

## Apocalypse 481

### Chapter 481: Sudden disadvantage

Its blades were in front of its body and were hooked by the scythe. Its back was being stabbed time after time, and this made the Abyss Cleaner crazy.

It ran, jumped, moved, cried, and used all its skills, but it still couldn't get rid of Xia Bai. It was as if all it could do was change the speed of its attacks.

The Blood Mist Armor was slowly disappearing, and its struggling slowed down. After it used all its strength to roll, it still didn't get rid of Xia Bai. It finally knelt after a sad cry and watched that terrifying woman wave the scythe to slice off its head.

Cloud Peak won the first.

The cheers were deafening. The low morale caused by the flesh and blood swamp had been cleared and disappeared.

Many warriors realized that Cloud Peak could get the final reward.

They faced the most dangerous and tough situations. They also paid a heavy price.

But this filled them with the urge to win. They didn't need to fight, but the outcome concerned all of them, and they hoped they could survive.

Whether they wanted to admit it or were Chinese or a foreigner, they believed in first blood. Although comebacks were more exciting, when it concerned their lives, each person wanted things to be safe.

They hoped to continue winning until things ended.

Then, they could see what rewards there were.

Everyone knew that the rewards would be amazing.

The victorious Xia Bai chose to continue fighting.

Although the first battle took a long time, the outcome was satisfactory. Xia Bai wasn't injured and didn't face any dangers. It was because she was stronger than a level-six lifeform. In this battle, there were four level-six lifeforms. If they kept such a state, then didn't it mean...

Unfortunately, the Darkness Slayer gave Cloud Peak warriors a heavy blow.

As compared to the Abyss Cleaner, it was much smaller. But as compared to humans, it was still a giant.

The pink skin wrapped around its body and made it look like it was burnt by hot water. It made one feel uncomfortable. Its body had many finger-thick meat strips. If one had OCD, they wouldn't be able to continue looking.

Its head wasn't big and had clear features that looked like a smiling human face. Two meat strips grew where the ears would be.

Its body was round, and its limbs were short. It had a short tail; if one didn't notice, one would ignore it.

This monster looked amusing, and the only thing on it that looked like a threat would be the blade in its hands.

This harmless monster gave the Cloud Peak warriors a lesson to tell them that they shouldn't judge a book by its cover.

Even if Ye Zhongming had reminded her, she didn't expect this monster to be so terrifying.

Darkness Calamity covered the sky, and Xia Bai should be advantaged. But she forgot the name of the Darkness Slayer. It was a monster good in the darkness.

When Xia Bai attacked, the Darkness Slayer laughed coldly. Its short legs caused it to be really quick. It entered the shadows quickly and waved its blade.

Xia Bai wanted to use her longer weapon to take advantage but realized she had miscalculated.

This monster dashed along the weapon and sliced towards her neck.

It was so quick that Xia Bai couldn't react. If not for the bright red crystal, she would think that this was a level-seven and not a level-six monster.

She had to give up on her weapon and jump backward. When she moved aside, the hand that killed the Abyss Cleaner became a blade once more and stabbed at its rib.

Ka ka!

A disgusting voice rang out. The Darkness Slayer didn't dodge and knocked towards Xia Bai.

Pa!

Xia Bai's hand and body clashed, giving a weird sound. At the same time, the blade continued to slice at Xia Bai.

"Sticky Body!"

Ye Zhongming sighed and felt like this was a problem.

Although humans of the same level would be stronger in normal circumstances than mutated lifeforms, the mutated lifeforms had stronger bodies.

Some mutated lifeforms were stronger than humans of the same level.

Darkness Slayer was one of those.

One of its terrifying abilities was this Sticky Body skill.

This wasn't an active skill; it was more like a passive skill.

This skill caused the body of the Darkness Slayer to be very sticky. It could weaken the enemy's attack and give it a strong defense.

The reason why it was so famous was because of this talent skill.

Xia Bai's hand blade was something that Cloud Peak warriors had witnessed. Even the Abyss Cleaner with Blood Mist Armor couldn't defend it. But now that it stabbed at the Darkness Slayer's body, it couldn't even break that pink skin. Moreover, its hand was stuck in the Darkness Slayer's body.

On the other side, the blade was about to hit.

Many Cloud Peak members stopped breathing, and they prayed for things to be good.

But it seemed like Xia Bai was at a disadvantage right away!

Would they lose?

This thought entered many of their minds.

Everyone would fear death, but apart from Ye Zhongming, the person who feared the least would be Xia Bai.

She didn't fear this disadvantage. She couldn't pull her hand out, so she let it be. She pressed the palm on its body and jumped up. In mid-air, she used a leg to kick that palm and use that strength to spin upwards. Her weight pushed through her hand onto its body.

The blade brushed past her.

The Sadness Ink Pattern Scythe that she lost control of also sliced toward the Darkness Slayer's body!

Chapter 482: Dazzling skills

Xia Bai used some strength when she previously let go of Sadness Ink Pattern Scythe to activate the Momentum Strike ability. After Darkness Slayer attacked her several times in a short time, the scythe's attack finally triggered.

The sharp scythe slashed its body.

Due to the angle, Xia Bai didn't immediately see the outcome. But Cloud Peak did. It left a wound on its back.

But...

Only the skin ripped open, but there was no blood. The moment the scythe landed on the ground, that wound also healed quickly.

Ye Zhongming knew that this was because of the Sticky Body skill.

This would be a tough battle.

Xia Bai dodged the Darkness Slayer's vegetable knife, and her body naturally couldn't continue to be upside down. She kicked the Darkness Slayer's head.

Fortunately, her body was flexible, and she could move while her hand was stuck.

Xia Bai was searching for its weakness.

The Darkness Slayer stumbled when its head was hit, but the Sticky Body nature caused her legs to be stuck.

Now, three limbs were stuck to its head.

It waved its vegetable knife again, and this time, it aimed at her wrist.

Her body was slightly twisted, but she didn't care. She pulled a sharp blade from her heel and used the shorter distance to slice where her hand was stuck when it waved its blade.

Blood flowed on its body. It wasn't its blood but Xia Bai's blood. She sliced a small layer of her palm.

This was to break free from the annoying liquid.

The vegetable blade slashed and missed.

Xia Bai moved her legs and got away from the Darkness Slayer, landing back on the ground.

She left her shoes on its head.

Wa wa!

The Darkness Slayer gave out a weird sound. The difference was that it was saying something.

It looked at Xia Bai. Those meat strips started to grow. In just a breath, it was two meters long and danced around its body.

“Thousand Leaf Tentacle!”

The Darkness Slayer used its second talent skill. It turned into a tentacle monster and charged towards Xia Bai.

Due to those tentacles, Xia Bai didn't dare to get close.

She dissipated Darkness Calamity and jumped to the side to open the distance.

The Sticky Body and Thousand Leaf Tentacle merged, so she didn't know how to deal with this monster.

Both sides slowed, but the Darkness Slayer's speed was much slower. This was a piece of good news for her.

She found a chance to grab the scythe. After waving it twice, she did gain some advantages. This silver weapon could slice those tentacles, but she had to be quick, or they would wrap around it.

The battle entered an intense stage.

Ah ya!

The Darkness Slayer shouted. That unassuming tail stood up. The Cloud Peak warriors saw that there were two rows of circular holes. They gave out five colored gas.

Under this strength, it sped up, and its speed advantage was apparent.

“Gas Piston Movement!”

The third skill!

Xia Bai dodged twice before that small vegetable blade hit the scythe. Sparks flew. She used the handle as a pivot to fly to the side. The tip of the scythe sliced the two tentacles.

But this couldn't change the situation. The Darkness Slayer used its speed to attack her. In just a while, she saw small cracks on the scythe.

What grade was that vegetable knife? It could even damage a silver weapon.

The fourth floor was silent. They didn't know how Xia Bai would deal with it.

“Son Body Attack!”

It used its fourth talent skill right away!

Those tentacles that were sliced stood up. The broken bits faced down, and the top started to split apart and turn into flesh flowers.

Many people were stunned and didn't know what the flowers were. They didn't seem useful apart from blooming, but they understood immediately.

Due to the Sticky Body, those petals were very sticky. If Xia Bai stepped on them, she would get stuck.

This was to reduce her movement space.

If she couldn't dodge and the Darkness Slayer got close, she wouldn't be able to move. Would she just get killed easily?

Could a level-six mutated lifeform beat a seven-star evolved?

After using the skill, the Darkness Slayer was unfazed and started to attack. A few blades injured her. But she was able to move aside with her agility.

Xia Bai's stamina was dropping. It was normal when one had to be passive.

Her eyes showed determination, and she held her scythe up.

Darkness Slayer charged and made sounds of happiness.

Xia Bai jumped, and then she stopped moving.

Ah!

Cloud Peak members exclaimed as she stepped on one of those flesh flowers!

Small tentacles grew from the petals and wrapped her white legs.

The Darkness Slayer definitely wouldn't give up on such a chance. Those hundreds of tentacles stuck to her body and wrapped around her. It raised that vegetable blade and slashed toward her head.

That pink face smiled even more.

It didn't notice what Xia Bai did.

She held her scythe up.

Maybe it did realize, but it didn't care.

The moment it controlled Xia Bai, the scythe used Momentum Slash and spun around Xia Bai and the Darkness Slayer!

Chapter 483: Three consecutive battles

Those sticky tentacles were between Xia Bai and the Darkness Slayer.

The spin sliced them up.

The Darkness Slayer gave out its largest cry since the start of the fight. The face filled with joy started to twist because of its injuries. Its two meat strip ears rose and twitched. It was obviously in intense pain.

The sticky body protected its body, but the tentacles weren't thick and couldn't block the sharp scythe.

That vegetable blade that sliced towards Xia Bai's head tilted and sliced on the scythe. This prevented the scythe from making a full circle and slicing all the tentacles.

But it was enough to release her hands and allow her to hold the scythe once more.

Those black bugs had appeared above the Darkness Slayer's head and exploded, turning into the powder that landed on the Darkness Slayer's body.

The Darkness Calamity's true ability was to worsen small injuries.

When she was a five-star evolved, this ability could cause Bei Zi's bruised leg to become so serious that he couldn't move. Now that she was a seven-star evolved, even if her job wasn't improved, the effect of Darkness Calamity still increased.

Now that the Darkness Slayer had so many tentacles sliced off, maybe its combat strength wasn't affected much. Those tentacles might even grow back once the pain ends. But it was still injured now.

As the powder landed, this pain was magnified by several folds.

Xia Bai could accurately control the range of Darkness Calamity, so Darkness Slayer was in a challenging situation.

It was already in pain, and now it was magnified several times. Even a level-six lifeform wouldn't be able to handle such intense pain.

The Darkness Slayer couldn't attack Xia Bai; it could only release those tentacles and retreat. Its body twitched, and the wounds of those tentacles even had pink liquid flowing out.

It should be its blood or the body's liquid.

The Darkness Slayer was still a terrifying presence. It made the right choice, even if it was about to faint from the pain. It knew that the enemy was still stuck to the ground. It retreated from the enemy's attack range and had to wait for the pain to reduce. When the time comes, victory will still belong to it.

Unfortunately, it underestimated the opponent. Xia Bai's viciousness was not something it could predict.

She used Sadness Ink Pattern Scythe to slice the flesh flower by her feet!

The only way to break free was to slice the flesh.

She did so without any hesitation.

Darkness Slayer was still in immense pain when she freed and slashed the scythe.

When it realized the situation, its vision was still blurred due to all the pain. When it caught the attack, the scythe was right before it.

Pu!

It held the arm holding the vegetable knife up to block, but it was sliced off.

A bunch of darkness calamity bugs exploded.

Ah!

Its body stopped twitching, and it was fully shaking.

The scythe rose again and sliced the other arm that wanted to block.

Darkness Calamity powder exploded once more.

Darkness Slayer realized it was about to die, so it activated its ability. Its tail shot out gas to change its direction. Those flesh strips on Xia Bai became flesh flowers to slow her down. The tentacles on its body started to grow and whip about randomly...

But this just bought some time. Xia Bai jumped behind it a dozen seconds later and sliced it by the waist.

Cloud Peak cheered. This comeback helped to raise their morale.

They looked at the corpse disappear. Xia Bai was supported by the scythe and panted slightly.

Although she won, she paid a price. An arm and a leg were injured. There were a few wounds from the vegetable blade. The key thing was that she had used a lot of stamina. Maintaining her bloodline and job ability caused her mental energy to reduce. It had reached a very dangerous level.

“Come down, let me do it.”

Ye Zhongming walked to the arena and told Xia Bai to come down. This was what they discussed, but she shook her head at him.

She wanted to fight one more!

“Come down!”

Ye Zhongming was very fierce. He was rarely like this to his subordinates, but now he wanted her to come down.

She was not in the state to fight. Moreover, she was about to face the Twin Fork Grasshopper, a quick mutated lifeform. Stamina was needed to fight such a lifeform, and Xia Bai didn't meet the requirements.

“No!”

Xia Bai stubbornly rejected his order. She turned around and stopped looking at the person she cared about most.

His face sank, and he crossed his arms to return to where he was.

There was nothing he could do if she didn't come down. Although he knew that she wanted to reduce his pressure, this might cause her death!

Ye Zhongming made her the highest level in Cloud Peak; her strength might even be stronger than Ye Zhongming if you didn't include his equipment; it wasn't for her to die just like that!

A seven-star potion was something very precious even for Ye Zhongming.

The light shone, and the third monster appeared. The Bugman-type lifeform had bat-like metal wings and two short, sharp limbs. Under the wings, two claws looked like forks.

The moment it appeared, it screeched at Xia Bai.

“Mental Strike!”

It used a talent skill immediately, and it was a mental attack.

Xia Bai’s body froze.

The grasshopper flapped its wings and dove down like lightning!

Just this movement alone shocked Cloud Peak.

Quick, it was too quick!

The Abyss Cleaner’s Light Shadow Slash was quick, but that was a skill. This thing did not use any skill and was even quicker than the Abyss Cleaner.

Xia Bai only had time to lift her scythe in front of her before its attacks arrived.

Metal clanged as the fork and scythe clashed. Xia Bai was knocked back.

Ye Zhongming was surprised. He looked at Xia Bai with praise.

There seemed to be a chance in this fight.

Chapter 484: Xia Bai’s strategy

As evolution levels increased, they started to have their unique points. They had their evolution directions and more abilities.

The evolution level just represented the overall strength or weakness.

Xia Bai might have the speed advantage compared to mutated lifeforms, but it was not enough when she faced those who focused on speed.

The grasshopper flapped its wings and attacked, which caught many off guard.

But Ye Zhongming saw that Xia Bai’s movement was very hesitant. There was a gap in speed, but it shouldn’t be so big.

Since that was the case, then...

Ye Zhongming thought about it. Both sides clashed several times, and Xia Bai was knocked back. If the grasshopper focused on strength, Xia Bai would have vomited blood.

Even then, Xia Bai was injured. The claws left several wounds on her shoulder and back.

Seven-star evolved had a terrifying healing ability but was not an instant heal. Those wounds still bled and dripped on the arena.

The grasshopper was cunning, and it knew where its advantage was. It knew it couldn’t fight head-on with Xia Bai, so it used its speed.

A huge fork knocked Xia Bai; this time, she was sent flying to the ground.

“Fallen Shadow!”

The grasshopper used its second skill. Two images formed from the fork on the claws and knocked into her scythe.

Fortunately, she was still a seven-star evolved. This skill caused her mouth to bleed. She got up and displayed a defensive stance.

“Why is Sister Xia not fighting back?”

“Its defense shouldn’t be strong, right?”

“Is she waiting to see its other skills?”

“Doesn’t her injuries look serious?”

Many Cloud Peak members discussed this. Compared to when she found chances to attack, she was very passive in this one.

This gave the grasshopper huge confidence. Its attacks didn’t stop, and it would use Mental Strike and Fallen Shadow. Her injuries continued to increase.

Maybe as it felt like it was about to win, its attacks grew more frequent, and they got smoother.

“Thousand Spin!”, “Shadow Release!” Two skills were used.

Thousand Spin was a consecutive attack. The fork would flap along with the wings, and the momentum would cause the body to spin. It would hold the fork straight and use this spin to attack the target.

Shadow Release created three shadows with a third of its strength to attack as many times as the main body.

This latter skill was its final ability. It used Thousand Spin along with Fallen Shadow. Four of them started to spin and attack Xia Bai. One could tell how terrifying so many attacks at once were.

Xia Bai had hundreds of wounds on her body when the skills were used.

Although she tried to avoid them hitting her important parts, the number of wounds was enough to cause serious injuries!

Ye Zhongming was excited. If his guess was correct, this should be it.

Xia Bai made a shocking move as if she were proving him right.

When the grasshopper attacked, she let go of the scythe.

Even if she had a seven-star body, she couldn’t block the fork that didn’t look like an ordinary weapon, right? Many people had that thought.

Pu!

One could hear the sound of a sharp weapon piercing the body. A fork stabbed into her left shoulder.

Ah!

Many Cloud Peak warriors exclaimed and were sweating for Xia Bai.

This was not a good sign. She was already severely injured, and this time, her arm had lost its ability to fight.

She would lose if this continued.

But her next move shocked everyone! Not only did she not break free, she moved forward and got close to the grasshopper.

This meant that the fork was fully in her body. It pierced her shoulder and stopped when the fork hit her bone.

As the upper limb of the grasshopper was short, she reached out and grabbed its body. The seven-star evolved body meant that she had the strength advantage, and it couldn't break free.

It didn't get out, which meant that it was dead.

The black bugs exploded once again. Unlike when she used it on the Darkness Slayer, she was the target this time.

Black powder landed on her body, and it increased her injuries. Her body started to shake, and she couldn't control herself. But she could still move her right hand to grab the enemy.

Behind the grasshopper, the scythe that she released moved quietly over!

Disdain appeared in the four eyes.

It had intelligence and was very experienced. It saw this enemy's ability and had been defending it. It knew that this scythe could attack after the enemy released it.

But the enemy had to make a clear attack movement.

It didn't see this human use much strength, which meant it wouldn't be too powerful even if the scythe hit it. A sharp weapon would just leave a small wound.

The grasshopper didn't fear anything and raised another fork to stab at Xia Bai's neck.

Puchi!

The grasshopper stopped, and unbearable pain spread from its back and across its body. Its nimble body became cumbersome, and its wings stopped listening to it, causing it to fall to the ground.

Before it died, it saw the scythe through its body and poking out from below its neck.

Xia Bai didn't use strength. Sadness Ink Pattern Scythe's Momentum Slash wasn't so strong, but it had another ability.

Sadness Pattern!

Chapter 485: Weapon Monster

The heavier the user's injuries, the stronger the weapon.

Even Ye Zhongming had to praise this ability. If not for the mental energy restriction and the fact that you often had to risk your life before you used it, he felt like this ability alone was enough to raise its grade by a few levels and become either green or blue equipment.

Xia Bai fought three battles and was out of stamina. Her chances of beating the grasshopper weren't big. This agile monster would drag Xia Bai to death.

Xia Bai thought of a strategy from the start. Defend, get injured, Darkness Calamity, restrain the enemy, Sadness Pattern.

She used herself as the bait, drew the grasshopper into a trap, and successfully killed it.

It looked simple, but it was very risky.

The plan would fail if she couldn't tank the damage and died. If she couldn't force the grasshopper to use all its skills and for her skill to be broken by one of its skills, it would all be for nothing.

Moreover, not everyone could handle the increased pain from Darkness Calamity. If their mind wasn't strong enough, they might faint. At that time, they would be there for the taking!

Xia Bai was walking on a tightrope since she chose to do that. If she weren't careful, she would fall into an abyss.

Fortunately, she won.

Xia Bai consumed all her mental energy to allow the Sadness Ink Pattern Scythe to have the strongest combat strength. The moment before she fell unconscious, she chose to leave the arena.

Her body was fully injured and was teleported back into Cloud Peak's camp, and Teacher Park started to heal her.

She suffered heavy injuries twice and survived. Only someone like Xia Bai could do it.

After this battle, Xia Bai had a supernatural status in Cloud Peak. She won everyone's respect. Especially people like Ah Yang, who didn't understand Cloud Peak. They looked at Xia Bai with worshipping gazes!

Ye Zhongming heaved a sigh of relief when he looked at Xia Bai, who was badly injured but still alive. He knew that it was down to him to end the battle.

He appeared in the arena. Light flashed, and the Weapon Monster stood opposite him.

Human body, frog face, six arms. Each with a different weapon. They were a blade, soft sword, hammer, halberd, nunchuck, fan.

It was a similar height to humans, but it felt like a grandmaster when it stood there.

This was a mutated lifeform that people respected.

Ye Zhongming had never faced such a monster before, but he saw its portrait. Survivors also mentioned that it wasn't easy to deal with.

Very few monsters could have such an aura. Some of whom were the Talking Lady and this fellow.

He pulled out Moon Blade and pointed it at the Weapon Monster.

The stronger the monster was, the more fighting spirit he had. He saw Xia Bai risking her life, and that fighting spirit got so strong that he couldn't suppress it anymore.

Ye Zhongming knew that this was left from his last life, but he didn't hate it and didn't suppress it. Only by having such a desire to fight would he have the motivation to get stronger.

Ye Zhongming attacked first.

Seal: Mountain Blade!

He used the job skill right away.

Huge pressure covered the Weapon Monster.

The frog face was expressionless. The moment Ye Zhongming attacked, it did, too.

The six arms waved, and the old blade on its upper left arm slashed, too.

“Shocking Blade Wave!”

Numerous blade shadows flew out from the blade and formed a giant light wave that suppressed Ye Zhongming’s skill. The two moves clashed.

There were no sounds. It was like there wasn’t any aura. The two moves clashed, tangled, and then disappeared.

The two figures bumped into each other.

At this time, there was an explosion and many more. Their weapons clashed many times in a short dozen seconds, and no one could deduce what was happening.

When they split up, the remnant sounds echoed in the space.

Too quick!

Be it the Abyss Cleaner or the grasshopper, they were quick, but the Cloud Peak warriors could still keep up.

But now, they realized how strong the true experts were.

The two of them announced what kind of battle this would be!

“Sword Moon Flash!”

“Seal: Metal Blade!”

As if they had discussed it beforehand, they used their skills simultaneously after they clashed with one another.

On one side, the soft blade slashed many lightning-like things. On the other hand, stars with the power of heaven and earth landed on the target.

It was so bright that everyone squinted their eyes.

They clashed and disappeared like the first time.

But this time, there were colors like fireworks.

They hadn’t witnessed such a brilliant battle.

Just one move and both of them took several steps back.

Even Ye Zhongming, the level-six mutated lifeform, had to take a breather after going all out and using skills consecutively.

Cloud Peak members couldn’t help but worry. They knew that their boss only had a few skills, and he had a Flame Blade at most. But that monster had six weapons, and it might have many skills.

After three battles, they also realized that the monsters had a lot of mental energy and could use the skills multiple times. What would happen then?

They were confident in Ye Zhongming and believed he could defeat this monster. But how would he face the level-seven lifeform if he used all his energy or got injured?

“Flying Halberd Strike!”

The Weapon Monster used its third talent skill. It tossed that halberd into the air and turned into four shadows. The moment it appeared, the first shadow thrust towards Ye Zhongming.

Pa!

Moon Edge smashed into the first one and shattered it. Ye Zhongming was also forced to take two steps back.

The second arrived, then the third, and the fourth!

The few halberd shadows combined.

Ye Zhongming retreated and retreated again!

A human-like expression appeared on that frog face for the first time, like it was impressed by its opponent.

It was shocked at the reaction speed and technique he used.

Don't underestimate the retreat.

Each step he took would open some distance, increasing the halberd's flying distance. He could have enough reaction time then. Block the first, and then you could block the second when you retreated. This continued until you blocked all. Ye Zhongming was ten steps back, and although it looked tough, he didn't use any skills and broke the Weapon Monster's move.

It wasn't as elegant as Xia Bai's battle, but his movement was fluid. His legs didn't even touch the ground. The ethereal-like feeling made the Cloud Peak warriors cheer for their boss.

This should be the nature of fights. Now, a simple, head-on battle!

The battle entered its most intense stage!!

Chapter 486: Close combat

The six weapons in the Weapon Monster's hand moved, and the frog face became increasingly solemn.

This opponent was putting it under huge pressure.

He only defended and blocked a talent skill to escape unharmed. Anyone who faced him would have the same feeling.

Ye Zhongming moved both hands. Receiving the skill caused his arms to become slightly numb.

The moment both sides crossed eyes, they charged forward and fought each other again.

Ye Zhongming's Moon Edge brought with it streaks of starlight. The Weapon Monster's weapon flipped around to find a chance to hurt Ye Zhongming.

Both sides were in close combat.

It wasn't a skill competition, but it was so dangerous that Cloud Peak members forgot to blink.

If you used skills, you would have time to adjust if you lost. But you would lose your life in close combat if you weren't careful.

Ye Zhongming used Starblade as the basic technique, with Scorching Flame Technique as support. He was able to keep up.

The six weapons were used well when the Weapon Monster didn't use skills. No wonder survivors were able to learn fighting methods from it. This monster was really impressive.

Ye Zhongming retreated and turned to the other side.

He only had one blade. Even if his speed and attacks were faster and stronger, that monster had six arms and six weapons, which gave it an advantage. It forced Ye Zhongming to be quicker. After a short time of high-intensity clashes, he could only retreat to recover some stamina.

But the Weapon Monster wasn't going to let him go. It followed him, and the six weapons rose up and down, forcing Ye Zhongming to fight it.

Due to the rules, Ye Zhongming's battle pets couldn't follow him. Red Hair, Yellow Ball, even the bees couldn't help him. This reduced his overall strength by half.

Just Red Hair alone was as strong as Ye Zhongming.

Ye Zhongming was not at his complete strength. Until now, no one could force him to go all out.

Even the dead Cheng Tianji couldn't.

Naturally, this Weapon Monster couldn't either. But this monster had a close combat advantage, so it looked like he was being suppressed.

"Why isn't the boss using that gun?"

"That thing needs demon crystals, and the boss doesn't have much. He probably wants to keep it to deal with the level-seven monster."

"Other equipment?"

"This... I don't know."

"Why so anxious? Have a good look."

Liang Chuyin stopped her two discussing subordinates, but her eyes were also filled with worry.

"It is okay; he has his pride."

Mo Ye looked at Liang Chuyin, saying something she didn't mean, and pulled her, "Ye Zhongming is just happy that he met a prey."

The others were shocked when they heard Mo Ye say that.

But think about it: it did fit his personality. He wanted to use his opponent's method to defeat them.

Of course, this also made many of them sigh in relief. He did this because he was confident in winning; if not, he wouldn't be playing with this monster.

As expected, Ye Zhongming started to counter-attack, which was intense.

He suddenly turned around. He went from holding the blade with two hands to only one. He stopped holding the handle but the body of the blade.

The weird stance stunned everyone; they didn't know what he would do.

Ye Zhongming used actions to tell them the answer. He raised Moon Edge to block three weapons on one side.

He used the blade and the handle to block three weapons.

He freed up one hand, which drew a bright light, and many fingers hit the other three weapons.

Sky Dragon Cultivator, Python God Finger!

The Weapon Monster was unprepared, and when it wanted to fight back, it noticed that three weapons were blocked, and the other three were knocked back.

But it didn't panic. It moved its body, and the six weapons were about to attack again.

But the opponent suddenly kicked its stomach, and that caused it to stumble.

That kick was too quick and connected with the previous motion, so it couldn't react.

Ye Zhongming stopped retreating. He followed the Weapon Monster. Moon Edge's attacks were airtight, and he started to chase the win.

Weapon Monster stabilized its body to block. It knew that its opponent would back off soon as he couldn't maintain this speed.

But Ye Zhongming tossed Moon Edge right away.

One weapon against six was a disadvantage. Who knew that he would toss his weapon? The weapon toss wouldn't be powerful or give him any gains at such a close distance.

But the pain in the stomach was still there, and the Weapon Monster made a defensive stance.

Its ribs hurt, and the Weapon Monster fell backward once again.

Ye Zhongming kicked once more, which hit the Weapon Monster's rib. Then he caught the weapon.

He tossed the weapon to block its vision! After realizing it, the Weapon Monster felt very frustrated.

But it was still a mutated lifeform that people called the grandmaster. After two losses, it couldn't let Ye Zhongming repeat.

But it noticed that things were different from what it thought.

This human tossed a silver metal, and a metal giant appeared.

Summoning Technnique didn't fall under battle pets as it was a skill.

Weapon Monster had to deal with two sides, but it wasn't much, as it had six arms. It still had an advantage.

What was infuriating was that when it fought the metal giant, that human actually used electricity on the metal giant's body. The strong energy current caused its body to shake, and its strength dropped.

Basic Lightning Technique!

When its body was numb, Ye Zhongming kicked it twice.

It seemed weak, but this was Blood Stepping Boot's skill-- Kick, a skill that had two times the damage of your own body.

Four kicks and the Weapon Monster finally spat out a mouthful of blood. The human-shaped body was badly injured!

Maybe it realized the danger it was in. Its six arms closed, and a light gate appeared before its body.

Chapter 487: Killing Beer (1)

"Shining Weapon Gate!"

The Weapon Monster used its strongest skill.

The light gate sent out an energy wave that forced Ye Zhongming and the metal giant back. The six weapons could be seen in the gate, and they started to merge to form a new weapon.

An exaggerated and giant bow.

This bow hung in the gate, and the Weapon Monster also entered. Its six arms grabbed it and pulled the bowstring to aim at Ye Zhongming.

Its movement was really quick, and it was instantly completed. A shining arrow was placed on the bowstring, firing with a buzzing sound.

Lightning Strike!

This was the only feeling that Cloud Peak warriors had when they saw the arrow. The moment this arrow that was the size of a mature human appeared, it caught everyone's attention. The arrow gave off a cold killing intent, sending a chill down their spine.

What kind of arrow was that? How did it have such an aura?

Although the people below didn't get up, the moment they saw the arrow, they subconsciously wondered if they could handle such an attack.

Everyone felt powerless.

It was too quick and powerful!

Everyone was shocked by the arrow, but they missed out on Ye Zhongming.

The moment the arrow appeared, Ye Zhongming started to adapt.

The metal giant and him moved towards one another.

They were already very close, and after this step, Ye Zhongming was behind it. At that moment, the arrow shot towards him.

From that, one could see how fast it was.

The arrow pierced the metal, and that five-digit durability instantly reached zero.

The blade light landed and pressed on that light arrow.

Seal: Mountain Blade!

The huge pressure caused the light arrow to freeze and slow down.

It pierced the osmium and gave Ye Zhongming a chance to slash. The pressure of the Mountain Blade gave Ye Zhongming a chance to use his next skill.

Seal: Metal Blade!

The sharp blade light and starlight hit the arrow.

This time, there was an explosion. It wasn't loud, but it was very clear.

Seal: Flame Blade!

Ye Zhongming used his third skill.

Hong!

The sound was deafening, and an explosion occurred. It was intense, and the energy wave and smoke covered half the arena. Cloud Peak members moved forward instinctively to try to see what happened.

There was the sound of weapons clashing. Cloud Peak warriors got nervous again. Everyone knew that this was the final battle.

The intense sound came quickly but disappeared suddenly, too. When the smoke settled, Cloud Peak cheered.

Their leader was standing on the battlefield with a headless corpse under him.

The low-visibility battle ended with Ye Zhongming as the victor.

The corpse disappeared, and the cheers weakened.

The final battle of the Competition Death Wheel was here.

The final level-seven monster jumped onto the arena with a shocking aura.

Beer!

The human body, crocodile head, crocodile tail monster!

Ye Zhongming wiped the blood off his mouth and looked at the red armor on Beer's fat body.

In the last life, this was a famous piece of equipment- Blood Monster's Protection.

After killing Beer, you could get this equipment. It fits one's body automatically, like the other shirt that Ye Zhongming got.

Ye Zhongming found it a waste. He would have obtained this golden equipment if he had faced Beer outside and killed it.

Of course, it was just a thought. Mutated lifeforms that were given names were all level-nine. If he faced a level-nine Beer outside, it could wipe Cloud Peak out by lifting its palm.

This monster, which was three stories high, squinted its eyes and looked at the small human. Its giant head shook like how experts prepared for fights in movies.

Ye Zhongming kept the pride he had when he faced the Weapon Monster and placed himself as the underdog.

This fellow was not easy to deal with. If he were not careful, then everything would go to waste.

The Osmium giant appeared again, but it was smaller this time. The light arrow wasn't easy to block, and it wasted a bunch of this precious metal.

Ye Zhongming's clear eyes turned dark, and some mysterious patterns appeared on his body.

Bloodline- Basic Hell Envoy!

On the other side, a small machine showed its technological body. But Cloud Peak warriors all knew that it was very powerful.

Explosive Mechanic!

The battle hadn't even started, but everyone was nervous.

Many had never seen Ye Zhongming face an enemy with such a careful attitude.

Obviously, this monster that the boss called Beer was so strong that Ye Zhongming had to face it with all his strength.

There were discussions previously, but it all disappeared. Everyone held their breath and looked quietly at them.

Huo Huo Huo!

Beer laughed. Its voice was filled with disdain.

It had the right to do so.

A level-seven mutated lifeform was facing a human whose actual strength was six-star. It didn't think the outcome would be surprising.

Its hands had two giant copper hammers that hit one another.

"Death Flame Domain!"

A flame circle started to spread with Beer at the center. It instantly took up a 20-meter distance to form a sea of flames. The high temperature could even be felt by the warriors below.

Many people cursed.

Isn't it cheating? It made a flame ocean before they even fought. How can others even fight?

Worry appeared in their eyes.

But that wasn't over. The hammers tapped each other, and a dark cloud the size of the flame domain appeared above its head. The moment it appeared, a few streaks of lightning shone and smashed onto the area.

"Lightning Domain!"

Beer with the strength advantage, wasn't overconfident and used its second skill!

Even Ye Zhongming didn't look happy.

## Chapter 488: Killing Beer (2)

The ground was covered in flames the height of one's shin. The sky had lightning that would land at any moment. Beer's big size also occupied a huge portion of the arena.

It just started, and this giant fellow had all the advantages.

Even the osmium giant seemed small in front of it.

Ye Zhongming was experienced, but he felt powerless.

But Beer helped him make his choice. It attacked.

Its mountain-like body stomped on the arena, and the entire space shook. The clouds moved slowly towards Ye Zhongming. Moreover, its body bent and started to 'walk' towards Ye Zhongming.

Right, walk. The arena was not big enough for it to run. Each step it took was enough to make Ye Zhongming feel as if a mountain was pressing onto him.

This fellow was too big, and the arena was too small.

Ye Zhongming kept the Explosive Mechanic. It was too weak and would spoil once the flames or lightning hit it.

He also retreated. The osmium giant entered the Death Flame Domain.

Ye Zhongming received notification that his summoned being was losing durability.

It was obvious that the domain dealt huge damage and it was also consecutive damage.

Ye Zhongming controlled the osmium giant to the side and was calculating something.

The hammers smashed at Ye Zhongming. He was stunned and moved to the side.

He was far away, and Beer's action seemed useless, but that hammer hit where Ye Zhongming was standing.

Between the hammer and its hands was a silver chain!

If Ye Zhongming had reacted slightly slower, he would have been badly injured, if not dead. The battle would have ended.

Beer was surprised that it didn't hit. It continued to move, and the other hammer flew.

Hong Hong Hong!

The sounds made things exciting, but no Cloud Peak members were relaxed. They watched as Beer's attacks reduced their boss's movement space.

With such a strong enemy, movement space decided one's room for survival.

If this continued... Many people didn't dare to imagine.

Ye Zhongming finally attacked. But his target confused everyone.

He used Mountain Blade on the flame domain.

The intense flames dimmed, but after the skill passed, they recovered.

Ye Zhongming used some Full Strength Light, not on Beer but on the lightning region.

The bright light went into the clouds, and there were rumbling sounds.

At this point, Ye Zhongming was forced into a corner. No matter which direction he moved towards, he would lose an angle of attack.

Many Cloud Peak members were biting their lips. They feared they would make a sound and affect their boss's judgment.

Ye Zhongming naturally knew the situation he was in. He started to attack.

The first thing he did cause people to exclaim in shock.

He charged into the two domains!

Skills were used as if they were free.

Mountain Blade, Mountain Blade, Mountain Blade.

Three attacks were all used on the flames. Each blade suppressed some of the flames.

As he was too quick, no one reacted, and Ye Zhongming was a few meters from Beer.

He was within its attack range!

This fellow wouldn't hold back. Its hammers smashed towards Ye Zhongming.

He rolled and pressed his finger on one of its legs.

Beer's cry resonated throughout the arena.

"This, what happened?"

Many Cloud Peak members questioned. Even if Boss had new job skills, how could it be so strong?

If Ah Tao and Miya were here, they would recognize it.

Soul Crushing Technique!

Soul Refining Technique's unique ability!

Ye Zhongming could not use it from far away, so the best way was to get close.

This move that attacked the mind and the soul was too vicious. It would be a great counter if a mental energy monster met it. The Talking Lady's cat was a good example. Its evolution level was similar to Ye Zhongming, but because of this technique, Ye Zhongming terrified it without him even using his full strength.

Beer was not a mental energy type mutated lifeform, so the Soul Crushing Technique did not have such a strong insta-kill effect. But it still caused intense pain in its head as if the entire world had stopped.

It felt something rising before it, and then a gun fired.

Ye Zhongming, squatting on the glider, held the Demon Energy Gun and fired at its head.

The bullet with bloodline darkness energy aimed at its head. The pressure of the purple weapon caused it to feel as if it was in danger.

Pa!

The bullet hit, but...

Ye Zhongming focused. Beer's head was covered in a layer of red scales that blocked his attack.

It was the ability from Blood Monster's Protection!

Hong!

A blade landed and hit the Demon Energy Steel Glider. This flying equipment tilted to the side. Ye Zhongming used the last chance to use Metal Blade on its head.

The skill accurately hit its head, and Ye Zhongming glided down along with the glider.

The series of attacks were quick, and in a few seconds, Ye Zhongming charged, Soul-Crushing Technique, rode the glider, shot, and slashed. These attacks could have ended the battle if it was any other target.

But when the red armor's defense dropped, Beer's crocodile head was covered in blood. One of its eyes had exploded, but it wasn't dead.

"Ah!!!"

Beer roared towards the sky, and its mouth gave a loud screech.

Pain had woken it up.

Its body grew bigger from that scream. Especially its legs that grew thick. That monster squatted on the ground and jumped towards Ye Zhongming.

Chapter 489: Killing Beer (3)

Beer occupied half of the arena. This jump was enough for him to get to any part of the arena.

Ye Zhongming ran a few steps before pouncing to the side to dodge that hit.

"Mountain Pressure!"

Beer used its third talent skill of the day.

An ability that relied on his body was not easily dodged in such a space even though you knew what it was doing.

Ye Zhongming was in a bad state. If not for his bloodline and body quality improving, he might not have been able to dodge that attack.

The arena shook once more, but it shook for real this time.

The platform that Beer hit started to crack. The two domains had an intense energy fluctuation. Death Flame and Lightning grew bigger, and Ye Zhongming was hit.

When Ye Zhongming got out of the range, he looked much worse. A lightning bolt hit him, and the burn from the flames wasn't suppressed, which caused him to be injured.

But Beer's anger due to his injured eye didn't end there. It didn't hold the hammers but dragged them by the chains.

Its giant body started to spin faster and faster. The hammers moved and formed hammer afterimages beside it.

The spinning Beer moved quickly towards Ye Zhongming, much quicker than before.

“Whirlwind Kill!”

The furious Beer didn’t stop and used its four skills.

The Death Flame Domain and Lightning Domain were very threatening, and now, with the pair of hammers, the entire arena was covered in flames and lightning, as well as the red shadow of the approaching weapon.

Cloud Peak member’s expressions changed. This attack covered all anger and would hit, so what would happen?

Ye Zhongming naturally knew that, too. He started to toss skills out with Moon Blade. He relied on his high mental energy to toss skills into his domain to buy time until this skill ended.

Skills clashed, and it was dazzling. But these dazzling lights often meant death.

Such attacks consumed their stamina, mental energy, and skill cooldown time. When Ye Zhongming and Beer’s spinning hammer touched, the clash ended.

Beer stumbled, and the domains beside it dimmed. But one could tell that it was fine.

Ye Zhongming flew backwards. He still held Moon Edge, but the handle was covered in blood. His hand was shaking, and the light on the blade’s body was gone. This clash caused Moon Edge to be half destroyed.

His body hit the spiderweb claw-like fence, and he fell to the ground. The pain and heaviness in the chest spread to him, and he felt better after spitting out some blood.

But he still looked very calm when he stood up.

Wu?

Beer lowered his head and saw a red monster biting its leg. The Blood Monster’s Protection couldn’t stop this thing’s teeth.

Also, why didn’t the Death Flame Domain hurt this thing? Those flames had covered its body?

There were some sounds on the other side. Beer tilted its head, and that osmium giant pounced onto its other leg.

Ye Zhongming’s Hell Envoy’s passive skill-- Hell Connection-- was activated many times, but the hell beings summoned were too weak. They were wiped out when they entered the two domains. They couldn’t even draw its attention. But this small thing could ignore the flames. Its bite was also shockingly powerful.

Hell-type monsters were like that; they often had special abilities.

Beer prepared to move his legs to kick these two annoying fellows away.

But two bright blade lights flew over. Even with Beer’s strength, he felt a chill down his spine.

He raised his hammers and slammed towards the two attacks.

Explosive Mechanic Mode 4: Light Blade Cannon!

Ye Zhongming, who was being suppressed, finally attacked again!

Peng peng!

The hammers scattered the light blades after two hits, but the weapon was also knocked aside.

Ye Zhongming sat on the slightly damaged glider and appeared in front of Beer.

Peng peng peng!

Gunshots fired. Ye Zhongming was waiting for such a chance. His battle plan was clear. He was going to use the Demon Crystal Gun to kill the enemy. Skills, bloodline, etc., were just to get close.

Blood Monster's Protection came to use again. The red scales protected the crocodile's head, but because of what happened before, Beer started to shake in the hope of dodging the attack.

Ye Zhongming jumped from the glider onto its head. He held the gun, and the other poured two potions into his mouth.

Mental Energy Recovery Potion, Cooldown Reduction Potion.

The former was to recover mental energy and reduce cooldown time. This was the reward from the third stage.

Two light blades followed.

The Explosive Mechanic, which was on a 30-hour cooldown, fired once again.

Moreover, it was beside Beer's head.

Fresh blood shot into the sky. That red armor cracked, and Beer cried.

The osmium giant stepped into an iron pancake, and that hell lifeform was hanging on the fence. The hammers swung all about just to chase Ye Zhongming away.

Ye Zhongming didn't persist and just jumped off. This made Beer feel safe. But the human in mid-air suddenly turned around, and the purple gun fired its final blood.

Fatal Gun Artist's skill, Space Stack.

Although he wasn't on its shoulder, it was still as if that gun was fired on its head.

This was the final shot. Ye Zhongming didn't have more crystals to use the gun.

The crocodile head that was badly injured couldn't handle the series of blows and exploded.

Ye Zhongming landed on the ground. He raised his head and started to retreat.

Beer didn't die right away. Its body rolled into a ball and started to roll about the arena. The glider that Ye Zhongming didn't keep in time was smashed.

This was another skill, but Ye Zhongming didn't know its name.

But he was still running. He knew that he just needed to hold on for a short while.

Finally, Beer couldn't handle the injuries and stopped. The small mountain-like body shook before smashing into the ground.

The final challenge of the Competition Death Wheel ended.

#### Chapter 490: Competition Death Reward Box

The arena slowly disappeared along with the end of the battle. Along with it were also all signs of the battle.

The bloodline was retracted, and Ye Zhongming's eyes became clearer. But everyone could tell that he wasn't in a good state.

He was only four-star evolved, but his real strength was six-star. He had to face a complete level-seven lifeform. Even Ye Zhongming didn't find it easy.

If not for his equipment, the outcome would be different.

Xia Lei and a few others held him up, and Park Xiuying used Cleansing Dew.

A golden box appeared where the arena was. It wasn't the light gold that represented the equipment's level but the pure gold like Yellow Ball's fur. Moreover, many mysterious and elegant patterns made it look special.

This was the final prize?

Cloud Peak members were excited and looked forward to seeing what was in the box.

They spent so much effort. Only three people escaped, two of which were nearly dead. Soul Merchant, Glory Army, and God Hall would see them as enemies. They even offended a mysterious faction and Cannibal Chain. What for? Wasn't it to vent their frustration and for this final prize?

Now that they vented their anger, it was time to see the prize.

He stopped Park Xiuying from continuing to heal himself. The moment they got out, the wheel would recover all their injuries.

Ye Zhongming picked the box up.

Before he opened it, the mountain became illusionary. A water ball covered all of them. As the wheel disappeared, the people in the ball slowly descended.

The few thousand people from Sha Sha Battle Squad and the other teams were shocked. The Wheel Mountain had exceeded their understanding. Now, this water ball caused their minds to stop working.

From far away, Sha Sha saw the guy surrounded by Cloud Peak warriors like a superstar. Her eyes moved, and she had a complicated feeling.

After the precision exchange wheel incident, Renxing Battle Squad, Star Beauty Company, Tong Hu Battle Squad, and her became friends with Cloud Peak. After balancing everything, she chose the same path as the first two and wanted to be independent.

She did have good feelings about Ye Zhongming and was open to developing it. She even felt that this guy had peeked at her in the shower.

She felt like if there weren't any accidents, she could work with this guy to make her squad stronger.

But she didn't want to join anyone.

But the world had many accidents, who knew that things would be so... Dramatic!

Disappear, surround, and attack, Cloud Peak, at a disadvantage, appears, mysterious incident, comeback, now, he was leading his men to descend from the sky.

Sha Sha was smart and knew what she missed out on. Cloud Peak won, and from now on, no one could stop them from becoming stronger. Today's events would spread to other places, pushing Cloud Peak to new heights. Ying City would have to rely on them to survive.

That included her battle squad!

Maybe she might not be able to get the things she wanted because of this.

The moment the water ball landed, it shattered and turned into pearls that landed on the Cloud Peak members. They noticed that their injuries healed, and their mental energy was filled. Their skill cooldowns were back to zero. Everything recovered to its best state.

Apart from their dirty clothes.

Xia Lei and the others looked at Sha Sha, but no one spoke. Ye Zhongming was back, so it was down to him.

“Clear the battlefield, set up sentries, and destroy those two things.”

Ye Zhongming didn't bother about them and ordered his men to set up the defense. He couldn't ensure if Cloud Peak would draw more trouble.

As for those two things, he referred to Soul Merchant and Glory Army's teleportation device. They were sent to the wheel space, and their equipment was left there. Ye Zhongming didn't know if they still worked or were in sleep mode, so it was better to destroy them.

“Come in.” After giving the instructions, he said to Sha Sha and the others.

He led them into Cloud Peak for the first time in half a year. The signs of battle from hours ago were still here. Although the enemy was killed, his expression didn't look good.

Cloud Peak had high morale. Anyone who killed so many strong enemies would feel that way. They were very efficient and quickly cleaned his villa. Ye Zhongming led Yellow Ball in. The other things were left to Xia Lei and the other core members.

As for Sha Sha's battle squad, they were left there waiting for him.

He did this because he wanted to see what was in the box.

“Competition Death Reward Box.”

This was the introduction of the box.

Ye Zhongming opened it and saw seven items inside.

He picked up the first, and two leather scrolls were tied together.

“Universal Equipment upgrade scroll (Green), Universal Equipment upgrade scroll (Blue).”

The first thing caused his heart to beat quickly.

Equipment could be upgraded, but it needed a scroll with different grades. With this scroll, he could upgrade the equipment to the next level.

But most equipment couldn't be upgraded and would remain the same as when you got it.

But one scroll could upgrade those equipment, the scrolls with universal at the front.

As for what grade you could upgrade it to, it would depend on the color at the back. Green represented that you could get a silver weapon to green. Blue meant you could upgrade from green to blue.

Two scrolls meant Ye Zhongming could raise a piece of silver equipment to blue or upgrade two pieces of white and green equipment to green and blue grade!

What did he rely on to defeat the level-seven Beer? The equipment. So, the first reward would make him stronger.

He placed them aside and picked up the second item from the box.
