

## Another World 1501

### Chapter 1501: Mortar

After a flash of white light, Zhao Hai appeared on a transmission formation. This transmission formation was quite big, at about ten meters across. Zhao Hai looked around and saw that he was in a mountain valley. He couldn't help but smile, he didn't expect the transmission formation of Yan Planet to be in such a place.

But Just as Zhao Hai was about to proceed, his eyes revealed his amazement. The mountains on both sides of the valley were very tall and seemed unending. One couldn't see where they ended up. This was because these mountains weren't made of earth or stone. Instead, they were piles of metals. Entire mountains of metals!

This was a terrifying scale. A pile of materials that reached as high as a mountain. Moreover, it wasn't just one mountain, it was an entire mountain range!

Zhao Hai's eyes sone as he sized up his surroundings. Then all of a sudden a voice was heard, "Kid, why haven't I been informed that you were coming? I would have been waiting."

Zhao Hai turned his head to see an old man with white hair and beard flying from a distance. The old man wasn't tall, but he was quite fat. Both his hair and beard were pale white and he had old age spots on his face. Despite this, the old man's eyes were still shining, one couldn't see his age from them at all.

Just as Zhao Hai was about to introduce himself, the old man immediately said, "Are you my replacement? Young, but not motivated, running here to do this shabby work. Tsk tsk. But this old man wouldn't lecture a kid. Well then, I'll be leaving this place to you." After speaking, he didn't give Zhao Hai a chance to speak at all as he entered the transmission formation and left just like that.

Zhao Hai was stunned in place. He didn't know what to say. The old man was too anxious to leave that he didn't even give Zhao Hai any opportunity to talk.

Zhao Hai shrugged his shoulders and shifted his focus on the piles of waste materials around him. One could see that most of them were metallic, but there were things that he couldn't identify.

Zhao Hai didn't immediately absorb these materials. Instead, he scouted the planet first. He wanted to see that there were indeed nobody else on the planet. The planet was very big. Even with Zhao Hai's speed, it took him several hours to circumnavigate it. After going through the planet, Zhao Hai was only left with shock.

All kinds of waste materials were present on this planet. It was filled with these waste materials. There's also a cave residence on the planet. It should be owned by the old person who left just before, he should be Old Jiang. The cave residence was built inside one of these mountains. Although it was huge, it doesn't look comfortable.

Zhao Hai didn't bother to go to that cave residence. After inspecting the planet for a week, he returned to the Space. Laura and the others were now quite busy. Zhao Hai looked at them and said, "How is it?"

He wasn't asking about Yan Planet but about another matter. Before being led to the transmission formation by Mu Yu, Zhao Hai left silver needles behind. At the same time, his large artifacts were also capable of releasing silver needles. Zhao Hai was using these needles to map more places for the Space.

Laura smiled and said, "Don't worry, everything's going well."

Zhao Hai nodded, then he turned his head to Cai'er and said, "Cai'er, how's the design for the cannons going?"

Cai'er nodded and said, "It's done. I've also divided them into two types, one's the conventional cannon and the other is a mortar-type weapon. What do you think?"

Zhao Hai gave a nod, "We'll give the blueprint for the mortar to Brother Mu Yu and the others. We'll keep the cannons for ourselves. Right, we need to install these cannons to the Hell King's Ship and our other large artifacts."

Cai'er complied. Zhao Hai smiled and said, "Now that we've come across such a huge treasure trove, it would be a waste if we don't harvest some good things. There's no need to hold back, let's receive one tenth first." Cai'er understood what Zhao Hai meant. Yan Planet was indeed a treasure trove for them. Naturally, they wouldn't hold back.

Cai'er replied, "A processing machine will take care of the rifles, cannons, bullets, and shells each. The rest will work on decomposing the materials. This task is too easy for the processing machine."

Zhao Hai smiled and said, "Alright, you can go take care of it. I'll head out now and collect waste materials. Let's sort the scavenged resources into their own groups."

Cai'er nodded. Then Zhao Hai's body flashed as he went out of the Space. Then he waved his hand as a spatial rift appeared and sucked in the waste material mountains.

As a pile of waste materials vanished, the processing machines began to work. The waste materials were immediately decomposed into base materials and then put to storage.

Now that he was the only person left in Yan Planet, Zhao Hai naturally could do whatever he wanted. In a short while, a mountain was absorbed by the Space.

Various materials began piling up inside the Space. At the same time, cannons and mortars were being produced. Naturally, this included their ammunition.

After receiving the mountain, Zhao Hai stopped for a while. Then he took out a jade slip, a mortar, and a few shells to the transmission formation. The transmission formation flashed as the items disappeared.

At this time, the transmission formation area of the Hundred Treasures Realm's headquarters was extremely busy. People were constantly coming in and out of the formations. The people who arrived were from subordinate realms while the people going out were from the Hundred Treasures Realm.

However, there was a transmission formation which didn't have any activity at all. There were even people guarding it. This caused the people coming to the headquarters to be curious. One of them asked, "Lei Peng, where does that transmission formation go? Why are people guarding it? Last I remember, that formation was quite normal."

Lei Peng turned towards the formation and then smiled faintly as he answered, "That's Mister Zhao Hai's specially assigned transmission formation. Mister is currently out of the headquarters, but Commander Mu ordered to have the formation open at all times for Mister Zhao Hai to use."

Those who were listening to Lei Peng were startled. The person who asked looked at Lei Peng and said, "Didn't Zhao Hai enter the Hundred Treasures Realm quite recently? I heard of him. Is he strong? Why does Commander Mu treat him well?"

Lei Peng replied, "Mister Zhao Hai isn't only strong. I followed Mister Zhao Hai and Commander Mu back in the Octopus Islands to deal with the Giant Spirit Realm bastards. I even got involved with fighting against the Fireweavers. Hahaha. Fighting with Mister Zhao Hai is really great. The other party simply can't do anything to us. Beating those bastards is very energizing." As he was talking, a white light flashed from Zhao Hai's transmission formation. After that, a jade slip, something similar to an iron pipe, and a few round iron objects appeared.

The people guarding the transmission formation didn't dare neglect the items. They immediately took it and sent it over. Those present quickly turned their gazes back to Lei Peng. The person from the subordinate realm asked, "Lei Peng, what's that? Isn't it just an iron pipe? Why do the guards look anxious?"

Lei Peng looked at the person and said, "It really seems like an iron pipe. However, it's something sent over by Mister Zhao Hai. Not to say an iron pipe, even if he sent a stick of iron, the guards would still treat it with importance. Alright, you go along. You shouldn't be staying here or else you'll block other people from entering." The person complied and then moved on with an expression of doubt.

Mu Yu was really busy. He, along with Tang Jie and Tang Wen, used Zhao Hai's large artifacts in order to shuttle people from all around. Because of the three large artifacts, the speed of evacuation had largely increased. However, it was clear that not everyone can stay in the Hundred Treasures Realm's camp.

Fortunately for Mu Yu, he ordered for the transmission formation to Yan Planet to be guarded. He also told the guards to immediately send anything that appears on the transmission to the Elders. With Mu Yu's status in the Hundred Treasures Realm, nobody questioned him.

So when the guards saw the items on the transmission formation, they immediately took them to the conference hall.

Mu Yao and the others were currently listening to various reports and sending responses to some of them. When the guard arrived, he immediately handed the items over to Mu Yao.

Mu Yao looked at the mortar with curiosity. Then he took the jade slip and read the contents using his spiritual force. Naturally, recorded in the jade slip was the refining method of the mortar.

It must be known that Zhao Hai's mortars didn't need to have mounts. Normally, when a mortar was used, a mount would be used to withstand the recoil. However, the people using the mortar this time were cultivators. The recoil of the mortar was nothing to them. Instead of a mount, a handle was installed so that the mortar could be held.

As for the mortar shells, Zhao Hai didn't need to think much about it nor make any modifications. The shells used were similar to the ones used by the Fireweavers. The only difference was the shells of the Fireweavers needed to be fired while the mortar shells were being triggered.

Mu Yao happily nodded as he turned to Tang Yaoen and said, "Take a look. Little Hai is indeed a genius." As he said that, Mu Yao waved his hand and took the mortar into his hands.

The mortar wasn't as simple as an iron pipe. There were plenty of formations inside it. These formations were accelerators that would boost the shells once they were triggered. This would cause the mortar shells to be more powerful than on their own.

As for the mortar shells, they were made thick and were filled with smaller projectiles. This allowed the shells to explode once more, causing even more damage to the enemies.

## Chapter 1502: Metallic Plants

Zhao Hai continued absorbing the waste materials on Yan Planet. At this point, he was able to clear a large area of the planet. Naturally, the ground was also full of salvaged raw materials.

There were enough ingots on the ground to cause people to be awestruck. Naturally, these ingots were the most common ones. As for the rarer metals, Zhao Hai didn't take them out and kept them inside the Space.

Of course, Zhao Hai left some of the more valuable materials outside. The rifles and the mortars were still being made inside the Space. But at this time, the rifles and mortars that Zhao Hai was making were

meant to be used by the Hundred Treasures Realm. The processing machines that used to make cannons have been changed to recycling the waste materials.

Zhao Hai's actions seemed like clockwork as he collected waste materials for the Space. As Zhao Hai was going about his task, he suddenly heard a prompt, "Special flora detected. It absorbs metals for sustenance. Increasing the Space's metal attribute."

Zhao Hai stared, then he immediately made Cai'er inspect the metal plant. The plant looked very ordinary. It wasn't tall and was pale blue in color with a metallic sheen on its leaves. It looked like a metal crafted plant instead of a living being.

Looking at the plant, Zhao Hai was reminded of the bone plants he'd seen before. Those plants were made out of bone, and this one was made out of metal.

Zhao Hai immediately analyzed the properties of the plant. As it turns out, the plant can increase the material strength of an artifact. There are other properties to the plant but it couldn't be analyzed. This doesn't mean that it had no other uses, the Space's level was just too low.

Hearing this result, Zhao Hai didn't know whether to laugh or cry. But he soon got over it. Since the plant had its uses, then there's no need to stare at it all the time. He just needs to find a place to plant it. His main goal right now was to continue his recycling of the waste materials.

To be honest, these waste materials were made out of very good components. Some were even rarely seen in the Ten-thousand Realm Battlefield. Of course, these special materials were found in the lower parts of the waste mountain. Even the Hundred Treasures Realm might not know when they were dumped here.

By this point, the amount of materials that was inside Zhao Hai's Space has increased tremendously. No less than a thousand resource veins were created, much to Zhao Hai's surprise. And he hasn't even gone through a thousandth of the entire waste piles of the planet.

Back in the Hundred Treasures Realm's headquarters, refiners were busy refining rifles, mortars, bullets, and shells. They no longer cared about perfect refinement right now, which would cause the process to be more complicated. Instead, they placed the materials into the furnace formation and immediately

started to refine the item. It was common for waste materials to come out of this process. If the refiners had a one percent success rate before, then now it was less than that.

Of course, the low success rate was also compensated by the increase in refining speed. Now, refiners could finish five refinements in the time it took one. The Hundred Treasures Realm couldn't afford to be wasteful before, but now they could. First, because of Zhao Hai's ability to recycle materials. And second, because they were running out of time and they needed weapons as soon as possible.

Although Zhao Hai was still recycling the waste materials on Yan Planet, he was still aware of the situation outside. Actually, he didn't need to produce a lot of cannons. He just made a few of them and then shifted the production to making ammunition. The cannons made by Mu Yu and the others weren't the ones he was planning to use. This was because Liquid Silver can transform into a cannon itself, he doesn't need to make them at all.

Zhao Hai was now making rifles and bullets. The production of both was going very smoothly. At this point, the rifles inside the Space numbered a hundred thousand. There's no need to say about how many bullets there were. Zhao Hai planned to reach a certain number of rifles before all production was shifted to bullets and shells.

After seven days, Zhao Hai was able to turn a fifth of the waste materials on Yan Planet into usable resources. If Mu Yu and the others were to come, they wouldn't be able to believe how fast Zhao Hai was able to work. But Zhao Hai had no time to hold back. This was because the Fireweavers and the Giant Spirit Realm had already reached the Hundred Treasures Realm's territory.

Although the Fireweavers and the Giant Spirit Realm had arrived at the Hundred Treasures Realm's territory, this didn't mean that they reached the Hundred Treasures Realm's headquarters. Conversely, the land they were in were territories of the subordinate realms. The people left behind here were scouts tasked to report on the progress of the enemy. In order to reach the headquarters, the army would still need a couple of days.

Despite this, the Hundred Treasures Realm was already on full alert mode. All rifles had already been issued to the troops so that they could get more familiar with them. Then the Hundred Treasures Realm began to mobilize their army. A large number of people from the Hundred Treasures Realm entered the Ten-thousand Realm Battlefield.

Outposts were constantly being built around the Hundred Treasures Realm's headquarters. There's nothing special about these outposts. Besides defensive formations, the only other thing inside them were transmission formations.

These outposts were mainly to prevent the Fireweavers and the Giant Spirit Realm from launching a direct attack on the headquarters. In each outpost were ten thousand troops and ten mortars. There were as many as twenty outposts like this.

Zhao Hai was also aware that the Fireweavers and the Giant Spirit Realm had reached the Hundred Treasures Realm's territory, but he didn't care. He kept recycling the waste materials on Yan Planet. Mu Yu still hasn't come to inform him.

These days, besides recycling materials, Zhao Hai sent back about a thousand rifles and a hundred thousand bullets to the Hundred Treasures Realm. This would be a great supplement for the troops.

Time passed as the Fireweavers and the Giant Spirit Realm army got closer and closer to the Hundred Treasures Realm's headquarters. At this time, the Hundred Treasures Realm sent people to lobby the other realms to participate in the fight. However, there was no progress. The other high-grade realms seem to be waiting for something. They didn't agree to send troops immediately.

The Hundred Treasures Realm was already prepared for such an outcome. As they intensified their lobbying, they were also bolstering their defenses to receive a full-on attack.

Besides ordinary cultivators, the Hundred Treasures Realm amassed about a thousand Immortal Experts from various realms. The Hundred Treasures Realm alone contributed a hundred Immortal Experts. This showed their background as a high-grade realm.

The people from the subordinate realms were initially shaken by the sudden development, but then they began to give their full-on support for the Hundred Treasures Realm. For these realms, the situation was an opportunity. As long as the Hundred Treasures Realm win and defeat the Fireweaver and Giant Spirit Realm army, they would definitely reward the subordinate realms with territory. The larger the territory, the more resources they would get. And the more resources, the more experts their realm could support. As long as they amass enough experts, their respective realms would then be able to increase their status.

Finally, half a month after Zhao Hai entered Yan Planet, the Giant Spirit Realm and the Fireweaver Army finally arrived outside the Hundred Treasures Realm's headquarters. They were now fighting with the outposts outside the headquarters.

There were now more than 50 outposts outside the headquarters. And each one of them had a thousand people and ten mortars.

When the Fireweaver and Giant Spirit Realm army entered the range of these outposts, they were immediately met with an attack.

It was clear that the Fireweaver and the Giant Spirit Realm Army weren't prepared for these attacks. They didn't expect the Hundred Treasures Realm to attack them with rifles. They didn't expect the refining method of the Fireweaver rifles to get into the hands of the Hundred Treasures Realm. Moreover, they were even able to make a large amount.

It didn't take long before the Fireweavers pressed hard on these outposts. In their view, rifles being in the hands of the Hundred Treasures Realm was an enormous threat. The rifles contributed a large amount to the current status of the Fireweaver Race. Matters related to it couldn't be taken lightly. The sheer number of rifles in the hands of the Hundred Treasures Realm was a serious danger to the Fireweaver Race. Therefore, the Fireweavers needed to eliminate the Hundred Treasures Realm at all costs.

However, things weren't as smooth as they imagined. The Fireweaver rifles couldn't be underestimated. Their offensive strength was very powerful. One shouldn't underestimate them just because Zhao Hai was able to block the bullets. Zhao Hai can block the bullets because his large artifacts were very powerful to begin with. Moreover, Zhao Hai used the full defensive power of his large artifacts in order to defend.

And now, the rifles in the hands of the Hundred Treasures Realm were much better compared to the Fireweaver rifles. Their range was farther and their lethality was greater. Because of this, the Fireweavers found it hard to advance one step. Although they were acting together with the Giant Spirit Realm, the Giant Spirit Realm didn't have any rifles on hand. And if their Transcending Tribulation Experts tried to rush towards the enemy, they would be killed by the Hundred Treasures Realm's rifles.

Even those with powerful defensive artifacts found it difficult to attack the outpost because of the range of the rifles.

At the same time, the Fireweavers discovered that besides the rifles, the Hundred Treasures Realm also have artillery in their hands. The range of the artillery was very far. Its offensive strength was also formidable. The Fireweavers couldn't understand what was going on. Even while using their rifle technique, their rifles couldn't become this powerful. Where did the Hundred Treasures Realm get these weapons?

The appearance of the rifles and artillery in the Hundred Treasures Realm's hands changed the form of warfare in the Ten-thousand Realm Battlefield. Normally, both sides would line up and attack each other using their artifacts. The side who couldn't hold on would retreat and lose while the winning side would give chase.

But with the rifles, things became different. The rifles were a huge threat to Transcending Tribulation Experts. They could hardly approach the riflemen to attack. In the end, the attacks became one-sided, lowering the morale of the cultivators that were under attack.

#### Chapter 1503: Requesting Combat Assignmen

t

After a flash of white light, a jade sword message appeared on the transmission formation. Then the jade sword message flew through several metallic mountains before appearing in front of Zhao Hai.

Zhao Hai received the jade sword message and then smiled as he said, "It's about time this arrived." Then he used his spiritual force to read the message inside. Just like what he thought, the message told him to go back to the Hundred Treasures Realm's headquarters.

The Fireweaver and the Giant Spirit Realm army had already exchanged fire against the Hundred Treasures Realm for five days. In these five days, the Hundred Treasures Realm were diligently defending. However, of the 50 outposts, 30 of them had been uprooted. The Fireweaver and Giant Spirit Realm army was about to reach the Hundred Treasures Realm's headquarters.

Although Zhao Hai was also aware of the situation, he didn't head back. Instead, he kept recycling the waste resources on Yan Planet. By this point, a third of the waste materials on the planet has been

processed by Zhao Hai. The number of resources salvaged was beyond Zhao Hai's imagination. This was because the waste materials present was not what Zhao Hai expected.

Yan Planet had canyons that had been filled in with waste materials. And the resources that composed these waste materials had been extinct in the Ten-thousand Realm Battlefield.

This happened before the Ten-thousand Realm Battlefield decided to protect the survival of the battlefield's resources. When the realms initially entered the battlefield, they didn't have such thoughts and just took everything in their sight. This dried up a lot of resources without any means of regeneration.

This action made a lot of materials in the Ten-thousand Realm Battlefield extinct. It also didn't help that the Ten-thousand Realm Battlefield experienced a war for materials. This war was called the Great War of the Ten-thousand Realm Battlefield. Almost all realms participated in this war.

Because of that war, plenty of plants and ore were ravaged. Nobody else managed to find these resources later on. Moreover, these extinct resources were one of the most valuable treasures in the Ten-thousand Realm Battlefield.

Right now, Zhao Hai has a lot of ores currently extinct in the Ten-thousand Realm Battlefield. Besides the ores, there were also new plants used for refining being introduced to the Space.

The forms of the plants were greatly varied. Since they were used as refining materials, some of them were used as a whole, while some were used as seeds. As a result, once they were salvaged, whole plants, parts of plants, and seeds came up. Fortunately, these seeds and plant parts could be replanted.

This discovery caused Zhao Hai to be ecstatic. He didn't expect something like this to happen. The main reason for his joy was the levelling up of the Space. It leveled up not just by 1 level, but instead 10.

Zhao Ha also discovered that artifact refining waste wasn't the only thing present on the planet. There's also alchemy waste. Although alchemy didn't have as low probability of success as artifact refining, it was also susceptible for failures. Once an alchemist fails, their materials would turn into slag and could no longer be used. Even the processing machine couldn't salvage any resources from them.

However, although these alchemy slags cannot be recycled for materials, the Space was still able to obtain its components. This allowed Zhao Hai to get his hands on even more plants. Now these plants had been planted inside the Space. Zhao Hai was very satisfied with his harvest.

Now, the number of rifles inside the Space has reached 200 thousand. Besides the 150 thousand used to arm the Undead, the others were stored by Zhao Hai. Besides the rifles, Zhao Hai also made more than 50 cannons. All of which were handed over to Mu Yu along with the refining method.

The cannons were much more powerful compared to mortars. However, refining them wasn't easy. It was only after obtaining rare materials in Yan Planet did Zhao Hai manage to refine them.

Zhao Hai didn't install the cannons on the Hell King's Ship, Giant Spirit Treasure Ship, and the Pagoda. It's not that he didn't want to arm them with cannons, but it was because it wasn't the right time to do so. Zhao Hai was in Yan Planet while the three large artifacts were elsewhere. It would seem suspicious if the three large artifacts were to suddenly gain new cannons.

From his calculations, Zhao Hai discovered that a cannon shot could devastate a Severed Soul Expert.

As for the number of ammunition currently inside the Space, Zhao Hai didn't bother taking count. Zhao Hai couldn't help but feel dizzy the last time he saw how many digits there were. So now, he no longer cared.

Although Mu Yu managed to obtain 50 cannons, their side had only been able to manufacture 10. This wasn't only because the materials used were rare, but also the success rate was very low.

By this point, the Hundred Treasures Realm's headquarters had almost been surrounded by the Fireweaver and Giant Spirit Realm Army. The following battle would be the defense of the headquarters. This was the reason why Mu Yu called Zhao Hai over.

Zhao Hai immediately flew towards the transmission formation and returned to the Hundred Treasures Realm's headquarters. Upon appearing at the transmission formation, the first person Zhao Hai saw was Mu Yu and the others.

Mu Yu's expression remained the same. On the other hand, Tang Wen and Tang Jie had grief written all over their faces. Zhao Hai could understand why they were like this. This was because the recent losses of the Hundred Treasures Realm has been very big.

In the past several days, the Hundred Treasures Realm lost more than ten thousand people. As for their subordinate realms, altogether they lost 50 thousand. This was the heaviest losses they experienced since entering the Ten-thousand Realm Battlefield.

Zhao Hai knew about the statistics, but he feigned ignorance. He looked at Mu Yu and said, "Big Brother Mu, did the Fireweavers arrive?"

Mu Yu smiled bitterly and said, "They're here. There's far more than we expected. In our subsequent battles against them, the realm has lost more than ten thousand people while the subordinate realms lost 50 thousand. But the enemies suffered much more losses, totalling about 150 thousand."

Zhao Hai made his brows tighten as he asked, "Why didn't you call me? How's the situation now?"

Mu Yu forced a smile and said, "The Fireweaver and the Giant Spirit Treasure Realm Army are now outside the headquarters, so I called you back. It's time for your large artifacts to take action."

Zhao Hai nodded and said, "Alright, this isn't a problem. But I need time, about a few hours."

Mu Yu replied, "Why? Is there something wrong?"

Zhao Hai shook his head and said, "Everything's fine. But I managed to obtain some materials in Yan Planet that I want to integrate to my large artifacts. There's also the cannons that I want to install. Once I get the cannons to my large artifacts, their offensive strength would become much more formidable."

Mu Yu stared, then his eyes shone as he said, "Alright, we can stall for a couple of hours. Don't worry about it."

Zhao Hai nodded and said, "Help me relay the news to the Elders. I won't have the time to greet them. I'll start working now."

Mu Yu nodded, "Go, I will take you to your residence. I will make sure that you're not disturbed." Zhao Hai nodded and then followed Mu Yu to his residence and closing up.

Mu Yu turned his head to Tang Jie and said, "Guard this place. Make sure that nobody disturbs Little Hai. I'll go and see Master." Tang Jie and Tang Wen nodded as they stood on the left and right side of Zhao Hai's residence.

Mu Yu proceeded towards the conference hall. The conference room has been expanded to fit more than 1000 Immortal Experts. Most of these Immortal Experts were from subordinate realms. Only about a hundred of them belonged to the Hundred Treasures Realm.

Mu Yao and Tang Yaoen were also inside the conference hall. People would give them reports from time to time. They reported the progress of the battles as well as the losses incurred by the Hundred Treasures Realm's side.

Although the subordinate realms lost a lot of people. This loss was distributed among the various realms. This meant that, on average, each subordinate's losses were light. Their losses were still within what they could accept. Even so, the Immortal Experts of the subordinate realms couldn't help but frown everytime they heard of the losses. Each person lost to this battle would affect their strength.

When Mu Yu entered the conference hall, it happened that Mu Yao received the loss report. Another outpost has been broken through and they lost a lot of people.

Mu Yu didn't mind the report as he flew towards Mu Yao. He gave Mu Yao a salute before saying, "Master, Little Hai has returned."

Mu Yao was stunned for a moment before he said, "Where is he? Let him use his large artifacts to attack the enemy. Teach those bastards a little lesson."

Mu Yao was under a lot of pressure recently. Although they were in a defensive position, they haven't been able to fight any beautiful battles recently. The Immortal Experts of the subordinate realms were beginning to criticize the Hundred Treasures Realm. At this point, they needed a victory, even if a small one.

Mu Yu replied, "Little Hai still wants to integrate some materials he found into his large artifacts. He's also going to install new cannons into his artifacts. Because time is tight, he didn't have the opportunity to visit you."

Mu Yu's words caused the surrounding Immortal Experts to discuss. Most of them were asking who Zhao Hai was and why he dared to treat Mu Yao like this. Mu Yao was a top existence in the Hundred Treasures Realm. Even people from the Hundred Treasures Realm wouldn't ignore him like that.

Mu Yao didn't care about these people as he nodded and said, "Alright. How long did Little Hai say it would take?"

Mu Yu replied, "He said it would take a few hours, but not too long. You know how Little Hai does things. He always prepares for the worst and does his best in preparing."

Mu Yao nodded, "Make sure that Little Hai remains undisturbed. No matter who they are, if they dared disturb him, kill them immediately. Once Little Hai comes out, tell him to come see me." Mu Yu nodded.

Mu Yao turned his head towards the other Immortal Experts and said, "When Little Hai comes out, we'll gather a hundred thousand people and go with him to attack the Fireweaver and the Giant Spirit Realm army. Is there anyone willing to go with him?"

As soon as Mu Yao said that, Immortal Experts from the Xu Race and the World of Cultivation stood up and simultaneously said, "Our realm is willing to go." After the two, other Immortal Experts stood up. Mu Yao looked at the people who stood up. These people were mid to lower-medium grade realms. They suffered sufficient losses in the war, naturally they were distressed. A loss for them was a huge loss for their realms. Who would have thought that they would volunteer to attack alongside Zhao Hai.

The actions of these Immortal Experts caused the Immortal Experts from low-grade realms to stare. They had just been commanded by their realms to go here, so they naturally wouldn't hope to be assigned to any battle. This was because an assignment meant the possibility of death.

However, they didn't expect that instead of keeping silent and lowering their heads, these Immortal Experts volunteered immediately. This puzzled these Immortal Experts. They looked at the volunteers as though they had gone crazy.

Seeing the Immortal Experts that stood up, Mu Yu understood what was going on. Those who stood up were Immortal Experts whose realms had participated in defending the Octopus Islands alongside Zhao Hai. It was natural that they had been rewarded greatly for this contribution. Now, upon hearing that Zhao Hai was going to set out once more, these people wouldn't want to miss this chance. Therefore, they all requested to be assigned to Zhao Hai's side.

On the other hand, Mu Yao didn't expect this to happen. He had asked these people before to participate in the battle. However, these Immortal Experts just shrank their presence, not wanting to be called over. In the end, Mu Yu had to pick people himself. He was also fair in his selection. He made sure that the people he picked came from different realms. This was the first time he saw people actually volunteering to fight in the war.

Mu Yao stared, but he still nodded and said, "Since you want to volunteer, then we'll ask you to gather 90 thousand people for the assignment. Our Hundred Treasures Realm will dispatch 10 thousand of our own people. This group will be assigned to Mu Yu and Zhao Hai's command. I ask everyone to prepare since you'll be heading out as soon as Little Hai goes out." Those who volunteered nodded. There weren't any traces of worry on their faces. Instead, they were excited, which puzzled the other Immortal Experts.

Mu Yao nodded, then he looked at Mu Yu and said, "This time, we need to make the Fireweavers and the Giant Spirit Realm understand that our Hundred Treasures Realm couldn't be bullied that easily. Remember, saving lives is your first goal. Killing enemies is secondary."

Mu Yu nodded and said, "Roger. Master can rest assured." Mu Yao nodded, then he let out a long breath as he asked, "How are the aid requests going?"

A Severed Soul Expert immediately replied, "It hasn't been going well. All of them gave ambiguous responses, dragging the conversation. I think they're waiting to see how we deal with the Fireweavers and the Giant Spirit Realm."

#### Chapter 1504: Confident!

Tang Yaoen coldly snorted and said, "Those trash. They really expect us to fall to the Fireweavers. Didn't they think about what would happen if we get swallowed by the Fireweaver Race? A group of shortsighted people."

Mu Yao snorted as well, his eyes fiery as he said, "Those people actually don't want the Fireweavers intervening in the Ten-thousand Realm battlefield. They are shrewd. They aren't acting now so that we'll fight the Fireweavers on our own and expend our strength. They want to use this opportunity to grab profits. But how could they know that we already have rifles and managed to kill a great number of Fireweavers. If they get word about this, then they would no doubt make a stand. What we have to do right now is to force their hand."

Tang Yaoen stared as he looked at Mu Yao and asked, "Senior Brother, what do you mean? What do you plan to do?"

Mu Yao coldly snorted and said, "We need those people to see that we have the strength to defeat the Fireweavers. Once Little Hai comes out and leads the hundred thousand army to attack the Fireweavers and the Giant Spirit Realm, the Fireweavers would know who they're dealing with. And as long as Little Hai wins, then those fellows waiting at the back wouldn't be able to get a seat at the table."

Tang Yaoen stared for a moment, then he frowned and said, "Brother, will this work? Little Hai is strong, but it shouldn't be easy for him to deal with the Fireweaver and Giant Spirit Realm army."

Mu Yao coldly snorted and said, "If the Immortal Experts of the Fireweaver Race and the Giant Spirit Realm don't interfere, then dealing with the army would be no problem. Haven't you seen the cannons sent by Little Hai? Those cannons are very powerful. It isn't easy to refine, but Little Hai's artifact can transform into a cannon. I reckon Little Hai will make use of it. With the cannons, the Fireweavers and the Giant Spirit Realm wouldn't be faring well. But those Immortal Experts supporting them wouldn't just stay and watch. However, once they make a move, we'll be prepared for it. We'll help Little Hai so that he wouldn't be hindered by Immortal Experts."

Tang Yaoen snorted and said, "They will have a hard time facing Little Hai. He was able to face two attacks from an Immortal Expert even before reaching Transcending Tribulation. Now, Immortal Experts wouldn't be able to deal with him in a short time. When the time comes, we would be able to block them."

Mu Yao nodded and said, "Everyone, prepare for the battle."

At this time, a voice was heard from outside, "Zhao Hai has come to see the Elders."

Mu Yao smiled faintly and said, "Come in." Shortly after, Zhao Hai walked in. He already knew that this place was filled with Immortal Experts. The Hundred Treasures Realm truly invested a lot in the headquarters. They even moved their Immortal Experts over. They were here to fight head on against the Fireweaver Race.

After Zhao Hai entered, he gave Mu Yao and the others a salute. Some of the Immortal Experts hadn't seen Zhao Hai before and were very curious about why Mu Yao and Tang Yaoen looked at him highly. These people heard how Mu Yao placed great importance on Zhao Hai.

Mu Yao looked at Zhao Hai and said, "Little Hai, I'll task you to use your large artifacts as well as a hundred thousand-man army to face the Fireweaver and the Giant Spirit Realm army. You need to win this battle, we can't afford to lose. How confident are you? Tell me the truth."

Zhao Hai looked at Mu Yao and said, "Replying to the Elder. Honestly, if the Immortal Experts of the other party don't interfere, then I'm confident of defeating the army."

Upon hearing Zhao Hai's response, the Immortal Experts in the hall were in an uproar. They knew very well how strong the Fireweaver and Giant Spirit Realm army was. Even with the help of the rifles, the Hundred Treasures Realm was still pushed back into the headquarters. And now, there's Zhao Hai claiming that he can defeat the enemy army. He couldn't just be talking big, right?

Hearing Zhao Hai, Mu Yao stared, he looked at Zhao Hai's eyes and said, "Little Hai, you have to know that this is wartime. This is a military assignment, it isn't the time to be making jokes!"

Zhao Hai smiled faintly and said, "I don't joke in battles, Elder. This young one is truly confident!"

Mu Yao hesitated for a moment before he said, "Alright. You don't need to worry about the Immortal Experts, we'll take care of it. As long as you can repel the enemy army, you will be awarded first-class honors."

Zhao Hai smiled faintly and said, "Thank you, Elder. This Zhao Hai is now going to prepare."

Mu Yao waved his hand and said, "Go and prepare. As long as you're done with your three large artifacts, Little Yu will arrange people to embark. This time, Little Yu will be the commander and you'll be the deputy."

Zhao Hai nodded. He understood that although he gained some fame in the Hundred Treasures Realm, he was still far from Mu Yu. In the fight against the Fireweavers and the Giant Spirit Realm, Mu Yu's prestige and fame was needed, so he needed to be a commander. Only someone of his status could command everyone.

The reason Zhao Hai was given the position of deputy commander was to give him a status that allowed him to give orders to people. Whether they defeat the Fireweavers or not depends mainly on Zhao Hai.

The Hundred Treasures Realm needs Zhao Hai's abilities and artifacts. But because Zhao Hai was an outsider, his status wasn't enough to convince people. So instead of making Zhao Hai commander, he gave the position to Mu Yu instead. Mu Yao knew that Mu Yao wouldn't be able to be very useful in the battle. Mu Yu couldn't do much against the Fireweaver and Giant Spirit Realm army. Otherwise, they wouldn't have been able to push towards the Hundred Treasures Realm's headquarters. Therefore, they can only rely on Zhao Hai.

Zhao Hai approved of Mu Yao's arrangement. He also knew that he didn't have enough status to command the people of the Hundred Treasures Realm. The position of deputy commander was just proper for him. At the same time, this position would also elevate his status in the Hundred Treasures Realm.

Zhao Hai received the assignment and then gave everyone a salute before leaving. Outside the hall were Mu Yu along with Tang Jie and Tang Wen. These four people will be in charge of commanding their army.

Mu Yao also thought of assigning other Severed Soul Experts to act together with Zhao Hai. However, Mu Yao was also afraid of these Severed Soul Experts hindering Zhao Hai. The upcoming battle was just too important for the Hundred Treasures Realm. The Hundred Treasures Realm was crumbling under pressure recently, they needed a victory to show the other high-grade realms that they can deal with the Fireweavers. The other high-grade realms needed to feel that they would be left out of the loot if they were to continue to delay.

Mu Yao knew that the other high-grade realms could see that if it weren't for the Fireweavers, then the Giant Spirit Realm would have been defeated. The Hundred Treasures Realm couldn't swallow the Giant

Spirit Realm, so these high-grade realms could still get some benefits. Now that the Fireweavers have entered the stage, things have become a bit different.

These realms knew how harmful it would be if the Fireweavers were to join the battles in the Tenthousand Realm Battlefield. But since these realms were led by old foxes, they want the Hundred Treasures Realm to shave off some of the strength of the Fireweaver and the Giant Spirit Realm army, and might even be defeated in their hands. When the time comes, they would act and defeat the Fireweavers in one fell swoop and completely destroy the Giant Spirit Realm. This way, they could divide the Giant Spirit Realm and the Hundred Treasures Realm's territories among themselves.

For this reason, these high-grade realms didn't send troops. But if the Hundred Treasures Realm displays a strong hand, then the situation would be different. These people would be anxious and they would no doubt be forced to make a move.

Zhao Hai had just closed up and took with him his three large artifacts. He said that he was going to integrate new materials into his artifacts. Naturally, this meant that people needed to get off the artifacts. Because of this, although Mu Yu and the others were ready, they still haven't entered the artifacts.

When Zhao Hai came out, he immediately released his three large artifacts. Then people began to embark. Zhao Hai would be on the Hell King's Ship, Mu Yu would be on the Pagoda, and Tang Jie and Tang Wen would be on the Giant Spirit Treasure Ship. Once everyone has entered the large artifacts, Zhao Hai immediately left the headquarters.

Although the Fireweavers and the Giant Spirit Realm were practically outside the Hundred Treasures Realm's headquarters, they still haven't been able to attack it. The outposts outside were still resisting. The Fireweavers and the Giant Spirit Realm were currently attacking them with all of their strength.

As Mu Yu stood on the Pagoda, he used his spiritual force to look at its changes. The Pagoda originally had nine floors each with their own windows. These windows were initially intended for cultivators to release their attacks. But now, these windows had large cannons jutting out from them. The cannons were much thicker compared to the mortars.

Mu Yu could count 72 cannons on the Pagoda alone. He turned his attention to the Hell King's Ship and the Giant Spirit Treasure Ship and could see roughly the same amount of cannons. There were also several Undead standing behind the cannons. Although they didn't hold anything, they all had spatial equipment on them. Mu Yu didn't have to look at what's inside to know that it had ammunition.

Mu Yu let out a long breath and took back his spiritual force. He turned his head towards an outpost not far away. This one hasn't received any attacks yet. However, a cold glint passed through Mu Yu's eyes. He had seen too many outposts like these being extinguished by the enemy. He hated the Fireweavers and the Giant Spirit Realm for this. He wanted to take revenge!

#### Chapter 1505: Battle Start

Zhao Hai calmly looked ahead. Inside the Space, an army of a hundred thousand Undead were waiting. The Undead were all equipped with rifles. Once Zhao Hai gives the order, they would emerge from the Space and attack the Fireweavers and the Giant Spirit Realm army.

However, Zhao Hai wasn't planning on releasing his Undead Army. If he released a hundred thousand Undead armed with rifles, people would definitely be terrified. Naturally, they wouldn't be stunned by the Undead, but by the number of rifles instead.

If Zhao Hai took out a hundred thousand rifles, then Mu Yu and the others wouldn't be calm. If given the time, it's natural for Zhao Hai to get this much rifles. After all, Mu Yao gave Zhao Hai Yan Planet. If he used the materials there, he should be able to make a lot of materials.

However, being able to create so many rifles in a short time surpassed Mu Yu and the others' imagination. This would only cause dread to occupy the Hundred Treasures Realms' heart.

Rifles were incomparable to magic artifacts. Magic artifacts required both spiritual force and spiritual qi to operate. If either was lacking, then even if you had a good artifact, you wouldn't be able to use it. On the other hand, rifles didn't need spiritual qi nor spiritual force. As long as one can pull the trigger and has enough bullets, then they would be able to kill people.

Naturally, a rifle in the hands of a Foundation Establishment Expert couldn't compare to a rifle in the hands of a Severed Soul Expert. Despite this, a hundred thousand rifles couldn't be treated lightly.

Therefore, even if Zhao Hai's undead were armed with rifles, they couldn't be used that easily. Zhao Hai didn't want to arouse any suspicion since it would be unfavorable for his plans.

But at the same time, Zhao Hai also knew that even if he didn't take out the rifles that he has, he still doesn't need to be afraid of the Fireweavers and the Giant Spirit Realm. This was because he has cannons, more than 200 of them. They were enough. The range of the cannons was quite far, completely beyond the range of the Fireweavers and the Giant Spirit Realm.

Moreover, besides the cannon, the Hundred Treasures Realm also sent 10 thousand people who had rifles. This was something that couldn't be underestimated.

The three large artifacts flew fast and before long they were able to hear the crackle of gunfire. Then shadows began to appear in front of them.

Zhao Hai immediately stopped the three large artifacts. Then he waved his hands ordering the Undead to aim the cannons. The cultivators inside the large artifacts were curious about the cannons. And when they came over, they discovered that the cannons were not as simple as they thought. The aiming system of the cannons looked sophisticated. It could clearly show the targets at the front.

The Fireweavers were currently standing on top of their tamed beasts aiming their rifles towards the outpost. The outpost was also firing back at them. Bullets flew between the two sides.

Since the Fireweavers were constantly moving and were far away from the outpost, the mortars weren't very useful against them.

When he saw this, Zhao Hai couldn't help but slowly shake his head. He was somewhat disappointed with the Hundred Treasures Realms' refinements. His artillery were an improved version. Not only did they have an aiming system, it also had a tracking system which can lock on to an enemy. This increased the weapon's strength even further.

The three large artifacts slowly distanced themselves, but not too far away. Zhao Hai looked at the Undead controlling the cannons. These Undead were already experienced in using cannons. And with the aiming system, they only needed less than a second to aim before they're ready to fire. The cannon shot would then actively seek out their target.

Moreover, the aiming system was being controlled by the Space. Each target will have a number either 1 or 2. If a target has the number 2, it meant that two cannons were already aiming for it, so others could

no longer lock onto them. Although the cannons were powerful. Sometimes it wouldn't be able to kill a target on their own. Therefore, the aiming system permitted two cannons to aim at one target.

The Undead were proficient in using the cannons. One was responsible for choosing the target, which wasn't very easy to do. Although there were a lot of targets to aim at, the problem was choosing which targets to go for. There's also another Undead who would determine when to fire. When two cannons aimed at its target, five blips would be seen. Once the five blips light up, then it would be the moment to fire. Besides that, there's also an Undead responsible for loading the ammunition. Then lastly, there's the Undead who would pull the trigger. They were well-trained and coordinated well.

Zhao Hai didn't need to command the Undead when they fire the cannons. During the battle, the Undead can fire whenever they see fit. So once the targets were aimed at, the cannons began firing.

Another improvement to the cannons was the reduction to the noise it made. If this many cannons fired at the same time, then those on the surroundings would definitely be shaken deaf.

Zhu Wang stood on top of his spirit turtle while holding his rifle and shooting at the outpost of the Hundred Treasures Realm. The defensive formation of the outpost has already been broken through, so they were now attacking the people inside the outpost. However, Zhu Wang didn't have a good expression on his face. This was because he was extremely upset about his weapon.

The Fireweavers were able to run unhindered in the battlefield because of their rifles. But they didn't expect the Hundred Treasures Realm to also have rifles in their hands. If it weren't for the horrible aim of the people in the outpost, then their side would have suffered more casualties. But even then, the people from the Hundred Treasures Realm's side were still able to inflict huge losses to the Fireweavers and the Giant Spirit Realm.

They had always used the rifles to bully people, but now they were being bullied by rifles. Zhu Wang couldn't help but feel bitter inside.

Zhu Wang aimed his rifle towards a person on the outpost. His spirit turtle was very stable. However, it still wouldn't be easy for him to hit his target.

After a long time battling their enemy, the people from the Hundred Treasures Realm understood that if they stayed in one place for too long, then they would no doubt be killed. Therefore, they were

constantly moving. With the targets moving, the spirit turtle was also moving, making aiming very difficult.

However, the people from the Hundred Treasures Realm have a weakness. They were not used to firing their rifles while moving. When they want to shoot, they would stop first and take aim. This window of time would give Zhu Wang and the others a chance to hit their opponent.

But just as Zhu Wang aimed at someone from the Hundred Treasures Realm, he suddenly noticed something in the corner of his eye. He turned his head and saw three large artifacts. The three large artifacts were slowly maneuvering themselves towards the outpost.

Zhu Wang was startled, he knew what these three large artifacts were. They were the reason why the first batch the Fireweaver Race sent were annihilated. Seeing them here, Zhu Wang couldn't help but feel a sense of crisis.

While Zu Wang was thinking about how to deal with the three large artifacts, he suddenly felt his hair stand up. Zhu Wang felt something similar before, it was a feeling of being aimed at.

As a gunman himself, he was very familiar with this feeling. It was because of this feeling that he was able to avoid a lot of dangerous situations. And this time, he felt it one after another. And the danger he felt was much stronger than the ones he felt before.

Zhu Wang's expression turned ugly. However, he didn't order his spirit turtle to move immediately. He was still moving at a moderate speed, but his direction had deviated. He was slowly retreating. Because he was very slow, nobody noticed.

Zhu Wang raised his spirit turtle since it was little, so they were almost mentally connected. The spirit turtle moved slowly but Zhu Wang knew that the spirit turtle was preparing to dash at any moment to avoid any danger.

As Zhu Wang finished his preparations, the intensity of the feeling he got became extremely powerful. Zhu Wang knew that the other party had made their move. Although he didn't see what was coming, he shouted, "Go!" Hearing its master's word, the spirit turtle seems to have a fire lit up on its behind as it zoomed out of the area. They traveled close to a thousand meters. In Zhu Wang's mind, this distance was enough to evade the enemy's attack.

However, Zhu Wang quickly discovered his mistake. The feeling didn't vanish. Just as Zhu Wang was about to command his spirit turtle to move once more, two luminous spots could be seen moving closer and closer towards him. He immediately waved his hand as he released fireballs to meet the luminous spots. At the same time, the spirit turtle's golden snake tail pierced through the spots.

Despite being hit by the fireballs, the luminous spots didn't slow down at all. The same was true when the golden snake hit them. It was also at this time that Zhu Wang was able to recognize what these two spots were.

“Huge bullets!” This was the final thought that ran through Zhu Wang's mind before he completely blacked out.

#### Chapter 1506: Crackle of Gunfire

The rumbling crackle of gunfire was heard from the three large artifacts. Although Zhao Hai's cannons underwent a muffling out its sounds, a sound of more than a hundred cannons would still be very loud.

On the other hand, the Fireweavers were sent into a flurry. This was because they didn't expect to be attacked suddenly. Moreover, the strength of the other party was very powerful. They could see their comrades dying to the cannon shells in all directions.

Zhao Hai made the cannon shells similar to the mortar shells. These shells explode as well, but it was impossible to kill cultivators with explosion alone. So Zhao Hai stuffed small artifacts inside the cannon shells. These small artifacts were actually small silver needles with armor penetration.

So when the two shells hit Zhu Wang, he didn't even have the chance to defend before he was peppered with holes.

It wasn't only Zhu Wang who suffered this fate, his spirit turtle was killed as well. Even a defensively strong spirit turtle couldn't do anything. Both the beast and person that died were immediately taken into the Space by the silver needles. After that, the Undead Zhu Wang joined the riflemen of the Space.

Zhao Hai didn't really need Zhu Wang's rifle. However, he currently didn't have the same rifle as Zhu Wang's. Therefore, he received Zhu Wang's rifle into the Space. This way, when he releases Zhu Wang in the future, nobody would suspect anything.

The other Fireweavers suffered the same fate as Zhu Wang. Some of them might have survived the explosion of the shells, but the silver needles inside finished them off. Under Cai'er's control, these silver needles could attack multiple times. This made it impossible for the Fireweavers to escape.

After the first volley, more than 100 Fireweavers perished. This caused the other Fireweavers to be dumbfounded.

They were used to seeing people die in this war, but seeing more than 100 die just like that, they were stunned. But this was only the beginning.

The cannons continued to fire. As shells flew, a Fireweaver would die.

Zhao Hai no longer hesitated to kill the Fireweavers. He used to be cautious, fearing that Mu Yu would find out that his artifacts were different. But now, he doesn't need to do so anymore. They were too far from the Fireweavers that spiritual force wouldn't be able to reach the shells. Therefore, Zhao Hai could confidently move using his silver needles.

When the cannons began to fire, Zhao Hai contacted Mu Yu with his computer. As he commanded the cannons to attack, Mu Yu would lead his troops to evacuate the outpost. Not only would this ensure the safety of the people on the outpost, it would also increase the strength of the Hundred Treasures Realms' side.

Also, because the outpost's defensive formation was broken, if he didn't get these people, then they wouldn't be able to return to the headquarters easily without the use of transmission formations. If they can't return, then they might as well join them to fight.

Because of this, Zhao Hai's three artifacts didn't go forward. Instead, it stopped in place as it continued to attack the Fireweavers.

What's strange about this group was that there were no people from the Giant Spirit Realm nor were there people from subordinate realms. All of them were Fireweavers numbering about 2000.

This confused Zhao Hai. He didn't understand why this group of Fireweavers chose to attack this outpost without bringing other troops. This doesn't seem like the tactic of the Fireweavers.

However, this wasn't the time to think about this. As cannons fired, more Fireweavers perished. Those who survived were flustered. They discovered that they didn't have any means to deal with the enemy.

The rifles in their hands didn't have the same range as the enemy's artillery. They simply cannot hit their opponent. This meant that they could only take the attack without any means to shoot back. This caused the Fireweavers to feel very angry. At the same time, they were also terrified.

In the past, they used this method to bully other cultivators. This was because their rifles had far more range than normal artifacts. Because of this, they had a distance advantage against their enemies. They would kill the other party with their rifles without the enemy being able to retaliate.

Now, they were in the same position as their past enemies. They became the people who could only take the shots without being able to shoot back. The other party was continuously sending attacks. Moreover, the strength of the attacks was so much stronger compared to the rifles.

The Fireweaver rifles weren't actually very strong. After all, the bullets were small. Even if they manage to hit someone from far away, as long as they don't hit a critical spot, they could only injure their target.

Naturally, this refers to normal situations where the other party didn't have any defensive artifacts to protect them. If the other party has a defensive artifact, then they would be lucky enough to be one of the people who could block the bullets. When facing the Fireweaver Rifles, there's only three results: life, death, or disability!

There's nothing else to say about 'life'. If your artifact managed to block the bullet, then you would no doubt survive. Death was simple as well, not being able to block the bullet and being killed. As for disability, it was once the bullet hit you in a non-vital location.

The Fireweaver rifle's bullets were also a kind of small artifact. They were quite hard to make. A cultivator's defensive artifacts weren't made for decoration. They were all hard and hard to penetrate in. When bullets hit these defensive artifacts, it would be a collision between two tough objects. This collision would cause the bullet to fragment. But this fragmented bullet was much more lethal compared to normal bullets.

When a bullet hits a cultivator, then it would only leave a hole behind. Most people might die from this hole, but not cultivators. With how resilient they were, as long as they consume medicine, this damage would be healed in no time.

On the other hand, a fragmented bullet adds an irregularity to the damage, causing a larger area of damage to the target's body. Therefore, fragmented bullets were extremely lethal. Even if they hit an arm, they would no doubt shatter it.

Most cultivators don't understand this principle. Because of this, whenever they fought the Fireweavers, they always used their defensive artifacts to protect themselves. In turn, this would increase the casualties because of the fragmented bullets.

At first, the Fireweavers didn't understand how lethal their rifles were. But as they continued to discover how easy to use the rifles were, they began to rely on it more and more. Presently, besides rifles and bullets, they rarely brought any other artifact.

Because of this over-reliance on rifles, the Fireweavers didn't consider bringing defensive artifacts along with them. In their opinion, the Fireweavers didn't need to defend. As long as they pepper their enemies with bullets, then the battle would be over. This made the Fireweaver Army a purely offensive army without any regard for defense. Now, they suffered because of this arrangement. As soon as Zhao Hai attacked them with cannons, they began to lose numbers at an alarming rate. This caused the Fireweavers to be terrified. They were afraid that they would be the next ones to die.

This wasn't the end. There weren't a lot of people inside the outposts. Before long, everyone has entered the large artifacts. This also meant that Zhao Hai and the others could let loose.

With the addition of the people from the outpost, and the Fireweavers that were killed, along with the Hundred Treasures Realm's troops, Zhao Hai's current strength was now very good. He had no reason to be afraid of 1000 Fireweavers. After the people from the outpost embarked on the ship, Zhao Hai immediately commanded the large artifacts to rush towards the Fireweavers.

As the large artifacts charged over, Zhao Hai called over a Fireweaver Undead. This Fireweaver Undead was Zhu Wang, now one of Zhao Hai's loyal soldiers.

Zhao Hai looked at Zhu Wang and said, "Only Fireweavers are here. Where are the people from the Giant Spirit Realm and the subordinate realms?"

Zhu Wang immediately replied, "Replying to the Young Master. The army has been left behind. The Fireweavers and the Giant Spirit Realm managed to gather a total of 100 thousand troops. They want to break through the Hundred Treasures Realm's headquarters in one go. In order to not disturb the grass and startle the snakes, we're sent in advance to pave the path of the army. After we do so, the army will go straight to the Hundred Treasures Realm's headquarters."

Zhao Hai stared, then his expression changed as he said, "Can the army catch up that quickly?"

Zhu Wang replied, "It can. The Fireweavers and the Giant Spirit Realm amassed more than 20 large artifacts fitted for fast and long travel as well as large capacity. But they weren't using Giant Spirit Treasure Ships, that would be too eye catching."

Zhao Hai nodded, then he waved his hand to send Zhu Wang Back. Then he commanded his large artifacts to chase the remaining Fireweavers. At the same time, he sent orders to the Undead to target only the Fireweavers who were fleeing. As for those who still resisted, the other people with rifles would deal with them.

After passing his orders, Zhao Hai appeared on the Pagoda. Mu Yu was currently looking at the Fireweavers who were being killed one by one with a pleased expression on his face. It was at this time that Zhao Hai appeared.

Seeing Zhao Hai, Mu Yu couldn't help but stare. Then his expression changed as he asked, "Little Hai, why are you here? Did something happen?"

Zhao Hai nodded and said, "I just asked an Undead Fireweaver. He said that the Fireweavers and the Giant Spirit Realm gathered a hundred-thousand army to attack the headquarters. The ones here are just cleaners sent to make a path. Once they sweep the outposts, the army would march to the headquarters. But they didn't expect us to come out and attack."

Hearing Zhao Hai, Mu Yu coldly snorted and said, "Good, Fireweavers, good. But why haven't we received this information before?"

Zhao Hai replied, "They used large artifacts to hurry along. These large artifacts are made to fly long distances. I'm afraid they're just waiting for the outposts to be cleaned up. Then they would rush to the headquarters and use artifacts like the formation breaking needle to break into it."

Mu Yu replied, "They're plan is good. But they didn't take us into account. Little Hai, what do you plan to do next?"

Zhao Hai smiled faintly and said, "We'll clean the advance troops first. Then we'll wait for the enemy's response. They have a hundred thousand people, we also have a hundred thousand people on our side. They have rifles, we have rifles as well. However, they don't have artillery. We're at an advantage."

Mu Yu nodded and said, "Alright. Let's clean these fellows up first. Let's get in touch with Little Jie and Little Wen. Then we'll proceed."

Zhao Hai nodded, then their figures moved and appeared on the Giant Spirit Treasure Ship where Tang Jie and Tang Wen were on. They discussed the plan before Zhao Hai and Mu Yu returned to their respective large artifacts and attacked what was left of the 2000 Fireweavers.

The Fireweavers already had low morale. They were panicking. Now that Zhao Hai increased the intensity of his attack, they no longer blocked and instead scattered in all directions to escape. However, they wouldn't be able to run away in time.

Zhu Huo currently stood on his wind beast as he desperately fled the battlefield. To him, the events that just happened seemed like a nightmare. This was especially true regarding the three large artifacts. Zhu Huo knew clearly that if he didn't escape now, then he wouldn't be able to live on.

Previously, the Fireweavers, along with the Giant Spirit Realm and its subordinate realms, sent a large number of people to wipe out the three large artifacts as well as the Octopus Islands. At that time, they had huge morale, but they were still annihilated in the end. Now, the 2000 people didn't have any confidence in facing the three large artifacts.

However, Zhu Huo was very confident in his running skill. His wind beast was very fast, it can be said that it was the quickest beast there was. Therefore, he was able to cover a large distance compared to the other Fireweavers.

Despite this, Zhu Huo didn't lower his guard. He knew how powerful the Hundred Treasures Realm's cannons were. Therefore, he constantly changed his route as he paid attention to any shells coming for him. He also fired his rifle from time to time.

Before long, Zhu Huo managed to leave the battlefield. He was certain that the cannons wouldn't be able to reach his current location. Zhu Huo began to relax.

But at this time, Zhu Huo suddenly discovered several people in front of him. In the hands of these people were rifles that he hasn't seen before. Zhu Huo swept these people with his spiritual force and discovered that they were Undead. Then suddenly, the Undead raised their rifles at the same time. Zhu Huo didn't have enough time to hide before the sound of gunfire was heard. Zhu Huo and his beast were killed immediately.

#### Chapter 1507: Bombing The Enemy Ship

The reason Zhao Hai released his Undead this time was to see how effective they were with the rifles. At the same time, he didn't want any Fireweavers escaping. If they manage to escape, then the Fireweaver army would get information. When the time comes, things might become more complicated.

Fortunately, the Undead didn't disappoint him. They lined up in a formation and used their rifles. Their fighting strength was quite good. Zhu Huo and his tamed beast weren't able to counter-attack before being killed.

Zhao Hai was very satisfied with this result. Although the rifles were good on their own, seeing how good they were in the real battlefield still reassured him.

Zhao Hai currently has a hundred thousand people going against 2000 Fireweavers. Along with the artillery they had, the Fireweavers couldn't do anything.

Moreover, the Fireweavers discovered that their rifles were of no use to Zhao Hai, which demoralized them even more. The last trace of resistance in their hearts vanished completely.

The three large artifacts continued to chase the Fireweavers. Naturally, they wouldn't be able to kill every single one. As for those who escaped, they suffered the same fate as Zhu Huo. After a while, not a single Fireweaver was left alive in the battlefield.

Once they could no longer spot any Fireweavers, the three large artifacts regrouped. Zhao Hai glanced at Mu Yu nodded. Mu Yu nodded as well. They didn't need to speak. It was time to implement what they discussed before.

Zhao Hai waved his hand and the three artifacts began to fly forward. He already asked Zhu Wang where the Fireweaver Army was. It was time to deal with them.

Mu Yu took out a jade sword message and passed the information back to the headquarters. Right now, the headquarters had managed to acquire more troops. As long as they make the proper adjustments, they would be able to empower their defense.

At the same time, Mu Yu knew that if the Fireweavers were to really attack the headquarters, then the result would greatly depend on the Immortal Experts. When the time comes, Mu Yu and the others could only occupy a supporting role.

The three large artifacts quickly moved forward. Everyone on board had happy expressions on their faces. They actually didn't take a lot of shots since Zhao Hai directly used his cannons to obliterate the enemy. Although they weren't active participants, the people onboard still couldn't help but feel ecstatic.

After flying for one hour, Zhao Hai and the others still hadn't seen anyone from the Fireweaver Race nor the Giant Spirit Realm. It looked like there wasn't a war going on.

Despite this, Zhao Hai knew that this war had captured the attention of the entire Ten-thousand Realm Battlefield. This time, both sides had troops numbered to the hundreds of thousands. This was almost unprecedented. It was impossible to ignore this battle.

Although wars occurred between the Hundred Treasures Realm and the Giant Spirit Realm before, the troops from both sides weren't that many. At that time, their numbers only reached dozens. Their battles were very discrete. But this time, it seems like both sides were going all-out.

This was a battle for the Hundred Treasures Realm and their position in the Ten-thousand Realm Battlefield. If they survive, then they will rise. But if they failed, they would vanish into history.

After another half an hour, Zhao Hai was finally able to see people from the Fireweaver Race and the Giant Spirit Realm. They were on 20 large ships. However, they weren't advancing at this time. The ships just stopped in place. It was clear that they were waiting for news.

This was something that the silver needles discovered. In order to be in range to fire at the Fireweavers and the Giant Spirit Realm, they still needed to fly for at least 20 minutes more.

Zhao Hai did not stop. He saw that the 20 ships that the Fireweavers prepared weren't used for battles but instead for transport. Therefore, Zhao Hai wasn't worried about anything.

Zhao Hai took out his computer and told Mu Yu about the situation. He had everyone prepare. Twenty minutes was just a moment for cultivators.

Twenty minutes passed in a blink of an eye. Zhao Hai and the others entered the range of the Giant Spirit Realm and the Fireweaver army. The other party also noticed their arrival as large quantities of people flew out of one transport ship.

The ship didn't look like a wooden sailboat. It had a flat head and didn't have any sails. It was also very large. One could see from a glance that it wasn't made for battle.

Naturally, Zhao Hai wouldn't be polite. After the enemy entered the range of the cannons, he immediately ordered the Undead to open fire. In order to gain the initiative, he had to be the first to attack.

Zhao Hai's cannon shells contain small spirit snake needles. Naturally, it would be very easy for the shells to deal with transport ships. After a few shots, several holes appeared on the ship. Some shells hit the ship and exploded, scattering small spirit snake needles into the surroundings.

The explosion caused very serious damage. The ship was compact and the people inside were densely packed. When the shells exploded and released a large number of spirit snake needles, even if the cultivators wanted to hide, they would have nowhere to hide in. They were quickly killed by the needles.

Zhao Hai didn't waste time and turned those who died into Undead and sent them to the Space. Many of the dead weren't from the Fireweaver Race. The Fireweavers were very concerned about the security of their rifles. Therefore, besides Fireweavers, none of the other troops had rifles. They were just normal cultivators, the weakest of whom were at the Nascent Soul Stage.

One could also see how much the Fireweavers and the Giant Spirit Realm invested in this war. The quality of troops was very high. If the Hundred Treasures Realm didn't have rifles, then they would never be able to stop this army.

The Fireweaver and Giant Spirit Realm army also discovered what Zhao Hai was doing. They immediately ordered everyone to get out as fast as possible. They knew that if they stayed in the cabins, they would no doubt be killed.

Zhu Yunshan's eyes were red. He was the leader of the Fireweaver Army. He didn't expect to encounter an attack from the Hundred Treasures Realm at this time. And this was from the three large artifacts that they were tasked to watch out for.

Seeing Zhao Hai's face, Zhu Yunshan knew that the 2000 Fireweavers that they sent in advance had been cleaned up. However, he didn't expect Zhao Hai to have lethal cannons. Those who were in the cabins when the shells exploded died before they could even come out.

Zhu Yunshan really wanted to rush out and eliminate the three large artifacts. However, he couldn't do so at this time. What they needed to do right now was to evacuate everyone out of their cabins, otherwise they would be killed.

Zhao Hai calmly gazed at the Fireweaver Army. He did not get closer to the enemy. The Fireweavers and the Giant Spirit Realm had been complacent this time. They thought they already won against the Hundred Treasures Realm. They didn't think that the Hundred Treasures Realm would be able to fight back, so they didn't bring large artifacts with fighting strength like the Giant Spirit Treasure Ships. Instead, they brought transport ships. So even if the Fireweavers and the people from the Giant Spirit

Realm came out of their ships, it would still be difficult for them to cause any damage to Zhao Hai's artifacts.

The only way for Zhao Hai's artifacts to be damaged was if they enemy were to rush it. However, with their current state, this will be very difficult to accomplish. Because of this, Zhao Hai didn't go forward. Although the 20 transport ships weren't meant for combat, they were still very large. If Zhao Hai and the others rushed over, then the enemy army would turn these ships into fortresses they could attack from. Therefore, Zhao Hai decided to bomb them out first. After destroying the 20 ships, only then would he go forward.

The rumbling of cannon fire continued. Cultivators on the three large artifacts ran to the windows in order to look outside. Kong Miao and Xu Wuzun were one of them.

Looking at the 20 ships on the opposite side peppered with small and large holes, an excited expression couldn't help but appear on Xu Wuzun's face. He turned to Kong Miao and said, "Grandmaster Kong, Mister Zhao Hai has truly hidden his strength well. Look at those guys. I'm afraid they will be blown up to bits. Hahaha."

Kong Miao couldn't hide his pride. Although Zhao Hai joined the Hundred Treasures Realm, it was undeniable that he came from the World of Cultivation. Zhao Hai's achievements gave face to the realm.

In the past, the World of Cultivation was basically unknown in the Ten-thousand Realm Battlefield. Now, because of Zhao Hai, a lot of realms under the Hundred Treasures Realm took the initiative to build a relationship with Kong Miao. The flattering words he received recently was something he would never imagine in the past.

Kong Miao was also aware that these people were only polite to him because of Zhao Hai. Because of this, he didn't put on any airs and was also polite to these people. Now that the World of Cultivation was under the Hundred Treasures Realm, they needed to build connections in order to thrive.

After some time, Zhu Yunshan called for statistics on the attack. The numbers he saw were painful. Just in this first batch of attacks, they lost about 20 thousand people. Twenty thousand was a large number in the Ten-thousand Realm Battlefield. Lower-grade realms might not necessarily have 20 thousand troops in the battlefield. In other words, Zhao Hai's cannon fire destroyed about two World of Cultivation's worth of troops in the Ten-thousand Realm Battlefield.

Zhao Hai still hadn't approached and instead continued to fire at the ships. Although Zhu Yunshan wanted to go out, he knew that it was impossible. If he did that, they would only lose more people. He was already prepared to retreat.

At this time, a cold snort was heard followed by a cry of a phoenix. A fiery red figure flew straight from a distance. Its speed was very quick. In a blink of an eye, the red figure was already close to Zhao Hai. From what Zhao Hai can see, it was clearly a Fire Phoenix!

#### Chapter 1508: Space Crisis!

The Fire Phoenix was more than 30 zhang(~100m) long. It had a golden crest on its head as well as seven long plumes. It had a sharp pair of claws along with a long and sharp beak. It had red feathers that seemed to be on fire.

Riding on the back of the phoenix was a person wearing clothes similar to those worn by the Fireweavers. What's different about him was the rifle on his back. The rifle was much longer than the ones used by the Fireweavers. It was also equipped with something like a scope.

Seeing this rifle, Zhao Hai immediately thought of sniper rifles. Zhao Hai couldn't help but be shocked. He didn't expect to see this gun in the hands of the Fireweavers. Originally, he was afraid of being too conspicuous with his rifles. Now, it seems like there's more to the Fireweaver Race's rifles than what he saw.

Just like what Zhao Hai thought, the Fireweaver Rifles weren't that simple. The reason the rifles looked ordinary was because the Fireweavers needed to be coordinated when using the rifle technique. The rifles they were equipped with were most suitable for this kind of combat. If they changed the form of the rifles like Zhao Hai, there would be some difficulties in using the rifle technique.

Zhao Hai's rifles were made without considering the rifle technique. Therefore, he was able to make the appropriate adjustments. The Fireweavers didn't have the same conditions as him.

What surprised Zhao Hai the most was the fact that the person on the back of the fire phoenix was at the Immortal Stage. Not only him, the fire phoenix he was standing on was also at the Immortal Stage.

The moment the Immortal Expert appeared, Zhao Hai immediately gathered the three artifact and formed a 品. Zhao Hai stood on the Hell King's ship, coldly looking at the Immortal Expert.

The Immortal Expert was also looking at Zhao Hai. His eyes were electrifyingly cold. Although Zhao Hai was still far away from the Immortal Expert, he could feel a heavy pressure on him.

Despite this, Zhao Hai didn't avoid the Immortal Expert's gaze. Seeing Zhao Hai dare look at him eye to eye, the Immortal Expert stared for a moment before he laughed and said, "A small place like the World of Cultivation actually managed to make an expert like you. Hahaha, good. This old man really underestimated you. Zhao Hai, dying in my hands today can be regarded as your blessing. Because of your strength, this old man will tell you his name. I'm Zhu Huwei, titled the Fire Phoenix Sniper."

Zhao Hai cupped his fist and said, "Zhao Hai has seen Senior Zhu. Senior Zhu, the Hundred Treasures Realm and the Giant Spirit Realm are bitter enemies. Being from one of the five Great Realms, why did you join the fight?"

Zhu Huwei looked at Zhao Hai, then he laughed and said, "Interesting, you still want to persuade this old man. Alright, let this old man tell you. The Fireweavers want more territory, how's that answer?"

Zhao Hai smiled bitterly and said, "Senior is really honest. This Zhao Hai has no words to say. Then, Senior, you may begin."

Zhu Huwei was no longer smiling. As the smile on his face vanished, he waved his hand as the huge rifle on his back appeared. Then he aimed at Zhao Hai.

Zhu Huwei's gunplay was very fast, but Zhao Hai still managed to make preparations. A metal plate appeared in front of him, hitting the shot Zhu Huwei sent towards him.

Zhao Hai felt his body shake. The Hell King's ship retreated along with the Pagoda and the Giant Spirit Treasure Ship.

Back when he discovered Zhu Huwei, Zhao Hai immediately pulled the energy from the three large artifacts together. No matter which one of them was attacked, all three will take the brunt of the impact together.

When Zhao Hai was thrown back by Zhu Huwei's rifle, both Mu Yu and Tang Jie were also fired upon. But since the three large artifacts were being pushed back, the two shots also failed to penetrate.

However, the two shots were still very heavy. Zhao Hai's spiritual force shook, but fortunately he wasn't injured.

As Zhao Hai fell back, the cannons from the three artifacts also fired. Numerous shells were fired into the air, but their target was only one, Zhu Huwei.

Zhu Huwei coldly snorted when he saw this. A giant fire phoenix let out a cry as it received these shells.

There was a loud explosion as all the cannon shells were exploded by the fire phoenix. The giant phoenix was also hit hard, the flames on its body dimmed a little.

However, that giant phoenix was merely an avatar of Zhu Huwei's fire phoenix. This Immortal Stage beast indeed has extraordinary strength.

At this moment, a voice was heard, "Zhu Huwei, let this old man face you." As soon as this voice was heard, two people appeared in front of Zhao Hai and the others. Both of them were dressed with the usual black clothing of the Hundred Treasures Realm. One couldn't see any weapons on them, but their bodies exuded a strong aura that showed that they were at the Immortal Stage.

Seeing the two, Zhu Huwei's eyes shrunk. It seems like the Hundred Treasures Realm had a certain understanding about him, otherwise they wouldn't have sent two Immortal Experts.

Zhu Huwei was a rather unusual person among the Fireweavers. Unlike the other Fireweavers who had two or more tamed beasts, Zhu Huwei only had one, his Fire Phoenix.

Actually, most of the powerful experts of the Fireweaver Race only had one tamed beast. This was because even though they trained multiple beasts when they were young, these beasts died out as time passed, leaving them with only one tamed beast.

Zhu Huwei was someone who raised only one beast since childhood. He had only been with his fire phoenix his entire life. His case was very rare among the Fireweavers.

Looking at the two experts from the Hundred Treasures Realm, Zhu Huwei laughed and said, "So it turns out to be the Twin Swords of Wind and Cloud. I didn't expect you to look at this Zhu Huwei highly. Both of you actually came to deal with me."

One of the twin swords looked at Zhu Huwei and said, "Zhu Huwei, since you know our title. Then you should know our custom. No matter where we are, we brothers always act together. Zhu Huwei, you're a famed Immortal Expert, aren't you ashamed of attacking a junior?"

Zhu Huwei sneered and said, "You're preaching to someone who doesn't care about what you think. Also, is Zhao Hai an ordinary Transcending Tribulation Expert? If he is, then this old man will withdraw from this battle immediately."

Just like Zhu Huwei said, was Zhao Hai really an ordinary Transcending Tribulation Expert? Even children won't be fooled by this. No ordinary Transcending Tribulation Expert could block an Immortal Expert's attack multiple times and still manage to survive.

Seeing the two keeping silent, Zhu Huwei coldly snorted and said, "Enough chit-chat. Let's leave this place or else we'll hurt the little ones." After he said that, Zhu Huwei's body vanished as he left the battlefield. The twin swords also followed and disappeared.

When the Immortal Experts left, Zhao Hai naturally continued. He waved his hand as the three large artifacts rushed and opened fire on the enemies.

Then suddenly, a large fiery red bullet shot towards Zhao Hai from behind the Fireweaver army. Zhao Hai expression changed. This was because he couldn't see anyone behind the Fireweaver Army. Judging by the strength of the bullet, it was no doubt fired by an Immortal Expert. It was a hidden Fireweaver Immortal Expert!

While he thought of this, Zhao Hai raised a metal wall to surround the three large artifacts.

Then at this time, Cai'er's voice was heard, "Young Master, be careful. This bullet came from the spatial rift. It seems like the Fireweavers have an Immortal Expert that has spatial abilities."

Zhao Hai stared, then his complexion changed. The Space was Zhao Hai's final trump card. If he really met an Immortal Expert with a spatial divergent ability, then he would have to be very careful to hide the existence of the Space.

But Cai'er's words didn't end there. She added, "Young Master, the situation isn't good. The Immortal Experts of the Hundred Treasures Realm had all been sent out to battle the Immortal Experts of the Giant Spirit Realm and the Fireweaver Race. I'm afraid you'll have to face this Immortal Expert on your own. Nobody will come to help you."

Zhao Hai's complexion turned ugly when he heard this. He immediately shrunk the three large artifacts and then sent them towards a spatial rift. He was the only one left.

Just as he closed the spatial rift, Zhao Hai immediately felt the space around him compressing. It seems like the space was being locked in.

Fortunately, Zhao Hai can still feel the existence of the Space. However, if he wanted to take something out of the Space, then it would be ten times more difficult compared to before. Fortunately, if he wanted to concentrate the energy of the Undead onto liquid silver, he could still do so.

Mu Yu was able to notice the metal walls surrounding the pagoda. However, he wasn't anxious. He thought that Zhao Hai only did this in order to block the Fireweaver attacks. Therefore, when he saw the metal walls, he didn't think of anything.

But in the next moment, Mu Yu suddenly discovered that they had returned to the headquarters. Everyone who departed earlier were with him. The only one missing was Zhao Hai.

Mu Yu stared, then he noticed his computer blinking. When he opened it to take a look, he discovered a message from Zhao Hai. He opened the message and heard Zhao Hai's voice, "Big Brother Mu, I met an Immortal Expert that has a spatial ability. The Immortal Experts of the headquarters have all been sent to fight the Immortal Experts of the enemy. Therefore, I can only send you back while I stop him from attacking the headquarters. Big Brother Mu, you need to keep everyone vigilant. If you can't hold on, return to the Hundred Treasures Realm." There were no more messages after that.

## Chapter 1509: Spirit Snake Rifle

Zhao Hai said his message in haste. When he heard the anxiety in Zhao Hai's voice, Mu Yu's expression drastically changed. He immediately wanted to save Zhao Hai, but he changed his mind when he understood what Zhao Hai meant.

All of the Immortal Experts in the headquarters have been drawn away. Now, the headquarters was empty. If Mu Yu wanted to save Zhao Hai, then the core of the Hundred Treasures Realm would be defenseless. If an Immortal Expert comes, then nobody would be able to stop them.

Mu Yu also knew why Zhao Hai didn't return. If Zhao Hai went back with them, then the Immortal Expert would definitely chase them. The outposts outside the headquarters couldn't stop an Immortal Expert. If the Immortal Expert used his spatial ability to attack the headquarters, then nobody would command the subordinate realms of the Hundred Treasures Realm.

Because of this, Zhao Hai chose to constrain the Immortal Expert. As long as they manage to protect the headquarters, then the Hundred Treasures Realm would have an opportunity to overturn the situation.

Mu Yu was aware that Zhao Hai waged his life to buy them some time, so he couldn't be impulsive in his decisions. Although Mu Yu was very confident in Zhao Hai, he knew that Zhao Hai still doesn't have the strength to fight an Immortal Expert. He can hold against an Immortal Expert, but it wouldn't be easy to do so.

Moreover, if what Zhao Hai said was true, then the Immortal Expert also had spatial abilities. In other words, Zhao Hai's chances of escaping using his own spatial ability was very low. The only thing he could do was send Mu Yu and the others back to the headquarters. At that time, the Immortal Expert shouldn't have arrived. Otherwise, nobody would have been able to leave the battlefield.

Mu Yu calmed down. At this time, Tang Jie and Tang Wen ran up to him with perplexed expressions. Tang Jie said, "Big Brother Mu, where's Little Hai? Why didn't he return with us?"

Mu Yu handed the computer to Tang Jie and said, "Take a look. Don't tell anybody else about this." After he said that, he turned around and left.

Tang Jie and Tang Wen immediately opened the computer and listened to Zhao Hai's message. Their expression changed as well. Tang Jie was about to yell, but Tang Wen was able to cover his mouth. Tang Wen whispered, "Brother, don't say anything. Let's follow what Little Hai said. First let's defend the headquarters, or else the Hundred Treasures Realm would be finished."

Tang Jie calmed down. Tang Wen looked at Tang Jie and said, "Brother, Little Hai is working hard to buy time for us. We cannot waste his efforts. Doesn't Big Brother Mu also want to save Little Hai? He understands what Zhao Hai wanted to do. We can only endure. Haven't you noticed Big Brother Mu's complexion?"

Tang Jie opened his mouth, but in the end he didn't say anything as he sighed and said, "Let's go." Then they followed behind Mu Yu.

Seeing Tang Jie and Tang Wen behind him, Mu Yu nodded and immediately began to arrange the 100 thousand troops into defensive positions around the headquarters.

The defensive positions of the headquarters were built very well. Each were equipped with cannons as well as mortars. It was Zhao Hai who provided the cannons, so the defenses of the headquarters were very good.

In addition to Mu Yu, there were also a few Severed Soul Experts in the headquarters. After communicating with everybody, Mu Yu immediately arranged the cultivators to their respective posts. At the same time, Mu Yu went to the refining room where the rifles and the bullets were being made.

Mu Yu immediately had two teams of refiners stop and shift their production to fake spirit snake needles. Mu Yu was aware that even if rifles were strong, they still couldn't compare to the formation breaking spirit snake needles when it came to offensive power. A spirit snake needle used by ten Severed Soul Experts was enough to stop an Immortal Expert for some time. What the Hundred Treasures Realm needed at this time was exactly this.

After all the preparations were finished, Mu Yu stood on the walls of the headquarters and looked outward. Actually, he was very anxious. He was afraid that Zhao Hai might suffer an accident. However, he couldn't show his emotions on his face. Right now, Mu Yu holds the highest status in the headquarters. The people from the subordinate realms weren't aware that there were no Immortal

Experts in the headquarters. If he gave them a clue of what was going on, then things might go out of control. Without an Immortal Expert present, disaster might erupt within.

Tang Jie and Tang Wen were also aware of Mu Yu's worries. Otherwise, Mu Yu wouldn't have stood there and presented himself. In fact, although he can't see anything, Mu Yu still stood in place. Tang Jie's thoughts were similarly in chaos, but he didn't show it. On the surface, nobody can see that something wasn't going well.

Kong Miao and Xu Wuzun also felt something strange. They knew how important Zhao Hai was to the Hundred Treasures Realm, and his status in the realm wasn't very low. Mu Yu was also very dependent on Zhao Hai. As long as Zhao Hai doesn't retreat, then Mu Yu would have stayed beside him. But now, they could only see Mu Yu. However, they didn't ask Mu Yu. This was because they knew that their status was nothing in front of the Hundred Treasures Realm. And there were also things that they couldn't ask.

Xu Wuzun was an old fox. The moment they returned to the headquarters without any warning, he began to feel that something was doing well. He was also aware that it wasn't the time to ask questions. Therefore, he didn't go forward. Naturally, since Kong Miao was still young, he wanted to ask what was going on before he was stopped by Xu Wuzun.

The Xu Race wasn't very popular in the Hundred Treasures Realm. This was related to their previous reputation. What the Xu Race needed was to get closer to the World of Cultivation. Because of this, Xu Wuzun was deliberately fostering his friendship with Kong Miao. Seeing Kong Miao about to do something stupid, it's natural for Xu Wuzun to stop him.

.....

After sending Mu Yu and the others out, Zhao Hai felt the space around him turn more solid. If he wanted to take things out of the Space, then he would need ten times more effort than usual. Fortunately, the Space still allows the Undead to input their energy into Liquid Silver. Otherwise, Zhao Hai would have no confidence to face the Immortal Expert.

At the same time, Zhao Hai had Cai'er and the others take a look how far the compact space goes. When necessary, he would open a spatial rift for the Undead to attack the Fireweavers.

Zhao Hai knew that this solidified space had a great impact on him. If he wanted to enter the Space now, it would take a longer time compared to before. That period of time was enough for an Immortal Expert to take action. Zhao Hai doesn't doubt the methods of an Immortal Expert. If the Immortal Expert can seal the spatial rift before Zhao Hai can enter, then that would be extremely dangerous.

What Zhao Hai was most afraid of was if the spatial rift was opened for too long, then the Immortal Expert might enter the Space. Zhao Hai still doesn't know if the Space could defend itself against an Immortal Expert. Because of this, Zhao Hai wasn't planning on entering the Space soon.

It can be said that this was the most dangerous encounter Zhao Hai had ever since transmigrating. In the past, whenever he was in danger, he could still enter the Space to save himself. But now, not only could he not enter the Space, the Space also couldn't provide him with much support.

Zhao Hai also discovered that the restrictions around him didn't only apply to the Space. His artifacts were also affected. He would need five times more energy to control his artifacts. Controlling your artifact slower than usual was very fatal.

As Zhao Hai was investigating the space around him, a tall and thin old man dressed in Fireweaver clothing appeared not far from him. This old man was very strange. Unlike other Fireweavers who step on one beast, this old man was stepping on two silver snakes. These snakes were long but thin. It's common for snakes to be as thick as a bowl if they were a few meters long. However, these snakes were 50 meters long yet were still as thin as a common snake.

Tiny scales covered these two snakes up to their triangle heads. They had cold crimson eyes that stared at Zhao Hai. Zhao Hai couldn't help but feel cold under their gazes.

The tall and thin man had a reserved aura when he appeared. His eyes were similarly cold. Zhao Hai felt the same feeling from this old man's gaze as the snakes'.

Additionally, behind the thin old man was an enormous rifle. It was big to the point that it didn't look compatible with the old man.

The rifle carried by Zhu Huwei before looked like a sniper rifle. On the other hand, this old man was carrying something like a bazooka. The barrel was thick and well-built. Although it looked like a rocket launcher, it was in the form of a rifle. Its body was flaming red, which was very eye-catching.

The old man sized Zhao Hai up for some time, then he said with a strange smile, “Zhao Hai, I heard of your recent achievements. However, you need to remember that kids need to be low-key, or else they would die early.”

Zhao Hai looked at the old man, then he coldly snorted and said, “Can one really live long if they stay low-key? If an Immortal Expert like you can take action against me, what’s the use of being low-key?”

The old man coldly snorted and said, “Zhao Hai, you’re a talented kid. But you shouldn’t have annoyed the Fireweaver Race. Only death awaits those who offend the Fireweavers.”

Zhao Hai smiled faintly and said, “You’re not the first person to say that to me. Ever since I came out to the world, I heard numerous people saying the same thing. But as you can see, I’m still living well. Instead, it was those people who died. I just don’t know if you can really kill me.”

The old man coldly snorted and said, “Extremely arrogant. Zhao Hai, remember this. The one who killed you is Spirit Snake Rifle Zhu Gui.” After he said that, the large rifle appeared in his hand. Then he aimed at Zhao Hai.

Zhao Hai has been in full alert. Seeing the other party using their gun, he immediately erected a 100-layer shield in front of him. The shields were 10 meters thick and 20 meters tall. They looked extremely sturdy.

Zhu Gui had a look of ridicule on his face. He was very confident in his rifle. This was because he knew that rifles used by Immortal Experts were unlike rifles used by Severed Soul Experts.

The Fireweavers had rifles for many years. If Zhao Hai could discover their weakness, how could the Fireweavers not? The Fireweavers knew about the shortcomings of using the rifles a long time ago. But once they reach the Immortal Stage, their rifles would be specially refined using secret methods. It was precisely because of this that once a Fireweaver enters the Immortal Stage, they would have officially begun cultivating the rifle. The Fireweavers discovered a unique cultivation from using rifles. This law, upon reaching the Immortal Stage, was called the Rifle Dao.

Zhu Gui didn’t know how deep the Rifle Dao was. But he knew that he had just touched the dao upon reaching the Immortal Stage. The road ahead was still very long.

Although he just touched the beginning of the Rifle Dao, Zhu Gui already felt how powerful it was. This was strength far surpassing the Severed Soul Stage. It was for this reason that Zhu Gui was confident of being able to destroy Zhao Hai's shield.

The large fiery bullet hit the shield in no time. However, the shattering of the shield that Zhu Gui imagined didn't happen. He saw the shield bend back but the bullet was becoming slower and slower. Before long, the bullet stopped, then it bounced back into the air.

Zhu Gui stared. The action of the wall made him think of a spring. This shield was just too springy. The wall drew back when it was hit, but when the momentum of the bullet ran out, it just sprung back into place, bouncing the bullet off.

In fact, Zhu Gui wasn't thinking wrong. The huge shield was a spring. The shield was ten meters thick. Naturally, Zhao Hai couldn't make it all solid. He installed countless springs inside it. The springs were layered to constantly counteract the force of the bullet. Once the bullet runs out of momentum, the wall would just go back to its original form.

Zhao Hai knew that if he met the bullet with a rigid shield, then his spiritual force would be shaken and he might injure himself. Therefore, he installed springs to cushion the impact of the bullet. When the time comes, he wouldn't worry about his spiritual force being shaken by the impact.

#### Chapter 1510: Immortal Rifle Technique!

Zhu Gui didn't expect his attack to be blocked. His expression was hard to look at. In his mind, he already lost face when Zhao Hai blocked his first attack. Moreover, he allowed Zhao Hai to teleport the people from the Hundred Treasures Realm. This was without a doubt a slap to his face. It's natural for his expression to be ugly.

Zhao Hai didn't care about Zhu Gui's reaction. He just discovered that the spring shield wall was very effective. Although it needed more spiritual qi, it was worth it as long as it blocked Zhu Gui's attack without causing any injury.

This was an attack from an Immortal Expert. Such an attack was blocked by his shield, and he wasn't injured. Zhao Hai was truly proud of his achievement.

However, Zhao Hai didn't lower his guard. This was different to his previous encounters. In the past, he can still escape to the Space when he's in danger. He didn't have this luxury this time.

Zhu Gui looked at Zhao Hai and said with a cold tone, "Good, very good, Zhao Hai. I didn't expect you to be this strong. Then I'll have to be impolite." After he said that, Zhu Gui held his rifle and then fired one shot after another.

But this time, Zhu Gui's firing method was a bit special. He didn't shoot after aiming like before. Instead, as if alive, the huge weapon in his hand moved on its own and fired bullet after fiery bullet.

Naturally, this method of firing wasn't very accurate. Instead of heading towards Zhao Hai, the bullets were randomly shot in all directions.

Zhao Hai couldn't understand what Zhu Gui was doing. Why was he waving his gun around? How can it hit?

However, Zhao Hai soon discovered where he went wrong. Not only were these bullets aimed correctly, it also trapped him!

After flying for some time in the air, the bullets began to make a turn. They all drew an arc before going straight for Zhao Hai, blocking all of his escape routes.

How could a bullet change directions!?

Zhao Hai was stunned when he saw the bullet curve. He didn't expect such high-speed bullets to all change their directions and suddenly head towards him.

However, Zhao Hai knew that this wasn't the time to be stunned. He waved his hand as his shield exploded and became flying swords.

Zhao Hai ordered, "Myriad Stellar Transformations, go!"

Along with his voice, about a thousand flying swords arranged themselves into a sword formation. The flying swords swam around Zhao Hai like fishes. Whenever a bullet gets close to Zhao Hai, these flying swords block them.

Zhao Hai stood in the middle of his sword formation, then he waved his hand and summoned the 12 metal beasts. After coming out, the 12 metal beasts charged towards Zhu Gui.

Zhu Gui was once again surprised that his barrage was blocked. His expression turned even uglier. Now, Zhao Hai even dared to counter-attack, which enraged him. He coldly snorted as a clump of blue flames appeared in his hand. Then the flame merged with the rifle. The once fiery red pattern outside the rifle was replaced by blue flames. It made the rifle more beautiful.

Seeing this, Zhao Hai didn't dare to be careless. Although he was able to block the bullets using his sword formation, it wasn't as easy as it seemed. After all, those were bullets fired by an Immortal Expert. The might of each bullet was as strong as the cannons on the Hell King's Ship.

After feeling the impact of Zhu Gui's bullets, Zhao Hai couldn't help but sigh. Immortal Experts truly deserted their reputation. They were very strong. Each one of their attacks equalled an all-out attack of a Severed Soul Expert. If Zhao Hai was a normal Severed Soul Expert, he would have perished a long time ago.

The flying swords Zhao Hai used in his sword formation each had yin-yang lightning pools inside them. Because of these yin-yang lightning pools, Zhao Hai was able to block Zhu Gui's bullets without being injured.

Despite these advantages, Zhao Hai still spent a lot of energy blocking the bullets. He wasn't as relaxed as what he revealed on the surface.

However, Zhu Gui didn't know this. Seeing Zhao Hai easily blocking his attack and even counter-attacking, he couldn't help but flare up.

Zhu Gui coldly snorted as he tapped both of his feet. In an instant, the two snakes under his feet rushed out to meet the 12 metal beasts.

Zhao Hai didn't care about the battle between the 12 metal beasts and the 2 snakes. The metal beasts could fight on their own. They can even decide to retreat if they need to.

After multiple level-ups by the Space, the 12 metal beasts were now as strong as a Transcending Tribulation Expert. However, the biggest advantage of the 12 metal beasts were the materials that they were made of.

In the past, the 12 metal beasts were not very strong. But now, within their bodies were yin-yang lightning pools. These lightning pools provided them with energy, further enhancing their fighting prowess.

At the same time, Zhu Gui was very confident in his two snake beasts. These two snakes were mutated beasts known as Silverwhip Snakes. Despite their soft bodies, these snakes' defensive capabilities were very good. Additionally, they have two venomous fangs. These fangs were hollow and could spit out venom. This venom was incomparable to normal poisons. Even Severed Soul Experts would suffer under it. Moreover, the venom had a strong corrosive effect.

Although the two Silverwhip Snakes were only at the Severed Soul Stage, their offensive strength puts them on level with Immortal Stage beasts. These beasts were very famous among the Five Great Realms.

The 12 metal beasts were much worse compared to the silverwhip snakes. However, their defenses allowed them to fight evenly with the snakes.

Zhu Gui's expression turned even uglier. Not only did he need to compress the surrounding space, he also used his barrage and silverwhip snakes. Yet, he was still unable to deal with Zhao Hai. How could the arrogant Zhu Gui swallow this humiliation.

Most importantly, he discovered that he had been held back by Zhao Hai for far too long, which was unfavorable to the plans of the Fireweavers. The Hundred Treasures Realm had already dispatched all of their Immortal Experts. The Giant Spirit Realm and the Fireweavers worked together in order to lure them all out. It was Zhu Gui's job to attack the headquarters of the Hundred Treasures Realm.

It must be said that the Fireweavers couldn't dispatch a lot of Immortal Experts. The Five Great Realms were all in a fragile equilibrium. If the amount of Immortal Experts gets affected, then this balance might be overturned. It must be known that none of these five realms were pacifists. They would use all opportunities they have in order to get an advantage.

Because of this, the Fireweavers needed to leave behind enough Immortal Experts to defend their own territory. Therefore, they were very limited in the manpower they can use. Besides the Immortal Experts who lured the Hundred Treasures Realm away, there were only very few who could make a move.

And among these few, Zhu Gui was the only one with the spatial ability that allowed him to attack the headquarters of the Hundred Treasures realm. The defenses of the Hundred Treasures Realm's headquarters simply couldn't be compared to the defenses of the World of Cultivation's stronghold or the Xu Race's Octopus Islands. The defenses of the latter two can be destroyed by a formation breaking spirit snake needle. On the other hand, Immortal Experts would need to take a lot of effort even with a spirit snake needle in order to break the defensive formation of the Hundred Treasures Realm.

Because of this, the Fireweavers sent Zhu Gui. He wasn't the strongest Immortal Expert, but he has a spatial divergent ability. He can use his ability to appear inside the Hundred Treasures Realm's headquarters. If there's an Immortal Expert inside the headquarters, then this plan would have failed. Zhu Gui wasn't strong, it's possible that he would be killed.

But this time, the Hundred Treasures Realm's headquarters didn't have any Immortal Experts in it. Naturally, Zhu Gui could go there and wreak havoc. As long as Zhu Gui enters the headquarters, he can destroy it from the inside. When the time comes, other Immortal Experts can rush in. Even if the Hundred Treasures Realm had countless Transcending Tribulation and Severed Soul Experts, they still wouldn't be able to stop them.

Before proceeding with the plan, the Fireweavers gave Zhu Gui the command to kill Zhao Hai first and get all of his weapons. The Fireweavers hated Zhao Hai. He killed thousands of their people and broke two of their attacks. How can the Fireweavers just let him off?

Moreover, the Fireweavers knew that Mu Yu was dependent on Zhao Hai. The target of the Fireweavers this time wasn't only Zhao Hai, but Mu Yu as well. Mu Yu was a key successor that the Hundred Treasures Realm groomed. His status in the Hundred Treasures Realm was very high. Even if Zhu Gui manages to infiltrate the headquarters, Mu Yu can still organize his people to defend. It was because of Mu Yu that the Immortal Experts were able to go out of the headquarters. With Mu Yu in command, victory and defeat was still difficult to see.

Actually, the plan of the Fireweavers was very good. They knew that Zhao Hai had spatial abilities. Therefore, they had Zhu Gui deal with him. In their opinion, sending the Immortal Expert Zhu Gui to deal with Zhao Hai would be quite easy. However, they didn't expect Zhao Hai to transport Mu Yu and the others back as soon as he noticed something wrong. And that he would face Zhu Gui by himself.

At the same time, Zhu Gui didn't expect Zhao Hai to be very hard to deal with. His methods were actually thwarted by Zhao Hai. If he delayed even more than this, then the plan would be wasted.

Zhu Gui knew that he could no longer delay. Because of this, Zhu Gui decided to use a rifle technique. This technique can only be used by Immortal Stage Fireweavers. He would combine the Fireweaver Race's innate fire with the rifle technique in order to increase the strength of his bullets.
