safely practice and peacefully develop his influence.

After several months of migration, almost all members of the Cross Sword Pirate Group have moved to Yalei 2. Those who were left behind were combatants that were needed to watch the territory.

At this point, there were more Undead in the Cross Sword Pirate Group's territory than the living. The other members of the Cross Sword Pirate Group had also accustomed themselves with this situation. One could even see a member of the pirate group walking together with an Undead, chatting.

This might seem inconceivable to other people, but it had become a norm in the Cross Sword Pirate Group. The pirate group members discovered that not only were these Undead intelligent, they were

also very easy to get along with. These Undead didn't seem like they were being controlled at all. They talk like normal beings, and they were also learning to operate and maintain battleships and mechs. This caused the people from the pirate group to be surprised when they first knew about it.

It was precisely because of these properties that the Undead were able to become good friends with the members of the pirate group.

On the other hand, the Six Realms Battlefield haven't been peaceful. During the year that Zhao Hai was in seclusion, new blood came to the battlefield. Naturally, these newcomers didn't know how fierce Zhao Hai was. Therefore, the Machine Field's domain began to turn chaotic once more. People would also cause trouble in the Lock Mountain Range from time to time. Although they had been repelled by Jia Ding Shan, Zhao Hai's absence caused the other people to become more and more bold. Even Li Lin and the others have been affected, being wounded several times.

Cai'er and the others looked at this with anxiety in their eyes. They knew that Zhao Hai was still worried about the Lock Mountain Range. This wasn't just because he was the Supreme Commander, but also because Xiong Li and the others were there.

Xiong Li and the others would serve in the Six Realms Battlefield for three years. They weren't as strong as Zhao Hai. They were still normal soldiers serving in the Lock Mountain Range, the most dangerous place for Machine Field residents. If something happens to Xiong Li and the others, Cai'er and the others wouldn't know how to tell Zhao Hai. So when Xiong Li and the others were in danger, Cai'er would release some pangolins that were training inside the Space to help out. Xiong Li and the others would just think that they were reinforcements sent by Jia Ding Shan.

When Zhao Hai came out of seclusion, Cai'er immediately told him about the situation. Upon hearing this, Zhao Hai raised his brow and said, "Really? It seems like I've been inactive for long enough. I think it's time for me to take a stroll."

Zhao Hai's body disappeared and reappeared in Yuan's fort. The fort was still under Yuan's control. But this time, some people had left and were replaced by newcomers.

When Zhao Hai appeared in the fort, the first person to spot him was a rookie. The rookie stared Zhao Hai who was wearing mage robes and looked ordinary. But upon seeing Zhao Hai's face, the rookie immediately recognized him. It must be said that Zhao Hai had become an idol to all practitioners in the Machine Field. Being one of Zhao Hai's adorers, it was natural for him to recognize Zhao Hai.

Upon recognizing Zhao Hai, the rookie was too excited to say anything. Once he recovered he turned his head and shouted, "Supreme Commander Zhao Hai has arrived. Supreme Commander Zhao Hai has arrived...!" He shouted so loudly that his voice turned hoarse. Zhao Hai couldn't help but bitterly smile.

To be honest, this was the first time he heard someone call him like that. He still felt strange about it. However, that person's shouts alarmed the entire camp. Yuan and the others also walked out of their rooms.

Seeing Zhao Hai, Yuan stared for a moment before he smiled widely. Then he went to greet Zhao Hai with laughter.

Xiong Li and the others were also happy to see Zhao Hai. At the same time, Zhao Hai returned the greetings. It took some time before the group calmed down.

Yuan immediately introduced the rookies to Zhao Hai. The rookies were all excited to meet him. Zhao Hai also chatted with them.

After exchanging greetings, Zhao Hai followed Yuan and the others to the conference room. Once they had been settled down, Zhao Hai looked at Yuan and said, "Captain, I came out because I heard that the other realms have been causing trouble in the Lock Mountain Range. I'm here to solve this problem before going back to seclusion."

Hearing Zhao Hai, Yuan couldn't help but be somewhat worried, "Little Hai, wouldn't this affect your cultivation? Is it fine to come out this soon?"

Yuan's worries weren't unwarranted. For a person in seclusion, a disturbance might cause their death. If Zhao Hai left seclusion because of the Six Realms Battlefield, then his gains might not justify his losses.

Zhao Hai smiled and said, "It's not a problem. I also need to rest during cultivation. It just so happened that it's my time to rest. So what's the problem? Why did the other realms begin causing trouble?"

Yuan coldly snorted and said, "Because you haven't shown your face recently, those guys began to think that you weren't in the Six Realms Battlefield. So they have become more courageous. They went to

cause trouble in our semi-controlled territory and some even attacked the Lock Mountain Range. However, they were all beaten back.”

Zhao Hai’s expression sank. His voice turned cold as he said, “It looks like these fellows needed to be beaten until they remember.”

Just as Zhao Hai said this, an alarm sounded throughout the fort. Zhao Hai couldn’t help but stare, then he smiled faintly and said, “Good, I didn’t expect to see people courting death this soon.”

Yuan sneered and said, “The people from the other realms have been appearing in our territory more frequently. It’s possible that they were releasing the anger they have built up because of you some time ago.”

Zhao Hai smiled faintly and said, “Let’s go and take a look. I want to see who came this time.” Then he flew out of the room and flew out of the fort.

Although the alarm sounded in the fort, this didn’t mean that it was under attack. Instead, some people triggered an alarm in the partially-controlled territory. If someone attacked the fort, the alarm wouldn’t have sounded like this.

Zhao Hai could already feel the invaders because of the Six-senses Purification Technique. His spiritual force had become extremely formidable, he no longer needed the Space to detect the people in the partially-controlled territory.

Before long, Zhao Hai saw ten Cultivators flying unscrupulously in the partially-controlled territory. Their flying speed wasn’t fast at all, it was as if they were exploring their back garden.

Zhao Hai flew until he was 100 meters away from these people, then he stopped. Although these people dressed like Cultivators, they had a gloomy aura around them. This only meant that they were people from the Devil Realm. Also, the cultivation of these people wasn’t low. Among them, there were three Nascent Soul Experts. The remaining seven were at Core Formation.

When the Devil Cultivators saw Zhao Hai, they stared. However, they didn't show any fear. They stopped as well as they sized Zhao Hai up. When they saw Zhao Hai's face, their expression changed. Zhao Hai had been famous in the past. It was impossible for these people to not recognize him immediately.

The Nascent Soul Experts' expressions changed. Then they slowly calmed down. One of them sneered and said, "Zhao Hai, you finally appeared. This old man has been looking for you for a long time."

Zhao Hai looked at the man and said, "Really? How could this Zhao Hai concern Senior? Might I ask who Senior is?"

The old man looked at Zhao Hai, then he stroked his beard as he said, "This old man is named Blood Infant Ling Lie!"

Hearing this name, Zhao Hai's pupils shrunk. Then he said, "You're the Ling Lie who slaughtered ten thousand infants to make your life source artifact, the Blood Infant? Hahaha. Good, fantastic. I wanted to hunt you down. But since I've been closing up, I don't have the time. I didn't expect you to present yourself to me. Good, this saves me a lot of trouble. After this day, you will become my Undead!"

Upon hearing Zhao Hai, Ling Lie laughed loudly and said, "Hahaha, good. From what this old man can see, you're just famous. A boastful kid with no strength. Let this old man teach you a lesson today." Then he waved his hand and took out a blood red scimitar. After that, the scimitar flew and slashed towards Zhao Hai.

The scimitar was like a blood red phantom as it reached Zhao Hai's side in a blink of an eye and cut towards his neck. This scimitar was quite famous, it was called the Blood Shadow Blade. It was a weapon that Ling Lie liked to use. The offensive strength of this blade was very good. It's speed was also renowned. People's heads would fall off without even seeing the blade. This was the origin of the blade's name.

This Blood Shadow Blade was also refined by Ling Lie. The refining of this blade was very special. It was made from a metal called the black bloodsteel. The blood from this metal wasn't from ordinary people. Instead, it came from 100 virgins. In other words, Ling Li killed more than 100 virgin girls in order to create this blade. This shows how cruel he was.

Haven't found any sources for this sorry :3

Chapter 1369: Daoist Zhao Hai?

The Blood Shadow Blade was extremely fast. It reached Zhao Hai's neck in a flash. However, despite seeing the knife approach, Zhao Hai didn't react at all. Ling Lie suddenly had a feeling of anxiety.

Ling Lie knew that Zhao Hai struggled in defending against Huang Daoran. Zhao Hai said that he would seclude himself. But in Ling Lie's opinion, Zhao Hai was injured and needed to recuperate.

Just as Ling Lie was lost in his thoughts, he suddenly discovered that the Blood Shadow Blade was already in Zhao Hai's hands. The Blood Shadow Blade struggled to get out, but it was useless.

Zhao Hai glanced at the Blood Shadow Blade and coldly snorted as he said, "It's really the Blood Shadow Blade. Ling Lie, you'll get no forgiveness from me today."

Then Zhao Hai leaned forward and took a step forward as he threw a simple punch. Although the punch looked simple, it wasn't the case in Zhao Hai's hand. Zhao Hai's eyes glowed as his body shone with a white light. This white light wasn't dazzling, it just gave people a sense of fairness and honesty. It had the feeling of a monk that intends to exorcize a demon.

Zhao Hai's fist wasn't any other first. It was a move that came from the Crouching Tiger Technique. As the punch was sent out, an imposing aura of a tiger erupted. And since Zhao Hai also practiced the Demon Subjugation Technique, his punching strength has reached a whole new level.

Moreover, this fist wasn't just a straight shot. It transformed constantly that Ling Lie wouldn't be able to dodge it even if he wanted to.

Ling Lie also noticed this point. Seeing the situation, he didn't dare underestimate it. He opened his mouth as a cry of an infant was heard. This weeping wasn't a doting cry of a child that wants the warmth of its mother. Instead, it was a scream full of hatred and gloom. Hearing this weeping sound, a person would feel a frigid air passing through their heart.

Along with this weeping sound, a blood red infant appeared in front of Ling Lie. This baby looked lovable, but its blood red eyes and body made it seem like it was a spirit that had innumerable injustices done to it.

As the infant appeared, its wailing sound met Zhao Hai's fist head on. Then it turned its body as giant red colored tentacles extended towards the attack.

Ling Lie knew that he couldn't avoid Zhao Hai's fist even if he hid. So he could only face it head on and hope that he could block the attack.

A dull thumping sound was heard as the Blood Infant's sound attack met Zhao Hai's fist head on. However, as though it was paper, the sound attack was shredded to pieces by the force of the fist. Then shortly after that, the fist hit the infant's tentacles.

Boom! When the Blood Infant and Zhao Hai's fist connected, the infant let out a pitiful yell before it was eradicated by the fist. As though it wasn't affected, the fist continued on towards Ling Lie.

Along with a bang, Ling Lie's body flew straight back. As he was in the air, Ling Lie spewed out a mouthful of blood. He looked at Zhao Hai and muttered, "You, Transcending Tribulation....." Then his head tilted as his body fell straight down. He was naturally beaten to death by Zhao Hai. His body showed a strange posture when it fell to the ground. Every bone in his body has been crushed.

Zhao Hai waved his hand and sent Ling Lie's body to the Space. Then he looked at the other Devil Cultivators and sneered as he said, "What? You don't take the Machine Field seriously? You come when you want to come, then leave when you want to leave? I don't have the time to take care of you, yet you came here. I guess it's time to let everyone know not to mess with the Machine Field. This isn't your back garden!" Then his body moved as he threw himself to the group.

The Devil Cultivators were beginning to feel regret. Why do they have to meet Zhao Hai, this unlucky star, now? Long Lie was a famous Nascent Soul Expert of the Devil Realm. But even he was taken down in one move by Zhao Hai. Maybe in the eyes of Zhao Hai, they weren't even considered a side dish.

Zhao Hai didn't give them a chance to talk as he attacked immediately. The Devil Cultivators could only take up their weapons and defend.

However, these Devil Cultivators weren't confident. This was because they heard Ling Lie's last words. Did Zhao Hai become a Transcending Tribulation Expert? With this thought in mind, the Devil Cultivators couldn't help but feel that their necks turn cold.

Zhao Hai didn't actually treat these people seriously. He just wanted to try the moves he learned from the Descending Dragon and the Crouching Tiger Technique.

Fist and leg techniques weren't very popular in the World of Cultivation. And of those who practiced them, the majority were the Buddhists.

According to legend, it was because Buddhism inherited the essence of ancient Body Cultivators. Therefore, their fists and leg techniques were well-developed. There were plenty of Buddhist disciples that used their fists and legs to confront their enemies. This was how confident the Buddhists were in their kung fu.

Zhao Hai cultivated the Demon Subjugation Technique, Crouching Tiger Technique, and the Descending Dragon Technique. These were orthodox Buddhist Techniques that were supported by faith power. Then there's also Zhao Hai's astral qi and evil qi. And with Zhao Hai entering the Nascent Soul Stage, his spiritual qi has undergone a great transformation. No Nascent Soul Expert in the World of Cultivation had all of these. Even some Transcending Tribulation Experts couldn't reach this level of strength.

Zhao Hai fought with the rest of the Devil Cultivators in order to practice his techniques. Therefore, he didn't go for the kill from the very beginning. After exchanging moves a dozen times, Zhao Hai became aware of how strong he was. Zhao Hai believed that he wouldn't suffer a loss even if he faced Huang Daoran right now. And once he cultivates all the 18 techniques, even Transcending Tribulation Experts might not be his opponent.

At this time, Zhao Hai was no longer in the mood to play around with these Devil Cultivators. Moreover, other practitioners had appeared around them. It was time to give them a message.

Zhao Hai suddenly stopped his offense. However, the Devil Cultivators didn't let their guard down. They kept their weapons at their side as they looked vigilantly at Zhao Hai.

Zhao Hai looked at them and then smiled as he said, "Everyone, I've played enough. It's time to send you off. Remember to be good people in your next life!" Then Zhao Hai moved and sent over five punches and four kicks.

These nine strikes hit the remaining nine Devil Cultivators. Even if these Devil Cultivators wanted to defend, they had no way to stop Zhao Hai's attack. All of them were killed on the spot.

Those who came over to spectate were stunned. Most of them didn't see the fight between Zhao Hai and Ling Lie. When they came, Zhao Hai was already exchanging moves with the Devil Cultivators. Zhao Hai didn't use any weapons, only his hands and feet, as he fought nine against one. This already surprised them. But they never thought that Zhao Hai was just playing around.

But after seeing Zhao Hai kill the nine Devil Cultivators with one move each, the spectators were startled. Zhao Hai turned his head to the onlookers and then coldly snorted and said, "Everyone, don't challenge my patience. Just because I don't come out, it doesn't mean that I don't care about the Six Realms Battlefield. The next time you disturb my cultivation, don't blame me for being impolite." Then he left the area and returned to the Lock Mountain Range.

Watching Zhao Hai show his strength, Yuan and the others were very surprised, but they were also proud. They glanced at the onlookers before returning to the Lock Mountain Range.

The people from the other realms looked at each other and saw the fear and alarm in their eyes. They didn't expect Zhao Hai's strength to become this tyrannical.

One Cultivator looked at another Cultivator beside him as he asked, "Long Hai, how strong do you think Zhao Hai is now? Those Devil Cultivators don't look weak, how can they be cleaned up that easily? He really deserves to be the strongest under Transcending Tribulation."

Long Hai smiled bitterly and said, "Brother Gu Ping, you underestimate Zhao Hai. Even Transcending Tribulation Experts couldn't deal with those Devil Cultivators that easily. It seems like Zhao Hai was trying out his moves in the early part of their battle. If he got serious in the beginning, there's no way for those Devil Cultivators to last that long. I'm afraid Zhao Hai has reached Transcending Tribulation. Even if he faced Huang Daoran, I believe that he wouldn't suffer a loss."

Gu Ping stared. Then he looked at Long Hai and said, "Zhao Hai is that strong? Are you sure? He fought with Huang Daoran barely a year ago. How could his strength increase by so much?"

Long Hai forced a smile and said, "You haven't seen Zhao Hai's previous fight. Before fighting those Devil Cultivators, Zhao Hai faced the Demon Realm's Blood Infant Ling Lie. Zhao Hai killed Ling Lie in just one punch. Moreover, the Blood Infant was present to defend the attack. Ling Lie even hinted that Zhao Hai had reached Transcending Tribulation before he died."

The conversation of the two wasn't quiet, so the experts around them were able to hear. These experts could hear whispers, let alone two people having a normal conversation.

Upon hearing Long Hai, everyone buzzed with conversation. Gu Ping's expression changed as he said, "Brother Long, let's leave this place as soon as possible. If we really annoy Zhao Hai, then we would be in trouble. Right, should we start calling him Daoist Zhao Hai?"

Long Hai smiled bitterly and said, "Who knows. In any case, Zhao Hai hasn't been recognized yet. We shouldn't talk in advance. But you are right, we need to leave immediately." After that, he followed Gu Ping in leaving the Machine Field's partially-controlled territory. The people from the other realms left as well. Nobody dared to stay even a second longer.

Chapter 1370: Hell King!

By the time Yuan and the others returned to the fort, Zhao Hai was there waiting for them. Zhao Hai wasn't in a hurry to return to the Space. In any case, he came out this time to relax. So he decided to meet Yuan and the others and have a good chat.

Yuan and the others also thought that Zhao Hai left. So they were very glad when they saw Zhao Hai. Naturally, Zhao Hai took out some delicious food and drinks for them to enjoy together.

Zhao Hai, Yuan, Wu Yang, Xiong Li, and the others were at a table together. After drinking two rounds of liquor, Yuan looked at Zhao Hai and said, "Little Hai, have you reached Transcending Tribulation?" Yuan's words caused everyone in the dining hall to look over at Zhao Hai. They heard Ling Lie's final words. At that time, Ling Lie implied that Zhao Hai had reached Transcending Tribulation.

Zhao Hai looked at everyone, then he shook his head and said, "I haven't. Since my Cultivation Method is special, I'm afraid my tribulation would be much harder."

Yuan and the others nodded. But one could see that they were disappointed. One couldn't blame them. After all, the Machine Field didn't have a Transcending Tribulation Expert. This was what worried them the most.

Naturally, Zhao Hai wouldn't reveal that he was now as strong as most Transcending Tribulation Experts. He specifically revealed that he hasn't reached Transcending Tribulation so that Yuan and the others would spread it to the world. This way, the other realms wouldn't take note of him.

He secluded himself for close to one year and then he made such a huge move. If people thought that he reached Transcending Tribulation, then the waves that it would cause would certainly be enormous. Zhao Hai didn't want things to go like this yet. After all, he was still preparing to practice all 18 Buddhist Techniques.

However, if Zhao Hai wanted to practice all 18 techniques, then he would need more than a year of time. During this period of time, he didn't want things to happen to his background. And he also doesn't want Yalei 2 and the Pirate Paradise to be affected.

But what Zhao Hai didn't know was that right after he dealt with the Devil Cultivators, people from the outside already heard the rumor about him becoming a Transcending Tribulation Expert. This information spread quickly throughout the World of Cultivation. In a flash, Zhao Hai became the center of attention after one year of absence.

When Zhao Hai left the Lock Mountain Range, Yuan received an inquiry from the higher-ups asking if Zhao Hai had already reached Transcending Tribulation.

Naturally, Yuan denied the rumors. Zhao Hai himself said that he hasn't reached Transcending Tribulation. And that his cultivation method was special, so his tribulation would be very hard.

This news lessened the attention placed on Zhao Hai. However, Zhao Hai's title of strongest under Transcending Tribulation was something that everyone recognized.

Besides the higher-ups of the six realms, the people in the Six Realms Battlefield gave Zhao Hai a nickname. Because Zhao Hai liked to use Undead, people gave him the title of Hell King![1]

Naturally, Zhao Hai knew about this nickname, but he didn't care. This was something that other people gave him, so he had no control over it. Also, it had truth to it. He liked using Undead because he needed their help, so he was called the Hell King. However, if he stopped using the Undead one day, would people still call him Hell King?

In fact, at this point, Zhao Hai had an idea to stop using the Undead. This was because he discovered that the Undead could also provide him with faith power. Not only did the Undead give him more faith power, it was also purer than other people.

This was understandable. After all, the other races in the Undead still had their own desires and wishes. As for the Undead, they had been subdued by the Space. If Zhao Hai ordered them to kill themselves, they wouldn't hesitate to do so. Therefore, the faith power given by them was purer than the others.

Also, in addition to being pure, Zhao Hai discovered that the faith power given by the Undead had special effects to his attacks. This was something that Zhao Hai discovered recently.

The same was true for the Demons, Divines, Beastmen, and Undead. The faith power that these races provide had strong offensive strength.

As for the Elves, Dwarves, Humans, Fishmen, their faith power provides great help for improving the body.

This discovery surprised Zhao Hai. He didn't expect faith power to have attributes.

However, Zhao Hai didn't care much about this matter. Whether it increases offense or helps in cultivation, both were very good. Moreover, their effects weren't that great. These attributes only provided a slight advantage. The difference between using both faith power was basically negligible.

Zhao Hai returned to the Space and accompanied Laura and the others for several days. Then he prepared to resume his practice in the 18 Techniques. This time, Zhao Hai chose to practice the Cosmos Technique. Of the 18 techniques, only the Cosmos Technique acted alone.

However, the Cosmos Technique was also more complex than the rest. The entire technique consisted of six mudra. The first of these mudra was the void seal, which means hiding in the void. One hand would form the vajra seal. The other hand would hold the hand like a baby while the forefinger is straight and rigid. The relationship between the two hands was the essence of the void seal.

The second mudra involved putting two palms together, bending two thumbs and inserting them in between the palms.

The third mudra involves the five fingers of the right hand extending upward. The index finger and the thumb would twist with each other. The second finger would curve around the index finger as far as possible.

The fourth seal involves two index fingers bent over the two middle fingers while the thumbs insert in between the palms.

The fifth seal joins two palms while the two index fingers bent towards each other.

The sixth mudra was the same as the first mudra. These six seals comprise the six mudra required to practice the Cosmos Technique.

Why do Buddhist Arts require hand seals? Actually, this had something to do with the Buddhist path. Buddhism pays attention to enlightenment. An enlightenment proves that one's path was correct and might lead them to a fruit of virtue. Buddhist monks who encounter enlightenment would comprehend a mudra. When Zhao Hai circulates his faith power, the mudra he performs directs it in accordance with the technique. The mudra provides the most natural flow of energy.

No matter which path, as long as the cultivation method was correct, one would understand it's operation. It was just like walking into a maze. As long as your map is correct, then you would no doubt come out of the other end.

In fact, Buddhist hand-seals were a disguised initiation method. The Buddhist required one to pass on what they have learned and realized through their lives. This mudra was this inheritance. It wasn't an overbearing type of inheritance, but it was an indispensable part of the Buddhist path.

The Cosmos Technique was the most difficult technique that Zhao Hai practiced to date. Throughout his cultivation, Zhao Hai became aware that the Cosmos Technique was a type of spatial magic. The spell used the power of the cosmos to allow one to advance and retreat calmly. So upon confronting the enemy, one could hide in the void to deal a fatal blow.

If it was only this, then Zhao Hai could achieve it through the Space. However, Zhao Hai's Space was a pure technique of the void. As for the Cosmos Technique, the void was just part of it. An expert could feel Zhao Hai using the Space. On the other hand, the Cosmos Technique conceals the movement as its user hides in the void. This was the most important aspect of the technique.

In addition to this, there's another thing about this technique. Its movements weren't random. Instead, it followed a large Buddhist formation. One could traverse the void through following the formation.

Although there was a formation to follow, this didn't mean that the technique was restricted. If the user followed the formation, then they could move in any direction they want. If they wanted to change directions, they only needed to do it through the formation. This gave the technique infinite possibilities.

Zhao Hai spent 81 days practicing the mudra. Even with the help of the Space, Zhao Hai still took a long time to get used to the movements.

Therefore, it took Zhao Hai 90 days to finish the technique. After he went out, Zhao Hai relaxed once more as he paid attention to the outside world.

At this point, the outside world was aware of how strong Zhao Hai was. The Six Realms Battlefield became peaceful once again. As for Yalei 2, things were on the right track. After Margaret and Louis got in touch, construction for the space bases went underway. The defenses of Yalei 2 needed to be built. Otherwise, any person could come to the planet. This wouldn't be good for the planet's development.

On the other hand, the headquarters of the Cross Sword Pirate Group in the Pirate Paradise has been retained. However, residences have been demolished. At this point, one couldn't see women, children, nor old people in the pirate group's territory. Besides some members of the pirate group, the rest of the population were Undead.

The Cross Sword Pirate Group had already lifted the blockade. However, it still had a lot of restrictions towards outsiders. Otherwise, people might discover that the pirate group was filled with Undead!

Technically, it's "King of the Underworld". But it sounded like he's a criminal mastermind.
