

## **Another World 1421**

### **Chapter 1421: Blocking The Way!**

The World of Cultivation's final target was the Octopus Islands. Even if they couldn't crash into the islands, at least they wanted to compel the Xu Race to have a decisive battle against them.

Since they were clear about this, Zhao Hai sent out silver needles in advance to explore the terrain ahead. His goal was to detect every single Xu Race ambush on the way.

Not only was Zhao Hai able to discover Xu Race people, he discovered a lot of them. Most were lying in ambush. Moreover, every single one of them were stealthed. These Xu Race people naturally didn't expect the World of Cultivation to have scanners that could detect them.

Although there were a lot of ambush spots on the way, Zhao Hai wasn't actually worried. Even if the World of Cultivation's troops were spread out, they were close enough to each other that other teams could provide reinforcements almost immediately. And even if they couldn't rush in to help, they could also warn other teams in advance so that they can confront the enemy together.

The Xu Race wanted to take advantage of this current situation to pick out teams of Cultivators. However, because of the scanners, each team were able to thwart the ambush. One by one, the Xu Race were being defeated and chased away. Naturally, if they were being chased, the Xu Race weren't able to use their stealth robes.

Originally, Zhao Hai thought that nothing was wrong. However, he discovered that in addition to the Xu Race, there were other people present. These people weren't from the Xu Race. They were all wearing black clothes and had masks that could hide from spiritual force. All of them were gathered together, numbering around a thousand.

Seeing this, Zhao Hai couldn't help but stare. These people were blocking the way of the World of Cultivation. It was obvious that they harbored evil intentions. Moreover, this couldn't be a simple ambush, they intended to have a battle!

Zhao Hai didn't underestimate the other party. Conversely, he became more alert to their presence. Their appearance meant that they were confident that they could stop the World of Cultivation's advance.

And although the other party only had a thousand people, all of them looked disciplined. Zhao Hai paid attention to them for a long time, but none of them made any noise. Also, all of them had thick killing aura. One would know at a glance that they weren't good-natured.

Using his mind, Zhao Hai called over to Laura, "Laura, try going through our materials in the Ten-thousand Battlefield. Find out who these people are."

Laura was also looking at the monitor, but she shook her head and said, "I can't check. Brother Hai, the information we have about the Ten-thousand Battlefield is too small. Moreover, these people deliberately concealed their identities. Although there are a lot of groups in the battlefield that wore black clothes and masks, it's impossible to identify them all."

Zhao Hai nodded, "Try to analyze their combat prowess." Laura nodded, then Lizzy and the others got busy. Zhao Hai's analysis of someone's battle prowess wasn't arbitrary. Through the Universal Scanner, he could get a fair guess about the enemy's strength through their qi, aura, temperament, and so on. Of course, this calculation might be inaccurate and could only be used as a reference.

Laura and the others got busy for some time, before they gave a report, "Brother Hai, I'm afraid these people are bad news. The analysis said that these people should be very strong. If we proceed with the plan, then we will certainly suffer losses."

Zhao Hai nodded, then he withdrew his spiritual force from the Space. His two eyes opened, showing a fierce gaze. Actually, there was no need for him to close his eyes in order to communicate with Laura and the others. He just did so out of habit. At the same time, this was so that Kong Miao wouldn't disturb him.

At this time, Zhao Hai knew that he couldn't delay. This was related to the World of Cultivation. Zhao Hai immediately went to Kong Miao and said, "Grandmaster Kong, there's a problem."

Kong Miao frowned as he listened to Zhao Hai. He looked at Zhao Hai and said, "People are blocking our way?"

Zhao Hai nodded and said, "Right, they're blocking our way. There are about a thousand people. They aren't from the Xu Race. All of them are wearing black clothes and masks. Their masks can shield from

spiritual force. Because of this, they cannot be identified. Moreover, they should be quite strong. The Undead that I sent in advance had been completely destroyed by them.”

Kong Miao frowned, “Strong? About a thousand? Did the Xu Race get reinforcements from another place? There are groups willing to help the Xu Race?”

Zhao Hai suddenly had a flash of intuition, he looked at Kong Miao and said, “Grandmaster, there are indeed people who are willing to help the Xu Race. Don’t forget, the Xu Race is now working for someone. It’s possible that it’s the High-grade Realm. That High-grade Realm might not want to see the Xu Race get wiped out. Otherwise, they would be affected if this matter fails.”

Kong Miao understood what Zhao Hai was saying. He could see the same thing in the Void Temple. Being a large power, the Void Temple had a lot of smaller forces working for them and depending on them to survive. If the Void Temple had something that wasn’t convenient for them to handle, then those small forces would be left to deal with it. If something unexpected happens to that small force, then the Void Temple would have to salvage the situation lest they risk damaging their reputation.

Kong Miao nodded and said, “That’s reasonable. If it’s the High-grade Realm, then things have become more troublesome.” Kong Miao was clearly aware of their present strength. They simply couldn’t go against powerful realms. Moreover, they wouldn’t even dare fight High-grade Realms.

Zhao Hai looked at Kong Miao and said, “No, Grandmaster. This is a great opportunity for us. With those people joining, the Xu Race would be more inclined to go against us. Since these people decided to hide their identities, we can just pretend that we don’t know where they came from. Once we defeat those people, then I’m sure that the Xu Race would tell us everything we want.”

Kong Miao knit his brows and said, “I’m afraid that approach isn’t correct. If we manage to win, then that High-grade Realm wouldn’t let us off.”

Zhao Hai shook his head and said, “Grandmaster, even if we don’t fight them, they still wouldn’t let us off. So we might as well fight them properly. Those people plotted against us. Grandmaster, from what I can see, let’s pause for now while you send word to the higher-ups.”

Kong Miao nodded. He also thought that Zhao Hai’s proposal was good. The opposite party had a thousand people. If the World of Cultivation proceeded with their current plan, then they would

definitely suffer a lot. This matter would greatly affect the World of Cultivation, so they needed to report to the higher-ups.

Kong Miao immediately took out a jade sword message and wrote a message using his spiritual force before releasing it. This jade sword message was headed towards the World of Cultivation's higher-ups.

Kong Miao immediately took out more jade sword messages in order to send word to the other teams. After releasing the messages, Kong Miao turned to Zhao Hai and said, "Let's wait here for the others."

Zhao Hao nodded and stopped the Hell King's ship. Kong Miao stood in place as people began arriving one after another. Kong Miao explained everything to everyone as Zhao Hai arranged spaces for them to rest in the ship.

In about two hours, all teams arrived on the ship. But Kong Miao didn't order the ship to depart. He was still waiting for the reply from the higher-ups.

Fortunately, jade sword messages travel very fast. Four hours after sending his message, Kong Miao received his reply. After reading the contents, Kong Miao turned to Zhao Hai and said, "Little Hai, go forward at full power."

Zhao Hai nodded. It seems like the higher-ups accepted his proposition to deal with these people. He immediately controlled the ship to go forward at full power.

Kong Miao also included Zhao Hai's plan in his message. It seems like the higher-ups saw Zhao Hai's plan as reasonable, so they agreed.

In fact, Kong Miao also thought that Zhao Hai's plan was very reasonable. In battles between High-grade realms, the most important thing for smaller realms was to know which side to pick. Even if they picked a wrong side, as long as the high-grade realm survives, the smaller realms would also have a chance for survival.

But if you don't pick a side, then it's possible for you to offend both sides. When the time comes, no matter who won, you still wouldn't have any good fruits to eat.

Naturally, the higher-ups could also think through this point. Therefore, they prepared to make a decision on where to stand at this time. The opposite party was blatantly trying to harm them. Moreover, the other party hid their status. If they knew who the other party was, then at the very least they know to whom they could surrender to. Beautiful the enemy was unknown, then they wouldn't know who to bow their heads to when the time came.

As Zhao Hai controlled the ship, he also paid attention to the masked group. It must be known that four hours had passed. With the ship's original speed, the two sides should have fought already. However, the World of Cultivation stopped and just resumed their travel. The other party should have some thoughts about this.

#### Chapter 1422: Anger

However, it seems like Zhao Hai underestimated the patience of these people. When Zhao Hai and the others stopped, these people didn't make any moves. They seemed like lifeless creatures as they just stood in place.

But Zhao Hai knew that these people were alive. It was just that they were patient because they had formidable mental strength. Not long after Zhao Hai and the others departed, the Xu Race reported to these unmoving individuals.

Seeing this, Zhao Hai understood that these black clothed people were the main force. As for the Xu Race, they were now acting as scouts. But this was also good. This meant that the target has shifted from the Xu Race to these people. Looking at their appearances, it was clear that they wanted to hide their identities. This made it convenient for Zhao Hai and the others.

After convening with everyone, Kong Miao appeared on the bow. He looked at Zhao Hai and said, "Little Hai, do you still have some Undead left there? How is the current situation?"

Kong Miao discovered that he was beginning to take Zhao Hai seriously more and more. This was because Zhao Hai brought continuous surprises to him. Like this time, for example. If Zhao Hai wasn't able to see the situation ahead, then the World of Cultivation would be wading through unfamiliar waters.

Zhao Hai nodded and said, "I still have several remaining. However, they can only monitor the surrounding area. As of now, there's no changes to the enemy. They haven't made any moves. However, the Xu Race kept reporting back to them. I'm afraid our speculations are true."

Kong Miao knit his brows and then nodded and said, "Keep monitoring the situation, if anything changes, tell me."

Zhao Hai smiled and said, "I reckon nothing will change. Those people are really arrogant. They wouldn't feel threatened by us. So why would they change their plan?"

Kong Miao replied, "If they're arrogant, then that means they are confident with their strength. Especially here in the Ten-thousand Realm Battlefield. I'm afraid we'll be facing a hard battle ahead."

Zhao Hai nodded and said, "I have a plan. If Grandmaster agrees, we can try it out."

Kong Miao looked at Zhao Hai and said, "What's your plan?"

Zhao Hai smiled faintly and said, "Among the Undead I have, there are beast-shaped Undead. Back when I was fighting Master, I equipped them with magic cannons. I haven't removed them yet. However, if we go with this plan, then I'll have to ask Grandmaster for high-grade crystals. The ones I use are too low-grade, so they cannons wouldn't be able to exert much power. I also have a large number of yin lightning mines. I can release my humanoid Undead to use the mines to deal with the Xu Race. Although they wouldn't be able to do much, at least they could introduce more chaos in the battlefield. With this the pressure on us would be much smaller.

Hearing Zhao Hai, Kong Miao nodded and said, "Alright, let's try that out. I'll give you the crystal stones. But how many Undead do you have?"

Zhao Hai smiled faintly and said, "A lot."

Kong Miao nodded and said, "Good. Then I'll send people to collect crystal stones. Wait here." After he said that, he turned around and left. Kong Miao's evaluation of Zhao Hai increased once more. Not only because Zhao Hai was powerful, but also because he was concerned about the well-being of other people.

Before long, Kong Miao came back holding a spatial bag. He handed the spatial bag over to Zhao Hai and said, "We can only scrape up this much. You decide how to use them." Zhao Hai nodded then received the spatial bag.

Kong Miao gave him a lot of crystals. Moreover, all of them were high-grade crystals. Actually, Zhao Hai had no need for these at all. This was because the Space was already producing high-grade crystals. But holding the mentality of not giving without taking, Zhao Hai asked for these crystals.

Zhao Hai wanted to release the Undead in consideration for the World of Cultivation. This battle was crucial to the realm's future. They cannot lose here. Therefore, Zhao Hai decided to release the Undead to help him out.

At the same time, he wanted to show his strength to Kong Miao and the others. Kong Miao and the others only heard about his Undead. Today Zhao Hai wanted them to see the power of his Undead.

Four hours was long for a cultivator. In a blink of an eye, Zhao Hai and the others were able to spot the people blocking their way. Those in the ship's cabin also began to walk out.

Zhao Hai stopped the Hell King's ship when they were a kilometer away. The two sides looked like status as they released killing auras towards each other. It was clear that they weren't intending to become friends.

After Zhao Hai stopped the ship, Kong Miao cupped his fist towards the other party and said, "Everyone, this one Kong Miao from the World of Cultivation. May I know why you're blocking our way?"

The masked group just stared at Kong Miao. All of them looked like dead people.

Kong Miao felt a bit uncomfortable because of this. But his face was calm as he said, "Everyone, do you want to stand up to the Xu Race?"

Despite this, the other side kept quiet. At this time, Zhao Hai walked over to Kong Miao and whispered, "Grandmaster, the Xu Race is starting to surround us. If we allow them to do this, we will be in trouble."

Hearing this, Kong Miao's expression changed. Then he coldly snorted and said, "We greeted them properly. But as it turns out, they just want to eat us. I'm afraid they don't have such a huge appetite." Then with a wave of his hand, everyone from the World of Cultivation took out their artifacts.

The other party didn't make any noise. However, all of them took out their artifacts. When he saw their artifacts, Zhao Hai couldn't help but be stunned. This was because all of them had the same weapon. All artifacts were three meters long and colored red. They were glaives!

Kong Miao was also stunned when he saw this. Then his expression changed. He wasn't ignorant, these glaives weren't ordinary and all of them had murderous auras. If placed in the World of Cultivation, such artifacts would be considered high-grade. It would be very difficult to acquire them. But now, all one thousand people had one of these artifacts. It's clear that their background wasn't ordinary.

The others were stunned as well. Then their expressions became ugly. They were all experienced individuals, naturally they understood what these weapons meant.

At this time, the leader of the masked group waved his hand. About thirty people stepped out and then suddenly, three colossal constructs appeared in front!

Saying that these three were colossal wasn't excessive. They weren't any smaller than the Hell King's ship. However, they were quite different. One could see at a glance that the Hell King's ship was a boat. As for the three, they looked like chariots!

And these weren't ordinary chariots either. These were three bronze chariots that were made out of high-grade wood. Each chariot was pulled by eight bronze horses. Their wheels were also equipped with sharp blades to mow down the enemy.

What made Zhao Hai feel strange was that the bronze horses were capable of movement. These bronze horses kicked their legs and even neighed, just like real horses.

The drivers of the chariots looked like warriors from ancient times. As the three chariots lined up, they looked like ancient war gods that had just walked out of their tombs.

At this time, the 30 masked individuals got on their respective chariots. Naturally, they would be the ones controlling the chariots. Seeing this, Zhao Hai immediately understood what the other party intended to do. They want to deal with the Hell King's ship and the Pagoda using these three chariots.

When he saw this, Kong Miao's expression turned uglier. It must be known that these bronze chariots were quite famous in the Ten-thousand Realm Battlefield. But this didn't mean that only one realm used these chariots. In fact, these chariots were pleasantly named Eight Cyan Imperial Charots. They were common large combat artifacts.

Although these chariots weren't rare, only a few people could effectively use them for fighting. This was because this artifact was very hard to operate. It wasn't an ordinary magic artifact but instead it operated like a machine. To Cultivators, the term machine was oftentimes replaced by 'puppet'. However, puppet artifacts were controlled using spells.

Puppet artifacts and machine-type artifacts were made roughly the same way. Components and formations in order to assemble these artifacts. And then they helped people fight. As for the Eight Cyan Imperial Chariots, they were machine-type artifacts.

Since these chariots were machine-type artifacts, operating them needed many people. In order to guarantee optimum fighting strength, each chariot needed at least ten people to control them.

Because these Eight Cyan Imperial Chariots were used heavily in the early years of the Ten-thousand Realm Battlefield, only a few of them remained to this day. Moreover, they were rarely used. It was said that only the most powerful realms possess them.

For the opposite party to take out three of these chariots fully explained their strengths. And it also informed Zhao Hai and the others that their background was indeed formidable.

When he thought of this, Kong Miao turned to Zhao Hai and said, "Little Hai, what do you think? These people want to deal with your artifact with the chariots. Can you block them?"

Zhao Hai's face was pale. However, this wasn't out of fear but anger. He didn't think the other party would be this ruthless against the World of Cultivation. Otherwise, they wouldn't have prepared this much.

Kong Miao looked at Zhao Hai and thought that Zhao Hai wasn't assured. So he immediately said, "If you're not sure, then forget it. Let's just think of a solution."

Hearing this, Zhao Hai coldly snorted and said, "If they want to play, then I'll accompany them. Grandmaster, don't worry. Those three chariots, leave them to me." After he said that, Zhao Hai took out four instruments as well as 12 metal beasts.

When the instruments and beasts appeared, they weren't very big. But it didn't take long before they enlarged and became as big as the Hell King's ship.

Zhao Hai waved his hand once more, causing the sky to be blotted by Undead. These Undead formed cube formations, each formation having a hundred thousand Undead inside. In a flash, Zhao Hai revealed ten million Undead.

Kong Miao and the others were stunned. They didn't expect Zhao Hai to have this move. The twelve metal beasts were no smaller than the Eight Cyan Imperial Chariots. There's also the four instruments floating around the Hell King's ship. The scene looked somewhat terrifying.

What's even more surprising was the ten million Undead. These Undead were wearing armor as they stood in place. Their tight formation and cold aura caused the surrounding temperature to drop by a few degrees.

Zhao Hai was truly angered this time. The World of Cultivation was his root. He can't let it perish. The other party was intent on wiping them out. Naturally, he had to return the gesture. So he released a lot of Undead as well as the metal beasts and the four instruments.

Seeing this, Kong Miao's eyes lit up. He looked at Zhao Hai and said, "Little Hai, you take care about the Eight Cyan Imperial Chariots. Leave the others to us." After he said that, Kong Miao flew out of the Hell King's ship. In his mind, if Zhao Hai intends to command this many artifacts, then he certainly wouldn't be able to attack with them.

And this was indeed the case with Zhao Hai. The other released three artifacts, which would be enough to occupy him for a while. Therefore, he wouldn't be able to participate in the attack.

The others saw this and understood what Kong Miao wanted to express. So all of them flew out of the Hell King's ship and attacked the other party. At the same time, Zhao Hai wasn't polite as his four instruments began playing music. The sound waves assaulted the Eight Cyan Imperial Chariots. The 12 Metal Beasts also moved and threw themselves towards the chariots. The Hell King's ship charged as well carrying Zhao Hai along with it.

As for the Undead, there was no need for Zhao Hai to control them. Lizzy and the others took control over the Undead to help Kong Miao and the others to attack the masked people.

Just like Kong Miao, the masked individuals were also shocked. They already researched Zhao Hai before this so they had a fair evaluation of his strength. However, they didn't expect Zhao Hai to conceal his strength. This unexpected change caused them to be startled.

However, now that Kong Miao and the others had attacked, they had no choice but to receive the assault. It was at this time that Kong Miao and the others discovered the difference between the two sides. Although the masked individuals only had one weapon, their offensive strength actually suppressed the World of Cultivation!

#### Chapter 1423: Impact!

When the masked individuals were about to attack the people from the World of Cultivation, walnut-sized balls suddenly came flying towards them. The masked individuals were stunned, this was because they could recognize that these were yin lighting bombs.

The reason they were shocked wasn't because of the yin lighting bombs' power. Actually, they were shocked because there were still people who would use Yin lightning mines in the Ten-thousand Realm Battlefield.

To ordinary Cultivators, yin lightning mines were ultimate weapons. After all, yin lightning mines were indeed lethal.

However, in the Ten-thousand Realm Battlefield? This was a place where experts from more than 30 thousand Realms fought each other. There were experts here who could rip an expert apart with their bare hands. Yin lightning mines had low range and might not even injure their targets. It can be said that yin lightning mines were useless in this place.

Just as the masked individuals were stunned, the yin lightning mines exploded. All the mines exploded at the exact same time.

These masked individuals forgot about one thing. When a certain quantity was reached, yin lightning mines would become extremely destructive.

They might not be injured by one yin lightning mine. But 100, 1000, 10,000, or even 100,000? When this number of mines explode at the same time, their power would certainly reach another level.

Naturally, common yin lightning mines wouldn't be able to reach this point. Common yin lightning mines needed to reach their target or else they wouldn't explode. However, Zhao Hai's yin lightning mines could be activated at any time. Without its user's trigger, then the mines wouldn't explode.

With the Undead listening to Lizzy and the others, the yin lightning mines exploded at the same time. The might of this explosion caused 50 masked individuals to lose their lives on the spot. More than 30 were critically injured. Almost a hundred people were rendered unable to fight just like that.

The other masked individuals were shocked. They didn't expect to receive this much damage from yin lightning mines. The commander immediately commanded everyone to disperse and deal with the Undead.

These masked individuals suddenly discovered that although the individual strength of the Undead wasn't much, they were extremely unified in their actions. They also discovered that all the Undead were using magic artifacts. What's more terrifying was the fact that these artifacts were quite similar to the blood red glaives, albeit not as powerful.

Besides artifacts, the Undead also have magic cannons. These masked individuals might not care about one or two cannons. However, the Undead have about ten thousand magic cannons. Such an attack could take out a Transcending Tribulation Expert.

It didn't take long for the masked individuals to find out how difficult the Undead were to deal with. It was now impossible for them to focus their attention on the World of Cultivation. Now, the masked individuals were divided into two. About 300 of them were dealing with the Undead. Before they can deal with the Undead, they wouldn't be able to help with the battle against Kong Miao and the others.

Although the remaining 600 or so individuals that were fighting against Kong Miao and the others were strong, it would still be impossible for them to cause huge losses for the World of Cultivation.

However, these masked individuals weren't discouraged. Conversely, each one of them were burning with anger. They were thinking about how to dismantle the corpses when they're finished.

These masked individuals were confident because they have reinforcements coming over. The Xu Race were just behind. As long as the Xu Race arrives, the Undead would be dealt with. When the time comes, the Undead would be sandwiched between two forces.

From what these masked individuals could see, the Undead's fighting abilities weren't that great. What the Undead depended on was their numbers. Once they become surrounded, the Undead would certainly have a hard time. Once this happens they would no longer be frightening. Therefore, the only thing that these masked individuals could do right now was to maintain their current situation and wait for the Xu Race.

However, it was clear that they had underestimated Zhao Hai's strength. If in the past Zhao Hai needed to allocate his spiritual force in order to control the twelve metal beasts, after gaining faith power, he no longer needed to. Additionally, since then, the 12 metal beasts have become even more powerful.

The 12 metal beasts, along with the Hell King's ship and the four instruments, were certainly enough to deal with the three Eight Cyan Imperial Chariots. If it weren't for the Eight Cyan Imperial Chariots, then the 30 Transcending Tribulation Experts would have already been ripped to pieces by now.

Also, the masked group underestimated the number of Undead in Zhao Hai's hands. Ten million? This wasn't even a fraction of the Undead in the Space. Because of Zhao Hai's relationship with the huge netherworld heart, the Undead in the Underworld all entered the Space. Even Zhao Hai himself couldn't tell how many Undead he has. In any case, Zhao Hai knew that his Undead numbered more than the population of the entire Cultivation Realm.

This was a terrifying number. However, these masked individuals were unaware of this. The remaining Undead haven't moved yet. Zhao Hai could block the Xu Race with just a wave of a hand.

Since it's impossible for these masked individuals to know about this, they were all waiting for the Xu Race reinforcements. Only then could they deal with the Undead.

These masked individuals thought that once they reach their current level, then numbers would no longer affect them. But after this incident, they found that they were wrong. Sometimes, when it reached a certain point, numbers are terrifying.

On the other hand, Zhao Hai didn't have many thoughts running through his mind. The only thing in his mind was how powerful the Eight Cyan Imperial Chariots were, especially when controlled by Transcending Tribulation Experts. The three chariots were like three tanks that could move unhindered in the battlefield. Zhao Hai wasn't able to do anything to them for a while.

However, by this point, Zhao Hai already grasped the attack patterns of the chariots. It must be said that large artifacts were more monotonous in the movements compared to other artifacts. Because of their size, large artifacts didn't have the same freedom of movement as smaller artifacts. To contrast this, each attack made by large artifacts were incomparably powerful. They were basically like the all-in attacks of a heavy sword.

But going against a large artifact using the dexterity of a small artifact would be courting death. A tank cannot drift like a sports car. But if a sports car crashes into a tank, then the car would certainly be crushed.

The Eight Cyan Imperial Chariots had the same attacking style. Their impact force was very strong. Even the twelve metal beasts couldn't clash with them head-on.

However, their attacking patterns were only at this level. Now that Zhao Hai knew about this, he would have a plan to deal with them. Normally, the chariots would line up in a row and then charge forward. Once they charged, their power was thunderous. It was impossible to block them.

What surprised Zhao Hai was that these three chariots seem to have a connected energy system. ONce the the three chariots attack, if Zhao Hai targets the left chariot, the energy of the other two would gather to the left chariots. Because of this, Zhao Hai had difficulty dealing with the chariots.

After Zhao Hai listed out the attacking patterns of the Eight Cyan Imperial Chariots, he began to formulate a plan. Meanwhile, the chariots began to line up once more. Their horses held up their heads and began to scratch the ground. They were prepared to charge at any moment.

Zhao Hai snorted, then the four instruments attacked the left chariot. At the same time, the 12 metal beasts moved along with the Hell King's ship. Everything was focused on the left chariot.

Bang, bang, bang, bang, the sounds of collision were heard. The three chariots' energy was already centralized on the left chariot. Because of this, Zhao Hai's attack didn't cause any damage.

However, Zhao Hai didn't give up. He gathered all his strength and continued to attack the left chariot.

The opposite party understood Zhao Hai's intention. Zhao Hai wanted to crush the left chariot through repeated attacks. After dealing with the left chariot, Zhao Hai would defeat the other two.

Despite this, the masked individuals didn't worry. They knew that the Eight Cyan Imperial Chariots weren't easy to break. If the chariots were that useless, then they would have been eliminated from existence a long time ago.

The masked individuals continued to line up and charged once more. Zhao Hai continued his actions. But this time, it seems like Zhao Hai was enraged as he attacked the chariots the same way as before.

Both sides seem to have an agreement that they would compete this way. Seeing that he couldn't do anything, it seemed like Zhao Hai was at a loss. However, don't forget that Zhao Hai's Hell King's ship, instruments, and 12 metal beasts all had faith power. This increased their offensive power, allowing Zhao Hai to clash with the enemy dozens of times.

Chapter 1424: Stellar Transformations Art, Homing Star Sword!

Both sides lined up, Zhao Hai was still targeting the leftmost chariot. Then the two charged in once more.

The two parties were already accustomed to this clash. To them both, it felt like a meaningless struggle, because they couldn't do anything to each other.

To be honest, these masked people were feeling depressed. They expected their chariots to easily be able to deal with Zhao Hai. They didn't think that Zhao Hai would match them instead.

They didn't know how Zhao Hai was able to fight against them for so long. However, they didn't think of it too much. All they wanted to do was to tie Zhao Hai down. If Zhao Hai turned around and attacked other people, then that would be a disaster.

The distance between the two decreased. When they were about 100 meters away from each other, the people in the Eight Cyan Imperial Chariots suddenly discovered that Zhao Hai and his artifacts had vanished from sight.

As the masked individuals were stunned, Zhao Hai appeared on their right side. In a blink of an eye, Zhao Hai traversed 100 meters without anyone noticing.

The masked individuals panicked once they saw Zhao Hai appearing on their right side. The Eight Cyan Imperial Chariots have connected energy. Since Zhao Hai has been attacking the left side for more than a dozen times, they were already used to transfer the energy to the left chariot. So at this moment, the right chariot was almost undefended. If their right side was attacked right now, it would spell trouble for them.

With a bang, both sides hit each other. It was at this point that the masked people discovered that they were truly in trouble. This was because Zhao Hai's collision point wasn't the rightmost chariot. Instead, he attacked the area in between the center chariot and the right chariot!

The masked individuals have three directions to attack Zhao Hai from. They could gather their energy on the leftmost, center, and rightmost chariot. However, in their previous clashes, Zhao Hai only attacked the leftmost chariot. This caused the masked individuals to think that Zhao Hai would always attack the left chariot all the time.

Because of this, they didn't expect Zhao Hai to suddenly change his attack. Moreover, it attacked in between two points. It was like a person holding two knives piercing through two people. Both sides would inevitably be damaged.

Zhao Hai wasn't repelled by the collision. Instead, the right and the center chariot were impacted by Zhao Hai's attacks.

The masked people let out a miserably grunt. They had been seriously injured. Without the support of the center and right chariot, the left chariot's strength was soon reduced.

And how could Zhao Hai let this opportunity go. As the other party was flustered, he commanded his artifacts to charge towards the leftmost Eight Cyan Imperial Chariot.

The masked individuals didn't expect Zhao Hai to make another attack this soon. Naturally, they were unprepared. In addition to the shock they just experienced, the left Eight Cyan Imperial Chariot was severely damaged by Zhao Hai's attack. The people on the chariot were also injured.

The three Eight Cyan Imperial Chariots suffered varying degrees of damage. All of their capabilities have been severely affected. At this time, Zhao Hai attacked once more as he shot numerous flying swords towards the three chariots.

The masked people inside the chariots knew that if they stayed inside the dysfunctional chariots, then they would be waiting for their death in a steel coffin.

With this thought in mind, the masked individuals immediately moved and flew out of the chariots. The moment they came out, they were greeted by flying swords. Although they suffered injuries, they weren't weak at all. They took out their blood red glaives and defended themselves.

Zhao Hai looked at them, then his eyes turned cold as he said, "Stellar Transformations Art, Homing Star Sword. Fly!"

Following Zhao Hai's words, the 12 metal beasts roared to the skies as their body slowly disappeared. Then on the bodies of the silver swords, stellar patterns were found. The surroundings became like a universe as images of countless planets and meteorites appeared.

Seeing this, the 30 masked individuals' complexions underwent a huge change. Then they gathered together and formed a large glaive. From their appearance, it seems like they were using a weapon formation.

However, they were too late. Zhao Hai's Homing Star Sword has already reached its peak strength. Additionally, the 12 metal beasts integrated themselves into the flying swords. It was now impossible for these 30 individuals to survive.

Seeing the other party's action, Zhao Hai coldly snorted before waving his hand. He took the damaged Eight Cyan Imperial Chariots and sent them to the Space. Not even a small fragment remained.

By taking the Eight Cyan Imperial Chariots to the Space, Zhao Hai was able to obtain the materials that they were made of as well as fix them for later use. At the same time, Zhao Hai wanted to see if the chariots could integrate with Liquid Silver.

After the three chariots were sent to the Space, Zhao Hai no longer cared about them. From now on, Cai'er would be the one to take care of them. What he needed to do right now was to deal with the 30 masked individuals in the sword formation.

It didn't take long before the 30 masked individuals noticed that they couldn't escape the formation. They could no longer see the silver swords from before. They were now surrounded by planets and meteors, no swords. This was the first time they encountered a sword formation like this.

Suddenly, a beast's roar was heard. Then 12 wild beasts appeared around them, who proceeded to pounce.

The 30 people stared. Then they immediately lined up to attack the wild beasts. However, it seems like these beasts were very hard to kill. No matter how they were hit, the wounds would heal immediately.

The masked people also didn't underestimate the strength of these beasts. Although the beasts looked ordinary, their offensive strength wasn't normal. One hit would heavily wound a person, two would directly kill them.

The masked people began to understand that they were really trapped and couldn't go out. They felt frustrated. Now they can only defend as long as possible and hope that people outside would save them.

However, Zhao Hai wouldn't allow them such an opportunity. He strengthened his offensive and pressured the trapped masked people. Then at this time, the Xu Race arrived.

The Xu Race have been monitoring Zhao Hai and the others from far away. Although they made this plan a long time ago, the Xu Race were very far from the battlefield. This was because they were afraid of being discovered by the World of Cultivation. Moreover, the masked people didn't want the Xu Race too close to them. Because of this, it took a while for the Xu Race to arrive at the battlefield.

The Xu Race expected the masked people to easily break the World of Cultivation. As soon as that was done, everything would be easy. However, they quickly discovered their mistake. Because when they arrived, they were immediately surrounded by a countless amount of Undead. Just by looks alone, they seemed to number several tens of millions.

Although the Xu Race were formidable, they numbered a bit more than 1000 people. They were surrounded by several tens of millions of Undead. Even if the Undead weren't strong, their yin lightning mines and the magic cannons could cause heavy damage. Additionally, the Undead were able to pinpoint their location accurately. This immediately caused the Xu Race to be in a passive position.

By this time, the 30 masked people that Zhao Hai trapped could barely hold on. They were already injured when they escaped the chariots. They had been suppressing their injuries and waited until people rescued them. However, they quickly discovered that rescue was impossible. Zhao Hai had been attacking them fiercely. Although they defended, they could no longer hide their injuries. Moreover, their wounds were beginning to become more and more serious.

The trapped masked individuals were beginning to be killed and turned into Undead by Zhao Hai. However, Zhao Hai didn't release them back to deal with the others. Doing that would be too conspicuous. Moreover, once the Homing Star Sword was summoned, it would become a domain of its own. If the Undead joined in, then it would only drop the power of the formation.

The Homing Star Sword Formation can absorb star power and transform it into offensive strength. The longer one stays inside the formation, the more they would suffer. This was because as the sword formation absorbs star power, the more power it would get.

Although the Ten-thousand Realm Battlefield was its own independent realm, it was still part of the Greater Universe. So no matter where, the Stellar Transformations Technique could absorb star power.

Before long, only ten people remained of the 30. Moreover, these 10 people were all severely wounded. They wouldn't be able to hold out for long.

However, the other masked individuals didn't have the time to think about them. The majority of them had been tied up by Kong Miao and the others, they simply cannot divert their attention elsewhere. The strength of Kong Miao and the others surpassed their expectations. In fact, they were being tied down by Kong Miao and the others.

In the beginning, Kong Miao and the others weren't too accustomed to the offensive methods of the other party. Their offense was fierce and violent, like a storm. This kind of fighting style made Kong Miao and the others feel awkward. Fortunately, the undead were able to separate a fraction of the masked group. This lessened the pressure on Kong Miao and the others and allowed them to get accustomed to the attacking patterns of the enemy.

#### Chapter 1425: Can Anyone Explain?

Zhao Hai calmly looked at the scene as the last of the 30 masked individuals was killed by the sword formation. These masked individuals felt very strange to Zhao Hai. They seem to have no other artifacts beside that blood red glaive. This confused Zhao Hai.

In the Ten-thousand Realm Battlefield, beside Sword Cultivators, Zhao Hai hasn't heard of other people that only used one artifact. Nobody wanted to limit themselves to one magic artifact. Zhao Hai theorized that this must be because the masked people were guarding the Xu Race.

Actually, when these masked people used their artifact, their movements looked awkward to Zhao Hai. It seems like these people weren't familiar with their weapon. Although the glaive displayed astonishing strength, Zhao Hai could see that the other party weren't used to using glaives.

If a cultivator uses a weapon, then they certainly wouldn't use something they're unfamiliar with. These people only used glaives and nothing else. They might have done this to cover their identities.

In addition to wearing masks, the glaives were deliberately made identical. They also didn't use any other artifact. This might mean that the masked individuals had unique artifacts that could identify them once used. Otherwise, they wouldn't have been this meticulous in hiding themselves.

After he thought of this, Zhao Hai interrogated one of the masked individuals that had been turned into Undead. Finally, he got his answer. The masked people who came after them this time turned out to be from one of the most famous High-grade realms in the battlefield. The Hundred Treasures Realm!

The Hundred Treasures Realm was one of the topmost existences in the Ten-thousand Realm Battlefield. The reason they were called this name wasn't because of how many treasures they have. It's because of the artifacts they use.

The Hundred Treasures Realm was different compared to other High-grade realms who generally pursued larger artifacts. These realms make large artifacts that would overpower smaller artifacts.

The Hundred Treasures Realm was the opposite. They pursued to achieve the smallest artifact possible. Their formations also focus on transforming an artifact smaller.

It was hard to tell how many artifacts people from the Hundred Treasures Realm could control. However, it was said that Transcending Tribulation Experts could control hundreds of artifacts.

Their artifacts weren't large ones. Some were willow leaf throwing knives, caltrops, darts, flying needles, and the like. It was these kinds of artifacts that they loved using.

People from the Hundred Treasures Realm were among the hardest to deal with in the Ten-thousand Realm Battlefield. This was because they just have too many artifacts. Moreover, a lot of practitioners weren't familiar dealing with very small artifacts. Additionally, the Hundred Treasures Realm have special formations that could supplement these smaller weapons. Take a flying needle, for example. They have a formation that gives armor sunder to these needles.

This armor sunder could break an opponent's defenses. Regardless of what artifact or technique the enemy used, this armor sunder formation could break them apart. This was one of the reasons why the Hundred Treasures Realm was the most difficult realm to go against in the Ten-thousand Realm Battlefield.

If most practitioners were warriors, then people from the Hundred Treasures Realm would be assassins. Their magic artifacts attacked silently.

Because of these characteristics, these masked individuals didn't use any of their artifacts. The Hundred Treasure Realm's unique artifacts and techniques made them extremely recognizable in the battlefield.

Therefore, in this operation, the Hundred Treasures Realm opted to use blood red glaives. Besides the blood red glaives, they weren't permitted to bring any other artifact. It was also because of this restriction that they had been pressured to death by Zhao Hai. They didn't have anything else to use other than the glaives.

The reason why the Hundred Treasures Realm chose the glaive was because it was a large heavy weapon that was completely different to hidden weapons. So even if the identity of the masked individuals was known, nobody would believe it.

Glaives were mostly used by orthodox practitioners. And the blood red color caused a heavy killing aura to emerge. This wasn't something a good person would use. This was a weapon meant for demonic cultivators.

Although the Hundred Treasures Realm weren't orthodox practitioners, they were at least labeled to be on the righteous path. Therefore, using the blood red glaives would completely divert any suspicions towards them.

The people from the Hundred Treasures realm thought that they were safe from being found out. However, how could they anticipate that Zhao Hai was able to create Undead that preserved their original memories.

It can be said that the Hundred Treasures Realm was truly unlucky. After learning the identity of the masked people, Zhao Hai naturally wouldn't be polite. He immediately controlled the 12 Beasts and the 4 instruments to attack the masked group that were attacking the Undead army.

With Zhao Hai joining the fray, the people from the Hundred Treasures Realm were even more pressured. Zhao Hai was strong and had large artifacts. After a few attacks, the people from the Hundred Treasure Realm were plunged into chaos. The Undead were also beginning to kill them.

In their current situation, this group could only retreat and join the main group. They plan to work together and find out how they could deal with this situation.

Zhao Hai didn't block them. He wanted all of the masked individuals to be in one group. This way, the Undead could cooperate with Kong Miao and the others to deal with the enemy in one go.

As for the Xu Race, Zhao Hai wasn't worried about them. Faced with millions of Undead, the Xu Race would have to fight well. The Xu Race would have to suffer a loss this time. Although Margaret and Megan were quiet most of the time, they were actually terrifying commanders in battle.

Kong Miao's group and their opponents were too focused on the fight that neither of them noticed the fate of the three Eight Cyan Imperial Chariots. Nor did they know about what happened to the group confronting the Undead. Both sides fought to the point of forgetting anything else.

But at this time, the other group of masked individuals joined up with the main group. This caused both sides to recover their senses. Then they began to feel that something was strange. The first reaction that Kong Miao and the others thought of was to defend at full power. As for the other party, they just allowed this group to join them. They didn't go on the offensive.

Then both sides discovered that Zhao Hai was using his artifacts to kill the enemy. The three Eight Cyan Imperial Chariots have already vanished. At the same time, the Undead were rushing over. It even looks like the Undead didn't suffer any losses.

Seeing this, both sides couldn't help but stare. It seemed like they didn't believe what they saw. Both sides weren't stupid, so they immediately understood what happened. Zhao Hai was actually able to deal with the Eight Cyan Imperial Chariots. This was something nobody expected to happen.

Although Zhao Hai released his own large artifacts, nobody really thought that he would be able to defeat the chariots. In their minds, even if Zhao Hai had these powerful artifacts, he was still up against three Eight Cyan Imperial Chariots controlled by 30 Transcending Tribulation Experts.

They were Transcending Tribulation experts, not beggars on the street. They weren't 30 pigs that could be killed that easily. Although nobody knew how the Eight Cyan Imperial Chariots were defeated, Kong Miao and the others rejoiced. This meant that Zhao Hai dealt with 30 Transcending Tribulation Experts!

What just happened? Can someone explain? How was Zhao Hai able to do this? Where did the three chariots go? Where are the people in the chariots?

All of this went through the minds of the people from the Hundred Treasures Realm. However, they weren't able to think about this for long because Zhao Hai already began his slaughter.

Zhao Hai didn't have any reservations, he controlled his four instruments and twelve metal beasts to slaughter the masked group. The other party also responded and branched out in order to resist Zhao Hai's attack.

At this time, Kong Miao and the others recovered. They roared with excitement as they went all out against the masked group.

The people from the Hundred Treasures Realms were able to resist the attacks somewhat. Their weapons were very useful in group warfare. Although Zhao Hai's attacks were powerful, they were still able to block it. However, they allocated most of their power doing this.

The Undead also didn't let go of this opportunity. They continued to attack the people from the Hundred Treasures Realm. This divided the attention of the other party once more. And there's still Kong Miao's group to deal with.

Kong Miao and the others had already adapted to the attacks of the people from the Hundred Treasures Realm. By this time, it became very easy to deal with them. The World of Cultivation began to occupy the winning position. The people from the Hundred Spirit Realm didn't have the strength to fight back.

The people from the Hundred Treasures Realm began to feel anxious. Before this, they were very confident. This was because they believed that the Eight Cyan Imperial Chariots would be able to deal with Zhao Hai. Then they would use the chariots to clean up the Undead. And with their own strengths, they were sure that they would be able to wipe out Kong Miao's group.

However, the situation has been overturned. The three Eight Cyan Imperial Chariots were unable to achieve their goal. Instead, Zhao Hai was the one who was able to use his large artifacts to fight the main group. Large artifacts were ultimate weapons. In order to deal with them, a group would need to

cooperate with each other. Previously, the Xu Race suffered heavy losses because the enemy had large artifacts. The people from the Hundred Treasures Realm wanted to use the same tactic.

It was also at this time that the people from the Hundred Treasures Realm understood how Zhao Hai could deal with the three Eight Cyan Imperial Chariots. After all, they were now at the receiving end of Zhao Hai's attacks.

In each of Zhao Hai's artifacts was a yin-yang pond. These yin-yang ponds provide energy to the artifacts. And after the Space's multiple upgrades, the effect of the yin-yang ponds also got stronger and stronger. This alleviated much of the spiritual qi requirements of the large artifacts.

Originally, only the Hell King's ship had a yin-yang pond installed. However, when Zhao Hai used the pagoda last time, he discovered that the consumption of spiritual qi was too much. Moreover, the pagoda's offensive strength couldn't compare to the Hell King's ship. At first, Zhao Hai wasn't able to figure out why this was the case. Then in the end, he discovered that the issue seems to be the yin-yang pond.

To be honest, as Zhao Hai's strength increased, he began to think that the yin-yang pond wouldn't be any use to him. But when he used the Pagoda last time, he understood that the yin-yang pond could benefit him.

Once he knew this, Zhao Hai immediately made adjustments. He began to look into the yin-yang pond. Then he installed yin-yang ponds to the four instruments as well as the 12 metal beasts. This provided the artifacts with energy so that Zhao Hai only needed to use a little amount to control them.

Now, Zhao Hai was thinking whether he can use the yin-yang ponds in all of his artifacts in the future. If that was the case, then it would ease a lot of burdens. However, he doesn't have time to use the Universal Scanner at this time.

Suddenly, good news came from the Space. The three Eight Cyan Imperial Chariots have been repaired. Moreover, the Universal Scanner analyzed the manufacturing methods as well as the materials used to make them. This was of great use to Zhao Hai. Right now, the Space had a lot of mineral deposits, and some of them were quite precious materials.

What made Zhao Hai even happier was the fact that the chariots could be integrated into Liquid Silver. With the promotion of Zhao Hai's level, faith power could be added to his weapon which was Liquid Silver. So the more artifacts get integrated to Liquid Silver, the more powerful it would become. This was truly something that went against heaven's will.

Although Zhao Hai was ecstatic, he didn't integrate the Eight Cyan Imperial Chariots to Liquid Silver immediately. This integration requires time. And during that period, Liquid Silver couldn't be used. In battles this size, losing Liquid Silver meant losing every weapon Zhao Hai had. In any case, the chariots wouldn't run away. It wouldn't be too late to integrate them once the battle was done.

#### Chapter 1426: Futile Resistance

The fight went on, but the people from the Hundred Treasures Realm were beginning to despair. They began to understand that it became impossible for them to survive this battle.

With Zhao Hai using his large artifacts to attack the defensive line, the people of the Hundred Treasures Realm needed to allocate a lot of people to block it. Also, Kong Miao and the others weren't weak, and their offense was getting sharper and sharper. There's also the Undead that couldn't be ignored. With the Undead surrounding them, the people from the Hundred Treasures Realm knew that even if they wanted to escape, it would be very difficult.

The Undead's individual strength was terrible, only at Foundation Establishment level. However, with so many of them together, and the dynamic between offense and defense, it would take a lot of effort to go through them.

And while they were escaping from the Undead, Zhao Hai and Kong Miao's group would certainly not let them off. If this happens, then they would be eradicated even more quickly.

By this point, the people from the Hundred Treasures Realm were no longer counting on the Xu Race. The absence of the Xu Race at this time meant that they were either blocked or too afraid to come. Judging by the current situation, the possibility of the former was much bigger.

The people from the Hundred Treasures Realm knew the Xu Race really well. They were a group that bullied the weak but feared the strong. Since the Hundred Treasures Realm was much more powerful than the Xu Race, the Xu Race would rather fight the World of Cultivation rather than offend the

Hundred Treasures Realm. There were a lot of people who didn't want to offend the Hundred Treasures Realm.

Even if the Xu Race wasn't stopped, then they still wouldn't be able to offer any help. The people from the Hundred Treasures Realm knew about this. It wasn't that the Xu Race didn't come to help, it's that they couldn't help.

Upon realizing this, the people from the Hundred Treasures Realm despaired even more. But this also brought out the fierceness of the people from the Hundred Treasures Realm. This was because they were issued an order to not come back if they failed. And even if they did, they would be heavily punished. Additionally, they don't have any hope to escape. So the group began to fight desperately.

Seeing this, Zhao Hai immediately took back his four instruments. To be honest, in the two times he used the four instruments, they were only able to release normal sound attacks with no faith power. In other words, the four instruments were akin to decorations. Such an attack wouldn't be a threat to the people from the Hundred Treasures Realm.

Zhao Hai didn't use faith power in fear that the people from the Hundred Treasures Realm would find out about it. The Hundred Treasures Realm was a high-grade realm that was rich in cultivation resources. They were much much stronger compared to the World of Cultivation. He was afraid that if he used faith power, then these people would be able to identify it. Then they would try their best to break through and deliver this news back to their realm.

Zhao Hai continuously worried about his faith power being discovered by other people. Therefore, he didn't use any faith power. But even if he didn't use faith power, Zhao Hai was still a powerful combatant, so there's no need for him to go all out.

After receiving his instruments, Zhao Hai released a large amount of flying swords. The coordinated assault of the swords caused another headache towards the people from the Hundred Treasures Realm. Before, they only needed to deal with Zhao Hai's large artifacts. And now, there's these flying swords. This was like a God of War wielding his spear while also throwing knives towards the enemy.

Faced with this predicament, the people from the Hundred Treasures Realm began to see something. Kong Miao wasn't the most threatening person in the World of Cultivation, instead it was Zhao Hai.

But even if they knew about this, they still couldn't do anything to Zhao Hai. At this time, Zhao Hai was standing on the Hell King's ship. The Hell King's ship didn't participate in the attack and just stayed back while the flying swords and the 12 metal beasts rampaged. Even if the people from the Hundred Treasures Realm wanted to kill Zhao Hai, they first need to repel the 12 metal beasts, and then go through the sea of flying swords, and after that breach through the defenses of the Hell King's ship. And there's also the screen of Undead between all of this. Nobody could do such an impossible task.

Futile resistance, the people from the Hundred Treasures Realm began to think about these words. At the same time, they couldn't feel but feel sorrow in their heart.

Who were they? They were powerhouses from the Hundred Treasures Realm, feared across the Tenthousand Realm Battlefield. There weren't a lot of groups that weren't afraid of offending them. Average practitioners would beg and offer their artifacts upon the sight of them. When had they suffered this much?

But even if they are desperate, they still have to fight. If they surrendered, then the Hundred Treasures Realm wouldn't let them off. Their family members and sects would be affected as well.

Cultivators were ruthless, but they placed great weight on sentiment. Every Cultivator had something that they couldn't let go of. Even Devil Cultivators have a lot of things they couldn't put down completely.

Naturally, Zhao Hai wouldn't let these people have a chance to do anything. He continued attacking as Kong Miao and the others became more ferocious in their offence. Zhao Hai's presence gave the World of Cultivation a boost of morale. Defeating three Eight Cyan Imperial Chariots would certainly make one's allies proud.

This battle attracted a lot of attention. However, those who came only saw the Xu Race fighting against the Undead. They didn't see the situation further inside. Therefore, nobody knew what Zhao Hai and the others were doing right now.

On the other hand, Zhao Hai knew what was happening outside. He knew that this situation couldn't go on for long, or else the Hundred Treasures Realm would send reinforcements.

The reason why the Hundred Treasures Realm sent 1000 people after Zhao Hai and the others was because they thought that was enough manpower. If not, then they would certainly send more people.

The Hundred Treasures Realm is different compared to the World of Cultivation and the Xu Race. The World of Cultivation and the Xu Race were medium-grade Realms, so sending 1000 Transcending Tribulation Experts was already a great deal. As for the Hundred Treasures Realm, 1000 Transcending Tribulation Experts wasn't much. This was the difference between high-grade and medium-grade realms.

Besides having confidence in dealing with the World of Cultivation, the Hundred Treasures Realm also sent this many people in order to minimize the possibility of being exposed. If they sent out too many people, then people might sniff something out. In the end, they sent about 1000 people.

But if the Hundred Treasures Realm knew that their own people were being besieged and about to die, then they would certainly come to aid them. And the World of Cultivation might not be able to do anything.

When he thought of this, Zhao Hai strengthened the metal beasts' attacks as well as the flying swords. The Hell King's ship and the Pagoda were also strengthened.

The people from the Hundred Treasures Realm were getting killed, but they were still struggling. The Hundred Treasures Realm already lost about 500 people. Those left couldn't stop the assault of the World of Cultivation. The only thing they could do was to survive as long as possible.

What surprised Zhao Hai was that nobody from the Hundred Treasures Realm surrendered. Although they knew that they would die and resistance was futile, they still fought.

Time passed as more and more people from the Hundred Treasures Realm were getting killed. At this point, only 100 people were left from the original group. Each one of the survivors were heavily injured with no hope of lasting for long.

When the commander of the group saw the end. He loudly shouted as he slashed his own throat with the glaive. He committed suicide!

It was almost impossible for cultivators to kill themselves. They valued their lives as treasures and would even give up their family members in order to survive. However, these people actually killed themselves without hesitation. To Zhao Hai and the others, this was something they didn't expect.

When they saw their commander kill himself, the others also followed along.

Seeing their opponents like this, Kong Miao and the others remained emotionless. To someone who valued their lives, seeing their enemies kill themselves was a very extraordinary matter.

However, Zhao Hai wasn't polite as he took all of the bodies and sent them to the Space. Then he flew towards Kong Miao and whispered, "Grandmaster, I found out that these people are from the Hundred Treasures Realm."

Upon hearing Zhao Hai, Kong Miao's expression couldn't help but change. He knew that the Hundred Treasures Realm was very hard to deal with. But he also knew that Zhao Hai wouldn't joke about this matter.

Kong Miao turned to Zhao Hai and said, "Are you sure?" Kong Miao really hoped that this wasn't the case. Therefore, he asked.

Zhao Hai nodded and said, "I'm sure of it. I turned them into Undead using a special method, so they were able to keep their original memories. They aren't able to lie in this state."

Kong Miao's expression truly changed. This was something he didn't want to happen. Zhao Hai looked at Kong Miao and said, "Grandmaster, my Undead are currently blocking the Xu Race. I think we should head out now and deal with the Xu Race. Then let's immediately inform the higher-ups about our opponent. This way, we could make preparations early."

Hearing this, Kong Miao nodded and said, "Let's do that. The higher-ups need to know who we're up against. Our World of Cultivation is really unlucky. You go lead the others to deal with the Xu Race while I send a letter to the higher-ups."

Xu Wuzun felt that things were going bad. He was a high-level member of the Xu Race, so he knew that the Hundred Treasures Clan was going to deal with the World of Cultivation. Since he knew, then he understood why the higher-ups wanted to deal with the World of Cultivation. And he also knew that the Xu Race would have to follow this up to the end. The Hundred Treasures Realm weren't people that the Xu Race could afford.

A Transcending Tribulation Expert of the Hundred Treasures Realm can deal with two to three Transcending Tribulation Expert from the Xu Race. And they could deal with even more people from the World of Cultivation.

It was precisely because he was very aware of the difference between the two realms that the Xu Race would rather fight the World of Cultivation than offend the Hundred Treasures Realm.

It's a pity that when they tried to deal with the World of Cultivation, they were beaten back twice. They also lost troops in this process. This caused the people from the Hundred Treasures Realm to be very dissatisfied with them. Because of this, they sent a team of about a thousand people to come and help deal with the World of Cultivation.

The Xu Race would be responsible for reconnaissance as well as ambushes towards the World of Cultivation. After the World of Cultivation and the Hundred Treasures Realm clashed, the Xu Race would pick off stragglers left behind. When the time comes, the group from the World of Cultivation would certainly crumble to dust.

This was a perfect plan. Xu Wuzun was initially worried about the World of Cultivation's large artifact. However, the people from the Hundred Treasures Realm told him to not worry about it. Naturally, Xu Wuzun had to comply. But just as the battle began and the Xu Race were about to mount a sneak attack, a sea of Undead suddenly appeared.

He only heard about these creatures but hasn't seen any of them. He knew that the Undead were weak, not worth bothering about at all. However, once they reach a critical number, they aren't easy to deal with.

Xu Wuzun was a Severed Soul Expert, so people in the Foundation Establishment Stage aren't worth his attention. In his eyes, they were mere ants, not even worth looking at.

However, he soon discovered that he made a mistake. Several tens of millions of Undead, lined up properly, and coordinated in attacks was a terrifying sight to come upon. It was simply impossible to deal with them. In fact, Xu Wuzun found that escaping had become an issue.

What made Xu Wuzun terrified was the fact that the opponent was only using Undead to deal with them. If this was the case, then how much Undead was the other party using in order to deal with the people from the Hundred Treasures Realm? It must be known that the World of Cultivation doesn't only have Undead, they also have about 1000 Transcending Tribulation Experts.

When he thought of this, Xu Wuzun felt his back turn cold. However, he knew that doing something about it right now was useless. The only thing they could do was to face the Undead and wait until the people from the Hundred Treasures Realm finish dealing with the World of Cultivation.

In the beginning, Xu Wuzun held this hope deep in his heart. But as time went on, the number of Undead didn't dwindle, nor did their attacks weaken. This caused the ominous feeling in Xu Wuzun's heart to get stronger and stronger.

As he began to think about what to do with the Undead, a path suddenly appeared and a huge ship went through it. Seeing this ship, Xu Wuzun's heart sank.

He clearly knew this ship, it was Zhao Hai's ship. Its appearance here only meant that the group from the Hundred Treasures Realm had been dealt with.

Seeing this scene, Xu Wuzun knew that he was done for. The Hundred Treasures Realm wouldn't let the World of Cultivation off, and the same was true for the Xu Race. This was because high-grade realms showed no mercy to those who failed them. The Hundred Treasures Realm would definitely use this as an excuse to deal with them all.

At this moment, someone from the ship spoke, "Xu Race people, we've already dealt with the people behind you. We also know who they are. You should be aware of the current situation. Those people wouldn't let you nor us go. Our two realms have no chance of winning against them. The only way for us to survive is if we work together!"

The Xu Race clansmen stared. They didn't understand what the World of Cultivation was planning to do. However, they noticed that the Undead attacks had stopped.

The Xu Race didn't attack either. They just lined up in a neat formation. Then the person on the boat continued, "You should also be aware of how strong the people behind you are. Now, they lost a thousand people while trying to help you. In this case, will they let you off? No. they won't. Once the World of Cultivation gets destroyed, you will be next. We know that you have nothing to do with this, you're just threatened by them. With our current strength, the World of Cultivation can easily wipe you out. However, that won't do us any good. So I hope that we can cooperate. We also have our own backers. As long as we discuss this situation, those people above us would definitely look into it. When the time comes, our two realms can work together."

Upon hearing this, Xu Wuzun stared. Naturally, he didn't expect the other party to propose this. However, he could recognize that what they said was reasonable. With how the Xu Race allowed the 1000 masked people to die, the Hundred Treasures Realm would certainly hold them accountable. However, the World of Cultivation was in the same dangerous position as them. Once the people from the Hundred Treasures Realm arrive to wipe out the World of Cultivation, the Xu Race would be next.

But if the two realms cooperate, things would be different. The Xu Race and the World of Cultivation were both medium-grade realms. Although their combined strength couldn't go against a high-grade realm, it still provided them with more chips to play with. Even if the Hundred Treasures Realm wants to deal with them, they would have to think about it.

If the two realms moved on their own, then they would both be extinguished! There was a chance of survival if they worked together. Now that this easy choice was presented to the Xu Race, what else could they choose?

Xu Wuzun was tempted. This was because the other party made it clear that they would be destroyed if they separated. Unfortunately, this decision wasn't up to him. If Xu Wuzun could make the decisions, then he would no doubt accept immediately.

Just as Xu Wuzun was about to speak, the other party talked once more, "Xu Race, your leader is still Xu Wuzun right? Please tell your clan about this. This isn't something that can be decided by one or two people. We will give you six hours. If there's no reply in six hours, then we won't be polite anymore. Countdown starts now."

Hearing the other part, Xu Wuzun immediately wrote a letter to tell the higher-ups about the situation. Xu Wuzun didn't notice it, but the Hell King's ship also sent a jade sword message out.

Back to a few moments before. After the battle with the Hundred Treasures Realm, Kong Miao released a jade sword message and then proceeded to make a move on the Xu Race. But at this time, Zhao Hai suddenly stopped Kong Miao and said, "Grandmaster, it's not the time to deal with the Xu Race."

Kong Miao looked at Zhao Hai and asked, "Little Hai, what do you mean?"

Zhao Hai reapplied, "Grandmaster, now we know that we're up against the Hundred Treasures Realm. We know that they wouldn't let us off, but the Xu Race is now placed in the same position because of their failure. In this case, it's better if we cooperate to face the Hundred Treasures Realm. If we don't the Hundred Treasures Realm could just take us one by one. If we cooperate, we can at least reach the strength of a High-grade Realm. They would need to think a lot if they want to deal with us."

Kong Miao nodded. He supported Zhao Hai's plan to cooperate with the Xu Race. However, Kong Miao worriedly asked, "What if the Xu Race doesn't agree?"

Zhao Hai smiled faintly and said, "They have no choice but to comply. They are now surrounded by Undead. Moreover, we'll express our goodwill and make them feel that there's a chance of survival. If we let them feel desperate, then they would fight us in the end. And even if they don't agree, we can just wipe them out. Even if the higher-ups of the Xu Race won't agree to surrender, the Xu Race members themselves are afraid of death."

Hearing Zhao Hai, Kong Miao's eyes shone. Then he said, "Alright, then I'll hand this matter to you. Don't worry, whatever you propose, I'll agree. Just persuade the Xu Race to work with us through this situation. If you manage to do that, this will be a great contribution to the World of Cultivation. If the Xu Race decides to ask their higher-ups, then I'll send one as well in order to make things clear. After all, this matter has no downsides to the World of Cultivation. However, they need to make a decision as soon as possible."

#### Chapter 1428: Popular Undead

With Kong Miao's permission, Zhao Hai began to negotiate with the Xu Race. This negotiation was too easy for Zhao Hai. He grasped the weakness of the Xu Race and made them less vigilant.

When he saw Zhao Hai's method, Kong Miao felt that he made the right decision to leave this matter to him. Compared to Zhao Hai, his negotiation skills weren't worth mentioning.

Seeing the Xu Race send a message, Kong Miao immediately released his own jade sword message. Then he looked at Zhao Hai and said, "If the Xu Race decides to cooperate, what do we do then? Do we let them go?"

Zhao Hai smiled and said, "How could that be possible? Since they agree to cooperate, then we can invite them over to the World of Cultivation as guests. I think the higher-ups would begin gathering manpower after receiving your message. We'll abandon our bases and focus on defending one. At the same time, we'll invite the Xu Race over to help."

Upon hearing Zhao Hai, Kong Miao didn't know what to say. He just felt that this was too shameless.

Zhao Hai didn't care, he just looked at Kong Miao and said, "Grandmaster, let's take a step back first. I want to rest, so I'll be receiving my artifacts. Naturally, the Undead will stay. Don't worry, I won't be gone for long."

Hearing this, Kong Miao anxiously asked, "Is there a problem? Are you alright?"

Zhao Hai shook his head and said, "Don't worry, I'll be fine after resting for a while."

Actually, Zhao Hai doesn't need to rest. He just wanted to integrate the Eight Cyan Imperial Chariots to Liquid Silver. He still doesn't know whether the Xu Race would agree to his proposal. If the Xu Race didn't, then the World of Cultivation would continue hunting them down.

Although the Eight Cyan Imperial Chariots have already been prepared, they still don't have any yin-yang ponds in them because they haven't been integrated to liquid silver. Even if Zhao Hai could still use them, he could only control two with his current strength.

Before this, Zhao Hai discovered that the yin-yang ponds couldn't just be installed on any artifact. If it was an artifact made by others, then it would be incompatible with the yin-yang pond. Yin-yang ponds can only be installed on large artifacts made by the Space or artifacts that were integrated to Liquid Silver.

Regardless, Zhao Hai wasn't disappointed. He doesn't want anyone else to know about the yin-yang ponds. It was something that only he would use. Although this would exclude the Undead from becoming stronger, Zhao Hai didn't mind. After all, the Undead wouldn't be fighting one-on-one battles soon. What the Undead depended on was their numbers.

Naturally, this wasn't the case for all Undead. By this point, Zhao Hai had a lot of Transcending Tribulation Undead in the Space. These included the Xu Race he hunted down before as well as the experts from the Hundred Treasures Realm.

Zhao Hai already asked those from the Hundred Treasures Realm about their artifact making methods. However, they don't know about the formations used inside. They were just combatants, the realm just makes weapons for them. It was impossible to know about the core secrets of weapons.

Naturally, these weapons refer to the weapons they used before, not the blood red glaives. To be honest, the blood red glaives were very good artifacts. However, it didn't have the armor sunder formation. And this armor sunder formation was the most important part of the Hundred Treasures Realm's artifacts.

Although he wasn't able to get this secret from the Hundred Treasures Realm, this didn't affect Zhao Hai. He could just melt those blood red glaives and make weapons that fit the people from the Hundred Treasures Realm. Although these weapons don't carry the unique properties of the artifacts from the Hundred Treasures Realm, they still had the powerful effect of weapon shattering.

The weapon shatter formation was now Zhao Hai's most used artifact formation. Almost all of Zhao Hai's artifacts had weapon shattering applied to them. Therefore, the artifacts were powerful in offensive and defensive situations.

The overall power of the Undead from the Hundred Treasures Realm might drop by using weapon shattering. However, at least their combat prowess was better when using the glaives.

It was because of these adjustments that Zhao Hai needed a time out. Naturally, Kong Miao was unaware of this. However, he still agreed and took the initiative of telling others about Zhao Hai.

Of course, nobody opposed this. Everyone already knew of Zhao Hai's contribution and strength.

The Xu Race stared as the Hell King's ship slowly backed out and the Undead closed the passage. At the same time, they felt very uneasy. They didn't know what the World of Cultivation would do after this. Will the World of Cultivation attack them?

The Xu Race began gearing for defense against any attack. However, the Undead didn't make any attacks. They were like statues suspended in the air.

As the Hell King's ship withdrew, it suddenly vanished and was replaced by beast-shaped Undead. This way, the people from the World of Cultivation could sit on them and not in mid-air. Even if they want to sleep it wouldn't be a problem, each beast-shaped Undead was enormous.

As for Zhao Hai, he summoned Alien and immediately went inside it. Alien shut down its mouth, blocking any spiritual force from Kong Miao and the others entering.

Seeing Zhao Hai, the others also wanted to enter the bellies of the Undead. The beast-shaped Undead agreed and opened their mouths, revealing rooms inside their bellies. This caused the people from the World of Cultivation to be glad. The rooms inside the Undead were actually more comfortable than the ones on the Hell King's ship.

Although the Hell King's ship wasn't very huge, Only Kong Miao and the other powerful experts had their own rooms. Others stayed in group cabins. Despite having enough space of their own in these cabins, these experts still preferred a personal space. This was because cultivators don't like being seen by others when they cultivate, afraid of being disturbed.

With the beast-shaped Undead, the cultivators were given their own mobile cave residence. Naturally, they would be very satisfied with this.

This was also something Zhao Hai deliberately arranged. These beast-shaped Undead were chosen by him and modified. Otherwise, they wouldn't have rooms inside them.

Zhao Hai only took Mo Sheng into Alien this time. Li Zongdao has been arranged to another Undead to cultivate in. As soon as Zhao Hai and Mo Sheng entered Alien's body, they entered the Space. Zhao Hai needed to see the process of integration. So upon entering the Space, he immediately started the fusion between the Eight Cyan Imperial Chariots and Liquid Silver. Once the chariots get fused with Liquid Silver, their strength would increase by one level.

The increase of the chariots' strength was due to Liquid Silver's special characteristic of being indestructible. This property was first seen back when it was still the Skull Staff. Because the Space and the outside world operate on different laws, outside laws wouldn't be able to do anything to the staff. This made the staff indestructible.

In the past, the Eight Cyan Imperial Chariots were defeated because Zhao Hai managed to wreck them. Once they become indestructible, they would no doubt be much more powerful.

Another reason for the chariots' increase in strength was the yin-yang pond. Before this, the strength of the chariots was largely based on the strength of its controllers. If they were controlled by Foundation Establishment Experts, then they simply couldn't be able to express their full strength. On the other hand, ten Transcending Tribulation Experts could bring out all of the chariot's strength. This was another weak point of the chariots.

As long as the chariots get integrated to Liquid Silver, they could be installed with yin-yang ponds. When the time comes, the yin-yang ponds could provide the chariots with endless amounts of energy. This would naturally increase the efficiency of the chariots.

Additionally, controlling the Eight Cyan Imperial Chariots was very complex. Even Transcending Tribulation Experts would need to work together in order to control it. After all, the Eight Cyan Imperial Chariots were machine-like artifacts that needed people to control it.

But after getting fused to Liquid Silver, the Eight Cyan Imperial Chariots wouldn't have this problem. Cai'er can transform the chariots into robot-like puppets. As long as Zhao Hai issues an order, the chariots would immediately move.

Most importantly, modifications have been done to the chariots. Although their charge attacks were quite strong, the strength behind it wasn't very lethal. Once they had been transformed, their combat prowess would be better than before.

Cai'er already prepared everything. After seeing Zhao Hai return, she immediately went forward. Zhao Hai followed Cai'er to the Eight Cyan Imperial Chariots. Then he turned to Cai'er and said, "Let's begin." Cai'er complied and waved her hand. Clumps of silver metals appeared and entered the three Eight Cyan Imperial Chariots.

Zhao Hai looked at the situation, then he turned to Cai'er and said, "How long would it take to finish?"

Cai'er counted for a moment and replied, "Probably about two hours."

Zhao Hai nodded and then took Cai'er and Mo Sheng to the villa. Upon entering the villa, Zhao Hai had Meg arrange something for Mo Sheng to eat. Then he sat beside Laura and the others. At this time, Laura was busy processing the Undead from the Hundred Treasures Realm. She needed to list down the Hundred Treasures Realm's techniques and see if there's somewhere they could be used.

As for Lizzy and the others, they were currently controlling the Undead gathered around the Xu Race. They were also monitoring Kong Miao and the others. Although the World of Cultivation now had a good relationship with Zhao Hai, Zhao Hai and the others still needed to be wary of them since he just showed them his strength.

Fortunately, Zhao Hai made a very wise decision. Although it might seem like he gave everyone their own rooms, this also meant that they were isolated from each other. Nobody contacted anybody else yet. They all just sat in their rooms, meditating silently.

After nodding at what he saw, Zhao Hai smiled faintly and said, "It seems like these people liked the Undead. How about giving them their own Undead?"

Laura smiled and said, "Even if you gave them, they wouldn't accept it. After all, these are your Undead. They would be afraid that you'll use the Undead against them."

Zhao Hai smirked, then he said, "Right, the World of Cultivation is full of intrigue. Nobody would trust others easily. Forget it, let's keep the Undead."

Laura smiled faintly and said, "Brother Hai, those people from the Hundred Treasures Realm have some unique techniques. You might want to learn them, it might help you fight more efficiently."

Zhao Hai nodded and said, "I'll do it after everything is finished. Do you think the Xu Race will cooperate with the World of Cultivation?"

Laura smiled and said, "I think they would agree. The Xu Race aren't stupid. Losing the 1000 experts would be a huge blow to them. And with the overbearing manner of the Hundred Treasures Realm, they certainly wouldn't let the Xu Race off. Instead of waiting for their end, they might as well go and fight. As long as they win, they can still rob people in the Ten-thousand Realm Battlefield."

Zhao Hai smiled and said, "I also think that they would agree. But this time, we truly offended the Hundred Treasures Realm. I'm afraid they have already received news right now. And they will send people to deal with the World of Cultivation and the Xu Race. I hope that the people standing behind the World of Cultivation will come forward. Otherwise, the World of Cultivation will be in deep trouble."

Laura smiled and said, "Those people will definitely step out. They're great enemies with the Hundred Treasures Realm and had fought against them for tens of thousands of years. Now that the Hundred Treasures Realm has made a move, those people would naturally fight back."

#### Chapter 1429: Giant Spirit Race

Hearing what Laura said, Zhao Hai couldn't help but look at her and said, "What? How did you know about the people standing behind the World of Cultivation?"

Laura smiled faintly and said, "Even if we don't know, how could the people from the Hundred Treasures Realm not know? After fighting for a long time, they naturally know who their opponent was."

Zhao Hai nodded and said, "So which realm is the opponent of the Hundred Treasures Realm? Why have we never heard of it before?"

Laura smiled and said, "Actually, there's some traces about them here and there. The Hundred Treasures Realm's enemy is the Giant Spirit Realm!"

Upon hearing this, Zhao Hai nodded. It could be said that the Giant Spirit Realm was indeed on the opposite side of the Hundred Treasures Realm. This was because the methods of the two realms were almost at the extreme opposites.

The Giant Spirit Realm was called this because: One, it was the home of the Giant Spirit Race. Naturally, they were giants. The average height of the people from the Giant Spirit Race was about two meters tall. But even this height was taller than an average practitioner.

Besides being tall, the Giant Spirit Realm gave priority to physical strength. Therefore, they strived to have as large weapons as possible.

In the eyes of the people from the Giant Spirit Realm, the larger and heavier the weapon, the better. Moreover, the Giant Spirit Realm was said to have the most large artifacts in hand.

With the extreme differences between the Giant Spirit Realm and the Hundred Treasures Realm, their people naturally weren't compatible with each other. Small and large battles between these two realms in the past. But recently, these conflicts have decreased. However, it seems like the Hundred Treasures Realm was beginning to stir things up once more.

Zhao Hai nodded and said, "So it's the Giant Spirit Realm. This makes things more interesting. The Giant Spirit Realm is also a high-grade realm like the Hundred Treasures Realm. I didn't expect the World of Cultivation to have a large backing."

Laura smiled and said, "The World of Cultivation can only be classified as a medium-grade realm, so a high-grade realm like the Giant Spirit Realm needed to shelter it. However, being known to back a medium-grade was a loss of face for the Giant Spirit Realm. This time it's different. The one who made the first move was the Hundred Treasures Realm. Once the Giant Spirit Realm knows about this, they would certainly make a move."

Zhao Hai nodded, "Good, then maybe I'll have a chance to meet these people. I want to see if they're as strong as the people from the Hundred Treasures Realm."

Laura smiled and said, "Brother Hai, you should look at the Hundred Treasures Realm's method of controlling artifacts. I must say, it's quite good."

Zhao Hai smiled faintly and said, "Don't worry, there's still much to do. It wouldn't be too late to study them after." Laura no longer persuaded Zhao Hai. She knew that Zhao Hai had a lot of things in his mind.

Actually, Zhao Hai might be able to get along well with the people from the Giant Spirit Realm. This was because of Zhao Hai's Buddhist Techniques. The special methods of the Giant Spirit Realm included training their strength to a mindblowing level.

Moreover, after this matter, Zhao Hai's name should have spread. Zhao Hai's feat of controlling large artifacts would also be known. This was very much in line with the Giant Spirit Realm's liking.

The Giant Spirit Realm was home to a very formidable race. Moreover, these people all had robust bodies that exuded strength. Therefore, in the Ten-thousand Realm Battlefield, the people from the Giant Spirit Realm were also called the Strongman Race.

Knowing the World of Cultivation's backer, Zhao Hai couldn't help but feel relieved. In the past, he was worried that the people behind the World of Cultivation would have covetous personalities. Now that he knew about the Giant Spirit Realm, he knew that this wouldn't be a problem.

Zhao Hai observed the state of Yalei 2. Fortunately, Yalei 2 has already been designated as a protected area by the Machine Field. Everything was developing smoothly. The same was true for the Pirate Paradise. The Cross Sword Pirate Group was still the strongest pirate group there, and their momentum was even greater than before.

The reason the Cross Sword Pirate Group was able to gain such power and influence was largely due to its relationship with the Undead. The Undead had already learned to drive mechs. And adding their formidable strength, they doubled the strength of the pirate group. It was natural for the Cross Sword Pirate group's strength to skyrocket.

After looking into the state of Yalei 2 and the Cross Sword Pirate Group, Zhao Hai took Laura and the others out of the villa.

By this point, the Xu Race were surrounded by the Undead, so nothing should change soon. The Xu Race wouldn't dare make a move lest they be annihilated by the Undead. There's also the people from the World of Cultivation close by. The thoughts of escaping were no longer in the minds of the Xu Race group.

At the same time, the Xu Race discovered that their stealth doesn't work on the Undead. Their stealth was their biggest source of confidence. Now that their stealth became useless, they naturally behaved.

Zhao Hai looked and saw that the Eight Cyan Imperial Chariots had already vanished from sight. What was left floating in the air was a bronze magic staff.

Naturally, Zhao Hai knew that the bronze staff was liquid silver. He just didn't expect Liquid Silver to change its color.

Zhao Hai waved his hand, calling Liquid Silver over. He couldn't see any other differences on the staff. But when he waved his hand, an Eight Cyan Imperial Chariot appeared in front of him. The imposing aura of this chariot made its previous form pale in comparison. One could tell at a single glance that it wasn't an ordinary artifact.

Zhao Hai nodded with approval. Although Liquid Silver changed its color, he didn't mind it. Even if Kong Miao and the others noticed, with Zhao Hai's present strength, he wasn't afraid.

After resting for a while inside the Space, Zhao Hai returned to Alien's body. Then he said, "Contact Grandmaster Kong Miao."

All the Undead have communication systems installed inside them. As long as he said the name, a light curtain would appear in front of him. And if the other party agrees to the connection, then they would be able to see each other through the light curtain.

Kong Miao was currently sitting inside his room within the Undead. This room wasn't very big, only about ten square meters or so. However, Kong Miao was still quite satisfied with it.

As he sat in the room, Kong Miao recalled the day's events. He began to discover that everything that happened was largely because of Zhao Hai. If it weren't for Zhao Hai, then everyone from the World of Cultivation might have perished.

At the same time, he gained another understanding about Zhao Hai's strength. At first, Zhao Hai was able to deal with three Eight Cyan Imperial Chariots while releasing a large number of Undead. Kong Miao also noticed that the Undead knew when to retreat and advance. Kong Miao thought that even if he used the Ten Thousand Transformations Staff, it would still be very difficult for him to deal with the Undead. The key to this was the fact that there were too many Undead. Their sheer quantity alone made them very hard to deal with.

It shouldn't be a problem for Zhao Hai to deal with the Xu Race using the Undead alone. When he thought of this, Kong Miao couldn't help but feel depressed. He couldn't understand how Zhao Hai was able to grow this rapidly.

Suddenly, there was a beep in the room. Kong Miao didn't know what was going on. Then at this moment, a woman's voice was heard, "Mister Zhao Hai asks to talk to you. Asking for permission to connect." After that, a light screen appeared in front of him. There was nothing yet on the screen.

Kong Miao was initially puzzled. But he was a smart person, so he answered, "Connect." Just as his voice fell, Zhao Hai's face appeared on the screen. Kong Miao could see Zhao Hai sitting inside his own room.

Zhao Hai looked at Kong Miao, then he smiled and said, "Grandmaster, I hope you're doing well. Do you want to head back to the ship, or do you want to stay there for a while?"

Hearing what Zhao Hai said, Kong Miao hurriedly waved his hand and said, "Staying here is fine. I must say, Little Hai, I didn't expect the Undead to have these kinds of things. Can I use this thing to contact anyone?"

Zhao Hai smiled and said, "Of course. I apologize for not telling you this in advance. With this thing, you can talk to anyone as long as you say their name. Naturally, that person needed to be inside an Undead. This is a function related to the Undead's internal space."

Kong Miao nodded, "Alright, this thing is really convenient. I reckon you won't need to take the ship out anymore. Everyone likes to have their own space. How was your rest?"

Zhao Hai nodded, "I'm alright. But Grandmaster, I need to say something. The three Eight Cyan Imperial Chariots that I wrecked have already been fused to my artifact. I hope you won't blame me for this."

Kong Miao stared, then he asked, "Fuse with your artifact? How did you do that?"

Zhao Hai smiled and said, "Back when I completed my artifact, I discovered an integration formation inside it. This allowed me to fuse my other artifacts into it. This is the most brilliant work of Senior Leng

Wuyang. This time, I fused the Eight Cyan Imperial Chariots to it. So from now on, I can use the chariots to fight.”

Kong Miao couldn't help but sigh as he said, “Senior Leng Wuyeng is truly talented. He was able to make such an artifact. Also, the Eight Cyan Imperial Chariots are your spoils anyway, so nobody will say anything. Additionally, you've contributed greatly to the battle, so it's a fitting reward.”

Zhao Hai gave a smiling nod. He told Kong Miao about this so that he could use the Eight Cyan Imperial Chariots later. This way, Kong Miao and the others wouldn't be too surprised.

#### Chapter 1430: Condition

The two chatted for quite some time until Zhao Hai's expression suddenly changed. Then he looked at Kong Miao and said, “Grandmaster, the Xu Race's response has arrived. How about we go and take a look?”

Hearing Zhao Hia, Kong Miao waved his hand and said, “Don't worry about it. Let's wait for the reply of the higher-ups first.”

Zhao Hai thought that this was reasonable, so he nodded and said, “Alright, then Grandmaster, I won't be disturbing you any longer. If you want to contact me, just call my name.”

Kong Miao nodded. Then the light screen vanished. Kong Miao couldn't help but sigh. These Undead were indeed quite good. He couldn't help but feel envious of Zhao Hai.

Right after that, Kong Miao contacted Xu Ning and the other Severed Soul Experts. He told them that the Xu Race's reply has arrived and to pay attention to their actions. If there's anything strange going on, then there's no need to be polite.

Just after contacting Xu Ning and the others, Kong Miao sensed that his jade sword message had come back. He immediately had the Undead open its mouth to let it in.

Upon receiving the jade sword message, Kong Miao read it using his spiritual force. After knowing the response of the higher-ups, Kong Miao contacted Xu Ning and the others once more. Then, he contacted Zhao Hai. However, Zhao Hai doesn't need to be notified because he already listened to his conversation with the other Severed Soul Experts.

However, Zhao Hai immediately answered the call and said, "Grandmaster, you're looking for me?"

Kong Miao nodded and said, "Go and prepare to see the Xu Race. The higher-ups agree to cooperate with them. We can even make concessions. However, the Xu Race needs to move to the World of Cultivation's stronghold in order to deal with the enemy together."

Being a medium-grade realm, the World of Cultivation holds several bases in the Ten-thousand Realm Battlefield. The newcomer's area that Zhao Hai was in before was their smallest base. There were still several bases where veterans stayed.

But the World of Cultivation's most important base in the Ten-thousand Realm Battlefield was inside an abandoned mine that once produced soft jade and jade marrow. Once the soft jade and jade marrow was completely dug up, the World of Cultivation spent 100 years in order to construct their stronghold.

Not only were 20 Severed Soul Experts stationed there all-year round, it also had a Great Guardian Formation. Besides the guardian formation, there were also other formations present. Even Immortal Stage Experts would find it hard to attack the stronghold. Most importantly, the stronghold has a transmission formation that directly led back to the World of Cultivation. When necessary, the people of the World of Cultivation from all around the Ten-thousand Realm Battlefield could return to this stronghold and return to the World of Cultivation.

When a time comes that the World of Cultivation gets in a very tight spot in the Ten-thousand Realm Battlefield, everyone can destroy the formations in their bases except one. Then they would teleport to the stronghold and then defend it. If the stronghold couldn't be defended, then they would use the transmission formation to return back to the realm.

However, the World of Cultivation generally won't use the stronghold as a base. This was because it would be a huge loss if they were to let go of the other bases they have.

This time, however, the stronghold needed to be utilized. Their opponent was the Hundred Treasures Realm, a high-grade realm. If the Hundred Treasures Realm really wanted to clean them up, then even the stronghold might not be able to hold up.

Fortunately, the World of Cultivation also had its own backer. If they couldn't defend, then at least the World of Cultivation could hide inside their realm safely.

The higher-ups wanted the Xu Race to move to the stronghold and fight against the enemy together. This requirement was a bit excessive. This was because the Xu Race might not trust the World of Cultivation fully. After all, the two sides were hostile just recently.

However, Zhao Hai thinks that the Xu Race would still agree. They had already lost hundreds of experts before, and then there's 1000 experts who were trapped by the Undead. If they don't agree, then those 1000 people wouldn't be able to survive. It must be known that for medium-grade realms, the loss of a thousand Transcending Tribulation Experts would be a huge blow to their foundation. They might even be demoted into a low-grade realm.

And once the Xu Race gets demoted into a low-grade realm, then that would spell their end. The Xu Race had been bandits for thousands of years. And through this period, they had offended an innumerable number of low-grade realms. Generally, offending these low-grade realms wasn't anything worth worrying about. These realms were weak and were often preyed on by everyone.

However, if the Xu Race were to become weak. Then they would certainly go extinct. When the time comes, even without the Hundred Treasures Realm moving, the Xu Race would be attacked by all of the enemies they made through the years.

Additionally, the Hundred Treasures Realm had lost 1000 experts. They certainly wouldn't let anyone involved go free. If the Xu Race decides to work with the World of Cultivation, then they would go under the umbrella of their backer. For the Xu Race, this was a very important matter.

Kong Miao and the others walked out of their respective beast-shaped Undead and then proceeded towards the encirclement. At this time, Xu Wuzun was nervously walking back and forth.

Seeing Kong Miao and the others, Xu Wuzun immediately stopped. When Kong Miao and the others were 100 meters away, Xu Wuzun said, "Grandmaster Kong, I received orders from the clan. The Xu

Race is willing to cooperate with the World of Cultivation in order to guard against the Hundred Treasures Realm.”

Upon hearing Xu Wuzun, Kong Miao knew that the Xu Race were indeed willing to form an alliance. Back when Zhao Hai negotiated with them, he didn’t mention any names about the people behind the Xu Race. Xu Wuzun taking the initiative to reveal the Hundred Treasures Realm’s identity proves that they fully surrender to the World of Cultivation.

Kong Miao nodded and said, “You made the right decision. But if you want an alliance, you need to agree to some conditions. You need to leave Octopus Islands and move to the World of Cultivation’s stronghold. If we work together, then we need to be in the same place. Naturally, we’ve already reached out to the people behind us. I believe they will send people to help us out.”

When Xu Wuzun heard what Kong Miao said, he couldn’t help but frown. The Xu Clan has already given Xu Wuzun the authority to make the decisions. This way, they could coordinate with the World of Cultivation at the shortest time. And even if the World of Cultivation makes demands, they could still agree to them. However, Xu Wuzun was still a bit taken aback by Kong Miao’s requirement. The Xu Race were a race of bandits. And bandits were very fond of their lairs. Additionally, bandits won’t leave their lairs that easily. Moving everyone to the World of Cultivation’s stronghold seemed unacceptable to Xu Wuzun.

Seeing Xu Wuzun’s expression, Zhao Hai turned to look at Kong Miao. Seeing Zhao Hai’s gaze, Kong Miao gave a nod. He knew that he wasn’t very good at negotiations. If Zhao Hai were the one to speak, then Xu Wuzun might agree.

Zhao Hai lightly coughed and said, “I have seen Your Excellency Xu Wuzun. My name is Zhao Hai.”

Xu Wuzun was thinking about how to reject Kong Miao’s conditions, but he was interrupted by Zhao Hai. Although Xu Wuzun was annoyed by this, he didn’t show it on his face. He wasn’t an immature child to destroy the current atmosphere with his temper. Additionally, he knew that Zhao Hai was the reason why the Xu Race suffered multiple defeats. And it was also because of Zhao Hai that the group from the Hundred Treasures Realm were annihilated. Therefore, he politely cupped his fist and said, “I have seen Miser Zhao Hai. What advice does Mister want to give?”

If other people were to hear about a Severed Soul Expert being polite to a Nascent Soul, they certainly wouldn’t believe it. However, this was exactly what happened. And Xu Wuzun looked natural while doing it.

Zhao Hai quickly said, "I don't dare. Your Excellency is too courteous. From what I can see, do you want to disagree with Grandmaster Kong Miao's conditions? Actually, you don't have to think about it too much. I know that you don't want to leave the Octopus Islands. After all, it's a place very important to the Xu Race. However, you should also understand that the World of Cultivation's stronghold is equally as important to us. If you let your Xu Race enter the stronghold, then technically you would know the stronghold's internal structure. For the both of us, the World of Cultivation is already giving you trust."

Hearing Zhao Hai, Kong Miao couldn't help but ponder over it. He never thought of it this way. If they brought Zhao Hai and the others to the Octopus Islands, then that would be detrimental to the Xu Race. This wasn't something that anyone could agree on. Besides the Xu Race, nobody else was allowed to enter the Octopus Islands.

Zhao Hai looked at Xu Wuzun and said, "Presently, both of us have a common enemy. If we divide ourselves, then we would be easily defeated. But if we are together, we can overwhelm them with our numbers. Even if the enemy manages to kill us, they would have to sacrifice a lot. What do you think?"
