

APOCALYPSE: GOD-LEVEL ZOMBIE SYNTHESIS SYSTEM

Chapter 4

As expected, not long after, Ye Li saw a dozen zombies on the third floor of the hospital.

“Attack!”

Ye Li ordered the level 4 male zombie and the level 2 female zombie.

Ye Li was full of spirits. He had been hiding and going through countless difficulties and obstacles for the last ten days, and now he had finally turned the tables.

At Ye Li’s command, the level 4 male and level 2 female zombies rushed towards the dozen or so zombies.

Soon, the level 4 male and level 2 female zombies subdued the zombies.

Of the dozen or so zombies, eight were male zombies and eight were female zombies.

Ye Li combined the eight male zombies into a level 4 male zombie and the eight female zombies into a level 4 female zombie.

Now he had two level 4 male zombies, one level 4 female zombie, and one level 2 female zombie.

Two level 4 male zombies could be synthesized into a level 5 zombie.

In his mind, Ye Li dragged a level 4 male zombie onto the other.

In an instant, a level 5 zombie was born.

The level 5 zombie was still an ordinary zombie. It would become an advanced zombie at level 6.

Ye Li continued to search for zombies in the hospital. To his disappointment, there were no other zombies in the hospital.

Now it was getting late, and it was not appropriate to go out and look for zombies.

Ye Li found a relatively clean room and had the level 5 male zombie and two female zombies guard him before going to sleep.

The next day, the sunlight shone on Ye Li's face through the window.

As soon as he woke up and stretched lazily, the system's voice appeared in Ye Li's mind again.

Ding...

"Congratulations, host, you have obtained three zombie boxes."

Ye Li was stunned. He quickly checked and found a level 5 zombie box, a level 4 zombie box, and a level 2 zombie box.

"Host, zombies can produce boxes every day. The higher the level of the zombie, the better the contents of the box."

The system explained to Ye Li.

Hearing this, Ye Li's face was filled with excitement.

Without thinking too much, Ye Li opened the box produced by the level 2 female zombie.

"Obtained 5 gene points, 5 strength points, 5 speed points, and 5 defense points."

Ye Li fused the acquired attributes into his body. This level 2 zombie box was not very good.

Then he opened the level 4 zombie box.

"Obtained 15 gene points, 15 strength points, 15 speed points, 15 defense points."

"Two boxes of food."

Ye Li felt that this was pretty good, and he fused the attribute points.

He opened the level 5 zombie box.

"Obtained 20 gene points, 20 strength points, 20 speed points, 20 defense points."

"Three boxes of food."

After fusing the attributes from the level 5 zombie box into his body, Ye Li felt that his body had undergone another qualitative change.

Ye Li opened the attribute panel again:

"Host: Ye Li."

"Age: 21 years old."

“System: Super Synthesis System.”

“Realm: Level 2 Awakened Being.”

“Skill: Zombie Poison Immunity.”

“Weapon: Steel-cutting Knife.”

“Gene: C-level.”

Ye Li thought that he was still rubbish even though he was now a level 2 Awakened Being.

Like a Level 2 zombie, a Level 2 Awakened Being was just an ordinary Awakened Being. It wasn't until Level 6 that one became an advanced Awakened Being.

Furthermore, above Awakened Beings, there were Evolved Beings. Awakened Beings and Evolved Beings were fundamentally incomparable.

However, he didn't expect his gene level to upgrade from D-level to C-level.

The higher the gene level, not only did it represent higher future achievements, but also signified greater strength.

For example, a Level 2 C-level gene Awakened Being was undoubtedly stronger than a Level 2 D-level gene Awakened Being.

Above C-level gene was B-level. It would be difficult to advance to B-level genes, but Ye Li was not worried at all.

The zombies produced zombie treasure chests every day, which contained gene points. If he wanted to upgrade his genes, it might not be as difficult as it seemed.

Then Ye Li became a little distressed, wondering how to deal with these five boxes of food?

Taking them along didn't seem very convenient.

Ding...

“Unlock system space.”

“The system space can accommodate up to 100 items.”

Ye Li rejoiced, thinking that things came just when needed.

He placed the five boxes of food into the system space and after some thought, he also put the Level 5 male zombie, Level 4 female zombie, and Level 2 female zombie into the system space.

System space: 8/100.
