

Another World 831

Chapter 831 - Unknown Future

The Great Demon King didn't expect Zhao Hai to be this fast. He stared for a moment before he laughed, "Alright, mister moves very quick. Then I will have to be impolite. Mister, please stay here for a moment while I arrange my people."

When the Great Demon King stood up, Zhao Hai did the same as he said, "Your Majesty, I won't be staying here for long. I have to go back to the Space and arrange some things. I'll leave my blood ghost staff here so you can take it with you. Just use the messenger fish to contact me and I'll immediately open a spatial rift. Demon Dragon can stay here with you. There won't be any battles in the next few days, he can help you relocate the other Demons."

The Great Demon King looked at the staff in his hand. The staff was currently in its skeleton form, it wasn't a staff used by most people. However, the Great Demon King knew the significance of this staff to Zhao Hai. Being handed the staff moved the Great Demon King's heart.

The Great Demon King nodded and said, "That would be best. Since mister has something else to do, then I won't hold you here for long. Me and Demon Dragon can take care of everything here."

Zhao Hai nodded and said, "Then I'll bother Your Majesty with this. The Space has been prepared, your Majesty can rest assured." The Great Demon King gave another thanks. Then Zhao Hai left the chariot and then flashed back to the Space.

The reason why Zhao Hai left quickly was because he needed to talk with Fei'er and the others. No matter what, they were still allies, being in constant contact with them would be good. This way, they would have better coordination in the future.

Originally, Zhao Hai wanted to take his time in the Demon Realm. And since he didn't want to reveal a lot of things, he didn't think about handing the blood ghost staff over to the Great Demon King.

However after further thinking, all of the Demons would enter the Space, so handing the blood ghost staff over to the Great Demon King would be more than enough. Because of this, Zhao Hai decided to give the blood ghost staff to the Great Demon King so that he can leave and contact Fei'er and the others.

Just as Zhao Hai entered the Space, Laura and the others were currently looking at the monitor. The image displayed on the monitor was the state of the Demon Realm. To be honest, they didn't think that the Demon Realm would be as bad as this.

After they saw that Zhao Hai had come back, Laura and the others immediately went forward to greet him. Laura looked at Zhao Hai and said, "Brother Hai, you're back? Didn't you think you would stay in the Demon Realm for a couple of days?"

Zhao Hai replied, "There is no need for me to be there, I couldn't offer further help in transferring the Demons. It would be better if I get in touch with Fei'er's group instead. Right, I also left the blood ghost staff to the Great Demon King."

Laura stared, then she nodded and said, "Leaving the staff with the Great Demon King is also good. In any case, the staff could map the Demon Realm."

Zhao Hai nodded, then he asked, "How are Fei'er and the others doing? Did anything significant happen?"

Laura shook her head and said, "Everything is very normal. We've already sent them their meals, they're ready to eat."

Zhao Hai nodded, then he sat on the sofa and let out a long breath, "How about the Ark Space? The people have seen the condition of the Demon Realm, what response did they have?"

Laura smiled and then said, "There's no excessive reaction. People seem to not be very disgusted by the Demons. They just look at the Demon Realm as though it was a story."

Zhao Hai felt relieved, he said, "It's good that they aren't angry. I thought I need to spend some time to improve their view towards the Demons, it seems like there's no need for that. Right, send me outside, I want to have a chat with Fei'er."

Laura nodded, then Cai'er waved her hand as she sent Zhao Hai to a city in the Buddha Empire. It wasn't a big city so it couldn't house several tens of millions of soldiers. Majority of the army rested outside the

city. Still, there was no problem regarding food. As for Fei'er and the others, they took their rest inside the city.

Zhao Hai directly appeared in the city, causing the attention of the surrounding soldiers to focus on him. After they saw Zhao Hai, one of them immediately went to Fei'er to report.

Zhao Hai didn't block them as he just waited there in place. Before long, Fei'er came, Shan and Yue were absent.

However, Zhao Hai can also understand why this was the case. He killed so many people from those two races. Although the custom of those people saw the undead as another form of life, a thread of hatred was still present. Therefore, it was an appropriate move if those people don't meet him.

At this time, Fei'er arrived by Zhao Hai and gave a salute, "I didn't think mister would see us today, wasn't mister quite busy?"

Zhao Hai smiled faintly and said, "I found some time to visit. Let's go in and talk" Fei'er nodded and led Zhao Hai to the place where he rested, which was the city lord's mansion.

There wasn't anything inside this mansion, after all, Zhao Hai already took everything out of the Ark Continent. Although the mansion looked quite spacious, it was only due to it being empty.

However, it was also great the Fei'er and the others were quite capable people with formidable bodies. Because of this, they didn't care about resting in this place. Fei'er didn't even sleep in the bedroom, there was no need to do so since there was no bed.

After entering the empty hall, Zhao Hai couldn't help but smile. He turned to Fei'er and said, "Mister Fei'er, I apologize. The things in this mansion has already been taken by me."

Fei'er smiled faintly and said, "No problem, we're already quite used to it. Right, why did mister come today? Is there anything you like to talk about?"

Zhao Hai nodded and said, "Mister Fei'er, what opinion does the Barbarians and the Winged Pegasus people have on me?"

Fei'er didn't expect Zhao Hai to ask this question, he couldn't help but smile bitterly. The Barbarians and the Winged Pegasus did indeed have some reservations towards Zhao Hai. However, Fei'er believed that they wouldn't take revenge against Zhao Hai. This was because there was still a bigger enemy in the horizon.

And now that Zhao Hai asked, he didn't know what to say. Zhao Hai saw Fei'er's expression and sighed, "I know that they have some bad outlook towards me. After all, I can't deny killing their own people. However, I hope that this wouldn't affect our cooperation."

Fei'er quickly replied, "Mister can rest assured, the cooperation wouldn't be affected."

Zhao Hai nodded, then he said, "I have no choice at that time. I didn't know that they weren't part of the Divine Race. I expected them to be part of the Divine Race army."

Fei'er looked confused at Zhao Hai. In their previous discussion, Zhao Hai seemed to know a lot about the Divine Realm. Normally, he shouldn't be able to know about the Divine Realm's matters.

Zhao Hai looked at Fei'er and smiled bitterly, "Did you wonder why I'm very familiar with the Divine Realm?"

Fei'er nodded, Zhao Hai forced a smile and said, "Don't forget that I'm a dark mage. After killing the Divine Race and turning them into undead, I can ask them about the matters of the Divine Realm."

When Fei'er heard Zhao Hai, his eyes suddenly showed his understanding. He actually forgot that Zhao Hai was a Dark Mage.

Zhao Hai looked at Fei'er and said, "Although I knew about the Barbarians and the Winged Pegasus, my knowledge isn't that much. The Barbarians and the Winged Pegasus haven't been conquered in a day or two, so I wasn't aware that they still held their resentment towards the Divine Race. When they planned to attack the Ark Continent, I can't risk my people being killed. Because of that, I had no choice but to kill them."

Fei'er nodded, he can understand Zhao Hai. To be honest, if Zhao Hai held back against the Barbarians and the Winged Pegasus at that time, then the Ark Continent wouldn't have been in its current state. Instead, the Ark Continent would have already fallen to the Divine Race. Moreover, Zhao Hai wouldn't have been here to become their ally. Most importantly, Zhao Hai was very strong, it would be strange if he doesn't go for the kill.

From what was said before, Fei'er didn't intend to become allies with Zhao Hai, instead he wanted to invite the Demon Race. If Zhao Hai wasn't strong, then they wouldn't have been speaking at this time. Strength decides everything, this was something that Fei'er completely understood.

Zhao Hai looked at Fei'er's expression and said, "This time, we need to quickly deal with the Divine Race, we can't be slow. North of the Ark Continent is a rift to the Underworld. Undead from the Underworld have already come out of the rift. If we delay, the undead and the Divine Race might attack us from both sides. That wouldn't be good for us."

Fei'er nodded, his expression was somewhat heavy. Although he believed that they had the strength to deal with the Divine Race, he still didn't underestimate the Divine Race. There were still 9 other Divine Race continents in the Divine Realm aside from the Taurus Continent. What reaction would the other continents have? This remained unknown. All their previous discussion was merely speculation.

If the other continents sent reinforcements towards the Taurus Divines, then things would be extremely difficult. All 9 continent's doesn't even need to send reinforcements. As long as a form of reinforcement came, then things would still get more difficult.

Chapter 832 - Transformers? Mecha? What!?

Fei'er looked at Zhao Hai and said, "So Mister's plan is?"

Zhao Hai replied, "We must attack, as soon as possible and in the shortest time. We need to attack the Taurus Divines while they still have a hold on their continent. This way, we lessen the chance of other continents joining the fight."

Fei'er knit his brows and said, "Of course, it would be best if we attack immediately. However, if we are too aggressive, then we might exhaust our resources. If the other continents come, then we won't have any energy left to resist." Zhao Hai shook his head and said, "It would be worse if we don't attack. The

Divines should have already acquired the news by now and had gone to prepare themselves. If we don't go at them hard, then things would be more troublesome for us."

Fei'er thought for a moment and then nodded, "We don't have any problems with that. And just like you said, the Divines should have already heard of what happened here and have been prepared. However, at this time, I still have no way to get in touch with my people. There's no way for me to tell them about our decision. I'm afraid they won't be ready to cooperate when the time comes."

Zhao Hai thought about it and then said, "When we enter the Divine Realm and make our initial attack, you could use that opportunity to contact your people. Right, I'll give this to you. This is a messenger fish, you can call me on this thing. If anything happens, use it."

Fei'er gawked as he received the messenger fish. Fei'er looked curiously at the small fish. Zhao Hai didn't say anything for a moment before he took out two messenger fishes and gave them to Fei'er, "Help me hand these two messenger fish over to the Barbarians and the Winged Pegasus army. In any case, we are on the same side now."

Fei'er nodded and received the two messenger fishes on Zhao Hai's hand. Then he looked at Zhao Hai and said, "This Fei'er really admires Mister's heart. Mister, rest assured, I will surely make Shan and Yue disregard any grudges between you and them." Zhao Hai gave a forced smile and then said, "That won't be easy. Right, Mister Fei'er, I don't know if you have any good weapons to deal with the Divine Race. If you want, I can give you some blood lightning javelins." Fei'er gawked, then his two eyes shone as he replied, "That would be great. Mister's blood lightning javelins are more overbearing compared to the blood lightning beads that the Divine Race had." Zhao Hai smiled faintly, but just before he was about to reply, his expression suddenly changed. Then he stood up, looked at Fei'er and said, "Mister Fei'er, I will prepare the javelins. When we fight the Divine Race, I will immediately send them over to you. I still have some matters to take care of, so I can't remain here for long."

After Fei'er saw Zhao Hai's expression, he couldn't help but stare for a moment. However, he also stood up and said, "Alright, then I won't hold mister here." Zhao Hai nodded before his figure vanished and appeared inside the Space.

The moment Zhao Hai appeared in the villa, he saw Laura looking at the screen. "What's wrong?", Zhao Hai said. Laura smiled bitterly as she replied, "Cai'er saw something. Ever since the underworld appeared in the Beastman Prairie, she made sure to scan the entire continent using the Space's map. Today, she managed to discover something unusual on Blazing Island."

Just as Laura said that, Zhao Hai shifted his attention towards the screen. The screen was currently showing the image of Blazing Island. However, what he saw on the island made him astonished.

Blazing Island had volcanoes everywhere. Living among those volcanoes were various fire element beasts and plants. Although Zhao Hai took the fire crystals as well as the river of earth fire, the temperature of the island was still quite high. On the dormant volcanoes, one could even see beasts moving about here and there.

But now, something completely out of place appeared on the island. Not only does it not belong to the island, these things doesn't belong to the Ark Continent. They were huge metallic men!

Zhao Hai inspected these metallic men. They was over ten meters high and looked delicately made. Their components were shining and most importantly, there were all kinds of magic formations drawn all over their body.

When Zhao Hai saw these magic formations, his pupils couldn't help but shrink. At this point, Zhao Hai already had some understanding about the formations in the Ark Continent. However, Zhao Hai still couldn't identify the magic formations on these metallic men. The magic formations were too complex.

At this time, Cai'er talked, "Young Master, the Space had recorded something that happened before. Come and take a look." Then the image on the screen changed into the same Blazing Island. But this time, there were several black spots seen on top of the island. These black spots moved very fast and before long they reached the island. Zhao Hai unexpectedly identified these black spots, they were aircraft!

Zhao Hai could swear that his eyes weren't wrong. They were indeed aircraft. Zhao Hai stood up from his seat as he looked closely at the figures on the monitor.

After that, an exciting even happened. After flying around the island, the aircraft suddenly twisted its form. It's metallic parts moved before forming into a huge metallic man!

Zhao Hai's eyes almost went out of their sockets. Seeing these aircraft gave Zhao Hai excitement. This was because he only saw these kinds of aircraft back on Earth. The aircraft made him think that there might be a connection between Earth and the Ark Continent.

However, that idea soon faded when the aircraft transformed. Zhao Hai couldn't help but shake his head. This aircraft was obviously a transformer! What is going on!?

Under the feet, in the middle of the palm, and at the back of these figures were flames shooting out. Before long, they slowly landed on the island.

When the magic beasts and flame demons spotted these metallic figures, they immediately charged in to attack.

However, these transformers just lifted their hands and shot out white lights towards the attackers. Almost immediately, the magic beasts let out a miserable cry before their bodies totally disintegrated. The flame demons might have resisted for some time but they too were erased by the white light.

Then the transformers made a fist and withdrew their attack. After that, their chests opened up and men came out of the metallic bodies.

As soon as he saw this, Zhao Hai understood. These weren't transformers at all. These metallic men were machines controlled by people. Just like mechas that were written about back on Earth.

However, most of the mechas seen on novels were purely made out of technology. On the other hand, these mechas actually had a lot of magic formations. What is this?

Even more surprised than Zhao Hai were Laura and the others. They had no prior experience about these things. Because of that, they were all shocked by what they saw on the monitor.

Zhao Hai slowly sat down and closed his eyes. Then suddenly, something flashed inside his mind. He had read about something similar before, iron golems!

These things were indeed similar to the iron golems that he read before. However, these machines were more complicated in comparison. This caused some doubts within Zhao Hai's mind.

Zhao Hai waved his hand and summoned a God-rank Divine. Then Zhao Hai beckoned towards the screen and said, "You, have you seen these things? Or maybe heard about them? What are those things?"

The God-rank Divine looked at the iron golems and then said, "I saw something similar. In the past, the Goblins used to make these things. However, those made by the Goblins weren't this defined. Moreover, they act very slow and weren't too useful. As for exactly those, I really haven't seen them before."

Zhao Hai stored the undead back before he let out a long breath, "It seems like another new plane has connected to the Ark Continent."

The women looked at each other and saw the surprise on each others' eyes. These things were quite new to them. Moreover, these metallic beings were very powerful. One must know that the beings in Blazing Island were almost 9th rank in strength. But even in their situation, they still couldn't stop the metallic beings.

Laura and the others can also understand Zhao Hai's current feeling. This matter was truly quite annoying. They were yet to find a way to deal with the Underworld but now another plane came. Zhao Hai was currently feeling like he was being bullied by fate!

Laura let out a sigh as well as she said, "Yet another plane connected to the Ark Continent. What happened to the Ark Continent? Did it's barrier really got damaged that far?"

The group smiled bitterly. They held the same feeling as Laura. It seems like the Ark Continent's barrier had been rendered useless.

Zhao Hai suddenly stood up and said, "I'll go see them. I want to see whether I can communicate with them. If we could talk, then I'd ask how they arrived at the Ark Continent."

The expression of the women immediately changed. Laura looked at Zhao Hai and said, "Brother Hai, it's better if you don't go. It's too dangerous. You saw the attack made by those people, they're too strong."

Zhao Hai patted Laura's hand and said, "Rest assured, nothing bad will happen. With my current strength, those people could do nothing to me."

Naturally, Laura was quite confident in Zhao Hai's strength. However, the attacks made by those mechas were just too strange. There was a white light and then the magic beasts just disintegrated. This wasn't an attack that they had seen before.

Zhao Hai looked at Laura and said, "I'll be fine, don't worry. I promise you that the moment they attack, I will immediately go back to the Space."

Laura looked at Zhao Hai and knew that there was no way to prevent Zhao Hai from knowing. Therefore, she just said, "Brother Hai, if they decide to attack, then immediately go back. Don't fight with them."

Zhao Hai nodded and said, "Rest assured, I will be safe. Alright, I'm going now." Then Zhao Hai's figure flashed as he went out of the Space. Laura and the others immediately turned their attention back to the screen to look at Zhao Hai's situation.

Zhao Hai didn't directly appear on Blazing Island. Instead, he appeared a distance away and then flew towards the island.

Zhao Hai saw that the skill of these people wasn't that high. One could say that their strength was mainly dependent on the mechas. At this time, these people were resting on the island, outside from their iron golems. One could say that they couldn't provide any threat to Zhao Hai.

Zhao Hai slowly flew towards the island. At the same time, he also instructed Cai'er to pay attention to the actions of those people. They seem to be resting on the island, leisurely talking and laughing there.

When Zhao Hai was not far from the island, these people finally moved. They quickly ran towards the iron golem and then started them up. However, they didn't make a move as they just stood there and waited for Zhao Hai.

After being informed about this, Zhao Hai didn't stop. Instead, he even sped up. He knew that this people doesn't intend to attack him. It was for certain that they also wanted to know where this was. Therefore, they would want to communicate with him.

Before long, Zhao Hai arrived on Blazing island. He also saw the huge mechas. However, he didn't show the fact that he had seen them before. Instead, he showed a shocked and curious appearance.

He slowly descended on the island as he stared at the mechas. When he was about a couple of steps away, he stopped. Then he proceeded to circle the mecha looking like someone who just discovered something new, ignorant about the fact that it might be dangerous.

Naturally, Zhao Hai was just acting out a play. He wanted these people to think that he had just accidentally came here to see these mechas.

While Zhao Hai was doing his thing, the person inside the mecha couldn't wait anymore as a sound came out, “&#%@...”

After hearing this, Zhao Hai's heart suddenly sank. This was because he couldn't understand what this person just said. If there's a language barrier, then it would be difficult to communicate. It might even result in some misunderstandings between the two parties.

However, Zhao Hai continued his play as he made a scared expression and loudly said, “What are you? How did you appear on Blazing Island?”

Zhao Hai knew that the opposite party would be unable to understand his words. However, this action still needed to be acted out.

Chapter 833 - Atlanta Plane

The other party turned silent. While Zhao Hai was wondering about the other party's reaction, a voice suddenly came from the mecha, “Hello, where is this place?”

What was heard was definitely the language of the Ark Continent. However, the tone was very awkward. It was just like how foreigners sound when they first studied chinese.

Zhao Hai stared blankly, he didn't think that these people could actually speak the Ark Continent's language. He looked at the mechas in front of him and asked once more. "Who are you? How did you appear on Blazing Island?"

Naturally, these people had seen Zhao Hai descend from the sky, therefore they didn't dare underestimate him. The huge metal figures immediately arranged themselves into a row before one of the chest plates swung open. A person walked out and went forward to greet Zhao Hai. He placed his hand on his chest as he gave a short bow and said, "Mister, I am the captain of the fifth squad of the Atlanta Continent's Flying Armor army. Eagle squad leader Axe. We arrived here by going through a spatial rift. Mister, where is this?"

Zhao Hai looked at Squad leader Axe and then returned the salute as he said, "Hello, this place is called Blazing Island, south of the Ark Continent. I am Ark Continent's Buda Clan Patriarch, Zhao Hai Buda."

Axe looked at Zhao Hai and said, "So it is Patriarch Zhao Hai. Patriarch, please feel at ease. We didn't come with hostile intentions. Sir, please come and take a seat." Then Axe took a few steps forward before arriving at an open area. Zhao Hai looked at the mechas standing there before he followed Axe and then sat down.

After Axe sat down, he turned his hand and took out two pieces of dried meat. He gave one of them to Zhao Hai and said, "Since we're far away from home, I don't have anything delicious to offer. I hope the Patriarch wouldn't laugh at my dried meat. Please have a taste."

Zhao Hai looked at Axe's smug look and smirked inside. Axe seems to be proud of his spatial item. Zhao Hai smiled faintly before he also turned his hand to take out two bottles of beer. He gave Axe one of the bottles before he said, "Since we're out here in the open, why don't we drink some liquor? I also want mister have a taste of my Buda Clan's special beer."

When Axe saw Zhao Hai take out two bottles of beer, his pupils couldn't help but shrink. Zhao Hai might not know about it, but spatial items were also very rare in the Atlanta Continent. Although Axe was just a squad leader, his identity wasn't simple. The reason why he himself had a spatial item was because he was the heir of a Great Clan in the Continent. Since he loved adventure, he took the chance to enter the spatial rift along with his men.

Naturally, the people who came with Axe weren't ordinary people. All of them were famed experts in the Atlanta Continent. Their magic armors were among the advanced ones in the army.

Since Axe had his current status, he felt the need to show off the fact that he held a spatial item to Zhao Hai. He wanted to see Zhao Hai's reaction.

In the mind of Axe, Zhao Hai doing things on his own despite being a Patriarch only meant that Zhao Hai's family wasn't strong. In turn, Zhao Hai should not have the position to hold a spatial item. If Zhao Hai sees his spatial item and reveals his greed, then Axe would have the excuse to be impolite to Zhao Hai.

However, he didn't think that Zhao Hai himself would also have a spatial equipment. Moreover, it seems like Zhao Hai treated these items as though they were nothing significant.

Axe couldn't help but smile bitterly inside. He wanted to test the other party but in the end he came up with nothing. So Axe just received Zhao Hai's bottle of beer before taking the top off and taking a drink.

However, it was quite obvious that Axe wasn't used to drinking beer. He only took a sip and frowned slightly before he placed the bottle at the side. Then he took a bite out of his dried meat before he looked at Zhao Hai and asked, "Patriarch, you said that this is the Ark Continent? May I know the continent's structure?"

Zhao Hai observed Axe. From Axe's performance, it showed that he wasn't just any ordinary squad leader. His every move and speech was controlled, obviously showing that he had undergone etiquette training. It seems like Axe's status wasn't low.

After hearing Axe's question, Zhao Hai didn't mind hiding things. Although he couldn't reveal the continent's current state, he can just tell Axe prior knowledge.

Zhao Hai paused for a moment before he replied, "We are at the Ark Continent. The continent is mostly comprised of one large landmass. Where we are today is called Blazing Island, a small island south of the continent. The island has volcanic eruptions all throughout the four seasons. The island has strong fire beasts and flame devils. Because of this, it was named as one of the continent's forbidden areas. The humans in the Ark Continent are divided among five empires; the Radiant Empire, the Buddha Empire, the Lyon Empire, the Rosen Empire, and the Aksu Empire. Besides the five empires, there are also four other races. There sea's Fishman race, the prairie's Beastmen, iron mountains' Dwarves, and the Elven Forest's Elves."

Axe eagerly listened to Zhao Hai's introduction. After Zhao Hai's statement, Axe asked once more, "Patriarch, which Empire does your family belong to? Do you have a lot of enemies in the continent?"

Zhao Hai sported an arrogant expression as he said, "My Buda Clan is the continent's most powerful family. I myself am a hereditary marquis of the Rosen Empire and the strongest 9th rank expert."

Axe had a confused expression as he looked at Zhao Hai, "Patriarch, the strongest people in the continent are 9th ranks? How can you determine a person's strength?"

Zhao Hai smiled and said, "The Ark Continent's professions are divided into two, namely warriors and mages. And both of them are divided into 9 levels, from 1st rank to 9th rank. You advance by improving your own strength. Once you receive the blessing of the heavens and granted flight, then you can be said to be a 9th rank expert."

Upon hearing Zhao Hai, Axe's eyes shone, then he said, "So it's that. I didn't think that there would also be warriors and mages in the Ark Continent."

Now it was Zhao Hai's turn to ask, "So mister means that there are also warriors and mages in the Atlanta Continent?"

Axe proudly lifted his chin as he replied, "Right. However, the professions in our continent are divided into three; warrior, mage, and magic armor master."

Zhao Hai took a glance at the mechas and said, "These magic armors are truly mysterious. Metallic beings this large are actually able to move. It's quite astonishing."

Axe couldn't hide his arrogance, "Naturally, these magic armors are the product of several thousand years of research. Their fighting strength is formidable. However, becoming a magic armor master isn't that easy."

Zhao Hai looked at Axe and asked, "It seems like the Atlanta Continent is more formidable than my Ark Continent. Can mister introduce me to the Atlanta Continent?"

Axe looked at Zhao Hai and snorted, “Originally, the Atlanta Continent is one large piece of land. After a huge war, the continent is divided into three continents; the warrior continent, the mage continent, and the magic armor master continent. Where I’m from is the magic armor master continent. Since childhood I’ve been immersed in the research and manufacturing of magic armors. However, there are also children who studied as either the warrior path or the mage path since childhood. The experts of our three continents are divided into 12 ranks. It is somewhat different to the Ark Continent, but it has similarities. After becoming 9th rank, one would be able to fly. Moreover, ranks ten to twelve have many times more strength compared to 9th ranks.”

Upon hearing Axe’s explanation, Zhao Hai concluded that the Atlanta Continent was the same type of plane as the Demon Realm and the Divine Realm, planes a cut above the Ark Continent. Ranks 10 to 12 should correspond to Demigods, Gods, and Saint Gods. It seems like the Atlanta Continent wasn’t so simple after all.

Zhao Hai also noticed that the way Axe talked to him had changed. Axe suddenly became high sounding that it made Zhao Hai feel uncomfortable. However, Zhao Hai didn’t say anything, he just kept listening to Axe’s babble.

After Axe’s explanation, he looked at Zhao Hai and said, “Mister might not believe it, but the magic armor of my squad are all 9th rank transforming armors. Let me show you.” Then as Axe waved his hand, his magic armor spouted blue flames on its foot, palm, and back. The metal armor flew up into the sky as it folded itself and transformed into an aircraft before zooming out into the horizon.

Zhao Hai looked at this in shock. Although he had seen the magic armor’s transformation on the screen, the impact in seeing it in person was too strong.

Now that he sat in front of this transforming mech, Zhao Hai couldn’t help but stare. This caused him to have a dumbfounded look.

Axe paid close attention to Zhao Hai’s appearance. After seeing Zhao Hai’s reaction, Axe couldn’t help but laugh deep inside. At the same time, he also felt proud of his magic armor.

Axe didn’t reveal this information, but the strength of the Atlanta Continent was also quite formidable. Their research towards magic formation was extremely profound. And like the Divine Race, the people in the Atlanta Continent had also managed to conquer several planes.

Since they were still unaware of how strong the Ark Continent was, they were polite upon arriving. But after Zhao Hai revealed the state of the continent, Axe knew that the plane he was on was inferior compared to the Atlanta Continent. Because of this, his plan became more and more obvious. At this time, Axe was thinking that after he went back, he would immediately request his clan to dispatch troops and conquer the Ark Continent!

Chapter 834 - Mutual Plan

Among the things that Axe withheld was the fact that there were no countries in the Atlanta Plane. Instead, families hold the power over everything. And also, Axe's family was the most famous family in the Magic Armor Master Continent, the O'Neil Family. Finally, Axe was to be the O'Neil Family's next Patriarch.

In the Atlanta Plane, the power held by families was extremely inflated, they could even reach the same as those held by Empires. Under those Great Clans were other small families that serve them. Moreover, if a family conquers a plane, then that plane would become their own territory, further increasing the strength of that family.

But although the O'Neil family was the most famed family in the Magic Armor Master Continent, they were still yet to conquer a plane. This caused their strength to be inferior to other Great Clans.

The Atlanta Plane was different from the Divine Realm. The Divines were able to know which planes were around them. And once they know the plane, they would also know how to go there. Because of this, the Divines could just break that plane's barrier and then proceed to conquer it.

On the other hand, the Atlanta Plane doesn't have that ability. They don't know whether there were any planes close to them, in turn, they won't know where those planes were. Because of this, it would be difficult for them to seek a plane and conquer it.

The people in the Atlanta Plane would just set up a magic formation on a random place and hope for the best. This magic formation would only activate once a plane's barrier was close. Otherwise, the magic formation would just ruin itself.

In the past, the Atlanta Continent had conquered planes using this method. However, the O'Neil family was quite unfortunate. They had arranged these magic formations many times, however, they were yet

to get lucky in finding another plane. These actions brought losses to the family. One must know that arranging these magic formations wasn't cheap. Otherwise, everyone would arrange these formations everywhere.

This time, the O'Neil family finally got their lucky break. Several days before, Axe heard a report from his subordinate that a spatial rift had appeared in a remote mountain valley inside the O'Neil family's domain. Moreover, the rift was getting bigger and bigger.

After hearing this report, the entire O'Neil family was shaken. Their first thought wasn't happiness, instead it was fear. They were afraid that a high-level plane had found them and broke through the plane's barrier. They thought of this because this was the same as what they did to the lower planes.

Because of this, the O'Neil family immediately barricaded the mountain valley. They also blocked information about this rift from coming out. While the family was contemplating on what to do, Alex's adventurous side rose up. He took his strongest and most loyal men with him and entered the spatial rift. Thus, they appeared on the Ark Continent.

Upon arriving on the island, Axe immediately felt relief. If this spatial rift was arranged artificially, then people would've been present on the other side of the rift. It would be impossible for those people to just leave their rift in the middle of nowhere.

However, Axe didn't immediately send word back to the family. He wanted to take a look at this new plane first. Because of this, he immediately commanded his men to fly around randomly. Just as they were travelling southward, they came upon Blazing Island. It was here that they were detected by Cai'er.

Axe wanted to talk to Zhao Hai because he wanted to know the strength of the Ark Continent. If the Ark Continent was strong, then the O'Neil family would establish a business cooperation with them. However, if they were weak, then Axe would go back to his family and prepare for an invasion of the Ark Continent.

After getting the continent's strength from Zhao Hai, Axe immediately knew that the opportunity has come for the O'Neil family. The Ark Continent was so weak that the O'Neil Family could easily usurp them.

Because of this thought, Axe's tone got more and more arrogant as his conversation with Zhao Hai went on. Zhao Hai had met people like Axe before, so how could he miss the change of tone on Axe's voice. However, Zhao Hai didn't care. What he revealed to Axe was the original state of the Ark Continent. Naturally, the present Ark Continent was completely different compared to before. If Axe had any bad ideas for the continent, then it was his own fault for miscalculating.

After a short while, Axe's mech went back and landed. Zhao Hai looked at the mech with envy as he said, "These things are truly wonderful. If the Rosen Empire had these, then we would have already conquered the rest of the continent. Mister Axe, I wonder if you can sell me a few of these. I just went forward to see the path and my fleet would be arriving in two days. Initially, we came to Blazing Island in order to get some special products to refine medicine with. I shall wait for my fleet to arrive. When they dock, I will approach mister for the trade. I will buy your magic armors no matter what price mister Axe wants."

When he heard Zhao Hai, Alex's expression couldn't help but change. It took a moment for Alex to calm down before he looked at Zhao Hai and said, "Mister, this request, I can't promise something to you right now. I need to head back to the family and discuss things, I'm sure they would be interested in the trade. If the family agrees, then we will send someone over to find you. What do you think?"

Zhao Hai had a regretful expression as he replied, "That's a pity. Well, take this, this is my clan's token. If mister's family agrees to the trade, then you can bring this token to the Rosen Empire. When that time comes, my Buda Clan would definitely give you a warm welcome."

Axe received the thing that Zhao Hai handed over. From what he saw, it seems like a token made out of red crystal. It looked very refined. On the token were two characters that read 'Buda'.

Axe didn't suspect anything as he held the token and said, "Alright. Mister, I'll immediately head back to the family and discuss this matter. I can assure you that we'll be swift in our reply." Zhao Hai nodded. Then Axe jumped into his mech as him and his team proceeded to fly southward.

Zhao Hai looked at Axe's departing back. He sneered before his figure vanished and returned to the Space. Laura and the others were currently in the living room, their expressions quite difficult to behold. When Zhao Hai came, Laura immediately said, "Brother Hai, I hate that man. It's obvious that he has bad ideas for the Ark Continent. His fake expression is too irritating to watch."

Zhao Hai smiled faintly and said, "It's fine, there's no need to be angry. I told him that I have my fleet behind me in order to see his reaction. If he doesn't have any ill will towards us, then he would definitely

stay and talk. But it seems like he did have bad ideas. If I hadn't told him that I have my people behind me, then he would've already killed me in order to suppress the news. After all, his party mostly consisted of 9th ranks. If he isn't sure that he can kill me and my fleet, then he wouldn't act rashly."

Laura coldly snorted and said, "Just let them come. In any case, their presence would only make the Ark Continent even livelier. I want to see what their expression would be when they face the Divine Race and the Underworld."

Zhao Hai smiled faintly and said, "Actually, this is also an opportunity for us. Once they appear in the Ark Continent, then that would be the best time to declare war on the Divine Race. When they arrive, we can slowly whittle them down. At that time, we would be able to obtain a batch of powerful magic armors. That would surely increase our strength."

At this time, Lizzy frowned and said, "Big Brother Hai, I'm sure you've also heard Axe say that their plane has experts up to 12th rank. In other words, God-ranks also exist in their plane. Their attack surely wouldn't be weak. Can we deal with them?"

Zhao Hai smiled and said, "No matter which plane, strong experts are surely rare. Those at the top are the least populated group. Also, I don't believe that Axe's family is more powerful compared to the Taurus Divines."

Lizzy also thought of the same thing. No matter which race, it would be impossible for them to surpass the strength of the Divine Race. If God-ranks were that abundant, then the Ark Continent would've already fallen a long long time ago.

Lizzy looked at Zhao Hai and asked, "Brother Hai, what's the deal with that token? Why do I feel like it's the same as the blood ghost staff?"

Zhao Hai nodded, "You're not wrong. That is a part of the staff. I wanted to try and see if I can separate a part of the staff from the main body. That small part would allow us to monitor the person. I didn't expect that the experiment would be a success. Cai'er, show us the state of that fellow."

Cai'er immediately complied and changed the image on the screen. The display showed a very small space. Inside this space was a person wearing a type of helmet. There was also some kind of contraption attached on this person's arms and legs. Moreover, it can be clearly seen that this person was Axe.

Chapter 835 - Free State

Laura stared, her eyes widened as she said, "So that's how those magic armors were operated. Interesting, interesting."

On the other hand, Zhao Hai's pupils narrowed. He saw a lot of things from Axe's setup. Although Axe's way of controlling the mech was very bizarre, but you have to say that it was actually very convenient. Mechas aren't usually controlled this way, that's why ordinary people were unable to pilot them. It seems like the people of the Atlanta Plane had truly developed their magic armors to the extreme.

The image showed Axe controlling his mech to fly at a very fast speed. Since there was nothing else that happened, Zhao Hai decided to change the image to the Thunder Clan.

Zhao Hai had only spoken with Fei'er for a moment before he was interrupted with Axe's arrival. At this point, Zhao Hai doesn't know what Fei'er was doing.

After the image changed, Zhao Hai saw Fei'er hurrying along. And since nothing happened, Zhao Hai shifted the image once more towards the Goblins.

Once the image changed to the Goblins' background, Zhao Hai couldn't help but stare. At this time, the background had changed. Below the massive bread trees were small houses. Although small, they were beautifully constructed. Zhao Hai carefully inspected the houses and saw that they were made out of straw and mud. The decorations on the houses were made out of bread fruit shells.

Zhao Hai turned to Cai'er and said, "Cai'er, what things have these Goblins traded? I want to see."

Cai'er complied as she pulled out a detailed list. There were some ordinary tools and nothing special. Zhao Hai couldn't help but nod, it seems like these Goblins were quite smart. Otherwise, they wouldn't have been able to make these houses with these simple tools.

Zhao Hai smiled faintly and said, "Good. Right, Cai'er, how were the Goblins doing lately? Did they only build houses?"

Cai'er smiled and said, "No. Young Master, you don't know but there are still some Goblins who were educated. At this time, those with knowledge were educating those who didn't know anything. Inside the houses they built were magic formations. Those formations were quite clever, they actually made the houses quite comfortable."

Zhao Hai changed the image and looked at the rooms of the Goblins. There really were magic formations inside, moreover, they looked very well-made.

Zhao Hai nodded, then he smiled and said, "It looks like my idea is correct. These Goblins aren't the same as those in the Atlanta Plane. Their inheritance has been destroyed by the Divine Race. If they kept developing, they might have become as strong as Axe right now."

Laura stared, then her two eyes shone as she said, "Brother Hai, you mean those Goblins can make those magic armors that Axe and the others used?"

Zhao Hai nodded and said, "Yes. Initially, I want to have those Goblins research this technology. Now that Axe has appeared, it gave me the opportunity to see how advanced the magic formations are. It seems like it needed to be studied for many years. The Goblins are talented in this aspect. Let's just have them study magic formations and maybe they can make something great."

Laura nodded, "That would be good. Now that the Goblins have been freed, their knowledge can now flourish once more. Making complex magic formations shouldn't take too long."

Zhao Hai nodded, "With how the Goblins have been treated, it was now close to impossible for them to pass their inheritance down. Their magic formations look quite good, but it can be seen that their entire knowledge is still broken. If an average race had reached their point, then I'm afraid they won't recover. The Goblins being able to maintain their current state is amazing enough."

Lizzy and the others agreed. The Goblins' resilience was really something worthy of admiration. For them to still pass some of their knowledge down despite being suppressed by the Divine Race was a very great matter.

Zhao Hai smiled and said, "I initially thought that they had zero knowledge of their civilization, so I refrained from showing them magic formations from the Ark Continent. It seems like my plan needs to

be pushed forward. Let's have some undead mages teach the Goblins some words and knowledge regarding magic formations. Right, Laura, how is father-in-law doing nowadays?"

Laura smiled and said, "Father is still researching the defensive magic formations. I reckon he'll complete it soon. Why? Do you need him for something?"

Zhao Hai couldn't help but stare. He had asked Karen to research defensive formations before mainly to defend against the Demons and the Divine Race. But now that the Ark Continent has moved to the Space, these things were now not needed. In the end, Zhao Hai had forgotten about this task. Zhao Hai didn't expect Karen to still continue with this research, moreover, they were even close to succeeding.

Zhao Hai sighed and said, "This is my fault. I actually forgot about this. Tell father-in-law to take a rest. He's been exhausted these days. Now that our strength is enough, there's no need to use that formation."

Laura smiled and said, "I already told father about this. But father said that he would still do it. He said that he's very interested in these things. Let's just let him be. In any case, we have people looking after him and he's still taking a rest from time to time."

Zhao Hai nodded, then he turned to Laura, "Laura, once father-in-law is done with this research, tell him to stop studying for some time. I want him to compile his knowledge so that we can make a book out of it. We can use those books to teach the Goblins as well as the people in the Ark Space. We'll have everyone start researching themselves, what do you think?"

Laura's eyes showed his agreement, she said, "Good, that would be great. Father always wanted to do that but the people of the Ark Continent doesn't take magic formations too seriously. They always see magic formations as secondary needs. Even if father printed his book, I'm afraid people wouldn't even take a look at it. Now that there's a purpose, I think he will be happy to share his knowledge."

Zhao Hai smiled faintly and then turned his head to Cai'er, "Cai'er, scan the formations on the magic armor that Axe used. I want to compile them and have father-in-law look at it in the future. Laura, you also need to take care of father-in-law. He's not young anymore, he needs to refrain from being exhausted."

Laura smiled and said, "Rest assured, father has been well taken care of. Although he likes his research, he hasn't been going all out recently. Moreover, this is what he likes to do, if he is forbidden to work, then it would be like torture for him. Also, he's now a 9th rank expert, so his lifespan should already be long. Just have him do his thing, there won't be any problems."

Zhao Hai nodded and didn't say anything else. Karen's current body has been really good. In addition to the environment, the food and water in the Space adds up to the benefits that he gets. Currently, Karen looks younger and more energetic compared to before. Zhao Hai couldn't even describe him as an old man anymore.

After arranging this matter, Zhao Hai turned the image on the monitor towards the underworld's creatures in the Beastman Prairie. The undead seems to have advanced further.

Zhao Hai looked at the undead and couldn't help but sigh. The advancement of these undead has been too fast. At this time, they had already occupied two-thirds of the Beastman Prairie. Moreover, their advancement was still going on.

It was fortunate that the people in the Ark Continent had already moved out. This reduced the headaches that Zhao Hai felt. Zhao Hai opened another screen showing the state of the Northern Icefield. Zhao Hai couldn't help but get shocked by what he saw. The Space's monitoring capabilities seem to have improved.

Before he met the Divine Race, they would place a magic formation everytime they go on a meeting. Because of this, the monitor would just display a white scene. This was the same for the underworld's fog, the Space couldn't penetrate deep inside it.

Because of these, Zhao Hai knew that the Space's monitor had many limitations.

However, just now, Zhao Hai discovered that the monitor's penetration distance seem to have increased. Zhao Hai didn't expect this to happen.

Zhao Hai couldn't help but look at Cai'er and said, "Cai'er, it seems like the monitor has been improved."

Cai'er had a smug look as she nodded and said, "So Young Master has noticed. When the Space levelled up, the monitor's abilities have also been strengthened."

Zhao Hai smiled faintly and said, "You couldn't blame me for this. I've been too busy to take note of this. Hahaha. Good, it's great that it improved. Later on, we can spy on anything we like."

Cai'er smiled as well, "I also have something else that will make Young Master happy. The ingredients in the magic backgrounds can now be used. By my calculations, they should be enough to make ten God rank potions. Moreover, the output of these ingredients would slowly increase. And most importantly, crops grown on the magic background can quickly replenish our supply of gold coins. When the time comes, Young Master can buy those remaining backgrounds."

Zhao Hai clapped his hands, "Fantastic! Finally we can get rich. Having no money really affected my confidence. That's good. Right, Cai'er, make those God-rank potions." Then Zhao Hai turned to Laura and the others and said, "Since we don't have any pressing matter to take care of, let's go to Grandpa Green and have a dinner with them."

Laura and the others happily obliged. They had been too busy with the Demons and the Divine Race lately that they had no chance to share a meal with Grandpa Green and the others. Since they had nothing to do at the moment, they might as well eat with the elders.

As Cai'er arranged the God-rank potions, Zhao Hai and the others flashed towards the Ark Space, on the island occupied by the Buda Clan. The island wasn't too far from the new Ark Continent. However, the status of the people living on the island had become extraordinary. This was because of the Buda Clan, Zhao Hai's family. There's no person in the Ark Continent that dared disrespect members of the clan.

However, it was also because of this status that Zhao Hai reduced the contact between the island and the mainland. At this point, the Buda Clan is no longer trading with the continent. This was because there was no way to do proper business when it came to the Buda Clan. Once the family sells on the mainland, no haggling on prices occurred, the other party might even insert extra money on the side. If Zhao Hai does business this way, then the people's respect towards him would become bad. At this point, Zhao Hai would only buy the least amount of things from the mainland as possible.

The Buda Clan's island was quite similar to the black wasteland's structure. Those who lived in the island were no longer just the Buda Clan and their slaves. Elves, Dwarves, and a substantial number of Beastmen also lived on the island.

When the new continent was made, Zhao Hai had the people from the Black Wasteland return to their homes. Some Dwarves, Elves, and Beastmen chose to leave the island but there were also some of them who decided to stay. They liked the way the Buda Clan ran things as well as the island's environment. Because of this, they stayed and chose to become members of the Buda Clan.

The island had now become its own small self-sustaining continent. The Elves could make their artworks on the island and then sell them to Zhao Hai. Zhao Hai would then choose some artworks for himself while selling the others to the Space. Although the artworks would be sold for a higher price on the continent, the Elves were still satisfied with the price given by the Space. As long as they have food, water, and a place to stay, that was already good enough.

The situation with the Dwarves was also similar. They like to forge stuff. In the past, they would continually make weapons and armor on demand, they held no freedom in what they can make. However, things were different in the island, they now have the freedom to make anything they want. Dwarves built their own houses and forges and then went on to do what they like. In any case, they don't need to worry about things to eat and drink.

One could say that the Buda Clan's island was its own free state. Here, everyone can do whatever they wanted. As long as they don't break the rules, then nobody would judge them for what they do.

Chapter 836 - A Rare Relaxation

Being a free state doesn't mean that one can do crimes without repercussions. There were still laws in place in order to punish you. Being a free state meant that nobody would tell you what to do. You are free to be anything you like.

Zhao Hai hasn't returned to the island for quite some time. Currently, the island was given an interesting name by the people of the Ark Continent, Haven Island.

It is certainly impossible for the people of the Ark Continent to not know about the story of the Haven products. They knew that the Buda Clan wanted to use this to name their products. Because of this, the name Haven Island came up.

Zhao Hai didn't know this, but since the products of the Buda Clan rarely appeared on the continent now, Haven products had become extremely valuable items. People who had Haven products regarded these items as family treasures.

Also, Zhao Hai already spread his method of making liquor. He taught the Humans how to make grain wine. On the other hand, the Elves focused on making fruit wine while the Beastmen stayed with their milk wine. The Dwarves also kept making their sweet potato wine.

The Dwarves had plenty of cubed potato. This cubed potato was quite similar to sweet potatoes back on Earth. Zhao Hai only passed down the technique of distillation so naturally each group had their own preference.

When Zhao Hai arrived at the island, he saw the slaves working the fields. As they were working, they were talking with each other and laughed, they looked very happy.

What made Zhao Hai happy was the fact that these people looked like they loved their work. The tools each person used was different. Although the conventional tools were already refined, there were still some of them who wanted to try different types of tools.

Zhao Hai didn't disturb them as he entered the castle along with Laura and the others. At this time, the liquor production of the castle had stopped. Even if some liquor were brewed, they were only going to be used for personal consumption. Because of this, the castle looked more spacious compared to before.

On the other hand, the people on the castle wasn't few. The 100 initial slaves that Zhao Hai had brought used to help manage the new slaves. But now that they weren't needed, they all returned to the castle.

After the people in the castle saw that Zhao Hai had come back, they immediately went to give him their greetings. Zhao Hai looked at the slaves and saw their neat appearance. It seems like they were living quite well. There were even some of them who showed a sense of elegance. This was evidently because they had become learned people.

Zhao Hai smiled at those who met him and said, "How are you doing? Is everyone doing fine?"

Everybody gave out a laugh before a fairly fat man replied, "Happy! We are very happy, Young Master. We can now eat meat every day, completely different to before when we were starving. I even got fat now, Young Master, look" Zhao Hai looked at the fat man. This person wasn't that tall, only about 1.8 meters tall. However, he looks like he weighs more than 250 pounds. Seeing someone this fat was very surprising.

However, Zhao Hai can see that although this person was fat, he didn't look weak at all. What made Zhao Hai surprised was the fact that this person was actually 9th rank, just one step left until becoming God-rank.

Zhao Hai waved his hand and said, "Come here, aren't you Silas? When you came here, you were very small and skinny. I didn't think that you would get this fat. Hahaha. Good, good. Just make sure that you won't stumble. Right, did you like cultivating that much?"

The fatty named Silas didn't expect Zhao Hai to call him by his name. His face couldn't help but blush as he said, "I didn't think that the Young Master would remember my name. I'm not very intelligent, so I couldn't do anything complicated. However, I loved cultivating so I did that. I didn't think that the Young Master would recognize me."

Zhao Hai smiled and said, "You continue with your diligent work. If you succeed, you will be the first member of the Buda Clan to break through to God-rank without outside help." The fatty obviously wasn't someone who had any idea about this. But when he heard Zhao Hai, he happily nodded his head.

Zhao Hai also greeted everyone else before entering the fort. Zhao Hai rarely came here anymore since his main operations were made inside the Space's villa. At this time, Green and the others were already waiting for him in the main hall. After Zhao Hai came in, Green immediately gave his greetings, "Young Master, why did you decide to pay a visit today? Did something bad happen?" Zhao Hai shook his head and said, "Everything's fine, things have been calm these days so there's nothing to worry about. I only came here for a simple visit." Green's worries vanished when he heard Zhao Hai.

After talking to Green, Zhao Hai also greeted Kun, Karen, and the others. After the group had sat down, Zhao Hai explained what happened outside, including the matter with the Atlanta Plane. After hearing Zhao Hai talk, Green said, "So there's another spatial rift in the Ark Continent. It seems like the newcomers don't have any good ideas for the plane."

Zhao Hai smiled bitterly as he gave a nod, "It seems to be like that. The Atlanta Plane should be as strong as the Demon Realm. However, they have their formidable magic armor. These magic armors were 10

meters high and covered in magic formations. Moreover, it can improve one's attack strength, each one of them had peak 9th rank power."

Upon hearing this, Karen knit his brows and said, "What magic formations? Can you let me take a look?"

Zhao Hai already guessed that Karen would be interested in this, so he smiled faintly and said, "Father-in-law, don't worry, I'll definitely show them to you. I need two days in order to compile everything we recorded. There are a lot of them and each part has different functions. When the time comes, you can study them closely."

Karen's was evidently satisfied with this answer. He initially started to study magic formations in order to forget his bitter memories regarding his wife, but who would've thought that he became obsessed with research. Green turned to Zhao Hai and said, "Young master, can you really fight with the Divine Race in this short amount of time?"

Zhao Hai nodded and said, "At this point, only remnant soldiers of the Taurus army are left in the Radiant Empire. Also, I reckon the Taurus continent would also stop sending reinforcements. This is a good opportunity to attack them with the Thunder Clan." Green and the others didn't oppose to this, they too held great resentment towards the Taurus Divines. For the Divines to use a huge blood sacrifice was already too much for them to accept. Not to say Zhao Hai, even Green and the others were seething with anger at this event.

After seeing that nobody opposed to this, Zhao Hai continued, "Grandpa Green, I need advice. The Space's magic backgrounds are now ready for harvest. I already had Cai'er use the ingredients there in order to make 10 God rank potions. How do you suggest to divide them?"

Green gawked, then his eyes lit up as he asked, "Really? We can make that much?"

Zhao Hai nodded, the other people in the room were also evidently happy. Green thought for a moment and said, "Little Hai, how about this. I think you should give those potions to the people of the Ark Continent. You can give two potions to the Elves, two potions to the Humans, two potions to the Dwarves, two potions to the Beastmen, and the final two to the Fishmen. This way, they would feel grateful to you."

Zhao Hai stared, then he knit his eyebrows as he said, "I wanted to give the potions to you. We can use the next batch for them." Green smiled and said, "Give it to them this time. The next time, we can have them. In any case, we won't leave the Space. What are you afraid of? These old bones are still very strong, we won't die soon." Zhao Hai nodded and followed Green's suggestion. At this time, Merine came in bringing some food. Then the group proceeded to eat their meal.

Zhao Hai spent three days in this peaceful state. These three days were rare times of relaxation for him. He went with the slaves and conversed with them. He also gave a visit to the Giant-horned Bulls, the Diamond Apes, the Dwarves, and the Elves. He went and visited everyone he could visit.

Times spent in relaxation always passes by quickly. Three days passed in a blink of an eye. Although Zhao Hai wanted to keep this time of leisure, the matters outside didn't allow him to stay.

Fei'er and the others had already reached the borders of the Radiant Empire. They were ready to attack the Divine Race and Zhao Hai couldn't be absent for this event.

These days, Zhao Hai also took the effort to visit Fei'er as well as see the Great Demon King's progress in moving the Demons to the Space. Although the Demons were busy with their migration, the Devil Legion was still ready to make an attack at any time.

In addition to the progress of the Demons, the magic formations have also been sorted out. Karen had succeeded in developing the defensive magic formation. Zhao Hai was now more confident in dealing with the Divine Race.

Currently, Zhao Hai didn't lack in his supply of crystal stones. What he lacked were things to use crystals with. The appearance of the defensive formations was just right for his current needs.

Karen's defensive formation wasn't simple. During the process of experimentation, Karen had written all its properties in a very detailed manner. This magic formation can be used by ten thousand people, fifty thousand people, and 100 thousand people. Although the number of people using it varied, the need for crystal stones didn't exponentially increase. It was only after this property was achieved did the formation deemed a success.

An army had already converged outside the Radiant Empire. However, the attackers didn't attack immediately. They just kept their formations in preparation for their charge.

Inside the Radiant Empire, the Divine Race has now gathered 20 million troops to fight. The borders of the Empire already had a long wall built equipped with magic cannons. All of the soldiers were in a neat formation floating in mid air.

On the opposite side, there were also troops floating in mid air; the two armies of the Barbarians and the Winged Pegasus, Zhao Hai's undead army, and the Demon Race's Devil Legion. The small number of Thunder Clan people were also present in the center.

While looking at the Divine Race's desperate situation, Zhao Hai couldn't help but sigh, "I didn't expect us to be this quick to turn on the Divine Race. To be honest, when the Divine Race and you came, I didn't think I would be able to see this day." Zhao Hai was currently sitting inside the Demon Dragon King's carriage, talking with the Demon Dragon King.

The Demon Dragon King smiled and said, "When we came to attack the Ark Continent, we also didn't expect to be able to settle inside a place much better in comparison."

Zhao Hai gave out a chuckle, "In truth, if it weren't for the Demons using a non-wicked method to come here, I wouldn't have allowed you to settle in the Space. You should know that since the residents of the continent had moved, I didn't have extra worries anymore. When the time comes, I can just slowly grind away at the Demons and the Divine Race."

The Demon Dragon King knew that Zhao Hai wasn't speaking nonsense. To be honest, after entering the Space, Zhao Hai's mysterious ability, the Demon Dragon King already understood that if they didn't become Zhao Hai's allies, then they would sooner or later be tidied up.

The Demon Dragon King smiled and then said, "This is the luck of our Demon Race. You should know that the Blood Void Formation needed live sacrifice as well. It's fortunate that we chose the Demons, otherwise we would have suffered the same fate as the Divine Race."

Zhao Hai couldn't help but laugh, "It's good that the Demons think that the Dragons are better compared to the Humans. Or else you would've used Humans instead of Dragons."

Just as the two were talking, Fei'er arrived by their side. Zhao Hai looked at Fei'er as the latter gave a salute, then Zhao Hai said, "Is everything prepared?" Fei'er nodded and said, "Yes, but as you can see, there are massive magic cannons placed on the walls. Even God-ranks are unable to resist the attacks from those cannons. Moreover, their range is much farther than the magic cannons of your Ark Continent. It is only because those things are huge and heavy that they were very inconvenient to bring to the battlefield. What we need to do right now is to take care of those cannons. Does mister have any way to do it?"

Zhao Hai smiled faintly and said, "Leave it to me." Then he waved his hand as he released a few rows of undead dragons. Mounted on top of their heads were magic cannons. Moreover, these cannons weren't those from the Ark Continent, instead, they were the Divine Race's magic cannons.

Fei'er looked at the Dragons and stared. He has been with the Divine Race army for a long time so naturally he could identify that these magic cannons were from the Divine Race. Fei'er just didn't expect that Zhao Hai would have those cannons of his own.

Zhao Hai looked at Fei'er and smiled, "When I attacked the Radiant Empire, I also took the opportunity to snatch some magic cannons for myself. It just so happens that they're quite convenient to use today."

Fei'er said, "It seems like we'll have the Divine Race taste their own magic cannons."

Zhao Hai smiled faintly but he didn't say anything. The magic cannons of the Divine Race were indeed large, however, Zhao Hai still didn't think that they were strong enough. It was mainly because they lacked a good energy source. In the past, the Divine Race only used ordinary crystals to power them. Those magic crystals were in no way comparable to the magic cannons that Zhao Hai had now.

With the superior crystals in his hands, Zhao Hai was able to improve the power of the magic cannons. Because of this, Zhao Hai decided to take them out.

Zhao Hai didn't give an explanation to Fei'er as he waved his hand. After that, the dragons proceeded to go towards the Radiant Empire. They would only stop if they reach their firing distance.

Besides the cannons, there were also four undead on top of each dragon, they're main purpose was to man the weapon. Although Zhao Hai didn't have that much magic cannons, he was still confident that his cannons were superior.

No matter what, the might and firing distance of the cannons was improved thanks to Zhao Hai's crystals. When the attack happens, the Divine Race's cannons would be useless against Zhao Hai's army.

The dragons stopped when they reached their firing distance, at the same time, the undead started to arm the cannons. It didn't take a long time before 40 red lights started to fly towards the Radiant Empire's walls. This caused the Divines manning the cannons to be startled. They weren't even able to get a defensive formation out before they were blasted by the red lights.

One could say that the might of these cannons were far superior compared to the cannons of the Ark Continent. Although its crystal consumption was greater, Zhao Hai didn't care about that right now, power was what he needed.

Zhao Hai's attack was beyond the Divine Race's expectations. The Divine Race has heard of the Ark Continent's cannons. Although they suffered a few attacks from the Ark Continent's cannons, they still believed that their magic cannons were better.

Because of this, the Divine Race were confident in defending the Radiant Empire. They were also able to see Zhao Hai's undead dragons. Although the Dragons held the Divine Race's giant cannons, the Divine Race knew that Zhao Hai didn't have that much with him. In their minds, they could fully suppress the enemy's advance.

However, they didn't expect that Zhao Hai's magic cannons would have a better firing distance compared to the Divine Race's cannons. This caused the Divine Race to begin worrying about their defense.

Zhao Hai didn't care about the Divine Race's thoughts. At this time, he made the undead continue on with their assault. To be honest, the walls were useless at this point. The Divine Race seemed to have focused their research on the magic cannons and had forgotten to study strong defensive formations.

If the Divine Race had good defensive magic formations, they wouldn't have been harassed by Zhao Hai's tactics. Unfortunately, the Divine Race didn't take magic formations very seriously.

When the Divine Race had wars with the other races, they were always on the winning side. Because of this position, their rear areas were never attacked.

This caused the Divine Race to grow complacent as time passed. Their arrogance had reached to the point that they had deemed defensive formations to be unnecessary. In the end, they neglect their study on defensive magic formations, this resulted in their suffering in the hands of Zhao Hai.

Once the Divine Race found out that their cannons were virtually useless, they had no choice but to abandon their magic cannons and slowly retreat.

When Zhao Hai saw that the Divine Race had abandoned their magic cannons, he couldn't help but be happy. He immediately released the undead loaded with the Ark Continent's magic cannons. Although they had a smaller power compared to the Divine Race's cannons, the Divine Race had already abandoned their advantage the moment they left the walls.

The Divine Race were also able to discover this. However, it was already impossible for them to return to their cannons. The Ark Continent's cannons had reached their firing distance, so if the Divine Race returned, then they would be placed under a rain of fire.

The Divine Race also knew that if they continued on like this, then they would only be defeated and wouldn't be able to fight back. Because of this, the Divine Race soldiers proceeded to rush towards Zhao Hai.

Just as the Divine Race were more about 1000 meters away from Zhao Hai, a dark cloud was immediately spotted. Upon seeing this, Zhao Hai immediately knew what it was. The Divine Race just threw their javelins.

Although these javelins weren't the same as Zhao Hai's blood lightning javelins, their firing distance was still quite far. Moreover, they were quite lethal to average people.

However, they were up against Zhao Hai's undead army. Against the undead, these javelins could only deal minimal damage.

Nobody could blame the Divine Race for not being able to adapt. After all, when they were planning to attack the continent, they knew that it was unlike the planes of the Barbarians, Winged Pegasus, and the Thunder Clan. The Ark Continent was just a lower plane with no God-rank experts.

Because of this information, the Divine Race didn't develop new weapons upon coming to the Ark Continent. This caused them to lack attacking methods to deal with Zhao Hai. Their methods were either useless or did only a small damage to Zhao Hai.

Although the Taurus Divines had started to make new means of dealing with Zhao Hai, the time to develop this weapon would take more than one or two days. If they wanted to depend on this new weapon, then they would need to hold Zhao Hai back for some time.

Chapter 838 - Fighting to Win

In the past, Zhao Hai was quite worried about the Divine Race's javelin attack. However, Zhao Hai didn't worry anymore. Now that Karen's research has been completed, they could now use it in the army.

As the Divine Race's javelins hit the periphery of the undead army, a red shield suddenly appeared. Upon hitting the red shield, the javelins were immediately burned to ash.

Currently, the crystals that Zhao Hai had the most were the fire element crystals. Therefore, Zhao Hai decided to use it for the defensive formation. At the same time, he also wanted to see how powerful the defensive formation was.

Sure enough, the defensive formation didn't disappoint Zhao Hai. Not only were the javelins blocked, they were also burned to ash. This was a testament to the defensive capability of the shield.

The Divine Race were shocked by the scene before them. It wasn't only the Divine Race who were startled, Fei'er and the others held the same shocked expression on their faces. Only the Demon Dragon King kept calm, but he couldn't stop the smile emerging from his face.

The reason why the Demon Dragon King was smiling was because Zhao Hai also equipped the Devil Legion with this defensive formation. This formation was mounted behind a large undead and was able to cover a large area. With this, whether advancing or retreating, the army would be protected either way.

The defensive shield shouldn't be underestimated. Even if the shield wasn't defensively strong, it still could block attacks. This would reduce casualties and in turn improve the soldier's morale.

Zhao Hai smiled and said, "I won't dare fighting the Divine Race before, but now, hehe." Then he had the magic cannons retreat as the other undead proceeded to push on.

This undead rush made the Divine Race panic. The reason for this was because the undead were all Divine Race soldiers. They were the fallen allies that were turned into undead.

The undead Divines initially rushed in a cube formation. But when they were about a kilometer away from the Divine Race army, they immediately turned into a rotating cone formation.

To be honest, there were only a few soldiers among the Divine Race army that wanted to face the Ark Continent at this point. Being faced with this cube formation composed of Divine Race undead made them utterly flustered.

However, the Divine Race were still worthy of their title. When the two armies clashed, their formation still kept solid. They were quickly able to establish their Domains and their formations.

But then, a scene of horror appeared in front of the Divine Race. As they raised their shields, the undead army did the same. This caused the initial state of battle to remain unchanged.

The speed of the cone's rotation became even faster. This rotation didn't have one person acting as the tip, instead, it had four people. Each member of the formation had sword-shaped Domains, it caused the entire formation to become a huge weapon.

There were a lot of these formations flying through the air, heading towards the Divine Race's defensive formation. Each cone slowly became like sharp bamboo spears, spiralling towards the enemies.

These bamboo spears proceeded to skewer the Divine Race army. The formation became a meat grinder, every area they passed through would have flesh and blood flying all around.

Although the Divines had established their Domains, they became helpless in front of these bamboo spears. One by one, each of their Domains were broken through, shattered before they met their deaths.

Zhao Hai looked at the situation without any change to his expression. The Demon Dragon King by his side was also looking towards the clash, his face failing to hide his shock. To be honest, he knew that even the Devil Legion wouldn't be able to accomplish such a formation. The coordination needed to perform such a feat was astronomical, not one person was allowed to fail. Even a small mistake would completely derail the formation.

The Demon Dragon King also knew that if the Devil Legion were to meet such a formation then even them would be punctured to death, there was no doubt about that.

At the same time, Fei'er and the others were also shaken by what they saw, all of them were rendered speechless. If Zhao Hai decided to deal with them using the same method, then they would surely be finished.

Although Zhao Hai was paying attention to his undead army, he had asked Cai'er to pay attention to his allies' reactions. The reason he revealed the might of the cannons as well as the bamboo spear formation today was to show these people how formidable he was.

In any alliance, a leader would need to be present. Otherwise, the alliance would be in a state of disunity. Not to say dealing with the Divine Race, an alliance leader would be needed to reduce infighting.

But if one wanted to become the alliance leader, then one needed to show their might. This meant that Zhao Hai needed to stun his allies with this strength. Only with this method would the Barbarians, Winged Pegasus, and Thunder Clan listen to him. Otherwise, if Zhao Hai can't do it, he might as well go back to the Space and sleep.

The thoughts of the Barbarians and Winged Pegasus have already been confirmed by Fei'er. It was precisely because of this that Zhao Hai decided to use the Divine Race as an example. He would kill the chicken in order to frighten the monkeys. This way, the Barbarians and the Winged Pegasus would be afraid of him and obey his commands.

Zhao Hai was very glad about this alliance. This was because he knew that it would take a long time to deal with the Divine Race if he was alone. But with the help of more people, the time needed would be greatly reduced.

However, Zhao Hai didn't want to listen to another person's command. He still had the vigor of a young male, he didn't want someone to dictate his actions.

Now it seems like the results were very good. The Barbarians, Winged Pegasus, and the Thunder Clan were all shaken by his action. Later on, they wouldn't have any reservations in following his command.

At this point, the Divine Race were flustered. They didn't expect Zhao Hai's attack to be this fierce. It gave them little to no chance to retaliate.

This time, the bamboo spear blistered into smaller bamboo spears. This caused the Divine Race army to be disturbed, finding it hard to keep their shape. In the end, the previously fearless Divine Race army started to have some deserters among their numbers.

In fact, Zhao Hai had used this bamboo spear formation once before, but since there weren't so many people in the formation, its might wasn't that big. But now that Zhao Hai had a lot of undead Divines in his hand, this allowed the formation to show its true might.

As the Divine Race soldiers ran away, Zhao Hai immediately gave an order to the Barbarians, Winged Pegasus, and the Thunder Clan to give chase.

Meanwhile, Zhao Hai directed his other undead to clean the battlefield. All weapons discarded by the Divine Race were all captured, this included the big magic cannons up on the walls.

The Divine Race soldiers left inside the Radiant Empire wasn't a lot. The 20 million soldiers were almost all of the soldiers left. Now that the army has been routed, the entire Radiant Empire was now ripe for takeover.

All involved in this fight were strong experts, it wouldn't be a problem for them to fight continuously for one or two days. However, the Divine Race were completely scared off by Zhao Hai. This caused them to be unable to muster up some courage. All of them were scampering to return back to the Divine Realm.

Naturally, Zhao Hai wouldn't just have them retreat easily. They continuously chased the Divine Race soldiers up to the rift. While the others were going with the assault, Zhao Hai was actually in the Radiant

Empire gathering all the supplies that the Divine Race had left. The most important harvests that Zhao Hai gained were grains, Goblins, and magic cannons.

There were plenty of supplies inside the Radiant Church, all of which were taken by Zhao Hai. The Radiant Empire was different compared to the rest of the Ark Continent. The people of the Radiant Empire were all sacrificed by the Radiant Church. Because of this, their belongings were still present. This caused Zhao Hai's harvest to be more than expected.

These supplies were not really good, most of them were even quite old. There wouldn't be anyone in the Ark Continent who would want to use them. Even the Beastmen would decline such items. Zhao Hai had made a place like the church in the Beastman territory. This allowed the Beastmen to trade their goods for living materials that they need.

But this didn't matter since Zhao Hai planned to hand these supplies over to the Demons and the Goblins. The Demons were completely lacking in living materials, they really didn't have anything good to live with. Just like the Demon Dragon said, the Demons could quickly pack all of their belongings as well as get magic beasts and plants before moving to the Space. Even with this, there would still be people who would come empty-handed. For these people, the Demon Dragon King had them carry stones for the Space in order to build their houses. The Demons were completely solid in their decision to keep the Space's environment intact.

There was no need to say anything about the Goblins. Besides their old and ripped pants, they simply didn't have anything else. Giving them these supplies would surely elevate their situation.

The Demon Dragon King has always been with Zhao Hai, therefore, he was able to see the undead basically scraping everything off the ground and then taking it to the Space. As long as something was useful, then it would be taken away. No matter if it was in good condition or bad, whether it was new or old, everything was taken. This caused the Demon Dragon King to be confused. However, the Demon Dragon King still kept an eye out for these things, the Demons were just too poor.

While Zhao Hai was proceeding with his plunder, the Divine Race continued to run back to the Divine Realm. In the final moments, a defensive troop stayed behind to stop the pursuing soldiers.

Although they were yet to attack the Divine Realm, Fei'er and the others were still very happy. They just managed to repel the Divine Race, this was definitely a good start to their plans. At the same time, it provided them confidence to fight against the Divine Race.

Zhao Hai also left some cities untouched. These cities were to be handed over to Fei'er and the others to rest in.

After exchanging words with Fei'er and the others, everyone went back to take a rest. Zhao Hai led the Devil Legion as they went back to the Demon's Space.

Zhao Hai discovered that the Demon Space has greatly changed. A lot of Demons already had their houses built. Those who didn't have their own house were also in the process of building them. The reason they were slow was because they almost exclusively used materials from the Ark Continent or the Demon Realm. They rarely acquired materials from the Space.

After seeing his people bustling about inside the Space, the Demon Dragon King couldn't help but smile as he turned to Zhao Hai and said, "Mister, I really want to give you my utmost gratitude. If it weren't for you, I'm afraid my people wouldn't be able to live this kind of life."

Zhao Hai smiled faintly as he waved his hand, "There's no need to be too polite. Right, I just gained a lot of materials from the Radiant Empire. If you need them, I can provide a share of those things to you. What do you think?"

When the Demon Dragon King heard this, he couldn't help but smile, "That would be great. Thanks." Zhao Hai smiled before he took out piles of those supplies out into the Space.

When the piles appeared, the Demon Dragon King immediately had people distribute them. After the Demon Dragon King was finished with his task, he was immediately invited by Zhao Hai inside the sword carriage. After the two sat down, Zhao Hai said, "Demon Dragon, I want to tell you something. A few days ago, another spatial rift appeared in the continent..." Then Zhao Hai told the Demon Dragon King about the Atlanta Plane.

The Demon Dragon King's expression stayed tranquil. Now that the Demons were going to enter the Space, he doesn't need to worry about this anymore. However, he knew that Zhao Hai must have a reason to tell him about this. Therefore, he kept listening. After Zhao Hai finished speaking, Demon Dragon asked, "What does mister want to do?"

Zhao Hai's tone turned to serious as he said, "Eliminate them when they come. Then we'll snatch their magic armors and use it to deal with the Divine Race."

The Demon Dragon King nodded and said, "Does mister want us to send some troops?"

Zhao Hai shook his head and said, "I only have my eyes on them, but I can't guarantee if we can use them in the future. I just told you about it so that you can prepare. I also want you to pick some Demons who are enthusiastic about magic formations. We'll have them make their own magic armor as soon as possible."

The Demon Dragon King wrinkled his brows as he said, "Mister, why would you go through so much trouble? We can just grab their method of production and reproduce them in the Space. If Mister's strength isn't enough, the Demons can send troops to help you."

Chapter 839 - Demon Realm's Beast Tide

Zhao Hai couldn't help but smile as he heard this. It was a completely Demon-like response. If you want it, just rob it. It was just like when the Demons fancied the Ark continent. They didn't think too much about it and just proceeded to invade.

After seeing Zhao Hai smile, the Demon Dragon King couldn't help but be worried, "Mister? Did I make a mistake?"

Zhao Hai smiled faintly and said, "There's nothing wrong. I don't want to have a war with three planes right now. Therefore, we'll just prepare to receive them in the future."

The Demon Dragon King stared, then he immediately understood Zhao Hai's plan. Zhao Hai was currently in a war against the Divine Race, but the Underworld was also slowly creeping in. If the Atlanta Plane was added, then Zhao Hai would have three enemies. Having war with these three parties meant that the Ark Continent would be at war with three planes.

The Demon Dragon King frowned and said, "Then what is mister planning to do?"

Zhao Hai replied, "We'll wait for them to invade the Ark Continent, then we'll snatch their technology for our research. We'll wait until we settle in the Divine Realm before thinking about going to the Atlanta Plane."

The Demon Dragon King thought about it before nodding. Their most important enemy at this time was the Divine Race. Although the people from the Atlanta Plane were also very dangerous, their threat was still inferior compared to the Divine Race. Moreover, they were now allied with the Barbarians, Winged Pegasus, and the Thunder Clan. If they shift their target to the Atlanta Plane, then that would be unfair to them. So first they need to deal with the Divine Race and then deal with the Atlanta Plane in the future.

The Demon Dragon King asked, "So what do we do now?"

Zhao Hai replied, "First, we need to deal with the Divine Race. We'll focus on this goal first, we'll put the other matters to the side."

The Demon Dragon King nodded. At this time, Zhao Hai suddenly felt his messenger fish move. Zhao Hai stared before he immediately took it out. From the messenger fish was the Great Demon King's voice, "Mister, are you in?"

Zhao Hai stared for a moment before he quickly replied, "I'm here. Your Majesty, do you need something?"

The Great Demon King immediately replied, "Mister, quickly close your spatial rift. A beast tide just formed in the Demon Realm. We don't want those demon beasts to enter the Space."

Zhao Hai gawked, then his body immediately flashed towards the spatial rift. Currently, the spatial rift was outside a medium sized settlement in the Demon Realm. This allowed easy entry for the Demons heading towards the Space. However, the situation outside wasn't very good to look at.

This wasn't the first time that Zhao Hai had seen a beast tide. In the past, the Black Wasteland had also suffered a similar event. However, compared to the Black Wasteland, the beast tide of the Demon Realm was much much worse.

At this time, a flock of demon beasts blotted out the skies. These magic beasts were poised to attack the city while some were heading towards the spatial rift.

When Zhao Hai saw this scene, his two eyes immediately shone. He immediately gave the Great Demon King a reply through the messenger fish, "Your Majesty, there's no need to worry. As long as I make some adjustments, I can also absorb those magic beasts into the Space."

Zhao Hai was just wondering as to how he could take magic beasts of the Demon Realm to the Space. But now, this opportunity actually came, so how could he just let this go. Zhao Hai didn't close the spatial rift but instead shifted the destination. Instead of the Demon Space, the spatial rift was connected to the hell background.

The hell background was suited for darkness creatures to survive in. Since most of these magic beasts were of the darkness attribute, Zhao Hai could just place them all inside the hell background.

If they want to take those beasts to the Space, then they could only grasp them one by one or bait them in just like what Zhao Hai did in the Carrion Swamp. However, both of those methods were very hard to accomplish.

But now that the magic beasts were rushing towards the rift, Zhao Hai can use this opportunity to take them to the Space. Although these beasts were hostile towards him, the Space can just change this sentiment down until it disappears entirely.

The Space considers people and magic beasts to be two different beings. If a person has hostility towards the Space, then the Space couldn't just change it instantaneously. It can only slowly turn the will of that person, subtly influencing that person's thoughts.

But for magic beasts, the Space held more power. As long as Zhao Hai takes them to the Space, the magic beasts would immediately surrender. Because of this, Zhao Hai wasn't worried about these magic beasts rampaging upon reaching the Space. Also, they might even provide some improvement to the Space's level.

Although the Great Dragon King couldn't understand Zhao Hai's action, he still didn't oppose to it. He believed that Zhao Hai knew what he was doing. And since he was busy defending the city, he didn't

have the focus to deal with Zhao Hai's decision. Upon hearing Zhao Hai, the Great Demon King immediately stored the messenger fish.

Before the magic beasts entered the Space, Zhao Hai quickly changed the background and opened new spatial rifts. This way, it would be easier for the magic beasts to enter the Space.

Then something shocking happened to the magic beasts. As Zhao Hai opened new rifts, the magic beasts immediately swarmed towards them, almost to the point where they were throwing themselves over.

The magic beasts attacking the city stopped their advance as they shifted their focus on the spatial rifts. Weaker magic beasts were even trampled by those much stronger than them.

Zhao Hai himself couldn't help but get shocked upon seeing this. Although he wanted the magic beasts to enter, he didn't think that it would be this case. This was completely out of his expectation.

The magic beasts went straight into the Space just like moths to a fire. This scene also attracted the attention of the Great Demon King. The Great Demon King was immediately worried about his people. He was afraid that those magic beasts would flood the Demons inside the Space. Because of this, he immediately took his messenger fish and contacted Zhao Hai, "Mister, mister, can you hear me?"

Zhao Hai took his messenger fish out and said, "Your Majesty, I can hear you. There's no need to worry. I took the magic beasts to a place completely different from the Demon Space. Your Majesty can rest assured."

Upon hearing Zhao Hai, the Great Demon King's heart couldn't help but skip a beat. Although Zhao Hai's words seemed simple, it gave the Great Demon King another piece of information. Zhao Hai's Space actually had another place other than the Ark Space and the Demon Space. It might even be multiple other places.

The Great Demon King found out that everytime he gauges Zhao Hai's strength, he would still be underestimating him. If Zhao Hai can settle the Ark Continent's residents on one place while settling the Demons to another, then this means that Zhao Hai could settle another race inside a different Space. If Zhao Hai continues to accumulate people this way, then his faith power would be greater than what the Divine Race would provide.

Zhao Hai didn't think about any of these as he was look satisfactorily at the magic beasts rushing towards the Space. This was a completely good thing for him. He also heard prompts here and there as the Space introduced different magic beasts to him while also subduing them. Later on, Zhao Hai would be able to use these magic beasts as his subordinates.

Zhao Hai fancied these magic beasts from the Demon Realm. Their strength was formidable. Moreover, they were the most suitable to become mounts. In addition to their strength, each one of them were unafraid of death. This was a problem prevalent with magic beasts found in the Ark Continent.

There were too many magic beasts, so it took them some time before they entered the Space. Fortunately, these magic beasts were completely focused on the Space. This allowed Zhao Hai to stop worrying about them.

After looking at it for a while, Zhao Hai returned to the Space's villa. When he arrived at the living room, he saw Laura and the others sitting there, looking at the Demon Realm's beast tide.

After seeing this, Zhao Hai couldn't help but smile, then he turned to Cai'er and said, "Cai'er do you know why those magic beasts suddenly rushed to the Space?"

Cai'er smiled and said, "It's possibly because the young master has changed the background. Most of these beasts had the darkness attribute and the hell background can improve the darkness attribute. For these magic beasts, it was basically an instinct to seek for improvement. Possibly, they were able to sense the hell background and couldn't help but rush towards it."

Zhao Hai nodded and then replied, "That's great. Having those beasts inside the Space is definitely a good thing for us. If those magic beasts come, then it's possible that they can upgrade the Space."

Cai'er smiled and said, "I don't think that would be possible. Although there are a lot of magic beasts, the types present aren't many. Moreover, most of them are weak magic beasts. If they didn't enter the Space, they would've been killed by stronger magic beasts. Depending on these beasts to upgrade the Space is just not possible."

Zhao Hai agreed, he nodded and said, "Even if they can't upgrade the Space, having them is still good for us. A lot of these magic beasts are quite strong, not quite inferior compared to God-ranks. Having them enter the Space would improve our strength."

Chapter 840 - Fighting a Battle To Force A Decision

The beast tide of the Demon Realm, although it was only a fleeting event, allowed Zhao Hai to gain a lot of benefits. After the magic beasts charged to the Space, Zhao Hai immediately changed the spatial rift's destination back to the Demon Space. After that, Zhao Hai went and informed the Great Demon King to have the Demons continue their move.

Zhao Hai had also finished his matter with the Demon Dragon King, so naturally he wouldn't stay in the Demon Space for long. He went to rest in the villa for a while before walking out to find Fei'er.

Fei'er and the others were now resting inside the cities of the Radiant Empire. Since the cities were converted into military compounds, they still had few commodities present, so Fei'er and the others weren't worried about what to eat. However, the fight that just happened had truly given them a shock.

Zhao Hai's fighting strength stunned them. They didn't think that Zhao Hai was so strong, he wasn't any weaker than the Divine Race.

Most importantly, after killing the Divine Race today, Zhao Hai would gain more undead Divines, improving his strength once more.

Because of this, after Fei'er and the others settled their people, they immediately gathered together and discussed Zhao Hai. It can be seen that the result of Zhao Hai's use of power has yielded its result.

Fei'er looked at Shan and Yue as he sighed and said, "You two, you should have seen Zhao Hai's strength. To be honest, I wasn't expecting him to be that strong as well. I know you have some reservations towards him for killing your people. Nevertheless, we're going against a common enemy right now. With Zhao Hai being the main powerhouse, our people would die less. I hope you two can put your enmity aside and cooperate with Zhao Hai."

Shan and Yue looked at each other before simultaneously nodding. Yue then said, "It's true that we have some hatred towards Zhao Hai, however, we hate the Divine Race even more. Moreover, we haven't seen Zhao Hai use our people in his battles. It's quite obvious that he wants to save face for us."

Shan added, "Right, compared to the Divine Race, our hatred for Zhao Hai is small. In fact, we really can't blame Zhao Hai for killing our people. It is the Divine Race's fault for sending them to the battlefield. Zhao Hai is just trying to defend his homeland."

Upon hearing the two, Fei'er let out a sigh of relief. Then he gave a nod as he said, "Then that's good. Our greatest enemy is the Divine Race, we should focus on them."

Shan and Yue nodded. They weren't clueless people, they knew that Zhao Hai's strength can only bring them benefits and no harm. As for what happens after they defeated the Taurus Divines in the Divine Realm, they didn't think about that yet. They weren't even sure if they could do such a thing.

Shan looked at Fei'er and said, "Feier, with the current situation, our people have already started out move. At this point, the Divine Race have guarded the spatial rift. Should we attack the Taurus continent like mister Zhao Hai said?" At this time, a soldier suddenly gave a report, "Mister Zhao Hai came to talk."

The three looked at each other before they all stood up. "Quickly invite him inside", Fei'er said. Then the three went forward to see Zhao Hai.

After Zhao Hai came in and saw that the three were together, he couldn't help but smile. Then he gave the three a salute and said, "I didn't think all three of you would be here. Let's discuss what to do next."

Fei'er smiled and said, "We're also about to talk to mister regarding this. However, we didn't have the means to meet mister, please excuse us." Fei'er purposely forgot about the messenger fish that Zhao Hai gave him.

Zhao Hai understood that Fei'er was just being polite, he didn't mind it as he smiled and said, "It's fine. I also like to go around places, so you don't need to worry." After that, all of them entered the hall.

The place they were in was a church in the city. This was a strange thing in the Radiant Empire. Generally, the city lord's mansion would be the most noteworthy structure in any place, however, in the Radiant Empire, it was the church.

The church was made magnificently. Its walls were full of murals, it was very beautiful. The murals depicted scenes glorifying the Divine Race, like how they managed to defeat Demons. There really wasn't much history shown.

This was the first time that Zhao Hai managed to see the inside of a church. Now that he saw it, he couldn't help but admit that it looked good. One could feel how tranquil it was inside, the murals were very artistic as well.

Suddenly, Zhao Hai noticed Winged Pegasus people on one of the murals. The Winged Pegasus were riding their mounts as they held their knight's spear and battled with a Demon.

Zhao Hai couldn't help but chuckle, then he turned to Yue and said, "I didn't think that the Winged Pegasus people would be part of the Radiant Church's stories. They could even fight alongside the Divine Race." Then he pointed towards the mural.

Yue had just met with Fei'er, so he wasn't able to notice the mural. Now that Zhao Hai pointed it out, he turned his head to look at it. Then he snorted and said, "Those are just nonsense made up by the Divine Race. Those bastards, we'll never worship them."

What Yue said wasn't wrong. While the Divine Race drew the Winged Pegasus on the mural, they don't actually treat them as equals. Instead, the Divine Race wanted to assimilate them into their civilization by erasing their culture. This way, they would become the Divine Race's faithful dog.

Zhao Hai smiled faintly and said, "The Divine Race has always been like this. They also wanted to control the Ark Continent by using the Radiant Church. If it wasn't for our early discovery about their plot, the situation wouldn't have been like this."

Fei'er and the others nodded. Then after the group had sat down, a Thunder Clan member brought over some clear water. The Divine Race prohibited wines being consumed by their troops, so they didn't bring anything with them. At this point, the only thing they can provide Zhao Hai was water. Zhao Hai didn't mind it too much as he took a sip of the water before he said, "I came to visit because I want to discuss how to attack the Divine Race. I also want to listen to your thoughts."

Fei'er and the other two looked at one another, they had a gaze that Zhao Hai didn't understand. After some time, Fei'er turned his head and said, "What does mister plan to do?" Zhao Hai looked at the three

before he smiled and said, "I plan to force a battle so that the Taurus Divines would be compelled to make a move. We need to take care of the remaining Taurus Divines before we can proceed to the Divine Realm."

The three nodded their heads. They understood how this worked. Shan opened his mouth and said, "We also thought about this matter. I believe our people have already started to battle with the Divine Race. At this point, the Divine Race wouldn't be able to send more troops to deal with us. We can use this opportunity to attack the Divine Race in one swoop."

Zhao Hai nodded, "So you already thought about it, then that makes everything better. Right, since we're now allies, I won't hide things from you. As you can see, the Demons have already become part of my people. Also, in the Ark Continent's Beastman Prairie, a spatial rift to the underworld has appeared. At this point, the underworld's dark mist and undead creatures are already slowly creeping their way into the center of the continent. Moreover, on the south of the continent is another spatial rift. This rift is connected to a plane called the Atlanta Plane. The people from that plane aren't weak. Most importantly, they have 10-meter tall magic armors made out of iron. These magic armors can be controlled by the people from the Atlanta plane and are very powerful. With these two enemies, I decided to move the entire population of the Ark Continent. I need to be clear about this to you three. The situation is very bad for us. We need to eliminate the remaining Divines and set a foothold in the Divine Realm. Otherwise, we would be sandwiched between two powerful enemies."

Fei'er and the others were shocked upon hearing this. They never expected these things to be present in the Ark Continent. Especially those people with magic armors.

Suddenly, Fei'er's eyes shone, he looked at Zhao Hai and said, "Mister, are those magic armors like the ones made by the Goblins?"

Zhao Hai nodded and said, "They are. However, their magic armors are much better in comparison. If the Goblins had the same quality of magic armor, then they wouldn't have been reduced to being slaves."

Fei'er nodded. He had seen Goblin-made iron golems before. This golem was treated as a victory trophy by Thunder Yun at his home.

Actually, this trophy wasn't acquired by Thunder Yun himself. Instead, it was something passed down in their family. The Goblins were subjugated way before the Thunder Clan were discovered. When Fei'er became Thunder Yun's guard, the name 'goblin' was already synonymous with slave.

However, that iron golem actually scared Fei'er. Compared to the Thunder Clan, the body of those iron golems were much bigger. Because of this, the memory of that golem failed to escape Fei'er's mind.
