

## Another World 1461

### Chapter 1461: A Difficult Task

Zhao Hai understood what Tang Jie was saying. Although the Formation Breaking Spirit Snake Needle can flow like a snake and its shaft can be deformed, it's still different from the Ten thousand Transformations Staff and Liquid Silver.

Zhao Hai's Liquid Silver can turn into any shape, the same was true for the Ten Thousand Transformations Staff. On the other hand, the Formation Breaking Spirit Snake Needle couldn't transform. In other words, it only had one shape. It can hover, but it couldn't change its form.

However, this was good in itself. The snake body can move like a noodle which was a partial transformation. It's incomparably flexible. Having a hard point was enough for it.

Zhao Hai knew that Tang Jie had good intentions, so he smiled faintly and said, "Brother Tang, rest assured. I won't act unreasonably. Let's go make our preparations. Those guys will be here soon. If they didn't bring a Formation breaking Spirit Snake Needle, then our defensive formations would be put in great use. The artifact they used to hurry along is very special. It was a very huge ship. Five thousand people have no problem going inside it. However, it's speed isn't very fast."

Tang Jie coldly snorted and said, "The Giant Spirit Treasure Ship, the Giant Spirit Realm actually took it out. It seems like they're anxious about the situation. It takes 100 Transcending Tribulation Experts to drive one. And each ship can hold 10 thousand people. Not only can it be used as a transport artifact, it can also attack. But because it's too big, it's not very flexible. However, it's attacking power is huge. It could break a Eight Cyan Imperial Chariot on a head-on collision. Since they took out the Giant Spirit Treasure Ship, it seems like they wouldn't use a Formation Breaking Spirit Snake Needle."

Zhao Hai looked at Tang Jie, confused. Xu Wuzun cleared his puzzlement, "The Giant Spirit Treasure Ship is quite famous in the Ten-thousand Realm Battlefield. In terms of offense, it's quite formidable. Most of the time, the Giant Spirit Realm uses the Giant Spirit Treasures Ship in order to destroy guardian formations. They used this method in order to deal with uncooperative smaller realms."

Zhao Hai's complexion turned serious, he nodded and said, "So it's like that. Can we deal with the Giant Spirit Treasures Realm using the Formation Breaking Spirit Snake Needle?"

Tang Jie thought for a moment and said, "It's not a bad idea, but the spirit snake needle is mainly used to destroy guardian formations. It's main function is to find a weak point in the energy flow of a formation and then attack it. The Giant Spirit Treasure Ship is a large artifact. In addition to its offensive strength, the ship is also famous for its defensive strength. Although it can defeat the Giant Spirit Treasure Ship, the Spirit Snake Needle would also sacrifice its service life. In that case, the gains wouldn't equal the loss."

Hearing this, Zhao Hai frowned and said, "The Formation Breaking Spirit Snake Needle is too precious. Its materials are very difficult to collect. Damaging it in order to deal with the Giant Spirit Treasures Ship isn't worth it. Right, we can use the counterfeit I made. Although it's not that strong, it can still attack the treasure ship. It'll take them a few days before they can arrive, I can use the time to make more imitations of the spirit snake needle. Maybe we can deal with the Giant Spirit Race without using the Formation Breaking Spirit Snake Needle."

When they heard Zhao Hai, the eyes of the three lit up. Tang Jie nodded and said, "That's a good plan. If the counterfeit needles can really block the Giant Spirit Treasures Ship, then everything else would be easier. By the way, what materials did you use to make the imitations? We have resources in hand, let me see if it's enough. If it's not, I can have more sent over."

Xu Wuzun immediately took out the jade slip that Zhao Hai gave him and then handed it over to Tang Jie, "The materials are not uncommon. We have some materials present here, so we can make more. Will there be enough time to make them?" After he said that, he turned to look at Zhao Hai."

Zhao Hai smiled faintly and said, "There should be enough. I've used a lot of my time in order to research the Formation Breaking Spirit Snake Needle. So I no longer need to look into the materials and it's design. The only thing left to do was to refine them."

Tang Jie scanned the jade slip with his spiritual force. Then his eyes shone as he looked at Zhao Hai and said, "Good. Little Hai, I'll leave this matter to you. Refine as many as possible. The more the better. You don't need to use your own materials, I'll provide them for you. You only need to focus on refining them."

Zhao Hai nodded and said, "Alright, as long as I have materials, refining is not a problem." Tang Jie nodded, then he turned around and left. Before long, he came back with a spatial bag in his hand. Then he handed the spatial bag over to Zhao Hai and said, "Here". Zhao Hai didn't delay as he nodded and then went back to his cave residence.

When Zhao Hai left, Tang Jie immediately took out a Jade Sword Message and then placed a message in it. He turned to XU Wuzun and said, "Mister Xu Wuzun, have this jade sword message pass through the transmission formation to the Hundred Treasures Realm's base. Please be quick." Xu Wuzun replied as he flew away towards the transmission formation with the jade sword message.

At this point, the Octopus Islands has established a transmission formation that linked directly to the Hundred Treasures Realm's base. So when necessary, the Hundred Treasures Realm would be able to dispatch support troops when necessary. Naturally, it was quicker for the jade sword message to pass through this transmission formation.

After Xu Wuzun left, Tang Jie turned his head to Kong Miao and said, "After this event, I want Little Hai to go to the Hundred Treasures Realm. What do you think?"

Kong Miao looked at Tang Jie in surprise. To be honest, this was the first time he heard of such a request. He never heard people from a high-grade realm inviting people from lower-grade realms. It must be known that high-grade realms were very proud. They simply don't see people from lower-grade realms as their equal. It's no wonder that Kong Miao was shocked by Tang Jie's request.

Tang Jie immediately knew that Kong Miao was thinking. He sighed and said, "Kong Miao, you should have seen Little Hai's strength as well as his talent for refining. To be honest, it would be a shame for him to be in the World of Cultivation. If he were to go to the Hundred Treasures Realm, his future would be limitless. Of course, we won't let you suffer a loss. When Little Hai goes to the Hundred Treasures Realm, we would teach the World of Cultivation some of our cultivation methods and refining techniques. What do you think?"

When Kong Mia heard what Tang Jie said, his eyes couldn't help but brighten up. To be honest, this was an offer he couldn't refuse. The World of Cultivation was unwilling to leave the Ten-thousand Realm Battlefield. They wanted to get cultivation methods and refining techniques, but these things aren't very easy to acquire. At this time, Kong Miao has a large set of methods and techniques from the Hundred Treasures Realm. But if they were discovered by the Hundred Treasures Realm, then the World of Cultivation would certainly be dealt with. It must be known that only subordinates of the Hundred Treasures Realm know about their methods. Practicing a stolen technique was a taboo. Kong Miao was worried about this matter.

But if Zhao Hai becomes someone from the Hundred Treasures Realm, then these cultivation methods would be open to the World of Cultivation. Practicing them would no longer incur the suspicion of the Hundred Treasures Realm.

When he thought of this, Kong Miao nodded and said, "He can go to the Hundred Treasures Realm. It would be an honor for Little Hai. I believe he would agree. As long as he doesn't oppose the idea, I don't have a problem with it."

Tang Jie nodded and said, "Alright, I believe Little Hai wouldn't decline. Our Hundred Treasures Realm have been preparing for a long time to deal with the Giant Spirit Realm. I believe we would be able to clean them up this time. I know that the World of Cultivation has paid a lot, you don't have to worry. Whether we can deal with the Giant Spirit Realm this time or now, I will find a good place for you in the Hundred Treasures Realm's territory to rebuild your base. It would definitely be better than your original base."

Kong Miao bowed and said, "Then I have to thank Captain Tang Jie." Although Tang Jie was only a Captain and he seems like he was talking big, Kong Miao doesn't think so. Tang Jie was a genius of his generation in the Hundred Treasures Realm. He's a candidate that the realm has decided to cultivate. His status in the Hundred Treasures Realm isn't any lower than Kong Miao's status in the World of Cultivation. If such a person speaks out, then his words would definitely bear weight.

Tang Jie waved his hand and said, "You're too polite. If we can push the Giant Spirit Realm back this time, then the World of Cultivation would have gained huge merit. The Hundred Treasures Realm wouldn't unjustly treat people with high merit."

Kong Miao expressed his gratitude once more. At this time, Xu Wuzun walked in. He looked at Tang Jie and said, "It's been passed on."

Tang Jie nodded. Then he let out a long breath as looked at the sand table and said, "The preparations on the Octopus Islands have basically been set. If Little Hai can make a few more imitations of the spirit snake needle, we can fight the Giant Spirit Realm outside. This way, the islands wouldn't be heavily damaged by the battle. The Octopus Islands are still quite close to the Giant Spirit Realm. As long as we keep this place, the Hundred Treasures Realm would have a springboard to attack the Giant Spirit Realm. It would be best if we could preserve the island's guardian formation."

Kong Miao nodded and said, "If we can really fight the Giant Spirit Realm outside the islands, there would be no problem with preserving the Island's guardian formation."

Xu Wuzun also nodded and said, "Everything depends on Little Hai. As long as he can make a lot of imitations, we can realize this plan."

Tang Jie forced a smile and said, "It wouldn't be that easy. Even if we manage to repel the Giant Spirit Realm, they could still send more people to counter-attack. When the time comes, they might even get their subordinate realms to join the battle. So we must not repel them too fast nor should we allow them to touch the guardian formation. This would be difficult to do. I just send word to the realm for them to begin with the plan to take care of the Giant Spirit Realm's subordinate realms. But this would take time. We need to stall the Giant Spirit Realm as much as possible."

Hearing Tang Jie, Kong Miao and Xu Wuzun couldn't help but knit their brows. To be honest, it would be very hard to fight the Giant Spirit Realm head-on. It was nothing more than assembling people and then fighting each other. On the other hand, stalling the Giant Spirit Realm would be a bit difficult.

Both Kong Miao and Xu Wuzun were confident in Zhao Hai. They believe that Zhao Hai would succeed in making counterfeit Formation Breaking Spirit Snake Needles. As long as they have these imitations, in addition to the Hundred Treasures Realm, they were confident in dealing with the Giant Spirit Realm. But making the Giant Spirit Realm neither win nor lose, it would be a bit difficult.

Tang Jie looked at the two and then said, "I know that it would be hard. However, we need to stall them if we want to win the war. We need to make them feel that they were close to winning, but they would never win. Only through this can we succeed."

Actually, Tang Jie's request was quite hard, but Kong Miao and Xu Wuzun couldn't decline it. In fact, they also hoped that the Giant Spirit Realm would be defeated or eliminated by Tang Jie. They hated the Giant Spirit Realm. If they don't defeat them, then the World of Cultivation and the Xu Race wouldn't have a great future.

.....

Yan Dong was currently looking at the person standing on the bow of the Giant Spirit Treasure Ship. Looking at the person, he couldn't help but sigh. To be honest, Yan Dong didn't have any good feelings towards the person. Although he was a genius of the younger generation, Yan Dong still didn't approve of him.

Yan Dong knew that this situation was caused by this person. The man was called Ba Li, a son of an Elder of the Giant Spirit Realm. The Elder was already old, so he pampered Ba Li a lot. Since childhood, Ba Li was fed with medicinal pills as though they were jelly beans. If such a person's cultivation speed was slow, then they would be utter trash. However, Yan Dong has to recognize that Ba Li was a genius. He was fast in cultivating and was extremely skilled in both spells and techniques. However, he was arrogant and selfish. Besides himself, he doesn't care for anyone. There were very few people like him, even in the Giant Spirit Realm.

After knowing about what happened to the World of Cultivation, Yan Dong immediately went back in order to ask for reinforcements. This was because he knew clearly that the World of Cultivation's crisis wasn't an accident. Yan Dong knew that it was clearly a plot of the Hundred Treasures Realm.

Originally, the Elder's Assembly was prepared to dispatch troops in order to save the World of Cultivation. However, Ba Li stopped it, thinking that the World of Cultivation was not worth saving. To Ba Li, it wasn't worth it fighting the Hundred Treasures Realm over a small realm. Moreover, the World of Cultivation was entangled with bandits like the Xu Race. Ba Li thought that it would be a stain to the Giant Spirit Realm's face if they were to accept bandits as their subordinates.

Although Ba Li's thoughts bore a hint of truth, Yan Dong believed that it would be a bigger stain on the Giant Spirit Realm's face if they didn't save the World of Cultivation. Unfortunately, Yan Dong was just a captain, so how could he contend with the words of an Elder's son? In the end, the Elder's Assembly agreed to Ba Li's words and abandoned the World of Cultivation. They were also the ones who sent the letter for Ba Muer and the others to come back.

#### Chapter 1462: Face-slapping

Hearing the decision, Yan Dong didn't know what to say. Once the realm gives up on the World of Cultivation, what would the subordinate realms think about the Giant Spirit Realm? This was equal to ruining the reputation that the Giant Spirit Realm has built up over the years.

Yan Dong wanted to urge the higher-ups to change their minds. However, he was just a Captain, his words simply couldn't be heard. Ba Li was the only person in the eyes of the Elders. Ba Li knew how to handle those old fogies. When he thought of this, Yan Dong couldn't help but feel frustrated once more. In his mind, if they had sent troops to the World of Cultivation earlier on, then all of this wouldn't have happened.

Yan Dong still remembered how the Elders seem to not care at all when they sent a letter for Ba Muer and the others to come back. But almost a day after the letter was sent, Ba Muer and the others still haven't returned. This made those Elders feel that something was off.

They wanted to send another message, but it couldn't be sent through the World of Cultivation's transmission formation. The Elders finally felt that something was wrong. The answer they got from their people that went to the World of Cultivation's stronghold was that the base has been completely destroyed. These Elders couldn't sit still and sent Ba Li along with 5000 people to see what was going on.

Yan Dong was also among these 5000 people. As soon as he saw the assignment, Yan Dong understood what was going on. Those old guys must have thought that something happened to the World of Cultivation. Otherwise, they wouldn't have sent Ba Li and 5000 other people to check. This group was enough to wipe out the World of Cultivation.

When Yan Dong followed the group back to the World of Cultivation's stronghold, what was left for them was a stretch of ruins. However, Yan Dong could see that the destruction was done deliberately. If it was only a battle, then the destruction wouldn't have been to this state.

When they examined the area with a technique, they discovered that there were no corpses present. Yan Dong and the others knew that something was wrong. This place must have been abandoned, and the matter has turned to the worst outcome.

Although Ba Li wouldn't care about these things, he immediately gave the order to go to the Octopus Islands to see upon hearing the result. If the people from the World of Cultivation were in the Octopus Islands, then they were to destroy them directly.

At this moment, they were still in transit towards the Octopus Islands. But Yan Dong still blamed this situation on Ba Li. If it weren't for Ba Li's interference, then things would have been different.

Unlike Yan Dong, Ba Li has never seen Zhao Hai and the others. Because of this, he didn't put the people from the World of Cultivation in his eyes at all. On the other hand, Yan Dong has met Kong Miao, Xu Wuzun, and Zhao Hai. These three were true experts, especially Zhao Hai. Yan Dong has developed a profound impression of Zhao Hai.

Although Zhao Hai was just at the Nascent Soul Stage, he was neither arrogant nor servile in front of Yan Dong. His speech was well-prepared and the impression he gave out was very good.

Yan Dong knew clearly that there's no such thing as no geniuses in lower-grade realms. On the contrary, the geniuses that came from lower-grade realms were the real deal. This was because lower-grade realms have very little resources to cultivate powerful experts.

Yan Dong doesn't look down on people from lower-grade realms, but this doesn't mean that the others were like him. In fact, most of his people look down on lower-grade realms. They couldn't be blamed, they grew up with rich resources. There simply wasn't any comparison. It's like a person holding a knife being compared to someone with a powerful gun. Sometimes, weapons can determine victory and loss.

This was especially true for battles between cultivators. For cultivators, weapons are very important. A good weapon can determine between survival and death.

Weapons are the main reason why people from high-grade realms defeat people from lower-grade realms even though they have the same level of strength. There's also their more advanced techniques and spells. Therefore, a lower-grade realm's genius couldn't defeat experts from high-grade realms.

It was precisely for these reasons that Yan Dong believed that people from high-grade have no reason to look down on people from lower-grade realms. It was also because of this that he was polite towards Kong Miao and the others.

Due to this mindset, Yan Dong felt very uncomfortable when looking at Ba Li. Yan Dong knows that he wouldn't see eye to eye with Ba Li. In Ba Li's view, Yan Dong didn't have the pride of someone from the Giant Spirit Realm. He was an embarrassment of the realm.

Since he was aware of this, Yan Dong hid as far back from Ba Li as possible. Even now, as they rode on the Giant Spirit Treasures Ship, Yan Dong hid in the corner so that he wouldn't be seen by Ba Li.

The Giant Spirit Treasure Ship wasn't very fast. It would take several days before they reached the Octopus Islands from the World of Cultivation's stronghold. These several days were very calm. Everyone who spotted the Giant Spirit Treasure Ship would get out of the way.

For practitioners, a few days were nothing. Before long, the Giant Spirit Treasure Ship arrived outside the Octopus Islands. But when the ship arrived, Yan Dong and the others couldn't help but be stunned. This was because people were waiting for them just outside the islands.

Outside were three groups of people. The middle group is composed of people from the Hundred Treasures Realm. They all wore black robes and were very easy to recognize. On the left were people from the World of Cultivation. Some of these people wore Cultivator clothes while the others wore Buddhist robes. They were also easy to recognize. On the right were the people from the Xu Race. Altogether, these three groups of people numbered 10 thousand.

As soon as he saw this, Ba Li understood what was going on. He stopped the Giant Spirit Treasure Ship. As he stood on the bow, he looked at the people from the Hundred Treasures Realm with a cold gaze. In fact, in Ba Li's eyes, there were only the people from the Hundred Treasures Realm. He didn't care about the others at all.

Ba Li looked at Tang Jie. Naturally, he knew who Tang Jie was. This was because Tang Jie was also a famous genius of the Hundred Treasures Realm. It can be said that the two were natural enemies. It was impossible for the two to not know each other.

Ba Li coldly snorted and said, "Tang Jie, what are you planning to do? Are you sheltering a traitor of the Giant Spirit Realm?"

Tang Jie looked at Ba Li, then he smiled faintly and said, "Ba Li, you look too highly on yourself. Traitor? Aren't you the ones who abandoned the World of Cultivators? When did they become traitors?"

Ba Li coldly snorted and said, "The day someone becomes a subordinate to the Giant Spirit Realm, they will belong to the Giant Spirit Realm forever. Anyone who thinks of separating from the Giant Spirit Realm are traitors."

Tang Jie just smiled when he heard this. Then he said, "Ba Li, you abandoned the World of Cultivation and the Xu Race. Now, they voluntarily joined the Hundred Treasures Realm. What does it have to do with you? You came here with an aggressive stance, are you here to find faults?"

The two of them were talking nonsense to each other. But this was a matter of face so they had to do it. Undeclared wars were rarely seen in the Ten-thousand Realm Battlefield.

Ba Li looked at Tang Jie and said, "Tang Jie, stop talking nonsense. Your Hundred Treasures Realm have been provoking the Giant Spirit Realm for some time now. It's time to settle accounts. Unfortunately for you, you only have more than a thousand people, and a few trash experts on your side. Do you think you can stop the Giant Spirit Treasure Ship with only that?"

Tang Jie chuckled and said, "If we can't stop it, then we can't stop it. We aren't the type of people who would give up on their subordinates when they are in danger."

Upon hearing Tang Jie, Ba Li's expression turned pale. Ba Li knew that he really made a mistake. He didn't expect the World of Cultivation to be so bold as to change sides to the Hundred Treasures Realm. They were essentially slapping his face. Now that Tang Jie blamed him, Ba Li's expression changed.

Ba Li looked at the group from the World of Cultivation, then he coldly snorted and said, "World of Cultivation, you actually dared to betray the Giant Spirit Realm. Where are the people from my Giant Spirit Realm?"

Kong Miao stood in front of the World of Cultivation with Zhao Hai beside him. Looking straight at Ba Li's eyes, Kong Miao calmly replied, "They're dead!"

Although the two words were simple and Kong Miao's tone was superficial, the impact of his words was powerful. Ba Li felt his blood rushing upward as he looked at Kong Miao and said, "World of Cultivation, you're really dared. Today, I'll eliminate every single one of you."

With a calm expression, Kong Miao looked at Ba Li and replied, "Then please!"

Ba Li's complexion reddened, he could feel himself about to spit blood. Kong Miao's simple replies seemed like he didn't care about him. This was another slap to his face. Moreover, it was a resounding slap.

No only was Ba Li's expression ugly, the others from the Giant Spirit Realm also had ugly expressions on their faces. After all, Ba Li was the representative of the Giant Spirit realm. Hitting Ba Li's face was equal to hitting the face of the Giant Spirit Realm.

A laugh was heard from the Hundred Treasures Realm's side. Tang jie didn't expect Kong Miao to have such a side to him. Those 4 words were enough to cause the blood of the people from the Giant Spirit Realm to boil.

When Ba Li heard this laugh, he could no longer stop himself as he angrily roared and took out his huge sword. Then he sent an attack towards Kong Miao.

The sword was more than 30 meters long, it was considerably large. It was silver-white and the body was very thick. One could see at a glance how heavy it was. As it was waved around, wailing could be heard from the air tearing. It's aura was astonishing.

Kong Miao just stood there as the attack headed his way. He didn't move, looking as though he was frozen with fear. His eyes were stuck on the attack as it headed to his head. Seeing this, Ba Li couldn't help but feel a touch of glee, but also a hint of confusion.

At this moment, a shadow appeared in front of Kong Miao. Then a flash of white light appeared before the sword's attack was pushed away.

Everyone who saw this couldn't help but be stunned. Ba Li's strength was very well known in the Ten-thousand Realm Battlefield. Only a few people could meet his attack head-on. An attack from an outstanding expert of the Giant Spirit Realm was actually destroyed like that? It was astonishing!

#### Chapter 1463: Attracting Hate

Zhao Hai stood there with his own sword in his hand. His sword blade was a meter long and was held with two hands. It looked like a glaive with a shorter shaft and longer blade.

Naturally, it was Zhao Hai who dispelled Ba Li's attack just now. But Zhao Hai's face was pale, as if he had suffered serious injuries.

Everyone's eyes were on Zhao Hai. It must be known that Ba Li was an expert at the Severed Soul Stage while Zhao Hai was just at Nascent Soul. With such a difference between them, Zhao hai was still able to block Ba Li's blow. This was beyond everyone's imagination.

Before this, Tang Jie and the others already had a very high estimate of Zhao Hai's strength. But Tang Jie discovered that he was still underestimating Zhao Hai. Zhao Hai's strength was actually this formidable.

Zhao Hai looked at Ba Li, then he coldly snorted and said, "Are all the people from the Giant Spirit Realm as shameless as you? To actually dare make a sneak attack."

Actually, Ba Li didn't make a sneak attack. However, Zhao Hai insisted on saying that because it was convenient to do so since Kong Miao didn't make a move. Kong Miao and Zhao Hai planned this. They would have Kong Miao irritate Ba Li only for Zhao Hai to block the attack. Ba Li's attack was blocked by a Nascent Soul Expert, if this goes out, then Ba Li wouldn't have any face left to go out with. And then Ba Li would definitely want to get rid of Zhao Hai.

What can make people make careless mistakes? The answer is anger. Zhao Hai and the others wanted Ba Li to hate them and be careless. If everything goes according to plan, then Ba Li wouldn't retreat and would continue attacking the Octopus Islands. This would give the Hundred Treasures Realm enough time to go through with their plan.

Sure enough, when he heard Zhao Hai, Ba Li's complexion turned blue. He looked at Zhao Hai and said through clenched teeth, "You are Zhao Hai?"

Zhao Hai snorted and said, "Correct, it's this Young Master."

Ba Li exclaimed, "Looking for death!" Then he waved his hand, sending an attack using his sword. Although his sword looked very unwieldy, it looked very light in Ba Li's hand. It sealed all of the opponent's retreat, so the opponent can only take it head on.

Of course, this was relatively speaking. If it was Tang Jie, then he would have many ways to avoid Ba Li's attack. Naturally, Zhao Hai can also avoid it. However, he didn't dodge. This was because he wanted Ba Li to hate him even more. So he chose to take the attack once more.

Zhao Hai waved his hand as the Hell King's ship appeared on his side. He didn't embark but just used the ship to deal with Ba Li's attack.

With Zhao Hai's present strength, he doesn't need to use the Hell King's Ship in order to deal with Ba Li's attack. However, since he didn't want the Giant Spirit Realm to know his true strength, he can only use this method.

The Hell King's ship rushed out and clashed with Ba Li's sword. Although the sword was very big, it was still smaller when compared to the Hell King's ship. A bang was heard before the sword slashed the hull of the Hell King's Ship. The hull of the ship was slammed back but it was able to repel the sword.

Zhao Hai stood behind the Hell King's Ship. As the ship repelled Ba Li's sword, his face was flushed. Then he looked like he was about to spit out something. His face was as pale as paper.

Bystanders might see that Zhao Hai was about to spit blood after receiving Ba Li's attack. However, he swallowed the blood down.

Actually, Zhao Hai wasn't really injured. He just swallowed his saliva and deliberately changed his complexion. With his current level, changing the color of his skin was very easy. It was just that nobody would be so bored as to change their complexion all of a sudden.

Seeing two of his attacks being blocked by Zhao Hai, Ba Li couldn't help but feel ashamed. Just as he was prepared to attack Zhao Hai once more, a wailing sound was heard. Then Ba Li felt something puncture his left arm.

Ba Li knew that this wasn't because he was hit, but because someone locked his left arm. And it was obviously a warning.

With his current strength, Ba Li was very keen about this thing. If a part of his body was being targeted, he would certainly feel it coming.

This also depends on the person. If he was attacked by someone lower level than him, then Ba Li would detect it coming. But if they had the same strength, he would fail to see it.

Being able to hit Ba Li's arm, this meant that they were matched in strength. Ba Li turned his head to look and discovered that it was Tang Jie. Tang Jie was an expert in sneak attacks. If he really wanted to

attack, then things wouldn't have been this simple. This kind of stinging attack meant that Tang Jie wanted to give a warning not an attack.

Ba Li received his greatsword and as he looked at Tang Jie and said, "Tang Jie, what are you planning to do? You want to fight with me now?"

Tang Jie looked at Ba Li's eyes, then he coldly snorted and said, "Ba Li, you're audacious enough to repeatedly attack a Nascent Soul Expert. If you have the ability, then fight me."

Ba Li squinted his eyes as he stared at Tang Jie, then he sneered and said, "I heard people say that your reputation in the Hundred Treasures Realm is at the same level as mine. I wanted to fight you for a long time. However, you people from the Hundred Treasure Realm are like rats, afraid of going out of your base. Since you came out of your rat hole, it's just the right time to fight."

Tang Jie laughed at Ba Li and said, "Ba Li, are you talking about your people? In the past few years, the only ones who rarely come out are the people from the Giant Spirit Realm. I hear that the Giant Spirit Realm is short of people right now? Is it because of this that you would rather abandon the World of Cultivation than fight against us? So pitiful. A high-grade realm actually succumbed to this level."

Ba Li coldly snorted and said, "Stop wasting breath. Tang Jie, are you just good at flapping your mouth? Don't you want to fight or not? Or would you rather us keep talking like this?"

Tang Jie sneered and said, "If I don't fight you, you might think that I'm afraid. Let' go." Then Tang Jie waved his hand, then the people from the Hundred Treasures Realm behind him took several steps back. The people from the World of Cultivation and the Xu Race also took a few steps back.

Ba Li also waved his hand and the Giant Spirit Treasure Ship went back some distance. This left the two with enough space. The two stared at each other, looking for an opening they can use.

Both of them knew that the other had extraordinary strength given by their reputations. Neither of them wanted to take the other lightly.

Originally, Tang Jie wasn't planning on fighting Ba Li. But in order to keep him here, he would need to fight him. But this time, he wasn't fighting to defeat Ba Li. Instead, he wanted to lose to Ba Li without

being seriously injured. This way, Ba Li's ego would increase, urging him to stay here to fight Tang Jie and the others.

Because of this, Tang Jie agreed to fight Ba Li one-on-one. However, despite his underlying plans for the battle, Tang Jie didn't dare treat it lightly. The Hundred Treasures Realm fought against the Giant Spirit Realm for many years without gaining any advantage. This was a huge evidence for the ability of the Giant Spirit Realm. So Tang Jie had no other choice but to be extremely cautious.

Ba Li didn't think too much as he paid attention to Tang Jie's movements. Although Tang Jie was just standing there and looking at him, Ba Li knew that Tang Jie was primed for battle. No matter which angle he looked at, it was impossible to kill Tang Jie with a single strike. In other words, Tang Jie has no openings at this time.

The absence of any openings doesn't mean that they cannot be attacked. Most Cultivators would have no openings at the beginning of a battle, much less a Severed Soul Expert like Tang Jie. But as long as blows begin to be exchanged, an opening would naturally reveal itself.

Thinking of this, Ba Li couldn't help but snort coldly. Then he began to wave his sword towards Tang Jie's location. The attack that he sent out was similar to the one he used on Zhao Hai. It was overbearing and it locked all of Tang Jie's escape routes.

Tang Jie huffed as he moved to the left. Under the guidance of spiritual force, the sword attack also swayed leftwards. Then at this moment, Tang Jie changed direction rightwards, separating himself from the sword attack. At the same time, he raised his hand and sent five throwing knives towards Ba Li.

Tang Jie's throwing knives were in five colors; gold, green, blue, red, and yellow. These five throwing knives were known in the Ten-thousand Realm Battlefield as the Five Elements Throwing Knives.

The color of the throwing knives weren't only made for appearance. When these flying knives were forged, each one of them were made of materials that corresponded to the five elements. And all five knives were also infused with elemental poison.

The five elements were provided by materials that contained them. For example, metals were used for the gold element, while wood was used for the wood element.

As for the elemental poison, weapons with it were very rare. Elemental poison was a very special poison that corresponded to each element. For example, a weapon infused with wood element poison would produce poison of the wood attribute whenever it stabbed the enemy. This type of poison would latch on the wood element of the body and use it to produce poison. It can be said that it was an invasive poison that uses your own body to destroy itself. It was an overbearing poison.

Ordinary people have the five elements in their body. The five elements would balance each other out. But if one of these elements were unbalanced, then the person would become sick.

Things were different for practitioners. A practitioner cultivated their spiritual roots. This so-called spiritual root was in fact a type of five element qi. Most practitioners have an imbalance in the five elements in their body. If a person has a gold spiritual root, then this meant that the gold/metal element in their body was in a larger proportion. The same applied for people who had other types of spiritual roots.

If such a person doesn't cultivate, then they would possess this flaw when they grow up and would repeatedly be sick. Moreover, their lifespan would be considerably shortened.

#### Chapter 1464: Fierce

Cultivation methods used by practitioners use part of the excess elemental energy and transform it. This would balance the five elements inside the cultivator's body. Then the practitioner would cultivate the energy transformed from the five elements.

Elemental poison breaks the balance of the five elements inside the body. Moreover, it does it in an overbearing way. The poison would rampage around the victim's body. The damage ranges from damage to the meridians to awakening the heart's devil.

Because of how terrifying elemental poison was, Tang Jie's throwing knives were famous in the Ten-thousand Realm Battlefield. It's not strange for people to die under these knives.

The throwing knives shot towards Ba Li. Ba Li coldly snorted and turned around. Then a shield appeared and blocked his back. As this happened, the sword had already sent an attack towards Tang Jie.

With a wave of his hand, a dish-shaped artifact appeared underneath Tang Jie. Then the dish-shaped artifact began to spin.

When the sword attack slashed towards Tang Jie, the disk-shaped artifact spun him out of the way. At the same time, the Five Element Flying Knives swam like fishes around Ba Li, looking for an opportunity to attack.

Zhao Hai could see that the two were just probing each other right now. From what he saw, Ba Li's style was vigorous. He uses a huge shield along with his huge sword. They were all heavily skewed towards power. As long as attack hit the enemy even once, it would deal an enormous amount of damage.

As for Tang Jie, he was agile. His techniques focus on flexibility. Even his artifacts were agile. They were like mercury seeping through the ground, looking for any opportunity to penetrate.

At this time, the attacks between the two increased. The two were done probing each other and were now starting to act seriously.

Once the two became serious, Zhao Hai finally saw how terrifying they were. There wasn't anything strange about their fighting style. It was quite similar to the World of Cultivation. Ba Li released several heavy weapons while Tang Jie took out small artifacts like he was throwing coins on the ground.

Ba Li used his shield to protect himself while Tang Jie used his disk-shaped artifact. But instead of blocking attacks, Tang Jie's disk-shaped artifact dodged attacks. Ba Li's attacks simply couldn't reach Tang Jie.

Although the battle between the two looked very lively, their artifacts didn't have any effect at all. Ba Li's heavy weapons couldn't hit Tang Jie while Tang Jie's small weapons couldn't penetrate through Ba Li's shield. Tang Jie's weapons could only circle around Ba Li to look for any opportunities to attack.

After watching for a while, Zhao Hai understood how Tang Jie could make his weapons so flexible. This was because everytime he attacked, he didn't go all in. Tang Jie probably only used 70 percent of his strength.

Ba Li's situation wasn't any different. Although his heavy weapons seem to require his full strength to control, if he did so, then his attacks wouldn't have been as effective.

The two were playing mental chess with each other. The battle was quick, each move was heart-stopping. The two focused on each other and ignored everyone else. This was because they couldn't afford to be distracted. One moment of carelessness would spell their defeat.

It wasn't only the two who were focused on the fight, those watching it were also focused. This was because the two were very important people. They couldn't afford anything happening to them.

Everyone was focused on the fight. If necessary, they would step in and intervene as soon as possible. Therefore, both sides were staring at the battle anxiously. They didn't dare miss anything.

Zhao Hai was also closely observing the fight. He wasn't only preparing to intervene he was also looking at the fighting styles of the two. There is a lot to learn from the battle between geniuses from the Giant Spirit Realm and the Hundred Treasures Realm.

An hour passed by unknowingly, but the two were still fighting hard. Sweat began to appear on their faces. Although both were strong, it was still difficult to be unaffected after a long high-intensity fight. They still had a lot of energy, but the mental pressure was exhausting.

Zhao Hai focused more on the two. He believed that the battle was drawing its end. He just has that feeling.

Just as Zhao Hai thought of this, a change suddenly happened on the battlefield. Tang Jie was a little slower in dodging and a mace artifact that Ba Li used managed to hit his left arm. The mace took out a chunk of flesh from Tang Jie's arm. Tang Jie was immediately bleeding hard.

Seeing this, Tang Wen could no longer continue watching. He immediately led the people from the Hundred Treasures Realm to take their weapons out. The people from the Giant Spirit Realm noticed this and made their move as well. People from both realms rushed into the battlefield, ready to rescue the people from their side.

Zhao Hai didn't move. He felt that something was strange. He can see that Tang Jie has the strength to avoid it. It seems like all of this was intentional.

This caused Zhao Hai to be puzzled. He didn't understand if Tang Jie really did this intentionally, and why he did it. However, seeing the expression on the faces of the people from the Giant Spirit Realm, Zhao Hai understood that Tang Jie did it to keep them here.

With this thought in mind, Zhao Hai looked at Kong Miao and said, "Grandmaster, have everyone attack the Giant Spirit Realm. When the people from the Hundred Treasures Realm retreat to the Octopus Islands, we'll retreat as well."

Kong Miao was taken aback as he looked at Zhao Hai. Zhao Hai didn't say anything and just nodded. Naturally, Kong Miao didn't need to ask as he complied and commanded everyone to take out their weapons and attack the people from the Giant Spirit Realm.

After talking to Kong Miao, Zhao Hai also sent a voice transmission to Xu Wuzun. Although Xu Wuzun was also stunned, he didn't ask anything and also commanded the Hundred Treasures Realm to attack. He just thought that it was Tang Jie who gave the order to Zhao Hai. This was because Tang Jie was evidently fond of Zhao Hai, even preparing for him to go to the Hundred Treasures Realm. Because of this, Xu Wuzun was polite towards Zhao Hai.

The two sides joining the attack didn't cause the Giant Spirit Realm to turn anxious. The people from the Giant Spirit Realm were currently inside the Giant Spirit Treasure Ship. The defensive strength of the ship was formidable, the Xu Race and the World of Cultivation's artifacts wouldn't be able to break through it at all.

Ba Li returned to the Giant Spirit Treasure Ship and immediately commanded it to charge. Seeing this, the people of the Hundred Treasures Realm couldn't help but be flustered as they retreated.

At this time, the Hell King's Ship appeared and rushed towards the Giant Spirit Treasure Ship. A bang was heard as the Hell King's Ship was thrown out. However, the Giant Spirit Treasure Ship didn't seem to be affected and it kept charging forward. What appeared next was a pagoda and it also clashed with the treasure ship. However, it was also knocked back. After that, 12 metal beasts appeared. Although the metal beasts were already big, they looked like puppies next to the Giant Spirit Treasure Ship.

The metal beasts also collided with the treasure ship. However, they also didn't achieve anything. The Giant Spirit Treasure Ship still kept charging forward.

Naturally, all of these things were released by Zhao Hai. When the Hell King's ship was thrown out, he spit out blood. And when the 12 Metal Beasts were hit, not only did he spit out blood, all of his orifices were oozing with blood. Moreover his expression was pale.

At this moment, a large needle 100 meters long shot out from the Hundred Treasures Realm's side. It slammed into the Giant Spirit Treasure Realm and caused an explosion. The needle was also thrown back, but the treasure ship was also halted.

Actually, the preceding hits already reduced the speed of the Giant Spirit Treasure Ship. The needle was the final thing needed for the ship to stop.

As soon as the Giant Spirit Treasure Ship was stopped, it would no longer be easy for it to chase the people from the Hundred Treasures Realm. It was like a car. It was impossible for a small car to stop a huge one. However, it would be hard for a large car to catch up to a smaller car when both started at the same time. Because of its mass, the larger car would need more time in order to gain momentum. Only once its momentum was enough could it be an unstoppable machine.

When the Giant Spirit Treasure Ship stopped, the people from the Hundred Treasures Realm, World of Cultivation, and the Xu Race immediately surrounded it. After surrounding the Giant Spirit Treasure Ship, the three groups immediately commenced their attack. But even if the treasure ship was halted, its formidable defense still remained. Moreover, the treasure ship began to retreat slowly. No matter what the three groups did, they weren't able to prevent the treasure ship from retreating.

It must be known that the Giant Spirit Treasure Ship was just gathering its strength. Once it fell back a certain distance, it would initiate its second charge.

Once the Giant Spirit Treasure Ship drew back some distance, the people from the Hundred Treasures Realm retreated towards the Octopus Islands. Seeing Tang Jie and the others retreat, the World of Cultivation and the Xu Race also retreated. Before long, the three groups were heading towards the Octopus Islands.

Once they arrived at the Octopus Islands, the three teams immediately calmed down. Their flurry outside couldn't even be seen. At this time, Tang Jie's voice was heard, "Little Hai, where is Little Hai? Has anyone seen Little Hai?"

Tang Jie stood in front of everyone as he loudly shouted. The blood flow on his arm has already been stopped. But he still looked bloody and somewhat distressed.

Zhao Hai flew from the World of Cultivation's side. He looked at the bloody Tang Jie and asked, "Brother Tang, I'm here. What's the problem?"

Tang Jie looked at Zhao Hai and said, "Little Hai, are you alright? I just saw you being heavily injured."

Zhao Hai knew that he would be asked this question. A ball of water washed his face with a wave of his hand and his face was clean in a blink of an eye. His face still looked ruddy, but he didn't look wounded at all. Zhao Hai smiled and said, "I'm fine, don't worry. I just did it to fool those fellows."

Upon hearing Zhao Hai, Tang Jie couldn't help but laugh. He patted Zhao Hai's shoulder and said, "Good kid. You actually discovered that I intentionally injured myself."

Zhao Hai smiled faintly and said, "Brother Tang, I'll have to trouble you. But the next time you get hurt, you should choose a sharp weapon. The mace is a heavy weapon among heavy weapons. You might have died there if something went wrong."

Tang Jie couldn't blame Zhao Hai for this. But he just laughed and said, "You're really observant. But now, that Ba Li guy wants to kill me and you. As the matter stands, they wouldn't leave this place easily. Our mission has already been accomplished."

Zhao Hai nodded and said, "But from what I can see, the Giant Spirit Treasure Ship is about to charge once more. Brother Tang, have people take the counterfeit spirit snake needles. Don't worry, I won't go out. Instead, I'll send the Eight Cyan Imperial Chariots. With this, the Giant Spirit Treasure Ship shouldn't be able to hit the island's guardian formation. But let's also leave some hope for the Giant Spirit Realm so that they wouldn't run away."

Tang Jie nodded, then he said, "I'm afraid we would be having a difficult few days ahead of us. Ba Li isn't a fool. Seeing us holed up in here, they will definitely call troops from the Giant Spirit Realm's territory. Once the small realms arrive, we would no longer be able to hold back our strength."

Zhao Hai smiled faintly and said, "When the time comes, we would no longer need to hide our strength. If the Giant Spirit Realm asks the smaller realms for help, then they would have to level the Octopus Islands to the ground or else they would lose a lot of face in front of their subordinates."

Tang Jie laughed and said, "Right, it's just like you said. Little Wen, immediately arrange people to go out and use the counterfeit spirit snake needles. You lead them. Our priority is holding back the Giant Spirit Realm. Do whatever you can to prevent them from hitting the island's guardian formation."

Tang Wen nodded and immediately led a group of people out. In addition to the people tasked with controlling the fake spirit snake needles, there were also 500 people from the Hundred Treasures Realm. Meanwhile, Kong Miao and Xu Wuzun sent out two thousand people from their side. Zhao Hai also released his three Eight Cyan Imperial Chariots.

Ba Li had a calm expression on his face, but there was a feeling of pride in his eyes. The Giant Spirit Realm and the Hundred Treasures Realm had been hostile towards each other for many years. However, their geniuses rarely met each other. Today, he was finally able to face Tang Jie and won. How could Ba Li not be happy with this outcome? It's just a pity that he wasn't able to kill Tang Jie.

#### Chapter 1465: Block

Ba Li felt a bit complacent right now. Nothing makes him happier than stepping on an enemy who had always been on the same level as himself. At this point, the people from the Hundred Treasures Realm have retreated to the Octopus Islands. But to Ba Li, this didn't matter. The Octopus Islands was now a tortoise shell. However, a hard shell can always be broken.

The Giant Spirit Treasure Ship had fallen back an appropriate distance and was now ready for a second charge. Ba Li was very unsatisfied about how slow the treasure ship was. In his opinion, the ship should be swift, charging repeatedly in rapid successions. He wanted to break the shield of the Octopus Islands in order to teach those who dared to fight the Giant Spirit Realm a lesson. And also destroy those who betray the realm.

With this thought in mind, Ba Li couldn't help but get excited. Seeing that the treasure ship was ready, he immediately ordered, "Charge, destroy that guardian formation!"

The Giant Spirit Treasure Ship began to slowly accelerate. Everyone from the Giant Spirit Realm took out their weapons. As soon as the treasure ship breaks through the guardian formation, they would immediately begin their slaughter.

Naturally, this doesn't mean that they would break through the enemy's formation in one attack. Apart from the Formation Breaking Spirit Snake Needle, there were a few things that could break through the enemy's formation in one strike. Even the Giant Spirit Treasure Realm couldn't do it.

However, the people from the Giant Spirit Realm were feeling very lucky. In their opinion, Tang Jie's defeat would affect the morale of the three groups inside the Octopus Islands. Once their morale was affected, it would be easier to break through the island.

Just as the Giant Spirit Treasure Ship accelerated, a group of people suddenly went out of the Octopus Island. There were more than 2000 people and three Eight Cyan Imperial Chariots.

Among the 2000 people, ten of them showed huge needle-shaped artifacts. This kind of artifact couldn't be classified as a weapon. It looked huge and unwieldy.

In order to keep the imitation spirit snake needles a mystery, the needles were kept straight and unmoving. This way, all of them would look like needle-shaped weapons.

The group didn't divide themselves into three. Instead, they arranged themselves in a battle formation led by Tang Wen. The three Eight Cyan Imperial Chariots were in front of them.

Tang Wen looked on as the Giant Spirit Treasure Ship got faster and faster. Just as he was wondering how to command the Eight Cyan Imperial Chariots, the three chariots moved and lined up in front of the treasure ship. Then they all charged forward without any hesitation.

Ba Li stood on the bow of the ship and looked at the charging Eight Cyan Imperial Chariots with disdain. He recognized the Eight Cyan Imperial Chariots very well. The Giant Spirit Realm has a couple of them. To be honest, although it was a large artifact, it was among the weakest of them. If it was attacked by

enough normal artifacts, it would be destroyed, let alone other large artifacts. If the Eight Cyan Imperial Chariots go head to head against other large artifacts, it would no doubt be destroyed.

In Ba Li's mind, Tang Jie's move to attack the Giant Spirit Treasure Ship with the Eight Cyan Imperial Chariots was done so in an act of desperation. The Giant Treasure Ship would eradicate the chariots in a blink of an eye.

Seeing the three Eight Cyan Imperial Chariots beginning to charge, Tang Wen immediately commanded the ten Cultivators that had the imitation spirit snake needles to divide into groups and follow the charge of the chariots. Behind the chariots, the fake spirit snake needles followed one by one. After so many impacts, the Giant Spirit Treasure Ship's momentum should have decreased by a lot.

'Bang' An Eight Cyan Imperial Chariots collided with the Giant Spirit Treasure Realm. However, contrary to what Ba Li thought, the chariot didn't break and was instead just thrown away.

Just as Ba Li looked at the chariot that was flung away, the second chariot crashed into the treasure ship. And just like the first one, it was just thrown away. Then soon it was followed by the third chariot. After hitting three Eight Cyan Imperial Chariots, the speed of the Giant Spirit Treasure Ship was somewhat reduced.

Ba Li was able to notice this, he frowned slightly as he turned to the person beside him and said, "What's happening? It's just three Eight Cyan Imperial Chariots. Why did the ship slow down?"

The person beside Ba Li was his aide. This person was only at the Transcending Tribulation Stage and wasn't the strongest among his peers. However, he was very good at pleasing Ba Li so he became his assistant. Among the Giant Spirit Realm, there were many there were a lot of foxes wearing a tiger's skin around Ba Li.

However, this person was indeed smart. Upon hearing Ba Li, he immediately said, "I'll immediately ask. My lord, please wait for a moment." Then he turned around and went towards the ship's control room.

The Giant Spirit Treasure Ship has a control room. Inside it were plenty of formations being controlled by about a hundred Transcending Tribulation Experts. These people mainly operate the ship, making sure that it runs smoothly. They also provide energy to the ship occasionally. Also, there's a huge formation

that burns spirit stones for the ship. It can be said that this magic circle was the true power source of the ship.

Ba Li's trusted aide arrived at the control room and immediately shouted, "What's the matter? My lord asks why the ship slowed down just after three attacks from Eight Cyan Imperial Chariots."

Although the people in the control room look down on this person, they didn't express their discontent lest they offend Ba Li. One of them replied, "Please tell Sir Ba Li that the ship has yet to arrive at its full speed before it got hit by the other party, so it could only slow down. If the other party keeps attacking, the treasure ship would stop soon."

When the aide heard this, he quickly got out of the room and returned to Ba Li's side to give his report, "My lord, the people in the control room said that the treasure ship had yet to reach its maximum speed before it hit the chariots. Also, if the other party keeps things this way, then the ship would stop before long."

As soon as Ba Li heard this, his complexion couldn't help but sink. He looked at the mana and said, "Tell them that if the treasure ship gets stopped, retreat once more. But they need to make sure that the ship doesn't get stopped the third time." The reason why Ba Li didn't blame the people from the control room was because he discovered that the needle-shaped artifacts from the Hundred Treasures Realm were now heading towards the ship.

With a barrage of rumbling noise, the treasure ship did indeed stop. Then it promptly retreated. But at this moment, Ba Li's aide delivered his order to the control room.

This time, the treasure ship retreated much farther. Tang Wen also noticed this and his expression couldn't help but change. He knew what the other part was doing, so he immediately commanded his men to run forward.

Seeing the people from the Hundred Treasures Realm chasing them, Ba Li's expression turned ugly. He immediately commanded, "Send out 2000 people to block them!"

Ba Li's order was immediately passed and 2000 people disembarked from the Treasure Ship to intercept Tang Wen and the others. Seeing this, Tang Wen knit his brows. If they were restrained by the other

party, then they wouldn't have any means to tail the Giant Spirit Treasure Ship. This will allow the ship to have enough room to speed up. The greater momentum the ship has, the harder it would be to block.

Just as Tang Wen was wondering what to do, Tang Jie's voice was heard, "Little Wen, stop chasing and head back. Don't go too far from the Octopus Islands."

Although Tang Wen didn't understand why, he still directed the group back to the Octopus Islands. They stopped where they were before. There's still some distance from the Octopus Islands, but it's not very far. It's still possible for the Octopus Islands to help them.

When the people from the Giant Spirit Realm saw that Tang Wen and the others had retreated, they thought that they were afraid. So they got excited and charged immediately. Seeing this, Tang Wen frowned but he arranged his people to defend. It must be known that there were only 500 people from the Hundred Treasures Realm and 2000 people from the World of Cultivation and the Xu Race. In this case, it would be impossible for them to face the 2000 people from the Giant Spirit Realm head on. Because of this, they can only take the defensive position right now.

At this time, Tang Wen saw the Giant Spirit Treasure Ship stopping. This meant that the ship was about to begin its third charge. However, they were tied down right now, so it was already impossible for them to block the ship.

Tang Wen couldn't help but be secretly anxious. However, it was useless for him to worry. Now that they had been entangled by the people from the Giant Spirit Realm, they could no longer block the Giant Spirit Treasure Ship. If the treasure ship hits the guardian formation of the Octopus Islands, then it would definitely cause heavy damage to the formation.

At this moment, the Giant Spirit Treasure Ship fully stopped. Then it slowly began to accelerate. Its third charge has begun!

Just as the Giant Spirit Treasure Ship began its third charge, a large crowd of people suddenly came out of the Octopus Islands, commanded by Tang Jie. They formed a huge human net as they killed their way towards the people of the Giant Spirit Realm. Tang Jie brought no less than 2 thousand people with him, 1000 of them from the Hundred Treasures Realm. This caused the people from the Giant Spirit Realm to be held back.

Moreover, the people from the Giant Spirit Realm found that they had been surrounded by all sides. They only have one way to move into, and that was behind them.

The people from the Giant Spirit Realm didn't think much about their situation as they began to organize themselves and slowly retreat. It could be seen from this that the Giant Spirit Realm had high combat literacy. They retreated in an orderly manner without suffering any losses.

Because of the assault from Tang Jie and the others, the people from the Giant Spirit Realm were too focused that they failed to notice what was behind them. The Giant Spirit Treasure Ship was slowly decelerating, on its bow was a pale faced Ba Li!

#### Chapter 1466: Deviation?

Ba Li's complexion was pale as he looked in front of him. He didn't think that he would be bound by Tang Jie. He sent out two thousand people in order to deal with Tang Wen and the others, but they were instead driven to the Giant Spirit Treasure Ship by Tang Jie. They were sent to the path of the treasure ship, blocking the ship's path.

Needless to say, the Giant Spirit Treasure Ship was very big, so shifting its direction would be difficult. It needs a large curve in order to change its direction.

Tang Jie and the others noticed this, so when the Giant Spirit Treasure Ship began to move, Tang Jie led his people out in order to force the people from the Giant Spirit Realm towards the ship's route. Since it happened quickly, it became impossible for the treasure ship to shift its course. The people from the Giant Spirit Realm were so busy keeping Tang Jie and the others out that they failed to notice that they had been forced towards the Giant Spirit Treasure Ship's path.

Ba Li's position in the Giant Spirit Realm was high, so it's impossible for him to ignore the death of 2000 of his people, especially when it's the realm's ship that would smash into them. So when he saw this, the Giant Spirit Treasure Ship had to slow down. Ba Li felt aggrieved, he was actually forced to stop the ship using this method.

However, there's nothing more to say about this, so he gave a command, "Send 2000 people to save the others."

His people complied and immediately sent out 2000 people to rescue the others. Then they returned to the ship as it slowly retreated once more.

Seeing the Giant Spirit Treasure Ship retreating, Tang Wen immediately led his people forward. He also maintained a great distance between them and the ship.

When he saw Tang Wen's action, Ba Li couldn't help but clench his jaws. Tang Wen was like a gum stuck in their hair. It was very hard to get rid of them. If they back off, they would follow, but they always kept their distance. Even if Ba Li wanted to attack them, they would still have time to retreat. And behind Tang Wen, there was Tang Jie's group. Ba Li was aware that if he sent everyone out, they would have a hard time defeating Tang Wen's 20 thousand-man army. It's possible for the Giant Spirit Treasure Ship to hit the octopus island's formation on its own, but it was clear that Tang Jie and the others would have a way to deal with it.

Tang Jie can battle it out with Ba Li's group and still send people to use large artifacts in order to block the Giant Spirit Treasure Ship. As the matter stands, Ba Li has a hard time getting the advantage.

When he thought of this, Ba Li couldn't help but develop a headache. He has no counter to Tang Jie's tactics.

It would have been great if Tang Jie and the others didn't have a way to block the Giant Spirit Treasure Ship. But the problem was that Tang Jie had the means to stop the ship. The Giant Spirit Treasure Ship was Ba Li's greatest weapon in dealing with the Octopus Island's guardian formation. Without the ship, it would be very hard for the Giant Spirit Realm to break through.

The Giant Spirit Treasure Ship kept retreating back. In fact, the Giant Spirit Treasure Ship already had enough distance in order to ram the Octopus Islands with full speed. However, Tang Wen and the others were following them. If the Giant Spirit Treasure Ship initiated its charge right now, then they would no doubt be blocked by Tang Wen.

Ba Li clenched his teeth and said, "Retreat to a safe distance. Let's wait until they no longer follow us. I don't believe they will follow us far back."

Actually, the other people on the ship knew about this. They were also aware that it was impossible for the people of the Hundred Treasures Realm to follow them. However, they still felt aggrieved by the situation.

Sure enough, just like Ba Li thought, when they retreated a thousand li(500km) away, Tang Wen and the others no longer followed them. Ba Li saw this but didn't stop the ship. They still kept retreating. Then they stopped and then began their fourth charge.

At this time, Tang Wen and the others were slowly retreating. In their retreat, they left people behind in certain intervals. These people weren't from the Hundred Treasures Realm but instead were people from the Xu Race. Once they separated from the group, they immediately entered stealth.

Tang Wen stopped at about 500 li away from the Octopus Islands. This distance was enough for the people from the Octopus Islands to save them if a situation occurs. They would also have enough time to return to the Octopus Islands.

Ba Li was relieved when Tang Wen and the others retreated. He stood on the bow and then grit his teeth as he waved his hand and roared, "Charge!" He used his roar to remove the suffocating feeling in his heart.

The Giant Spirit Treasure Ship slowly moved forward. Its speed from the very beginning was slow and would pick up as time went by. When it traveled 300 li, the ship was already at its peak speed. To be honest, the time it took for the ship to wind up made Ba Li feel helpless. However, he knew that if the ship wasn't as big as it was, it wouldn't have as much power as it would have.

Before long, the Giant Spirit Treasure Ship entered the vicinity of the Octopus Islands. Seeing Tang Wen and the others, a smile appeared on Ba Li's face.

When the treasure ship was 800 li away from the islands, a group of people suddenly appeared on its left side. This group of people belonged to the Xu Race. There were very few of them, about 10. When this group of people appeared, they immediately took out a huge needle that was 100 meters long. Then the flying needle flew straight towards the ship.

There was a bang as the needle hit the left side of the ship. The hull of the ship shook slightly but its speed didn't decrease at all. The ship kept flying forward but the group from the Xu Race disappeared after taking the flying needle back.

Ba Li looked at the direction where the Xu Race people vanished. He frowned but didn't say anything, the ship was still advancing forward.

With how fast the Giant Spirit Treasure Ship was, it was able to traverse more than ten li in a blink of an eye. At this time, another Xu Race team appeared and did the same as the group before them. Upon hitting the ship with their needle, they immediately disappeared. Ba Li's brows wrinkled tighter. He wasn't afraid that the ship would be destroyed. In fact, he had absolute confidence in the ship. He knit his brows not because he was worried but instead he was feeling impatient. The people from the Xu Race looked like flies as they continually bothered the Giant Spirit Treasure Ship.

However, it was also impossible for him to send people to deal with the Xu Race. This was because the treasure ship had reached its maximum speed. People couldn't just leave the ship at this point. With the amount of air pressure present, leaving the ship had become dangerous.

If he wanted to send someone to deal with the Xu Race, then Ba Li would have to slow the treasure ship down. This was impossible for Ba Li to do. Even if someone had a knife on his neck, he still wouldn't slow the treasure ship down. If Zhao Hai knew that Ba Li was talking about now, then he would be surprised. Ba Li seems to have turned into a terrorist who would crash his plane in a building no matter what.

Ba Li not making the ship slow down didn't surprise the other people on the ship. However, the Xu Race didn't stop because of this. Small groups of Xu Race people appeared one after another, sending needles whenever they appeared. After ten groups of Xu Race people sent needles towards the ship, they could no longer be seen. Just when Ba Li let out a sigh of relief, three Eight Cyan Imperial Chariots appeared and crashed themselves into the ship one by one. Ba Li was so angry that smoke could almost be seen on the top of his head. Fortunately, the ship didn't slow down. They were still crashing towards Tang Wen and the others in front of them.

Tang Wen calmly stood in place as he looked at the treasure ship getting closer and closer. Then he turned his head and said, "Are you ready?"

The people beside him nodded and said, "We're ready!" Tang Wen nodded, then he waved his hand and said, "Disperse!"

Just as Tang Wen said that, the people beside him ran off in all directions. It doesn't seem like they were retreating. Instead, they looked defeated as they scattered.

Seeing the actions of Tang Wen and the others, Ba Li couldn't help but laugh. Then he turned to his aide and said, "See that? Those fellows are really cowards. They were immediately frightened and dispersed. Hahahaha. Too laughable."

Ba Li's aide hastily replied, "They're truly cowards. Seeing my lord, they would naturally disperse." Although he clearly knew that this wasn't the case, Ba Li still patted his aide's shoulder in praise.

However, Ba Li quickly discovered that something wasn't right. Their route had deviated. According to their flight path, they would fly past the Octopus Islands!

Seeing this, Ba Li's proud expression immediately turned dark. Then he angrily roared, "Do those idiots in the control room not know how to steer the ship! Why did our path change?"

Nobody replied, turned his head to his aide and said, "Ask those idiots in the control room what happened!"

The aide nodded and then immediately left. Actually, the aide already knew what happened, but he didn't have any guts to express his thoughts or else he would bear Ba Li's anger alone. Therefore, he ran towards the control room. But he didn't ask why the path deviated, instead he asked, "Can we change directions?"

The person in the control room bitterly smiled and said, "We don't have enough time. The other party has obviously included this in their calculations. After the last attack on the ship, we can no longer change back."

The aide smiled bitterly as he turned around and returned to the bow. Ba Li's eyes were spitting fire at the Octopus Islands as they passed right by it. However, there was no way to salvage the situation. He knew that the reason why the ship changed its path was because of the attacks made by the Xu Race along the way.

## Chapter 1467: Thousand Flower Rain

In fact, the situation wasn't difficult to understand at all. The Giant Spirit Treasure Ship at full speed was like a truck that was stocked full. It's difficult to stop the truck from the front but it's easy to divert its direction from the side.

The people from the Xu Race were carrying the fake spirit snake needles. Without much support, these needles couldn't damage the treasure ship. However, every five blows to the ship was done by Severed Soul Expert, which caused its impact to be heavier than usual. So before Ba Li knew it, the treasure ship was shifted off course.

Besides the Xu Race using the fake spirit snake needles, there's also Zhao Hai's Eight Cyan Imperial Chariots. Each of their crashes caused the ship to change its direction by a bit.

These changes didn't happen at once. Only through multiple collisions did the ship's direction change. This caused the people in the control room to be late in discovering the deviation.

In fact, when the first strike arrived, the control room no longer had any way to control the direction of the ship. So even if they want to change its direction, they would no longer be able to do so.

Seeing the Giant Spirit Treasure Ship brush past the Octopus Islands, Tang Jie couldn't help but laugh. He turned his head and patted Zhao Hai's shoulder as he said, "Little Hai, good job. That was a good idea. Hahaha, Ba Li's expression was wonderful!"

Zhao Hai smiled faintly and said, "After this, I think Ba Li would understand his faults. We should request reinforcements. The true battle is about to come."

Tang Jie's expression calmed, then he nodded and said, "Right, the real battle is coming. However, it would take a few days before their side sends more people. We have enough time. Right Little Hai, I have good news. The realm will send us 5,000 people as reinforcements. Moreover, they will bring enough materials with them in order to make more fake spirit snake needles."

Zhao Hai was stunned, then he smiled bitterly and said, "Brother Tang, you don't want me to give each of you a fake spirit snake needle, right? To be honest, there's no need to make so many imitations. Also,

I can't refine all the time. And the imitations aren't as flexible and strong as the real one. Even if it's used by Severed Soul Experts, it can only be as strong as the Eight Cyan Imperial Chariots. It's big, but Transcending Tribulation Experts can't use it to break guardian formations. And it also couldn't be used several times. It's not worth it making a lot of them."

Tang Jie sighed and said, "I'm aware of that, but Little Hai, you should know something about the Giant Spirit Realm. In the Ten-thousand Realm Battlefield, the Giant Spirit Realm has one of the best large artifacts. In the past, the Hundred Treasures Realm suffered against them because of these artifacts. Large artifacts are much better compared to ordinary artifacts. If we want to deal with the Giant Spirit Realm, then your fake spirit snake needles will be important. We'll have to trouble you in making them."

Hearing Tang Jie, Zhao Hai nodded and said, "Alright, rest assured, I'll do whatever I can."

Tang Jie nodded, then he said, "There's also refining masters coming alongside the reinforcements. When the time comes, I'll have to shamelessly ask you to tell them the method of making the fake spirit snake needles."

Zhao Hai smiled faintly and said, "The method isn't that extraordinary. Don't worry, once they're here, I'll give them the quantities of materials as well as the formations needed to make the spirit snake needles."

Tang Jie nodded, then he turned his head towards the Giant Spirit Treasure Ship and said, "If we can defeat the Giant Spirit Realm this time, then the Hundred Treasures Realm would gain a huge advantage. And Little Hai will be the hero of the Hundred Treasures Realm. The realm wouldn't treat you unfairly."

The reason why Tang Jie told Zhao Hai about this was because he already told Zhao Hai that he would bring him to the Hundred Treasures Realm when all of this was over. Zhao Hai would officially join the Hundred Treasures Realm.

When he heard what Tang Jie said, Zhao Hai only smiled faintly and didn't say anything. To be honest, he didn't have any interest in joining the Hundred Treasures Realm. He already knew the Hundred Treasures Realm's cultivation methods as well as the Giant Spirit Realm's. What he needed was the methods of the other realms. So what he wanted to do was to look at the other realms to find something new.

What Zhao Hai cared the most was the origin of the Six Realms Battlefield and the Ten-thousand Realm Battlefield. He wanted to know the people behind these subspaces.

Tang Jie looked at Zhao Hai and couldn't help but smile. By this point, his appreciation towards Zhao Hai knows no honor nor disgrace. Zhao Hai was a person who did great things.

Tang Jie could now understand Kong Miao. In the past, he found it strange that Kong Miao would confide with Zhao Hai whenever he makes a decision. But after seeing Zhao Hai's abilities, Tang Jie understood why Kong Miao did so. In fact, he was now similar to Kong Miao. No matter what happens, he would discuss it with Zhao Hai.

Under everyone's gaze, the Giant Spirit Treasure Ship took a large turn and went into the distance once more. Its speed had also slowed down. It seems like Ba Li has discovered their weakness.

The weakness of Ba Li's group was just a scant few. If they had enough manpower, then they would be able to stop the attacks of the Xu Race and also restrain Tang Jie's group. They would no longer think about many things. But because they lacked people, they could only be suppressed time and time again. This irritated Ba Li.

However, although he was annoyed, Ba Li knew that they couldn't go on like this. So after the ship slowed down, he turned to his side and said, "Let's leave the Octopus Island's area and immediately send a message back to the realm. Let them send reinforcements as soon as possible."

Someone beside him took the order and left the Giant Spirit Treasure Ship. In a short while, they left the Octopus Island's region and disappeared."

Seeing the Giant Spirit Treasure Ship heading back, the people on the Octopus Islands cheered. They knew that this wasn't the end to the Giant Spirit Realm, but this also meant that they won the first confrontation.

It must be known that this win wasn't easy to obtain. They had to save part of their strength so that the Giant Treasure Ship wouldn't retreat immediately. They had to make Ba Li and the others think that the Octopus Islands were vulnerable. From what happened, it's clear that they were doing very well.

Moreover, the people that the Giant Spirit Realm sent this time weren't weak. Not only did they send the Giant Spirit Treasure Ship, there's also 5000 people from the Giant Spirit Realm. Five thousand wasn't a small number.

Actually, the people most excited were the people from the World of Cultivation and the Xu Race. For a long time, people from high-grade realms had always been beyond their reach. When they looked at them, they always felt that those people were kings. As long as the Giant Spirit Realm sends 3-4 thousand people, then they would be able to drive out lower-grade realms from the Ten-thousand Realm Battlefield.

But now? They were actually able to defeat the people from the Giant Spirit Realm. Although this was greatly due to Tang Jie, no matter what, didn't they contribute? Moreover, they also exerted a lot of effort, so this was enough to make them feel proud.

Tang Jie glanced at the people cheering around him and faintly smiled. Then he turned his head to Zhao Hai and said, "Alright, let's head back. Little Wen, arrange people to stand guard against the people from the Hundred Treasures Realm." Tang Wen nodded, then he went over to Kong Miao and Xu Wuzun in order to arrange the sentries.

Zhao Hai returned to the Octopus Islands with Tang Jie and the others. Tang Jie had everyone take a rest while he took Kong Miao, Xu Wuzun, Tang Jie, and Zhao Hai back to his residence.

After settling themselves inside the residence, Tang Jie smiled and said, "I really didn't expect Ba Li to head back too soon. I reckon he's burning with anger right now and preparing troops in order to begin his second attack."

The people present chuckled, they were in a very good mood after repelling a powerful enemy. Although they haven't killed anybody, they were still glad with the result. Tang Jie looked at everyone and said, "The reinforcements from the realm should arrive soon. The first batch will arrive in two hours. When the time comes, I'll have to ask Mister Xu Wuzun to help me arrange their accommodation."

Xu Wuzun immediately nodded and said, "Captain Tang can rest assured, I'll take care of it. Right, who will be commanding the reinforcements?"

Kong Miao also paid attention when he heard this. To be honest, they were a bit worried. Tang Jie has been polite towards them because the World of Cultivation and the Xu Race were stronger when combined. But as soon as the Hundred Treasures Realm's reinforcements arrive, the strength of the Hundred Treasures Realm here would increase. When that time comes, it would be very hard to tell if the Hundred Treasures Realm would maintain their attitude.

The one most worried about this was Xu Wuzun. The World of Cultivation didn't have to worry a lot since Zhao Hai would be joining the Hundred Treasures Realm. The people from the Hundred Treasures Realm look at the monk's face and see the Buddha, so they wouldn't treat the World of Cultivation unfairly. Moreover, the World of Cultivation betrayed the Giant Spirit Realm, so they were very useful for the Hundred Treasures Realm.

But the Xu Race was different. In the past, the Xu Race didn't have the qualifications to become subordinated to the Hundred Treasures Realm. And with the Xu Race's bad reputation, if the Hundred Treasures Realm didn't treat them well, then they couldn't do anything.

If the Hundred Treasures Realm always listened to Tang Jie's words, then Xu Wuzun wouldn't be too worried. After all, Tang Jie was very polite to them. And being comrades in battle, Tang Jie shouldn't burn the bridge after crossing the river.

But if another person from the Hundred Treasures Realm assumes command, then things would be hard to predict. Who knows how the reinforcements would see them? After all, the Xu Race had always been unwelcomed in the Ten-thousand Realm Battlefield.

Tang Jie was also a smart person, so he immediately understood Xu Wuzun's concerns. He smiled and said, "The commander of the group is my Senior Brother Mu Yu. He is my Senior Brother from the same master. Our relationship with each other is very good and he takes very good care of me. He's also a powerhouse in the Hundred Treasures Realm. There's almost no one of his generation that is as famous as him. Since he's leading the reinforcements, we have nothing to worry about."

Hearing Mu Yu's name, Xu Wuzun couldn't help but stare. Then his face lit up as he said, "Do you mean Mu Yu, the Thousand Flower Rain?"

Tang Jie smiled faintly and said, "Senior Brother is the most powerful expert of the young generation. His Thousand Flower Rain is very well-known in the Ten-thousand Realm Battlefield."

Hearing this, Zhao Hai and Kong Miao knew who Mu Yu was. It must be known that Mu Yu was the most powerful expert among the Hundred Treasures Realm's younger generation. However, he handles things very low-key. Therefore, not everyone in the Ten-thousand Realm Battlefield knew about him. Nevertheless, he was written on the records of the World of Cultivation. The reason why Mu Yu was recorded was his artifact.

Mu Yu's artifact was known as the Thousand Flower Rain, the same name was given to his technique. It was said that this artifact was researched and made by Mu Yu himself. When using it, one would feel as though they were plunged into a sea of flowers. Mist came along with the flowers as well as the drizzle of rain. It had a beautiful and charming look to it.

However, almost everyone who saw this scenery has died. Nobody knows how he uses his artifact nor did anybody see what it looked like. Because of this, Mu Yu was placed in the 'Do not offend lists' of many realms.

Thousand Flower Rain was not Mu Yu's only nickname, he was also called the Thousand Flower Emperor. And in the jade slip of the World of Cultivation, Mu Yu's nickname was exactly that. For a while, Zhao Hai and Kong Miao didn't know who Mu Yu was. But upon hearing his nickname, they immediately remembered.

Tang Jie wasn't lying, Mu Yu's Thousand Flower Rain was indeed very famous in the Ten-thousand Realm Battlefield. He was especially famous among high-grade realms. But because of his covert activities, the name Mu Yu wasn't very known. Moreover, Mu Yu only goes against high-grade realms and never lower-grade realms.

Hearing that it was Mu Yu who would lead the reinforcements, Zhao Hai and Kong Miao were also happy. Mu Yu had a great reputation. With him and his 5000 men, the protection of the Octopus Islands would no longer be a problem.

Tang Jie looked at everyone and said, "Mister Xu Wuzun, please arrange the residences of the reinforcing army. Mister Kong Miao, please rest first, I still have something to say to Little Hai and Little Wen."

Chapter 1468: Tang Jie's Discovery!

After Kong Miao and Xu Wuzun left, Tang Jie turned his head to Zhao Hai and said, "Little Hai, tell me the truth, what divergent ability do you have?"

Hearing Tang Jie, Zhao Hai replied, "About my ability, I think it's already well known. It's nothing serious."

Tang Jie looked at Zhao Hai and said, "Little Hai, I'm not talking about your spatial ability. We all know about it. What I mean is, don't you have another divergent ability?"

Zhao Hai stared, then his expression changed. Did Tang Jie discover the existence of the Space? However, this shouldn't be the case. Zhao Hai quickly recalled what he did to expose the Space.

Seeing Zhao Hai's expression, Tang Jie smiled and said, "I think I guessed right. You really do have another ability. Tell me, does it have something to do with reconstruction?"

Hearing Tang Jie, Zhao Hai stared. But he was now prepared, so he revealed a startled expression.

When he saw this, Tang Jie knew that he had hit the mark. Then in a light tone he said, "Did I guess correctly? I heard that someone from the Demon Puppet Realm has a strange ability. Because of him, the Demon Puppet Realm managed to obtain so many refining techniques as well as methods to make artifacts. You have the same ability right?"

Zhao Hai relaxed as soon as he heard this. If this was what Tang Jie discovered, then everything's fine. As long as the Space was kept secret, then he could reveal other things.

Zhao Hai looked at Tang Jie and then sighed as he said, "Actually, my ability doesn't only reconstruct, it can also synthesize materials like refining. I can combine whatever materials I want, making my refining much easier."

Hearing Zhao Hai, Tang Jie laughed and said, "Fantastic! Then as long as we deal with the Giant Spirit Treasure Ship, can you get it's refining method, the artifacts and materials used to make it, as well as the proportion of materials?"

Zhao Hai smiled faintly and said, "As long as we can get the Giant Spirit Treasure Ship, I can reconstruct it. And if we have enough materials, we can make as many Giant Spirit Treasure Ships as we want."

Tang Jie's eyes shone, then he laughed and said, "Good, that's good. How about the Formation Breaking Spirit Snake Needle?"

Zhao Hai smiled and said, "It's the same. As long as you give me enough materials, I can make Formation Breaking Spirit Snake Needles."

Tang Jie laughed as he patted Zhao Hai's shoulder. Then he said, "That's good. With this, your status in the Hundred Treasures Realm would surpass me in no time."

Zhao Hai looked at Tang Jie in confusion as he said, "Why? Even if I can refine items, I can't be the only refining master in the Hundred Treasures Realm, right?"

Tang Jie looked at Zhao Hai and then shook his head as he said, "Kid, you don't even know how lucky you are. Are you even aware that refining can fail? Even the refining of ordinary artifacts can fail. If you can reach a success rate of 20% then you are already considered as a top refining master. As for powerful artifacts like the Formation Breaking Spirit Snake Needle, the success rate of making it is less than 1%. So many materials are wasted in making it. Even if there's a 1% success rate, not everyone has so many materials to waste. Therefore, top refining masters are respected in many realms. And not everyone is like you, being able to refine artifacts with a 100% success rate."

Zhao Hai forced a smile and said, "It's not that I have a 100% success rate. It's just that I can decompose my failures and use them to refine once more. It can be seen that I have a 100% success rate, but I'm just not wasting any materials."

Tang Jie laughed and said, "That's still very great. Little Hai, with you, the Hundred Treasures Realm will increase in strength. To tell you the truth, the Hundred Treasures Realm has already amassed a lot of treasures. However, we have too few refining masters. Once you join, those treasures will be turned into powerful weapons."

Zhao Hai looked at Tang Jie and said, "Brother Tang, you didn't think about the greatest use of my ability. What do you do to damaged artifacts or artifacts you gained after looting dead enemies?"

Hearing Zhao Hai, Tang Jie's eyes lit up as he said, "Those things, you can reuse them and make them into new artifacts? Damn, I didn't think of that. If that is the case, then this is much bigger than I thought it would be!"

Tang Jie stood up and walked around the room. Once his excitement has sizzled down, he looked at Zhao Hai and said, "Little Hai, are you confident that we can deal with the Giant Spirit Treasure Ship?"

Zhao Hai smiled faintly and said, "I'm very confident. That unwieldy thing isn't a threat to me. It'll be easy to defeat it."

Tang Jie knit his brows and said, "Little Hai, don't be too overconfident. The Giant Spirit Treasure Ship isn't that weak."

Zhao Hai smiled and said, "Brother Tang, rest assured. I wouldn't be complacent. Look at this." After he said that, Zhao Hai waved his hand and a Formation Breaking Spirit Snake Needle appeared in front of him. This spirit snake needle didn't have the stiffness that the fake spirit snake needles had. It looked incredibly flexible. Most importantly, it looked more flexible than the real Formation Breaking Spirit Snake Needle.

Tang Jie stared and couldn't help but touch the spirit snake needle. Naturally, he couldn't see anything special. He scanned it with his spiritual force but was still unable to find something out. He looked at Zhao Hai and said, "What is this?"

Zhao Hai smiled faintly and said, "It's my artifact, Liquid Silver. You should have information about it. This is the masterpiece of a genius refiner of the World of Cultivation. He modeled it after the Void Temple's Ten Thousand Transformations Staff. It's made very well, but he wasn't able to finish the last step. Afterward, I finished it and completed the last step. In my hand, this artifact can transform at will and even fuse with artifacts that I refine, as you can see. This Formation Breaking Spirit Snake Needle is an imitation, but it's much better than the imitations I made. Its actual power isn't bad. As long as we stop the Giant Spirit Treasure Ship, I can use this to break its defensive formation. In addition to our other artifacts, even if the Giant Spirit Treasure Ship's defense is strong, I'm afraid it still wouldn't be able to withstand it."

Tang Jie's expression turned brighter and brighter as he listened to Zhao Hai. Then he laughed and said, "Alright, then I'll trust your confidence. Hahaha. Good. Let's see if the Giant Spirit Realm continues to be arrogant after this."

Zhao Hai smiled and didn't say anything. Tang Jie thought about the situation more and after some time he looked at Zhao Hai and Tang Wen, "Little Hai, Little Wen, let's go wait for Big Brother Mu Yu at the Transmission Formations. I reckon they will be arriving soon." Zhao Hai and Tang Wen complied as they stood up and followed Tang Jie out.

When he got outside, Tang Jie asked two people from the Hundred Treasures Realm to inform Xu Wuzun and Kong Miao and ask them to head to the transmission formations. Mu Yu had a high status in the Hundred Treasures Realm. Like Tang Jie, he was seen as a key genius that needs to be cultivated. Mu Yu was also being trained to be a future head of the Hundred Treasures Realm.

There's no need for Tang Jie to express Mu Yu's status, Kong Miao and Xu Wuzun would still meet him. If Mu Yu and the others think that they had been neglected, then Xu Wuzun and the others would regret it very much.

Before long, the group arrived at the transmission formation. The allocated area was huge. After looking at the transmission formations, Tang Jie turned to Xu Wuzun and said, "Mister Xu Wuzun, have the accommodations been prepared?"

Xu Wuzun nodded and said, "Captain Tang, rest assured, everything has been prepared. Once the reinforcements arrive, they can move in immediately. There's no need to worry"

Tang Jie nodded and said, "Is there any information coming from the sentries outside?" The sentries that Tang Jie meant were the Xu Race that were tasked as lookouts. After all, at this point, only Zhao Hai had the means to detect them here in the Ten-thousand Realm Battlefield. Even the Giant Spirit Realm would find it difficult to detect the Xu Race.

The main purpose of these sentries was monitoring the Giant Spirit Realm, preventing Ba Li and the others from making any surprise attack. The farthest sentry location was ten thousand li away from the Octopus Islands. If the Giant Spirit Realm wanted to attack, the Octopus Islands would have enough time to react.

Xu Wuzun replied, "The last report I got was an hour ago. Nothing has happened yet. It seems like the Giant Spirit Realm has retreated. I think they're waiting for reinforcements."

Tang Jie nodded and said, "It's just as we expected. Ba Li went back to get more manpower before attacking once more. This time they will have a lot more people. Even if we have reinforcements, we still need to be careful. Based on our previous fights against the Giant Spirit Realm, the Giant Spirit Realm would bring about 50 thousand people this time. Maybe they'll bring even more."

Hearing this, Xu Wuzun and Kong Miao's expression turned ugly. Xu Wuzun muttered, "Fifty thousand people? If we add Ba Li's group, then wouldn't they number 55 thousand?"

Tang Jie nodded and said, "And it could be much more, not less. Even if Senior Brother Mu Yu arrives with his reinforcements, they will only number 30 thousand people. Almost half of the Giant Spirit Realm. Because of this, we need to take advantage of every situation as possible."

Xu Wuzun and Kong Miao nodded, their expressions were somewhat heavy. They knew that losing this war meant that the World of Cultivation and the Xu Race would lose thousands of people. The Giant Spirit Realm might not be able to do anything to the Hundred Treasures Realm, but they will certainly retaliate against the World of Cultivation and the Xu Race.

#### Chapter 1469: Mu Yu

A white light flashed from the transmission formation before a hundred figures appeared. Once the light dimmed down, Tang Jie and the others were finally able to see the people who arrived.

Leading the 100 people was a man who looked 30 years old. He had elegant long hair that was tied casually in a ponytail. His eyes were bright and his face had a warm smile. Along with his fair skin, the man looked mild-mannered and cultured.

He's not very handsome but his temperament made him attractive. He doesn't look like a person who experienced many battles. He was more like a scholar who was gentle and polite. He gives a warm and peaceful feeling.

Although he was wearing black clothing, the impression he gave people wasn't threatening at all.

However, upon seeing this person, Zhao Hai couldn't help but narrow his eyes. Actually, this man has the same temperament as him. Zhao Hai believed that this person was incredibly dangerous. After all

this person was an expert at hidden weapons. What do hidden weapons do? They were used for assassination. These weapons strike when you least expect them.

People who use hidden weapons don't show their presence too much. The more you don't pay attention, the more advantageous it would be for them. Tang Jie's aura was extremely revealing, so he wasn't good in this aspect of being a hidden weapons master. This made Mu Yu a terrifying person.

Although Tang Jie has yet to make an introduction, Zhao Hai already knew that this person was Mu Yu. However, Zhao Hai didn't look at Mu Yu for long as he shifted his attention to the people who arrived with him.

At this time, Tang Jie stepped forward and welcomed Mu Yu with a salute, "Senior Brother." Zhao Hai followed along and gave a salute. He guessed right, this person was indeed Mu Yu.

Mu Yu chuckled and said, "Little Jie, you're too polite. When did you ever call me Senior Brother? Do you want me to beat you?"

Hearing Mu Yu, Tang Jie couldn't help but laugh as he said, "Big Brother Mu, aren't there other people here? No matter what, you still have to acknowledge your seniority. Right, let me introduce you, this is Zhao Hai. The realm already agreed for me to bring him back after this matter is over. From now on, Little Hai is one of us."

Zhao Hai took a step forward as he bowed and said, "I have seen Senior Brother Mu Yu."

Mu Yu looked at Zhao Hai, then he patted Zhao Hai's shoulder and said, "Don't be so polite. Just like Little Jie, you can call me Big Brother Mu from now on. Little Hai, your name has become very loud in the Hundred Treasures Realm. Hahaha."

Zhao Hai smiled and said, "Big Brother Mu, don't terrify me. You're making me embarrassed."

Upon hearing Zhao Hai, Mu Yu couldn't help but laugh as he said, "I don't intend to embarrass you. But now that you say this, I really want to embarrass you."

Tang Jie smiled and then said, "Big Brother Mu, this is Grandmaster Kong Miao and Grandmaster Xu Wuzun."

Kong Miao and Xu Wuzun stepped forward and said, ""I have seen Mister Mu Yu.""

Mu Yu nodded as he smiled and said, "The Hundred Treasures Realm is blessed with the two of your realms joining us. On behalf of the Hundred Treasures Realm, Mu Yu thanks you both."

Kong Miao and Xu Wuzun hastily replied, "We don't dare accept Mister's gratitude."

Mu Yu smiled faintly and said, "Alright, there's no need to be too polite. Little Jie, do we have a place to stay in? These folks need to rest while we talk about the details of what happened."

Tang Jie immediately took care of things. Mu Yu's people were settled in while Mu Yu was given his own residence. This residence was very big, much bigger than the one Tang Jie had. The interior decoration was done very well. It seems like this was the best residence that the Xu Race could give.

After settling inside the residence, Tang Jie explained the situation of the war to Mu Yu. The performance of Zhao Hai and the others have also been reported.

Mu Yu listened to the report carefully. When Tang Jie was finished, Mu Yu let out a long breath and said, "Alright, you did really great. The Giant Spirit Realm just retreated but hasn't left. They will prepare for a large-scale attack. We need to be careful moving forward."

Tang Jie nodded and said, "We also think the same. Right now, the greatest threat we have is the Giant Spirit Treasure Ship. So as long as we restrain it, the Giant Spirit Realm would find it very hard to attack the Octopus Islands.

Mu Yu nodded and said, "That's true. But both of our hands need to be prepared. The Giant Spirit Realm also has its own Formation Breaking Spirit Snake Needle. It's not impossible for them to send it over as well. Besides, are you confident in dealing with the Giant Spirit Treasure Ship?"

Tang Jie smiled and said, "Senior Brother can rest assured, there will be no problem. Did you see the fake spirit needle that I sent back? As long as we have several of it, then the Giant Spirit Treasure Ship is not a problem."

Mu Yu nodded, then he turned to Zhao Hai and smiled, "Little Hai is truly gifted by the heavens. The fake spirit snake needles still retained their powerful might. We tried it out by breaking formation and it's really powerful. I believe it will have no problems dealing with the Giant Spirit Treasure Ship."

Zhao Hai smiled faintly and said, "Big Brother Mu is overpraising me. The fake spirit snake needles have a lot of weak points. Compared to the real thing, it's still too far."

Mu Yu laughed and said, "You don't need to be too polite. Quality items like the Formation Breaking Spirit Snake Needle aren't easy to make. Being able to refine imitations of it is already a formidable ability. I'm afraid we'll be using the fake spirit snake needles a lot during our battle against the Giant Spirit Realm."

Zhao Hai smiled faintly and said, "If the artifact is good, then it naturally needs to be used. Big Brother Mu praises me too much." Mu Yu waved his hand and stopped discussing the topic. Instead, he turned to Tang Jie and said, "Is there any news about the Giant Spirit Realm's side?"

Tang Jie shook his head and said, "There's nothing coming from their side. But I'm certain that the Giant Spirit Realm has no presence in a 10 thousand li radius around the Octopus Islands. I currently don't know where they are. Little Hai, do you have any idea?"

Zhao Hai nodded and said, "I know, they're currently staying at the base of the Imperial Spirit Sect. They're recuperating as well as waiting for their reinforcements."

Mu Yu nodded, "I'm aware of the Imperial Spirit Sect. That should be the people from the Imperial Spirit Realm. They're an upper mid-grade realm." Then while he was talking, he took out a mirror artifact and used it. The mirror flashed for a while before a map appeared. Then the map became three-dimensional.

After that, the map moved fast and then stopped on a certain place. Zhao Hai and the others looked at the map and saw that it depicted the territory of the Giant Spirit Realm. In the area covered on the map,

there's a red point. Mu Yu pointed towards it and then the map enlarged, showing a place close to the Octopus Islands.

Then Mu Yu gestured towards the place and said, "This is the base of the Imperial Spirit Sect. It'll take three days of travel from here to there. If they use transmission formations to send their reinforcements, they should be here in a few days."

What Mu Yu said was correct. Although Ba Li's group was able to reach the Imperial Spirit Sect's base quickly, that was because they were using the Giant Spirit Treasure Ship. If a person flew normally, then they would take at least three days.

Mu Yu looked at Zhao Hai and asked, "Little Hai, are you sure that they're in the Imperial Spirit Sect?"

Zhao Hai nodded and said, "I'm sure. Several of my small Undead latched onto the Giant Spirit Treasure Ship. I should not be wrong."

Mu Yu nodded and said, "Can you spot the reinforcements arriving?"

Zhao Hai replied, "I can. But the Giant Spirit Treasure Ship had just arrived. Their reinforcements had yet to arrive. But I reckon they'll be there soon."

Mu Yu nodded, "Continue monitoring them. If someone from the Giant Spirit Realm arrives, immediately inform me. Also, count how many reinforcements arrived."

Zhao Hai nodded, "Alright. Big Brother Mu can rest assured." Zhao Hai knew that Mu Yu was worried that the Giant Spirit Realm would bring a Formation Breaking Spirit Snake Needle with them. If they really did, then things would be troublesome.

Mu Yu looked at everyone and said, "Everyone, I have good news. When you migrated out of the World of Cultivation's base, the realm's second plan has begun. Right now, what we have to do is to resist the attack of the Giant Spirit Realm. The longer we hold them off, the more advantageous it would be for the Hundred Treasures Realm. It's best if there are more Giant Spirit Realm natives in the reinforcements. This way, their reputation would get a greater hit when we succeed. As long as we

restrain the Giant Spirit Realm here, then the realm would give them a huge surprise. This Mu Yu will have to rely on everyone.”

Everyone replied, “We’re willing to follow Mister’s orders.”

Mu Yu nodded, “I know that the World of Cultivation and the Xu Race have some worries. After all, you fought against the Hundred Treasures Realm before. Let me tell you, our Hundred Treasures Realm wouldn’t collect debts after things have settled. I can vow on my heart’s devil that the Hundred Treasures Realm would keep its word and protect you.”

Hearing Mu Yu, Kong Miao and Xu Wuzun were completely assured. It must be known that a vow on one’s heart’s devil was especially important to a cultivator. Therefore, Kong Miao and Xu Wuzun stood up simultaneously and said, “We’re willing to give our lives to the Hundred Treasures Realm!”

#### Chapter 1470: Furnace Formation

Mu Yu looked at Zhao Hai as he chuckled and said, “Little Hai, there are a few refining masters among the reinforcements this time. I’ll have to ask you to teach them how to make the fake spirit snake needles.”

At this time, Kong Miao and Xu Wuzun already left the room to take care of things. The only people left were Mu Yu, Tang Jie, Tang Wen, and Zhao Hai. Therefore, Mu Yu didn’t hesitate to tell this to Zhao Hai.

Zhao Hai smiled and said, “Big Brother Mu, rest assured. I won’t omit any details.” Mu Yu gave a satisfied nod. Then he replied, “We will not make you suffer a loss.”

Without waiting for Zhao Hai to speak, Tang Jie smiled faintly and told Mu Yu about Zhao Hai’s ability. Hearing Tang Jie, Mu Yu stared for a moment before a flash of glee appeared on his face. He didn’t expect Zhao Hai to have such an ability. He immediately turned to Zhao Hai and said, “Little Hai, is Little Jie telling the truth?”

Zhao Hai replied, “It’s true.”

Mu Yu laughed and said, "Good! The heavens are really helping my Hundred Treasures Realm. Those Giant Spirit Realm fools actually gave you to us. Hahaha. They got what they deserved!"

Zhao Hai chuckled and didn't say anything. Mu Yu turned his head to Zhao Hai and said, "Little Hai, let's go meet those refining masters right now so that you can teach them how to make the fake spirit snake needles. I hope that we can make a hundred spirit snake needles before the Giant Spirit Realm attacks."

Zhao Hai reacted, "100? In just a few days?"

Mu Yu looked at Zhao Hai and said, "Try the best you can. I won't let you do it alone. Those refining masters will help. Moreover, all the materials will be provided by us. You don't have to worry about it."

Zhao Hai was puzzled as he looked at Mu Yu and asked, "Big Brother Mu, why do we need to prepare so many spirit snake needles? Although they are large, they're smaller compared to most large artifacts. When faced with large artifacts, the needles wouldn't be able to do much."

Mu Yu forced a smile and said, "You might now know, but the main reason why the Giant Spirit Realm can draw out the war against the Hundred Treasures Realm was because they have a lot of large artifacts. At any critical moment, they can use large artifacts in order to charge at us. Causing us to have a hard time."

Zhao Hai stared, then he immediately understood Mu Yu's plan. He looked at Mu Yu and said, "You mean you want to use the fake spirit snake needles in order to deal with the Giant Spirit Realm's large artifacts?"

Mu Yu nodded and said, "Correct. The Giant Spirit Realm wins over us using their large artifacts. If we destroy their large artifacts, I reckon we can win against them. Although the fake spirit snake needles aren't stronger than large artifacts, we can still use them against the large artifacts, right? What do you think?"

Zhao Hai nodded and said, "He has to agree that Mu Yu was correct. The offensive strength of the fake spirit snake needles is very strong. But because of its shape, it couldn't face large numbers of people on their own. Its impact area was just too small. It might be weaker against armies of people, but it could be said to be a nemesis of large artifacts."

Moreover, the fake spirit snake needles greatest advantage was how cheap it was to make. Although the fake spirit snake needles were still made with good materials, it was a fraction of the materials needed to make the real one. For a high-grade realm like the Hundred Treasures Realm, finding materials for the fake spirit snake needles was really easy.

The spirit snake needles were rocket launchers while large artifacts were like tanks. A tank can trample on the enemy's position with its powerful impact, but a rocket launcher can still render it useless. On the other hand, it would be hard for a rocket launcher to deal with an enemy group.

Moreover, like rocket launchers, the fake spirit snake needles weren't as expensive as tanks. Because of this, it's best to use the fake spirit snake needles against tanks like large artifacts.

Mu Yu's eyes gazed at the distance as he said, "The hatred between the Hundred Treasures Realm and the Giant Spirit Realm has gone on for too long. It's time to end it."

Zhao Hai looked at Mu Yu's expression and didn't interrupt. Although he was now partly someone from the Hundred Treasures Realm, he couldn't just ask things randomly. If he asked into things, then the people from the Hundred Treasures Realm might think that he was going too far. Therefore, Zhao Hai didn't talk too much right now.

Mu Yu blanked out for a moment before he recovered. Then he took Zhao Hai towards a door of a cave residence. He specially requested Xu Wuzun for a cave like this. This cave residence wasn't used to house people but instead prepared for refiners. All of these master refiners would stay here for work.

It must be said that refiners need peace in order to work. If they were to make a mistake, it's possible that they would ruin an artifact.

But sometimes, the situation called for a change in how things were done. For example, refining artifacts like the fake spirit snake needles. If only one refiner refines a fake spirit snake needle, then not to say three days, they wouldn't be able to finish in three months.

Therefore, refiners had to cooperate with each other. Generally, refining had three methods. The first method was when the refiner only used their own spiritual fire in order to refine. However, it's impossible to achieve much with such a method. Its energy consumption was too big so refiners only used this method when refining basic items.

The second method was refining using furnaces. The furnace was a special tool for refining. It uses the energy of the refiner for control but not for refining. Instead, a furnace makes use of crystal stones for energy. The crystal stones pass through the furnace to generate spiritual fire and then refine the material inside it. During the whole process, the refiner only needed to control the fire, shape the artifact, and inscribe formations.

However, this method only worked on small and normal sized artifacts. This method couldn't be used to make large artifacts. Firstly, the furnaces weren't very big. Secondly, refiners couldn't make large artifacts with just furnaces. In this case, refiners needed more refiners to complete the task.

When refiners cooperate, they don't use furnaces. Instead, what they use was called a furnace formation. This furnace formation was different from normal furnaces. It's shaped like a furnace but it was much bigger. Normal furnaces could be as small as a person's hand while the smaller furnace formation could be as tall as one person and as wide as three meters.

Normally, furnace formations would take up an area of ten meters across.

Nevertheless, how could a furnace formation refine a 100-meter long fake spirit snake needle when it was just ten meters across?

This was where another characteristic of a furnace formation takes place. Furnace formations have their own internal space. What was an internal space? It was similar to what Zhao Hai's Hell King's Ship had. Once the Hell King's ship increases its size, it would turn into a huge warship. However, how could a hundred thousand people fit inside such a ship? In order to do so, the Hell King's Ship had its own internal space that was bigger than its actual volume.

After multiple experiments, some high-grade realms were able to accomplish the same thing. One shouldn't look down on a furnace formation that was ten meters across. Inside it was a space that was very large. Not to mention refining a spirit snake needle, it can even refine a Highcloud Flying Shuttle.

However, furnace formations also have their limits. The biggest artifacts it could refine could only be as large as a Highcloud Flying Shuttle. If one wanted to refine something like the Giant Spirit Treasure Ship, then it would definitely be impossible. In fact, the Giant Spirit Treasure Ship wasn't a single entity. It was a large assembly from multiple parts that had been refined separately.

This time, the Hundred Treasures Realm could only refine a fake Formation breaking Spirit Snake needle using a furnace formation. Their furnace formation was circular. A circular furnace formation isn't anything special. Plenty of furnace formations were circular. However, the Hundred Treasures Realm's furnace formation was a bit special. There are eight points on the formation that a person could stand on. Each person operating the formation would be assigned different tasks. One person would be responsible for the crystal stones and controlling the heat, another would add the materials, another would shape the artifact, two would be in-charge for inscribing formations, two would temper the artifact, and then the last person would lead the team. As long as these people could cooperate well with each other, they would be able to make a large artifact.

Mu Yu brought 160 refiners with him along with ten furnace formations. This meant that Mu Yu wanted the furnace formations to work all the time in order to make a sufficient amount of fake spirit snake needles.

Ten furnace formations would need a very big place. And with the substitutes present, the area needed would be bigger. After vacating several residences, Xu Wuzun and the others were finally able to secure a place that fits the description.

When Zhao Hai was brought to the place by Mu Yu, he couldn't help but be stunned. There were ten large metallic artifacts on the ground. The build of the artifact was very complex. Outside the artifacts were unclear and complicated patterns. Trying to understand it would make one's head hurt.

Outside this formation were eight platforms which would be used by one person. Sixteen refiners were responsible for one furnace formation.

All of the people present immediately bowed to Mu Yu and said, "We have seen Mister."

Mu Yu waved his hand and then turned to Zhao Hai and said, "Little Hai, from now on, these people will listen to you. Tell them how to make the fake spirit snake needles. You can direct them from the side and observe the entire refining process."

The furnace formations were transparent. Just by standing outside, one could see the progress of refinement. Its design was very good.

When Zhao Hai ran the Formation Breaking Spirit Snake Needle through the Universal Scanner, he also gained the method on how to use the furnace formation in order to make it. Moreover, the explanation was very detailed.

Therefore, when Zhao Hai heard Mu Yu he smiled bitterly and said, “Big Brother Mu, they are refining experts. They have more understanding than I have. Moreover, my refining technique is somewhat special. Therefore, I don’t need to do anything. I have the refining method in this jade slip. I reckon these seniors can understand the steps at one glance.”

Hearing Zhao Hai, Mu Yu nodded. To be honest, Mu Yu was wondering how could Zhao Hai make something as large as the fake spirit snake needle on his own? Now that he heard Zhao Hai, he understood that it was made with a different ability, not a refining technique.

When he heard that Zhao Hai used a divergent ability in order to make the spirit snake needles, Mu Yu was a little bit worried. He was afraid that Zhao Hai doesn’t know how to refine the fake spirit snake needle normally. So he was relieved when Zhao Hai said that he had a jade slip with the refining method.

Zhao Hai waved his hand, took out a jade slip and handed it over to Mu Yu, “Big Brother, the refining method is here. Take a look.”

Mu Yu nodded and received the jade slip. He scanned the jade slip with his spiritual force. He was also worried that the instructions that Zhao Hai gave were incomplete. Then all of the artifacts would be failures, hampering the progress of the war. However, as soon as he scanned the contents of the jade slip, Mu Yu’s worries went away. The process of making the artifact was written clearly. What kind of head, when to add the materials, when to shape it, when to add crystal stones, all were written. Not to say these expert refiners, even novices would be able to follow the instructions given.

Mu Yu nodded as he gave the jade slip over to a refiner and said, “Copy the method on your own jade slip, then pass it to the others.” The refiner nodded before he took his own jade slip and copied the contents. Then he gave Zhao Hai’s jade slip to the others before studying the method he just copied.

Before long, more than 100 copies were made. Mu Yu took back the jade slip and gave it to Zhao Hai. However, Zhao Hai waved his hand and said, “Big Brother Mu, you take it. I have no need for it.”

Mu Yu was not polite as he nodded and stored the jade slip. Then he turned his head towards the refiners and said, "Study the jade slip and divide the responsibilities among yourselves. I can give you an opportunity to study the method later, but for now, I want you to make as many fake spirit snake needles as you can."

The refiners complied as they continued reading their jade slips. Mu Yu looked at them and didn't say anything. He just looked from the side. Seeing this Zhao Hai turned his head to Mu Yu and said, "Big Brother Mu, I'll also return to my residence and refine. It's always good to have more." Mu Yu nodded. Then Zhao Hai returned to his residence and went to the Space.
