Chapter 1561: Establishing The Formation

Zhao Hai held a jade sword message in his hand as he turned to Mu Yu and said, "They're finally beginning to act. It seems like we have to keep things moving here."

Mu Yu smiled faintly and said, "It's been several days since the Mi Clan left. From what it looks, the other islands would no longer send people. We should begin setting up your formation so that we can be safe. Maser also said that this will become our headquarters if the plan fails. What do you think of this?"

Zhao Hai nodded and said, "Now I want to see if the people of the Ten-thousand Realm Battlefield could also tame and use cloud beasts."

Mu Yu stared, then his eyes shone as he nodded and said, "Right, right, I forgot about this. If we can tame cloud beasts, then we can be like the people of the Cloudsea Territory. We would be able to stay in the sea of clouds for a few days without our strength being affected. By the way, I forgot to ask you, what's with Li Jiang and Zhe Jun's cloud beasts? Did you really improve their beasts? How did you do it? Is it one of your abilities again?"

Zhao Hai smiled and said, "What ability, it's because of this thing." As he said that, Zhao Hai turned his hand and took out a pill. It was a white pill that seems to emit mist intermittently.

Mu Yu looked at Zhao Hai and asked, "Is this a pill? You gave these to the cloud beasts?"

Zhao Hai smiled and said, "Correct. This is a pill. However, this isn't any ordinary pill. To make it, I used herbs from the Ten-thousand Realm Battlefield as well as refined white clouds. This pill doesn't have any other uses and it would harm cultivators if they ate it. However, its benefits towards cloud beasts are very good. I obtained this from Guo Ling. He was chased down because of his research of this pill. After I got the formula, I used herbs from the Ten-thousand Realm Battlefield to complete it."

What Zhao Hai said was both true and false. This pill could truly enhance cloud beasts, but it falls short compared to when Zhao Hai did it. This pill was something produced by the Space's scanner and didn't have any relationship with Guo Ling. Guo Ling wasn't chased down because of this. But because of this, Mu Yu couldn't verify if what Zhao Hai said was true or not.

Mu Yu received the pill and carefully examined it. He looked at Zhao Hai and said, "How did you know that this will be effective for cloud beasts?"

Zhao Hai replied, "Brother Mu, I had been drifting on the sea for so long, I could catch cloud beasts and experiment on them. After poisoning hundreds of cloud beasts, I was finally able to complete this pill."

Hearing Zhao Hai, Mu Yu couldn't help but stare, then he laughed and said, "So it's that. Hahaha. You really like to toss about. But this is good. It means that we would have something to win people over."

Zhao Hai smiled and said, "Don't tell others about this pill. It's better if it remains a mystery. This will make them think even more."

Mu Yu nodded. Then suddenly he frowned and said, "So what do we do about the cloud beasts? We currently have no cloud beasts in hand. How can we know if this cloud beast could be used by our people?"

Zhao Hai looked at Mu Yu, then he chuckled and said, "Brother Mu, did you stay here for too long that your brain has turned into mist? Don't forget, we can still send people on missions. Although we have the formation, that doesn't mean that the people cannot go out. The people in the village are happy with getting cloud beasts, after all, they are familiar with this job."

Mu Yu tapped his head as he smiled bitterly and said, "I would have forgotten if you didn't tell me. But when are you going to put up the formation? Without the formation, I feel very on edge."

Zhao Hai smiled faintly and said, "I already issued an order to check the surrounding islands. If the realms still have no intention to come over and investigate, then we can immediately establish the formation. If they want to come over, then we'll have to wait until they leave."

Mu Yu nodded, "Only when the formation is set up will this island truly become ours. From the message just now, it's clear that the realm places great importance to the Hidden Cloud village. We need to make sure to prepare this place well."

Zhao Hai smiled faintly and said, "The Hidden Cloud Village is on the right track. What we need to do is really simple. We'll rearrange the residences so that we can make room for growing cloud rice and cloud

herbs. Although we don't have any cloud herbs on hand right now, we can take ordinary herbs from the realm and try to plant them here. Wouldn't it be better if we grow something in this place?"

Zhao Hai wasn't speaking nonsense. He tried to plant ordinary herbs to the Space's whitecloud island and it unexpectedly succeeded. However, the herbs also changed and became cloud-like. Regardless, the efficacy of the herbs didn't decrease and it improved instead."

Mu Yu thought about it and said, "Alright, let's do that. So how should we arrange the residences? Do you have a plan?"

Zhao Hai took out a piece of paper as he smiled and said, "I had Laura and the others make it. Take a look. If you like it, we'll do it according to this plan."

Mu Yu chuckled and said, "Since it's made by Laura and the others, it should be enough." As he said that, he took the paper that Zhao Hai handed to him. When he looked at the plan, Mu Yu couldn't help but stare. Then as he went on, he nodded. The houses in this plan were arranged in a special way. The way the houses were arranged followed the flow of a formation. As long as the houses were arranged in this way, then it would become a big spirit gathering formation. In the middle of this formation was an open area where plants could be cultivated.

Mu Yu looked at Zhao Hai and said, "This is a very good plan. Let's do it according to this. When should we begin?"

Zhao Hai smiled faintly and said, "Let's wait a couple of days as everyone comes back. After we set up the formation, we can ask them to move the houses."

Zhao Hai wasn't speaking nonsense. The cloud houses were very special since they're made of refined white clouds. They can't leave whitecloud islands but they could be easily moved. It can even float in mid-air. And as long as they're placed, they would not move. And for those in mid-air, they wouldn't fall.

Because of this, Zhao Hai was fine with moving the houses. It was quite normal to move houses in the Cloudsea Territory.

Mu Yu nodded and then sighed as he said, "The realm is about to send people against the Ghost Spirit Realm, yet we can't participate. It's really boring."

Zhao Hai smiled faintly and said, "You can't be sure about that. Once we deal with the matters in the Hidden Cloud Village, we can return. When the time comes, we can deal with the Ghost Spirit Realm with our own hands."

Mu Yu nodded, "There's also that. Those fellows from the Ghost Spirit Realm don't know what's good for them. They dared to attack you and even had the gall to ask for an explanation from the realm. I wouldn't be able to get this foul air out of my lungs if I don't fight them."

Zhao Hai smiled faintly and said, "To be honest, I really don't care about the Ghost Spirit Realm. With the other realms joining together, the fall of the Ghost Spirit Realm is inevitable. What I'm worried about are the Fireweavers. They are vengeful and wouldn't just let go of a loss. If they want to get back at us, then the Ghost Spirit Realm is a great opportunity to do so."

Zhao Hai said these things because he discovered that the Fireweavers have been making some moves lately. They're building up their military as though they were going to take action.

In the previous war, Zhao Hai put silver needles on some of the Fireweavers. This allowed him to know a little bit about the Fireweavers' situation. To be honest, compared to the Fireweaver Race, the Hundred Treasures Realm was still a lot worse. If the Fireweavers attacked with all their strength, the Hundred Treasures Realm wouldn't be able to stop them. Fortunately, the other Great Realms were pulling the Fireweaver Race's legs, making them unable to use all of their resources against the Hundred Treasures Realm.

The Five Great Realms weren't peaceful with each other. They constantly fought against each other, but not on a large scale. If the Fireweavers aggressively attacked the Hundred Treasures Realm, then the other Great Realms would definitely take action. The Fireweavers were also aware of this, so they only sent a fraction of their power when they fought against the Hundred Treasures Realm in the past.

But this time, the Fireweavers gathered an army of 10 thousand, ready to take action against the Hundred Treasures Realm. This army of 10 thousand from the Fireweavers equates to 30 thousand experts from another realm. This was because each expert had two beasts with them. And these two beasts were as strong as their masters. This Fireweaver Army wasn't something to be underestimated.

What surprised Zhao Hai was the fact that he didn't know where the Fireweavers received the information that the Hundred Treasures Realm was about to clash with the Ghost Spirit Realm. They wanted to use this opportunity to behead the Hundred Treasures Realm.

Since he didn't know how the Fireweavers received the information, Zhao Hai could only remind Mu Yu about the possible dangers. He hoped that Mu Yu would latch on to this idea.

Hearing Zhao Hai, Mu Yu nodded and said, "The Fireweavers are scum. We need to be careful of them. Do you think they would dispatch troops this time?"

Zhao Hai shook his head and said, "I cannot say for sure. But I think we need to prepare in order to avoid losses when the time comes. Oh, those guys are back. Let's see if we can begin establishing the formation." As he said that, several people arrived. Zhao Hai and Mu Yu were talking inside their cloud house, so Zhao Hai had the newcomers come in. The group went in and gave a salute to Zhao Hai and Mu Yu.

Zhao Hai waved his hand and said, "Stand up. So how is it? Will the other islands come over to investigate?" Actually, Zhao Hai knew that the other powers would no longer be sending people. This was because the Mi Clan already told them that there's nothing wrong about the island. And with the Hidden Cloud Village being ignored by almost everyone, nobody wanted to come and check again.

The answers of those who came were the same. The other islands wouldn't be sending people. After that, Zhao Hai rewarded them and then had them leave. Then Zhao Hai turned to Mu Yu and said, "Brother Mu, we can begin arranging the formation. You take the formation disk while I plant the formation flags."

Mu Yu nodded. Zhao Hai waved his hand and took out a formation disk. This formation disk was white, flat, and shiny. It wasn't very big at only a meter in diameter. Engraved on the disk were a variety of mysterious patterns. Among them were 36 circles connected in an array. It looked like a beautiful decoration.

Zhao Hai handed the disk to Mu Yu and said, "Every time I place a formation flag down, a red dot will light up. You just need to observe it for me."

Mu Yu nodded and received the formation disk. Right after that, Zhao Hai left the Hidden Cloud Village and flew towards a predetermined area. The place Zhao Hai chose to place the formation flag was quite far from the Hidden Cloud Village, at a day's distance of flying. But for Zhao Hai, this distance was nothing. In a flash, he arrived at the area and took out a formation flag.

The flag was entirely black with a height of 13 feet. The flag itself was triangular and had a huge star design in the middle.

Zhao Hai calculated the positions carefully. If it were a normal formation, it wouldn't have needed so much attention. However, the formation that Zhao Hai set up this time was different.

Three years to search for a dragon but ten years to find its tail. In Feng Shui, this means that it was easier to find a dragon vein than to find a dragon's cave. But Zhao Hai's formation was much more complicated than Feng Shui. But compared to Feng Shui experts, Zhao Hai was much more formidable. Moreover, he can use the Space to check if the formation disk lit up. If the red light lit up, this meant that Zhao Hai was in position. It took less than two hours before Zhao Hai was able to find the correct location for the flag.

Zhao Hai saw through the Space that the formation disk in Mu Yu's hand had lit up and knew that he was at the right place. However, he didn't just put the flag there and flew away. Instead, he held the flag in his hand as he pulled back and screamed, "Ha!" as he threw the flag down. A cloud of yellow light burst out from the flag for a moment before it disappeared into the star pattern. Then the flag disappeared among the mist, making people unable to sense its presence at all.

All of Zhao Hai's actions were supplemented by Faith Power. If he wanted the formation to perform to its best, then it would need Faith Power. In the entire Ten-thousand Realm Battlefield, it may only be Zhao Hai who could do this. This was because faith power was included in the plan to establish the formation.

Chapter 1562: Long-term Mission

Zhao Hai held the last flag of the formation's 36 flags. He was quite nervous. It took five days for Zhao Hai to plant the formation flags and this was the last one. As long as this flag was inserted, the entire formation would be completed and the Hidden Cloud Village would disappear from the Cloudsea Territory.

Zhao Hai gripped the flag and then lifted it up as if he was holding a mountain. When his right hand reached its limit, he opened his eyes and then shouted, "Ha!"

Along with Zhao Hai's shout, his right hand fiercely threw the flag downwards. A dazzling golden light erupted from his body and entered the flag through the star pattern.

As the golden light disappeared, the flag was placed firmly in place. Shortly after, Zhao Hai felt the space around him distort as the flag vanished from sight.

Zhao Hai let out a long breath and then wiped a sweat off his brow. He discovered that arranging this great formation caused him to be exhausted.

After that, Zhao Hai's figure flashed and appeared next to Mu Yu. Mu Yu was still holding the formation disk. The 36 circles around the disk were already lit up with red light.

Mu Yu looked at Zhao Hai, then he nodded and said, "It's finally complete." Zhao Hai also nodded and said, "It's complete". Mu Yu laughed as he patted Zhao Hai's shoulder and said, "Good work. Let's go. It's time to move the houses." Zhao Hai nodded and walked out with Mu Yu.

When the two went out, they saw the cultivators from the island waiting for them. They had been told to not go out of the island in the past few days. These people couldn't help but feel awkward. They were already used to heading out to do missions. Now that they had been ordered to stay, they suddenly found themselves with nothing to do.

As soon as Mu Yu and Zhao Hai went out, the cultivators of the Hidden Cloud Village immediately turned towards them. Zhao Hai looked at these people and said, "I asked you to stay inside the village for the past few days because I was arranging a large formation outside the island. From now on, nobody besides us will be able to know that the village exists. Naturally, you can still enter and leave the village. Alright, all of you line up to receive these tokens. Remember, if you lose this token, you will no longer be able to return to the Hidden Cloud Village."

These people knew that Zhao Hai would arrange a formation outside the village. So when they heard him, they immediately understood what was going on. Then they lined up and received the token one by one.

Once everyone received their token, Zhao Hai immediately asked them to move their houses. Naturally, the people didn't oppose this plan. Moving houses for the people of the Cloudsea Territory wasn't a huge deal.

By this point, the people of the Hidden Cloud Village were fully obedient towards Zhao Hai and Mu Yu. This was because they had already tasted the benefits of the missions. And the source of the missions was Zhao Hai.

Zhao Hai would issue a mission and they would complete it. Once they return, they would receive contribution points which they could exchange for whatever they want.

In order to facilitate the exchange of points, Zhao Hai opened a computerized exchange kiosk in the village. Operating this kiosk was very simple and was on a touch screen. The items to be exchanged were divided into medicine, weapons, armor, cultivation methods, and other categories. All of these things were very much needed by the people in the Hidden Cloud Village.

The people in the Hidden Cloud Village were of the poorest of the cultivators in the Cloudsea Territory. Adding on to the fact that they cannot easily leave the region, they were very starved of cultivation materials. The existence of the exchange kiosk gave them all that they needed. This also made them feel that they belonged to the Hundred Treasures Realm.

When everyone arranged their houses according to Zhao Hai's layout, they immediately felt the difference. They discovered that the spiritual qi inside their houses had become better. This made them understand that this was because of Zhao Hai's arrangement. This made them even more thankful towards Zhao Hai. At the same time, they believed that Zhao Hai was a formations grandmaster.

Formation grandmasters were different from refiners or alchemists. It can be said that no matter which realm, almost every cultivator has some understanding about formations. However, there were very few who were very good with it.

This was the reason why learning formations was an extensive and profound task. All cultivators knew that there were even more formations than the countless amount of cultivation methods.

Because of this, becoming a formations master required tons of time invested in understanding formations. Only by doing so could one be able to establish and break formations.

This also caused an issue. Because of the immense number of formations, researching them would take time away from your cultivation.

Although the life of a cultivator was very long, with Immortal Experts living to thousands of years, not every cultivator can reach this stage. A Foundation Establishment Expert can only live up to 300 years old, a Nascent Soul Expert up to 700 years and a Severed Soul Expert to 800 to 900 years.

Naturally, this was considering that the cultivator doesn't suffer any accidents. Closing up until reaching the Immortal Stage was impossible. In order for a cultivator to break through their bottleneck, they needed to undergo a trial. These trials would put the cultivator in dangerous positions. Besides these trials, there's also practicing how to use their artifacts and collecting techniques to supplement them. All of these take time.

If a cultivator just cultivates their entire life without practicing how to use artifacts, then they would be in danger once they head out. And this doesn't include gaining knowledge about pills, refining, and the various materials in the universe. If they didn't, then they might miss a treasure when they head out. And the most important thing was the accumulation of spiritual qi. Each cultivator needs spiritual qi to practice.

Time was the biggest enemy of Cultivators. Cultivators would go against the heavens and cultivate spiritual qi in order to reach a grand goal. In addition to becoming stronger and reaching the heavens, the most important reason why Cultivators cultivate was to become Immortal!

In order to gain eternal life, then there's only one path to take, and that is to become stronger. How can one become stronger? Cultivate and be invincible in battles. The fundamentals are very important. Things like formations were just supplements to the path of Immortality.

With this in consideration, although Cultivators knew formations, not a lot of them were experts in it. In the Ten-thousand Realm Battlefield as well as the Cloudsea Territory, those considered to be formation grandmasters were extremely few.

The formation that Zhao Hai set up was enough for the people in the village to consider him as a formations grandmaster. This wasn't far from the truth, since Zhao Hai could indeed be called a formations grandmaster.

Starting from the Machine Field, Zhao Hai has been paying great attention when it comes to formations. And every time the processing machine deconstructs an artifact, the formations inside it were recorded. And after arriving at the Ten-thousand Realm Battlefield, Zhao Hai was able to increase his list of formations even more. Then there's his entry into the Hundred Treasures Realm. The Hundred Treasures Realm hasn't been stingy with Zhao Hai. They provided him with various materials to learn from.

With the help of the Space and the existence of the Universal Processing Machine, Zhao Hai could now be considered to be a formations grandmaster. With regards to understanding formations, nobody could beat Zhao Hai.

Anyone who reached a high level in any field would receive great respect from everyone around them. Zhao Hai's achievements regarding formations increased the respect the people in the Hidden Cloud Village had for him.

After the cloud houses had been arranged, Zhao Hai began to issue long-term missions; first of which was catching cloud beasts. No matter what cloud beasts, even cloud rats, could be exchanged for contribution points. Since this was a long-term task, no matter what cloud beast one exchanged, they could get anything you wanted.

This was great news for the cultivators of the Hidden Cloud Village. Originally, the people of the village relied on catching cloud beasts in order to survive. Because of this, they were experts at the task.

The second long-term mission was more interesting. In fact, it might sound very simple, it was farming! Now that the cloud houses have been rearranged, the island where the village was in was left with large open areas to cultivate plants. Farming cloud plants required hard work and would take a lot of time for cultivators. If there were no points provided, then nobody in the island would want to farm the land. Because of this, Zhao Hai treated farming as a mission. Although catching cloud beasts provided more points, farming the island was much safer.

After giving the two long-term missions, the matters of the Hidden Cloud Village had been settled. It could now be treated as the Hundred Treasures Realm's back-up base. There was no longer any need for Zhao Hai and Mu Yu to stay here.

Chapter 1563: Troops of the Hundred Treasures Realm

While Zhao Hai and Mu Yu were taking care of the Hidden Cloud Village, the Hundred Treasures Realm began to use their troops against the Ghost Spirit Realm. The Ghost Spirit Realm already expected this when the Hundred Ghost Daoist returned to their headquarters. Ever since they defeated the Giant Spirit Realm and the Fireweavers, the Hundred Treasures has been establishing a strong presence in the battlefield.

The Ghost Spirit Realm didn't guess wrong. After the Hundred Ghost Daoist left, the Hundred Treasures Realm began to assemble their troops and prepared to attack the Ghost Spirit Realm. This time, they didn't only assemble their own troops. The realms under the Hundred Treasures Realm also mobilized. This made it a full-on war between two realms.

The actions of the Hundred Treasures Realm caused the medium-grade realms in the Ten-thousand Realm Battlefield to be confused. They didn't understand the Hundred Treasures Realm's decision.

Although the battle between the Hundred Treasures Realm and the Giant Spirit Realm ended with the former's win, the Hundred Treasures Realm still exerted a lot of effort to do so.

In fact, in order to deal with the Giant Spirit Realm, the Hundred Treasures Realm had to use a lot of methods. The most important one of them was causing disunity between the subordinate realms of the Giant Spirit Realm. This was essentially cutting off the wings of the Giant Spirit Realm. So when the battle happened, the Giant Spirit Realm would undoubtedly lose.

This tactic was very successful at the start, especially when the World of Cultivation changed sides. It was a massive knife inserted to the Giant Spirit Realm's back. This brought a huge advantage to the Hundred Treasures Realm while causing the other subordinates of the Giant Spirit Realm to leave.

However, this caused the Giant Spirit Realm to use their trump card. They shamelessly invited the Fireweavers. The other realms looked down on this decision. A high-grade realm asking their enemy for help, it was a huge loss of face. But the other realms could recognize that this was a good move. This was because the appearance of the Fireweavers stabilized the unstable state of the Giant Spirit Realm.

Upon seeing the Fireweavers, the subordinate realms who were planning on leaving immediately became obedient and were more active in participating in the war. This was because these subordinate realms also wanted to reap some benefits from the war.

This rendered the previous arrangements of the Hundred Treasures Realm useless. Not only did they fail to cut off the wings of the Giant Spirit Realm, they also caused the Fireweavers to join the war, one of the Five Great Realms.

Fortunately, the Hundred Treasures Realm were able to respond and went into a defensive position with all they had. They abandoned their other bases and guarded their headquarters. Additionally, the subordinate realms who were still loyal to them helped them defend the periphery of the headquarters. In the end, they were able to withstand the attack of the Giant Spirit Realm and the Fireweavers. Later on, when the other high-grade realms joined in on the counter-attack, the war quickly ended.

However, the Hundred Treasures Realm didn't win the war with ease, their casualties weren't small. The same was true for the realms under them. Although the Hundred Treasures Realm gave compensation afterwards, the realms still haven't recovered. But now, the Hundred Treasures Realm decided to fight another high-grade realm. This was obviously not a wise thing to do.

But nobody knew that the reason why the Hundred Treasures Realm went through with this decision was because they knew they would win. The other high-grade realms would be lending a hand. They were practically bullying the Ghost Spirit Realm.

Naturally, the Hundred Treasures Realm had no idea that the Fireweavers mustered a 10 thousand-strong army to deal with them. They were now departing to attack the Hundred Treasures Realm.

The third day after Zhao Hai established the formation, the army of the Hundred Treasures Realm were ready to set off. Their target was the Ghost Spirit Realm. They also didn't spend any effort to hide their action as they charged towards the Ghost Spirit Realm's territory. As long as the Ghost Spirit Realm weren't deaf and blind, then they would certainly know what's coming for them and would prepare.

Just as expected, the Ghost Spirit Realm were fully prepared. They didn't go out of their territory to fight the Hundred Treasures Realm and instead stayed in and waited. They made the right decision. They were more familiar with their own territory. Moreover, they wanted to wear out the Hundred Treasures Realm so that it would be easier to deal with them.

After Zhao Hai and Mu Yu were done with the arrangements in the Hidden Cloud Village, the army of the Hundred Treasures Realm were already five days into their travel. They would soon arrive at the territory of the Ghost Spirit Realm.

When Mu Yu and Zhao Hai returned to the headquarters, they found that the Elders who were left behind were all Elders belonging to Mu Yao and Tang Yaoen's faction.

Seeing this, Mu Yu couldn't help but stare. He didn't understand why Mu Yao didn't lead the attack. On the other hand, Zhao Hai could see why Mu Yao didn't go. Mu Yao just forced Shen Wei out of his position. If he went to lead the troops this time, then people might think that he craved power and wanted to be the realm's leader for a long time. This outcome wouldn't be beneficial for the Mu Faction.

Where there are rivers and lakes, there are people. This saying wasn't bad at all. The Hundred Treasures Realm was now very stable, but Mu Yao still needed to be careful. Mu Yao knew that the stability was because of the realm's system, the system of Elders taking turns making decisions for the realm. If he destroyed this system, then the people of the Hundred Treasures Realm would rise up against him, causing a civil strife in the realm.

Mu Yao fully understood the political state of the realm, so he decided to stay in the headquarters. In his opinion, the merit has to go to Zong Ze. This would be beneficial for the Hundred Treasures Realm's development. At the same time, Mu Yao didn't need more merits at this time. His achievement of defeating the Giant Spirit Realm was already enough for him for the rest of his life.

"Master, Martial Uncle, why didn't you lead the army?" Naturally, Mu Yu was still unaware of the undercurrents of the realm. He still didn't understand Mu Yao's decision.

Mu Yao knew that Mu Yu would ask, but he didn't say anything. He just smiled faintly as he turned to Zhao Hai. He found that Zhao Hai was very calm, it seems like there's no need to explain to him.

"Little Yu, you need to think more. Cultivators need to cultivate, but with your current status, you can't just focus all of your attention to cultivating. Or else you will suffer in the future. Once we old guys are gone, the Hundred Treasures Realm will be passed on to your generation. It wouldn't be good if you're still like this. Look at Little Hai, I reckon he already knows what's going on. Learn from Little Hai." Mu Yao looked at Mu Yu with a calm expression on his face.

Mu Yu looked at Zhao Hai with a confused expression. Zhao Hai turned to Mu Yu and said, "I heard a saying that says politics is knowing when to advance and when to retreat. If Elder Mu led the army, how would the other Elders react? What would they think of Elder Mu? Brother, sometimes you need to give credit to other people. Especially if you're in a high ranking position."

Mu Yu wasn't a fool, it was just that he knew too little. Hearing Zhao Hai, Mu Yu quickly understood. He turned his head to Mu Yao and saw him nodding. Mu Yu let out a long breath and said, "So it's like that. Thank you Little Hai."

Zhao Hai smiled faintly and said, "You're too polite. Brother Mu, this time, let's just stay here instead of joining the fight."

At this time, Tang Yaoen opened his mouth and said, "How is the Hidden Cloud Village? That place is very important to the Hundred Treasures Realm. We cannot be careless about it."

"Martial Uncle, don't worry, everything there has been taken care of. Little Hai has given two long-term missions for the people of the village. The first mission is to farm the land using the herbs of the Hundred Treasures Realm to see what would happen. The second is to capture cloud beasts. If the Hundred Treasures Realm want to fight against the people of the Cloudsea Territory, then the cloud beasts would be indispensable. Otherwise, we would have a hard time heading out of the whitecloud islands." Mu Yao turned to Tang Yaoen and explained Zhao Hai's plan to him.

Although Mu Yao and the others regarded the Hidden Cloud Village as important, their status limited them to asking about it often. Because of this, they could only hand the task over to Zhao Hai and Mu Yu. Mu Yao knew Zhao Hai and Mu Yu's abilities. If they cannot take care of the Hidden Cloud Village, then he would be worried about the Hundred Treasures Realm's future.

Mu Yao nodded and said, "The whitecloud islands are indeed suitable for planting medicinal plants. What you did is very good. We also need to test if we can use cloud beasts. But for the sake of our future, it's good if we are prepared. Good job, well done."

Mu Yu smiled and said, "With the great formation protecting the island, unless someone has a token, nobody would be able to enter the village. And the tokens that Little Hai gave out are made specially and it's impossible for others to imitate it. We don't have to worry about security at all. We now have a secure base in the Cloudsea Territory."

Mu Yao nodded, "That's good. We cannot expose the Hidden Cloud Village to the outside. This time, the realm will implement the plan that you two proposed. If it succeeds, then everything would be fine. But if we fail, we may be forced to retreat to the Hidden Cloud Village. Do you understand?"

The two gave a nod. Then Mu Yao continued, "Alright, you may go back. There's nothing going on in the headquarters these days, so the two of you can relax. Little Hai, you can go home and rest."

Although Zhao Hai knows that the Fireweavers are going to attack, he couldn't say it at this time. So he nodded and said, "Thank you Elder Mu."

Mu Yao waved his hand, then he looked at Mu Yu and said, "You can also rest. Come back here tomorrow. Although there's nothing going on in the headquarters, we still need to pay attention. After all, the Fireweavers are still here."

Mu Yu nodded then left the room with Zhao Hai. Hearing what Mu Yao said, Zhao Hai relaxed. It seems like Elder Mu was truly a cautious individual. This was good.

Chapter 1564: Giant Spirit Realm Reappears

Zhao Hai returned to Bluetree Planet. The children were still conducting their daily learning. The progress of the children could be clearly seen. The majority of them had reached the Foundation Establishment Stage. For children of their age, it was a golden start.

The children of the Hundred Treasures Realm started at the same level, but not a lot of them were able to reach the same progress. Only the children on planets with academies established by Mu Yao can barely compare with the children on Bluetree Planet. This proves the importance of Zhao Hai's academies.

Zhao Hai didn't manage the children too much. He just looked at the situation of the planet and then returned to the Space. Because of what happened in the sea of clouds, the children held great admiration towards Zhao Hai. If Zhao Hai showed himself right now, then he would be disturbing the children, so he chose not to see them.

People might think that since Zhao Hai was the children's idol, his appearance would encourage them. But sometimes this wasn't the case.

The children were now at a very sensitive time in their lives. If Zhao Hai suddenly appeared and talked to them, then the pace of the children would change. If they become anxious about their cultivation, then they might suffer backlash in the future. A Cultivator cannot be too impatient, or else they would be courting death.

If it was an adult cultivator, then Zhao Hai wouldn't mind talking to them and giving them some notes on cultivation. However, these children were too young and had yet to have full control of their emotions. So in the end, Zhao Hai didn't see them and just observed their progress through the Space.

When Zhao Hai arrived inside the Space, Laura and the others were already staring at the monitor. Zhao Hai turned his head and was stunned at what they were looking at; it was the Fireweavers. The Fireweavers had already set off from their headquarters. Zhao Hai already expected this, so he wasn't too surprised. What surprised Zhao Hai was that he saw other people in the Fireweaver Army. These people weren't part of the Fireweaver Race, they were from the Giant Spirit Realm.

The Giant Spirit Realm has returned to the Ten-thousand Realm Battlefield!

Nobody knew about this before. Even Zhao Hai, who had been monitoring the Ten-thousand Realm Battlefield, didn't know. The return of the Giant Spirit Realm was too sudden, which greatly surprised him.

Zhao Hai's expression changed, then he turned his head to Laura and the others and asked, "When did the Giant Spirit Realm return?"

Laura replied with a serious expression, "Five hours ago. It was also at that time that the Fireweavers decided to attack. It seems like they made an agreement with the Fireweavers to deal with the Hundred Treasures Realm. It has already been five days since the Hundred Treasures Realm army set off for the Ghost Spirit Realm. They wouldn't have any more time to retreat. Brother Hai, what do you think?"

Zhao Hai replied, "I'm afraid we couldn't do much right now. I can only remind Elder Mu. In any case, we're still members of the Hundred Treasures Realm. If the Hundred Treasures Realm loses too hard, then it wouldn't be good for us."

Laura nodded and said, "Would you say that you left some Undead to monitor the Fireweavers, then you noticed their movement?"

Zhao Hai nodded and said, "I can only say it like that. This time, the Fireweavers and the Giant Spirit Realm seem to be prepared to do a lightning attack. They prepared so many weapons."

Zhao Hai was right. This time, the Fireweavers and the Giant Spirit Realm took out a lot of large artifacts. The Fireweavers dispatched 10 thousand people along with their beasts, which made their combat power equal to 30 thousand people. The Giant Spirit Realm also sent out about 10 thousand people along with 200 Immortal Experts. This number couldn't be looked down on. If the Hundred Treasures Realm wasn't prepared at all, then the consequences would be disastrous.

When he thought of this, Zhao Hai immediately said, "I'll head back now. Continue paying attention to the movements of the Fireweavers." Laura and the others nodded. Zhao Hai appeared on Bluetree Planet once more and then used the transmission formation to return to the headquarters.

Zhao Hai arrived at the headquarters and couldn't be bothered with greeting other people as he went straight towards the conference hall. Mu Yao and the others were still inside. Seeing Zhao Hai enter, Mu Yao and Tang Yaoen were surprised. But the two knew that something must have happened seeing Zhao Hai's expression. Otherwise, he wouldn't have returned this soon. They knew Zhao Hai, and they knew that the things he treated seriously weren't trivial.

"Did something happen?", Mu Yao took the initiative to ask.

Zhao Hai gave a salute to the two and then said, "Elders, after the previous war, I kept undead around the Fireweavers in order to monitor them. I just received information that the Fireweavers are working with the Giant Spirit Realm once more. They set out with dozens of large artifacts. Including the beasts of the Fireweavers, they have a 40-thousand man strong army, including 200 Immortal Experts. They are now coming towards the headquarters. We need to quickly make a decision."

Hearing this, Mu Yao stood up. The information Zhao Hai brought was indeed shocking. He didn't think that this would happen, especially at this time.

Mu Yao walked two laps before saying, "It seems like the Fireweavers have eyes in other realms. Otherwise they wouldn't know that our people would attack the Ghost Spirit Realm this quickly. They really chose a good time, but this is also an opportunity for us."

Zhao Hai stared, somewhat confused by what Mu Yao said. Mu Yao looked at Zhao Hai as well as the other Elders and said, "Our previous plan was to send our forces against the Ghost Spirit Realm and then declare that we lost too much so that we don't have to send as many troops to the Cloudsea Territory. The sudden appearance of the Fireweavers and the Giant Spirit Realm provided us with a lot of help. If we use our battle against the Fireweavers and the Giant Spirit Realm as a reason, we can tell the other realms that we suffered great casualties. Then we'll say that we don't have the strength to attack the Cloudsea Territory. We can give the other realms the coordinates for the transmission formation. Naturally, we won't give it for free. We'll trade for the coordinates. This is good for our plan."

Hearing Mu Yao, Zhao Hai couldn't help but stare. It seems like old ginger was indeed more spicy. Mu Yao was a shrewd and crafty old man.

Zhao Hai let out a long breath. To be honest, the number of troops sent by the Fireweavers and the Giant Spirit Realm this time wasn't that many. In the past war, they mobilized about 100 thousand troops. In comparison, the number they sent this time was as much.

The attack of the Fireweavers and the Giant Spirit Realm hinges on its speed and timing. The main force of the Hundred Treasures Realm were now attacking the Ghost Spirit Realm, and were now about to arrive. At this time, it was impossible for them to return. If the Hundred Treasures Realm didn't receive any information from Zhao Hai, then they wouldn't have made the proper preparations. Then the Hundred Treasures Realm would definitely suffer a big loss.

But the situation became different after receiving Zhao Hai's news. With the Hundred Treasures Realm fully prepared, the Fireweavers and the Giant Spirit Realm were completely done for.

It must be said that the reason why the Hundred Treasures Realm were able to attack the Ghost Spirit Realm so quickly was because they had a lot of large artifacts. And these large artifacts were Giant Spirit Treasure Ships.

Although the Giant Spirit Realm was their enemy, the Hundred Treasures Realm couldn't deny that they make good large artifacts. In their opinion, the Giant Spirit Treasure Ship was the best artifact of the Giant Spirit Realm.

Giant Spirit Treasure Ships were defensively strong and could accommodate a lot of people. Also it had no problem with long-distance flights. Its ramming strength couldn't be underestimated either. A ship like that could only be described as perfect.

Naturally, it's impossible for a large artifact to be as flexible as Zhao Hai's Hell King's Ship. It wouldn't be realistic at all. If you make a competitive weightlifter do synchronized swimming, then they might drown in the pool. Similarly, it was impossible for the Giant Spirit Treasure Ship to be as flexible as Liquid Silver. The Giant Spirit Treasure Ship was perfect as a large artifact.

Because of this, after acquiring the method to create Giant Spirit Treasure Ships, the Hundred Treasures Realm began a large-scale manufacturing project. This was enabled even more when they learned the method of water refining where they can refine Giant Spirit Treasure Ships in batches. Adding to the fact that the Hundred Treasures Realm had no shortage of materials due to Zhao Hai's efforts, the Hundred Treasures Realm became a rich manufacturing powerhouse. They were able to make a large number of Giant Spirit Treasure Ships which they used to send their main force against the Ghost Spirit Realm. This also made the other realms envious of the Hundred Treasures Realm.

These Giant Spirit Treasure Ships were the reason why the Hundred Treasures Realm were able to quickly arrive close to the Ghost Spirit Realm. With how far they traveled, even if they received news about the Fireweaver and Giant Spirit Realm attack, the troops would still be unable to return. And the Ghost Spirit Realm wouldn't allow them to return to offer help. They will definitely entangle the Hundred Treasures Realm. The timing of the Fireweaver and Giant Spirit Realm attack was truly perfect.

But after Zhao Hai discovered the move of the Fireweavers, their attack had lost its element of surprise. It might work if the Hundred Treasures Realm weren't prepared, but they were.

Mu Yao immediately transferred a large army from the realm. There were a total of 300 Immortal Experts as well as 30 thousand experts on the Transcending Tribulation Stage and above. After they arrived, Mu Yao didn't delay and immediately had Zhao Hai use his three large artifacts for everybody to ride on. Then they flew out of the headquarters to meet the Fireweavers and the Giant Spirit Realm.

There was no mistake, they went out to meet the enemy. Mu Yao planned to block the Fireweavers and the Giant Spirit Realm from entering the Hundred Treasures realm's territory this time. Otherwise, the battle would damage the Hundred Treasure Realm's lands.

Zhao Hai was a bit surprised when he heard about Mu Yao's decision. But this style was to his tastes, so he drove his three large artifacts to meet the Fireweaver and Giant Spirit Realm army. This time, he has 300 Immortal Experts riding his artifacts. When he thought of this, even someone as calm as Zhao Hai couldn't help but be excited.

This was the first time that Mu Yao and the other Elders rode inside Zhao Hai's large artifacts. They were slowly beginning to like it. Not only were these artifacts powerful during battles, they were also comfortable to ride in.

Zhao Hai was still on the Hell King's Ship. As for the 300 Immortal Experts, they were equally divided between the three large artifacts. As for Mu Yao, he was on the Hell King's Ship, standing on the bow beside Zhao Hai.

Looking around and seeing Zhao Hai's Giant Spirit Treasure Ship and Pagoda advancing beside the Hell King's Ship, Mu Yao couldn't help but nod as he said, "Little Hai, your large artifacts are very good. I didn't expect them to be faster than Giant Spirit Treasure Ships. And there's no need for people to power them. It's very good."

Zhao Hai smiled and said, "There's no need to add power during ordinary times. And when in battle, we can add some crystals to multiply the energy provided. However, to make this possible, the formations require very expensive materials for the hull. Moreover, the formation needs to encompass the entire ship. Unlike the Giant Spirit Treasure Ships where the formations are made in modules. There's no way such a huge formation could be placed inside normal ships."

Mu Yao nodded and said, "Your artifacts are truly treasures. Right, Little Hai, can your artifacts be recreated?"

Zhao Hai nodded and said, "They can, but the materials to make them could no longer be found in the Ten-thousand Realm Battlefield. So they couldn't be as defensive as mine, and they also cannot continuously evolve. There's also the heavy requirement for refining. The artifacts that I made are at the same level as the Ten-thousand Transformations Staff of the World of Cultivation."

Mu Yao nodded and said, "That's not too bad. If you have time, try to teach the refiners. Weapons with the ability to transform are very good. If you can use it well, their strength wouldn't be bad."

Zhao Hai smiled and said, "I have recorded the refining method and placed it in the Scriptures Pavilion. If the refining masters want to study, then they can just go there and have a read."

Mu Yao gave a satisfied nod. He appreciated Zhao Hai's selfless actions. It was also because of his selflessness that he gained everyone's favor and trust, allowing him to gain his current status in the Hundred Treasures Realm.

Looking at the sky in the distance, Mu Yao said, "Little Hai, do you think our plan will succeed? If we fail, then the Hundred Treasures Realm would have no place in the Ten-thousand Realm Battlefield."

Zhao Hai replied, "Originally, the plan wasn't easily accomplished. In my opinion, it has only a 50 percent chance of succeeding. But now that the Fireweavers and the Giant Spirit Realm reappeared, the chance of success has risen to 70 percent. As long as Elder Zong and the others manage to destroy the Ghost Spirit Realm, our territory would increase. And with us fighting against the Fireweavers and the Giant Spirit Realm, we can get more from splitting the Ghost Spirit Realm's territory. And while the other realms fight in the Cloudsea Territory, we can use this chance to develop our strength. As long as the other realms lose heavily in the Cloudsea Territory, they won't be able to do anything against us."

Mu Yao nodded and didn't speak for a long time. However, a hint of fire could be seen burning in his eyes.

Chapter 1565: Who Laughs Last

Zong Ze knit his brows as he held the jade sword message in his hand. He didn't expect the Fireweavers to make a move at this time. Fortunately, Zhao Hai made prior arrangements otherwise the Hundred Treasures Realm would suffer very heavy losses.

He let out a long breath and calmed his brows. The jade sword message was from Mu Yao informing him about the plan. To be honest, Zong Ze was very optimistic about Mu Yao's decision. This was because Mu Yao was much more cautious than him.

The timing of the Fireweavers was just too good. This also revealed some issues. The Hundred Treasures Realm had been too eye-catching recently. They defeated the Fireweaver and the Giant Spirit Realm army and obtained the Giant Spirit Realm's territory. Although the territory has been divided with the other realms, the Hundred Treasures Realm still gained the most land. This caused the other high-grade realms to be wary of them.

Zhao Hai's successful expedition and the discovery of the Cloudsea Territory once again caused the Hundred Treasures Realm to be the center of attention. This time, the most credit went to Zhao Hai, which meant that the Hundred Treasures Realm would get even more benefits. In this situation, the other realms were a bit unconvinced. However, the truth was there and they had to accept it. So what should they do? The only way was to weaken the Hundred Treasures Realm.

And this time, the Hundred Treasures Realm proposed dealing with the Ghost Spirit Realm. This would benefit the other realms, but at the same time, it made the other realms wary of the Hundred Treasures Realm. This was because the Hundred Treasures Realm already had the domineering attitude of "those who follow me will prosper, while those who don't will die". The other high-grade realms were now more worried about becoming the next Ghost Spirit Realm.

If these guesses were correct, then the perfect timing of the Fireweavers could be explained. Someone from the other realms leaked this information to the Fireweavers.

This made Zong Ze think that his guess was likely to be correct. Besides Zhao Hai, nobody notified them that the Fireweavers were coming over to attack the headquarters.

The territory of the Fireweavers and the Hundred Treasures Realm weren't connected. If the Fireweavers don't use transmission formations, then their only passage to the Hundred Treasures Realm was through the territories of other high-grade realms.

The Hundred Treasures Realm and the other high-grade realms were allies. Normally, if the Fireweavers pass through their territories, even if they don't plan to help, they should have informed the Hundred Treasures Realm. This was to ensure that the Hundred Treasures Realm wouldn't be in danger.

But now, besides Zhao Hai, the other realms didn't inform the Hundred Treasures Realm. They chose to be silent, blocking information from reaching the Hundred Treasures Realm. They were coordinating with the Fireweavers' attack.

It was at this point that Zong Ze was convinced that everything was caused by these traitors. The Fireweavers and the Giant Spirit Realm didn't bring that many people. They may cause damage to the Hundred Treasures Realm, but it would be impossible for them to capture its territory. And this was the goal of those high-grade realms.

Thinking of this, Zong Ze let out a long breath and stored the jade sword message. Mu Yu already told him to not worry about the headquarters' situation. They had already allocated people to deal with it. This way, Zong Ze could deal with the Ghost Spirit Realm with a peace of mind.

Zong Ze knew that Mu Yao wouldn't give assurance to anything if he wasn't confident, so he continued charging forwards with high morale. In one day, they finally entered the territory of the Ghost Spirit Realm. He already received information that the Ghost Spirit Realm made ample preparations and were waiting for them.

This was a head-on collision between two high-grade realms. Although the other realms would cooperate in this action, after this incident, Zong Ze didn't expect them to really cooperate properly. Even if these realms send troops, their goal would be to at most wound the Ghost Spirit Realm.

Before this, Zong Ze wasn't guarded against this outcome. But after receiving Mu Yao's message, he has to be careful. These high-grade realms have a lot of methods, they couldn't be easily dealt with.

Thinking of this, Zong Ze waved his hand as he turned to Tang Jie and said, "Pass the order, in this attack, nobody is allowed to leave the Giant Spirit Treasure Ships without my order."

Tang Jie stared. In the past, Zong Ze wanted the Giant Spirit Treasure Ships to work together with the Cultivators during battle. What has changed now? However, he didn't ask much as he nodded and went on to pass the order.

Zong Ze looked at the front as he muttered, "Let's see who laughs in the end."

.....

As Mu Yao and the others travelled forward, Mu Yao turned to Zhao Hai and asked, "Little Hai, did they change their direction?"

Zhao Hai shook his head and said, "Elder, don't worry. With our current speed, we'll be able to meet them in about two days."

Mu Yao nodded and said, "Two days. That should also be the time that we're clashing with the Ghost Spirit Realm, right? We're fighting two battles at once. Hehe. As long as our plan succeeds, let's see who would dare provoke us in the Ten-thousand Realm Battlefield."

Zhao Hai smiled faintly. What he wanted was more than this. He wanted everyone to submit to them, including the Five Great Realms. He wanted to see if a unified Ten-thousand Realm Battlefield would get some response from the people watching in the shadows.

Time flew quickly and two days passed by. The people on the three large artifacts were beginning to become anxious as they stared in front of them. They knew that the enemy would be appearing at any time.

Mu Yao stood on the Hell King's Ship as he stretched his spiritual force forward. Actually, Zhao Hai knew how far the Fireweavers were, but he didn't tell.

When the Fireweaver and Giant Spirit Realm Army were about ten minutes away from Zhao Hai and the others, Mu Yao opened his eyes and said, "They're here."

Zhao Hai was stunned. He didn't expect Mu Yao to discover the Fireweavers from such a far distance. Although the enemy was just ten minutes away, the distance involved with it couldn't be underestimated. How far could the Hell King's Ship travel in ten minutes? How far could the other party's large artifacts travel in ten minutes? Ten minutes was not a short distance, yet Mu Yao was still able to detect the opposite party. Immortal Experts were truly formidable.

Although Zhao Hai was stunned, he immediately reacted and waved his hand, turning the three large artifacts into porcupines. Numerous cannons appeared on the surfaces of the three large artifacts.

Mu Yao noticed the changes on the three large artifacts. His eyes lit up as he turned his head to Zhao Hai and said, "No wonder these guys got so excited when they heard that we're going to be fighting with you. These artifacts are really treasures. Hahaha. Now I also want to play with them."

Zhao Hai smiled faintly and said, "I like convenience. If I can take the enemy out from long-range, then I won't go into close-combat. If I can take them out in one shot, I definitely wouldn't want to attack twice."

Mu Yao laughed as he patted Zhao Hai's shoulder. At this time, on the Giant Spirit Treasure Ship, Tang Yaoen was also surprised. He turned his head to Tang Wen and said, "Little Wen, Little Hai's Giant Spirit Treasure Ship seems to be different from the ones we made?"

This time, Tang Wen didn't follow Tang Jie in dealing with the Ghost Spirit Realm. Instead, he stayed beside his Master. Since he had been with Zhao Hai before, he could explain why.

Zhao Hai's Giant Spirit Treasure Ship was indeed different from the one refined by the Hundred Treasures Realm. The Giant Spirit Treasure Ships made by the Hundred Treasures Realm were exact copies of the ships of the Giant Spirit Realm. On the other hand, in order to exert the most firepower, Zhao Hai installed cannons to every window of his ship. You can't see a window on the ship without a cannon jutting out of it. Once Zhao Hai's Giant Spirit Treasure Ship enters its offensive mode, only then could people see how terrifying it was.

Tang Wen was very familiar with this point, so when he heard Tang Yaoen, Tang Wen immediately replied, "Master, in order for the ship to accommodate cannons, Little Hai heavily modified his Giant Spirit Treasure Ship."

Tang Yaoen nodded and said, "This kid doesn't joke around. No wonder he can resist Immortal Experts using his large artifacts alone. It looks like these three large artifacts carry quite a lot of firepower."

Tang Wen smiled and said, "Right, Little Hai heavily modified his three large artifacts to carry a lot of power and ability. Especially during group battles, enemy Cultivators wouldn't be able to have the chance to attack. And even if they could attack, Little Hai wouldn't allow their attacks to hit him."

Tang Yaoen nodded and no longer spoke because he detected a fleet of ships just in front of them. The Fireweavers and the Giant Spirit Realm sent out dozens of large artifacts. However, to Zhao Hai's three large artifacts, these ships could only become ordinary weapons.

Although the Giant Spirit Realm still had a lot more Giant Spirit Treasure Ships, most of them had been disassembled as they retreated from the Ten-thousand Realm Battlefield. And with how hasty they were about their current attack, they couldn't bring too many ships. Because of this, a large part of the artifacts that they brought belonged to the Fireweavers.

The Fireweavers weren't known for their large artifacts, and most of their ships were used for transportation. But this time, in order to deal with the Hundred Treasures Realm, they deliberately took out sword shuttles.

Sword shuttles were enlarged forms of sword artifacts. It had pointed edges on both ends and was sharp on all sides. It was small, but it was flexible and full of power.

Chapter 1566: Direct Bombardment

The Fireweavers used sword shuttles for their offensive strength. However, a sword shuttle's transporting ability wasn't that good. It was mainly used for attack.

As for the Giant Spirit Treasures Ships? Before Zhao Hai arrived, if they claimed to be second in the Ten-thousand Realm Battlefield in terms of large artifacts, nobody would dare claim first.

The Giant Spirit Realm were very confident in their battle against the Hundred Treasures Realm because of these large artifacts. But they didn't expect that they would be suppressed by Zhao Hai. And ever since then, they had been falling downwards.

But from what they heard this time, it seems like Zhao Hai has closed up. If Zhao Hai was really out, then the Fireweavers and the Giant Spirit Realm would have an easier time.

Zhu Lie calmly on the sword shuttle, but his mouth was twitching from time to time while his eyes burned with anger. Zhu Lie's younger brother fought in the last battle against the Hundred Treasures Realm. He always wanted revenge, and now he has the opportunity to do so.

However, the twitch on his mouth wasn't because he was angry. When Zhu Lie was young, he was injured by a stronger opponent, leaving a scar on his face. There were many medicines present to heal the scar, but Zhu Lie didn't use it. He left this scar on in order to remind him of this hatred.

Later on, he was able to kill the cultivator who gave him the scar. Even then, he didn't get rid of it. The scar became a reminder to him that everyone who offends him must die.

Because of this scar, his mouth would unconsciously twitch from time to time. This also caused him to look fiercer.

Zhu Lie didn't participate in the battle against the Hundred Treasures Realm because he was in retreat at that time. After learning that his brother died during the war, he was itching to go seek revenge from the Hundred Treasures Realm. Now that he finally has the chance, he's naturally happy.

At this moment, Zhu Lie noticed three black spots suddenly appearing in the distance, heading straight towards them. Zhu Lie scanned it using his spiritual force and found that it was three large artifacts. He couldn't help but stare because of what these large artifacts were. From what he heard, a person from the Hundred Treasures Realm named Zhao Hai used these same three large artifacts. Could it be that the Hundred Treasures Realm knew of their plan so they came out and intercepted them? That's impossible. Didn't the other realms say that everything has been set up? It's impossible for the people of the Hundred Treasures Realm to discover them before their arrival.

At this time, a Fireweaver arrived beside Zhu Lie and said, "Brother Lie, those three large artifacts belong to Zhao Hai of the Hundred Treasures Realm. It seems like the Hundred Treasures Realm discovered that we are coming."

Zhu Lie knit his brows and said, "Are you sure?"

The person nodded and said, "There's no mistake, that is Zhao Hai. Look at the cannons, those cannot be easily installed. It should be Zhao Hai."

Zhu Lie coldly snorted and said, "If it's him, then it's him. So what? Tell everyone to go forward at full speed." The Fireweaver subordinate was about to say something, but he suddenly heard a loud boom.

Upon hearing this, the Fireweaver couldn't help but stare, then his expression changed as he said, "Brother Lie, order everyone to defend quickly. Zhao Hai began opening fire!"

This was Zhu Lie's first time facing Zhao Hai, so he didn't know how terrifying he was. When he saw the expression of the person beside him, he couldn't help but have a look of contempt. In his opinion, the Fireweaver beside him was an embarrassment. He was actually very scared of someone like Zhao Hai.

Before he gave his order, Zhu Lie heard a loud bang. Then the sword shuttle under his feet shook for a while. Zhu Lie's expression couldn't help but change. There was a hole on top of the sword shuttle.

This caused quite a shock to Zhu Lie. He didn't expect Zhao Hai's cannons to be so overbearing. The Fireweavers have always been famous for their rifles. Zhu Lie was also confident of his rifling skills. He didn't think that the Hundred Treasures Realm would reach this level. It must be known that even Fireweaver Rifles couldn't shoot through the sword shuttles.

Zhu Lie quickly issued his command, "Defend! All shuttles engage your defensive formations. Everyone, leave the sword shuttles. Hand the shuttles' control over to the Giant Spirit Realm."

Since they were in transit, Zhu Lie had all of their large artifacts focused on movement with no defensive shields. Although sword shuttles were offensive-oriented large artifacts, they were still quite defensive. So upon seeing that Zhao Hai managed to blast a hole on the shuttle, Zhu Lie immediately ordered the use of defensive formations. At the same time, he gave the responsibility of control of powering the shuttles to the people of the Giant Spirit Realm.

This time, they brought a lot of sword shuttles to allow the people of the Giant Spirit Realm to attack the Hundred Treasures Realm when required. However, Zhu Lie didn't expect this scenario to arrive soon.

Although the Fireweavers and the Giant Spirit Realm were now in cooperation, Zhu Lie and the others still don't fully trust the people of the Giant Spirit Realm. As they travelled, the control over the sword shuttles were handled solely by the Fireweavers. Now that the situation wasn't going great, Zhu Lie immediately handed the control of the shuttles over to the people of the Giant Spirit Realm.

Unfortunately, it was too late to transfer control. Control over the sword shuttles couldn't be transferred in an instant. And with Zhao Hai's attacks, which had become stronger since the previous war, as well as Zhu Lie's complacency, more than ten sword shuttles have been destroyed from Zhao Hai's first volley.

At this time, Zhao Hai's second round of bombardment began. The Fireweavers quickly responded as cultivators began to leave the sword shuttles. Some of the sword shuttles have also been handed over to the people of the Giant Spirit Realm.

Although the people of the Giant Spirit Realm had taken control over the sword shuttles, they still needed time to get used to its performance. So after Zhao Hai's second bombardment, more than a dozen sword shuttles were destroyed.

Fortunately, there weren't a lot of people inside the shuttles. After Zhao Hai's two rounds of bombardment, the people inside the sword shuttles had gone out.

Even so, Zhao Hai's two rounds of attacks damaged more than 20 sword shuttles while killing more than 2000 people. The losses to Fireweaver beasts were similar.

Zhao Hai's cannons use explosive shells. Once the shells enter the shuttles, they would then explode. They were quite lethal.

Then at this time, Zhao Hai's third round of attacks came. Zhu Lie roared. But as he shouted, a huge shield appeared in front of everyone. Zhao Hai's cannon fire hit the shield. Although the shield shook heavily, it managed to block Zhao Hai's attacks.

Seeing this, Zhu Lie didn't have a happy expression. His complexion was gloomy and he seemed to be sweating. This was because he knew that the shield wasn't something ordinary cultivators could use. An Immortal Expert has made a move.

It seems like his performance caused the Immortal Experts to be dissatisfied, so they took action. It should be known that Immortal Experts wouldn't take action in battles like these in the Ten-thousand Realm Battlefield. In the battlefield, Immortal Experts would only fight against other Immortal Experts. If they intervene in battles of those lower than them, then they would be looked down on.

At this time, a voice was heard, "So it's Spirit Shield Barre. Barre, do you still have some face left? This is a battle between juniors, do you want to participate in it?"

Zhu Lie could hear that this was another Immortal Expert speaking. Just as the enemy's voice fell, another voice replied, "Mu Yao, so it's you huh. The Hundred Treasures Realm destroyed the future of the Giant Spirit Realm in the Ten-thousand Realm Battlefield. This is a life and death battle. What rules are there?"

The voice from earlier replied, "Good, Barre, good. Hahaha. I think we should find another place to have a conversation. Or do you still intend to protect everyone? If you keep intervening, don't blame me for killing you."

"I'm afraid you're not enough!" As soon as the voice fell, the shield in front of Zhu Lie and the others disappeared. At this time, Zhao Hai's fourth round of attacks hit Zhu Lie and the others.

But this time, Zhu Lie and the others were prepared. While the two Immortal Experts were talking, Zhu Lie and his men weren't idling. The people from the Giant Spirit Realm were able to acclimatize themselves to the sword shuttles while Zhu Lie and his men have also managed to spread themselves out properly. Even if Zhao Hai's shells fell into their formation, they could still avoid or defend. With this, they could avoid massive casualties.

Zhu Lie looked at the three large artifacts in the distance as he coldly snorted and said, "Advance. Sword shuttles take the front, the others will follow behind." Following his order, the remaining thirty or so sword shuttles flew forward. The cultivators also took their weapons out and followed behind. The beasts of the Fireweavers also surrounded their masters.

Another round of bombardment came, but this time the effects weren't great. The shells directed at the sword shuttles had been dodged while those targeting the troops behind were easily dodged due to their loose formation.

Zhao Hai discovered this so he waved his hand, retracting the cannons of the three large artifacts. Then Undead carrying rifles appeared.

A lot of cultivators in the three large artifacts had fought with Zhao Hai before, so they knew what to do. They took out their own artifacts but they didn't immediately sally outside. They knew that Zhao Hai was preparing to charge the enemy. Once the three large artifacts crashed into the enemy formation, then it would be time for them to move.

Just as what they expected, Zhao Hai was indeed preparing to charge the enemies. The weakness of the shells had already been found by the Fireweavers, so there was no point in attacking with it. Now Zhao Hai was prepared to go into close-combat.

Seeing Zhao Hai stop his attacks, Zhu Lie knew that something was bound to happen. He loudly commanded, "Everyone, get ready. The other party is going to charge into battle. Get ready to intercept the enemy. Divide yourselves into three teams, each team is responsible for one large artifact."

Just as Zhu Lie's voice fell, Zhao Hai's three large artifacts began their charge. Zhu Lie's eyes flashed a cold light. His rifle appeared in his hand, ready for the incoming clash. He was aiming at the Hell King's Ship.

Chapter 1567: Sight of Defeated Soldiers

Zhao Hai looked at the more than 30 sword-shaped large artifacts of the other party and smiled. Seeing them separate into three teams, Zhao Hai understood what they wanted to do. However, he didn't care since he was confident in his artifacts.

Under Zhao Hai's command, the three large artifacts charged towards the enemy formation. The other party was arranged very loosely. There were 20 thousand people as well as another 20 thousand beasts in the air. They occupied a very large area.

As the speed of the three artifacts increased, the sword shuttles of the Fireweavers also moved as they directly clashed with Zhao Hai.

The people of the Giant Spirit Realm knew that if they just kept the sword shuttles stopped in place, then they wouldn't be able to stop the enemy's charge. Many of those present from the Giant Spirit Realm had fought against Zhao Hai in the past, so they knew how powerful he was. Because of this, they chose the initiative and charged forward.

As the sword shuttles and Zhao Hai's three large artifacts got closer and closer, Zhu Lie who was watching in the back was beginning to be nervous. Although he was now holding his rifle, his mind was focused on the large artifacts.

Standing on the Hell King's Ship, Zhao Hai paid attention to the Fireweavers through the Space. Looking at their gritted expressions, a smile couldn't help but appear on his face.

The moment the sword shuttles and the three large artifacts were about to clash, Zhao Hai suddenly waved his hand, shrinking the three large artifacts in an instant. The three large artifacts easily passed through the sword shuttles. Then they returned to their original size as they continued charging towards the enemy formation.

These changes were very abrupt. The people from the Giant Spirit Realm who controlled the sword shuttles couldn't help but feel their blood boil and almost vomit out blood. Even Zhu Lie and the others who were looking at the clash didn't expect this change. It was like waiting for a huge firework explosion only to discover that it was a dud. This caused them all to be caught off-guard.

Then at this time, the three large artifacts crashed onto the enemy formation. When Zhu Lie and the others finally responded, the three large artifacts had already carved three bloody roads into the formation.

Zhu Lie looked at what happened with red eyes. He let out a furious roar as he took his rifle and began firing towards the three large artifacts. The others had a similar response, whether it be rifles or other artifacts, everyone took them all out and began attacking the three large artifacts. The beasts of the Fireweavers went all out in their attacks. They hit, bit, and clawed the large artifacts with all their power.

But it didn't take long before the Fireweavers discovered that they made a mistake. With what they're doing, it would be impossible for them to deal damage to the three large artifacts. Their rifles couldn't even penetrate the shields, nor were the beasts able to do anything. As the beasts attacked the three large artifacts, the rifles inside began to fire, shredding the bodies of the nearby beasts.

Seeing this, Zhu Lie's heart couldn't help but bleed. He immediately shouted, "All beasts retreat. Quick, let them retreat!" The beasts also discovered the danger and quickly drew back.

But at this moment, bullets went flying out of the three large artifacts. Fireweavers who couldn't defend were immediately hit.

At the same time, the cannons of the large artifacts began to fire. These cannons weren't focused on killing people. They were targeting the beasts in order to wipe them out.

The people on the sword shuttles also reacted. They immediately drove the sword shuttles around to kill. It must be recognized that sword shuttles were very fast. And because it was designed for offense, the attacks of the sword shuttles were very strong.

However, Zhao Hai wasn't afraid of them. He commanded his large artifacts to assault the Fireweaver formation once more. And while nobody was paying attention, he received the destroyed sword shuttles and then merged them into liquid silver.

When the enemy sword shuttles turned around and rushed towards him, Zhao Hai waved his hand. Then more than 20 sword shuttles appeared beside the three large artifacts. Then they clashed with the remaining sword shuttles of the Fireweavers.

Seeing this, Zhu Lie could feel a buzz in his brain. His eyes turned cloudy and he almost fainted. He didn't expect Zhao Hai to have his own fleet of sword shuttles. Zhu Lie couldn't help but yell, "What's this! Why does he have sword shuttles? Aren't sword shuttles a secret of the Fireweavers?"

At this time, a Fireweaver gave a salute and said, "Brother Lie, when we fought against them last time, the people of the Hundred Treasures Realm still didn't have Giant Spirit Treasure Ships. Later on, Zhao Hai destroyed Giant Spirit Treasure Ships and remade them, giving the Hundred Treasures Realm the refining method. I think Zhao Hai is a refining expert. Brother Lie, we need to find a solution out of this quickly."

Zhu Li also knew that things weren't doing well. He coldly snorted and said, "Everyone, use your rifle technique. We need to break through the shields of these large artifacts." Along with his command, the Fireweavers merged with their beasts becoming half-human half-beast individuals. Their rifles increased in size as they aimed towards the three large artifacts.

When Zhao Hai saw this, he strengthened the shields as he loudly said, "Everyone listen, unless ordered, nobody is allowed to leave." Zhao Hai knew that the strongest defenses of the three large artifacts weren't the shields but the artifacts themselves. Zhao Hai believes that even the Fireweavers' rifle technique wouldn't be able to go through the defense of his three large artifacts.

At this moment, the sword shuttles that Zhao Hai released had begun its clash against the Fireweavers' sword shuttles. The two sides exchanged moves for quite a while.

In the end, the shields of the three large artifacts couldn't withstand the combined Fireweaver assault and broke down in some places. However, the shields didn't break down like other shields where everything would crumble. Although the shield was broken down in many places, the places that weren't broken down could still provide protection.

Although this was the case, Zhu Lie and the others could still see hope. They all roared as they continued shooting at the three large artifacts.

Zhao Hai has to recognize the skills of the Fireweavers when it comes to using rifles. Their rifles were accurate and all the bullets penetrated through the existing holes of the shields. A dang dang sound was heard on the three large artifacts.

Although this was the case, the Fireweavers still couldn't do anything to Zhao Hai's three large artifacts. Their bullets were like needles hitting a steel wall. They simply couldn't do anything to the three large artifacts.

Zhao Hai knew that the Fireweavers couldn't sustain their attack for a long time. He already experienced this kind of attack the last time he fought against the Fireweavers.

Zhu Lie also discovered this point. However, it made him desperate. He couldn't understand how Zhao Hai became this strong. The offense that the Fireweavers were proud of were useless against Zhao Hai.

At this moment, Zhao Hai controlled his three large artifacts towards the remaining sword shuttles of the Fireweavers. The remaining sword shuttles have been surrounded by Zhao Hai's own sword shuttles. It was impossible for them to get out now.

When speaking about the flexibility of the sword shuttles, how could the sword shuttles controlled by people of the Giant Spirit Realm contend against Zhao Hai's sword shuttles? These shuttles were controlled by Laura and the others. They were completely able to cooperate with each other which allowed them to get rid of the sword shuttles with only two of their own shuttles being damaged.

Seeing Zhao Hai come over, the people of the Giant Spirit Realm inside the sword shuttles knew that they were going to die. One of the teams inside a sword shuttle couldn't help but turn mad as one of them roared, "Don't worry about other things, let's just rush towards Zhao Hai. Even if we die today, we'll take him down with us!"

When the others heard this, they stared. Then their expressions turned mad as well as they agreed. Then they commanded their sword shuttle to charge towards the Hell King's Ship.

The person the Giant Spirit Realm hated the most right now was Zhao Hai. This was because it was Zhao Hai who destroyed their plans. It can be said that the reason for the Giant Spirit Realm's fall was Zhao Hai. Adding on to their hatred against the Hundred Treasures Realm, their hatred towards Zhao Hai had reached an all-time high. It was understandable for them to go crazy over this battle.

Zhao Hai also noticed this particular sword shuttle. The body of this sword shuttle was filled with damage. Some of the damage was caused by Zhao Hai's sword shuttles while some were from the Hell King's Ship's cannons. Now that this sword shuttle was charging over with no disregard, it gave off quite a desperate look.

Zhao Hai smiled faintly and said, "Interesting, they're true warriors. Then let me fulfill their wish." With a thought, the Hell King's Ship turned and met the sword shuttle's attack head-on. The sword shuttle was completely destroyed, nobody inside it survived.

On the tip of the Hell King's Ship was a formation breaking spirit snake needle. So how could the sword shuttle defend against it? After the collision with the first sword shuttle, it fired out and hit another sword shuttle. It only stopped after going through five sword shuttles in a row. When these sword shuttles were destroyed, the other sword shuttles suddenly stopped in place.

Zhao Hai was somewhat confused. He didn't know what these people were doing. He also stopped his sword shuttles. He wanted to see what the other sword shuttles would do.

At this time, Zhu Lie and his men could no longer use their rifle technique. Some of them even died from excessive use.

When Zhu Lie and his men released their rifle technique, their strength was greatly weakened. Zhao Hai saw this and picked up his communicator to talk to Mu Yu who was in the Pagoda, "Brother Mu, bring the two other large artifacts and deal with the Fireweavers. Let the cultivators go out and kill the enemy. If they dared to form a defensive line, use the cannons."

Mu Yu quickly replied, "Alright. I'll leave the sword shuttles to you. Keep a good one for me. I still don't have a good flying artifact of my own."

Zhao Hai laughed and said, "Alright, don't worry. I'll keep one for you." Mu Yu laughed as well. Then he used the two other large artifacts and charged towards the Fireweavers and the Giant Spirit Realm army.

By this point, the Fireweaver and Giant Spirit Army didn't have a proper formation. Their lines were very loose due to Zhao Hai's initial charges. And with the Fireweavers being exhausted by their rifle technique, the army's strength rapidly dropped. This was the best time to kill them.

As Mu Yu went to deal with the Fireweavers and the Giant Spirit Realm soldiers, Zhao Hai was observing the remaining sword shuttles. He didn't know why they suddenly stopped. They still had their shields up, but who knows what's happening inside.

Originally, the sword shuttles had silver needles inside. However, Zhao Hai already withdrew the silver needles when the clashes began. He really didn't intend to keep the sword shuttles from the very beginning. So now that the sword shuttles have stopped, he has no clue what the other party wants to do.

At this time, a person from the Giant Spirit Realm came out from one of the shuttles. It was an expert in the Severed Soul Stage. As soon as he exited the sword shuttle, he bowed towards Zhao Hai and said, "Mister Zhao Hai, we're willing to surrender to the Hundred Treasures Realm. I wonder if Mister will accept?"

Zhao Hai was stunned. He didn't expect them to surrender. This was the first time that the people of the Giant Spirit Realm surrendered to him. He thought for a moment before saying, "How do I know if you really want to surrender?"

The person smiled bitterly and said, "It's up to Mister. How do you want us to prove that we surrender?"

Zhao Hai looked at the person's appearance and he didn't look like he was lying. He waved his hand as Undead from the Giant Spirit Realm appeared beside him. Then he said, "I'll be sending them over. You hand all of your weapons and spatial equipment to them. They will also seal your spiritual qi. If you agree, then I can guarantee your safety. What do you think?"

The person from the Giant Spirit Realm didn't hesitate and immediately said, "Alright." Then he waved his hand and the shield of his sword shuttle disappeared along with the shields of the other sword shuttles. Then the people of the Giant Spirit Realm began going out.

The sword shuttles weren't that big and only needed 5 people to drive. Currently, there were 24 sword shuttles remaining and 120 people from the Giant Spirit Realm. When they began going out of the sword shuttles, Zhao Hai sent his Undead. Seeing the Undead, the people from the Giant Spirit Realm couldn't help but sigh. They knew that the Giant Spirit Realm had truly lost this time. Even if the Fireweavers helped, it was now very difficult to deal with the Hundred Treasures Realm.

The cultivators of the Giant Spirit Realm gave all of their weapons and spatial equipment to the Undead. They also allowed the Undead to seal their cultivation. They didn't resist at all.

Chapter 1568: I'm The Director

Zhao Hai looked at the Giant Spirit Realm Cultivators being put inside the cabin by the Undead and sighed. He couldn't help but say deep inside, "Careless, I've been careless this time." Since he didn't have any plans with the sword shuttles, he removed the silver needles ahead of time. And with the intensity of the battle, he wasn't able to monitor the situation inside the sword shuttles. Because of this, even if these people turned, he still doesn't know if they're plotting something or not.

This also made Zhao Hai see the weakness of the silver needles. Silver needles allowed the Space to monitor anything they passed through. But if there's a high amount of energy fluctuation in the area, the Space wouldn't be able to record anything. Only the area close to the silver needles could be monitored during these situations.

Because he withdrew the silver needles ahead of time and because the energy fluctuations were intense, Zhao Hai didn't know if the Giant Spirit Realm Cultivators did indeed surrender or if they had something else planned.

But now that their cultivation has been sealed, they wouldn't be able to bust up a storm. Zhao Hai plans to wait until they return to the headquarters. When the war is over, and these people were under his supervision, then he'll see what kind of waves they plan to make.

Once Zhao Hai's side was taken care of, Mu Yu's side also went very smoothly. The Fireweavers were unable to recover from their usage of rifle technique. Their formation was very weak, so it was impossible for them to organize a proper defense.

At this time, the people inside Zhao Hai's large artifacts rushed out. Each one of them were vigorous. The enemy had already been scared out of their wits by Zhao Hai. The fight began with a huge advantage to one side.

Then after Zhao Hai subdued the remaining Giant Spirit Realm Cultivators, he drove the Hell King's Ship around. Along with his sword shuttles, he rushed towards the enemy formation.

This was the straw that broke the camel's back. Originally, the Fireweaver and Giant Spirit Realm Army was teetering on collapse. This time, they began to scatter in all directions.

Zhao Hai certainly wouldn't let this opportunity off. He sent out his Undead to chase these people down. At the same time, he followed Mu Yu and the others to clean up the battlefield.

A lot of Fireweaver and Giant Spirit Realm Cultivators died this time, Zhao Hai definitely wouldn't waste their corpses. He received them all into the Space and turned them into Undead.

When the battlefield was mostly cleaned up, Mu Yu and Tang Wen arrived on the Hell King's Ship. Both of them had smiles on their faces. Mu Yu looked at Zhao Hai and said, "Good, this is good. These people wanted to take advantage of our situation. Hahaha. This time we dealt with them ruthlessly. Let's see if they will still come to annoy us after this."

Zhao Hai glanced around and said, "The other realms would certainly know the result of our battle here. But they wouldn't dare get too close, so we can make our preparations."

Mu Yu also looked around before he asked, "How will you arrange it?"

Zhao Hai smiled faintly and said, "Just leave it to me. I can assure you that even the Detective Race will not be able to find anything out. I will create a false image to make them think that we lost a lot."

Mu Yu nodded and said, "That's good. When will you begin?"

Zhao Hai smiled faintly and said, "No rush. Let's wait until everyone comes back, then we'll begin." The reason why Zhao Hai wanted to wait until everyone was back was to let them help him with his arrangements.

This wasn't the first time that these people fought with Zhao Hai, so they were used to chasing their enemy after they won. At the same time, they know Zhao Hai's rules. After chasing the enemy for one hour, they have to come back immediately. Otherwise, Zhao Hai wouldn't be polite.

So after two hours, those who chased the enemy down began arriving back. Once everyone was back, Zhao Hai had them enter the three large artifacts; Mu Yu and the others as well. Then he controlled the three large artifacts to fly up. Zhao Hai stood in mid-air and used his hands to perform hand seals using the Infinity Technique. This was the second time he used the technique, so he was quite used to the movements. He erased all traces of battle in the area. Naturally, this erasure refers to erasing the spiritual qi fluctuations. As for the destroyed terrain, Zhao Hai didn't touch it.

After erasing the traces, Zhao Hai established some connection with the surrounding environment. Then he waved his hand and called Mu Yu and the others out. Zhao Hai also took out a large number of Fireweaver Beasts as well as undead Fireweaver and Giant Spirit Realm cultivators. After that, he directed the cultivators of the Hundred Treasures Realm to clash against the Undead.

These cultivators were curious about what was happening. They looked at the Undead with a rare sense of excitement on their faces.

They haven't done something like this before, so they were excited. Zhao Hai was like a movie director, giving action commands to the Cultivators and the Undead.

Zhao Hai released his sword shuttles once more. The three large artifacts were also armed and ready. Mu Yu and the others were curiously looking at all of these. They didn't think Zhao Hai would have such means.

After everything was ready, Zhao Hai gave his order and everyone moved. The Cultivators of the Hundred Treasures Realm used their artifacts to attack the Undead. Naturally, they were all careful in

using their techniques. They have to make it look like they were fighting hard against the Undead while they weren't really doing so at all.

The Undead were also firing back. However, their rifles were all firing blanks. Only the sound of firing was heard with no bullets. These blanks were something Zhao Hai had the processing machine make to use in situations such as these.

In order to be more realistic, Zhao Hai asked the Undead to fetch some blood from the Space's blood pool. Then he gave blood bags to the cultivators.

The cultivators didn't know what the Undead were doing, so they observed. Then Zhao Hai told them that when the blood bag exploded, they would need to feign death immediately.

These Cultivators haven't acted in a play in their entire lives, nor did they see others acting out a play. Therefore, all of these things were novel to them.

In the beginning, when the Undead were firing on them, the Cultivators were startled. Then in the end, they discovered that although the Undead were firing, there were no bullets to be seen. So even if they were confused, they understood what Zhao Hai wanted to do.

Before long, the cultivators broke their blood bags and pretended to be dead. Then they fell downward. Naturally, they didn't crash to the ground. Once they fell into the forest, they would watch others acting out their part.

The cultivators who have fallen into the forest looked at "tragic" fighting above them and couldn't help but laugh. This was the first time they saw something like this, so they found it quite interesting.

What attracted them the most was the battle between Zhao Hai's three artifacts and the sword shuttles. Of course, they were also acting, but Zhao Hai's performance was much better than the Cultivators. The sword shuttles were surrounding the three large artifacts and kept attacking. The three large artifacts were being bombarded and damaged.

The sword shuttles were like fishes as they surrounded and attacked the three large artifacts. They seem to be doing a good job preventing the three large artifacts from entering the fight.

If they didn't know that this was a play directed by Zhao Hai, the Cultivators below would think that this was a real battle. Moreover, they would think that it was a vicious battle.

After a while, a sword shuttle was hit by the Hell King's Ship's cannon. The people inside the sword shuttle flew out. As soon as they got out of the sword shuttle, a cannon shell exploded right next to them. Then these people fell down.

Seeing this, the people in the forest couldn't help but be shocked. This scene was very lifelike. They didn't expect to see something like this.

However, this wasn't the end. When the sword shuttle was taken down, the other sword shuttles became more active. All of them charged towards the Hell King's Ship. Before long, the Hell King's Ship's shield was broken through. Then the sword shuttles continued to charge, causing the cracks to appear on the Hell King's Ship's surface.

At this time, the Giant Spirit Treasure Ship and the Pagoda came over to support and knocked down more sword shuttles. However, the Hell King's Ship was still destroyed in the end. The battle continued on. The Pagoda and the Giant Spirit Treasure Ship were seriously damaged, but they managed to wipe out the sword shuttles. The cultivators of the Hundred Treasures Realm were able to follow-up and achieve victory for the realm.

However, the losses of the Hundred Treasures Realm looked very heavy. They cleaned the battlefield before slowly withdrawing. After all of these were done, all cultivators who 'died' returned to the three large artifacts.

Looking at the Hell King's Ship, Giant Spirit Treasure Ship, and the Pagoda being in good condition, the cultivators couldn't help but be surprised and impressed. The cultivators weren't in a hurry to enter the large artifacts. They were all looking at the three large artifacts with curiosity. They gathered in groups and chatted for some time. All of them looked very excited.

Mu Yu stood beside Zhao Hai and looked at the excited faces of the cultivators. He shook his head as he smiled and said, "I've been to many battles before, but I haven't seen people this happy after a big victory. Little Hai, now that we finished the play, should we leave? I don't know if we can deceive the high-grade realms with this."

Zhao Hai smiled faintly and said, "It should work. These high-grade realms trust the Detective Race too much. I let the people act like this so that the Detective Race wouldn't find out. At the same time, I tampered with the spiritual qi fluctuations. Even Immortal Experts wouldn't be able to correctly judge what happened here."

Zhao Hai wasn't speaking falsely. Immortal Experts were very sensitive to fluctuations in energy. And with their extremely long lives, Immortal Experts were experienced in the flow of war. They can definitely get information from the spiritual qi fluctuations of an area. This was the reason why Zhao Hai performed such a play.

Chapter 1569: Closest Allies

The battle has ended and the play has been performed. Nobody from the other realms would dare approach this place. It wasn't that they don't want to come, it's that they dare not come. If they came, then they would be questioned by the people of the Hundred Treasures Realm. Why did the Fireweaver and the Giant Spirit Realm army pass through their territory with no detection at all?

They were now allies of the Hundred Treasures Realm. Moreover, if they want to go to the Cloudsea Territory, then they would need to obtain coordinates from the Hundred Treasures Realm. If the Hundred Treasures Realm was offended, then they wouldn't be able to obtain any benefits.

Because of this, the other high-grade realms didn't dare to appear. If they appeared, then they would need to explain. And they would risk offending the Hundred Treasures Realm. Because of this, they chose to ignore this matter.

This decision by the high-grade realms gave Zhao Hai a chance to make his arrangements properly. Although the high-grade realms could go to the Fireweavers to find out about what happened in the battle, Zhao Hai knew that they wouldn't get anything from it. The Fireweavers would be too embarrassed with the result to tell them the truth.

Mu Yu knew that Zhao Hai was correct. He looked at the scene as he nodded and said, "Alright, let's head back. We still don't know what happened to Master and the others."

It was impossible for Mu Yao and the others to fight the Immortal Fireweaver Experts close by. Battles between Immortal Experts cause great damage to the surroundings. If they fought around the army, then collateral damage would be inevitable.

Whether it be the Fireweavers nor the Hundred Treasures Realm, none of them want to see their juniors being affected by their own battles. Because of this, Immortal Experts always chose to do their battles elsewhere.

Zhao Hai looked all around him and said, "Right. Let's head back first. If others see the three artifacts here in good condition, the play we performed before would become useless."

Mu Yu laughed, then he commanded the Cultivators to enter the three large artifacts. After that, Zhao Hai drove his artifacts back to the territory of the Hundred Treasures Realm. After a while, the three large artifacts entered the territory. This time, Zhao Hai made sure to avoid places where there were people from the subordinate realms.

Although there were a lot of people this time who came from the subordinate realms, these people had fought with Zhao Hai in the past. They all chose to fight for the Hundred Treasures Realm in the most critical time. These people could be trusted.

The reason why these people were chosen to come with them was because Mu Yao already made preparations when he received Zhao Hai's plan. The other high-grade realms need to believe that they suffered a huge loss, so everyone needs to be informed. The Hundred Treasures Realm needs to choose people who were loyal to them otherwise the plan would fail.

Because of this, Zhao Hai wasn't worried that these people would have a slip of the tongue. Even so, they still need to avoid the other subordinate realms. After all, a lot of these subordinate realms were new, they couldn't be trusted just yet.

While the three large artifacts were heading back, Mu Yu went to the cabin and met the people from the Giant Spirit Realm. The people from the Giant Spirit Realm were very behaved. Their cultivation was sealed so they all looked like ordinary people. If they dared cause trouble this time, then they would just be courting death.

The Giant Spirit Realm Cultivators who were resting inside the cabin immediately stood up when they saw Mu Yu coming in. Some of them even looked afraid. They all knew who Mu Yu was. And now that they became prisoners, if Mu Yu wanted to do something to them, they wouldn't be able to resist.

Zhao Hai has been following behind Mu Yu. He wanted to see how Mu Yu plans to deal with these people. After looking at the Giant Spirit Realm Cultivators for some time, Mu Yu sighed and said, "Since you have already surrendered to the Hundred Treasures Realm, you are one of our people from now on. I hope that you can stay with the Hundred Treasures Realm in peace and we will try to treat you as our own. But I also hope that you will not come in contact with your realm, otherwise we wouldn't be polite. We still cannot unseal your cultivation. But I can guarantee your safety."

The cultivators from the Giant Spirit Realm gave Mu Yu a bow of gratitude. Mu Yu sighed and then turned around and left. Looking at Mu Yu's expression, Zhao Hai had some thoughts.

Although Mu Yu didn't say much, Zhao Hai could hear a trace of discomfort and impatience in his tone. This was very strange. The Hundred Treasures Realm and the Giant Spirit Realm were long time enemies. Upon seeing his enemy surrender, Mu Yu should have been happy. However, he didn't look happy at all. This caused Zhao Hai to be more convinced of his previous suspicions. There were indeed people behind the Hundred Treasures Realm and the Giant Spirit Realm.

Zhao Hai followed Mu Yu out of the cabin and stood on the Hell King's Ship's deck. Mu Yu looked at Zhao Hai and said, "Little Hai, do you find it strange why I wasn't happy upon seeing the Cultivators of the Giant Spirit Realm surrender?"

Zhao Hai nodded and said, "It is indeed strange. The Hundred Treasures Realm and the Giant Spirit Realm are bitter enemies. And these people are the first batch to surrender to the Hundred Treasures Realm. You should feel happy."

Mu Yu sighed and said, "There's something that I should let you know right now. In the past, the Hundred Treasures Realm and the Giant Spirit Realm weren't bitter enemies. According to legend, in the past, our two realms were close allies. One of us would ask for help and the other party would fight for them with their lives. It can be said that we were the staunchest allies in the entire Ten-thousand Realm Battlefield."

Zhao Hai knew that the Hundred Treasures Realm and the Giant Spirit Realm had a past with each other. However, he didn't expect it to be like this. How could two very close allies become bitter enemies? What happened in between?

Mu Yu sighed and said, "Nobody knew what happened for the feud to appear. I also didn't see any records from the realm. It just said that since the two realms lost a bet, they began attacking each other. Then it slowly turned into a bitter feud."

Zhao Hai stared, he looked at Mu Yu and said, "A bet?"

Mu Yu looked at Zhao Hai and said, "Correct. The historical data says that it's a bet. It's like a joke. Two allies broke their relations because of a gamble. Two close friends became bitter enemies. I shudder every time I think of this. Little Hai, think about it, if the opponent wasn't overwhelmingly strong, how could the Hundred Treasures Realm and the Giant Spirit Realm fall out of each other over a simple bet? The other party has enough strength that the Hundred Treasures Realm and the Giant Spirit Realm couldn't do anything. These two closest allies would rather kill each other than renege on their bet."

Zhao Hai nodded as his mood turned heavy. What Mu Yu said finally confirmed his previous guesses. Zhao Hai knew that the Hundred Treasures Realm weren't afraid of a lot of things. They even had enough strength to dare fight against the Fireweavers, one of the Five Great Realms. One could see from this point that the Hundred Treasures Realm couldn't be easily manipulated.

To what extent should someone be strong enough for the Hundred Treasures Realm to bow their heads? Zhao Hai didn't dare confirm it yet, but there was one thing he was sure of. Those people were definitely stronger than the Five Great Realms.

The Fireweavers still aren't a group that Zhao Hai could treat lightly, much less people who were much stronger than them. One shouldn't just look at the ease that Zhao Hai dealt with the Fireweavers. In fact, most of the Fireweaver Race's strength was focused on the other Great Realms. If the Fireweavers really put their foot down in order to deal with the Hundred Treasures Realm, the Hundred Treasures Realm wouldn't be able to do anything. Even with Zhao Hai, it was impossible. They would be expelled from the battlefield, or the Hundred Treasures Realm would have to retreat to the Hidden Cloud Village.

But Zhao Hai didn't dare say anything. The existence behind the bet of the Hundred Treasures Realm and the Giant Spirit Realm was something that neither the current Zhao Hai nor the Hundred Treasures Realm could afford to touch.

Moreover, the strength of the Hundred Treasures Realm regressed compared to before. In the past, when the Hundred Treasures Realm and the Giant Spirit Realm were allies, their experts didn't kill each

other. But now, because of the years of conflict between the two, both sides suffered great casualties and weren't as strong as before. Zhao Hai was sure that the strength of the Hundred Treasures Realm right now wasn't as good as during the time they began fighting the Giant Spirit Realm.

Seeing that Zhao Hai was silent, Mu Yu sighed and said, "Now do you know why I'm not happy? We have defeated the Giant Spirit Realm, but what happens in the future? What would happen if the people we bet with from before appeared again? Will we become another Giant Spirit Realm? So when I see the people of the Giant Spirit Realm, I couldn't help but feel sad. I couldn't feel happy at all."

Zhao Hai nodded. He understood Mu Yu's words. It was just like what Mu Yu said. They won now, but what if those people look for them one day, what would happen then? All of these weren't up to them to decide, it all depends on the other party.

Upon thinking about it, this matter hinges on one thing, and that is strength. Only strength can determine who has the final say. If the Hundred Treasures Realm was strong, then the opponent wouldn't be able to do anything to them. Everything was because of strength.

Mu Yu looked at Zhao Hai, then he sighed and said, "I asked Master about this. It seems like he knows something about it. However, he isn't willing to tell me anything. In the end, I could only give up on asking."

Zhao Hai nodded and said, "It must be something unspeakable for even Elder Mu to keep silent about it. He knows that there's no good for us even if we know, so he didn't tell you. But I believe that he will tell us one day. He will tell us what we need to know in order to increase our strength for the Hundred Treasures Realm. Only in this way could we resist in the future."

Mu Yu nodded, "Right. Only once we increase our strength would we have a chance to resist. Let's return to the headquarters immediately. It's the only place that's safe for us. We still don't know what happened to Master and the others."

Zhao Hai replied, "Rest assured, I believe nothing bad will happen to Elder Mu and the others."

Mu Yu nodded and no longer spoke. It was also at this time that the three large artifacts slowly entered the Hundred Treasures Realm's headquarters.

Chapter 1570: Two Years Later

Not long after Zhao Hai and the others returned to the headquarters of the Hundred Treasures Realm, a group of people suddenly appeared on the battlefield. If a normal cultivator saw these people, they would certainly be frightened. It was because this was a group of Immortal Experts. They numbered more than 200.

The Immortal Experts looked at the battlefield. The more they looked, the worse their expressions became. One of the Immortal Experts said, "Senior Brother, it seems like the loss this time isn't small. Look at the spiritual qi fluctuations. It seems like we're in trouble this time."

The person who spoke was Tang Yaoen. They had just fought against the Immortal Experts of the Fireweaver Race and the Giant Spirit Realm. The other party had 200 people while their side had 300. They had the advantage in numbers. This time, they lost 13 Immortal Experts while the opponents lost 56, which can be said to be a huge victory. In the end, seeing that they had no chance of winning, the enemies retreated.

When the other party retreated, they immediately rushed back to the battlefield. But when they arrived, they found that there was nobody there. The only things left were spiritual qi fluctuations.

Although the spiritual qi fluctuations were disorderly, Mu Yao and the other Immortal Experts could still feel something. What they felt was that the battle had been very fierce.

Because of this, the expression on Mu Yao and the others' faces weren't attractive. Hearing Tang Yaoen, Mu Yao sighed and said, "I didn't expect this. Let's just return." After he said that, they flew towards the Hundred Treasures Realm's headquarters.

Not long after Mu Yao and the others left the battlefield, several figures appeared one after another. After investigating the battlefield a few times, these people retreated. And the people who came over were also Immortal Experts.

Before long, Mu Yao and the others returned to the headquarters. Once they entered the headquarters, they were stunned. The atmosphere in the headquarters was different to what they expected. They thought the headquarters would be filled with a sad mood. Instead, they were met with laughter and celebration. Everyone seems to be in a festive mood.

As soon as they returned, the people inside the headquarters immediately gave them a salute. Mu Yao and the others were quite confused. At this moment, Zhao Hai and Mu Yu joined in and offered a salute.

Tang Yaoen waved his hand and said, "Little Hai, how was the battle? How many people did we lose?"

Before Zhao Hai could speak, Mu Yao said, "Let's go in and talk." After he said that, he flew towards the conference hall. Although Tang Yaoen was still puzzled, he followed behind. Zhao Hai and Mu Yu also went to the hall.

Once everyone was inside, Mu Yao looked at Zhao Hai and Mu Yu and asked, "What's going on? How many did we lose?"

Zhao Hai turned to Mu Yu, signaling to him that he should talk first. Looking at Mu Yao's complexion, Mu Yu replied, "Replying to Master. During the battle, we lost 32 people while 73 were injured. Those who are injured have basically recovered."

Hearing Mu Yu's report, Mu Yao and the others stared. Then at this time, Tang Yaoen angrily said, "Stop talking nonsense. Little Yu, when did you learn to lie? Tell us, how many people did we lose?"

Mu Yu looked at Tang Yaoen, puzzled, before he answered, "Martial Uncle, how could I lie about this? We really lost 32 people and 73 injured. However, we managed to defeat the enemy, killing about 7000 people from the Giant Spirit Realm as well as a total of 10 thousand beasts and cultivators from the Fireweaver Race."

Tang Yaoen's expression changed. As he was about to yell, Mu Yao waved his hand to stop him. Then Mu Yao looked at Mu Yu and said, "Little Yu, you have to tell us the truth. We just came back from the battlefield and we felt the spiritual qi fluctuations. It's obvious that it has been a tragic battle. There are many traces of large artifacts falling to the ground. One of them was very huge, like Little Hai's Hell King's Ship. So how can we lose so few people?"

When Mu Yao said this, Mu Yu understood what was going on. He smiled and said, "Master, you've been deceived. The traces on the battlefield were staged by us after the battle, including the spiritual qi fluctuations. This is to deceive the other realms. In fact, the real traces of battle have been erased by

Little Hai's secret technique. We have indeed lost only 32 people and 73 injured. Those injured are already healed."

Mu Yao and the others were stunned, then they turned their heads to Zhao Hai. Zhao Hai hastily nodded and said, "It's true. This will make the others believe that we lost a lot of people. Moreover, I can guarantee that even if the Detective Race came, they wouldn't be able to see anything strange. Elders can rest assured."

Mu Yao breathed a sigh of relief, then he waved his hand and said, "You go back and rest."

Instead of leaving, Mu Yu opened his mouth and said, "Master, there's something I need to tell you. During the battle, 120 Cultivators from the Giant Spirit Realm surrendered to us. They have been locked up. Do you want to take a look?"

Hearing this, Mu Yao's expression changed, he stood up and said, "Where are they?"

Mu Yu looked at Mu Yao and felt that his reaction was somewhat strange. But in the end he said, "Inside a cave on the back mountain."

Mu Yu nodded and said, "Take me there to take a look." Although Mu Yu didn't understand why Mu Yao was acting like this, he nodded and led Mu Yao to the cave.

Mu Yu thought that Mu Yao would go take a look alone. He didn't expect all the Immortal Experts to follow behind him. This caused Mu Yu to stare, he didn't understand what was going on.

Not only Mu Yu, but Zhao Hai was also confused. But he knew that Mu Yao and the others' reaction wasn't because of the Giant Spirit Realm Cultivators. There must be something that he and Mu Yu didn't know.

Before long, everyone arrived at the cave in the back mountain where the Giant Spirit Realm Cultivators stayed. Their spiritual qi has been unblocked, but Mu Yu still didn't permit them from leaving the cave. There were also two Undead guarding the entrance of the cave.

The reason why the Undead were guarding the entrance was because Mu Yu doesn't want others to know who was inside the cave. The matter of the Giant Spirit Realm Cultivators surrendering was only known to a small number of people.

Mu Yao and the others' entry into the cave caused the Giant Spirit Realm Cultivators to be terrified. With so many Immortal Experts present, they found it very hard to breathe.

But what's strange was that Mu Yao and the others just looked at the Giant Spirit Realm Cultivators and then left. This caused Zhao Hai and Mu Yu to be even more confused.

When they returned to the conference hall, Mu Yao had Mu Yu and Zhao Hai leave. Once the two left, Mu Yao turned his head to the others and said, "It seems like it's time."

The faces of the Immortal Experts inside the hall weren't attractive. Tang Yaoen said, "The people of the Giant Spirit Realm surrendered too soon. It seems like we're in trouble this time."

Nobody spoke inside the hall for some time. Everyone's expression was difficult to look at. Mu Yao turned to the others and said, "It's natural for trouble to come. But this is also an opportunity. Didn't the Five Great Realms gain their current status because they won one time?"

Tang Yaoen nodded and replied, "Fortunately, we still have two years to prepare. Brother, what do you think we should do in these two years?"

Mu Yao shook his head, then he sighed and said, "We don't need to prepare anything. Preparing wouldn't do anything. Let Little Hai and Little Yu focus on cultivation from now on. Let's hope they can win."

Tang Yaoen stared, his expression changed as he said, "Brother, do you really want to send Little Yu and Little Hai for this? You should know how important the two of them are to the realm. If they suffer misfortune, our losses would be too great."

Mu Yao shook his head and said, "We'll make them go. Little Hai and Little Yu are the strongest we have. Since they are people of the Hundred Treasures Realm, they have to strive for the Hundred Treasures Realm. This matter is directly involved with the Hundred Treasures Realm's future. If we win, then the

Hundred Treasures Realm would gain an opportunity to grow rapidly. If we lose, even if they both remain, our Hundred Treasures Realm would still be hampered in our growth.”

Tang Yaoen no longer spoke when he heard Mu Yao. He knew clearly that what Mu Yao said was right. Even if they didn't let Mu Yu and Zhao Hai go, if the realm lost, then the realm would still suffer the consequences. They would have trouble developing in the future.

Thinking of this, Tang Yaoen couldn't help but sigh. The others inside the hall also sighed. An Immortal Elder turned to Mu Yao and said, “Old Mu, do we tell the others about this? Do we have to change our plans?”

Mu Yao shook his head and said, “There's no need to change. Let's also keep this from the others, so that they won't be distracted. In any case, even if Little Yu and Little Hai lose two years later, we won't be annihilated immediately. If our plan is successful, even if Little Yu and the others lose, we would still have enough strength to face anything.”

The other Immortal Experts nodded. Mu Yao looked at everyone and said, “Everyone, let's not return hastily this time. We'll stay in the headquarters. As long as our plan succeeds, then the strength of the Hundred Treasures Realm would at least double in the next two years. This is vital to the realm's future.”

Everyone nodded, then they stood up and bade Mu Yao goodbye before returning to their own residences. The only ones left inside the conference hall were Mu Yao and Tang Yaoen. Tang Yaoen turned to Mu Yao and said, “Senior Brother, do you think those people are really as powerful as the legends say?”

Mu Yao looked at Tang Yaoen and then forced a smile as he said, “I'm afraid they're even more powerful than what the legends say. You've seen the information. How many realms have they wiped out before? Aren't we just the next on the list? If we comply, then we'll suffer losses. If we don't comply, then we'll be exterminated. To be honest, whether it is you or me, nobody would want to take the risk.”

Tang Yaoen sighed. Although he was crude, he wasn't stupid. He knew that Mu Yao was right. From the records, they were more powerful than rumored. No realm survived under their attack. And even if they follow the rules of the bet, they would still lose. The consequences were much worse if they didn't follow.

Although Tang Yaoen had some doubts about the strength of those people, just as Mu Yao said, nobody wanted to take the risk. If the Hundred Treasures Realm gets destroyed because of their decision, then they would be sinners for the rest of the realm's history.

Tang Yaoen looked at Mu Yu and said, "Senior Brother, we need to inform Little Yu and Little Hai about this. No matter what, this is something they need to face."

Mu Yao sighed, then he nodded and said, "Let's wait a while before telling them. Let's see how the Ghost Spirit Realm is doing first. If everything went smoothly, then we'll lay down for some time. We'll wait for the proper time to inform Little Yu and Little Hai. Let's just have them cultivated in safety." Tang Yaoen nodded. The conference hall turned silent for quite a while. Both Mu Yao and Tang Yaoen didn't know that their conversation had been heard by Zhao Hai.

The conference hall has been spied on by the Space a long time ago. There were no energy fluctuations here so Zhao Hai can see perfectly inside. The words that Mu Yao and Tang Yaoen shared also fell into Zhao Hai's ears. These words aroused Zhao Hai's curiosity.

Although Mu Yao and the others were saying ominous words, Zhao Hai can infer many things from what they said. The period of two years, him and Mu Yu being sent out, the bet, these all pointed towards the bet that Mu Yu told him before.

As for why they were going, it was most likely related to the surrender of the Giant Spirit Realm Cultivators. In other words, because the Giant Spirit Realm Cultivators surrendered, they need to comply with some agreement. It's very likely that the people they would meet would be very powerful beings. They destroyed a large number of realms in the battlefield. They were also able to lift up realms in the battlefield, like the Five Great Realms.

Hearing this information, Zhao Hai wasn't worried. On the contrary, he was very happy. This was because he was now able to connect the dots and confirm an existence above the Hundred Treasures Realm and the Five Great Realms. This was exactly what he was trying to find out.

The reason Zhao Hai wanted the Hundred Treasures Realm to develop was to draw out these people. Now that his goal has been realized, he could now see who these people were. How could he not be excited about this outcome?

Laura and the others also saw the dialogue. They looked at each other with excited expressions. To be honest, they also want to see people stronger than the Hundred Treasures Realm. These might be the people who made the Ten-thousand Realm Battlefield and the Six Realms Battlefield. These were places they treated as important and they had been looking for answers for a long time. Now, they were finally very close to the answer they want.

Zhao Hai and the others wanted to know the people behind the Ten-thousand Realm Battlefield because they felt that these people were a huge threat to the Space. And they need to deal with this threat as soon as possible.
