

# APOCALYPSE: GOD-LEVEL ZOMBIE SYNTHESIS SYSTEM

## Chapter 1

### Chapter 1

A hundred years ago, the zombie virus broke out, and the doomsday descended.

70% of humans turned into zombies, and humans were close to extinction.

As doomsday descended, the special genes of humans were starting to awaken.

Humans and zombies fought a great war, but unfortunately there were too many zombies, so humans had to build base cities to protect their own safety.

...

“Are there zombies in this hospital?”

Ye Li swallowed. He had been in this parallel world for ten days now.

In these ten days, he had been hiding and running. Fortunately, he was not eaten by zombies.

After these ten days, Ye Li had finally found out what world he had transmigrated into.

A world with zombies!!!

He had only seen such a world in novels and movies before.

When he had just transmigrated here, he heard that there was a base city called Annan.

Now he was not far from the Annan Base City. He wanted to go there to find a shelter. Otherwise, if he stayed outside for too long, he would surely die.

The city where Ye Li was had obviously been occupied by zombies.

He hid in a hospital, hoping there were no zombies inside. Otherwise, he would be doomed.

He could handle one or two ordinary zombies, but if there were too many, he could imagine what would happen.

After all, he was not even an Awakened Being.

Humans' special genes were divided into five levels from low to high: D, C, B, A, and S.

The higher the gene level, the higher the future achievement.

Awakened Beings were divided into levels 1-10, and above level 10 were Evolved Beings.

Ye Li was very careful with each step, afraid of attracting zombies to eat him. Even if he was lucky enough not to be eaten by zombies, being bitten would turn him into a zombie.

He even dared not breathe too hard. As a transmigrator, he was really miserable.

Others who transmigrated all had invincible cheat codes and were protagonists. But he transmigrated into a world with zombies and had to be careful not to attract zombies all the time.

Ye Li hid in a ward. Looking at the dirty room, he sighed. When would this end?

Although he had only been in this parallel world for ten days, no one knew what he had experienced in these ten days.

Gurgle!

Suddenly, Ye Li's stomach growled again.

He was thirsty, hungry but dared not go out. He didn't know how many zombies were outside.

Roar,roar!

A terrifying sound entered Ye Li's ears.

Ye Li was startled. He had heard this sound too many times in these ten days.

It was not any other sound but the sound of zombies!

Boom, boom, boom!

Then came a burst of intense knocking.

If zombies broke into the door, he had nowhere to hide in this small room. He could only die or become a zombie.

"What should I do?"

Ye Li's face was ashen. Was he destined to die?

Ding...

"Super synthesis system binding in progress..."

10%...30%...60%...100%.

"Super synthesis system binding complete."

The voice that suddenly appeared in his mind surprised Ye Li. He knew this was a system.

As a transmigrator, he certainly knew what a system was.

But he didn't have time to think. Four male zombies had already broken in.

As soon as these four male zombies saw Ye Li, they crazily pounced on him as if they were already starving for ten days

“As long as the host can subdue these four male zombies, they can be synthesized.”

The voice of the system sounded again in Ye Li’s mind.
