

Another World 1471

Chapter 1471: Getting More and More Interesting

Upon entering the Space, Zhao Hai immediately tasked the Universal Processing Machine to make fake Formation Breaking Spirit Snake Needles. And since it's impossible for him to produce an endless amount, he only had the processing machine make 20. For the processing machine, this was very simple. It must be known that the processing machine could make multiple items at one time. As long as it was set, the processing machine could make 10 thousand spirit snake needles. Therefore, Zhao Hai wasn't worried about not being able to get enough spirit snake needles.

Telling Mu Yu that he didn't have the time was a blatant lie. He couldn't let Mu Yu know that he can solve the problem of the spirit snake needles in a minute.

After setting the processing machine up, Zhao Hai relaxed inside the Space. In these three days, he would accompany Laura and the others. To be honest, Laura and the others had been working very hard. They helped Zhao Hai during battles as well as the other things that he couldn't handle while outside. This caused Zhao Hai to feel guilty.

Most importantly, Laura and the others were still stuck in the Space. Although the Space was very huge. Because of the characteristics of the Space, people close to Zhao Hai were being treated as gods. Even Zhao Hai's friends from before would feel panicked and uncomfortable when Laura and the others talk to them. Because of this, Zhao Hai's wives rarely go to the other Spaces.

Although the situation in the Hundred Spirit Planet was good, and Merine, Green, and the others didn't treat Zhao Hai and the others as gods, everyone on the planet were workaholics. They were focused on their research. Sometimes, Zhao Hai doesn't even know what they were studying. Normal people like Laura and the others found it difficult to be interested in those research.

As the matter stands, Laura and the others were isolated. When he thought of this, Zhao Hai felt even more guilty.

Because of this, Zhao Hai would accompany Laura and the others whenever he was free. Moreover, he was working hard to find an opportunity to bring Laura and the others out and make their identities public. He wanted everyone to know that he could only have his current achievement because of these women supporting him.

Laura and the others also understood this. So even if they had been stuck inside the space, they were still willing to help Zhao Hai. The more guilty Zhao Hai felt about them, the more gratitude they felt. This was because Zhao Hai didn't treat their efforts as something natural. This was what moved them the most.

This time, upon returning to the Space, Zhao Hai couldn't help but be surprised. Usually, when he returned, Laura and the others would go out of the villa and meet him. But today, they weren't there. Zhao Hai pushed the door of the villa and saw that Laura and the others were looking at a recording. It wasn't a scene from the outside, but instead a voice of Tang Jie.

Zhao Hai looked over the kitchen and saw Mo Sheng eating food. Besides Mo Sheng, everyone was looking at the recording.

Zhao Hai turned to the recording in confusion. It was Tang Jie talking about defeating the Giant Spirit Realm and getting some unexpected benefits. Zhao Hai didn't know why Laura and the others were focused on this.

Zhao Hai looked at Laura and the others after he sat down and then asked, "What happened? Why are you looking at this? Did Tang Jie say anything about me?"

Laura turned to Zhao Hai and said, "Brother Hai, don't you feel that something is weird about this?"

Zhao Hai scrunched his eyebrows and said, "Weird? Is there a problem? How come I didn't notice it?"

Laura replied, "It's already well-known that the Hundred Treasures Realm would benefit greatly upon defeating the Giant Spirit Realm. But if you pay attention, Tang Jie said that there would be unexpected benefits. Once the Hundred Treasures Realm destroys the Giant Spirit Realm, the benefits could all be thought of. They would gain unparalleled prestige, the territory of the Giant Spirit Realm, smaller realms surrendering to them, resources, and even talents. Those benefits can be determined very well. But what was the unexpected benefit that Tang Jie talked about? Also, just now, Mu Yu mumbled something about ending the long grudge against the Giant Spirit Realm. He was a little lost during that time, which was strange for a Severed Soul Expert. In other words, there were other things beyond the hatred between the two realms."

Zhao Hai stared for a moment when he heard this. He knit his brows as he thought it through. Now that Laura said it, he felt that something was not right. He looked at Laura and said, "So you're saying?"

Laura looked at Zhao Hai and said, "Brother Hai, do you remember the Six Realms Battlefield?"

Zhao Hai quickly understood what Laura meant, he said, "You mean to say that the Ten-thousand Realm Battlefield is in the same situation as the Six Realms Battlefield? There's another place like the Ten-thousand Realms Battlefield?"

Laura shook her head and said, "No. When we ascended to the Machine Field, did we immediately hear about the Six Realms Battlefield? When we were in the Six Realms Battlefield, did we hear about the Ten-thousand Realm Battlefield? No. In fact, it was only when we defeated Huang Daoran that we were made aware of the battlefield. Even at that time, Huang Daoran and Feng Baiming were being mysterious about it. We really didn't know about the existence of the Ten-thousand Realm Battlefield until Yuan Ding and Yuan Zhen met you. I think there may be a stronger existence above the Ten-thousand Realm Battlefield. And maybe they were the ones who didn't want to fight the Giant Spirit Realm but were forced to. Perhaps the battlefield was just a toy in their eyes, just like how the Buddhists rarely go to the Six Realms Battlefield. In the eyes of the Buddhists, the Six Realms Battlefield was a toy and their focus was on the Ten-thousand Realm Battlefield."

Hearing this, Zhao Hai understood what Laura meant. His eyes shone as he said, "You think that I may be in contact with this existence once I enter the Hundred Treasures Realm?"

Laura nodded and said, "Perhaps you can meet them. This is all just speculation, it will be seen once you enter the Hundred Treasures Realm."

Zhao Hai nodded, then he let out a long breath as he said, "Just as I thought that things have gotten boring, it seems that it's not. Maybe things will get more interesting from now on."

Laura smiled faintly and said, "Correct. Brother Hai, you should prepare yourself. Back when we ascended, we thought the World of Cultivation was the highest realm. It was until we entered the Six Realms Battlefield that we learned that there's an existence much higher. At that time, we were still at the Machine Field. What about now? We entered the Ten-thousand Realm Battlefield, now we discover someone higher."

Zhao Hai nodded and said, "That's possible. It'll get more and more interesting from now on. I reckon I'll be meeting people who use Faith Power soon."

Laura smiled faintly and said, "You will definitely meet one. If Faith Power existed in a realm like the World of Cultivation, then it would certainly exist on higher-grade realms. Brother Hai, you should find an opportunity to ask Tang Jie about this. With how he's currently treating you right now, he should tell you a thing or two."

Zhao Hai nodded, "If I ask Tang Jie about Faith Power, he will certainly help me. This will give me more understanding about Faith Power. Alright, we'll do all of that later one. How about we go to the hot springs right now to relax?"

When they heard Zhao Hai, Laura and the others turned red. Then they unconsciously looked towards the kitchen because Mo Sheng was still eating there. They were afraid that Mo Sheng might have heard. However, upon turning their heads, they couldn't help but laugh. This was because Mo Sheng had fallen asleep.

Zhao Hai waved his hand and sent Mo Sheng to his room. Zhao Hai knew that Mo Sheng liked to live inside the Space. As long as he's inside the Space, even if Zhao Hai wasn't present, Mo Sheng would practice on his own or get his own food. In any case, he found himself feeling more comfortable inside the Space.

Unlike Zhao Hai, Mu Yu and the others have become extremely busy. The refining masters were working very hard to make the spirit snake needles. Because of how detailed Zhao Hai's instructions were, these refining masters didn't find it hard getting used to the process of manufacturing. This also increased the success rate, which was something that Mu Yu never expected.

Since Zhao Hai returned to his room to refine artifacts, the materials that were brought to be given were being used by the refining masters. In fact, this was something that Mu Yu wanted to see. It was these fake spirit snake needles that would go against the enemies, not the pile of materials.

Mu Yu stayed inside the refining room all the time. He knew too clearly how important these spirit snake needles were for the Hundred Treasures Realm. It can be said that these needles would be the Hundred Treasures Realm's ultimate weapon against the Giant Spirit Realm. Mu Yu had no choice but to spend time supervising the process.

Mu Yu could see hope in these spirit snake needles. A hope of defeating the Giant Spirit Realm. Like what he said before, it was time to end years of grievances!

Chapter 1472: Strength of the Enemy

Although Zhao Hai was having a vacation, he didn't sit and do nothing at all. Zhao Hai suddenly remembered a special refining technique he learned in the lower realms, water refining.

Water refining was a technique that Zhao Hai acquired from the Seafolk. But because of the Universal Processing Machine, he seldom used it. Now, he only uses the technique to strengthen the Azure Dragon Snail. The Azure Dragon Snails inside the Space were thriving, they can practically live forever if they were left along. Moreover, their shells had been undergoing water refining, which made the shells extremely hard.

Besides the Azure Dragon Snail, there were also other sea beasts that used water refining. Compared to fire refining, water refining had its own advantages and as well as difficulties.

One of the difficulties of water refining was that its requirements for water were very high. If there wasn't enough water, then the result of the refining wouldn't turn out well.

Another difficulty was that it required a very long time to finish. It was much slower than fire refining. In comparison, it was a dozen times slower. This was a very huge disadvantage when compared to fire refining.

However, there were also advantages to water refining. First, as long as there's enough water, then one would be able to succeed in refining. If one had an ocean of water, then they can even refine multiple Giant Spirit Treasure Ships at the same time.

Also, the probability of failure during water refining was very low. This was because water refining was a gentle technique, it was a slow process. Smaller artifacts even had close to 100% success rate. Large artifacts didn't have as good a success rate, but it was still very good.

The reason why Zhao Hai began to ponder about water refining was because he thought that it was very suitable for a high-grade realm like the Hundred Treasures Realm. High-grade water wasn't difficult to

acquire for these large realms. They also have geniuses that could control water. Moreover, water refining didn't require perfect water control. One only needs to pay attention to the artifacts during critical methods of refining.

The most important thing was the technique's success ratio. After all, Zhao Hai doesn't want to be a human restructuring machine upon arriving at the Hundred Treasures Realm. Therefore, he was going to research this technique and hand it over to Mu Yu.

Zhao Hai became afraid because he had seen the failure rate of the refiners. It was utterly terrible. The success rate has reached 1 in 10. Tang Jie told Zhao Hai before that the success rate of refining a large artifact was less than 1 percent. At that time, he didn't think much of it. Now that he saw how much the refiners failed in refining the fake spirit snake needles, Zhao Hai couldn't help but be shocked.

When he saw Mu Yu being satisfied with the results and even offering praise, Zhao Hai was dumbfounded. Such a success rate was still enough to be praised, he was speechless.

After staying inside the Space for three days, Zhao Hai finally went out. At the same time, he recorded the water refining technique into a jade slip. It must be said that water refining wasn't very difficult. However, people need to fix their mindset that only fire can be used in refining.

In these three days, Zhao Hai was also paying attention to Ba Li's group. Just as Mu Yu and the others worried about, Ba Li was prepared to deal with the Octopus Islands in one go. The reinforcements didn't number 50 thousand, but 80 thousand people! In addition to the 5000 people from the Giant Spirit Realm that came with Ba Li, there were 3000 more people who came to reinforce. Along with the 3000 people were two more Giant Spirit Treasure Ships and 20 Eight Cyan Imperial Chariots. The only good news was that the reinforcements didn't bring a Formation Breaking Spirit Snake Needle with them.

Zhao Hai reckoned that the people from the Giant Spirit Realm disliked using Formation Breaking Spirit Snake Needles. They were the type of people who liked to use brute strength. Formation Breaking Spirit Snake Needles required skill. Although it also has great attacking power, its flexible body was something the Giant Spirit Realm wasn't fond of. Instead, they sent two Giant Spirit Treasure Ships as well as a bunch of Eight Cyan Imperial Chariots. In their opinion, these things were enough to bulldoze through the Octopus Islands.

However, the reinforcements had just met with Ba Li. They still haven't departed for the Octopus Islands. In Ba Li's mind, Tang Jie and the others would never leave the island, so he has no worries. He might as well prepare in order to succeed in the attack.

Zhao Hai didn't say anything about Ba Li's decision. He can attack whenever he wants to attack, Zhao Hai doesn't care. In any case, he doesn't have anything to worry about.

At the same time, over these three days, although the refiners had wasted a lot of materials, they were still people with real skills. In three days of refining, they were able to make 90 fake spirit snake needles. This number wasn't small.

When Zhao Hai came out of the Space, he immediately went to the refining cave. There were people guarding outside in order to block people from entering. They were afraid of people disturbing the process of refining. However, Zhao Hai was an exception. Mu Yu already gave word to allow Zhao Hai entry once he comes.

Upon entering the cave, Zhao Hai noticed Mu Yu sitting on the corner. It's clear that he doesn't want to disturb the people refining the artifacts.

Seeing Zhao Hai arrive, Mu Yu nodded. Zhao Hai also gave a nod to Mu Yu before arriving at his side and saying, "Brother Mu, let's head out, I have something to report."

Mu Yu nodded, he understood that Zhao Hai was about to give a report about Ba Li and the others. He stood and went outside with Zhao Hai. Then they flew towards his cave residence.

Upon entering his cave residence, Mu Yu immediately called for Tang Jie, Xu Wuzun, and Kong Miao. While the rest were heading over, Zhao Hai told Mu Yu about the large artifacts that were added to Ba Li's arsenal.

When Tang Jie and the others arrived, Mu Yu relayed the information he heard from Zhao Hai.

Hearing Ba Li's current army, Xu Wuzun and Kong Miao couldn't help but let out a cold breath. This was 80 thousand experts, not 8 thousand. Moreover, there were 8000 people from the Giant Spirit Realm. It seems like the Giant Spirit Realm was prepared to trample the Octopus Islands no matter what.

Mu Yu looked at everyone and asked, "What do you think we should do about this?"

Tang Jie and the others couldn't help but frown. To be honest, they didn't know how to deal with this. Ba Li's reinforcements were beyond what they expected. Thinking about it caused them to feel pressure.

Zhao Hai didn't speak, but there was no anxiety on his face. Conversely, there was a slight disapproval in his expression. It was clear that he didn't take Ba Li's numbers to heart.

Although Mu Yu also noticed Zhao Hai's expression, he knew that Zhao Hai's words right now carried less weight than his. Therefore, without waiting for Zhao Hai to speak, Mu Yu opened his mouth and said, "Actually, you don't have to worry about how many people Ba Li has. By this point, the second plan has been launched. What we need to do was to defeat Ba Li here, so that everyone in the Ten-thousand Realm Battlefield would know about our strength."

Tang Jie and the others had heavy expressions when they heard this. This was because they had yet to know how many fake spirit snake needles the refiners were able to make. If there weren't enough spirit snake needles, then dealing with those large artifacts would be very difficult.

Seeing their expression, Mu Yu knew what they were thinking. He said, "In the last three days, our refiners were able to make 94 fake spirit snake needles. I can assure you that we would have more than a hundred by the time Ba Li arrives."

Zhao Hai coughed lightly, as he said, "Brother Mu, I was also able to make 20 fake spirit snake needles in the last three days. We already have more than a hundred fake spirit snake needles. Moreover, we still have enough materials. Once Ba Li arrives here, we would have even more spirit snake needles. I'm afraid it will reach more than 200."

Upon hearing Zhao Hai, Mu Yu excitedly asked, "Little Hai, are you telling the truth?"

Zhao Hai smiled faintly and said, "I wouldn't dare deceive you about this." Then Zhao Hai took out a spatial bag and then threw it over to Mu Yu. Mu Yu took the spatial bag and scanned it. There were 20 fake spirit snake needles neatly arranged inside.

Mu Yu laughed and said, "Alright, fantastic! As long as we have these Formation Breaking Spirit Snake Needles, we can deal with the Giant Spirit Realm with confidence."

Tang Jie and the others were shaken. The appearance of these spirit snake needles gave them energy. They weren't afraid of the people that Ba Li had with him, they were afraid of the large artifacts. No matter which of these artifacts slams into the guardian formation, they would still deal great damage.

Without these large artifacts, then they could use the guardian formation to comfortably defend the island against tens of thousands of attacks. After all, guardian formations wouldn't be seen as important if they were weak. Moreover, in the last several days, Xu Wuzun and the others had conducted enhancements to the guardian formation with Tang Jie's help. If it weren't for large artifacts or spirit snake needles, it would have been impossible to break through the formation.

Before this, Tang Jie and the others were worried that there weren't enough spirit snake needles to counter the large artifacts. But now, they were no longer worried!

Chapter 1473: Tang Jie's Ambition

Mu Yu looked at everyone and said, "What we need to do right now is to sharpen our swords and wait for those guys to come. I really want to see what they'll do once the large artifacts they're so proud of get destroyed. Hahaha. I reckon their expressions would be majestic."

Everyone laughed. By this time, they were already relaxed. The fake spirit snake needles gave them courage. Even if the Giant Spirit Realm was powerful, they still wouldn't flinch upon facing them.

Seeing everyone's expressions, Mu Yu smiled and said, "Alright, you all should take a rest. Make the sentries outside be more careful. Once they spot the enemy coming, they should report it immediately. This time I think the Giant Spirit Realm wouldn't be rushing over. After all, they have too many people with them. As long as they are spotted, the sentries outside should retreat immediately. We don't need to see how strong the enemy is because we're already aware."

Kong Miao and Xu Wuzun complied, then they turned around and left. Tang Jie, Tang Wen, and Zhao Hai didn't move. Mu Yu gave them a glance telling them to stay.

Once Xu Wuzun and Kong Miao have left, Mu Yu let out a long breath and said, "I didn't expect the Giant Spirit Realm to bring so many people. Little Jie, do you think we should ask for reinforcements? We have

a lot of subordinates close to here. We can't just rely on the Xu Race and the World of Cultivation, it would be unfair towards the two realms."

Hearing Mu Yu, Tang Jie couldn't help but stare. In his mind, Mu Yu was very confident. What happened?

Tang Jie replied, "Big Brother Mu, what happened to your confidence?"

Mu Yu looked at Tang Jie and said, "It's not that I'm not confident, I just don't want to cause too many deaths to the Xu Race and the World of Cultivation. The two realms turned to us for help. They have done a lot for the Hundred Treasures Realm, we cannot make them suffer too many losses. It would be unfair to them and it would make the other smaller realms think something bad about us."

Zhao Hai smiled faintly and said, "Big Brother Mu, you don't have to be worried. If you're worried about our population dwindling because of our battle against the Giant Spirit Realm, then you don't have to. In fact, we already have enough manpower in our hands."

Mu Yu stared as he looked at Zhao Hai in confusion and asked, "What do you mean? Where do we get manpower?"

Zhao Hai smiled and said, "We have enough people with us. Big Brother Mu, don't forget that I'm a Dark Mage. To be honest, even if the Giant Spirit Realm brings all of their subordinate realms, they still couldn't surpass the number of Undead that I have. Although my Undead aren't that strong, our spirit snake needles have energy gathering formations. I can use 10 thousand Undead to power one fake spirit snake needle. They don't need to fight directly but they can help us by supplying energy to the spirit snake needles. Therefore, we don't need to worry about manpower."

Mu Yu and Tang Jie stared, they haven't thought about it this way. Hearing Zhao Hai, Mu Yu asked, "Little Hai, there are more than 100 fake spirit snake needles. If each needle needed 10 thousand Undead, you would need more than a million Undead. You have that many?"

Zhao Hai looked at Mu Yu and said, "If we weren't using fake spirit snake needles, then I would have to use 100 thousand Undead for each spirit snake needle."

Zhao Hai's eyes flashed a cold light as he said this, causing Tang Jie and the others to shiver. Actually, they weren't strangers to seeing blood. But when they heard Zhao Hai, they couldn't help but feel a cold sweat going down their back.

More than 100 spirit snake needles, each with 10 thousand Undead accounts to more than 1 million Undead in total. If each spirit snake needle needed a hundred thousand Undead, then it would be more than ten million Undead.

What did ten million Undead signify? It meant that 10 million people died! If all of these Undead were made by Zhao Hai, then calling him a mass murderer would be an understatement.

Tang Jue looked at Zhao Hai and probed, "Little Hai, how did you acquire your Undead?"

Zhao Hai looked at Tang Jie and understood what Tang Jie wanted to know. He just smiled, revealing his pure white teeth, as he said, "All of them are my enemies!"

Tang Jie, Tang Wen, and even Mu Yu couldn't help but feel their hearts shake. Zhao Hai's words reverberated in their minds for some time. Although the words sound ordinary, the aura behind it carried a thick smell of blood that couldn't be covered.

Mu Yu took several breaths to calm himself down. Then he looked at Zhao Hai with a complex expression before he said, "Alright, then we'll do what you say. When the time comes, we'll hand the fake spirit snake needles over to you. In addition to your large artifacts, you will be our greatest trump card against the enemy."

Zhao Hai smiled faintly and said, "Big Brother Mu, rest assured, nothing will go wrong. Right, Brother Mu, this is a gift for you, no, a gift for the Hundred Treasures Realm. It's something I acquired back in the lower realm. I don't know if it will be useful for the people from high-grade realms." After he said that, he threw a jade slip over to Mu Yu.

Inside Zhao Hai's jade slip was a refining technique. Zhao Hai already discovered that water refining had some issues when it came to higher-leveled applications. In order to make full use of water refining, it needed some improvements. Inside Zhao Hai's jade slip was a completely unmodified water refining technique.

Zhao Hai certainly has the ability to make a water refining technique that matches the standards of the World of Cultivation. However, this could only make Mu Yu and the others suspicious. Because of this, he didn't change anything. In fact, introducing the idea of water refining was already enough for Mu Yu and the others. Once this door gets opened, the Hundred Treasures Realm could go in and explore.

Zhao Hai doesn't suspect the intelligence of the people from high-grade realms. Therefore, he didn't make any modifications and just gave Mu Yu the water refining technique as is.

Mu Yu received the jade slip with a puzzled expression. Then he carelessly scanned the jade slip with his spiritual force. To be honest, he didn't expect Zhao Hai to bring something good. He knew that Zhao Hai was an ascender. Mu Yu wouldn't even glance at the techniques of the World of Cultivation, not to say techniques from the lower realms.

However, upon looking at the contents of the jade slip, Mu Yu's expression slowly changed. Then he slowly became excited.

Mu Yu wasn't an expert in refining. In fact, he knows very little about refining. However, he could still see that the water technique that Zhao Hai gave was real. After looking at the water refining technique, Mu Yu excitedly looked at Zhao Hai and said, "Little Hai, is this real?"

Zhao Hai smiled faintly and said, "Of course it's real. Back in the lower realms, I came into contact with a Seaman Race. They take the sea as their home and were the rulers of the ocean. Their leader gave me this water refining technique. How about it? It's useful right?"

Mu Yu laughed and said, "Useful, it's very useful. Little Hai, you really are the Hundred Treasures Realm's lucky star. Right, why didn't you take this out earlier?"

Zhao Hai rolled his eyes and said, "It's because I never use this method. I have a divergent bility, what need do I have for it? If it weren't for the low success rate of the refiners, I would have forgotten about it."

At this time, Tang Jie asked, "Big Brother Mu, Little Hai, what are you two talking about? Water refining, what is that?"

Mu Yu smiled and then tossed the jade slip over to Tang Jie, then he said, "This will be important for the Hundred Treasures Realm. I must not be revealed in the Ten-thousand Realm Battlefield. We need to tend this thing back to the realm as soon as possible. All experiments on it need to be done there."

At this time, Tang Jie initial parts of the jade slip. He looked at Zhao Hai in disbelief as he said, "Little Hai, is this really useful? Why does it seem ordinary to me?"

Zhao Hai smiled and said, "Of course it's useful. It's very easy to use. Back when I was helping the Seaman Race, the weapons they use were made from this technique. Their weapons aren't any weaker than other weapons in the lower realms. Naturally, I still don't know if we can make use of this technique. But we can still study it."

Mu Yu nodded and said, "We can't use it, but its principle can be studied. As long as we make improvements, then with this method, the Hundred Treasures Realm would be able to refine anything."

By this point, Tang Wen has read through the contents of the jade slip. It was at this point that he became clear about its importance towards the Hundred Treasures Realm. Right now, Tang Wen discovered that Zhao Hai has contributed more to the Hundred Treasures Realm than any other native of the realm.

Mu Yu looked at the three and said, "Nobody should find out about the contents of this jade slip. I'll personally return to the base in order to deliver this."

Hearing Mu Yu, Zhao Hai couldn't help but ask, "Big Brother Mu, it's just a refining technique. Does it really need that much attention?"

Mu Yu replied, "You don't know this, but although the Hundred Treasures Realm is an expert in making small artifacts, we are bad at making large artifacts. If we manage to improve this water refining technique, then the Hundred Treasures Realm would be able to make artifacts much larger than the Giant Spirit Treasure Ship."

Seeing Mu Yu getting more and more excited, Zhao Hai said, "Alright, Big Brother Mu, there's no need to be so excited. Although the water refining method is very strong, it required high-grade water, and a large quantity of it. Does the Hundred Treasures Realm have so much high-grade water?"

Mu Yu stared at Zhao Hai, then he coldly snorted and said, "Don't underestimate the Hundred Treasures Realm. The realm has a lot of treasures, high-grade water is nothing. You don't need to worry about this. You three stay here and prepare. I'll return here as soon as I deliver the jade slip."

The three nodded. Right after that, Mu Yu turned around and left. Looking at Mu Yu's departing back, Zhao Hai sighed and said, "Big Brother Mu Yu is too excited. There's no need to be so anxious."

Tang Jie patted Zhao Hai's shoulder and said, "Stop talking nonsense. If Big Brother Mu didn't come here and you gave me that thing, I would immediately head back to the base along with an escort of 500 men. Although I know that there's no danger in using the transmission formation, I would still need guards. That's how important that thing is to the Hundred Treasures Realm."

Tang Wen agreed, "With that technique, the strength of the Hundred Treasures Realm would jump several generation's worth. When the time comes, who in the Ten-thousand Realm Battlefield would become our opponents?"

Tang Jie was also very excited. Seeing the expression of the two, Zhao Hai couldn't help but frown. Now he doesn't know if it was a good idea to give the water refining technique to the Hundred Treasures Realm. If the Hundred Treasures Realm wanted to conquer the entire Ten-thousand Realm Battlefield, then that would be utterly impossible. If the Hundred Treasures Realm becomes so ambitious, then the World of Cultivation would certainly suffer.

When he thought of this, Zhao Hai couldn't help but ask, "Brother Tang, you don't really intend to conquer the entire Ten-thousand Realm Battlefield, do you? If that happens, then all the high-grade realms would unite against us."

Tang Jie shook his head as he smiled and said, "Of course not. The situation of the Ten-thousand Realm Battlefield is very complex. There simply are too many powers here. It's impossible to unite this place. However, it's possible for the Hundred Treasures Realm to become an existence that people would have to think twice before offending. Once that happens, we could get more subordinate realms and our influence would grow. The resources we receive would also increase, causing our development to become quicker. It wouldn't be impossible to become the most powerful existence in the Ten-thousand Realm Battlefield.

Hearing Tang Jie, Zhao Hai felt relieved. It must be known that uniting the Ten-thousand Realm Battlefield and becoming the strongest existence in the battlefield were two totally different things. The

former demanded absolute sovereignty over the battlefield while the latter only involved becoming the strongest power.

However, this was already enough. If the Hundred Treasures Realm becomes the most powerful existence in the battlefield, then it would be very beneficial for Zhao Hai.

Although Mu Yu left, nothing changed in the Octopus Islands. This was because everything on the island had already been taken care of. They already had more than 100 fake spirit snake needles. The only person who was mildly busy on the island was Zhao Hai. He was currently recycling the failed spirit snake needles into usable materials. This way, they could be used for future refinings.

Chapter 1474: Refining Grandmaster

Ba Li was in high spirits as he stood on the bow of the Giant Spirit Treasure Ship. At least this was what he appeared to other people. At this time, Ba Li's mind was filled with the thought of revenge.

To Ba Li, being driven back by Tang Jie was the greatest shame of his life. This time, he would flatten the Octopus Islands using his 80 thousand troops, three Giant Spirit Treasure Ships, and 20 Eight Cyan Imperial Chariots.

What Ba Li was worried about right now was the Hundred Treasures Realm's response. Although Ba Li was arrogant, he knew how important the Octopus Islands was to the Hundred Treasures Realm at this time. Its location was akin to a sword stuck into the Giant Spirit Realm's territory. As long as they keep it, they would be able to use this sword to strike at the Giant Spirit Realm.

With how important the Octopus Islands was, the Hundred Treasures Realm would certainly not allow it to be extinguished. It's possible that the Hundred Treasures Realm had sent reinforcements. Ba Li could only hope that the Hundred Treasures Realm didn't send a lot.

This was also the reason why Ba Li sent for so many reinforcements. He wanted to have the bigger army even if the Hundred Treasures Realm sent more people. This way, he wouldn't need to be afraid of cleaning up the opponent.

However, this caused the marching speed to be reduced greatly. Because of their massive army, logistics became a huge problem. And because of their massive number, not everyone can enter the Giant Spirit Treasure Ships. Therefore, some of them had to fly alongside the treasure ships. These people used their own flying artifacts, some used flying swords. There were all kinds of weird artifacts in the air.

Although flying artifacts weren't slow, Ba Li wouldn't dare make them fly at their full speed. This was because he wanted to save the strength of these people.

Back when he fought against Tang Jie and the others, Ba Li understood that they were sly and cunning. Ba Li was afraid that if he had his people move too fast, then their fighting strength would be affected once they arrived at the island. If that happens, and Tang Jie and the others capitalize on it, then things would be troublesome.

After suffering several losses against Tang Jie, Ba Li finally learned to think smartly. He would need superior forces to deal with the enemy. And since the enemy wouldn't run away, he doesn't need to rush. He would fight steadily, leaving the opponent no chances to make a move.

Before long, Ba Li's group was 10 thousand li away from the Octopus Islands. As he stood on the bow, Ba Li could see the Xu Race sentries retreating. To be honest, when he saw the Xu Race running away, Ba Li couldn't help but feel a sense of achievement.

At this time, Mu Yu received information that Ba Li's group was approaching. The number of people on the Octopus Islands didn't increase, it was still less than 30 thousand. Mu Yu now trusted Zhao Hai. He publicly announced that Zhao Hai was now someone from the Hundred Treasures Realm. He even directly gave Zhao Hai the status of Refining Grandmaster!

Although the position of Refining Grandmaster doesn't hold too much power and could be considered to be an empty position, the status was very respected in the Hundred Treasures Realm. Among the millions and millions of people in the Hundred Treasures Realm, less than a hundred people held the status of Crafting Grandmaster. Not to say people from the Hundred Treasures Realm, even people in Tang Jie's position had to be respectful towards Refining Grandmasters. Nobody would dare offend these people.

It can be said that besides Mu Yu, Zhao Hai has the highest status currently on the Octopus Islands. Naturally, this was only in name. After all, Zhao Hai was from the World of Cultivation. There were still a lot of people who didn't believe in him.

Zhao Hai was also aware of his identity. He didn't become arrogant and kept being polite towards everyone. He still called Tang Jie Brother Tang and treated him with respect.

Unlike those who didn't know the truth, Tang Jie and the others knew that the title of Refining Grandmaster wasn't given to Zhao Hai for no reason at all. It was because Zhao Hai was really worthy of it.

First of all, the fake spirit snake needles were his achievement. There's also the water refining technique. These two were enough to brand Zhao Hai as a Refining Grandmaster.

Not everyone in the Hundred Treasures Realm could become a Crafting Grandmaster. If you were very good at refining, then you would at most become a Refining Master. To become a Refining Grandmaster, in addition to becoming a good refiner, one would also need great contributions towards the Hundred Treasures Realm.

Being a Refining Grandmaster was a position of honor. Even if it didn't hold much power, this title would still make Zhao Hai respected.

Zhao Hai could see that he still fell short in the eyes of the people from the Hundred Treasures Realm. Therefore, he didn't become complacent because of his new status.

Since Zhao Hai didn't become arrogant due to his new status, he gained the appreciation of the people from the Hundred Treasures Realm. And with him joining the Hundred Treasures Realm, they were slowly getting accustomed to him. They also treated Zhao Hai with respect.

This respect wasn't because Zhao Hai was a Refining Grandmaster, but because Mu Yu and Tang Jie treated him well. This caused the people from the Hundred Treasures Realm to look highly at him as well.

Right now, Zhao Hai was on the right side of Mu Yu while Tang Jie was on the left. Seeing the two on Mu Yu's left and right, it seemed like they were Mu Yu's left and right arms.

Mu Yu looked outside from the Octopus Island's guardian formation. The guardian formation of the Octopus Islands was very well designed. Looking from the outside, the guardian formation seemed to not exist. However, it made it difficult to see the inside of the formation. From the outside, the Octopus Islands look like it was shrouded in mist.

Hearing the report of the Xu Race, Mu Yu knew that Ba Li's group weren't far from the Octopus Islands. Mu Yu couldn't help but ponder for a while as he asked, "Tell me, will Ba Li ignore anything else and just attack?"

Tang Jie thought for a moment and said, "I think so. Ba Li should be enraged by how we beat him last time. He will definitely attack us no matter what."

Mu Yu turned his head to Zhao Hai and said, "Little Hai, what do you think?"

Tang Jie pondered over it and said, "I'm not sure about this, but I think the chances of Ba Li attacking immediately isn't too great. Now that they have superior strength and numbers, he may come look at the situation first once he arrives. Ba Li should also be aware that the Hundred Treasures Realm had sent reinforcements. So I think he would first want to know how many people the Hundred Treasures Realm had sent over. This way, he could make his decisions confidently."

Mu Yu and Tang Jie nodded. Tang Jie clapped his hands and said, "Right, that guy Ba Li suffered hard against us last time. He should have learned how to be smarter this time. Now, he has superior strength, the only worry in his mind is the reinforcements that the Hundred Treasures Realm has sent. As long as he knows how many people the Hundred Treasures Realm sent, he can choose which method he could use to deal with us."

Mu Yu nodded, "Although I haven't fought against Ba Li, I heard about him before. He's a new genius of the Giant Spirit Realm, so he shouldn't be that stupid. If he doesn't attack, then I'll go out and meet him."

Zhao Hai smiled faintly and said, "I wonder what his expression would be once he discovers that Big Brother Mu came as reinforcements. I hope he won't run away without fighting."

Upon hearing Zhao Hai, Mu Yu couldn't help but laugh as he said, "That kid wouldn't run away. There's a rule in the Giant Spirit Realm that they couldn't retreat when faced with the Hundred Treasures Realm."

Tang Jie smiled and said, "We couldn't deal with Ba Li last time because he held the entire offense. He just retreated in order to make preparations to deal with us. If he retreats without a fight, then the Giant Spirit Realm wouldn't let him off even if he's a genius."

Zhao Hai smiled faintly and said, "Then we have to go out and meet them. However, we also need to make our preparations."

After he said that, Zhao Hai waved his hand and released a large number of Undead, enough to cover the entire island. The Undead were arranged in a cube formation of 10 thousand Undead each. Then the entire group of 100 were also in a cubic formation. Their presence in the sky caused a huge pressure on those who looked at them.

After releasing the Undead, Zhao Hai waved his hand as 100 fake spirit snake needles appeared in front of the cube formation. Then these spirit snake needles were distributed among the Undead groups. With the spirit snake needles suspended outside the Undead formation, it looked like a structure that was ready to fight at any time.

This arrangement was already approved by Mu Yu. Zhao Hai already told him that his Undead could help in supplying energy to the spirit snake needles. With this, not only could the spirit snake needles be utilized, the people on the Octopus Islands were also freed and could now fight.

The weakest among the people present, besides Zhao Hai, was at the Transcending Tribulation Stage. The majority of Zhao Hai's Undead were in the Foundation Building Stage, but 10 thousand of them could still be used to power one fake spirit snake needle. With the Undead focusing their power on the spirit snake needles, this meant that not a lot of them would be killed in the battle, which was what Zhao Hai wanted the most.

Mu Yu looked at Zhao Hai's action and nodded. He didn't say anything but placed a huge marker on Zhao Hai in his mind. This wasn't because of Zhao Hai's arrangement, but because of his Undead!

Chapter 1475: Proof

Zhao Hai already told Mu Yu before that he has a lot of Undead, and these Undead could control the fake spirit snake needles. Mu Yu believed that Zhao Hai wouldn't lie about this matter. Zhao Hai also

said that each fake spirit snake needle needs 10 thousand Undead to operate, Mu Yu believes that Zhao Hai can achieve this.

However, he didn't make Zhao Hai release a million Undead just to take a look. So he didn't know what would happen when 1 million Undead was released.

Now that Zhao Hai released his 1 million Undead, the overwhelming number caused one's scalp to numb. There's a certain quantity of people that caused one to tremble, and this was a group of Undead. These Undead looked like human beings. Imagine having a million troops flying in the sky?

As the saying went, 10 thousand soldiers was endless. But this was 1 million. Even if you knew that they were on your side, you would still shake upon seeing them.

Seeing this, how could Mu Yu not place emphasis on Zhao Hai? With his ability to reconstruct artifacts, even if he doesn't join the Hundred Treasures Realm, Zhao Hai could still roam the Ten-thousand Realm Battlefield freely.

Imagine Zhao Hai robbing more people and increasing the number of fake spirit snake needles in his hand. Then he would have his undead use these spirit snake needles to fight. In this case, who could be his opponent in the Ten-thousand Realm Battlefield?

The Xu Race and the World of Cultivation were already prepared for this scene. They had seen Zhao Hai release his Undead before, so they weren't too surprised. Only the people from the Hundred Treasures Realm were startled.

Tang Jie and Tang Wen went to calm everyone down. Once things became peaceful, Mu Yu led people outside the Octopus Islands. On the other hand, the Undead stayed inside. They would be the surprise attack of the island. It wasn't time to reveal them.

Not long after they came out of the island, Mu Yu and the others saw a group of people in the distance. There were three Giant Spirit Treasure Ships in front of the group. There were a lot of common cultivators behind, just like infantry walking behind tanks. They were slowly progressing towards the Octopus Islands.

Mu Yu and the others positioned themselves 300 li outside the island. The other party were naturally able to see them. Since they weren't that fast to begin with, the large army slowed down one li away.

Ba Li stationed himself on the bow and was looking at the alliance of three realms in front of him. He was Mu Yu in front of the group along with Tang Jie and Zhao Hai on the left and right.

Seeing Mu Yu, Ba Li's eyes couldn't help but shrink. As someone from the Giant Spirit Realm, he naturally knew who Mu Yu was. Mu Yu was titled as his generation's most talented genius. Ba Li would have been living inside a rock if he didn't know who Mu Yu was.

Seeing the people behind Mu Yu, Ba Li couldn't help but raise an eyebrow. The number of people increased, but only people from the Hundred Treasures Realm were added. Moreover, the reinforcements weren't a lot, probably only 5000 people. This wasn't what Ba Li expected. Ba Li thought that the Hundred Treasures Realm would act like him, getting their subordinate realms to fight for them. But now, it seems like the Hundred Treasures Realm didn't do so. This caused Ba Li to be surprised.

However, seeing the mist shrouding the Octopus Islands not far away, Ba Li began to think twice. With how misty the Octopus Islands was, it was capable of hiding an army inside.

Ba Li sized Mu Yu up. Mu Yu was also looking at him, then Mu Yu smiled and said, "Ba Li, right? What? The Giant Spirit Realm going to cause trouble once more?"

When Zhao Hai and Tang Jie heard Mu Yu, they had to suppress their laughter. It was clear that the Hundred Treasures Realm caused this incident, but now Mu Yu pinned the blame on the Giant Spirit Realm. Who knows how Ba Li would react.

As soon as he heard this, Ba Li was immediately enraged as he said, "Mu Yu, you're a respected expert, so don't change black to white. Your Hundred Treasures Realm provoked us first and even took in traitors. You better give me an explanation otherwise you can't blame me for being impolite."

Everyone present knew that this was just useless banter. Even if Mu Yu gave an explanation, Ba Li would still be impolite. He brought tens of thousands of people, they weren't just here for vacation.

Mu Yu replied, "Ba Li, there's no need to waste any breaths. I think you should be clear why matters came to this point. I heard that you're the one who chose to abandon the World of Cultivation and the Xu Race. Hahaha, I didn't expect the Giant Spirit Realm to have a genius like you. I must say, Ba Li, are you a secret agent of the Hundred Treasures Realm?"

As soon as he heard Mu Yu, Ba Li's expression turned white. This matter was a taboo among the Giant Spirit Realm. This was the greatest mistake that Ba Li made, so he didn't dare talk about it.

To be honest, Ba Li was regretting his decision. He didn't think that his decision to abandon the World of Cultivation would lead to this.

Ba Li was an arrogant person, and this incident has become a biggest stain on his reputation. Now, Mu Yu was using this incident to mock him. How could Ba Li not be angry, he was furious!

Ba Li coldly snorted and said, "Mu Yu, there's no need to waste so much words. All of this was a plot of the Hundred Treasures Realm. The World of Cultivation and the Xu Race are spies of the Hundred Treasures Realm!"

Ba Li said these words because he noticed the people behind him feeling uneasy. Ba Li couldn't help but be startled. He immediately understood what Mu Yu wanted to do, so he could only say these words in order to stifle the unrest of the people behind him.

Ba Li was now aware of how wrong he was to abandon the World of Cultivation and the Xu Race. The World of Cultivation and the Xu Race were nobodies, but they represented an entire range of people. They may not be strong, but they were symbols for medium and low-grade realms.

The attitude of the Giant Spirit Realm towards the World of Cultivation and the Xu Race tells a message towards the medium and low-grade realms. As soon as Ba Li admits to abandoning the World of Cultivation and the Xu Race, these smaller realms would certainly become uneasy. Everyone would think that the Giant Spirit Realm would abandon them one day just like what they did to the World of Cultivation and the Xu Race. Once they have this idea in their mind, these people would no longer trust the Giant Spirit Realm. And the Giant Spirit Realm would find it hard to remove this idea from their minds.

Because he knew about this, Ba Li would have to say something else to mislead the smaller realms, making them think that the World of Cultivation and the Xu Race were spies planted by the Hundred Treasures Realm. This would give the Giant Spirit Realm an excuse for what they did.

Just as Ba Li said his words, without waiting for Mu yu to speak, Zhao Hai coldly snorted as he looked at Ba Li and said, "Ba Li, I have seen a lot of shameless people, but I haven't seen someone as shameless as you. Everyone here knows what happened. Our World of Cultivation were subordinates of the Giant Spirit Realm ever since we entered the Ten-thousand Realm Battlefield. We offered tributes religiously so that the Giant Spirit Realm would protect us. But what did the Giant Spirit Realm do? When the Hundred Treasures Realm attacked us, you only sent 50 people. Moreover, you abandoned us. At that time, the World of Cultivation and the Xu Race killed more than a thousand people from the Hundred Treasures Realm. Even then, you wanted us to face them head-on, pushing us towards our end. If the Hundred Treasures Realm didn't take us in and cleared our grudge, then our two realms would have left the Ten-thousand Realm Battlefield. Your embarrassing your ancestors by telling such blatant lies."

Ba Li's complexion was pitch black when he heard Zhao Hai. What Zhao Hai said was true and this matter was indeed the fault of the Giant Spirit Realm. Ba Li couldn't refute it for some time, the people behind him were becoming more uneasy.

These people from smaller realms weren't fools. They didn't know what happened to the World of Cultivation, but now they knew. To be honest, they didn't expect this result. They didn't expect the World of Cultivation to betray the Giant Spirit Realm over this.

Ba Li was worried. He knew that if he let these smaller realms believe in Zhao Hai, then the Giant Spirit Realm would face troubles in the future. When he thought of this, Ba Li immediately said, "Kid, don't talk nonsense. What proof do you have that you're telling the truth?"

Zhao Hai looked at Ba Li, then he coldly snorted and said, "Ba Li, do you really think that I have no proof? Today, I will offend the Hundred Treasures Realm in order to prove the shamelessness of the Giant Spirit Realm." After he said that, Zhao Hai waved his hand and a large group of Undead appeared beside him. These Undead were all wearing black clothing. They were dressed exactly like the people from the Hundred Treasures Realm.

Besides their appearance, these Undead held something that was exclusive to the Hundred Treasures Realm, their small artifacts. Their hands were also small and flexible. Cultivators, from the Foundation Establishment Stage, train in a specific manner, causing them to have certain characteristics unique to their cultivation method. For example, the people from the Giant Spirit Realm had wide and thick hands. This was an important identification for cultivators.

Therefore, when Zhao Hai released the Undead, the people from smaller realms immediately looked at the hands. Compared to most practitioners, the hands of Zhao Hai's Undead were more slender, just like the people from the Hundred Treasures Realm. Upon seeing this, they couldn't help but believe Zhao Hai's words.

Chapter 1476: Collision

Seeing that the situation wasn't doing well, Ba Li coldly snorted and said, "So what if we don't save you? You don't even see who you're with. The Xu Race are well-known as bandits in the Ten-thousand Realm Battlefield. Even if you're willing to associate yourselves with bandits, the Giant Spirit Realm isn't. The moment you joined hands with the Xu Race, you're no longer someone from the Giant Spirit Realm."

When he heard this, Zhao Hai couldn't help but laugh as he said, "Good, Ba Li. Good, Giant Spirit Realm. Do you really think yourselves to be saints? Hearing what you said just now, even the Xu Race would appear to be better. At least the Xu Race recognizes themselves as bandits. The Giant Spirit Realm is truly causing shame to high-grade realms." Zhao Hai waved his hand and collected the Undead from the Hundred Treasures Realm.

At the same time, upon hearing Zhao Hai, the other people from the Giant Spirit Realm couldn't help but be ashamed. They were also angered. Their shame was caused by Ba Li's amateur response. In the Ten-thousand Realm Battlefield, who could dare claim that they didn't rob others and were living honestly? Ba Li actually said such a novice excuse. Didn't he just admit that the Giant Spirit Realm has abandoned the World of Cultivation?

They were angry because of what Zhao Hai said. Saying that the Xu Race was better than the Giant Spirit Realm caused the people from the Giant Spirit Realm to be annoyed. Although Ba Li chose the wrong words, what Zhao Hai said was excessive.

Ba Li also knew that he spoke wrongly, his complexion couldn't help but turn dark. He looked at Zhao Hai and said, "Don't bother talking, everyone can see the truth. The World of Cultivation betrayed the Giant Spirit Realm and even killed our people. If I don't kill you today, then my hatred wouldn't be quenched. Mu Yu, does the Hundred Treasures Realm really want to get mixed in with this group?"

Mu Yu looked at Ba Li, then he smiled faintly and said, "Since we're already here, then we might as well involve ourselves. No matter what, the World of Cultivation and the Xu Race are now the Hundred Treasures Realm's subordinates. We aren't the kinds of people who abandon their people."

As soon as he heard Mu Yu, Ba Li's expression turned even darker. He coldly snorted and said, "Enough chit-chat, take this." Then he waved his hand, causing his army to slowly retreat.

But what Ba Li failed to see was the despise on the expressions of the people from the smaller realms. These people were disappointed by Ba Li not only because the Giant Spirit Realm abandoned the World of Cultivation, but also because of Ba Li's recent performance. Ba Li was incompetent in their eyes. Faced with Zhao Hai's confrontation, he was in a dilemma and in the end finally said those careless words. If this was a genius of the Giant Spirit Realm, then they might as well think of a way of getting out.

In fact, when Mu Yu pointed out that it was Ba Li's idea to abandon the World of Cultivation and the Xu Race, the people from the smaller realms were already disappointed. Smaller realms depend on high-grade realms for protection. Because of this, smaller realms pay attention to any changes to high-grade realms. These realms were very sensitive to whether a high-grade realm could protect them or not.

In the past, the Giant Spirit Realm appeared to be strong. But after seeing Ba Li, these people couldn't help but shake their heads. If the Giant Spirit Realm were to be in the hands of people like Ba Li, then it would be hard to say if the Giant Spirit Realm could maintain their current domineering position.

If Ba Li knew what these people were thinking, he would have exploded. He didn't expect that instead of hiding his mistake, he made it even bigger.

Although these people had such thoughts, they didn't dare display it. They were still together with Ba Li and they knew that no matter how the Giant Spirit Realm turns out in the future, they could still deal with them right now.

Seeing Ba Li retreat, Mu Yu knew that they were planning for their first attack. He also waved his hand as everyone slowly returned to the Octopus Islands.

Upon entering the island, Mu Yu patted Zhao Hai's shoulder and said, "Good, Little Hai. Your performance was fantastic. Ba Li was in a real dilemma. Hahaha."

Zhao Hai smiled bitterly and said, "I hope Big Brother Mu doesn't blame me for killing so many of your people."

Mu Yu shook his head and said, "What's to blame? Do you know how many people from the Hundred Treasures Realm die in the Ten-thousand Realm Battlefield every year? Even then, they contributed to the Hundred Treasures Realm, so their death is worth it. Let's talk about how to deal with the enemy. Little Hai, we made more than 200 fake spirit snake needles this time. Do we use them all?"

Zhao Hai replied, "Big Brother Mu wants to defeat the Giant Spirit Realm, right? Then we'll use them all. I can also send my own large artifact to help. Once the Giant Spirit Realm's artifacts get defeated, everyone should prepare to charge immediately. With the help of our own large artifacts, it would be easier to deal with them."

Mu Yu nodded, he looked at Zhao Hai and then smiled as he said, "We need to defeat them as soon as possible. As long as we defeat them in a short period of time, those people from the smaller realms would be distracted. When the time comes, stage two of our plan would proceed. Then it wouldn't be long before the Giant Spirit Realm gets defeated."

Zhao Hai nodded, then released his own large artifacts beside the 1 million Undead. The Hell King's Ship and the three Eight Cyan Imperial Chariots appeared. The pagoda was still stationed on top of the Hell King's Ship. However, the Formation Breaking Spirit Snake Needle that Zhao Hai showed Mu Yu and the others earlier couldn't be seen.

Mu Yu was satisfied with this arrangement, he nodded as he stood in place looking at the black spots that were Ba Li's group. Then he said, "Everyone pay attention. As soon as Zhao Hai defeats the large artifacts of the other party, immediately attack at full power. Make sure to keep in formation and don't disperse!" He shouted using his spiritual qi, so his voice was loud and clear to everyone.

The atmosphere before the battle was tense as everyone took out their own artifacts. Meanwhile, Zhao Hai had closed eyes as he was paying attention to Ba Li and his group.

Ba Li's current setup was to smash against the enemy. But since last time, he learned his lesson. He had the three Giant Spirit Treasure Ship in the middle while the 20 Eight Cyan Imperial Chariots were divided into two columns, protecting the left and right side of the ships. Meanwhile, the army was at the back.

At this time, Ba Li and the others were almost a thousand li away from the Octopus Islands. Such distance was enough for the Giant Spirit Treasure Ships to gain their full speed. Ba Li then waved his hand and shouted, "Charge!"

Along with Ba Li's order, the three Giant Spirit Treasure Ships began to slowly accelerate. As for the 20 Eight Cyan Imperial Chariots, they sped away, surpassing the treasure ships.

Ba Li wasn't angered by this. This was also approved by him. The reason for this was the difference of acceleration between the treasure ship and the chariots. The treasure ship was large, so its initial startup was very slow. But this doesn't mean that its peak speed was low. On the contrary, the treasure ship's peak speed was very fast. Compared to the Giant Spirit Treasure Ship, the Eight Cyan Imperial Chariot was smaller and would naturally be faster at the start. However, the peak speed of the chariots couldn't compare to the Giant Spirit Treasure Ship.

The Giant Spirit Treasures Ship doesn't need protection when it just first started. After all, things went slowly during this time. Even if Zhao Hai and the others wanted to make the treasure ship veer from its course, the ship could still adjust it in time. Once the treasure ships get faster, it would be able to catch up to the Eight Cyan Imperial Chariots. As long as they bridge the gap, it would be too late for Zhao Hai and the others to deal a blow to the treasure ships.

It was because of this that the 20 chariots were allowed to go ahead of the Giant Spirit Treasure Ships. After a while, the treasure ships also picked up some speed. The distance between the ship and the chariots decreased and before long they were side by side. At this time, they were now less than 500 li away from the Octopus Islands.

The Giant Spirit Treasure Ships began to inch away from the Eight Cyan Imperial Chariots. They were now 300 li away from the Octopus Islands. In such a distance, the treasure ships would arrive in no time.

Ba Li clenched his jaws as the Giant Spirit Treasure Ships drew closer and closer to the Octopus Islands. He really wants to see how Mu Yu and the others would react once the ships smash through the guardian formation. However, Ba Li was also feeling a bit strange. He couldn't understand why the Hundred Treasures Realm didn't do anything as the treasure ship approached.

Just as Ba Li was feeling that something was strange, several large artifacts appeared out of the islands. Seeing these artifacts, Ba Li couldn't help but sneer. The artifacts that came out were the ship and the

chariots that he fought before. The last time that Zhao Hai used them, they were easily knocked away by the Giant Spirit Treasure Ship. So Ba Li didn't take them seriously.

Ba Li quickly noticed that something wasn't right. He discovered that there were a lot of needle-shaped artifacts behind the ship and the chariots.

These needle-shaped artifacts left a deep mark in Ba Li's mind. In the last fight, it was these needles that knocked the Giant Spirit Treasure Ship off its course, causing Ba Li to retreat.

Back then, the Hundred Treasures Realm only revealed ten of these needle-shaped artifacts. Ba Li knew that these needle-shaped artifacts weren't weak. This time, he counted more than a hundred needle-shaped artifacts. This caused Ba Li to feel bad.

However, even if he had a plan, it was already too late. The Giant Spirit Treasure Ship was now less than a hundred li from the Octopus Islands. He no longer has any time to make a turn.

At this time, Zhao Hai controlled the Hell King's ship and the Eight Cyan Imperial Chariots to charge along with the fake spirit snake needles. Mu Yu and the others were all standing inside the island, looking outside with nervous expressions. The Hell King's Ship, Eight Cyan Imperial Chariots, and the needles didn't look as big as the Giant Spirit Treasure Ship. This lineup looks like Zhao Hai was staging a suicidal attack against the treasure ship.

Both sides got closer and closer before they finally hit each other.

'Bang' 'Bang' 'Bang' 'Bang'

A continuous sound of collision was heard as the Hell King's ship and the other artifacts hit the middle Giant Spirit Treasure Ship, the one Ba Li was on.

Mu Yu and the others didn't see the impact, but Ba Li did. He didn't pay much attention to the Hell King's Ship, and this was where he was wrong. Just as the Hell King's ship was one li away, the battering ram on its helm flew out and became a snake-like thing. This caused Ba Li to be stunned.

Just as Ba Li was stunned, the battering ram hit the treasure ship that he was on. Ba Li felt the ship lightly shake, then there was nothing. He thought that the Giant Spirit Treasure Ship was just shaken. However, he suddenly felt that something wasn't right. The treasure ship was beginning to act strange.

Then when Ba Li lowered his head, his jaw couldn't help but drop. This was because a large hole appeared on the ship. Something was actually able to breach a large hole on the Giant Spirit Treasure Ship!

Ba Li's mind turned blank. He couldn't understand how this could happen. A seemingly ordinary battering ram was actually able to blow a hole on the ship?

Before Ba Li could recover, the Hell King's Ship already crashed into the Giant Spirit Treasure Ship. This time, Zhao Hai used all of his strength. By integrating the energy-collection formation on the spirit snake needle, not only did the Hell King's ship take Zhao Hai's spiritual qi, it also included the spiritual qi of the Undead and everyone inside Zhao Hai's strength. It can be said that the current Hell King's Ship was a ship-breaking artifact. The formation inside the Hell King's Ship was much more powerful than the formation inside Tang Jie's Formation Breaking Spirit Snake Needle. Although Zhao Hai doesn't have a lot of Transcending Tribulation Experts, the number of people that could provide energy for Zhao Hai exceeded a billion. Faced with such overwhelming strength, the Giant Spirit Treasure Ship had no chance.

'Bang'

A large sound was heard as Ba Li could feel himself flying. Moreover, he could feel his internal organs shaking before he vomited blood. His face revealed the shock he felt about the current situation.

The Giant Spirit Treasure Ship that Ba Li was on was finished. It was completely crushed by the Hell King's Ship. Ba Li was fortunate enough to be thrown away. There were a lot of people that were directly killed by the collision!

Chapter 1477: Victory

Seeing the miserable state of the people from the Giant Spirit Realm, Ba Li vomited another mouthful of blood. This time, he was truly agitated.

It's not strange for him to be agitated. There could have been 30 thousand people on these three Giant Spirit Treasure Ships. However, Ba Li didn't let so many people on his ships, only 8000 of his people as well as a few servants from the lower realms. In total, the three ships had 10 thousand people, most of them from the Giant Spirit Realm.

The Giant Spirit Treasure Ship was originally a defensive artifact instead of an offensive one. Although the treasure ship's ramming was very strong, it's because of its good defense. With its large size, defense, and heavy weight, its momentum was great so its ramming strength would naturally be great. But when it comes to the strongest aspect of the Giant Spirit Realm, it's its defensive strength.

The defensive strength of the Giant Spirit Treasure Ship not only involved its body. The ship also has a lot of defensive formations installed within it. So no matter how large the attack on the ship was, the people inside wouldn't feel it too much. Naturally, this was on the premise that the ship wasn't destroyed.

Now that the Giant Spirit Treasure Ship has been shattered by the Hell King's Ship, its defensive system was destroyed. If it were a normal situation, one or two formations would be destroyed, so the people inside wouldn't be too affected.

But now, the Giant Spirit Treasure Ship was destroyed by Zhao Hai's liquid silver. The moment liquid silver broke through the ship, it immediately rendered the ship's defenses invalid.

With the current strength of the Hell King's Ship, even if the Giant Spirit Treasure Ship was in a good condition, it still wouldn't be able to resist liquid silver's attack. Let alone now that the Giant Spirit Treasure Ship has been smashed into by the Hell King's Ship.

A lot of people on the Giant Spirit Treasure Ship didn't even realize what was going on before they were killed. The reason why Ba Li wasn't dead was because he saw the hold in front of the ship.

Ba Li was the first person who saw the Giant Spirit Treasure Ship being destroyed. Although he was shocked, his warrior's instinct made his body move before his mind recovered. This caused him to only be injured and not killed. The other people from the Giant Spirit Realm weren't as fortunate. They had seen the Hell King's Ship being thrown away by the Giant Spirit Treasure Realm before, so they thought nothing of it.

The other two Giant Spirit Treasure Ships suffered the same fate as Ba Li's ship. The other treasure ships were faced with two Eight Cyan Imperial Chariots each. Naturally, the chariots were in cooperation with liquid silver's version of the Formation Breaking Spirit Snake Needle. In one fell swoop, these treasure ships were also ruined.

The Giant Spirit Treasure Ship were destroyed without the 20 Eight Cyan Imperial Chariots being able to catch up. In fact, the chariots were destroyed by the fake spirit snake needles. At this point, all the large artifacts of the Giant Spirit Realm were destroyed. The people from the Giant Spirit Realm were also severely injured. There were initially 8000 people from the Giant Spirit Realm. Two thousand were killed directly while nearly 3 thousand were injured. The ones who remained intact numbered more or less 3 thousand.

Following this, Mu Yu commanded his people to attack. At this time, Ba Li had just recovered and didn't have enough time to organize his people. As for the Hell King's Ship, the Eight Cyan Imperial Chariots and the fake spirit snake needles, they were already rampaging through the Giant Spirit Realm's subordinate army.

The Giant Spirit Realm's subordinate army was currently in confusion. They didn't know what just happened. It must be known that the leaders of the army were in the Giant Spirit Treasure Ships along with Ba Li. This would give these people face and would also make commanding the troops much more convenient.

However, who would have expected the Hell King's Ship to cause such heavy casualties. For the subordinate army, they had just lost their commanders. And with the Hell King's Ship and the other large artifacts causing chaos, the Giant Spirit Realm's army formation was destroyed in no time.

And now that Mu Yu and the others have joined the fray, things on the side of the Giant Spirit Realm turned even more chaotic. They simply didn't have any means to organize an effective resistance.

This simply couldn't be called a battle. The moment the Giant Spirit Treasure Ships were destroyed, it has turned into a one-sided slaughter.

When Mu Yu and the others saw the Giant Spirit Treasure Ships and the Eight Cyan Imperial Chariots being destroyed one after another, their morale exploded like a volcano. With great vigor, they killed their way into the enemy formation.

Losing their commanders in the Giant Spirit Treasure Ship, the people from the subordinate realms of the Giant Spirit Realm were in shatters. As soon as they clashed with Mu Yu and the others, they were defeated immediately.

There was a hidden disadvantage in recruiting people from subordinate realms. These people were from different walks of life and were all violent in the battlefield. The people who could command them were only their own people. It would be impossible for Ba Li and the others to take control of them. This was also a custom in the Ten-thousand Realm Battlefield.

With Ba Li injured and most of the commanders being killed, the command system of the Giant Spirit Realm's alliance army was essentially destroyed.

Ba Li was now standing firmly on the ground. However, his heavy injury as well as the chaotic state of the Giant Spirit Realm's army made it impossible for him to think of a solution to the situation.

Seeing this, Ba Li knew that he had lost. He didn't expect his 80-thousand man army to be defeated this swiftly. He couldn't bear the feeling of defeat that he vomited blood once more, further worsening his injury.

At this time, someone from the Giant Spirit Realm arrived beside Ba Li. The Giant Spirit Realm was still a high-grade realm in the end, so their experts were experienced enough in all kinds of situations. They were able to recover sooner than the people from lower-grade realms. Even so, the people that remained on Ba Li's side now numbered less 3 thousand. Moreover, the Hell King's Ship was heading their way.

The person from the Giant Spirit Realm looked at Ba Li and asked, "My lord, what do we do now?"

Seeing the Hell King's Ship coming towards them, Ba Li clenched his teeth and said, "Disperse and regroup in the Imperial Spirit Sect." After he said that, he turned around and flew away. Hearing this, the people from the Giant Spirit realm couldn't help but be stunned. But as the Hell King's Ship got closer and closer, they also turned around and ran.

It can be said that the departure of the people from the Giant Spirit Realm represented the outcome of the fight. If the people from the Giant Spirit Realm chose to run, then what of the other realms?

Although it can be said that the Hundred Treasures Realm occupied the winning side, Mu Yu and the others still didn't dare make any reckless pursuit. He divided his men into 2 thousand people and began to chase. Now that the Giant Spirit Realm's army was routed, there was no longer any need for Zhao Hai's large artifacts, so he collected them all back.

However, Zhao Hai didn't idle. Instead of chasing the enemy down, he collected the corpses of the defeated along with the remains of the Giant Spirit Treasure Ships and the Eight Cyan Imperial Chariots. He was the one who defeated them, so he has the right to collect them.

To be honest, Zhao Hai had set his eyes on the Giant Spirit Treasure Ship. This big was large and had powerful momentum. Once he sent it to the Space and produced veins of its materials, he would be able to integrate the Giant Spirit Treasure Ship into Liquid Silver.

But as for getting all three Giant Spirit Treasure Ships, Zhao Hai didn't hope for it. After repairing the treasure ships, he would hand it over to Mu Yu. After all, he couldn't be too greedy.

However, in the meantime, Zhao Hai wouldn't hand the ship over to Mu Yu. After all, the ships were still heavily damaged. One of them had half of its hull destroyed, this was Ba Li's ship. As for the other two, they had lighter damage in comparison. Zhao Hai plans to repair these two and hand them over to the Hundred Treasures Realm later on. The last treasure ship would be the one he would integrate to Liquid Silver.

There was no need for Zhao Hai to join the chase. Because of this, after getting the corpses along with the Undead, he proceeded to return to the island.

Zhao Hai knew that Mu Yu would chase as far as the Imperial Spirit Sect, he wasn't that crazy. They would return before long. Once Mu Yu returns, they would proceed to plan what to attack next.

After Zhao Hai returned to the Octopus Island, he immediately entered his cave residence and then sneaked into the Space to look at the situation outside via the Space's monitor. And just like what he thought, Xu Wuzun and the other had already stopped chasing and were preparing to head back.

The Xu Race had a jubilant expression on their faces. And after considering how much they lost in the battle, they became even happier. They didn't actually suffer any casualties, only some people who were severely injured. Moreover, the people from the Giant Spirit Realm's army who died in their hands

have reached ten thousand. Up until now, the Giant Spirit realm already lost more than 20 thousand people.

A fourth, they actually managed to kill a fourth of the enemy without suffering heavy losses. Moreover, only 3000 people from the Giant Spirit Realm were left. This was an absolute win! Even considering the countless battles where they faced the Giant Spirit Realm, this was the most overwhelming victory that the Hundred Treasures Realm experienced!

After everyone retreated, Mu Yu looked around but wasn't able to see Zhao Hai. His expression changed as he asked, "Little Hai? Where is Little Hai? Did any one of you see him?"

Nobody made any noise. Tang Jie and the others' complexion changed. They didn't want Zhao Hai to suffer and accidents. Then at this time, a person from the Giant Spirit Realm was approaching from a distance. Everyone stared. Then just as they were about to attack, Mu Yu waved his hands and said, "Are you all blind? Can't you see that it's an Undead?" After Mu Yu said that, everyone stopped and discovered that it was indeed an Undead.

The person from the Giant Spirit Realm bowed to Mu Yu and said, "I have seen Mister Mu Yu. The Young Master has tasked me to tell you that he has returned to the Octopus Islands. There's no need to worry about him."

Chapter 1478: Everyone's Reaction

Mu Yu looked at the Giant Spirit Realm Undead and then suddenly laughed. This caused Tang Jie and the others to be surprised. They also heard the Undead saying that Zhao Hai was alright and that there was no need to worry. So why did Mu Yu suddenly laugh?

Tang Jie looked at Mu Yu and said, "Big Brother Mu, why are you laughing?"

Mu Yu turned his head to Tang Jie as he laughed and said, "I just find it amusing for someone from the Giant Spirit Realm to salute to me. Although it's an Undead, they still died in our hands."

Upon hearing Mu Yu, Tang Jie stared for a moment before he laughed as well. Whether it be Zhao Hai or Kong Miao and the others, they had underestimated the hatred between the Hundred Treasures Realm and the Giant Spirit Realm.

The Giant Spirit Realm and the Hundred Treasures Realm had fought for too long that their hatred has been engrained deep into their bones. It wouldn't just disappear in a matter of months or years.

In the past, because both sides knew that they didn't have the means to deal with the other, they could only bear with this feeling. Due to this enmity, none of them wanted to die before the other.

Mu Yu and the others' present situation was the same. Although their souls haven't been burned by hatred, the fire within it has no doubt been lit. So when they saw someone from the Giant Spirit Realm being respectful towards them, they couldn't help but feel extraordinarily happy.

After laughing for some time, Mu Yu looked at the Giant Spirit Realm Undead and said, "Why did Little Hai return to the Octopus Islands so soon? Why didn't he come and kill a couple more enemies?"

Mu Yu has a blaming tone in his voice. In his opinion, nothing was more important than killing the people from the Giant Spirit Realm. Zhao Hai had formidable strength, enough to kill a lot more people. However, he actually went back, causing Mu Yu to be displeased.

The Giant Spirit Realm Undead replied, "Master said that he went back in order to repair the acquired Giant Spirit Treasure Ships and Eight Cyan Imperial Chariots."

Upon hearing the Undead, Mu Yu's displeasure immediately vanished. He nodded and said, "I see, then I guess everyone will have to withdraw as well." After he said that, he led everyone back to the Octopus Islands.

Just as Zhao Hai thought, Mu Yu was planning on an assault against the Giant Spirit Realm. So when he heard the Undead saying that Zhao Hai was going to repair the Giant Spirit Treasure Ships, he immediately understood what Zhao Hai wanted to convey. Zhao Hai also wanted to attack the Giant Spirit Realm.

When he thought of this, Mu Yu couldn't help but feel embarrassed for being displeased at Zhao Hai. Without himself knowing, he flew quicker as he thought about seeing Zhao Hai.

The group quickly returned to the Octopus Islands. However, they didn't see Zhao Hai. Zhao Hai was currently inside his cave residence. Undead were guarding the entrance, not letting anyone in.

Seeing this, Mu Yu immediately gave the order forbidding people from approaching Zhao Hai's residence. At the same time, he made the refiners prepare just in case Zhao Hai needs assistance.

After dealing with Zhao Hai's matters, Mu Yu and the others summarized the fight to write a combat report to be sent back to the realm.

As Mu Yu and the others were busy making their combat results, the entire Ten-thousand Realm Battlefield was shaken. Fights between the Hundred Treasures Realm and the Giant Spirit Realm were no longer news to the people in the Ten-thousand Realm Battlefield. This was because every couple hundred years, these two realms would wage a huge war against each other. The people from other realms were already used to this.

However, whenever these two realms go to war, other high-grade realms would still pay attention. This wasn't to say that they cared about the two realms. On the contrary, these people were harboring evil intentions. They wanted to see how each war ends and see if they can get easy pickings between the two of them.

Because of this, almost every high-grade realm knew the results of the battles. But the result this time caused them to be shaken. This wasn't the result they expected.

Not only the high-grade realms, even the lower-grade realms didn't expect this result. The subordinate realms under the Giant Spirit Realm were now in confusion. Now they knew the reason why the World of Cultivation defected to the Hundred Treasures Realm along with the Xu Race. This was because the Giant Spirit Realm has given up on them.

These smaller realms give tribute to high-grade realms in exchange for protection. However, the situation of the World of Cultivation was different. Although they had been giving tribute, they weren't protected. What made these smaller realms despise the Giant Spirit Realm was the fact that the World of Cultivation was attacked by the Hundred Treasures Realm, the Giant Spirit Realm's greatest enemy.

But in the end, they still gave up on the World of Cultivation. How can people not despise them for it? How can a high-grade realm do this?

If it was just this, then it might not have been as impactful. The Giant Spirit Realm was a strong realm. Even if they cannot deal with the Hundred Treasures Realm, they could still deal with smaller realms with no problem.

If the Giant Spirit Realm managed to trample the traitors in the Octopus Islands, then nothing might have happened. They didn't even need to eliminate the traitors. As long as they teach the World of Cultivation and the Xu Race a lesson, then the message would have been received. These smaller realms wouldn't think badly of the Giant Spirit Realm.

However, the Giant Spirit Realm lost. Moreover, their defeat was resounding. Three Giant Spirit Treasures Ships were destroyed along with 20 Eight Cyan Imperial Chariots. Of their 80 thousand people army, twenty thousand died, and tens of thousands more were injured. Nobody expected this result, even the Hundred Treasures Realm.

The higher-ups of the Hundred Treasures Realm sent Mu Yu over in order to hold the Giant Spirit Realm. The longer Mu Yu delays the Giant Spirit Realm, the more disadvantageous it would be for the Giant Spirit Realm. Moreover, the Hundred Treasures Realm would be able to use this opportunity to make a move on the Giant Spirit Realm's subordinate realms. Then they would amass an army and fight the Giant Spirit Realm in a decisive battle.

The higher-ups didn't expect Mu Yu to Win. In their minds, this was an impossible feat. After all, the Octopus Islands was too close to the Giant Spirit Realm's territory. The Giant Spirit Realm could easily amass a giant army. Although the Hundred Treasures Realm was connected to the Octopus Islands via the transmission formations, sending over a large army would still be very hard to do.

An army needed a place to rest and the Octopus Islands' area was limited. The islands could accommodate an army, but the number was limited. For this reason, the Hundred Treasures Realm didn't send out a lot of people to defend the Octopus Islands.

But things have changed, Mu Yu defeated the Giant Spirit Realm. This was something that nobody expected. Therefore, the Hundred Treasures Realm immediately prepared troops in order to reinforce the Octopus Islands.

Before the battle, the Hundred Treasures Realm already contacted the subordinate realms of the Giant Spirit Realm and explained why the World of Cultivation defected. They were hoping that these subordinate realms would follow.

But during that time, these subordinate realms were hesitant. After all, things haven't reached a certain degree, so it's normal for them to hesitate in making the move.

The Hundred Treasures Realm weren't worried that these lower-grade realms would report to the Giant Spirit Realm. After all, the things they said about the World of Cultivation was true. And these lower-grade realms would want to have a way out for themselves. They were also afraid. Afraid that the Hundred Treasures Realm would destroy them if they told the Giant Spirit Realm. By then, if the Giant Spirit Realm abandons them like what they did to the World of Cultivation, then they would be finished.

This was completely possible in the minds of these lower-grade realms. Don't forget that the World of Cultivation was battling the Hundred Treasures Realm, they even killed the people from the Hundred Treasures Realm. Even then, the Giant Spirit Realm still abandoned them. If the Hundred Treasures Realm chose to deal with them because they told a secret, then the Giant Spirit Realm might abandon them in a heartbeat.

Now that Ba Li basically confirmed that they abandoned the World of Cultivation, the minds of these lower-grade realms began to turn.

And with the overwhelming defeat of the Giant Spirit Realm, the thoughts of these smaller realms began to wander.

As for the high-grade realms, they had even more thoughts in their minds. They didn't expect that a clear victor would appear between the Hundred Treasures Realm and the Giant Spirit Realm after years of being in a stalemate.

Although the Hundred Treasures Realm's victory was only a small one, its implication was huge. The people from high-grade realms were stunned for a while before they immediately studied how to deal with the situation.

For these high-grade realms, keeping the current state of the Hundred Treasures Realm and the Giant Spirit Realm would be the best situation. If one side swallows the other, then this would give the victor a huge leap in strength in a very short time. This would be troublesome to the other high-grade realms.

In the past, they didn't think that something like this would happen. But when it really did happen, they would have to find a way to deal with it. But what made them feel troubled was the fact that they didn't know what to do in a short time.

At this point, the high-grade realms couldn't help but get a headache. They didn't know whether they should help the Giant Spirit Realm or the Hundred Treasures Realm.

Chapter 1479: Striking While The Iron Is Hot

For these high-grade realms, it's possible to help the Giant Spirit Realm and the Hundred Treasures Realm. If they help the Giant Spirit Realm, then they might not be able to get any advantages and might even offend the Hundred Treasures Realm. Nevertheless, this also meant that they could maintain the balance between the Giant Spirit Realm and the Hundred Treasures Realm.

And if they help the Hundred Treasures Realm deal with the Giant Spirit Realm, they will definitely get some benefits. Once the Hundred Treasures Realm defeats the Giant Spirit Realm, a lot of territory would be up for grabs. With how large the Giant Spirit Realm's territory was, the Hundred Treasures Realm would have a hard time swallowing everything. To be honest, this choice was very attractive.

Faced with this dilemma, the people from the high-grade realms didn't know what to choose. While they were facing this problem, Mu Yu was already considering their next action. Their target would be the Imperial Spirit Sect.

However, Mu Yu received an order to delay their action for a few days. The realm would be sending people over. This time, the reinforcements wouldn't be less than 50 thousand. And this was just the first batch, more people would be arriving later on.

Mu Yu knew that the realm wants to capitalize on this victory. Mu Yu didn't oppose this decision. The morale of the troops was at an all-time high. Everyone was waiting for the next battle. If they don't use this opportunity, then they would be wasting the gift that heaven sent them.

Mu Yu knew that the reinforcements this time couldn't all be from the Hundred Treasures Realm. It was impossible for the realm to send so many of their own people. Of the 50 thousand people, only a fraction of them would be from the Hundred Treasures Realm. The majority would be people from subordinate realms.

In this case, things would get more complicated. The more people from subordinate realms, the harder it would be to command the army. One shouldn't look at the 50-thousand people reinforcement as a huge boost in strength. In fact, the increase wasn't as great as one expects.

Thinking of this, Mu Yu couldn't help but sigh. Then he turned his head towards Zhao Hai's residence. It has already been two days since Zhao Hai closed up. Mu Yu was beginning to worry.

Mu Yu wasn't worried that Zhao Hai would suffer a tragedy. Instead, he was worried that Zhao Hai wouldn't be able to repair the Giant Spirit Treasures Ships. If he couldn't, then it would tremendously affect their next actions.

While Mu Yu was thinking about this, Tang Jie arrived at his side and said, "Big Brother Mu, the first batch of reinforcements is here."

Mu Yu nodded and said, "Let's go and take a look. Have Xu Wuzun arrange their accommodations. Since the Octopus Islands aren't too big, we can't give them one residence each person. Have them share a room."

Tang Jie nodded and said, "Don't worry, Xu Wuzun has taken care of it. I saw it myself. There's no problem."

Mu Yu nodded as he led Tang Jie towards the transmission formations. Although the Hundred Treasures Realm sent a lot of people, they didn't send another commander. This meant that everyone would still be commanded by mu Yu. This also made Kong Miao and Xu Wuzun relax.

The situation outside was clearly seen by Zhao Hai who was inside the Space. Not only Mu Yu, Zhao Hai was also paying attention to Ba Li's current situation.

Ba Li was aware that the people of the subordinate army had sent jade sword messages back to their realms. However, he didn't have the capabilities to stop them right now.

Ba Li was truly injured this time. His wounds were very heavy. Generally, cultivators carry pills in order to heal their injuries. But strangely, Ba Li's injury could not be healed no matter how many pills he took.

The Giant Spirit Realm lost a lot of people this time, and many were also injured. Because of this, they didn't have any way to manage the people from the subordinate realms.

But at the very least, Ba Li was able to send a message back to the Giant Spirit Realm asking for reinforcements. Naturally, Ba Li knew that the Hundred Treasures Realm wouldn't just let them off easily.

Ba Li wanted to get better soon, so he ate pills like they were his meals. However, his recovery wasn't doing very well. Although he has more or less restored his strength, he would still cough up blood from time to time. This was something that Ba Li didn't understand.

Regardless, the Giant Spirit Realm's response was even quicker than the Hundred Treasures Realm. A day before the reinforcements of the Hundred Treasures Realm arrived, the Giant Spirit Realm's reinforcements came. Leading the Giant Spirit Realm's reinforcements was a veteran Severed Soul Expert, an Elder of the Giant Spirit Race.

After this Elder arrived, he immediately announced the demotion of Ba Li's position in the army. Now, the commander of the army was this Elder named Ba Tu.

Not only did Ba Tu bring 3000 people from the Giant Spirit Realm as reinforcement, he also brought two Giant Spirit Treasure Ships, 30 Eight Cyan Imperial Chariots, and two Formation Breaking Spirit Snake Needles.

This time the Giant Spirit Realm has truly put in great capital. It seems like they were still thinking that Mu Yu would be waiting for them on the Octopus Islands. They didn't expect that Mu Yu was planning an offensive a long time ago.

One couldn't blame the Giant Spirit Realm for having such thoughts. Although the Hundred Treasures Realm won against them, they didn't win because of numerical advantage. The Giant Spirit Realm expects the Hundred Treasures Realm to be defending the island since their offense was insufficient. They never thought that Mu Yu would attack them.

Also, the Giant Spirit Realm had another error in their judgement. They thought that the Hundred Treasures Realm would not increase their troops due to time constraints. Therefore, they thought about attacking the Octopus Islands once more.

One could say that the Giant Spirit Realm was acting stupidly for not thinking that the Hundred Treasures Realm would send reinforcements. It can be said that the Giant Spirit Realm was too arrogant to think about this point.

Now that the reinforcements of the Hundred Treasures Realm was arriving, Zhao Hai knew that it was time for him to head out. Not only to give Mu Yu the Giant Spirit Treasure Ship, but also to report about the Giant Spirit Realm's situation.

To be honest, Zhao Hai wasn't worried that they wouldn't be able with the Giant Spirit Realm. He found that the Giant Spirit Realm army no longer had any substance right now. The people from their subordinate realms already made their army's foundation shaky. If they didn't stabilize the state of their army and still attacked the Hundred Treasures Realm, then that would be a very stupid decision on their part.

Zhao Hai could almost guess what the Giant Spirit Realm wanted to do. The Giant Spirit Realm wanted to stabilize their army by increasing morale. However, this was basically gambling. And the odds were against them.

Because of their two prior failures, the morale of the Giant Spirit Realm army was very low. The subordinate realms were in disarray. They need to deal with this situation first before gambling on an attack.

However, this wasn't Zhao Hai's problem to deal with. The Giant Spirit Realm can do whatever it wants. The more stupid the Giant Spirit Realm was, the better it was for him.

Just as Zhao Hai left his residence, someone from the Hundred Treasures Realm bowed towards him and said, "Grandmaster, Master Mu wants you to see him as soon as you can."

Zhao Hai nodded as he smiled and said, "You're Mu Ping, right? There's no need to call me Grandmaster. Where's Brother Mu right now?" Zhao Hai remembered Mu Ping because he was one of Mu Yu's confidants. Mu Ping was Mu Yu's junior brother. Mu Yu's Master already stopped taking care of his disciples a long time ago and left everything to Mu Yu. Although Mu Yu and Mu Ping were disciple brothers in-name, they actually had a master-disciple relationship.

Zhao Hai had always been confused with the Hundred Treasures Realm's naming sense. Tang Jie and Tang Wen were disciple brothers and not blood brothers, yet they had the same surname. Mu Yu and Mu Ping were the same. Zhao Hai doesn't understand.

After asking Tang Jie about it later on, he discovered that disciples would take on the master's surname in the Hundred Treasures Realm. Tang Jie's master was surnamed Tang, so he was also surnamed Tang. The same was true for Mu Yu's master, he was also surnamed Mu.

Zhao Hai was curious about the Hundred Treasures Realm's rules. However, he didn't ask too much. Although these rules were peculiar, they weren't strange.

Hearing Zhao Hai's greeting, Mu Ping couldn't help but show a smile. Mu Ping learned cultivation from Mu Yu even since he was a child. He was smart and talented, so he made great progress. Now, he's at the Transcending Tribulation Stage. He has admired Mu Yu ever since his childhood. In his heart, Mu Yu wasn't only his Master, but also a father figure as well.

Being Mu Yu's aide, Mu Ping also admired Zhao Hai. In his opinion, Zhao Hai was someone second only to Mu Yu. Being called by his own name by Zhao Hai was an honor for him.

Mu Ping quickly replied, "Brother Zhao, Brother Mu Yu is currently welcoming the reinforcements. Please come with me." Zhao Hai nodded and immediately followed Mu Ping back to Mu Yu's residence.

Mu Ping took Zhao Hai into the residence. But instead of going to the personal room, he was taken to the lounge. Zhao Hai didn't mind it. There were a lot of people this time. In addition to the people from the Giant Spirit Realm, there's also the people from the Hundred Treasures Realm's subordinate realms.

Before long, the sound of footsteps could be heard as Mu Yu entered the room. Seeing Zhao Hai, he laughed and said, "Little Hai, you're finally out. How is it? Has it been taken care of?"

Zhao Hai smiled faintly and said, "Big Brother Mu, don't worry, it's done. However, because it's been heavily damaged, one of them has to be integrated to my liquid silver. The other two have been repaired along with 10 Eight Cyan Imperial Chariots."

After he said that, Zhao Hai took out a jade slip and then handed it over to Mu Yu before saying, "The materials and methods used to create the Giant Spirit Treasure Ship are here. There shouldn't be any problems with it."

Mu Yu received the jade slip with shining eyes, then he said, "Good, this is fantastic. Let's see if the Giant Spirit Realm would still be arrogant in the future. Little Hai, I didn't expect you to repair the Giant Spirit Treasure Ship and the Eight Cyan Imperial Chariots in a short time. With this, we have more confidence in dealing with the Giant Spirit Realm."

Zhao Hai smiled faintly and said, "The Giant Spirit Realm sent over 3000 people as reinforcements along with two Giant Spirit Treasure Ships, two Formation Breaking Spirit Snake Needles, and 30 Eight Cyan Imperial Chariots. Ba Li has also been removed from his position. Right now, the army commander position is held by an Elder named Ba Tu. Does Big Brother Mu know this person?"

Hearing Ba Tu's name, Mu Yu's expression immediately changed. "Ba Tu actually came. It seems like the Giant Spirit Realm is nervous this time."

Zhao Hai looked at Mu Yu and said, "Is Ba Tu famous?"

Mu Yu nodded and said, "He's very famous. Ba Tu is the most decorated warrior of the Giant Spirit Realm. He's different from average people of his race. Ordinary Giant Spirit Realm experts would have more than ten artifacts, even dozens of artifacts. On the other hand, Ba Tu only had two artifacts, his two axes."

Mu Yu looked at Zhao Hai and said, "Although it might seem silly that he only has two artifacts, these two artifacts are his Life Source Weapons. Their offensive strength is formidable. Although he's only at the Severed Soul Stage, he can escape from an Immortal-stage expert. In battles, he's not afraid to die and would go into the frontlines. He's a very difficult person to deal with. Ever since he became an Elder,

he rarely went out. But now that he's sent here by the Giant Spirit Realm, it seems like the Giant Spirit Realm is already aware that things have gotten urgent. However, why did they send Formation Breaking Spirit Snake Needles? Do they still want to attack us?"

Zhao Hai smiled faintly and said, "Big Brother Mu guessed right. He wants to take the offensive. They're currently getting their troops ready along with the 3000 reinforcements in order to attack the Octopus Islands."

Mu Yu stared, then he laughed as he said, "They really want to attack? Hahaha. Good, that's fantastic. Then let them come, we'll be waiting."

Zhao Hai looked at Mu Yu then he said, "Does Brother Mu Yu really want to just wait here?"

Mu Yu stared, he looked at Zhao Hai and asked, "Little Hai, what do you mean? Aren't we going to exhaust the enemy here?"

Zhao Hai smiled faintly and said, "It's good for us to wait here and be on the defensive. But after asking Mu Ping, he said that we have more reinforcements coming soon. Wouldn't it be boring if we just wait here? Doesn't Big Brother I want to strike while the iron is hot? As long as we defeat the Giant Spirit Realm in a head-on battle, the lower-grade realms would no longer have any reservations. Even if they don't get completely wiped out, they wouldn't have any will left to face us in the next battle. After all, they still need to consider a way of retreat. Our offensive wouldn't only show them our strength, but our ambitions as well."

Chapter 1480: Farsighted

Mu Yu muttered, "Ambition?"

Zhao Hai looked at Mu Yu and said, "Right, ambition. Big Brother Mu, I think it's important for a realm to show their ambition. These smaller realms want to grow, but how can they grow their power in the Ten-thousand Realm Battlefield? Naturally, they would need a high-grade realm to provide them with protection. Even if they can't grow, they still want to be safe from being bullied by others. We fought against the Giant Spirit Realm twice and we won both times. Repelling the Giant Spirit Realm was enough to show our strength. But even if we have strength, but we don't show ambition, these smaller realms wouldn't follow us. If we take the offense to the Giant Spirit Realm, it would make these smaller

realms think that we have ideas on the Giant Spirit Realm's territory. When the time comes, they wouldn't be resistant to joining our side. If we don't attack, then they might think that we don't want the Giant Spirit Realm's territory and so they won't join us."

Mu Yu's eyes shone, but he didn't reply immediately. Instead he walked back and forth a couple of times before saying, "Alright, let's do that. Let's show the people the ambition of the Hundred Treasures Realm."

Zhao Hai smiled faintly and said, "As long as we defeat the Giant Spirit Realm in a head-on battle, what we do later on would become easier. Moreover, Big Brother Mu, we've already made a huge wave here. The other high-grade realms being quiet is strange. Those guys aren't pacifists, so they would hope that the Giant Spirit Realm and the Hundred Treasures Realm would lose a lot this time so that they would benefit. As long as we defeat the Giant Spirit Realm, those people would no longer have any thoughts towards us. Some of them may help us, hoping to get benefits once we win. There would also be people who want the Giant Spirit Realm and the Hundred Treasures Realm to continue tearing each other down. Once the Giant Spirit Realm is about to perish, they would definitely send people to help. Therefore, we should be more careful and be more guarded against high-grade realms."

Mu Yu looked at Zhao Hai and then he suddenly laughed. He patted Zhao Hai's shoulder and said, "Alright, good. The Hundred Treasures Realm is truly blessed to have you. The people high up have already thought about this. Let them handle these things. We just need to do our jobs."

Zhao Hai was stunned, then he was somewhat embarrassed. His analysis wasn't made because he obtained it from others, it was all made by himself. He didn't think that veterans of the Ten-thousand Realm Battlefield would have already thought about it.

Zhao Hai embarrassingly replied, "I made Big Brother Mu laugh, I was just worried."

Mu Yu replied with a serious expression. No, Little Hai, this isn't just you being worried. You've seen it coming. Even Little Jie and Little Wen didn't see it, they still need some practice. You might not know this, but the Hundred Treasures Realm has prepared for a long time in order to deal with the Giant Spirit Realm. This includes our previous battles, we've been preparing for the right time to arrive. In the previous wards, whenever we get news about talents of the Giant Spirit Realm, we would eliminate them no matter what the price is. Our goal is to eliminate all of the smart people in the Giant Spirit Realm, leaving only the fools behind. After doing this for several years, we have finally achieved results. The Elders of the Giant Spirit Realm have become reckless and unwise, otherwise they wouldn't have made so many blunders. In addition to this, the Hundred Treasures Realm also made an agreement with the realms that are adjacent to us. Once the Giant Spirit Realm is destroyed, its territory would be

divided. We will not swallow everything on our own. It's precisely because of this that we're able to deal with the Giant Spirit Realm with a peace of mind."

Upon hearing what Mu Yu said, Zhao Hai was actually startled. He didn't expect the Hundred Treasures Realm to go to such means just to deal with the Giant Spirit Realm. It might be a stupid method, but it was very effective. Killing all the clever members of the Giant Spirit Realms while leaving the fools behind, it was equivalent to weakening the foundation of the Giant Spirit Realm. Looking at it, it seems like the Giant Spirit Realm's lack of wise decisions was due to this plan.

Zhao Hai now admired the Hundred Treasures Realm. To deal with the Giant Spirit Realm, they actually formulated a very long-ranged plan. This was what they call farsighted.

Zhao Hai sighed and said, "Seniors are truly highly skilled, farsighted. I admit being inferior. With people like this, the Hundred Treasures Realm doesn't need to worry about dealing with the Giant Spirit Realm."

Upon hearing Zhao Hai, Mu Yu couldn't help but laugh as he said, "Alright, there's no need to be like this. Things have been going well according to plan. But this time, the Giant Spirit Realm brought two Formation Breaking Spirit Snake Needles and they even sent Ba Tu. Ba Tu is a ruthless person, he would use the spirit snake needles to deal with the Giant Spirit Treasure Ships in our hands. If he did that, then our treasure ships would suffer."

Zhao Hai smiled faintly and said, "It's fine. Just leave the Formation Breaking Spirit Snake Needles to me. Brother Mu, don't forget that my Hell King's Ship and the Eight Cyan Imperial Chariots have been integrated into my Liquid Silver. Even if they are destroyed, Liquid Silver's properties would repair them in an instant. There's nothing to worry about."

Mu Ya pat his head as he laughed and said, "I forgot. Good. Then you'll take care of it. Hahaha. I want to see what Ba Tu's face when the time comes."

Zhao Hai heard that something wasn't right with Mu Yu's tone. He couldn't help but ask, "Big Brother Mu, do you have a grudge with Ba Tu?"

Mu Yu snorted and said, "Years ago, Ba Tu killed my Master's wife. This hatred is something that cannot be forgiven. Unfortunately, my Master is now at the Immortal Stage and couldn't kill Ba Tu himself. So naturally, it's the disciple who will need to make a move."

Zhao Hai nodded and said, "I see, then we cannot let him off. Big Brother Mu, Ba Tu will head off in two days. When do we leave?"

Mu Yu thought about it and said, "We almost have enough reinforcements. Tomorrow, we'll leave tomorrow. We have so many people, we'll have to move slowly."

Zhao Hai laughed and said, "Big Brother Mu, don't forget that my Hell King's Ship has its own internal space. Also, the two Giant Spirit Treasure Ships can hold 20 thousand people. If there's more, they can enter my own ship."

Mu Yu replied, "Can the Giant Spirit Treasure Ship carry that many people?"

Zhao Hai smiled and said, "Don't worry, it can fit even if we have double the number of people."

Mu Yu nodded and said, "Alright, I'll go make the arrangements now. We'll take off tomorrow." After he said that, he turned around and left.

Seeing Mu Yu, Zhao Hai smiled faintly. If he fought against the entire Giant Spirit Realm army on his own, then he would have no chance of winning. But if Mu Yu and the others were there, the Giant Spirit Realm would be finished.

At this point, Zhao Hai was not afraid of Severed Soul Experts. Even if Ba Tu was half-step into the Immortal Stage, Zhao Hai was still not afraid. What he feared were those Immortal Experts. He still has not enough strength to face those Immortal Stage monsters.

Zhao Hai was able to witness the strength of the Immortal Stage Experts of the World of Cultivation and knew that he had no strength to deal with them. Not to mention high-grade realms like the Giant Spirit Realm and the Hundred Treasures Realm. Their Immortal Stage Experts could only be much stronger than the ones in the World of Cultivation. With his current strength, the best Zhao Hai could do was escape with his life.

Actually, it would be impossible for these Immortal Stage Experts to kill Zhao Hai. Even if he doesn't enter the Space, they would still have a hard time. Zhao Hai may not be able to escape from them before, but this time it was different. After copying the energy collection formation from the Formation Breaking Spirit Snake Needles, Zhao Hai's means has increased.

Others might not see great use in these energy collection formations. In their eyes, it would be used in large battles where there were a lot of people to collect energy from. But to Zhao Hai, this formation was extremely useful. Since he has the Space, he can get energy from the people inside it and concentrate it on Liquid Silver. With such enormous energy present, even Immortal Experts would need to get out of the way.

However, Zhao Hai didn't want to show this strength. These should be reserved for life-threatening situations. They shouldn't be used when not necessary. Zhao Hai always had a sense of insecurity while in the Ten-thousand Realm Battlefield. He was afraid that the Ten-thousand Realm Battlefield was like the Space, providing omniscience to its owner. If the maker of the Ten-thousand Realm Battlefield knew what happened in the battlefield, then it would be troublesome for Zhao Hai to expose too much about his ability. So he held-back, and he would never do anything huge by himself if he could borrow the hands of other people.

The reason Zhao Hai showed some of his strength was because he knew that the World of Cultivation had already offended the Giant Spirit Realm. The Giant Spirit Realm should hate the World of Cultivation to the bone. If they cannot deal with the Giant Spirit Realm this time, then the Giant Spirit Realm would be like maggots gnawing on the bones of the World of Cultivation.

The Giant Spirit Realm might not be able to defeat the Hundred Treasures Realm, but they had enough strength to deal with the World of Cultivation. The Hundred Treasures Realm might be protective towards the World of Cultivation, but the Giant Spirit Realm still had plenty of means to attack the World of Cultivation behind the Hundred Treasures Realm's back. The losses to the World of Cultivation would be heavy.

The World of Cultivation was Zhao Hai's foundation, so it couldn't suffer any accidents. Therefore, Zhao Hai had to deal with the Giant Spirit Realm.

Moreover, the more he strived against the Giant Spirit Realm, the more important he would look to the Hundred Treasures Realm!
