

## Apocalypse 51

Chapter 51: Small evolution potion

“Dragon Sandstorm: Sandstorm disappears after activation and turns into numerous Dragon Sandstorms, its strength and number have a negative relationship.”

Attack skill?!

Ye Zhongming was shocked.

The sudden apocalypse also brought many mysterious skills but the type that everyone wanted was undoubtedly an attack skill.

In the first five years of the apocalypse, the price of attack skills was really high. Although it dropped a little after, but they were still one of the most expensive items.

This wasn't tough to understand. After all, humans wanted to evolve so they needed to kill monsters to get demon crystals and then spin for evolution potions.

Under such a situation, the price of skills that could increase their efficiency naturally wasn't low. Especially when they didn't have primary jobs, attack skills seemed more precious.

Moreover, there wasn't many equipment with active skills. If one was lucky to have one that was an attack skill, this equipment would be top grade.

Why was those epic or legendary equipment good? Apart from their strong stats, they also had active skills that could allow users to use something similar to job skills.

For a purple weapon to have an active attack skill meant that this blade was truly close to epic grade.

If he could get one of these...

Ye Zhongming didn't dare to imagine.

But when he saw the materials needed, he was shocked.

He needed seven materials!

A thousand vine liquid, Heavy Armored Bird's feather, Black Silkworm Crystal, Alchemy Metal, Thick Dendro Tree Branch, Earth Read Bug's parotid gland and Red Giant Demon's heart...

Those materials made his teeth sour as there were two really hard to get ones, three very hard to get ones, one super hard to get, as for the last... He had never heard of it before!

Moreover, one needed level six crystals, ten of them!

That wasn't it, the final sentence defeated him, on it wrote-- Note, crafting might fail, 50% chance of failure.

It can still fail!?

There was no need to control fire, or smelt things so how can you fail?

Ye Zhongming calculated. Apart from the Alchemy Metal that he heard of, the other six materials were worth at least a thousand level five demon crystals!

That was not a thousand level one crystals but a thousand level five ones.

Did he even earn that much in his last life? Ye Zhongming felt a little overwhelmed.

Thinking about how his jobs, Glory Smith and Gardener needed upgrade scrolls, about his primary jobs needing to upgrade, and then about this blueprint, Ye Zhongming felt that he was so poor.

Sell it off? What a joke. Ye Zhongming crushed it and learned how to craft it.

So be it. There was something that was said, problems that could be solved by money weren't problems. He was living his second life so why would he be afraid of this?

After obtaining his biggest gains so far, he looked at the three eggs. These were great things. After eating them, one could strengthen one's body and they were called small evolution potions. When Ye Zhongming was looking at the blueprint, Yellow Ball had walked around these eggs many times.

Good food was in front of him so he didn't hold back. He found some wood pieces and set up a fire. After lighting them up, he put the egg with a slightly weaker life force on the fire.

While waiting, Ye Zhongming didn't waste his time. He dealt with the body, the shell, claw, teeth, tail, scales all became his spoils of war. Of course, the outcome was that his remaining mental energy was used up but his skill familiarity reached 40.

He sliced off meat from the body and placed it on the fire. These meat jerkies were the best food, not only did they provide sustenance, they could also increase one's strength.

Yellow Ball was naturally the one that benefitted the most. Its stomach was a bottomless pit, it alone ate 5kg of meat.

A thick scent spread out of the egg and Ye Zhongming knew that it was about time. He used two sticks to carry it off the fire and he smashed the crispy shell to reveal a white jelly-like thing.

The dog and he started to split this delicious egg.

Ye Zhongming ate a small portion before he was full and the rest was eaten by Yellow Ball. This fellow really could eat.

The beast egg was called the small evolution potion so naturally, it had its benefits. Ye Zhongming could feel a fiery energy in his stomach. It was very gentle, not as strong as the evolution potion, it was as if you were soaking in a sauna.

This energy instantly healed up his injured right arm. Although the Ape Turtle bit on his shield and blade, but the huge force still felt really bad for him such that he couldn't lift his arm. Now was much better.

Apart from healing his injuries, his mental energy was swiftly recovering. In just a moment, it was nearly back to full.

When that warm feeling reduced, Ye Zhongming clenched his fists and he felt that his body was much stronger. If he had to give it a number, he was seven times stronger than a mature adult. Which meant that he was twice stronger than after he drank the level one evolution potion.

This small evolution potion really was good.

Some weird sounds spread from beside him. He turned around and saw that after Yellow Ball ate much of the Ape Turtle Meat and this egg, it finally evolved. Its body was covered in fur and their

color was much deeper. It was also much larger. It stood on the ground and reached Ye Zhongming's chest.

The most obvious change was its forehead. Its skin split and a grey crystal appeared there. This dog that no one wanted in the past had successfully evolved.

Its black eyeballs spun and it looked at its master before pouncing over. The majestic aura it had when it was evolving was totally gone now.

"What is your talent skill? Use it for me." Ye Zhongming pushed its big head aside and told it to show him the talent skill that all mutated life forms would have.

.

Yellow Ball barked and used it right away.

Thus, ten thousand mutated crows immediately flew over his head...

Chapter 52: First time crafting

Yellow Ball wagged and looked at its master in glee.

Ye Zhongming looked at this dog and was totally speechless.

This Yellow Ball's talent skill was actually a fur attack, shooting out its dog fur to deal damage. In the apocalypse, some dogs had such an ability. This skill had a nicer name, Needle Density.

But no matter what it was called, it couldn't hide the fact that after using it, one would become bald.

Okay then, no need to wash fur, could just rub its body.

He stopped himself from dissing the skill but he looked at its effect and felt that it was not bad. Some of its furs became really tough and all of them were stuck in the cement mixer. Even if it became bald, what couldn't be denied was that if Ye Zhongming was hit by it, he would end up as a porcupine.

"On the account that it is quite strong, I will forgive you for becoming ugly."

Touching the thick dog skin, Ye Zhongming could sense that Yellow Ball was exhausted after using the skill. Seemed like shooting out its fur consumed a lot of energy.

After searching once more to check that there was nothing around, Ye Zhongming and the bald Yellow Ball left the place and started to walk back. They were nearing the most important event of the day.

When he got back to his room, Ye Zhongming saw that the two girls were covered in blood and they just returned. With strength to rely on and immunity to the virus, these two girls got bolder.

Especially Liang Chuyin, she was decisive and she led Park Xiuying to kill zombies.

After all, they didn't have much experience and just became level one evolved so their control of strength wasn't too good so they weren't that efficient. There were a few times when they were nearly surrounded and eaten up. When they ran back, they were both injured and didn't collect much crystals, only a few dozen.

“See, I told you it wasn’t tough. Now that we have evolved, we can smash a zombie into pieces with one random stick. Why be afraid?”

Liang Chuyin now had the ability to kill a zombie on her own and chattered.

“You also vomited okay!” Park Xiuying used the towel to wipe off the dirt on her face while rolling her eyes at Liang Chuyin.

“Hehe there is a first time for everything, it is common to feel disgust.”

“Jerk!”

After a few rounds of fighting together, the two girls got much closer and even felt like they were friends.

Seeing Ye Zhongming come back, Liang Chuyin took out the collected crystals and awaited being praised. Even Park Xiuying did the same thing and she was delighted.

After spending the past few hours nearby, this teacher got rid of her impractical thoughts. She saw her broken world and accepted the apocalypse.

Ye Zhongming praised them a little but the reason was more because they were adapting to the apocalypse and not the small amount of crystals.

After all, only those who adapted would live for longer. His investments in them would also pay fruit soon enough.

Of course, when they saw the bald Yellow Ball, Teacher Park teared up from pity. As for Liang Chuyin, she also teared up but that was from laughing...

He took out the two eggs and told the two shocked girls to barbeque one of it before leaving once more.

The two girls cleared the zombies out well and he could only see a few scattered ones walking about. There were many corpses but the crystals were all dug out.

Ye Zhongming didn’t walk far and just started to search. He walked to the side of an abandoned car.

Moon Edge needed large amounts of metal so these cars were the best materials.

She pressed an arm on the car and used the Crafting skill. In his mind, he got the notification. The first picture of Warblade Moonsand appeared. Like it was scanning something, the entire blade body lit up and told him that he had enough materials. It also indicated that the success rate was 50%.

Ye Zhongming tried to add his white blade in and it was actually allowed. The success rate also increased by 30% and became 80%.

Seemed like with similar items as a blueprint, one could greatly increase crafting success rate.

After putting in the blade and also adding in half of the claws and all of the Ape Turtle’s teeth, Ye Zhongming paid a level two demon crystal as energy source to craft.

That car was dissolving at a visible speed, like when one melted white sugar in a pot, it turned into a liquid and covered the white blade. The claws and teeth also melted into that liquid.

With the energy from the level two demon crystal, this liquid started to shrink and reveal the body of the blade. It looked very illusionary and its shape kept on changing.

After a short while, a silver light shone. When it dimmed, a weapon that shone silver landed in his hands.

“Moon Edge (Ming): Basic sharpness 10, basic toughness 5. Stat 1: Sharpness +10, Stat 2: Strength+3.”

Ye Zhongming loved the new weapon.

The basic sharpness of 10 was indicated on the blueprint. The toughness was probably the basic stat from merging the mutated tree branch. The additional sharpness and strength were probably from the Ape Turtle’s claws and teeth.

He took out one claw and the notification told him that he couldn’t enchant. Seemed like adding in materials was the same as enchanting. Moreover, the effect was better than enchanting.

As compared to the white blade, this blade was cooler and it looked similar to a goose feather blade. More importantly, it was much stronger.

He waved and the Moon Edge could easily slice into the metal lamp at the side of the road.

He also noticed that when using the blade, he was filled with energy. That was probably due to the strength +3 effect.

He touched the carved word- Ming, and smiled in satisfaction.

The first successful crafting gave Ye Zhongming huge confidence. The skill familiarity increased by 25 points. He knew that if he crafted a few more times, the skill familiarity would be full.

After keeping the silver Moon Edge, Ye Zhongming took out the Ape Turtle shell and strengthened the arm shield that he got. The grey arm shield was upgraded to white. From half a forearm length, it was now covering his palm and half his hand. The dent from the bite was gone and what replaced it was an ancient pattern.

Chapter 53: Chuyin's first weapon

“Toughness +20.”

After strengthening, Ye Zhongming used the Ape Turtle’s scales to enchant and that gave him these stats that made him suck in a cold breath.

The shield naturally couldn’t compare to Moon Edge. After all, it was silver and could have two added stats. With the basic stats, that was three.

But Moon Edge’s highest stat was toughness. The basic plus bonus reached only 20. But just one of this shield’s stat reached 20. This also did not include the basic stat that Ye Zhongming couldn’t see.

One could imagine how shocking its defence was.

Ye Zhongming estimated that this shield could block a level two mutated Ape Turtle’s full-strength bite.

First-time crafting, numerous strengthening and enchanting caused his mental energy to deplete once more. He gave up on crafting another time and returned to the room.

The egg was nearly done. Maybe because its life force was more than the previous one, Ye Zhongming felt that the fragrance was thicker.

Although he wasn't hungry but he needed to regain some mental energy. Ye Zhongming took a piece and his emptied mental energy recovered a little.

The rest were split between the two of them and the dog.

The two girls didn't eat much but that was as compared to Yellow Ball and Ye Zhongming. As compared to their usual amount, they were already worrying about getting fat. But the strength they got after eating made it hard for them to stop.

As for Yellow Ball, one couldn't tell that it had eaten a lot of meat and a huge half of an egg. Another half of this egg entered its stomach.

But eating a lot had its pros. Yellow ball's bald body was now covered in a thin layer of fur. With this speed, in just a few days it would be back to normal.

The two girls used the modified strengthening potion and this small evolution potion so their strength was surging and they needed some time to adapt. Using this time, ye ZHongming strengthened the mutated willow branch and the Ape Turtle's tail and obtained a whip that was two fingers thick. One couldn't tell what the whip was made out of, it wasn't metal and it wasn't wood. There were thin leaves every small distance and when one touched it, one could feel how sharp it was.

Ye Zhongming obtained two Blood Tongue Lizards' tongues. Mo Ye and he ate one so one was left. He used it to enchant the whip and it got Whip+4.

"What is this?"

Liang Chuyin's physique was better so she woke up first. Seeing the white colored whip, she walked over and asked.

"Try if it suits you, if it does then this is yours."

She was delighted. Actually, she noticed that Ye Zhongming's weapon was special and there was a layer of light on it which should be a special effect. Especially since he came back from outside, his blade was gone and there was a new beautiful silver blade. He also had an ancient-looking white shield. All this proved that he had a special skill but she knew her place and didn't ask him about it.

There was such a shining weapon in front of her so she didn't care about anything else and tested if it was suitable.

When she tried it outside, she left many holes in the wall and she truly fell in love with it. Whoever wanted to fight her for it would become her enemy.

No wonder she would treat it like a treasure. When she tested it, the cement wall couldn't block it at all. Moreover, she noticed that when she held its handle, it felt like it was one with her. She could freely control the leaves and when she didn't need them, they could stick to the body of the whip. When needed, they could stand and use their sharp edges to attack the enemy.

Liang Chuyin who had some skill with it felt like this weapon was custom-made for her.

Liang Chuyin made so much noise that Park Xiuying woke up. Seeing her new friend have such a weapon, she felt happy for her. At the same time, she was really envious. Everyone knew that having such a weapon in such a dangerous apocalypse was like having something to rely on.

But thinking about her relationship with this guy, Teacher Park didn't hold any hope.

"What kind of weapon do you want?" Ye Zhongming looked at Park Xiuying and asked.

She was stunned and didn't expect him to actually ask her. She thought that him giving her a level one strengthening potion was already too much so she felt really touched.

"I, that, I don't know."

That answer was something that Ye Zhongming expected. After all, apart from vegetable knives, she didn't use any weapon usually so it was expected that she was lost regarding it.

After thinking about it and looking at what materials he had, he noticed that there was really nothing that he could give to her. Seemed like he had to wait for his mental energy to recover before making a Moon Edge for her.

Actually, Ye Zhongming thought about eating the egg to recover mental strength but he had eaten twice and was really full. Moreover, such a good thing that could recover mental energy and increase the strength of the body, it had to be left for a crucial moment. There wasn't a rush for him to make a weapon for her right now so that could wait.

"Are we going to Pearl Lake?"

Seeing Ye Zhongming pack up his things quietly, Liang Chuyin thought back to what he told Mo Ye.

"En." Ye Zhongming looked at them, "Everything we did was actually to prepare for what we are going to do next. What I want to say is that we are going to do something that is very dangerous. Not only are we facing strong monsters and many zombies, but we might also be attacked by humans. Do you want to go with me?"

"Yes!" Liang Chuyin raised her hand without thinking. Only then did Ye Zhongming notice that this girl's hair was cut and it was just over here eating. This made her look more heroic.

Teacher Park bit her lips and said, "Will I be able to help? If you think I can then I will go. If you think that I will burden you then I will help defend this home."

Ye Zhongming smiled, "Then let's go together. I just said that we might face dangers, I haven't said what would happen if we succeed."

They raised their heads and looked at him. They wanted to know what magical thing they would get.

"A lot, very strong. Enough to make us one of the strongest in this city."

Chapter 54: Start of a chaotic battle

In the main hall of Red Ocean Company, soldiers in uniform lined up. Their black barrels were hanging low but the suppression given by the weapons made it hard for everyone there to breathe.

Li Shujun raised his head, maybe that could allow him to continue to persist.

“CEO Li, I said what I should say, you have also considered for a while so what do you think?”

Captain Ye who was in uniform squinted his eyes and looked at this Red Ocean Company CEO.

Within a day, Captain Ye was filled with emotions towards this new bloodied world. He hated the person who turned Earth like this.

At the same time, he was impressed with the gachapon and was also respectful of the luck of some people.

For example this CEO Li.

A gachapon appeared right in the Red Ocean Company building so the people here knew that it existed and how to use it.

Moreover, Red Ocean Company was in charge of logistics, it did things like construction, moving, bridge building etc. When the apocalypse started, they were celebrating their 8th anniversary so the workers and families were all gathered in the building, waiting to take a bus to the celebration.

Apart from a minority of admin workers, the rest were strong teens so the chance of them turning into zombies was low. After the initial chaos, they fought back and very quickly, they cleared the building of zombies and also obtained many crystals.

Li Shujun who built up the company had huge respect for everyone. After killing his lover and son who turned, he rebuilt his image as the leader.

When they learned how to spin the gachapon and he even obtained a one star potion on his first try, this survivor squad which had no burdens and was united started to form.

People who could start with nothing and build a construction company in this city, their personalities and way of doing things weren't something that others could compare to. After finding out the secrets of the gachapon, he didn't relax. Within the 24 hours of the apocalypse, he gathered his hundred men to clear out zombies around to obtain large amounts of demon crystals.

Although they lacked experience which caused many accidents, many people got scratched or bitten. 50-60 of them were left but in exchange they gained a thousand level one crystal which gave them two one star potions and over twenty weapons.

He selected his strongest men to get the potions. In his team now were three one star evolved and 11 guns!

This strength made their ambitions swell and they started to expand further until they bumped into Captain Ye.

“If I don't agree then would my brothers and I say goodbye to this world?”

Li Shujun's voice was hoarse and his eyes were filled with unwillingness.

Right, he was filled with hate. If he didn't bump into these soldiers, then with how his team was advancing, in a while he might become the strongest team in the city. When the time comes, he would get anything that he wanted and his life would be much better than during peacetime.

He realised that this was a time when strength was more respected. Tsk, Li Shujun always felt that he was strong!

Unfortunately... He bumped into the forces that were set up in the city.

Even if he was unwilling, he had to admit that they were soldiers. Even if the world was in chaos, they were still stronger.

That was normal, they had the advantage that normal people couldn't compete with. They had discipline and listened to orders. They had a perfect command system and highly efficient logistics. They were professional soldiers and their body conditions were perfect so the chances of mutating were low. More importantly, they had weapons, very advanced weapons. After finding out the weakness of the zombies, they could face zombies multiple times their number.

As expected, they were the group of people that got stronger first in the apocalypse.

Looking at these soldiers, there were five or six of them who were evolved. One of them included a short but muscular soldier. Li Shujun felt like his aura was so minute in front of even him.

He guessed that this soldier might have reached two star?

"Although this is not a battle between countries but it is still war! In war, everyone needs to cooperate with the country. That is the duty of every citizen. That includes you and everyone here!"

Captain Ye swept the hall, he didn't care about the expressions of the others and said, "Moreover, you all won't be doing things for nothing, after the battle, you will receive your rewards. I can promise that. Even if you don't trust me, you should trust my uniform!"

After saying that, he looked back at Li Shujun, "CEO Li, if you want me to reply to your question, I can answer it outright."

"Right, if you don't join us then sorry, we won't allow any accidents to occur. If we notice any, we will wipe them out!"

His words were like a firm oath that reverberated through the hall. No one could say anything, no one dared to say anything!

"Maybe after this operation, you can become as strong as us so why not?"

That young soldier that gave Li Shujun huge pressure suddenly spoke and revealed his snow white teeth.

"Hello, my name is Wang Ding." The soldier reached out, "Let's get close."

Li Shujun looked at Captain Ye and slowly reached out.

.....

"Is there anything special about this place?"

Liang Chuyin assembled other advanced binoculars while asking Ye Zhongming who was trying to recover some mental energy.

“Angle is good, we can see many things from here.”

“What do you want to see?” Teacher Park sensed that Ye Zhongming and Liang Chuyin had started to accept her so her attitude became more casual. She wasn’t as timid as before.

Ye Zhongming glanced at a street and at the man-made lake over there.

“A monster will appear there, it is really special and everyone wants to fight for it.”

#### Chapter 55: Treasure Basin and Monster Baby

Liang Chuyin and Park Xiuying looked at one another and didn’t continue to ask.

They noticed that this guy had too many secrets. He was so calm in front of danger, he was vicious and stable against zombies, he was numb and didn’t trust humans. While this filled him with charm, it added a sense of mystery to him.

There were many things that made them think that Ye Zhongming... Could see the future.

But no matter what they thought about, they definitely wouldn’t expect that he lived two lives.

Ye Zhongming looked at Pearl Lake and he was recalling what he saw in his last life.

Ye Zhongming walked out of his home after eating everything and that started his evolution road.

But in truth, he had gone out once, he only walked out of the door.

On the first day, he wanted to find Bai Sisi, he fantasized about protecting her and giving her safety.

But before he was out of the district, he saw a bright light in the distance. It was a short moment before an ancient horn sounded.

Right when he didn’t know what to do, he noticed that all the zombies were dashing towards the light and horn. There were many zombies that were trapped indoors who broke through the glass and jumped off dozens of stories. Although most of them smashed their bones but that didn’t stop their suicidal behavior.

Ye Zhongming stumbled and ran home in terror. Numerous zombies charged at him such that he was left with nightmares for days. As long as he closed his eyes, he would think about those terrifying scenes. Even if he fell asleep, he would get awakened by his nightmare.

The current him looked down on his cowardly self.

But after he fled back into his room, he saw something that he couldn’t forget.

Buildings collapsing, cannons firing, zombies going mad...

Monster after monster walked out from that small lake and was attacked by survivors and troops. They were attacked by mutated monsters too...

At the same time, the army attacked the zombie hoard, they attacked the humans, everyone attacked one another.

Those dozen meter high monsters, the light from the cannons. Even from far away, he could sense the flesh flying which left a huge impression on him.

Scenes that were ten thousand times more real than those science fiction movies made him experience how terrifying the outside world was. It made him lose his courage to walk out and he stayed in his small room for a long time.

Until life forced him to walk outside did he dare to face the bloody world. Until he understood the gifts of the gachapon did he slowly find out about what happened on that day from the mouths of survivors?

In the waters of the Pearl Lake was a weird gachapon. Different from other gachapons, this one didn't have any choices, just a picture of a golden ingot.

One just needed one demon crystal to spin this, right, one level one demon crystal.

What was magic was that after activating it, the reward wouldn't appear right away. It would give the person a notification, that after facing dangers and troubles would one obtain huge rewards. Then there would be a ten hour countdown.

The person who found out about this mystery spread the news. That was because the gachapon's notification meant that this was a highly difficult quest and they recommended having a team.

If that was all, it wasn't so tempting but the notification also highlighted a part of the rewards.

Evolution potion... Silver weapon... Job scroll... Mystery recipes...

Right, this was just a portion. This made many people who were immersed in the mysteries of the gachapon to go mad.

Survivors formed teams to get here to fight for top rewards. People who had tasted the strength that the gachapon had given them saw an addictive poison and wanted to get stronger.

It even attracted the army!

As for how to increase strength, normal people could stop hunting-- spinning--- evolving. But for soldiers, this meant battle plans and it also meant modern warfare.

This was a gap that couldn't be made up in the early stages.

In his memory, until two years after the apocalypse, due to human evolution reaching another stage and people adapting, from then on, survivor squads exceeded armies of the modern age.

But in the few top organisations, some organised units were still at the top.

As the army joined in, humans the zombie hoards fought head on and that was a chaotic battle that lasted until late at night. Ye Zhongming remembered the light, gunshots and cries. They only disappeared in the early morning.

As for what the outcome was, no one had the right answer. Those units either got wiped out or disappeared. Either that or they got so strong that Ye Zhongming couldn't come into contact with them. The answers disappeared into smoke or were hidden deep in someone's heart.

But one thing was certain. In that battle, many people and many units obtained a lot and became stronger.

Ye Zhongming was certain that the person who killed the protector beast Ape Turtle had gotten famous in this event and then he became a nine star expert.

Many people knew that things that were hard to get from gachapons all appeared in large amounts in this battle.

The movement of the two girls pulled Ye Zhongming back to reality and he took out two level two demon crystals.

He had gotten four level two crystals, from the Iron Arm, two Blood Tongue Lizard, the Ape Turtle one. He used one to spin the three colored gachapon, one for the Moon Edge so he had two more. He didn't hesitate to smash them and turn them into his mental energy.

He had to maintain his best state before the battle!

Many survivor teams started to appear and they were heading towards the lake. The battle for the treasures was about to begin.

The gachapon in the water was later known as the Treasure Basin. After ten hours, a little monster holding a golden bag would appear and people called it Monster Baby.

Apart from running fast, it didn't have many skills. It didn't even have a single skill. But it had a piece of equipment that made it pretty much invincible.

Summoning Horn!

Chapter 56: Qin Xiaobo

Until many years later when Ye Zhongming bumped into a Monster Baby did he experience how terrifying this little thing was.

It was the nightmare of any person.

But humans didn't know anything about it now.

Ye Zhongming knew that many people would die today but he didn't think about stopping them.

Humans have to understand the relationship between risk and reward. This was something that was still the same in the apocalypse. This relationship was something bathing in blood.

If one didn't understand that, or rather couldn't properly understand that, then one wouldn't be able to live for long.

Ye Zhongming didn't need to remind fellow humans because he also needed to face a huge risk. He even had to face even more dangers.

Moreover, people might not listen to him. He might even bring trouble to himself.

"Take the walkie talkie. After we begin, Liang Chuyin hide there. If you notice a meter-tall monster carrying a golden bag, inform me right away."

"Teacher Park, you observe here and report the situation. Moreover, pay special attention to where that little monster is going."

"I will be hiding near that bank. If Teacher Park can confirm where the monster is going then report it to me. Chuyin and I will gather in the direction you point us to."

The two girls listened carefully to the mission that Ye Zhongming gave them and remember it in their hearts.

“In a while many never before seen monsters will appear along with numerous zombies so don’t be afraid. In comparison, Teacher Park will be safer but that is not absolute. So if you face dangers that you can’t handle you can retreat. If there is a chance, find another high point to report the battle situation and the location of the monster. If not then head over here.”

Ye Zhongming pointed at a skyscraper, “Wait there for Liang Chuyin and me.”

He said to Liang Chuyin, “Once you notice the target you have to inform me. Although that thing doesn’t have abilities but it is really cunning and can summon many mutated beings. Don’t act alone.”

“Finally, no matter the outcome, after I give the signal head there and meet up with Teacher Park.”

“Do you understand?”

Liang Chuyin nodded. Ye Zhongming didn’t worry much about this influencer as she was decisive and could notice the key points of a problem.

“This will be very dangerous so you all must be mentally prepared. If you want to back out there is still time.”

The two girls shook their heads and their expressions were really solemn. They didn’t have any intention of backing down.

Without any sign, a giant glow shone from the side of Pearl Lake which covered the sun such that the three of them couldn’t help but squint.

Shortly after, there were the rumblings of Crawlers. Along with this, a horn resounded and spread out from the sky such that half the district could hear it.

The Treasure Basin was activated and the Monster Baby officially appeared!

“Go!”

Ye Zhongming said that and charged out first.

.....

There were three regions in this city. Among them, the Peace Region that Pearl Lake was in wasn’t the largest. There was the school, the square, a park, it was the region with the best scenery.

When the apocalypse began, this place didn’t have the most zombies.

But the number of mutated monsters here was the most. After hearing that horn, many survivors saw a shocking scene.

Various weird looking monsters popped out from unimaginable places and headed toward earl lake, forming many black lines on the surface.

The most terrifying was still the zombie hoard.

These monsters that were separated across the streets started to gather towards the lake. Wherever they passed, apart from their own kind, any being would be attacked.

Survivors, and mutated beings all became their targets. Anything that blocked them would be ripped apart and then eaten.

Half the region was in chaos. In just a short moment, killing became the main theme. Thick blood scents spread in the air and stimulated the nerves of all living beings in the area.

.....

Qin Xiaobo was the first person to notice the Treasure Basin and the one who spun it. He was the leader of the survivor team who arrived here first.

Although the apocalypse just started but humans showed their strong ability to adapt. Especially those bold ones, they started to find ways to live on and even live better than in the past.

It was still that same sentence, life will find its own way out.

Undoubtedly, Qin Xiaobo was such a person. He was defending his shop when it began and used his knuckle duster to shatter the head of a customer that turned into a zombie. After shivering in the face of zombies for a few hours, he felt like he had changed.

He was no longer afraid.

When the sky lit up, he dug out the crystal that didn't seem to fit in with the zombie and then ran back to where his house was at.

But what he got was despair.

His father and mother had turned into monsters and were biting on a corpse. That corpse was the son that he was raising after he divorced his wife.

After a moment of being stunned, he cried out and ran out of his home.

He was lucky that he wasn't scratched during that time. When he calmed himself down, he met a few survivors and these homeless people banded together.

Those people traveling outside were all bold. They fought zombies and even killed them before. Qin Xiaobo was a businessman and he was muscular. His brain and body were his advantage. He also had nothing to hold him back. After two dangerous situations, he saved his teammates many times and was thus respected by them and they listened to him.

At the start of the apocalypse, it was a really vicious time. Whoever was vicious would have more power. Only a period of time after the apocalypse would it become comparable to peacetime. Whoever could give their subordinates more and whoever was smarter and had more brains would become the leaders.

Ten hours ago, Qin Xiaobo was searching for water but the supermarket and stores were mostly occupied by zombie hoards. Someone suggested to head to Pearl Lake. If there weren't corpses there then the heated water could be drunk. If that method worked then they didn't need to worry about water.

Thus they came to Pearl Lake and saw that majestic Treasure Basin. At the same time, they found out how to use the demon crystal.

Qin Xiaobo activated it and received a notification.

This was the first time he heard about evolution potions and job scrolls. This made him realise that not only was this world terrifying, but there was also hope.

He knew his skills and spread the news. He told a survivor he met outside the district who told others.

After this, he met the soldiers who came out to search for items.

Qin Xiaobo had a brain so he wanted to work with the army, support them and gain rewards which was the evolution potion.

The motivation of evolving pumped them up and they were the first to rush here.

They arrived here when ten hours were about to be up. Like many people, the sudden light made them temporarily blind.

Once they recovered, Qin Xiaobo saw a meter tall monster with one eye that looked at them with some interest.

Qin Xiaobo was stunned. Right when he was totally confused, he heard the monster mutter about something that he couldn't understand.

The dumb looking monster looked unhappy and picked up the green horn by its waist to blow.

Only now did Qin Xiaobo notice that this monster was carrying a huge golden bag.

Chapter 57: Last honor of this world

Captain Ye placed his binoculars down and his expression wasn't good.

"Situation!"

The advisor at the side reported the situation to his captain.

"With our point as the origin, Li Shujun's forces are at 2 o'clock and they have reached their position. At ten o'clock we found Hu Duohai and they had reached their position. The second unit is at five o'clock and at seven o'clock there is Cheif Liu."

"Apart from that Qin Xiaobo's forces disappeared at 12 o'clock and we have lost contact. At nine o'clock, four o'clock and right behind there are unknown forces that range from dozens of people to a few hundred."

"At Jianying Building, Santong Street, Nanwu Street, Shining Supermarket etc there are large amounts of mutated life forces that are getting close, and also..."

"Also what?" Captain Ye focused and looked at this elite soldier that had always been following him and who had graduated from a famous military school.

Hit gritted his teeth, "We... are getting surrounded by zombies."

Captain Ye smiled, "As long as we are in the city we are being surrounded aren't we?"

"Captain, what I mean is that many zombies are gathering toward us from all directions. If we don't retreat in ten minutes, we will be in a tough battle. If we delay by half an hour, we might not be able to get out."

"So we only have half an hour to solve this puzzle?"

That young advisor nodded, he pursed his lips and didn't say a word.

He tapped the window with a rhythm and determination flashed across his eyes.

He took off the Bluetooth ear piece. With his one star evolved's super ability he jumped onto the top of a car and shouted, "Brothers, I have brought you all into a death tomb."

The first and third unit soldiers turned around to look at their captain.

"There! There! And there! There are numerous monsters coming towards us. If we don't retreat we might all die here!"

Hearing those words, many soldiers started to shuffle. Death had been something they heard during those 24 hours but when it was going to be about them, it still made them waver.

"I know that many of you are worried about your families and feel lost about the future and even feel terror about it. You don't know why you are still here and why you are still wearing the uniform."

"Me too." Captain Ye's voice was low, "I don't know what is happening in my hometown and what my parents are like. I don't know if my wife is safe and if my family is still alive."

"I am also worried."

Many people resonated with his words and their eyes swelled up.

"But!" He grabbed his own collar and asked the soldiers, "Is that a reason to give up? Is this why we abandon our faith?!"

"Tell me, would we become like this?"

The young faces were all struggling, they were thinking and deciding.

"Anyways I won't." Captain Ye slapped his chest, "I am worried about my family but I also saw the world change. I saw our humans turning into monsters. I saw those poisonous gachapons and also saw unimaginable evolving methods!"

"Exactly the same as those games!" Captain Ye shouted and his face turned red, "I feel like I am getting played! What about all of you?"

"I feel like I am a toy, I am a chess piece that others are using for fun!"

"I am worried about my family and want to find them but I know that it won't work. Maybe I won't even get out of the city and would be eaten up by these monsters. At that time what is the point of my family being alive? I am already dead!"

"So I need to keep alive and get stronger and head towards my own home to see my family! If they are alive I will hug them. If they are dead, I will personally bury them. If they are alive I will use my life to protect them. If they are dead then I will live well for them!"

"My army life told me that to complete this goal, I can't depend on myself, I need to depend on this team. This is what we knew when we wore the uniform, did we forget it all because of the apocalypse? Are we going to get hot-headed and run out to die?"

"No, I won't do that, I won't allow my men to do that either! I will ensure and keep all of you alive! Stay alive do you hear me!"

"Yes!"

The soldiers were touched by Captian Ye's feelings and shouted back.

"We are soldiers, we are born to fight and now this is war! We need to get stronger, we need to get stronger than these monsters, stronger than this world! Only then are we worthy of the name and honor of soldiers!"

"Anyways, even if I die, I will die with this uniform, I will die with the last bit of honor that this world has!"

"Honor belongs to us!"

"Belongs to us! Belongs to us!"

The shouts felt as if time had stopped. The soldiers had tossed aside all their random thoughts.

Right, there was nothing to think about. Get stronger, stay alive and then they could think about other things. The strength of an individual versus a group, the difference was something that they knew.

"Now we have a huge chance. If we win, we will get stronger. What do you all say, should we give up?!"

"No!"

"Good, my troops never disappoint me!" He waved, "Our goal is up ahead, my order is to head forwards! Head forwards! Smash everything ahead of us! Tonight, those who do well will have a chance to evolve! Tonight, I will treat you all to alcohol!"

The soldiers all replied. They raised their guns and pushed forwards toward Pearl Lake!

.....

Ye Zhongming hid in a building and he heard that captain speak. Even he felt his blood boil up.

He was envious as such a united team was something that was unimaginable in the apocalypse. No one would talk about honor and feelings with you, they only cared about interests.

These things would slowly disappear as the world crumbles.

But at least at this moment, the blood of these guys was still hot.

Maybe their goals were the same as his. Maybe some people might find them amusing but their aura and unity were deserving of respect.

We could not agree with them but we had to respect them.

“Good luck!” Ye Zhongming silently prayed for these guys.

Zi zi zi zi!

Energy currents appeared nearby. He raised his head and saw that a giant black hole was forming over at the lake!

## Chapter 58: Monster that appeared

Ye Zhongming looked at the black hole with a drunk look.

He sniffed the familiar smell from that black hole.

It didn't smell good and even had a decomposing smell to it. The first time one smelled it, it would make one vomit.

But for someone who had survived the apocalypse before, they had a special feeling towards this smell.

It was the smell of a dungeon!

When the apocalypse started, not only did gachapons descend from above, but tens of thousands of golden light smashed down and left dungeons.

In it were many alien beings. Monsters roamed those areas. Over there were strong monsters that filled humans with despair.

There were all sorts of weird plants and also precious items. There, one could find all sorts of treasures.

When survivors entered the dungeon, there was a high chance that they would die. It was a meat grinder, a tomb that made everyone's expression change.

If you could walk out alive, you would get far more benefits than you can imagine.

Someone once joked that the apocalypse didn't lack two things. One was women that would take off their clothes and second was experts that walked out of dungeons.

From that, one could see how many benefits one could get from the dungeon.

Ye Zhongming was someone who did walk out of dungeons. But as compared to real experts, he was not the main character. He wasn't even the co-star, he was just someone making up the numbers.

But he did it several times which gave him the first job in his life and he got his first upgrade scroll. Obtaining most of his fortune in his life.

Then how much did those main characters get?

Ye Zhongming couldn't imagine but anyways he knew that they got a huge amount.

The feeling of getting rich from the dungeon was something that everyone wanted. Even if there were many monsters within and it was very smelly inside, but one would still think back and look forward to it.

At this moment, a giant black hole appeared on the Pearl Lake which was opened by the horn of the Monster Baby. This horn could summon evolved life forms and zombies from around the area but it could also open a tunnel to summon strong monsters from the dungeon!

As expected, when the black hole reached a certain size, lightning shone within and two red monsters walked out from inside.

These were two weird dog shaped monsters. On the sides of the dog face were several grey beards. On its head was black fur which made it look really weird. It had a split tail and at the tip of it was a sharp white bone.

These two monsters had special legs. They were similar to humans but only had three toes. Giant veins covered their legs and every time they took a step, a shining thing would flow past their veins.

"Orr! Or or!"

The two monsters gave out a chaotic sound like they were discussing their sudden appearance here.

After which, they looked at the stunned Qin Xiaobo and his men and looked really excited. They pounced, pressing down the human at the front and biting onto their weak necks to consume them.

As he had a good angle, Ye Zhongming saw this.

"Red Gondor!"

He held Moon Edge tightly and his breathing sped up.

Apart from those strong monsters that would be given names, the other monsters in the dungeons would follow the different evolution tiers.

For example, the Ape Turtle that he had faced, evolved twice so it was level two.

This Red Dongor was also a level two monster.

The black hole just opened up and two level two monsters appeared. This meant that this event was in hell mode.

In the last life, as Ye Zhongming was too far, he didn't see these 1.5 meter tall Red Gondors, he only saw...

Who knew if his addition would cause that monster to still appear?

After absorbing the blood of two survivors, the two monsters were really excited. They ignored the Monster Baby and started to chase the humans.

The human flesh and blood tasted much better than those of other monsters in the dungeon. Moreover, the energy in the blood made them drunk.

Usually, these level two monsters didn't have the ability to smash the barriers and appeared outside. This time they wanted to have a full meal.

The moment the two of them just left, a pair of giant horns appeared. These pair of horns were each on the side of a dining table. Shortly after, a car sized head appeared and also a mountain-like body of an elephant.

This two story tall monster was called Terror Goat. After this fellow shrunk by a dozen times, it was similar to a mountain goat. The terror prefix showed how much grievances humans had towards it. Not only did it not eat grass like goats, but it was also a bloodthirsty demon. It had thick skin and moved with agility. Its horns were firm and it ran like high speed supercars. This speed along with its weight and horns meant that evolved people three star and below would die if they were hit!

Another level two monster!

Ye Zhongming knew that Terror Goat didn't seem as scary as other monsters but it could easily deal with the same level evolved! If it had special skills, it wouldn't have been a level two monster.

That wasn't it. The Terror Goat charged towards one side and a few more monsters appeared in the black hole.

Right, a few!

These monsters weren't huge and each of them was the size of a pig but there were too many of them. Hundreds of them charged out! Ye Zhongming looked at their faces and his expression changed too.

These monsters were all level one but a hundred level one monsters together was far stronger than a level two monster.

Purple Cloud Ants!

They were terrifying group monsters that had purple cloud patterns on them!

Ye Zhongming started to guess what grade the dungeon that the Monster Baby was connected to. How did so many problematic monsters appear?

Dong! Dong! Dong!

The earth shook with a rhythm. Ye Zhongming turned around and through the windows he saw a five meter tall figure appearing behind him. It had grey skin and it didn't wear anything. It held a giant steel pillar and bared its fangs as it walked closer to the battlefield.

Zombie Ape!

Ye Zhongming's heart started to sink.

Chapter 59: Bringing forward the plan

The Zombie Ape wasn't a monster but a zombie.

Level three zombie!

Ye Zhongming didn't know why there was a level three zombie on just the first day of the apocalypse.

Wasn't their evolution speed too overpowered?

Zombie's evolution was different from humans'. Humans relied on evolution potions and if they wanted the potions they needed the gachapon.

Zombies and other life forms were different. Their evolution was natural, once the energy in their body reached a certain level, it would transform and that would be their evolution.

From certain theories, these zombies could reach the highest level in the shortest amount of time.

But that was just theory and it wasn't true in reality.

For example, from normal zombies to level one zombies, you just needed to eat brains and flesh. To get to level two, you might need ten. From two to three, you might have to eat a thousand!

This was not a simple addition and subtraction but it might be several folds increase.

At the start, evolution would be easy but as they leveled up, it would get tougher and tougher, slower and slower.

As compared to humans, their evolution speed might be advantageous at the start.

But Ye Zhongming didn't expect that in just a day, there would be level three zombies.

Level three!

In the last life, what was the fastest speed for a human to reach three star? Three weeks?

This Zombie Ape took one day! It only took one day!

What in the world was going on?

The strength of the monsters from the dungeon already made his heart very heavy but the appearance of Zombie Apes gave him a really bad feeling.

The terrifying monster he saw in the last life hadn't appeared yet but now there was a level three zombie?!

Moreover, it was a Zombie Ape whose combat strength was average among mutated zombies!

This zombie was really strong and its skin was really thick such that even its eyelids had strong defence.

There was no use in attacking any other parts, only its head was its weakness. However, it was 5 meters tall so how could humans shorter than two meters hit it?

Even after humans evolved, dealing with Zombie Apes was a huge headache.

Like it was about to prove Ye Zhongming right, the Zombie Ape raised the steel pillar and smashed it into a building. The dozen-story tall skyscraper started to shake and a few cries rang out from it. Its other hand broke a window and grabbed a struggling man.

This man wasn't too small and he was over 1.75m, he should be around 80 kilograms.

But in the hands of the Zombie Ape he couldn't fight back at all. The level three zombie just crushed him and large amounts of fresh blood flowed out of its fingertips and dripped onto the heads of the normal zombies below, making them go even more berserk.

The Zombie Ape's huge hand tossed the guy into its body. Its head bit and his head was picked off. Just like that, a liquid flowed out of its mouth and onto its body to make it look even more disgusting and cruel.

This wasn't over, maybe the freshness of humans made it hungry. It stuck its steel pillar on the ground and it rubbed the man's body with two hands. Just like that, it was turned into a meatball which it tossed in and started to chew.

Ye Zhongming had lived in the apocalypse before but he still felt disgusted by such scenes. Many other survivors collapsed. The troops were a little better but those survivor teams made of normal people all fled in many directions.

The gory scenes exceeded what many people could handle.

"Damn, this, what is this?"

One of Li Shujun's men felt his legs tremble, an urge to pee overcame him and he nearly peed himself.

He was one of the first few that followed Li Shujun and when he was guarding a car to transport items, Li Shujun had a bunch of brothers who snatched business from others so fighting was common. They used knives every few days. He thought that since he had seen blood before that there was nothing he had to fear.

But the scene of that giant monster eating a man alive made his soul tremble.

Li Shujun's expression wasn't good too. He felt that he was strong, not only did he have many strong men, he was also a one star expert.

But Captain Ye's appearance gave him a blow that made him yield and follow instructions. The appearance of this Zombie Ape made him realise that this apocalypse wasn't his and it didn't belong to anyone. If one had to attribute it to something, then this apocalypse belonged to the monsters.

Captain Ye had a similar expression. He didn't expect the eagerness of his men that he had just instilled in them to get affected by such a monster.

The difference with normal people was that Captain Ye was not afraid. Although this monster was terrifying but he believed in his men and the strength of modern weapons. What he cared about was this monster's influence on the surrounding zombies.

The Zombie Ape looked like it could control other zombies and they were following its footsteps.

If Ye Zhongming was beside Captain Ye's side, then he would definitely tell him that high level zombies threatened low level ones. That can turn into control so zombies rarely fought and killed one another.

On this point alone, being a zombie was better than being a monster.

Captain Ye looked serious. He was clear about the difference between scattered zombies and a hoard. He could deal with the former but the latter...

"Order Chief Liu and the second unit to defend our back no matter the cost!" Captain Ye bit his teeth, "Also, order Wang Ding to execute the plan when needed! The target is this monster!"

"Yes!"

The advisor shouted and he went to give out the orders.

.....

"Ye, oi!" Park Xiuying vomited and couldn't even say anything.

The scene of the Zombie Ape eating someone caused the teacher to be unable to control her emotions. She only provided some information before she started to vomit.

Liang Chuyin also gave out some weird noises. She was also uncomfortable but she was holding it in.

Ye Zhongming didn't blame them, instead, he analysed the outside situation through the bits and pieces they were saying.

He came to try to steal something but looking at the situation, the humans might collapse in a short time. He had to consider when to give up.

"Teacher Park, where is the Monster Baby?"

"It is still walking at the lake." Park Xiuying wiped her mouth while using the binoculars to observe.

"Terror Goat?" Ye Zhongming told the two girls the name of the monsters.

"Behind the Xingdai Building on your left!"

Ye Zhongming stood up and jumped outside, moving towards the Xingdai Building. He said to Park Xiuying, "Tell me its location and pay attention to movement around. Shout out if you notice anything. Liang Chuyin, move towards me!"

Chapter 60: Mo Ye's defence line

Mo Ye touched an old rifle and was stoning a little at the side of the wall.

"Little Ye what happened? You haven't been yourself since you came back."

A forty year old middle aged man helped an automatic rifle. There were a bunch of mutated rats moving around. Although he looked relaxed but the hand he used to hold the rifle was really white.

Whoever was facing hundreds of cat-sized rats would definitely feel nervous.

Mo Ye coughed and shook her head, "Nothing, just, these rats are so disgusting."

The middle aged man laughed, "I thought that you were frightened by that giant monster."

“Why would Sister Mo be afraid? She fought six guys with daggers and she wasn’t afraid and even took them all down.” A young fellow laughed and his face even had pimples.

“Right, who is Captain Mo, the grappling female champion of this province, top five in the open category!” A strong guy turned around and smiled at the young kid, “Do you know what top five is? That means that out of all the male cops in the province, only four guys are stronger than her. The others have to kneel for her!”

Those words made the five person team here relax. The nervous atmosphere was being solved.

“Mo Mo’s shooting is also really strong.”

The one who spoke was the other girl in this five men team, a woman around 30 years old. Although she wore a camouflage uniform and was in boots but her figure couldn’t be hidden.

In terms of looks, there was a slight gap between Mo Ye and her but her maturity made up for that gap. Even to these police males, this woman was better than Mo Ye and she was the top goddess.

But if you treated her as a weak woman then you were totally wrong. She worked on the frontlines for eight years and did hundreds of missions and maintained a perfect record. That record hadn’t been broken until date and only Mo Ye got close. Her hundred percent record lasted for four years but there was still a huge gap between the older woman and her.

But she married and changed to an admin role so the world had one less legend and one more good-looking admin officer.

“Sister Lei Lei, you are laughing at me. Who doesn’t know that you hold eight of the 12 shooting records!”

“Haiz, I have not used a gun in a long time. I am old and can’t fire anymore.”

The three guys laughed. Apart from Xia Lei, only Mo Ye’s face flushed red. This captain who didn’t even have a boyfriend couldn’t help but laugh at such teasing words.

This five person team was just pieced together. Mo Ye had her own men but the apocalypse began and not many could return to the headquarters. The team had eight people and only the kid and the strong guy were under Mo Ye.

That middle aged man was Mo Ye’s teacher in the school but he got injured and became an admin officer like Xia Lei.

Since the start of the apocalypse, some people fled to the headquarters while some were trapped in the headquarters and couldn’t go home.

This middle aged man was similar to Mo Ye and they both went from home to the headquarters. But the difference from Mo Ye whose relatives weren’t in this city was that this middle-aged man had lost all his loved ones.

“Little Tiger what are you laughing at? Cheng Long is alone, you do have parents, aren’t you worried about them?”

Cheng Ze kicked the kid and scolded him.

“Worry what? Don’t you know what my parents are like? Their bodies are good and they are smart. They are definitely hiding and waiting for me to find them. Once I evolve I will head back, no rush.”

“As expected from a heartless person!”

Xia Lei stared at Little Tiger, her white face couldn’t help but show some worry.

She was someone who was trapped at the headquarters. It was hard to get out of the city based on your own strength unless you became evolved. So Xia Lei and Little Tiger were the same, they all wanted to evolve before heading home.

“No worries Little Lei, Little Qin is at a government unit and he is at a new region with few people so fewer zombies. Moreover, the armored unit is near them so they would head there to defend right away.”

Xia Lei smiled and expressed thanks to Cheng Ze.

Actually, Cheng Ze’s reasoning was that she was not nervous. Before communications went down, she had contacted her husband. He was fine and didn’t turn into a zombie. She also knew that they were defending the administrative region and the armored unit had headed out towards them. They should be one of the groups of protected people.

“As for you Little Ye, why do you keep saying that you will leave?”

A few of them looked back at Mo Ye.

“I...”

Ye Zhongming’s resilient body appeared in Mo Ye’s mind. Her promise rang out in her mind once more and she felt that this guy would be nearby.

But when Mo Ye was about to reply, the mutated rats that they were in charge of shooting sped up and attacked their defense line. An order spread from the corridor!

“Fire! We can’t let them break our defense line!”

Gunshots could be heard and her explanation was also broken.

Although they didn’t belong to the same team but they were all really strong and knew how to coordinate with each other. The dense firepower net cleared out the rats in front of their area.

Those level one mutated rats couldn’t block the thermal weapons that humans spent centuries developing.

Gunshots could be heard from the other rooms. From afar, the entire building became a fire-breathing monster such that zombies and mutated beings fell in patches.

The defence line made up of cops fired and showed the other survivors how strong they were. Be it zombies or mutated beings, none could cross their defensive line.

But sad things often happened because of that. Before Captain Ye and the second unit fired, the attack was the strongest here so that attracted the attention of the Zombie Ape.

Its giant body turned and it pointed the pillar in this direction. It roared and numerous zombies pounced at this building with the Zombie Ape following behind.

“Damn, that fellow was drawn over!”

Their expressions weren’t good and the strong guy Cheng Long scolded while shooting at the Zombie Ape. Hundred-meter distance was within range.

Many people had the same idea. They were all clear that if the Zombie Ape got close, a few hits would smash them into pieces.

But numerous bullets landed on it but they only left white marks. It used its hand to block its eyes and head!

All of a sudden, the cops couldn’t do anything to this fellow.
