

Another World 1511

Chapter 1511: The Real Battle Begins!

Zhu Gui's blue flame wasn't ordinary. It was named Nether Arctic Flame. The Nether Arctic Flame was an extremely yin-attributed flame. No matter which material it comes in contact with, it would freeze them instantly. Then it would shatter into bits. It was very domineering.

Zhu Gui acquired this flame due to luck. Because this flame was very domineering, Zhu Gui didn't use it often. The flame was just too strong. The Fireweavers had techniques to control flames, but the more overbearing the flame was the harder it would be to control. Even if Zhu Gui already assimilated the flame into his body, using it often would affect his meridians.

If an Immortal Expert like Zhu Gui gets affected by the Nether Arctic Flame, then there's no need to mention others. It could be said that this flame was Zhu Gui's trump card.

Zhu Gui glared at Zhao Hai before waving his hand, controlling a belt of bullets with his spiritual force. The bullets laid themselves beside Zhu Gui. Then Zhu Gui began to pull his trigger.

A red bullet with blue flames shot towards Zhao Hai. Zhao Hai looked at the bullet with a serious expression. He discovered that this bullet was different, mainly because of the blue flame.

Zhu Gui wasn't done with just one bullet. He began to wield his rifle and rained bullets down on Zhao Hai.

Zhao Hai waved his hand, increasing the number of swords in his formation to ten thousand. This provided him with complete defense in all directions.

Before long, the first bullet hit Zhao Hai's sword formation. It took a dozen swords before Zhao Hai stopped the bullet. However, Zhao Hai's expression became ugly to look at.

This was because he discovered that the swords that blocked the bullet were all frozen. No mistakes, they were frozen. The swords were still under his control, but the efficiency of the yin-yang lightning pools dropped, like a machine that was jammed. The speed of the flying swords also decreased.

Zhao Hai didn't expect the blue flame to be this domineering. If it was before, then he could capture a bullet into the Space in order to break down the properties of the flame. Then after that, his artifacts would embody the flame and he would no longer worry about it.

However, things were different this time. Zhu Gui has spatial abilities that allow him to lock the surrounding space. If Zhao Hai really captured a bullet for the Space, then Zhu Gui would definitely find out about it.

Because of this, Zhu Gui can only block the bullets using his flying swords. And every time a bullet was blocked, more flying swords would be frozen. However, Zhao Hai couldn't do anything about this. Right now, he wanted to see what Zhu Gui would do next.

But what Zhao Hai wasn't aware of was Zhu Gui's surprise at his abilities. He didn't expect his nether arctic flame to be unable to do anything to Zhao Hai.

Then when Zhu Gui saw that his silverwhip snakes were evenly-matched against Zhao Hai's 12 metal beasts, he hatched up a new idea. He moved his rifle and shot towards the 12 metal beasts.

Although the 12 metal beasts were very agile, it was still impossible for them to evade Zhu Gui's rifle. Zhu Gui was an Immortal Expert, how could they dodge his attacks.

The 12 metal beasts were hit. Although they haven't been defeated, their speed definitely dropped. However, they were still faster than the frozen flying swords.

Zhao Hai discovered that the yin-yang lightning pools inside the 12 metal beasts moved faster than the ones on the frozen swords. It seems like the size of the yin-yang lightning pools contributed to this difference.

Despite being affected less than the flying swords, the 12 metal beasts were still hindered. They could no longer stop the silverwhip snakes. The two snakes made use of this opportunity to attack Zhao Hai.

Zhao Hai quickly commanded his flying swords to defend. However, the two snakes were just too agile. Moreover, they were unafraid of the swords.

Zhao Hai's expression turned ugly. He discovered that he couldn't do anything to the snakes. He can take out the Hell King's Ship, but it wouldn't do good against the blue flames. If it comes out, it would just be a huge target for Zhu Gui to fire at. In turn, it would cause Zhao Hai's spiritual force to be more strained. It just wasn't worth it.

The strength of the Hell King's Ship relied on its ability to ram the target as well as its cannons. The cannons needed people to load them. Normally this wouldn't be a problem because Zhao Hai can just take Undead out of the Space. But since he couldn't use the Space right now, the Undead couldn't come out.

The cannons were also unusable. Once they were hit by Zhu Gui, they would also become sluggish. Therefore, Zhao Hai chose not to release the Hell King's Ship.

However, if he didn't take the Hell King's Ship out, then it would be difficult to deal with the silverwhip snakes. He can wrap himself with liquid silver, but it would be detrimental to his later actions. This was because the blue flame also affected liquid silver's ability to transform. If he covered his body with liquid silver and it came in contact with Zhu Gui's blue flames, then he would be in trouble.

Zhu Gui's firing was getting faster and faster. Although Zhao Hai continued blocking them with his flying swords, the swords he could use were decreasing. Naturally, Zhao Hai can release more flying swords, but this would also drain his energy. If he wrapped himself with liquid silver, then all his flying swords would be affected.

The Stellar Transformations Sword Formation can completely block Zhu Gui's bullets. However, it also used a lot of spiritual force. If Zhao Hai releases a lot of flying swords, then he would not be able to fight for a long time. It should be known that the battle between Zhu Gui and Zhao Hai was a battle for endurance. The one who runs out of energy first would lose.

Zhao Hai can already feel proud for lasting this long against an Immortal Expert. But in the current moment, what he needed to do was to find a way to deal with the silverwhip snakes.

Seeing the two silverwhip snakes getting closer and closer, Zhao Hai coldly snorted before he performed hand-seals. The hand-seal this time was very simple with only one hand needed. But as the hand-seal formed, Zhao Hai's expression turned solemn and free. Then Zhao Hai waved his hand as two golden lights shot directly towards the two silverwhip snakes.

The golden lights were very fast, the silverwhip snakes simply couldn't avoid them. In an instant, the golden lights collided with the snakes. After a brief pause, the snakes began to twist their bodies uncomfortably. They seemed to be struggling, not because of physical damage, but mental.

Naturally, Zhao Hai knew what was going on. He used the Beast Controlling Technique on the two snakes. Zhao Hai knew that if he didn't show some of his true skills today, then he would lose to Zhu Gui.

While using the Beast Controlling Technique, Zhao Hai also used some of his Faith Power on his flying swords and 12 metal beasts. Once Faith Power entered them, it was like pouring a barrel of gasoline on an extinguished flame. The flying swords as well as the 12 metal beasts sprang back to life.

Zhu Gui wasn't an ignorant old man. His eyes couldn't help but narrow when he saw the golden lights. "Faith Power!", he exclaimed.

Zhu Gui's expression became very ugly to look at. He knew clearly that not everyone can get their hands on Faith Power. Faced with faith power, the nether arctic flame would no doubt be extinguished.

When he thought of this, Zhu Gui's complexion changed. Then he turned his head to the Fireweavers who didn't dare join the fight and said, "Everyone, attack. We cannot allow Zhao Hai to survive. Otherwise, he will be a huge disaster for us in the future."

Zhu Gui knew that those with Faith Power had no roadblocks in their cultivation. Zhao Hai was only a Transcending Tribulation Expert yet he was already very hard to deal with. If he continued to become stronger, then nobody would be able to stop him. Therefore, he needed to make sure that Zhao Hai would be crushed today.

The Fireweavers behind were aware of the general plan. They were waiting for Zhu Gui to deal with Zhao Hai so that they could charge the Hundred Treasures Realm headquarters together. This was the reason they stayed and didn't move.

These Fireweavers were aware that Immortal Experts didn't want other people joining their match. If they help without any orders, then the Immortal Expert will not let them off.

To be honest, in the beginning, they thought that Zhao Hai was courting death. A Transcending Tribulation Expert actually dared to stay behind and fight with an Immortal Expert. However, things were different from what they expected. Zhao Hai was actually very strong to the point of successfully defending himself against Zhu Gui.

Hearing Zhu Gui's order, the Fireweavers and the Giant Spirit Realm experts responded and immediately took their artifacts out.

Since he already revealed his faith power, Zhao Hai no longer held back and used Faith Power on his surroundings. The space around him returned to normal. Actually, he just wanted to try this and see if it worked, and it really did.

Seeing his plan work, Zhao Hai waved his hand as three large artifacts materialized in the air. Nearly two hundred thousand Undead with improved rifles stood on the ships. After that, the cannons began to fire. The real battle has begun!

Chapter 1512: Huge Harvests

Zhao Hai was already exposing his abilities this time. Although he hadn't moved his more powerful Undead, every Undead with rifles were sent out. In any case, Mu Yu and the others weren't here. Zhao Hai thought that it was time to teach the Fireweavers a lesson they would never forget.

Zhu Gui discovered that his spatial ability could no longer restrain Zhao Hai. Moreover, Zhao Hai has already taken out his three large artifacts. Despite this, Zhu Gui didn't stop firing his rifle and was now aiming at the large artifacts. But in the end, it didn't have any effect. Zhu Gui knew that this was because of Faith Power.

In the past, Zhu Gui heard about the infinite and wondrous uses of Faith Power. However, he didn't believe it at that time. He thought that people were elevating Faith Power because they couldn't acquire it.

However, it seems like these rumors weren't false. Faith Power was indeed formidable. No wonder a lot of people wanted to get their hands on it.

Zhu Gui wasn't very strong among the Immortal Experts, but he wasn't weak as well. It was just that his opponent this time was an anomaly. Zhu Gui being able to force Zhao Hai to use Faith Power was already an extraordinary feat.

Zhao Hai knew that he would have to use Faith Power sooner or later, but he didn't expect to use it this soon. But since he already took it out, then he wouldn't be polite.

Zhao Hai used his three large artifacts as well as more than 200 cannons to bombard the Fireweaver Army. At the same time, the three large artifacts were charging over in full force.

Although Zhao Hai was commanding the three large artifacts to attack the enemies, he excluded the two silverwhip snakes from being targets. He was currently using the Beast Controlling Technique to subdue the two beasts.

But in turn, this also left Zhao Hai with little energy to micromanage the large artifacts and the Undead. Therefore, Zhao Hai handed the control over to Laura and the others while he focused on the two silverwhip snakes.

Zhao Hai was very concerned about the silverwhip snakes. This was because he really wanted them for the Space. This way, the Space would have more powerful beasts and also the beasts of the Space would be strengthened. At the same time, he also wanted to see the effect of the Beast Controlling Technique. He had not used this technique before, so he naturally wants to try it out.

Zhao Hai discovered that the silverwhip snakes had intense reactions to the technique. They weren't willing to submit to him. However, Zhao Hai wasn't worried much about it. He would grind them down until they could no longer resist.

Zhao Hai reckons that the reason why these silverwhip snakes didn't submit sooner was because of their strength. Another important reason why they were hard to subdue was the fact that they had been raised by Zhu Gui ever since they were little. Their loyalty to Zhu Gui had been engraved deep into their souls.

Zhao Hai's action was basically stealing someone's own hand. Naturally, it would be very difficult. If these two silverwhip snakes were in the wild, then they would have submitted. The Buddhist Beast Controlling Technique wasn't a joke.

Although the control over the three large artifacts were handed over to Laura and the others, their fighting strength didn't decrease. Conversely, it had increased. If commanding ability was concerned, Zhao Hai couldn't compare to Lizzy and Megan.

Amidst the crackle of gunfire, the three large artifacts crashed onto the Fireweaver Army's formation. Although Zhu Gui was defending with all his power, he couldn't do anything to the three large artifacts reinforced with Faith Power.

Once the formation was broken through, the Undead on the large artifacts began to attack. Their rifles had been improved, it was much more lethal compared to the standard rifles of the Fireweavers. The Fireweaver Army couldn't do anything against the charge of the three large artifacts.

Zhu Gui's eyes were burning as he looked at the three large artifacts. He didn't expect these artifacts to be so formidable. He actually couldn't block them using his Immortal-level strength.

Zhu Gui clenched his teeth. He decided to give up on dealing with Zhao Hai and would instead attack the Hundred Treasures Realm's headquarters. In his opinion, as long as the Hundred Treasures Realm was dealt with, then Zhao Hai would become a rootless wild ghost. He would no longer be able to go through any storms.

Thinking of this, Zhu Gui received his nether arctic fire and rifle. He reluctantly glanced at the two silverwhip snakes and then at Zhao Hai before he vanished.

Although Zhao Hai focused on subduing the silverwhip snakes, he was still paying attention to Zhu Gui. He didn't expect Zhu Gui to actually give up on the snakes. Seeing Zhu Gui disappear, Zhao Hai immediately knew where he was heading to. Zhao Hai's expression couldn't help but change. Just as he was about to give up on subduing the silverwhip snakes and taking the three large artifacts back, he heard Cai'er's voice, "Young Master, don't worry. Sir Tang Yaoen and the others have returned to the headquarters. And since Zhu Gui has been fighting you, he only has about a fourth or a third of his strength remaining. He wouldn't be Sir Tang Yaoen's opponent."

Hearing Cai'er, Zhao Hai stared, then he smiled and said, "Good. Since Elder Tang Yaoen is back, then I no longer need to worry. Cai'er, help me deal with these people. I need to focus on subduing these long worms."

Long worms were another name for snakes, it was something that Zhao Hai's folks back on Earth used to say. Knowing that Tang Yaoen and the others were back at the headquarters, Zhao Hai felt relieved.

What Zhao Hai didn't expect was that as soon as Zhu Gui disappeared, the resistance of the silverwhip snakes decreased. Zhao Hai was stunned, then he was elated. He immediately intensified his attack. After more than half an hour, Zhao Hai finally felt the waves of obedience coming from the snakes.

Zhao Hai was shaken, then he immediately understood that the Beast Controlling Technique had succeeded. Zhao Hai stopped the technique and the two silverwhip snakes flew towards him. Zhao Hai calmly looked at the snakes, he could no longer sense any hostility coming from them.

The two silverwhip snakes flew to Zhao Hai's side and rubbed their bodies against him. They looked like children seeing their father coming home.

Seeing the actions of the silverwhip snakes, Zhao Hai couldn't help but laugh. He waved his hand and sent the two silverwhip snakes to the Space. Then he began to pay attention to the situation of the battlefield.

The situation wasn't doing very well for the enemies. Although the Fireweavers and the Giant Spirit Realm sent more than 80 thousand people, they didn't have any large artifacts. Now, the strongest of them, Zhu Gui, has left. They could no longer do anything against Zhao Hai.

Additionally, Zhao Hai has 200 thousand Undead with rifles. It's no wonder why the Fireweaver and Giant Spirit Realm army wasn't doing very well.

Zhao Hai calmly looked at these people. There's no room for pity when it comes to enemies. At this point, he already killed 30 thousand people. He turned them all into Undead and sent them to the Space. They would provide him with more Faith Power.

In the past, Zhao Hai was continuously afraid of Immortal Experts. Because of this, he avoided any confrontation with them. However, after fighting Zhu Gui, Zhao Hai knew that he could go against them if he used Faith Power.

But Zhao Hai still decided to minimize his usage of Faith Power in the future. A stronger enemy might be waiting for him. And Zhao Hai didn't want to expose all of his cards.

After Zhu Gui left, Zhao Hai no longer added any Faith Power to his artifacts. But despite this, the Fireweaver and the Giant Spirit Realm army still couldn't defend themselves.

Also, Zhao Hai noticed another thing. The protective shield outside his large artifacts now has a layer of blue flame. This was the nether arctic flame that Zhu Gui uses.

When Zhao Hai used Faith Power to free the surrounding Space, he also found time to receive some of Zhu Gui's bullets. Naturally, this resulted in the Space acquiring the nether arctic flame. In turn, this allowed the three large artifacts to have stronger defenses. At the same time, Zhao Hai's offensive means had become better.

It was at this time that some subordinate realms from the Fireweaver and Giant Spirit Realm army started to rout. It's impossible for these subordinate realms to be fully committed like the Fireweavers and the Giant Spirit Realm. After all, they still have their own realms to worry about. The same was true for the subordinate realms under the Hundred Treasures Realm. If Zhu Gui really managed to kill his way to the headquarters, and Mu Yu and the others were unable to resist, then the subordinate realms would run away. They couldn't bear to suffer heavy losses.

Zhao Hai didn't care about these people. It was impossible for him to keep all of these 80 thousand troops from escaping. Although he has 200 thousand Undead in his control, the enemy army is composed of experts no weaker than the Nascent Soul Stage, with most of them at the Transcending Tribulation Stage. Moreover, each one of them had hidden cards in their hands. If these people wanted to escape using all of their means, then it would be impossible to stop them.

Zhao Hai also knew that, with these people escaping, his Faith Power would be exposed before long. However, Zhao Hai wasn't afraid of it. He can use Faith Power in order to battle an Immortal Expert. If someone wanted to cause him trouble, then they would have to consider their own strength.

The retreating troops caused a chain reaction. In the end, even the Fireweavers and the people from the Giant Spirit Realm began to retreat.

Surprisingly, the Fireweavers were very disorganized in their retreat. They simply ran on their own. On the other hand, the Giant Spirit Realm were retreating in a battle formation. They were slow, but they were still retreating.

Seeing the Giant Spirit Realm, Zhao Hai couldn't help but bitterly smile. He understood why they were like this. The Giant Spirit Realm had faced Zhao Hai multiple times already. They knew that if they retreat without any organization, then they would lose a lot of people. Therefore, they decided to retreat in an organized and steady manner.

Zhao Hai also discovered that the Giant Spirit Realm weren't panicking when facing the three large artifacts. Whenever Zhao Hai's large artifacts come rushing over, they would give way. And after each attack, the Giant Spirit Realm's people regrouped in the shortest amount of time.

At the same time, Zhao Hai saw that the Giant Spirit Realm's formations weren't the same as before. In the past, because they were like the other cultivators who attack in a long-ranged manner, their formation was compact.

However, this formation was detrimental against the Hell King's Ship and the other large artifacts. Therefore, they loosened their formation. They no longer adapted a large square-shaped formation and instead divided themselves into smaller squares. Because of this, they were able to avoid Zhao Hai's large artifacts. At the same time, these smaller squares could join up with the other squares to perform a united attack.

One could see that the Giant Spirit Realm had improved after each battle. They were growing and becoming harder to deal with. If Zhao Hai didn't release his Undead, then the Giant Spirit Realm wouldn't have lost as many people.

From the way the Giant Spirit Realm was retreating, Zhao Hai knew that even if he goes over with the Undead, it would still be impossible for him to kill a lot of them. Therefore, Zhao Hai turned his attention to the Fireweavers. The Fireweavers were unlike the people from the Giant Spirit Realm, they scattered in a chaotic manner. How could Zhao Hai let go of this opportunity? He immediately took his three large artifacts and chased them down.

Seeing Zhao Hai coming after them, the Fireweavers ran faster. Despite this, Zhao Hai was able to kill a large number of them. After two hours of pursuit, Zhao Hai began to slowly head back to the Hundred Treasures Realm's headquarters.

Zhao Hai's harvest this time was very rich. Of the 100 thousand-man army of the Fireweavers and the Giant Spirit Realm, 60 thousand fell to Zhao Hai's hands. Additionally, he was able to acquire the two silverwhip snakes.

Zhao Hai wasn't anxious to return to the headquarters. This was because he was already aware of what happened. Zhu Gui appeared at the Hundred Treasures Realm's headquarters to make a surprise attack. However, he didn't expect Tang Yaoen to be present. With his strength already spent fighting Zhao Hai, Zhu Gui could no longer escape. In the end, he was killed by Tang Yaoen.

Additionally, more and more Immortal Experts were returning to the headquarters. This made the headquarters safe once more. Therefore, there's no need for Zhao Hai to hurry back.

Originally, Zhao Hai was planning to clean up the allied army of the Fireweavers and the Giant Spirit Realm. Then he would return to the headquarters. However, upon seeing Mu Yu extremely worried and was about to lead a group of people to look for him, Zhao Hai decided to return to the headquarters first and listen to instructions.

Chapter 1513: Turtle Immortal

Mu Yu was truly worried about Zhao Hai's state, especially after Zhu Gui suddenly appeared. Mu Yu knew that an Immortal Expert with spatial abilities would come to attack them. Because of this, they were ready. And since Tang Yaoen and the others were beginning to return, Zhu Gui was eliminated. Zhu Gui, an Immortal Expert with spatial abilities, couldn't escape and was killed. To be honest, this was unexpected.

But at the same time, Mu Yu was worried. Mu Yu knew that Zhu Gui was the person going against Zhao Hai. This was because he saw the bullet that Zhu Gui fired at Zhao Hai before.

With Zhu Gui seen at the headquarters and Zhao Hai nowhere to be seen, Mu Yu couldn't help but be worried. He was worried that Zhao Hai had suffered an accident.

He wouldn't have been this worried in the past. After all, Zhao Hai has spatial abilities that allowed him to escape. But this time, Zhu Gui can control space as well. He was essentially Zhao Hai's nemesis.

As soon as he saw Tang Yaoen killing Zhu Gui and the Immortal Experts beginning to return to the headquarters, Mu Yu approached Tang Yaoen and asked for permission to find Zhao Hai. He also told Tang Yaoen about Zhu Gui's entanglement with Zhao Hai.

Tang Yaoen just came back from dealing with Zhu Gui. Strangely, although Zhu Gui was an Immortal Expert, his strength was quite lacking, which allowed Tang Yaoen to kill him. But after hearing Mu Yu's explanation, Tang Yaoen immediately understood Zhu Gui's state. Tang Yaoen immediately agreed to Mu Yu's proposal to organize people to look for Zhao Hai. They need to see him, even if he was a corpse.

Tang Yaoen had the same thought as Mu Yu. Zhao Hai stayed behind in order to restrain Zhu Gui. But now, Zhu Gui appeared inside the headquarters while Zhao Hai was nowhere in sight. This meant that Zhao Hai failed to stop Zhu Gui, and it's possible that he had suffered an accident.

Tang Yaoen was different from Mu Yao. Mu Yao was someone who listened to reason. If it was Mu Yao, then he might now permit Mu Yu to look for Zhao Hai. Instead, he would send Tang Jie and the others instead. After all, the Fireweavers and the Giant Spirit Realm had Immortal Experts outside. If an Immortal Expert ambushed Mu Yu outside, then he would be in danger. It must be known that Mu Yu was a key talent groomed by the Hundred Treasures Realm. They couldn't afford to lose him.

On the other hand, Tang Yaoen was someone who was impulsive. He was someone who acts on emotions first before others. As soon as he heard from Mu Yu that Zhao Hai stayed behind for the sake of the Hundred Treasures Realm, he agreed immediately. If it weren't for the fact that the headquarters needed people to guard it, then he would have gone himself.

With Tang Yaoen's approval, Mu Yu immediately organized a group to look for Zhao Hai. Mu Yu was also aware of how dangerous it was outside, but what he cared about was information about Zhao Hai.

Besides people from the Hundred Treasures Realm, there were also people from the World of Cultivation and the Xu Race that went with Mu Yu. When Kong Miao and Xu Wuzun heard that something might have happened to Zhao Hai, they somewhat panicked. To their respective realms, the loss of Zhao Hai was a huge impact.

They just subordinated themselves to the Hundred Treasures Realm, so their standing was very low. Zhao Hai's status in the Hundred Treasures Realm was a huge benefit to them. They can rely on Zhao Hai as their foundation. If Zhao Hai suffered an accident, then their biggest pillar would be gone. This was hugely disadvantageous to the two realms.

Therefore, upon hearing that Mu Yu was going to look for Zhao Hai, Kong Miao and Xu Wuzun immediately arranged for their own people to join in. In the end, the group looking for Zhao Hai reached ten-thousand.

Mu Yu was aware of the dangers outside. Not only would they meet the Fireweavers and the Giant Spirit Realm army, they might also come across Immortal Experts from the enemy's side. The more people there were, the safer they would be.

Tang Jie and Tang Wen had a good relationship with Zhao Hai, naturally they would also follow the search party. Mu Yu didn't oppose their decision. The party went out of the headquarters and went straight to the place where they fought the Fireweaver and Giant Spirit Realm army.

When they reached about a thousand li(500km) away from the headquarters, Mu Yu and the others stopped. This was because they were being blocked. A Fireweaver sitting cross-legged on the back of a turtle was blocking the way.

The Fireweaver looked quite old. His hair and beard were all white. But as he sat on the back of his turtle, he looked as steady as a rock. Although his eyes were closed, nobody dared underestimate him.

When Mu Yu saw this old person, his complexion changed. Then he said, "So it's Senior Turtle Immortal. This Junior Mu Yu greets you."

The old man was titled the Turtle Immortal, his name was Zhu Yulong. He's a well-known Immortal Expert among the Fireweaver Race. He was coordinating with Zhu Gui to attack the Hundred Treasures Realm's headquarters. Then unexpectedly, Zhu Gui was tied down by Zhao Hai, making them unable to attack the Hundred Treasures Realm's headquarters in time. In the end, although Zhu Gui was able to reach his target, Tang Yaoen returned and killed him. This annoyed Zhu Yulong. He didn't want to retreat just like that. Therefore, he looked for an opportunity to turn things around. Seeing Mu Yu come out, he immediately blocked his way.

When he heard Mu Yu, Zhu Yulong opened his eyes slowly. His eyes didn't show the cloudiness of an old person. Instead, his eyes were very clear and filled with wisdom.

Zhu Yulong looked at Mu Yu, then he laughed and said, "Good, you really deserve being called the top talent of the Hundred Treasures Realm. If our two realms weren't enemies, then I would have given you some guidance. Unfortunately, we are enemies. This old man can only kill you with my own hands.

Hearing Zhu Yulong, Mu Yu couldn't help but be proud as he said, "Then I'll have to ask the Elder for advice. It's not easy to take the life of this junior."

After he said that, Mu Yu waved his hand as a fake spirit snake needle appeared in his hand. Tang Jie and the others followed through and divided themselves into groups of ten. Then they centralized their energy into the fake spirit snake needle.

Mu Yu took out ten Formation Breaking spirit snake needles from his spatial bag and handed it over to the others. Mu Yu knew that Zhu Yulong could only resist a couple of fake spirit snake needles.

Seeing Mu Yu's movement, Zhu Yulong didn't do anything. In his opinion, this was the final struggle of Mu Yu's group. He liked seeing his enemies struggle. It was the same as a cat tormenting an old mouse before killing it.

Mu Yu felt cold in his heart. However, he wasn't anxious. They were still quite close to the headquarters. If they hear any sounds coming from here, then Tang Yaoen and the other Immortal Experts would immediately come over and help. It's fine as long as they hold on for some time.

Zhu Yulong slowly stood up. His movement was very slow, it's probably his disposition preventing him from wasting his strength. Although his movements were slow, they didn't appear weak. Instead, he gave off the feeling that he was saving his strength, preparing to attack at any time.

Mu Yu's expression turned a shade darker. He knew clearly how dangerous the enemy was. The moment the other party unleashes an attack, it would certainly be a killing move.

At this time, someone's voice was heard, "How lively. How could I miss this for myself?" After speaking, a figure appeared beside Mu Yu. Mu Yu was stunned for a moment, then his expression lightened up. It was Zhao Hai that appeared beside him.

Mu Yu looked at Zhao Hai, then he laughed and said, “Good, good. You finally came back. I knew you would be fine. Hahaha. This is good. Fantastic.”

Zhao Hai smiled faintly and said, “I made Brother Mu Yu worried. And this is?” He turned his head to look at Zhu Yulong.

Mu Yu smiled faintly and said, “This is Turtle Immortal Zhu Yulong. He’s a famed Immortal Expert among the Fireweavers. I never expected him to be here.”

Zhao Hai looked at Zhu Yulong, then he smiled faintly and said, “It looks like Senior is waiting for me. I just don’t know why Senior is still here? Why didn’t you return to your camp?”

Zhao Hai guessed correctly. Zhu Yulong was roaming around the vicinity to deal with Zhao Hai. He knew that Zhu Gui was blocked by Zhao Hai, putting a wrench into their plan of attacking the Hundred Treasures Realm’s headquarters. This caused Zhu Yulong to dread Zhao Hai. A Transcending Tribulation Expert was able to block an Immortal Expert. Such a person was too dangerous. If he continues to grow up, then the Fireweavers would have gained a powerful enemy. Therefore, Zhu Yulong was traveling around in order to hunt Zhao Hai. Naturally, he also knew that this might not be successful. This was because Zhao Hai had spatial abilities, he can just return to their headquarters directly. However, Zhu Yulong didn’t give up. His long life made him understand that there’s still a chance as long as you don’t give up.

Naturally, Zhu Yulong wouldn’t tell Zhao Hai this. Therefore, as soon as he heard Zhao Hai, he couldn’t help but raise his eyebrow as he smiled faintly and said, “So you’re the person who placed the Fireweavers in a bad position. You’re truly extraordinary. Correct, this old man has been waiting for you.” Then after he said that, Zhu Yulong didn’t waste any breath as he took the rifle on his back and then shot at Zhao Hai. He repeated his action and also sent a shot towards Mu Yu.

Zhu Yulong’s rifle was completely different to Zhu Gui’s rifle. Zhu Gui’s rifle was massive, looking like a rocket launcher. On the other hand, Zhu Yulong’s rifle was two meters long and very thin. Its bullets were also quite long, looking like enlarged needles.

However, Zhao Hai didn’t dare underestimate these bullets. He waved his hand as his three large artifacts, 12 metal beasts, and Eight Cyan Imperial Chariots appeared in front of him to block the bullets.

At this time, another person's voice was heard, "Old Turtle, are you thinking that we're already dead?" Then a figure appeared in front of Zhao Hai and the others. Then with a wave of his hand, he sent throwing knives towards the incoming bullets.

Dang, dang, dang. Sounds were heard when the throwing knives met with the bullets. The bullets were intercepted, but the throwing knives were driven back.

Chapter 1514: Immortal Showdown

It was Tang Yaoen who arrived. Tang Yaoen was also worried about Zhao Hai. Additionally, he was also aware of the dangers outside. So after Mu Yu headed out, he paid attention to their movements.

But since there were only a few Immortal Experts in the headquarters, the matters he needed to take care of were a lot. He couldn't pay attention to Mu Yu and the others frequently. He was only able to notice Mu Yu's situation when Zhao Hai appeared and Zhu Yulong made his move.

Seeing Zhu Yulong making a move, Tang Yaoen immediately made a move and shot down the bullets using his throwing knives. One shouldn't feel bad about the destroyed throwing knives. This was because Tang Yaoen still had a lot of them in his hands.

Seeing Tang Yaoen appear, Zhu Yulong's expression changed. Tang Yaoen was famous for being hard to deal with. If he were to be tied down by Tang Yaoen, then things would become troublesome.

Tang Yaoen's presence meant that Zhu Gui had failed in his task. And in turn, the plan to attack the headquarters failed. Zhu Yulong wasn't aware that Zhu Gui was killed. After all, once Zhu Gui entered the Hundred Treasures Realm's headquarters, Zhu Yulong no longer had any contact with him. Although he was aware that the plan might have failed, he didn't know what happened to Zhu Gui. Now that Tang Yaoen appeared here, Zhu Yulong knew that Zhu Gui had suffered an unfortunate fate.

Tang Yaoen looked at Zhu Yulong, then he sneered and said, "You Old Turtle, you think you can just do whatever you want here? Don't count on Zhu Gui, he has already been killed by me. The Fireweavers have really regressed more and more. You actually sent a weakling to attack our headquarters. Do the Fireweavers really hate their people so much that they sent them over to be killed by me?"

Zhu Yulong's expression turned gloomy as he said, "Tang Yaoen, you're too proud. Your Hundred Treasures Realm can only defend your headquarters. Let's see how long you can defend. Sooner or later, you will be wiped out by us."

Tang Yaoen sneered and said, "Wipe out the Hundred Treasures Realm? I'm afraid the Fireweavers aren't good enough to do that. Also, make sure you protect yourselves well, or else you will not have any place to cry."

Zhu Yulong sneered, "Enough talking. I really want to see how strong you really are. Take this." After he said that, Zhu Yulong fired at Tang Yaoen. Zhu Yulong used rapid fire this time as he sent bullets towards Tang Yaoen.

Tang Yaoen coldly snorted. Then he waved his hand as he filled the skies with throwing knives. Some knives were sent to block the bullets while the rest targeted Zhu Yulong.

Tang Yaoen's throwing knives were unusual. It was smaller compared to conventional throwing knives. They were in the shape of willow tree leaves, narrow and thin. They didn't look like artifacts used to kill people.[1]

Zhao Hai knew that the two Immortal Experts were still probing each other. He turned his head and whispered to Mu Yu, "Brother Mu, we should have everyone enter the Hell King's Ship immediately. We don't want to be a drag for Senior Tang."

Mu Yu, who was looking at the Immortal Experts, immediately recovered and had his order transmitted. Everyone moved and got into the Hell King's Ship under Tang Jie's guidance. After that, Zhao Hai received his other artifacts and then slowly retreated from the battlefield.

Although he was entangled with Tang Yaoen, Zhu Yulong was still able to notice Zhao Hai's actions. Naturally, he saw Zhao Hai whisper something to Mu Yu. He discovered that the order originated from Zhao Hai. This caused him to dread Zhao Hai even more.

When Zhu Yulong was fighting against Tang Yaoen, Zhao Hai maintained his calm as he arranged everyone to embark on the Hell King's Ship. Then he led everyone to retreat from the area. All of this was because of Zhao Hai's calm mind. He was able to make accurate judgements of the situation. This was a dangerous opponent. It must be known that very few people can keep their calm when two

Immortals fight. If they can comprehend something while witnessing the battle, then their path to Immortality would be much easier.

It was for this reason that Mu Yu was focused on witnessing the fight between the two Immortal Experts. He was hoping to comprehend something during their battle.

Despite the benefits, Zhao Hai was able to be calm and make the correct decision. Such a person was dangerous to the Fireweaver Race. The more he thought of this, the firmer Zhu Yulong's decision to kill Zhao Hai was.

However, even if he wanted to kill Zhao Hai, Tang Yaoen wasn't an easy opponent to deal with. Just as Zhao Hai thought, the two were just probing the strength of the other. Once they ascertain the capabilities of the other side, only then would they properly attack.

Although the two were probing each other, neither of them underestimated the other party. Even a minor mistake was detrimental to fights between Immortal Experts.

The two exchanged a dozen moves, but none of them gained any advantages. However, Zhu Yulong was a bit behind. After all, this place was near the Hundred Treasures Realm's headquarters. If Tang Yaoen wants, he can call over the other Immortal Experts to work together against Zhu Yulong. Since Zhu Yulong didn't want to die, he can only think of retreating.

However, Zhu Yulong knew that even if he wanted to leave, he couldn't show it. He knew that if he showed any inkling of wanting to retreat, then Tang Yaoen would capitalize on it and become more aggressive. Because of this, Zhu Yulong would have to be on the offensive.

After firing a couple more shots, Zhu Yulong waved his hand and then infused his rifle with a black flame. Then he took out a different bullet. This bullet was longer and more pointed than the previous ones. Zhu Yulong arranged these bullets into a chain beside his rifle.

Tang Yaoen, who fought against the Fireweavers, knew what Zhu Yulong was about to do. Tang Yaoen snorted as his body changed its stance. Almost immediately, the aura surrounding Tang Yaoen changed. If before this he looked like a normal Immortal Expert, the current him was like an unsheathed blade!

When Tang Yaoen's aura changed, a phantom of a willow leaf appeared around his body. This phantom was a large version of his throwing knives. It was ten meters high. Tang Yaoen stood on top of this phantom.

Zhu Yulong didn't seem to notice this. With a jerk of his rifle, bullets shot out from its tip. This time, the bullets curved in all directions. But all of the bullets were headed towards Tang Yaoen.

Tang Yaoen flipped his hand, taking out a willow leaf throwing knife. This time, he didn't take a lot, only one. After that, he opened his mouth and said, "Go!" Then he threw his knife over.

The willow leaf throwing knife began to light up. At the same time, a phantom throwing knife appeared around it, similar to the phantom Tang Yaoen was standing on. This throwing knife headed straight towards Zhu Yulong with an indomitable momentum.

Meanwhile, Zhao Hai was paying great attention to Zhu Yulong's new bullets. He felt how different these bullets were. This caused him to ponder.

Before long, Zhao Hai discovered that after the bullets left the rifle, flames would erupt behind them. As soon as the flames came out, the bullets accelerated and also burned more violently.

Boom! Throwing knife and bullet hit each other, causing a huge shockwave to ravage the surrounding area. Everything the shockwave passed through were eradicated. Moreover, two meters of soil from the ground were dug out from the area. It was clear how powerful the collision was.

When the shockwave reached Tang Yaoen, the phantom he was standing on rose up, protecting Tang Yaoen inside.

The same happened to Zhu Yulong. When the shockwave reached him, his turtle beast opened its mouth and exhaled, eradicating the approaching wave.

Zhu Yulong intensely glared at Tang Yaoen. At the same time, Tang Yaoen was also looking at Zhu Yulong coldly. As soon as he experienced Tang Yaoen's throwing knife, Zhu Yulong's intention to retreat solidified. He understood that if he didn't leave, then he would be in deep trouble. He felt several

spiritual forces coming from the Hundred Treasures Realm's headquarters. He needed to leave as soon as possible, before these Immortal Experts came over.

Zhu Yulong raised his rifle and tapped the trigger one time. At the same time, he coldly snorted as his giant turtle bellowed, throwing gas bombs towards Tang Yaoen. Tang Yaoen coldly snorted, then he overlapped his hands in front of his chest. Four of his fingers gathered as he released two throwing knives.

Boom! Boom! Two loud bangs were heard as another collision occurred. This time, the impact of the collision brought more dust and more powerful shockwaves. However, Tang Yaoen didn't pay attention to this. He looked at Zhu Yulong's location with a blank face. He could no longer see Zhu Yulong. His spiritual force was also telling him that Zhu Yulong had disappeared. In other words, Zhu Yulong ran away!

The collision between the throwing knife and the bullet and gas bomb caused fluctuations that interfered with Tang Yaoen's spiritual force. At that moment, Tang Yaoen couldn't feel Zhu Yulong. When the fluctuations calmed down, Tang Yaoen could no longer feel Zhu Yulong. Zhu Yulong had already escaped.

An Immortal Expert's speed couldn't be underestimated. If they wanted to escape with all their might, even Zhao Hai's Hell King's Ship wouldn't be able to catch up with them.

Tang Yaoen didn't expect a famed expert like Zhu Yulong to run away. When he discovered that Zhu Yulong had escaped, it was already too late to give chase.

Chapter 1515: Bullet Sliding

Tang Yaoen sat inside the hall with a bitter expression. Meanwhile Mu Yao was sitting next to him with a smile. Both were looking at Zhao Hai not far away.

Mu Yao was very satisfied with Zhao Hai. He didn't expect Zhao Hai to block Zhu Gui and also wash out the entire Fireweaver alliance army.

However, even if the situation was perfectly dealt with, Mu Yao still couldn't help but feel terrified. If it weren't for Zhao Hai's instincts to send Mu Yao and the others back first, and if he failed to block Zhu Gui, then what would have happened? If Zhu Gui succeeded in wreaking havoc inside the headquarters then the Hundred Treasures Realm would be finished.

"We've been careless!", Mu Yao couldn't help but think deep inside. "If it weren't for Zhao Hai, things would have been dangerous."

Mu Yao looked at Zhao Hai and then said, "Little Hai, good job. This is another major contribution. Tell me, what reward do you want this time? But please don't ask me for resources, I don't have much on me."

Everyone inside the room couldn't help but laugh. Zhao Hai smiled and said, "This time, this Junior doesn't want materials. I just want somebody."

Mu Yao stared, he raised his eyebrow and asked, "Someone? Did some miss from somewhere attract you? With your status, which woman would neglect you? You can flatter them yourself."

This caused another round of laughs inside the room. Zhao Hai laughed as well, then he said, "It's not a woman I want. I want the person Elder Tang Yaoen killed. I want Zhu Gui's corpse."

When he heard Zhao Hai, Mu Yao couldn't help but hesitate for a moment before asking, "You want to turn him into your Undead?"

Zhao Hai nodded and said, "Right, I want to turn him into an Undead and ask him how he managed to make his bullets curve."

Mu Yao nodded and said, "I initially didn't plan to give you Zhu Gui's body. In any case, he's an Immortal Expert. His dignity has to be preserved. But since you specifically asked for it, then I'll leave him to you. If you get the method to curve bullets, make sure to give us a copy."

Zhao Hai nodded. Mu Yao turned his head to Tang Yaoen who was still fuming. Tang Yaoen snorted and said, "If he dared show his face next time, I'll make sure to kill him right away. What? Little Hai wants Zhu Gui's body? Give it to him."

Tang Yaoen harrumphed and said, "He's buried in the back mountain, you dig him up yourself."

Zhao Hai smiled and didn't mind Tang Yaoen's anger. He nodded and said, "Elder Mu, if there's nothing else, I'll be in Yan Planet. If something happens, just send me a message."

Mu Yu nodded and said, "Then we won't be disturbing you. We still have to wait for the enemy's response. If they don't send a lot of troops, then we can deal with it on our own. But if they do send a lot, we'll call you over."

Zhao Hai nodded, then he gave Mu Yao and the others a salute before turning around and leaving. Mu Yu followed behind Zhao Hai. After leaving the hall, Mu Yu turned to Zhao Hai and said, "Little Hai, you can make your own personal artifacts while in Yan Planet. In any case, the materials there can no longer be used by the world. By the way, how did you escape from Zhu Gui this time?"

Zhao Hai forced a smile and said, "Why would I escape. That fellow got terrified upon seeing my Faith Power. I reckon it wouldn't be long before everyone in the Ten-thousand Realm Battlefield would know that I have Faith Power. Trouble might come for me."

Hearing Zhao Hai, Mu Yu also sighed and said, "Rest assured, I'll talk to Master about this. You are a hero of the Hundred Treasures Realm. Master can cover for you. Don't worry much about it. Having Faith Power here in the Ten-thousand Realm Battlefield isn't that strange."

Zhao Hai nodded and said, "Alright, then I'm leaving. If you have something to say, just send me a message. As soon as I return to Yan Planet, I'll continue recycling materials and making rifles. Then I'll equip my Undead with them."

When Mu Yu heard Zhao Hai, his eyes lit up as he said, "That's a good idea. You have so many Undead. If they are equipped with rifles, then your combat power would increase."

Zhao Hai smiled before waving goodbye to Mu Yu. Then he went to the back mountain and soon found Zhu Gui's grave. Fortunately, it hasn't been long since Zhu Gui. Otherwise, he wouldn't be able to turn him into a useful Undead. What surprised Zhao Hai was the fact that Zhu Gui was buried along with his rifle.

There's no need to mention that Zhu Gui's rifle was a treasure. It was much better than the rifles used by Zhao Hai right now. However, Tang Yaoen and the others actually didn't keep it and instead buried it alongside Zhu Gui. It seems like Immortal Experts really do respect the dignity of their peers.

However, Zhao Hai wasn't as polite as them. He immediately turned Zhu Gui into an Undead and sent him to the Space. The rifle was also taken away. Fortunately, Tang Yaoen also didn't take the bullets. These things would be very useful for Zhao Hai.

After dealing with Zhu Gui, Zhao Hai went to the transmission formation to be sent to Yan Planet. The person operating the Transmission Formation was a Severed Soul Expert, but he was still very polite to Zhao Hai. The two had small talk before Zhao Hai was teleported to Yan Planet.

White light flashed before Zhao Hai appeared on Yan Planet. Along with Zhao Hai, Laura and the others also went out of the Space. Zhao Hai smiled and said, "How is it? Didn't you want to go out? Let's explore Yan Planet together."

When they heard Zhao Hai, Laura and the others were stunned. They looked at him in surprise. Then Laura looked at Zhao Hai and said, "Brother Hai, can this work? What if we get found out?"

Zhao Hai smiled and said, "It's fine. I can just say that I met you all back in the World of Cultivation and then came to pick you up."

Laura looked at Zhao Hai and said, "But we still need to interrogate Zhu Gui and also research his weapon."

Zhao Hai knew that Laura was nervous, so she said this. It has been too long since they went out of the Space. This caused Zhao Hai to be sad. He couldn't help but blame himself for not taking them out earlier.

Zhao Hai took a deep breath and said, "It's fine, we can do all these things outside. We can also have Cai'er take care of everything else. Let's go see the junk mountains."

Hearing Zhao Hai, Laura and the other smiled. Then they nodded and followed Zhao Hai to explore Yan Planet.

To be honest, Yan Planet didn't have the best environment. Otherwise, it wouldn't have become a dumping ground. However, this doesn't have any effect on Zhao Hai. Although Laura and the others didn't focus too much on their cultivation, they still ate rich foods from the Space. They had already reached the Nascent Soul Stage. Climates like the one in Yan Planet no longer affect them.

Together with Laura and the others was Mo Sheng. This young man had been following Zhao Hai practically all the time. But in the previous battle, Zhao Hai returned him to the Space because of how dangerous it was.

Although the environment wasn't very good, Laura and the others were still very happy to stroll outside. It was only Cai'er who was left to manage things inside the Space. But this wasn't a problem for her.

Zhao Hai didn't accompany the women and just let them play on their own. He was currently recycling the trash materials for the Space.

Cai'er interrogated Zhu Gui about the method to curve bullets. As it turns out, in addition to his technique, the modifications to his rifle also contributed to curving the bullets.

In order to increase the firing distance and accuracy of Zhao Hai's rifles, its barrel needed to have rifling inside. The rifling would allow the bullet to spin. Not only would this increase the travel distance of the bullet, it would also increase its accuracy. Additionally, bullets fired through this barrel would be more lethal.

On the other hand, the rifling on Zhu Gui's rifle was somewhat special. Ordinary rifles would have rifling from the beginning of the barrel to the end. Meanwhile, Zhu Gui's rifle only had rifling on the back half of the barrel. There's no rifling on the front half.

Since only the first half had rifling on it, when the bullet is shot out, the user could move the rifle accordingly in order to curve it. Naturally, to successfully curve a bullet, countless hours of practice would be needed. Otherwise, it wouldn't be very useful to curve a bullet if it doesn't hit the target.

Besides the different rifling on the barrel, the bullet used was also different. The powder inside the bullet was made to combust slower but still pack a lot of strength. But at the same time, in order to ignite this powder, more energy needed to be used. In this case, the trigger of the rifle was also modified. Not only was it made of better materials, its force transmission is also special. Normally, the force used to pull the trigger doesn't affect how hard the bullet would be hit. After all, it was the hammer connected to a spring that would hit the bullet, not the trigger.

However, on the modified rifle, the force of the trigger reflects on the force applied on the bullet. The greater the pressure applied to the trigger, the greater the force on the bullet. A normal Severed Soul Expert wouldn't have the strength to ignite the primer on Zhu Gui's bullet. So even if this idea gets revealed, Severed Soul Experts wouldn't be able to make use of it.

The method of curving bullets was named Bullet Sliding by the Fireweavers. This method included the barrel design, trigger design, the powder compound, rifle techniques, levels of strength, and many others. All of them were collectively referred to as Bullet Sliding.

Zhao Hai was astounded by the sophistication the Fireweavers did to their rifles. At the same time, Zhao Hai didn't bother transferring this information into a jade slip. He believed that even if Mu Yao and the others got a hold of this method, they wouldn't let the people of the Hundred Treasures Realm practice it. This was because it would take too much time to master.

At this time, the Hundred Treasures Realm were still novices when it came to rifles. They never fully understood the rifles, so it would be impossible for them to study Bullet Sliding. As for the compound used for the bullets, they can still use it, but only as artillery shells.

For Zhao Hai, the formula of the powder was very useful. With this new formula, the ability of his cannons would increase.

As for Bullet Sliding, Zhao Hai didn't intend to learn it. He wasn't planning on using the rifles in the long term. As for giving this method to the Undead, he thought of it. But without the special powder, the efficacy of the technique would plummet. Moreover, this technique was only meant to be used once; to catch the enemy off-guard, making it very hard for them to defend.

This type of technique wasn't useful for the Undead. The Undead relied on their numbers in order to win. They would go out in several hundred thousand and overwhelm the enemy. With this much bullets flying in the air, there really wasn't any use for curved bullets.

It can be said that Bullet Sliding wasn't very useful for Zhao Hai. It wasn't as good as acquiring Zhu Gui outright. Zhu Gui was an Immortal Expert, so he would be a huge asset for the battlefield. With Zhu Gui in hand, Zhao Hai has gained yet another ace in his sleeve. Moreover, Zhao Hai discovered that Zhu Gui was giving him a much denser Faith Power compared to Severed Soul-level Undead.

As for Zhu Gui's experiences in attaining Immortality, Zhao Hai didn't bother to ask. In any case, he has Faith Power, so his path ahead was extremely free. The biggest gain to Zhao Hai was Zhu Gui himself. The things Zhu Gui knew were practically of no use to Zhao Hai.

Zhao Hai felt very content. After receiving Zhu Gui, he had his Undead refine their rifle technique by themselves. In addition to cultivating, Zhao Hai also continued to recycle the trash materials and ended up receiving new metal plants. Although these metal plants were of a different kind, the Space wasn't able to analyze them just yet. Zhao Hai didn't mull over it for long as he just planted metal plants and moved on.

As the waste materials decreased, Zhao Hai discovered less and less new ore. However, Zhao Hai didn't stop and kept working to recycle the materials. Naturally, the materials he received in the Space was a lot. This would be reserved for future use. Although it was possible to use the ores inside the Space, Zhao Hai still stockpiles some resources. This was because he felt that using the resources grown by the Space was akin to destroying it. And that was the last thing he wanted to do.

Laura and the others explored the planet before returning to Zhao Hai's side. They chatted amongst themselves clearly enjoying the experience.

Zhao Hai didn't say anything as he just gave the women a smile. Zhao Hai liked seeing them like this. In his mind, they didn't deserve being cooped up inside the Space all the time.

Chapter 1516: Decisive!

Shua!

The last waste material was being taken from the ground. At this point, Yan Planet had become a huge material warehouse. All kinds of resources covered the entire planet.

Zhao Hai let out a long breath. Looking at the materials stacked on Yan Planet, he couldn't help but feel a sense of accomplishment. It has been three days since he came here from the headquarters. Laura and the others had long since become tired of the planet and had gone back to the Space. They came out this time to experience the novelty of the planet. However, how could Yan Planet's environment compare to the Space? To them, Yan Planet was a garbage dump while the Space was a well-sterilized room.

Although Yan Planet was now stacked with materials, Zhao Hai was still able to get a lot of materials for his stockpile inside the Space. Naturally, he didn't care about ordinary materials. What he stockpiled were the more special materials.

Moreover, Cai'er hasn't been idle. A hundred thousand rifles had been made along with the shells with modified powders. Zhao Hai's fighting strength had once again increased.

Zhao Hai was also paying attention to what was happening to the headquarters. Not long after Zhao Hai entered the Ten-thousand Realm Battlefield, rumors began to spread that he has Faith Power. Surprisingly, Mu Yao and the others were very calm when they heard it. Zhao Hai also saw how relaxed their expressions were. This caused Zhao Hai to wonder why they had this reaction.

Actually, the situation wasn't as complicated as what Zhao Hai thought. On the contrary, after hearing about Zhao Hai's Faith Power, Mu Yao and Tang Yaoen just nodded. They just accepted the fact and that was the end of it.

Zhao Hai was surprised as to why Mu Yao didn't ask him about the source of his Faith Power. If Mu Yao knew that Zhao Hai also used his Buddhist Techniques, then he wouldn't have been as collected as now.

In any case, no matter what Zhao Hai thought, the matter has already occurred. Another thing that surprised Zhao Hai was the situation of the headquarters.

Just after Zhao Hai entered the transmission formation to Yan Planet, representatives of more than ten realms arrived at the headquarters. There's only one thing they want; to drive the Fireweavers out and divide the Giant Spirit Realm's land after destroying them.

Naturally, the Hundred Treasures Realm agreed to their proposal. And of course, the Hundred Treasures Realm would take the lion's share of the prize.

None of the realms had any problems with this arrangement. They knew how they acted and they also knew that the Hundred Treasures Realm was aware of it. Now, the Hundred Treasures Realm had gained a lot of benefits. And it had become impossible for the Hundred Treasures Realm to fall. They had already defeated the Fireweavers in a battle. In order to make up to the Hundred Treasures Realm, they didn't argue with the Hundred Treasures Realm about this matter.

However, there were a few realms who wanted the Hundred Treasures Realm to disclose the secret to making the Fireweaver Rifles, of which the Hundred Treasures Realm rejected on the spot. In the end, these realms gave up and sent troops to deal with the Fireweavers together.

Seeing this development, Zhao Hai felt relieved. The Hundred Treasures Realm was now in a safe position. Now that the other realms had begun to dispatch troops, the Fireweavers and the Giant Spirit Realm wouldn't have any good days ahead.

But a thing that annoyed Zhao Hai was that they didn't immediately attack the Fireweavers and the Giant Spirit Realm. They instead decided to discuss the division of spoils first. This took a lot of precious time. By the time Zhao Hai finished cleaning Yan Planet up, they still hadn't sent their troops and had just finalized the split. Seeing this, Zhao Hai didn't know what to say.

Seeing that he has nothing left to do in Yan Planet, Zhao Hai entered the Space to rest. As he rested, the realms finally sent their troops. And unsurprisingly, under this large alliance, the Fireweavers and the Giant Spirit Realm weren't able to resist. In the end, the Giant Spirit Realm had to grit its teeth and retreat from the Ten-thousand Realm Battlefield, destroying their transmission formation. It seems like it would be impossible for them to return to the Ten-thousand Realm Battlefield in a short time.

Seeing the Giant Spirit Realm retreating, the Fireweavers drew back. They returned to their territory's border and waited there. They were sending a message to the alliance army that if they were to attack, then they would fight desperately. Seeing this, the alliance army retreated. What's left to do was to split up the Giant Spirit Realm's territory.

Zhao Hai didn't expect such developments to occur while he rested. The Giant Spirit Realm just ran away while the Fireweavers retreated. Things happened way too fast. Zhao Hai even felt that what happened wasn't real.

However, Zhao Hai knew that this was real. The Hundred Treasures Realm began to distribute territories to its subordinate realms. The World of Cultivation and the Xu Race were also able to receive their own territories.

With how things were moving so fast, Zhao Hai no longer stayed inside Yan Planet as he arrived at the transmission formation and returned to the Hundred Treasures Realm's headquarters.

Compared to the time he left, the headquarters was now much quieter. This was because the subordinate realms had left. The Ten-thousand Realm Battlefield has returned to its previous calm environment.

Zhao Hai knew that more than ten high-grade realms participated in the counter-attack. With this alliance army, the Fireweavers and the Giant Spirit Realm had no chance of winning. The Giant Spirit Realm decisively left while leaving a few experts behind. This was in preparation for their eventual return to the battlefield in the future.

At the same time, the Fireweavers knew that they couldn't fight for a long time. If they did, then the other four Great realms wouldn't let them off. Don't expect the other Great Realms to be gentlemen. If they see any weaknesses appearing in the Fireweaver Race, then they would definitely pounce like hungry wolves.

Because of this, the Fireweavers retreated. Originally, under the assistance of the Giant Spirit Realm, they wanted to deal with the Hundred Treasures Realm in a swift manner. Then the domain of the Hundred Treasures Realm would be theirs. When the time comes, they can send an army to guard the territory, making it impossible for the other realms to get it from them.

However, the Fireweavers didn't expect the Hundred Treasures Realm to be able to fight back under their joint army with the Giant Spirit Realm. They suffered a huge loss against the Hundred Treasures Realm.

The reason the Fireweavers failed in dealing with the Hundred Treasures Realm was the sudden appearance of rifles among the Hundred Treasures Realm's troops. This rifle was very similar to the Fireweaver Rifles. With the rifles in hand, the Hundred Treasures Realm was now on the same playing field as the Fireweavers. In this case, it would be impossible to finish the Hundred Treasures Realm in a short time. And with the other high-grade realms making a move, the Fireweavers knew that their plan had failed. Therefore, they made a decisive withdrawal of troops.

It can be said that the battle ended the moment the high-grade realms began to move. The Giant Spirit Realm decisively ran away while the Fireweavers decisively withdrew. The battle ended in a decisive manner.

Seeing Zhao Hai appearing on the headquarter's transmission formation, someone immediately greeted him. The person was currently smiling, unable to hide his glee.

Zhao Hai smiled back at the person. Then the person said, "Mister Zhao Hai, the higher-ups ordered me to tell you to go to the conference hall as soon as you come back."

Zhao Hai nodded and expressed his gratitude before flying towards the conference hall. It didn't take long before Zhao Hai arrived. He didn't see Mu Yu nor Tang Jie inside this time. Mu Yu and Tang Jie were very busy. Now that the Giant Spirit Realm has left the battlefield, the Hundred Treasures Realm gained a large swathe of territory. This territory needed to be divided and the subordinate realms also needed to be rewarded. Not only that, infrastructure needed to be repaired and built. There were a lot of things to take care of. Because of this, Mu Yu and the other talents were sent over.

Two Severed Soul Experts were guarding the outside of the conference hall. Seeing Zhao Hai, the two immediately gave Zhao Hai a salute. They didn't block Zhao Hai's path and instead invited him to enter.

Zhao Hai smiled at the two guards and returned the salute. After that, he entered the conference hall. Just like outside, the hall was much more empty than before. Five Elders were inside chatting. It was evident that they were in a very good mood.

These Five Elders would only step in when something major happened. The little things can be left for the Severed Soul Experts to deal with. The Hundred Treasures Realm has a very solid management system, so the Five Elders weren't always very busy.

Although there were still plenty to be done, these things can be taken care of by Mu Yu and the others. There simply wasn't any need for the five Elders to help. Therefore, they looked very leisurely and free.

When Zhao Hai entered the room, the people inside turned their head over. Mu Yu waved Zhao Hai over as he laughed and said, "Little Hai, you're back. It's a pity that you came back too late. The Giant Spirit Realm has already left the Ten-thousand Realm Battlefield while the Fireweavers returned to their territory."

Zhao Hai pretended to be shocked as he said, "That fast? They retreated just like that? This doesn't sound like something they would do."

Mu Yao grinned and said, "They had to return. If they didn't, then they would never be able to leave. How is Yan Planet? Did you recycle enough materials? The more you process, the more resources you'll get. Don't worry about us snatching your work, you can take as much as you want."

Zhao Hai smiled and then he cupped his fist and said, "Reporting to Elder Mu Yao. All the waste materials in Yan Planet have been recycled. Please send people to inspect and take them as soon as possible. Otherwise, I won't be responsible if they get lost."

Upon hearing Zhao Hai, Mu Yao couldn't help but stare. Tang Yaoen looked at Zhao Hai and said, "You're done? Kid, are you telling the truth?"

Zhao Hai smiled and said, "Elders, if you don't believe me, you can come with me and see." Without hesitating, Mu Yao moved towards the transmission formation. Tang Yaoen and the other Elders followed closely behind.

Chapter 1517: Bestowing a Planet

Mu Yao and the others stood on Yan Planet's transmission formation and looked at the piles of materials around them. They even forgot to speak for a while.

Mu Yao and the others were people born in the Hundred Treasures Realm. They had seen a lot of things in their lifetimes, but this was the first time they saw something like this. A mountain of materials wasn't

a symbolic term for what they were seeing, it was an actual fact. Before their eyes, resources were literally piled up on mountains.

After some time, Mu Yao let out a long breath. He didn't say anything as he flew up and began to fly around Yan Planet. Tang Yao and the others did the same.

Meanwhile, Zhao Hai didn't move as he just stood there with a smile on his face. He knew that if he didn't let Mu Yao and the others take a look around, then their hearts would be settled.

Before long, Mu Yu and the others returned to the transmission formation. Everyone had a look of disbelief on their faces. Mu Yu let out a long breath before he laughed and said, "Alright, good. Little Hai, you can take whatever material you want."

Zhao Hai smiled faintly and said, "Thank you Elder. But in fact, I have already taken what I need. These are just what remained."

Tang Yaoen looked around him as he let out a sigh. He smiled bitterly and said, "I didn't expect the Hundred Treasures Realm to waste this much resources. The quantity of materials here is enough for the realm to use for 10 thousand years. It seems like we need to train our refiners more."

Mu Yao smiled as he turned to Zhao Hai and said, "Little Hai, I want to reward you well. So let me give you a planet in the Hundred Treasures Realm. It has a spiritual vein that people can use to cultivate in. I can also give you permission to enter the Ten-thousand Realm Battlefield whenever you want. What do you think?"

Zhao Hai smiled faintly and said, "Thank you, Elder Mu. Elder, I have some friends in the World of Cultivation that I want to take with me. Is that alright?"

Mu Yao laughed, then he patted Zhao Hai's shoulder and said, "Of course. You already have a planet of your own, you can do whatever you want with it. Let's go, follow me back to the Hundred Treasures Realm. We'll pick out a planet for you."

After he said that, Mu Yao pulled Zhao Hai towards the transmission formation. After a flash of white light, the two vanished. Only Tang Yaoen and the other Elders were left.

Tang Yaoen and the other Elders still needed to keep a watch at these resources. There were just a lot of materials on Yan Planet. Although this matter was known to a few people, it wasn't small enough to keep it a secret. If someone else comes to know about the resources present on the planet, they would definitely come over and steal it.

Mu Yao and Zhao Hai appeared on a small transmission formation hub. The place looked like a courtyard with only a few transmission formations. Zhao Hai understood that this was a transmission formation hub exclusive for people like Mu Yao.

Mu Yao led Zhao Hai towards a room. The room was quite special. In the middle of a room was a huge disc occupying half of the floor area. There were several chairs around the disk. Mu Yao brought Zhao Hai in front of the disc before pressing a small formation on top of it. The entire disk lit up, showing a huge star map.

Zhao Hai looked at the star map and could roughly count more than a hundred million planets. Majority of them were grey planets while the others were red and green planets. The latter two planets surpassed a hundred thousand with red planets numbering about 70-80 thousand while green planets numbered 30-40 thousand.

Naturally, Zhao Hai knew what these colors represented. They weren't the original color of the planets. Sure enough, as Mu Yao looked at the star map, he said, "The Hundred Treasures Realm spent a lot of time refining this star map. Inside is the territory of the Hundred Treasures Realm. All grey planets are uninhabited and had no spiritual qi as well as flora. Red planets are owned planets while the green ones are ownerless. These planets all have spirit veins. You can pick one."

Zhao Hai nodded. The star map's controls were the same as what Zhao Hai expected. He pointed towards a green planet and information about it was immediately displayed.

Looking at Zhao Hai, Mu Yao nodded and said, "I don't know about the World of Cultivation, but in the Hundred Treasures Realm, once someone becomes a Transcending Tribulation Expert, they would be assigned to a planet. People would then be sent to the planet as pioneers. Those transferred will become your servants as well as subjects. You can give them cultivation methods and select talents from them in order to cultivate. These people will follow your last name. And once you become an Immortal Expert, you would hand the planet over to them. If someone under you becomes a Transcending Tribulation Expert, they can apply to be assigned to another planet. If nobody is willing to take over your

planet after you become an Immortal Expert, then it would be taken back by the realm. As for the people on that planet, they would be redistributed to other planets.”

Zhao Hai nodded. He didn’t expect the Hundred Treasures Realm to have this kind of distribution scheme. He could count around 80 thousand red planets on the star map. If it was according to what Mu Yao said, there should be at least 80 thousand Transcending Tribulation Experts in the Hundred Treasures Realm. And this would be a conservative estimate. There would be experts who decide to stay on their master’s planet. This meant that there were much more experts. This was the strength of the Hundred Treasures Realm.

In the World of Cultivation, the Sect system was implemented. As long as you become a Nascent Soul Expert, you would be allowed to establish your own sect. But in the Hundred Treasures Realm, one needed to be a Transcending Tribulation Expert in order to establish your own school. This one step of difference shouldn’t be underestimated. Plenty of cultivators can go through with their lives without reaching the Transcending Tribulation Stage. If the World of Cultivation adopted the same system as the Hundred Treasures Realm, then there would be a very small number of sects established.

As Zhao Hai scanned the green planets, he came upon a planet that had been taken back. Zhao Hai understood what Mu Yao was saying right now. These planets had transmission formations and even medicine fields. The people assigned to this planet would grow the medicinal plants and build the residence of the Transcending Tribulation Experts. They would also do the odd jobs required to keep the planet functioning.

Zhao Hai continued to scan the green planets and saw planets both untouched and reclaimed. These planets were roughly the same. Zhao Hai thought for a while before he pointed to a random planet and said, “I’ll have this one.”

Mu Yao looked at the planet and remembered that it’s previous owner had become an Immortal Expert. However, none of his subordinates reached the Transcending Tribulation Stage. Therefore, the planet was reclaimed. The more talented subordinates followed him while the rest were redistributed.

Mu Yao nodded and said, “Alright, then I’ll hand this planet to you. You can go there anytime if you have matters to deal with in the World of Cultivation. Ten thousand people will be transferred on the planet. They would be your future subordinates. Don’t worry, the ones sent over would be children not exceeding ten years old and had not cultivated. You can teach these children to cultivate.”

Zhao Hai nodded. He expected there to be a population being sent over but he didn't expect it to be 10 thousand children. However, this wouldn't be a problem. Zhao Hai wasn't too unfamiliar with education. There's even an academy inside the Space with great Undead teachers.

Zhao Hai looked at Mu Yao and said, "Elder Mu, I'd like to take a look at the planet first. Right, the planet seems to be called Bluetree Planet. Can I build an academy on it?"

Mu Yao smiled and said, "You can. That planet is yours from now on. As long as you don't destroy the spirit vein, you can do whatever you want with it."

Zhao Hai nodded and asked Mu Yao about the planet's coordinates. After that, he went to the transmission formation and went to the planet. As he arrived, Zhao Hai understood why the planet had its name. This was because a blue tree was native to the planet. This blue tree was a medicinal plant. It can also be used for refining but it wasn't very useful. Its biggest use was emitting a fragrance that can calm people down, making it easy for them to cultivate.

After taking a look at the situation on Bluetree Planet, Zhao Hai had Cai'er design the great academy to be built on it. His only requirement was to not disrupt the planet's environment. For Cai'er, this was an extremely easy task. Using the Universal Scanner, a blueprint was made before long. Zhao Hai was satisfied with the blueprint. He left the planet and then returned to the Ten-thousand Realm Battlefield.

Mu Yu and the others had yet to return. Zhao Hai didn't stay in the headquarters for long before he left and went to the World of Cultivation's headquarters. Then he passed through the transmission formation and returned to the World of Cultivation.

Zhao Hai returned to Jade Clear Mountain. After all, Huang Daoran was still there. When Zhao Hai and Mo Sheng appeared on Jade Clear Mountain's transmission formation, Huang Daoran and Feng Baiming were already waiting there for them.

Zhao Hai's exploits in the Ten-thousand Realm Battlefield naturally entered the ears of Huang Daoran and Feng Baiming. To be honest, they were really shocked at what they heard. Moreover, they were also aware about Zhao Hai's present status. Compared to Zhao Hai, their status was practically nothing.

When Zhao Hai came out of the transmission formation, he immediately saw Huang Daoran and Feng Baiming. He quickly bowed and said, "Master, Uncle Master."

Huang Daoran looked at Zhao Hai with a complex expression. He didn't really expect Zhao Hai to achieve such huge achievements in the Ten-thousand Realm Battlefield. Moreover, he was able to join the Hundred Treasures Realm, which had a huge gap in power compared to the World of Cultivation.

Seeing Zhao Hai giving him a bow, Huang Daoran smiled bitterly and said, "Little Hai, you don't need to be so polite with me. Actually, I didn't teach you anything. Now that you're a Transcending Tribulation Expert, our master-disciple relationship is automatically finished."

Zhao Hai was aware of this custom. He smiled bitterly and said, "Master, don't say that. You will forever be my master. Right, Master, now that I'm back, I plan to take people back to the Hundred Treasures Realm. How about coming with me?"

Zhao Hai knew that Huang Daoran's talent was also great. Although Huang Daoran wouldn't reach the Severed Soul Stage in his life, he still wanted to take him to the Hundred Treasures Realm to help teach the 10 thousand children. Huang Daoran might even take a few children as his disciples. For cultivators, disciples that can inherit your legacy was very important.

Hearing Zhao Hai, Huang Daoran forced a smile before shaking his head and saying, "I can't go. I'm not familiar with the Hundred Treasures Realm, what can I do there? I have lived in the World of Cultivation my whole life. I don't plan to leave it."

Just as Zhao Hai wanted to convince him, Huang Daoran waved his hand and said, "It's no use. I will not go. Come, let's go to Blacksmith's residence first. I have something to tell you."

Zhao Hai nodded and then went to Feng Baiming's residence alongside Huang Daoran and Feng Baiming. Zhao Hai's return didn't cause too much disturbance. Kong Miao made sure to inform the higher-ups of the World of Cultivation to receive Zhao Hai well. They needed to know that the current Zhao Hai wasn't someone the World of Cultivation could afford to offend.

Four people sat inside Feng Baiming's place. Looking at Mo Sheng sitting behind Zhao Hai, Feng Baiming sighed and said, "Even Mo Shen reached Transcending Tribulation. It seems like the decision to let him follow you is correct."

Zhao Hai smiled. Mo Sheng's progress towards the Transcending Tribulation Stage was somewhat special. Zhao Hai didn't know how to explain it to Feng Baiming. But since he didn't ask, Zhao Hai naturally would tell.

Huang Daoran looked at Zhao Hai and said, "Little Hai, now that you're back, I have to ask you for help."

Zhao Hai stared, then he asked, "Master, please tell me your order."

Huang Daoran waved his hand and said, "What order. It's a request. This time doesn't only involve the Cultivation Realm, but the entire World of Cultivation instead. An accident occurred in Fabio Planet. The Bug Race has begun using our transmission formations to head to other planets. Although we have already sent people to deal with the crisis, the Bug Race was able to defend the transmission formations. Large quantities of bugs began appearing on the planets around Fabio Planet. We think that this might be the prelude to the mass invasion of the Bug Race. Therefore, I want to ask for your help to take a look at Fabio Planet. Naturally, we would also go with you. Besides us, the Buddhists also sent a few Transcending Tribulation Experts and Severed Soul Experts. There's even Immortal Experts present."

Hearing Huang Daoran, Zhao Hai couldn't help but stare. Then he knit his brows. He felt that this matter was quite thorny. It must be said that in the World of Cultivation, the Bug Race was synonymous with dread.

Zhao Hai speculated before that the Bug Race had an infinite evolution ability. In this case, the Bug Race would be very dangerous. Back then, Zhao Hai felt that his strength was insufficient. He also cannot carelessly stir up the Bug Race. Because of this, he didn't make a move to deal with them in the past.

And now, Huang Daoran told him that the Bug Race had left Fabio Planet and were even capable of using transmission formations. This was terrible news for the World of Cultivation. Although Zhao Hai was now someone from the Hundred Treasures Realm, he still came from the World of Cultivation. With the crisis looming over the World of Cultivation, it's impossible for him to ignore it.

Seeing Zhao Hai knit his brows, Huang Daoran's heart couldn't help but sink. He heard that Zhao Hai's strength had become formidable. He was now able to block an attack from an Immortal Expert. Moreover, this was an Immortal Expert from a high-grade realm. These Immortal Experts were stronger than their contemporaries from realms like the World of Cultivation. Because he was aware of this,

Huang Daoran invited Zhao Hai to make a move. Seeing Zhao Hai's knitted brows, Huang Daoran thought that Zhao Hai might not want to.

However, Huang Daoran had no intention to urge Zhao Hai. He knew that with Zhao Hai's current status, he could no longer order Zhao Hai around. Not to say Huang Daoran, even the World of Cultivation's Immortal Experts had to be polite in front of Zhao Hai.

After some time, Zhao Hai let out a long breath and said, "I expected the Bug Race to be a threat a long time ago. However, since my strength has been insufficient, I didn't dare try to deal with them. I didn't expect the Bug Race to develop to this scale in a short time. This is also good. We can deal with it in time."

Hearing Zhao Hai, Huang Daoran couldn't help but stare. He asked, "Little Hai, you want to deal with the Bug Race?"

Zhao Hai nodded, "I want to deal with them completely. To be honest, although the Bug Race doesn't look strong, their evolution potential is limitless. Therefore, I want to take the opportunity to destroy them. But I didn't expect the Bug Race to make a huge move before I did."

Huang Daoran looked at Zhao Hai and said, "Are you confident?"

Zhao Hai shook his head and said, "Whether I'm confident or not, it still needs to be done. The Bug Race has escaped their planet. Their terrifying evolution would also explode. If we don't eliminate them now, then they would be more troublesome later on. I'll take my people to the Hundred Treasures Realm first before dealing with the Bug Race. Before I return, don't send anyone to Fabio Planet, even Immortal Experts. I'll come back as soon as possible."

Huang Daoran nodded and said, "Alright. I'll pass it on. Do you need any help?"

Zhao Hai shook his head and said, "I can take care of it. Remember to wait for me to come back." After he said that, Zhao Hai vanished.

The place Zhao Hai reappeared in was Yalei 2. He came here to see Xiong Li and the others. Zhao Hai didn't plan to take them to the Hundred Treasures Realm. The overall strength of the Hundred Treasures

Realm was just too high for Xiong Li and the others who started cultivation late. If they go to the Hundred Treasures Realm, they will be pressured and wouldn't develop well. With Yalei 2 being his territory, Zhao Hai believes that nobody would dare touch it. He also intends for Huang Daoran to take care of his brothers. This will be more beneficial to Xiong Li and the others.

Besides Xiong Li and the others, Zhao Hai also visited Zheng Li and Louis. In the future, Zhao Hai was planning to hand over the management of Yalei 2 to the two of them. Xiong Li and the others preferred to cultivate. They weren't very useful in things like management.

Xiong Li and the others were cultivating well. But because of this, they weren't too aware of Zhao Hai's affairs. Zhao Hai just left them with training methods from the Giant Spirit Realm. He might not have much time to return here in the future.

Xiong Li and the others weren't angry about this. They already knew that Zhao Hai would go far and they would be left behind. They could only chase Zhao Hai's footsteps.

After seeing Xiong Li and the others, Zhao Hai met Zheng Li. Zheng Li was also cultivating in Yalei 2. He had already defected from the Cultivation Realm, so he couldn't return there in the future. In any case, Yalei 2 was developing well. The spiritual qi in the surroundings had also become adequate. Although Zheng Li wouldn't have much progress here, it was still enough for him.

The only thing troubling Zheng Li right now was his sister Zheng Yun. Zhao Hai has been aware that Zheng Yun had feelings for him. Moreover, Zheng Yun was pretty and had pretty good cultivation. But in the past, Zhao Hai has no plans to take her as a concubine. Therefore, he didn't have any response for her.

From what Zhao Hai can see, Zheng Yun's feelings for him was akin to a little girl's admiration towards her hero. As long as he left Zheng Yun for some time, Zheng Yun should be able to forget about him.

However, Zhao Hai didn't expect Zheng Yun to keep her feelings. When Zhao Hai returned to Yalei 2, Zheng Yun was still waiting for him. She even religiously cleaned his mansion for him. Zheng Yun had matured a lot and her strength has reached the Core Formation Stage. And since she has been helping to manage the affairs of the planet, her personality became more stable. However, her feelings towards Zhao Hai didn't change.

Because of Zheng Yun's sentiment, Zhao Hai couldn't help but feel a headache. He already had a lot of women on his side. But looking at Zheng Yun's situation, if he doesn't accept her, then she might wait for him her whole life. Having a female wait for him for such a long time wasn't something that Zhao Hai could accept.

In the end, Zhao Hai brought Zheng Yun along with him. Zhao Hai expected Zheng Li to oppose this decision. However, Zheng Li actually supported him.

Before leaving, Zhao Hai met Louis. Louis wasn't only the Commander of the Cross Sword Pirate Group, he's also a manager of Yalei 2. After all, his members were living in this place. Zhao Hai told him this time that he would rarely return to Yalei 2 in the future. Everything here would depend on Louis' management.

Zhao Hai didn't tell them about the Hundred Treasures Realm. In fact, none of them were even aware of the Ten-thousand Realm Battlefield, not to say the Hundred Treasures Realm.

Zhao Hai also found time to bring Margaret back to the Ashley Family for a visit. He also asked them to help him look after Yalei 2.

Actually, even if Zhao Hai didn't ask the Ashley Family for help, Yalei 2 would still be fine. The Machine Field's higher-ups knew about Zhao Hai's recent exploits as well as his present status. Even if they had the courage they had in their youth, they still wouldn't dare do anything to Yalei 2. Zhao Hai didn't really intend for the Ashley Family to take care of Yalei 2. What he wanted to do was to tell people that he still had a relationship with the Ashley Family. He wanted people to think twice before making a move on them.

After taking care of his affairs, Zhao Hai released the Hell King's Ship. Then he shrunk the ship and then appeared on Jade Clear Mountain.

Zhao Hai greeted Huang Daoran and Feng Baiming and then went directly to the transmission formation. A white light flashed and he returned to the Ten-thousand Realm Battlefield. This time, he appeared at the new headquarters of the World of Cultivation. Since this place was newly built, it cannot be compared to their old one. However, with the support of the Hundred Treasures Realm, they wouldn't have any problems rebuilding the stronghold. It's not even impossible to build the headquarters much better than before.

Kong Miao has been waiting for Zhao Hai at the transmission formation. Seeing Zhao Hai coming out with his Hell King's Ship, Kong Miao immediately greeted him, "Little Hai, will you really help with the Bug Race's matter? Wouldn't it be dangerous?" Naturally, Kong Miao was aware about the Bug Race's situation. Moreover, he knew how dangerous it would be. Therefore, he asked Zhao Hai about it.

Zhao Hai nodded and said, "It will be dangerous. Grandmaster, don't let anyone go into Fabio Planet, even Immortal Experts. Let me take care of my matters in the Hundred Treasures Realm first, then I'll go back."

Kong Miao gave a serious nod. He knew clearly that Zhao Hai wouldn't joke about matters like these. He was well aware of Zhao Hai's strength. Moreover, it was already known in the Ten-thousand Realm Battlefield that Zhao Hai possesses Faith Power. Even with Faith Power, Zhao Hai was still considering Fabio Planet as dangerous.

The World of Cultivation was different compared to the Hundred Treasures Realm. Transcending Tribulation Experts were already considered powerhouses in the World of Cultivation. Every Transcending Tribulation Expert lost was damaging to the realm. If they suffered heavy losses on Fabio Planet, then the World of Cultivation's vitality would be affected.

After reminding Kong Miao once more, Zhao Hai entered the nearby transmission formation and appeared on the Hundred Treasures Realm's headquarters.

Chapter 1519: The Bug Race Crisis

When Zhao Hai appeared on the transmission formation, he discovered Mu Yu, Tang Jie, and Tang Wen waiting for him. Seeing Zhao Hai arrive, Mu Yu couldn't help but laugh as he welcomed him with glee.

Zhao Hai stared, he looked at Mu Yu and said, "Big Brother Mu, aren't you busy? Why are you here?"

Mu Yu smiled and said, "We're busy. We just came back in time to see you. Right, Little Hai, were you able to get your people? Can we meet them?"

Zhao Hai nodded as he held the Hell King's Ship in his hand. Naturally, the others had already seen this form. When he heard Mu Yu's question Zhao Hai waved his hand and the Hell King's Ship enlarged. Then Laura and the others walked out of the ship.

Mu Yu and the others couldn't help but be stunned when they saw the beauties coming out of the ship. They didn't expect Zhao Hai to be the passionate type. He actually had a lot of beautiful women on his side.

Zhao Hai looked at Laura and the others and said, "This is Brother Mu, Brother Tang Jie, and Brother Tang Wen."

Laura and the others immediately gave a salute and said, "We have seen Brother Mu Yu, Brother Tang Jie, and Brother Tang Wen."

Mu Yu and the others hastily returned the gesture. Zhao Hai smiled and said, "These are my wives Laura, Meg, Megan, Lizzy, Ruyen, Berry, Margaret, and Zheng Yun." (Ni'er?)

Mu Yu nodded, then he laughed and said, "I never expected a kid like you to have such beautiful wives. Alright, let's go to your planet first. Master has been scouring everywhere for youths to be sent to you." Zhao Hai smiled faintly and entered the transmission formation with the others. Then they appeared at Bluetree Planet.

Bluetree planet was very calm. After all, there wasn't anyone here yet. The place they appeared in was the transmission formation hub of the planet.

The group left the transmission formation hub and took a good look at the planet. The planet was filled with blue trees. Because of this, it was filled with a calming fragrance. The upper half of the planet was filled with water while the land areas were filled with the blue trees. This made it very beautiful.

Although the planet was left uninhabited, the cave residences were still very clean. Not a single dust could be seen nor were they disturbed by beasts. This was because of the magic formations guarding the residences. And since there weren't any strong beasts on the planet, everything was practically left untouched.

Zhao Hai led everyone on the Hell King's Ship as they explored the planet. Looking at his surroundings, Mu Yu nodded and said, "It's very good. I didn't expect Bluetree planet to be this attractive. It's a pity that I inherited Master's planet. Otherwise, I would've looked for a more beautiful planet."

Zhao Hai smiled faintly as he turned his head to Laura and said, "I'll have you stay here and take charge of the children being sent over. We need to build the academy as soon as possible. They will be arriving soon. They need to have somewhere to stay in when they arrive."

Laura nodded and said, "Don't worry about it Brother Hai. We'll take care of it. Just take care of yourself."

Zhao Hai nodded. Mu Yu stared and asked, "What? Little Hai, you're leaving? Where?"

Zhao Hai smiled and said, "I need to return to the World of Cultivation. I discovered that the World of Cultivation's Bug Race has been causing trouble. I want to head back and see what I can do. In the past, I wasn't strong enough yet so I wasn't able to deal with them. Moreover, the Bug Race couldn't be left on their own for a long time. I need to take action."

Mu Yu knit his brows and said, "Since you're going to make a move, then this means that this Bug Race isn't simple. So do you need a few of our brothers to come and help you?"

Zhao Hai shook his head and said, "It's no use. I'm quite curious about the Bug Race. I want to see if I can find a way to subdue them. There's no need for people to go."

Hearing Zhao Hai, Mu Yu nodded and said, "That's good. Remember, make sure to contact us if there's any danger." Zhao Hai nodded with a smile. The Hell King's Ship stopped and descended outside the cave residences. Then he received the Hell King's Ship and at the same time waved his hand to take out large quantities of building materials and machines. Zhao Hai turned his head to Margaret and said, "You can begin."

Margaret nodded and immediately took out a computer. She manipulated it for some time. Then soon after that, the construction machines began to move.

It isn't very hard for a cultivator to build a house. As long as they use a spell, they would be able to build a wall. Naturally, they also need to cover their houses with artifacts. However, things like windows and doors made the process more complicated. Because cultivators didn't want to make things more troublesome, most of them opted to just dig a cave and make it their home. It was both secure and convenient.

If an enemy comes, a house would have four walls that need to be considered for defense. On the other hand, since caves were dug out from a mountain, all of its walls encompassed the mountain itself. There were very few cultivators who could knock down a mountain in one blow. This allowed cave residences to have great defense.

Because of this, cultivators were unfamiliar with building structures. Cultivators generally abstain themselves from the pleasures of life. Therefore, they could live inside caves. The best they could do was decorate their caves to make them more livable.

Therefore, when they saw Zhao Hai's machines, Mu Yu, Tang Jie, and Tang Wen were very curious. Mu Yu looked at Zhao Hai and said, "Little Hai, what's this? You want to build an academy? Is it for the education and security of the children?"

Zhao Hai nodded and said, "I plan to build a school to teach the children and also inform them how to plant medicinal herbs. I intend to give them most of the work. But I will not make them waste too much time, after all they still need to cultivate."

Mu Yu stared, then he frowned and said, "Little Hai, you should know that it's impossible to turn all 10 thousand children into formidable experts. If you teach them equally, then you would be spreading yourself too thin. I think you should teach your disciples following the way of the Hundred Treasures Realm."

Zhao Hai smiled faintly and said, "It's fine. Brother Mu doesn't need to worry. I won't be teaching these children myself. I found someone to teach them. Naturally, I know that it's impossible for the 10 thousand children to become powerful cultivators. However, each child is gifted in their own fields. Some of the children might be good at refining. Some might be good at farming. I want them to display their talents. Perhaps we might uncover promising talent for the future."

Mu Yu stared, he looked at Zhao Hai and said, "You're not teaching them? Then who is?"

Zhao Hai smiled faintly and said, "You forgot about my Undead. I have a lot of them under my control. Some of them are experts. I can let them be teachers."

Mu Yu was shocked, then his eyes shone as he said, "This is also good. If these Undead could teach the children, then these children will be lucky."

Zhao Hai smiled and said, "The children are still at their growing stage. Once they display their talent, they would be placed under the supervision of an Undead teacher."

Mu Yu nodded, "That's good. In any case, it wouldn't affect your cultivation. Right, those children will be coming in a couple of days. What do you plan to do with them?"

Zhao Hai replied, "With Laura and the others here, I can leave it to them. I still have to return to the World of Cultivation. I reckon I'll be back soon."

Mu Yu nodded. Zhao Hai turned to Meg and said, "Meg, please prepare us some food to eat. I want to drink with my Brothers." Meg nodded and then turned around and entered the cave residence. The kitchen of the residence was already modified for cooking.

Mu Yu could see Zhao Hai's unusual behaviors, but he didn't say anything. He just stood outside the cave and chatted with Zhao Hai. The construction machines were working at making a house. Margaret already imagined the buildings to be made. Some should be built fairly soon.

Before long, Meg finished preparing the food. Zhao Hai's group shared a feast together with Mu Yu and the others. Mu Yu and the others were especially surprised by Zhao Hai's food. The food contained spiritual qi, which caused their appetite to soar.

After eating, Zhao Hai left the planet to Laura and the others while he returned to the Hundred Treasures Realm's headquarters with Mu Yu and the others. Zhao Hai greeted Mu Yao and said that he must return to the World of Cultivation to take care of matters. Naturally, Mu Yao didn't oppose. Zhao Hai already made a huge contribution towards the Hundred Treasures Realm. Additionally, Mu Yao was fond of Zhao Hai.

Zhao Hai returned to the World of Cultivation's base and then directly went back to the World of Cultivation and Jade Clear Mountain.

With Laura and the others being busy at Bluetree Planet, the only one left inside the Space was Cai'er. Because she was connected to the Space, Cai'er was essentially its custodian. Originally, Zhao Hai wasn't planning to return to the World of Cultivation this quickly. However, Cai'er told him that the Bug Race has seized the five surrounding planets of Fabio Planet. They were now beginning to slaughter people and expand in all directions.

It seems like the Bug Race has learned to make transmission formations. They used this newfound knowledge to expand. Besides the five planets initially conquered, the Bug Race appeared in ten more planets. Any time the Bug Race appeared on a planet, they would target the cultivators inside it first. Once all cultivators died, they would begin killing the commoners. These Bug Race had no sense of propriety, they directly killed everyone and turned them into food.

Because of this, Zhao Hai rushed back to the World of Cultivation. He knew that this matter could no longer wait. The World of Cultivation couldn't afford to lose a lot of planets. They needed to solve the Bug Race crisis by destroying the Queen Nest. With its queen, the Bug Race would be no longer be able to reproduce.

Chapter 1520: Rampage

Feng Baiming met Zhao Hai inside his residence alongside Huang Daoran. Huang Daoran looked at Zhao Hai and said, "Little Hai, the situation has become more serious. The Bug Race is beginning to expand. Moreover, they have become stronger and probably more intelligent."

Zhao Hai nodded and said, "Have everyone close their transmission formations for now. Remember, unless I say the word, don't open any transmission formations. Tell everyone that I'm going to Fabio Planet. The solution to this problem lies there."

Huang Daoran and Feng Baiming nodded. Then Huang Daoran looked at Zhao Hai and said, "How many people do you want us to send to go along with you? Going alone is too dangerous."

Zhao Hai shook his head and said, "There's no need. It's useless no matter how many we send. The Bug Race evolves each time they eat a cultivator. I need to go alone."

Huang Daoran and Feng Baiming also didn't know what to say. They knew that their strength was now inferior to Zhao Hai.

Zhao Hai looked at the two and said, "The sooner we fix this issue, the better. I'll head to Fabio Planet now. There's no time to waste." Then his figure disappeared and entered the Space. At this time, Laura and the others had also returned. They knew how important and dangerous Zhao Hai's trip to Fabio Planet was. Zhao Hai didn't underestimate these bugs, so they all came to help. In any case, there's nothing to do in Bluetree Planet. The machines were doing all the work. It must be known that these robots were specially made to construct buildings.

When Zhao Hai entered the villa, he immediately asked, "Where's Mo Sheng?"

Laura smiled and said, "He's fine. He just ran over to cultivate. There's no need for Brother Hai to worry about him."

Zhao Hai nodded, then he looked at the monitor. On the screen was the current situation on Fabio Planet. Eight-legged bugs were everywhere. The man-made structures were all destroyed.

What surprised Zhao Hai the most was the presence of Silverback Gold-winged Bugs everywhere. Zhao Hai knew how powerful these bugs were. Now, these bugs filled the skies of Fabio Planet. Some were even going to outer space, looking like satellites orbiting the planet.

Zhao Hai's expression sank. He didn't expect the Bug Race to develop this quickly. He turned his head to Cai'er and said, "Have the Undead riflemen prepare. When the time comes, we need them to take the Bug Race nest."

Cai'er nodded. Laura looked at Zhao Hai and said, "Brother Hai, the reason why you didn't let Huang Daoran and the others attack Fabio Planet, was it because you're afraid they would destroy the Queen's Nest?"

Zhao Hai shook his head and said, "That's just one of the reasons. Right now, Fabio Planet is very hard to destroy. It's impossible to deal with it using conventional methods. Don't forget the capabilities of the Bug race. Moreover, I feel that destroying Fabio Planet will bring even more trouble. Although this is only a feeling, I still need to be on-guard against it."

Hearing Zhao Hai, the expression on Laura's face changed. Zhao Hai's instincts rarely went wrong. This was because Zhao Hai cultivated the Essence Technique. This cultivation allowed its user to divine good and bad luck. If Zhao Hai felt that destroying Fabio Planet would lead to trouble, then he most likely was correct.

Laura knit her brows and said, "Brother Hai, how confident are you this time? Can we really deal with the Bug Race?"

Zhao Hai forced a smile and said, "I feel that it would be very dangerous. However, there are good benefits despite the danger. Most importantly, the Bug Race had begun to move. If we don't deal with them right now, then they would be more troublesome to deal with them in the future. I reckon the Bug Race are amassing genes. Once they collect enough, I'm afraid even I wouldn't be able to deal with them."

Laura and the others were startled. They didn't expect this matter to be so serious. In their minds, once Zhao Hai uses Faith Power, even Immortal Experts need to be serious. Despite this, Zhao Hai was afraid of the Bug Race, a race from the World of Cultivation; a realm very common in the Ten-thousand Realm Battlefield. They didn't expect Zhao Hai to look very highly upon the Bug Race.

Zhao Hai looked at Laura and the others and said, "The Bug Race's two strongest abilities are their evolution and reproduction. If given the opportunity, the Bug Race could evolve and produce Immortal-stage bugs. Their reproduction would multiply this threat in no time. These abilities are what made the Bug Race terrifying."

Laura and the others nodded. These two abilities were indeed terrifying. If the Bug Race were allowed to produce high-level bugs on a large-scale, then nobody would be able to deal with them.

Seeing that everyone understood his thoughts, Zhao Hai said, "Alright. It's time to make preparations. I'll be heading out." The group nodded before Zhao Hai left the Space. He immediately appeared in an underground bug nest.

Presently, Fabio Planet was filled with these bug nests. The moment Zhao Hai appeared, the surrounding bugs immediately flooded towards him.

Zhao Hai coldly snorted. Then he waved his hand and took out the Hell King's Ship. But this time, the Hell King's Ship was only as big as an automobile. When Zhao Hai entered the ship, his body also shrunk. Then the sound of gunfire was heard as shells began shooting out of the ship. When the shells left the Hell King's Ship, they returned to their normal size.

While the ship was firing in all directions, Zhao Hai continued onwards. Left behind on his path were dead bugs.

The majority of the bugs in this nest were the eight-legged bugs. Besides these, there were also other types scurrying around. Moreover, Zhao Hai discovered that these bugs weren't weak. Even the most common eight legged bugs had Foundation Establishment-level strength.

Zhao Hai knew that this was caused by the Bug Race's evolutionary ability. With such an ability, if they were left behind for long, then nobody would be able to stop them.

Zhao Hai moved forward non-stop. He left no bugs alive on the road he took. The Undead on the Hell King's Ship already coordinate themselves, allowing them to send waves of bullets towards the bugs. Every single bullet took the life of a bug.

Zhao Hai didn't care about the path he left behind. He was aware that the bugs orbiting the planet had already descended. It seems like they want to block him.

However, Zhao Hai didn't have any worries. These bugs could never be his opponent. Zhao Hai also discovered that the strength of the bugs he came across was increasing. The bugs intercepting him were now at the Core Formation stage.

Core Formation Experts were minor experts in the World of Cultivation. But now, the Bug Race had groups of them appearing. If the World of Cultivation knew about this, they would no doubt be surprised.

Nevertheless, Zhao Hai could still ignore Core Formation Experts. The rifle bullets in Zhao Hai's hand were used to deal with Transcending Tribulation Experts. These Core Formation bugs simply wouldn't be able to stop it.

Zhao Hai was now rampaging his way across Fabio Planet. He doesn't know where the Queen's Nest was because it could shield against spiritual force. But one thing was certain, as he proceeded, the resistance from the Bug Race became fiercer. It's obvious that they had something to protect. It was based on this judgement that Zhao Hai continued on.

Moreover, Zhao Hai used the Infinity Technique to communicate with the surroundings. Besides the bugs coming to stop him, Zhao Hai was talking to the air and the soil around him. It was them who showed the way.

Before long, the bugs blocking Zhao Hai's way had reached the Nascent Soul-level strength. The appearance of these bugs also changed. Some of the bugs looked like snakes with swords as tails. Some looked like scorpions with wings.

The Hell King's Ship never stopped as it killed its way through the bugs. The bugs that weren't shot down by the rifles were still killed by the Hell King's Ship. outside the ship was a shield covered with a layer of blue flames. The bugs would be frozen stiff upon contact with this shield. And once the ship ran them over, they would immediately turn into dust.

Seeing this, Zhao Hai couldn't help but be stunned. He didn't expect the Nether Arctic Fire to be this overbearing.

The bugs coming over continued to increase. Their strength was also becoming higher and higher. Some bugs were beginning to show Transcending Tribulation-level strength. Moreover, these bugs were more difficult to deal with compared to the average Transcending Tribulation Expert. This was because of the defensive shells of the bugs.

Most importantly, there were just too many bugs. Zhao Hai already lost count of how many he killed. One hundred million, one billion, who knew anymore.

What Zhao Hai didn't know was that as soon as he began his rampage, the bugs on the other planets seem to have received orders to retreat to the transmission formations and return to Fabio Planet. They all rushed all at once, causing the cultivators fighting them to stare.

Since the transmission formations of the World of Cultivation were closed, information took a very long time to be transmitted. Not a lot of people knew that Zhao Hai had come to deal with the Bug Race.
