

Another World 881

Chapter 881 – Demon Realm’s Currency Issue

On the monitor was a small team of magic armors. This team composed of three armored tanks with a total of 50 magic armors inside. Overall, these armored tanks can carry 60 magic armors, however, they freed ten spaces so that they could bring living materials and energy sources along.

The three tanks had entered Aksu Empire’s Lifeline Canyon. Their speed wasn’t any slower than any automobile back on Earth. However, this was Zhao Hai’s first time seeing a vehicle as fast as this given its size. Zhao Hai calculated that the tanks had reached the speed of about 200 kilometers per hour.

Upon reaching this calculation, Zhao Hai couldn’t believe that it was true. There weren’t a lot of cars back on Earth that can reach 200 kilometers per hour. One shouldn’t forget that these tanks contained 20 magic armors, reaching a weight of over 100 tons. And with wind resistance, how could these things reach this speed? It was impossible!

However, after recalculations from the Space, Zhao Hai was finally convinced. Those bulky things actually had this kind of outrageous speed.

Zhao Hai didn’t understand how it could be possible. Why would these things be this fast? But when he thought about the ships, Zhao Hai thought that it might be possible

The big ships of the Atlanta Plane weren’t slow even though they displaced a million tons. .This was strange in and of itself but since the ships were sailing on water, Zhao Hai had no point of reference to notice it.

However, when he remembered the time the four ships had encountered a little bit of storm, Zhao Hai noticed that the although the wind and rain looked normal, the waves caused by the collision to the ship’s bow flew higher than one would expect. There was only one explanation for this, the ship was very quick. Upon making measurements, Zhao Hai discovered that these ships had infinitely more speed than the other ships back on Earth.

At the thought of this, Zhao Hai understood that no matter the tanks or the ships, both of them were using magic formations. Its possible that the Atlanta Plane were using their formations to reduce the weight of their tanks and ships. This would allow them to go quickly.

When he thought about this, Zhao Hai couldn't help but feel excited about the magic formations and magic armors of the Atlanta Plane. Their Techno-magic civilization had reached a very high degree. Whether it be the Ark Continent or the Divine Realm, both need to look up to the Atlanta Plane when it comes to magic armors or magic formations.

Zhao Hai also came to discover that the Atlanta Plane's war tanks were divided into several types. One of them was a turtle-shaped tank. This turtle-shaped chariot was the slowest, but it can carry the most. Moreover, its defenses were the best. There was also a tiger-shaped war tank. This tank was the most commonly used war tank in the Atlanta Plane. Its firepower and speed were much better than the turtle-shaped tanks. Its weapons made it the most commonly used tank in the Atlanta Plane.

The third type of war tank was the leopard-shaped tank. This was the fastest tank among the three. However, because of its speed, it can't carry a lot of cargo. Its firepower was also inferior compared to the tiger-shaped tanks. This type of tank was more specifically used to transmit information.

However, the war tanks that Zhao Hai could see were actually modified tiger-shaped tanks. Not only can its speed compare to the leopard tanks, it can also leap forward just like the other tiger-shaped tanks. But making these tanks was also more troublesome compared to making any other tiger-shaped tank. Because of this, there are only a few of these tanks present in the Atlanta Plane.

After passing through Lifeline canyon, the tanks were now inside the Aksu Empire. Although the Aksu Empire had experienced war in the past, its mountains weren't like the Accra Mountains where Zhao Hai killed every magic beast. Because of this, one could see several magic beasts here.

There were plenty of magic beasts inside Aksu Empire. Although Zhao Hai had moved the people of the Ark Continent, he didn't have much time to take care of the magic beasts. Even if there were no such things as beast tides in the Akse Empire, there were still quite a lot of magic beasts.

Now that the people from the Aksu Empire have migrated, the place naturally became a paradise for magic beasts. All kinds of magic beasts ran into the Akse Empire and settled themselves.

However, the three Atlanta Plane tanks didn't care much about those beasts. They would only kill magic beasts that came to disturb them. Other times they would just plow forward.

Zhao Hai didn't understand what these tanks were doing. If they wanted to scout, then they should've stopped and looked around them. Why would they plow on forward like this? It wasn't something that scouts would do.

Actually, Zhao Hai didn't know that the three tanks were indeed sent to scout. They were heading north of the Ark Continent in order to look for people, or even find traces as to why they left. The O'Neal family actually sent people to the south as well. However, these people would only stroll around the Lyon Empire. They couldn't reach the Buddha Empire since their provisions were limited.

Because of this, Zhao Hai only came to notice the team heading north. After some calculations, the team heading north would meet the underworld's creatures soon.

Although the speed of the tanks were quite high, the Ark Continent was quite large. If they wanted to explore the entirety of it, then it wouldn't take one or two days. Because of this, the team camped on a medium Aksu Empire city when darkness came.

After seeing that the team had gone to take a rest, Zhao Hai turned to Laura and said, "It seems like they would be in the Ark Continent for a while, there's no need to worry. I just don't know if the people from the Atlanta Plane would fight the Underworld's creatures when the time comes."

Laura smiled faintly and said, "That might not be the case. They could stop their advance to the North and focus on the southern part of the continent. It's possible that they would be interested with the spatial rift first."

Zhao Hai nodded, "That's quite possible as well. In any case, we won't have to worry. We're not afraid of them, conversely, I'm waiting for them to come. I just don't know if they can come in half a month. At that time, we would be starting our fight against the Divine Race."

Laura forced a smile and said, "When that time comes, then we would be fighting on two sides. Right, Brother Hai, tell this matter to the Thunder Clan and the others as well. Have them prepare themselves."

Zhao Hai nodded and said, "Right, we'll tell them. You go arrange this matter while I go and see Bingya and the others."

Laura nodded, then along with Lizzy and the others, they turned around and left. On the other hand, Zhao Hai changed the monitor's image to Bingya's group.

Bingya and the others had already arrived at the vicinity of the Divine Race's fortress. They didn't advance rashly, instead, they camped inside a forest and rested well.

When Zhao Hai saw that nothing was about to happen, he closed the monitor and then took a bath. After relaxing himself, his body flashed as he went to visit the Demons.

The Demons had already sent the third batch of Devil Legion soldiers into the hell background at this time. Meanwhile, the Demons inside the Demon Space were also looked after by Zhao Hai, their current state wasn't worse off compared to the Ark Continent. Although the Ark Continent had received more care from Zhao Hai, the Demons were given ample attention as well. Most importantly, the Demons liked their environment more.

Besides feeling that the air was much better here, the Ark Continent's people didn't think too much about their new place. After all, the Ark Continent and the Ark Space was quite similar. On the other hand, the state of the Demons was different. Compared to the Demon Realm, the Demon Space was infinitely better. The Demons treasured this gift. In their minds, it would be the best if they could thrive in such an environment. Because of this, every Demon was giving 200% of their effort in order to develop their land. This caused their society to improve smoothly.

When Zhao Hai came to the Demon Space before, he already told the Great Demon King and the Demon Dragon King about the current state of the war with the Divine Race.

Currently, the days of the Great Demon King and the Demon Dragon King were doing very well. The Demons were busily developing their own lands. And since the Space was quite big, and each race had their own Domain, no conflict had occurred. The matters that the two needed to take care of was quite little.

Back in the Demon Realm, each race and clan would fight for land because of food. Each conflict that happened would need the Great Demon King's attention. At the same time, cities in the Demon Realm were also susceptible to attacks made by magic beasts and natural disasters. All of these needed the Great Demon King's help.

However, these things didn't occur in the Space. The Space was very big, so each race would have ample land of their own, erasing the conflicts caused by land. At the same time, magic beasts in the Demon Space were weak, and there were also a lot of Bread Fruits inside. With the addition of bamboo rice, other grains, and vegetables, the problem with food was also taken care of.

In the Space, there was also the church to exchange things from. As long as one place something of equal value, then the Space would make a trade. This reduced the conflicts for resources even more. Because of these things, the Great Demon King was very relaxed. The Demons had almost reached a state of high standard for a society where law and order prevailed and crime was at an all-time low.

Zhao Hai came to the Demon Space this time in order to discuss the matter of the Demon Race's currency.

In the past, the Demon Realm didn't have any form of currency. Everyone traded for what they want. It was just like the Beastmen, where they would use their argali to trade for living supplies. For the Demons, supplies were more precious than gold.

However, things were different in the Space. The Space wasn't lacking in supplies, the Demon Space was completely self-sufficient. In this case, a form of currency was much needed. Otherwise, it would be impossible to place values on traded commodities. This might even cause conflict among the people.

In order for the Demons to develop further, they would need a form of monetization. Zhao Hai had already thought about this a long time ago. Having currency would also be very beneficial during transactions with the other Spaces. This meant that Zhao Hai was planning to have the various Spaces trade with each other in the future.

Zhao Hai already opened this matter with the Great Demon King. Being the wise leader that he was, the Great Demon King immediately agreed. However, the means of currency had become quite of a problem.

Each of the Space's backgrounds can produce gold ores. However, the Demons have reached an extreme state of environmental protection. Even if they built their house, they would make sure that they would make the least amount of damage to the surroundings as possible. With this mentality, how could they stomach mining their mountains for gold ore? The Demons would surely disagree.

Zhao Hai couldn't help but sigh upon thinking about the Demon Race's conduct. He was left wondering what else to do. He can't mine for gold and he can't use paper currency as well because it would need cutting of trees to produce paper. Moreover, making forgery-proof paper wasn't possible. If counterfeit money appeared later on, then the Demon Space's currency would be in turmoil. The Demon Race might go into war because of this and Zhao Hai didn't want this to happen.

Zhao Hai went to the Demon Space because he wanted to discuss a solution. And since this wasn't his strength, he took Laura and Ruyen along with him.

When the three appeared in the Demon Space, the Great Demon King and the Demon Dragon King were having their meals. The things the two ate were simple. This was a habit they developed back in the Demon Realm.

Zhao Hai's group of three appeared in front of the Palace. The Devil Legion guards immediately discovered them upon arriving. The guards didn't block the three, instead, they gave a salute and sent one person to inform the Great Demon King and the Demon Dragon King of their arrival.

Upon hearing that Zhao Hai had come, the Great Demon King and the Demon Dragon King immediately went out and welcomed them to the dining room. After that they had people arrange tablewares and food once more.

After everything was taken care of, the Great Demon King turned to Zhao Hai and said, "Mister, are you here to discuss the matter of our currency? Did you come up with some solutions?" The last couple of days, the Great Demon King had a headache while thinking on this matter. However, he was still left with no good solution.

Chapter 882 – Crystal Card and Selfishness

Zhao Hai had thought about various methods before, but these methods wouldn't work. This was until a while ago when he was scanning through the Space. He remembered about these things from the Ark Continent, crystal cards!

Zhao Hai had obtained a lot of crystal cards from the Ark Continent before. However, crystal cards were useless for the Space. But then, after further upgrades, the Space can now turn crystal cards to gold coins and gold coins into crystal cards. Because of this, banks were already prevalent in the Ark Space and crystal cards had become more necessary for the people from the Ark Continent.

Back on Earth, your bank card can be used to buy things. However, if you use it to spend abroad, then you would have certain problems. Moreover, if it was lost, stolen, or hacked, then you would have huge problems. However, these things wouldn't happen in the Space.

In the Ark Space, crystal cards were divided into two types. The first type was the regular crystal card. This crystal card was just like any ordinary money to be used in spending. The other type was a personal crystal card. This card can only be used by its owner. The owner's appearance, fingerprint, blood-type, energy-attribute, and other qualities were used to personalize these cards. No other person can use it besides its owner.

Such protective measure might be impossible back on Earth, but in the Ark Continent, it can be achieved. Moreover, Zhao Hai tied each person's ID to their personal crystal cards. This way, the card would have its owner's information, making it convenient for the people to use.

At this point, these crystal cards were widely used in the Ark Space. This time, Zhao Hai wanted to implement this system into the Demon society.

Because of this, when the Great Demon King asked Zhao Hai for any ideas, he immediately told him about the crystal cards. Upon hearing the explanation, the Great Demon King nodded and said, "These crystal cards are very good. Mister, let me see this card that you described."

Zhao Hai nodded and then took a card out. Since this card was the same one used by the people from the Ark Continent, Zhao Hai also had one. This was also effective in promoting the use of the card.

Upon receiving the card and inspecting it, the Great Demon King nodded and said, "Good, Mister, this is quite useful. When could we start using this card?"

Zhao Hai smiled faintly and then said, "I'll prepare some banks in your cities first, with the purpose of releasing personalized cards. At the same time, I'll be providing you with transfer devices. These transfer devices aren't that big, they're as big as a piece of jade. As long as two parties reached an agreement on the price, they can insert their cards on this transfer device and make the transaction. It's quite convenient to use."

The Great Demon King smiled and said, "So Mister has already thought this through. Alright, I have no problems with it. We'll go according to Mister's plan."

Zhao Hai nodded and then said, "Good, then it's settled. You need to discuss this matter with your people first. When you reach an agreement, then you can call me over and I'll immediately build the banks."

The Great Demon King nodded and said, "Alright, then I'll have to ask mister to wait. Right, Mister, how's the outside situation doing? Do you need us to send troops?"

Zhao Hai shook his head and said, "At this time, there's no need. We've just plundered a Divine Race supply fleet. This will delay their plans since they would need to find food for themselves. There's also the people from the Atlanta Plane arriving at the Ark Continent. Those guys wouldn't be a threat for some time. It'll be a while before a fight happens, you don't have to worry about going out for some time."

The Great Demon King smiled and said, "I'm not really anxious about it. The more we drag time, the better it would be. I just want to send some Devil Legion soldiers out for a test."

Zhao Hai smiled faintly and said, "Just take it slowly, there's no need to rush. Right, in the future, I might be able to bestow special armors to the Devil Legion soldiers. When the time comes, I will inform you."

The Great Demon King stared, "Did Mister manage to find the appropriate equipment?"

Zhao Hai smiled and said, "Yes, didn't the Divine Race have some ultimate weapons? If we snatch those ultimate weapons and make combat armors, then wouldn't that be great?"

Upon hearing Zhao Hai, the Great Demon King couldn't help but get shocked. He never expected Zhao Hai would actually have this idea. Snatching ultimate weapons? Only Zhao Hai would think about it.

The Great Demon King had seen how strong ultimate weapons were. To be honest, although he had a Domain Weapon, after seeing the Divine Race's ultimate weapon, he couldn't help but feel a blow to his mind. The Divines were indeed worthy of their name.

Although the ultimate weapons looked simple, the Great Demon King knew that they were extremely strong, much much better compared to domain weapons.

Before the Demons met Zhao Hai, only one Demon held a domain weapon. Because of this, the Great Demon King was aware of how hard it was to manufacture weapons of this calibre. This was especially true when it comes to ultimate weapons.

Now, Zhao Hai actually wanted to make ultimate weapons. No wonder the Great Demon King was surprised. Zhao Hai looked at the Great Demon King and smiled, "Don't worry about it, I've already gained one ultimate weapon. I'm just currently waiting to get the others. I believe that we would have another great harvest soon. However, since these things are special, there are certain difficulties when it comes to mass production. I could only supply the Devil Legion in batches."

The Great Demon King stood up and then looked at Zhao Hai, "Mister, if you really managed to make ultimate weapons, please give me one."

Zhao Hai stared, he was confused at the Great Demon King as he asked, "Your Majesty, you're the King of the Demon Realm. Having your Devil's War Chariot is already good. Why would you want an ultimate weapon? Do you want to enter the battlefield in the future?"

The Great Demon King stared, then he smiled bitterly and said, "Right. Even if I'm a King, I still think about these things every day."

Zhao Hai looked at the Great Demon King and then smiled, "You're really a fighting maniac. Rest assured, ultimate weapons wouldn't be a problem. If conditions allow me to make Hell King's ships, then I will give you one as well."

Zhao Hai can now understand why the Great Demon King would want an ultimate weapon for himself. Ultimate weapons were extremely important for warriors. If Zhao Hai equips the entire Devil Legion with ultimate armors, then they might change their loyalty and devotion to Zhao Hai. Because of this, the Great Demon King couldn't help but worry.

Although the Devil Legion had become strong, they still regarded the Great Demon King as their leader. If Zhao Hai bestows them with ultimate weapons, then their mentality might change.

Even if the Great Demon King's thoughts about Zhao Hai had been influenced by the Space, it still hadn't reached a state similar to Shue and the others. The Great Demon King still had his own thoughts and this

was understandable. After all, every leader would need a steel heart in order to prosper. It would be harder to change their minds compared to ordinary people.

Zhao Hai realized this point, therefore he promised the Great Demon King that he would give him an ultimate weapon. At the same time, if permitted, he would also give the Great Demon King a Hell King's ship.

When he heard Zhao Hai, the Great Demon King couldn't help but stare. His heart couldn't help but jump as he bowed to Zhao Hai and said, "Mister, thanks!"

Zhao Hai smiled faintly and said, "Don't be too polite. You'll have to settle matters here as soon as possible so that the banks can be made."

The Great Demon King nodded and said, "Mister can rest assured. I'll take care of it as soon as possible."

Zhao Hai nodded before leading Laura and Ruyen to leave the Demon Space and return to the Hell King's ship. Upon returning, Laura immediately turned to Zhao Hai and said, "Brother Hai, the Great Demon King seems to have some reservations. Otherwise, he wouldn't have asked for an ultimate weapon."

Zhao Hai smiled and said, "It's understandable, don't worry about it. Let's just let matters go on its own. I'm not afraid of his reservations, as long as he doesn't want to rebel, then that's fine. In the end, the Divines are still our enemies. Since the Demons are already inside the Space, then there's no need to be anxious about it."

Laura nodded. At this time, Lizzy came over and said, "Brother Hai, how was it?" After that, Laura relayed everything that happened back in the Demon Space.

After Lizzy finished listening, her eyes couldn't help but blaze up as she said, "Brother Hai, the Great Demon King seems to be unable to tell good from bad. How about we teach him a lesson?"

Zhao Hai smiled faintly and said, "There's no need. The Great Demon King's position in the Demon Race is quite high. If we deal with him, then there might be a negative influence on the Demons. In any case, the Great Demon King only has this small reservation. There's nothing bad about this."

Lizzy was still a bit indignant, she coldly snorted and said, "We've been good to the Demons, yet he still had some doubts. Those kind of people needed to be taught a lesson."

Zhao Hai smiled faintly and said, "You're mistaken. Who told you that good deeds are always returned? Remember, being good to others doesn't necessarily mean that the others would be good to you. Minds of people are the most mysterious things in the world. Do you know why the Space is formidable? It's because it can influence the minds of people, even for a little bit."

Lizzy nodded, although she was still quite mad, she knew that Zhao Hai was correct. In this world, there were a lot of people that would bite the hand that fed them. If you think that your good deeds would be reciprocated, then you're too naive. It won't be long until you would end up dead.

Laura didn't want such a serious topic to continue, so she turned her head to Zhao Hai and said, "Brother Hai, you go and take a rest. A major battle wouldn't happen in the following days."

Zhao Hai nodded, then he turned to Cai'er and said, "Cai'er, pay attention to Bingya and the others. If there's any problem, then go and help them. At this time, they're quite useful to us."

Cai'er nodded. After that, Zhao Hai turn around to take his rest.

Chapter 883 – Two Geniuses

While sitting inside a tiger-shaped tank, Theo looked outside through the tempered glass. He can see that the land here was quite fertile, no worse than any land in the Atlanta Plane. Although there weren't any crops on these fields, one could see how fertile they were judging by how healthy the weeds on these plots were.

But this was where Theo was confused. Theo knew that no ordinary person would move out with such a land in their hands. However, the Ark Continent's people actually moved out. There could only be two explanations to this, either they found a better place to move to, or they were forced to move out.

And the latter reason was the one he wanted to prove. This wasn't only because of his curiosity, it was also tied to the O'Neal family's future.

They have been on the road for three days and have encountered cities both big and small. From what they had seen so far, they can be certain that the Ark Continent's population was very large. Who knows

how much larger they were compared to the O'Neal family. However, the more their population estimate became, the more uneasy Theo was.

It wasn't an easy task to relocate an entire continent. Even if they wanted to move, then where could they move to? Not to say about a continent this big, even an entire city moving would have many things that needed to be done. The relocation of the Ark Continent was just too sudden and strange.

While Theo was thinking about these things, the person next to him suddenly said, "Theo, what are you thinking about?"

Theo turned his head and looked at the war tank's driver, Lewis. Theo wasn't a war tank driver, instead, he was a magic armor pilot, a position much higher compared to a war tank driver. However, Theo didn't underestimate Lewis. In the past, Lewis was an outstanding magic armor pilot. However, he was injured and lost his capabilities to pilot a magic armor. This caused him to drive war tanks instead. However, his status was much higher compared to any other war tank driver. Among the O'Neal family's war tank drivers, Lewis was the most famous one.

Theo didn't ignore Lewis, instead he replied, "Big Brother Lewis, I'm getting more and more restless. You can see how fertile the Ark Continent is. If there's nothing bad going on, then people wouldn't have moved out. From the cities and villages that we've passed through, we can be certain that the continent's population was not less than tens of millions. These many people would need an extremely important reason to move out. I'm quite certain that they've come across something unordinary. We need to be careful when going forward."

Lewis turned his head and looked at Theo, he can see the evident restlessness on the young man's face. Theo looked at Lewis and said, "Big Brother Lewis, what's wrong? Did I say anything bad?"

Lewis shook his head and said, "No, there's nothing wrong about what you said. I just didn't think that you would think up to this point. You're correct, the Ark Continent's migration is too suspicious. This matter involves the future of the O'Neal family, we do need to be careful."

Theo nodded, then he turned to Lewis and said, "Big Brother, I seem to remember something about your injuries. I heard that they came from a someone in the Warrior Continent. Are those people really strong?"

These years, the Atlanta Plane was quite peaceful. Theo had yet to participate in a battle against either the Mage Continent or the Warrior Continent. Because of this, he had no idea about their strength. Since he has the opportunity, then he decided to ask.

When Lewis heard Theo's question, his expression couldn't help but change. Then with a low-spirited nod, he said, "Yes, very strong. I was already a God-rank magic armor at that time. When I was still in my 20s, I'm quite famous in the O'Neal family. Because of my fame, my arrogance had reached the skies. I wasn't afraid of anybody. Then, news suddenly arrived that there was a magic silver mine on a deserted island between the warrior continent and the magic armor continent. Although its reserves weren't a lot, it can still supply us for a period of time. When I heard this news, I immediately drove to the deserted island with my own magic armor."

This was Theo's first time hearing about Lewis' matter. Because of this, he listened to it earnestly. To be honest, when Theo heard Lewis say that there was a magic silver mine on a deserted island between the Warrior Continent and the Magic Armor Continent, even his heart was moved.

Magic silver was an ore essential to the construction of a special alloy used for making magic armors. Anyone from the magic armor continent would not pass the opportunity of acquiring some.

Although Lewis shifted his gaze forward, his mouth kept moving. He continued on with his tale, "I was young and frivolous, so I wanted to claim the magic silver mine on my own. However, I wasn't aware that this was a trap arranged by the Warrior Continent. It was only afterwards that I became aware of an unwritten custom of the Atlanta Plane. No matter which continent, when a young talent becomes famous, the other two continents would surely make plots to extinguish that talent. Also, there would always be people following that young talent to protect them. But at that time, I didn't let my protectors follow me. In the end, I suffered a big loss and was seriously injured by someone from the warrior continent. If it wasn't for that expert from the family, I wouldn't have been able to come back. The people from the warrior continent were quite strong in martial arts. They specialized in physical cultivation and were capable of fighting in the air. Because of their practice, their lifespans are much longer than the people from the magic armor continent. An important thing to note about them is their ability to sustain a fight for a long time unlike our magic armors. If we leave our magic armors, our strengths would be greatly reduced. It's impossible for us to contend with them with our physical bodies, especially against their God-ranks. Even if their attacks couldn't compare to our magic armors and they weren't as fast, dealing with them isn't easy. The longer the fight takes, the more disadvantage we would be in."

Theo blankly listened to Lewis' words. Lewis said a lot of things that he didn't know. If one were to think about it, Theo was also considered to be a genius in the O'Neal family. And even he didn't know about these things.

Lewis turned to look at Theo and whispered, "This matter isn't something that the three continents would tell people. They will only protect the geniuses secretly. Maybe there are even experts protecting you right now."

Theo gawked, then he forced a smile and said, "Big Brother Lewis, don't joke with me. I'm not that talented. The family wouldn't send people to guard me. Otherwise, they wouldn't have sent me on this duty." Lewis smiled faintly and said, "You don't know that. You should know that those who came to be famous people didn't only go through a single battle. Without undergoing a life and death trial, it would be impossible for them to become an expert." Theo stared blankly, then he nodded as he looked out the window and said, "I will definitely become an expert. I will." Lewis looked at Theo and smiled. He couldn't help but think about the younger him, he had the same look as Theo. At that time he was so arrogant and was surrounded by praise. When he was injured and became unable to pilot a magic armor, people began to look at him in disappointment. Fortunately, Lewis didn't ruin himself and turn into a good for nothing drunkard. After a period of depression, Lewis stood up again and began to drive war tanks for the O'Neal family. In the end, he became the family's best war tank driver.

Although he was an excellent tank driver, his status is still not higher compared to magic armor pilots. However, this didn't necessarily mean that he was lower than ordinary magic armor pilots. If one wanted to man a hundred ton vehicle, one would need nimble hands, and not everyone had this. Although this ability didn't look much, it actually allowed a war tank driver to perform specialized tasks.

After some time of silence, Lewis suddenly stopped. This caused Theo to awaken from his thoughts as he looked at Lewis in confusion.

From Lewis' expression, it seems like he had seen a ghost. Theo followed Lewis' gaze and became similarly shocked. On the horizon in front of them was a sky covered by a dark mist.

It was still noon, about time for people to take their lunch, the middle of the day. However, in front of them was actually a dark sky. The heavens and the earth was covered by a dark mist! This caused everyone who saw this to stare blankly for a moment.

Theo's face changed as he said, "Big Brother Lewis, what's that?" Lewis recovered from his shock, his expression changed as he turned to Theo and said, "Tell everyone to prepare for a fight. I don't feel good about this dark fog. I have killed a Dark Mage from the Mage Continent before. Among his dark magics was the dark mist. However, it wasn't this large. Even God-rank Dark Mages would find it

impossible to produce a dark mist this massive. Maybe this is the reason for the Ark continent's migration."

Theo didn't dare to ignore Lewis's words. He immediately turned and went into the interior part of the tank. There, the resting place for the staff was located. Theo went towards the magic armor pilots and then sounded an alarm. Red lights lit up from the walls as a blaring sound spread.

It didn't take long before the alarm was heard all throughout Lewis' war tank. The tank immediately burst into action.

Like any other war tanks similar to the one Lewis drove, each one of them had 40 people inside. 20 of them were magic armor pilots, five were war tank drivers, another five were war tank technicians, then lastly there were 10 war tank weapon operators. Since war tanks weren't as big as the ships, their living quarters weren't as big. However, since war tanks were expected to travel over long distances, the living quarters were still made quite ample.

Chapter 884 – Yin Fire?

Theo quickly put on his own magic armor. He was a God-ranked magic armor pilot, so his armor was bigger than the one Axe had. Not only can it transform, its speed, power, and defense was also much better.

As the war tank's roof opened up, Theo immediately drove his magic armor to fly towards the dark mist.

This was also how they usually fight in the Atlanta Plane. After an abnormality was discovered, the war tank would stop and immediately release magic armors. After all, the war tanks were simply used as a transport, the magic armors were the real firepower.

Theo carefully controlled his magic armor. He liked staying inside his mecha, he thought that the most comfortable place in the world was inside it.

He liked the feeling of being a pilot. Because of this, he was focused on the task at hand. Theo carefully looked out front to where the dark mist was located.

Upon seeing what was before him, Theo couldn't help but clench his fist. This also made his magic armor clench its fist. Magic armors were the greatest inventions of the Atlanta Plane, it was because magic armors that the magic armor continent managed to grow to its own size.

There was one type of magic formation known as Spirit Projection Formation. The main function of this formation was to synchronize one's own mind to an external object. Moreover, this would allow the object to be controlled as if it was one's own limb.

This formation made magic armors formidable. Every action made by a magic armor pilot would be mimicked by the magic armor itself.

However, this magic formation also had its weak point. If one wanted to use this formation, then one would need a formidable spiritual force. Moreover, this spiritual force was different compared to the spiritual force that mages needed.

Mages used their spiritual force to control the elements. They can use incantations and with their own control of the elements they could produce their spells.

On the other hand, the spiritual force that magic armor pilots used were the purest type of spiritual force. This kind of spiritual force cannot be used to kill an enemy, instead, they were used to control things. It was important for magic armor pilots to study this kind of spiritual force. The stronger the pilot, the stronger their spiritual force was.

It was because they spend most of their time studying this spiritual force that the magic armor pilots only have stronger bodies than average mages but was way worse compared to warriors.

Inside his magic armor, Theo looked at the dark mist. Because of the formation on the magic armor, Theo can see the situation very clearly. Under the strengthening effects on the magic armor, his eyesight had also improved.

The dark mist was extremely black, he could barely see anything inside. Theo turned his head towards the others beside him and said, "What do you guys think?" His voice was also amplified by the magic armor.

Another person gave a reply, "I think we should send people inside to scout. The others will wait outside to provide support."

Theo nodded and said, "Alright. Spirit Snake, Poison Serpent, Mad Dog, Lunatic, and Lone Wolf, you five go in and have a look. There's no need to be thorough. Go in and when you spot something wrong, immediately retreat."

The five magic armors complied and immediately flew towards the Dark Mist while Theo and the others remained outside. They were in high alert, ready to provide aid at any time.

The five magic armors proceeded to enter the dark mist. Due to the Dark Mist's nature, the visibility inside was horrendous. However, the five didn't feel anything after flying inside, the place was spiritless, it made them very alert.

The five people advanced in a 2-3 formation following a trapezoid shape. As they carefully advanced, someone's voice was suddenly heard, "Stop, I can hear something." The person who talked was the one named Mad Dog. After hearing him, the others stared as they immediately stopped.

Mad Dog then said, "Let's go down. I can hear something below." Then just as he was done talking, a bone spear suddenly flew from below stabbing towards him.

Mad Dog stared, his consciousness immediately became alert. Because of this, upon seeing the approaching bone spear, his hand immediately moved and went on to capture the projectile.

At this time, more bone spears came from below. However, due to their skill, the people from the Atlanta Plane remained unscathed.

After the group defended against the bone spears, groups of fireball suddenly came flying. These fireballs had very peculiar characteristics. Most fireballs would have a shade of red, however, this one was actually grey!

When Mad Dog saw these fireballs, his expression couldn't help but change as he said, "Retreat immediately! This place is too strange." The group complied as they immediately went towards the edge of the dark mist.

However, before they retreated, they first released beams of energy from their hands striking the incoming fireballs. They expected the fireballs to disappear upon being hit by the beams of energy. But contrary to what they thought, the fireballs became bigger instead. It seems like the beams of energy were consumed by the fireballs.

Mad Dog and the others became surprised upon seeing this, they immediately hastened to exit the place. Fortunately, they haven't penetrated too deep into the Dark Mist. Before long, they exited the place. But then, another strange matter occurred. The fireballs that were coming towards them stopped once they reached the edge of the dark mist, they didn't go out even for one step.

Theo's group were constantly paying attention to the Dark Mist, but they didn't think that the group that just went in would actually withdraw this quickly. Moreover, they looked very distressed. Theo's group immediately went forwards to meet the scouting team, preparing to give them aid.

However, what surprised them was the absence of any pursuing parties. Theo turned his head and asked, "Mad Dog, what happened? How come you came out this quickly?"

Mad Dog immediately replied, "Theo, what's inside is very strange. The visibility is very low so we cannot see anything. In the beginning, we were attacked by bone spears, then after that, by several groups of fireballs. Moreover, those fireballs were unaffected by our energy beams. Instead, once the energy beams collided with the fireballs, the fireballs began to grow bigger. Because of this, we decided to retreat. Theo, ask Brother Lewis. He has experience, he might know about this matter."

Theo gawked, then he nodded and said, "Alright, let's go. Someone stay here and guard the place. Send a report if something peculiar happens." After that, he led people to leave the place, keeping ten people behind to stand guard.

When Theo's group returned to the war tank, he immediately left his magic armor. Just as he jumped down, Lewis opened the door and walked out from the driver's chamber. Theo quickly went towards Lewis and said, "Brother Lewis, I just had Mad Dog and the others go into that Dark Mist. At first they were attacked by some bone spears. But after that, they were met with a group of fireballs. These fireballs seem to be able to consume our energy beams. Instead of being extinguished, they became even stronger. Do you know something about this?"

Lewis became stunned, "Yin attacks? Could this place be an innate Yin Domain?"

Theo looked confused at Lewis as he asked, "Brother Lewis, what's an innate Yin Domain?"

Lewis' tone became serious as he answered, "Innate Yin Domain is just one of its descriptions. Basically, it is a place full of Yin Qi. Such a place is able to produce undead and allow them to evolve. The fireballs that you've met are called innate Yin Fire. This fire extremely poisonous. Aside from sources of Yang Qi, no other thing can extinguish this fire. As long as a lick of this fire gets into your body, you will definitely be consumed. No other place can produce this Yin Fire aside from Innate Yin Domains. Innate Yin Domains also have its own special conditions. Innate Yin Domains cannot have any light coming from the sun, the Yang energy of the sun makes the existence of Yin Fires impossible. Because of this, the Sun is the natural nemesis of anything inside an Innate Yin Domain!"

After hearing Lewis say this, Theo couldn't help but look at the Sun. It was now that he could understand why Lewis was surprised about why an Innate Yin Domain would exist here. The Sun was blatantly up in the sky, however, an Innate Yin Domain actually existed right under it. This really can't be explained.

Lewis turned his head to a man that looked around 30 years old and had a fierce aura about him, "Mad Dog, did the fire stay inside the Dark Mist?"

Mad Dog nodded and said, "It did. Not long after we went in, we were immediately met with that fire. Since we were unable to suppress it, we decided to retreat. In the end, the fire didn't follow us."

Lewis nodded and said, "Nobody got caught by the fire?" Mad Dog shook his head.

Lewis then relaxed himself and said, "That's good. Anything touched by that Yin fire would get destroyed immediately, this includes magic armors. It's just strange. In a place where an Innate Yin Domain couldn't possibly exist, Yin Fire can actually manifest."

Theo didn't like where things was going. He regained his composure and looked at Lewis, "Brother Lewis, what do we do now? Do we go in once more?"

Lewis shook his head and said, "You can't. This Yin Fire can only be dealt with by a strong cannon and presently we don't have one. Going in once more would just be courting death. Let's leave two war tanks here and monitor the Dark Mist as well as see how large it is. The last war tank will be sent back to send the report. I can now probably understand why the people from the Ark Continent moved. If this

place could really produce Yin Fire, then some changes should have happened in the Ark Continent. And when the night comes, the undead creatures may come out from the Dark Mist. With the calibre of the undead, the Ark Continent shouldn't be able to stop them. Go prepare a war tank immediately. Equip it with ten magic armors and have it go back to report."

Theo didn't dare to be slow and immediately complied. On the other hand, Lewis didn't leave. He knew that he couldn't leave this place. Although he couldn't pilot magic armors anymore, he had gone to a lot of places before. Compared to Theo and the others, Lewis' experience was richer. He needed to remain here to guide the group.

The War tank was quickly prepared. Theo didn't go with the war tank, instead, he selected ten magic armor pilots to go along with the returning war tank. After taking care of this, Theo went back to convene with Mad Dog and the others.

After the war tank had gone back, Lewis looked around and said, "Let's go back to the city we stayed in last night. Don't get too close to the Dark Mist, otherwise we may be attacked at night." Theo nodded and sent people to contact those who were observing the Dark Mist.

However, what they didn't know was their every action and every word was being observed by someone.

At this time, Zhao Hai turned his head to Laura and said, "Innate Yin domain? Are there Underworld areas in the Atlanta Plane? Otherwise, it would've been impossible for them to know that. Also, is this Yin Fire strong? It seems like I need to take a look."

Upon hearing Zhao Hai, Laura smiled and said, "I knew you would like to go and see. I'm also very curious about this Yin Fire. Brother Hai, the Hell King's ship also has the Yin attribute. Can we go and see if it'll be good for it?"

After hearing this, Zhao Hai turned to look at the others. Seeing the anticipation in their eyes, Zhao Hai couldn't help but smile and said, "Look at you, you look like children waiting to see new toys. Alright, let's go have a look." Then Zhao Hai waved his hand as the Hell King's ship went through the space and then instantly appeared inside the Dark Mist. However, the ship's build this time had gotten smaller.

Actually, whether the Hell King's ship was smaller or bigger, the space inside it remains the same. This was because the ship wasn't relying on its outward size to decide the amount that can be loaded inside it. It completely relied on its spatial abilities in this aspect. Even if Zhao Hai made the ship into a very huge vessel, he still couldn't place more things inside it.

When the ship arrived, Zhao Hai and the others immediately walked out from their cabins. All of them curiously looked at the Dark Mist. In the past, Zhao Hai just went inside the Dark Mist in order to snatch some undead for himself.

Now that he had returned inside the Dark Mist, Zhao Hai couldn't help but get curious. However, he soon felt that there was nothing else to see here. Everywhere was just dark mist, tumbling around and obscuring visibility.

At this time, several bone spears began to fly towards the ship, aiming for Zhao Hai and the others. But Zhao Hai didn't even spare a look at these bone spears. He knew that this kind of attack was not a threat to him.

Sure enough, just as the bone spears flew towards the Hell King's ship's periphery, they were immediately wiped out using the spray coming out from the waters under the ship. The bone spears weren't even able to make a scratch on the ship's hull.

Upon seeing that the bone spears were useless, the enemy immediately sent out groups of fireballs. Unexpectedly, they were using the same tactic that they used against Mad Dog and the others. When Zhao Hai saw these clumps of fireballs, his eyes turned bright. He knew that these were the things he was looking for. When the group of fireballs reached the Hell King's ship, instead of having the ship extinguish it, Zhao Hai opened a spatial rift and took the fireballs in.

Chapter 885 – A Lich's Anger

When the grey fireballs entered the Space, Zhao Hai immediately heard a prompt, "Toxic Yin substance detected. Substance classified as Yin Flame. Extracting properties, extraction is completed. Host can now use this flame for crafting. Increasing the hell Space's strength. Yin Flame can be added to the Hell King's ship. The Hell King's ship's surface will have Yin Flames surrounding it. Yin Flame may be used for both attack and defense. Yin Flame can increase the ship's power system as well as improve the ship's cannons. Yin Fire Crystals can now be mined in the Hell Space. Asking host to approve all the improvements."

Zhao Hai didn't expect the grey fireballs to have this much benefits. The flame can even be used for crafting. It's quite good.

Zhao Hai couldn't stop himself from laughing. This was truly a pleasant surprise. "Immediately start the upgrades!"

Just as Zhao Hai's voice fell, a gray radiance suddenly covered the Hell King's ship. After the grey light vanished, grey flames started to go about and around the Hell King's ship.

The flames seem to go in and out of the ship, looking like it was burning the insides of the vessel. However, for those standing inside the ship like Zhao Hai and the others, they can't feel anything different at all.

Upon seeing this, Laura and the others couldn't help but feel curious. They stretched their hands and reached out towards the flames. However, like phantoms, the flames just went through, seemingly unaffected by the hands that stretched out towards it.

At this time, another batch of bone spears came out of the Dark Mist. Zhao Hai stopped the ship's waters from blocking the spears. Instead, Zhao Hai just allowed them to strike the ship.

Just as the bone spears were about to hit the ship, a flame wall suddenly solidified itself, blocking the bone spears from going further. As the bone spears pass through the flaming wall, one could see the spears disintegrate into nothingness.

Laura and the others couldn't help but call out in alarm. They didn't expect these phantom-like flames to be this powerful.

At this time, a scream was heard inside the Dark Mist. Zhao Hai looked towards the direction of the scream and said, "Who is that? Come out?!"

The Dark Mist suddenly parted, revealing the people behind them, no, they shouldn't be called people. These 'people' didn't have a corporeal form, they looked like spectres floating in mid-air.

Zhao Hai looked at these beings and couldn't help but stare blankly. Then he immediately understood, these people were unique beings of the Underworld, the Lich.

To put it simply, the Lich Race was part of the Ghost Races. They were Darkness beings that evolved their souls to the maximum, they almost had complete immunity against physical attacks. In the Underworld, they were one of the most difficult race to deal with.

Zhao Hai didn't think that he would meet members of the Lich Race here inside the Dark Mist. It seems like more creatures from the Underworld had come up into the Ark Continent.

After the group of Lich saw Zhao Hai, one of them said with a deep voice, "Who are you? And why are you here?"

Zhao Hai looked at the Lich and then smiled, "This is the Ark Continent, It's natural that I'm here. Are you from the Underworld's Lich Race? Why would you come to the Ark Continent and cause trouble?"

Upon hearing this, the Lich seemed to turn blank. One of them turned its head to Zhao Hai and said, "Don't talk nonsense, how could this be the Ark Continent. The Ark Continent's laws prohibit the existence of God-ranks. We've been here for some time, however, we didn't feel any change of laws. Also, from looking at your God-rank strength, how could this be the Ark Continent?"

Zhao Hai stared, he didn't think that the Lich would actually know about these matters. In fact, what Zhao Hai didn't know was that these Lich were old ghosts that lived for who knows how long. As long as they weren't killed in battle, the Lich were basically immortal. Because of this, they were aware of many things, they're basically living historical records...

Zhao Hai looked at the Lich and then said, "This is really the Ark Continent. Because of a giant accident, the laws of the plane has been changed. This accident also opened the rift to the underworld and the Ark Continent."

The Lich looked at each other, clearly astonished by what they heard. Zhao Hai said that the laws had been changed. In the past, they didn't understand how a spatial barrier could get punctured, producing a spatial rift. So it turns out to be this reason. However, what puzzled them was what kind of power would have the capability of changing the laws of a plane.

A Lich looked at Zhao Hai and said, "Nonsense, changing the laws of the plane isn't easy. How could people possibly achieve it?"

Zhao Hai smiled bitterly as he answered, "Changing the laws of a plane certainly isn't easy. However, some people actually used an entire country's worth of people to perform a Blood Sacrifice to achieve it."

Upon hearing Zhao Hai, the expression on the Lich changed. Although they were now members of the Lich race, they were originally transformed souls, they could still recall some memories. They didn't expect that people would have the audacity to use an entire country to carry out a blood sacrifice.

Zhao Hai looked at the Lich and then said, "Although you've become part of the Lich Race, you seem to have retained some humanistic natures. I'm not afraid to tell you that the one who did this to the Ark Continent was the Divine Race. The Divines and the Demons invaded the Ark Continent at the same time. The Divines used an entire country to carry their blood sacrifice to break the plane's barrier as well as change the laws. And with the appearance of the Underworld, I had no choice but to move everyone out of the continent."

Just as Zhao Hai said this, a Lich suddenly asked, "Mister, might I know which country was used as a blood sacrifice?"

Zhao Hai nodded and said, "Of course, the country used for the blood sacrifice was the Ocean Waves Dynasty!"

When Zhao Hai said this, the Lich couldn't help but pause. He looked at Zhao Hai and said, "Did you say Ocean Waves Dynasty? Is it really the Ocean Waves Dynasty?" Zhao Hai was confused by the Lich's response, he nodded and said, "Right, it's the Ocean Waves Dynasty, there's no need for me to lie about this matter."

Upon hearing this, the Lich suddenly screamed. Then Zhao Hai saw the flames of the ship suddenly forming a wall. It seems like this scream's power was quite huge, otherwise, the ship wouldn't have been compelled to produce this fire wall.

Zhao Hai couldn't help but knit his brows. He was confused at the Lich's reaction. He knew that the Lich didn't intend to attack. It seems like the Lich was impacted by something. The other Lich even went forward to comfort that Lich.

Moreover, Zhao Hai can see that the Lich that attacked had the lowest strength compared to the other Lich. Zhao Hai couldn't help but stare when he thought that the Lich might be a person. Can it be that this Lich had a relationship with the Ocean Waves Dynasty?

It took some time before the Lich calmed down. At this moment, a more elderly Lich looked at Zhao Hai and said, "Mister, please don't get offended. He didn't attack intend to attack you. It's just because he was a member of the Ocean Waves Dynasty's Imperial family before he died. He couldn't help but get affected by your information."

Zhao Hai nodded and said, "I can understand. But has this gentleman not been in the Ocean Waves Dynasty for many years?"

The Lich that screamed paused for a moment before he nodded and said, "Mister guessed correctly. It has been more than a thousand years ago when I passed away. Since then, I've received no news about the Ocean Waves Dynasty."

Zhao Hai nodded and said, "I couldn't blame mister. The Ocean Waves Dynasty has been the base of the Radiant Church in the past hundred years. It was said that the Radiant Church's influence was more powerful than the Dynasty's nobles. And most of those Nobles had become fanatical followers of the church. However, the Radiant Church was a chess piece of the Divine Race. After we discovered the Radiant Church's schemes and dealt with them, we didn't expect them to retreat to the Ocean Waves Dynasty. After that, the Ocean Waves Dynasty's King relinquished the throne to the Radiant Church's Pope, changing the nation's name to Radiant Empire. Because of what happened, the Divines chose to sacrifice the entire country for their plans."

The group of Lich gawked, then the Lich from the Ocean Waves Dynasty sighed and said, "Alright, it has been a thousand years. For the Dynasty to turn this way doesn't have anything to do with me. And with my current state, there's no way for me to take revenge against the Divines."

Zhao Hai smiled faintly and said, "Actually, I have news regarding mister's enmity. The one who invaded the Ark Continent are the Taurus Divines. At this point, the Taurus Divines have basically been extinguished by me. We're currently battling for the Taurus Continent. The Ark Continent will be left behind for the Underworld."

The group of Lich looked blankly at Zhao Hai. They couldn't believe what Zhao Hai just said. Zhao Hai looked at them and smiled, "I only came here because I heard from someone that a strange flame exists. Therefore, I came to witness it for myself. I don't have any other plans."

The Lich looked at each other before one of them said, "Are those Iron Men your people?"

Zhao Hai shook his head and said, "It's impossible for me to have subordinates like those. Due to the changes made by the Divines to the Ark Continent's laws, spatial rifts started to appear in the Ark Continent. In addition to the Underworld, there's also another plane that managed to connect to the continent. That plane is called the Atlanta Plane. Those Iron Men that you say came from that place. Those suits are called magic armors, the people from the Atlanta Plane are inside. They're quite strong, and are also intruders to the Ark Continent."

Chapter 886 – Establishing the Laboratory

The Lich didn't know what to say. They didn't think that the Continent would have this much change. It seems like they were reading from a story book.

Zhao Hai looked at the Lich and said, "Everyone, I won't be staying here anymore. You will definitely meet the people from the Atlanta Plane once again, please be careful." Then he turned back into the ship with the intention of leaving.

But at this time, one of the Lich suddenly said, "Mister, please wait." Zhao Hai immediately stopped, he turned around and then said, "Do you need something?"

Among them, an elderly Lich gave Zhao Hai a salute. This salute was just like one made by Nobles, but was also different. Laura looked at the old man's actions and her eyes shone as she whispered to Zhao Hai, "Brother Hai, this is a salute made by ancient Nobles. They use this whenever they have a request."

Zhao Hai nodded, then he looked at the Lich and said, "Is there something wrong?" The Lich looked at Zhao Hai and said, "From what we can see, Mister should be someone with an extraordinary status. Our group had long been tired of the Underworld. We want to go to all places with Mister. I don't know if Mister can agree? We can become Mister's slaves, we'll follow your every bidding."

Zhao Hai stared, he didn't expect the Lich to have this request. He looked puzzled at the Lich before he asked, "You have God-rank strength. And since you seem to be the leader of your group, then you should have an overlord-class position in the Underworld. Are you really willing to follow me and be my slaves?"

The Elder Lich smiled and said, "Correct. Just like mister said, we're honored and famed characters in the Underworld. However, the Underworld is different compared to other places. In the Underworld almost everyone has an immortal body. So there'll be no problem even if one doesn't struggle to live. People would just play around and then go elsewhere. Most of us just do nothing for countless years. I don't know how many years I have lived, but I've grown bored of the Underworld. If you weren't asleep, then you would spend your waking hours doing nothing. We want to go with mister to see the world. We don't mind being slaves"

Then Zhao Hai turned to the other Lich and said, "Do all of you share the same thoughts?"

The other Lich nodded. It's true, they spend all day doing nothing, being in a daze the whole time. It wasn't something people could endure, it was akin to punishment.

Zhao Hai looked at the Lich and then smiled, "I can take you with me. You can bring your subordinates as well. And instead of being slaves, I'll treat you as my friends instead."

The Lich looked at Zhao Hai blankly. They didn't expect Zhao Hai to be this willing to accept them, even going so far as to treat them as friends.

The Elder Lich looked at Zhao Hai and said, "Mister, we are from the Lich Race. Won't our existence bring trouble to you?" Zhao Hai laughed, "That won't be a problem. I myself am a Dark Mage, the most powerful one in the Ark Continent. The undead under my control has reached tens of millions. What can a few Lich do to affect my reputation?"

The group of Lich stared, then their expressions lit up. The Elder Lich then asked, "Might we ask how many undead can Mister's ship hold? Our subordinates are quite a lot."

Zhao Hai laughed and said, "The number's not a problem. I can just store them in my Space. The more people the better."

The Lich paused then he said, "Alright, then we'll be impolite to Mister. However, most of our people cannot fly. We'll have to ask Mister to lower his ship."

Zhao Hai smiled before he slowly lowered the Hell King ship's altitude. At the same time, the Elder Lich made a sound before leading the other Lich towards the ship. Before long, a large number of undead creatures came walking from all directions.

Zhao Hai thought that the Elder Lich's subordinates were other Lich. However, he soon found out that he was wrong. Among the undead that came from all directions, most of them were skeletons and zombies. The Lich actually numbered the least among them. It was a bit strange but Zhao Hai still took all of them into the ship.

Under the stunned gaze of the Lich, the undead went into the Hell King's ship in droves. The ship's size was basically ignored, it was just like a bottomless pit as it swallowed every undead.

After the last undead went into Zhao Hai's ship, Zhao Hai turned his head and said, "Alright. Everyone, let's go to the Divine Realm." The Lich nodded and in the next moment the ship vanished from the Dark Mist before reappearing in the Divine Realm.

The Lich couldn't help but get stunned upon seeing the instant change to the scenery. The Elder Lich looked at Zhao Hai and said, "I didn't expect Mister to hold a Spatial Divergent Ability. No wonder mister can defeat the Divine Race."

Zhao Hai smiled and said, "It's not just my ability that allowed me to defeat the Divines. Since you have prestigious status in the Underworld, then you should know about the Demons, right?" The Lich didn't understand what Zhao Hai was saying. Zhao Hai just said that the Divines and the Demons invaded the Ark continent at the same time. So why would he use the Demons to explain why he defeated the Divines?

The Elder Lich still wondered, however, he nodded and said, "Yes we are. We've had several battles against the Demon Realm. The Demons have good fighting prowess. Even if they are dominated by the undead, they still managed to fight back. They're the most intimidating enemies we have seen."

Zhao Hai looked at the Lich and smiled, "The reason why I dared to deal with the Divine Race is because I managed to bring the Demons to my side. The Demons are now my subordinates. Because of this, I didn't have any other worries and managed to focus on dealing with the Divine Race."

Upon hearing this, the other Lich gawked. After that, the way they saw Zhao Hai changed. The Lich race lived extremely long lives, so they also participated in the battles against the Demons. They didn't expect that those terrifying Demons would actually be subdued by Zhao Hai. This was just too shocking.

After seeing their reactions, Zhao Hai smiled faintly and said, "Come with me, let's go visit the Demon Realm." Then with an intention, the Hell King's ship appeared inside the Demon Space.

Upon reaching the Demon Space, the Lich were shocked yet again. They had gone to the Demon Realm before, so they could safely affirm that this place wasn't the Demon Realm.

What made them feel even more strange was the fact that although this place wasn't the Demon Realm, Demons actually lived inside it. They had battled with Demons many times, therefore, they knew what the Demons looked like.

Just as the Lich were confused, a prompt was suddenly heard, "Robots not belonging to the Space discovered. Proceeding to modify their program. Program modification completed. Host can now command the robots."

Before Zhao Hai could comprehend the announcement, the group of Lich suddenly bowed and said, "We have seen the Master."

Zhao Hai was stunned, then a wave of happiness washed over him. The Lich were wise beings, so Zhao Hai thought that the Space wouldn't be able to do anything to them. But now, it seems that this wasn't the case. No matter what, the Lich were still undead. To the Space, they were just another type of robots. Naturally, the Space couldn't allow disobedient robots to exist inside it, so it immediately subdued the Lich. This was great for Zhao Hai.

After comprehending what just happened, Zhao Hai waved his hand and said, "No need to be too polite. Just call me Young Master. I'll be sending you to the Space, to Wild Dragon Island. Go and help my father-in-law research magic formations. If you want to come out and see the world outside, then don't hesitate to tell me."

The Lich nodded. They now regarded Zhao Hai as their master, so they respected his words.

The Lich were different compared to those beings invited by Zhao Hai to the Space. Those who were invited in could only be influenced by the Space little by little. On the other hand, the Lich were immediately subdued by the Space.

Zhao Hai also took the Lich to see the Great Demon King. But since the Great Demon King was still busy with the crystal cards, Zhao Hai didn't stay too long.

In the meantime, Zhao Hai just threw the Lich's subordinates to the Space. Majority of their subordinates were just ordinary undead, they didn't even reach 9th rank. Naturally, Zhao Hai didn't intend to use them in the near future.

When he was done dealing with the undead, Zhao Hai returned to the Divine Realm after handing the Lich over to Cai'er. Cai'er would introduce the Space to the Lich and then take them to Wild Dragon Island.

The Lich have lived a long life, so even if they weren't that intelligent, they can still make up for it with their experience. Besides sleeping, the Lich also managed to record history and some even started to research interesting things.

However, it's just a pity that technology was completely nonexistent in the Underworld. The Undead were basically brainless beings with nothing but instinct. In this case, having the undead research was basically useless.

Now that Zhao Hai had sent them to the Space, the Lich might find something good to do. And since magic formations were profound, then they might come to love researching it.

Zhao Hai had already asked Ruyen to make a laboratory in Wild Dragon Island. Gathered in this laboratory were many types of people. There were mages, elves, dwarves, and now Lich. Zhao Hai was also preparing to bring Goblins to the laboratory in the near future.

Zhao Hai knew how good laboratories could be. Back on earth, these laboratories were key to humanity's scientific and technological advances. Therefore, Zhao Hai was making a laboratory for himself in order to prepare for the future.

Chapter 887 – The O'Neal Family's Response

Theo and Lewis were currently standing on top of the city lord's mansion, looking at the Dark Mist in the distance. The people who were sent to survey the situation had found out that the dark mist had already covered the entire northern part of the Ark Continent and has been slowly creeping further. This report made Theo and Lewis' faces ugly. Mad Dog and the others left to send word back to the family. At this time, Theo and Lewis were inside a small city with 30 magic armors and two war tanks.

Theo looked at the Dark Mist and couldn't help but clench his fist as he said, "I didn't expect that the Dark Mist is still expanding. No wonder the people from the Ark Continent left. What should we do? The family had already exerted great effort for this expedition."

Lewis was very clear about this point. Both of them were already branded with the O'Neal family's mark. It can be said that their fate was intertwined with the family. Lewis knew that the O'Neal family had made great efforts in order to enter the Ark Continent. If they fail this expedition, then the O'Neal family might not be able to recover. Their future would be bleak.

However, this Dark Mist wasn't very easy to deal with. It's certain that underneath this dark cloak was a ton of undead. Lewis can confirm this because only Undead and Dark Mages could use bone spears as an attack. And after he saw that Yin Fire, Lewis was absolutely sure that there were undead. This was because it would be impossible for Dark Mages to get in contact with Yin Fire without causing damage to themselves.

But even so, Lewis cannot display his restlessness at this time. He turned to Theo and smiled faintly, "Don't worry, the Family will surely find a way to deal with this. There are powerful cannons on the Family's ships."

Theo nodded, he was still young after all. Without Lewis here, the Undead would have already caused havoc to their team. Because of Lewis, Theo was able to keep a calm mind amidst the recent developments.

Then Theo turned to Lewis and said, "Brother Lewis, will the messengers come back soon?" Lewis shook his head and said, "I'm not sure. However, I'm certain that the family would make the proper arrangements. There's a good chance that they would send a warship here to support us. After all, warships have more firepower and can carry more troops. It can also save more energy."

Theo stared for a moment before he gave a nod, then he said, "Brother Lewis, since the undead would only come out at night, how about we do something else during the day?"

Lewis looked at Theo and said, "Do something? What do you want to do?"

Theo smiled faintly and said, "Now that the Ark Continent's people have migrated, the magic beasts began to thrive. Those magic beasts would be able to provide us with magic crystals. If we send our people to kill those magic beasts during the day, then we can make crystals for our own use. At the same time, we could also use this time to scout for minerals in the Ark Continent."

Lewis thought about it for a moment before he gave a nod, "Alright, let's go do that. We can spare ten people for that task. However, we cannot use our war tanks."

Theo happily complied as he turned around and went to manage it. Looking at Theo's departing back, Lewis couldn't help but smile. After that, he returned to looking at the Dark Mist. His brow wrinkled, he was worried about the current situation. The area covered by the Dark Mist was too big. Moreover, with the rate of its expansion, who knows what kinds of undead were lurking inside. Was it worth it for the O'Neal family to fight the undead?

While Lewis was worried about these matters, Mad Dog and his team arrived at the O'Neal family's camp located in the Rosen Empire. The O'Neal family had already occupied the entire Rosen Empire with the Patriarch moving to the Rosen Empire's Imperial Palace.

Although Zhao Hai had relocated the entire Rosen Empire's population, he didn't destroy the Imperial Palace. And even if the interior decorations had been taken away, the structure was still as elegant and magnificent as before. Therefore, it's understandable for the O'Neal Patriarch to settle there.

When Mad Dog's group appeared outside the palace, they were stopped by two magic armors. These two magic armors were God-ranks, therefore, Mad Dog didn't dare to be unreasonable, otherwise he would be killed on the spot. He jumped down from the war tank and then gave a bow, "Lion Squad's Mad Dog from the Scout Team. I seek an audience with the Patriarch, I have matters to report."

The two magic armors turned their head as they gave an announcement, "Lion Squad's Mad Dog bears news. He asks for an audience with the Patriarch."

Another magic armor not far away passed the message. Before long, the word got into the Imperial Palace and into the Patriarch's living quarters. A servant then knocked on the Patriarch's door and said, "Patriarch, Scout Team's Lion Squad has arrived for a report. They're asking for an audience with you."

The O'Neal Family's Patriarch was currently working. But when he heard the servant, he immediately send, "Send him in." The servant complied and then turned to a distant place and gave word to a magic armor, "Send him in!" The magic armor then passed the message over until it reached the Palace's entrance. After that, the servant led Mad Dog to the Patriarch's room.

The Patriarch looked at Mad Dog and said, "George, you brat. What happened? Did you discover something?"

George didn't expect the Patriarch to actually recognize him. His mood couldn't help but get lifted as he gave a bow to the Patriarch and said, "Patriarch, it's been ten days since we left here and headed north. However, after travelling for ten days, we actually met trouble. There is a place covered with Dark Mist. When I entered the Dark Mist to investigate, I was attacked by bone spears and after that grey fireballs. That fireball wasn't affected by our energy beams, instead, it actually strengthened it. After we came out and consulted Big Brother Lewis, he said that we've come to meet an Innate Yin Domain and those fireballs are possibly Yin Fire. Because of this, he decided to send us back to give a report while they remained to take watch over the Dark Mist."

The Patriarch stared, then he knit his brows. Naturally, he knew what innate Yin Domains were. He looked at George and said, "Has it been confirmed to be an innate Yin Domain?"

George shook his head and said, "Brother Lewis said that it had the characteristics of an innate Yin Domain. However, Innate Yin Domains don't exist under the sun yet this one did. But even so, Brother Lewis still believes that it should be an innate Yin Domain."

The Patriarch nodded and said, "Lewis' assessments are always safe. Since he said so, then it seems that it is an innate Yin Domain. If that is the case, then that would be troublesome. But I don't want to have Lewis going into the Dark Mist. You go take a rest first." George nodded before going away.

After George left, the Patriarch turned his head and said, "Call the Generals for a meeting." Then the servant at the door gave a sound of affirmation before leaving.

Before long, the Generals arrived at the Patriarch's room, Axe was also present. After the group had sat down, the Patriarch said, "George from the Lion Squad just arrived. He said that after travelling north for ten days, they were met with a Dark Mist. Lewis suspects it to be an innate Yin Domain. What do you think about this?"

The people in the room turned silent. Everyone here had fought many battles. Even Axe was experienced due to his love for exploration. All present knew what an innate Yin Domain was, therefore, they couldn't help but turn silent upon hearing the news.

After some time, a tall general stood up and gave a bow before saying, "Patriarch, we should send more troops there. A distance of ten days isn't far. If something happens there, then it would definitely a threat to us. Moreover, the O'Neal family already went all out in this conquest. Retreating will result in huge losses."

The Patriarch nodded. Then another general stood up and said, "Patriarch, I think the Ark Continent's migration has to do with this innate Yin Domain. We need to guard the boundary. From what I can see, we should send a battleship over for support. At the same time, we should request some strong cannons from the family as soon as possible."

The Patriarch gave another nod. Then another general stood up and said, "Patriarch, I think we should also quicken our southern survey. The south is too close to the Family. If a threat appears there, then the Family might be threatened."

The Patriarch hesitated for a moment before he nodded, "That's rational. We need to focus on the south as well. Axe, do you have anything to say?"

Axe stood up, gave the Patriarch a bow, and said, "Father, we've already occupied the Ark Continent. It's not clear why the people of the continent really left. And now, there's the innate Yin Domain. I think we should ask for more firepower from the family. We also need to adjust some magic armors in order to look for the resources of the Ark Continent and then mine them. This would fund the Family's operations, we need to recoup our expenses as soon as possible."

The Patriarch looked at Axe and gave a satisfied nod as he said, "My son has really grown up. That is a good idea. The dangers of the Ark Continent is still unknown to us, we must be ready to retreat at a moment's notice. However, if we retreat, that would be a huge loss to the family. The best thing we could do right now is to scour the continent for any mineral resource and mine it."

The generals agreed. In fact, the main reason they attacked the Ark Continent was to get commodities and minerals. If they didn't get any minerals here because they were busy finding out why the Ark Continent's people migrated, then that would just be putting the cart before the horse.

Even if the Ark Continent had turned dangerous and they needed to retreat, they still need to mine for minerals as much as possible. This would minimize the losses to the family.

After seeing that everybody agreed, the Patriarch nodded and said, "Pass this order. The Victory and the Glory would immediately return to the family to be restocked with 1000 strong cannons and an additional 10 thousand magic armors as soon as possible. At the same time, the Tyrant will carry a thousand magic armors and 50 war tanks in order to support the Lion Squad."

Those present stood up and immediately went on to execute the command. After they left, the Patriarch lightly frowned and said, "Interesting. There's actually an innate Yin Domain here. The Ark Continent is getting more and more peculiar. Who knows what else we could find."

Zhao Hai was also listening to the meeting. After the generals left, he turned to Laura and said, "It looks like the O'Neal family had started to become careful. I'm afraid their southern scouts would quickly discover the spatial rifts to the Demon Realm and the Divine Realm. I want to see how they react after seeing those two places."

Laura smiled faintly and said, "If I was the O'Neal family's Patriarch, in addition to sending people to monitor the Underworld and mining the Ark Continent, I would also send people to investigate the Demon Realm. At the same time, I would send people to attack us in the Divine Realm, just to see how strong we are."

Zhao Hai smiled as well and said, "They have a lot of things to do. I just don't know if they have enough manpower to do it."

Laura chuckled and said, "Well, they surely have enough troops. From what we just heard, they wouldn't use too much magic armors when mining for ores. And since there's no danger in the Ark Continent, those magic armors should be enough. It's the same with the Demon Realm. In this case, their troops can only be divided into two; the ones guarding the Dark Mist, and the other half can be allocated to us. However, I'm not sure about how much they'll send for the attack."

Zhao Hai nodded, "I think they shouldn't send too much to attack us. What we need them to do is to enter the Divine Realm and then we'll toss them to the Divines. Meanwhile, after they finish mining, we could just steal it off of their hands. Wouldn't that be better?"

Laura and the others chuckled. Then Lizzy said, "Recently, I've been sensing that Brother Hai really wants to steal. You really want to snatch everything. Brother Hai, if you see a girl in the future, will you snatch her as well?"

Zhao Hai pretended to lower his head as if he was thinking. After some time, he nodded and said, "That's a good idea. I haven't had a new wife for some time. It seems like now's a great chance." Then after he said that, he proceeded to run away.

After hearing Zhao Hai say this, Laura and the others immediately chased Zhao Hai. Naturally, they knew that Zhao Hai was just messing around. They just wanted to play along with their husband's antics.

After some time, Zhao Hai stopped. He just sensed a call coming from a messenger fish. Zhao Hai took the messenger fish and saw that it was the one that belonged to Bingya. Zhao Hai turned to Laura and the other and then smiled, "It looks like we have something to do." Then he spoke to the messenger fish, "Bingya, it's Zhao Hai."

Chapter 888 – Unprecedented Crisis

Bingya's voice was then heard, "Mister, the work is done. You can make your move at any time."

Zhao Hai nodded and said, "Don't leave the area. Only move when I give the signal. Don't let the Divines discover your actions, we need to make a surprise attack."

Bingya replied, "Yes. Mister can rest assured, the Divines have centralized the vassal soldiers in one area, we aren't so easily found." Zhao Hai nodded, then he said, "How are the Divines solving the food problem?"

Bingya smiled faintly and said, "The Divines are strictly monitoring the grain distribution. At the same time, they are also sending a lot of soldiers out in order to hunt magic beasts. The grains that the vassal soldiers were receiving have become less and less. However, the Divines didn't stop the vassals from hunting for themselves."

Zhao Hai nodded, then he replied, "The Divines didn't want the vassal soldiers to have suspicions. Tell the vassal races to not worry and not to show any hostility to the Divines. Wait until I arrive, then we can deal with the Divines." Bingya gave an agreeing sound.

Zhao Hai smiled and then stored the messenger fish. After that, he turned to Laura and said, "It's time to move." Laura smiled faintly and said, "Do we make a move on their supply ships? If we do, then the Divines would surely starve."

Zhao Hai replied, "I know they'll send more food soon. And in addition to food, they might send more manpower and Supreme Elders this way. At this point, they should have already suspected that the Scorpio Supreme Elder had met an unfortunate end..." Laura nodded, then she looked at Zhao Hai and frowned, "So Brother Hai, what do we do? Do we deal with their base? We can't just deal with them without suffering any losses." Zhao Hai smiled faintly and said, "Let's just wait. If we can't deal with the supplies, then we'll deal with the base. In any case, there's no way for them to catch up to us."

When she heard this plan, Laura didn't stop it. She knew that Zhao Hai already had Cai'er monitor the seas for the next few days. Once they discover the Divine Race's supply ships, then they would proceed to attack.

Cai'er was already at work. She didn't even need to be focused on this task, as long as she paid attention to it from time to time, then it would be fine. At this time, Zhao Hai's attention was turned to the O'Neal family.

Not only did the family send scouts to the northern part of the continent, they also sent a team down south. However, that team has yet to arrive at the Buddha Empire. Naturally, it was still impossible for them to discover the Demon Realm's spatial rift. But they were close to arriving at the Accra Mountains.

Zhao Hai still had some undead mining for ores in the Ark Continent. However, their quantity wasn't a lot and majority of them were iron armor beasts. There were also mining teams present in the Demon Realm as well as in the Taurus Continent.

The third day after Zhao Hai and Bingya talked, Cai'er told Zhao Hai that the Divine Race's supply fleet had come. The transport fleet this time included warships aside from ordinary cargo ships. However, one could see that the amount of grain being shipped has been reduced.

Zhao Hai saw the situation and couldn't help but smile as he said, "It seems that the Divines had no way of collecting ships in a short time. However, it also seems like they're carrying more spatial equipment this time."

Laura looked at the supply ships and said, "Will you make a move now, Brother Hai?"

Zhao Hai nodded, "Of course. Let's go and see who they sent this time to suppress my undead." After that, Zhao Hai and the ship disappeared and reappeared once more in a place not too far from the fleet. Then Zhao Hai slowly increased the ship's size as they approached the Divines.

Naturally, the Divines managed to spot the Hell King's ship and immediately responded. The warships quickly surrounded the cargo vessels. At the same time, the people from the ships flew up.

But what made Zhao Hai confused was the lack of Supreme Elders. These people should know that besides Supreme Elders, nothing could bring any threat to him. Why didn't the Divine Race send a Supreme Elder?

While Zhao Hai was confused, the sky suddenly turned black. Zhao Hai turned his head and saw a starry sky. There were large and small meteorites along with various planets. Not far away from these small celestial bodies was a star emitting a large amount of heat.

Zhao Hai and the others stared at this situation, enamored by the scene in front of them. This was especially true for Laura and the others. They didn't know about outer space, naturally it was impossible for them to know what they were seeing.

On the other hand, Zhao Hai was looking at it with curiosity. Although it was similar to the outer space that he remembered, he was sure that they weren't out in space. There was no gravity in outer space, people just float in mid-air. There's no air in space as well. However, those things were present where they were. Zhao Hai can be certain that this was the doing of the Divine Race.

Formation! This was the first word that popped into Zhao Hai's mind. Zhao Hai was almost sure that this was a formation established by the Divines. However, he didn't know what kind of formation this was.

He didn't expect the Divines to have this kind of weapon. It can actually changed the environment around them. This caused Zhao Hai to anticipate what would happen next.

Zhao Hai turned to Laura and the others and said, "Be careful, we've fallen into the Divine Race's formation. I believe the Divines will attack us soon."

Laura and the other nodded, but they didn't worry too much. Zhao Hai's abilities made them confident. Zhao Hai was almost invincible.

Zhao Hai didn't mind this as he commanded the ship's cannons to hit the celestial bodies at the distance. The energy beams launched out from the cannons and quickly reached the target. Several meteorites were destroyed immediately but the bigger planets only had a big hole. Everything was just like what would happen in outer space.

Zhao Hai couldn't help but knit his brows. To be honest, his understanding of formations was too poor. On the other hand, the Divine Race's formations were truly mystical. Trapping those who were beginners to magic formations would be easy for them.

At this time, Zhao Ha discovered that several planets had linked with each other. Then, these white links connected into the Taurus constellation. Before long, a huge golden bull rushed straight towards the Hell King's ship.

Zhao Hai frowned, these planets reminded him about the Taurus Supreme Elder. It was likely that this attack was the same one used by the Taurus Supreme Elder while using the Taurus Ultimate Weapon.

Zhao Hai didn't make a move and just waved his hand. After doing that, the cannons on the ship immediately launched its attacks towards the incoming bull. 100 energy beams coalesced and became one huge beam and hit the bull. However, something out of Zhao Hai's expectation happened. The bull just blurred for a moment before it continued on towards the Hell King's ship.

At this moment, Zhao Hai didn't have enough time to hide. When the bull approached the ship, the waves went on to mitigate its speed. However, the bull's radiance just decreased, it didn't vanish.

The bull rushed to the ship amongst the waves of water before it slammed on the ship. This caused the ship to sway gently.

This sway might be small, but it still made Zhao Hai frown. He discovered that this attack was actually stronger than the ones made by the Taurus Supreme Elder.

At this moment, Zhao Hai felt something rushing to the ship. When he turned his head, he saw several stars forming the sagittarius pattern. Then a horse-archer pulled his bow and sent a light arrow towards Zhao Hai.

It was time for Zhao Hai to move. With an intention, the ship shrunk as it quickly dodged to the side. But before Zhao Hai could calm down, the light arrow actually curved and homed into the ship.

Upon seeing this, Zhao Hai immediately made the cannons fire at the arrow. However, the result was the same as the Taurus bull. Although the magic cannons had hit the beam, the arrow only lost a bit of light as it continued to shoot towards the ship.

Upon seeing this, Zhao Hai coldly snorted and waved his hand. A giant scorpion appeared right by him and moved forward to meet the incoming arrow. When both became closer to each other, the scorpion used its tail to strike the arrow. With a banging sound, the arrow vanished.

Zhao Hai used this opportunity to return to his cabin and open the monitor. In the past, he was fortunate to escape the Dao Lotus due to the monitor. Zhao Hai wanted the monitor to help him this time as well.

However, Zhao Hai was left disappointed. The monitor was also confused, there simply wasn't anything useful in its display. After Zhao Hai saw this, his expression changed. He understood that the Space's monitor wasn't all-powerful. Things like the Divine Race's formations weren't able to be penetrated by the Space.

This was equal to erasing Zhao Hai's advantage. If the monitor was really rendered useless, then it's possible that Zhao Hai was in real danger.

At this moment, Zhao Hai felt an unprecedented crisis!

Chapter 889 – Way To Break The Formation!

Laura and the others were with Zhao Hai. They also saw the monitor's display. Since this wasn't something they had seen before, they became flustered after a while.

While Laura and the others panicked, Zhao Hai actually kept his calm. After a moment he opened his mouth and called out, "Cai'er, Cai'er, are you there?"

But Cai'er didn't reply which was unprecedented. Under normal circumstances, Cai'er would immediately reply to Zhao Hai's call. Zhao Hai can still feel his connection with Cai'er, but it seems like it has been blocked by something. At this moment, they had no way of contacting each other.

Zhao Hai's face turned uglier. He slowly walked out of the cabin and looked all around. The scorpion was still by the ship's side. On the other hand, the Taurus and Sagittarius constellations were constantly attacking the ship. But with the ship's cannons, ram, waves, and poles moving to defend, the enemy had no way of dealing with Zhao Hai.

However, Zhao Hai soon noticed that on the left side of the Hell King's ship, a constellation that looked like a goat lying on the ground and another constellation that was two fishes entangled with each other.

The two constellations slowly formed. Then, from the capricorn constellation, a goat with two curved horns rushed out. At the same time, two fishes also came out from the pisces constellation. Both were rushing towards the Hell King's ship.

Zhao Hai gawked, then he immediately ordered the ship's cannons to attack the goat and the fishes. The waves went in to help as well. The task of dealing with the bull and the archer was left to the ship's ram and pole. Zhao Hai was now sure that he was dealing with at least four Supreme Elders this time; the Taurus, Capricorn, Pisces, and Sagittarius. It seems like they've prepared this formation to kill him here.

At this time, Laura, with a scared tone, asked, "Brother Hai, what do we do now?" Zhao Hai looked at Laura and smiled, "Don't be scared, it's fine. They just want to drag us in. We don't have to fear when it comes to this battle. If they really wanted to stall for time, then let's just see who comes out on top."

Just as Zhao Hai said that, a huge meteor was suddenly spotted heading towards the ship. The ship didn't respond for a while, but just as the meteorite was about to hit it, flames immediately formed a wall. The meteorite was turned into ash, but not before shaking the ship.

At this time, more meteorites went crashing towards the ship. This caused Zhao Hai's expression to change. He can now affirm that there weren't only four Supreme Elders present. Instead, there should be five. Four were carrying the constellation attacks while one controlled the meteorites. Without a fifth elder present, the formation wouldn't have been this stable.

Zhao Hai's expression was ugly. Now that his connection with the Space was lost, asking for help from the Space was impossible. And although there were a lot of undead inside the ship, the strength of those undead weren't much help compared to his current enemies. If he released the undead, then they would just be annihilated.

Zhao Hai didn't know what kind of formation the Divines had used this time. However, there was one thing he can be sure of, this formation amplified the attacks made by the Supreme Elders. It can be said that once the continents worked together, then they would be able to increase the power of their ultimate weapons by many folds.

It was this point that Zhao Hai was careful of. To be honest, Zhao Hai wasn't threatened by the ultimate weapons. What he was taking in mind was the Divine Race's great formations.

The reason Zhao Hai was thinking about these formations was because they were able to cut his communication with the Space. If Zhao Hai wasn't careful, then all of the Divine Realm's ultimate weapons would gang up on him. Their power would surely be formidable.

If the Divines knew about Zhao Hai's thoughts, then they would surely rage at him. Zhao Hai was currently trapped, but now he was even thinking about their formation.

Zhao Hai looked out and saw that the meteorites were still coming. Then his staff turned into a huge hammer as he proceeded to smash the meteorites one after another. As long as the hammer hits the meteorites, the meteorites would immediately be crushed.

While Zhao Hai was pounding at the meteorites, he was also keeping attention to everything around him. He didn't want to spend too much time with the Divines, he needed to find a way to break the formation.

And just as Zhao Hai was looking at the meteors as well as the planets, he found out that the other planets were proceeding to smash themselves towards the Hell King's ship. If those managed to hit the ship, then things would surely become more troublesome.

While Zhao Hai was paying attention to these celestial bodies, he suddenly discovered something peculiar. The formation of meteors and planets only had one sole body that stayed stationary all throughout the event, it was a star.

This discovery made Zhao Hai stare for a moment, then he decided to take the risk. With only a thought, Zhao Hai directed the ship towards that single star.

The reason Zhao Hai discovered this peculiarity was not only because this star remained stationary, it was also because this was the only star present in the skies.

Upon ruminating on this thought, Zhao Hai immediately went to deal with the star. The Hell King's ship was very fast. In just a blink of an eye, he had almost reached the star. The waves underneath had wrapped the entire ship. A fire wall also supported the ship's advance. But even so, Zhao Hai could still feel the heat coming out from that star.

Zhao Hai didn't care so much about this as he went straight towards the star. However, something made Zhao Hai feel strange. He already pierced through the star, but the formation was still up.

Zhao Hai's expression changed, then he muttered, "Did I guess wrongly? That's impossible. In this great formation, everything other than this star had moved. This star should be the key to breaking the formation. Why was my action useless?"

Laura and the others couldn't understand why Zhao Hai was planning to go straight towards the star. However, they still decided to trust Zhao Hai. Nobody moved as they all waited for a result.

After seeing that nothing happened as they clashed with the star, Laura and the others felt relieved. But at the same time, their current situation didn't change.

Zhao Hai calmly scanned his surroundings, the heavenly bodies were still going towards the ship. The attacks from the four constellations also kept coming. This was not what Zhao Hai expected.

Zhao Hai looked at the star and saw no change. However, Zhao Hai still believed that this was the key for their escape. The ship just passing through the star didn't affect this belief. If the star wasn't the key, then it would've used its high temperature to assault the ship. However, the star stayed there, not doing anything. This was the flaw made by the other party. Their wisdom had caused their ruin.

However, Zhao Hai's attack didn't do anything to the star. So how could Zhao Hai get out of his current situation?

As he was thinking about the solution, Zhao Hai kept waving his staff as he smashed the incoming meteors. Zhao Hai suddenly thought about the contents of a book he had read before. In fact, there were a lot of books with the same content. Any big formation would surely have their own core, and that core would need to be protected for the formation to continue existing. Take this formation for example, its core was surely supported by smaller formations.

However, Zhao Hai's understanding with regards to formations was just too low. Him being able to break this formation was close to impossible. So what can he do now?

Zhao Hai frowned. And then his thoughts turned back to the time where he managed to break the Dao Lotus' formation. At that time, it wasn't so difficult. Was that because the Dao Lotus had no one commanding it?

As this thought passed through his mind, Zhao Hai's gaze couldn't help but shake. Since he had no way of contacting the Space, Zhao Hai's means of action became limited. At this time, all he had was his staff, the Hell King's ship, the scorpion, his undead. But among all other things that he could use, Zhao Hai actually forgot about one thing, the Dao Lotus!

The Dao Lotus was inside his body, not in the Space. Therefore, Zhao Hai can definitely use the Dao Lotus this time. When he thought of this, Zhao Hai immediately took the Dao Lotus out from his dantian. Zhao Hai didn't use the Dao Lotus to defend himself, instead, he directed the lotus to attack the star.

Break the firmament of reality!

Zhao Hai suddenly thought of these words. Although these words only appeared on novels and might be ineffective at this time, Zhao Hai still tried. Therefore, he thought of these words as he sent the Dao Lotus out.

After releasing the lotus, Zhao Hai began to pay attention to it. The Dao Lotus didn't meet with any trouble as it flew directly towards the star. The lotus looked as if it was going to be swallowed by the heat. However, from his connection to the lotus, Zhao Hai can feel that the lotus was spinning, it was still operating as normal.

Zhao Hai then controlled the Dao Lotus to launch an attack on the star. The eight trigrams appeared from the lotus; earth, wind, thunder, fire, mountain, water, heaven, and marsh. Then the lotus proceeded to rotate quickly, the eight trigrams followed along with it. In the end, the Dao Lotus was almost unrecognizable, the figure that can be seen right now was the scene of Primal Chaos!

Chapter 890 – Most Violent Way

Zhao Hai hadn't met this situation before. He just commanded the Dao Lotus to attack, but it seems that the Dao Lotus had a mind of its own and made its own move. This made Zhao Hai puzzled.

At this time, the scene of primal chaos exploded fiercely. Following a banging sound, the star vanished alongside the entire starry sky.

Zhao Hai looked outward and saw that the blue skies had returned. Not far away from him was the Divine Race's grain fleet. There were five Divines surrounding the fleet, all had difficult expressions on their faces. One of them had a rotating plate on his hand while the other four were in full body armor. Zhao Hai could recognize the Supreme Elder of the Taurus Clan among the armored men. Although he didn't know about the other three, Zhao Hai could still fairly guess who they were.

The one with two curved horns on his helmet should be the Capricorn Continent's Supreme Elder. The one with a big pair of wings and was equipped with a bow and arrow should be the Sagittarius Continent's Supreme Elder. And the one with fish fins on his armor should be the Pisces Continent's Supreme Elder.

The aura of these people wasn't small. The oldest one among them should be the Taurus Supreme Elder, the others seem to be younger.

However, Zhao Hai didn't have time to talk to them as he heard Cai'er calling out to him. Cai'er appeared in front of Zhao Hai and then hugged his neck as she cried, "Young Master, young master, you just disappeared. I can't find you. I was so scared."

Zhao Hai lightly rubbed Cai'er's head and said, "Cai'er, don't be afraid. This Zhao Hai will never leave you." After some time, Zhao Hai managed to calm Cai'er down. At this time, Laura and the others walked towards Zhao Hai. They looked at Zhao Hai with sincere gazes. They knew Zhao Hai would be able to solve this crisis.

Then Zhao Hai looked at the Divines and said, "And which Supreme Elders do I have the privilege to meet? I already know old Taurus, so there's no need for introduction. How about I guess the others? Hmm, you should be the Capricorn Continent's Supreme Elder. Should I call you Moroga?"

Moroga just snorted and didn't answer Zhao Hai. Although he still had his proud look, his eyes were full of dread.

Zhao Hai smiled faintly, then he turned his head to the person with wings and was equipped with a bow. "You should be the Sagittarius Continent's Supreme Elder. Please forgive me, I don't know your name."

The Supreme Elder had a calm expression as he gave Zhao Hai a salute and said, "Nice to meet you, my name is Shi."

Zhao Hai nodded, then he turned his head to the elder with fins on his suit, "And you should be the Pisces Continent's Supreme Elder. I apologize for not knowing your name."

The Supreme Elder of the Pisces continent also gave a salute and said, "Mingdasir has seen mister Zhao Hai."

Zhao Hai gave a nod. Then he turned his head to look at the person holding the plate, he smiled faintly and said, "I'd like to guess this elder's identity. If I have not guessed wrong, the formation was your doing. And the reason you're able establish the formation was because of your formation plate. Since your formation allows ultimate weapons to coordinate with each other, you're status shouldn't be that difficult to guess."

The Supreme Elder looked calmly at Zhao Hai. Seeing that the other party had stayed silent, Zhao Hai smiled faintly and said, "The Divine Realm has 13 continent. Each continent had their own Ultimate Weapon. 12 of the continents have their names going according to the constellations, only the Central Continent did not. At the same time, the 12 continents have combat suits that correspond to their continent's name. As far as I know, there's no word about the Central Continent having their own combat suit."

The Central Continent's Supreme Elder's eyes shrunk upon hearing Zhao Hai. Noting this small detail, Zhao Hai smiled faintly and said, "The Central Continent's Ultimate Weapon should be that formation plate in your hand. That plate could establish a formation that would allow the 12 continent's ultimate weapons to coordinate. If my assumptions are true, then you should be the Central Continent's Supreme Elder. But I have to apologize for not knowing your name."

The Supreme Elder looked at Zhao Hai and then said, "Mister Zhao Hai is too polite. Mister's guess is correct, I am indeed the Central Continent's Supreme Elder. I'm just known as Elder Star. I didn't think that mister would actually break the formation that we've prepared for a long time. Mister's strength is truly one of a kind."

Zhao Hai smiled faintly and said, "It is Elder Star that is being too polite. It seems like you've come here to kill me. Am I correct?"

Elder Star looked at Zhao Hai and then sighed, "To be honest, I didn't want mister to become my enemy. Mister's strength is beyond my expectations. However, Mister is just too strong, to the point of being a threat to the Divine Race. Because of this, I have no choice by to deal with Mister."

Upon hearing this, Zhao Hai laughed and said, "Elder Star really says interesting things. You don't want to become my enemy? Then why did the Divines open a spatial rift to my Ark Continent? Why did the Divines sacrifice millions of the Ark Continent's people, both young and old, for your blood sacrifice? My actions are something that the Divine Race had brought onto itself. You really think that the Divines could rein in every plane. However, you don't realize that you're just chess pieces for another person. A dog being commanded. A threat to the Divine Race's existence? Hahahaha, the Divines shouldn't exist to begin with!"

After Zhao Hai said that, the faces of Elder Star and the others turned ugly. Elder Star coldly snorted and said, "Zhao Hai, don't think that you're great just because I spared a good word or two for you. You think you can escape from our attacks?"

Zhao Hai laughed once more and replied, "Escape? Why would I escape? I want to collect all of your Ultimate Weapons for my own use. Did I just come here to watch you and run? And you hold me here while your grain ships would escape? Stop dreaming. From what I can see, there's five of you here. There are still four Supreme Elders not accounted for. Two should be back defending your continents. As for the other two, are they planning to head here and surround me?"

As Zhao Hai said that, the expressions of the Divines changed. Then at this moment, an extremely huge whirlpool suddenly appeared on the sea. The entire Divine Race fleet was swallowed up, nothing but those Divines who flew were left.

When all the ships had vanished, a small ball suddenly flew out from the sea and headed towards the Hell King's ship before plopping on top of Zhao Hai's head.

That small ball was Bubble, the source of Myriad Water. Before Zhao Hai left the continent, he had Bubble released to the sea in order to swallow the grain ships into its own storage space.

To be honest, Zhao Hai can deal with five of these Elders at once. However, if he did that, then he would have to use his true strength. This would cause the plane's suppression on him to become stronger. If he was unlucky, then he might prematurely ascend. Because of this, Zhao Hai didn't proceed to quickly deal with the five elders. The reason he talked with them was in order for Bubble to have time to prepare. This ended with the grain ships being swallowed up.

Moreover, the words that Zhao Hai said wasn't all just for the sake of conversation. The two Supreme Elders guarding the Taurus Continent were indeed heading here. They were the Cancer Continent and the Leo Continent's Supreme Elders.

The two arriving here was something that Zhao Hai desired. Amidst the expressions of the Supreme Elders, Zhao Hai gave a smile and said, "Ever since I was born, today's fight was the hardest one I've encountered. But everyone, I won't be here for long. See you next time!" After he said that, Zhao Hai vanished along with the Hell King's Ship.

Seeing Zhao Hai vanish, the expressions of the Supreme Elders changed. This was especially evident in Gold Ben as he said, "Not good! Nobody is left to defend our base in the Taurus Continent! Zhao Hai will attack!" When they heard this, the Supreme Elders' expressions turned ugly. Elder Star immediately said, "Quick, everyone go back to the base. We cannot allow Zhao Hai to destroy it!" After that, all of them flew towards the Taurus Continent with all their might. But unfortunately for them, nobody can beat a Space Ability user when it came to mobility. They were bound to be defeated.

When the Hell King's ship disappeared from the sea, it quickly re-emerged in an area not far away from the Divine Base in the Taurus Continent. After appearing, Zhao Hai immediately took a messenger fish and said, "Bingya, Bingya, are you there?"

Bingya's voice came, "Mister, I'm here."

Zhao Hai nodded and said, "Good. Listen, have the vassal soldiers prepare. We'll be dealing with the base. At this moment, the base has no Supreme Elder defending it. It's time to attack."

Bingya gave a nod, then he gave an affirmation before putting the messenger fish away and preparing for the attack. Zhao Hai looked at the base and snorted, "It's about time you fall." Then he made the Hell King's ship advance.

While the ship advanced, its size began to gradually increase. In the end, the ship became the size of a hill. At the same time, Zhao Hai released the scorpion as well as Bubble.

The Divine Race's base wasn't too far from the sea. This was made in order for them to receive supplies much quicker. But this also gave Bubble the chance to show his might.

Zhao Hai's speed was very fast. While advancing, the ship's cannons fired beams of light. Bubble went to the sea and began to make huge waves that crashed towards the base. These attacks caught the Divines off-guard.

Zhao Hai also released a large amount of undead to overrun the base. Although the Divines were fighting back with their cavalries and cannons, their progress wasn't very good.

There were 20 Domain Weapon experts who went out of the base, but they were eliminated instantly by the Hell King's ship. The ship's attacks were now more powerful thanks to the yin flame. This flame was quite sinister, its attacking strength was nothing to scoff at.

Although it was still daytime and sunlight was the best counter to yin flames, that rule only affects ordinary yin flames. Zhao Hai's yin flames don't have this weakness.

However, the Divine Race's base was built really well. Layers upon layers of protective formations made it hard for Zhao Hai to make a proper attack.

Zhao Hai knew that he couldn't deal with 100 million Divine Race soldiers in a short period of time. And it would be more troublesome if the Supreme Elders arrive. Because of this, Zhao Hai decided to have the Hell King's ship hit the base head on.

The Divines constructed their base on a mountain, completely hollowing its insides. Therefore, Zhao Hai wanted to use the ship to collapse the mountain in one go.

Outside the base, Bingya, who was preparing to cooperate with Zhao Hai along with the vassal soldiers, stared blankly as Zhao Hai drove the ship to slam the mountain. It looked like a suicidal move.

Bang. The sound of collision reverberated as the mountain collapsed. Dust and debris went everywhere. Some huge rocks even managed to fly towards the vassal soldiers.

Upon seeing this, Bingya became shocked. However, he quickly recovered as he gave an order, "Quickly hide!" The vassal soldiers weren't fools, they couldn't just stand there and wait to be smashed. They immediately scattered in all directions. Zhao Hai's attack gave them an extreme shock.

On the other hand, plenty of Divines inside the base weren't able to run away and were directly buried alive. Although there were people who managed to escape, all of them couldn't help but stare dumbly at what just happened. Their base was just destroyed, they were too shocked to think about escaping.

The Divines had thought about ways Zhao Hai could use to break through their base, and they even made all sorts of precautions. However, they didn't expect that Zhao Hai would use this barbaric method. Moreover, he even managed to destroy everything. The Divines were turned silly. All of their confidence and pride were now gone. For some, the only thing that was left was deep fear!

However, Zhao Hai didn't plan to let them off. The undead encircled the Divine race army. Only a single word was required and Zhao Hai would be able to eliminate all of them.
