

Another World 861

Chapter 861- Golden Saint Seiya? What in the world?!

Zhao Hai didn't look at who were the Divines using the Domain Weapons. Instead, he looked at the small formation plate in the hands of the old man. The plate looked extraordinarily pure. It had a yellow metallic sheen on its body, looking very beautiful.

In just a glance, Zhao Hai knew that this plate wasn't simple. Otherwise, these Domain Weapon experts wouldn't have appeared. It was certain that they were escorting this old man. The formation plate actually had a function to hide these people.

When the old man looked at Zhao Hai, his expression couldn't help but shrink. Then the old man's left hand gently patted the bull's head. A round hole appeared on the head as the old man placed the formation plate in it. Then the round hole disappeared.

The action was very subtle. But even though the old man was quite far from Zhao Hai, Zhao Hai can still see the moves made by the old man. He also saw how the metallic bull absorbed the formation plate into itself.

After the old man settled the formation plate, he looked at Zhao Hai and said, "You're the first person who managed to cause this much damage in the Taurus Continent. That's quite the achievement. However, you cannot just trample on the pride of the Taurus Divines. You need to die!"

Zhao Hai looked at the old man and he smiled faintly, "You want to take my life? Do you really think that your ultimate weapon and domain weapons are enough to threaten me? Stop dreaming. I'll make you understand what true might is." After Zhao Hai said this, the cannons of the Hell King's ship started to aim at the Divines.

The old man calmly looked at Zhao Hai. He didn't believe that a few cannons would be able to make any damage. One couldn't blame the old man for not being well-informed. Aside from Holy Light City, Zhao Hai didn't use the cannons at any other place. At the same time, no Divine was able to escape their attacks. Therefore, the Divine Race weren't aware of how powerful these cannons really were. In the eyes of the old man, these cannons wouldn't be able to break the Domains experts.

The same was true for the Domain Weapon Experts. They were peak existences in the continent. Normal Divines were already arrogant, they were even more so.

Because of this carefree approach, they had given Zhao Hai an opportunity to deal a fatal blow. Although they saw the ship's cannons being aimed at them, nobody moved. They wanted to show Zhao Hai how dominant they were.

At this time, the ship's cannons began to let out red lights. The next thing that happened can be described as a sword puncturing paper. The Domains of the experts were broken though immediately and each of them were vaporized. With no owner present, the Domain Weapons began to fall. But before they reached the ground, they vanished, taken into the Space by Zhao Hai.

After destroying each Domain Weapon expert, Zhao Hai looked at the old man and said, "You plan on relying on those people to take my life? Continue dreaming." If this was before, the old man might not care. He would just think that Zhao Hai was being arrogant. But this time, the old man couldn't help but be terrified.

The old man can see a monster in the shape of Zhao Hai. He didn't think that 20 Domain Weapon Experts would get vaporized just like that. Even if the old man used his own weapon, he wouldn't be able to do the same. This was the first time that the old man had felt his heart shake.

Zhao Hai looked at the old man as his voice started to turn cold, "You're telling me that we're causing trouble in the Taurus Continent? Do you think that you have the right to say this? Who began this war? Who opened a spatial rift and changed the Ark Continent's laws? Who sacrificed millions of my people? It's you. You people are killers. Sooner or later, all debts shall be paid in full. Since you forced my hand, then you can only accept your fate. I actually want to thank you for giving me this many Domain Weapons and the ultimate weapon as well."

When the old man heard Zhao Hai, his expression couldn't help but change. Although he still had a pale face, he snorted at Zhao Hai and said, "Don't think that you will be able to deal with me after killing those Domain Weapon experts. I'll make you understand the power of our ultimate weapon!" The old person loudly shouted, "Transform!"

And with his words, the metallic bull suddenly turned into a yellow light, wrapping the old man's body. After the light vanished, Zhao Hai couldn't help but stare blankly at the scene.

In front of Zhao Hai was still the old man. But this time, he wasn't riding a metallic bull. Instead, his body had a beautiful golden armor complete with a helm. Upon seeing this Zhao Hai couldn't help but recall something from his memory, a Golden Saint from Saint Seiya!

The armor worn by the old man was very similar to those worn by Gold Saints. But the armor still looked more gorgeous than the ones he saw back on Earth. The originally tall old man looked even more imposing with the armor on.

The old man slowly opened his eyes as he coldly gazed at Zhao Hai. He had no expression in his eyes, he seemed just like a statue.

Upon being swept by the old man's stare, Zhao Hai recovered. Before he felt danger, Zhao Hai tapped his head and muttered, "What world is this? Why do things back in my old world keep appearing? Who can tell me what's going on?"

The old man didn't care about Zhao Hai's mutterings. He coldly stared at Zhao Hai and said, "Anyone who dares to insult the Taurus Divines shall be punished by god. You will die!"

Zhao Hai looked at the old man and then shook his head, "It's useless. Although you are indeed more dangerous now, I can also feel that the toll on your body is quite high. You simply don't have the requirements to fully utilize this armor. Now that you forced yourself, let's see how long you can stay in this form."

The old man nodded at what Zhao Hai said, "That's true. I can't hold this form for a long time. However, it's already enough to deal with you!" Then the old man rushed forward as he yelled, "Battle March!"

A weak light came out from under the old man's feet as he soared towards Zhao Hai. Zhao Hai's face changed, he can feel that this charge was quite formidable. Therefore, he didn't dare to ignore it as he whispered, "Waves!" After that, water started to spray from the ship before it turned into rough waves. They crashed together to block the incoming figure.

Boom! The rough waves collided with the incoming charge. The rough waves dispersed the speed of the old man. Before long, the flashing image showed itself. It was a translucent bull charging straight towards the ship. The bull was more than ten meters high. It had huge pair of horns that certainly had powerful impact force.

However, the property of Zhao Hai's waves was sinister. Waves unceasingly crashed on the bull, reducing its charge by a degree each collision. The bull became slower and slower while also getting smaller as it hit each wave. Finally, it vanished into thin air.

When the bull vanished, the waves returned to the Hell King's ship. Although the collision looked simple, its effects had manifested in the surroundings. Everyone was shocked upon seeing the degree of the fight. There were some undead and some Divines who were reeled in by the collision turning all of them into piles of dust and mists of blood.

The old man looked at Zhao Hai and said, "You really do have your means. But your luck has run out! Taurus Charge!" The old man wound his right arm around before punching forward. Another manifestation of a bull came out and charged towards the Hell King's ship. Although it wasn't as big as the translucent bull, one could see that it was more solid and much quicker.

Zhao Hai saw this move and immediately shrank the ship until it was only at the size of rice. At this point, Zhao Hai was standing in mid-air as he said, "Cleave!"

The ship immediately rushed forward, reaching its maximum speed in an instant as it met with the approaching bull.

The next scene can be described as a bull being stabbed by a sword. The bull immediately vanished, but the ship still kept going forward towards the old man.

The old man's face changed, then he quickly shouted, "Turning Bull!" Then he turned his body. At this time, an image of a lazy bull turning over can be seen. Although it looked very clumsy, it was actually able to affect the impact of the ship.

Once the impact had passed, the old man immediately readied his fist as he shouted, "Eat this, Rampaging Bulls!"

Then the old man continually threw one punch after another. He was using this opportunity to make a move since the ship still haven't returned to Zhao Hai.

The old man threw more than a hundred fists in an instant. Each fist forming a bull as it charged forwards. Zhao Hai seemed to not care about this as he silently said, "Hundred Cannon Salvo!"

As Zhao Hai said this, the Hell King's ship suddenly appeared beside him. The ship didn't increase its size but there were small cannons which projected red lights. The old man was quick to discover that although these lights were small, they still held their might regardless. Red and yellow lights continued to clash in the air causing quite a spectacle to those who were around.

Chapter 862 – Starting to Repel

At this moment, the old man made another move. However, this one wasn't based on punches. This time, he had his index finger out on both hands as he shouted, "Double Horn Strike!" Then he pushed his fingers directly in front of him.

Along with his movement appeared a pair of bull horns projecting towards Zhao Hai. At this time, Zhao Hai's figure moved and returned to the Hell King's ship. The ship was like a sword, going straight forward to crash into the old man.

It was at this time that Zhao hai opened his mouth and said, "Collision Formation!"

The old man had just extended his fingers, so he didn't have enough time to change his action as the ship proceeded to ram him. The old man's face changed, at this time, he thought that moving away was impossible. He crossed his two arms in front of him and waited for impact.

Unfortunately for him, when Zhao Hai hit his elbow, the old man heard a crack. His elbow along with his armor was cracked. The old man looked like he was hit by a truck as his body went rolling back. Blood also started to spurt out from the old man's mouth.

The Hell King's ship was also slowed down by this collision. The old man flew about a kilometer away just by the force of the collision. Then the man didn't come back to clash with Zhao Hai. Instead, his figure moved as he quickly disappeared from the area.

This move was completely out of Zhao Hai's expectation. After seeing the figure vanish, Zhao Hai couldn't help but shake his head. He knew that he didn't have the time to pursue the old man. Also, it was certain that the old man wasn't going at a straight line. Who knows which direction he was currently heading now.

Zhao Hai shook his head and stopped thinking about this matter. He just waved his hand as he took something from the ground. It was the elbow part of the old man's armor which was just broken off in the earlier collision.

Zhao Hai inspected the object, he discovered that the elbow thorn was silver white. It was very beautiful and at the same time, sharp.

Zhao Hai waved his hand and threw this elbow thorn into the Space. Then he turned his head from the old man to the city. He wanted to see how the attack had gone.

The people in the city were also paying attention to the battle. Now that Zhao Hai had defeated the old man, the Divines in the city were immediately sent into panic. There were those who tried to resist while some tried to escape. At the same time, Fei'er and the others had become more confident in their attack. Before long, the city was pacified. According to their previous arrangement, those who were captured were immediately thrown to the Space...

After Zhao Hai completed all of these, Thunder Clan Wushuang's group as well as the Beastman Race's Bingya's group arrived on the Hell King's ship. They had just witnessed the fight and they knew that the old person just used the Taurus Continent's ultimate weapon. Upon seeing Zhao Hai defeat the old man, they couldn't help but get startled.

Because of this, when the group arrived on the ship, their gazes towards Zhao Hai had become different. Zhao Hai looked at their expressions and smiled, "What's wrong? Everyone shouldn't be surprised. If we really think about it, it would be difficult for me to deal with that weapon. But since the old man didn't have the proper requirements to use the armor, he could only get injured and retreat."

Wushuang and the others weren't fools. Naturally, they knew that Zhao Hai was just being modest. However, none of them said anything, they just went on and reported the casualties of the fight.

Zhao Hai looked at the group and said, "Currently speaking, we are making good progress. But since that old man managed to flee, I think troubles will start to come. That armor was the Taurus Continent's ultimate weapon. Now that they were aware that the ultimate weapon can't deal with me, they will certainly ask for reinforcements. Elder Wushuang, Elder, Jiang, Speaker Fang, I hope that you can send a message to your clans requesting to allocate more power to keeping watch over the seas. I'm almost certain that the Taurus Continent would ask for help from the other Divines."

The three nodded. They had also thought about this point. The Taurus Continent's ultimate weapon was the Taurus Divines' last refuge. Now that the weapon had lost, they can only wait for death unless they ask for help. The Taurus Divines aren't braindead, they will certainly do something.

Zhao Hai turned to look at Wolf Tribe Bingya's group and said, "Please tell your patriarchs to prepare. Your time to move might arrive."

Bingya and the others stood up and gave a respectful salute. At this point they were afraid of Zhao Hai. They were still clueless about Zhao Hai's other abilities.

After following Zhao Hai for several days, they had come to understand the various cards in Zhao Hai's hands. There were the magic cannons, the crystals, the undead, the ship, all of them made Zhao Hai a capable person.

But today, Zhao Hai made them understood how terrifying he really was. They also had their own ultimate weapons in their respective clans. They took advantage of these weapons to defend their own continents.

However, Zhao Hai seemed to be able to take care of two or three ultimate weapons at once judging by how he dealt with the old man. At this point, they wouldn't dare act arrogant in front of Zhao Hai.

After seeing that the group had agreed to his arrangements, Zhao Hai nodded and said, "Alright, then everyone needs to prepare. In the next few days, we will hasten our advance. We need to get enough territory before the reinforcements arrive."

The group gave a small bow before they turned around to leave. Whether it be Wushuang or Bingya's group, all of them had already regarded Zhao Hai as the alliance leader. Therefore, they would certainly listen to his words.

After arranging these matters, Zhao Hai returned to the Space. After seeing Zhao Hai arrive, Laura and the others immediately came to greet him. Then Laura said, "Brother Hai, how is it? Are you alright?"

Zhao Hai smiled and said, "I'm fine. But the ultimate weapon is actually quite powerful. Although I didn't use the full strength of the ship, being able to block its attack is already very good."

Laura nodded and said, "Right. I didn't think that the ultimate weapon would be a full body armor. But Brother Hai, if the other continents collectively use their ultimate weapons against you, how will you deal with it?" Zhao Hai smiled faintly and said, "Don't worry, there won't be any problems. I can easily deal with all of them. However, at best, I don't want to use the ship's full strength. I had just discovered that the laws of this plane had started to reject me."

Laura and the others stared, they looked puzzled at what Zhao Hai said as they asked, "Really? How does it feel?"

Zhao Hai smiled bitterly and answered, "It's like going to a place where everyone is hostile to you and wants you gone. Moreover, everyone is very strong, you won't be able to resist if they throw you out. Because of this, I don't dare use the ship's complete strength."

Laura and the others nodded, but they didn't know what to say next. Zhao Hai looked at them and said, "It's fine, don't worry about it too much. I won't be leaving this plane soon. Although the plane had started to repel me, it hasn't reached to a point where I get thrown out. To be honest, if not because of Fei'er and the others as well as the Atlanta Continent, I would've opted to leave this plane. With my current strength, nothing in the Divine Realm is of use to me anymore. I'm also quite curious about why Lu Wei decided to suppress the Goblins while the Atlanta Plane went completely fine. After all, the next place where we'll be heading towards is the Immortal Cultivator Realm. There, we would face Lu Wei with his real strength. Because of this, I want to gain as much advantage as possible so even if we do ascend we still have some life-saving measures in place."

Laura and the others nodded. They didn't know about Lu Wei's true strength, but they knew that he was certainly more powerful than his incarnations. Moreover, Lu Wei was an elder in his sect. It's possible that the sect had plenty of elders like him. And it was also certain that people more powerful than him existed. If this was the case, then they would face an overpowering enemy once they arrive at the Immortal Cultivation Realm.

Upon facing such an enemy, one should get all the advantages he can to maintain his life. Everything that can save them was good. Because of this, Laura and the others agreed to Zhao Hai's plan.

To be honest, Laura and the others didn't care too much for the Thunder Clan, Barbarians, and the Winged Pegasus. For them, as long as the Ark Continent was safe and the Demons who submitted to Zhao Hai was safe, then that's enough. Those three races mentioned before were just Zhao Hai's allies, there was definitely no need to care about them for now.

However, Laura and the others were also the same as Zhao Hai; they were quite curious about the Atlanta Plane's magic armors as well. Items allowing someone to have God-rank strength was always good.

If they can improve these magic armors and find a way to mass-produce them, then their fighting strength would certainly soar.

Most importantly, Laura and the other would like to obtain the various ultimate weapons in the Divine Realm. Compared to the magic armors, these ultimate weapons were more formidable. If they can obtain these weapons, then their strength would naturally increase. When the time comes, they would no longer worry about the problems they were facing.

Chapter 863 – The Final Battle

The war kept going on. And just like Zhao Hai said, they sped up their attack on the Taurus Divines. At this point, Zhao Hai has no shortage of troops. He had already sent the first batch of Devil Legion soldiers to the hell background to train. The undead in Zhao Hai's hands had already exceeded 100 million.

Zhao Hai's undead numbers has also been increasing every day, and all of these undead were God-ranks. Once could say that Zhao Hai's current military strength can hold up against another continent in the Divine Realm.

Most importantly, Zhao Hai had more than 20 Domain Weapons. Having such a quantity made one formidable in the Divine Realm.

At this time, besides asking for help, the Taurus Divines couldn't do anything else to deal with Zhao Hai. The Taurus Divines truly had their backs against the wall.

With the increase of Zhao Hai's undead, his speed in attacking the cities of the continent shot up. Zhao Hai selected his strongest undead and gave them Domain Weapons, sending each of them to attack the other cities in the vicinity.

Five days after Zhao Hai's fight against the old man, news came from the Barbarians. They discovered a team of Taurus Divines heading towards the Capricorn continent. It seems like they were going to ask for reinforcements. This team wasn't big, about 10 thousand Divines or so. However, among them was

an old man riding a metallic bull as well as two domain weapon experts. They rest were elite Taurus Divine cavalry.

After seeing this composition, the Barbarians didn't dare to block them. When Jiang and the others heard this part, they were relieved. If they decided to block this team, then they would definitely be slaughtered.

Once Zhao Hai heard that the old man went out of the continent, he immediately had the Barbarians and the other two mount a full attack on the Taurus Continent.

In order to deal with their fear of being defeated by a Domain Weapon expert, Zhao Hai gave each clan three undead domain weapon experts.

But what Barbarian Jiang and others didn't know was that these undead had a piece of token on their bodies. These tokens were fragments of the blood ghost staff and can be used to monitor things around them.

With the three clans joining in, in addition to the large number of Domain Weapons, Zhao Hai and the others had gained the winning side in the war. At this time, the Taurus Divines had given up on defending small cities. Instead, their armies were centralized on its big cities. Only commoners were left behind.

However, before Zhao Hai and the others came at ease, the Taurus Divines suddenly gave the commoners a decree. As long as a commoner was able to kill Zhao Hai or his undead and escape, then they will be rewarded by the Royal Family and even have them become a member of the noble class.

For ordinary Divines, this was an extremely attractive offer. In the Divine Realm, every commoner's dream was to become a noble.

This was because if one was a Noble, then it was possible that they would lord over a plane in the near future. But in the past, bestowment of noble titles had been severely restricted. This ended with the nobles in the Taurus Continent to be small in size.

But now that they suffered losses against Zhao Hai and was inching towards destruction, the Taurus Continent issued this decree. This caused the commoners to leave the cities and begin doing guerilla warfare.

This tactic had impacts on Zhao Hai's group, especially to the three clans. They were always worried that they would be attacked by the Divine Race.

Although Zhao Hai was affected as well, it's impact wasn't too big. After all, he has the Space. Those people who would ambush them would be spotted by the Space first. Because of this, Zhao Hai wasn't too worried.

However, this matter still angered Zhao Hai. The three clans began to have casualties. This made them hesitate in moving forward, affecting Zhao Hai's plan in a major way.

Zhao Hai wanted to deal with the Taurus Divines before the reinforcements arrive. With this, they would have more of a strategic edge in defending. But the decree made their advance slow down. When the time comes, he would become more passive when the support arrives.

Moreover, the situation had aggravated. In the past, as long as Zhao Hai dealt with the garrison troops and the rebelling commoners, the other Divines would stop their struggle. It was at this time that they encountered something new. Since there were no defenders in the city, the Divines seemed to behave. But when Zhao Hai sent the undead to throw them into the Space, he discovered that some undead went missing. Upon counting, Zhao Hai discovered that he had lost more here than in the siege. This made Zhao Hai furious.

Once Zhao Hai became angry, the consequences became serious. Zhao Hai, who couldn't bear to kill, suddenly gave an order. If more than 100 undead became missing in the city, then he would completely wipe the city's population. This order was spread out. Before they start their attack, he would tell the Divines to refrain from resisting. Or else everyone will be killed!

In the beginning, the Divines didn't believe this order. However, when more than 1000 undead disappeared from a medium grade city of over 1 million people, Zhao Hai ordered the extermination of every Divine inside. More than 1 million people were killed, no living witness remained.

Besides killing everyone, Zhao Hai also used the Hell King's ship to erase the city from the map. And just like that, a medium grade city that can house more than 1 million people had disappeared.

The Taurus Continent was very big. And although people were doing guerilla tactics against Zhao Hai, they would still need supplies to survive. Because of this, they became aware of Zhao Hai's attacks on their cities. When the news of Zhao Hai's elimination of an entire city had spread out, every Divine became angry. But at the same time, they were terrified, they knew they had no way to resist, Zhao Hai was too strong.

There were some benefits in Zhao Hai's actions. There were small cities in the continent who didn't resist and just had the undead take them to the Space.

For those who didn't resist, Zhao Hai gave them some rewards. He returned some of their living materials so that they could live a better life inside the Space.

Although more and more Taurus Divines had entered the Space, their rebellious attitude had gotten milder and milder. The Divines who came in earlier had destroyed a large chunk of land, but they quickly came to know that those things were useful to them. If they don't want to starve, then they would have to behave.

Zhao Hai didn't force them to do anything either. As long as they don't cause any trouble, then Zhao Hai wouldn't care much about them.

The Divines also discovered that although the Space couldn't compare to their life in the Divine Realm, there were still some positives. Back in the Taurus Continent, whatever they do would get taxed. Whether they farmed, bred, or hunted, the nobles would still get a share. But inside the Space, they didn't need to pay any taxes.

In order to further pacify the Divines, Zhao Hai treated them like what he did with the Goblins. He also erected churches, allowing the Divines to trade for goods while inside the Space.

Zhao Hai's thunderous method pacified the small cities. At the same time the guerilla armies had started to discover that no city was able to supply them anymore. Every supply available was gone. If they continued to do their guerilla warfare, then they would need to forage for food themselves.

The Taurus Continent was huge and there weren't any shortages on magic beasts. This might be good for the guerilla armies, but soon they had found out that they lack salt. Salt cannot be produced anywhere in the continent. Guerilla armies would need the cities to provide them with salt.

Now that Zhao Hai took all the small cities into the Space, not only salt, but grain and other commodities had vanished from the continent.

Lack of salt(sodium) in their bodies would make people ill. In this case, the guerilla armies had no other choice but concentrate on the cities that Zhao Hai had yet to take. This caused the supply problem to increase in each city. Soon, the Divines would need to fight a decisive battle against Zhao Hai.

It was at this time that Zhao Hai discovered that these Divines have become weak after being starved of salt. There was no need to fight them, they couldn't even resist being captured.

The decree given by the Taurus Royal Family did create some troubles for Zhao Hai. However, the Divines were soon to discover that they had no way to cause any major problem for Zhao Hai. Instead, they only gave Zhao Hai more people to take away. Their plan had completely failed.

The Taurus Divines had truly reached a dead end. They found that Zhao Hai's speed had gotten much faster. The Taurus Divines expected Zhao Hai to take about several months to a year to deal with every city. As long as the Taurus Divines hold on for four to five months, the support from other continents would surely arrive.

However, they discovered their mistake. According to Zhao Hai's present speed, it would only take less than one month before he arrives at Divine Will City. When that time comes, everything would be over.

After looking at Zhao Hai's daily progress, the Taurus Royal Family decided to make a move. They secretly had some of their juniors pack up and seek asylum from the other continents. Those who remained would hold Zhao Hai back.

Zhao Hai was aware about those who escaped, but he didn't stop them. He still kept his speed as he advanced. As the resistance got weaker and weaker, his advance also got faster and faster.

A month after Zhao Hai knew that the old man had left the Taurus Continent, they had already killed their way towards the Taurus Continent's Divine Will City. This was the biggest city in the Taurus Continent with a capacity that surpassed 60 million. But at this time, all 60 million people present in the city were all Divine Race soldiers. All the commoners have been moved to smaller cities. Naturally, those commoners were already inside Zhao Hai's space. At this time, the only remaining city under the control of the Taurus Divines was Divine Will City.

The city was reinforced, its magic shield had already been erected. Magic cannons filled the walls, and the soldiers had expressions saying that they were ready to die.

Zhao Hai stood on top of the Hell King's ship as he looked at Divine Will City. Standing on his side were the Great Demon King, the Demon Dragon King, the Barbarian Race's Patriarch and Great Elder, the Pegasus Race's Patriarch and Speaker, the Thunder Clan's Patriarch and Great Elder, Wolf Tribe's Bingya, Dwarf Race's Ryder, and Elven Race's Yehta.

Ten days ago, Zhao Hai had already convened with the Barbarians, Thunder Clan, and the Winged Pegasus. They used these ten days to completely conquer the Taurus Continent, the only place left to conquer was Divine Will City.

The Patriarchs of the three clans provided great support to the war. With Zhao Hai's strength, they had already found themselves blindly following his instructions.

While looking at Divine Will City, the eyes of these people couldn't help but shine. They had been conquered by the Divines, so they didn't expect that they would be able to see this day. Who would've thought that they would surround the Taurus Continent's largest city.

The Great Demon King and Demon Dragon King were also moved. After fighting the Divines, they became aware of how strong the Divine Race really was. If not for Zhao Hai, then the Divine Race would surely take the Demon Realm after conquering the Ark Continent. They would reach a situation that was the same as right now, their capital would get surrounded by soldiers as they made their last stand.

But the ones who were moved the most were Bingya and the others. The Foreign Races had battled with the Divine Race for tens of thousands of years. And all those years they had been at a disadvantage. If it weren't for the Divine Race not being united, and the fact that they managed to get their hands on ultimate weapons, then they would've been reduced to the same state as the Goblins.

For many years, the Divine Race had always attacked the continents held by the Foreign Races. The Foreign Races were always on the side of defense, they had no ability to retaliate. In the current time, dealing with an entire continent was more difficult than it seemed. Seeing Zhao Hai able to do it this easily really made them feel flustered. They didn't know what to say.

Chapter 864 – A Bloody Battle

Zhao Hai looked at the battle-ready Divine Will City. To be honest, he had come to admire the Divines. Not giving up until this point wasn't easy.

But although Zhao Hai held admiration towards them, they were still his enemy. Naturally, he wouldn't hold back.

Zhao Hai urged the Hell King's ship to slowly head near Divine Will City. After he reached some distance away, he stopped then said, "Divine Will City, I want to talk with your leader." The Taurus Divines in the city were preparing for an intense battle. Nobody thought that Zhao Hai would actually have words to say. Nobody responded for a while but after some time, an old sounding voice was heard, "Taurus Divine Patriarch, Maurice, has seen Mister Zhao Hai." Along with his words was a Domain Weapon slowly rising from the city. It was a sword-shaped Domain Weapon. Standing on top of it was a magnificently armored man. His hair and beard were both white and his bearing was astonishing. Although his Domain Weapon couldn't compare to the Hell King's ship, his imposing presence was no less than Zhao Hai.

It was quite like Zhao Hai. If there was no war, then this person might not have been quite notable.

Zhao Hai looked at Maurice before he gave a slight bow and said, "Patriarch Maurice, hello. I want to talk about the current situation. With how things are right now, the Taurus Divines can do nothing, there's no use for defending your city. I want to ask Patriarch Maurice to think about surrendering. I can personally guarantee your safety and I will not treat you as slaves."

Maurice was looking at Zhao Hai with eyes full of hatred. After hearing Zhao Hai's words, he laughed and said, "Zhao Hai, don't think that you've won. The Taurus Divines will not fall. One day, you will all die!" Zhao Hai looked at the maddened Maurice and frowned. It seems like his appeal was a failure. The hatred on Maurice's eyes could be clearly seen. At this point, it was impossible for there to be a peaceful ending to the Taurus Continent's war.

Zhao Hai took a deep breath and said, "Patriarch Maurice really made this Zhao Hai speechless. The result of the war has been decided by you, I hope you're ready to shoulder the consequences. Please head back, we will be attacking soon."

Maurice looked at Zhao Hai for a moment before he snorted and returned to the city. At this time, the Thunder Clan Patriarch standing behind Zhao Hai said, "Mister, you're wasting your time on Maurice. That person is a complete lunatic. He will never recognize defeat, his arrogance is basically bordering craziness." Zhao Hai smiled bitterly and said, "The war has taken too many lives, I don't want to add more. It's a pity that peaceful means are impossible. We can only fight. Let's go according to our previous tactic. I will break their shield and use the undead as the vanguard." Then the group nodded.

Zhao Hai didn't delay. After negotiations have failed, there was nothing else to do but fight. Zhao Hai commanded the ship to rush forward. The Divines in the city were prepared for this, but they still underestimated the speed of the ship. It was too fast that it almost instantly appeared outside the city when it was just quite a distance away a moment ago. Before the Divines could react, the ship had already rammed itself into Divine Will City's shield.

Because of the ship's speed, there was no time to reinforce the shields. After getting rammed, the shield immediately broke.

Zhao Hai naturally wouldn't let go of this opportunity. The cannons of the ship immediately attacked as large quantities of undead appeared in the city.

Although the Divines had met this attack many times, they still couldn't grasp a counter to Zhao Hai's attack.

However, Divine Will City wasn't this easy to deal with. Although it's shield has been broken, had received the Hell King's ship's cannon attack, and was overrun by undead, the sheer number of soldiers inside the city was a problem. Tens of millions of soldiers crowded the city for the decisive battle. This allowed them to block Zhao Hai's surprise attack. While the Divines were battling it out with the undead, the Divines on the walls proceeded to fire their cannons towards the various armies outside the city.

Zhao Hai was aware of this situation, but he wasn't worried. The number of undead in his hands right now was more than the soldiers inside Divine Will City. Therefore, there was no need to be afraid. He didn't stop releasing undead as he gained more and more ground inside the city.

The battle immediately became heated at the very beginning. Those left in Divine Will City were people very loyal to the Taurus Royal Family. And with the Patriarch personally taking command, these people

were already resolved to die in battle. This caused the casualties from the attacking allied army to also mount up.

The first minute of battle already caused deaths on both sides. The Divines used their entire flesh and blood in resisting the attackers. Zhao Hai couldn't deny the fact that these Divines were truly brave and fearless. However, these people were his enemies, they didn't merit Zhao Hai's mercy.

The fight went on. This was the most bloody battle that Zhao Hai had experienced. Everyone involved seem to go mad. Their eyes were blood red as their bodies were covered with blood. The weapons in their hands swung endlessly. One would either kill the enemy or be hacked to death.

There were only a few participants in this battle who managed to keep a calm mind. The undead were already emotionless. The only thing they existed for at this time was to kill.

The situation had devolved into a complete brawl. Even Zhao Hai knew that using magic cannons at this time was impossible unless he would risk killing people on his own side.

But Zhao Hai didn't worry. Although there were more than 20 Domain Weapons on the enemy side, he also had the same number in his hands. Domain Weapon experts on both sides were evenly matched.

Zhao Hai didn't participate in the battle, at the same time, no Divine went for him. They knew that it would be impossible to kill Zhao Hai. The Divines were also aware that they would lose, they were just making their final struggle.

Time passed, one hour, two hours, three hours... One day, two days, the war was still going on. Three days had passed and the battle still going. Atkept this time, the entire Divine Will City was turned into a pool of black, brown, and red liquid. The fighting strength of those present were already affected after three days of zero nourishment. However, nobody stopped from waving their swords at their enemies.

Finally, when the curtains of the night descended, the last enemy was killed, formally ending the resistance of the Taurus Divines.

At this time, the combatants immediately fell to the ground; only the undead were left standing. Zhao Hai was still looking at Divine Will City on top of the Hell King's Ship. No Divine surrendered in this fight,

nobody escaped, they fought until the last soldier. However, this didn't have an impact on Zhao Hai. War is war, no matter how tragic it was, war would need to go on.

Zhao Hai waved his hand to take all the Divine corpses inside the city. Then he waved once more as a huge ball of water appeared on top of the city. This ball drizzled water on the city, washing away all the filth.

Divine Will City had been completely destroyed. Hardly any building was left untouched. There were weapons strewn everywhere along with some cut limbs.

Soldiers lying down felt the rain falling. The rain was warm, reminding them of a hot bath. The rain was very comfortable. As they were lying there, they felt their strength slowly returning. Their sore limbs started to recover as well.

They couldn't help but open their eyes and look at the huge ball of water up in the sky. The ball was not far from the Hell King's ship. At this moment, the sun was proceeding to go down in the west, dying the ball in golden yellow hue. The originally golden Hell King's ship had its color further enhanced, looking incomparably holy in their eyes.

The scene made the exhausted soldiers lie down for much longer. They don't want to move as they just looked at the Hell King's ship, a bit of reverence appeared in their eyes.

Zhao Hai looked into the state of Divine Will City. The ball of water was taken out of the hot spring. The water was initially hot, but as it drizzled into the city it began to cool down. After the droplets reached the ground, it had already reached a temperature that was comfortable for those lying down.

The bloodstains of the city began to be washed away. Although the city was critically destroyed, its sewage system was kept intact. Because of this, the water began to flow out of the city, cleaning it bit by bit.

The water not only bathed the soldiers, it healed their wounds as well. There were various soldiers in Divine Will City who noticed their wounds closing up.

After seeing that there were no bloodstains left in the city, Zhao Hai stopped the rain. At this time, several shadows began to fly towards the Hell King's ship. There was no need for Zhao Hai to look to see that it was the Great Demon King and the others.

The fight involved more than 200 million people. The Taurus Divines had more than 60 million troops while the alliance army had more than 140 million troops altogether...

The Taurus Divines were completely wiped out, nobody surrendered. On Zhao Hai's side, Zhao Hai lost more than 20 million undead. The Thunder Clan lost 5 million, the Pegasus Clan lost 7 million and the Barbarians lost about 14 million. Since only the Great Demon King and the Demon Dragon King participated, the Demons lost nobody. As for the team of Foreign God-ranks, the originally 1000 people were reduced to less than a hundred.

Chapter 865 – Not Short On Money

This was a big victory. They had finally destroyed the Taurus Divines. The three clans had already gained their freedom. From this point on, nobody would ride on their heads and command them.

However, this was also a hard victory. The losses on the three clans wasn't small. Because of this, even if they had won, the faces of the Thunder Clan and the others weren't smiling. At the same time, they also knew that a more brutal fight was waiting for them later on.

The group stood quietly as Zhao Hai gazed at the setting sun on the horizon. He was appreciating the sunset. Nobody talked for some time.

Moments later, Zhao Hai said, "I didn't think the fight would be this bloody. The losses on your clans have been quite serious. You need to take a rest and regain your strength. However, I don't expect the Divines to give us some time. I believe that soon, the armies from the other continents would arrive." Upon hearing this, the expressions of those present became heavier. They knew that what Zhao Hai said was right. It had already been a month after the Taurus Divines had sent for reinforcement. Although they were yet to arrive, everyone knew that it was only a matter of time. The Taurus Divines just underestimated Zhao Hai's speed, thus explaining why they had yet to return.

However, once they do come back, there would be an army behind them. At that time, the situation would be more severe.

The Thunder Clan Patriarch sighed and said, "I still underestimated the strength of the Divines. I thought that their blunder in the Ark Continent would affect their strength. The war was too bloody. Our victory is too tragic."

The others nodded. Although the Thunder Clan had the least losses in the battle, their population wasn't a lot to begin with. Once one looked at the impact of the casualties, the Thunder Clan had suffered the most.

Zhao Hai sighed and said, "Does anybody have a plan? The Taurus Divines are now gone, but the other Divines will surely come. I can handle ultimate weapons, but I'm not sure about the rest of you. Our future casualties might be bigger than it is now." The Patriarchs held heavy expressions. They did defeat the Taurus Divines, but this only gave them even more powerful enemies. If they don't handle this well, then they would be in danger of being destroyed.

It was at this time that Wolf Tribe Bingya suddenly said, "Mister, I have an idea. But I don't know if it would work." Zhao Hai turned to Bingya and said, "Oh? Then please tell us."

Bingya looked at the group, everyone's focus was already on him, then he said, "Mister, there are other clans who had been enslaved by the Divine Race. We have connections to those people and we're quite certain that they're also not satisfied with being ruled by the Divine Race. We can spread our victory in the Taurus Continent and maybe it would incite other people to rebel. This way, the pressure that we will face would be smaller."

Zhao Hai stared for a moment before thinking into it, then he said, "That is a very good idea. But how about the other clans conquered by the Foreign Races? If we use our victory as a tool, then they might also rebel." Bingya forced a smile and said, "Mister doesn't know this, but the Foreign Races don't conquer planes. First, one would need a method to break the plane's barrier. However, this method was bestowed by the Divine Race's Deity. It is a closely kept secret by the Divine Race. Because of this, there is no way for the Foreign Races to conquer another race."

Zhao Hai nodded, then he turned to Bingya and said, "That's good. Then please report our current situation to your family and see if they can contact those races. Things have already happened so there's no need for us to hide. Talk to those races and see if they would want to rise up against the Divines. Then we'll cooperate."

Bingya nodded, it's good as long as Zhao Hai agrees. In fact, the Foreign Races had been thinking of ways to deal with the Divines. The Divine Race's conquests on every smaller plane can indeed increase their strength. However, this also came with hidden dangers.

After the Divines conquer a race, then they would force those people to change their faith. This might not be a big deal back on Earth. But for the people here, their faith was more important than their lives. The Divines changing their faith would naturally plant a seed of hatred deep inside those people's hearts.

The Foreign God-ranks had no such fears since they haven't conquered other races. However, this caused them to be at a disadvantage because the Divines could force those who they conquered to fight for them while the Foreign God-ranks can only fend for themselves.

In order to change this situation, the Foreign God-ranks had found a solution. They secretly sent letters to those who were enslaved by the Divine Race to see how satisfied they were with the Divine Race. If these people hated the Divines, then the Foreign God-ranks wouldn't attack them once the war starts. Naturally, those races chose to agree.

The Foreign God-ranks have been in contact with those races for some time, this explained why Bingya suggested this action. After seeing Zhao Hai's combat prowess and knowing that he was an enemy to the Divines, then there was no reason for him to hide this matter.

Zhao Hai looked at the Thunder Clan Patriarch and the others and said, "The Taurus Divines has been destroyed. Now, the entire Taurus Continent belongs to us. The other Taurus Divines have also been taken away by me. However, I don't want too many troops stationed in the continent. I'll be using the tactic I've used in the Buddha Empire to deal with the incoming Divines."

Fei'er and the others had experienced this firsthand, so they knew what Zhao Hai meant. To be honest, they were still left with no solution with this tactic, causing them to suffer some losses.

The Thunder Clan Patriarch and the others also understood what Zhao Hai meant. Fei'er and the others had already reported what happened back in the Ark Continent. However, since they hadn't seen it in action, they still held some doubts.

Zhao Hai looked at the group and said, "You guys need a proper rest. How about this, you should withdraw your army and return to your own planes. Leave the Divines to me. Mister Bingya, when you send word to your people, tell them that there are still reinforcements coming to attack us. However, tell them to refrain from acting early. The other Divines are still cautious of us. We'll weaken them first before you make your move. It won't be too late at that time."

Bingya couldn't help but stare, he didn't know where Zhao Hai's self confidence came from. However, he believed that Zhao Hai must have some basis for this. Therefore, he didn't argue and just nodded and said, "Alright, this won't be a problem. But sir, do we continue with our plan to contact the other races conquered by the Divine Race?"

Zhao Hai smiled and said, "Naturally... Moreover, we need to do it as soon as possible. Tell them that if the Divines tell them to send some troops, then those troops shouldn't try too hard in battles. If they do, then this Zhao Hai would have to be impolite."

Bingya nodded. If this was before, then he might not have believed Zhao Hai's words. But after seeing Zhao Hai's strength, Bingya knew that Zhao Hai wasn't joking. Then Zhao Hai turned to the others and said, "If you need anything, don't hesitate to tell me. I can definitely provide you with what you need."

The reason Zhao Hai had such huge confidence was because he wasn't lacking in money at this time. The gold in the Demon Realm were very easy to mine. Currently, the amount of gold in Zhao Hai's hands had exceeded his previous amount. Additionally, the 20 ordinary and 10 magic backgrounds have already been bought. With the addition of the other backgrounds, there was no shortage in supplies.

No matter what the Thunder Clan and the others needed, the processing machine can just make them. This caused Zhao Hai to dare say such things.

The Thunder Clan Patriarch and the others expressed their gratitude to Zhao Hai before taking their leave. The war left their clans with too many things to process. It was impossible for them to be with Zhao Hai for long. On the other hand, Bingya and the others stayed. Naturally, Bingya would have other subordinates process their action while he and the others stay and observe Zhao Hai. This was also for their people, they need to know how strong Zhao Hai was. Therefore, they would have to stay.

After seeing the group leave, Zhao Hai turned to the Great Demon King and the Demon Dragon King and said, "Your Majesty, Demon Dragon, you've been outside for some time, your people need to see you. I won't be keeping you here for long"

The Great Demon King and Demon Dragon King observed Zhao Hai's expression and knew that Zhao Hai had something to tell them and he didn't want Bingya and the others to know. Because of this, the two didn't say anything and just nodded, allowing Zhao Hai to send them back to the Space.

This wasn't the first time that Bingya and the others had seen the Great Demon King and the Demon Dragon King entering the Space. However, they didn't know that instead of the Demon Realm, the two were sent to the Demon Space. They were thinking that since Zhao Hai had a powerful Space Divergent Ability, he could send the Great Demon King and Demon Dragon King back to the Demon Realm at any time.

To be honest, Zhao Hai was thinking of seizing this opportunity to make an offer to the Thunder Clan and the others. He would tell them about the Space and offer them their own background. But after Bingya told them about the other races, Zhao Hai knew that it was impossible. Everyone hated leaving their homeland. And now that there was hope of surviving, it was impossible for the Thunder Clan and the others to enter the Space. Therefore, Zhao Hai stopped himself from making a move.

Chapter 866 – Devil Legion's Mount

After the Great Demon King and the Demon Dragon King had left, Zhao Hai turned to Bingya and the others and said, "Everyone, I'll be taking my rest as well. I hope you can fulfill the thing I've asked you."

Bingya and the others bowed and said, "Mister can rest assured, we won't disappoint you." Zhao Hai nodded before he turned around and entered the cabin.

After seeing Zhao Hai leave, Bingya and the others also entered their cabins. Their rooms weren't as good as Zhao Hai's but it was still very nice.

Bingya entered his room. However, he didn't immediately close it. Instead, he invited Ryder and Yehta over for some talks.

The Demons were very satisfied with their current state. The Royal Palace had been completed as their first building. At this time, Devil Legion soldiers were standing outside the castle. However, there were large quantities of Demons coming and looking at them.

The Devil Legion soldiers still had their indifferent posture, however, the death qi that was emitting out from them had vanished. Although people could still feel it, they weren't as scared as before. This made

the Demons puzzled. The Devil Legion used to be the most powerful unit of the Demon Race, they were essentially symbols of invincibility. What happened? Had the Devil Legion been weakened? This confused a lot of Demons.

The Great Demon King and the Demon Dragon King were also quite surprised after seeing these 100 thousand Devil Legion soldiers. They might look like ordinary Demons now, but the two of them understood that these Devil Legion soldiers had become more formidable than before.

In the past, having the Devil Legion felt like holding a double-edged sword. Anyone who saw them would immediately know that they were dangerous.

Now, although they weren't as terrifying as before, the Great Demon King and the Demon Dragon King knew that these Devil Legion soldiers were at their most fearsome state, they had become sheathed blades. Everyone knew that a concealed weapon was more dangerous than an unsheathed sword. Hidden dangers were more scary in the battlefield.

At this moment, Zhao Hai entered the Space. After seeing Zhao Hai arrive, the Great Demon King and Demon Dragon King immediately went to meet him. After the three exchanged greetings, Zhao Hai looked at the Devil Legion soldiers and nodded, "Good, good. They look much better now. Right, it seems like it's time to give them a mount."

The Devil Legion was still primarily an infantry unit. In the past, because of necessity, they were given mounts by Zhao Hai. However, those mounts weren't a match for them. But this time was different. Now, Zhao Hai managed to deal with the Taurus Continent while the Space had been upgraded by a few levels. At the same time, God-ranked magic beasts were beginning to be produced. A lot of these magic beasts can be used as mounts. The ones Zhao Hai prepared for the Devil Legion was actually being bred in the hell background.

Magic beasts that grew on other places might be strong, however, they were extremely wild and was hard to control. Giving such magic beasts to the Devil Legion would surely hinder their performance. Therefore, Zhao Hai specifically bred a lot of magic beasts in the hell background for the Devil Legion to use.

These magic beasts lived inside the hell background while the Devil Legion trained there. The purpose of this wasn't only to train the Devil Legion. It was also to train the magic beasts. Once Zhao Hai equipped the Devil Legion with those magic beasts, their overall might would become stronger.

As for their wild nature, Zhao Hai wasn't afraid at all. The magic beasts weren't as intelligent as the Devil Legion. Zhao Hai can even order the magic beasts to kill themselves, much less having them be mounts for the Demons.

The Great Demon King wasn't aware of any of these. He looked at Zhao Hai blankly before he said, "Can Mister find a suitable magic beast for them?" Zhao Hai smiled faintly and said, "That's not a problem." Then he released 100 thousand magic beasts. These magic beasts were black and were in the shape of horses. These horses had horns on their heads, but they had no hair, instead, they had thick leather armors. Their four hooves were on fire, the same was true for their tails, the tails looked like flaming whips as the horses moved.

These magic beasts were something that was produced by the Space, they're called Nightmares. One shouldn't underestimate them for being horses, they're very ferocious beasts. Moreover, they eat meat and were essentially fire-type demons. With their God-rank strength, they were very frightening to behold.

Nightmares were also present in the Demon Realm. However, they weren't so strong, at most they would reach 9th rank. These Nightmares had hairs on their bodies and didn't look like fire-element beasts. At most, they had red hair, red tails and red hooves. Nightmares like what Zhao Hai released were unseen before.

Zhao Hai turned his head towards the Devil Legion and said, "Take them, they'll be your mounts." The Devil Legion soldiers nodded before they went and took a Nightmare for themselves.

However, matching weapons for the Devil Legion had yet to be found. At this time, they were currently equipped with full body armor, a spear, a sword, and some javelins.

These things were still quite good for the Devil Legion, however, Zhao Hai wasn't satisfied. It's a pity that he can't make other weapons right now, they would need to wait for an opportunity later on.

After the Devil Legion took their Nightmares, Zhao Hai turned to the Great Demon King and said, "Your Majesty, you can arrange another batch of people to enter the Hell Space. As for the defenses in the spatial rift, let my undead take care of it. Have the rest of the Devil Legion take a rest inside the Space."

The Great Demon King nodded as he left to take care of it. Demon Dragon remained by Zhao Hai as he said, "Mister, did the matter with Bingya and the others go bad? Or should we just leave them alone."

Zhao Hai shook his head and smiled, "Don't worry much about it. Besides, we still have another battle to fight. In the past month, the underworld's dark mist had already drifted towards the Aksu Empire. Moreover, in one month, the people from the Atlanta Plane will bring their magic armors to the Ark Continent. Hehe, I want to see their expressions once they see the state of the Ark Continent."

When he heard this, the Demon Dragon King couldn't help but smile. The people from the Atlanta Plane wanted to attack the Ark Continent for resources and manpower. However, the Ark Continent has been completely turned to ruins. The various minerals of the continent had already been taken by Zhao Hai. Resources that remained were practically useless. At the same time, the population of the Ark Continent was gone. The people from the Atlanta Plane would surely lose greatly in this expedition.

Zhao Hai turned his head to Demon Dragon and said, "I don't want to use the Devil Legion at the moment. Once we go to the immortal cultivation realm, that is where they will show their talent. My undead are simply more troublesome to upgrade. But first, we need to have the Devil Legion ascend to God-rank. This way, we would have some sort of foundation when we ascend."

The Demon Dragon King nodded, "Mister can rest assured, the Demons will not forget the humiliation brought to us by Lu Wei. Nor will we forget Mister's great gift to us. I will also let Mister know that there are a lot of Demons who have your statue inside their homes."

Zhao Hai stared, he didn't think something like this would happen. He looked puzzled at Demon Dragon as he asked, "When did this happen? Why haven't I heard of this? Did you force them?"

Demon Dragon smiled faintly and said, "We didn't force them. They did it themselves to thank Mister. There's no need for you to worry about it. And we also can't force them to change their faith."

Zhao Hai nodded, then he said, "It's good as long they aren't forced. If they treat me as a god, then that's fine. Let's just have this matter develop on its own."

Faith Power would be useful for Zhao Hai, but he didn't know how much nor was he able to feel it. Because of this, he wasn't worried about it at this time. He didn't have any intentions to force those who came to his Space. They were free to worship who they want.

Demon Dragon looked at Zhao Hai, he couldn't help but admire the young man. The Demons were aware of Faith Power, they were even planning to use it as a bargaining chip to allow them into the Space. However, they didn't think that Zhao Hai wouldn't open this topic. He just did what he said and invited all of them into the Space. He didn't intervene with the Demons either. This made the Demon Dragon King admire him.

Chapter 867 – Biggest Worry

After he came back out, Zhao Hai looked at the situation around the Thunder Clan and the others. Fortunately, nothing worth noting happened, everything was normal.

The fight this time was very hard. Although they managed to conquer Divine Will City, their ratio of casualties had reached about one to one. It can be said that if it wasn't for Zhao Hai's undead, the losses would have been much greater.

Although the three clans were prepared to have losses, the scale of their casualties was not what they expected. This wasn't to say that Zhao Hai didn't give an effort. In fact, if Zhao Hai wasn't there, the battle would've dragged on for longer, causing more losses. It was because they had underestimated the might of the Divines who were fighting to the death.

Now, the three clans had their vitality injured. It would take some time before they recuperate their losses. It's not just weeks or months, it might take years of perhaps decades.

What they lost this time was their elites. Elites of any race weren't easily trained. Every soldier would need a long time and arduous training before becoming an elite. At the same time, the resources needed to nurture an elite was a lot. Armors, mounts, food, uniforms, everything required a lot of resources.

Behind every proud achievement of an elite unit was a mountain of resources invested. The three clans have been suppressed by the Divines for many years. Every year, they would pay the Divines a ton of tax, this caused their reserves to be small. Although the Divines were defeated, it was almost impossible for the three clans to train an elite unit in a short time, their foundation had been stretched thin.

Zhao Hai observed the three clans, they had returned to their own planes to relay the news to their people. Then they proceeded to construct defensive lines on their spatial cracks. This would allow them to defend their plane against attacks while only using a small amount of manpower.

Zhao Hai didn't care about the three clan's actions. Instead, he was actually happy. In the past, when the three clans were moving together with him, he felt like his feet were being dragged. His special tactics simply couldn't be used. Now that they left, Zhao Hai was able to breathe. He was like someone who had let go of a heavy load.

Although Zhao Hai still had Bingya and the others inside the ship, their small number would have no influence on Zhao Hai's actions.

The Taurus Continent was much bigger than the Ark Continent. In the past, Zhao Hai only had the Buddha Empire to deal with the Demons and the Divine Race. And now that he had the large Taurus Continent for himself, what else could he be afraid of? He can use the full might of the Space to make the Divine Race suffer here.

If Zhao Hai was confident in himself, then he was more confident in the Space. The incoming reinforcements might come from one continent, or several, but one thing was for sure; there will certainly be ultimate weapons coming over. Although ultimate weapons were strong, the Divines couldn't use it lightly. It was just the same as the old man, he can use it but not for very long, otherwise his body will start breaking down.

On the other hand, Zhao Hai wasn't weak. Currently, he has 40 Domain weapons, the Space's transportation ability, and various other weapons. As long as he utilized them properly, the Divines would surely suffer.

After thinking about this, Zhao Hai couldn't help but think about the Divine Realm. However, it's a pity that the Space's map only showed the Taurus Continent. At this point, he had no way of monitoring the Divine Race.

Besides this, Zhao Hai was also thinking about the Underworld and the Atlanta Plane. The underworld's advancement was still going on while the Atlanta Plane was about to finish its preparations. As long as the people from the Atlanta Plane comes to the Ark Continent, another factor would be added to the current situation.

He wasn't worried about any of these since he had the ample strength. Even if he dealt with multiple battles, he could still manage. The matter that Zhao Hai was most worried about was the laws rejecting him!

Zhao Hai can clearly feel that the repelling force on him was getting stronger, his time left was not much. He had never felt such a strong repelling force before. Even before the Divines had changed the laws of the Ark Continent, he hadn't felt such a repelling force even if he was God-rank. However, he felt it here.

Although this made Zhao Hai puzzled, he can confirm that he may ascend soon. If he can't solve everything when the time comes, then the Thunder Clan and the others would surely suffer under the Divine Race.

But as for the matter of how to solve everything, Zhao Hai was still clueless. Both Atlanta Plane and the Underworld couldn't be easily dealt with. Even the Divines were hard to take care of. If the other Divines acted like the Taurus Divines, then the war would take a very long time. At that point, Zhao Hai was not sure if he would still be in this plane.

Zhao Hai also tried to see if the repulsion would disappear once the Hell King's ship was stored in the Space. But the result left Zhao Hai disappointed. The repelling force was still there. Zhao Hai understood that this was because his strength had reached the threshold for ascension and not because of the Hell King's ship.

However, Zhao Hai had found a temporary solution. When he hid inside the Space, the repelling force would get reduced. This was good news since it would extend his time. But in this case, his cultivation speed would be increased because of the benefits of the Space. Inside the Space, the Dao Lotus would have more energy to absorb. Zhao Hai was sure that if he stays in the Space for too long, then he would definitely ascend once he went out.

The Space can't do everything, therefore Zhao Hai cannot stay here forever. It can be said that Zhao Hai was currently in a dilemma.

In order to reduce his cultivation speed, Zhao Hai had to reduce his time inside the Space. Since this was the case, Zhao Hai decided to deal with the minerals present in the Divine Realm in the meantime. He immediately sent large numbers of undead and iron armor beasts to mine the minerals in the Taurus Continent and had them sent to the Space.

Bingya and the others were confused regarding Zhao Hai's actions. However, they didn't ask about it. In the eyes of Bingya and the others, Zhao Hai had already seized the Taurus Continent, so why would he

frantically mine all the minerals here? As long as he manages to repel the Divine Race, he can mine it whenever he wants.

Naturally, Zhao Hai wouldn't care to explain it to them. Every day, the undead scoured the continent for resources to mine. As long as something was present there, the undead proceeded to collect it.

There were plenty of high level Taurus Divine undead inside the Space. And these people were quite familiar with the continent. Because of this, Zhao Hai wasn't too worried about finding places to mine.

While he was mining, Zhao Hai also paid attention to the situation in the Divine Realm. Time passed quickly and before long a month had passed.

Now, the three clans had completed their defensive lines. And soon, the people of the Atlanta Plane would invade the Ark Continent. Information had also been sent by the foreign races. The allied armies of the Capricorn Continent, Scorpio Continent, Cancer Continent, Gemini Continent, and Leo Continent had left their continents and had proceeded to head towards the Taurus Continent.

When he heard this information, Zhao Hai didn't worry. He was actually waiting for these people to arrive. To be honest, their departure was slower than Zhao Hai wanted it to be. Zhao Hai was now facing a two-way war. Once the Atlanta Plane invades the Ark Continent, it would be impossible for them to miss the spatial crack. After all, it was quite obvious.

As long as the Atlanta Plane's people notice the spatial crack, they will certainly send people to investigate. When the times comes, Zhao Hai might face a battle on two sides.

Although Zhao Hai didn't want to see this situation, he had no choice but to accept it. With the arrival of both the Divines and the Atlanta Plane, it would be impossible for Zhao Hai to only fight one battle.

Fortunately, Zhao Hai had expected this kind of situation, so he wasn't worried about it. The arrival of both parties wasn't a bad thing for him. At most, it would just be mildly troublesome.

Originally, Zhao Hai wanted to divert the Atlanta Plane's people to battle with the Underworld. But with speed of the underworld's advance, it would take quite a long time before they become a problem for

the Atlanta Plane. The Atlanta Plane would enter the southern part of the continent, it is for certain that they would meet Zhao Hai and the others first.

Zhao Hai thought and decided to leave the spatial crack's defensive line open, allowing the people of the Atlanta Plane entry to the Divine Realm. He wanted to see how the Atlanta Plane and the Divine Race interact. He wanted to see which of them are more formidable.

Chapter 868 – Gold Ben's Plot

Gold Ben was sat on his bull. His face looked calm but his feelings deep inside was different. He had lost contact with his people one month ago. One can imagine that the situation back home wasn't doing very well.

Upon thinking about this, his chest couldn't help but tighten up as he lowered his head and coughed a couple of times. In the previous battle against Zhao Hai, Gold Ben had been injured forcing him to run away. This caused his body to not be as strong as before. And as he went about to convince the other continents to send reinforcements, his condition worsened. At this time, his vitality was damaged, his face wasn't as rosy as before.

According to the estimate made by the Taurus Patriarch, with Zhao Hai's strength, it would take about three to six months before the Taurus Continent gets captured. However, Gold Ben didn't expect to lose contact with the Taurus Continent not long after he left. This made him restless.

Although he managed to invite five continents, the ultimate weapons only numbered two. With him, there were three ultimate weapons. To be honest, even he wasn't convinced that these three ultimate weapons could defeat Zhao Hai. The reason why he decided to head back even if he was uncertain was because; one, he was worried about the state of the Taurus Continent, two, he knew that it was close to impossible for the others to send him their ultimate weapons, the two ultimate weapons already costed him a lot. Third reason was because he chose to invite these people even if there was no sure way to defeat Zhao Hai. Even if they were defeated by Zhao Hai, this meant that Zhao Hai had just sown a seed of discord between him and the other continents. This would cause the other continents to formally declare war on Zhao Hai.

With these reasons, Gold Ben decided to specifically invite Capricorn, Scorpio, and Cancer Continents. Among other Divines, these people were the most probable to bear a grudge. As long as they fight with Zhao Hai, they wouldn't be able to stop.

Moreover, these people were quite infamous in the Divine Realm. They were extremely militant, which caused them to become hotheaded and ruthless. They bore grudges and would seek revenge over the

slightest problem. Most importantly, these people were greedy, even for a Divine. In fact, Gold Ben extremely disliked them.

But because of their character, Gold Ben was able to ask them for help. Gold Ben was good in using their greed and arrogance to draw them into this war.

After thinking about this, Gold Ben couldn't help but look behind and gaze at the reinforcing army. Altogether, the five continents sent 100 million elite troops, there were also another 100 million troops from other races that were recruited. This resulted in an army numbering about 200 million troops. Additionally, they also had about 200 Domain Weapons as well as two ultimate weapons. It can be said that the five continents attached great vigilance towards Zhao Hai.

However, this didn't mean that Gold Ben had his confidence in this army. He had seen Zhao Hai's methods, he knew that if Zhao Hai wanted to attack a Divine Race city, then nobody would be able to stop him.

The military strength of the Taurus Continent wasn't something to scoff at. But when these troops met Zhao Hai, they were all defeated. Although the Taurus already lost some troops and had the three clans rebel, for Gold Ben, this wasn't the main reason. The main reason for this was because Zhao Hai was just too strong.

Although he managed to invite a 200 million strong army, he actually didn't have the authority to command it. He had no way of directing their actions. These people still didn't trust each other, so how could they show their full might? This caused Gold Ben's confidence to go down.

However, he didn't have any other choice but to believe in these people. He just hoped that the Taurus Divines were still in control. Otherwise, things would be even more troublesome.

The Taurus Continent began to show in the horizon. Upon seeing this, Gold Ben couldn't help but get moved. But this agitation caused him to heavily cough once again. The Divines on his side couldn't help but feel anxious.

As they slowly got closer and closer to the Taurus Continent, the more the Divines got anxious. All of them were paying close attention to their surroundings, afraid that they might run into Zhao Hai's army.

Gold Ben didn't hide any information about Zhao Hai to the five armies. He told them that Zhao Hai was very strong. After all, Zhao Hai was able to defeat him. Because of this, the five armies maintained their vigilance as they went on.

Before long, they arrived at the Taurus Continent's coastline. Contrary to their expectation, they actually didn't receive an attack. Their advance went smoothly. However, the Divines were soon able to discover an issue. They were already in the continent, but they were yet to see any Divine Race person. This caused their mood to sink.

Those who've been in the battlefield for a long time can understand what was going on. Before, they were looking down on the Taurus Divines for offering a huge price so that they could help. They thought that the Taurus Divines were too cowardly. But after seeing the state of the continent, they came to know that things weren't as simple as they thought it would be.

The Taurus Continent was populous, and the place where Gold Ben decided to arrive at was in the rear of the Taurus Divines. If Zhao Hai hadn't captured the Taurus Continent, then this place should be teeming with people. But now, they hadn't seen even a single Divine. This caused their heartbeats to rise.

Gold Ben's face was quite ugly. He also had an idea as to what this meant. Perhaps this meant that what he dreaded had already come true. However, he still wanted to try his luck, hoping that he was just mistaken.

In order to find answers as soon as possible, Gold Ben quickened his advance. He knew that a Taurus Divine City wasn't too far away. If there's no problem, then there should still be people in that city.

Those behind also followed suit and sped up. The desolate landscape had given them tremendous pressure. They also wanted answers as soon as possible.

Before long, the city in Gold Ben's memory appeared in sight. But even before they arrived, Gold Ben's expression got worse and worse. This was because he couldn't see the magical shield surrounding the city nor any smoke coming out of the chimneys.

When Gold Ben and his entourage flew over the city, he couldn't bear but despair, "No, this is impossible!!" Then blood spurted out from his mouth as he directly fainted mid-air.

The other Divines beside him immediately went and fetched his falling body. After that, they slowly descended into the city. Their eyes were full of tears, some were choked in sobs.

The city looked normal, the destruction inside wasn't anything serious. However, it was completely deserted. The only thing they could see were bloodstains on the ground. These bloodstains had gone dark, it seems like it had been like this for some time.

All of these implicated that there was a fight. And since there were no Divine in sight, it meant that the Taurus Divines had been defeated.

These remaining Taurus Divines knew that this was their rear. If Zhao Hai managed to attack this city, then the other places had certainly fallen. Perhaps the Taurus Continent had already fallen into Zhao Hai's hand.

The people from the other continents, after seeing the Taurus Divines, immediately understood what happened. They quickly issued an order to stop their armies' advance and then sent people to clean the houses. Upon clearing everything, they proceeded to occupy the deserted city.

Naturally, Gold Ben and his people also lived inside the City. He was currently being treated by the others. After being nourished with healing magic for a long time, Gold Ben slowly opened his eyes.

Upon opening his eyes, Gold Ben saw the people around him. Gold Ben's heart couldn't help but pain. However, he steeled his heart as he slowly sat up. The Divines close to him were still in tears. He looked at them and said, "Don't cry, it has already happened. What is most important right now is to take revenge. Where are the others?"

A Taurus Divine answered, "Supreme Elder, they stopped their advance and had occupied the City Lord's Mansion."

Gold Ben nodded as he took a deep breath and closed his eyes. After some time, he opened his eyes once more, a new fire was lit inside his pupils. Then his body moved as he proceeded to stand up.

The Divines around him were immediately startled, a person quickly said, "Elder, take a proper rest. We need your healthy body for our revenge. If you fall, then the Taurus Divines will have surely ended."

Gold Ben looked at the man and the others before saying, "We don't have time to rest. Besides, I won't die so soon. Stay here as I discuss matters with the others."

After that, Gold Ben went out. Upon exiting the place, he found out that he was actually in a house right behind the mansion. He immediately found the direction and proceeded to head towards the Great Hall.

The people from the other continents were currently discussing the situation. A lot of the benefits that Gold Ben had promised was made in the assumption that the Taurus Divines were still standing. But now, it seems like the Taurus Divines were exterminated. Naturally, the advantages the Gold Ben promised had become impossible to attain. In this case, they were contemplating if they would want to offend a formidable enemy.

But after discussing for a long time, a decision had yet to be made. The hall had turned strangely quiet, everyone was calculating the pros and cons. They wanted to weigh if fighting this powerful enemy would be good or bad for them. If it was good, then they would think about the benefits. As for the bad, they were thinking about the price that they would pay.

After thinking for some time, a male Capricorn Divine said, "I think we shouldn't participate in this war. The enemy that the Taurus Divines offended is too powerful. It would not be a good idea to offend him. And even if we beat him, our losses would surely be big. Moreover, there isn't much benefit left for us."

Chapter 869 - Divine Race's Huge Problem

"You short-sighted fool!"

A roar came from the hall's door. The people in the room stared. The Capricorn Divine that just spoke wasn't any ordinary person, he was the Capricorn Continent's Supreme Elder, an ultimate weapon expert. It can be said that among those present, he held one of the highest status. Nobody dared to be impolite towards him.

But after they saw who came through the door, they shut up, it was Gold Ben. Gold Ben was also an ultimate weapon expert, him being the Supreme Elder of the Taurus Continent. He and the Capricorn Supreme Elder held equal status. Naturally there was no problem if he said those words.

However, the Capricorn Supreme Elder didn't take it lightly. He looked straight at Gold Ben and said, "Who do you think you are? You stray dog, why did you come here!"

Gold Ben looked at the Capricorn Supreme Elder and snorted, "Moroga, I'm scolding you for being a short sighted idiot. You decide to retreat after seeing the Taurus Divines being defeated? Where did your courage go? Are you still from the Divine Race? Have you ever thought about it, since Zhao Hai managed to conquer the Taurus Continent, what stops him from going over to your Capricorn Continent? Do you believe that you can deal with him alone? Even if you can defeat him, how much losses will your continent suffer? Think about this first!"

Moroga wanted to argue, but when he listened to Gold Ben, he said nothing. What Gold Ben said was true. Since Zhao Hai can destroy the Taurus Divines, why couldn't he destroy the Capricorn Divines? If Zhao Hai decided to go to the Capricorn Continent, then their days would surely be the worst. After seeing that Moroga kept silent, Gold Ben said, "Zhao Hai isn't someone that a single continent can handle. Moreover, he is a formidable Dark Mage, capable of turning everyone into undead. Most importantly, his undead will keep the strength that they had when they were alive. The more Divines he kills, the more God-rank undead he would acquire. At this point, I'm afraid he already had about 100 million God-rank undead. Even if it hadn't reached 100 million, he should have at least 80 or 90 million. Think about it, 80 million God-rank undead killing their way to your continent. What kind of situation would you be in?"

A man next to Moroga suddenly opened his eyes. His eyes were very strange, it was entirely red. Although he only wore ordinary cotton garments, his aura was actually stronger than Gold Ben. This person was the Cancer Continent's Supreme Elder, Jie Yu.

Jie Yu, with his red eyes, scanned the people in the room before saying, "We need to eliminate Zhao Hai. Just like Gold Ben said, if he gets more and more powerful, the Divines will not have any good days ahead. Moreover, since he just had eliminated the Taurus Divines, fighting here won't affect ordinary people. If we wait, then the battle would be on our own homes. Uninvolved people would die."

Jie Yu's status in the hearts of the people was higher compared to Moroga and Gold Ben. This was because he had been a famous expert for many years. In the Divine Race, the amount of people he killed had made him well-known.

After listening to Jie Yu, the group couldn't help but face the matter at hand. Gold Ben also added, "Elder Jie Yu is correct. Now that the Taurus Divines had been eliminated, we don't need to worry about commoners being hurt. If one day Zhao Hai comes to your doorstep, then even if you defeat him, the battle would definitely hurt your people. I believe nobody wants to see this situation. And don't say that

there aren't benefits in defeating Zhao Hai. Don't forget, now that the Taurus Divines have been ended, the Taurus Continent is completely empty. Not only the Taurus Continent, there is also the our three vassal planes. Although they had rebelled, as long as we defeat Zhao Hai, subduing them would be an easy matter. Additionally, there is a spatial rift in the Taurus Continent that is connected to the Ark Continent. And inside the Ark Continent is a spatial rift to the Demon Realm. As long as we defeat Zhao Hai, not only would you gain the Taurus Continent, you also obtain the Thunder Plane, Barbarian, Plane, Winged Pegasus Plane, and Demon Realm. Isn't this price enough? Think about what you will gain."

Gold Ben thought that since the Taurus Divines had been eliminated, he might as well use these things to bait these people. This way, they would be more convinced to dealing with Zhao Hai and avenging the Taurus Divines.

Sure enough, when they heard Gold Ben, the people inside the hall couldn't help but turn greedy. Moroga looked at Gold Ben and said "Gold Ben, are you telling the truth? Is there really a spatial rift to the Demon Realm in the Ark Continent? Don't you dare lie to us"

Gold Ben coldly snorted and said, "Why would I use this to deceive you? It's known that Zhao Hai and the Demons had allied to deal with us. You can even see Demons in Zhao Hai's army. Moreover, the Demons being the first to arrive in the Ark Continent is something that every Taurus Divine knows."

Moroga didn't talk for a while, then he said, "Is Zhao Hai really that strong?"

Gold Ben snorted and said, "If he wasn't, then the Taurus Divines shouldn't have lost. The Taurus Divines didn't even last for two months. When I went to deal with him, I took 20 Domain Weapon experts with me. But when I faced him, he completely destroyed everyone except me. Now you tell me if he is strong or not."

Moroga's face turned ugly. At this time, it was Jie Yu who talked, "Why did you only tell us this right now?"

Gold Ben sneered and said, "If I said it before, will you come? Let me tell you the truth. We had already summoned the Deity twice. We asked him for help in destroying Zhao Hai. However, both attempts failed, which caused Zhao Hai to snatch two artifacts. The reason why Zhao Hai was so powerful was precisely because he has the Deity's artifacts in his hands."

After Gold Ben said this, a distinct sound of gasping can be heard in the room. To be honest, when they heard that Gold Ben had been defeated, they weren't too surprised. In the thirteen clans of the Divine Race, Gold Ben wasn't the strongest, he only ranked at about 7th or 8th strongest, both Moroga and Jie Yu can defeat him. Him being defeated by Zhao Hai only meant that Zhao Hai was stronger than him. And if Zhao Hai was against Jie Yu and Moroga? It was still hard to say.

However, upon hearing that Zhao Hai had defeated the Deity twice and even managing to rob his weapons, the Divines present couldn't help but get startled.

The Deity was very strong. They had long known that the Deity uses his incarnations to fight. Although the incarnation might not be stronger than the Divines, his weapons were very strong.

Once the Deity's incarnation gets destroyed, it was certain that the second one would be stronger. In the Divine Race, nobody can oppose the Deity, even Jie Yu can't defeat him. But Zhao Hai actually managed to do it, acquiring two weapons in the process. This meant that Zhao Hai's strength was beyond their expectations. At this point, he might even be stronger, with him having the Deity's weapons.

Jie Yu was also frowning. As for why Gold Ben only said this now, his intention was very clear. Gold Ben wanted to drag all of them into the water. However, Gold Ben's words gave them no choice, Zhao Hai was that big of a threat. He can threaten the entire Divine Race. They can't do anything else but deal with Zhao Hai.

Nobody made any noise, everybody was frowning. On the other hand, Gold Ben was calm. He scanned the people in the room before he turned to Jie Yu, "Elder Jie Yu, we need to make proper arrangements. First, we should send messages to the other continents. We need at least two more ultimate weapons to be certain in dealing with Zhao Hai. Second, we need to be wary about the vassal races under your control. The Thunder Clan, Barbarians, and the Winged Pegasus showed no signs before, but now they had rebelled. This is a lesson we need to learn from. We need to guarantee that your vassal races have no hidden plans. And third, we need to guard against the Foreign Races. Zhao Hai came from the Ark Continent where the Foreign Races also existed. Upon reaching the Divine Realm, it was almost certain that they contacted the Foreign God-ranks. Once they become aware of Zhao Hai's strength, they would surely enter into an alliance. Don't forget, we have been suppressing the Foreign Race all these years, they certainly won't let this opportunity to retaliate go. If the other elders agree, then I want to propose an alliance of the ten continents. We need to work together in dealing with Zhao Hai. Of course, since the Taurus Continent has been destroyed, we just want our revenge. As long as someone kills Zhao Hai, I will give them my Taurus God Armor."

Upon hearing Gold Ben, Moroga and Jie Yu stared. Then they quickly understood what Gold Ben meant. Gold Ben had nothing left, his family was killed, his body was injured. The only thing he had right now was his Taurus God Armor, nothing else. Therefore, he wants to use his Taurus God Armor as a bargaining chip to help him take his revenge. One couldn't help but recognize how heavy this was. Almost all of them were tempted.

And there was nothing wrong with the other things that Gold Ben said. The Thunder Clan, Barbarians, and the Winged Pegasus clan had long been vassals of the Taurus Divines. These three clans even participated in the fight against the Foreign Races. Their betrayal meant that other vassal races could also rebel. Additionally, with Zhao Hai being from the Ark Continent, a place that had a branch of the Foreign Races, he would definitely contact the Foreign God-ranks for cooperation upon arriving in the Divine Realm. The hatred between the Foreign Races and the Divine Race wasn't small, it simply cannot be resolved easily. If the Foreign God-ranks didn't use this opportunity, then they would be nothing more than fools.

These three points were enough to unite the ten continents against Zhao Hai. Not to mention Gold Ben narrating it properly as to fit his narrative.

After some hesitation, Jie Yu nodded and said, "Alright, we'll do it according to what Gold Ben said. Moroga, Gold Ben, us three will collectively write the letters to be sent to the other continents. We'll tell them about the situation here in the Taurus Continent, we'll express your opinion as well. As for what we need to do at this time, I don't want to rush an attack. Let's build a base here and prepare to welcome the other armies. What do you think?" Moroga nodded and said, "I agree with Elder Jie Yu. but I think us three won't be enough. How about we let everyone present here sign the letter. This way, it will be more convincing."

Jie Yu nodded and said, "That would be best. While I write the letter, Gold Ben, are you familiar with the surrounding terrain? Go and draw a map, then select a place for us to build our base." Gold Ben nodded and said, "I'll take care of it. But I need to tell you that Zhao Hai has powerful magic cannons and javelins. Moreover, he obtained a ship from the Deity. This ship can ram the city and easily destroy its protective shield, it's not affected by normal attacks either. I also heard about Zhao Hai's actions back in the Ark Continent. He can use harassment tactics with his speedy cavalry to chip at our numbers while hindering us from going forward. I'm afraid Zhao Hai will use this method to deal with us. I want all of you to think about these matters as we establish our base."

Jie Yu nodded, "Among all of us, only your people had fought with Zhao Hai. This matter shall be handed over to you. You need to build a proper base. If we can't quell Zhao Hai here, then he would definitely be a disaster to the Divine Race." Gold Ben nodded and said, "I'll begin immediately." Then he turned around and left.

After Gold Ben left, Moroga turned to Jie Yu and said, "Elder Jie Yu, do you think Gold Ben would really let go of his Taurus God Armor?"

Jie Yu replied, "He will. Gold Ben's injury isn't light. He can't hide it. He also spat blood outside the city. At this point, he is surely using a secret method to delay time. However, it's impossible for this method to last for a long time. Once his injury flares up, he will surely die. Therefore, he can dare to say that he'll give us his Taurus God Armor."

Moroga nodded, then he sighed and said, "This Zhao Hai is really fierce. I didn't expect him to really eliminate the Taurus Divines. No wonder Gold Ben would want to take revenge. If Zhao Hai doesn't get eliminated, he would surely be a huge trouble for the Divine Race."

Jie Yu nodded, then he closed his eyes, nobody knew what he was thinking. After seeing Jie Yu like this, Moroga immediately prepared a pen and paper so that Jie Yu can proceed to write.

Chapter 870 – Axe Island Shipyard

Axe was feeling great recently. His status in the family was now a step higher than before. Axe loved to adventure, which explained why he didn't have the highest position in the family. And with the addition of having minimal contact with the family, Axe's status of being the direct successor wasn't very stable.

But this time, the information that Axe brought was too important of the O'neal family. After Axe came back, the family immediately prepared for their invasion of the Ark Continent.

With this, Axe's status had become more and more stable. When the time comes, nobody could say anything if he were to succeed the family.

Because of this, Axe took care of the Ark Continent's invasion very meticulously. In his mind, conquering the Ark Continent was a very good opportunity for him. As long as his family takes control of the Ark Continent, the position of Patriarch would certainly be his.

Axe was too enthusiastic with the preparations, there were matters he wasn't involved with but he still chose to express his thoughts.

However, the O'Neal Clan's Patriarch was Axe's father. He became quite fond of his son, so when he saw Axe intervening on things he not only let it go, he even supported his son.

In the past, Axe didn't pay much attention to the matters of the family, this worried his father. One could transfer one's power to another person, but things were more complicated than that. If you can't consolidate your power, then you would end up like a puppet in the end.

Axe was heading this direction, which worried his father. Therefore, after seeing Axe's enthusiastic performance, the Patriarch encouraged him to intervene more.

In the Atlanta Plane, especially in the Magic Armor Continent, military operations were done large-scale, causing many things to be prepared.

Like the Divine Race, if they wanted to make an attack, they needed to carry out some preparations. They would need to assemble an army, amass supplies, provide weapons, and a lot more. These needed to be properly taken care of before making a move. If the military wasn't prepared, then they would risk failure.

The thing the Atlanta Plane needed to take of the most were their magic armors. Both the offensive and defensive capabilities of the magic armors are formidable. However, magic armors had a weak point, it was power.

Magic armors weren't like people, especially God-ranks. As long as people had enough food and rest, then they would be able to fight properly.

On the other hand, magic armors needed energy coming from a compressed energy source. The energy inside these sources came from extracting energy somewhere and compressing it.

This energy is the heart of each magic armor. Therefore, the Atlanta Continent prepared a lot of these things. Otherwise, there would come a time where the magic armors would turn into useless pieces of junk.

It was precisely because of this that the preparation time for the Atlanta Continent was much longer compared to the Divine Race. The Divines would be able to finish their preparations in just one month while the Atlanta Plane would take at least two to three months.

Besides compressed energy, the Atlanta Plane also needed means of transportation before they can proceed to attack.

The magic armors of the Atlanta Plane were just like aircraft, but much more formidable. However, each magic armor can only carry so much energy source inside them. Once their source of power gets used up, then they could no longer fight.

But since the magic armors needed to be used for combat, they couldn't just be allowed to fly by themselves. Because of this, if one wants to transport the magic armors, you would need a bigger vessel.

There were many means of transport in the Atlanta Plane. Some of these transport vehicles work in the sea while some work on land. But regardless of where they operate, one thing was for sure, these transport vehicles were very large.

Since these transportation vehicles were big and there weren't any who can carry a lot of magic armors in one go, they needed to be taken care of as well before the Atlanta Plane can invade the Ark Continent.

In the Atlanta Continent where the spatial rift to the Ark Continent was located, was an island. It was quite a large island with no people in it. This wasn't an issue since it could be regarded as a military base to be used as a jumping point for their invasion of the Ark Continent.

However, the island also presented a problem by itself. If they wanted to leave the island and proceed to the Ark Continent, then they would need a lot of transportation vehicles. There were a lot of transportation vehicles available in the Atlanta Plane, but how to bring them to the Ark Continent was a nuisance that needed to be taken care of.

Whether it be in the Ark Continent or the Atlanta plane, or even on Earth, constructing marine-worthy vehicles was much harder compared to land vehicles.

And this case was especially true for much larger vessels. Therefore, after hearing about the Ark Continent, the O'Neal family immediately constructed a shipyard on that island. Then they concentrated all of their shipbuilders there in order to make the ships.

The O'Neal family had no other way. The spatial crack was in a small mountain, there was simply no way for the family to send a large amount of ships directly to the Ark Continent.

However, for the Atlanta Plane who were constructing magic armors, making said ships only took a short time. In this case, a megaton-class ship can be made in just a month.

And because the O'Neal family was looking at this invasion with importance and had invested almost all manpower and funds into this project, they were able to make four megaton-class ships in two months.

These four huge ships aren't just for transporting magic armors, they were also used to carry land transportation vehicles. These land-based vehicles were also a masterpiece of the Atlanta Plane. Each one can carry 20 magic armors. Moreover, it can go through all kinds of terrain. It also had a thick armor as well as weapons making it capable for combat.

The O'Neal family knew that to conquer the Ark Continent, they would need to rely on these land vehicles. Therefore, along with the ships, they also made a few of these vehicles.

The O'Neal family went all out on this gamble. As long as they conquer the Ark Continent, every investment would be worth it.

Axe was currently on the island with the spatial rift. This island was known to the family as Axe Island. After he came back home, it was named after him to commemorate his achievement. Axe took a liking to this island. He stayed on it as he supervised the shipbuilding efforts.

Today, it wasn't only Axe who was present. His father, the O'Neal family Patriarch was also here along with other important figures of the family.

The reason they came to Axe Island was because the fourth ship was finally able to be launched.

In the O'Neal family, these four ships had been named, 'Conquest', 'Victory', 'Glory', and 'Tyrant'. One can see from the names of these ships the ambition and expectations of the O'Neal family in conquering the Ark Continent.

The workers below were still busy. Axe was standing on the dock, a step behind his father. Axe's father looked at the four big ships and couldn't help but smile. He turned to Axe and said, "Axe, you did this quite magnificently. As long as the family occupies the Ark Continent, you will receive the highest honors." Although Axe was feeling proud in his heart, his outside expression maintained its calm. He bowed to his father and replied, "It is my pleasure to benefit the family. Father, I want you to wait for a while. I'll head to the Ark Continent and contact Zhao Hai. What do you think?"

Axe's father smiled, but he shook his head and said, "Axe, there's no need to be anxious. Wait until everyone is ready. When the time comes, it won't be too late. Zhao Hai is very young and might be inexperienced, however, this doesn't mean the same for the other people in the Ark Continent. If we aren't prepared and you just brashly go there, you might alert them. This matter is crucial for the family, so we don't want even a small mistake. Axe, don't forget, you're a young Patriarch, what you need to do is to overlook the entire situation and not to charge headfirst. That kind of thing is not befitting someone of your status, let others do it instead. Understood?"

Upon hearing his father, Axe didn't talk back. Instead, he nodded and said, "Yes, father, I understand."

Axe's Father nodded, then he patted Axe's shoulder and said, "Kid, I'll be handing the future of the O'Neal family in your hands. You need to understand that there are things that even the Patriarch cannot help with. You can't do everything by yourself, otherwise, what point is there for your position?" Axe remembered his father's words. Although he didn't have a thorough understanding about it, he also knew that this wasn't the time to ask his father. He just nodded and stayed silent.

At this time, someone arrived by Axe's father and knelt down on one knee, "Reporting to the Patriarch. Everything has been prepared. We ask the Patriarch to give the honors!"

Axe's father nodded. Then he went to the pier right by the Tyrant. On the bow of the ship was a bottle of wine tied by the rope. Axe's father took the bottle and then swung it with all his strength towards the ship.
