

Another World 1591

Chapter 1591: Armored Turtle

Zhao Hai was inside the Space quietly looking at ten Giant Spirit Treasure Ships slowly disappearing. Actually, there's no need for him to take these Giant Spirit Treasure Ships. However, he still decided to take these ships. This was because in addition to the Giant Spirit Treasure Ships, he would also use something else, the Turtle Cloud Beast King.

The Cloud Turtle that Zhao Hai subdued in the Sea of Beasts was very powerful. Its defense couldn't be underestimated. Even Immortal Experts wouldn't be able to deal damage to the turtle. If turned into an artifact, the turtle would be terrifying.

However, the cloud turtle was alive, and that's better. Zhao Hai gave the turtle a layer of armor made from Liquid Silver.

It must be said that despite its defense, the turtle also had weak points. First of them were its eyes. It was an obvious weakness. If the turtle's eyes were attacked, it would no doubt be heavily injured.

Another weak point of the turtle was its behind. Zhao Hai made sure to protect these places. Zhao Hai would turn a portion of Liquid Silver into a light red crystal to cover the turtle's eyes. As for its behind, there's no need for further modifications. Whatever the turtle ate and drank was fully digested, it didn't need to defecate. Therefore, its behind would be fully covered up.

There's also the turtle's four limbs. Although they were also quite defensive, Zhao Hai was still not convinced. So he would also prepare leg armor for the turtle.

Not only would Zhao Hai prepare armor for the turtle, he also planned to construct a fortress on the turtle's shell. He wants to install a fortress on top of the turtle. Any Undead or Cultivator can occupy this fortress later on.

Zhao Hai didn't spend any effort on managing the Giant Spirit Treasure Ships and the Sword Shuttles. Instead, he made sure to equip the turtle with all it needed for battle. Not only did he give armor to the turtle, he also made sure to improve its combat prowess.

At this time, Laura and the others were making plans for the turtle. In their opinion, they need to design beautiful and powerful armor for the turtle. This way, the turtle could be a terrifying force on the battlefield.

The Universal Processing Machine already made a lot of plans for the turtle. However, either Laura and the others weren't satisfied with these plans, or the turtle wasn't comfortable with it. Therefore, there has been no final design yet.

It must be said that the turtle was quite interesting. When it was back in the Sea of Beasts, although it was strong and intelligent, it didn't communicate with Zhao Hai at all. It only made moves to show its feelings.

But after coming to the Space, the turtle has become more intelligent. Although it cannot turn humanoid and talk verbally with Zhao Hai, it used its spiritual force to talk. Because of this, it was able to reject any plans that it didn't like.

Zhao Hai didn't expect the turtle to be very picky. Seeing it act like this, he didn't know whether to laugh or cry.

Finally, after repeated discussion between the women and the turtle, a plan was chosen. The turtle's vulnerable parts would be protected by thick plate armor. As for its moving parts, a scale armor would be used. The scale armor would not only allow the turtle to move properly, it was also designed to look beautiful.

Around the turtle's shell would also be a layer of armor. It would look like ordinary scale armor during normal times. But during battles, these scales would peel off, revealing cannons underneath. The turtle would then become a moving fortress. Between this armor and the turtle's real body would be five layers of protection.

On the back of the turtle was a fortress. It was octagonal and was also divided into five layers from inside out. This fortress wasn't like conventional ones with walls and pointed towers. It was an octagonal building with 36 floors. The top three floors were Zhao Hai's living area while the three floors below that would be guest rooms. The remaining 30 floors would be used for the battle.

This fortress was also armed to the teeth. It had no blind spots at all. The cannons on the fortress can attack anyone in any direction. Most importantly, the layers were divided by height. The outermost layer would be the shortest while the inner layer would be the tallest.

Naturally, all of these armaments would be extremely heavy. However, this wouldn't be a problem for the turtle. This was because Zhao Hai installed a Yin-yang lightning pond on the fortress. And on the abdomen and four limbs of the turtle were piston-like contraptions that helped the turtle by decreasing the burden.

Zhao Hai spent half a month arming the turtle. As for the other things, they had been prepared a long time ago, so he didn't need to worry about them.

After half a month, Zhao Hai returned to the headquarters. There was already a large gathering of people present there a couple days ago, they were just waiting for Zhao Hai to arrive.

When Zhao Hai returned, he was immediately summoned to the conference hall. Inside were all the Elders. Zhao Hai promptly gave all of them a salute.

Zong Ze waved his hand as he looked at Zhao Hai and said, "Little Hai, how are your preparations?"

Zhao Hai smiled faintly and said, "Don't worry Elder, I'm ready."

Zong Ze nodded and said, "Alright, then let's head out. This time, in addition to the 80 thousand troops, there will also be 1000 Immortal Experts going with you. You'll have to arrange accommodations for these people."

Zhao Hai smiled and said, "No problem."

Zong Ze nodded, then he went outside along with everyone. Then he turned towards Zhao Hai. Zhao Hai smiled faintly and waved his hand. The Hell King's Ship, 11 Giant Spirit Treasure Ships, and 100 Sword Shuttles appeared in the headquarters. At the same time, the huge turtle appeared.

Seeing the turtle, Zong Ze couldn't help but stare. Then he looked at Zhao Hai in confusion. Zhao Hai smiled and said, "This turtle is a Cloud Beast King I subdued. I gave it some armor and constructed a fortress on its back."

Hearing Zhao Hai, Zong Ze nodded and said, "Good, it looks very imposing. Little Yu, have people embark." Mu Yu nodded, then he immediately assigned people to the large artifacts.

Zhao Hai turned to Zong Ze and said, "Elder, the Immortal Experts can go on any large artifacts. There are rooms waiting for them anywhere. They can also go to the fortress on the turtle. The rooms have been modified by me to ensure that they can rest comfortably."

Zong Ze smiled and said, "Alright, then we'll let the Immortal Experts decide." The Immortal Experts weren't polite and chose which large artifacts they wanted to be in. There were also some who went to the fortress on the back of the turtle. Zhao Hai had enough rooms for all of them.

The rooms were all large and very quiet. It was also filled with transforming clouds as well as wine, tea, side dishes and everything that they would need.

Once everyone was inside the large artifacts, Zong Ze looked at Zhao Hai and said, "Little Hai, Elder Mu will be the one leading the operation. I will stay in the headquarters to deal with matters here. Elder Mu's main task is to deal with the Immortal Experts of the Fireweavers. The main battle will be left to you and Little Mu."

Zhao Hai nodded and said, "Elder can rest assured, I'll make sure to complete the task."

Zong Ze nodded and patted Zhao Hai's shoulder as he said, "Go. Remember to show them the might and prestige of the Hundred Treasures Realm." Zhao Hai nodded and then jumped onto the turtle's back before departing in an overbearing manner.

The Hundred Treasures Realm didn't intend to hide their approach. In fact, the Fireweavers might already be in conflict with the Divergent Realm and the Sword Realm. Even if they knew about the Hundred Treasures Realm's move, they wouldn't have any way to prevent it.

Such a large army moving naturally caused the entire battlefield to shake. The surrounding realms were alarmed. However, the Hundred Treasures Realm sent people in advance to let these high-grade realms know that they were going to deal with the Fireweavers and that they were asking for passage through their territory. Regardless, these high-grade realms didn't expect the Hundred Treasures Realm to send such a large army.

The large army could cause anyone to be nervous. However, these high-grade realms didn't do anything. They just watched as the army went by.

The high-grade realms already knew that the Fireweavers were currently in battle. They also knew that the Hundred Treasures Realm made an agreement with the other Great Realms and wanted to take advantage of the situation. Naturally, these high-grade realms wouldn't stop them. In their minds, this was an opportunity to consume the Hundred Treasures Realm's strength.

So when the Hundred Treasures Realm's army went by, these high-grade realms were only observing. At the same time, the Hundred Treasures Realm received information that the Fireweavers were beginning to fight against the Divergent Realm and the Sword Realm.

It would take ten days of travel from the Hundred Treasures Realm to the Fireweaver Race. But since Zhao Hai's artifacts were quick and they didn't need to stop for rest, they only took seven days before arriving at the Fireweaver Race's domain.

The Elders were now centralized on the fortress. Because the fortress was octagonal, the top of it was a flat surface. During battle, there would be cannons placed here. But now it had been transformed into an outdoor meeting room. Mu Yao called all of the Elders over in order to discuss further plans.

Seeing that everyone has arrived, Mu Yao said, "In two hours, we will be entering the Fireweaver Race's domain. I believe they are already prepared to face us. Does anyone have any ideas about how we should proceed forward?"

The Elders didn't make any noise. Mu Yao looked at Zhao Hai and said, "Little Hai, these are your large artifacts. Tell us what you think."

Zhao Hai nodded, then he took out a computer and pressed a couple of buttons before a huge map projection appeared in front of everyone. Zhao Hai walked towards the map and said, "Before this, I've

already sent Undead to scout out the Fireweaver Realm's territory. The Fireweavers made proper preparations for our arrival. This right here is a mountain range bordering the Fireweavers' territory. This is the famous Poison Mountains. The Fireweavers built fortifications on this mountain range. Moreover, they had been inspired by our cannons and arranged lines of them in these mountains. There are also cultivators from their subordinate realms stationed here. We need to watch out for these cannons. So when we reach the Poison Mountains, we'll use our cannons to punch out a hole in their defense in the shortest possible time."

Zhao Hai's battle plan wasn't complex, it was actually very simple. However, this plan was made because they had information about the enemy. Zhao Hai knew the fortifications on the Poison Mountains as well as the troops stationed there. There weren't a lot of Immortal Experts guarding the mountains. Including Immortal experts from their subordinate realms, there were only 300 people. The Immortal Experts can take advantage of Zhao Hai's cannon in order to make a gap through the Poison Mountains. Then they would send in the Sword Shuttles and clean up the mountains in one fell swoop."

From what Zhao Hai calculated, the Fireweavers should have about 300 artillery in place. However, among these artillery were small cannons like mortars. Moreover, their artillery didn't have tracking capabilities. In this case, Zhao Hai had the technological advantage compared to the enemy. This was his greatest advantage, and they can capitalize on it to gain an easy win.

Mu Yao and the others quietly listened to Zhao Hai's words. The projection was very clear and they could see the enemy fortifications on the map. There's also a battle simulation shown on the map to make the plan more visible.

After hearing Zhao Hai, Mu Yao replied, "How many Immortal Experts did the other party send to defend the Poison Mountains?"

Zhao Hai replied, "Rough estimate is about 300 and not over 400."

Mu Yao nodded and said, "Alright, leave the Immortal Experts to us. Take care of the rest."

Chapter 1592: Seven-colored Phoenix

The Poison Mountains defense line was a newly built fortification of the Fireweavers. In the past, the Poison Mountains was a medicinal production area for the Firewaver Race. It wasn't intended to be

used for the military. This was because the Fireweavers believed that they didn't need to be guarded against the Land of Chaos. Nobody from that place would dare attack them. They only need to guard against the Divergent Realm and the Sword Realm.

But now, they had no choice but to build a defensive line on the Poison mountains. This was because the Hundred Treasures Realm were coming to attack them.

The Hundred Treasures Realm was going to attack them! The Fireweavers didn't think that this would happen. In their opinion, the Hundred Treasures Realm was a lower realm. This was a realm that they could attack whenever they wanted. And if they exerted a little effort, they would be able to destroy it.

But afterward, the Fireweavers discovered that they made a mistake. The Hundred Treasures Realm wasn't a soft persimmon that could be easily pinched. The Hundred Treasures Realm made the Fireweavers suffer big losses multiple times.

This time, the Hundred Treasures Realm even announced that they were going to attack just as the Divergent Realm and the Sword Realm attacked the Fireweavers. This caused the Fireweavers to be angry. But they also understood that these three realms should have made an agreement prior to this.

Although the Fireweavers wanted to send troops to repel the Hundred Treasures Realm army, they found that they were lacking manpower. In the end, they can only set up a defensive line on the Poison Mountains.

It was very easy for cultivators to establish fortifications. Things like digging were extremely simple since they only needed to use a few spells. The most important task was arranging the formations.

The Fireweavers attached great importance to this defensive line. Otherwise, they wouldn't have sent 300 Immortal Experts to guard it. Of these 300 Immortal Experts, 50 of them were from the Fireweaver Race while the others were from their subordinate realms. Moreover, the realms where these Immortal Experts came from had territories located just beyond the Poison Mountains. This way, they wouldn't slack off in their duties. Otherwise, once the Hundred Treasures Realm breaks through, it would be their realms who would be attacked first.

Zhu Zhifeng stood on the Poison Mountains and looked into the distance. He already received news that the Hundred Treasures Realm Army was going to arrive soon. A huge battle was approaching.

Zhu Zhifeng was one of the rare female Immortal Experts. Although she was a woman, nobody dared look down on her. Even the other Fireweavers treated her with respect. This was because she was quite strong, even amongst the Immortal Experts of the Fireweaver Race.

Zhu Zhifeng was now standing on the Poison Mountains with a gloomy expression. There were two tamed beasts next to her. These were two bird-type beasts, both of which were very beautiful. These birds were known as rainbow phoenixes. They were very powerful beasts that can fly at fast speed and can use any element to attack.

Zhu Zhifeng was the commander-in-chief of the Poison Mountain fortification. She was very clear about the importance of the Poison Mountains to the Fireweavers. If the Hundred Treasures Realm breaks through this defensive line, then they could quickly drive towards the Fireweaver domain.

From what she heard from the people who fought against the Hundred Treasures Realm, it seems like the Hundred Treasures Realm has developed rifles like the Fireweavers. They even made cannons that were better than the ones the Fireweavers had. Zhu Zhifeng found it hard to believe.

Now that she was going to face the Hundred Treasures Realm, she wanted to see how strong they really were. Just as Zhu Zhifeng was thinking about this, one of the seven-colored phoenix beside her suddenly called out. Zhu Zhifeng looked up and couldn't help but be shocked.

Zhu Zhifeng already knew that the Hundred Treasures Realm had sent a lot of large artifacts to attack the Fireweavers. But she didn't expect the Hundred Treasures Realm to send this many.

She had seen Giant Spirit Treasure Ships before when she cooperated with the Giant Spirit Realm. She was also aware that the Hundred Treasures Realm got their hands on its production method. But she didn't think that the Hundred Treasures Realm would be able to refine this much.

Before long, the fleet of the Hundred Treasures Realm arrived at the Poison Mountains. Zhu Zhifeng looked at the Hundred Treasures Realm's large artifact and coldly snorted. Then she flew up along with her Rainbow Phoenixes.

Zhu Zhifan looked at the Hundred Treasures Realm's fleet, then she loudly said, "Commander of the Hundred Treasures Realm fleet, please come out for a conversation." Before any battle, talking generally couldn't be avoided.

Cultivators were like this. They obviously weren't afraid to fight to the death, but before the battle, they also needed to fight for who was on the side of justice. Actually, this was just an interlude. However, this was an interlude that everybody was used to. Although Zhao Hai didn't like this, he didn't try to change it. He didn't have the ability to do it right now.

Mu Yao appeared on the ship's bow. He looked at Zhu Zhifan and said, "So it's the Seven-colored Phoenix. Let this Mu Yao give you his greetings."

Since she used rainbow phoenixes as her tamed beasts, people gave Zhu Zhifan the nickname of "Seven-colored Phoenix". Also, although she wore ordinary Fireweaver clothing, it looked beautiful when she wore it due to some modifications. Naturally, the most remarkable thing about Zhu Zhifan was the fact that she wasn't carrying rifles with her. Instead, she had two pistols on her sides. These pistols' barrels were lengthened at about half a meter long.

When Mu Yao gave his greeting, Zhu Zhifan coldly snorted and said, "Mu Yao, stop pretending to be polite. What are you doing here bringing so many people?"

Mu Yao looked at Zhu Zhifeng, then he suddenly laughed, "What I'm doing? Then let me tell you, we're here to take revenge. Your Fireweaver Race attacked my Hundred Treasures Realm twice. Now is the time for the Hundred Treasures Realm to return the favor."

Zhu Zhifeng didn't expect Mu Yao to give this answer so easily. When she heard Mu Yao, her expression couldn't help but change. Then she said, "Mu Yao, you need to think about this. After this, the Hundred Treasures Realm will face our Fireweaver Realm's retaliation for a hundred generations."

Mu Yao laughed and said, "If we don't come, then would you leave the Hundred Treasures Realm alone? Talking right now is useless. What you need to do is worry about us being able to get through your defense." As soon as he said that, the entire Hundred Treasures Realm fleet moved. They lined up sideways as cannons were revealed.

As soon as she saw this, Zhu Zhifeng's expression changed. She didn't expect Mu Yao to take swift action. Fortunately, they were also prepared. She immediately returned to the defense line. The defensive formation of the Poison Mountains defensive line has already been activated long ago.

Because this was a newly-made defensive line, its defensive formation wasn't very formidable. However, Zhu Zhifeng was confident that they would have no problems blocking the attack of the Hundred Treasures Realm.

Just as Zhu Zhifeng returned to the defensive line, the Hundred Treasures Realm fleet began firing. The cannons fired almost at the same time. Only one sound was heard before the projectiles were in the air.

The defensive line was made halfway up the Poison Mountains. The entire mountainside has been hollowed out. Besides supporting pillars, the rest were filled with various artifacts. To defend the mountains, the Fireweavers prepared more than 200 artillery. However, these artillery didn't have large calibres. Now that the Hundred Treasures Realm has begun firing, the Fireweavers also return fire.

However, Zhu Zhifeng finally discovered that her thoughts were incorrect. Although the cannons of the Hundred Treasures Realm fired at the same time and their shells were flying in one direction, once they entered the periphery of the defensive line, the shells curved and attacked a uniform point.

Zhu Zhifeng didn't expect the Hundred Treasures Realm's cannons to be so strange. Moreover, she knew that if the cannons of the Hundred Treasures Realm continued to attack that one spot, the defensive formation would definitely break.

Before Zhu Zhifeng could direct people to deal with the attack, the shells hit the defensive shield. The collision caused the formation to rumble.

'Bang' 'bang' 'bang' 'bang'

Loud sounds were heard before an opening appeared on the defensive shield. Then the Hundred Treasures Realm fired its second volley, expanding the hole they made. The middle of the defensive line has been opened up for the Hundred Treasures Realm.

The Fireweavers were in shock. They didn't expect the formation they carefully arranged to be broken in just two rounds of cannon fire from the Hundred Treasure Realm.

At this time Sword Shuttles departed from the Hundred Treasures Realm fleet and then shot straight through the hole. These Sword Shuttles narrowed themselves while keeping their sharpness. Their unexpected entry caused a one-sided slaughter.

It must be said that the ability of the Fireweavers to fight was strong, but their defensive capabilities were weak. And with the power of the Sword Shuttles, the defensive line of the Poison Mountains has been pierced through like a hot knife through butter. Nobody in the Poison Mountains was able to stop the attacks.

Once the Sword Shuttles shot through the defensive line, Zhu Zhifeng knew that things weren't going well. She waved her hand as she held her pistols. Then she began sending bullet after bullet towards the Sword Shuttles.

A few sounds were heard as Zhu Zhifeng's bullet hit the sword shuttles. Zhu Zhifeng was very confident in her attacks. She believed that her shots were enough to deal with a sword shuttle, unless an Immortal Expert was controlling it.

But to Zhu Zhifeng's disappointment, although she hit the sword shuttles, they weren't damaged at all. Instead, the shots were deflected. Then the sword shuttles continued moving forward as though Zhu Zhifeng didn't make an attack.

Chapter 1593: Breaking Through Poison Mountains

Zhu Zhifeng was very familiar with sword shuttles. After all, the Fireweavers liked to use these kinds of large artifacts. Although it couldn't accommodate people, its offensive strength was very good.

Sword Shuttles might cause Severed Soul Experts to feel a headache, but Immortal Experts weren't afraid of it. Rifles used by Immortal Fireweavers could defeat sword shuttles.

This was where Zhu Zhifeng was wrong. What she faced weren't ordinary sword shuttles, these were Zhao Hai's sword shuttles. Even if her bullets could break normal sword shuttles, they didn't affect Zhao Hai's.

If there were people inside Zhao Hai's sword shuttles, Zhu Zhifeng's attack might have been effective. The impact of her bullets to the sword shuttles were enough to injure people inside.

Unfortunately for her, there was nobody inside Zhao Hai's sword shuttles, not even Undead. Besides Yin-yang lightning ponds, there was nothing inside the sword shuttles. Therefore, Zhu Zhifeng's attacks were useless.

Seeing that her attacks were useless, Zhu Zhifeng's expression changed. At this time, the other Immortal Experts in the defensive line made their moves and began to attack the sword shuttles. But just like Zhu Zhifeng, their attacks didn't do anything at all.

Then the Immortal Experts thought of other means to stop the sword shuttles, one of which was to capture them. Just as some of these Immortal Experts attacked the Sword Shuttles with the intention of capture, the sword shuttles suddenly split into smaller sword shuttles. Then these small sword shuttles continued to attack the defensive line.

This time, the Immortal Experts were stunned. They now knew that the sword shuttles were unmanned. So how could they defeat it?

Zhu Zhifeng also noticed this. Upon seeing what happened, she knew that they were going to have a bad time. She immediately sent a command, "All Immortal Experts, come out of the defensive line. Let's see how many experts the Hundred Treasures Realm brought this time."

Zhu Zhifeng knew that it was useless if the Immortal Experts kept fighting the sword shuttles. Instead, they might as well fight the experts of the Hundred Treasures Realm.

When they heard Zhu Zhifeng's command, the other Immortal Experts understood what she meant. Since they couldn't deal with the sword shuttles, they might as well take the fight to the Hundred Treasures Realm's experts. They also wanted to see how many Immortal Experts the Hundred Treasures Realm sent.

With Zhu Zhifeng and the others heading out, the sword shuttles were able to move in the defensive line unhindered. Nobody can block them. They were killing people as though they were cutting grass.

At the same time, when Mu Yao saw Zhu Zhifeng and the other Immortal Experts heading out, he wasn't polite and immediately led the Immortal Experts to meet them. This time, they didn't change places and just fought in the Poison Mountains.

It wasn't that the Hundred Treasures Realm's Immortal Experts didn't want to change places, it was the decision of the Fireweavers to fight immediately. When the Hundred Treasures Realm's Immortal Experts came out, the Fireweavers immediately attacked. They didn't give any opportunity to change places.

Seeing this, Mu Yao knew what Zhu Zhifeng was planning. She wanted to use the energy caused by the battle of the Immortal Experts to stop the Hundred Treasures Realm fleet from going forward.

Zhu Zhifeng's plan was good, but she underestimated the Hundred Treasures Realm. She also underestimated the number of Immortal Experts that the Hundred Treasures Realm sent over. How could 300 Immortal Experts stop 1000?

After discovering Zhu Zhifeng's intentions, Mu Yao immediately took the other Immortal Experts to attack. It was a 3-to-1 battle of Immortal Experts between the Hundred Treasures Realm and the Fireweaver Race. Because of the number difference, the Fireweavers weren't able to hold on. In a short time, a hundred Immortal Experts have fallen.

Seeing so many people were lost in such a short time, Zhu Zhifeng understood that the Hundred Treasures Realm couldn't be stopped. She immediately led the other Immortal Experts to retreat. Seeing the Immortal Experts retreat, the other cultivators naturally wouldn't stay. Like a swarm of bees, the defenders of the Poison Mountains ran away. The defensive line has been broken.

The fall of the Poison Mountains didn't bring much joy to Mu Yao and the others. They knew that this was just the first step. There were still plenty of fights waiting for them.

The one who benefited in this battle the most was Zhao Hai. He obtained a lot of corpses to be turned into Undead, including Immortal Expert corpses.

Mu Yao and the others didn't have any problems with Zhao Hai's actions. Besides dealing with Immortal Experts, Zhao Hai was almost responsible for fighting the enemy. Moreover, the losses he could incur were beyond anybody's imagination.

After Zhu Zhifeng and the others left, Mu Yao returned to the Hell King's Ship. Then they went to the turtle fortress and discussed. Zhao Hai and Mu Yu were naturally present.

Once everyone had settled down, Mu Yao turned to Zhao Hai and said, "Good job. Now what do you think we should do next?"

Upon hearing Mu Yao, everyone stared, including Zhao Hai. It must be known that Mu Yao was the commander of this entire operation. But now he was asking Zhao Hai about the plan. It was clear that he values Zhao Hai's opinion. Then everyone calmed down. It seems like Mu Yao was training Zhao Hai to be a commander. This was also good.

Passing on the torch. Each Immortal Expert paid attention to the next generation's talents. Some of them paid attention to the younger generation's cultivation, while the others looked at their skills. Naturally, Mu Yao wanted to grow Zhao Hai's commanding ability.

Although these Immortal Experts lived extremely long lives, there was still a chance where they would die one day. If they don't prepare the next generation, then the Hundred Treasures Realm wouldn't have a great future.

Zhao Hai stared, then he looked at Mu Yao. Mu Yao smiled and gave a nod. Zhao Hai understood that Mu Yao wanted him to say whatever he wanted. Zhao Hai nodded and then opened his computer. This time, what appeared on the projection was a plain. It was covered with all kinds of plants. There were also hills and valleys that were marked.

Zhao Hai pointed towards the marked hills and valleys and said, "Elders, there are nearly a hundred outposts around the Fireweaver's land. Some of these outposts have been built recently while some were old camps of the Fireweavers that were now occupied by their subordinate realms. We don't need to worry about these newer outposts. As for these subordinate camps, they're more difficult to deal with. What I want to say is, we don't need to worry about Fireweaver outposts. If we just focus on the Fireweavers, their subordinate realms might attack us from behind. We should begin with cleaning up the subordinate camps and advance bit by bit. Although this might slow us down, it would make later fights much easier and safer for us. Moreover, once the final battle begins, there are also the other two realms who would attack together with us."

Mu Yao nodded and said, "But if we go slow like this, the other two realms might get offended. Then it wouldn't be good."

Zhao Hai shook his head and said "Elder doesn't need to worry about this. Since the Fireweavers treat the other two realms more seriously, their defense towards them should be stronger. It would take some time for the two realms to break through. Their advancing speed might not be any faster than us."

Mu Yao nodded, he looked at the projection and said, "Do you know about the situation of the two realms?"

Zhao Hai knew that Mu Yao was still worried, so he nodded and zoomed the projection out. The entire Fireweaver Domain was now shown. Zhao Hai pointed at the map and said, "Currently the Divergent Realm and the Sword Realm are in these areas. They still haven't reached deep into Fireweaver Territory. The Fireweavers have solid defenses against them, it would be hard for them to advance."

Mu Yao frowned and said, "Now that we advance too fast, we would be sandwiched by the Fireweavers. There won't be any benefit to us."

Zhao Hai smiled faintly and said, "We'll be fine. Since we're all riding on large artifacts, our mobility is very strong. If the Fireweavers try to attack us, we can lead them in a circle, or lead them to the Divergent Realm and let them help us deal with them. This will save us from losing people and even show the Divergent Realm how strong we are."

Mu Yao laughed, then he patted Zhao Hai's shoulder and said, "Good. Then let's do it according to your plan."

Zhao Hai nodded and said, "Then we can depart." Mu Yao waved his hand and said, "Depart" Zhao Hai complied and led the fleet towards the Fireweaver Domain.

Mu Yao and the others returned to their respective large artifacts, only Mu Yu remained. As Zhao Hai and Mu Yu stood on the top of the fortress, looking at the lands ahead, Mu Yu said, "If we can really eliminate the Fireweavers, the Hundred Treasures Realm will benefit greatly. Not only would we take Halfbeast Island, we can also make the Great Realms treat us seriously. They wouldn't dare attack us, giving us time to develop our strength."

Zhao Hai nodded, "I believe the Fireweavers wouldn't be able to survive. The Divergent Realm and the Sword Realm are determined to deal with the Fireweavers. Otherwise, they wouldn't have used Halfbeast Island as a bargaining piece. If we fail to deal with the Fireweavers, the ones who would lose greatly would be them."

Mu Yu nodded and no longer said anything.

Chapter 1594: Delaying

Zhu Zhifeng and the others didn't directly retreat to the Fireweaver headquarters. This was because she knew that these subordinate realms wouldn't be able to stop the Hundred Treasures Realm on their own. She also knew that her party couldn't stop the Hundred Treasures Realm. Instead, she plans to delay the Hundred Treasures Realm as long as possible. Then when the realm sends troops, they would deal with them.

Because of this, Zhu Zhifeng's group retreated to a camp not far from the Poison Mountains. This camp was in a valley and has been operated by this subordinate realm for many years. With the reinforcements that came this time, the valley has turned into a strong fortress.

It was precisely because of its location that Zhu Zhifeng and the others decided to go there. At the same time, Zhu Zhifeng ordered to strengthen the communication between the surrounding camps. As long as a camp was attacked, people would be sent over to support.

The transmission formation of the subordinate realms have always been kept open. This allowed reinforcements to rush over at any time. The subordinate realms were also ready to fight desperately against the Hundred Treasure Realm. The Five Great Realms might not treat their subordinates any better, but they were still very loyal to the Great Realms. If these subordinate realms were faced against the Divergent Realm or the Sword Realm, then they might be afraid. However, against the Hundred Treasures Realm, they weren't afraid at all. They were ready to go all out.

This wasn't to say that the subordinate realms had a huge enmity with the Hundred Treasures Realm. Instead, it was a question of mentality. For the Five Great Realms, people from the Land of Chaos, especially the high-grade realms, were third-rate realms. The Five Great Realms had the mentality that they were superior, they were like nobles looking at poor people.

With such a mentality, the subordinates of the Five Great Realms also looked at the people of the Land of Chaos as barbarians, low-grade people. Although they were merely subordinates, they were subordinated to the Five Great Realms. They had a higher status compared to those in the Land of Chaos.

It was because of this mentality that when they knew they were facing the Hundred Treasures Realm, they weren't nervous. In their opinion, it was unforgivable for these people to come and attack them.

On the other hand, the subordinate realms facing the Divergent Realm and the Sword Realm weren't as firm. The Fireweavers had to send people to suppress these people. In the minds of these subordinate realms, the Divergent Realm and the Sword Realm were at the same level as the Fireweavers. It wouldn't be shameful to surrender to them.

Zhao Hai and the others weren't aware of this mentality. They kept going according to their plan. They began tracking the subordinates of the Fireweaver Race.

At this time, Zhao Hai and the others were attacking the Spirit Formation Realm. Zhao Hai already had some understanding about this realm, he knew about them from the Undead Fireweavers.

Spirit Formation Realm, as the name suggests, specializes in formations. Their use of formations has reached a high level of mastery. Their camp was among the most difficult ones to break through. The weapons they used were mostly formation plates and formation flags.

Zhao Hai planned to attack this camp first because of this realm's ability. Their formations would bring a lot of trouble for him. At the same time, he wanted to obtain their formations and abilities for the Space.

When the large artifacts were ten mu away from the Spirit Formation Realm's camp, Zhao Hai suddenly stopped. Seeing Zhao Hai stop, Mu Yao, who was with him on top of the fortress, asked, "Little Hai, why did you stop? We're about to arrive."

Zhao Hai smiled faintly and said, "It's not easy. Elder, this realm is famous for its formations. The reason their camp is difficult to attack is because they surrounded it with all kinds of formations. These range from trapping formations to killing formations. If we rush over hastily, we will definitely be blocked. I

know this from the Undead Fireweavers. Even they are afraid of the camp of the Spirit Formation Realm.”

When Zhao Hai said this, Mu Yao couldn't help but stare. He looked at Zhao Hai and said, “So it's like that. What do you plan to do?”

Zhao Hai smiled faintly and said, “We'll destroy the formations first before we go to their camp.” After he said that, he waved his hand as the cannons on the large artifacts fired recklessly at the forest in front.

A large amount of flames were caused by this, drowning the forest into a sea of flames. Then another burst of cannon fire came, which almost extinguished the fire. Then the waves underneath the Hell King's Ship rolled out, causing a vast sea to appear.

Zhao Hai released a sword shuttle to see whether the formations were still there. When the sword shuttle entered the area, it stopped moving forward and instead turned in circles.

Zhao Hai could see that the formations were still in place. Zhao Hai coldly snorted, then, with a thought, the turtle spat out dark clouds. For some time, the dark clouds surrounded the area in front.

Once the dark clouds disappeared, Zhao Hai controlled his large artifacts to go forward at full power. Before long, they arrived in front of the Spirit Formation Realm's camp.

All of Zhao Hai's actions were seen by Mu Yao. He also could guess what the black cloud that the turtle spat out. The dark clouds should be able to dissolve spiritual qi. Otherwise, they wouldn't have been able to break through the formations that easily.

In order for formations to function, they would need spiritual qi. With the dark clouds dissolving spiritual qi, the formation has lost its power. Naturally, they were now inactive.

The formations of the Spirit Formation Realm were unlike the spatial refraction formations that Zhao Hai arranged outside the Hidden Cloud Village. The spatial refraction formation were specially refined by Zhao Hai using the Space. Powering the spatial refraction formations were the dark clouds.

When they arrived outside the defensive formation of the camp, the Hundred Treasures Realm's elders appeared out of their respective artifacts. They wanted to see how Zhao Hai plans to deal with the defensive formation.

Zhao Hai wasn't polite. The large artifacts lined up with their cannons out. Then with a wave of Zhao Hai's hand, the cannons began firing at a single point. The Hell King's Ship's battering ram also ejected followed by the sword shuttles.

The Hell King's Ship's battering ram now had the property of a Formation Breaking Spirit Snake Needle. It was designed to deal with all kinds of defensive formations. With the cannon attacks, the point target has been weakened. Then once the battering ram arrived, although it didn't break the formation, it caused the shield to shake.

Then at this time, the sword shuttles arrived. Like the battering ram, the sword shuttles also had the properties of the spirit snake needle. With the offensively strong sword shuttle's attack, a large hole was punched through the defensive formation.

But Zhao Hai soon discovered that the defensive formation of the Spirit Formation Realm wasn't simple. Although a hole was punched through, the shield on other places was still quite strong. At the same time, the hole was beginning to heal. This was quite new for Zhao Hai.

Naturally, it was impossible for the hole to close instantly. The cannons fired once more, expanding the hole that was made. Before long, the hole became bigger and bigger until the camp of the Spirit Formation Realm appeared in front of Zhao Hai.

Zhao Hai didn't hesitate to command the Undead to ready their rifles. Meanwhile, the cannons didn't stop firing. They were constantly firing at the camp of the Spirit Formation Realm.

However, no one can be seen in the camp of the Spirit Formation Realm. The whole camp seems to be covered by a layer of fog. You couldn't see anything clearly.

Zhao Hai knew that there were people in the camp, plenty of them. The people from the Spirit Formation Realm already thought about their defenses being breached, so they arranged a lot of formations inside their camp to drag out the fight against the Hundred Treasures Realm.

The arrangements of the Spirit Formation Realm was nothing less than brilliant. It's just a pity that they were against Zhao Hai. Zhao Hai had a lot of experience when it came to breaking formations. Although the Spirit Formation Realm's formations were on another level, it still followed the same principle as the other formations. After running the formations through the scanner, the method to break them would immediately be found.

Additionally, Zhao Hai had a lot of large artifacts. Large artifacts were already known to be the bane of many formations. Formations were like traps placed for people. However, large artifacts were akin to tanks that could barrel through these traps.

Because of this, Zhao Hai controlled the large artifacts to go at full speed. Moreover, when he attacked, he targeted the ground. The formation flags used by the Spirit Formation Realm were flattened in an instant.

The people of the Spirit Formation Realm also discovered this and knew that their preparations were useless against the Hundred Treasures Realm. The people of the camp immediately left using the transmission formations. Although Zhao Hai broke through the camp of the Spirit Formation Realm, they weren't able to kill the people inside the camp. The camp was able to evacuate in time.

This also showed that the formations on the camp had been effective. Although Zhao Hai was still able to break through, they weren't fast enough to prevent the people of the camp from escaping.

Seeing that the people of the Spirit Formation Realm had escaped, Zhao Hai wasn't angry nor was he worried. He knew that he would meet them again sooner or later.

After leveling the Spirit Formation Realm's camp to the ground, Zhao Hai and the others rushed to another camp. This camp was from a realm that wasn't as good as the Spirit Formation Realm. The defensive formation of the camp was easily broken through by Zhao Hai. Although this camp has received support, it was still impossible for them to block the Hundred Treasures Realm. In the end, the people on the camp could retreat. But unlike the Spirit Formation Realm, they left a lot of people behind who were killed.

Although Zhu Zhifeng wanted to support the camps that were being attacked by Zhao Hai, her strength was limited. The Hundred Treasures Realm had superior strength, so how could these small camps possibly resist.

Zhu Zhifeng initially had a thought of fighting it out with the Hundred Treasures Realm. However, she quickly gave up on the idea. The Hundred Treasures Realm truly invested manpower this time, and with Zhao Hai's large artifacts, if they came out to do a field battle, then Zhu Zhifeng's side would only lose much faster. They had nothing in hand that could stop the charge of the Hundred Treasures Realm's large artifacts.

Zhu Zhifeng discovered that they had no good way to block Zhao Hai's attacks. In the end, she can only slow the Hundred Treasures Realm down. She had the people on the camps withdraw but also left people to keep the defensive formations going. Although the Hundred Treasures Realm wouldn't spend too much time destroying these camps, they would still be slowed down by these camps.

At the same time, Zhu Zhifeng also applied for support from the Fireweaver Realm. She asked for defensive formations as well as a few more people. Zhu Zhifeng's purpose for doing this was for Zhao Hai and the others to break these formations. The Hundred Treasures Realm wouldn't leave a camp standing. After all, these camps had transmission formations. If they were left to survive, then the transmission formations could be used to send troops and attack the Hundred Treasures Realm in the rear. So Zhao Hai and the others could only pull out these nails one at a time. In this case, they would be slowed down, giving the Fireweavers more time.

To be honest, Zhao Hai didn't expect Zhu Zhifeng to come up with these plans. It was very useful. Although he knew that the camps would be broken through quite easily, attacking each camp one by one was still a slow task.

However, Zhao Hai wasn't worried at all. After all, they weren't planning to get to the headquarters of the Fireweavers as soon as possible. Although the Fireweavers were preoccupied by the Divergent Realm and the Sword Realm, their headquarters was heavily guarded. The present forces of the Hundred Treasures Realm couldn't attack it. If they did, they would suffer heavy losses, and this wasn't what Zhao Hai wanted to see. Zhu Zhifeng's actions just gave Zhao Hai and the others an excuse to slow down. Once the Divergent Realm and the Sword Realm makes some progress, then they would go at full speed towards the Fireweaver Realm's headquarters.

Chapter 1595: Fireweavers Sends Troops

Zhu Rong stood in the conference hall of the Fireweaver Headquarters, looking at the astrolabe in front of him. This astrolabe was a map-type artifact. It can show an eagle's eye view of a map. The name astrolabe came about because it was the artifact used by various realms to show the planets they control.

Zhu Rong was the current Patriarch of the Fireweaver Race. The Fireweaver always had a Patriarchal leadership since the beginning. Moreover, every Patriarch of the race was named Zhu Rong. This was because Zhu Rong was the name of an ancient god of fire. Since the Fireweavers were famous for their control over fire, they had always seen themselves as the children of Zhu Rong. Because of this, every Patriarch from each generation was named Zhu Rong, to remind the Fireweavers that they were the descendants of the god of fire.[1]

Although the current Zhu Rong wasn't a heroic leader, the Fireweavers still progressed under his leadership. Simply speaking, he was an average leader. He followed the rules and thus got great results.

The situation of the Ten-thousand Realm Battlefield was very complex. Because of this, it was very hard to foresee what was going to happen. Perhaps Zhu Rong's biggest mistake was sending troops to attack the Hundred Treasures Realm.

Their two attacks against the Hundred Treasures Realm had been counterproductive. It also caused the Fireweavers to lose out a lot. Zhu Rong's decision this time might have been his worst since he came to power.

Zhu Rong also didn't expect the Divergent Realm to attack them in cooperation with the Sword Realm. Then as they were dealing with the Divergent Realm and the Sword Realm, the Hundred Treasures Realm came and attacked.

When Zhu Rong received the news, he was angry. But later on, the Hundred Treasures Realm's attack caused him to be nervous.

The Hundred Treasures Realm has been too swift, surpassing Zhu Rong's expectations. When Zhu Zhifeng's request came in, Zhu Rong immediately agreed. He sent resources and people in order to deal with the Hundred Treasures Realm's attack. At the same time, he began to recall some troops that were facing the Divergent Realm and Sword Realm.

However, Zhu Rong knew that sending more troops wouldn't have much impact. The Hundred Treasures Realm's current style was similar to the Giant Spirit Realm in which they relied on large artifacts to trample the enemy. In the past, the Hundred Treasures Realm suffered from this style. But the Giant Spirit Realm could no longer be compared to the current Hundred Treasures Realm.

Even at the Giant Spirit Realm's peak they couldn't take out so many large artifacts. Now, the Hundred Treasures Realm had over ten Giant Spirit Treasure Ships as well as about a hundred Sword Shuttles.

Sword Shuttles were also large artifacts. However, relatively speaking, when compared to Giant Spirit Treasure Ships, Sword Shuttles could be considered to be a smaller-scale large artifact.

The Hundred Treasures Realm's display showed that they wouldn't give up on their attack so easily. But if they wanted to deal with the Hundred Treasures Realm, the Fireweavers needed to use large artifacts. Unfortunately, the Fireweavers didn't have a lot of large artifacts.

Having a few large artifacts was never a disadvantage for the Fireweavers. They didn't depend on large artifacts to grow. In place of large artifacts, the Fireweaver Race had their tamed beasts.

The Fireweavers were very good at raising beasts. And some of their beasts had huge bodies. So after deliberating for a long time, Zhu Rong decided to mobilize a large army from the front line to deal with the Hundred Treasures Realm. The people who were selected were those who had tamed beasts that were large in size.

The Fireweavers moved quickly. Before long an army of 50 thousand has been reassigned. With their tamed beasts, this army could be considered as 100 thousand-man strong.

Besides this army, there were also 1000 Immortal Experts. Originally, these 1000 Immortal Experts were reserved to reinforce the Divergent Realm and Sword Realm frontlines. But this time, they had been moved.

The mobilization of such a large army naturally wouldn't escape the notice of the Divergent Realm and the Sword Realm. The two realms immediately contacted Mu Yao, then the three began to cooperate.

When he heard about the movement of the Fireweavers from the Divergent Realm and the Sword Realm, Mu Yao immediately informed Zhao Hai so that he could make preparations.

Zhao Hai wasn't worried about it too much. He already knew about the Fireweavers' movements. He knew how many troops the Fireweavers sent out this time, and he also knew what they were planning to do. The Fireweavers were planning to deal with the Hundred Treasures Realm as quickly as possible.

Zhao Hai was waiting for the Fireweavers to do this. Although an army 100-thousand strong sounds like a lot, Zhao Hai had a lot more troops in his hands. He also had weapons of the other party and not to mention beasts to add to the numbers.

.....

Zhu Rong looked at the three patches of red on his astrolabe. The red parts were areas occupied by the Divergent Realm, Sword Realm, and the Hundred Treasures Realm. Although the red patches weren't that big, Zhu Rong knew that if they weren't dealt with, the Fireweaver Race would be in trouble.

At this time, a voice came in from the door, "Reporting."

Zhu Rong replied, "Come in."

A Fireweaver entered holding a jade sword in his hand. As he handed the jade sword to Zhu Rong, he said, "Reporting to the Patriarch. The Divergent Realm and the Sword Realm suddenly intensified their attacks. The frontlines are having a hard time holding them back because of the reassignment of manpower."

Zhu Rong searched the jade sword message with his spiritual force. Then he nodded and said, "Tell the frontlines to hold on. As long as we deal with the Hundred Treasures Realm, the troops will support them. At the same time, send word back to the realm, have them send all available personnel from the Nascent Soul Stage and above to the headquarters. We need them to participate in the war."

The Fireweaver nodded and then immediately released a jade sword message to pass the order. At this time, Zhu Rong looked back at the astrolabe, his gaze pointed towards the Hundred Treasures Realm.

Since this was the Fireweaver Domain, the 100 thousand-strong army was able to reach Zhu Zhifeng's location quickly. The Immortal Experts were also present.

Zhu Zhifeng already received Zhu Rong's order. Zhu Rong gave her so many troops, and his only command was to eliminate the Hundred Treasures Realm as soon as possible.

When Zhu Zhifeng received the order, she couldn't help but smile bitterly. After coming in contact with the Hundred Treasures Realm for so many days, she already had some understanding of their strength. Now, she didn't dare look down on them anymore. She discovered that the Hundred Treasures Realm's strength wasn't any weaker compared to the Divergent Realm and the Sword Realm. In fact, their large artifacts had greater impact compared to the latter two realms. In this case, it was impossible to deal with the Hundred Treasures Realm in a short time.

Zhu Zhifeng's plan was to delay the Hundred Treasures Realm along with the Divergent Realm and the Sword Realm. The Divergent Realm and the Sword Realm cannot attack them for a long time. The Fireweavers only need to wear them down. When the time comes, whether it be the Hundred Treasures Realm, Divergent Realm, or the Sword Realm, they wouldn't be able to go on. In the end, even if the Fireweavers lose some of their territory, they can still keep the majority of it.

If the Fireweavers were anxious to deal with the three realms, then they would lose in the end. It was impossible for the Fireweavers to deal with the three realms at the same time.

From what it looks like, the three realms were aiming to destroy the Fireweavers. It wasn't the same as before where they would just attack and then retreat. This time was completely different.

Unfortunately, although Zhu Zhifeng expressed her thoughts to the higher ups, they didn't listen. They still want to deal with the Hundred Treasures Realm as quickly as possible.

Although Zhu Zhifeng was an Immortal Expert, she wasn't the only Immortal Expert among the Fireweavers. The other Immortal Experts received the same orders. So even if Zhu Zhifeng didn't send the troops, the realms would just recall her back and replace her with someone else.

In the end, Zhu Zhifeng had no choice but to dispatch the troops. The headquarters sent 50 thousand people, and with their tamed beasts their strength was boosted to 100 thousand. There's also troops already present, which made Zhu Zhifeng's troops 200 thousand-man strong. Moreover, they had about 2000 Immortal Experts, including their tamed beasts. It was double the army of the Hundred Treasures Realm.

.....

Mu Yao and the others gathered on the octagonal fortress. They also obtained the total army size of the enemy. Mu Yao looked at everyone and said, "Let's talk about the enemy army. Does anyone have any idea about what we should do?"

The Immortal Experts were silent. The enemy army was double to triple their strength. The upcoming battle would be an uphill fight.

Mu Yao turned to Zhao Hai and said, "Little Hai, what do you think?"

Zhao Hai looked at the Immortal Experts and said, "According to our previous plan, we'll direct the Fireweavers to the Divergent Realm and then cooperate with them to deal with the enemy. Then we can destroy the enemy army bit by bit."

Hearing Zhao Hai, Mu Yao couldn't help but frown, "If we do that, won't the Divergent Realm look down on us? After all, it would look like we are relying on them to deal with the enemy."

Zhao Hai replied, "Elder, although we get Halfbeast Island by sending troops. The situation of the island isn't ideal. We still need to exert some effort to control it. If we really clash with the Fireweavers and suffer heavy losses, we won't be able to control the island. The Divergent Realm and the Sword Realm are established realms with great strength. Their foundation is deep and once they digest the Fireweaver Domain, their strength would increase. On the other hand, we can't easily digest Halfbeast Island. It would be very difficult for us to benefit from it in a short time. At that time, if the Divergent Realm or the Sword Realm decides to attack us, the consequences wouldn't be good."

"Moreover, we aren't relying on the Divergent Realm to deal with the Fireweaver Army, we just need their help to face the enemy's Immortal Experts. Every Elder we have is crucial to the realm. Every Elder we lose would damage the realm's future. Therefore, we need the Divergent Realm to minimize our loss of Immortal Experts. As for the regular army, they wouldn't be able to stop our large artifacts."

Mu Yao was silent. He knew that what Zhao Hai said was right. They were now in cooperation with the Divergent Realm so there's no worries. But once the Divergent Realm has no need for the Hundred Treasures Realm, who knows what they would do. If the Hundred Treasures Realm loses too many Immortal Experts, the realm's foundations would be heavily damaged.

Chapter 1596: Troops Blocking The Way

Seeing Mu Yao hesitate, Zhao Hai couldn't help but feel anxious. He was afraid that Mu Yao would still order to fight the Fireweaver Army head on. With their current strength, this action wouldn't be advantageous. The loss they would face was too great.

Zhao Hai wasn't worried about the loss of ordinary cultivators. With his large artifacts, the ordinary cultivators can just stay inside as they fought against the Fireweavers. There would still be losses, but not too much.

What Zhao Hai was afraid of was the loss of Immortal Experts. If they lose too many Immortal Experts, the Hundred Treasures Realm would have a hard time.

Immortal Experts were the foundation of a realm. With the Immortal Experts as the main pillar, the realm would be able to develop outwards. Their existence was enough to bring benefits to the realm.

Zhao Hai was worried that Mu Yao would fight the Fireweavers in order to save face. For a cultivator, face was very important, especially to Immortal Experts.

After hesitating for a while, Mu Yao nodded and said, "Little Hai is right. This would be the best for us right now. I will send word to the Divergent Realm immediately. Then we'll begin heading over to them."

Hearing Mu Yao, Zhao Hai sighed inside. It's good as long as Mu Yao agrees. Mu Yao looked at Zhao Hai and said, "Little Hai, prepare to move towards the Divergent Realm." Zhao Hai nodded and readjusted the course of the large artifact. They were now heading towards the Divergent Realm.

This time, Zhao Hai wasn't polite against the camp they were facing. The camp had been ravaged through. In the past, when Zhao Hai attacked the camps, he would destroy their shield first and then allow the people inside to escape. Now, Zhao Hai sent his sword shuttles first to break through the shield and then destroyed the transmission formation, barring anyone in the camp from escaping. In the end, everyone was killed by the Hundred Treasures Realm army.

Zhao Hai did this to lure in the Fireweavers. Actually, the Fireweaver Army wasn't that far from Zhao Hai and the others. It was precisely because of this that Zhao Hai made a swift move to change directions.

However, the Fireweaver Army weren't as mobile as the Hundred Treasures Realm. Although the Fireweavers also had their giant beasts, they weren't as fast as large artifacts.

Zhu Zhifeng arrived at the camp Zhao Hai and the others were just in. Looking at the destroyed camp, she couldn't help but frown. Although the previous camps had been breached, there were no traces of fighting on them, meaning the people inside managed to survive. But now, there were traces of fighting in the camp. This meant that the people in this camp had suffered a misfortune.

Judging from the direction of the Hundred Treasures Realm, they seem to be meeting with the people of the Divergent Realm. This wasn't good news for the Fireweaver Army. If the Hundred Treasures Realm met with the Divergent Realm, the Divergent Realm would be able to break through the Fireweavers' defenses.

Zhu Zhifeng landed on the camp and looked at the traces of battle. She could feel the spiritual qi fluctuations of the surroundings. She turned to the other Immortal Experts and said, "The Hundred Treasures Realm has been here at most two hours ago. But catching up to them will be difficult. From their direction, they should be meeting with the Divergent Realm. This isn't good. Therefore, I want to send a small group to try and block them. What does everyone think?"

One of the Immortal Experts knit his brows and said, "I'm afraid it wouldn't be easy. The hundred Treasures Realm isn't weak. It's impossible for us to block them if we send a few people. And if we plan to send more, then we would have to find a way to catch up. Although we can use the transmission formations of our subordinate realms, they cannot accommodate all of us as well as our beasts. And if we only send people, their combat strength would be greatly reduced."

Zhu Zhifeng knit her brows. She knew that what the Immortal Expert said was correct. This was also the reason why she hesitated. But if the Hundred Treasures Realm met with the Divergent Realm, it would be even more troublesome.

After thinking about it, Zhu Zhifeng immediately said, "Let's send some Immortal Experts ahead. We only need to delay them so that our main army can catch up. The Hundred Treasures Realm needs to be eliminated before they meet the Divergent Realm."

Zhu Zhifeng still had some status among these Immortal Experts, otherwise Zhu Rong wouldn't have sent her to lead them. It must be known that Immortal Experts couldn't be easily convinced.

So when they heard Zhu Feng, the Immortal Experts were stunned, but they still followed her orders. The Hundred Treasures Realm needed to be blocked. If they were blocked, they would be wiped out once Zhu Zhifeng and the army arrived.

Although the plan seemed safe, Zhu Zhifeng still had some worries about it. The Hundred Treasures Realm couldn't be easily dealt with. After fighting against them multiple times, Zhu Zhifeng understood that both their Immortal Experts and large artifacts were very strong. Zhu Zhifeng just hoped that her plan would succeed.

As soon as Zhu Zhifeng made this plan, Zhao Hai became aware of it. He left silver needles wherever he passed through to monitor the situation.

Although he knew about Zhu Zhifeng's plan, Zhao Hai didn't have any ability to stop it. He can only speed up. But he knew clearly that no matter how fast they went, they couldn't be as fast as transmission formations. He only hoped that they could break through any blockade the Fireweavers prepared for them.

Zhao Hai also told Mu Yao about this information. After hearing Zhao Hai, Mu Yao knitted his brows and said, "Are you sure that they will be sending Immortal Experts after us?"

Zhao Hai nodded and said, "I'm completely sure. Zhu Zhifeng knows that its impossible to stop us if they don't send Immortal Experts. What we need to do right now is to proceed at our full speed."

"We need to have at least ten Immortal Experts in each of our large artifacts. They will cooperate with the troops to input spiritual qi into the large artifacts. This way, we can increase their speed as well as their ramming strength. Even if there are Immortal Experts ahead of us, as long as there are not that many, we can just rush past them."

Mu Yao thought about it for a while and said, "Let's try that. The Fireweavers wouldn't be able to send a lot of people. As for the camps, we can ignore them for now." Zhao Hai nodded.

Mu Yao took out a jade sword message and then sent the message out to various large artifacts. At the same time, Zhao Hai prepared the Yin-yang lightning ponds inside all of his large artifacts to provide energy. Besides this, there's also the spirit gathering formation inside the artifacts.

The spirit gathering formation was once used on the Formation Breaking Spirit Snake Needles. This formation allowed the needle to break through defensive formations.

Zhao Hai temporarily installed spirit gathering formations on the large artifacts. Then he would make the cultivators input their spiritual qi into it, providing another source of energy for the large artifacts. With the Yin-Yang lightning ponds, the speed of the large artifacts would more than double. And in the process, their impact strength also increased.

Before long, Mu Yao's order was passed down and the large artifacts were ready. At least 10 Immortal Elders were sent to each large artifact. And almost every cultivator inside the large artifacts participated in sending energy.

The cultivators inside the large artifacts were currently feeling stifled. This was because they had no opportunities to make a move. All fights were taken care of by Zhao Hai's large artifacts. Now that they had the opportunity to make a move, although not in battle, they were still happy to contribute. So it was no wonder that they put all of their strength into sending energy.

As everyone's spiritual qi entered the ships, a burst of golden light appeared and the ships immediately sped up. The turtle didn't lag behind, it sped up as well. Although it was wearing armor, it also had a Yin-Yang lightning pool. There were also Immortal Experts on the octagonal fortress giving energy. The turtle almost didn't need to spend energy to speed up.

Additionally, the turtle also sent its own spiritual qi towards the fortress. This time, the turtle became the fastest moving figure in the Hundred Treasures Realm fleet.

Zhao Hai stood on the fortress and looked straight ahead. This was because he knew that Immortal Fireweavers were in front. There were about 500 of them. Besides the Immortal Fireweavers, they were also able to mobilize 20 thousand troops from the surrounding subordinate realms.

Despite this, Zhao Hai didn't stop and sped up instead. Mu Yao wasn't aware of what was currently in front of them, but he knew that Zhao Hai had his reasons for doing this. Because of this, he didn't stop him.

Before long, Mu Yao saw a group of people in front of him. His expression couldn't help but change. Then he turned towards Zhao Hai and saw that he was stubbornly looking forward. He didn't look like he was intending to slow down.

Zhu Jieying stared at the Hundred Treasures Realm's fleet flying over. The rifle in his hand was already prepared. The other cultivators also took out their artifacts. They were ready to fight it out with the Hundred Treasures Realm.

Chapter 1597: Violent Charge

Zhao Hai calmly looked at the enemy army in front of him. The opposite party had about 20 thousand people. They were lined up in a huge group, only blind people couldn't see them.

However, Zhao Hai didn't stop the ships. Instead, he accelerated forward. The Fireweavers thought that the Hundred Treasures Realm would stop and exchange polite greetings. But they were wrong! Instead of stopping, the Hundred Treasures Realm continued barreling through!

Zhu Jieying saw this and was startled, he immediately shouted, "Disperse! Scatter and attack!" At the same time, the rifle in his hand began firing.

Zhu Jieying's rifle was a bit similar to Zhu Gui's. It was a huge rifle, looking more like a small cannon. The rifle's bullets were also very big, and they were burning with orange flame.

The other Fireweavers also took their rifles and began attacking the hundred Treasures Realm fleet. The other cultivators didn't do anything and just changed their army formation. The Hundred Treasures Realm fleet wasn't in their range yet and they also didn't have rifles in their hands. With their common artifacts, once they reach a far enough distance, they wouldn't be able to deal enough damage. Therefore, they didn't participate in the offense.

But as soon as the fleet of the Hundred Treasures Realm entered their attack range, the cultivators immediately took their weapons out and attacked.

However, how could the ships of the Hundred Treasures Realm be that easy to deal with. Nobody could be seen on the Giant Spirit Treasure Ships of the Hundred Treasures Realm. Once the Fireweaver bullets hit the ships, they were simply deflected. At the same time, the artifacts of the cultivators weren't even able to make a scratch on the ships. Moreover, all of these attacks didn't slow the ships down.

Fortunately for the attackers, they changed their formation prior to their offense. And since Zhao Hai had no intentions of dealing with them, the Hundred Treasures Realm fleet just whizzed by. The Fireweaver army could only look at the ships' behind and eat dust.

Seeing their blockade being pretty much ignored, Zhu Jieying's expression couldn't help but turn ugly. He immediately took out a jade sword message to tell Zhu Zhifeng about the situation.

When Zhu Zhifeng heard the news, her facial color changed. She understood that the Hundred Treasures Realm already knew about her plan. But this only made Zhu Zhifeng more convinced that they needed to stop the Hundred Treasures Realm.

Zhu Zhifeng immediately dispatched 500 experts. These cultivators appeared in an area very close to the place where the Fireweavers and the Divergent Realm were fighting.

As she sent the group out, Zhu Zhifeng also ordered everyone to stop. She knew that chasing any more would be useless. With their speed, it was impossible to catch up to the Hundred Treasures Realm. Therefore, she began to organize batches and sent them through transmission formations. She plans to use this method in order to catch up to Zhao Hai.

Zhao Hai was also aware of Zhu Zhifeng's actions. However, he didn't care about it. With the cultivators and Immortal Experts providing energy, the fleet would be able to get through even the Immortal Experts of the Fireweavers.

With the fleet's speed, they were now not too far away from the Divergent Realm. By this time, they had broken through five blockades. And on one of the blockades, he was able to kill a couple of Fireweaver Immortals.

It was because of this loss that Zhu Zhifeng no longer dared to block the Hundred Treasures Realm too much.

However, in order to avoid being exhausted, the cultivators supplying energy to the ships began to rest and go in shifts. Even so, the fleet was still very fast. After all, there were still 10 Immortal Experts supplying each ship. The energy provided by these experts couldn't be underestimated.

Zhao Hai knew that there were still a Fireweaver blockade in front of him. And this blockade wouldn't be easy to break through. This time, the Fireweavers deployed a lot of large artifacts to stop them.

The Fireweavers didn't have a lot of large artifacts and they also weren't good at them, but this didn't mean that they didn't use them at all. And because they cooperated with the Giant Spirit Realm, the Fireweavers still had a few Giant Spirit Treasure Ships. They also have some sword shuttles as well as large beasts that had great defensive power. This was the last blockade of the Fireweavers, the most difficult one they laid out.

Zhao Hai also prepared to set out a full power. Now 20 Immortal Experts were sending energy to each large artifact, and all of the cultivators were giving energy as well. Zhao Hai also released Undead to help send energy. This caused the entire fleet to approach the Fireweaver blockade with an unprecedented amount of momentum.

This time, Zhao Hai didn't make the turtle take the lead. The turtle was a beast that could be greatly injured. The turtle was there to keep up appearances and defend, not be the main offence for the fleet. With its strength, it could face several Immortal Experts in a proper battle.

The Fireweavers also knew that the Hundred Treasures Realm had no intentions to stop. They knew that if they stood in place, they would be hit by the Hundred Treasures Realm. Because of this, the beasts and large artifacts of the Fireweavers also charged towards the fleet.

The two sides looked like knights going for a duel, charging at each other. The two sides got closer and closer, each staring at the eyes of the other. Their eyes were red, as though forgetting the existence of life and death.

The fleet of the Hundred Treasures Realm consists of 13 Giant Spirit Treasure Ships as well as the sword shuttles. But in a head-on charge like this, these sword shuttles weren't useful at all.

Besides the 13 Giant Spirit Treasure Ships, there was also the turtle. But since the turtle has been placed behind, the spearhead of the fleet was the Hell King's Ship. The Hundred Treasures Realm's fleet was like an arrow with the Hell King's Ship at the tip. Then the Pagoda and the Giant Spirit Treasure Ships were behind it.

On the Fireweaver side, they had 5 Giant Spirit Treasure Ships, 50 sword shuttles, and about 1000 large beasts. Naturally, their formation wasn't as sharp as Zhao Hai. They looked like a tide rushing towards the Hundred Treasures Realm fleet.

Boom! Both sides finally hit each other. The Hell King's Ship hit the enemy Giant Spirit Treasure Ships. Although the enemy Giant Spirit Treasure Ships dented the Hell King's Ship, it failed to cause it to stop. Meanwhile, the Hell King's Ship's battering ram entered the enemy ship's bow, opening it up before splitting it in half. Then the Hell King's Ship continued flying forward.

Although the other Giant Spirit Treasure Ships weren't as miserable as the first one, their fate was fairly similar. The Giant Spirit Treasure Ship that clashed with the Pagoda might be the luckiest one. The Pagoda didn't have as strong of an impact as the others. However, it still managed to deflect the ship that clashed with it. After all, once two forces clash, one of them had to get out of the way.

As for the beasts, they also couldn't stop the advance of the Hundred Treasures Realm. All beasts that went head-on against the Giant Spirit Treasure Ships were turned into meat paste. As for those who just brushed with the ships, their bones had been shattered and their muscles torn. Beast parts could be seen being thrown around from the area of impact.

This clash ended with the Fireweavers' complete defeat. Besides those in the periphery, the group sent forward by the Fireweavers were annihilated. This caused the higher-ups of the Fireweavers to pay more attention to the large artifacts of the Hundred Treasures Realm.

Upon leaving the battlefield, Zhao Hai and the others flew directly towards the Divergent Realm. At the same time, Zhao Hai put away the Giant Spirit Treasure Ships that he destroyed, this included the scrapped sword shuttles. Naturally, his actions were done in secret. Mu Yao and the others didn't know about it.

Mu Yao stood on top of the fortress, looking in front of him. Then he turned to Zhao Hai and said, "Little Hai, that was the last blockade of the Fireweavers? Then we should reach the Divergent Realm soon."

Zhao Hai nodded and said, "Yes, that was the last blockade of the Fireweavers. The Divergent Realm frontline is just ahead. We will approach from the Divergent Realm's domain."

Mu Yao nodded, "If there's no more danger, we should slow down. We can't cause any misunderstanding with the Divergent Realm. After all, we're currently allies." Zhao hai nodded, then he informed the people on the other large artifacts to stop sending energy. The fleet slowed down instantaneously.

However, this slowdown was only relative. The actual speed of the fleet was still very fast. After more than two hours of flying, they officially entered the battlefield of the Divergent Realm and the Fireweavers.

The speed of the fleet slowed down once more. All of the Immortal Experts were now on the fortress looking at the situation around them.

At this time, several black spots could be seen flying from the distance. Then the black spots slowly increased and before long a battalion appeared in front of the Hundred Treasures Realm. Zhao Hai could also see that these people had wings.

Mu Yao waved, and the entire fleet stopped. Then the turtle slowly moved forward towards the front. At the same time, the winged people stopped.

Seeing the other party stopping, Mu Yao cupped his fist and said, "The Hundred Treasures Realm's Mu Yao has seen everyone. Are you our friends from the Divergent Realm?"

One of the winged people cupped his fist towards Mu Yao and answered, "This one is the Divergent Realm's Eighth Scouting Team Captain, Ulitan. I greet Elder Mu Yao and everyone from the Hundred Treasures Realm." After he said that, he made a gesture and moved back. The Hundred Treasures Realm fleet followed behind.

Before long, a huge camp appeared before the people of the Hundred Treasures Realm. The camp was enormous, encompassing an entire mountain. The mountain was full of cave residences. People could be seen coming in and out of these caves.

The camp didn't have any defensive measures, not even a defensive formation. This was something that Mu Yao didn't expect.

Just as the Hundred Treasures Realm fleet arrived outside the camp, a group of people left the camp to meet them. The person who led this team was Sleat.

When Mu Yao saw that Sleat was coming, he immediately led the other Immortal Experts out of the fortress to give their greetings. When both sides were close enough, Sleat cupped his fist and said, "Elder Mu, you're here. Welcome to our camp."

Mu Yao also cupped his fist and said, "Elder Sleat, you didn't have to come out and greet us. We've made you wait"

Sleat smiled and said, "You've broken through several blockades of the Fireweavers, that was admirable. Please, the Elders of my realm are waiting for you. Then you all have a rest in our camp."

Mu Yao smiled and said, "Elder Sleat doesn't need to trouble himself. We're already used to staying inside our large artifacts. There's no need to arrange a place for us. We shouldn't make the other Elders wait for too long. Please lead us in." Sleat nodded and said, "Alright, then follow me."

Zhao Hai and Mu Yu didn't follow them. Also, only 100 Elders followed Sleat to the Divergent Realm camp. The others returned to their respective large artifacts. Zhao Hai and Mu Yu stayed on the fortress rooftop. They were drinking liquor as they looked at the Divergent Realm camp. Then Mu Yu suddenly said, "Little Hai, this camp doesn't have any defenses. Is this because they're confident or arrogant?"

Zhao Hai smiled and said, "I think they're confident. Moreover, the camp isn't without any defenses at all. They chose this position because it's the highest point in the region. The surrounding vegetation has also been leveled, so there's no chance for the enemy to perform a surprise attack. Also, haven't you heard what the winged man said, he's a captain of the scouting team. This means that the Divergent Realm has scout teams. The Fireweavers couldn't come over and attack at all. This allows the camp to be relaxed."

Mu Yu nodded, "The Divergent Realm is really formidable. I'm afraid there are around 300 thousand cultivators in this camp. All of them are at the Transcending Tribulation Stage and above. As for Immortal Elders, I have no idea."

Zhao Hai smiled and said, "They definitely have a lot of Immortal Experts. They want to deal with the Fireweavers, how could they not spare enough manpower? The Fireweavers aren't easy to deal with as well, so the Divergent Realm cannot half-heartedly send troops. I have to say, I really underestimated the Five Great Realms."

Mu Yu drank from his cup and enjoyed the fragrance of the alcohol. Then he said, "Soon, we'll be able to defeat them. Soon."

Chapter 1598: Elder Prisonheart

Mu Yao entered the cave in the camp along with Sleat. The other Immortal Experts were left outside. The cave was quite huge. After the Immortals entered the camp, they were offered liquor to drink.

When Mu Yao entered the cave, he saw ten Elders from the Divergent Realm sitting on transforming clouds. Seeing Mu Yao arrive, these Elders stood up and gave their greetings.

Mu Yao hastily returned their greetings. Sleat also began introducing Mu Yao to the Elders present. One of these Elders was an ordinary-looking old man. He wore a robe and his eyebrows and hair were already white. He had a kind smile on his face, but his eyes had that light that could penetrate through people's hearts.

This old man was a famed Elder of the Divergent Realm, he was nicknamed Elder Prisonheart. The reason for this nickname was the old man's formidable spiritual attack which targeted one's heart demon and activates it. Then the heart demon would devour the cultivator's mind and kill them.

In addition to activating your heart demon, Elder Prisonheart can also cause one's heart demon to go into deep slumber, which could help a person's cultivation. Therefore, there was a saying in the battlefield that says, "Prisonheart can bring you heaven, Prisonheart can also bring you hell."

Mu Yao also heard about Elder Prisonheart, but he hadn't seen him in person. He didn't think that this notorious Elder of the Divergent Realm would look like an ordinary old man.

Despite his appearance, Mu Yao didn't dare underestimate this old man at all. Not only was Elder Prisonheart an esteemed Immortal Expert of the Divergent Realm, it was said that he was the oldest Immortal Expert in the Ten-thousand Realm Battlefield. Even Mu Yao had no idea how old Prisonheart was.

Mu Yao bowed to Prisonheart and said, "I have seen Elder Prisonheart. I didn't expect to see you here, this Mu Yao is extremely honored. I heard about Elder and my Master's friendship. This Mu Yao can be considered a junior, please forgive me for not offering my respects."

Prisonheart chuckled and said, "There's no need to be polite. You're now representing the Hundred Treasures Realm. It wouldn't be good if you lower yourself to me. Come, have a seat."

Mu Yao smiled faintly and then gave a bow before sitting down. The other Immortal Experts in the room also sat down. Prisonheart looked at Mu Yao and said, "I heard that you have broken through six blockades set up by the Fireweavers just to reach this place."

Mu Yao smiled bitterly and said, "It's something that can't be helped. At that time, the Fireweavers had sent a 200-thousand man strong army to deal with us. There's also 2 thousand Immortal Experts. We only have 1 thousand Immortal Experts. Although we're confident that we can defeat the ordinary cultivators, we're not sure if we can win against their Immortal Experts. In the end, we can only come here to your camp."

Prisonheart wasn't angry nor did he show any contempt in his expression. Instead, he nodded and said, "You're a good commander, you made the best decision. I saw your large artifacts. No wonder you're able to break through the defenses of the Fireweavers."

Mu Yao nodded, then he said, "We managed to kill 32 Immortal Experts on the way here. We also destroyed 5 Giant Spirit Treasure Ships, 50 sword shuttles, and about 2000 tamed beasts."

After he said this, Mu Yao looked at the Elders of the Divergent Realm and said, "The Fireweavers don't want the two of us to meet. With our large artifacts, they would find it very hard to hold their defensive lines."

Prisonheart looked at Mu Yao and smiled faintly. He understood what Mu Yao wanted to say. He was afraid that the Divergent Realm would look down on the Hundred Treasures Realm. He wanted to tell them that the Hundred Treasures Realm could pull their own weight.

Prisonheart had long passed the age of hot-headedness, so he didn't dislike Mu Yao's statement at all. He just smiled and said, "That's good. You take a rest first. When we attack, we'll send you a message."

Mu Yao nodded, Prisonheart looked at the others and said, "The Fireweavers want to hold us here until we're exhausted and retreat. But this time, we gathered the strength of three realms, we cannot just leave for cheap. If we want to conquer the Fireweaver Domain, we need to take down their defenses as soon as possible."

The Elders nodded. This way was very important for the three realms. If they failed, then dealing with the Fireweavers would become more difficult. Moreover, they would be subjected to the crazed revenge of the Fireweavers. After all, the Fireweavers weren't people who would just take a beating and not punch back.

Prisonheart said, "Go and prepare. You have three days. After three days, we'll launch our attack. We need to take the defensive line in one fell swoop."

Those present nodded. Prisonheart waved his hand, ordering everyone to leave. Then he looked at Mu Yao and said, "Mu Yao, please stay."

Naturally, Mu Yao stayed behind. Once everyone left, Prisonheart looked at Mu Yao and said, "Mu Yao, tell me the truth, how confident are you that we can rush through the defenses of the Fireweavers? This attack is very important to us. If we fail, it would be a very heavy blow to our morale."

Mu Yao nodded and said, "I know this. But I still don't have an understanding of the defensive line. I need to see it first to make an assessment."

Prisonheart nodded and said, "Good, that would be good. We need to get your answer as soon as possible so that we can make the proper arrangements."

Mu Yao nodded, then he gave Prisonheart a bow before leaving. Looking at Mu Yao's departing back, Prisonheart murmured, "Sure enough, he's a talent."

Mu Yao quickly returned to the octagonal fortress. Zhao Hai and Mu Yu stood on the rooftop waiting for him. When he saw the two, Mu Yao nodded and said, "The people of the Divergent Realm have decided to attack three days later. At that time, we will be at the front. Little Hai, look into the defensive line of the Fireweavers. See how certain we'll be in breaking through."

Zhao Hai nodded and said, "Alright, I'll immediately prepare the scouts." Mu Yao nodded.

At this time, a jade sword message flew over to Mu Yao. After receiving the jade sword message, Mu Yao read its contents using his spiritual force. Then he smiled and said, "Good. Little Hai, look at this. Maybe you won't need to send scouts."

Zhao Hai took the jade sword message and read its contents. Inside was the report sent by the Divergent Realm's scouts regarding the Fireweaver Realm's defensive line. The defensive line's setup was described in great detail.

Zhao Hai took a closer look at the report. He now knew how much the Fireweavers prepared to defend against the Divergent Realm. The Fireweavers stationed about 500 thousand troops to face the Divergent Realm. There were also 10 thousand Immortal Experts. There were also over 300 large artifacts, 10 of which were Giant Spirit Treasure Ships, about 100 were Sword Shuttles, another hundred were Eight Cyan Imperial Chariots, then the rest were other large artifacts. They also had 500 cannon groups. There's nothing else to say about the numerous formations set up along the 1000 li(500km) long defensive line. Wanting to break through all of these would be difficult.

After reading the report, Zhao Hai couldn't help but close his eyes. Then he had Cai'er calculate the odds of an attack.

Zhao Hai opened his eyes as he looked at Mu Yao and said, "Elder, I want to send people to check some things out. I'll give you an answer tomorrow."

Mu Yao nodded and said, "Go. Remember, this is an opportunity of the Hundred Treasures Realm to increase our prestige. If possible, we'll have to perform well."

Zhao Hai understood Mu Yao's message. Mu Yao wanted him to achieve as much as possible in breaking through the defensive line of the Fireweavers. Zhao Hai nodded before going inside the fortress. At the same time, he sent silver needles in order to conduct a final scouting on the Fireweavers' defensive line.

Zhao Hai already knew some information about the defensive line. But this time, he wanted to make a thorough investigation to make sure that nothing would go wrong.

Once the information was obtained, calculations would be made to make the best offensive plan. Zhao Hai knew clearly that this war was a huge opportunity for him to become famous in the Ten-thousand Realm Battlefield.

Zhao Hai already had some fame on the battlefield. However, people didn't regard him as important because of his cultivation. But after this matter, everyone in the Ten-thousand Realm Battlefield would know that Zhao Hai has the strength to face any Immortal Expert.

Although this would bring him great trouble, where people would be more careful in dealing with him and those who would look for him would become stronger, it would save Zhao Hai the trouble of sifting through the weaklings to get to the strong experts.

Zhao Hai was currently sitting in front of a monitor. The current display has been divided into many smaller screens showing a Fireweaver camp. In fact, once arranged, these divisions would form the defensive line of the Fireweavers.

Through observation, Laura and the others found that these camps weren't divided randomly. Each camp was handled by a group. Instead of staying in one camp, the Fireweavers divided themselves into different smaller camps. The subordinate troops were more free since they could go to any camp they wanted. This allowed convenience to the movement of troops. As long as there was an attack, the troops would be able to gather immediately. This gave the Fireweavers the ability to be fluid in their defense.

Chapter 1599: Battle Plan

Zhao Hai looked at the map on the screen, then he said, "How is it? Is the information good?"

Lizzy nodded and said, "The information sent by the Divergent Realm is accurate, but not as detailed as our silver needles. Brother Hai, look at this. The defenses of the Fireweavers are more heavy on the right side of the defensive line. It's because this is the place where the Divergent Realm kept attacking. Moreover, their cannons and formations are more concentrated on the right side. Generally speaking, the weakness of the Fireweaver defense line was on the left side."

Megan nodded and added, "Right. Moreover, the left side of the defensive line is composed of subordinate realm experts that aren't too strong. Although these subordinate realms participated in the battles, they would always keep people behind to guard their camps. It could be seen that they weren't too eager to defend for the Fireweavers. I think this is an opportunity for us."

Lizzy nodded, "I think so too. The Divergent Realm wants to launch an offensive in three days. We can let them attract the attention of the Fireweavers while we break through the defensive line. As long as we cause chaos, the Fireweavers would surely be defeated."

Zhao Hai carefully inspected the map. Then he nodded and said, "Good, but our attack must be fierce and swift. We need to break through as fast as possible. At the same time, we'll cause chaos to the left side of the defensive line."

Lizzy nodded and said, "We can also let the Undead use their rifles to attack the subordinate realm camps. This way, they would be in more chaos. As long as their formation gets ruined, the Divergent Realm would be able to seize an opportunity to break through."

Zhao Hai nodded. He was also confident in the Divergent Realm. They can definitely launch an attack to cause trouble with the Fireweavers. Moreover, they were able to gain huge progress. If Zhao Hai and the others let this opportunity go, then they no longer need to fight in this war, they might as well go home.

After looking at the maps, Zhao Hai turned his head and said, "Let's make a battle plan. Replace the Undead with the people from the Divergent Realm and the Hundred Treasures Realm. We just need to use our large artifacts, we're already too eye-catching. There's no need for us to do everything."

Lizzy and Megan nodded and went on to create their battle plan. Zhao Hai called Laura over and said, "After the battle, pay attention to the corpses of the Divergent Realm cultivators. The Space will need their abilities." Laura nodded.

It's not the first time that Megan and Lizzy wrote a battle plan. Soon, a battle plan was handed over to Zhao Hai. Seeing that there was no problem, he took out a piece of jade and inscribed the battle plan into it. After saying goodbye to his wives, he left the Space.

After returning to the fortress, Zhao Hai immediately went to Mu Yao's room. Mu Yao has been waiting for news from Zhao Hai. Seeing Zhao Hai coming over, Mu Yao immediately said, "How is it?"

Zhao Hai smiled faintly and then took out a jade slip and handed it over. Mu Yao received the jade slip and scanned it with his spiritual force. He quickly saw the battle plan. Upon reading it through, a smile appeared on his face. He nodded and said, "Very good. We can use this battle plan. I'll go meet the Divergent Realm. Get ready to set off at any time."

Zhao Hai nodded and said, "Elder, rest assured, we can depart at any time. As long as we coordinate well with the Divergent Realm, I believe our plan can succeed."

Mu Yao nodded and said, "Go and prepare. I'm certain that the Divergent Realm will accept this plan." Zhao Hai nodded, then he turned around and left. Mu Yao took the battle plan and walked towards the conference hall of the camp.

There were guards outside the Divergent Realm's conference hall. Just as Mu Yao was about to report his presence, Prisonheart's voice was heard, "Mu Yao, come in, come in." Mu Yao nodded, then he entered the conference hall.

Mu Yao immediately saw Prisonheart as soon as he entered the hall. Besides Prisonheart, there's also another person inside. It was a tall and huge man with a face full of hair. He was wearing a full suit of armor. He stood in place looking like a huge iron pot.

Seeing this person, Mu Yao had a guess who it was. This was Siege Hammer Hawkins, an expert famed for his combat power. It's said that his strength is endless and his defense is formidable.

Mu Yao gave Prisonheart a salute and then turned his head to Hawkins and then cupped his fist, "I have seen Mister Hawkins. Please accept this Mu Yao's greetings."

Hawkins looked at Mu Yao and returned the greeting as he half-heartedly cupped his fist and said, "Good." Then he no longer said anything else. This caused Mu Yao to feel anger deep inside. He was one of the most powerful Elders of the Hundred Treasures Realm, but Hawkins treated him like this. How could Mu Yao not be angry? However, he didn't show it, instead he turned to Prisonheart and said, "This is the battle plan we created. Elder, please take a look."

Prisonheart also saw Hawkins' performance, but his expression didn't change. Nor did he say anything, but deep inside he was disappointed in Hawkins' conduct.

Hawkins was extremely arrogant. He was too prideful because of his strength. In his mind, the Hundred Treasures Realm were anxious to reach the camp because they were afraid of the Fireweavers. To Hawkins, the Hundred Treasures Realm were cowards. If it were him, he would have stayed and fought it out with the Fireweavers.

However, Hawkins failed to think that the Hundred Treasures Realm was different from the Divergent Realm. If the Divergent Realm lost 1000 Immortal Experts, although they would be shaken, their foundation would still remain solid. But for the Hundred Treasures Realm, losing 1000 Immortal Experts would cause them to be in danger of extinction.

Hawkins failed to consider all of these things. He just looked at the timid behavior of the Hundred Treasures Realm and thought that it was shameful, especially for a high-grade realm.

Prisonheart received the jade slip and then searched for it using his spiritual force. He carefully read through the contents of the jade slip. After some time, Prisonheart placed the jade slip down and then he turned to Mu Yao and said, "Mu Yao, did you make this? Why do I feel that the spiritual force used to make this jade slip is not yours?"

Mu Yao smiled and said, "Elder's spiritual force is really strong. I didn't make it. This came from Zhao Hai of our Hundred Treasures Realm. What do you think?"

Prisonheart nodded and said, "The plan is very good. It's meticulously made, it even has some details that we missed. It seems like the Hundred Treasures Realm has another genius." Mu Yao smiled and didn't say anything.

Hawkins looked at Prisonheart in confusion. Prisonheart passed the jade slip to Hawkins and said, "Make preparations according to what's in the jade slip. Do it within three days."

Although Hawkins was arrogant, he wouldn't dare go against the old man Prisonheart. He immediately received the jade slip and gave Prisonheart a salute. He didn't even look at the jade slip before turning around and left, ignoring Mu Yao in the process.

Mu Yao looked at Hawkins and smiled faintly. Although he was angry, he wouldn't offend the Divergent Realm over this matter.

Prisonheart couldn't help but sigh inwardly when he saw Hawkins' performance. But he didn't explain to Mu Yao, instead he said, "Mu Yao, when will you depart?"

Mu Yao replied, "As soon as possible. We need to hide early, we can't let the Fireweavers discover our trail. If they're prepared, the plan would be useless."

Prisonheart nodded and said, "Alright, you can go anytime you want. As soon as we begin our attack, I will send you a message so that you can make a move on your side." Mu Yao nodded, then he gave Prisonheart a salute before turning around and leaving.

Prisonheart looked at Mu Yao's back, then he sighed and said, "It seems like the rise of the Hundred Treasures Realm is inevitable."

It wasn't only Mu Yao who was favorable to Prisonheart, but Zhao Hai as well. The plan made by Zhao Hai made Prisonheart see how different the Hundred Treasures Realm was. The Divergent Realm has been clashing with the Fireweavers for some time now, so they had a deep understanding about the Fireweavers' defensive line. They even knew where the subordinate realms were stationed. However, they never thought that this information would have some use. So when he saw Zhao Hai's analysis, Prisonheart understood that they were wrong. The information they had in hand was useful, very useful. The Hundred Treasures Realm was just more capable in using it to their advantage.

Thinking of this, Prisonheart sighed once more. He sat down and felt very tired. He was very old and felt that he was in the last years of his life. However, he was very worried about the next generation leaders of the Divergent Realm. These people were very arrogant. And after this war, their arrogance would increase once more. This wasn't good for the Divergent Realm's future. They need a leader with a good

head between his shoulders. They need a leader who knows when to retreat and when to give in. People like Hawkins were clearly unqualified for this position.

Prisonheart slowly closed his eyes. He felt that he should do something for the Divergent realm. He needs to make a move before he perishes. The conference hall was very quiet. Nobody knew what this dying old man was thinking.

Mu Yao returned to the fortress, his expression wasn't great to look at. Upon arriving at the fortress, he immediately looked for Zhao Hai and said, "Little Hai, we'll depart immediately."

Although Zhao Hai didn't know why they had to depart so soon, he just nodded and said, "Alright. But we need everyone in the fortress to relocate to the other large artifacts. The turtle cannot shrink, so I can only receive it."

Mu Yao nodded and said, "Alright. We need to perform perfectly. This relates to the honor of the Hundred Treasures Realm." Zhao Hai nodded and then left to make preparations.

Chapter 1600: It's Not The Time

A group of Fireweavers stood on their tamed beasts and flew over a forest on the left side of the defensive line. Actually, this forest could no longer be considered as one, this was because it had been leveled to the ground. Broken branches and leaves could be seen everywhere. All of these broken trees were all caused by clashes of spiritual qi. Although the focus of the Divergent Realm's attacks were on the right side, this didn't mean that the left was unaffected. It was just that the fights here weren't as intense.

These Fireweavers were the scouts sent over by their camp. They were responsible for the surveillance around the defensive line. They're here to see if there's an army trying to sneak in.

However, just under the noses of these scouts, in the broken forest, were a dozen boat-shaped artifacts a meter long. These boats were disguised to look like fallen trunks from outside. They weren't eye-catching at all.

Zhao Hai, Mu Yao and Mu Yu were standing at the top layer of the Pagoda, looking at the scouting Fireweavers in the distance. The Pagoda was now an upright trunk standing from the ground. Nobody noticed that there were three people who were smaller than a thumb standing on it.

Mu Yao turned towards the Fireweavers' defensive line before looking at Zhao Hai and smiling, "Looking at the defensive line, I feel like I'm looking at a giant's wall now that I've shrunk down."

Zhao Hai smiled faintly and said, "If it weren't for your help, I wouldn't have been able to shrink the artifacts for such a long time. This is good. Tomorrow, the Divergent Realm should begin their attack. We'll have nothing to worry about."

Mu Yao nodded and said, "This is the first time the Hundred Treasures Realm works alongside the Divergent Realm. We must show them that the Hundred Treasures Realm couldn't be trifled with."

Zhao Hai and Mu Yu nodded. At this time, a team of Fireweavers flew over their heads. Looking at the Fireweavers, Mu Yao sneered and said, "Look at these people, they've been arrogant for so long. This time, we need to deal with them properly."

At this time, the sound of fighting could be heard from a distance. Zhao Hai and the others were quite familiar with this noise. Although the Divergent Realm were gearing up for a large attack, they didn't stop their smaller attacks along the defensive line. This was to prevent the Fireweavers from noticing something wrong. If the Fireweavers get an idea about Zhao Hai's actions, it would be difficult for the plan to succeed.

Mu Yao turned to Zhao Hai and said, "Little Hai, if nothing unexpected happens, the Fireweavers will certainly be defeated. But at the same time, the Divergent Realm will also suffer casualties. I want you to turn them into Undead. Can you do that?"

Zhao Hai was stunned when he heard Mu Yao, he looked at Mu Yao for a moment, then he nodded and said, "There's no problem. But I can't turn all of the corpses into Undead. It wouldn't be good if the Divergent Realm finds out that the corpses of their people have disappeared."

Hearing Zhao Hai, Mu Yao let out a long breath. Then he nodded and said, "Alright, then I'll leave it to you. Try to get as many Undead as you can. If possible, kill some of them, but don't let them find out."

Zhao Hai nodded. But Mu Yu was still confused, so he turned to Mu Yao and said, “Master, why do this?”

Mu Yao coldly snorted and said, “You didn’t see Hawkins from the Divergent Realm. Because we went to them, that guy looked down on us. Naturally, this isn’t important. What’s important is that this guy might be the one making the final decisions for the Divergent Realm in the future. If that guy becomes their leader, then it’s possible for our two realms to be in conflict. So we might as well take out some of their strength right now.”

Zhao Hai and Mu Yu immediately understood what was going on. Hawkins embarrassed Mu Yao, so it’s no big deal if they take this grievance out on the Divergent Realm.

Originally, Mu Yao wanted the Divergent Realm to participate in their move. But when he saw Hawkins’ appearance, he no longer mentioned it. He knew that if Prisonheart had to force them to work with the Hundred Treasures Realm, then Hawkins would look down on them even more.

But Mu Yao didn’t lie. He wanted to deal with the Divergent Realm to vent out his anger, but he also felt that the Divergent Realm might make a move on the Hundred Treasures Realm in the future. So when that time comes, Mu Yao wanted to see what it would look like if Zhao Hai released Undead from the Divergent Realm to face them.

Naturally, he wasn’t hoping for Zhao Hai’s Undead to do all the work. But he knew that if they equipped the Undead with rifles, their combat strength would increase.

A day quickly passed and everyone got up early in the morning. Everybody was prepared. Since the cultivators and the Immortal Experts of the Hundred Treasures Realm could no longer supply spiritual qi for the large artifacts, Zhao Hai decided to release some Undead to provide energy instead. The cultivators would be responsible for dealing with the subordinate realms of the Fireweavers. Naturally, this would happen after they break through the defensive line.

When the cultivators heard that they finally had the chance to fight, they couldn’t help but celebrate. Besides the fight on the Poison Mountains, all they had been doing was sending energy to the large artifacts. This idle way of life was making them feel aggrieved.

Now that they finally have the opportunity to show their strength, the cultivators were happy. To be honest, there’s a high chance for them to survive this war since they were with Zhao Hai. And if they

stayed inside the large artifact, they wouldn't be killed. But at the same time, this limited their ability to fight. They weren't like the Undead who could use rifles. Because of this, they couldn't help but feel useless.

Seeing the cultivators being in high spirits, Zhao Hai bitterly smiled. He didn't understand why these people were so happy to fight. Didn't they know that this would cause some of them to die in battle?

Mu Yu looked at Zhao Hai's expression and immediately knew what he was thinking. He smiled faintly and said, "You think they're stupid? Desperate to go out?"

Zhao Hai smiled bitterly, as if agreeing. Mu Yu replied, "You don't understand them. If they don't get the chance to fight, how can they go back to the realm and receive their reward? They would be too embarrassed to accept it."

When Mu Yu said this, Zhao Hai stared. He hadn't really thought about this. Mu Yu looked at Zhao Hai and said, "In their minds, the chaotic part in the defensive line would be taken care of by the large artifacts. So when they head out, the danger would have already been greatly reduced. What's left for them was to chase stragglers and pick up some scraps. In this case, they wouldn't suffer much casualties. So why would they be reluctant to attack?"

Zhao Hai bitterly smiled, he really didn't think about this. He said, "I haven't thought about this. But this is also good. Once we break open the defenses of the Fireweavers, the enemy should be very weak. Then our side wouldn't suffer huge losses when they head out."

At this time, a loud rumbling sound could be heard from the defensive line. Even Zhao Hai and the others could hear it. Then the Fireweavers from the camps around the defensive line began to concentrate towards the Divergent Realm. The people on the left side of the defensive line became fewer and fewer.

Not long after the battle began, a jade sword message flew into Mu Yao's hands. Mu Yao received the jade sword message and then read its contents. Upon knowing the current situation, he turned to Zhao Hai and said, "Little Hai, the offensive of the Divergent Realm has begun, shall we make a move as well?"

Zhao Hai turned towards the place of battle and saw two clumps of shadows converging on each other. There would also be explosions from time to time. Black spots would often fall from the sky. Zhao Hai knew that these black spots were fallen experts.

However, Zhao Hai didn't plan to set out immediately. Instead, he said, "Replying to the Elder. I think we should wait. Although both sides are now fighting, the battle has yet to reach its hottest state. The Fireweavers can still choose to retreat. We need to wait for the perfect timing to attack."

Mu Yao looked at Zhao Hai and nodded before he said, "Alright, then we'll wait." Zhao Hai nodded. Meanwhile, the others couldn't help but stare. They didn't expect Mu Yao to say those words to Zhao Hai.

Only Mu Yu understood why Zhao Hai chose to delay their attack. Apart from waiting for the perfect timing, Zhao Hai also wanted to use the Fireweavers to whittle the strength of the Divergent Realm. Mu Yao also understood this, so he agreed to Zhao Hai.

Regardless of whether they were Immortal Experts or ordinary cultivators, they all stood there quietly looking at the battle in the distance. The two clumps got closer and closer to each other, nearing to the point of merging into one huge black clump. In the region where the two sides met, more and more explosions could be seen. And the amount of black shadows falling down had increased.

People on the large artifacts would look towards Zhao Hai from time to time. They wanted to see when Zhao Hai would decide to make a move. But they soon discovered that Zhao Hai had closed his eyes. This caused them to itch with impatience.

While the people around him were anxious, Zhao Hai was very calm. This caused everyone to be surprised, even Mu Yao was amazed.

What these people didn't know was that Zhao Hai was observing the battle through the Space. Both sides were evenly matched and the battle was hard to predict. However, the Fireweavers still had two reserve armies that hadn't entered the battle. These two armies were all from the Fireweaver Race. If Zhao Hai and the others entered right now, then these reserve armies would be able to swiftly head over.

However, Zhao Hai believed that these two reserve armies would soon join the fight. This was because the attack of the Divergent Realm this time was extremely violent. It exceeded what the Fireweavers were used to.

Before long, one of the reserve armies joined the fight. Also, the Space has received a lot of corpses. Most of these corpses were from the side of the Fireweavers, but some of them were from the Divergent Realm.

The Space now has dozens of new abilities. Some of these abilities were used for offense, some were for defense, and some were used for support.

Finally, after three hours of fighting, the last reserve army joined the fight. Zhao Hai knew that it was time for them to move.

Zhao Hai opened his eyes and without waiting for everyone to react, he waved his hand, causing the large artifacts to fly forward and return to their original size. Then he released the turtle and returned to the fortress. Under the turtle's lead, all large artifacts rushed towards the defensive line.

.....

Rewinding time to an hour ago.

Prisonheart was standing behind the troops, quietly watching the battle. Meanwhile, Hawkins beside him had an anxious look.

Although the Hundred Treasures Realm had yet to appear, Prisonheart wasn't worried. He believed in the Hundred Treasures Realm. He thought that they were just waiting for the right time to attack.

Prisonheart carefully inspected the battle. He wanted to see the reason why the Hundred Treasures Realm had yet to make a move. Before long, he discovered that the Fireweavers still have reserve armies waiting in the back. Moreover, the army numbered 50 thousand. And all of them were members of the Fireweaver Race.

Fifty thousand Fireweaver troops meant that, with their beasts, they essentially numbered at least 100-thousand. If they discovered the attack of the Hundred Treasures Realm, they would no doubt rush over. Even if they die stopping the Hundred Treasures Realm, by that time, the Fireweavers would have made a proper response. This should be the reason why the Hundred Treasures Realm didn't attack yet.

Although he managed to guess correctly, Prisonheart himself didn't know that he was right. Because of this, he continued observing.

As Hawkins stood beside Prisonheart, he continued to wonder why the old man still hadn't sent him to attack. He knew that the Divergent Realm had a reserve army that numbered 50 thousand. This made the two sides evenly matched. They might even be able to defeat the Fireweavers if they pushed hard. So why didn't Prisonheart make him move? Was Prisonheart still worrying about the Hundred Treasures Realm? Those cowards, what could they do?

Seeing Hawkins' obvious expression, Prisonheart felt more disappointed. Hawkins still failed to notice that the Fireweavers also have their own reserve army. Although he was disappointed, he still said, "Hawkins, don't be anxious. It's still not time yet." Although Hawkins didn't know what they were waiting for, he still nodded. But his murderous aura continued to increase.

At this moment, Prisonheart noticed that the Fireweaver reserves had begun to move. Prisonheart immediately turned his head towards the left side of the defensive line.
