

## **Another World 1571**

### **Chapter 1571: Peace Talks With The Ghost Spirit Realm**

While Mu Yao and the others were thinking about what would happen two years later, Zong Ze already met the people from the Ghost Spirit Realm. The two sides were fully prepared. One side was prepared for defense while the other was prepared for attack. It was a battle between the lance and the shield.

Zong Ze knew that the people from the other high-grade realms would be watching him. He didn't worry about them and just attacked on his own. Speaking of which, the Hundred Treasures Realm still had the advantage in this battle. They had Giant Spirit Treasure Ships as well as Formation Breaking Spirit Snake Needles. They didn't only have fake spirit snake needles, but genuine ones too. These were all useful instruments in attacking the opponent's defense.

Naturally, the Ghost Spirit Realm weren't easy to deal with. High-grade realms always had aces up their sleeves. However, the cards in the Ghost Spirit Realm's hands were still less compared to the Hundred Treasures Realm.

The Hundred Treasures Realm's development in the past couple of years was quite rapid. They obtained the water refining technique, the refining method for the Giant Spirit Realm, and most importantly they gained a lot of useful resources. The Hundred Treasures Realm were able to produce treasure after treasure. They now had more genuine spirit snake needles and even more fake ones.

It can be said that ever since Zhao Hai recycled the materials on Yan Planet, the Hundred Treasures Realm became very rich. They could do whatever they want without worrying about wasting resources.

This kind of domineering development was something that the Ghost Spirit Realm couldn't match. They don't have as many resources to waste on refining nor do they have efficient refining techniques. If the Hundred Treasures Realm's development was like a raging torrent, then the Ghost Spirit Realm was like boiling water.

The Ghost Spirit Realm couldn't be blamed for this. In the entire Ten-thousand Realm Battlefield, rapid development like the Hundred Treasures Realm didn't happen. Because of this, the Ghost Spirit Realm found themselves short when defending against the Hundred Treasures Realm.

Both sides began their exchange and the Ghost Spirit Realm suffered greatly. After all, the Hundred Treasures Realm had Giant Spirit Treasure Ships. The ramming strength of the ships couldn't be

underestimated, their defensive strength even more. This was especially true for the Hundred Treasures Realm's Giant Spirit Treasure Ships. Although they looked no different to the Giant Spirit Realm's ships, the Hundred Treasures Realm focused on defense when refining it. When it comes to defense, it surpassed the ships of the Giant Spirit Realm.

Although the Giant Spirit Realm also attached great importance to the defense of its Giant Spirit Treasure Ships, they were more focused on the ship's impact strength. The Hundred Treasures Realm was the opposite. This had something to do with the Hundred Treasures Realm's artifacts. In the past, the Hundred Treasures Realm used hidden weapons which were offense-focused weapons. And now, they also got their hands on rifles that had great offensive strength while requiring a small amount of spiritual force and spiritual qi. This allowed the Cultivators of the Hundred Treasures Realm to fight for a long time.

Even if the Cultivators of the Hundred Treasures Realm were still forced to learn their own artifacts before learning how to use rifles, it was inevitable that they would like the rifle even more. It didn't take long before the Cultivators of the Hundred Treasures Realm began thinking that rifles were better.

And in order to make the rifles be more effective, the shooter needs a good defensive cover. And what cover would be better than the Giant Spirit Treasure Ship? Because of this, the Hundred Treasures Realm made sure to focus on the defenses of their Giant Spirit Treasure Ships. This would allow their people to use their rifles more effectively.

Changing a large artifact's properties wasn't easy to do. Fortunately, the Hundred Treasures Realm had Zhao Hai. Zhao Hai increasing the defense of the Giant Spirit Treasure Ship can be considered to be another great achievement. He used the processing machine to adjust the formations inside the ship and iron them out, causing the Giant Spirit Treasure Ship to be more formidable.

Because of the improved Giant Spirit Treasure Ship, Zong Ze's attack went very smoothly. They clashed with the Ghost Spirit Realm several times but they had yet to suffer many casualties.

Also, there was the Formation Breaking Spirit Snake Needles helping them attack the barriers. The Hundred Treasures Realm were completely towering over the Ghost Spirit Realm. Zong Ze was also not in a hurry to finish the battle. He uprooted the camps around the Ghost Spirit Realm one by one as he advanced to their headquarters.

Zong Ze's procedure was correct. Once they got rid of the camps surrounding the headquarters, they would no longer have any worries about being attacked in the rear. They advanced towards the Ghost

Spirit Realm's headquarters like a group of hunters. They hit the Ghost Spirit Realm in their weak points, not giving them any chance to counter-attack.

Zong Ze's actions were naturally seen by the other high-grade realms. They were very surprised by the Hundred Treasures Realm's performance. They actually began to dread the Hundred Treasures Realm.

Zong Ze naturally wouldn't be polite. He urged the high-grade realms to dispatch their troops. However, the high-grade realms kept coming up with reasons to delay.

Then at this moment, Mu Yao made a move. His move was very simple, he denounced the other high-grade realms.

There's no mistake, he denounced them. He asked how the Fireweaver army passed through their territories silently. They were now allies, so Mu Yao's denouncement was well-founded. The other high-grade realms could only feign ignorance, saying that they didn't know anything.

Anyone who wasn't blind could see that this was impossible. These high-grade realms were very strict with their own territories. How can they not know that the Fireweavers passed by them? They were lying through their teeth. But since these high-grade realms still denied it, nobody could say anything. The two sides could only fight a battle of words.

The high-grade realms preferred this kind of battle. This was because they wouldn't be in a rush to join the battle between the Hundred Treasures Realm and the Ghost Spirit Realm. They only needed to delay time with the Hundred Treasures Realm.

Zong Ze and Mu Yao were shrewd old men, so how could they not know the thoughts of the other high-grade realms. But this was the result that the two of them wanted. Only then could they distract the other high-grade realms from looking deeply into Zong Ze's battle. Otherwise Zong Ze wouldn't be able to exaggerate his losses.

In this battle, the Hundred Treasures Realm intended to exaggerate the number of casualties. This way, they wouldn't have to send as many people to the Cloudsea Territory.

Naturally, the other high-grade realms were unaware of this plan. However, they noticed that the Hundred Treasures Realm would probably suffer great losses. The high-grade realms didn't think that this was strange. The Hundred Treasures Realm had now defeated the subordinate realms in the periphery of the Ghost Spirit Realm's headquarters. And the more they advance, the more resistance they would face from the Ghost Spirit Realm. It was normal for the Hundred Treasures Realm to suffer more casualties.

The fact that the Hundred Treasures Realm had more casualties and even lost a Giant Spirit Treasure Ship was the best the other realms could get for a report.

The people most worried right now were the people of the Ghost Spirit Realm. Although both sides were ready for this war, the people of the Ghost Spirit Realm didn't expect the Hundred Treasures Realm to be this savage in their attack. When the Hundred Treasures Realm wiped out the subordinate camps around the headquarters, the Ghost Spirit Realm immediately asked for help from their allies. After so many years in the Ten-thousand Realm Battlefield, the Ghost Spirit Realm were also able to establish relationships with other people. And since they're a high-grade realm, they naturally had their own allies. When they felt that they were in danger, the Ghost Spirit Realm asked for help from these allies.

However, the Ghost Spirit Realm were bound to be disappointed. These so-called allies came up with all kinds of excuses to reject their request. Even if the Ghost Spirit Realm gave favorable conditions enough to tempt high-grade realms, nobody agreed.

This caused the people of the Ghost Spirit Realm to be surprised. They discovered that something was wrong. According to past events, these other high-grade realms would definitely send troops in order to get benefits and stop the Hundred Treasures Realm from expanding. It was killing two birds with one stone.

However, it seems like the high-grade realms were in an agreement. They were indifferent to the battle between the Ghost Spirit Realm and the Hundred Treasures Realm. This wasn't good news. An agreement between the other high-grade realms wasn't something that the Ghost Spirit Realm wanted to see.

It was also at this time that the Ghost Spirit Realm thought about Zhao Hai's successful return from the expedition. They immediately understood that Zhao Hai and the others might have come upon a treasure while out at sea. These high-grade realms were now in an alliance with the Hundred Treasures Realm in order to get benefits from the sea. If this was the case, then it's natural that the other high-grade realms wouldn't offer any help.

When they reached this conclusion, the Ghost Spirit Realm could no longer sit still. They knew very well that if the Hundred Treasures Realm were in an alliance with the other high-grade realms, it wouldn't just be as simple as ignoring their plea. It's highly probable for these high-grade realms to help the Hundred Treasures Realm in attacking them. This wasn't something the Ghost Spirit Realm wanted to see.

The more they thought about this, the more they were convinced. The people of the Ghost Spirit Realm couldn't help but despair. If the Hundred Treasures Realm were really allied with the other high-grade realms, then that would be the end. Even if they asked for help from the Five Great Realms like the Giant Spirit Realm, it was still impossible to stop the Hundred Treasures Realm. The entry of the Five Great Realms meant that the other realms would definitely work against them. Once the other high-grade realms enter the fight, even the Five Great Realms have to withdraw.

Being a high-grade realm themselves, nobody knows about the high-grade realms of the Ten-thousand Realm Battlefield more than the Ghost Spirit Realm. The high-grade realms were envious of the Five Great Realms. If the Five Great Realms come to attack, then the high-grade realms would abandon their grudges and unite against the enemy. This was the agreement reached by the high-grade realms in the battlefield.

Because of this, the Ghost Spirit Realm didn't dare seek any help from the Five Great Realms. Doing so would be akin to pushing themselves into the pit of death. If they asked for help from the Five Great Realms, then they would follow the footsteps of the Giant Spirit Realm. But if they don't ask for help from the Five Great Realms, then they wouldn't be able to resist the Hundred Treasures Realm with their own strength. This caused the people of the Ghost Spirit Realm to be in a dilemma.

While the Ghost Spirit Realm were having a headache, the Hundred Treasures Realm continued their attack. Moreover, they became more fierce. The medium-grade camps were broken through one after another. The Ghost Spirit Realm were slowly being pushed into the edge of a cliff. If they can't deal with the Hundred Treasures Realm, it's possible for their subordinate realms to rebel.

After looking into the situation, the higher-ups of the Ghost Spirit Realm finally made a decision. They would negotiate peace with the Hundred Treasures Realm!

The Ghost Spirit Realm wanted peace talks!

The Hundred Treasures Realm didn't expect this; the other high-grade realms as well. In this kind of conflict between high-grade realms, the losing party rarely went for peace talks. It looked strange. What would a losing party bring to the table during the talks?

In fact, in battles between two high-grade realms, the one who demands for peace talks would be the winning side. They will ask for benefits and the two would reach an agreement. The losing side couldn't afford asking for peace talks. If they offer peace talks, then they would be gutted by the winning party. They would rather desperately resist. Even if they can't win, at least they would cause the other side to lose a lot. This way, the enemy would retreat.

Because of this, it was widely accepted in the battlefield that the winning side would be the one who asks for peace talks. The winning side knew clearly that if they didn't ask for peace, then they would pay a huge price. Then other realms would prey on them in the future.

The Hundred Treasures Realm was confused when they heard that the Ghost Spirit Realm was asking for peace talks. They didn't believe it at first. But later on, they confirmed that it was true. This was because the Ghost Spirit Realm sent an Immortal Expert over to meet the Hundred Treasures Realm and presented very generous conditions .

Looking at the Ghost Spirit Realm's representative, Zong Ze hesitated. To be honest, the Ghost Spirit Realm wasn't easy to fight. Even with the Giant Spirit Treasure ships and the rifles, it was practically impossible to annihilate them.

Although the other high-grade realms agreed to send troops, Zong Ze hasn't seen even one soldier from them. If this continues, the Hundred Treasures Realm would truly lose a lot. By then, the Hundred Treasures Realm would have trouble digesting the new territory.

But if the Hundred Treasures Realm agrees to the peace talks, they wouldn't be able to explain themselves to the high-grade realms. This situation was a headache to Zong Ze. They dealt with the Ghost Spirit Realm mainly because they didn't want them to cause trouble when the Hundred Treasures Realm goes to the Cloudsea Territory, and also as a retaliation for the Ghost Spirit Realm's action against Zhao Hai. With the other high-grade realms not showing themselves, Zong Ze was in a dilemma.

While Zong Ze was hesitating, the other high-grade realms finally dispatched troops. These realms were paying attention to Zong Ze's next moves. They already got the report that the Hundred Treasures realm lost a lot of people as well as Giant Spirit Treasure Ships. Since these realms couldn't just show themselves to look directly at the battle, they believed the reports sent by the Hundred Treasures Realm. Seeing that the Ghost Spirit Realm wanted to have peace talks and the Hundred Treasures Realm inkling to agree, these high-grade realms could no longer sit still.

In their minds, because the Hundred Treasures Realm suffered big casualties, they were also inclined to agree to the peace talks. If the two sides reached an agreement, then the other high-grade realms wouldn't be able to fish for benefits. Therefore, they decided to send their troops.

Looking at the troops, the Ghost Spirit Realm immediately confirmed their previous speculation. They also understood that their grievance with the Hundred Treasures Realm was just a distraction. The main reason these high-grade realms moved against them was because there was something they needed to do in the sea.

Although the Ghost Spirit Realm didn't know what Zhao Hai and the others discovered, they were sure that what they saw wasn't simple. After all, not a lot of things could compel all these high-grade realms to team up.

As soon as the Ghost Spirit Realm saw this, they knew that no matter what they did, these high-grade realms wouldn't let them off. The Ghost Spirit Realm also suffered a lot of losses, so they gathered their people and then withdrew from the Ten-thousand Realm Battlefield. But as they left, they told the Five Great Realms that a treasure had been found in the sea. Their motive was very obvious. Since you want to drive us away from the Ten-thousand Realm Battlefield to prevent us from causing trouble, then we'll bring you exactly that. Let's see if you have the ability to drive the Five Great Realms away from the Ten-thousand Realm Battlefield.

This was a typical retaliation. This wouldn't give the Ghost Spirit Realm any benefits, but they still did it. The high-grade realms might be angered, but it would be impossible for them to take revenge on the Ghost Spirit Realm.

All the high-grade realms discovered this, including the Hundred Treasures Realm. Although the Ghost Spirit Realm has been expelled, they now have five more powerful groups looking at their backs. This caused their backs to be very unsteady.

But no matter what, the elimination of the Ghost Spirit Realm was good for the high-grade realms. After all, they were able to cut up the territory of the Ghost Spirit realm.

With the withdrawal of the Ghost Spirit Realm, the Hundred Treasures Realm and the others completely seized their territory. All the high-grade realms sent representatives to the Ghost Spirit Realm's headquarters in order to conduct negotiations.

The negotiation was naturally about how to divide the territory of the Ghost Spirit Realm. And in these negotiations, Zong Ze, the Hundred Treasures Realm's representative, proposed that since the Hundred Treasures Realm just lost a lot of people in the recent two battles, they would give away the coordinates of the Cloudsea Territory's transmission formation. And this time, they wouldn't be going with the other high-grade realms. However, they wouldn't give up the coordinates for nothing, they wanted more territory for themselves.

The Hundred Treasures Realm expended a lot of resources to evict the Ghost Spirit Realm from the Ten-thousand Realm Battlefield. Additionally, the Hundred Treasures Realm gave up the first opportunity to venture into the Cloudsea Territory and even handed out the coordinates. Naturally, the Hundred Treasures Realm had a point in asking for more territory.

Although the other realms didn't agree at first, they also thought that they had been too excessive lately. And the Hundred Treasures Realm would no longer go with them to snatch benefits in the Cloudsea Territory. Most importantly, they also want the Hundred Treasures Realm to keep a close watch on the Five Great Realms.

When the Ghost Spirit Realm left, they also sent information to the Five Great Realms about the sea. The high-grade realms didn't believe that the Five Great Realms would just sit still. As long as there's benefit to be grabbed, the Five Great Realms would surely try to get a share.

If the Hundred Treasures Realm didn't go, then they could keep an eye on the Five Great Realms. Once the Five Great Realms sent troops, the Hundred Treasures Realm would be able to send troops of their own to react. This would win some time for the other high-grade realms.

It was because of this consideration that the other high-grade realms agreed to the Hundred Treasures Realm's request. They agreed that the Hundred Treasures Realm would stay behind and also get more territory. The result caused the Hundred Treasures Realm to be secretly delighted. The other high-grade realms secretly laughed. In the end, the Hundred Treasures Realm gave up on the Cloudsea Territory and handed over the coordinates in exchange for territory in the Ten-thousand Realm Battlefield.

After things settled down, Zong Ze and his people returned to the headquarters. At the same time, they handed the coordinates of the transmission formation to the high-grade realms. It also included information that Zhao Hai gathered about Ye Island.

The other high-grade realms didn't suspect the Hundred Treasures Realm. In their minds, the Hundred Treasures Realm just passed through two battles and lost a lot of people. It would be strange if they didn't suffer any losses.

Moreover, to guarantee the Hundred Treasures Realm's words, the high-grade realms invited the Detective Race to reconstruct the battles. Naturally, what they got was the scene that Zhao Hai staged. The high-grade realms finally settled their anxieties and prepared to head towards the Cloudsea Territory.

After dealing with these matters, the Hundred Treasures Realm entered a calm period. In this period of time, the Hundred Treasures Realm digested the new territory that they gained.

Of the territory they obtained, it was natural for the lands to be under the Ghost Spirit Realm's subordinate realms. They were now under the Hundred Treasures Realm, so the Hundred Treasures Realm needs to make sure to control them well.

Actually, for these subordinate realms, there's no difference if they were under the Ghost Spirit Realm or the Hundred Treasures Realm. The tribute they needed to give was the same and they practically lost nothing. Because of this, there wasn't much resistance. After all, these subordinate realms also need to consider their own well-being. There's no use for them if they kept being loyal to the Ghost Spirit Realm.

Also, the Ghost Spirit Realm hadn't been a good guardian. In addition to tributes offered every year, the subordinate realms would also lose a couple of experts once in a while. It was highly probable that the Ghost Spirit Realm killed these experts and turned them into corpse soldiers. But since these subordinate realms couldn't show any evidence, they could only let this matter go.

Now that they were under the Hundred Treasures Realm, not only did the required tributes decrease, the subordinate realms also didn't need to worry about their experts suddenly disappearing. These subordinate realms didn't resist the Hundred Treasures Realm. In fact, they are happy to be under the Hundred Treasures Realm.

It must be said that the two battles provided huge harvests not only to the Hundred Treasures Realm, but also to Zhao Hai. Because of the two battles, the number of high-level Undead in Zhao Hai's control has increased. This was especially true for his army of Undead Immortal Experts. Zhao Hai now has about a hundred of them, 50 of which were given to him recently by Mu Yao and the others.

When Mu Yao and the others fought the Immortal Experts of the Giant Spirit Realm and the Fireweaver Race, they were able to kill more than 50 Immortal Experts. Those who were killed by them were handed over to Zhao Hai to become Undead. As for the Immortal Experts on their side who were killed, they were given a proper burial by the realm.

To Mu Yao and the others, this was revenge. At the same time, turning these Immortal Experts into Undead would mean that they would be able to get information out of their mouths. But the one who benefited the most was still Zhao Hai. The Space now has a lot more Immortal Experts. The Undead Army not only increased in strength, but the faith power they provided also increased by a lot. Faith Power provided by an Undead Immortal Expert was a dozen times more than a Severed Soul Expert. So this time, Zhao Hai was the biggest winner.

But now, this biggest winner was in Hidden Cloud Village along with Mu Yu. The Hidden Cloud Village has been developing properly. The Cultivators in the island were diligently fulfilling missions to exchange for goods. This made the residents of the island happy. And with Zhao Hai and the Hundred Treasures Realm's support, their cultivation progressed very quickly. Their happiness also became loyalty towards the Hundred Treasures Realm.

#### Chapter 1573: Cloud Beast Spiritual Qi

Zhao Hai and Mu Yu were in a room looking at the cloud beast in front of them. This was a tiger cloud beast. Its level wasn't low and was something that people in the Hidden Cloud Village couldn't acquire. It was captured by Zhao Hai and Mu Yu using the Hell King's Ship.

The reason they took this cloud beast was because they wanted to perform some experiments. They wanted to see if the cloud beasts could be of any use for the Hundred Treasures Realm.

Zhao Hai looked at Mu Yu and said, "Brother Mu, I think it's better if we leave this to someone else. You don't need to test it yourself." Zhao Hai was completely immune to the dark clouds, so he didn't really

need these cloud beasts. If he wanted to test the effects of the Cloud Beasts, then he could only ask other people.

Although Zhao Hai knew that he would be sent somewhere with Mu Yu two years later, he didn't show it. In any case, it wasn't a big deal to Zhao Hai, he has been waiting for that day.

With the matters of the Hundred Treasures Realm pretty much taken care of, Zhao Hai and Mu Yu went back to Hidden Cloud Village. Then, using the Hell King's Ship, they went to the Sea of Beasts and caught the cloud tiger.

Originally, Zhao Hai wanted to leave this experiment to other people. As soon as they put it forward to the realm, they would be able to arrange someone to be in charge. But this time, Mu Yu wanted to do the experiment himself. This caused Zhao Hai to feel worried.

Mu Yu smiled faintly and said, "Don't worry, it'll be fine. In any case, I've already learned how to subdue these cloud beasts. Moreover, aren't you here? If you protect me, I would have nothing to fear."

Zhao Hai looked at Mu Yu and then said, "Alright, but if there's something wrong we need to stop immediately."

Mu Yu nodded, then he looked at the unconscious cloud beast. He slowly raised his hand as he recited incantations. At the same time, the index finger on his right hand lit up with spiritual qi. Then he used his right index finger to cut his left middle finger. A drop of blood quickly appeared on Mu Yu's left middle finger. Mu Yu then flicked the drop of blood towards the cloud tiger's forehead. All this time, he didn't stop reciting his incantation.

The blood that dripped on the forehead of the cloud tiger glowed red. The red light became brighter and brighter and the cloud tiger's body began to tremble. Then as the red light covered the entire body of the cloud tiger, its body began to shake severely. The cloud tiger began to absorb the red light little by little before it completely disappeared. A red dot remained on the cloud tiger's forehead as it stopped shaking. Then the cloud tiger opened its eyes. It looked at Zhao Hai first before turning its head to Mu Yu, its eyes lit up with joy.

The cloud tiger immediately jumped to Mu Yu's side and nudged him using his head. Mu Yu also had a happy expression as he reached out and scratched the cloud tiger's neck. The cloud tiger closed its eyes and let out a comforted grunt, which made it look very cute.

Zhao Hai smiled, he looked at Mu Yu and said, "Big Brother Mu, try using the cloudbeast token. Here, give this to it." After talking, Zhao Hai took out a piece of white cloud and handed it to Mu Yu.

Mu Yu nodded, then he took the white cloud and then fed it to the cloud tiger. The cloud tiger lowered its head and then ate the white cloud in a couple of bites. Then Mu Yu took out a cloudbeast token and used it. A huge cloud tiger phantom suddenly appeared on the cloudbeast token before the cloud tiger was sucked in.

Mu Yu felt with his spiritual force and found the cloud tiger inside the cloudbeast token. It didn't look uncomfortable at all, so Mu Yu was relieved.

Actually, Mu Yu's worries were somewhat unnecessary. The cloudbeast token has been used in the Cloudsea Territory for many years. The people in the territory used it for as long as they can remember. It was the most suitable vessel for cloud beasts to survive in. Not only can the beasts move inside the token, they could also provide help for their master's cultivation. If it weren't for its inability to store white clouds, the cloudbeast token would have been perfect.

Seeing that the cloud tiger was doing well, Mu Yu tried to communicate with it using his spiritual force. He wanted to see if he could get spiritual qi from the tiger to use in cultivation.

Before long, Mu Yu was able to convey his thoughts to the tiger. The tiger seems to pause before Mu Yu felt a trace of spiritual qi slowly pass from the cloudbeast token to his body. Mu Yu was overjoyed. He immediately guided the spiritual qi according to his cultivation method.

But it didn't take long before Mu Yu discovered a problem. Although the spiritual qi entered his body, it was completely different from his own spiritual qi. The spiritual qi inside his body actually treated this new spiritual qi as something foreign and expelled it. This caused Mu Yu's expression to change.

Mu Yu didn't dare absorb the spiritual qi from the cloudbeast token and immediately stopped the cloud tiger from giving it to him. At the same time, he used his spiritual force to quickly refine the spiritual qi. It took quite a while before he managed to completely refine the spiritual qi.

Zhao Hai also discovered that something was wrong with Mu Yu, but he didn't intervene. Although something was wrong with Mu Yu, it wasn't dangerous. There's no need for him to provide any help.

After refining the spiritual qi, Mu Yu let out a long breath, then he turned his head to Zhao Hai before shaking his head and saying, "It's no good. I can't use all of the cloud beast's spiritual qi. My body treats the spiritual qi as foreign and repels it."

Hearing this, Zhao Hai knit his brows and said, "The spiritual qi attribute is different to yours?"

Mu Yu nodded and said, "It's possible. You should know that the spiritual qi we usually absorb has no attribute. But even spiritual qi with attributes can be absorbed. The spiritual qi from the cloudbeast token is completely different than the ones we're used to. The spiritual qi seems to have its own consciousness. Naturally, spiritual qi that has a consciousness would be treated as foreign by our bodies. We'll have to either expel it or refine it for use. We can't use it as is."

Zhao Hai frowned, then he stretched his hand out and said, "Brother Mu, release some of your spiritual qi and place it in my hand." Mu Yu nodded and released his spiritual qi towards Zhao Hai's hand. Then the spiritual qi slowly entered Zhao Hai's body.

When Mu Yu's spiritual qi entered Zhao Hai's body, naturally since it was a foreign spiritual qi, he needed to slowly refine it. But it helped that he already knew Mu Yu's attributes.

Zhao Hai turned his head to Mu Yu and said, "Brother Mu, put the spiritual qi from the cloudbeast token in my hand next." Mu Yu nodded. Although he couldn't use the spiritual qi inside the cloudbeast token, he could still control it.

After the spiritual qi entered Zhao Hai's body, Zhao Hai immediately felt how different it was compared to Mu Yu's spiritual qi. Then he felt how different it was compared to the spiritual qi he was used to.

This spiritual qi also had no attribute just like normal spiritual qi that Mu Yu could use. However, the spiritual qi has its own consciousness, making Mu Yu unable to absorb it like normal.

This so-called consciousness didn't mean that the spiritual qi was alive, but it had something to do with the cultivator. Spiritual qi existed between heaven and earth. It was unconscious and completely free. It doesn't belong to anyone and anyone can use it.

But once a cultivator absorbs spiritual qi into their body using their spiritual force, this means that they had taken ownership of that spiritual qi and it became branded with their consciousness. This conscious spiritual qi can be used to attack enemies and even infiltrate other cultivators' bodies and destroy them from within.

Naturally, there's another example. That was when a cultivator was injured and was healed by a fellow cultivator. The cultivator would inject their spiritual qi into the injured cultivator's body. The injured cultivator needs to allow the foreign spiritual qi inside their body. This way, they can guide the spiritual qi onto their meridian and use it for themselves.

The spiritual qi provided by the cloudbeast token was taken from the cloud beast inside. Although the cloud beast has been subdued by Mu Yu, the beast was still self-aware. Naturally, the spiritual qi of the beast was branded to be its own. When Mu Yu received the spiritual qi, he didn't expect that the spiritual qi would have a consciousness. Because of this, he didn't hesitate to take it into his body. This caused his own spiritual qi to reject it and treat it as foreign.

Thinking of this, Zhao Hai slowly opened his eyes. Mu Yu anxiously looked at him. If Zhao Hai couldn't find a way to utilize the spiritual qi from the cloudbeast token, then the people of the Ten-thousand Realm Battlefield would have difficulties in fighting against the cultivators of the Cloudsea Territory.

Looking at Mu Yu's expression, Zhao Hai smiled faintly and said, "Brother Mu, it's fine. I already expected this issue to come up. Although the spiritual qi of the cloudbeast token has consciousness, it is completely harmless to you. Try to treat it as beneficial to your body, just like when someone heals you."

Hearing Zhao Hai, Mu Yu hesitated for a while. Cultivators rarely trusted others, so they only accepted healing from a very small number of people. Although receiving healing from others would accelerate their recovery, cultivators weren't willing to take the risk.

Accepting another person's spiritual qi meant that one would need to remove their defenses. If the other party had evil thoughts, then they would be able to have a hold on the person's life. Because of this, cultivators almost never accept healing from other people.

It was also because of this that Mu Yu hesitated when he heard Zhao Hai's suggestion. However, he quickly removed this thought. He didn't believe that Zhao Hai would deceive him over this.

Mu Yu closed his eyes and then allowed the cloud tiger's spiritual qi to enter his body. When the spiritual qi entered his body, it didn't cause any damages but instead quickly fused with Mu Yu's own spiritual qi. There were no problems at all.

Mu Yu was ecstatic, he opened his eyes as he looked at Zhao Hai and said, "It works."

Zhao Hai smiled faintly and said, "You need to get used to this feeling. Moreover, the cloud tiger also needs to get used to it. Only by doing so can you frequently receive the cloud tiger's spiritual qi."

Mu Yu nodded and said, "Let me test it first." After saying that, Mu Yu closed his eyes and fully received the spiritual qi provided by the cloudbeast token. At the same time, he had the cloud tiger increase the amount of spiritual qi supplied.

Zhao Hai couldn't help but smile when he saw Mu Yu's appearance. Then he suddenly thought of something. He couldn't help but pat himself in the head as he cursed himself. Since the beasts of the Space now had the same ability as cloud beasts, they could also provide spiritual qi for him just like Mu Yu's cloud tiger. But these beasts were inside the Space and not the cloudbeast token. However, Zhao Hai believed that this wouldn't be a problem. After all, the Space was a higher-level version of the cloudbeast token.

If what Zhao Hai suspected was true, then this would be equal to an innumerable amount of beasts supplying him with spiritual qi. His strength would certainly skyrocket.

Thinking of this, Zhao Hai immediately relayed his idea to Cai'er. Hearing Zhao Hai, Cai'er immediately agreed. The Space's beasts were completely loyal towards Zhao Hai, so their spiritual qi would never bring harm to him. Zhao Hai immediately closed his eyes and began his experiment.

Just as the beasts began to send him spiritual qi, Zhao Hai immediately felt an incomparably strong wave of spiritual qi coming from the Space. Although he was prepared to receive it, he didn't think that it would be this much. It was like a person using a bucket to fetch water. He expected to only get a bucket's worth of water but the river suddenly sent him a huge wave.

It's fortunate that Zhao Hai's body was formidable. If it was another person, then their body would have exploded from too much intake of spiritual qi. Even so, Zhao Hai still ordered the beasts to stop sending spiritual qi.

Zhao Hai took quite some time to digest the spiritual qi he received. He wasn't planning on giving up on this method. It was just that it gave too much spiritual qi. Actually, Zhao Hai underestimated how many beasts there were inside the Space as well as how strong they were.

After thinking about this, Zhao Hai immediately told Cai'er to investigate the amount of spiritual qi that the Space's beasts could provide given that it wouldn't disturb their cultivation and growth. After that, they calculated how much spiritual qi Zhao Hai can comfortably absorb, then that amount of spiritual qi would be sent over.

#### Chapter 1574: Urgent Recall

If it was someone else, the calculations would have made them collapse. However, Cai'er felt no pressure at all. This was because Cai'er has been integrated with the Space and knew everything about it. It was too easy for her to calculate these things.

There's also Zhao Hai's request to limit the spiritual qi supply so that the beasts' cultivation wouldn't be affected. Zhao Hai knew that the beasts in the Space were also part of his strength. Zhao Hai didn't want the beasts to sacrifice themselves for him.

Naturally, this request was easy to accomplish. There were just too many beasts inside the Space. Cai'er could just calculate the safe amount to be sent to Zhao Hai.

Before long, Cai'er calculated that the amount of spiritual qi that the Space's beasts could safely send Zhao Hai was still too much for him. Even Immortal Experts would find it very hard to digest this much spiritual qi. Moreover, this was still spiritual qi that was sent by a fraction of the beasts. If all of the beasts were to send spiritual qi, then an Immortal Expert wouldn't have a good time digesting it.

Cai'er tuned the amount of spiritual qi to be sent to Zhao Hai and began sending it to Zhao Hai's body.

Originally, because of Zhao Hai's Ten-thousand Transformations Yin-Yang Art, he was able to cultivate all the time. If Zhao Hai was cultivating alone in the past, then now it was as if he had another person to cultivate for him. And it was cultivation that happened at all times. This increased Zhao Hai's cultivation speed by several folds.

Spiritual qi absorbed by cultivators weren't always constant. It was influenced by their location, mood, and current body state.

But for Zhao Hai, there's no need to consider the optimal conditions for cultivation. The amount of spiritual qi that Cai'er sends to Zhao Hai from the Space was akin to being in the perfect state of cultivation at all times. This was impossible for others to do. Even people in the Cloudsea Territory couldn't do this.

Cai'er's computational speed couldn't be underestimated. She began her calculations as soon as Zhao Hai asked her to. Before long, Zhao Hai felt a constant stream of spiritual qi entering his body. Only then did he slowly open his eyes.

Normally, when a cultivator is injected with spiritual qi, they would need to use their own spiritual qi to guide it through their body. It was precisely because of this that the cultivators of the Cloudsea Territory could use more spiritual qi compared to the cultivators of the Ten-thousand Realm Battlefield.

However, Zhao Hai didn't have this problem. The Ten-thousand Stellar Transformations Yin-Yang art that he practices operated at all times. Because of this, any spiritual qi sent to Zhao Hai's body was immediately refined and circulated along his cultivation path. Zhao Hai simply didn't need to worry about it.

Zhao Hai looked at Mu Yu opposite him and saw that the spiritual qi inside Mu Yu's body was becoming richer and richer. It seems like he was also getting used to the process.

Actually, this type of cultivation wasn't difficult for Cultivators in the Transcending Tribulation Stage and above. This was because their spiritual force was already formidable. Even if they use part of their spiritual force to take control of the new spiritual qi, there would be no problems.

Zhao Hai stood up and walked out of the room to take a look outside. Some of the Cloudsea Territory Cultivators were looking after the herbs on the medicinal fields. These herbs had already taken root and

sprouted. The herbs were different from the ones in the battlefield. They now looked like the cloud herbs of the Cloudsea Territory. However, Zhao Hai knew that this was only a superficial effect. The medicinal potency and properties of these herbs weren't changed in any way.

The ones looking after the herbs were the older residents of the island. Since they weren't able to go outside to catch cloud beasts, they could only take the job of watching over the herbs. Although the contribution points they received were less, it was a relatively safer job.

Hidden Cloud Village was currently undergoing a period of gentle development. It was developing very well. Zhao Hai not only posted missions here and planted herbs, he also planted cloud rice and cloud vegetables on the island. And with all kinds of cultivation resources sent over by the Hundred Treasures Realm, the island can be treated as a branch of the Hundred Treasures Realm.

The people of the Hidden Cloud Village were now regarding themselves as members of the Hundred Treasures Realm. This wasn't to say that they betrayed the Cloudsea Territory. For the people in the Hidden Cloud Village, the Cloudsea Territory had never accepted them as one of theirs.

They were able to reach their current situation with their own efforts. The actual rulers of the Cloudsea Territory, the Big Clans, didn't provide them with any help and they even suppressed them. In the end, they can only escape to the Hidden Cloud Village and wait for their death like prisoners. As time passed by, their sense of belonging towards the Cloudsea Territory has disappeared.

On the other hand, the Hundred Treasures Realm provided them everything they always wished for. If these people didn't side with the Hundred Treasures Realm, then they have no heart.

Regarding the development of the Hidden Cloud Village, Zhao Hai was very happy. This was a bridgehead for the Hundred Treasures Realm to move in and out freely in the Cloudsea Territory. And because the Hidden Cloud Village was close to the Sea of Beasts, they can get a large number of cloud beasts. With these cloud beasts, not only could the people of the Hundred Treasures Realm increase their strength, they can also adapt to the environment and be more prepared in attacking the Cloudsea Territory.

Zhao Hai stood in front of the door as he continued to look around the village. The scattered yet organized cloud houses looked very beautiful. Cultivators could be seen having a leisurely chat here and there. The increased vitality of the island made the Hidden Cloud Village more attractive.

At this time, Zhao Hai felt that Mu Yu had awakened. He turned his head and saw Mu Yu standing. Zhao Hai looked at Mu Yu and asked, "Brother Mu, how is it?"

Mu Yu smiled and said, "It's very good. It felt very good. It seems like the experiment is a success. I think we should send word back. Let people come over to receive cloud beasts."

Zhao Hai nodded and said, "Those guys from the other realms really think that the Cloudsea Territory is a soft persimmon. Although we already provided them with an introduction to the Cloudsea Territory, I don't expect them to take it to heart. They're all filled with the thought of finding new territories to conquer. Let's see them suffer for once, to teach them a lesson."

Mu Yu smiled and said, "Perhaps those people think that the information we gave was fake. Just to prevent them from leaving the Ten-thousand Realm Battlefield."

Zhao Hai coldly snorted and said, "It's better if they don't believe us. The more they lose in the Cloudsea Territory, the sooner our plan can start. Brother Mu, send word back to the realm. Let them come here to collect the cloud beasts and get familiar with the environment of the territory. The people of the Hidden Cloud Village can help them in this aspect."

Mu Yu nodded and took out a jade sword message, wrote the message, and released it. Before long, a white light flashed from the Hidden Cloud Village's transmission formation. Tang Jie and other cultivators from the Hundred Treasures Realm appeared. Mu Yu didn't expect Tang Jie to be one of the first people to come to the Hidden Cloud Village to get cloud beasts.

Tang Jie went towards the two and gave his greetings, "Big Brother Mu, Brother Hai, the Elders asked the two of you to return. I'll take responsibility for this place temporarily."

When he heard this, Zhao Hai's heart moved. He could almost guess why the Elders called them back. He didn't expect this day to come this quickly. But since Mu Yu didn't know anything, he knit his brows and said, "But why? Hidden Cloud Village is now on the right track and there are still things to deal with. Little Hai and I cannot leave now, and you're not familiar with this place."

Tang Jie smiled and said, "It'll be fine. You can give me some pointers and I'll learn slowly. And the Elders seem to be anxious. I think you should head back and take a look."

Mu Yu sighed, he nodded and said, "Alright, we'll go back. Little Jie, come with me. I'll explain everything about this place to you." Tang Jie complied and then walked around the Hidden Cloud Village with Mu Yu. He was also told about how to use the cloud beasts and how to transfer spiritual qi. After everything was done, Mu Yu said, "Little Jie, the Hidden Cloud Village is very important for the realm. You need to take good care of this place and arrange people to venture into the Sea of Beasts to adapt to the environment. However, you need to watch out for the major powers of the territory. Understand?"

Tang Jie nodded and said, "Don't worry, Brother Mu. There'll be no problems. After a while, an Immortal Expert will be sent here to supervise. You can rest assured."

Hearing Tang Jie, Mu Yu nodded and said, "Alright, then we're leaving this place to you. If something is wrong when we return, you'll see how I deal with you."

Tang Jie gave a nod as he grinned. Zhao Hai and Mu Yu proceeded towards the transmission formation. With a flash of light, they returned to the Hundred Treasures Realm's headquarters in the battlefield.

After arriving at the headquarters, the two were immediately led to the conference hall. When they arrived inside, the two couldn't help but stare. Lately, the conference hall has been filled with people. But now, there were only three people inside, Zong Ze, Mu Yao, and Tang Yaoen.

## Chapter 1575: Sky Tower

The two quickly gave the Elders a salute. Mu Yu looked at the two with a complex expression as he said, "Take a seat." Sensing the mood, Zhao Hai and Mu Yu knew that they had something important to say. They quickly sat down and looked at the three Elders.

Mu Yao looked at the two and said with a serious tone, "I called you both back because there's something very important for you to do. And this matter is related to the future development of the Hundred Treasures Realm." Mu Yao stopped here and looked at the two.

Hearing that Mu Yao was being serious, Zhao Hai and Mu Yu were also paying close attention. Seeing the two, Mu Yao continued, "Originally, we're planning to tell you this matter when you reach the Immortal Stage. However, things have changed. We can no longer hide this from you. Little Yu, as you already know, the Hundred Treasures Realm and the Giant Spirit Realm were close allies a long time ago. We supported each other and faced all difficulties together."

Mu Yu nodded while Zhao Hai had a serious face. He guessed that Mu Yao and the others called them over for this matter, and it seems to be the case now.

“Because of the close relationship between the Hundred Treasures Realm and the Giant Spirit Realm, we were the most powerful team in the Ten-thousand Realm Battlefield. Nobody could find allies like us. The other realms could only fight among themselves.”

“At that time, the Hundred Treasures Realm and the Giant Spirit Realm were perfectly united. We almost reached the point of overwhelming everyone else in the Ten-thousand Realm Battlefield. But suddenly, a group of people came to us. The group of people claimed to be the guardians of the Sky Tower and they wanted to make a bet with us. If we win, they will support us and no longer care about our affairs. If we lose, we must do whatever order they have.”

At that time, nobody believed them and thought that they were crazy to dare say such things. But soon enough, news came out that the guardians of the Sky Tower also gambled with other realms. These realms didn't care about them either and in the end they were wiped out from the battlefield. Any person from these realms who tried to enter the battlefield were also killed.”

“The seniors of our realm didn't believe this news in the beginning but they still made investigations. In the end, they believed that these guardians of the Sky Tower were the real deal. These people certainly had the ability to completely destroy a realm.”

“In the end, the two realms agreed to gamble with the guardians of the Sky Tower. The bet was also very simple. It was for four people from the two realms to go to the Sky Tower and start ascending it from the first floor. As long as these people can reach the fifth floor, not only would these guardians stop bothering the two realms, they would also support their growth.”

“Finally, four people, two from each realm, were sent to the Sky Tower. These four people were all at the peak of the Severed Soul Stage. This was because the opposite party didn't permit the entry of Immortal Stage Experts. However, both realms still sent Immortal Experts over. The guardians of the Sky Tower allowed one Immortal Expert from each realm to supervise.”

“When the representatives of the two realms arrived at their destination, the two Immortal Experts who were with them were dumbfounded. What faced them was an extremely tall tower. They didn't know how tall it was since they were unable to scan it entirely using their spiritual force.”

“The guardians of the Sky Tower welcomed the representatives of the two realms and led them to the first floor. There was a person on the first floor for the four representatives to face. Naturally, the person was also at the Severed Soul Stage. However, as they began their exchange, the person was able to easily defeat 2 out of the 4 representatives. It didn’t take long before the other two were also defeated. Naturally, the two realms lost the bet.”

“When the two realms lost, the guardians of the Sky Tower gave their order. When they head back, the Giant Spirit Realm decided to kill five Immortal Experts from the Hundred Treasures Realm while the Hundred Treasures Realm would do the same to the Giant Spirit Realm. This was because the two realms would be evicted from the Ten-thousand Realm Battlefield if they didn’t comply.”

“Our two realms naturally understood that the guardians of the Sky Tower wanted us to kill each other. But we have no choice but to comply. When we returned, both sides prepared which ten Immortal Experts would be sacrificed to deal with this matter. But what we didn’t expect was when we made our decision, the people of the Sky Tower came and killed the ten Immortal Experts. Then they said to us that the Immortal Experts need to be killed in a fight.”

“In the end, the two realms had to comply. After the two sides killed five Immortal Experts from both sides in a fight, they thought that the matter was over. Nobody knew how, but Severed Soul Experts and Transcending Tribulation Experts from the two realms began killing each other. A cycle of hatred formed, causing the two realms to be in a full-on war.”

“Ten years after the conflict between the two realms began, the people from the Sky Tower sent them a letter. Inside the letter, they frankly said that the gamble’s purpose was for the two realms to kill each other. If they didn’t, then they would make a move. This consequence of the bet wouldn’t end until one of the realms gets evicted from the battlefield. The bet would also end if one side surrenders to the other. And once the winner was decided, the winning realm should send two experts below the Immortal Expert to gamble once again.”

Mu Yu stopped and looked at Zhao Hai and Mu Yu. Then he said, “Now you know why we had such a big response when we saw the people from the Giant Spirit Realm who surrendered. This means that we need to send people to the Sky Tower. But we still have two years. The people to be sent to the Sky Tower will be crucial for the Hundred Treasures Realm. We plan to send the two of you. Do you have anything to say about this?”

Mu Yu and Zhao Hai looked at each other. They didn't expect the situation to be like this. Even Zhao Hai didn't think this far in his speculations. The Ten-thousand Realm Battlefield actually had something like the Sky Tower. Moreover, it held so much power and influence.

Zhao Hai looked at Mu Yao and said, "I have no problems with it. What other orders do you have, Elder Mu?"

Mu Yao looked at the two and said, "I know that you have succeeded in using the cloud beasts of the Cloudsea Territory. So your cultivation should increase rapidly. But I want you to control your cultivation so that you won't reach the Immortal Stage in two years."

Zhao Hai nodded and said, "It's not a problem. According to my speed, it'll be impossible for me to reach the Immortal Stage in two years."

Mu Yu nodded and said, "Master can be rest assured, I can control my cultivation."

Mu Yao looked at the two and then sighed as he said, "Little Yu, Little Hai, your results will heavily affect the future of the Hundred Treasures Realm. I have no other choice, please don't blame me."

Mu Yu and Zhao Hai hastily stood up as they gave Mu Yao a salute and then Zhao Hai said, "Elder can rest assured. Since we're people of the Hundred Treasures Realm, we'll work hard for the future of the realm. Elder, there's no need for you to worry. We'll win this time."

Mu Yu nodded and said, "Master, there's no need to worry. We'll make sure to win against the enemy. Leave this matter to me and Little Hai."

Although Mu Yao was doubtful whether Mu Yu and Zhao Hai could defeat the enemy, he wouldn't attack their confidence right now. He nodded and said, "Alright, you two get some rest and practice in these two years. We won't give you any orders in these two years. You just make sure to be in your peak condition when the time comes."

Zhao Hai and Mu Yu nodded before they turned around and left. Looking at their departing backs, Mu Yao couldn't help but sigh. Zong Ze looked at Mu Yu and couldn't help but feel sad. He knew how

important Mu Yu was to Mu Yao. He treated Mu Yu like his own son. The Sky Tower was a dangerous place and the people inside weren't exactly good. Going there was asking for death.

When Zhao Hai and Mu Yu left the hall, none of them spoke a word. After some time, Mu Yu sighed and said, "It seems like my original guess was real. We're just chess pieces in someone's game. Little Hai, what are you going to do now?"

Zhao Hai looked at Mu Yao and then smiled faintly as he said, "Cultivate properly and one day we'll be the ones playing the game. Brother Mu, don't worry about it too much. With the two of us together, let's see how strong the people from the Sky Tower are. If we win against them, I want to see what they plan to offer us."

Mu Yu looked at Zhao Hai and bitterly smiled. He naturally knows that Zhao Hai was cracking a joke to lift up the mood. The people from the Sky Tower were all very strong. Even if they lose, they can forfeit the prize and there's nothing the Hundred Treasures Realm can do.

Seeing Mu Yu's expression, Zhao Hai smiled and said, "Don't worry too much. I'll leave first to return to Bluetree Planet. If you need anything, just go there to look for me."

Mu Yu nodded. He was beginning to feel pressure. He wasn't as carefree and easygoing as Zhao Hai. Sometimes, he envied Zhao Hai's personality. With his carefree attitude, Zhao Hai was still able to achieve great things, nobody but him could do it.

Zhao Hai didn't care much about what Mu Yu was thinking about. When he returned to Bluetree Planet, he immediately entered the Space. Laura and the others were already waiting for him. Seeing Zhao Hai come back, Laura smiled and said, "We finally have some clues. Brother Hai, what do you think will be inside the Sky Tower?"

Hearing Laura, Zhao Hai couldn't help but laugh as he replied, "You're really worthy of being my wife. I'm also looking forward to seeing what's inside the Sky Tower."

Not only Laura, the other women shared the same excitement. Lizzy looked at Zhao Hai and said, "Brother Hai, we've been waiting for this day. Now that it has come, how can we not go? We also want to know where the Sky Tower leads to. Also, don't you think that the Sky Tower sounds familiar?"

Zhao Hai knitted his brows for a moment before his eyes lit up as he said, "You mean the waterfall on the southern part of the Cloudsea Territory?"

Lizzy nodded and said, "Right. That waterfall. Didn't Li Jiang said that it's a barrier that came down from the skies? Nobody knows where it began. If you think about it, doesn't it sound just like the Sky Tower?"[1]

#### Chapter 1576: Two Years

Zhao Hai was moved. He hasn't thought about it. Now that Lizzy reminded him, he couldn't help but consider the possibility. He nodded and said, "That might be true. If we have time, we should try to go and see what it really is."

Lizzy smiled and said, "Brother Hai, there's no need to be anxious, or else we would alert the enemy. If the Sky Tower is really in that waterfall, then wouldn't your appearance there two years later distract them? When the time comes, we can try to see what's really inside the Sky Tower."

Zhao Hai smiled and said, "Alright. I'm just too excited to see what the Sky Tower holds." After he said that, the group entered the Villa.

When they settled inside, Zhao Hai looked at the situation of the Hidden Cloud Village. Everything was going well on the island, nothing out of the ordinary happened.

For the next two years, Zhao Hai stayed at Bluetree Planet and didn't go out. However, nobody knew that he was actually very concerned about the situation of the Ten-thousand Realm Battlefield.

Zhao Hai wasn't only concerned about the Ten-thousand Realm Battlefield, but the Cloudsea Territory as well. Not long after Zhao Hai and Mu Yu were recalled by Mu Yao from the Hidden Cloud Village, the people from the other high-grade realms began attacking the island of the Ye Clan.

Before the invasion, the Ye Clan was able to make some preparations against an attack from the Ten-thousand Realm Battlefield. But seeing that there was no noise in the past month, they began to slowly relax. As they were beginning to relax, the Ten-thousand Realm Battlefield began their attack.

Both sides fought on Ye Island. The people of the Ten-thousand Realm Battlefield were able to secure the transmission formation and sent batches upon batches of experts into the island. And with Zhao

Hai's reports, they knew some degree of the Ye Clan's strength. So when they entered, the Ye Clan couldn't stop them. By the end, the Ye Clan were at a disadvantageous position.

Seeing that they couldn't do anything about the situation, as well as the constant stream of people from the Ten-thousand Realm Battlefield, the Ye Island decided to board their Cloud Piercing Ships and left.

It could be said that the Ten-thousand Realm Battlefield were able to gain their first base in the Cloudsea Territory. However, this base wasn't exactly secure. After the Ye Clan left, they immediately went to the Cloudbeast Fortress and reported the events that happened on the island. Then the Cloudbeast Fortress spread the news throughout the entire territory.

In an instant, the entire Cloudsea Territory was shaken. All major powers made a move and prepared to attack Ye Island. Large quantities of experts began arriving at the Cloudbeast Fortress.

The Ten-thousand Realm Battlefield were at a disadvantage this time. The Cloudbeast Fortress surrounded the entire island and blocked Ye Island's Transmission formation. Without transmission formations, experts from the Ten-thousand Realm Battlefield wouldn't be able to attack another place. As soon as they enter the cloud sea, they would no longer be able to absorb spiritual qi. When they meet someone from the territory at that time, then they would no doubt be finished.

In this case, the people of the Ten-thousand Realm Battlefield were truly stranded on Ye Island without any means to leave. It was also at this time that the Cloudsea Territory began their assault.

Naturally, the people from the Ten-thousand Realm Battlefield knew that the people of the Cloudsea Territory wouldn't just allow them to occupy the island. Therefore, they began to send more troops to the island and also blocked everything from entering the transmission formation besides those from the battlefield. The people from the Cloudsea Territory wouldn't be able to use Ye Island's transmission formation to enter.

At the same time, the people from the battlefield began to erect a large formation around the island. Although Zhao Hai told them about the disadvantages of doing so, with how small the island was, they could still bear the energy consumption.

This turned out to be a good decision. The Cloudsea Territory hasn't been using defensive formations for quite a long time. Because of this, they don't have any good methods to break it. Both sides were immediately placed in a stalemate.

But soon the people of the Ten-thousand Realm Battlefield found it very hard to support their defense. Not only was the area of their protective shield getting smaller and smaller, the spiritual qi of the island was also continuing to decrease. The people of the Ten-thousand Realm Battlefield were beginning to worry. If there's no spiritual qi on Ye Island, then what would they use to fight against the cultivators of the Cloudsea Territory?

In the end, the people of the Ten-thousand Realm Battlefield had to put their protective shield down. Naturally, this was immediately discovered by the Cloudsea Territory. The people of the territory were always worrying about how to get through the barrier. Seeing that it was taken down, they were very happy. They immediately gathered people to charge in.

The first battle between the two sides turned murkier and murkier. Both sides kept sending more troops. Additionally, the cultivators of the Cloudsea Territory were all close-combat oriented, something the cultivators of the Ten-thousand Realm Battlefield weren't used to. Naturally, the same was true for the cultivators of the territory, they weren't used to defending against long-ranged attacks. The casualties of both sides were beginning to pile up.

As the battle went on, both sides became enraged and sent even more people. The people of the Cloudsea Territory's hearts turned cold and sent people towards Ye Island with zero regard. At the same time, the Ten-thousand Realm Battlefield knew that if they lost their foothold on Ye Island, they might not be able to return to the Cloudsea Territory in the future, so they continued to send more people. The clash between the two sides dyed the white clouds on Ye Island red.

Nobody thought that as the two sides were fighting, the one benefitting from it the most was Zhao Hai. Whether they be cultivators from the Cloudsea Territory or the Ten-thousand Realm Battlefield, once they died, Zhao Hai would sneakily get their bodies and turn them into Undead. He even got so far as to get their weapons as well.

Naturally, Zhao Hai wouldn't go too far. If the people from the Cloudsea Territory and the Ten-thousand Realm Battlefield notice that the corpses were disappearing, they would immediately raise suspicions. Because of this Zhao Hai prioritized getting Immortal Expert corpses for the Space. In any case, there weren't a lot of them.

The war lasted for several months. In the end, the Ten-thousand Realm Battlefield could no longer endure. They had lost too many experts, so they had to retreat.

But before they left, they also made some preparations. In some hidden places on Ye Island, they arranged transmission formations. These transmission formations were built like the ones in Fabio Planet. They were buried deep down so that people wouldn't be able to see them with a casual glance.

When the transmission formations were completed, the cultivators of the Ten-thousand Realm Battlefield returned to the battlefield and blew up the formation they came in from.

As soon as the people of the Cloudsea Territory realized that they had finally repelled the invaders from the Ten-thousand Realm Battlefield, they rejoiced. They had been tired of fighting the cultivators of the Ten-thousand Realm Battlefield. They also weren't worried that there were people hiding in the vicinity. They believed that these people would have joined the battle instead of waiting until it was too late.

Although they were able to take Ye Island back, the land was severely damaged. And because everyone worked together in the battle, the Ye Family could no longer monopolize the island. In the end, the Ye Family moved to the Cloudbeast Fortress. Ye Island has been turned into a huge farmland by the people who participated in the war.

The high-grade realms of the Ten-thousand Realm Battlefield suffered great losses defending Ye Island. Although they obtained a lot of good things such as the transforming clouds and cloud plants, they were nothing compared to the losses they experienced. This caused the high-grade realms to grit their teeth with hatred towards the people of the Cloudsea Territory.

But as a consolation, the high-grade realms discovered that the transmission formations they hid on Ye Island had yet to be discovered. They still had a chance to attack the Cloudsea Territory in the future.

The other high-grade realms suffered heavy losses but the Hundred Treasures Realm didn't move against them like they planned. The most important thing right now for the Hundred Treasures Realm was to prepare for their gamble against the Sky Tower. They had no intention to expand right now.

But what made Mu Yao puzzled was the inaction of the Five Great Realms. This was something that Mu Yao didn't understand.

Now that the high-grade realms suffered heavy losses, if the Five Great Realms sent some troops, they would definitely occupy a lot of territory. But they didn't make a move. This was a missed opportunity. Zong Ze and the others were also confused. They couldn't understand what the Five Great Realms were thinking.

While Zong Ze and the others didn't understand, Zhao Hai had some clues. When the high-grade realms of the battlefield fought against the Cloudsea Territory, the Five Great Realms wanted to send troops. But because of the relationship between the five, they didn't trust the others. They were afraid of being calculated upon, so they missed the opportunity.

The Five Great Realms knew each other very clearly. It might be true that the high-grade realms had lost a lot of troops, but if any one of them sent troops alone, it was still impossible for them to face these high-grade realms. If they suffer a loss, the other four Great Realms would eat them up. If they want to deal with the high-grade realms, then the Five Great Realms would have to work with each other. However, the relationship between the five Great Realms was very tense. It was impossible for them to send an allied army. Because of this, they could only watch the opportunity vanish in front of their eyes.

What surprised Zhao Hai the most was that the Giant Spirit Realm had finally removed themselves from the Fireweavers. As it turns out, a lot of Giant Spirit Realm Cultivators took refuge among the Fireweavers. Now that these people had withdrawn, it meant that the Giant Spirit Realm had officially removed themselves from the Ten-thousand Realm Battlefield.

The Hundred Treasures Realm developed quickly in these two years. The territory they gained from the Ghost Spirit Realm was placed in their complete control. Additionally, since they didn't fight in the Cloudsea Territory, their strength was preserved and was used in internal development. By this time, the strength of the Hundred Treasures Realm has surpassed the other high-grade realms in the battlefield.

However, the Hundred Treasures Realm still hid their strength. They weren't thinking of displaying it at this time. They were preserving all of their strength for the outcome of the bet with the guardians of the Sky Tower.

Mu Yao and the others knew that their upcoming bet with the Sky Tower was extremely important for the Hundred Treasures Realm. If the Hundred Treasures Realm didn't have enough strength, then when they failed the bet, they could only bow down and accept the beating. This wasn't to say that Mu Yao wasn't confident in Zhao Hai and Mu Yu's strengths. But Mu Yao had a great sense of dread towards the Sky Tower.

There were some information that Mu Yao didn't tell Zhao Hai and Mu Yu. The Sky Tower appeared several times before. And every time they showed themselves, their actions were always shocking.

Because he knows this, Mu Yao wasn't confident in Zhao Hai and Mu Yu winning. Although Zhao Hai showed immense strength, Mu Yao and the others still prepared for the worst.

From the conversation between Mu Yao and the other Elders, Zhao Hai was also able to get some bits and pieces of information. He even suspected that the tense relationship between the Five Great Realms was the Sky Tower's doing.

After coming to know these things, Zhao Hai affirmed that the Sky Tower wouldn't allow the Ten-thousand Realm Battlefield to be peaceful and united. They want to see an eternal slaughter on the battlefield. They wanted blood to flow constantly. This also meant that the people of the Ten-thousand Realm Battlefield would never be able to become very powerful.

Although Zhao Hai didn't understand their purpose, Zhao Hai knew that they had a goal. And this goal was what Zhao Hai wanted to know.

Because they suffered a huge loss against the Cloudsea Territory, the high-grade realms returned to their territories in order to lick their wounds. Because of this, the Ten-thousand Realm Battlefield became calm. Besides minor conflicts between lower-grade realms, there were no large battles happening.

The other high-grade realms naturally wouldn't stir any trouble this time. After all, they were weakened. If they stir up trouble and lose even more people, then their subordinate realms might swallow them instead.

When they planned to go to the Cloudsea Territory, the high-grade realms decided to use their own people and none from their subordinate realms. They sacrificed their own realms' manpower. They didn't want the lower-grade realms to know about their losses, so they didn't dare make any noise. A weak master and a strong slave relationship was more than likely to turn ugly.

Fortunately, the lower-grade realms didn't know about the wounds of the high-grade realms. Because of this, the high-grade realms continued to behave and didn't dare reveal that they were currently paper tigers.[1]

While the Ten-thousand Realm Battlefield was calm, the Cloudsea Territory was the opposite. This wasn't because they started an internal strife. The invasion of the Ten-thousand Realm Battlefield showed the people of the Cloudsea Territory their shortcomings. Their weapons could only do close-combat and couldn't be used to fly like the flying swords of the Ten-thousand Realm Battlefield's cultivators. This caused them to suffer a huge loss. Therefore, they began to research how to make flying artifacts.

Then there's also the defensive formation of the Ten-thousand Realm Battlefield. It caused them a huge amount of trouble. They were also thinking of researching it, especially how to break them as fast as possible. These shortcomings caused the people of the Cloudsea Territory to enter a state of intense research. The Cloudsea Territory had ushered in a period of rapid development.

Originally, the Cloudsea Territory lacked metal. But after the Ten-thousand Realm Battlefield cultivators came and died, they left a lot of good treasures behind, especially metals. This allowed the Cloudsea Territory to attach great importance to metallic weapons. There were even rumors that Great Clans were starting to organize people to go to the Bronze Wall and the Iron Wall to mine metals. They needed to develop metal weapons as soon as they could!

#### Chapter 1577: Next Target

Zhao Hai was calm as he walked out of the transmission formation. The first person he saw when he came out was Mu Yu. It's been two years since he has seen him.

Seeing Zhao Hai, Mu Yu smiled faintly and said, "Let's go. Master and the other Elders have been waiting." Zhao Hai nodded and didn't say anything as he went to the conference hall with Mu Yu.

The two also met Hundred Treasure Realm Cultivators along the way. Each one of these cultivators exuded an extraordinary aura. They were much more vigorous compared to two years ago.

Mu Yu noticed Zhao Hai looking at these cultivators and he smiled and said, "A lot of people have got their hands on cloud beasts in these two years. Moreover, they had trained in the Sea of Beasts for some time. Their progress was very rapid. You're not doing badly as well. You've actually reached the Severed Soul Stage."

Zhao Hai's progress in these two years was indeed very fast. He used all of his time strengthening himself. And because he has beasts inside the Space supplying him with spiritual qi, he was able to elevate his strength in just two years. He also used the time to review his moves and integrate them with each other in order to be more effective in battle.

Zhao Hai has a lot of methods to attack. One of them was using his large artifacts. The attacks weren't actually that complicated. Although he used the Pagoda Technique before, he wasn't able to use much of it during battle. There were very few people who could stop the large artifacts, so there weren't any opportunities to use more complicated maneuvers.

Another type of attack that Zhao Hai could do was the Stellar Transformations Sword Formation. To be honest, the sword formation wasn't that strong without Faith Power. It can be used to deal with Severed Soul Experts but it was useless against Immortal Experts. But once Faith Power was used, the power of the sword formation would increase by several folds. Even powerful Immortal Experts would need to watch out for its strength.

The third type of attack that Zhao Hai could use were the Buddhist Techniques. Zhao Hai learned 18 Buddhist Techniques. They were all very powerful. But because he couldn't use them often, he was unable to achieve mastery.

In these two years, Zhao Hai racked his brains in order to find a way to improve his battle capability. He wanted to integrate all of his moves and master them so that he could use them more conveniently.

Due to the non-stop spiritual qi provided to him by the Space's beasts, Zhao Hai could leave spiritual qi accumulation to the side while he focused on his combat techniques. He also took Julie as his sparring partner. Actually, only Julie can be Zhao Hai's sparring partner, others were simply unqualified.

Because she also benefited from the genes extracted from the cloud beasts, Julie was now stronger than the average Immortal Expert. Julie was also a master at close Combat. Zhao Hai also discovered that the Buddhist Techniques were very good at close-range. It could show great strength whether he used his hands, feet, or artifacts.

After two years of practice, Zhao Hai's combat strength was now more solid than before. Now, even against a strong expert like Mu Yao, Zhao Hai would be able to fight evenly. And if the fight turned desperate, Mu Yao would not be Zhao Hai's match. After all, Zhao Hai's body was just too abnormal.

Zhao Hai's body was now exuding the aura of a Severed Soul Expert. However, 100 Severed Soul Experts wouldn't be able to hurt him.

Zhao Hai looked at Mu Yu and then smiled as he said, "Big Brother Mu, you're not doing too bad yourself. You look like you're about to break through to the Immortal Stage. Did you suppress yourself?"

Hearing Zhao Hai, Mu Yu couldn't help but smile bitterly as he said, "What else can I do? Let Little Jie and the others go? This is something we two brothers should do."

Zhao Hai laughed and said, "Isn't that good? I have been waiting for a long time. I want to experience the Sky Tower."

While they were talking, the two arrived at the conference hall and directly went inside. The conference hall was the same as before, only three people were inside, Zong Ze, Mu Yao, and Tang Yaoen. In these two years, Mu Yao and Tang Yaoen didn't do much. When Zhao Hai and Mu Yu closed up, they closed up as well. They came out this time to see the two.

When the two entered the conference hall, Mu Yao nodded and said, "Take a seat."

After the two sat down, Mu Yao gave them a complicated look as he said, "Tomorrow you will head out to the Sky Tower. Don't think too much, just do your best. It doesn't matter if you lose, you just need to save your lives and come back."

Zhao Hai and Mu Yu stared. Although Mu Yao gave pleasant words to make them do their best, it felt like he wasn't confident that they would win. It can be seen from this how much Mu Yao dreaded the Sky Tower.

Although the two thought that Mu Yao's words were a bit improper, they didn't show it and just nodded. Mu Yao continued, "The realm has already prepared for the worst, so you don't need to worry. The Hundred Treasures realm has been in the Ten-thousand Realm Battlefield for so many years, and nobody can easily deal with us. We also have a base in the Cloudsea Territory. However, the Sky Tower isn't like any realms. The people of the Sky Tower hold mysterious origins. Nobody knew where they came from but their strength couldn't be doubted. It's best to not offend the people of the Sky Tower. Otherwise, it wouldn't be good for the Hundred Treasure Realm. Understood?"

Hearing Mu Yao, Zhao Hai and Mu Yu immediately understood what he wanted to say. They can strive hard to win the bet, but they cannot offend the people of the Sky Tower. Otherwise, the Hundred Treasures Realm would suffer. In other words, even if they can win against the enemy, they should make sure to not injure them too much.

The two nodded. Looking at them, Mu Yao sighed and said, "Alright, I've said what I should say. Go to the back mountain tomorrow and use the transmission formation to send you to the Sky Tower. We'll send an Immortal Expert to accompany you. Someone from the Sky Tower will also meet you."

The two people gave the three Elders a salute before turning around and leaving. Mu Yao looked at their departing backs as he turned to Tang Yaoen and said, "Yaoen, you need to protect the two. Little Yu is capable and he will lead the Hundred Treasures Realm in the future. There's no need to say about Little Hai's importance. No matter what, the realm cannot lose the two of them."

Tang Yaoen nodded and said, "Senior Brother, since you know that it would be dangerous, then why did you send Little Yu and Little Hai?"

Mu Yao smiled bitterly as he turned to Zong Ze. Seeing Mu Yao's gaze, Zong Ze smiled bitterly and explained, "The Sky Tower has been around for so many years and they had already laid down the rules for their bets. They strictly said that the best of the young generation should be sent. If we didn't send Little Hai and Little Yu, then the Sky Tower would definitely find ways to punish the Hundred Treasures Realm."

Tang Yaoen coldly snorted, clearly showing his displeasure with the Sky Tower. Although he didn't like these rules, he also knew that they couldn't afford to offend the Sky Tower. He can only swallow his feelings and hope that Zhao Hai and Mu Yu will be fine. Otherwise, the Hundred Treasures Realm would suffer greatly.

When Zhao Hai and Mu Yu left the conference hall, Mu Yu turned to Zhao Hai and said, "Little Hai, let's go to my place and sit for a while." Zhao Hai nodded and followed Mu Yu to his residence.

Before long, the two arrived inside Mu Yu's residence. Upon entering, Mu Yu sighed and said, "Little Hai, did you understand what Master is implying? Is the Sky Tower really that strong?"

Zhao Hai smiled bitterly and said, "I'm afraid they are. Otherwise, Elder Mu wouldn't have said those words. But once we reach the Sky Tower, we'll make sure to teach those guys a lesson. We'll let them know that people like us aren't easy to provoke."

Mu Yu coldly snorted and said, "Little Hai, do you still remember the words you said two years ago? You said, one day, we'll be the ones playing the game. Little Hai, we'll be the ones playing on the board one day. We'll definitely be."

Zhao Hai looked at Mu Yu, he smiled and said, "I believe we will. Haha. Big Brother Mu, there's no need to be anxious. We'll take things step by step. Like cultivation, we cannot rush. I think the reason Elder Mu and the others are afraid of the Sky Tower is because they don't know their background. Because of this, they're wary of offending them. What we need to do is collect information about the Sky Tower. Once we find out who or what they are, only then can we deal with them. Big Brother Mu, our Hundred Treasures Realm plotted against the Giant Spirit Realm for generations, and now they're gone from the battlefield. Our next target is this Sky Tower. It must be said that our Hundred Treasures Realm's biggest enemy is the Sky Tower, not the Giant Spirit Realm."

Hearing what Zhao Hai said, Mu Yu couldn't help but stare. He lowered his head and thought for some time. Then he raised his head and looked at Zhao Hai, "Right, they are the Hundred Treasures Realm's next target. This time, we'll explore their bottom line first. Little Hai, what do you think is on top of the Sky Tower?"

When he heard Mu Yu's question, Zhao Hai paused. Then he laughed and said, "I want to know as well."

Mu Yu smiled and said, "Alright, we'll know tomorrow. But I still don't know which Elder will go with us. Will you go back and rest?"

Zhao Hai nodded and said, "I'll head back and rest. See you tomorrow." Then he stood up and walked out. He knew which Elder would go with them tomorrow, but he didn't tell Mu Yu.

The next morning, Zhao Hai and Mu Yu went to the back mountains and saw Zong Ze, Mu Yao, and Tang Yaoen. Mu Yao nodded at the two and then led them inside a cave. Inside the cave was a small transmission formation that was set up temporarily. Mu Yao looked at the two and said, "Tang Yaoen will be the person accompanying you."

Mu Yu didn't expect that Tang Yaoen would be the Elder who would come with them. However, he and Zhao Hai didn't say anything. Along with Tang Yaoen, the group entered the transmission formation and disappeared along with a white flash.

#### Chapter 1578: Sky Tower

A white light flashed and three people appeared on a transmission formation. Zhao Hai looked around him and saw that they were at a square on a mountain's summit. The mountain looked very high, but this wasn't what attracted Zhao Hai's attention. Right beyond the square was a tower.

It was a very huge tower with an octagon base covering about one mu(666.7 sq. m.). Each corner of the tower had upturned eaves with bronze bells hanging on them. Every time the wind blows, the bells would let out a gentle ring, causing a person's mind to calm down.

Connected to the square was the tower's entrance. Above the entrance was a copper tablet inscribed with three characters "Sky Tower". The writing technique was ancient and powerful. Although there were only three characters, the tablet exuded a powerful pressure. It was clear that the one who wrote the characters was an extraordinary individual.

The three had just appeared on the transmission formation. But because of their powerful spiritual force, they were able to get this much information in just one sweep.

But even if they were scanning the Sky Tower, they were still unable to discover how high it was. Even Zhao Hai's Space was unable to find out about it. It was clear that the height of the tower was very astonishing.

Most importantly, although they could scan the tower with their spiritual force, they weren't able to scan what was inside. They can sense the existence of the tower, but its insides were covered with a dense fog.

The first floor of the Sky Tower was a hundred meters high. Its gate was 90 meters high and 50 meters wide which was divided into two doors. Under Zhao Hai's gaze, the two doors slowly opened. Despite such a large door opening, it didn't make any sound at all. It was a completely silent opening.

A figure slowly walked out of the tower. This person was very tall, about 2.5 meters tall. The figure was like an iron tower. However, his white hair betrayed him, exposing that he was no longer young.

It was an old man with snow-white hair and beard. Despite his age, his waist was straight and his eyes were sharp. He also had vigor similar to a fierce tiger. Zhao Hai and Mu Yu were surprised when they saw this person.

Looking at Zhao Hai and the others, the old man stepped forward. Tang Yaoen immediately greeted him, he bowed slightly and said, "Hundred Treasures Realm's Tang Yaoen has seen your excellency."

The old man also cupped his fist towards Tang Yaoen as he said, "Luo Ying, guardian of the Sky Tower, greets Elder Tang Yaoen. We already received news of your coming. It has been agreed that as long as either the Hundred Treasures Realm or the Giant Spirit Realm surrenders to the other, the winner would send representatives to the Sky Tower for the bet. I'm happy to see you all today."

Tang Yaoen replied with a calm expression, "Guardian, please tell us what the bet is this time."

Luo Ying looked at Tang Yaoen, then he smiled faintly. He knew that no realm wanted to accept the bets of the Sky Tower. However, they have no choice but to accept. Because of this, he was amused with Tang Yaoen's calm expression. In his opinion, this was a weak person keeping calm on the surface in order to preserve his dignity. To be honest, Lu Ying didn't really care about today's matter.

Luo Ying replied, "It's approximately the same as before. The Hundred Treasures Realm sends two people to ascend the tower. As long as they can reach the fifth floor, the Sky Tower will support the Hundred Treasures Realm in any of their actions in the Ten-thousand Realm Battlefield. And in the following 500 years, the Sky Tower will not bet with the Hundred Treasures Realm. But if the Hundred Treasures Realm loses, then after you head back, the Hundred Treasures Realm must attack the Fireweaver Race. What does Elder Tang Yaoen think about this? Is it fair?"

How could it be fair? Hearing Luo Ying saying that the Hundred Treasures Realm must attack the Fireweavers if they lose, Tang Yaoen immediately knew what the Sky Tower wanted. With the Hundred Treasures Realm's present strength, attacking the Fireweaver Race wouldn't result in anything good. It would certainly cause massive losses to the realm. The Hundred Treasures Realm might even face ruin. However, they have no choice. With a pale complexion, Tang Yaoen replied, "Alright, then we'll accept this bet."

Looking at Tang Yaoen's expression, Luo Ying smiled faintly and said, "Since this is the case, you three, please enter the tower." Then he turned sideways and gestured towards the tower using his left hand. Tang Yaoen coldly snorted before walking towards the Sky Tower.

Meanwhile, Luo Ying was sizing Mu Yu and Zhao Hai up. Needless to say, Mu Yu's complexion was pale and his face clearly showed his anger. Luo Ying expected this. Actually, the Sky Tower's guardians always began with mentally harassing the participants before entering the Sky Tower. As long as their mental state was shaken, they would surely be defeated.

But when Luo Ying saw Zhao Hai, he couldn't help but be shocked. This was because Zhao Hai had a smile on his face as he looked at him. Luo Ying didn't know why, but upon seeing Zhao Hai's eyes, his heart couldn't help but jump. His body firmed up and his body hair stood up.

Zhao Hai looked at Luo Ying and gave him a salute as he said, "Guardian Luo, I don't know how tall it is, but the Sky Tower is the tallest structure I have seen in my life. I am awed by it."

Zhao Hai's sudden words stunned Tang Yaoen and Mu Yao. The two looked at Zhao Hai and found that he was smiling as he conversed with Luo Ying.

The two couldn't help but shake before letting out a long breath. To be honest, they had been suppressed by the Sky Tower's imposing aura. Because of this, they had been led by the nose by the people of the tower. Zhao Hai's words caused the pressure in their hearts to vanish.

Luo Ying looked at Zhao Hai and a dignified radiance appeared in his eyes for the first time. He understood the underlying purpose behind Zhao Hai's words. Luo Ying's eyes flashed a cold light. People like Zhao Hai were the type of people that the guardians of the Sky Tower needed to eliminate.

The killing intent behind Luo Ying's eyes only flashed for a fraction of a second. He looked at Zhao Hai and gave a smile as he said, "The height of the Sky Tower is a secret. If you really want to investigate, then it would be an act of spying on the Sky Tower. By then, you would be treated as an enemy of the Sky Tower. Do you still want to know?"

Zhao Hai stared, then he quickly waved his hand and said, "I wouldn't dare. The Hundred Treasures Realm and the Sky Tower have a good relationship. You had us wage war against the Giant Spirit Realm, so we went and did it. We also managed to drive the Giant Spirit Realm out of the Ten-thousand Realm

Battlefield. After that, you even allowed us to enter the Sky Tower. As you can see, we have a very good relationship. How could I become an enemy of the Sky Tower? I absolutely won't dare."

Hearing Zhao Hai, a smile bloomed on Tang Yaoen and Mu Yu's face. If they weren't afraid of Luo Ying's face, then they would have laughed. Even then, they were having a hard time suppressing their laugh, their faces were beginning to turn red.

Tang Yaoen was beginning to dread Zhao Hai's ability to talk nonsense. He was truly a master of it. Tang Yaoen couldn't do it. At the same time, Zhao Hai's words caused Luo Ying to be unable to reply. Looking at Luo Ying's choked up expression, Tang Yaoen and Mu Yu wanted to laugh.

Looking at Luo Ying's expression, Zhao Hai smiled faintly as he turned his hand and took out a jug of liquor. Then he handed it to Luo Ying and said, "Senior, this is a special product of our Hundred Treasures Realm. It's high-grade spirit wine. Senior, please accept it. Take it as a token of the Sky Tower and the Hundred Treasures Realm's friendship."

Luo Ying looked at Zhao Hai, then a smile slowly appeared on his face before he laughed. He took the jug that Zhao Hai handed over and then patted him on the shoulder as he said, "Hahaha. What a young man. It's been a long time since I've seen a young man as interesting as you. I'll take your wine."

Zhao Hai smiled faintly and said, "Senior, please." Then he handed the wine over to Luo Ying. After receiving the jug, Luo Ying once again invited the three to enter the tower.

Meanwhile, Tang Yaoen looked at Zhao Hai with amazement. Not only did he break the awkward atmosphere, he also managed to make Luo Ying laugh.

However, since there was no time, Tang Yaoen didn't say anything. He led Zhao Hai and Mu Yu inside the tower along with Luo Ying. Upon entering the tower, Zhao Hai and Mu Yu stared. This was because the inside of the tower was much bigger than they thought.

From what Zhao Hai can see, the inside was ten mu(6,666,7 sq.m). The ground was made out of flagstone, appearing very bleak.

Inside this huge space was a bald person wearing a Buddhist robe. Hanging on this person's neck was a bead necklace with beads as large as a fist. A faint gold color appeared on his skin and a golden aura surrounded his body. He wasn't very tall at around 1.8 meters tall. Compared to Luo Ying, he was short. He also looked somewhat emaciated.

Although one couldn't see any fat on the person's body, his muscles were well-defined. It looked solid as steel, as though it was cast. As he stood in place, he looked like a golden metallic statue casted from liquid gold.

The person had closed eyes, one hand on the side while the other was pressed on his chest. One also couldn't see him breathing. If it weren't for his vitality, he could fool people to think that he was a statue.

Luo Ying looked at the person and then turned to Tang Yaoen and said, "This is the Sky Tower's first floor guardian. He has Severed Soul-stage strength. You may begin. Both of you can make a move." After he said that, Luo Ying retreated along with Tang Yaoen.

Looking at the golden body of the monk, Zhao Hai turned to Mu Yu and said, "Brother Mu, I think we shouldn't go together. Otherwise, people would think that we're bullying people. What do you think? Who should go first?"

Mu Yu looked at the monk and could see that he was a body cultivator. Moreover, he looked like a well-accomplished one. But if it came to battle, Mu Yu knew that this person wasn't a match against Zhao Hai. So after thinking, he replied, "I'll go first. If I can't do it, you'll go." Mu Yu wanted to go first to see how strong the monk was. If he won, then that would be good. If not, then at least Zhao Hai could see the opponent's strength.

Zhao Hai understood Mu Yu's thoughts, so he didn't decline and gave a nod before retreating.

## Chapter 1579: Fish In A Net

The monk slowly opened his eyes and walked towards Mu Yu. The monk's expression was very calm. After arriving 50 steps away from Mu Yu, the monk gave a salute.

Mu Yu also bowed towards the monk. Then he took out his weapon and went into his stance. Meanwhile, the monk was calmly waiting for Mu Yu to make a move. Looking at the monk's body, Mu Yu couldn't help but feel a hint of danger. He no longer waited and immediately made a move.

Flower petals began flying out of Mu Yu's hand and attacked the monk. As Mu Yu made his move, the monk slowly took one step forward.

However, this one step brought the monk directly in front of Mu Yu. At the same time, his right hand delivered a punch towards Mu Yu. His moves were calm, fast, as if doing it casually.

But Mu Yu was already prepared for this move. His body moved at the same time the monk took a step forward. His body shifted a hundred meters on the side. At the same time, flower petals began to surround Mu Yu's body.

What Mu Yu didn't expect was that the monk simply didn't care about the flower petals. Just like before, he sent another attack towards Mu Yu. As the flower petals cut towards the monk's body, they just made sparks, they were useless.

Seeing this, Tang Yaoen's expression couldn't help but change. He didn't expect the monk's body cultivation to be this formidable. It must be known that Mu Yu's artifact was famous in the Hundred Treasures Realm. Most artifacts weren't a match against Mu Yu's weapon. Tang Yaoen didn't expect that this artifact would have no effect against the monk.

Mu Yu also noticed this point. He flew back and took out another artifact. It was a needle-type artifact, a fake spirit snake needle.

Although this spirit snake needle was only an imitation, its offensive strength couldn't be underestimated. Zhao Hai made a lot of these fake spirit snake needles, so Mu Yu had a lot of it in his hands.

Normally, Mu Yu wouldn't use it. This was because he knew that he couldn't display the peak strength of the spirit snake needle. Additionally, fake spirit snake needles have a very short lifespan, so Mu Yu didn't like to use them.

However, Mu Yu was left with no choice. The monk's defense was just too strong. His own sword couldn't do anything to him. Because of this, he could only take the fake spirit snake needle out.

When the monk saw the spirit snake needle, his pupils shrank. He felt the danger coming from the spirit snake needle. He couldn't help but be more cautious.

Although Mu Yu was using a fake spirit snake needle and it was as mobile as the original, its agility couldn't compare to cultivators. Mu Yu could only use the spirit snake needle defensively. He couldn't do anything to the monk.

Looking at the monk's movements, Zhao Hai immediately knew that the monk was using a Body Cultivation Method that utilizes Faith Power. The monk certainly has his spiritual qi strengthened by faith power. Otherwise, it would be impossible for him to block Mu Yu's Flower Rain Sword.

This discovery caused Zhao Hai's pupils to shrink. He didn't expect the monk to use faith power. This was rare. It must be known that it wasn't easy to cultivate Faith Power Cultivation methods. Without Faith Power, cultivating this method was impossible. Naturally, if you can practice it, your strength would be leagues further compared to those who used normal cultivation methods.

Zhao Hai now knew why the people of the Ten-thousand Realm Battlefield couldn't defeat the people of the Sky Tower. This side actually had Faith Power Cultivation Methods. People who cultivate ordinary Cultivation Methods were bound to lose.

Zhao Hai could see that although Mu Yu was holding on, he was actually being pushed back. Zhao Hai couldn't help but snort as he took a step forward and appeared in front of the monk.

The monk was also guarding against Zhao Hai. Seeing Zhao Hai appear in front of him, the monk wasn't surprised and just sent a fist towards him.

Zhao Hai smiled faintly as he captured the monk's fist and then proceeded to send a kick towards his abdomen. The monk's facial expression changed. He knew how strong his fist was, but Zhao Hai was able to effortlessly capture it. The monk didn't dare receive Zhao Hai's kick. His body moved and retreated.

Zhao Hai looked at the monk and then opened his mouth and said, “Big Brother Mu, you go back first. I’ll deal with this monk.”

Mu Yu nodded and said, “Alright, I’ll give him to you.” Then he slowly retreated to the back.

Zhao Hai looked at the monk and said, “You’re quite strong. You have Faith Power, right? Let me experience it.” Then Zhao Hai waved his fist towards the monk.

The monk’s expression turned serious as he went into his stance. Both sides were 50 steps away from each other. There was a small pause before the monk took a step forward towards Zhao Hai.

Zhao Hai welcomed the monk’s attack and then the two proceeded to fight using their hands and feet. Their way of combat caused Tang Yaoen and Luo Ying to be dumbfounded.

Luo Ying was very clear about the monk’s strength. The monk was very strong, especially in close-combat. Who would have expected Zhao Hai to also be formidable in hand-to-hand combat. He was able to fight equally with the monk.

What Luo Ying and the others didn’t now was that Zhao Hai was using four Buddhist Techniques as he fought against the monk. Altogether, he used the Demon Subjugation Technique, Descending Dragon Technique, Crouching Tiger Technique, and the Cosmos Technique.

The Cosmos Technique was the sole movement technique among the 18 Buddhist Techniques. Zhao Hai wasn’t able to use it in the past but now he was able to use it against the monk. The monk’s body movement technique was also very good. If Zhao Hai didn’t use a movement technique then he wouldn’t be the monk’s opponent.

Meanwhile, the monk couldn’t help but be startled. He practiced body cultivation his entire life. Moreover, he was using a Faith Power Cultivation Method. This caused his attacks to be formidable. He didn’t expect to see someone who could block his attacks today. He could even faintly sense that Zhao Hai’s attacks were more powerful. How could this not stun him?

The exchange between the two became quicker and quicker and their attacks were also becoming heavier. Although the monk practiced body cultivation his entire life, he couldn't compare to Zhao Hai's abnormal body. Unexpectedly, the monk was beginning to be pushed back.

Luo Ying looked at Zhao Hai in disbelief. He couldn't believe that there would be a person who could stay toe-to-toe with the monk. It was totally unimaginable.

Although Luo Ying was much stronger compared to the monk, he knew clearly how strong the monk was. Even in this place, the monk was among the top Severed Soul Experts. Zhao Hai was actually able to fight even with him.

Zhao Hai didn't care about anyone's thoughts. His actions became faster and faster and his hits became heavier. The monk could only retreat. At this moment, the monk pulled his bead necklace out. Upon waving it, the bead necklace turned into a whip. Then the monk waved his whip and attacked Zhao Hai.

Seeing this, Zhao Hai couldn't help but laugh as he said, "Is it time to use weapons? Good, then let me play with you." After he said that, he waved his hand and took out a long iron staff before striking the monk with it.

The two changed from fighting with their hands and feet to fighting with weapons. However, it was still close-combat. Any mistake made by either of them might turn fatal. Tang Yaoen looked at the fight with peak attention.

The monk couldn't help but feel bitter. He didn't expect Zhao Hai to be this formidable. Zhao Hai even had a formidable weapon with him.

After the two fought for some time, Zhao Hai coldly snorted and said, "I've played enough. It's time to end." Then he waved his hand, releasing a large number of flying swords around him. These flying swords immediately arranged themselves into a sword formation, trapping the monk inside. The monk found that every time he moved, he would expend a large amount of spiritual qi. This caused his expression to turn ugly.

Moreover, the monk discovered that the swords had disappeared and he seems to be inside an interstellar space. Then the planets around him began to exert pressure on him. He felt that he could no longer move. He has been tied down.

Then the illusion around him vanished. The monk was like a fish in a net. Zhao Hai stood not far away from the monk, looking at him with a smile on his face.

Zhao Hai smiled faintly, then he turned his head to Luo Ying and said, "Senior Luo Ying, we've won. Can we go up now?"

Luo Ying gave Zhao Hai a complex look as he replied, "Good. Let me lead you there." Then he led the three towards a stone slab. Unexpectedly, this slab was actually a transmission formation.

The four got on the transmission formation and disappeared along with a flash of light. When they arrived at the second layer, Zhao Hai and Mu Yu couldn't help but stare.

Zhao Hai looked at the surroundings and couldn't help but be amazed. The surroundings were too strange. There was no light in all four directions. Besides the flash of light from the transmission formation, everything was pitch black.

Not only was the surrounding black, it also isolated one's spiritual force. For experts like Zhao Hai and Mu Yu, their spiritual force was limited to a hundred meters.

After looking around him, Zhao Hai smiled and said, "Interesting. Brother Mu, let's have a look." Mu Yu gave a heavy nod. He now understood that the people of the Sky Tower held the home advantage. They can literally change the environment of the tower in order to suit their combat needs.

Although this was just a guess, Mu Yu was fairly sure that this was the case. Zhao Hai didn't care about this as he stepped out of the transmission formation. Then he waved his hand and sent out lightning from his hand. Then a storm formed, causing the surroundings to light up.

Zhao Hai's move caused Luo Ying's eyes to feel uncomfortable. He couldn't help but narrow his eyes. Then at this time, Zhao Hai felt a sharp aura going straight towards his head.

Zhao Hai waved his hand and released a white light. When the light disappeared, the sharp aura on his head also disappeared.

Zhao Hai opened his mouth and said, "Brother Mu, take care of your surroundings." Mu Yu responded and immediately took his weapon out. Then he surrounded his body with flower petals.

Zhao Hai flew up as his body began to shine. At the same time, he took out a lot of flying swords that also lit up, acting like light tubes in the air. In an instant, the area around Zhao Hai was lit up. Although it couldn't compare to the outside, it was enough to see things.

At this time, Zhao Hai and Mu Yu were standing in the middle of the sword formation. Zhao Hai looked around him as he sneered and said, "It's a sneak attack. Let me see how they do it."

Zhao Hai let Mu Yu to move forward. At the same time, Zhao Hai continued to release silver needles in order to look for his opponent.

Before long, Zhao Hai discovered that the surrounding area wasn't flat, but it was like a hill. It was also floating and unsteady. The suppression was very powerful. Even the Space was unable to see very far. Zhao Hai could only use the silver needles to explore. However, he still hasn't found anyone yet.

As Zhao Hai was looking around, he suddenly felt a dangerous aura coming towards Mu Yu. Zhao Hai coldly snorted as his Stellar Transformations Sword Formation moved. It emitted golden light and began to put pressure on the surroundings.

At this time, Zhao Hai saw Mu Yu's shadow twist before a black rapier pierced Mu Yu's stomach. Mu Yu also discovered this rapier, but it was too late for him to dodge. Fortunately, Zhao Hai was able to move and block the attack. Then the shadow disappeared followed by a strange laughter.

Zhao Hai's eyes turned bright as he said, "A Divergent Ability user. Interesting. I didn't expect to meet a divergent ability user at this time. Brother Mu, be careful. The guy can hide in the shadows to attack people."

Mu Yu's heart rate couldn't help but increase. What happened scared him. The other party was actually able to kill using shadows. He wasn't even able to respond in time.

Zhao Hai coldly snorted and waved his hand as he said, "Scatter!" Along with his order, his flying swords split into flying needles.

Then these needles lit up much brighter than before. Moreover, it lit up everything in the surroundings to the point where there were no shadows.

#### Chapter 1580: Runaway Wolves

A shadowless lamp! Zhao Hai arranged his silver needles according to the principle of a shadowless lamp. Zhao Hai knew that the opponent can use shadows to kill, such a person wasn't easy to deal with.

The range of Zhao Hai's shadowless lamp was enormous. Zhao Hai and Mu Yu were completely covered by the light of the lamp, removing any shadows around them.

Seeing this, Luo Ying's expression couldn't help but change. In terms of real strength, the person on the second floor might not be a match for the monk on the first floor. However, this person has a divergent ability that was impossible to guard against. A lot of experts fell under his move.

However, Zhao Hai was able to counter this ability using light. He removed any shadows around him and Mu Yu. He was in an impregnable position. It seems like even the person on the second floor wouldn't be able to stop them.

Luo Ying guessed correctly. Naturally, Zhao Hai couldn't be stopped on the second floor. Now, Mu Yu and Zhao Hai didn't need to be afraid of any surprise attacks. At the same time, Zhao Hai's silver needles were working to weed out the person on the second floor. Zhao Hai believed that he would be found quickly. And once the guy was found, it would be very hard for him to escape.

Before long, a smile bloomed on Zhao Hai's face. The second floor was almost as big as the first floor. However, the ground wasn't as flat. The darkness seems to suppress spiritual force, but this didn't trouble Zhao Hai. He already found the person hiding in the shadows. He was currently lurking not far from where Zhao Hai and Mu Yu were. His black clothes seem to blend in with the darkness.

Zhao Hai snorted as his body disappeared from where he originally was. The next moment, he was beside the person reaching his hand out to capture him.

The person's response was very quick. His body shifted the moment Zhao Hai was about to reach him. However, he was already seen by Zhao Hai, he couldn't run away. After backing up, he wanted to hide in the shadows. However, Zhao Hai chased him, making it very hard to escape. He could only step forward and fight Zhao Hai.

Fifty moves into their exchange, the person was finally hit by Zhao Hai. The punch didn't kill him but instead sealed his spiritual qi. Then he took the man and threw him in front of Luo Ying. He punched the man once more to unblock his meridians.

The person looked at Zhao Hai and gave him a salute before his body vanished into the darkness once more. Zhao Hai waved his hand, withdrawing his silver needles. Mu Yu also returned to Zhao Hai's side. Darkness plunged the entire second floor once more.

Luo Ying looked at Zhao Hai and the others and said, "Let's go." After he said that, he moved forward several steps. A light suddenly flashed as another transmission formation appeared. The group entered the formation and then vanished from the second floor in a flash of white light.

When they arrived at the second floor, Zhao Hai and the others were once again surprised. What appeared before them was a vast grassland. The floor was no longer ten mu wide. One wouldn't be able to know how vast the grassland was just by eyesight alone.

This caused Zhao Hai to be stunned. He didn't expect this kind of place. The Sky Tower was indeed extraordinary. They were actually able to make this kind of place.

As Zhao Hai was thinking about this, they suddenly heard a wolf's howl in the distance. Zhao Hai and Mu Yu stared as they turned their heads towards Luo Ying. Luo Ying just gave them a smile and nothing else.

At this time, a black line was seen from the horizon. The black line got closer and closer until Zhao Hai could see that the black line was composed of wolves. It was a pack of wolves!

The pack of wolves arrived in front of Zhao Hai and the others not long after. Then they all stopped. Upon studying the pack, Zhao Hai's expression couldn't help but change. He didn't expect them to be strong. The strongest of these wolves was actually at the Severed Soul Stage while the weakest was at the Nascent Soul Stage. Most of them were at the Transcending Tribulation Stage.

While Zhao Hai wasn't sure what was going on, someone suddenly walked out from the pack. At first, Zhao Hai thought that it was a wolf. But as it turns out, it was actually a person. It was a person in a wolf's skin.

The person wasn't tall, he was just 1.6 meters tall. His body was skinny and he only had wolf skin as garments. The wolfskin head hung on his head while the rest covered his body. He also had iron claws on both of his hands.

The person looked more like a wolf than a person. As the person stared at Zhao Hai and Mu Yu, the two felt like they were being stared at by a real wolf. Then the person straightened their back and let out a shrill howl.

With this howl, the other wolves howled as well. Then the entire pack revealed their hostility towards Zhao Hai and Mu Yu. If anyone had a weak mental state, then they would have been thrown to the ground by the hostility alone.

In addition to the wolves following this person, there were still other packs of wolves heading over from the distance. It was as if they were responding to the person's call. It seems like this person's skill was controlling these wolves.

Seeing this, Zhao Hai couldn't help but show a strange smile. The person actually planned to attack him with beasts. This was too funny. Does this person really want to compete with Zhao Hai using beasts?

On the other hand, Mu Yu had a tense expression as he looked at these wolves. At this time, more wolves were running over. Zhao Hai estimated there to be at least a hundred thousand wolves present.

A hundred thousand wolves where the weakest of them was at the Nascent Soul Stage. Most Severed Soul Experts would have their scalp numb with this sight. This quantity could basically drown you to death with their numbers.

Suddenly, Zhao Hai turned his head to Luo Ying and said, "Senior Luo Ying, can we also use beasts that we subjugated? Or Undead?"

Hearing Zhao Hai, Mu Yu and Tang Yaoen stared, then their complexion lit up. This was because they were reminded of Zhao Hai's formidable Undead. Moreover, Zhao Hai's Undead knew how to use rifles. If they were taken out, these wolves would no doubt be eliminated.

Luo Ying stared, then he nodded and said, "Naturally they're allowed. Beasts and Undead are also part of your strength. Of course you can use them."

Zhao Hai smiled and said, "That's good." Then he waved his hands and took out a large number of Undead. These Undead had rifles in their hands. Moreover, they numbered roughly the same as the wolves.

Seeing this, the eyes of the person in wolfskin couldn't help but shrink. Then he let out a howl before disappearing among the pack. Then to Zhao Hai's surprise, the wolves scattered in all directions. In a blink of an eye, they could no longer be seen.

Zhao Hai was staring at what just happened with a blank expression. He didn't know what was happening. As Zhao Hai was in a daze, Luo Ying said, "You passed this floor."

Zhao Hai stared, then he turned his head to Luo Ying in confusion. Luo Ying smiled at Zhao Hai and said, "That wolf kid is known for bullying the weak and fearing the strong. Seeing how many Undead you have and they even have Fireweaver rifles, they naturally wouldn't want to fight you. Come with me, let's go to the next floor."

Zhao Hai and Mu Yu didn't expect this to happen. It seems like some of the guardians of the Sky Tower couldn't be relied on. Luo Ying didn't care about their thoughts as he led them to the next transmission formation. Then they arrived at the fourth floor.

The fourth floor was different compared to the last three floors. Its environment was a forest. It was a huge forest that it was hard to see where it ended.

Zhao Hai's expression turned vigilant. He discovered that the forest was somewhat strange. He could use the Infinity Technique as well as the Instinct Technique. The Instinct Technique allowed Zhao Hai to sense danger and this forest was full of danger. At the same time, the Infinity Technique informed Zhao Hai that the forest was part of a whole. It seems to have its own consciousness.

His discoveries caused Zhao Hai to be surprised. He couldn't feel the extent of this forest since it could suppress spiritual force just like the second floor. However, it was different from the second floor. The suppression of the forest wasn't because of the floor itself. It seems like someone was deliberately blocking the use of spiritual force.

This feeling was quite bizarre. It seems like they were facing a person and not a forest. It was a person who suppressed them the moment they discovered the intruders.

Zhao Hai knit his brows. Mu Yu also discovered how strange the situation was, he turned to Zhao Hai and said, "Little Hai, something's wrong with this forest."

Zhao Hai nodded and said, "There's something not right. This forest is strange. It makes me feel that it is hostile to us."

Mu Yu nodded and said, "I feel the same. Do you think its another divergent ability user? Probably a beast?"

Zhao Hai looked at Mu Yu and said, "I'm not sure right now. Let's head forward and find clues." Mu Yu nodded as he released his artifact and protected himself. Then the two walked forward side by side.

As the two continued going forward, the hostility they felt continued to increase. Zhao Hai's expression turned more serious. He discovered that this forest was indeed part of a whole. Moreover, its aura was getting stronger and stronger, reaching the Immortal Stage.

It wasn't only Zhao Hai who felt this, Mu Yu's expression was also turning ugly. He whispered, "Little Hai, something is truly wrong. How about releasing the Hell King's Ship and attacking? Let's see if the forest could withstand its attack."

Since he didn't have any other ideas at this time, Zhao Hai agreed, "We might as well try." Then he took out the Hell King's Ship. The two got on the ship before it began to fly forward. Then at this moment, a large number of vines appeared and tried to tie the Hell King's Ship down. These vines were dark green and had a metallic sheen. They didn't look easy to deal with.
