

Another World 1401

Chapter 1401: Revenge!

There was no trust between each Xu Race person. However, they had one good thing about them. They adhere to what was called a Bandit's Code. Nobody knew where this code came from but it made the Xu Race trustworthy once they were on a mission. They would do their tasks clearly and would give what the pay deserves. However, once the task is done, you need to keep on guard against them. This was because they no longer needed to adhere to the code once the task was over.

Because of this, these Xu Race people would trust one another during missions. But once the mission was done, they would immediately separate.

The reason why the Xu Race people gathered together to deal with Liu Sheng and the others was because Liu Sheng's group had 14 people. If only half of the Xu Race came, then they wouldn't be able to restrain Liu Sheng and the others. Therefore, they banded together. But they didn't expect Zhao Hai to ruin their plan.

Their mission was ruined by Zhao Hai, but the Xu Race who organized the party still paid what was promised. This was the most commendable part of the Xu Race.

However, after being paid, the group disbanded immediately. This was because people in the Tenthousand Realm Battlefield knew about the Xu Race's customs. Naturally, they were also aware that once the task was done, the Xu Race would resume being bandits. If they stayed behind, then they would be in danger. Therefore, as soon as they were paid, everyone quickly separated.

These people didn't really expect Zhao Hai to really retaliate. It must be said that the Xu Race couldn't be easily found. Each one of them were good at stealth. Not only stealth, they could also hide from spiritual force. And with how nomadic they were, nobody knew where the Xu Race people were. If one wanted to hunt them down, then they would experience countless suffering.

But what the Xu Race didn't think about was a heaven-defying thing like the Space to exist. Their stealth techniques were totally useless against the Space's surveillance. No matter where they run, they would always be seen by the Space.

In order to deal with these fellows, Zhao Hai put a silver needle in their bodies. With the silver needles, they wouldn't be able to escape.

In addition to wanting to teach them a lesson, Zhao Hai also wanted to hunt the Xu Race in order to find out who was behind their current operation.

The Hell King's ship continued to fly forward with an unparalleled momentum. Coupled with its huge form, it gave people a strong oppressive aura. Because of this, anyone who spotted the Hell King's ship would hide immediately, no matter which realm they came from.

Although everyone was from a different Great Realm, they were all aware that an artifact like the Hell King's ship wasn't something that anyone could use.

It was precisely because of this that nobody came to provoke Zhao Hai and the others. Liu Sheng and Zhao Hai were currently standing on the bow of the ship. Although Zhao Hai felt nothing, Liu Sheng and the others couldn't help but feel pride. Even if the Hell King's ship had nothing to do with them, seeing people from the other realms go out of their way made them feel special. Moreover, the Hell King's ship was an artifact of the World of Cultivation.

The Hell King's ship was fast. And with how recent the attack was, it only took Zhao Hai and the others a few hours to find a Xu Race person.

The Xu Race person also noticed the Hell King's ship. He had a very deep impression of this ship. He knew that this was the ship that the giant pagoda transformed into.

Although they said that they let the pagoda escape because they were stunned, they couldn't deny the strength of the pagoda. Even if they were dumbfounded, their artifacts still hit the pagoda. However, the pagoda didn't suffer any damages. One could see the strength of the Hell King's ship from this. So at the sight of the ship, the Xu Race person immediately hid and hoped that he could avoid disaster.

The Xu Race person already thought that Zhao Hai was coming for him. This was because Zhao Hai said that he would return the favor when he left. But seeing the Hell King's ship coming to his direction, he was still in disbelief.

Not long after the Xu Race person hid himself, the Hell King's ship stopped in front of him. Zhao Hai looked at the Xu Race person's hiding place and said, "Come out, do you think you can escape? Don't forget what I said yesterday." The Xu Race person thought that Zhao Hai was just deceiving him. But

when he saw Zhao Hai looking straight into his hiding place, he knew that Zhao Hai could see him. The Xu Race person couldn't help but feel bitter. He put away his stealth cloak and then appeared 200 meters away from the Hell King's ship.

He looked at Zhao Hai and said, "How did you see me? Our Xu Race's ability couldn't be detected."

Zhao Hai smiled and said, "Just because you say so doesn't mean that nobody can detect you. Wasn't I able to see you? Let me tell you this, you aren't the first Xu Race person I met. I killed one before. He wanted to ambush me using his stealth, but unfortunately for him, he failed. Hehe. I guess it's your turn now. You Xu Race should know that the Ten-thousand Realm Battlefield is a paradise for bandits. But targeting only one group of people won't work. There will come a time where they will retaliate. Today is just the beginning." Then Zhao Hai waved his hand and released ten thousand flying swords to attack the Xu Race person.

The Xu Race person also released his magic artifacts to block Zhao Hai. However, Liu Sheng and the others also released their flying swords and attacked the Xu Race person together.

Seeing this, Zhao Hai smiled faintly as he received his swords. He gave Liu Sheng and the others the opportunity to finish this one off. Liu Sheng and the others were thirsting for revenge, this was a good time to blow off some steam.

Although the Xu Race person wasn't weak, he couldn't hold on against this many Transcending Tribulation Experts. Before long, he was killed.

After killing the Xu Race person, Zhao Hai pulled its corpse into the Hell King's ship, then he turned to Liu Sheng and said, "Brother Liu, you can take his stuff, but I'll have to take his corpse. Is that alright?"

When he heard Zhao Hai, Liu Sheng stared for a moment, then he nodded and said, "Little Hai, you use Dark Magic, so this corpse will be yours. However, we cannot take everything he has. We should have equal share.

The others naturally wouldn't oppose Liu Sheng. It must be said that they wouldn't have gotten this harvest without Zhao Hai. They simply had no way to find people from the Xu Race.

If this wasn't the Ten-thousand Realm Battlefield, then they wouldn't have accepted the loot. After all, the majority of the effort was done by Zhao Hai. But since they were in the Ten-thousand Realm Battlefield and needed to pay a tax every month to stay, they would need everything they could get their hands on. In the end, they have no choice but to accept a portion of the loot.

But to Zhao Hai, these things weren't worth a glance. But he knew that it would make Liu Sheng and the others anxious if he didn't take anything, so he nodded and said, "Alright, then I'll take the Xu Race corpse as well as its life source artifact. You divide the rest."

It must be said that Zhao Hai would still suffer a loss in this agreement. This Xu Race person has been in the Ten-thousand Realm Battlefield for some time, and it had robbed more than 100 magic artifacts. And there were still other items in its possession. If these things were divided equally, each person could still get a rich slice of the pie.

This Xu Race person was different from Liu Sheng and the others. Liu Sheng and the others were newcomers to the Ten-thousand Realm Battlefield, so they were still worrying about tax for the month. On the other hand, this Xu Race person was a veteran and had stayed in the battlefield for many years. He was able to rob a lot of things. Therefore, he was quite rich.

As soon as Liu Sheng heard Zhao Hai, he still wanted to give more items to him. However, Zhao Hai didn't agree. In the end, he could only follow what Zhao Hai said.

Once they looked over the Xu Race person's belongings, Liu Sheng and the others discovered that it was actually very rich. There were a lot of good things in its spatial item. The things inside weren't only enough to pay for a month's tax, they could even make a small profit. Naturally, Li Zongdao and Mo Sheng received their share. Mo Sheng handed his share over to Zhao Hai which meant that Zhao Hai still had his share in the end. After all, Mo Sheng has no care about these things. And he also wouldn't know how to use them.

Their mission was a success. Not only were they able to get revenge, they were also able to profit. This caused Liu Sheng and the others to be happy. After everyone divided their spoils, they turned to look at Zhao Hai. Their expressions were very obvious. They were curious if Zhao Hai was going to continue hunting people from the Xu Race.

Zhao Hai looked at their expressions and immediately knew what they were thinking. But he didn't say anything as he smiled and waved his hand, directing the Hell King's ship to fly towards another direction.

Previously, the ambush was done by the Xu Race as well as people from other races. Zhao Hai placed silver needles in each of their bodies. However, Zhao Hai was only planning to target the Xu Race. As for the others, he didn't care about them for now. This action was something that the Xu Race initiated. Naturally, the first to be dealt with would be the Xu Race. Although the other races participated, they were only acting as mercenaries.

Additionally, Zhao Hai didn't want to offend other people. Therefore, he wouldn't make a move on the others right now. His main target was still the Xu Race!

Chapter 1402: Uneasiness In The Newcomer's Region

Recently, the people from other Great Realms discovered that the atmosphere in the World of Cultivation's newcomer's residence wasn't right. Firstly, the people from the World of Cultivation were being attacked. This caused them to not dare to come out. Even if they came out, they would form groups, rarely would someone go out alone. This made the people from the other realms gloat on the World of Cultivation's misfortune.

Moreover, the people from the other realms were able to notice that there were a lot of Xu Race people surrounding the World of Cultivation's newcomer's area. And oftentimes, they could see the Xu Race attacking the people from the World of Cultivation.

Anyone with a discerning eye can see that this was an action done by the Xu Race against the people from the World of Cultivation. It was just that the people from the World of Cultivation have yet to discover this plot.

It must be said that the Xu Race were among the most unpopular groups of people in the Ten-thousand Realms Battlefield. This was because they were a group of bandits.

Moreover, not a lot of experts come to the newcomer's area. The Xu Race were an exception. They didn't care about unwritten rules or the like. They never cared for written rules, much less unwritten ones.

People from the other realms also grouped up whenever they went out due to the increased presence of the Xu Race in the area. Although the Xu Race seemed to target the World of Cultivation, who knows when they would switch their targets. Therefore, they needed to be careful as well.

However, people were also beginning to notice that the World of Cultivation were launching a counter-attack. There was a huge ship artifact filled with people from the World of Cultivation that were hunting down the Xu Race.

The ship flew in an overbearing manner in the newcomer's region, killing every Xu Race person they came upon. But there had never been news of people other than the Xu Race that had been attacked.

It was at this point that the other people knew that this was a war between the Xu Race and the World of Cultivation. So they all went to the sidelines to watch and maybe profit off of the conflict from time to time.

Before long, when the Xu Race discovered what was happening, more of their members flooded into the newcomer's region. But this time, the people from the World of Cultivation were prepared. Massive numbers of their own experts also went back to the newcomer's region.

These people who came back to the newcomer's region were all powerful veterans. When the newcomers from the other realms saw this, they immediately ran and returned to their own areas and hid.

These people understood that the large number of Xu Race and World of Cultivation Experts flooding into the newcomer's region would divide the region. If they don't stay in their own areas, then they would only be courting death.

The conflict in the newcomer's region naturally alarmed the people in the Ten-thousand Realm Battlefield. Various realms began to shift their attention to the region.

The World of Cultivation and the Xu Race weren't the most powerful groups in the Ten-thousand Realm Battlefield. These two groups could only be regarded as medium-grade. There hasn't been a huge conflict between two realms in the battlefield for some time. Everyone deliberately avoided being entangled in this situation. This was because it's possible that both sides would injure each other, leaving the other realms to harvest some great benefits.

It must be known that the Ten-thousand Realm Battlefield had people from around 30 thousand realms inside it. If you manage to step on other people, then you would be able to greatly benefit. Therefore, the other realms avoided joining the conflict as much as possible.

The other realms were observing the war carefully. The World of Cultivation couldn't just back down from this, or else other people would also target them. Therefore, they needed to teach the Xu Race a lesson.

Normally, in this situation, the Xu Race would retreat. They were a bandit race. They weren't in the business of eliminating an entire group of people.

What's unusual this time was that the Xu Race higher-ups issued a command to spare no one from the World of Cultivation. Even the people of the Xu Race didn't expect this to happen.

Meanwhile, Zhao Hai and the others didn't return and instead continued hunting the Xu Race. Because of their movements, the Xu Race became vigilant. This was also the reason why the Xu Race decided to send more manpower to the newcomer's region.

Since Zhao Hai and the others didn't return, naturally they wouldn't know what happened back in the newcomer's area. After Yuan Ding and Yuan Zen reported the situation, the World of Cultivation immediately acted and restationed large quantities of experts towards the newcomer's area in order to deal with the Xu Race. Leading the group was a young monk. This monk held an unadorned staff and gave people an immense amount of pressure. This pressure wasn't from the monk but instead his staff.

This young Monk led more than 1000 people to enter the newcomer's area. Majority of them were Transcending Tribulation Experts while several were at Severed Soul Stage. As for the young Monk, it seems like he's a Severed Soul Expert himself.

Zhao Hai was able to notice the young Monk the moment the reinforcements entered the newcomer's residences. Seeing the Monk's staff, Zhao Hai knew that it was the famed treasure of the Void Temple, the Ten-thousand Transformations Staff.

Seeing the Ten-thousand Transformations Staff, Zhao Hai understood that the World of Cultivation was prepared to make a huge move. However, Zhao Hai didn't care. The newcomer's region was a huge

place. So even if the Monk entered the region with the Ten-thousand Transformations Staff, he wouldn't necessarily meet Zhao Hai and the others. And Zhao Hai doesn't want to meet that monk.

From what Zhao Hai can see, the young Monk was the leader of the team. Moreover, he was a Buddhist disciple. If Zhao Hai went back to the residences, he would have to listen to this person. Zhao Hai didn't like being commanded, so he made sure to avoid the monk. He also didn't tell Liu Sheng and the others about this information.

Naturally, Zhao Hai was no longer intending to attack the Xu Race. By this point, the Xu Race also sent a thousand powerful experts into the newcomer's region. Most importantly, now that the Xu Race has gathered together, Zhao Hai would suffer a loss if he were to make an attack.

Since Zhao Hai wasn't planning to join the fray, he led Liu Sheng and the others to harvest resources in the newcomer's region.

With the noise created by the Xu Race and the World of Cultivation, the density of people wanting to harvest resources has drastically declined. This was a great opportunity for Zhao Hai and the others to gather up resources. In the past, gathering materials was very hard because of how many people there were. And robbing people wasn't easy as well.

But now things were different. It became rare for someone to leave their own residential areas. Zhao Hai took this opportunity to harvest medicinal materials and ores.

Before Zhao Hai made this decision, he made sure that every Xu Race person that ambushed Liu Sheng and the others had been dealt with. This way, they can calmly harvest ores and medicinal plants as well as avoid the young Monk and not get involved with the ongoing war.

Zhao Hai doesn't intend to work hard for the World of Cultivation. He didn't want to become cannon fodder. Therefore, after taking revenge against the Xu Race, he proposed his plan to Liu Sheng and the others.

Now that Liu Sheng and the others have enacted his revenge and seen Zhao Hai's strength, they naturally wouldn't oppose the plan. Therefore, Zhao Hai used the Hell King's ship in order to visit the areas with resources.

As they progressed, Liu Sheng and the others began to get some clues. They had been to some of these areas before, so they knew how many people came here. But after flying in these areas for quite some time, they became confused since they had yet to meet someone else.

Liu Sheng and the others also discovered that Zhao Hai seems to have a goal in everything he did. He wasn't just doing it casually nor was it for revenge. Take dealing with the Xu Race as an example. On the surface, it seems to be for revenge. But Liu Sheng and the others understood that Zhao Hai was doing that in order to get closer to them. Zhao Hai wanted them to follow him.

It might seem strange, they knew Zhao Hai's purpose, so they shouldn't have been pulled in that easily. But in the end, they knew deep inside that they wouldn't leave Zhao Hai. So they followed Zhao Hai's plans.

Thinking about this, Liu Sheng couldn't help but smile bitterly. The longer the time they spent with Zhao Hai, the stronger this feeling became. It seems like they would unconsciously agree to anything Zhao Hai said. It was a bizarre feeling. But at the same time, they didn't dislike it. Even if Zhao Hai wanted to use the Xu Race to get closer to Liu Sheng and the others and make them his followers, they seem not to mind it.

Sometimes Liu Sheng would think that they might have been collectively possessed by a demon. Otherwise, why would they listen to Zhao Hai's words?

Chapter 1403: Enlightenment Technique

Liu Sheng and the others were indeed bewitched. However, what bewitched them was a Buddhist Technique, the Enlightenment Technique. The Enlightenment Technique was the most difficult technique to study among the Buddhist Techniques. It was a technique that operated silently, it didn't even have any spiritual waves. But once it was used on a person, that person would have a favorable impression towards the user and would slowly start to agree to his every word.

There were two ways to use the Enlightenment Technique. The first way was the immediate application of the technique. If the mind of the target wasn't strong enough, then they would be converted immediately. Once converted, the target would fully obey the user and may even become crazed believers who have lost their sense of identity.

Another way of using the technique was to slowly apply its effects. When this method was used, there would be no signs. The affected target wouldn't feel a single thing.

However, this method has a weak point. It needed continuous application in order to convert the target.

Zhao Hai used the second method on Liu Sheng and the others many times. By this point, Liu Sheng and the others were getting closer to being converted. It was just that Liu Sheng and the others haven't discovered it.

Zhao Hai didn't have any regrets converting Liu Sheng and the others. After all, Liu Sheng didn't really have any good intentions when he asked for Zhao Hai's help. He had already been polite to Liu Sheng and the others. Also, being converted wasn't necessarily bad for Liu Sheng and the others.

Zhao Hai has the Space as well as a constant supply of faith power. He could only get stronger and stronger in the future. Being converted by Zhao Hai was a benefit to their future.

Another great use for the Enlightenment Technique was for the collection of faith power. Converted people provide faith power towards the user. The more you convert, the more people you have to provide faith power. Moreover, the more fanatic the believer, the better faith power they could provide. This was the Enlightenment Technique's most powerful aspect.

Faith power was very beneficial for Cultivators. Zhao Hai's body was already stronger than before. Moreover, he wouldn't have any barriers in his cultivation. However, getting a believer that would supply you with Faith Power was very hard. Especially fanatic believers, which were much more difficult to cultivate.

If Zhao Hai didn't have the Space, then it would simply be impossible to collect Faith Power. The World of Cultivation didn't lack methods to collect and apply faith power. However, finding people to provide faith power was extremely hard.

In the past, Great Sects in the World of Cultivation did some experiments. They reared people like livestock in order to perform brainwashing on them, hoping that it would provide them with a means to get Faith Power.

However, this method wasn't very successful. First, because Faith Power could only be provided to one person. Who this person was has become a problem. If too many people share, then everyone would get very little faith power. And if you increase the people in captivity, then it would be too difficult to handle. Having too many people would increase the chance for accidents. Also, those who brainwashed these people would attract suspicion. Once the doubt spread, the experiment was essentially a failure...

The livestock experiment failed, so the use of Faith Power hasn't become popular in the World of Cultivation. One reason was because the methods were kept secret. And an even bigger reason was the lack of places to collect faith power from.

After acquiring faith power, Zhao Hai gained a deeper understanding about it. He also understood why Lu Wei had to use an artifact to collect Faith Power. Despite that, he was still weak since the amount of Faith Power he collected was very small.

Although Lu Wei was regarded as a god in the Divine Realm, his followers weren't devout. It was just like in the Earth where people believed in Buddha, but weren't necessarily Buddhists. This wasn't necessarily true belief. It was precisely because of this that Lu Wei and even the Yin Wind Ghost Emperor only got very few faith power. With such a poor amount of faith power, it wasn't very useful. So the strength of the two was still low.

But no matter what, the two still enjoyed the benefits of faith power. Therefore, they stubbornly kept on collecting faith power without letting anyone else know.

If Lu Wei knew how much Faith Power Zhao Hai was getting, then he would certainly be very envious. At the same time, if the people from the World of Cultivation were to know that there was such a thing as the Enlightenment Technique, then they would definitely want to acquire it at all costs. As long as they get their hands on the technique, they could collect a very large amount of faith power. To any Cultivator, the attractiveness of this was fatal.

Liu Sheng and the others were completely unaware of this. They only knew that they were listening to Zhao Hai's words more and more. Moreover, they didn't seem to have any inclination of disagreeing to him.

Although Li Zongdao also noticed this on Liu Sheng and the others. Li Zongdao wasn't a fool. Despite going along with Liu Sheng and the others for some time, he still didn't trust them. Perhaps Li Zongdao might trust them if this was the World of Cultivation. But in the battlefield, Li Zongdao wasn't as trusting.

If this was the World of Cultivation, then Liu Sheng and the others would have some trouble with Li Zongdao's identity. He was the Strongest Core Disciple of the Profound Clear Sect. If Li Zongdao was killed and the Profound Clear Sect finds out, then Liu Sheng and the others wouldn't be able to shoulder the consequences.

However, this was the Ten-thousand Realm Battlefield. This wasn't a peaceful place. If Liu Sheng and the others murdered someone, then nobody would be able to find out about it. The Ten-thousand Realm Battlefield was just too chaotic. Chasing and tracking down a kill was almost impossible.

Seeing Liu Sheng and the others following Zhao Hai's word, Li Zongdao couldn't help but be more wary. In his mind, they had no reason to be more polite. Liu Sheng and the others showing a better attitude towards Zhao Hai couldn't be good.

Li Zongdao told Zhao Hai about these suspicions, but Zhao Hai told him that it's fine. Actually, Zhao Hai doesn't know what to say. He couldn't just reveal that he was converting Liu Sheng and the others. Otherwise, it might bring unnecessary troubles to him.

Despite this, the group continued to collect resources and even hunt some beasts. With their numbers, they simply didn't need to be afraid. In the end, Li Zongdao could only calm down.

As Zhao Hai and the others were collecting resources, the Xu Race and the World of Cultivation began to make their moves. Both sides knew that the other had sent experts to the newcomer's region. Therefore, they became wary against each other.

They would approach each other cautiously. They would also send people out to scout. However, they made sure that each team comprised at least ten people. One should know that one couldn't be careless in times of war.

Zhao Hai received information about both sides through the Space. At this point, every move and action in the newcomer's region couldn't escape Zhao Hai's eyes.

The distance between the two sides was very large. If they want to fight, then it would take a few days before they could meet. Also, Zhao Hai and the others were far away from where the two sides would meet. Therefore, there's no need for Zhao Hai to worry.

Zhao Hai continued collecting resources along with Liu Sheng and the others. He wanted to use this opportunity to stock up on resources. Once the battle begins, things wouldn't be as easy as it is now.

Naturally, Liu Sheng and the others didn't say anything. They had almost been converted by Zhao Hai. It wouldn't take long before they would become Zhao Hai's faithful followers. It doesn't matter if they were to separate with Zhao Hai, they would still treat him as a god forever. This was what made the Enlightenment Technique terrifying.

At this point, even if Zhao Hai used the Enlightenment Technique in front of Liu Sheng and the others, they still wouldn't dislike it. This was because their minds had already been conditioned by the technique.

Zhao Hai wasn't in a hurry, nor did he want to participate in the war. He planned to wait for a few days after the battle began before participating. This way, he wouldn't be under the command of that young monk but could still provide great contributions to the World of Cultivation.

Monk Kong Miao was the person who held the Ten-thousand Transformations Staff. Zhao Hai didn't know his name before. Only after hearing people call him by his name did Zhao Hai find out.

Although Monk Kong Miao was very young, his strength was already formidable. Most importantly, the way he does things was orderly. The troops under him were marching in formation. The army proceeded forward without any chaos.

Seeing this, Zhao Hai couldn't help but admire Kong Miao. One must know that the troops commanded by the monk didn't have the same training as the Machine Field's armies. But despite this, the monk was able to command them to be orderly. This was impossible without any talent.

Compared to the World of Cultivation, the Xu Race were much more formal. The Xu Race people seemed to have received military training. Also, since they were already managed by a central body, they were able to be managed easily. The advancing speed of both sides wasn't great. Although they were all Practitioners, an army always had a slower speed than an individual person. After all, it wasn't easy to maintain a formation while moving.

Although Zhao Hai was still collecting resources, he was also paying attention to the situation between the World of Cultivation and the Xu Race. He was waiting for the two to begin so that he could join in on the fun.

Chapter 1404: Kong Miao Is A Reincarnated Monk?

Zhao Hai let out a long breath as he stood on the Hell King's ship. He turned to look at Liu Sheng and the others. The group consisted of people from different realms. But now, they have one identity, Zhao Hai's followers.

Zhao Hai conducted the last session today, converting Liu Sheng and the others and making them his loyal followers. When he used his faith vision, Zhao Hai could see the golden yellow faith power in Liu Sheng and the others' bodies. It wasn't bad compared to the Undead.

It must be said that although the Undead have their own thoughts, they always had been Zhao Hai's most loyal followers. They would die for Zhao Hai at any time. Liu Sheng and the others now had the same level of loyalty towards Zhao Hai. This meant that, like the Undead, they would sacrifice their lives for Zhao Hai's sake.

By this point, Liu Sheng and the others looked at Zhao Hai with fanatic gazes. In their heart, Zhao Hai was their god. They were prepared to sacrifice everything for him.

At this time, while Li Zongdao and Mo Sheng were resting in the cabin, Zhao Hai looked at Liu Sheng and the others and said, "You should go and rest as well. Remember, don't be too obvious in front of other people." Liu Sheng and the others gave Zhao Hai a respectful salute before turning around and entering their cabin.

Seeing the others depart, Zhao Hai looked at the jet black sky and then muttered, "Just wait, sooner or later I'll see you." The 'you' that Zhao Hai referred to were the people who made the Ten-thousand Realm Battlefield.

Zhao Hai was worried about the people who created the Ten-thousand Realm Battlefield. If they were able to create a place like this, then they certainly weren't simple people.

It was precisely because he set his target to those people that Zhao Hai wasn't too worried about the situation in the Ten-thousand Realm Battlefield. He knew that he wouldn't be in trouble here. The only thing he had to do was to keep collecting resources in order to upgrade the Space. Once the Space's level is greater, his confidence would also increase.

The next day, Zhao Hai and the others were still collecting resources. However, they didn't venture out too far. Otherwise they would meet the powerful beasts. But even with this, their harvest was still very enormous, enough to catch up to people who had been harvesting for several years. After all, nobody else was coming out at this time. Even if they met other people, they still couldn't do anything to Zhao Hai and the others. By this time, Zhao Hai already added more than 30 Undead to his space. With the amount of Undead he obtained in the Ten-thousand Battlefield, Zhao Hai had enough strength to be an overlord of a region once he returned to the World of Cultivation.

After collecting resources for several days, Zhao Hai finally stopped. They had harvested almost all of the well-known materials in the newcomer's region. Another reason was because the World of Cultivation and the Xu Race were about to begin their battle.

Both sides had about 3000 people all in all. Their weakest combatants were at Transcending Tribulation Experts, there were no Nascent Soul Experts in attendance. Currently, the two sides were faced with each other on Green Copper Mountain. The distance between the two was less than a kilometer. Seeing this, Zhao Hai knew that the battle was about to start. It would take three days for the Hell King's ship to arrive at Green Copper Mountain. Then they would join the war.

Zhao Hai didn't tell Li Zongdao why they were heading back. Li Zongdao and the others didn't ask either. Zhao Hai already earned Li Zongdao's trust while Liu Sheng and the others were already Zhao Hai's followers.

After Zhao Hai changed the ship's direction, he turned his head to the others and said, "Everyone, I have something to say." Everyone immediately grouped up to listen. Li Zongdao looked at the eyes of Liu Sheng and the others and couldn't help but feel strange. Their transformation was too abrupt. The way they follow Zhao Hai in the past two days made Li Zongdao feel that they were impostors.

Zhao Hai looked at everyone and said, "Our World of Cultivation has gathered more than 1000 people to confront the Xu Race. We need to head back and fight. Therefore, everyone should use this time to rest well and recover your spirits. We shall fight as soon as we arrive."

Upon hearing Zhao Hai, Li Zongdao stared and said, "Really? Little Hai, when did this happen? Why don't I know about this?"

Zhao Hai smiled faintly and said, "Several days ago, when we were collecting herbs, the two sides began to move towards each other. They will start fighting today. I don't want to head back and be caught by those people. Now that the battle is about to begin, naturally we have to help. Alright, Brother Li, go rest. We still have more than two days before arriving. Use these days to take a break and recover."

Li Zongdao nodded and said, "I was wondering why there's so few people in the newcomer's region these days. I reckon they've hid in fear."

Zhao Hai smiled faintly and said, "Right. It's because of this that I decided to stay, and now we have a lot of resources in hand. But it's time for us to get involved with the war."

Li Zongdao laughed and said, "Good. Good job Little Hai. It's not good to get involved with those monks. If we head back too early, we'll only be used as cannon fodder."

Zhao Hai nodded and said, "I also remembered something that Martial Uncle told me. The Ten-thousand Realm Battlefield hasn't been peaceful, and the Void Temple was even forced to take out their Ten-thousand Transformations Staff. I'm afraid the lead Monk is currently holding that staff."

Li Zongdao replied, "The Ten-thousand Transformations Staff is here? Do you know the monk's name?"

Zhao Hai nodded and said, "The other monks call him Kong Miao. He looks quite young. You heard of this name before?" Zhao Hai noticed Li Zongdao's expression changed when he said the name Kong Miao. So he couldn't help but ask.

Li Zongdao's expression turned back to normal after some time, then he said, "It really is Kong Miao. I heard about this person before. He's from the Void Temple. He doesn't have much of a reputation in the World of Cultivation, but we have heard of his name. He's the greatest genius of the younger generation. He seems to be the same age as me, or even two years younger. However, his training speed is very fast. When I reached Nascent Soul, I heard that he already transcended his tribulation. Now I'm afraid he's reached the Severed Soul Stage. I heard he's the youngest person in the Void Temple to become an Elder. Although he belongs to the same age group as us, he's already left us far behind. I'm afraid only you, Little Hai, can catch up to him."

Zhao Hai stared, he could understand what Li Zhangdao meant. Li Zongdao was titled as the greatest Core Disciple of his sect. In the eyes of ordinary cultivators, he was a peerless genius. However, he still fell behind Kong Miao.

Thinking of this, Zhao Hai nodded his head and said, "It seems like Kong Miao isn't simple. After all, the Void Temple is confident in sending him along with the Ten-thousand Transformations Staff. If it's possible, it'll be nice to see him."

Li Zongdao bitterly smiled. Perhaps only Zhao Hai can say this in the entire World of Cultivation. Even Transcending Tribulation Experts couldn't dare speak such words.

Li Zongdao shook his head and then said, "Little Hai, you need to be careful of this Kong Miao. From what I heard, Kong Miao seems to be a reincarnation of a Buddhist Monk. There's a technique in Buddhism that allows one to pass on their memories and keep on reincarnating."

Upon hearing Li Zongdao, Zhao Hai's expression turned serious as he said, "Kong Miao is a reincarnation? Is that true?"

Li Zongdao shook his head and said, "Nobody knows for sure. However, that's the rumor. Otherwise, how could he cultivate so quickly? His cultivation speed is terrifying."

Zhao Hao nodded. He was aware of his own abilities. The reason why he was able to cultivate quickly was because of the Space. If Kong Miao could cultivate up to this point without something like the Space, then he must have another advantage. Li Zongdao was already considered to be a genius in the World of Cultivation, but his cultivation speed wasn't as quick as King Miao. Kong Miao's cultivation speed could no longer be considered to be talent.

If Kong Miao is indeed a reincarnated Buddhist Monk, then can he see faith power? If he's able to, then wouldn't that be troublesome? Thinking of this, Zhao Hai's brows couldn't help but wrinkle. It seems like he needs to be careful around Kong Miao.

Li Zongdao looked at Zhao Hai and said, "Don't think too much about it. Here, he's also someone from the World of Cultivation. He won't do anything to us."

Zhao Hai smiled bitterly and didn't say anything. If he didn't have so many secrets, then he wouldn't have feared Kong Miao. However, he had a lot of things he couldn't reveal to the outside. Even one of his aces could bring him trouble. Therefore, he has no other choice but to tread carefully.

Li Zongdao looked at Zhao Hai and knew that there's something happening, but he didn't ask. These kinds of things were up to Zhao Hai to deal with.

However, this didn't mean that Li Zongdao wasn't curious why Zhao Hai was so anxious when he heard about Kong Miao being a reincarnated expert.

As he thought of this, Li Zongdao's eyes suddenly shone. Then he thought about Zhao Hai. Zhao Hai has an insane cultivation speed as well as a lot of secrets. He had formidable strength as well. He has the same characteristics of a reincarnated expert. Was Zhao Hai also a reincarnated expert?

Chapter 1405: Kong Miao's Rage!

Zhao Hai wasn't aware of what Li Zongdao was thinning. If he did, then he wouldn't know whether to laugh or cry. This was because Li Zongdao was partially right. Although Zhao Hai wasn't a reincarnated expert, he was someone whose soul has transferred. However, he didn't cultivate back on earth.

Although Li Zongdao suspected Zhao Hai of being a reincarnated expert, he didn't have any evidence to back it up. Moreover, this suspicion was lessened a little when he remembered that Zhao Hai doesn't know a lot about cultivation. In the end, this suspicion could almost be canceled.

Zhao Hai had Laura and he others command the Hell King's ship while he went to sleep along with Li Zongdao and Mo Sheng. The battle would involve more than a thousand experts, he needed to be prepared.

A battle involving more than a thousand people might not sound a lot, but one shouldn't forget that the combatants on both sides were at Transcending Tribulation and Severed Soul Stage. Each one of these experts could overturn mountains.

Because of this, Zhao Hai had to be careful. Transcending Tribulation Experts couldn't be underestimated. Therefore, he planned to use the following days to cultivate and prepare himself.

.....

Kong Miao stood along with his men, looking at the Xu Race people in the distance. He didn't store his artifact in a spatial equipment like others did. Instead, he held it in his hand. This was because the artifact he was holding was the Ten-thousand Transformations Staff.

Kong Miao liked holding the staff. This was because the staff was a very good artifact. The staff was very comfortable to use. Kong Miao thinks that it is his time to become famous in the Ten-thousand Realm Battlefield.

Thinking of his wonderful experience, Kong Miao couldn't help but sigh deep inside. In his opinion, he was favored by the heavens. Otherwise, how could he encounter such good things?

The reason behind Kong Miao's cultivation speed wasn't that he was a reincarnated expert. But instead it was because he obtained an inheritance of a Buddhist Expert.

Kong Miao was born on the Void Temple's controlled planet. Among the clans in the planet, his clan was only average. Each person in the clan practiced the Buddhist path. If any talent was discovered, they would immediately be sent to the Void Temple to practice and become either an Inner Disciple or a Core Disciple.

However, Kong Miao wasn't treated well by the clan. Naturally, the Clan didn't waste resources on him. Because of this, Kong Miao became comparable to a Rogue Cultivator.

But nobody expected that Kong Miao would pick up a jade slip as he was collecting medicine in the mountains. The jade slip didn't look like anything. But as Kong Miao searched it using his spiritual force, he suddenly fainted. He was asleep for five days. After waking up, he knew that he had picked up a treasure. The jade slip was left behind by a Buddhist Master. The slip recorded the master's road from Foundation Building up to the Severed Soul Stage. This was equivalent to pointing the way for Kong Miao. This provided him insights and allowed him to achieve a smooth cultivation.

Most importantly, the jade slip included a very high level cultivation method. The steps were clearly written. How to cultivate, which pills to consume, everything was described.

Additionally, the jade slip had the spiritual force and spiritual qi of a Severed Soul Expert. The spiritual force stimulated Kong Miao's growth while the spiritual qi provided him with a foundation of pure spiritual qi to train in.

This jade slip was a great treasure. Anyone who got their hands on it would certainly become a great expert. As for how that jade slip ended up in the mountains, nobody knew.

Kong Miao had a much stronger spiritual force than his peers, and he also had the pure spiritual qi of a Severed Soul Expert. Naturally, he was able to get twice the result with half the effort. Before long, he stood out in his family and became a genius that was sent to the Void Temple. He became an outer disciple, then an inner disciple, then a core disciple. Along the way, the resources allocated to him increased. And with the help of the jade slip, his training went smoothly. His cultivation was like a rocket as it shot past everyone else. Now, he was an Elder of the Void Temple, one of the Severed Soul Powerhouses in the World of Cultivation.

Thinking of this, Kong Miao couldn't help but feel proud. His discovery of the slip really turned his destiny over. From an ordinary member of a clan to being one of the most powerful people in the World of Cultivation. If it isn't destiny, then nothing could justify it.

It was just that he has been busy cultivating these years or have places the sect arranged him to go to and needed to conceal his identity, which made Kong Miao unhappy. Because of this, his name wasn't as resounding as he wanted to be. Only a few people from Great Sect knew about his name, others were simply clueless about who he is.

Seeing people from great sects going out and being accommodated by small sects made Kong Miao envious. Whenever he went out, people simply didn't know who he was. Naturally, small sects wouldn't arrange anything for him.

This made Kong Miao angry. He's an Elder of the Void Temple, the strongest expert among his generation. However, whenever he went out, nobody knew who he was.

Now, the Xu Race gave him an opportunity to become famous in the Ten-thousand Realm Battlefield. Kong Miao was aware that the people in the Ten-thousand Realm Battlefield were elites of the World of Cultivation. Moreover, these people were well-respected by the sects. When the time comes, he would be greeted by everyone when he returns to the World of Cultivation.

Although he felt pride in his heart, Kong Miao didn't reveal it to the outside world. He calmly looked at the Xu Race as they lined up before him, preparing to attack.

As Kong Miao looked at the Xu Race, he said, "Please tell your representative to come out and have a talk."

When his voice sounded out, the Xu Race people opposite him turned quiet. Then a Xu Race person flew out. This Xu Race person looked old, his face was wrinkled and was somewhat ugly. This Xu Race person looked at Kong Miao and said, "What does Your Excellency want to talk about?"

Kong Miao looked at the Xu Race person and said, "I'm Void Temple's Kong Miao. I just want to ask you a question. Our World of Cultivation doesn't have an enmity with your race. So why are you targeting us? Please explain, otherwise, you can't blame me for being impolite."

When the Xu Race person heard Kong Miao, he suddenly laughed and said, "Impolite? How are you planning on being impolite? Aren't you being too naive in saying that? This is the Ten-thousand Realm Battlefield. My Xu Clan rely on robbing people in order to get benefits. If you're talking about explanations, then why don't you explain the people from the World of Cultivation who are pursuing our members? If you can't give me an explanation, then forgive me for being impolite as well."

Kong Miao went silent. His Cultivation has been going smoothly. Even his trials were devoid of danger. He had never met someone as arrogant as the Xu Race before him. He was so angry that he didn't know what to say.

Seeing Kong Miao's response, the Xu Race person laughed harder as he said, "So you're really just a kid. Hahaha. It seems like the World of Cultivation is really confident. They actually sent a kid to fight a war!" The other Xu Race people laughed as well. It was as though they were ignoring that Kong Miao was present.

Looking at these people, Kong Miao shouted, "If you're like that, then I guess we no longer need to talk. Let's see who really has the strength to survive!" With a wave of his hand, the Ten-thousand Transformations Staff sent an attack towards the old Xu Race person.

Without any delay, the others from the World of Cultivation also attacked using their respective artifacts.

Seeing Kong Miao beginning the fight, the Xu Race naturally attacked as well. All kinds of green-tinted magic artifacts were taken out. A rumbling sound could be heard as the artifacts filled the air.

The two sides were still probing each other. Although it might seem like the battle was very lively, there had been no casualties on both sides. Kong Miao was now fired up. He felt insulted by the old Xu Race person. The Ten-thousand Transformations Staff kept changing forms as it attacked the Xu Race person.

However, it was clear that the old Xu Race person was prepared. He coldly snorted and released 200 artifacts to clash with the Ten-thousand Transformations Staff. Although each of the artifacts couldn't contend with the Ten-thousand Transformations Staff, enough of them were able to.

The artifacts all had an aquamarine tint to them. The artifacts themselves were of the same color, but in fact they were controlled by the old Xu Race person. Because of his strength, each artifact were able to unleash quite a large amount of power.

Kong Miao also released quite a few artifacts to assault the old Xu Race person. Kong Miao was now a Severed Soul Expert, this meant that his soul has been divided into two. This other soul could help him control magic artifacts. This allowed him to control twice the amount of artifacts.

If Kong Miao hadn't reached Severed Soul Stage, then it would have been impossible for him to use the Ten-thousand Transformations Staff. This was because despite the staff's immense strength, it was also very demanding when it came to control. If a Transcending Tribulation Expert wanted to use the Ten-thousand Transformations Staff, then he wouldn't be able to use any other artifact along with it.

Because of this, only Severed Soul Experts used the staff. With this, they can use the staff while their other would control the other artifacts.

Chapter 1406: Plot Of The Xu Race

The Ten-thousand Transformations Staff was quite similar to Zhao Hai's Liquid Silver. However, the staff couldn't compare to Liquid Silver after its upgrade. Currently, Liquid Silver was a faith weapon while the Ten-thousand Transformations Staff isn't.

Also, although the Ten-thousand Transformations Staff could transform, it couldn't transform into something beyond its volume. On the other hand, Liquid Silver can transform without any limits.

Despite this, the Ten-thousand Transformations Staff was still very mysterious. Although it said ten thousand in its name, it was like Liquid Silver with an unlimited number of forms it can transform into.

However, only a few people could exert the full strength of the staff. This was because, just like Liquid Silver, one needed to consider formations to use with the staff, not just your spiritual force. Not a lot of people could do this. After all, not everyone was like Zhao Hai who had the Space to help him with formations.

And since the Ten-thousand Transformations Staff was very valuable, it's impossible for it to become someone's Life Source Artifact. It would only be taken out whenever it was needed.

As the matter stands, the one who used the staff wouldn't be familiar with it. After all, the longer you use a weapon, the more power you could display while using it. As for the Ten-thousand Transformations Staff, it couldn't display a great amount of power in the hands of a stranger.

However, one couldn't say that the Ten-thousand Transformations Staff has no merits. Inside the Ten-thousand Transformations Staff was a formation core. It was composed of a control formation as well as an offensive formation. Also, these formations weren't the same as normal ones. These were high-level formations.

These formations were things that the Void Temple kept secret. It can be said that the prestige of the staff was due to this formation core. Without this formation core, the Ten-thousand Transformations Staff could just be relegated to a high-grade artifact. It wouldn't be able to become one of the pinnacle artifacts of the World of Cultivation.

Beside this formation core, one would also need to use a formation in order to use the artifact. This time, you would need to use your own spiritual force to condense it.

But since most people don't have the Space, they would have to define the forms of the staff beforehand. This way, they would know which formations to use in order to change its form.

Kong Miao's situation was the same. In his hands, the Ten-thousand Transformations Staff would transform into a stick, a crescent moon spade, a monk's blade, a pagoda, an earthen bowl, and other forms numbering 10 altogether. The attacking style of each form was different. Because of this, Kong Miao needed to be familiar with these forms beforehand, and he would also need to prepare the formations. This way, he would be able to change the staff's form in the shortest time.

According to the records of the Void Temple, the best user of the Ten-thousand Transformations Staff was its 22nd Abbot. This Abbot could use 108 forms of the staff. Moreover, it could divide the staff and combine its attacks.

Although Kong Miao was only able to use 10 forms, the formation core of the staff couldn't be underestimated. His attacks were still very formidable. The Old Xu Race person needed to use dozens of artifacts in order to block the staff's attacks.

As for the other artifacts that Kong Miao released, although they weren't ordinary, they couldn't enter the old Xu Race person's eyes. He was still focused on the Ten-thousand Transformations Staff.

Kong Miao was quite startled by the strength of the Xu Race. He knew that although the attacks of the Ten-thousand Transformations Staff looked ordinary, the power between each one of them was colossal. Most Transcending Tribulation Experts using 20 artifacts wouldn't be able to block the staff's attack. It might even kill that Transcending Tribulation Expert.

But in front of the Xu Race person, the strikes weren't doing as well. It seems like this old Xu Race person wasn't simple! The information that Kong Miao obtained was just too few. He didn't even know that the one he was facing was a famous Xu Race person named the Green Cloud Sand Bandit, Xu Wuzun.

This person was very powerful. Moreover, he has two Life Source Artifacts, the Green Cloud Scarf and the Emerald Sand Fan.

Of the two artifacts, Xu Wuzun acquired the Emerald Sand Fan first. Nobody knew how Xu Wuzun refined the Emerald Sand Fan, but a large amount of poisonous green sand has been refined along with it. Not only can this green sand defile other magic artifacts, it could also corrupt the enemy's spiritual qi. It could even spread poison to the enemy through their qi, rendering them powerless during the battle.

As for the Green Cloud Scarf, Xu Wuzun acquired it after entering the Severed Soul Stage, using it as the Life Source Artifact for his secondary soul. Once the Green Cloud Scarf was released, a poisonous mist will form. It could gather and disperse, poisoning the target. It could even be used as a flying artifact. Also, its defensive power was quite good.

Xu Wuzun has long been a famed expert. If he were to be ranked against the others, then he would definitely place top 10 in the Xu Race.

Because of these attributes, Xu Wuzun was able to block Kong Miao's attacks. Although Kong Miao was strong, he was still a rookie Severed Soul Expert in the eyes of a veteran like Xu Wuzun.

With Kong Miao being tied down by Xu Wuzun, the World of Cultivation Experts had a hard time against the Xu Race. This was because the artifacts of the World of Cultivation Experts were inferior compared to the Xu Race. With the help of their innate ability, the Xu Race were able to control a large amount of artifacts. Although these artifacts didn't reach the same level of control as their original owners, their sheer number made up for it. As the battle went on, the Xu Race were able to slowly suppress the World of Cultivation.

Kong Miao was also able to notice this, but he has no way of remedying it. However, since the people from the Cultivation Realm were also veterans of a thousand battles, they were able to deal with their situation quite fast. They immediately had their artifacts go back to defend. Then a division of responsibilities was formed. People at the front would be in charge of defense while people at the back would take the offensive role. This way, they were able to concentrate on one task.

But at the same time, the Xu Race changed their approach. They also divided themselves into offensive and defensive roles. However, the difference between the Xu Race and the World of Cultivation was that the World of Cultivation had more people defending than attacking. Meanwhile, only a small number of Xu Race people were defending while most of them attacked. As the matter stands, the World of Cultivation was in the defensive. The pressure they faced was even bigger.

Fortunately, the people from the Cultivation Realm had real abilities. Therefore, the Xu Race weren't able to get an advantage against them. However, it was clear that the World of Cultivation was getting pushed back.

However, at this time, Kong Miao was still fighting the old Xu Race person and he couldn't get any advantages at all. One could see from this point how novice Kong Miao really was. He was now a leader, not an individual acting alone. He needs to lead his people to fight the Xu Race. If he wasn't so preoccupied with Xu Wuzun, then he might have been able to use the Ten-thousand Transformations Staff to help the people from the World of Cultivation.

Naturally, the old Xu Wuxun intentionally enraged Kong Miao in the beginning. This would make Kong Miao target him alone. Then with his strength and experience, he would tie Kong Miao down, allowing the other Xu Race people to deal with the World of Cultivation.

It was obvious that this was planned beforehand. Before Xu Wuzun and the others fought with the World of Cultivation, they already knew that Kong Miao would be in command. They knew Kong Miao's origin as well as the artifact he would be bringing. Therefore, they could understand his temperament and make the proper arrangements. As could be seen, this plan was very successful.

Since the World of Cultivation's people were busy dealing with the Xu Race's offense, they weren't able to discover this point. If they were able to notice it, then they would know that their opponents this time weren't only the Xu Race. After all, it was impossible for the Xu Race to collect such detailed information.

Both sides didn't hold back during the battle. Naturally, it would be impossible for the fight to end quickly. With so many people involved, they could take turns resting and participating in the fight.

If this situation was kept constant, then the battle would last for ten days or half a month. Naturally, this was in the condition that no accident would happen. But it was already obvious to Zhao Hai that this wouldn't be the case.

Although he had yet to arrive at the battlefield, Zhao Hai was aware of its current situation. Every action and movement made by both sides have been monitored by the Space. Because of this, Zhao Hai became anxious. He discovered a group of Xu Race people approaching the battlefield. These were people the Xu Race prepared for reinforcement.

The Xu Race showed about a thousand troops in the beginning in order to get the World of Cultivation to send the same number of people. The Xu Race's reinforcements could also be called the ambush army. Although they only numbered 500, a sudden addition of 500 people could definitely change the state of the battlefield. These 500 would catch the World of Cultivation off-guard. If they weren't able to wipe out the entire World of Cultivation army, then they could at least strike a fatal blow to the strength of the World of Cultivation. This was the Xu Race's real goal.

Chapter 1407: Changes To The 12 Metal Beasts

The moment he got news about this, Zhao Hai immediately flew to the battlefield at full speed. By his calculations, the Xu Race reinforcements would arrive at the battlefield in four days. This was considering that they wouldn't rest during the whole journey.

But if they didn't rest, then they wouldn't have the strength to fight once they arrive at the battlefield. Therefore, they would certainly take rests along the way. In this case, they would arrive at the battlefield much later.

Zhao Hai and the others don't have this problem. Now that Laura and the others were controlling the Hell King's ship, Zhao Hai and the others could rest at any time. If it weren't for Li Zongdao, then Zhao Hai would have brought everyone to the Space. Li Zongdao's group had already become Zhao Hai's followers, they wouldn't reveal his secret.

Laura and the others were also aware of the situation, so they controlled the Hell King's ship without stopping. From what Zhao Hai could calculate, it would take two days before they could arrive at the battlefield. When the time comes, they would be able to join the fight.

At this point, Zhao Hai no longer cared if Kong Miao was a reincarnated expert. From what he can see, even if Kong Miao was a reincarnated expert, he still wouldn't be able to identify Zhao Hai's Buddhist Techniques. It seems like Zhao Hai's Buddhist Techniques weren't the same as the ones practiced by the Buddhists in the World of Cultivation. The 12 Buddhist Techniques seem to come from a higher-level Realm than the World of Cultivation. Therefore, there shouldn't be any issues in him using his techniques in the open.

Zhao Hai could affirm this point from seeing Kong Miao's fight with Xu Wuzun. Although the battle between Kong Miao and Xu Wuzun looked lively, it also allowed Zhao Hai to see the Buddhist Techniques of the World of Cultivation.

There were many Buddhists from the World of Cultivation that learned Body Cultivation Techniques. However, Zhao Hai believes that their technique couldn't be compared to Demon Subjugation Technique.

Zhao Hai remembered Feng Baiming saying that it wasn't their techniques that allowed the Buddhists to rise in the World of Cultivation. On the contrary, the Buddhist Techniques of the World of Cultivation couldn't compare to the techniques of the Sects. Even their Body Cultivation techniques couldn't compare.

The Buddhists were able to rise mainly because the troops of the Sects had been annihilated in the past. This made the Sect lose a lot of their elites. This was also the reason why the Sects suspected the Buddhists of betraying them.

Although Cultivation Methods weren't included in this analysis, it could be seen that the Buddhist Cultivation Methods weren't any better compared to the Sects. And since it was already established that Zhao Hai had a mysterious Cultivation Method that seems like a Buddhist, Zhao Hai was certain that there won't be any problems even if he used the 18 Techniques in front of everyone.

Since this was the case, Zhao Hai was no longer worried. He was now looking forward to giving the Xu Race a proper beating.

Zhao Hai knew that his life was already tied with the World of Cultivation. If he falls, then his life would become difficult. It was just like the saying, 'If the skin doesn't exist, then where would the hair stick to?'

If something happened to the World of Cultivation's hold in the Ten-thousand Realm Battlefield, then it would certainly cause some changes in the World of Cultivation. Zhao Hai doesn't believe that the other Realms would just leave the World of Cultivation alone if they were to lose this battle. When the time comes, the flames of war might come to the World of Cultivation itself.

Zhao Hai knew that if he wanted to make progress, then he would need the Ten-thousand Realm Battlefield. This place was rich with good resources. There were regions outside the newcomer's region with more valuable materials. Just because it was made by other people doesn't mean that Zhao Hai doesn't want the things here. The existence of the Ten-thousand Realm Battlefield gave Zhao Hai the opportunity to get stronger.

He can take the resources in the Ten-thousand Realm Battlefield in order to develop the Space quickly. At the same time, he could also understand the Ten-thousand Battlefield better. So when the time comes, he wouldn't be unprepared if he were to face its creators.

Li Zongdao was now preparing to fight with all his strength. He knew that they were heading towards a huge battle. His strength was at the bottom of the group, he was only a bit stronger than Mo Sheng. With Mo Sheng's innate constitution as well as Zhao Hai's protection, then nothing would go wrong for him. Li Zongdao was also under Zhao Hai's protection, so he shouldn't be in any danger. However, Li Zongdao didn't want this. He was a Core Disciple of the Profound Clear Sect. It wouldn't be good for his development if he was always being protected in the Ten-thousand Realm Battlefield.

However, Li Zongdao also understood that it was impossible for him to break through towards Transcending Tribulation at this time. If he was anxious in breaking through, then it would be easier for him to make a mistake. If he was possessed by a devil, then that would be his end. Therefore, he didn't cultivate at this time. Instead, he conditioned his body for the fight ahead. He also prepared his artifacts and pills. He relaxed himself so that he would always be in optimum condition.

Mo Sheng was the simplest of them all, he just slept. This fellow's current routine was eating then sleeping at this point. But because his food was rich with spiritual qi, his strength was rising instead of dropping. Moreover, it was increasing very quickly, much to Li Zongdao's envy.

Zhao Hai didn't mind them as he sat there cross-legged, looking like an old monk entering meditation. But in actuality, he was watching the battlefield as well as the 500 Xu Race reinforcements.

The travelling speed of the Xu Race reinforcements was indeed what Zhao Hai thought. Zhao Hai could also understand why the Xu Race would have their ambush team so far away from the main team. They were afraid of being discovered by the World of Cultivation. Therefore, they separated the two teams by a couple of days.

Actually, the World of Cultivation was being complacent this time. They expected to repel the Xu Race with just Kong Miao and the Ten-thousand Transformations Staff. After all, the Xu Race were bandits, they shouldn't go for a head-on fight.

But who would've expected the Xu Race to send Xu Wuzun. Moreover, they sent their powerful experts over. Dealing with this Xu Race group would be impossible in a short amount of time.

The Xu Race wanted to exhaust the World of Cultivation's people with the main team. Then once the reinforcements arrive, they would clean the World of Cultivation's army.

It must be said that the Xu Race's plan has been doing very well. Although the World of Cultivation's people were taking turns to rest, the Xu Race weren't giving them any opportunity to make a comeback. They strengthened their offense, increasing the pressure on the World of Cultivation. The World of Cultivation could only increase their active manpower. In this case, they wouldn't have any time to rest.

Zhao Hai observed the battle from the perspective of a bystander. With reinforcements coming, the Xu Race's tactics were soon understood. Zhao Hai couldn't help but sigh. In this aspect, the World of Cultivation was inferior to the Xu Race. The Xu Race were indeed bandits, they were clever and bold.

The Hell King's ship was very fast. And with nobody to disturb Zhao Hai's travel, the ship arrived near Green Copper Mountain the next day.

Upon entering the range of Green Copper Mountain, Zhao Hai and the others walked out of the cabin and looked at the distant mountain. Green Copper Mountain was now filled with black spots. At the same time, sounds of explosions could be heard. It was clear that the battle was intense.

Seeing this, Zhao Hai and the others knew that the battle was escalating. Li Zongdao looked at the mountain and said, "Did we come late?"

Zhao Hai smiled faintly and said, "Late? How could we possibly be late? Let me tell you, the Xu Race people who are currently fighting the World of Cultivation were only acting as bait to hold them down. The Xu Race currently has a reinforcing army numbering 500. When they arrive, the Xu Race would get an advantage in numbers, putting even more pressure on the World of Cultivation. But you don't have to worry, the Xu Race reinforcements wouldn't arrive soon. This will give us enough time to deal with the Xu Race who are here."

Listening to Zhao Hai, Li Zongdao's expression couldn't help but change, then he said, "Little Hai, are you telling the truth? Then how about the World of Cultivation, are they sending reinforcements?"

Zhao Hai shook his head and said, "They're not. It's possible that those people haven't discovered the Xu Race's plan. But we don't need reinforcements, just our group is enough."

Li Zongdao looked at Zhao Hai and nodded. He no longer said anything. At this time, the Hell King's ship was getting closer and closer to the battlefield. The sounds of explosions were also getting clearer and clearer. Then Zhao Hai said, "Everyone, prepare yourselves. Don't leave the ship, we're teaching the Xu Race a lesson."

Everyone nodded as they took out their magic artifacts. Zhao Hai also waved his hand as four instruments appeared. These musical instruments were the chime, wooden fish, drums, and a silver bowl with a stick. After that, a nine-storey pagoda appeared on top of the ship.

Twelve metal beasts also appeared around the Hell King's ship. But as soon as these metal beasts appeared, Zhao Hai couldn't help but be stunned. He released the twelve beasts not because of their offensive strength. But because they were reinforced by Liquid Silver and wouldn't be damaged. When necessary, he could use them to block attacks.

However, when the beasts appeared, Zhao Hai discovered that he had been mistaken. The aura of the twelve metal beasts had changed dramatically. They seem to be much more powerful than before. Most importantly, their bodies had faith power coursing through them. Zhao Hai didn't expect this to happen.

Chapter 1408: Charging The Formation!

The 12 Metal Beasts weren't very powerful. This was the reason why Zhao Hai haven't used them frequently, only during large-scale battles.

But the 12 Metal Beasts this time were different. They all contained faith power. Although Zhao Hi hadn't seen them move, the aura they emitted was enough to explain their transformation.

If the 12 Metal Beasts from before were inanimate objects, then right now, they seem alive. Moreover, from their aura, it seems like they're at Nascent Soul level.

And all of these were just from their appearance. It must be known that the 12 Metal Beasts were formed from Liquid Silver and couldn't be destroyed. This made their combat power much more potent.

Most importantly, Zhao Hai saw hope in the 12 Metal Beasts. A hope for the Myriad Stellar Transformations Yin-Yang Art.

The Myriad Stellar Transformations Yin-Yang Art was Zhao Hai's Cultivation Method. Although he also learned the 18 Buddhist Techniques. The 18 Techniques were just techniques. In other words the 18 Techniques were at most at the same level of importance as sword techniques, not something used for cultivation. In the end, Zhao Hai's Cultivation Method was still the Myriad Stellar Transformations Yin-Yang Art.

While learning the 18 Buddhist Techniques, Zhao Hai always felt regret in his heart. This was because the Myriad Stellar Transformations Yin-Yang Art didn't include Faith Power. If the cultivation method was able to use faith power, then Zhao Hai's strength would certainly increase.

So when he saw the appearance of the 12 Metal Beasts, Zhao Hai was able to see hope. Hope that the Myriad Stellar Transformations Yin-Yang Art would be able to incorporate faith power. After all, the cultivation method was obtained after acquiring the 12 Metal Beasts. It wouldn't be strange for the cultivation method to be upgraded since the 12 Metal Beasts had also been upgraded. Perhaps later on, when he has enough strength, the Myriad Stellar Transformations Yin-Yang Art would transform.

Thinking about this, Zhao Hai's spirit couldn't help but shake in excitement. He commanded the Hell King's ship to kill towards the Xu Race army. It was time for them to attack.

With such a huge battle, it would be impossible if both sides weren't aware of what was happening. It was just that the World of Cultivation's side were all old veterans. Therefore, there were a lot of them who didn't know Zhao Hai. But judging by the clothes they wore, they knew that Zhao Hai and the others were from the World of Cultivation. They couldn't help but cheer.

Although these people didn't know who Zhao Hai and the others were, the World of Cultivation was now at a disadvantage. They needed all the help they could get.

Zhao Hai didn't mind them as he had the Hell King's ship head straight into the Xu Race army. At the same time, he made a hand seal that made the four instruments sound. Buddhist sounds were then heard by everyone in the surroundings. This sound actually extinguished much of the killing aura. Everyone who heard it felt the murderous intent in their hearts vanish for a while.

At the same time, the 12 Metal Beasts charged towards the Xu Race. And with the Hell King's ship's ruthless battering, a path through the Xu Race army was soon carved out.

The people on the ship weren't idling as well. Everyone revealed their killing moves as they slaughtered the Xu Race. Although the Xu Race also prepared defenses of their own, they didn't expect the arrival and strength of Zhao Hai's group. Their defensive line was easily broken through. The Hell King's ship was like a hot knife through butter, directly cutting through the Xu Race army.

Zhao Hai controlled the Hell King's ship to wreak havoc in the Xu Race army. Although he couldn't cause a lot of damage to the Xu Race army, at the very least he would cause chaos among their ranks. When the time comes, the World of Cultivation could use this chance to counterattack. As long as the Xu Race army was in chaos, it would be impossible to organize them to fight. As the people from the World of Cultivation killed their way over, the Xu Race wouldn't be able to defend. After all, one couldn't fight an army with a disunited group.

Although the World of Cultivation's side wasn't a real army, they were still able to make their own formations, so there weren't any chaos in their ranks. Because of this, they were able to easily kill their way across the Xu Race army.

In ancient battlefields, there were many times where an army would lose when the enemy's general was able to cut through their formation. It wasn't necessary for the general to kill a lot of people, the only thing he needed to do was cause chaos to the enemy's formation. Once the opponent becomes disorganized, then that would be the moment they would lose.

Zhao Hai was now akin to a Great General charging his way through the Xu Race formation. Once he fully destroys the enemy's formation, then that would be the opponent's defeat.

And just like what Zhao Hai expected, the Xu Race's formation broke. The Xu Race could no longer make unified attacks. Kong Miao and Xu Wuzun were also able to see this.

Xu Wuzun knew that the Xu Race wasn't doing very well. On the other hand, although Kong Miao was a greenhorn, he still understood that he would be missing an opportunity if they don't attack right now. So he immediately commanded, "Everyone, attack with all you've got!"

Actually, there's no need for Kong Miao to shout. The people from the World of Cultivation already knew what's going on. They were experienced fighters who had seen a lot of things. So upon seeing what was happening, they immediately attacked. However, they still made sure to attack as a team. Magic artifacts began flying towards the Xu Race's army formation.

Zhao Hai ran back and forth within the Xu Race's army. Even if the Xu Race wanted to deal with him, they would still need to hold back in fear of friendly fire. Chaos ensued for a while as the Xu Race weren't able to stop Zhao Hai.

The confusion brought by Zhao Hai to the Xu Race army caused Xu Wuzun's complexion to pale. He knew that they had been defeated this time. If this was a small skirmish, then they can just disperse and regroup in place. But this time, there were more than a thousand of them. It wouldn't be so easy to break up and army like this and regroup. Moreover, the World of Cultivation wouldn't allow this to happen.

Xu Wuzun looked at Zhao Hai rampaging through the Xu Race army, his eyes burning with anger. He engraved Zhao Hai's appearance into his memories. He would certainly take revenge in the future.

Xu Wuzun was indeed an old bandit. He could accept losing and knew when to retreat. Seeing that he couldn't do anything, he immediately sent a few attacks before turning around and leaving.

Xu Wuzun released his Green Cloud Scarf and used it to retreat. Its speed was very fast. And with Xu Wuzun urging it to fly, his speed became even faster. A green smoke was left as Xu Wuzun vanished from sight.

Seeing this, Kong Miao knew that Xu Wuzun had run away. He wanted to pursue, but he stopped himself and instead turned his attention towards the Xu Race army.

The Xu Race army was gathered by the higher-ups. Otherwise, they wouldn't have fought head-to-head against the World of Cultivation. Before this, they were on the winning side, so they fought on. But now that they were being pushed back, they began to have thoughts of escaping.

The Xu Race also had their own laws. In this case, if they were the first to run, then they would be heavily punished. Therefore, the Xu Race kept on fighting.

But seeing Kong Miao kill his way over, the other Xu Race people noticed that Xu Wuzun already ran away. This caused the morale of the Xu Race to fall drastically. Now, the Xu Race no longer had any intention of continuing to fight. So almost immediately the army dispersed as the Xu Race ran in every direction. Even if the World of Cultivation wanted to stop them, it wouldn't be so easy.

The Xu Race had stealth cloaks, so as soon as they ran away, they would be very hard to detect.

Altogether, the Xu Race lost 120, 40 of which were killed by Zhao Hai. Naturally, Zhao Hai wasn't polite and took the 40 corpses and turned them into Undead. As for the other corpses, he didn't touch them, this was because those corpses were the spoils of other people.

Zhao Hai wasn't the only one that had use for Xu Race corpses. Other people from the World of Cultivation also needed them, especially those from the Devil Realm and the Demon Realm. People from the Devil Realm could refine these corpses and make Corpse Soldiers out of them. Although they weren't as formidable as Zhao Hai's undead, their strength still couldn't be looked down upon.

As for the Demons, they also have uses for Xu Race bodies, and that was for consumption! Right, the Demons can eat other experts in order to increase their strength. Plenty of Demons have slow cultivation speeds and could only use this method to supplement their weakness.

After repelling the Xu Race, Zhao Hai controlled the Hell King's ship to go towards the people from the World of Cultivation. Then he cupped his fist and said, "Zhao Hai has seen the Seniors."

Actually, not a lot of people knew Zhao Hai. They had been in the Ten-thousand Realm Battlefield for a long time, and they weren't very informed about the outside world. Additionally, Zhao Hai had just risen to prominence lately. Therefore, only a few of them were able to hear about Zhao Hai.

But since Zhao Hai offered his help this time, these Seniors couldn't help but cup their fists as well. But it was clear that they weren't very enthusiastic about it. At this time, Li Zongdao cupped his fist to everyone and said, "Profound Clear Sect's Li Zongdao has seen the Elders."

Compared to Zhao Hai, their attitude towards Li Zongdao was much better. They returned Li Zongdao's salute and some of them even chatted with him. Li Zongdao was extremely polite. All those present here hold great power back in the World of Cultivation. If he offended anyone, then the Profound Clear Sect's benefits would be affected.

Liu Sheng and the others also gave their greetings. All of a sudden, the scene rumbled with conversation. The battlefield quickly turned into a friendly meeting between people.

At this time, a sigh was heard. This sigh wasn't very loud but everyone was able to hear it. They turned their head and saw Kong Miao with the Ten-thousand Transformations Staff.

Chapter 1409: Chanting Sutras

Kong Miao's present mood wasn't very good. This time, he wanted to clean the Xu Race and establish his prestige. But he didn't expect that his limelight would be taken from him at the last minute. No wonder his mood was sour.

However, Kong Miao didn't show any of these emotions on his face. He slowly flew towards the bow of the ship. Then he gave his greeting towards Zhao Hai, "Amitabha Buddha, this little monk Kong Miao has seen the Benefactors. Thank you for the help."

Zhao Hai smiled and returned the greeting, "I don't dare. Seeing Grandmaster Kong Miao today is Zhao Hai's honor. Grandmaster, please get on the ship." Li Zongdao also gave Kong Miao a salute. After all, Kong Miao was a genius of their generation. In the World of Cultivation, the language spoken was strength. With Kong Miao's strength, Li Zongdao would naturally give him his respects.

Kong Miao didn't hold back and came aboard the Hell King's ship. Zhao Hai turned to the other people from the World of Cultivation and said, "Everyone, please come on board as well. Rest assured, the cabin is enough to hold all of us." The people from the World of Cultivation were stunned when they heard this, but they still nodded and got on the ship. Meanwhile, Li Zongdao led Kong Miao into the cabin. The inside of the cabin had also changed. It was now much bigger than before. Not to mention 1000 people, even if there were 10 thousand people it could still accommodate them.

Seeing the cabin, everyone couldn't help but stare. They weren't country bumpkins. If they were placed in the Profound Clear Sect, then they would be Great Elders. They had lofty positions in the World of Cultivation. They had seen all kinds of artifacts that had internal spaces. However, they hadn't seen an artifact with as large internal space such as this.

Zhao Hai approached Kong Miao and then said, "Grandmaster Kong Miao, please excuse this Zhao Hai for arriving late to the battlefield."

Seeing Zhao Hai still being respectful towards him, Kong Miao didn't say anything. Instead he nodded and said, "Benefactor is not late at all. Fortunately, you arrived. Otherwise, we would be in danger. I didn't expect the Xu Race to really fight us head-on. Moreover, they even sent Xu Wuzun. I've lost this time."

Zhao Hai quickly replied, "Grandmaster couldn't be blamed. The Xu Race is deliberately targeting us. It's normal for Grandmaster to not expect it. Grandmaster, please have a seat."

Upon sitting down, Kong Miao looked at Zhao Hai and said, "Mister Zhao Hai, how did you appear here? Did your sect send you to help us?"

Zhao Hai shook his head and said, "To be honest, we've always been in the newcomer's region. Last time, when we were collecting resources, the Xu Race ambushed us. After we managed to beat them back, we've been causing trouble to the Xu Race ever since. Then suddenly, we discovered that the Xu Race had disappeared. So we looked for them and learned about what's happening here, so we rushed over."

Kong Miao nodded and said, "So it's you who has been dealing with the Xu Race. However, with such an artifact in your hand, you would certainly have the confidence to deal with the Xu Race. Don't worry, I'll tell the higher-ups about your contribution so that they will give you a reward."

Zhao Hai quickly replied, "Thank you, Grandmaster. Right, Grandmaster, I was able to find something troublesome while I was heading here. The Xu Race have reinforcements currently heading here. It seems like they number around 400-500 people."

Upon hearing Zhao Hai, Kong Miao stared, then his expression changed. He wasn't an idiot, so he immediately understood the plan of the Xu Race upon hearing Zhao Hai. He looked at Zhao Hai and said, "Do you know which direction they're coming from?"

Zhao Hai nodded and said, "I do. What does Grandmaster plan to do?"

Kong Miao coldly snorted and said, "The Xu Race have been targeting the people of the World of Cultivation for some time. If we don't teach them a lesson, then they wouldn't learn. I ask Mister to take us to them using your ship. We need to teach the Xu Race a lesson."

Kong Miao's words were half true and half false. He indeed wanted to deal with the Xu Race. However, revenge was half of the reason for this. The other half was that he wanted to use this opportunity to make up for his image.

That's right, he wanted to repair his image. In the recent fight against the Xu Race army, Kong Miao wasn't able to establish his might. Moreover, he was placed in a situation where he couldn't raise his head in front of other people. His image has been damaged. Therefore, he wanted to clean his image as soon as possible.

Hearing Kong Miao, Zhao Hai smiled and said, "Alright. Grandmaster, don't worry. I'll immediately take care of it." Then Zhao Hai controlled the ship to turn around and head towards the direction of the Xu Race reinforcements.

Seeing Zhao Hai comply, Kong Miao nodded. Then he stood up and announced his decision.

The other people from the World of Cultivation naturally wouldn't oppose this idea. They also felt aggrieved about the battle. If Zhao Hai didn't appear, then they would be in a very difficult situation. Now that they have the opportunity to retaliate, naturally they wouldn't disagree.

After that, Zhao Hai said, "Everyone, your rooms have been arranged. Please come and see." Everyone looked at Zhao Hai in confusion. But since they were curious, all of them went out of the cabin. When they came out, they saw that the ship had changed greatly. The cabin transformed into a nine storey pagoda. But other than that, parapets had appeared on the edges of the ship, making it look like a castle wall.

Most importantly, the size of the deck increased. Even if 1000 people stood on it, it would only look a bit crowded. And if people stood on the pagoda, then it would be more spacious. The ship became well-suited for battle.

Seeing Zhao Hai's arrangement, they immediately knew that this was in preparation for their fight against the Xu Race. This was good, now they can deal with the Xu Race much easier.

Kong Miao nodded when he saw Zhao Hai's arrangement. He was looking at Zhao Hai as though he was his subordinate. And since his subordinate did well, naturally Kong Miao was happy.

Zhao Hai made arrangements for everyone. Those who wanted to go on the tower were given their own spots. And those who wanted to stay on the deck were also taken care of. Then everyone went to their own cabins, they still had more than a day to stay on the ship.

Naturally, Kong Miao and the other Severed Soul Experts were arranged to the topmost level of the pagoda. This would demonstrate their status.

Kong Miao was very satisfied with Zhao Hai's arrangement. Seeing that they were at the topmost level, the other Severed Soul Experts were also satisfied. The topmost layer was divided into private rooms, providing each expert with their own personal space.

This arrangement was greatly accepted by the Severed Soul Experts. Experts at their level wanted to be alone. They didn't want their cultivation to be seen by other people.

However, these people didn't actually rest. Instead, they gathered in Kong Miao's room. Although these people belong to different sects, they were all familiar with each other. And all of them were veteran experts. They knew that Kong Miao holding the Ten thousand Transformations Staff was a signal by the Buddhists. This meant that Kong Miao has been regarded as a potential successor. They sent Kong Miao out to gain experience.

And sending these experts here meant that they were to help Kong Miao. Therefore, these people knew what their role was. So after being arranged in their own rooms on the pagoda, they didn't rest and instead went to Kong Miao.

Kong Miao was initially confused about what was happening. However, he didn't say anything. Before he was sent out, he was given some pointers by the other Elders. They told him to discuss matters with these people. So after seeing that these people have gathered in his room, he immediately understood that these people might have something to tell him.

After everyone had sat down, Kong Miao gave the experts his greetings and said, "Seniors, why have you come here? Please speak openly." Kong Miao thought about the ugly battle they had just gone through earlier. His performance was far from remarkable. Therefore, Kong Miao was already mentally prepared.

But much to his disappointment, these people didn't bring that matter up. Instead, a monk looked at Kong Miao and said, "Kong Miao, you sit down as well. We're here to discuss Zhao Hai."

Hearing this, Kong Miao couldn't help but stare. Then he said, "Zhao Hai? What's wrong with Zhao Hai?" At the same time, Kong Miao sat down.

The monk replied, "Don't you find it strange? In the World of Cultivation, have you heard about someone having a ship artifact like this? A ship that can transform? Aren't you curious about Zhao Hai?"

Upon hearing the monk, Kong Miao was stunned. He was an intelligent person. And after studying Buddhism for many years, his mental strength was stronger than his peers. These days, he has been extremely arrogant and conceited. But after hearing the monk, he immediately calmed down.

He lowered his head and chanted the names of Buddha. Then his eyes shut as he read scriptures. Seeing Kong Miao's appearance, the other Severed Soul Experts weren't dissatisfied. On the contrary, they all gave Kong Miao a look of approval.

After reading scriptures for some time, Kong Miao opened his eyes. Then a flash of light appeared on his eyes as his aura calmed down. His temperament has undergone a subtle change.

Chapter 1410: About Zhao Hai

In Buddhism, chanting has a very particular function. Chanting can calm the mind and adjust one's thinking. It's important to Buddhists because Buddhism focuses on training the mind and heart.

Kong Miao had been self-inflated these days. After being asked by the moink, he immediately discovered that his mind was in turmoil. He couldn't even think about such a simple question. So he immediately chanted some sutras in order to adjust his mind. Now, he felt that his thoughts were much sharper than before.

After chanting, Kong Miao bowed his head and said, "I thank Grandmaster Xu Ning for the lesson. This Kong Miao will take care from now on."

Looking at Kong Miao, Xu Ning laughed and said, "I often hear people talk about you being the most talented genius of Buddhist path. But when I saw you today, I'm convinced. Good. Now, let's talk about what you think about Zhao Hai."

Kong Miao's eyes flashed, he nodded and said, "I still don't know who Zhao Hai is. But judging from his conduct, he should be someone extraordinary. He should have already known about the battle with the Xu Race, not hearing from others like what he said. However, I'm certain that he has enmity with the Xu Race and he's serious about dealing with them."

Xu Ning nodded and said, "You're right, this Zhao Hai is indeed extraordinary. He's the most talented expert of the Machine Field. Most importantly, it's just been more than five years since he ascended. When he arrived in the Machine Field, less than a year later he became the champion of the Six Realms Beginner Competition. It's the first time that the Cultivation Realm lost the first place position. After he entered the Six Realm Battlefield, he was able to establish his reputation by showing his strength. The Cultivation Realm was then forced to send Huang Daoran after him. However, even though he's just at Nascent Soul, Huang Daoran couldn't do anything to him. In the end, Huang Daoran took him in as a disciple and he agreed. After that, he secluded himself for four years. Then he was sent here after he went out. He's also the first person to report about the Xu Race."

Although his explanation wasn't too detailed, Xu Ning was still able to express to the others that Zhao Hai was extraordinary. Hearing what Xu Ning said, Kong Miao couldn't help but stare, then he said, "According to what Grandmaster said, it has been roughly six years since Zhao Hai ascended? He came to the Ten-thousand Realm Battlefield six years after ascending? He's truly a genius."

Xu Ning bitterly smiled and said, "Also, you might not know, but this isn't an ordinary ship. It should be similar to the Ten Thousand Transformations Staff. It's a transforming artifact. And compared to the Ten Thousand Transformations Staff, it's much stronger. In the past, Leng Wuyeng of the Machine Field left behind an unfinished artifact. It's possible that Zhao Hai managed to complete it. This ship might be one of the artifact's transformations."

Leng Wuyeng's unfinished artifact was quite known by the people from the Cultivation Realm. The Cultivation Realm admired powerful experts. Although Leng Wuyeng was an enemy, he was indeed an expert. Most importantly, Leng Wuyeng studied in the Cultivation Realm. He could be considered to be partly from the Cultivation Realm. Because of this, not a lot of people hated him. Conversely, they looked up to him and were paying attention to the weapon he intended to make.

However, Leng Wuyeng didn't want his weapon to fall into the hands of the Cultivators. Therefore, he made sure that no formation from the Cultivation Realm could be engraved on the artifact. Once a formation from the Cultivation Realm was engraved into the artifact, the artifact would self-destruct.

For this reason, nobody from the Cultivation Realm had any ideas towards the weapon. In the end, it was finished by Zhao Hai.

Nevertheless, the Cultivators were still aware of the potential of the artifact. It was both hard and soft and could imitate the properties of the Ten Thousand Transformations Staff. This caused even more Cultivators to pay attention to it.

Because of this, Xu Ning was fairly certain that Zhao Hai's artifact was the artifact Leng Wuyen tried to create. This startled everyone present.

Xu Ning looked at everyone and said, "If I haven't guessed wrong, this staff is Leng Wuyeng's weapon. However, I didn't expect Zhao Hai to become this powerful by using this artifact."

Upon hearing Xu Ning, Kong Miao and the others held their breath. To be honest, they also paid attention to Leng Wuyeng's weapon. It wasn't because they believed that it could compare to the Ten Thousand Transformations Staff. It was because they wanted to understand Leng Wuyeng through it.

But now it seems like they had been underestimating Leng Wuyeng. They thought that Leng Wuyeng's artifact wouldn't be very great. But how could they know that Liquid Silver's relationship with Leng Wuyeng wasn't actually that huge. Its current strength was because it had been fused with Zhao Hai's Blood Ghost Staff.

Kong Miao opened his mouth and said, "Zhao Hai really isn't simple. So what does Grandmaster intend to do now that you've brought Zhao Hai up?"

Xu Ning looked at Zhao Hai and said, "Back when Zhao Hai was fighting against the Xu Race, did you notice the Cultivation Method and weapon that he used?"

Upon hearing Xu Ning, Kong Miao couldn't help but stare. Then he frowned as he recalled. He didn't pay much attention during that time. However, he was able to remember Zhao Hai's weapons. Then his eyes shone brightly as he looked at Xu Ning and answered, "Buddhist Cultivation Methods?"

Xu Ning nodded, "Right. Buddhist Methods. His methods are very pure. I'm afraid people who have cultivated for decades aren't as good as him."

Upon hearing Xu Ning, everyone's facial color changed. They knew that although Xu Ning wasn't the strongest expert, his attainments in the Buddhist Path were the highest. He wouldn't be mistaken about this aspect.

Kong Miao looked at Xu Ning and said, "Grandmaster, you mean?"

Xu Ning looked at Kong Miao, then he laughed and said, "Others say that you might be a reincarnated monk, but I can affirm that you're not. But as for Zhao Hai, I cannot be sure if he's not."

Hearing this, Kong Miao and the others held their breath. Then they looked at each other, surprise evident in their eyes.

Suddenly, one of them said, "No, Zhao Hai cannot be a reincarnated monk." When he said that, everyone's attention was on him.

Seeing the person who spoke, people couldn't help but chuckle inside. This was because the person who spoke out was a Severed Soul Expert of the Profound Clear Sect. Normally, he was very low key, but was a tough individual. Most importantly, he was born in an orthodox sect like the Profound Clear Sect. His cultivation base was inherited from Sword Cultivators.

His nickname was Jianyi(Sword One). Nobody knew his name, only his nickname. He never used his real name either. According to him, his real name had long since been forgotten. He was destined to pursue the sword in his entire life, so he was now called Jianyi.

Although he was a Sword Cultivator, his feelings towards the Profound Clear Sect was very deep. Seeing Zhao Hai and Li Zongdao together, as well as their close relationship. He knew that Zhao Hai might have a deep connection with the Profound Clear Sect. It wasn't strange for Jianyi to burst out like that.

Jianyi looked at everyone and said, "I know that Zhao Hai has been quite auspicious. But he cannot be a reincarnated monk. He's not very familiar with how the Cultivation World works. It's clear that he's not born in the World of Cultivation. It's also impossible for him to be born from a higher realm. He could only be someone from the lower realms. As for why he uses Buddhist Techniques, it might be because he obtained an inheritance of a powerful monk."

Inheritance and reincarnation are two very different concepts. Reincarnation meant that Zhao Hai was the powerful monk while inheritance meant that he was like Kong Mia who has obtained the things the powerful monk left behind.

As soon as everyone heard this, they couldn't help but feel relieved. It's not unusual for someone to obtain an inheritance of an ancient powerhouse. If a Cultivator receives an inheritance of an ancient Sword Cultivator, then he would become a powerful Sword Cultivator himself. Zhao Hai obtaining an inheritance of an ancient monk wasn't anything strange.

Xu Ning nodded, then he said, "This explanation is also passable. But even if he managed to obtain the inheritance of an ancient monk, having the ability to enter the Ten-thousand Realm Battlefield a few years after ascending shows how strong Zhao Hai is. This is something we need to pay attention to. The World of Cultivation has been bleeding rookies lately. If we're able to nurture him, then that would be advantageous to us."

Everyone nodded. Although there was a struggle between the Buddhist and Sects, when it came to the World of Cultivation as a whole, they knew where their priorities lay.

Recently, the World of Cultivation had been losing a lot of rookies. They weren't able to notice it at the beginning. Losing people in the Ten-thousand Realm Battlefield was very normal. But later on they discovered that something was wrong. In the Ten-thousand Realm Battlefield, there's no such thing as a coincidence. If they don't pay attention to this matter, then it might spiral into something big.

What were rookies? They were newcomers representing the hope of the World of Cultivation. They were the foundation of the realm. What the Xu Race were doing was akin to uprooting the World of Cultivation's foundations. If the veterans begin to perish and the newcomers weren't able to take their place, then the World of Cultivation would find its manpower in the Ten-thousand Realm Battlefield to be insufficient. When the time comes, it wouldn't be strange for them to be kicked out!
