

## Apocalypse 421

### Chapter 421: Death Wheel Ghost Banner

The blood veil was translucent and covered the entire square. Something weird happened.

Typically speaking, when veils touched liquid, they would get wet. But this was different. It was absorbing the blood. While it was dry itself, it became brighter and brighter.

Moreover, it was not only absorbing blood; it absorbed the broken limbs and flesh. Be it humans or zombies, all of them were absorbed into the thin veil.

Nothing was left on the square, except equipment and demon crystals, when it absorbed everything.

The veil that had turned blood red didn't finish. It rose like how it descended previously. When it was four to five stories high, it started to shrink. A moment later, the veil turned into a two-square-meter red cloth.

An unclear diagram appeared.

Ye Zhongming used a dagger to slice his wrist. The cloth felt like it had sniffed something delicious and wrapped the wound.

If someone were close, they would see something spreading from the cloth like veins. As those veins spread, Ye Zhongming's face turned ashen white, and his body shook.

Such a situation lasted for a minute. When the entire cloth was covered in veins, it floated back into the sky. The people looked at it and didn't understand.

A blue bone appeared in Ye Zhongming's hands, and he stuck it into the ground. The red cloth landed again and wrapped around this long bone from some animal or undead lifeform.

It moved about and slowed down until it got fixed in place. It slowly opened up and danced in the breeze.

"This... Banner?" Even if he felt sorry for Ye Zhongming and Cloud Peak, Bai Feng knew that Ye Zhongming might not be a good person, but he was honest. Since his men and he survived, he wouldn't do anything to him. So he didn't leave and just stayed to see what Ye Zhongming wanted to do.

He saw how the veil turned into a banner and was shocked.

This banner danced twice as if it was completing a ritual. It spat out a red mist, and it lowered the visibility around.

Numerous ghost souls could be seen in the mist. They twisted in the mist and cried out in pain. They wore white or black robes and stretched out their green or black claws. They had empty eyes and mouths as they wandered.

Many people retreated in terror. This was the first time they saw such a weird thing. Like those souls were real. It was as if they would scream from above and charge.

What was unacceptable was that these souls were those who had just died. They could find familiar faces that terrified those who were alive. They were afraid that they would end up like this if they died.

The red mist grew until it formed a red cloud above Ying City.

The sun shone brightly above. Half of the sky was also that red cloud.

Talking Lady, who tried to stay as far away from Ye Zhongming as possible, raised her head and looked at the red mist. Apart from terror, there was respect in her eyes. Maybe she didn't know that this emotion was called respect. As Talking Lady was a zombie, she was intelligent. Facing such a mysterious thing that she didn't know, her instinct was for her legs to go soft.

She knew that her emotions were not right, so she left right away.

Ying City survivors looked at the red cloud in terror. After being stunned momentarily, they quickly left the range. They didn't know what it was but knew it wasn't good.

Cloud Peak, Counter Cloud Peak people moved out of their tents and looked at the red sky. They all discussed what it was.

The few five-star experts who wanted to attack Cloud Peak gathered together. Ten minutes later, a hundred of them set off towards Ying City.

Xia Lei, whose injuries were mostly healed, stood on the walls and looked at the weird shape in the distance. The other Cloud Peak members took a look before they started to get busy. As the battle today was about to begin.

This weird phenomenon lasted for half an hour, and when the red mist returned to that flag, it shone purple!

“Purple equipment!”

Those survivors who didn't leave were stunned. Who knew that this thing was purple equipment? Purple!

The top person in Ying City, Zhao Xingmei, used Flying Star, which was just green!

The person who owned Flying Star looked at Ye Zhongming with a complicated gaze. This guy set up such a massive plot for tens of thousands to die... To create a piece of purple equipment?

Bai Feng's gaze was dark, and he looked at Ye Zhongming. He told his men, “Let's go, let's leave.”

Zhao Xingmei ordered them to leave, too, but when leaving, she looked at the calm guy and understood some things.

This guy had a plan. When everyone felt he was taking revenge for his men, he used it to obtain a piece of overpowered equipment.

Moreover, was this over? Zhao Xingmei smiled. No, he was using this to reestablish his position and status. There was no more top evolved, no Zombie King Talking Lady, no mutated animal Rat King, only one king of Ying City!

This battle hurt the evolved and zombies. Rat King only dared to hide underground with his children. The only one that won was this guy.

He did one thing to achieve so many goals. Zhao Xingmei, who felt like she was smart, felt powerless.

Did this guy come out from a stone?

Ye Zhongming held the flag, and the information appeared in his mind.

“Death Wheel Ghost Banner (Purple), one time use, after use, activate the Death Competition Arena (Very dangerous).

Chapter 422: First trump card

The difference between apocalypse and other eras was that there were no rules.

The biggest difference was that it was also that there were many rules.

If you were strong, you were the rule. If you were weak, you followed the rules.

Thus, no one dared to enter when the strong Counter Cloud Peak Alliance split the region, forming the battlefield. At least no one dared to yet.

But today, someone entered, and many people did.

Since they sneak attacked Cloud Peak and forced the only five-star evolved to appear, they prepared to attack on the second day. But they stopped because of that weird red cloud.

Counter Cloud Peak Alliance wanted to fight today, but these survivors spoiled their plan.

“Where did they come from?”

Pang Cheng sat on a stone and asked.

He had his clothes over his body and was topless, revealing his scars and the wounds that just sealed. The sneak attack left many wounds on his body that hadn't healed. He hugged Lou Xiaoling. His aura wasn't as confident as before, but he was still arrogant.

Xia Lei had healed up yesterday, while Pang Cheng's wound was only sealed today. It was the difference in healing.

Sound Iron and Little Nine frowned. They didn't know anything about these people and needed to wait for their men's report.

“Wait. at most in the afternoon or tomorrow; we will get news.”

In the afternoon, there was news.

“Cannibal Chain?”

They looked at two identical copies of intel. Sound Iron and Little Nine, including Wen Hong and Pang Cheng, looked at each other.

Maybe Pang Cheng was used to developing his faction alone, so he didn't know this organization, but Soul Merchant and Glory Army knew. After all, they were super factions that spread over many regions. They paid attention to other similar organizations, so using their intel net made it easy to find out who they were and where they came from.

“Although this organization had divisions in many bases, they avoided regions that big factions controlled. For example, Soul Merchant and our regions don't have them. Are they crazy? They want to stir up the situation here?”

Little Nine tossed the intel and glanced at those people in the distance.

“Someone hired them.” Sound Iron moved his purple right arm. The ghost woman who wore Green Flower’s mask ripped off a piece of its meat. Although he used medicine he got from the wheel, it still affected his movement.

“To hire so many at once, based on our understanding of the price, they need at least 8-10 three-star potions. Not anyone could afford this price.”

The few five-stars evolved nodded. They might have used five-star potions and had many four-star experts under them. But three stars were the core strength. In other words, these prominent factions’ average was three, one level higher than the mankind average.

Ten bottles was not a huge sum to them, but it wasn’t small either. They had to hunt for a week before they could get it.

A one-week hunt of a big faction was not a small matter; it was a huge operation with a few thousand people.

“Moreover... Do you see their movement? They got nearby yesterday morning but didn’t enter the region we control. But this morning, they are just a kilometer from us. What happened in those ten hours?”

Little Nine thought about it and drew their thoughts.

“They are probing us?” Lou Xiaoling sounded like she guessed the answer.

Mockery appeared in Little Nine’s eyes, and he shook his head, “No, it should be a change in attitude.”

Sound Iron touched his chin, “Before coming, the person who hired them might not know that he was facing us, so before they understood what was happening around them, they didn’t dare to enter the area we control. But a few hours later, they are here and are very nearby. Which means the person who hired them added money?”

Little Nine smiled, “I think so, too; that makes sense. They were resting last night and didn’t set up camp. This proved that they were waiting for something. If the person didn’t add money, these people would have just left.”

“Aren’t they afraid we would take revenge?”

Pang Cheng had a sharp gaze, and his giant body stood up. He looked at the busy camp like he wanted to teach them a lesson.

“They are afraid.” Little Nine stood up, “But they fear Soul Merchant or Glory Army. They shouldn’t be afraid of our divisions.”

“En?” Pang Cheng turned around, and his eyes were squinted so much you couldn’t see anything, “Isn’t it the same?”

Little Nine and Sound Iron looked at each other. None of them explained it as it was too complicated. Super factions had many things involved. But the former still explained to this

temporary ally, "Since they are here, there should be enough benefits. Or rather, the mysterious person's strength and payment counter their fear of us."

The few were silent, and then Little Nine continued, "Actually, it isn't hard to see if they are afraid. Just continue to attack Cloud Peak, and we will know."

At night, when Cloud Peak thought this was another peaceful day, Counter Cloud Peak Alliance attacked. Thousands of them got close. At the front were several heavy trucks whose heads were reinforced with thick metal horns. They were used to break the gate.

They moved, and the new faction moved, too. They started to move closer to the walls, but they were aiming at Counter Cloud Peak Alliance.

"Retreat."

Little Nine looked, and he was expressionless.

The Counter Cloud Peak Alliance backed down just like that, and the new group retreated to their camp.

"They are here for us!"

Sound Iron muttered but smiled. He told Little Nine, "Seems like we have to use our trump card to see if they are unafraid of us."

Little Nine pouted, but he had trauma in his heart.

That night, a 300-man team brought ten giant metal cages covered in black cloth.

God Hall officially joined Counter Cloud Peak Alliance.

Chapter 423: Revealing the card

"Sister Lei, who are these people?"

Liang Chuyin stood beside Xia Lei and looked at the sudden group that appeared.

Xia Lei shook her head. She didn't know either. She also did not get any news that someone would come to help Cloud Peak.

She knew that there were still some people running about for Cloud Peak. Tong Hu was trying, but Xia Lei didn't hold much hope.

The core members retreated to defend Cloud Peak and increase their defense strength. Tong Hu was alone, and his words wouldn't mean much. No one would be willing to risk their lives here.

Since that was the case, then who invited this group? From their actions yesterday, they were on their side. However, they didn't send anyone over to contact them.

"How far did those we send out get too? When can they get back?"

"Four hours. As they couldn't head out from the front, they could only abseil down the cliff and wrap around. They probably won't be back until night."

Xia Lei told Li Yi something and then frowned as he looked at the busy Counter Cloud Peak Alliance; there... seemed to be many more people.

“How is Big Yellow?”

Xia Lei had been busy with the defense, so she wasn't free and couldn't care much about Yellow Ball. Little Tiger was the one taking care of it. Park Xiuying healed Little Tiger many times, and he was mostly healed up.

“A little better, but it is still the same. With this speed, it would take more than two months to recover.” Little Tiger rubbed the side of his body where the arrow turret attack pierced. He was severely injured before he even managed to attack, so he was very frustrated. He looked at the Counter Cloud Peak Alliance with rage in his eyes.

Xia Lei took a deep breath, “Tell Xiuying to stop healing Big Yellow. She needs to conserve her mental energy. If not, we will lose our strongest card before the enemy attacks. She has to join the fight next time.”

Everyone was silent and knew that it was all they could do. If Park Xiuying healed Yellow Ball several times every day, her mental energy wouldn't recover. When the skill was still on cooldown, she needed to join in and use Diamond Shield, Cleansing Dew, and Gentle Chains. She wouldn't be able to hold on for long if she didn't have enough mental energy.

Liu Zhenghong suddenly climbed the wall. The core members having a meeting here didn't understand why this big sister who had been staying in the lab would appear here.

“Liao Gang and Liao Dong were getting a little frustrated; if I didn't give them sedatives, they might have entered battle modes.”

Xia Lei and the others were shocked. Who were the Liao brothers or... what? Only the core members knew. They were a huge trump card and would be of huge effect during a crucial moment like Park Xiuying that night. But due to their special nature, they weren't as stable as other evolved. After all, they came from Liu Zhenghong's lab, and if they lost control, they wouldn't be a trump card but a chaotic monster.

Liu Zhenghong knew that everyone was waiting for her explanation. She uncertainly said, “All of you know how they came about. Their genes and special parts came from mutated life forms; their abilities are... that type.”

“That could make them awaken from deep sleep. Although they got rash for many reasons, the biggest possibility was that there is something similar to them outside.”

Liu Zhenghong sucked in a deep breath and continued, “Do you remember the monster Ye Zhongming told us before he left? The one tossed by a plane and then killed by Big Yellow.”

Everyone was stunned. Mo Ye frowned, “Sister Zhenghong, are you saying that there are people outside who grasped this technique like you?”

Liu Zhenghong shook her head, “Definitely not the same, and it might not even be similar, but as... All of you don't understand specifics, but genes might be similar as they are obtained from mutated life forms. Those beasts are also stronger animals, but they still have some instincts. Like territorial protection.”

“Without any provocation, the Liao Brothers nearly went into battle modes. I think they sensed that some other person of the same race invaded their territory.”

Liu Zhenghong said and pointed at the land before Cloud Peak, “Don’t forget that to make the brothers fight for us at the crucial moment, we made them view this as their territory.”

Everyone was shocked. Before the Counter Cloud Peak Alliance was here, Cloud Peak released Liao Gang and Liao Dong to view the entire Cloud Peak as their territory.

“If my guess is correct, that Organization called God Hall is here. So, be prepared.”

Liu Zhenghong clapped, “I will move the brothers here. I will also wait here just in case.”

Truth proved that her guesses and actions were correct. After noon, the Counter Cloud Peak Alliance made a move. They split into two; a thousand pushed three giant metal cages before that mysterious group to block them from Cloud Peak. The other headed for Cloud Peak. At the front weren’t the trucks but six of those black cages.

When they were 200 meters away, some people in white lab coats walked out and removed the black cloth on the cages.

The air froze. Be it Cloud Peak or the Counter Cloud Peak Alliance, they focused on the figures inside the cages, and their breathing stopped.

Beasts! All sorts of beasts were lying there. Their breathing was either slow or rushed, and they were sleeping. But the aura from their bodies was shocking.

Everyone here was an evolved, and they could see many things clearly from this distance. When the counter Cloud Peak Alliance saw it, they cheered. Whereas those on the walls had ashen white faces.

In the nine giant cages, the nine beasts had blue crystals on their foreheads.

Counter Cloud Peak Alliance showed their first trump card on the third day after the sneak attack.

The nine level-five beasts from God Hall.

Chapter 424: Cloud Peak reveals their card

“Brother Ye, I feel like things are rising here and here.”

Seeing Ye Zhongming return, a teen training the secret technique rushed over and asked about changes that happened to his body.

The others walked over to ask for tips.

These kids were all high school students during peacetime and were treated like babies at home. They enjoyed their student life, and they enjoyed the start of life. They slowly formed their views on the world and started to develop their plans for the future alone or with the help of their parents.

But half a year in the apocalypse turned them into good killers. They were precise and well-trained in the wilderness of Peace Town. They were also very vicious, which changed Ye Zhongming’s opinions of them.

But although they adapted to the apocalypse, they were still young. They were very close to one another; they might not be jealous of each other, but they were still competitive.

Ah Yang was their older brother and was the only one-star evolved previously. They were working hard to evolve so the gap wasn't too huge.

But their Brother Ah Yang was already five-star evolved. Although they were improving, they didn't even reach one-star strength, so they were very anxious.

It wasn't that they didn't think about using potions to increase their strength like Ah Yang. But they were warned that people who used potions would die.

Following Boss Ye taught them they would die if they dared to break the rules.

Under such a circumstance, working hard was the only thing they could do.

Seeing how active they were, Ye Zhongming was willing to teach them his experience. These kids might be the hope of the future.

Tong Hu and the others were back when he finished answering their questions. They told Ye Zhongming that it was all done, and they followed the map to check several times. They didn't miss out on anything.

“Based on this speed, we will complete it in two days. Also, Cannibal Chain told us the latest news at Cloud Peak.”

Even after witnessing Ye Zhongming use the Ten Thousand Sacrifice Book to make a piece of purple equipment, Tong Hu couldn't guess what this boss would do.

He was near Cloud Peak but wasn't anxious to gather with his men. He was instead making some... Bizarre things around Cloud Peak.

He felt that burying demon crystals and scattering blood around was weird.

Two days.

Ye Zhongming looked towards Cloud Peak. He estimated and sat on the ground, closing his eyes to enter a silent state.

Tong Hu, Ah Yang, and the others protected him.

.....

Hong Bo was Old Bone Mercenary Squad's team leader, a five-star evolved.

But he used an IOU to get the five-star potion. Due to some reasons, he had some relationship with the higher-ups of Cannibal Chain, so he won their trust to use a loan to get a five-star potion.

But no matter what, five-star potions could not be given for nothing. He had to return.

How to return? He would become their working partner, their subordinate until he paid up.

Once Cannibal Chain gave him a mission, Hong Bo and his mercenary squad had no reason to reject it.

For example, now. When Hong Bo knew that he was facing Soul Merchant and Glory Army, it was fake if he said he wasn't afraid. Although he was five-star evolved, too, there was a gap between

five-star evolved. Super Faction's five-star evolved were stronger than those from smaller factions. Hong Bo was not confident he could deal with those Saints or Glory Army leaders.

But he didn't know what Cannibal Chain was thinking. They forced him to assist Cloud Peak. This made him curse but also made him very suspicious. Cannibal Chain wouldn't be stupid, so what reason was it that made them so determined to support Cloud Peak? Were they people that were more worth making friends with than Glory Army and Soul Merchant?

Especially today when Counter Cloud Peak pushed nine level-five monsters out. Hong Bo nearly peed his pants. He regretted getting that five-star potion. Was he going to die?

"Boss Hong Bo, are you afraid?"

Hong Bo turned around and saw a smiling face in a white suit. He had a red tie, and he held a cigar. He didn't mock them to their face even if he dissed their dress many times. This person, around 30 years old, differed from those in charge of the branches. He was sent from the headquarters to assist or monitor him, so he was only stronger than him.

He saw the three giant cages spinning the cigar that wasn't lit. He retracted his gaze, "It is okay to be afraid, but please understand us. After all, someone paid and even added the price. The price is enough for us to hold a portion of the Counter Cloud Peak Alliance."

"You are saying hold them back?"

Five-star evolved that could survive until now weren't fools. Hong Bo noticed the keyword that the guy from the headquarters used.

"Right, hold them back."

He nodded, "This time, you don't have to fight. You have to maintain this state. Don't attack, and don't retreat. Just watch."

.....

Cloud Peak's core members didn't have a good expression. Each side knew that each other had trump cards, but their first one was already so strong.

"They are determined to kill us."

Le Dayuan wore a dark blue suit with dirt on it. He looked at the monsters and laughed.

"Heartless fellow, you can still laugh?" Liu Zhenghong rolled his eyes at this middle-aged man who was getting fatter and fatter.

Le Dayuan looked at Liu Zhenghong and wasn't angry at all. These can scare us. Even if I don't know biotech, I can tell that their gene is not stable. Although they are level-five, they should be weaker. We have the brothers; those are elite products."

Liu Zhenghong frowned, "But there are too few."

"That depends on the fight." Le Dayuan didn't care.

"Sister Xia!" Someone ran onto the wall and panicked, "Something happened! Head to the cliff to take a look!"

## Chapter 425: Cloud Peak reveals their card (2)

Xia Lei led a few people to the back of Cloud Peak to the cliff and saw a red-haired woman standing on a piece of stone.

As evolved were strong, many sentries were set up near the cliff. Cloud Peak also used this as a way out, using ropes to break an encirclement. The team who contacted the mysterious group also headed out from there.

But she saw...

Xia Lei didn't know how to describe Red Hair. Her guy's former pet?

She found it weird.

Red Hair didn't bother about Cloud Peak when Ye Zhongming wasn't here, but it didn't mean they were enemies. Ignoring one another was the best description.

Until last time, when Red Hair struck and saved Mo Ye and Xia Bai, the core members had some hope.

But they didn't expect her to come.

Xia Lei knew that Red Hair had high intelligence. She was on the same level as Talking Lady in Ying City. She would split the city with Talking Lady if she were a real zombie.

She didn't dare to treat it impolitely, even if she was her guy's puppet.

"My, downstairs, come up, inform you."

Xia Lei thought about it and analyzed what she meant. She suppressed the joy in her heart and asked, "You want to help us?"

Red Hair looked at Xia Lei and didn't reply right away. She jumped beside Xia Lei, shocking Liang Chuyin and Little Tiger.

Although because of Ye Zhongming, the core members had to focus on the overall level, and none of them evolved too high, their overall strength was high. This could be seen from how the three could kill a five-star evolved.

But this depended on who they were dealing with. With Ye Zhongming's strength, he was forced to open the Secret Realm when he fought Yangos, two levels higher than him. Much less Red Hair was two levels higher than Xia Lei and the others.

If this beautiful puppet attacked, the three of them wouldn't be their match. If anything happened to Xia Lei, then Cloud Peak would have collapsed.

But fortunately, she didn't attack. She sniffed Xia Lei's neck and moved away.

She heaved a sigh of relief as she was afraid.

"I only help Ye."

Red Hair said something that was an answer to her question. The next sentence made her face red.

"You have Ye's smell on you."

Liang Chuyin and Little Tiger turned in another direction and held their laughter. Red Hair was amazing. Half a year passed, and she could still smell it.

Xia Lei's face turned red, and she felt awkward. That sentence reminded her that she hadn't had a good bath in half a year.

Red Hair acknowledged to break the weird atmosphere. Xia Lei then waved to ask the sentries to move aside.

She returned to the cliff and tossed the rope they had prepared down. In just a moment, there were sounds from below. Many zombies climbed up and entered the back mountain. Many zombies who could fly directly flew up, which stunned those from Cloud Peak.

When an army of at least 1,500 zombies appeared in the villa, one could imagine how shocked the survivors were.

Outside was the Counter Cloud Peak Alliance, which tried to attack Cloud Peak. Inside were the zombies, who were always enemies coming to help them. Everyone would be stunned when they faced such a thing.

Moreover, the lowest level zombie was level three, with a few hundred level four zombies. There were even three to four level-five zombies. Along with the level-six Red Hair...

The warriors who couldn't accept the zombies had to admit that the chance to defend the villa would increase greatly with their addition.

But zombies were still zombies, and Red Hair could suppress them when they weren't fighting. But when their instincts took over, what happened then? So they discussed with Red Hair. Xia Lei drew out a region for them to rest, and she would inform Red Hair when they needed to join the battle.

But Xia Lei and the rest neglected one point: Red Hair said she would only help Ye...

When those God Hall beasts were injected with potions outside the city, white scientists opened the metal cages. They took out some potions and scattered them around. A few minutes later, some beasts woke up.

The first was over five meters long and around three meters in height. It was a tiger-shaped animal with grey fur. Its back leg had decomposing parts, and it had a stench. It had a vicious gaze, and when it woke up, it shook its fur and looked around.

A researcher behind was holding a tablet and pressing sometimes. A red flying object flew above and exploded, scattering a red liquid.

The tiger-shaped monster that was stretching, as well as the other beasts, were stimulated. Their eyes turned red, and they charged at the city walls. A ten-meter-tall giant monster tossed an iron hammer, smashing into the wall. Although it wasn't destroyed, there was a huge hole, and the entire wall shook.

In just a minute, the nine level-five monsters woke up. With the red mist, all of them charged at the city wall.

Xia Lei saw the situation and was solemn. She looked at Liu Zhenghong, who had her hands in her pocket, "Sister Hong, are you ready?"

“Yes.” She shrugged and signaled to the wall. She looked at the nine level-five monsters get close and said, “Let these low-level fellows witness our trump card!”

As she said that, two three-meter-tall people got onto the walls. They were covered in fur but couldn’t hide the muscular bodies below. The human head seemed small on this giant body, but they were wearing a very high-tech silver helmet that covered half their face. The other half was the guy’s determined face.

The left side of the body was slightly more prominent, and a pair of hands grew from his ribs. Its right side was smaller, and there weren’t any extra hands. Black, sharp, spike-like bones replaced it. Under the sunlight, the bones reflected.

Liu Zhenghong looked at the brothers, who jumped off without fear with excitement.

The weird scientist Ye Zhongming got back the female demon that the survivors in his last life called Human Creator Hong. She appeared for the first time in this life and showed her sharp fangs.

#### Chapter 426: Cloud Peak Whirlpool

One could hear the weird beast roar even at the foot of the mountain. People with experience would know that mutated lifeforms would only give such a noise when in the most intense fight.

Tong Hu looked at his boss and scratched his head, “Boss, are we not going up? What if something happens to the villa?”

Although he didn’t know what Ye Zhongming wanted to do, he did some weird things to surround Cloud Peak in the center, which would be done in two days, but he didn’t understand. The boss could return now, but he chose to stay here to watch.

“Little Li and Ah Yang led people out; you also have to go to the position I told you to guard.”

Ye Zhongming didn’t reply to Tong Hu and instructed this matter.

“En, don’t worry, boss. Although it is tough, nothing will happen to us.”

Ye Zhongming smiled. It had been a long time since Tong Hu said his catchphrase.

“We can’t let Counter Cloud Peak Alliance contact the outside world, lock their contact channels with the outside. Remember this. Also, if someone tries to break out, tell them to scram. If they ask, say that I am the one who told them to. If not, then kill them.”

Tong Hu agreed and led a few men to go.

Ye Zhongming looked towards Cloud Peak again, and he left. But his gaze was determined.

News that he was alive should have spread in Ying City. Let’s hope the people who came were stronger so he didn’t waste his effort to make the purple equipment. this... It would be interesting.

He ran while thinking.

.....

The background of the Liao Brothers was very complicated. But one thing was sure. They were humans; they once were.

They were the first batch in Cloud Peak and had strong battle experience. Their evolution level was slightly lower than the core members. They were very loyal and treated this as their home.

But dangers would come at any time, and it would hit anyone.

The Liao Brothers naturally couldn't escape such a rule.

In a mission, both were severely injured and on the verge of death.

Park Xiuying wasn't in the villa then.

The two brothers who would die were noticed by Liu Zhenghong, who completed an advanced biological theory. She looked at the brothers, who were unconscious and might die in the next second and asked for them.

She used some methods to keep them awake, and after asking them for their opinion, she did some tests on them.

Although the theory was perfect, there would be many real problems.

When testing on their bodies, if not for Park Xiuying's healing job, they would have died long ago. Even with such circumstances, the brothers still had flaws.

Their emotions were unstable, and they would get angry easily. They would lose their minds when they fought and become bloodthirsty. Their intellect would drop, and they would be numb and slow when they weren't fighting.

Even Liu Zhenghong had to admit that they weren't perfect and were flawed. It was one with massive flaws.

But such situations couldn't stop them from showing off their shocking ability in the fight.

Like now.

God Hall sent nine monsters. Three of them were special. One was that tiger-shaped monster that looked ordinary but gave off a shocking aura. As for its strength, you could see it was the strongest from how it woke up the earliest.

One was a sheep-faced bone monster. Its body was covered in grey bones, and even its limbs were bones. Apart from the crystal on its head, only a green ball of light was hanging in the center of its bone body.

Another was a giant bug that was covered in thick bone armor. Even its eyes were protected by this firm bone material. Its limbs stuck close to the ground when it ran, and it looked like a much larger tank. When it stopped, its legs would lift. The four legs would dance in the air like sharp blades and give off an air-piercing sound.

Out of these three monsters, the sheep-faced monster ran the fastest. Its legs were made of bone and slid far on the ground. It was the first to come into contact with the Liao Brothers.

In terms of size, these two humans were smaller, but not by much. When the two brothers ran, the ground was shaking. Liao Gang jumped, and he spun beside its face. The bone spikes that replaced

his hands stabbed down. Liao Dong, still charging below, jumped at a close distance. There was an explosion, and the ground below the monster started to crack, forming a hole.

The sheep-faced monster stumbled and nearly fell.

Liao Gang struck it with bone spikes with light at their tips.

The sheep-faced monster was level-five. It lifted its upper body, and the bone on its shoulder grew in a blink. Two bone shields blocked in front of it and clashed with Liao Gang's bone spikes.

There was a clang, and Liao Gang bounced back. But Liao Dong was here. A yellow light appeared on its four arms and smashed onto its body.

Many of the circles of bones protecting its body shattered.

"Kacha!"

After a slight sound, the Liao Brothers crossed the sheep-faced monster and fought those behind.

Two seconds later, a weird explosion happened. That sheep-faced monster was blown into pieces of bone.

The God Hall researchers were stunned. One of them asked another if they saw what caused the explosion. The other also shook his head. They could only wait to return and watch the video.

On the wall, the Cloud Peak members exclaimed.

"Earth Cracking Technique, Weapon Precision, Four Army Emperor, and micro demon crystal bomb. A perfect attack, right?"

Liu Zhenghong looked at the fighting brothers and was proud of her hard work. At least from that attack, it proved that the two human weapons were a perfect merge of their strength when they were humans and tools. When healing Bai Feng, she took some of his gene chains and used the crystal weapons.

"A bunch of bastards whose actual strength is just level four and a half. Taste the strength of a real level-five!" Liu Zhenghong licked her lips and muttered.

.....

When Cloud Peak's battle was intense, a day away, a group with hundreds of people was resting. It was shocking that they all had mounts; all were mutated horses that were level-one.

"How long more?" A guy in black squinted his eyes and asked.

"Saint An Hu, one more day."

"En." Saint An Hu nodded and instructed, "Charge the equipment. Get the deputy leader out when we reach. He is very interested in the person who could survive from the Secret Realm."

Chapter 427: Various factions

"Is the news accurate?"

The guy pointed at the intel on the table and spat out a mouthful of smoke.

“Yes, officer, the intel point on Ying City returned actual information.”

The guy nodded and took a close look at the intel. He placed it down before returning to his cigarette.

“Kill so many people to get an unknown purple piece of equipment. He returned to his base but didn’t show up... More importantly, he survived from the Secret Realm, interesting.”

The subordinate stood straight and listened quietly.

“Send two observers to see what this Ye Zhongming wants to do.”

The guy ordered. He picked up another cigarette, and a flame skeleton appeared. It opened and closed its mouth to light it up.

.....

The knock on the door interrupted Da Keng, who was focused on his experiment. A giant metal nurturing pond inside the room, and a gory battle occurred there.

“Enter.”

The guy standing before the window had his hands in his pocket, and his tone was ice cold.

A woman with black sunglasses in a low-cut shirt walked behind the guy and said gently, “An Hu used the frequency bird to send news. The teleport will take place tomorrow morning.”

“En.” The guy acknowledged and continued to look at the battle. Inside, many evolved were dealing with two level-four mutated leopards.

These evolved were all three-star, but it felt like they didn’t have much strength for some reason. If an experienced evolve saw them, they would notice that they didn’t have equipment, skills, or jobs. Apart from a three-star evolved body, they didn’t have anything else.

As those two level-four leopards were mutated life forms, they at least had their talent skills.

After the battle lasted for an hour, it became a massacre. The level-four leopard broke through their defenses and started its feast.

These evolved had their organs eaten up. The two mutated leopards then lay in the pool and fell asleep.

The Nurturing Pool had some smoke spitting out. A moment later, a bunch of guys in blue lab suits entered, using heavy machinery to lock these two leopards into cages. Moreover, they injected an unknown liquid into their bodies.

This guy turned his head and showed a close-to-perfect face. He was so beautiful that most girls would be jealous.

“How is the work at Demon Gold? How many pigs?”

The girl was in awe for a short moment before replying, "Close to ten thousand pigs; among them, there are 2000 one-star, 400 two-star, and no three-star and above."

The guy scoffed, "More and more useless. After being trashed, he can't even do something so simple."

He paused and said to the woman, "Contact the chief and say that I suggest removing him as a saint and selecting someone to replace him."

The girl hesitated, "This isn't good. After all, he is the first batch of Saints and has been strong. He has a good relationship with Green Flower. He is also under Deputy Leng. Will that cause problems?"

The guy looked at the woman and caused her to lower her head, "I will go now."

"Also, pay attention to Deputy Lu and God Hall's negotiation. Tell him what I think. When needed, give them some benefits. We need to grasp their gene technique. The pig-raising plan is slowing down, so that technique is important for us."

"Yes!"

.....

The ground was covered in corpses and broken limbs.

But it was as if the person who caused all this didn't see anything.

"It is Counter Cloud Peak Alliance; look at this news."

Tong Hu's men passed a piece of intel to Ah Yang. He looked at it and didn't say anything.

"Boss is going to trap them all. We can tell everyone that he is alive except those on the mountain." That person wiped off the blood on his hands while saying.

"No." Ah Yang shook his head, "If the boss's goal is just these people on the mountain, he can just bring us up; who can stop us? I feel like he is playing chess. He uses them as bait to draw stronger enemies over and then..."

Ah Yang didn't continue as he was unsure what the boss wanted to do. It was all his guesses.

"No matter what, let's be prepared. I don't think things are so simple. Maybe the boss will start these two days; that is when we will go all out."

.....

The beasts surrounded the Liao Brothers.

They crushed the sheep-faced monster two against one, but now they were at a numbers disadvantage.

Although the beast that tossed the weapon at the wall wasn't the strongest, its defense was strong. It blocked them while the other beasts attacked.

That Tiger-shaped monster walked around the battlefield and searched for the chance to throw a fatal blow.

Liao Gang was knocked to the ground, and he held the arm of the beast. This was the price it paid for hitting him. But in such an encirclement, falling meant death. The monsters surged and wanted to kill him.

But when they got close, they got hit by shark yellow fur. Such a range attack forced them back.

“Big Yellow’s ability!”

Candy also came to watch. She was just a support, so she was only a three-star evolved. Although the villa found some recipes for her, they weren’t too useful, and she just made them to increase skill familiarity.

“En, but it is much weaker than Big Yellow.” Liu Zhenghong rubbed Candy’s head and pulled her back.

The Liao Brothers stood up. The half-wrapped metal suddenly opened, and two red lasers fired. They were so quick that it made one tongue-tied. The two closest monsters were caught off guard, and their heads were pierced, dying on the spot.

“Dayuan, do you see that? Putting crystal weapons on the experiment products is much more effective than using them alone.” Liu Zhenghong teased him.

Le Dayuan giggled and didn’t argue. He said to the side, “Bring it up, let’s show Director Liu.”

Eight people carried four boxes and placed them on the wall. They opened it, and there were four weird guns. Each gun had a crystal-shaped hole.

#### Chapter 428: Crystal Weapon Father's first appearance

The guns looked similar to Ye Zhongming’s crystal energy gun. But be it from function or how exquisite it was, there was a huge difference between the two.

This wasn’t weird. When Le Dayuan invented the demon crystal weapons in the last life, he gained inspiration from weapons from the wheels. Although he couldn’t understand the theories behind the weapons, it opened a gate for him. He used his way to complete the energy absorption and conversion process. That itself was very noble.

In this life, as Ye Zhongming appeared, Le Dayuan grasped the concept much easier and completed the toughest initial stage. To a grandmaster-level engineer, this made it much simpler to progress.

Without Ye Zhongming’s help, Le Dayuan’s research was tough initially. But he had his own independent learning and experiment process. He improved the theory and his experience and created many crystal weapons.

For example, the micro-crystal bomb the Liao Brothers used. A small demon crystal explosive ignited the crystal’s energy to blow up a small area.

For example, the crystal bomb that Xia Lei used the kill CEO Wang from Royal Guild. It was the improved version of the one that Ye Zhongming used. It was more stable, and the explosion was more compact. It was also more convenient to carry.

For example, the laser from the Liao Brothers’ metal masks. It was a crystal weapon, but the activation method was different. The distance was short, and the range was reduced to increase the shooting speed and condense the strike.

Next were these guns. Based on the blueprints that Ye Zhongming drew for Le Dayuan, the guns were only half complete. But compared to the one he used to scare off those from Ying City Jail, it was a vast improvement. At this critical moment, it was a trump card.

The four helpers that followed Le Dayuan were already three-star evolved. Each one held this weird gun that the other Cloud Peak warriors saw for the first time and aimed at the monsters surrounding the Liao Brothers.

Four level-three crystals were placed into the holes in the guns, and light spread out from the hole to the gun's body. Specks of light also started to gather at the barrel.

Four helpers all wore yellow crystal glasses, and there were some data indicators. They followed the data to adjust their arms.

Five seconds later, the four guns fired. Four fist-sized blades of light fired. They were quick and covered a huge distance in a blink of an eye.

The light landed in the group of monsters.

The battlefield froze, and fresh blood shot out from the monsters.

“It hit!”

The four researchers clenched their fists. After all, they weren't warriors and had to use these new weapons personally. So, they weren't confident that their shots would hit, so they created some support tools.

They didn't suspect its strength like the other crystal weapons. After all, they were guns and were only strong if they hit. No matter how strong it was, if you missed it, it was zero.

Relying on their eyesight, whether Cloud Peak or the Counter Cloud Peak people, they saw the outcome of the four shots.

The four shots hit, but their effects were different. Two of them hit the target monster's neck and head. Even a level-five mutated beast couldn't block such a hit. The two monsters fell to the ground and lost their lives.

The third gun missed and sliced a part of the monster's body. It then hit the stomach of the monster monster behind it. Both were injured. But this injury would only cause them to lose some combat strength but wouldn't kill them.

The last shot missed more; it shot through the gap between monsters and hit the ground.

It was a waste, but for those from Cloud Peak, this was enough for them to be satisfied.

Not only did it reduce the number of monsters to four, two were injured. This also proved the effect that the crystal weapons had on the battle. It was enough to have a critical effect on the battle.

“Little Nine, take down Cloud Peak, and Le Dayuan is ours; you get Liu Zhenghong. What do you think?”

Sound Iron looked at the four streaks of light change the situation, and he couldn't suppress his excitement. He suggested to Little Nine.

He had heard of the crystal weapon father when they investigated Cloud Peak. Glory Army even tasted it before. But this was the first time so many people witnessed it in actual battle.

But it was enough to tempt anyone.

“Cloud Peak and I are enemies, but in terms of the size of the animosity, Soul Merchants and our Glory Army can’t be compared. Not only did we have important people that died to them, but Ye Zhongming destroyed our base before.”

Little Nine stood there with his hands behind his back and said, looking at the battle, “This time, we have the most high-level combat strength. We should have the priority. It is up to us on who we choose.”

Sound Iron’s face turned cold, “Then you should be clear that we contacted Pang Cheng. We suppressed the Ying City factions. Royal Guild is also under us. Our contribution to this alliance is no less than you. Moreover, Glory Army and Cloud Peak are enemies, so aren’t we enemies too? Cloud Peak killed and injured two of our saints!”

When Sound Iron finished, the two looked at each other, and none wanted to step down.

“Keke.” Little Nine laughed, “Saint Sound Iron, we have forgotten about God Hall. Their target is Liu Zhenghong. I am not planning to fight with them, so... There will be too few good things for all of us.”

Sound Iron’s voice turned cold, and his gaze did, too.

“Seems like it, then let’s see who is the strongest. Who has the most high-level strength? But it is not up to you.”

He acknowledged and continued smiling, “That is for the best.”

The two of them turned around and looked away. Their hearts shook simultaneously as they knew that both sides had trump cards.

But what was it? Another saint from Soul Merchant? Glory Army’s other army?

Two allies on the same side started to guess about one another.

.....

Lu Lan pushed his glasses and recalled that someone told him that women said he was a pervert.

That person also said that he would treat him to pleasure after he completed his mission.

He shook his head and sat on a ten-meter-long monster.

Right, this earthworm, bigger than serpents, was modified such that its head became a cabin.

To God Hall, this wasn’t a tricky matter.

“Sun Wanhu, although we didn’t know each other for long and you didn’t treat me to girls in time and even called me glasses, this time, I will help you kill that fellow who returned from the Secret Realm. This is me being grateful to you.”

Lu Lan smiled and clapped. This earthworm dug into the ground.

“Oh, right, and also the dog that killed the Lightning Beast.”

#### Chapter 429: Final attack

The battle started very typically but ended abruptly. When the nine level-five beasts from God Hall and the Liao Brothers battled, both sides chose to stop.

They showed their trump cards and the probing ended.

Strictly put, Cloud Peak won this round. After all, the price they paid was the Liao Brothers being injured and the four demon crystal guns already destroyed.

Seven level-five beasts were killed on the Counter Cloud Peak Alliance's side, and two were severely injured.

Both sides sent people to carry back their wounded. Of course, Counter Cloud Peak Alliance wasn't planning to give the demon crystals to Cloud Peak. Cloud Peak didn't plan to snatch it, too, as if they did, it would be a new battle.

Some core members discussed something in a small room under the walls while looking at Le Dayuan fiddle with some parts on the table.

“The demon crystal weapons are good, but they aren't durable. We don't have the Smith job, so we can't deal with the parts. The strength can't reach the required level. One shot and the gun is useless; what a waste.”

Le Dayuan felt bad about the parts. These were the parts of those four guns. One shot, and they couldn't be used anymore. This was also the problem that Le Dayuan couldn't solve now.

Of course, he could use level-two crystals to fire, but that would only be two shots. The strength would also be insufficient to deal a fatal blow to evolved lifeforms level four and above.

“We are wasting not only these materials but also the demon crystals. Four shots, two dead and two injured, but we used four level-three demon crystals. Most of these parts were also traded for crystals. These few guns used around six level-three crystals.”

Little Tiger touched his chin.

Ye Zhongming left very good foundations for Cloud Peak when he left. Their starting point was the same as those super factions. But he also left Le Dayuan and Liu Zhenghong. These two core departments were money burners. Each experiment, be it a failure or success, spent demon crystals.

Liu Zhenghong even joked that Cloud Peak would have at least one more five-star evolution without those two labs.

Although it was a joke, it proved that the gene and demon crystal research burnt money.

But now it seemed like it was worth it. Without the two labs, Brother Liao and the demon crystal weapons, Cloud Peak would be in a tough battle, and many more deaths would occur.

“If Ye Zhongming dealt with these parts, they could block the level-four crystals’ energy blast. It could even hit and kill level-six lifeforms if strong enough to use level-five crystals.”

Hearing them mention Ye Zhongming, the people in the room went quiet.

This was a name that they tried to avoid mentioning.

“Don’t overthink; the battle is not over.” Xia Lei stood up with a complicated expression, and she motivated everyone. She then led people to patrol.

Within Counter Cloud Peak Alliance, a few five-star leaders gathered.

“Doctor He, what do you think?”

Little Nine asked the old man who joined in. He wore a white metallic protective suit, which was soft like cotton. On close look, one could notice the white light on it.

“Don’t ask me; I am not interested. Just hand Liu Zhenghong and her lab to me. I don’t care about anything else. Also, the three good monsters could be used; inform me when the time comes.”

Doctor He walked out.

Everyone was not surprised. This Doctor He was here for a short time, and he displayed his personality fully.

“Saint, should we continue to probe?”

Little Nine turned and asked Sound Iron.

“I don’t think we need to. Cloud Peak’s five-star evolution has made a move. The two core divisions have shown their research products. Unless Ye Zhongming revives, they have nothing else to rely on.”

Little Nine nodded, “Pang Cheng, what do you think?”

“I don’t have any thoughts; take Cloud Peak down and remember to give a few women to me.”

Lou Xiaoling was awkward when she heard that. She punched his fats but he just glanced at her and she didn’t dare to do anything.

“Anyone apart from Xia Lei.”

“I am okay with that.”

Little Nine looked at Wen Hong. His top warrior was already raring to go.

“Since that is the case, our injuries are mostly healed, and their trump cards are mostly used.”

“We shall do the final attack tomorrow.”

.....

Everyone in Cloud Peak could sense the nervous atmosphere on the second morning. The entire Counter Cloud Peak Alliance camp started getting busy since the first light. Everyone started moving and preparing for the final attack.

Not far from Cloud Peak was a group of cavaliers. On the eight healthy horses in the center was a circular device. Around it were four generators that provided it with energy.

Saint An Hu looked at the mountain and smiled.

In another direction, a green car was driving in the wilderness. There was no path, but it didn't stop this vehicle. It drove like it was moving on flat land.

There were two firm-looking people in the car. The guy riding shotgun looked at the map and pointed to the driver. The driver glanced and nodded.

Counter Cloud Peak Alliance controlled a small village here. The zombies and mutated lifeforms were cleared. Some corpses had decomposed and gave off a stench.

An old well started to shake. A loud explosion, and a giant earthworm came out like a train. A guy wearing glasses looked out from the cabin in its head. After confirming his location, he clapped, and this earthworm climbed out and moved towards the mountain.

In an unknown forest, a thousand-men team was waiting there. They wore the same uniform, and all held grey weapons. They looked quietly at a giant metal gate.

In front of this team was a calm middle-aged guy. Behind him was a flagbearer holding a flag with huge words that danced in the wind.

.....

At this time, Ye Zhongming buried the final crystal and scattered some of his blood. He ordered them to let the outside world in. Tong Hu, Ah Yang, Little Li, etc., gathered behind him again.

Ye Zhongming and these people stood quietly in a corner and looked at the only path up to Cloud Peak. He had a feeling that everything would start today.

8 am, the final attack began.

#### Chapter 430: Death Flame Light

The room had a bad smell, and there was a gory scent.

When Bei Zi walked in, he saw Demon Gold sitting in a wheelchair and sweating profusely. He placed his hands on the table and clenched them.

Bei Zi's gaze instinctively shifted downwards, and saw his friend's bloodied knees.

Bai Feng shattered those, but Demon Gold had to break them weekly.

Evolved's great body allowed them to have strong recovery ability. But Demon Gold wished that he didn't have such an ability.

He couldn't let his knees heal to keep his hope of recovering. He had to shatter his knees before they firmed up to keep it in that healing state that the person mentioned.

It was a hell-like torture.

“You are here.”

His voice was calm, but one could hear how hoarse and exhausted it was.

“I am going to rush there.”

Bei Zi placed a box on the table. Demon Gold casually opened it and took out one of the ten blue potions. He injected it into his body, and he looked much more relaxed. At least there wasn't as much sweat.

“I will try to get enough money to get King Shang to heal your knees.”

“Should I feel honored that I could let Bei Zi speak so many words?”

Demon Gold laughed. However, he sounded like he was mocking himself. Both people knew it was a joke.

“You are going to Cloud Peak? I heard that Ye Zhongming is back from the Secret Realm.”

Demon Gold interrupted Bei Zi, who was about to open his mouth to speak, and sighed, “Based on what I know, many people entered the Secret Realm, but none came out, only him... No wonder even Deputy Chou was alerted.”

“Let's not talk about him!” Bei Zi got angry.

“How can I not? Just because he suggested removing me from being a saint?”

“You know about that?” Bei Zi raised his head and showed his face, covered in a beard. His eyes also didn't look human, more like a beast.

“Even if I don't have any strong subordinates, I still get some news. No matter what, I am still a saint.”

Demon Gold waved like he was talking about something that didn't concern him, “I know that I can't stop you, especially since... You got a pair of new eyes; you want to take revenge. But be careful. Cloud Peak isn't big, but they can do unbelievable things. Last time, four saints couldn't do anything to them. Even with Chou Hai, Sound Iron, and An Hu, you must still be careful.”

“Because that guy could come back from the Secret Realm.”

The room was silent. A moment later, Bei Zi turned to open the door. He then stopped.

“Use less of these painkillers. Although they can reduce pain, it would also prolong the pain. A shorter pain is better than a long pain, so why do it to yourself?”

After saying that, Bei Zi closed the door slowly.

When the door was closed, Demon Gold saw a perfectly fine left hand.

.....

The battle entered its most intense state right away.

It was brutal.

In every instance, people were falling. Some might stand back up, but more lost their breathing ability.

The Counter Cloud Peak Alliance that made their mind up were terrifying when they decided to use all their strength.

There were beasts at the front, but the difference was that these three beasts from God Hall were all level three, and their foreheads had a red crystal.

These were the good-grade monsters from God Hall.

After the three monsters were several modified fire engines and vehicles, each had evolved holdings guns.

Two rows of soldiers holding metal shields were covered by these vehicles, which, in turn, covered other evolved.

Many of these evolved brought monsters. They weren't as strong as the three level-six ones, but the amount was numbing.

Gunshots fired. It wasn't from those on the vehicles but the Counter Cloud Peak Alliance gun job users.

Cloud Peak had guns, too. They might not have as many as Counter Cloud Peak, but they definitely wouldn't hold back now. But their shots were focused on those three level-six monsters. They hoped to hurt or even kill them before they got to the walls.

Blood splattered from their bodies and also from the bodies of the Cloud Peak warriors. Shields or defense skills lit up and hit those bullets, giving out specks of light and metallic clangs.

In the middle of the three beasts was a giant ball-shaped monster. It had no body or limbs; it was just a balloon. When ranged bullets or arrows hit its body, they would enter its skin and be ineffective. When it was a hundred meters from the wall, the six eyes on the monster opened, and it shot a red light. The light wasn't fast, and even a little slow, but it still caused their expressions to change.

This was the skill of a level-six monster.

"Unkempt Monster, talent skill: Death Flame Light." Doctor He, who was observing the battle, smiled. He saw his monster succeeding and was satisfied.

"Take it down!"

Xia Lei knew that it wasn't anything good. She gave an order, and many attacks knocked into those light circles.

Six rows of them lined up, each row having ten layers. Cloud Peak's attacks destroyed the first row, but many followed behind.

They weren't quick, but this was just relative to others. It reached the walls in five seconds. Out of six rows, the fewest layered one had four, and the one with the most had seven!

"Star Shining Sand!"

Sister Rong jumped in front of the circles and placed her hands in front of her. A pink pollen appeared around her. This process was short; a moment later, the mist floated between the light circles and the wall.

The light sand attached to the light circles, causing them to dim slightly. Many Cloud Peak warriors cheered, but in the next moment, some of the light circles disappeared, but most flashed before returning to normal.

Then, they clashed onto the walls.

If Sister Rong was also six-star, her skill might have been able to block the light circles.

But she wasn't.

It was two seconds of silence, and then there was a flame light.

Where the light circles hit, flames spread around. Before anyone could react, the entire wall was burnt black. Those warriors who couldn't escape were burnt to ash.

"That green bug! G1!"

Xia Lei screamed. Four shooters hiding fired. G1 was the crystal gun model that killed the level-five monsters that day. Cloud Peak only had eight, and these were the last four.

Their target wasn't the unkempt monster but the big bug to its left.

When the Unkempt Monster's death flame light attracted all the attention, that bug was squatting there. It spat out a strong water pillar towards the wall!

Xia Lei was sharp and noticed it. But she was still too late. The four light pieces hit the green bug's body. Its big body was easy to aim at. Four light pieces shot into its body, making it cry out in pain. But the water pillar had already fired.

A Cloud Peak warrior used his skill to affect its direction, but the level difference was huge, and he failed.

This water pillar hit that burnt wall. The green stone that turned weak due to the high temperature was hit by this strong water pillar and started to crack. Both sides watched as this part of the wall collapsed.

In just half an hour, Cloud Peak's wall was broken.
