

## **Apocalypse 2611**

### **Chapter 2611 As Above, So Below! II**

An unbelievable development!

The Hyperversal Authorities of the very Havens flowed across the coiled Extremity Vein- the authorities of different Havens appearing throughout as the ebb and flow of the authorities caused the massive construct to radiate endless light.

A light that brightened up all Havens as at this moment, all eyes of immaculately powerful beings were on this phenomenon!

The force and surging of all of these authorities was so ridiculously potent that for the Scions and Elders who had entered the Abyssal Sanctimonious Lands within the Extremity Vein felt a rebounding force of authority wrap around them as they were ejected.

The endless veil of Dissolution that Noah's Reified Sources and Scions of Inheritances were watching and waiting to be torn down this whole time was forcefully pulled away from their eyes as all of them were ejected from the Vein!

HOONG!

And it pulsed and hummed as if it was announcing the grand arrival of something.

Those ejected out of the Extremity Vein gathered like innumerable dots on the stellar space as they stared at it with scrutiny.

From her high position above Dissolution, the brows of the Adjudicator furrowed as she waved her hands- her figure and Noah's figure in their isolated space disappearing as they appeared in close proximity with the Extremity Vein that now surged with multiple colors of light.

[A change like this is unheard of.]

Svetlana spoke lightly as they watched, and they weren't the only ones as from the different factions, the Hyperversal Extremities of Inheritances and Clans arrived in front of their Legions of Apex Aeonie Lifeforms that were going to participate in the Culmination Step of Dissolution as they observed the massive Vein that made them all look like ants cautiously!

This was the phenomenon in Dissolution, but in the other 6 Havens, the forces of a myriad of Inheritances and Clans simply had their Extremities gather and observe the pulsing Vein on their side as they waited to see what this phenomenon would usher forth.

But they were bound to be disappointed.

Because at this moment, the brightest shining portion of the Extremity Vein was Dissolution.

The one that triggered this change.

The Haven currently undergoing the Last Extremity Sanctification!

From it, blinding light radiated out across the stretches of trillions of light years- the Vein began to flicker as it split open to gush out the boundless light flowing through it!

A light that washed out into the surroundings as if stellar waterfalls of Hyperversal Authority had gloriously burst open.

Thereafter, these points where the Vein split open stabilized and formed into massive radiant rifts.

Rifts that reflected an illusory transparent light that could not yet be seen through at this moment!

And the eyes of all Hyperversal Extremities and Apex Aeonic Lifeforms gathered on these massive transparent rifts of light.

Noah's visage floated forward with a light of glory as within his mind, Oraculum buzzed to try and obtain information- and yet it was blocked off all around as nothing of the future relating to what was happening right now could be seen!

Authority of spatial distortion and the violation of the spacetime continuum heavily occurred around the transparent rifts stretched out across the portion of the Extremity Vein within Dissolution.

Then...

BZZT!

The transparent rifts trembled as their veil was torn down.

Along with this, the veils were entirely fractured and opened wide, revealing gateways connecting one end to another as the Hyperversal Authority of Dissolution, Helios, Oceanus, Elera, Andromeda, Penumbra, and Genesis flowed out endlessly!

The surrounding space felt like it had become heavy and viscous with the continued release of Hyperversal Authorities of the Seven Havens.

Apex Aeon Lifeforms felt stifled as they realized their movements were slowed down and restricted by at least 80%!

They also felt as if their souls now carried a heavy weight that they had to circulate their essence to overcome and simply move freely.

It was a feeling of oppression that came with the gushing of Hyperversal Authorities of the Seven Havens into Dissolution endlessly.

And then, there were the gateways.

Noah's body felt the same restrictions, with a part in his Soul that held the beginnings of the term [DISSOLUTION] that he had attained at the end of the Initiation Step lighting up and letting off a glow that made the oppressive effects of the surrounding reality become much lesser for him.

And as his will tried to overcome the raging Hyperversal Authorities gushing out to see into one of the many massive gateways before him, he felt the visage of the Adjudicator of Dissolution come in front of him as her hands pushed him back slightly.

As if she was protecting him from something.

What would the Adjudicator of Disintegration need to protect him from?

Before this question could be answered, her serene voice thundered out in this region as it was shockingly spread out by the raging essence and caused to boom out across all of Dissolution.

[As Above, So Below...]

...!

The cryptic words that the Curagulus of Extremity had unearthed from the Aeonian Annals of Extremity!

As the dense number of transparent tears of the Extremity Vein within Disintegration opened wide and released waves of astounding authority, the veil became torn as from within...a scene that many would remember for the rest of their lives unfolded.

The first thing was one that the Hyperversal Extremities observing at the very forefront sensed before anyone else.

It was the aura of Lifeforms.

In what should be the Culmination Step of Extremity Sanctification beginning, the dense, numerous, and majestic auras of Supreme Beings unfolded in a maddening fashion!

As the scene behind the portals became clear, it was like they were looking into an entirely different Realm past the radiant gateway.

A Realm that just like they were floating and staring into, innumerable sets of eyes were also floating and staring back at them!

As Above, So Below!

This term was quite literal in nature as it ushered forth the bells of change for the Seven Realms of Extremity!

### **Chapter 2612 As Above, So Below! III**

The phenomenon within Dissolution was utterly astounding.

Shielded behind the visage of the Adjudicator of Dissolution, Noah's will gazed past the veil of the gateway as past this doorway, an endless reality seemed to be stretching outwards endlessly.

As if a whole Haven- or multiple Havens were contained within this Extremity Vein that stretched out across all Seven Haven!

And just as he and many others stared into this Haven from Dissolution, there were a dense number of auras from this side that stared back at them.

BZZT!

The Oraculum Quintessential Absolute Dynamis of Extremity burned within Noah's eyes.

It locked onto the existences before him as it sought for any Records of their identity, and shockingly...

Golden light bloomed from his eyes as information about them began to appear from the Aeonian Annals of Extremity.

This was a shocking finding in itself as it meant these beings held their own Records, and they were connected to the Aeonian Annals of Extremity as well!

The reason for the Adjudicator of Dissolution stepping in front of Noah and gazing out with caution was because just on the Vein Rift in front of them, the blaring aura of three Hyperversal Extremities was gazing back at them.

Behind them, astounding creatures of Titanic size reminiscent of the Leviathans of Dissolution could be seen as each of them radiated power at the Apex Aeonian Lifeform level!

The three Hyperversal Extremities were bestial in nature as one at the very forefront was almost feline in nature.

Its body was massive with lustrous fur shining with obsidian gold light, the four limbs extending into paws glistening with deadly gold claws as at their base, tendrils of thick Hyperversal Extremity Authority of Dissolution swirled!

Its feline head was glorious in nature as two extremely sharp canines extended left and right from its jaws, its eyes radiating black light that pulsed out with terrifying tendrils!

Before Noah, its identity was a simple one.

[Haven Saber Smilodon]

Smilodon!

Magisterial in stature and grand in its power, with tendrils of Hyperversal Extremity Authority surging around it that did not pale in comparison to the Adjudicator of Dissolution before Noah!

And she knew this very well as this was the sensation that caused her to come stand before Noah.

'Zenith...'

This Hyperversal Extremity had long since attained Zenith Tier 3 Hyperversal Extremity Authority!

These were the thoughts of the Adjudicator.

Behind the Haven Saber Smilodon, the Titanic beasts were variations of Smilodons as on them, Noah's eyes collected slightly more information.

[Earth Saber Smilodon]:: Stemming from the regal lineage of the Saber Smilodons of Extremity, this Entity has achieved Great Proficiency at the stage of an Apex Aeonie Lifeforms. Within its soul, Dissolution courses with great valor as it seeks to cross the Earth and attain Haven- as it seeks to attain Extremity and become a Haven Saber Smilodon...

...!

Earth Saber Smilodon.

Its description came with new terms like [Great Proficiency] when it talked about the stage of Apex Aeonic Lifeforms, but the maddening thing was the fact that behind the Zenith Tier 3 Hyperversal Extremity Haven Saber Smilodon, there were thousands of just these Earth Saber Smilodons floating with valor and majesty!

Thick waves of Dissolution emanated from them as beside them were other Leviathan Beast Lineages.

They caused Noah's eyes to briefly move from the Haven Saber Smilodon and onto the two other Hyperversal Extremities beside it.

One was a unique winged entity that had a slender body with two pairs of veined wings and on its head-oversized multifaceted eyes could be seen as it was a Dragonfly!

In its membranous wings, thick Hyperversal Extremity Authority flowed with as the aura it gave off was no less than the Haven Saber Smilodon.

[Aquatic Eon Dragonfly]

Its identity showed itself before Noah as its cold eyes were enough to cause a common Apex Aeonic Lifeform to turn away in fear.

The other Entity had to be given even more attention to as its size alone exceeded all Entities they currently observed here.

Its pupils held a serpentine glint with dazzling yellow light, obsidian scales radiating black lightning adorning its serpentine body that snaked across the whole region behind it- forming into layers of mountains where others like it but much smaller could be seen slithering about!

This entity had an ancient name as well as it was a beast lost through time.

[Lightning Titanoboa]

3 dazzling Hyperversal Extremities.

All of them standing in front of the single opened Vein Rift just in front of the Adjudicator and Noah as the two sides looked at each other silently...but no one made a move!

The Haven Saber Smilodon, Aquatic Eon Dragonfly, and Lightning Titanoboa all gazed forward silently as a light of ingenuity flashed within their eyes, and yet none made a move.

It was extremely clear that it was due to something else holding them back as when one gazed away from this singular Vein Rift, the other Vein Rifts stretched out across Dissolution held similar scenes.

Scenes of terrifyingly powerful Hyperversal Extremity Entities gazing back at the Scions, Elders, and Extremities of the Inheritances and Seven Clans.

All of this was Unfathomable as this was only the Culmination Step of Extremity Sanctification!

In all the 6 previous times, the Extremity Vein had opened to reveal vast lands holding Supreme Eternal Behemoths of the specific Havens and droves of Aeonic Treasures of Extremity, Extremity Relics, and Hyperversal Extremity Treasures.

All of them were at the Apex Aeonic Lifeforms level as towards the end of the Culmination Step, the most dreadful Leviathan to emerge was nearly into Extremity during the Pinnacle Stage of Andromeda.

That was it!

And even when the Extremity Step of Extremity Sanctification began in the past Havens, the Extremity Colossal Beasts to emerge were at most Tier 1 or Tier 2 Supreme Ultimate Behemoths that they had to battle to attain treasures capable of raising their power within the Tiers of Hyperversal Extremity.

This was the experience of Extremity Sanctification Documented in the Aeonic Annals of Extremity.

This...was not what was playing out at this moment!

### **Chapter 2613 Fight! Fight! Fight! I**

The last Extremity Sanctification would be different.

It would be grand.

Many powerful beings had foreseen this and knew something was coming.

But even this was out of their wildest dreams!

At the beginning of the Culmination Step of Dissolution...an utterly shocking reality unfolded as from thousands of massive Vein Rifts blooming all across this Haven, the auras of entities no less than Tier 3 Hyperversal Extremity could be felt as among some of them...their auras were even more dreadful!

The Extremities of Inheritances who brought their Scions and Elders here for the purposes of the Culmination Step became grim at such a scene as they felt like even they were in peril.

It wasn't even the Extremity Step yet, but Tier 1 and Tier 2 Extremities were already sweating from the sheer pressure released by the Entities showing themselves beyond the Vein Rifts.

In front of a Vein Rift near the region where the Apex War of Annihilation took place.

The main body of Ayame stared with scrutiny ahead as beside her, gorgeous young men and women with crimson gold horns rising on their heads could be seen, with a few hundred more sharing their features floating behind them as in front...five Extremities from their Infinite Extremity were floating with power and valor!

They gazed into a Vein Rift that only showed two Hyperversal Extremities and hundreds of Leviathan Lineages behind them, Ayame gazing at them before she spoke out with caution.

"[Light Centipede] and [Purple-Flame Mammoth]...entities like these haven't appeared since the first Extremity Sanctification if records are to be believed. Now..."

She wasn't as fearful as other Scions as in front of her, the 5 Infinite Extremities had three among them that were Tier 3 Hyperversal Extremities- her grandfather was included in this group!

The other two were Tier 2 Hyperversal Extremities that cautiously gazed at the Light Centipede and Purple-Flame Mammoth whose sheer aura alone caused their scalps to tingle.

Yet even here...the terrifying entities on the other side did not make a move.

They simply stared out with cold eyes of interest and indifference at the same time!

And this was the shocking reality in all regions as even though thousands of Vein Rifts showing terrifying Tier 3 Hyperversal Extremities radiated light and continued to gush out the Hyperversal Authority of Dissolution, none of them moved out.

[...]

Their forces were enough to topple Inheritances and Clans, and yet they only stared out into the Seven Havens with a hint of interest and a lot more apathy.

That was until...

[Hey...stop!]

In one region, a shout of shock rang out as many wills gazed over from afar.

Noah and the Adjudicator also gazed out light years away from their position as they saw a cluster of powerful existences adorned in golden white robes.

They held thousands of Apex Aeonic Beings behind them and 7 Hyperversal Extremities at the forefront, with one of the Extremities stepping out at this moment as this group...stemmed from the Orientis Clan!

They were nobles of one of the Seven Clans as the one who had shouted was a man emanating Tier 3 Hyperversal Extremity towards a young woman.

A young woman who was adorned in a pure white robe as she had dark hair dripping to her shoulders- with this existence being widely known in the Haven of Elera as the Maiden of the North!

The Maiden of Orientis.

An Apex Aeonic Lifeform who had arrived at the 17th Boundary Layer, with her talent being not so much in fighting- but due to her capabilities in traversing the Aeonic Annals of Extremity that were so terrifying that she exceeded some genuine Hyperversal Extremities!

At this moment, this being had floated past the Hyperversal Extremities of the Eastern Clan as such an action caused one of them to bellow out, and yet her figure was calm as she spoke with valor.

"Esteemed Rubino, I am only following my intuition. There is nothing to worry about."

...!

Intuition.

What intuition would lead an existence towards a Vein Rift that was currently showing Four unknown Tier 3 Hyperversal Extremities and Legions of Leviathan Lineages behind them?

Extremity Rubino of the Orientis Clan nearly made a move to stop this genius Lifeforms of his clan, but his own soul buzzed soon after as he watched on with caution- his power ready to erupt at any time.

The Maiden of Orientis floated forward serenely until she came right before a transparent barrier surrounding the Vein Rift.

Not too far away, four Bestial Hyperversal Extremities stood as within this Vein Rift, all four were of similar lineage as they were [Cataclysmic Megalodons]!

Behind them, Lineages of sea-based Leviathans could be seen as the Maiden of Orientis looked at all this while an Absolute Dynamis of Extremity surrounded her whole body and gave off a golden glint of destiny.

And then without a word, she stepped past the transparent barrier and into the Vein Rift.

[....!]

Many eyes were focused here as while watching with bated breaths...

[WO!]

A booming shout instantly erupted from a cold-faced Cataclysmic Megalodon as from the Third Tier Supreme Extremity from Orientis instantly arrived behind the transparent barrier, ready to pull back the Maiden and battle right away!

But...

The Maiden of Orientis put her hand back and shook it as her eyes trembled from the sheer pressure released by the Hyperversal Extremities before her.

And after the initial shout from the forefront Cataclysmic Megalodon, its eyes glinted with a crimson light as it seemed to scan the figure of the young woman before it as its jaws moved again.

[Hughes...step forward!]

...!

The foreign Cataclysmic Megalodon emanated power and undeniable glory as after his call, a black and crimson Megalodon emanating waves of power similar to the Maiden of Orientis came forward.

It was a Minor Apocalypse Megalodon.

Its body was utterly glorious with power as its sharp jaws opened with valor, the 17th Boundary Layer of Dissolution crackling chaotically around its shark-

like body as it moved forward while the Leviathans around it made a clearing!

The massive legions of Megalodons cleared up the surrounding areas as their jaws began to snap with an ancient rhythm and power, a single word booming from them and spreading out at this moment.

"Fight."

"Fight!"

"Tatakae!"

"FIGHT!"

With utmost grandeur and as if she had stepped onto an arena, a glorious atmosphere rose at the very front of a Vein Rift!

**Chapter 2614 Fight! Fight! Fight! II**

Fight!

This word was repeated over and over again resonantly as the Authority of Dissolution churned.

The scene astonished many as it wasn't anything they had seen before!

Amidst such clamor, the authority of the forefront Cataclysmic Megalodon rose as all the shouts instantly died down, its magnetic voice emanating out.

[You may gain passage so long as you are victorious.]

...!

A shocking development to this new phenomenon!

The Maiden of Orientis had utilized her intuition to be the first existence to come forward as her actions allowed the millions of powerful Scions, Elders, and Hyperversal Extremities of the Seven Havens to get a glimpse of just how the Culmination Step was playing out for the Haven of Dissolution.

After hearing the words of the Cataclysmic Megalodon, the Maiden of Orientis became stern as her body erupted with tendrils of an Absolute Dynamis of Extremity.

Within it, concepts that had achieved the 16th Boundary Layer could be felt along with one that had reached at the 17th Layer!

It was the concept of Ascension.

The moment she heard the words of the Cataclysmic Megalodon, she gathered her power as her soul burned with valor, her voice ringing out!

[Domain Expansion]

...!

[Ascensio-]

BOOM!

Before she could even finish her words, the Minor Apocalyptic Megalodon moved so fast that it disappeared from its current location, the next thing that the Maiden of Orientis observed being its crimson and black tail overshadowing her whole figure!

BOOM!

She was instantly smashed backward as her gathered authority of an Absolute Dynamis of Extremity splintered, her chest becoming caved in as she shot back like a supersonic warhead!

Her white dress became dyed crimson as her figure quickly crossed the transparent barrier of the Vein Rift, the gaze of the Tier 3 Hyperversal Extremity Rubino becoming somber as he appeared behind her figure and held onto her injured body.

[WO!]

Within the Vein Rift, the Leviathan Megalodon Lineages cheered and bellowed out rhythmically once more in a grand fashion.

Shockingly, from the body of the Maiden of Orientis- a cluster of white light left her as her injured gaze became increasingly weaker- this light coming to land on the Minor Apocalyptic Megalodon termed Hughes as it entered its body and caused the aura it gave off to be even more menacing!

This reality was captured in the eyes of all.

When Extremity Rubino checked the Maiden of Orientis' body, he saw that her Soul Values were all nearly drained as they were even a fourth lower than what they used to be before!

This allowed him to know that one could step forward and fight, but there would be a price to pay if they were defeated.

But...what if one won?

[...]

Such a thought buzzed in the minds of many.

They heard the words of the terrifying Tier 3 Hyperversal Extremity Cataclysmic Megalodon as it stated they may gain passage so long as they were victorious!

And the enemy chosen to face them would seemingly be a being on the same stage of power and accomplishments on the path of Extremity as the Minor Apocalyptic Megalodon that had fought the Maiden of Orientis only held the single 17th Boundary Layer of Dissolution within its body.

So long as they won against such a creature...

These were the thoughts of others.

But the vast majority knew that it would be extremely difficult as they just witnessed a prodigy like the Maiden of Orientis be overpowered before she could even call out her Domain Expansion!

At such a juncture...

[Enough!]

A shout reverberated out as the Tier 3 Hyperversal Extremity Rubino holding the injured Maiden bellowed out while carrying her figure with authority behind him.

He then stepped past the transparent barrier and into the Vein Rift as the resonant bellows of the Minor Apocalyptic Megalodons quieted down.

Extremity Rubino floated in grandly as his body boomed out with crackling Tier 3 Hyperversal Extremity Authority, the forefront Cataclysmic Megalodon who had spoken initially looking at him coldly as its deep voice rang out.

[Vacadon, step forward.]

...!

One of the Tier 3 Hyperversal Extremities behind it came forth.

It was another Cataclysmic Megalodon, its body glistening with a fully obsidian color as the profound Hyperversal Extremity Authority of Dissolution cracked on its massive figure.

At its appearance, space also twisted and churned as in the center of the area immediately within the Vein Rift, a black singularity instantly bloomed as the voice of this entity named Vacadon thundered out.

[Step into the Temporal Field of Dissolution, and we shall battle. You may gain passage so long as you are victorious.]

WAA!

Similar words were echoed as when an Apex Aeonic Lifeform had come, the only difference being the addition of the Temporal Field!

Extremity Rubino harrumphed while gazing at the portal before him.

[Temporal Field of Dissolution?]

[An isolated domain where you can unleash your Hyperversal Authority without worry of the surrounding reality. You can battle for a day, month, or a year within as only a second will pass out here.]

...!

The eyes of the many gazing wills constricted at such words as the benefits of time dilation at their level of power were minimal, with only the most powerful beings being able to dilate time to a state that can actually help them!

Yet these Entities within the Vein Rifts conjured what they termed the Temporal Field of Dissolution so easily!

Extremity Rubino pulsed with power as he gazed at this Temporal Field, the Titanic figure of the Cataclysmic Megalodon known as Vacadon floating and disappearing into the obsidian singularity while its eyes seemed to be gazing down towards Rubino with great disrespect.

It was a gaze that caused this Extremity from one of the Seven Clans to snort and flash into the Temporal Field of Dissolution soon after!

And all wills watched with bated breaths.

In the far distance, Noah's figure remained with the Adjudicator of Dissolution as his eyes seethed with golden light- taking in all the events occurring and analyzing them!

One may gain passage so long as they were victorious.

But...what exactly waited for them if they overpowered any of these frightening enemies?

Just what was the Culmination Step of Dissolution shaping up to be?!

### **Chapter 2615 Inscrutable! I**

The grand and auspicious changes that occurred within the Haven of Dissolution were spread out to the main forces of all Inheritances and Clans.

In all other Havens, the risen Extremity Vein seemed to only be flowing with authority at this moment as the Vein Rifts only bloomed within Dissolution, and with the information being sent out that there were thousands of Vein Rifts showing Hyperversal Extremities at Tier 3 along with Legions of Leviathan Lineages...

Such a development caused even more segments of Inheritances and Clans to move as they realized they had truly underestimated the last Extremity Sanctification!

The Hyperversal Extremities who had led and guided the Scions and Elders currently within Dissolution were those considered in the middle of lower ranks of power within the Clans and Inheritances.

At this moment, the most powerful upper-tier Hyperversal Extremities began to move- their souls smelling change and opportunity as they made their way into Dissolution!

—

Within the Haven of Oceanus.

The figure of Extremity Blue stared at the risen Extremity Vein in the distance as her soul received waves of information from the forces of the Avernus Clan.

Her fair hands rose as she reached out towards the pulsing Vein, almost as if she could grasp it in her very hands...but she knew this was only an illusion.

She had to grasp power herself.

She had to always make the right choice.

And with Lunacy by her side, even the wrong choices would always be made right!

[Alright, let's see what the Havens have in store...maybe I shall finally grasp Zenith with this.]

Her dazzling visage rose as she glimmered with a blue light.

She then looked at the risen Extremity Vein and how it extended past the broken Walls Between Haven as she chose a direction and began rushing towards Dissolution!

She was only a glimmer of blue light in the vast expanse of Oceanus as in another region of this Haven, the figure of Emperor Shao could be seen surrounded by tendrils of dense Absolute Dynamis of Extremity by the dozens.

He was also gazing at the risen Extremity Vein in the distance as streams of information flowed into his mind from his own sources.

He assumed a contemplating look as the strands of Authority around him talked to each other.

And after a certain time passed, the authorities seemingly came to a conclusion as soon after, the countenance of Emperor Shao rose!

Zenith.

This was the stage he had reached.

But even this wasn't enough.

What he needed to attain was something exceeding Tier 3.

Something most others only dreamt of, but had long given up on.

His figure vanished into the vastness of Oceanus as he left to seek what his soul wanted the most!

—

Extremity Rubino vanished into the Temporal Field of Dissolution along with a Cataclysmic Megalodon that stood resonantly at Tier 3 Hyperversal Extremity.

Into a Field where the passage of months or even a year was akin to the passage of a second from the words of the leading Cataclysmic Megalodon!

They had seen the shocking difference in power when the Maiden of Orientis faced the Minor Apocalyptic Megalodon, the main point being that even if one was in the same Boundary Layer of a Concept of Extremity- it did not necessarily mean they were at the same level of power!

But the existence who was taking up the challenge now was a being from the Orientis Clan.

A man of stature and power that against these unknown Entities...

**BOOM!**

The thoughts of all beings theorizing what would happen came to a halt when the Temporal Field of Dissolution pulsed and spat out an existence that was pulsing with unstable waves of power, his hand missing up to his shoulder as golden blood spurted out freely!

His dark hair seemed withered as his eyes were dimmer than before, this existence being none other than Extremity Rubino!

[...]

An immense silence descended.

BZZT!

The Temporal Field of Dissolution shook again as the massive figure of the Cataclysmic Megalodon also came out, its sleek obsidian skin spotless and without any injuries as nobody knew just how shocking the battle within the Temporal Field of Dissolution was, nor how long it truly lasted.

They didn't know whether Extremity Rubino had been reduced to this state after the passage of months, days, hours...or even seconds since time worked differently within the Temporal Field of Dissolution!

But for a Level 3 Hyperversal Extremity from one of the Seven Clans to return in such a rugged manner...

The wills watching became utterly somber.

Mind you, this was the Culmination Step of Extremity Sanctification.

It was meant for Apex Aeonic Lifeforms for all past Culmination Steps in previous Havens!

And yet the Culmination Step of Dissolution...so far, even a Level 3 Hyperversal Extremity wasn't able to even gain entry!

Extremity Rubino felt as if all the wills watching were gathered around him as his eyes were filled with anger and veiled traces of fear, his figure moving back from the Vein Rift without even being told as the expressions of other Extremities from the Orientis Clan were dark.

Sensing the atmosphere, Extremity Rubino snorted out with anger.

[If you all think it is so easy, why don't you give it a go? Let's see which one you gains entry!]

...!

He felt like he could see the mocking gazes of other Transcendent Masters from the other 6 Clans and Major Inheritances.

He felt as if they were looking down on him!

But they didn't know the terror he faced within.

The Cataclysmic Megalodon that he faced...for a total of 10 seconds.

10 seconds!

Battles against Transcendent Masters could take nanoseconds to finish if there was a large discrepancy in power- like say a Level 3 Hyperversal Extremity fighting against a Tier 1 Hyperversal Extremity.

But when both were at the same Tier...such battles could take days or weeks!

And yet, his battle had ended in 10 seconds.

It showed just how much more overpowered the other side was!

All of those mocking gazes on him...didn't know the terror of the genuine Hyperversal Extremity Authority of Dissolution!

So his words thundered out.

And the masses of Scions, Elders, and Extremities couldn't help but look at their own Vein Rifts before their eyes holding terrific Entities within!

### **Chapter 2616 Inscrutable! II**

The power and confidence dwelling within the Scions, Elders, and Extremities of the Seven Clans and Major Inheritances weren't little.

Even in this shocking reality where they watched a top-tier Apex Aeon Lifeform knocked back with a single hit and a top-tier Hyperversal Extremity return injured with his arm ripped off...it didn't deter them!

It made them more cautious.

But that was it.

In front of one Vein Rift, an Inheritance known as the Extremity Forgers had their Tier 2 Hyperversal Extremity call out.

[Valiant, Gacun, Rosalind...step forward!]

He called from among the strongest Apex Aeon Lifeforms from his Inheritance as the three called out became serious while floating towards the Vein Rift.

Even at this very moment, the authority of Dissolution mixed with the authority of other Havens continued to spill out and permeate the surroundings, causing the concentration of authority to increase as it made the movements of all beings even harder!

This group of three Scions stepped forward as they received the same message as the one they had heard before- the enemies they faced being those from the Leviathan Lineage of Cosmic Centipedes as three Cosmic Earth Centipedes showing the equivalent 16th Boundary Layer came to face them.

They weren't the only scions to be sent forth as the many Inheritances and forces of Seven Clans here...began to usher their Scions and Elders to continue testing out and gathering more information of this Culmination Step of Dissolution- as well as seek to gain entry if they could defeat their enemy!

The Scions sent weren't the strongest.

The message they received was the same.

[You may gain passage so long as you are victorious.]

...!

They were then matched with equivalent Leviathans of Dissolution as shockingly, the Scions of Inheritances and those from the Seven Clans began taking in loss after loss!

No other Hyperversal Extremity had stepped forward as they continued to observe and gather information.

At the same time, the auras of more Hyperversal Extremities blazed as those from other Havens hearing of this shocking phenomenon made their way over.

All of this...fell under Noah's gaze as his eyes were currently glazed with the gold light of Oraculum!

He sensed boundless possibilities.

He sensed innumerable opportunities!

He just had to grasp them as he asked himself...

'Is it not time?'

WAA!

Was it not time?

His Aspects of Existence cried out as if they heard his call, the majority of his Soul that had been undergoing the Vacuous and Vitalis Awakenings beginning to rouse as it ushered for their completion!

It had taken its time, but the occurring changes were that heavy and thorough as it wasn't anything that Noah had come across before.

Bathed in Vacuous Hyperversal Authority, the Vacuous Malignancies could undergo the First Vacuous Awakening after their bodies reached a level of potency and purity for this authority. This was a simple enough process...but Noah had undergone both this and the First Vitalis Awakening!

Just how ridiculous had he now become?

HOONG!

Spurred by his Will, his Main Body which was currently surrounded by a swirling storm of liquified Vacuous and Vitalis Hyperversal Authorities woke up.

"..."

He looked at himself and the raging Hyper-dimensional Powers that had materialized even in the outside reality, his eyes blinking as he raised his right hand up because he...couldn't feel anything.

Yes!

He couldn't feel authorities, essences, or anything emanating from his body when he first woke up as it was a new sensation he had to adapt to!

His hand showed fair white skin that held faint stellar obsidian runic tattoos that formed ancient marks all throughout his arms, and they extended upwards as when they met on his chest...a magisterial ecriture of infinity was inscribed.

The runic markings glowed with a simple stellar light as they could barely be seen, but Noah felt that they weren't as simple as they looked because they served a purpose!

He could feel...potent Vacuous and Vitalis Hyper-dimensional Authority coursing through the pathways of these runic tattoos as they cycled over his body and caused a profound reaction!

His Body, his Origin, and his Soul...it all felt so different as he needed to understand and quantify just what had occurred.

When he thought of this, his vision flickered as prompts began to rise.

[You have completed your First Vacuous Awakening!]

[You have completed your First Vitalis Awakening!]

[An unimaginable feat worthy of being heralded across the Eternal Annals of Extremity!]

[Your Soul, Origin, and Body have gained the quality of an Absolute Hyper-

dimensional Inscrutable Existence as all of your authorities will be contained within your body without being expressed outwardly. No existences will be able to discern your Realm, Concepts, Layers, Dynamis, or anything else about you as even when you express a form of authority, you can choose how others perceive it, or you can express it as a formless authority that isn't visible to the naked eye.]

...!

A ridiculous upgrade that came with endless possibilities of applications.

Absolute Hyperversal Inscrutable Existence!

Due to the First Vacuous and Vitalis Awakenings, he attained an Existence that could now not even be perceived of its state of power by others!

It was the reason why when he first woke up, even he was thrown off as he couldn't feel any signs of essence emanating from his body when normally after such a transformation, a whole storm of essence would surround him!

[You have attained the Innate Vacuous Hyper-dimensional Channels and Innate Vitalis Hyperversal Meridians that allow the circulation, accommodation, and utilization of Vacuous Hyperversal Authority and Vitalis Hyperversal Authority.]

[The level of potency and purity of Vacuous Hyper-dimensional Authority is enough for you to actively control and utilize it at the First Vacuous Awakening, but the potency and purity of Vitalis Hyperversal Authority is still too low in relation to its stature as you currently cannot actively control this authority.]

...!

Vacuous Hyper-dimensional Authority could be utilized at Noah's current stage as it seemed...Vitalis Hyperversal Authority placed itself far above.

Thick tendrils of Vitalis Hyper-dimensional Authority flowed within his body, origin, and soul...and yet he couldn't actively command it!

### **Chapter 2617 Inscrutable! III**

[Transformation into the Vacuous Havenly I Entity is now available.]

[Transformation into the Vitalis Havenly I Entity is not currently available. The advancement of the Second Vitalis Awakening is theorized to open up this pathway for you.]

In the Infinite Hyperversal Haven.

Noah continued to gaze as descending prompts calmly as he took stock of his current body.

The stellar glow and shine that always blazed around him was retracted as he seemed simple, the only thing barely giving off a stellar glow being the runic tattoos that came together to form an infinity symbol on his chest.

His hair was dyed entirely lustrous black as Vacuous Hyperversal Authority was embedded deeply into it, his eyes being the most stunning as they held...

9 different colors of overlapping pupils!

Nine-Pupiled!

When one gazed into his eyes, they would tremble and feel like an ancient resistance was gazing at them and seeing through all their secrets, the pupils constantly rotating like engines as they seemed to be absorbing the surrounding waves of authority.

[You have attained the Innate quality of Hyperversal I Assimilation.]

[Hyperversal I Assimilation]:: You can accept all kinds of essences, resources, and entities of reality into your existence and assimilate them to further strengthen yourself- their Source capable of being applied towards your Concepts of Extremity or Any Aspects of your Existence...

Hyperversal I Assimilation!

In the past, when the Adjudicator of Dissolution had been talking to Noah as he discussed devouring his enemies and making their strength his- she had uttered with distaste that he sounded very much like the Vacuous Malignancies who reveled in devouring Hyperversal Extremities as if they were tonics!

And truly...such beings were exactly that.

Their whole existence could be devoured and directed towards any part of an existence that had undergone Vacuous Awakening.

Any form of Loot Noah attained from here on out...he could assimilate it and choose where its source strengthened him- whether it was to build his Aletheian Havens of Extremity, advance his Soul, or towards his Boundary Layers!

His Boundary Layers.

Shadows had long since been placed in his Meridians as at this moment, 81 of Noah's Boundaries had been forcefully taken to the 16th Boundary Layer as well.

The 16th Boundary Layer that was attained from the Shadow Sword that Noah was cut short from!

There were two more opportunities within the Sima Clan and Infinite Extremity for Noah to grasp and see just how far he could go...and then there was the Culmination Step that was astounding even Hyperversal Extremities within Dissolution.

[More information is being quantified regarding the changes brought forth by both Vacuous and Vitalis Awakenings.]

The latest prompt told him he would have to learn for himself just how ridiculous his current body was, with his soul currently calm and without any raging storms as neither Vacuous nor Vitalis Hyperversal Authorities were clashing.

It wasn't because they had suddenly harmoniously fused in some way- but the advent of the Innate Vacuous Hyperversal Meridians made it so that his Soul was coursing with fantastical vessels that

isolated and kept Vacuous Hyperversal Authority within, while the Innate Vitalis Hyperversal Meridians did the same with its respective authority!

The two opposing authorities were no longer clashing in Noah's body, but in the time that they were and after the Awakenings he had undergone...Noah was born anew as his power was utterly astounding.

From the hand he raised, Noah closed it into a fist as instantly, the liquified Vacuous Hyperversal Authority and Vitalis Hyperversal Authority swirling in the surroundings were absorbed into his body- the ancient runic tattoos on him lighting up with brilliance as they felt like ancient rivers that pristine authority flowed in!

Everything around him calmed as his Nine-Pupiled Eyes blinked, a dazzling blue-bordered stat panel appearing an instant later.

[Name]:: Noah Osmont

[Realm]:: Fourth Aletheian Haven of Extremity

[Lineage]:: Quintessential Hyperversal Emperor

[Titles]:: True Emperor of Quintessence, Wrathful Quintessential Hyperversal Demon Emperor, One Who Gazes Upon Hyperversal Authority, Aletheian, Indefatigable, Tyrannical Emperor, The Tainted, Anomaly, Home of the Weald, Awakener, Inscrutable, Hyperversal Anomaly...

[Quintessential Hyperversal Mana Value]:: Infinite

[Quintessential Hyperversal Vitality Value]:: 299,999

[Quintessential Hyperversal Soul Value]:: 299,999

[Quintessential Hyperversal Defense Value]:: 299,999

[Quintessential Hyperversal Damage Value]:: 299,999

[Hyperversal Dignity]:: 35

[Hyperversal Mastery]:: 35

[Absolute Hyperversal Authority Resistance]:: 37%

[Absolute Hyperversal Authority Penetration]:: 37%

[Dynamis of Extremity]:: Indefatigable(Quintessential Absolute), Aletheian(Quintessential Absolute), Vitalistic(Quintessential Absolute), Oraculum(Quintessential Absolute), Thanatos(Quintessential Absolute), Lotra(Quintessential Absolute)

[Boundaries of Extremity]:: Quintessence, Infinity, Shadows, Blood, Manadynamics, Loot, Reality, Dimensions, Anima, Body, Origin, Soul, Genesis, Apocalypse, Prana, Dreams, Avalon...

The statistical values of his main body.

Not his Reified Source of Quintessence that had a multiplier of 9.

Not his Reified Wealdian Sources of Extremity that also had a similar multiplier.

His Main Body!

In comparison, three days ago when the Apex War of Annihilation occurred, Ahpuch had his Soul Values approximately 20,000- with Noah's being slightly lower!

"..."

And here he was three days later.

His Nine-Pupiled Eyes blinked like ancient sins as he uttered out gloriously while raising his head.

"Acceptable..."

WAA!

The True Emperor of Quintessence looked at his progress and claimed it was acceptable!

His gaze went out far as it crossed the Infinite Hyperversal Haven and the Recorded History it was in.

It traversed the Aeonic Annals of Extremity and came to focus on the eyes of the clone beside the Adjudicator of Dissolution who was watching as one Scion after another was thrown on in defeat from the Vein Rifts stretched out across Dissolution!

The eyes of this clone flickered as the single pupil within doubled and then tripled until ultimately, 9 dazzling layered pupils appeared.

The skin begins to peel and flicker away as with this clone as an anchor...the Reified Wealdian Source of Indefatigable stepped forth.

Not with its characteristic and terrifying four faces as its original appearance, but with light complexion and calmness reminiscent of Noah's main physique as at this moment...it stopped giving off any perceive of authority or aura!

One's will and authority wouldn't even be able to perceive him unless they were looking straight at him, this change causing the Adjudicator of Dissolution to physically turn around as her eyes constricted when she gazed at Noah once more.

She had to gaze at him with her eyes.

She couldn't see him any other manner as her Hyperversal Will and Soul sensed him entirely disappearing in the past second!

If she wasn't looking at him, she wouldn't know he was there!

It was such an incredulous phenomenon as Noah didn't address it in any way, his form becoming decorated in light back plants and a loose-fitting obsidian shirt that showed off his glorious physique, as well as a glimpse of ancient runic tattoos forming into an infinity symbol on his chest.

An atmosphere of profound dignity and majesty surrounded him even when nothing about his aura or authority could be felt, his form slowly floating towards the Vein Rift that held the Smilodon Leviathan Lineage along with the Tier 3 Aquatic Eon Dragonfly and Lightning Titanoboa!

The extras had tried and kept on trying to gain entry even now as none were successful.

It was time for the protagonist to step onto the stage!

### **Chapter 2618 Man of the Hour! I**

The Haven Saber Smilodon gazed at the millions of The Underdwellers as his eyes could see them plotting.

He could see them scheming as the Hyperversal Extremity Authority of Dissolution allowed to read their movements and even their very thoughts!

They thought they could sneak this way out of this through some unique methodologies, but they would come to find that only pure power was the answer.

And comparing The Underdwellers before him to their Havenly Lineage that was tasked with a glorious purpose...well, the result was apparent in the currently occurring reality.

Matched against equivalent existences from the Havenly Lineages who had achieved the same highest Boundary Layer, the Underdwellers still had yet to produce even a single being that gained entry!

It showed the discrepancy in power as they sought Extremity...but they didn't truly dedicate and sacrifice their very souls to it!

An Underdweller capable of matching even one being from their Havenly Lineage had yet to step forward as if things continued like this...then he had no worries about their Havenly Lineage being the ones to bear the weight of all that was to come.

Tendrils of Hyperversal Extremity Authority of Dissolution raged around the body of the Haven Saber Smilodon as he was gazing at the light years around this Nether Haven when his sharp canines glinted while turning towards a certain direction.

[Hmm?]

His authority pulsed as he nearly missed an Underdweller.

Even now as he stared at his levitating form that was coming towards the Vein Rifts, the Haven Saber Smilodon could not feel an aura emanating from this existence!

He...could not read the power of this being.

Unlike the masses of Underdwellers who easily had their thoughts laid out in the open, even the concepts of Extremity could not be felt from this being!

The Haven Saber Smilodon's eyes released a radiant sheen as the Hyperversal Extremity Authority of Dissolution around him danced, information and possibilities blooming within the mind of the Haven Saber Smilodon as he coldly gazed forward.

'Maybe?'

...!

—

Noah's figure floated out serenely.

He approached the Vein Rifts before him just like many other Scions and Elders were doing, but a few eyes had already glanced over due to the fact that the Adjudicator of Dissolution was here- their wills drawn prior due to Noah being behind her!

There were also many sets of eyes that already had the region around Noah under observation as light years away, the figure of Extremity Ariana and a dozen other Avernus Extremities could be seen floating a distance away from another Vein Rift.

Ariana had purple flames simmering in her eyes as she noted the distance and closeness that Noah showed with the Adjudicator of Dissolution, her eyes revealing many things when a voice that nearly caused her to jump rang out beside her.

[You're so focused when staring at him...do you want to kill or pounce on him?]

...!

Beside her, the lunatic that was Extremity Blue suddenly appeared as Ariana nearly cursed at her!

She gritted her teeth while replying calmly.

[All of these changes have just bloomed as nobody is clear yet on what the full circumstances is. I don't like that he's getting a chance to fight...]

Ever since the events in the Shadow Sea Plane and the Shadow Sword that Ariana had claimed, she had grown even more careful and cautious of the entity that was Noah Osmont!

[You're focusing on the wrong things, little sister...] Beside her, Extremity Blue smiled brilliantly while her gem like eyes shone.

Extremity Ariana kept her annoyance to herself as she wanted to ask this lunatic just who the hell was her little sister?!

Yet this lunatic continued as her smile turned utterly cold.

[Your concentration should be on the fact that at this moment, we cannot feel even an ounce of Concepts or an aura from him, and we're supposedly Hyperversal Extremities while he is an Apex Aeonic Lifeform!]

Brilliance shone in her eyes as around them, the eyes of the Avernus Extremities constricted and focused!

At this time, the figure of Noah stepped foot past the transparent barrier of the Vein Rift as he gazed calmly at the Leviathan Lineages before him.

Smilodons, Dragonflies, and Titanoboas!

Each of their bodies pulsed with power and great might as his languid eyes came to land on the entity emanating the most dangerous aura.

The Haven Saber Smilodon stated back at him coldly as he didn't call out a name yet.

Instead, his regal voice rang out.

[What is the highest Boundary Layer you have achieved?]

...!

A smile formed on Noah's lips.

Inscrutable.

This feature of his entity made it so that even this powerful existence at the same stage if not beyond the Adjudicator of Dissolution to not be capable of seeing through him!

"The 16th Boundary Layer."

He spoke simply as the eyes of the Haven Saber Smilodon flashed, his stature being able to ascertain the truth and falsehood of words as his voice boomed out soon after.

[Miguel, step forward.]

WAA!

A glorious aura blared forth.

The Legion of Smilodons in front of Noah parted ways as from them, the visage of an Earth Saber Smilodon coming through as its fur was drenched inky black.

The power of the 16th Boundary Layer of Dissolution surged on his paws explosively as above his head, an illusory obsidian flaming crown of Dissolution roared to life!

The Earth Saber Smilodon named Miguel stared at Noah, and he was met with eerie Nine-Pupiled Eyes that gave off unseen pressure.

But the might of the Smilodon wouldn't falter.

It would do what many other Havenly Lineages had done against the Underdwellers that had come forth.

It would strike and smash this being back to where he came from!

[HO!]

Flames of Dissolution freely flowed from the body of the Earth Saber Smilodon as he treated this battle with utmost seriousness since the enemy's power couldn't be properly gauged.

SAA!

A flicker of black light.

And an instant later, the pristine sharp claws of the right limb of the Earth Saber Smilodon appeared on the right side of Noah's floating figure!

"..."

Disappointment dawned on the eyes of the Smilodon.

His enemy didn't erupt with any power, nor did he even react to turn to the right to defend.

He deserved the loss that was coming if he couldn't even react to his speed!

The claw of the Smilodon thundered down as...

BZZT!

...!

A fantastical scene unfolded.

The Smilodon didn't know when, but the hand of the entity adorned in loose fitting black pants and shirt had risen as two fingers on his hand clamped out...and the claw of the Smilodon carrying the weight of Dissolution behind it was entirely stopped!

Crackles of inky black Dissolution buzzed and erupted as if metal was grating on metal.

The Earth Saber Smilodon felt as if his claws were clamped and held down with the weight of a Haven as the being responsible slowly turned his head to the right.

And the soul of the Earth Saber Smilodon vibrated with astonishment as it stared into nine pupils that now seemed like 9 endless swirling storms of the abyss!!!

**Chapter 2619 Man of the Hour! II**

All the battles that had occurred so far when Scions and Elders of Inheritances and Clans stepped into the Vein Rifts had ended the same way.

Complete and utter thrashing as the quality of power was on a completely different scale when the Scions and Elders battled against equivalent Leviathan Lineages that had attained the same stage of Extremity!

One of the main causes behind this was none other than the fact that the Leviathan Lineages all pulsed with the authority of Dissolution.

The authority of the very Haven they stood on and the very authority still spilling out senselessly from the Vein Rift!

Fight after fight, the result was the same as the Scions and Elders wouldn't even last a few moves.

So...when an existence facing a Leviathan pulsing with Dissolution showed off a shocking scene of dominance to the extent that he wasn't even moved back by an attack...many eyes and Wills began to draw over!

Who was he?

What was his level of power? Which Clan or Inheritance did he stem from?!

These questions buzzed as a vast number of wills across the indeterminate light years came to focus on a single Vein Rift that showed off a devilishly handsome man.

He arrived and made all others focus on him.

As if he was the man of the hour!

—

The sensation was indescribable.

When the Earth Saber Smilodon began moving. When flames of Dissolution erupted around its body. When its claws came towards him.

It was immeasurably fast in the eyes of others, but for him...it was so slow!

Just his spread-out will allowed him to see it all as his Foundation which had been absolutely jacked by the First Vacuous Awakening and the First Vitalis Awakening was just this frightening!

While the Smilodon was coming in the span of an instant, Noah was able to lock onto it as his Nine-Pupiled Eyes blazed with gold, even more details now being pulled out when he looked at this creature.

[Name]:: Miguel

[Realm]:: Minor Haven of Dissolution

[Lineage]:: Havenly Smilodon Lineage

[Titles]:: Havenly Beast, Saber-Toothed, Havenly Dissolution Extremity Foundation...

[Havenly Dissolution Mana Value]:: 50,000

[Havenly Dissolution Vitality Value]:: 50,000

[Havenly Dissolution Soul Value]:: 50,000

[Havenly Dissolution Defense Value]:: 50,000

[Havenly Dissolution Damage Value]:: 50,000

[Dynamis of Extremity]:: Dissolution

[Boundaries of Extremity]:: Dissolution

...!

The reason why they outclassed Scions and Elders so much.

From their side, they were calling them Leviathan Lineages as on their end, they were known as the Havenly Lineages!

And the values of a single Entity of the Havenly Smilodon Lineage who had achieved the 16th Boundary Layer is Dissolution was two times compared to a Direct Disciple of a Tier 3 Hyperversal Extremity like Ahpuch who had also only achieved the 16th Layer as his highest.

The Havenly Lineages were powerful!

If Noah had met them just three days ago before the war, maybe he would be on the same boat as other Scions and Elders like today.

But now...

"Get ready."

...!

His voice was calm as he addressed the astounded Earth Saber Smilodon.

His fingers that were clamping down on the claw released and straightened as they all pointed towards the Earth Saber Smilodon, and an instant later...his fingers were retracted to form a fist!

A fist.

Just the formation of a fist!

The pressure of this formed fist thundered forth as in the eyes of others, a blinding cylindrical beam of multicolored light instantly barreled forth!

And yet, it was the authority of the Indefatigable Quintessential Absolute Dynamis of Extremity released from the Reified Wealdian Source of Indefatigable!

ZAA!

The multicolored beam of light disappeared just as quickly as it had erupted.

When it faded, the eyes of the Earth Saber Smilodon before Noah were dim as its long canines were shattered, cracks extending from throughout its inky black body as a number that only Noah could see rose before this beast.

-49,999!

He precisely controlled his output to release a damage value that would leave behind a single Vitality Value on this Entity.

He didn't go for death as there were three terrifying Tier 3 Hyperversal Havenly Beasts right behind this one!

Its body shuddered as golden blood flowed like rivers, immense silence descending in the surroundings as from its body, Noah saw a flash of light be released and flow towards him.

His hand rose to grasp it as it couldn't forcefully make its way into his body unless he allowed it, and after he affirmed there were no issues, it sank in smoothly as a prompt rose!

[You have attained 10 Units of Havenly Aurora!]

...!

When the Maiden of Orientis lost, she had lost a significant portion of her Soul Values as they were even permanently reduced- all of this going towards the victor who had defeated her.

Now after Noah defeated a Havenly Beast, he attained 10 Units of Havenly Aurora!

This unique form of energy was collected into a corner of his soul calmly as when he tried to peer into it...

[The Usage of the Units of Havenly Aurora is currently unknown.]

The information wasn't there.

The reality around him resumed.

The Scions, Elders, and Extremities watching in front of other Vein Rifts had shining eyes as they stared at the unbelievable scene that had just occurred.

For the first time, someone from their side had actually defeated a Leviathan Beast!

In the far distance, in a region where massive vessels and the powerhouses of the Sima Clan were clustered.

The Extremity of Foundation stood behind Erikson and many other Sima Clan Scions as he spoke to his son with a calm gaze.

[You continue to be right about him.]

The words were meant to acknowledge Erikson's foresight, but his expression remained free and unbound as for today's occasion, his beach attire had changed to a shade of orange-red. As if to welcome a setting sun!

He gazed at the figure of Noah in the distance as well as the Vein Rift before the eyes of the Sima Clan.

At this moment, he already began to distort the probability of the events to come as he was ready!

On another side, the figures carrying a sense of despondency and desolation could be seen as they were wrapped in shadows.

The Primeval Shadow Elder Silas and others stood behind Laos, Flashing Shadow, and even the Shadow Extremity Overlord as they also gazed towards Noah!

Their thoughts were hard to read as gazes of maddened rage would occasionally turn towards the region clustering the forces of the Avernus Clan!

Many beings had just begun to react to the shocking first win within a battle to occur on their side as one Scion who had been watching this battle unfold since Noah stepped forward spoke with an incredulous expression as if he had just realized something.

"Wait...did he say his highest Boundary Layer was the 16th?"

...!

Before the battle began, the Haven Saber Smilodon had asked Noah his highest Layer. It was only now that some people who held more information fully processed this as their minds began to pound!

Their eyes became stern as they looked at this being ahead of them.

He wasn't even an Apex Aeon Lifeform until a few days ago as far as they knew, and he had already taken a Boundary to the 16th Layer?!

This was akin to a prized Scion being given the resources and nurturing of a massive Inheritance or Clan!

So what exactly had this being relied on to bring a Boundary to the 16th Layer?!

"..."

A question that held no answer.

Within the Vein Rift, the Haven Saber Smilodon looked at Noah with a dazzling obsidian light as his voice thundered out while waves of his authority wrapped around the Earth Saber Smilodon Noah had spared to pull it back.

[You have come out victorious and gained entry-]

[Like hell he did!]

..!

BOOM!

Before the words of the Haven Saber Smilodon ended, a dazzling allure of Blue erupted out as Hyperversal Haki of Extremity thundered from all directions!

The Adjudicator of Dissolution quickly reacted as she was about to make a move, and yet her hand came to a halt an instant later as she felt no need to.

A maddening flicker of cerulean light was surprised at this, but it continued forward nonetheless as the target was the being emanating not even an ounce of an aura!

And yet before her Hyperversal Haki of Extremity or even her visage came close...

BZZT!

Astounding waves of Hyperversal Extremity Authority of Disintegration seethed as everything was wiped away.

After all, there were three Zenith Tier 3 Hyperversal Extremities just at the forefront of this Vein Rift!

The figure of a woman with snow-white hair adorned in a blue battle dress became clear.

And before her, the glorious visage of a cold-faced Aquatic Eon Dragonfly could be seen- this being the existence that had effortlessly eliminated her Hyperversal Haki of Extremity!

Extremity Blue watched forward and spoke with squinting eyes

[Hey, beastie...] Her expression was calm as she stared at the Zenith Tier 3 Hyperversal Extremity before her.

[Could you move aside just for a second? I just want to put to sleep that guy behind you there, and I'll leave right after...pinky promise!]

Her fair hand reached out as her smallest finger was raised.

The swirling gaze of the Aquatic Eon Dragonfly pulsed as its voice thundered out.

[You may gain passage so long as you are victorious.]

...!

The same words.

Immeasurable grandeur overflowed as behind the Aquatic Eon Dragonfly, Noah's silhouette became bathed in a wondrous light- the Legion of Earth Saber Smilodons before that being parting as they exposed a hazy mist in the distance that hid unknown lands!

### **Chapter 2620 Havenly Aurora! I**

[You have come out victorious and gained entry into the Supernal Haven of Dissolution. Be mindful of your actions within as if you offend those you should not, your life is not guaranteed.]

...!

The Haven Saber Smilodon spoke while its cold eyes stared at the figure of Extremity Blue who had interrupted him earlier in the corner of his eyes.

"Supernal Haven of Dissolution?" Noah's eyes rose as he saw the Earth Saber Smilodon Legion parting ways to reveal a hazy dark mist in the distance that shrouded what lay behind it.

Whatever lay behind was termed Supernal Haven of Dissolution as he sought to see if this horrifying Tier 3 Hyperversal Extremity would reveal any more information!

And the Haven Saber Smilodon pulsed with tendrils of Dissolution as an authoritative voice thundered out coldly.

[The Haven you all are in is the Nether Haven of Dissolution. Within it, the potency and purity of Dissolution are at their lowest as most of the Underdwellers within it will not even have the right to embark on Dissolution itself.]

...!

The Aeonic Haven of Dissolution was termed the Nether Haven of Dissolution, with the words of the Haven Saber Smilodon stating that beyond the Vein Rifts, they would appear in the Supernal Haven of Dissolution!

One was below, one was above.

One was outside of the Extremity Vein, the other could only be accessed within!

And Noah along with all those in the Aeonic Haven of Dissolution were termed...

[Underdwellers? Us? Haha!] The annoying voice of the Extremity of Lunacy echoed out as her head peeked beside the Aquatic Eon Dragonfly.

Her eyes shimmered with blue light as she continued to speak once more.

[You told him he was granted access and that he should be mindful not to offend those he shouldn't in this Supernal Haven of Dissolution lying ahead...

does that mean there aren't any sort of rulings that would prevent an Extremity from giving an eternal nap to a being of lesser power that offended her?]

...!

Noah's eyes shone dangerously at Extremity Blue's words.

Outside of the Vein Rift, the eyes of the Adjudicator of Dissolution radiated terrifying splendor at the advent of such words!

And then...the Haven Saber Smilodon gazed at Extremity Blue as if he were looking at a fool as he spoke grandly.

[Rulings? The only ruling within any of the Supernal Havens of Extremity is strength. If this being here has offended you and you want to kill, you can kill. You simply need to gain entry.]

BOOM!

Explosive words thundered out as the minds of all those watching buzzed.

Right.

The Investiture of Extremity that stated that those of higher power could not act against those less powerful than them was instituted by the Senatus of Extremity in order to maintain a semblance of order in the Seven Havens!

In the Seven Havens they knew and lived in.

There was no such thing in these lands that the Haven Saber Smilodon termed the Supernal Havens of Extremity!

Strength was king.

Strength spoke for itself as if one had power, they could do whatever they wanted!

When she heard this, Extremity Blue let out a raucous laugh that before it could finish...

[Of course...] The voice of the Haven Saber Smilodon thundered out again as this time it was focused on her.

[...you have offended me just now. So if you happen to gain access into the Supernal Haven of Dissolution, just know that if I feel like it, I may also choose to put you to sleep permanently.]

WAA!

The Hyperversal Extremity Authority of Dissolution crashed madly.

The smile and laugh on Extremity Blue's face were wiped away as a horrifying atmosphere bloomed.

In front of her, a radiant obsidian Temporal Field of Dissolution bloomed as the cold eyes of the Haven Saber Smilodon shone while the dominant voice resonated again!

[Zaman, step forward!]

...!

From behind the Legions of Earth Saber Smilodon.

The obsidian mist churned and roiled as an immediate later, a glorious aura of a Tier 3 Hyperversal Extremity bloomed- the visage of a red-striped Haven Saber Smilodon appearing as its aura was much less threatening than the Zenith Haven Saber Smilodon that had been talking this whole time!

Extremity Blue had not achieved Zenith.

She was not matched with any of the three Zenith Tier 3 Hyperversal Extremity Havenly Beasts that were already here as her match was called out from the Supernal Haven of Dissolution!

The unfolding scene was utterly breathtaking as a great deal of information was unveiled, and immense dangers also showed themselves as Extremity Blue gazed in the far distance where the troops of the Avernus Clan were clustered.

Her eyes sent out a clear message as Extremity Ariana and the others there knew exactly what she stated, the Avernus Extremities moving authoritatively as their troops began to swarm towards nearby Vein Rifts to seek access!

Since if they were powerful enough to enter the Supernal Haven of Dissolution, they would not be bound or restricted by the Investiture of Extremity that they had already begun to violate.

At such a conclusion, Extremity Blue herself smiled crazily as she turned into a streak of light that surged towards the Temporal Field before her, but not before her voice thundered out.

[Wait patiently for me, Little Osmont.]

SHAA!

With a blink of light, she disappeared.

Noah gazed at this scene with profound coldness as he also turned around and floated towards the obsidian mist in the distance!

'Wait!'

The voice of the Adjudicator of Dissolution buzzed in Noah's mind at such a moment as he didn't stop.

He knew what she was going to say. She wanted him to continue being reliant on her power and the power of others to defend against Hyperversal Extremities in these new and unexplored lands that didn't prevent them from acting out against those of lesser power!

But Noah had seen time and time again how even she could not do anything to stop the violations of the Investiture of Extremity.

He had long since decided to not rely on others as he only sent back a single message to the Adjudicator of Dissolution!

'I'm not worried about a mere Hyperversal Extremity. They had been hunting me then, and they're hunting me now. I'll deal with it as I see fit.'

...!

The power of other beings could not be relied on.

Only his own power would give the most guarantee as without looking back, he passed the ranks of the Earth Saber Smilodon that were staring at him cautiously and with a combative battle spirit as he delved towards the obsidian mist in the distance!
