

Another World 961

Chapter 961 – Huge Level Ups!

As soon as the three remaining combat suits were sent to the Space, a prompt was immediately heard, “12 Constellations combat suits Libra, Aries, and Virgo detected. The 12 Constellations Combat Suits are now complete.”

Zhao Hai also took out the Star disk and threw it into the Space. Another prompt came, “Special use map formation discovered. Formation disk is known as Star Disk. Formation can be used along with weapons and other materials in order to make it more powerful. Host can combine the Star Disk to the Seven Star Heaven Lock and the Hell King’s ship. This will allow the Hell King’s ship to use the strength of the stars as well as break every formation that is related to constellations. Host can now also unite the Dao Lotus with the Hell King’s ship, further strengthening the ship. This will allow the ship to use the strength of the myriad worlds and break all kinds of formations. Finally, the Host can combine the Hell King’s ship with the Blood Ghost Staff. The Hell King’s ship wouldn’t only exist as a plate, its form can also be changed at will.”

Upon hearing this announcement, Zhao Hai felt great happiness. He didn’t expect that things would be this good. However, this great event was still far from ending. The Space continued to speak, “Since the Star Disk contains the power of the stars, the Space has gained stars. Everywhere in the Space now has stars in the sky, complementing the Space. Space levels up to 100 and has met the requirements for becoming a low-grade Cultivation Space. Host can now purchase 50 ordinary backgrounds and 10 low-grade cultivation backgrounds. Universal Scanner and Universal Processing machine has reached intermediate standard, allowing for the analysis and manufacturing of low level Cultivation items. Host can now assign a region to be an accelerated place. Presently, Host can accelerate a region’s time by ten times. Note: It can also make plants mature quickly, but they would have more years to their record. The special region is good for growing natural treasures. Host may also use the region to cultivate. Ten years of cultivation inside the region would be the same as one year of cultivation outside.”

Zhao Hai laughed out loud. He didn’t think that the Space would become this powerful. It rose to level 100 and became a low-grade Cultivation Space. For Zhao hai, this was an absolutely good thing. This was especially true for the time acceleration function. It had great uses for him.

At this moment, there were plenty of things inside the Space that can develop to become heavenly treasures. Unfortunately, these things needed a lot of years in order to grow. Now that the ability to dilate time had come, the time needed to cultivate these things had reduced by a lot.

However, that still wasn’t the end. After the previous prompt ended, another one came, “Since the Star Disk is an item with Stellar energy, special high level cultivation method has been provided. Myriad

Stellar Transformations Secret Art acquired. Cultivation method is divided into three aspects, attack, defense, and auxiliary methods. Once Host combines the Dao Lotus with the Star Disk, the Myriad Stellar Transformations Art will evolve into Myriad Stellar Transformations Yin-Yang Art. Asking Host for permission in order to fuse the Dao Lotus and the Star Disk.”

Zhao Hai laughed even louder, he was too happy. This special reward came unexpected. For Zhao Hai, being able to acquire a Cultivation Method was too important.

Zhao Hai quickly agreed, “Combine, combine everything! Cai’er, go and see if the scanner and the processing machine requires money to upgrade. If not, then immediately buy as many backgrounds as you can.”

Cai’er immediately complied. Then at this time, Zhao Hai’s staff vanished. Zhao Hai could also feel the a force from the Dao Lotus inside his body, it now has the energy from the Space. A great amount of energy was integrated into the Dao Lotus. Upon internal examination, Zhao Hai found that the Dao Lotus had become different compared to before. In the past, the Dao Lotus only had the eight trigrams, looking very mysterious. Now, the eight trigrams below the Dao Lotus became a Yin-Yang pond, rotating non-stop. Along with the pond’s rotation, the power of the heaven and earth seem to be sucked into Zhao Hai’s body. In the skies above the Dao Lotus was a black void littered with stars. Starlight would occasionally fall from the void and into the Dao Lotus. When this happened, the Dao Lotus’ petals seem to sway gently.

Zhao Hai felt that his spirit form became more tangible as it began show signs of breathing. At the same time, Zhao Hai felt his mental power being strengthened.

The Gold Core in his dantian had become bigger as well. It emitted golden light, baptizing Zhao Hai’s body. At this time, there was no part in Zhao Hai’s body that felt uncomfortable.

Zhao Hai closed his eyes, enjoying the baptism. Then at this time, another prompt came in, “Spiritual Artifacts detected in the Space. Level of Spiritual Artifacts is too low, promoting their level. Spirit of the book, spear, sword, hammer, staff, bow, and whip has been promoted. Because of the existence of the Artifact Spirit, item can now command themselves to battle. But they would still listen to the Host’s commands.”

Zhao Hai was shocked once again. He didn’t think that there would be more surprises. At this time, the Hell King’s ship vanished and flew into the Space. Meanwhile, the Staff came back.

Zhao Hai held his staff and took a look at it. On the staff were the symbols of the twelve constellations. The head of the staff wasn't the original skull, instead, it has turned into a lotus. This lotus had seven pistils and at the tip of each pistil was a small star. These pistils were swaying gently. Upon further inspection, one could see that the pistils were arranged into the shape of the Big Dipper and not in a circular manner.

Stellar shimmers can also be seen from the Staff, making it look very beautiful. Zhao Hai happily looked at his staff before waving it around, making the Hell King's ship appear. The ship had become beautiful as well. There was still the image of Hell on its hull, but both sides had disks totalling to 12. Each disk had its own constellation as all of them spun around.

Below the ship, instead of seawater, a giant lotus can be seen. From what can be seen, it seems like the ship was nestled on top of a lotus. There were also occasional sprays of bluish water containing starlight. The entire ship looked like a masterpiece made in heaven.

When Laura and the others saw the Hell King's ship, their eyes couldn't help but shine. They didn't expect the ship to become even more beautiful.

Zhao Hai waved his staff again, and this time the disks on the side of the ship flew out. After a flash, the twelve constellations assumed their form. They went according to their own zodiac but they can change their form at will.

Zhao Hai nodded before boarding this ship along with Laura and the others. The combat suits returned to being disks and went back to the side of the ship. There weren't any huge changes on the ship. But now, the wind chimes of the ship had been replaced by lotuses.

Zhao Hai stood on the deck of the ship and made a command using his mind. After that Laura and the others discovered that the ship reverted to its appearance before the upgrade. This caused some of them to be confused.

After that, Zhao Hai made another command and turned the ship into a huge lotus. The ship was now gone. When he saw this, Zhao Hai nodded. The Hell King's ship now had the staff's ability to assume any form.

When Laura and the others saw this, they quickly understood what Zhao Hai wanted to do. Then they proceeded to inspect the lotus. The lotus still had eighteen layers. At this time, the group was standing on the uppermost layer. Splashing below the lotus was the bluish water. And on each of the lotus' layer, a mural of Hell can be seen on the lotus petals. Also on, each tip of the lotus petals were small wind chimes.

Zhao Hai gave a satisfied nod before turning to the women and said, "In the future, we'll be using this form of the Hell King's ship, what do you think?"

Laura nodded as she smiled and said, "Alright, that is a great idea. It's more attractive this way." Lizzy and the others nodded as well. They were now looking all around to inspect their new vehicle.

Zhao Hai smiled faintly and said, "Let's go head inside. I want to see what this Myriad Stellar Transformations Yin-Yang art is."

Laura and the others nodded before entering a room along with Zhao Hai. The insides of the room didn't have any changes besides being much larger compared to before. After seeing what is inside, Zhao Hai and the others proceeded to enter the villa. After that, Zhao Hai called out, "Cai'er, let me have a look at the Cultivation Method."

Cai'er nodded. Then after that, a book appeared before Zhao Hai. This book floated in the air before a small spirit came out of the cover. The figure bowed towards Zhao Hai and said, "I have seen Young Master Zhao Hai."

Zhao Hai stared, then he immediately recovered, he looked at the small figure with curiosity as he asked, "Are you that improved book? Hmm, you are the artifact bestowed by the Divines to the Radiant Church. Now that you have levelled up, you need a new name. How about this, from now on you will be known as Compendium of Treasured Scriptures."

The spirit bowed to Zhao Hai and said, "I thank the Young Master for bestowing me a name."

Zhao Hai nodded and said, "Do you have the cultivation record? Let me have a look."

The Compendium nodded before the book opened up. After that, huge writings appeared in front of Zhao Hai. Zhao Hai carefully looked through these writings. The letters were well written and organized. The characters weren't overly small, they were sized enough to be comfortable.

Zhao Hai couldn't help but nod. Then he proceeded to read the cultivation method, the Myriad Stellar Transformations Yin-Yang Secret Art.

As he read on, Zhao Hai kept trying to figure out the root of the method. After reading through the first part, Zhao Hai discovered an issue. According to the method, given Zhao Hai's present strength, he could only practice the first part. Just the first part of this cultivation method was this formidable, it caused Zhao Hai to be startled.

Chapter 962 – No Repulsion?

Zhao Hai wanted to turn the page, but he discovered that the pages seem to be stuck. He immediately turned to look at the spirit and said, "...Compendium, why wouldn't it turn?"

The Compendium immediately answered, "Replying to the Young Master. This cultivation method is very special. With the Young Master's current strength, you can only read the first part. If the Young Master wants to forcefully read the second part, then it's possible that you would suffer a backlash on your body. This one suggests to refrain from reading the second part for now."

Zhao Hai stared, then he nodded and said, "Alright. I'll be fine with reading the first part."

After he said that, Zhao Hai went his room to look into the mysteries of the cultivation method. The more he pondered, the more he felt the endless uses of the method. At the same time, he also realized how complex it was.

After some time, Zhao Hai began to practice. The contents of the first part were already understood by him. However, it was still very difficult to practice, the method was too complicated. The method was more complex than the other cultivation methods, and this was only the first part. Who knows how difficult the whole method would be.

Originally, Zhao Hai felt that he was already very strong. But when he started cultivating using the method, he understood that his strength still fell short.

The energy inside Zhao Hai's body was originally azure-colored. But after using the cultivation method, Zhao Hai found that his energy had become bright silver. Moreover, his energy began to shine, just like starlight.

Not only did Zhao Hai's energy transform, it became compressed as well. If Zhao Hai's previous energy was an azure colored mist, it now had become a silvery liquid. This caused his energy to be ten times compared to before.

As Zhao Hai's energy transformed, Zhao Hai discovered that the Plane's repulsion had weakened. This caused Zhao Hai to be puzzled. He can confirm that he became ten times stronger, so why did the repulsion reduce?

As Zhao Hai was thinking about this, the blood in his body began to boil. This startled Zhao Hai. Then he immediately went to look into the state of his body. His energy has been fully transformed.

He didn't know how long, but his transformation was completed. Moreover, the Myriad Stellar Transformation Yin-Yang Method's first part had established a good route through Zhao Hai's body. Zhao Hai let out a long breath before opening his eyes.

Upon opening his eyes, Zhao Hai couldn't help but gawk. This was because the room had gone dark. Zhao Hai turned his head to look out the window, but he discovered that it was closed.

It was at this time that a surprised voice was heard, "Brother Hai, you're awake." Zhao Hai turned his head to see Berry.

Zhao Hai stared, he looked confused at Berry as he said, "Berry, when did you come back? What about your people?"

Berry smiled and said, "Brother Hai, I've been back for two days now. I've already arranged things for my clan, there's no need for me to return this time."

When he heard Berry, Zhao Hai picked up some information, "You've been back for two days? Why didn't I know about this? Also, how is the outside doing?"

Berry chuckled before she hugged Zhao Hai, "Of course you wouldn't know, you've been cultivating for three days. I don't think there's anything significant happening outside. It's currently night, but the stars are very beautiful." Zhao Hai nodded, he knew that this might be because of the Space's recent upgrade. He didn't think too much into it as he turned to Berry and said, "What's wrong? Were you worried about me?"

Berry nodded, "We're quite worried. But we also knew that you wouldn't have any problems. Sister Laura and the others already went to take a rest. Yesterday, Megan was the one who guarded you. Today's my turn." Zhao Hai nodded, "I'm fine, there's nothing's wrong. How is the Space?"

Berry smiled and said, "It's doing well. Cai'er already divided the accelerated region among the various backgrounds. The Processing Machine and the Scanner have also been upgraded. 50 ordinary backgrounds have been bought, but the low-grade Cultivation Backgrounds haven't. We're waiting for you to make a decision."

Zhao Hai nodded, then he turned to look outside and said, "Let's go, join me outside."

Berry nodded before going with Zhao Hai outside. After exiting, Zhao Hai breathed in. He discovered that after the Space's upgrade, the environment had become much better compared to before.

Then he looked at the sky and saw a falling star, it looked incomparably beautiful. Zhao Hai turned to Berry and smiled, "I didn't think that my energy would be reduced by a lot after using the new cultivation method. However, the quality has greatly increased. Because of this, the plane isn't repelling me. It seems like I can stay here for a while longer."

Berry became glad after hearing this, she quickly replied, "Really? That's fantastic. Then we need to collect more things to upgrade the Space." Zhao Hai smiled faintly, "Yes, we'll collect more things for the Space. Right, how is the O'Neal family doing nowadays?"

Berry smiled and said, "They're doing quite well. Although their base haven't been completed, their relocation is pretty much done. Sister Lizzy and Sister Megan began directing them to the Winged Pegasus Clan over the two days you were gone. Brother Hai, you're very tolerant towards the Winged Pegasus. It's about time to teach them a lesson."

Zhao Hai just smiled and said, "Now isn't the time. If we made a move towards the Winged Pegasus Clan this early, then the Thunder Clan and the Barbarians might feel dissatisfied. Let's use the O'Neal family to teach them a lesson."

Berry pouted as she said, "They're not thinking well. If they were Demons, then the Great Demon King would've already sent an order to destroy them."

Zhao Hai smiled faintly. Zhao Hai didn't know what to say to the Succubus. To the Demons, the weak should surrender to the strong, it was a natural process. If you don't surrender, then you can just wait before you get destroyed. This was the rule of the Demon realm, but this rule wasn't suitable to every other place.

After seeing Zhao Hai staying silent, Berry said, "Brother Hai, at this point, more and more soldiers from the Devil Legion are equipping themselves with combat suits. Their fighting strength has been promoted by a lot. Before I came back here, I went to see his Majesty the Great Demon King. The Great Demon King told me that if you don't let the Devil Legion fight, then they might as well go to the Hell Space to exercise."

Zhao Hai thought about this and said, "Going to the Hell Space wouldn't have any use to them anymore. Go tell the Great Demon King tomorrow that I'll have them participate in a fight. In any case, we will clash with the O'Neal family soon. Let's have the Devil Legion come out and use them as exercise."

Berry nodded, "We have already prepared the combat suits for the foreign races. We can return them tomorrow. After that, what do we do?"

Zhao Hai replied, "We'll take the Leo Divines into the Space. Then we'll have the O'Neal family deal with the Winged Pegasus Clan. Once we get the Winged Pegasus to the Space, we'll direct the O'Neal family to the foreign races. I want to see which is stronger, the O'Neal family's magic armors, or the foreign races' combat suits. And if the foreign races are stronger, I want to see how the O'Neal family plans to deal with them. Meanwhile, we'll use that time to sneak into the Atlanta Plane."

Berry's eyes shone when she heard this. Then she said, "That's great. I've been curious about the Atlanta Plane. I want to see how they go about their life."

Zhao Hai smiled faintly and didn't say anything. Him going to the Atlanta Plane was mainly because of the Ascension Magic Armor, so that he could ascend.

The two spent a little while outside the villa before they went inside to rest. The next morning, when Laura and the others woke up and saw Zhao Hai, they became glad.

Zhao Hai looked at the group and smiled, "Alright, let's eat. After the meal, you'll go to the Space and study the Myriad Stellar Transformation Yin-Yang Art. This cultivation method is very good."

The women nodded. Then after eating the food that Meg made, the group entered the Space to study the cultivation method. However, Zhao Hai believed that they would take a much longer time compared to him.

After Laura and the others entered the Space, Zhao Hai turned the Hell King's ship's appearance from the lotus to the one it had before. Then he proceeded to head towards the Libra Continent.

When Solomon and the others saw Zhao Hai, they immediately went forward to greet him. After inviting them into the ship, Zhao Hai turned to look at the group and said, "Everybody, I've fixed the ultimate weapons, you can now take them back."

After Solomon and the others expressed their gratitude, Solomon said, "Does Mister have somewhere to go next? If not, then can we invite you to stay with us? We will definitely treat Mister well."

Zhao Hai smiled faintly and said, "You're too polite. However, I have something else to do. I won't be able to stay here for long. However, I have something I need your help with."

Solomon quickly replied, "Mister, please tell us. As long as it's possible, we will certainly do it."

Zhao Hai smiled and said, "Before Elder Star and the others took their own lives, I accepted their condition. Because of this, I'd want to personally deal with the Leo Divines. What do you all think?"

Solomon hesitated for a moment and said, "Will Mister deal with all of them? If Mister wants us to let them go, then it'll be troublesome. We cannot just let go of our years of resentment."

Zhao Hai smiled faintly and said, "Rest assured, from now on, the Divine Race would disappear from the Divine Realm. This place belongs to you now."

When Solomon heard Zhao Hai, he couldn't help but stare, then he said, "Mister, didn't you make a promise to Elder Star and the others? If you don't want to violate the oath, then you can just let us handle it."

Zhao Hai just smiled and said, "I will go there myself. I will let them survive, but not too many. I'll give them a spark of survival, but they won't be in the Divine Realm anymore."

Chapter 963 – The Situation of the People In the Space

Upon hearing Zhao Hai, Solomon thought about Zhao Hai's ship that can hold a lot of people. Solomon seemed to have reached an understanding as he nodded and said, "Alright, then we'll be depending on Mister. You can go to the Leo Continent at any time."

Zhao Hai smiled faintly before bowing to everyone and said, "Thank you very much. I will begin immediately. I'll have to ask Patriarch Solomon to send word to your troops."

Solomon was also aware of Zhao Hai's mysterious ability to appear and disappear, so he just nodded. After Solomon and the others got down from Zhao Hai's ship, Zhao Hai proceeded to vanish from the Libra Continent and reappear in the Leo Continent.

Upon appearing in the Leo Continent, Zhao Hai immediately attacked the Leo Divines. The situation with the Leo Divines wasn't doing very well. While fighting against the foreign races, the losses they had suffered wasn't small. Although they managed to hold the foreign races back, the price they paid was very huge.

They could only hope that their Supreme Elder would come back. However, their Supreme Elder didn't return. Instead, Zhao Hai came, this caused huge damage to their morale.

Zhao Hai didn't hold back against the Leo Divines. Because of this, everyone who attacked were killed off, those who behaved were sent to the Space.

Zhao Hai had done such things multiple times. The undead were also used to this. Since the undead had some sort of intelligence, they no longer needed Zhao Hai's command during the battle.

The foreign race army had already received their Patriarch's order, so they didn't participate in the attack. However, they were still able to see how easily Zhao Hai managed to deal with the Leo Divines. When they saw this, their backs couldn't help but turn cold. This was the first time they saw this kind of attack. Zhao Hai's undead had shocked them greatly.

The one that surprised them the most was the incomprehensible number of undead that Zhao Hai had. When Zhao Hai appeared, it seems like the entire sky of the Leo Continent was covered in undead, it was an extremely terrifying sight.

The more curious foreign race members were able to witness the fate of a small town with a hundred thousand people. Zhao Hai's undead army only took half an hour to get rid of the town. The town was left with no living entity, people or magic beasts. All of them vanished from sight.

Every time Zhao Hai emptied a city, the foreign race army would go and occupy it. However, the foreign races discovered that their speed was still not enough to catch up with Zhao Hai.

Another thing that surprised them was the fact that the undead seem to have unlimited energy. Even after attacking for an entire day, the undead still kept going on.

A day passed, the foreign races could no longer see Zhao Hai. Two days, the foreign races had seized half of the Leo Continent, yet Zhao Hai still wasn't in sight. It seems like Zhao Hai had ended the war.

On the third day, the foreign race army had occupied the entirety of the Leo Continent. However, they still couldn't see Zhao Hai, it looks like Zhao Hai had already left.

The foreign race soldiers were surprised. They immediately reported Zhao Hai's disappearance to Solomon and the others. When Solomon's group heard this, they became shocked. Now they were curious about Zhao Hai's true strength. A single person was able to deal with a Divine Race continent in just three days. Even thinking about this made their backs turn cold.

So where was Zhao Hai? Zhao Hai was currently inside the Space. He was no longer being repelled by the Plane at this moment. Moreover, Zhao Hai discovered that the quantity of his energy has become a tenth of what it was before. However, this didn't make his attacks weaker. This was because the energy inside his body was also ten times more potent compared to the past. In other words, Zhao Hai's energy stayed the same despite being reduced. It would take some time before the Plane's suppression would return.

The Stellar Transformations Art was truly formidable to be able to achieve this. Zhao Hai can clearly see that the art was much better compared to the one he practiced before.

Progression on any cultivation method involves the amount of energy inside one's body. It was just like filling a barrel with water. Half of a barrel was still not enough to fully utilize one's strength.

If the cultivation method that Zhao Hai used before was like putting water inside a barrel, then the cultivation method he used now was like filling a barrel with mercury. This made the barrel much heavier than before.

Because of this, with his barrel still not full, Zhao Hai was able to enter the Space. Zhao Hai was currently heading towards the villa, there he saw Laura and the others cultivating.

Just like Zhao Hai thought, the cultivation of the others were slower than his own. Since their bodies weren't as good as Zhao Hai, it would take them longer than three days to refine their energy.

Although their speed was slow, Zhao Hai didn't think of it as an issue. In the meantime, Zhao Hai observed the O'Neal family's base in the Taurus Continent.

The O'Neal family had yet to fully construct their base. After all, their base was enormous. While construction was happening, their scouts were beginning to look through the surrounding areas. However, they still haven't found the spatial rifts of the three clans. Because of this, Zhao Hai wasn't too worried about making a move.

After that, Zhao Hai shifted his attention to the Divine Space. In the beginning, the Divines had ravaged their surroundings. But now, they had started to behave. When they entered the Space, the Divines slowly began to understand that the Divine Race was over. The Divines would now live in this place from now on.

It was only after realizing this point that the Divines began to see how good the environment was. Compared to the Divine Realm, they wouldn't need to worry about food in this place. Moreover, there were churches in various places that allowed them to exchange goods. Life was very convenient.

Additionally, there were no slaves in this place, nor were there people who collected taxes. In this war, the Nobles of the Divines Race had lost their dominance among the other Divines. Because of this, the Divines were truly free.

Also, the Divines had discovered that one couldn't do crimes in this place. You cannot steal nor hurt another person, or else you would be punished.

The Divines had seen it with their own eyes. There was one Divine who bullied a family with only an old man, a woman, and a child. The next day, that man vanished. Then after a month, the man appeared once more. But this time, the man wasn't looking so good. He became thin and pale. When the people asked him where he was, the man was immediately frightened, then he said that he didn't want to recall where he came from.

Then later on, a person who stole someone's belongings vanished for seven days. When he reappeared, his expression was the same as the previous person. When he was asked, he said that he was locked in a completely dark room. Nobody talked to him nor was there any other noise. Although food was provided to him, he stayed in place for seven whole days. The person said that being locked in that place for seven days was the most terrifying thing he encountered in his past seven years. He wasn't willing to return to that place.

There were a lot of similar events like this inside the Space. Once a person commits a crime, they would be sent to the dark room. Some of the more serious offenders, like murderers, were killed on the spot. But besides them, everyone got punished. They didn't know who took them, they just felt that they were transferred to the room after they did their crime. Then after being sent to the room, a voice would tell them about their crime and their punishment. After that, silence was the only thing that remained. The dark room wasn't big but it wasn't small either, it was about five by five meters big.

By word of mouth, the matter regarding the dark room spread throughout the Divine Space. This caused the Divines to be terrified, some people even said that they'd rather die than be sent to that room again.

However, this thing would never be accomplished. Once you enter the dark room, you completely lose your freedom. If you decided to kill yourself, then a strange force would take control of your body, making you lose all your strength. Because of this, committing suicide was impossible.

After several people were sent to the Dark Room, the Divine Space began to calm down. It almost turned into a high moral society where law and order prevailed.

What the Divines did now was to work every day and gain things to be exchanged for items that they need like daily necessities, books, and other items aside from weapons.

The Divines who entered the Space first began to get used to their current life. Some even thought that they were living a better lifestyle.

However, this didn't mean that they had forgotten about their hatred towards Zhao Hai. Because of this, Zhao Hai didn't appear inside the Divine Space. He just paid attention to them and see how they were living their life.

After seeing that the Divines were doing well, Zhao Hai turned to look at the other Spaces. They were doing very well, especially those in the Ark Space. Some novels began to be made and even some short movies which Zhao Hai was eager to see.

When the people from the Ark Continent saw Zhao Hai's projections, they became curious about its origin. Those who liked to research immediately started this endeavor. In the end, they were finally able to see the advantages of magic formations. It was able to record light and project them to another place. Those who were keen of mind began to make stories and then show the recorded images to other people. This caused the emergence of short movies. Its initial development was just like the movies back in the earth, they were first made without sound and colors.

But even if this was the case, it made life in the Ark Space even more colorful. Before long, magic formation research became to hot topic among the populace.

This was what Zhao Hai wanted to see the most. The researchers in Wild Dragon Island can only do so much. Now, with the entire continent helping in the research, the development of technology would surely be astonishing.

Compared to the Ark Space, the Demon Space went another direction. The Demons didn't research magic formations, instead, they began to look into different kinds of plants.

This might have stemmed from the lack of fauna back in the Demon Realm. Due to its scarcity, the Demons began to be keen in looking into plants. Zhao Hai hasn't seen the Demon Space for quite some time. And now, its state had given him a surprise. He didn't expect the Demon Space to become a plant kingdom. Every Demon family had plants of different kinds planted all around their dwelling.

Zhao Hai can see that they didn't cultivate those plants for consumption, it was just because the Demons liked them. With such plants proliferating in their surrounding area, the Demons managed to develop a new occupation, Potions Master!

There was no such occupation in the Demon Realm before because almost all of the plants there was poisonous and highly toxic. Nobody in their right mind would carelessly touch any kind of plant.

However, everything was different inside the Space. Plants were aplenty here, moreover, most of them weren't harmful. Because of this, the Demons started to study plants and some even decided to taste everything they came across.

Zhao Hai was similarly glad to see this situation. They can research as much as they want. And because of this, Zhao Hai decided to establish a reward system. No matter which area of research, magic formations, plants, or any useful thing, as long as they discover something new, they will be rewarded. Naturally, the rewards differed between each contribution.

Zhao Hai's decision roused the enthusiasm of the groups inside the Space. This was especially true for the Goblins. Their race was born to study magic formations. Ever since they learned how to read as well as recognize basic magic formations, almost all Goblins dabbled in the study of magic formations.

After looking at their frantic expressions, Zhao Hai became happy, he also gave more abundant rewards for the Goblins. The Goblins didn't really care about food, drinks, nor the place they lived in. They just loved to look at magic formations, so they sunk their heads into their research.

Compared to the other groups, the Thunder Clan, Barbarians, and the Winged Pegasus were not doing as well. This was because they had just entered the Space and had not yet fully settled themselves. This

was especially true for the Winged Pegasus. Since they were not willing to enter the Space, their situation was becoming more chaotic.

Zhao Hai didn't care about their situation nor did he head there to help. He didn't want to be seen as the type who wanted to interfere with other people's matters. After all, the situation of the three clans was quite special.

Three days after Zhao Hai dealt with the Leo Clan, Laura and the others completed their study on the new cultivation method. Naturally, their route, energy, and physical ability still fell short compared to Zhao Hai.

Chapter 964 – Atlanta Plane

After Laura finished cultivating the Myriad Stellar Transformations art, she proceeded to hand the method over to Karen. However, Karen didn't like studying the method, he said that it's very annoying.

Zhao Hai didn't force Karen to study. To be honest, Zhao Hai discovered that the Stellar Art was suited for attacks. Karen didn't like fighting and just liked to do research.

After that, Laura just handed the method over to Green. She didn't give Grandpa Green any pointers, he could understand it on his own.

Upon seeing that Laura and the others were done practicing, Zhao Hai immediately called them over to the living room. After asking them about their experiences, Zhao Hai nodded and said, "Alright, it's great that you're done practicing. In the past few days, I've been busy observing the various groups inside the Space. Now that the time is right, we should prepare our next plan."

Laura looked at Zhao Hai and said, "Brother Hai, are you preparing to deal with the Winged Pegasus Clan? I think we should start to make a move, if we don't teach those guys a lesson, then they will continue to be a pain in the head."

Zhao Hai smiled and said, "I'm also losing my patience towards the Winged Pegasus. However, I made a promise to Shan. Otherwise, I wouldn't have let them go free all this time. Let's just start sending undead to the O'Neal family's scouts and slowly lead them towards the Winged Pegasus Plane."

Lizzy looked at the screen and said, "Brother Hai, did you make a move? How did the O'Neal family react?"

Zhao Hai slightly frowned, "If I could describe their reaction, then i can only say that it's strange. They seem to be very sensitive. As long as they see an undead, they will immediately pursue them."

When Lizzy heard this, she frowned and said, "It's not the style of the O'Neal family to throw caution out the window. What happened?" Zhao Hai also frowned, "Right, the O'Neal family isn't acting normal. However, this doesn't have anything to do with us at this time. Let's just lead them to the Winged Pegasus, let's see what they do then."

The group nodded, then ZhaoHai turned his head to look at everyone and said, "I want to take a look at the Atlanta Plane, what do you think?"

When Lizzy and the others heard this, their expression couldn't help but change. Then Lizzy asked, "Brother Hai, do you really want to go to the Atlanta Plane? When do we leave?"

Zhao Hai smiled faintly and said, "We'll go now. Don't forget, I gave Axe a token. We now have mapped a portion of the Atlanta Plane. We can go there directly and learn about their situation."

Laura looked at Zhao Hai, her expression looked quite strange as she asked, "Brother Hai, you're not planning on ascending in the Atlanta Plane, are you?"

When Zhao Hai heard Laura, he couldn't help but stare for a moment before he shook his head and said, "Impossible, the situation between the Atlanta Plane and the Ark Continent is different. I just want to head there to find clues about the Ascension Magic Armor. I also want to confirm if the plane is under Lu Wei's control or not, and if not, then I want to find out who the Plane Manager is. I also want to see their relationship with their lower planes."

When Laura and the others heard Zhao Hai, they couldn't help but nod. To be honest, they also wanted to find out, after all this matter involved the state of their future.

After seeing that the others didn't speak, Zhao Hai nodded and said, "Actually, we can also play around in the Atlanta Plane. The plane has a lot of people in it. As long as we forged some IDs we can explore wherever we want."

The eyes of Laura and the others lit up when they heard this. Although the Space's environment was good, they still couldn't help but feel bored inside. Moreover, there was nothing special inside the place where the Divines were transferred into. Going to a new place right now would be great.

After seeing their reactions, Zhao Hai smiled faintly and said, "If you agree, then let's go and take a look. What do you think?"

Laura and the others nodded. When he saw their nod, Zhao Hai smiled and then changed the monitor's image into the Atlanta Plane.

Different from the Ark Continent or the Divine Realm where there were no magic armors, the Atlanta Plane was teeming with all kinds of mechanized suits. The uses of magic armors were numerous. These magic armors weren't only used for battles or construction, they were also used to things like farm work, the usability of magic armors was immense.

To be honest, when he saw the Atlanta Plane, Zhao Hai couldn't help but think about Earth. In Atlanta Plane's Magic Armor Continent, there were things running on the ground like cars. Naturally, these cars used the same energy converters as the magic armors.

However, the energy inside energy converters weren't from magic beasts. Instead, the energy used by the cars was stored up electric power.

Right, it was electricity. After paying attention to the Atlanta Plane's situation, Zhao Hai discovered that people were utilizing the power of electricity. Moreover, it seems like they had been using it for a long time.

The structure of their power grid was the same as the one back on Earth. However, the power generated by their power plants weren't obtained from burning things like charcoal. Instead, their power was gained through hydroelectric plants and wind farms. With the addition of magic formations, their power was like the one used in the Space. But their power was more advanced than the one that Karen set up.

After seeing this, Zhao Hai was very shocked. It was at this point that he can finally confirm his suspicion, the Atlanta Plane wasn't under Lu Wei's rule.

Zhao Hai noticed that although planes like the Ark Continent, Demon Realm, and the Divine Realm use magic formations, the level of their formations was very low. With these formations, it would be impossible to develop a decent system, or even a technomagic society.

Moreover, Lu Wei was preventing people on these planes from researching magic formations. Didn't he order the destruction of the Goblin Race?

What surprised Zhao Hai the most was his result after carefully comparing the magic formations with magic array inside the Seven Star Heaven Lock. Although it can be said that the array inside the Seven Star Heaven Lock was more complex compared to magic formations, Zhao Hai discovered that they were two fundamentally different systems. Even if the magic formations becomes more complex, it was still different compared to the one inside the Seven Star Heaven Lock.

In the beginning, Zhao Hai thought that magic formations and the Seven Star Heaven Lock was just separated by profundity. With enough research, Zhao Hai's magic formations would reach the Seven Star Heaven Lock's level.

However, it seems like Zhao Hai was thinking wrongly. Magic formations and the Seven Star Heaven Lock were different. They were like two parallel lines, bound to never intersect.

Upon careful research, Zhao Hai saw that the two systems were a product of two different evolutions. This greatly surprised Zhao Hai, and this also confirms his thought that the Atlanta Plane wasn't managed by Lu Wei.

Laura and the others gawked at the scene in the monitor. They didn't think that the Atlanta Plane would have this appearance.

After some time, Zhao Hai turned to the others and said, "It seems like the Atlanta Plane isn't going to be simple. Laura, pay attention to the clothes that they wear. We'll need to make clothes that are appropriate before we take a stroll."

Laura and the others nodded before they carefully stared at the monitor. In the meantime, Zhao Hai looked into his warehouse to see if there was anything he needed.

Besides a set of tattered clothing, Zhao Hai managed to see something useful. There was an ID card that the O'neal family's pilot owned.

Zhao Hai looked into the ID Card. The contents of the ID card were the same as the ones back on Earth. It was quite detailed, there was the picture of the owner, his height, weight, age, place of birth. There was even a magicrystal function on the top part of the card.

Zhao Hai called the undead O'Neal family pilot who owned this card. Every ID card in the Atlanta Plane seem to have magicrystal implants. They had the same function as a bank card, it records how much money you have.

In the Magic Armor Continent, despite having plenty of Clans, there was only one bank. This bank was jointly controlled by several Great Families. Its purpose was to facilitate the trading and livelihood of the people in the Continent.

Upon hearing the function of the ID card, Zhao Hai couldn't help but nod. This ID Card did indeed make life more convenient in the Atlanta Plane.

Zhao Hai looked at the magic armor pilot and said, "As long as a person from the Atlanta Plane has these ID Cards, then they would be fine? Do you have any other currency?"

The magic armor pilot nodded and said, "We do, there are three kinds, gold coins, silver coins and copper coins. Gold coins are equal to ten silver coins and also 100 copper coins. Ordinary people use these to make purchases. The money on the ID Cards are used by those industries right under the banks. Usually, people would take their money out of the bank first before spending it.

Zhao Hai nodded, then he waved his hand, returning the magic armor pilot to the Hell Space. After that, he took the ID Card and placed it in the scanner.

After the entire procedure finished, a prompt came in from the scanner, "Unique ID Card from a Technomagic Civilization detected. The card has special methods inside, asking Host for permission to copy. If host wants to copy the ID Card, then Host can head to the Universal Processing Machine. Copied Cards would have a certain amount of money saved inside. The Host can deposit money in these cards using gold coins from the Space."

Chapter 965 – Bank Experience

When Zhao Hai heard the scanner's prompt, he couldn't help but curse. This scanner was truly a miserly fellow. In the beginning, it would ask Zhao Hai for money in order to analyze things. And now, it can't even do a simple thing like artificially giving him money in the ID card. It actually wanted Zhao Hai to spend his gold from the Space.

However, Zhao Hai also knew that there was no way for the scanner to change. He immediately went to the processing machine in order to make ID cards for himself as well as for Laura and the others. He also planned to place a hundred thousand gold coins on each card.

Zhao Hai didn't know the purchasing power of gold coins in the Atlanta Plane. Therefore, he decided to have a hundred thousand gold coins as a buffer.

Before Zhao Hai took the ID cards from the processing machine, Laura and the others went out of the villa. Upon seeing them arrive, Zhao Hai knew what they wanted to do. Zhao Hai turned to Laura and said, "Did you manage to get their style of clothing?" Laura nodded, "There isn't anything special, they're not that eye-catching either. Look." Then after that, the women proceeded to draw the clothes for the processing machine to make.

After waiting for the clothes to finish, Laura and the others immediately put them on. On the other hand, Zhao Hai didn't need to have clothes prepared for him. His own clothing can transform itself. As long as Zhao Hai willed it, he could dress like anything he wanted.

When the women finished putting their clothing on, Zhao Hai nodded and said, "Let's go and see what the Atlanta Plane is like." Laura and the others nodded before all of them returned to the living room. After that, Zhao Hai looked for a place where nobody can see them. Then the group appeared there.

Upon arriving in the Atlanta Plane, the group immediately looked all around them. The place was good and the environment wasn't bad. This caused Zhao Hai to be startled. He thought that since the Atlanta Plane was so developed, then their technology would have a great impact to the environment. But now, it seems like this wasn't the case. The people from the Atlanta Plane protected their environment well.

The reason why Zhao Hai said this was because when people reach levels like him, then they would be extremely sensitive to their environment. It wouldn't take Zhao Hai long to know whether the place was polluted or not.

While Laura and the others were curiously looking around, Zhao Hai smiled faintly and said, "Alright, let's get going. Don't forget, we need to speak the Atlanta Plane's language."

Laura and the others nodded, then they carried on to talk using the Atlanta Plane's language. They had already studied the Atlanta Plane's language for some time, so they were quite familiar with it already.

The group appeared inside a small city under the O'neal family's control. As long as they make a few turns, then they would be going along the city's main street.

After seeing that there weren't any banks, Zhao Hai went to a pedestrian and gave him a salute before asking, "Mister, can I ask where the bank in this city is? I'm from outside this area and I want to take some money."

The man turned his head to Zhao Hai and saw an ordinary looking man. There was nothing special on him but there was a cloudy temperament around him, making people look at him favorably. So the man immediately replied, "The Bank is very close. You go straight this road and then turn right, in about five minutes it should be on sight."

After that, Zhao Hai nodded and expressed his gratitude to the person before leading Laura and the others to proceed. The group inspected everything around them. They could see that this was a very busy street, both sides of the road were filled with tradesmen. It was very noisy. While Laura and the others were looking all around, people were curiously looking at them, some were in surprise.

Zhao Hai's group was filled with beautiful women, so it was natural that they would be able to turn heads. Zhao Hai didn't care about this, he just smiled as he received the envious looks of the people around him.

The Atlanta Plane's people weren't a monogamous society. Here, as long as you're rich, you can marry as many wives as you want. Because of this, Zhao Hai's ID card was able to record his relationship with his wives.

This was also one of the characteristics of the Atlanta Plane's ID card. When you marry, the name of your spouse would be reflected on the ID card.

After walking for about 10 minutes, the group was finally able to see the bank. The bank looked very well decorated. Zhao Hai looked at the name of the bank, Magic Armor Bank.

Zhao Hai nodded before leading Laura and the others towards the bank. The bank was quite stylish. The entire hall was about five meters high. Its interior decorations were resplendent and rich. Inside the bank, there were rows of counters with people lining up. On the left side of the hall was a place for sitting down.

Near the right side of the hall was a room. On the side of the door, the characters for, 'VIP lounge' was written. There was an expensive looking soldier stationed outside the room along with two pretty female staff.

Zhao Hai went directly towards the VIP lounge. Upon seeing Zhao Hai, the two female staff bowed and said, "Welcome Mister, may we please see your ID card."

Zhao Hai smiled faintly before handing his ID over. The female staff gave Zhao Hai's ID a look before handing it back to Zhao Hai and saying, "We'll have to be unfair to Mister. We cannot allow you in since you're not a VIP."

The people inside the hall noticed Zhao Hai entering the bank along with his beautiful wives. Moreover, he even walked directly towards the VIP lounge. Upon hearing the female staff, some of them laughed.

"So he just wanted to put up an act to enter the VIP lounge. You don't even have 1 million gold coins deposited, yet you think you're a VIP? Look at this fool, are these women also deceived by him?"

"Right, right, these beautiful women were fooled by this man. Elder Brother, perhaps you're richer than him."

Upon hearing these remarks, the faces of Laura and the others couldn't help but turn red. If not for Zhao Hai waving his hand to them, they would have began berating these people back.

Zhao Hai wasn't angry, instead, he looked at the female staff and said, "Sister, I'm aware of the rules. I came here to upgrade mine and my wives' ID Cards to VIP. Can the VIP lounge handle this?"

Upon hearing Zhao Hai, the people in the hall gawked. Then some of them went to look outside the bank to see whether Zhao Hai had piles of gold following behind him. Otherwise, how could he upgrade a group's cards to VIP?

But after looking outside, there were no cars parked that were filled with gold coins. The people in the hall had mixed reactions. Some of them had ridiculing smiles on their faces while some remained silent.

There were spatial tools in the Atlanta Plane, but these items were uncommon. They were generally under the hands of people with status. If Zhao Hai didn't have cars filled with gold coins, then he wouldn't be able to upgrade his group's status to VIP. But on the contrary, if Zhao Hai was still able to upgrade his status to VIP, then this meant his identity wasn't simple.

When the female staff heard Zhao Hai, she couldn't help but stare. Then she said, "Mister, please come with me."

Zhao Hai nodded, then he led Laura and the others to enter the VIP lounge. When Zhao Hai's group entered the VIP with the female staff, the people inside the hall couldn't help but pay attention to the VIP lounge door. They wanted to see the result. If Zhao Hai was successful in upgrading his ID card, then the people in the bank would be respectful towards him. If he wasn't, then the staff wouldn't be polite, they would certainly throw him out. One must know that the influence behind the Magic Armor bank wasn't weak. If Zhao Hai deceived them, then they surely wouldn't be polite.

Upon entering the door, Zhao Hai immediately felt the difference. The environment inside the VIP lounge was much better compared to outside. There was gentle music playing in the background. Moreover, the chairs inside weren't hardwood chairs, they were sofas.

Under the guidance of the female staff, Zhao Hai's group sat on the sofa. Then the female staff offered them so beverages to drink. After providing Zhao Hai's group with refreshments, the female staff bowed to Zhao Hai and said, "Mister, please wait here in the meantime while I go and call our manager." Zhao Hai nodded. He thought that the Atlanta Plane was becoming more and more like Earth. This gave him mixed feelings.

Before Zhao Hai even finished his drink, a middle-aged man came over. The man was wearing very formal business attire. Although it wasn't very gorgeous, his clothing made him look respectable and professional. The man walked to Zhao Hai and bowed, "Mister Zhao Hai, Welcome to Magic Armor Bank. I'm the bank's manager. Might I ask how much money mister intends to deposit?"

Zhao Hai smiled faintly and said, "I've made some big business this time. However, the opposite party didn't send the money through the bank. Instead, he gave me gold bricks. Can those bricks be used as deposit in this bank?"

As soon as the manager heard Zhao Hai, he quickly replied, "Naturally. Mister can rest assured. Gold bricks can be deposited to this bank. We shall help mister convert them to gold coins. There wouldn't be any mistakes."

Zhao Hai nodded, "That's good. Where do you want me to place the gold bricks?"

The manager bowed and said, "I'll have to ask Mister to come with me. The Mistresses can just stay here and relax." Zhao Hai nodded before standing up and saying, "Let's go." The manager made an inviting gesture. Before going, Zhao Hai turned to Laura and the others and said, "Everyone, give me your ID Cards. I will deposit money to your accounts as well."

Laura and the others complied and gave Zhao Hai their cards. After receiving the cards, Zhao Hai proceeded to follow the manager.

The manager led Zhao Hai in a respectful manner. He was now convinced that Zhao Hai wasn't a simple character.

Chapter 966 – Unusual Mood

The manager guided Zhao Hai to a room further in the bank. There weren't anything else inside this room other than a magic formation.

Then the manager turned to Zhao Hai and said, "Mister, please place the gold bricks inside this magic formation."

Zhao Hai nodded. Then he waved his hand, making a big pile of gold appear inside the formation. From what it looks like, it seems to be valued at least ten million.

When the gold bricks appeared inside the formation, the formation immediately lit up with a golden radiance. After that, on the walls opposite to Zhao Hai, rows of digits appeared. Zhao Hai initially didn't understand what these digits meant. However, after the manager looked at the digits, he looked at Zhao Hai and said, "Mister, all of your gold bricks value at 12.5 million gold coins. Does Mister want to verify this?"

Zhao Hai shook his head and said, "No need, it's accurate. Please save 1 million gold coins on each of my wives' ID Cards. Place the remaining coins on mine." After that, Zhao Hai handed the cards over to the bank manager.

The manager respectfully received the cards before he said, "Mister can wait for me outside. After I take care of this, I will personally deliver them to Mister." Zhao Hai nodded before he turned around and left the room.

At this time, Laura and the others were chatting and drinking. When Zhao Hai arrived, the women turned to look at him.

Zhao Hai smiled faintly and said, "It'll take a while before it's done. After that, we'll buy several good cars. Then we'll play in the city." Laura and the others nodded.

At this time, the female staff who led them in breathed out a sigh of relief. She wasn't relieved for Zhao Hai, she was relieved for herself. She rejoiced that she wasn't being disrespectful towards Zhao Hai earlier. She was glad that Zhao Hai was a genuine customer. If people like the female staff were disrespectful towards a distinguished guest, then they would immediately lose their job. Perhaps they might even suffer further consequences.

Losing a job as the bank staff would be a huge blow. One should know that bank workers were one of the most well-paid people in the Atlanta Plane.

After Zhao Hai sat down and took a drink, he turned to the others and said, "Didn't you want to have good cars? We'll buy more cars this time."

Laura and the others smiled. The female staff couldn't help but look at Zhao Hai's women in envy. The female staff didn't ridicule Zhao Hai's way of spoiling his women. If such a person was willing to spoil her that much, then even the female staff would be happy.

Before long, the bank manager returned with Zhao Hai's IDs. After handing the ID cards over to Zhao Hai, the manager said, "Mister, the ID cards have been updated. If Mister has anything else he needs, then we would gladly handle them."

Zhao Hai smiled faintly and said, "Prepare 10 thousand gold coins, 10 thousand silver coins, and 10 thousand copper coins for me. I won't be able to buy anything without pocket money."

The manager immediately replied, "I ask Mister to wait for a moment. I will immediately prepare the coins." After that, he bowed to Zhao Hai before leaving. Before long, three bags were handed over to Zhao Hai. After receiving his coins, Zhao Hai stood up.

The manager followed Zhao Hai as the group left the VIP lounge. Those who haven't left the hall looked at Zhao Hai's group. A lot of people knew the manager, so upon seeing Zhao Hai, they knew that Zhao Hai succeeded in upgrading his card. The people couldn't help but look at Zhao Hai with envy.

Zhao Hai swept his gaze through the people in the hall before faintly smiling. After following Zhao Hai out of the bank, the manager proceeded to enter return to his post.

After Zhao Hai's group left the bank, Laura turned to Zhao Hai and said, "Brother Hai, why did you save so much money in your card? We don't need to buy anything, and the things here aren't cheap at all."

Zhao Hai smiled faintly and said, "Who said we won't buy anything. We have money, so why won't we spend it? After all, the money we spend is mine."

Upon hearing this, Laura and the others stared. Then they quickly understood what Zhao Hai meant. They looked at each other and smiled. Zhao Hai intends to throw money away. This wasn't the first time that he'd done this, it was quite normal.

Megan looked at Zhao Hai and said, "Big Brother Hai, what do you want to buy?"

Zhao Hai smiled and said, "I want to buy a lot of things. For example, books about magic formations and magic armors. Magic armors themselves, and also some cars. It'll be good if we could buy energy source machines as well. As long as I like it, then I will buy it."

Megan understood Zhao Hai's sentiment. To be honest, after seeing the things inside the Atlanta Plane, they couldn't help but feel envious. They also wanted to have some of the things here. At the same time, Zhao Hai would also like to provide the people inside the Space with the goods from the Atlanta Plane.

After seeing the others' reactions, Zhao Hai couldn't help but have a huge smile on his face, "Let's go and find a hotel first. Then let's think about what to do next."

As he said that, Zhao Hai stepped into the road and waved. Laura and the others didn't understand Zhao Hai's action. But unexpectedly, an orange vehicle stopped in front of Zhao Hai. It wasn't a very huge car. It had a sign 'Taxi' on its side.

There were three rows of seats inside the car. It looked very well maintained. Zhao Hai opened the door for Laura and the others. After they got in, Zhao Hai sat next to the driver and said, "Take us to the best hotel in town."

As soon as the taxi driver heard this, he couldn't help but gawk. Then his expression turned ecstatic as he quickly replied, "Alright, Mister can sit tight." After that, the taxi drove forward. After a few turns, they stopped in front of a big hotel.

When the taxi stopped, a staff from the hotel immediately came over. Then he opened the door for Zhao Hai's group.

Zhao Hai nonchalantly tossed a gold coin over to the taxi driver. The taxi driver repeatedly thanked Zhao Hai, but Zhao Hai didn't care much about it as he walked towards the hotel.

The hotel staff quickly caught up with Zhao Hai and opened the hotel's door for him. Before entering the hotel, Zhao Hai tossed another gold coin towards the hotel staff.

Zhao Hai didn't know how popular tipping culture was in the Atlanta Plane. However, rather than being judged by not tipping, he might as well give everyone tips.

When the hotel staff received the gold coin, he immediately expressed his gratitude towards Zhao Hai. It's evident that tipping was a custom in this place, but a gold coin was also too much.

As soon as Zhao Hai's group entered the hotel, a female concierge immediately met him. She bowed towards Zhao Hai and said, "Mister, welcome. Does Mister have a reservation?"

Zhao Hai shook his head and said, "I don't. We just arrived at this place today. So we haven't had the chance."

The female staff nodded and said, "Mister, come with me." Then she led Zhao Hai to the reception area. The female reception staff behind the counter bowed and said, "Mister Welcome to our hotel. Do you want to take a room or do you want to dine at our restaurant?"

Zhao Hai nodded and said, "Give me your best room. Somewhere that I can live together with my wives."

The female staff smiled and said, "Alright, Mister can rest assured. Our best accommodation has ten rooms inside, a dining room, living room, conference room, a swimming pool, a bar, and a fitness room. It can definitely match mister's requests."

Zhao Hai nodded, "Alright, give me that room."

The female staff nodded, then she said, "I'll have to ask Mister's ID Card." Then Zhao Hai handed his ID card over. The female staff registered Zhao Hai's ID card before giving Zhao Hai the room key.

After Zhao Hai received the key, the group was led by the staff towards the elevator. When everyone had entered, the staff pressed the button for the top floor.

Zhao Hai looked at the elevator button, the top floor turned out to be 55. It was quite high. Meanwhile, Laura and the others were looking at the elevator with curiosity.

Upon entering their accommodation, the staff proceeded to introduce each room and facility. Then after receiving the tip from Zhao Hai, the staff left with a happy face.

Laura and the others looked at their room with curiosity. Zhao Hai smiled faintly and didn't say anything. He just went to the balcony and looked at the cityscape.

The city had the flavor of a huge metropolis. Moreover, there were a lot of high-rise buildings that were constructed and being constructed. From the hotel's balcony, one would feel like he was standing on top of the mountain, overlooking everything underneath.

At this time, after looking at the rooms, Laura and the others went to Zhao Hai's side and said, "Brother Hai, this place is very good. Everything is beautiful."

Zhao Hai smiled faintly and said, "If you really like it, we can stay inside a science and technology background for a few days. They also have rooms like these."

Laura and the others happily nodded. Meanwhile, Zhao Hai just smiled and didn't say anything else. Metropolis cities just like this one were only attractive because of the people living in them. If you have a city like this but have no people, you would soon feel like you're living inside a ghost town.

After looking at the rooms, Zhao Hai turned to Laura and the others and said, "Let's go and eat something. Then we'll head out and buy things." Laura and the others nodded, then they proceeded to follow Zhao Hai. Upon arriving at the elevator, Zhao Hai looked at the elevator staff and said, "Take us to the restaurant." The staff nodded before pressing the button with the number '30' in it.

When Zhao Hai and the others came out of the elevator, the waiter of the restaurant immediately came over and settled them down on a table. Zhao Hai casually ordered some dishes before the waiter retreated.

One must say that the restaurant food of the hotel were very good. After having eaten their meal, Zhao Hai's group went to the hotel's lobby.

Just as the group arrived at the lobby, a man dressed in decent formal clothes came over and said, "Mister, hello. I am the hotel's lobby manager. Does Mister have any requests for the hotel?"

Zhao Hai smiled towards the hotel manager and said, "Hi. Me and my wives would like to buy some cars. Can you help us with this matter?"

The lobby manager immediately replied, "Mister can rest assured, we know exactly where you want to be." After that, the person next to the manager took Zhao Hai outside of the hotel. Outside, there was a limousine already waiting for them.

The hotel manager personally opened the door for Zhao Hai before asking Zhao Hai to go in. Zhao Hai's group entered the limousine and saw that it was a really good car. The interior of the car was quite spacious. It could accommodate about a dozen people inside. There was also a refrigerator as well as an audio device.

Laura and the others were curiously inspecting the car. After some time, Laura turned to Zhao Hai and said, "Brother Hai, I thought that we already had good carriages back in the Ark Continent. But compared to this, they still fall short."

Zhao Hai smiled faintly without saying anything. To be honest, among everyone here, his mood was the most complex. Although it can be said that he enjoyed his time after transmigrating, Zhao Hai couldn't help but feel strange after arriving at the Atlanta Plane. Even if there were no connections between the Atlanta Plane and Earth, they were still quite similar. Zhao Hai thought about his time in the Atlanta Plane and compared it with his time on Earth. Back on Earth, Zhao Hai didn't enjoy much of his life. He was an otaku with no merit to his name. He had seen limousines on the television and has hoped to ride it one day. So while Zhao Hai was sitting inside the car, his heart couldn't help but feel incomparably strange.

While Laura and the others explored the limousine, Zhao Hai just sat and looked out the window. His thoughts returned back to his time on Earth. The Atlanta Plane made him recall his previous life, both the good and the bad. It was at this time where Zhao Hai realized that there were some things that you would appreciate only when you lose it. Whether it be good or bad things, one would still think fondly upon it. Although there were a lot of negatives in his life on Earth, although there were no major events, it was still his original life.

Laura and the others discovered that Zhao Hai wasn't too enthusiastic. They stopped chatting as they sat beside Zhao Hai. Laura looked at Zhao Hai and asked, "Brother Hai, what's wrong? Why do you look unhappy?"

Zhao Hai looked at their eyes and smiled, "It's nothing. But I just thought of thanking the heavens that I run into all of you. Meeting you is the luckiest thing that happened to me."

Laura and the others smiled. They knew that something must be in Zhao Hai's mind. Otherwise, he wouldn't have said this out of the blue. Laura looked at Zhao Hai and asked, "Brother Hai, what happened?"

Chapter 967 – Recreational Vehicle

Upon seeing their expressions, Zhao Hai couldn't help but feel guilty. At the same time, he put away the extra thoughts in his mind. He understood that every move that he made wouldn't only concern himself, he also had Laura and the others to think about.

No matter how much he missed his life back on Earth, he couldn't go back. At this moment, he wasn't Zhao Hai of Earth, he was Zhao Hai Buda, the Patriarch of the Buda Clan and the husband of the ladies sitting by his side.

When he thought about this, Zhao Hai immediately cleared his mind. He looked at Laura and the others and said, "I'm fine. I was just thinking about the time I was sent to the Black Wasteland. At that time, I didn't think even dream of being in place like this."

Upon hearing Zhao Hai, Laura and the others sighed in relief. Then Laura smiled and said, "Doesn't this show Brother Hai's abilities? You relied on your efforts and bit by bit you were able to reach your current state."

Zhao Hai smiled bitterly and said, "It's not just me. I relied on the Space. Perhaps without the Space, the present Zhao Hai wouldn't exist. It's possible that the Buda Clan would already sunk into the annals of history."

Laura looked at Zhao Hai and then smiled, "Brother Hai, I don't believe other people could achieve this much even if they had the Space. Not everyone can utilize the Space to its maximum potential like you. You have been very low-key all this time. Don't forget, the Space wasn't this powerful in the beginning.

If other people had the Space, then they wouldn't have been as patient as you. Brother Hai, the Space is just a tool. It's abilities are limited, and the one who determines its fate is always its user."

Zhao Hai smiled faintly and said, "I'm fine, there's no need to comfort me. In any case, I'm already happy to have the Space. Right, what kind of car do you want to buy? Actually, we can't use the cars for long. After we achieved our goal in the Atlanta Plane, we would be going back. When that time comes, we won't be able to use them anymore."

As soon as Laura and the others heard this, they immediately went to discuss. After seeing their chirping, Zhao Hai couldn't help but smile.

At this time, their vehicle stopped. After that, their driver opened the door for Zhao Hai. When Zhao Hai went out of the car, the driver bowed and said, "Mister, this the biggest vehicle store in the city. There are a lot of cars available here. Mister can choose whatever car you like."

Zhao Hai nodded and thanked the driver. After that, he took five gold coins and handed it over. After the driver expressed his gratitude, he proceeded to return to his car.

Zhao Hai turned his head to look at the huge car dealership. The store was very huge and stylish. What differs this store compared to others was the fact that there were no advertisements outside the store. The only thing that can be seen in front of the store was an ancient looking car.

The succinct design of the store gave of it the aura of a noble that was wearing commoner clothes. Even if the noble was wearing simple clothing, his temperament could still be seen.

Zhao Hai couldn't help but praise the store, "Good, good. Just by its appearance, one could see that it's very good. Go, see if there are any cars you want."

Laura and the others proceeded to cheer and enter the huge store. Zhao Hai just smiled faintly. However, he didn't run over and just calmly entered the store.

Just as he entered, Zhao Hai was immediately met with a store staff. The woman was wearing a dress. Although the dress made her look very bright, it wasn't to the point being excessive. Her dress just made her exude a smart and capable appearance.

The female staff bowed to Zhao Hai and said, "Mister, welcome to our establishment. I am store staff Number 215." Zhao Hai smiled faintly and said, "Hello. It seems like you have quite the collection here." The staff nodded and said, "Yes. Mister, please I'll be leading you in. What do you want to buy? We have ordinary cars, commercial cars, sports cars, and recreational vehicles."

Zhao Hai thought for a moment and said, "I want to take a look at your recreational vehicles first. I want something that can travel anywhere."

The staff immediately said, "Alright, please follow me." After that, she led Zhao Hai to a place inside the store.

Zhao Hai looked at the store and saw Laura and the others looking at various sports cars. One has to recognize how cool and dazzling sports cars could be. They were very appealing to the eyes.

After Laura and the others saw Zhao Hai, they immediately went to him as Laura said, "Brother Hai, we like these ones. Can we buy them?"

Zhao Hai smiled faintly and said, "If you want to buy it, then go ahead. I still need to look at their recreational vehicles."

Laura replied, "Recreational Vehicles? Alright, then let's see them first." After that, they followed Zhao Hai as they were led by the store staff.

The store staff was a bit shaken. Laura and the others were rare beauties, and it seems like these ladies were Zhao Hai's wives. This caused her to be surprised, this was because Zhao Hai looked too ordinary.

The female staff didn't believe that Laura and the others were with Zhao Hai because of money. Although the women were indeed beautiful, they couldn't just fake their noble temperament. Even if the female staff's dress made her look capable, her temperament still fell short compared to Zhao Hai's wives.

Although the female staff was curious about Zhao Hai, she didn't ask nor should she care. Being too curious would just bring her trouble.

Before long, under the guidance of the store staff, Zhao Hai arrived at where the recreational vehicle was. Zhao Hai looked at it and discovered that the RVs of the Atlanta Plane were much larger compared to those back on Earth. Their RV here wasn't smaller than a carriage. This caused Zhao Hai to be surprised.

Laura and the others were also surprised upon seeing the RV. They didn't think that they would see a car that was as large as this.

Upon seeing this, Zhao Hai finally understood why the roads of the Atlanta Plane were wider than the ones on Earth. It seems like it was caused by the Atlanta Plane's much higher technological level.

The female staff arrived right by the silvery bright RV and said, "Mister, please take a look. This car is produced by the O'Neal family. This recreational vehicle is divided into three floors, each floor having 125 square meters of floor space each. On the first floor, there is a miniature parking lot about 1 meter high. This parking lot would automatically descend to the ground when needed. Once you park your car, it will return to its original position inside the vehicle. All in all, the parking lot could accommodate eight cars. Each section of parking could be separated. You can descend to any parking section from the second floor and then proceed to drive. It's very convenient."

"Situated on the second floor are the living room, bathroom, a fitness room, a miniature swimming pool, and other facilities. The furniture inside are all complete. All seats are made with high-grade magic beast leather. They're very comfortable to sit on."

"Bedroom are placed on the third floor. All in all, there are six bedrooms each with their own bathroom."

"These are the three floors of a conventional RV. At its roof is a small courtyard where you can host small parties while on the road."

"Windows on both sides of the car can also be opened and act as small sheds to protect against the sun. You can park your car and then proceed to enjoy a picnic."

"The materials used to construct these RVs are all high quality copper alloys. Not only is the vehicle strong against shaking, it is also quite light for its size. There are a lot of magic formations on the vehicle,

and it even uses engines made for war tanks. Because of its strong horsepower, the car could still go fast despite its large build.”

“The tires of the vehicle are made of special elastomers. Even nails would be broken when they’re being run through. The suspension mechanism is also made according to standards used for war tanks. There wouldn’t be any issues even if you go through a rugged mountain path.”

While the staff was explaining the function of the vehicle, they also played the functions of the car. Laura and the others were shocked to see the RV. Now they finally understood why it was named like that, it was basically a small mobile house. The carriages of the Ark Continent could only be called primitive compared to this.

On the other hand, Zhao Hai wasn’t as startled. Although it was bigger and more advanced than the RVs back on earth, their fundamental function wasn’t any different.

After the staff was done with the introduction, Zhao Hai looked at her and said, “Are there other cars like this one?”

The store staff quickly replied, “It’s the only one. Mister, this RV is the most advanced vehicle of its type. Others simply couldn’t compare to it. Moreover, this car is being promoted by the O’Neal family. They’re limited in supply.”

Zhao Hai nodded, then he said, “How much is it?” When the staff heard this, she couldn’t help but stare. Then she quickly understood that Zhao Hai was interested in the vehicle so she immediately answered, “The vehicle is priced fairly. As long as you pay 500 thousand gold coins, our company would take care of everything including licensing as well as any other modifications you have for the vehicle.”

Zhao hai smiled faintly and said, “Alright, prepare one of these for me.” Then he turned to Laura and the others and said, “Didn’t you like those sports cars? Go take a look so we can have them installed in the parking spaces.”

When the store staff heard this, she immediately lit up with happiness as she said, “Alright Mister, we’ll take care of it. I’m sure the madames would be satisfied with our collection of vehicles.”

Chapter 968 – Meeting Warriors At Night

When Zhao Hai left the shop, he was already inside his recreational vehicle. Zhao Hai already learned how to drive back on Earth, and driving in the Atlanta Plane was much easier. This was because; One, the roads here were very wide. Two, because the cars were equipped with automatic transmission. And third, because almost all cars had an anti-collision formation installed. As long as one uses this formation, one wouldn't need to worry about accidents. Of course, one can choose to turn this formation off.

Naturally, Zhao Hai had this formation installed in his RV. Moreover, he had modifications made on the RV in order to make it more comfortable. And with eight sports cars in the parking compartments, Zhao Hai spent more than 1 million gold coins in total.

This purchase also made Zhao Hai realize the buying power of gold coins in the Atlanta Plane. Gold coins seem to be worth a lot.

Zhao Hai drove back towards the hotel and checked out of their room before proceeding to drive off the city. He already bought a car and deposited a huge amount of money in the bank. This might cause unnecessary attention to be placed on their group. Since Zhao Hai didn't want any complications to occur, he decided to head off to other places.

When they went out of the city, Zhao Hai released the O'neal family pilot and then had him drive the RV. Zhao Hai already bought a map before leaving, and their next destination was the neighboring city...

Zhao Hai and the others didn't immediately enter the Space after leaving the city. They still wanted to understand the Atlanta Plane better. The roads of the Atlanta Plane were very well maintained and were very wide. Each road could allow four vehicles like their RV to go side by side.

In the beginning, Zhao Hai didn't understand why the roads outside the city were this wide. But later on, he got the reason from the magic armor pilot. The roads were wide so that war tanks would be able to easily make use of it.

Although Zhao Hai's RV was very big, it still wasn't as wide as a war tank. The roads could allow two war tanks to go side by side at most. Three would be pushing it.

Zhao Hai and the others looked at the scenery they passed by and saw that it was very good. Both sides of the roads were protected forests. Later on, they came to understand that the environment inside the Atlanta Plane was very nice. There were forests and meadows everywhere, it was quite rich in nature.

Before long, the days passed by and darkness came. Zhao Hai had the RV stop as they prepared for the night.

It wasn't that Zhao Hai didn't want to go to the Space to rest. Instead, Laura and the others wanted to use the RV to experience what its like to stay inside a vehicle. Naturally, Zhao Hai agreed.

Meg made their dinner in the RV's kitchen. After finishing their meal, they went to the rooftop to look at the stars before going to their rooms to sleep.

There was no need to mention how comfortable the rooms inside the RV were. Zhao Hai was sleeping with Meg tonight. The two didn't do anything and just slept side by side.

When midnight came, Zhao Hai was suddenly woken up. This was because he felt some people in the proximity approaching them in a fast speed. Zhao Hai stared for a moment before he got up and moved Laura and the others to the Space. He also entered the Space and looked at the monitor.

Zhao Hai saw how fast these people were approaching. Moreover, these people weren't using magic armors. Their movement was like what warriors back in the Ark Continent did.

Zhao Hai noted at this point that the O'Neal family, as well as the rest of Magic Armor Continent, didn't allow warriors nor mages in their territory. They had a hostile relationship with warriors and mages. If these two people were spotted in the Magic Armor Continent, then they wouldn't have a good time.

Not long after Zhao Hai entered the Space, several warriors appeared right outside the parked RV. When the warriors saw the vehicle, they immediately surrounded it. They carefully looked at the car before one of them sighed and said, "This is quite a good vehicle. Leader, what do we do?" These warriors were wearing black clothing and had their swords strapped to their backs. Black cloths were covering their faces with only their eyes showing.

Another warrior in their group answered, "Don't cause any incidents. Don't forget our goal. Let's go." The warriors nodded. After sparing one last envious glance at the RV, the warriors proceeded to leave.

Zhao Hai counted the warriors. Altogether, there were ten of them. They were very fast, they should have about the same strength as the Ark Continent's seven or eight ranked warriors.

When Zhao Hai saw this, he couldn't help but stare. With the strength that these people possessed, it was impossible for them to exist here in the Magic Armor Continent. What did they come here for?

Fortunately, the group of warriors went along the road, so Zhao Hai was able to pay attention to their actions. Before long, the group entered the city that Zhao Hai came from. In the Magic Armor Continent, cities didn't have any walls. This allowed the warriors to enter the settlement very easily.

After entering the city, the group immediately proceeded to go about undetected before entering a house. The residents of the house seem to be expecting their arrival. They immediately let the warriors in before closing the door.

At this moment, Zhao Hai was paying attention to the warrior group. It can be said that Zhao Hai was a careful person. Before leaving the city, he took the time to explore the entire city just enough so that the Space could map the entirety of it. Now, he could see the actions of those people using the monitor.

After the group entered the house, they immediately took their hoods off. When the owner of the house saw them, he handed them a document and said, "Good, you came on time. These are your ID Cards and the address of the place where you'll be staying. Remember your mission. Make sure to understand what the O'Neal family has been doing lately."

The leader of the warrior group took the document and gave it a quick scan. Then he nodded and said, "You can rest assured." Then he led the warriors to leave the room.

Upon hearing this, Zhao Hai didn't have any interest to listen. Then Zhao Hai let out a long breath. This was an internal affair of the Magic Armor Continent, it didn't have any relationship to him.

As for the status of these warriors, Zhao Hai didn't need to look it up in order to guess. They were certainly assassins from a Great Family in the Magic Armor Continent. Although it can be said that this

was a continent for magic armors, there were certain matters that magic armors couldn't handle but these assassins could. Because of this, it wouldn't be strange for Great Families to train warriors in order to serve their goals.

It was at this moment where a scream suddenly came from a room.

Laura and the others opened their doors and walked out with their night robes still on. When they saw Zhao Hai on the living room looking at the monitor, they couldn't help but gawk. Zhao Hai looked at the women and smiled faintly, "It's fine, everything's alright. Go back to sleep. There was a group of warriors approaching the RV earlier. I didn't know what they intend to do, so I took it upon myself to move you into the Space. Everything's fine now."

There was still a hint of fear lingering in the minds of the ladies. They went to Zhao Hai's side before Laura asked, "Brother Hai, what happened? Why are there warriors in the Magic Armor Continent?"

Zhao Hai looked at Laura and said, "Don't worry, it's fine. It's possible that those warriors are assassins from a Great Family in the Magic Armor Continent. It seems like the recent actions of the O'Neal family had been brought to the attention of these Families. Therefore, they sent people to look into what the O'Neal family was doing."

After hearing Zhao Hai, Laura and the others quickly relaxed. Zhao Hai looked at them and said, "Alright, go back to sleep." Then Zhao Hai waved his hand as the group returned to their rooms in the RV.

Laura and the others looked at where they were, then they proceeded to go back to sleep. They were experienced people as well. Therefore, although what happened managed to frighten them, they were able to quickly recover.

The next day, Laura and the others regained their usual vigor. After having eaten their breakfast, they proceeded to depart.

Zhao Hai sat on the roof of the vehicle as he looked at the great scenery. Laura, who sat beside Zhao Hai, suddenly turned to Zhao Hai and said, "Brother Hai, in about three hours, we'll arrive at the city. According to the map, the city should be called Yanking City. We should be able to buy things there."

Zhao Hai nodded and said, “Now we need to buy all kinds of magic armors, methods of energy conversion, and news about the Atlanta Plane. However, we could only buy magic armors available for civilians. I’m afraid military magic armors aren’t available for us. On the other hand, the method of energy conversion should be purchasable, albeit certainly not cheap.”

Laura nodded and said, “There’s another issue, purchasing all of these things without being noticed would be very hard. Brother Hai, how about this, let’s buy the books first. Then we’ll buy everything else later on.”

Zhao Hai nodded and said, “Right, books are the key. It’s also best to find secret places where we can steal formations that aren’t available outside. The research on magic formations is the most important thing for us.”

Laura and the others nodded. It was just like in the Ark Continent where the top-ranked martial arts manuals weren’t available for the public. In the Atlanta Plane, there were special magic formations that couldn’t be gained using conventional methods. If Zhao Hai wanted to acquire those formations, then he would have to look for a place to steal them from.

At this time, Lizzy added, “Another important thing is the Ascension Magic Armor. But where do we obtain those?”

Zhao Hai also knit his brows and said, “That wouldn’t be easy to find out. Later on, we need to map more cities into the Space. That way, we would obtain some useful clues.”

Chapter 969 – I Must Run A Factory

Yanking City was a large city under the O’Neal family’s rule. Although this city wasn’t the family’s capital, it was still an important industrial base for the family, making it one of the most important cities under the family’s control.

Zhao Hai’s next goal was here. Although he can easily get what he wants, he intends to attract as little attention to himself as possible. If he wanted something, then he would need to spend money. And when he’s ready to leave, he would get all his money back from the bank.

After the group arrived at Yanking City, they immediately went to look for a good hotel to stay in. Upon receiving their accommodations, Zhao Hai went outside to look at the situation. Zhao Hai already made

some plans. If he wanted to buy a lot of things without attracting suspicion, then the only way for him to do so was to open a company in Yanking City.

While Zhao Hai went to inquire about the city's matters, Laura and the others separated and drove towards several bookstores. All the books that they liked and deemed useful were bought.

Zhao Hai drove to many areas of the city in order to gain a general idea. However, it wasn't easy to acquire any information about opening a company here. After all, he was unfamiliar with the people and the place.

When Zhao Hai returned to the hotel, Laura and the others had also come back. Aside from buying a large number of books, they also bought a lot of clothes and other stuff.

Zhao Hai didn't care about it as he put the books away. After that, the group proceeded to enter the Space and look at the monitor. The current image displayed was the state of the Taurus Continent. Their efforts to lure the O'Neal family to the Winged Pegasus had finally bore fruit. In about two days, the O'Neal family should see the Winged Pegasus Clan's spatial rift.

Since there was nothing to worry about, Zhao Hai changed the monitor's display to Yanking City's map. Yanking City was an industrial city, there was an overwhelming number of large and small factories operating inside. It may be because the O'Neal family needed great production capabilities in order to make more magic armors and war tanks. Because of this, factories became more prosperous.

After seeing the state of these factories, Zhao Hai couldn't help but knit his eyebrows as he turned to Laura and said, "I need to buy a factory here. This way, I could buy things in the name of the company. However, the business of these factories is doing very good. I'm afraid there will be nobody who'll want to sell. From the current state, running a factory wouldn't be an easy matter."

Laura nodded. She had done business before, so she understood matters beneath the surface. Although businesses in the Atlanta Plane were different than those in the Ark Continent, anyone with keen business senses would know that setting up a factory at this point wouldn't be easy.

Zhao Hai knit his brows before he said, "Let's go. I want to ask the people in this hotel. Let's see if they can introduce me to someone who could help us."

Since they didn't have anything else they could do, Laura and the others could only nod. After the group appeared outside their room, Zhao Hai immediately called for the lobby manager.

Zhao Hai lived inside the hotel's best accommodation. Therefore, the lobby manager couldn't just ignore his summons. Upon hearing that Zhao Hai wanted to see him, the manager immediately arrived.

.Zhao Hai looked at the lobby manager. The man's age seem to be on the bigger side. His hair was white and he had a moustache. However, he had tidily arranged himself. When the manager entered the room, he quickly said, "Mister, do you need something?"

Zhao Hai smiled towards the manager and said, "I'm not from this place. I heard that the factory business in Yanking City is quite booming recently so I thought of doing business here. But since I'm unfamiliar with the city, I can only ask lobby manager to act as a middleman and introduce me to people I need to know if I want to build or buy a factory in the city. I wonder if manager can help me with this?"

The manager immediately replied, "Mister can rest assured, we have agencies that specialize in matters like these. I will contact the best Head-hunting agency for Mister."

Zhao Hai nodded and said, "Then I would have to trouble the Manager. Price isn't an issue, but I want the person to be reliable. After this, I certainly wouldn't mistreat the Manager."

The manager immediately replied, "Mister is too polite. As the hotel's staff member, I can't accept any remuneration. I would be violating the rules. I wonder when Mister plans to see the person?"

Zhao Hai thought about it and said, "The sooner the better. But today would be too early, I'll see them tomorrow."

The manager nodded and said, "Good. Mister can rest assured, I will arrange a meeting as soon as possible. Once they contact me, I will immediately inform you."

Zhao Hai nodded and waved his hand to make the manager retreat. Once the manager was out of the room, Laura turned to Zhao Hai and said, "Brother Hai, is getting a Professional Manager really the right decision?"

Zhao Hai smiled and said, "Rest assured, they can do it. They are trained specifically to handle matters like ours. Do you want to go out and take a stroll? In a city like this, people don't generally rest in the evening. The city's nightlife should be very rich."

As soon as Laura and the others heard this, they happily nodded. Then Zhao Hai smiled as he led Laura and the others to leave. After asking the hotel to arrange a car for them, they immediately walked out.

Zhao Hai wasn't wrong. The nightlife of people in this city was truly colorful. What made Zhao Hai glad was the presence of a stadium here. He can now watch some matches being held.

Zhao Hai paid attention and saw that their games here was very similar to football. Zhao Hai immediately called the hotel in order to arrange some game tickets. He then led Laura and the others to see the game.

Back on Earth, Zhao Hai wasn't able to go to a stadium in order to watch a game. In his country, football wasn't heavily promoted. And there was no need to mention about going abroad. In this case, Zhao Hai had no way to see games in person.

Zhao Hai wasn't a hardcore sports fan. He only knew the rules of the game and he didn't have any teams that he supported. He just wanted to watch the game because it looked lively.

At the same time, Laura and the others haven't seen a single sports match. Games like football were nonexistent in the Ark Continent. For those who always thought about military tactics and cultivation, games where you kick a ball was seen as a joke. Instead of playing football, they might as well spend the time training.

Laura and the others were very curious about the game. Because of this, after having their dinner at the hotel, they immediately arranged for a vehicle to take them to the stadium. What made Zhao Hai somewhat excited about the game was the fact that two rivals were the ones playing. It was the Red Coat Club, Yanking City's team, against the team from Derby City.

The tickets they had weren't in the VIP rooms. Zhao Hai always thought that the true way of watching a game was on the stand.

Zhao Hai's group arrived at the stadium at about Atlanta Plane's 8:30pm, the game would start at 9:00 pm. Laura and the others followed Zhao Hai into the stadium and upon entering, the ladies were shocked. Although the game was in half an hour, the stadium was packed with people wearing colored clothes.

People were singing their songs inside the stadium. The ladies haven't seen something like this before, they was shocked speechless. Although Zhao Hai had seen these things in TV, being in person was still a more surreal experience.

Before long, Zhao Hai and the others had found their seats. Their location was very good, it was quite close to the field. In that short distance, they were able to see the looks of the players.

At exactly 9:00pm, the match began. The entire field detonated with cheers. One couldn't hear anything besides the cheers towards both teams. Even if the person was right next to you, one would still need to listen carefully in order to comprehend their words.

However, once the game began, Laura and the others couldn't feel somewhat disappointed. They were experts, and they had also seen warriors and mages traversing terrain as though it was nothing. They couldn't feel the same was as the people watching inside the stadium.

But under the current atmosphere, they still couldn't help but continue watching the game. It was a 90-minute game. With the intermission and overtime, the entire match took two hours to finish. Since they were early by 30 minutes, Zhao Hai's group stayed inside the stadium for a bit less than three hours.

In these three hours, the fans of both teams never stopped cheering. Their songs were loud from beginning up to the end. Laura and the others couldn't help but admire their spirit.

After the group returned to their vehicle, Laura rubbed her ears and said, "Too frantic. Those people are too loud. Brother Hai, you said that they haven't learned battle qi nor had military training. How could they shout that loud for three straight hours? Every one of them are full of spirit."

Zhao Hai smiled faintly and said, "Perhaps it's because of the game's charm. It's difficult for people like us to understand them. To them, football is just like religion." Laura thought for a moment and said, "Brother Hai, is it possible for the people inside the Space to play this game? The Space is severely lacking in entertainment."

Zhao Hai smiled and said, "It won't be easy. There are a lot of races inside the Space. I'm afraid that there would be some disparity in each team. How would Goblins play against the others? I think we should just abandon this idea."

Laura couldn't help but agree. Zhao Hai just smiled and didn't say anything else. One of the reasons he wanted to see that match was to introduce Atlanta Plane's lifestyle to Laura and the others. He wanted them to see a lifestyle different from the Ark Continent.

Atlanta Plane was very similar to Earth. Zhao Hai wanted to make Laura and the others understand the plane's culture so that they may share something similar with Zhao Hai.

Nothing noteworthy happened that night. The next morning, as the hotel's staff were delivering breakfast, the lobby manager led someone to Zhao Hai's room.

The manager bowed to Zhao Hai and said, "Mister, this is the Professional Manager that the Headhunting Agency has recommended. He can help Mister with what you want."

After the manager's introduction, the Professional Manager immediately bowed to Zhao Hai and said, "Mister, Hello. I'm called Bluewell. Being able to serve Mister would be a great honor."

Zhao Hai inspected the man. He looked like he was in his 30s. He wore appropriate clothing and had his hair properly combed. The man's eyes seem to sparkle.

Zhao Hai looked at Bluewell and said, "Mister Bluewell, nice to meet you. Please have a seat." Bluewell was very polite as he took a seat and sat down. He didn't have any hesitations in his actions which made Zhao Hai very satisfied.

As an Agent, being someone who seemed easy to talk to was a sign of professionalism. If one was cautious with their actions, then that Agent was no good.

The hotel manager didn't leave and just stood there. The manager understood that Zhao Hai had yet to accept the Agent Bluewell. It can be said that Bluewell was still at the interview stage. If he was unable to satisfy Zhao Hai, then the hotel manager would have to find another person.

Zhao Hai looked at Bluewell and said, “Mister Bluewell, did the manager tell you about my request?”

Bluewell immediately replied, “Yes Mister, the manager already informed me that you wanted to purchase a factory in Yanking City, or maybe build your own.”

Zhao Hai nodded and said, “What would Mister Bluewell suggest?” Bluewell replied, “Mister, if I may frankly speak. I think Mister purchasing a factory in Yanking City wouldn’t be a wise decision. Factory business is doing very well in Yanking City. Nobody would be willing to let go of their factories. And even if they did, they would do so at a very high price. Therefore, purchasing a factory at this time would not be worth it.”

Zhao Hai nodded, he had also thought of this point. Therefore, he waved his hand, telling Bluewell to continue. After seeing Zhao Hai’s response, Bluewell went on, “However, I think it’s possible to open a factory by yourself. Yanking City had always been an industrial hub. There are a lot of factories here. Not only the O’Neal family, other families also run factories in this place. Mister can open a factory here, but I don’t know what kind Mister wants to build.” Zhao hai looked at Bluewell and said, “What can you suggest?”

Bluewell replied, “My suggestion is, if Mister has the money, then Mister should open a medium sized factory. Not too big nor not too small. Big factories in the City are under the control of the O’Neal family vassals. If you want to run a big factory, then you need to cooperate with them or else you would be under the O’Neal family’s pressure. On the other hand, if you run a small factory, then I’m afraid making a sizable profit would be very difficult. Therefore, running a medium factory would be appropriate.”

Chapter 970 – Believe Me!

Zhao Hai calmly listened to Bluewell’s words. Bluewell’s explanation was very concise, there was no point that Zhao Hai didn’t understand. He even said the rules of the city’s businesses.

Such rules can be reflected at any place. Yanking City was an industrial hub, the factories here were very profitable. This was something that almost the entire Magic Armor Continent knew. Moreover, almost all of the industrial hubs have some connection to war departments.

Take Yanking City for example, how could the O’Neal family just let go of its control over it? Can they rest assured when outsiders settle here? Impossible. It was equivalent to letting others take the sword that you use to fight.

Because of this, all large factories in Yanking City were controlled by the O'Neal family. Even if they weren't under the family's control, they would be handled by loyal vassals of the family. Only through this arrangement could the family be relieved.

After Bluewell finished speaking, he looked to see Zhao Hai's reaction. He found that Zhao Hai was calmly sitting in front of him. It seems like Zhao Hai was pondering over his words. Bluewell couldn't help but feel nervous.

Although Bluewell was a professional manager, he wasn't a formal member of the Agency. He was someone who had the ability but hadn't had the chance to showcase it. Because the Agency knew about his skills, they kept his contact number. Once someone looks for an agent for help, then they would give Bluewell the opportunity to show his skills.

Naturally, this opportunity wasn't given to everyone. If the client didn't have the calibre to face Bluewell, then they wouldn't send him over.

This time, the hotel manager was the one who called the Agency. The manager's hotel was a very famous institution in Yanking City. Since the agency didn't want to offend the hotel, they sent Bluewell over.

Bluewell always wanted to find opportunities to show his ability. So after being briefed by the agency regarding Zhao Hai's situation, he immediately settled himself and went to see Zhao Hai.

After having thought through everything, Zhao Hai turned to Bluewell and said, "Mister Bluewell, let me ask. If I ask you to help me open a factory, how much money would I need?"

When Bluewell heard Zhao Hai, he couldn't help but turn ecstatic. He clearly prepared this answer as he immediately opened his mouth and said, "A minimum of three million gold coins and a maximum of five."

Zhao Hai nodded and said, "Mister Bluewell, I'm very satisfied with your answer. I can give you five million gold coins to help me open a factory. I will not directly operate this business and will leave all of that to you. I'll also give you a tenth of the factory's shares. Although I won't meddle in the business, I'll have ask your help to buy me things through the company from time to time. Is this alright with you?"

Bluewell was shocked. He understood what Zhao Hai just said. Zhao Hai would give him five million gold coins to open a factory, of which 10 percent of the shares would be named under him. Everything the company does would be under Bluewell's care, Zhao Hai would just gain the dividends.

Was there such a good thing? Bluewell felt that he was inside a Manager's dream. Even if one was a manager and in a high position, one would still be an employee. However, this wasn't the case with Zhao Hai. Bluewell was a shareholder of the company. Ten percent wasn't a small number, this was basically a meat pie that fell from the heavens!

Bluewell looked at Zhao Hai, his eyes shining as he said, "Mister, are you sure about this?"

Zhao Hai smiled faintly and said, "I never joke about these matters. If you agree, then we can immediately sign an agreement. I will send you the money and leave everything else to you. What do you think?"

Bluewell looked at Zhao Hai and said, "Alright, Mister can rest assured. You can trust me, this Bluewell will dedicate his life to Mister."

Zhao Hai laughed, then he turned to the hotel manager and said, "Manager, please help us find a lawyer. I need to sign a contract with Mister Bluewell."

The manager nodded. Then he looked at Bluewell enviously before he turned to leave. After the manager left, Bluewell turned to Zhao Hai and asked, "Mister, why did you trust me?"

Zhao Hai smiled faintly and said, "I didn't trust you. I believed in myself and my eye for people. Moreover, to be honest with you, 5 million isn't a huge amount to me. But if you dare betray me, hehe, then I will make you understand the feeling of wanting to die instead of living!"

When Bluewell heard Zhao Hai, his eyes couldn't help but shrink. Then he nodded and said, "I understand. Mister, you can rest assured, I will not let you down." Zhao Hai smiled and said, "As long as you don't deliberately swallow the money in the factory, whatever you do is fine. If the factory goes bankrupt, and it isn't because of your mismanagement, then I wouldn't blame you. Just do normal business and make money."

Bluewell smiled faintly and said, "Just like Mister, I'm also confident in myself. You can be relieved with the five million that you gave me. I promise that in less than a year, you would be able to get your investment back. After getting my dividends, I will give everything to you."

Zhao Hai laughed and said, "You are really confident. Since you believe in yourself so much, then I will give you 5% shares after one year. We'll include that in the contract."

Bluewell looked at Zhao Hai and suddenly sighed, "I'm starting to doubt if you are really an heir to a Great Family. Otherwise, you wouldn't be nonchalant about your money. Of the 5 million, you're giving me 500 thousand, and if you add the 5%, that is 750 thousand gold coins in total. Even small families would have a hard time earning that much money in one year."

Zhao Hai smiled faintly and said, "Money, you won't gain it if you don't gamble. And if this 15% share could buy your loyalty, then wouldn't that be worth it?"

Bluewell looked at Zhao Hai, then he laughed and said, "If more people think like Mister, then Professional Managers would be more relaxed."

Zhao Hai smiled and said, "Not all Managers are like Mister Bluewell!" Then both of them laughed.

After some time, the two calmed down, but the two of them seem to have developed a sense of understanding with each other. Bluewell looked at Zhao Hai and said, "Mister I haven't asked you yet. What do you plan to buy through the factory?"

Zhao Hai thought for a moment and finally said, "I want to buy a set of energy conversion equipment and maybe some magic armors, some civilian ones. Having military magic armors would also be great."

Bluewell nodded and said, "That won't be difficult. Energy converters are widespread and can be easily purchased. Besides, with our factory, purchasing them wouldn't be difficult. As for civilian magic armors, you can buy as many as you want. You can also buy military magic armors, but the amount would be limited." Zhao Hai stared, then he became happy as he asked, "Good, but what levels of military magic armors can I buy?"

Bluewell replied, "You can buy magic armors below God-rank. However, you can only obtain them from black markets, and their price would be more expensive."

Zhao Hai smiled and said, "Money is not an issue. As long as you can buy them then it's alright. But remember, don't let these matters affect the factory. We don't want to kill the goose that lays golden eggs."

Bluewell nodded and said, "Mister can rest assured, I know how to be discrete."

After he said that, the hotel manager suddenly appeared along with a person who looked refined. From the introduction made by the hotel manager, Zhao Hai found out that the person was from a famous law firm in the city. He came here specifically to arrange Zhao Hai's contract.

Zhao Hai didn't waste any breath as he immediately expressed the agreement with Bluewell. After the lawyer wrote the contract, Zhao Hai looked at it and wrote his name upon seeing that there were no problems. This time, he only signed the name 'Zhao Hai' instead of 'Zhao Hai Buda'

When he forged his ID card, he only used 'Zhao Hai' as his name and not 'Zhao Hai Buda'

After the contract was written, Zhao Hai got one copy, Bluewell got one, and another went to the law firm for documentation. Now, Zhao Hai's agreement with Bluewell was official.

Zhao Hai led Bluewell towards Magic Armor Bank and directly entered the VIP lounge. This time, nobody stopped Zhao Hai from entering. After looking at Zhao Hai's ID Card, the staff immediately welcomed him in.

Upon entering the VIP lounge, the bank manager immediately approached Zhao Hai and said, "Mister, I am the lounge manager. Is there anything I can do for you?" Zhao Hai looked at the manager before handing his ID card over and saying, "Get 5 million from my card and give them to this Mister right here."

Bluewell also handed his ID card over. The manager took the two cards and left the VIP lounge. The number of transactions that the manager handles wasn't a lot, and 5 million was quite a lot of money. However, the manager had seen a lot of things, so he wasn't surprised at all.

Before long, the manager came back holding the two ID cards. Then he handed it over to Zhao Hai and Bluewell. Then the manager said, "Mister, it's done. Is there anything else you need?"

Zhao Hai didn't reply, instead, he turned to Bluewell and said, "Alright, I've already given you the money. Everything else is up to you. You go first, I still have other matters to attend to" Bluewell nodded before he gave a bow and leaving the lounge.
