

Apocalypse 681

Chapter 681: Fourth stage strength

The lightning disappeared, and the clouds stopped. Shortly after, there was a leaf rain.

At the start, Ye Zhongming just felt like it was normal rain.

But when he saw those green leaves, he felt like it was a leaf snow.

Numerous soft leaves descended from above and floated while spinning. This was a weird motion. They went up and down. It was as if they were lined up.

The leaves didnt spin too quickly, but their speed also increased as their height fell. When they were in the middle of the air, they could slice through the air and give out an ear-piercing sound.

Ye Zhongming placed the staff before him, and Water Bottle Protection appeared above him.

Yi, I like that staff!

The Death King Tree looked playfully at the staff, and shock appeared.

But Ye Zhongming had no effort to bother about it as the Death King Trees attacks were here.

The spinning leaves and Water Bottle Protection clashed, making a sharp rubbing sound.

Pa!

The first leaf exploded and turned into green dust. Water Bottle Protections light also changed.

The second, the third

Hundreds of leaves hit the barrier in a short few seconds. It finally couldnt take it and shattered.

Ye Zhongming could only place another water element gem.

But the green leaves had descended by a few centimeters at this time. When the Water Bottle Protection appeared, it clashed with the leaves. This time, the gem couldnt even last for two seconds.

Ye Zhongming placed a third one.

But the leaves in the green cloud continued to descend.

Based on the speed at which the barrier was disappearing, Ye Zhongming compared their strength with his defense. He was sad to realize that he would be badly injured in five seconds, unable to walk in ten, and would die in fifteen.

This plant that controlled the entire city was so strong when it attacked.

But this didnt mean that Ye Zhongming had no way to deal with the Death King Tree. After all, he needed just one strike!

Ye Zhongming placed a gem for the fourth time. At the same time, he took a rope from his space. This was a tool that he got from the wheel.

He tied it to the staff.

The Death King Tree looked at him with interest.

After tying, he changed a water gem. This was the fifth one. In the next moment, he charged and pulled when he was three meters away. The staff was dragged to his side, and he placed the sixth gem on it.

The Water Bottle Protection shattered the leaves around it. It also broke, and the seventh gem was replaced.

The Death King Trees expression changed.

Although World Nature was able to produce endless amounts of sharp leaves, even the Water Bottle Protection was unable to block it. But Ye Zhongming had many water element gems and was able to get closer to the tree.

Even if that would cause a short gap between the two Water Bottle Protections, he could use two gems to replace it.

Not bad, smart.

Death King Tree spoke again. The main branch spat out a green mist and merged with the green clouds. Shortly after, the falling leaves started to spin quicker. They also changed the way they landed. They began to float without any order.

They landed quicker, there were more of them, and they spun faster without any order. This made them much stronger and placed Ye Zhongming under more pressure.

Second stage!

Death King Tree was bragging when he said that.

The second stage attack was strong, but Ye Zhongmings two nature gems could last three to four seconds before, and now they could only last two. He had to continue changing gems.

Fortunately, this should be the Death King Trees ultimate move. Apart from being able to speak, it had to fully focus on using the ability. If someone were near the sticky liquid lake, they would notice the liquid disappearing quickly.

Ye Zhongming charged forward again, but after two meters, he had to stop to change gems.

Lets see how many more you have!

After Ye Zhongming used this method to move ten meters forward, the Death King Tree couldnt take it and used the third stage of World Nature.

The leaves grew bigger, and they started to spin 360 degrees. Each leaf was so quick that you could only see an afterimage.

Ye Zhongming was only able to take one step each time he moved.

Even so, the leaves were a few meters from Ye Zhongmings head when the Water Bottle Protection disappeared.

But he was still a distance from the main body.

Based on this situation, Ye Zhongming couldnt hold on until he got close, and the leaves would hit his body.

You were right; I am the Death King Tree and Life-Taking Carrot. I can also kill everyone in the city. Do you know why? I need to absorb nutrients. Although it is good to eat to my fill, I would run out of energy, and that is not what I need.

Death King Tree saw that it was about to win and smiled gleefully.

But, this En in your words, the sheep-rearing project is about to end. I will eat everyone who has entered and are in Linhai. I would also eat you. You have the same source as me, and I would be able to get to level nine and turn into a human. At that time, I could walk about this land, and no one could stop me!

This is the brain I prepared for myself when I become a human. It makes sense that you call it Life Brain. When the time comes, I just need a body. Keke, what body proportions do you think is the best?

That smiling face changed, and killing intent surged.

So you can die now!

World Nature's fourth stage was activated, and the leaves turned from medium rain to large!

Water Bottle Protection shattered almost instantly.

Ye Zhongming knew that this was the decisive moment. He kept the Staff of Nature and charged towards the main body. He waved, and the Osmium Giant blocked above his head.

Two seconds later, the spiraling leaves sliced this piece of Osmium that had followed Ye Zhongming for so long into pieces. It was useless now.

The giant Copper Ink Ocean Sunflower appeared above Ye Zhongming's head in the next second.

It was upside down when it appeared. Its tentacles, which could cause the light that slowed one down, were activated, causing the leaf rain to stop. A moment later, they continued to shoot down.

The beast's tentacles were ripped into meat pieces. When Ye Zhongming kept it, this battle pet was in its last breaths.

These few actions were completed quickly. Although it only took him a few seconds, his speed was enough for him to reach the Death King Tree's main body.

World Nature landed on his body.

He used Moon Edge to protect his face and the blade was damaged quickly. He ignored his body that was being sliced and slapped the body.

He activated Intelligence Mark!

Chapter 682: Linhai opens up

Intelligence Mark: Use this ability on mutated plants and give them medium intellect. Moreover, you gain control of the plant. The cooldown time is a thousand hours. This ability consumes a large amount of mental energy.

This was the plant skill that Ye Zhongming used after using the Nature Soul Essence. It was a very overpowered ability. To mutated plants, it was the hand of God.

Medium intellect meant that he would give mutated plants intelligence. It was the same as giving life.

Although he didn't know how high medium intellect was as he hadn't used it before, it should be good. They might even be able to learn the human language.

Think about it; a speaking plant would be quite magical.

After Ye Zhongming got this skill, he started to think about using it on the Death King Tree.

Not to give it medium intellect but because of the other function of the skill-- Control.

If he could control the Death King Tree, then Linhai's problem would be solved. He could even create a monster that could control an entire city and rule many fearless dried corpse warriors!

So, Ye Zhongming found the guide and decided to escape from his team at the crucial moment. He wanted to use the Intelligence Mark on the main body. He had to give it a shot.

The Death King Tree's body was cold and smooth. When he pressed it, it felt like he touched a polished piece of metal.

The moment Intelligence Mark touched it, the Death King Tree screamed. At the same time, World Nature was broken, and that green cloud dissipated.

It was very short since Ye Zhongming summoned the beast to create time for him until he used the Intelligence Mark on the Death King Tree. Only a few seconds had passed. He had wasted a Moon Edge in a short while, and all his defensive equipment was destroyed. The leaves had sliced many wounds on him, and fresh blood soaked his shirt, turning him into a blood person.

But his expression was firm. He knew that this decided the outcome.

When he heard the Death King Tree scream, Ye Zhongming thought he succeeded. But shortly after, his expression changed, and he raised his palm.

His mental energy surged like a dam and was about to empty.

One requirement of the skill was that it required a large amount of mental energy. Ye Zhongming didn't care about it before as he had a large amount.

But maybe because the Death King Tree was too strong, with his mental energy, he couldn't handle the amount needed.

A second and his mental energy was nearly gone.

Even if his mental energy wasn't full due to his participation in the fight before, this consumption was shocking!

Ye Zhongming's body was flung backward, and he only stopped when he hit the wall. He fell to the ground and couldn't get up.

The Death King Tree pulled out all the roots from the ground, and its stem shook. The membrane above was tugged, and it broke. The entire Sticky Liquid Lake was about to fall.

At the same time, the entire Linhai was shaking. In the underground river, mutated rat area, an underground city, all the people stopped their fights, and they felt a killing intent sweep them.

A tree with a beautiful female face appeared in all their minds, but its face was twisted.

It disappeared quickly.

The earthquake stopped as if it had never happened, but everyone knew they had seen the Death King Tree.

They had never seen it before, but they were sure it was.

The Life-Taking Carrot outside stopped shaking and retracted into the ground. The humans, zombie horde, and mutated lifeforms observing were stunned, and they felt like the timing wasn't right.

But since that was the case, no one would give up on the chance to enter. Large amounts of lifeforms entered from all directions. The death city welcomed a new life.

Or rather, it was the last moments before death.

The sticky liquid lake had collapsed underground, and the stem of the Death King Tree shook more intensely. Its roots flung the green liquid all around, and the branch mountains rumbled as they collapsed.

You are going to die; you must die! It went crazy. It looked at Ye Zhongming, who was climbing up and being hit by sticky liquid. The main stem didn't stop shaking, and it started to bump into all sides. It was in pain.

All of you will die! Death King Tree moved towards Ye Zhongming. It wasn't quick, but Ye Zhongming, who had used up his mental energy and was knocked back by the Death King Tree, couldn't even move. The distance between them was reducing.

You are strong; you can use such methods. Unfortunately, you are not strong enough! So what if you can hurt me? You will still die. Everything in the city will die!

The Death King Tree screamed those last words out. The main stem shook. Life-Taking Carrots around the underground city that shouldn't be there started to pop out from walls or the ground to kill the survivors they touched. Their bodies were ripped apart, wrapped, torn. The leaves absorbed their energies, and they turned into dried corpses that were tossed around like rubbish.

The energy was transported back to the main body of the Death King Tree.

Those roots rose and stabbed toward Ye Zhongming.

If he could kill this human, the Death King Tree would not only fully heal but also evolve further.

Pierce!

Its confident stab missed, and it only caused some sticky liquid to spatter.

Ye Zhongming, who had lost his movement ability, was lit by a bolt of lightning. He used Quickness, and in a blink, he was at the side of the tree. He jumped up and grabbed Life Brain!

Chapter 683: Clarity Ball

Before Ye Zhongming searched for the King Death Tree, he told Yang Yixi to purchase two things. One was the advanced purification potion for Gaye so that he would lead the way.

The other was a pill-- Clarity Ball.

A potion maker made this, and its function was to be eaten before using a skill. After use, you would recover from the mental energy consumed and reset its cooldown time.

In his last life, he had a good habit of considering defeat before he thought about victory. Even if he was afraid that the skill was ineffective against the Death King Tree, who was at a higher evolution level than him, and didn't care much about the use of mental energy, he was still prepared for accidents.

When he found out that people here could create potions when he was asking around for a guide, Ye Zhongming knew there was a high chance he could get the Clarity Ball.

When one produced this pill, the secondary product was the purification potion. Since Gaye could purchase purification potions endlessly, that meant that someone in Linhai got the recipe for the Clarity Ball and was trying to create that pill.

As expected, after paying a high price, he traded for one.

Even when World Nature sliced his body badly, he remembered to eat the Clarity Ball before he used the Intelligence Mark.

When Death King Tree knocked him back, his mental energy had returned back to normal, just that his body was slightly injured. He was faking that he couldn't move so that he could find a way to fight back after the Intelligence Mark failed.

Thus, when the Death King Tree was still giddy from the Intelligence Mark, Ye Zhongming had the chance to grab its treasure.

Let go!

Death King Tree screamed, and the tentacles around charged toward Ye Zhongming.

The Life Brain was a core part of the body that it planned to make for itself. It spent a lot of effort on it, and after it started to change into a human, it still cared so much about this part that was as important as a heart! It used a technique to implant its own blood and life force.

Strictly speaking, it was a mutated plant, and in terms of attack, it wasn't as strong as other mutated animals. It was rare to have such a strong ranged attack like World Nature.

But mutated plants were stronger in terms of support abilities or weird skills. Look at how it created dried corpses, sticky liquid lakes, human faces, etc, and you would know how weird its abilities were.

For such a fellow to make a Life Brain, everyone definitely knew that it was something good.

Ye Zhongming targeted it because this was the best thing apart from the Death King Tree's body itself.

He picked it up and ran away with it.

You can't run; this is my territory!

Although the Life Brain wasn't the main body of the Death King Tree, it spent a lot of effort on it, so it was important. Now that someone else had it, the blow to the Death King Tree was worse than the Intelligence Mark.

It chased Ye Zhongming. Those roots, tentacles from the sticky liquid lake, and even the branches from the branch mountain all attacked. They wanted to bury this human here.

As the sticky liquid lake had collapsed, due to the land area and tunnels, this place hadn't turned into a new lake. But the sticky liquid here was a few meters deep. Moreover, more liquid flowed down, and the depth increased every second.

Under such a situation, Ye Zhongming had no way to flee.

But he didn't panic at all and even shook the brain at him.

Goodbye; I hope you get further on your path to becoming a human!

A rainbow gate appeared behind Ye Zhongming, and he jumped in before disappearing the next second.

All that was left was the screaming Death King Tree.

When Ye Zhongming walked out from the Rainbow Gate, the underground city was in a mess. The Life-Taking Carrot appeared suddenly and turned it into hell. Even if they weren't as dense as those that surrounded the city, the humans still weren't their match.

Everyone didn't know what happened and didn't know what to do.

Yang Yixi, Ah Hai, Mei Na, Gan Lan, treant, etc, gathered to discuss. Anxiousness and rage appeared on their faces.

These people didn't know where Ye Zhongming went, and it was normal for them to be unhappy about it.

Coincidentally, the underground city was in chaos. The Life-Taking Carrot hit this place, but there weren't many of them, so they lost some men before they solved the problem.

But the people in the underground city were stunned and didn't know what to do next. Many people felt like their lives were about to end, so they went mad.

The more serious problems were internal. Many people in the group panicked and were unhappy that their leaders were standing there and not doing anything. Some even suggested following the plan they had before they decided to work together.

These people were gathered here to discuss this matter.

But after a few sentences, Ye Zhongming bumped his way in while being covered in blood.

The silent twins charged over.

Pack up; we need to go immediately!

Everyone was stunned, but they were already used to listening to him.

Since he was back then everything was good.

He said a few sentences to explain the reason and calm them down.

After everyone headed out, Ye Zhongming held a bag, and he had a helpless expression on his face.

The Life Brain was naturally the thing in the bag. It couldn't be placed in his space, similar to how Linhai blocked the Rainbow Gate.

Fortunately, it could be used inside the city, which was how he had escaped from the core region.

But he knew that the Death King Tree was definitely chasing him, so he had to leave.

He changed his clothes. The wounds from World Nature had started to heal, and his strong, high-level evolved body was showing its use.

After this, Ye Zhongming led the people to get ready.

They didn't have much time.

At this point, in a place in the underground city, a thick tentacle wrapped a struggling guy and pulled him through many walls. It sent him in front of the Death King Tree!

Die or obey! That woman's face was filled with viciousness!

Chapter 684: Breaking out of the ground

The earthquake from Linhai forced all the Cloud Peak warriors to take a defensive stance. In such a foreign environment, they were forced to be on guard.

This place is too weird.

Tong Hu touched his head and looked around. He was nervous when he faced such a broken city.

If it isn't weird, then how would the boss be trapped?

Boss isn't trapped; he chose to enter.

Ah Yang and one of his brothers debated to reduce the invisible pressure they faced.

The Battle Contribution Badge is not working.

Liang Chuyin tried to contact Ye Zhongming, but there was still no sound. This made everyone worry again.

This might be due to the distance. Linhai is a big city, so the boss might be elsewhere.

Little Li looked at the frowning Liang Chuyin and consoled her.

Little Li really liked this little girl who looked feisty but was very caring inside. She was beautiful and had a pair of smiley eyes. She was thoughtful and knew how to cook. Also, she came from the countryside like Little Li, which made her feel it was a waste that this young girl wasn't with the boss.

Although the boss already had Xia Lei and Xia Bai following him like a shadow, something probably happened a long time ago. Little Li knew that for women to be loyal, the best way was to turn them into their own women. But this wouldn't change her feelings about Liang Chuyin being more suitable for Ye Zhongming.

She was suitable for him in age, personality, and looks. Having a few women wasn't a problem for strong men in the apocalypse it was like that in peacetime, much less now!

Of course, if Tong Hu had such a thought, she wouldn't hesitate to smash his head.

Sister Ye, there are a bunch of mutated dogs on the left. But the situation is weird; you should take a look.

A sentry returned with news. When they heard it, Mo Ye and the others rushed over while the main team remained on the spot.

This was the path that Ye Zhongming agreed on, so they couldn't change it.

They walked for a few minutes before they saw the mutated dogs. But most of them were dead, and the remaining few had fled.

This Did the Life-Taking Carrot do it?

These mutated dogs had turned into dried corpses, and their bodies were grey; their blood and flesh were sucked dry. This fits the features of things killed by the Life-Taking Carrot.

But this place was Linhai's territory, so why would Life-Taking Carrots appear?

Everyone thought back to the earthquake and had a bad feeling.

Yi, another earthquake? Liang Chuyin looked below and felt like the ground was shaking. The moment she said it, the shaking became more intense.

They rushed back, and the shaking was intense when they arrived back at the team.

That What is that?

Someone exclaimed, and everyone looked to see a giant body rising at a corner of the city around a few dozen kilometers away. A fur-like thing was dancing on that body.

Damn! Zhang Dalong cursed, and he smashed his rod on the enemy. The strike hit the enemy, and his head shattered like it was made of glass.

After killing that person, Zhang Dalong waved his weapon to the other side to knock the person getting close back. His chest caved in, and he died before he even landed.

Two kills in a row, but not enough to allow Zhang Dalong to break free from this squad. The people he held hostage had turned on him and surrounded him with these people. Moreover, they heard that he had the secret of the Life Brain, so all these people were excited.

I am hungry, I am hungry.

Zhang Dalong smashed the silver rod on the ground, and an energy wave blew onto the people around. After a few seconds, his body started to change.

A black mist spread from his nose, ears, and mouth and quickly covered his body. His closed eyes suddenly opened, and it was red mixed with black. Two black horns appeared on his head as he spread his hands with long and sharp fingernails out from the mist.

What is that?

Many people were frightened by this thing, and they felt an intense danger.

Seven people stood behind the ground, and when they saw Zhang Dalong transform, a middle-aged man's coat fell, and he walked towards Zhang Dalong.

Ordinary soldiers couldn't handle such a battle, so it was time for the Lei Family head to attack.

But he took a few steps before the city started shaking like an intense earthquake.

After the initial chaos, some sensitive people noticed that it came from one direction. They looked and saw a big body rising from the ground. In a blink, it was a few dozen meters tall!

Move aside!

No! Show me what you are moving, and I will let you pass.

Dont force me to kill you!

You?

The intense fights in front caused Ye Zhongming, who was discussing things with the leaders, to rush over.

The team started to retreat from the tunnels they had dug. Things were smooth at the start, but they noticed some people in front of them after moving for a period.

These people were cunning and had updated news. They found out what Surging Motion was doing. Although they didnt know the exact news, they had been waiting here to try to extort them.

They were good at taking advantage of people and extorting them. They were sure that Surging Motion wouldnt waste time fighting them and would be easy for them to benefit.

Of course, they had to be strong; if not, they would just end up dead.

Actually, they were like those Lanpa waiting beside the dark river.

Ye Zhongming looked at this hundred-strong squad. The leading few werent weak. Two were five-star evolved, and there were ten four-star evolved behind. They were indeed stronger than Surging Motion or Mei Na and Gan Lans squads individually.

Before they could say anything, there was an intense earthquake. Stone started to drop from the tunnels, and a few seconds later, the tunnel, which was a few hundred meters behind them, collapsed. Numerous Life-Taking Carrot vines charged out towards them.

At the same time, a voice spread from the hole above, which appeared after the tunnel collapsed.

I found you!

Chapter 685: The chase

No matter which direction one came from, they saw that slowly rising shadow at the center of Linhai.

At that moment, all lifeforms were shocked.

Although ones size didnt mean anything in the wheel world, bigger evolved lifeforms were usually harder to deal with.

Apart from some silly ones, most of such lifeforms were strong.

When such big things became gigantic, one could be sure they had a high evolution level and were very powerful!

For example, that tree in his last life was so huge that its crown covered the entire city. Looking at it from afar, one would be shocked by its aura. Those beings had formed their own world, and nine-star evolved wouldnt offend them.

This Death King Tree that came up from underground was the same.

The giant stem had the Life Taking Carrot around it. They grew on the thick branches; those soft branches were its twigs, and the hard ones were its branches.

The Life-Taking Carrot was more like the Death King Trees hair. But to humans, these strands of hair were threatening enough.

Apart from those that grew on the trunk, more of these plants had their roots and could move about on the ground. They were quick and popped up from every corner to kill everything they touched and absorb their energy. The energy would be transmitted back to the main body through roots to speed its evolution.

At the same time, many dried corpses appeared from all around. They moved in unison towards one direction.

The zombie horde that entered from one side was the first to bump into the dried corpses. There was a dried corpse nest there, and they surged out.

The Sword Armor Zombie was the boss of the horde and had met many opponents in the past. It bumped into humans, other zombies, monsters, and other lifeforms.

But it had never met such dried things that looked identical. It could sense that they were different from it, but it couldn't pinpoint what the difference was.

But for the zombie horde, one rule had to be followed.

Zombies either joined the horde to become Sword Armors subordinates or would fight until one side was killed.

As for those who weren't the same race there was no other possibility but to fight!

Thus, Sword Armor told them to attack.

What kind of scene was it when six digits of zombies charged? People who hadn't seen it before wouldn't know; those who did at least currently, most of those people are dead.

There were still many dried corpses, over five thousand of them. They would usually be able to sweep Linhai, and no one would dare offend them.

But they met an opponent now.

The dried corpses didn't have much consciousness, and they didn't fear death. But the zombies didn't either.

There were many dried corpses, enough to take over Linhai. But there were more zombies, and they came from outside, so they didn't bother to recognize them as the rulers.

Moreover, compared to the singular fighting style of the dried corpses, the zombies had more variety and were stronger.

Thus, when both groups clashed, the zombie horde only slowed briefly before they drowned the dried corpses.

The battle ended after two minutes without Sword Armor even attacking.

It found an abnormally strong dried corpse and kicked aside one of its subordinates that tried to steal a piece. It tore a piece of its body and shoved it into its mouth.

It chewed before spitting it out. If it still had human consciousness, it would say that it tasted like shit.

This thing had no nutrients for the zombie at all.

Sword Armor and its men, who had spent some time in the wilderness, needed energy, but these things weren't providing it.

But Sword Armor's hunger made its senses sharper. It raised its head and sniffed. It then flew up into the sky. First, it saw that tree appearing from underground, but it didn't entice it at all. It then pointed in a direction before roaring. After which, the zombie horde dashed towards that direction.

It had found a tempting meal!

Ye Zhongming didn't expect the Death King Tree to spot him so quickly. This made him more anxious to flee this place.

Linhai still belonged to that fellow. Tangling with it here wasn't a wise choice.

Under such a situation, with people still blocking his way, Ye Zhongming naturally wouldn't be polite.

A thought rose in his head, and a small figure dashed out from behind him to punch the survivor, who was stretching his neck and looking at Ye Zhongming.

She was also level five evolved, but the silver zombie was much stronger. A hole appeared on the neck of that five-star evolved.

He screamed. That evolved raised his right hand, and a light blade appeared, which sliced toward the silver zombie's head.

But a second figure appeared beside Ye Zhongming, and the puppet smashed that person's knees. That person collapsed to a height similar to the twins. The silver zombie headbutted him, causing his face to cave. The light blade disappeared, and he fell to the ground, twitching intensely.

The silver corpse jumped and bit his neck, sucking large amounts of energy from it.

A five-star evolved was killed like a chicken in front of the twins. The people who were terrified by the Life-Taking Carrot were now silent, and they looked on in disbelief.

Ye Zhongming used his finger. Python God Finger enhanced with Soul Refining Techniques mental attack hit the throat of the other five-star evolved. The finger was only half an inch in, but a hole appeared at the back of his neck. Blood spurted into the crowd, and the warm, salty liquid scattered across their body.

Scram!

Ye Zhongming hollered and led his people out. Those survivors who wanted to threaten them were the ones who turned and fled.

If they fought head-on, Ye Zhongming wouldn't be able to kill a five-star evolved so easily. But these two were standing three meters from him, which was no different from asking to die.

The Life-Taking Carrot got close behind him. After its body appeared on the ground, the Death King Tree also took its first step towards Ye Zhongming.

The chase had officially begun.

Chapter 686: I am not responsible

Why do I feel like you are a little weak?

Gan Lan worked with him to smash some of the Life-Taking Carrots before looking at Ye Zhongming and asking.

Half an hour had passed since the Death King Tree appeared on the ground and spotted Ye Zhongming. This team had already fought two battles with it.

As the Life-Taking Carrots weren't all gathered here, so Ye Zhongming led them to fight and move. Although they had losses but, they weren't trapped. The equipment that the treant led people to protect continued to move.

Sweat started to appear on Ye Zhongming's forehead. When he heard Gan Lan say that, he turned to look at her.

I have a support job, Rhythm Observation.

Gan Lan was in charge of supporting Ye Zhongming in this battle, so she followed beside him.

Ye Zhongming frowned and was slightly shocked.

Such a support job wasn't too useful during low levels. It didn't accurately gauge the outside world situation and the target's changes. But as the job skill got stronger and the user's level increased, this skill became more useful.

In his last life, many people said they would rather have two evolved at the same level fighting than fight one at the same level but with rhythm observation. That showed you how strong this support job was.

Moreover, Ye Zhongming also knew one thing. One of the most threatening assassins in his last life had an assassination and sneaking main job, he also had this support job. He could use this job skill to find the moment when his target was weakest and most careless to attack. His success rate was shocking.

Who knew that this woman actually had such a skill?

This was a good assassin.

But thinking about how she was a fire element job user, Ye Zhongming found it a waste. People with sharp senses would spot this type of person with strong elemental jobs. This was a fatal mistake if she wanted to become an assassin.

I used too much mental energy.

Ye Zhongming gave a simple reply.

He looked to the end of the tunnel, where there were sounds. It should be the Life-Taking Carrot, but it bumped into other survivors this time.

Before escaping back here with the Rainbow Gate, Ye Zhongming went to another place. He left a backup, but until now, he didn't know if that card would work.

He might easily break this situation if all conditions were met and he was lucky.

Of course, this was just a backup, and it wasn't even a trump card. Gan Lan gave him such a thought, which is why he would think about doing that.

The most important thing now was to leave this place and gather with his subordinates.

Honestly, the people around him were too weak. If the Cloud Peak warriors had worked with him, they would have been half a kilometer further.

Ah!

Screams spread from ahead, and Ye Zhongming knew something had gone wrong. He led Gan Lan and me forward. The tunnel that had already been dug was damaged, and an oval-shaped hole formed when the ground above collapsed.

If one stood in this hole, one could see the sky outside.

Ye Zhongming felt a sense of danger about that green liquid seeping from that hole.

Although he didn't know what it was, Ye Zhongming guessed that this was what the Death King Tree used to control and modify dried corpses. So this situation wasn't good.

He looked at the survivor, who screamed but was still pushed into the hole by survivors who failed to stop running. Ye Zhongming noticed that the hole wasn't too steep and that survivors could climb out of it.

Charge up to the ground; it is our only choice!

Ye Zhongming pointed up.

Since they couldn't retreat, this was the only way connecting the underground to the surface.

The entire team started to follow the hole up to the ground.

Half a minute later, someone pointed above and shouted.

Dried corpse!

To people in the underground city, their fear of the Death King Tree and Life-Taking Carrot wasn't as bad as that of dried corpses. After all, the Death King Tree and Life-Taking Carrot threatened them. It was like how nuclear weapons threatened people. The dried corpses were the normal weapons that were killing them.

The group panicked.

There were a thousand of them, but this number was too little compared to the dried corpses.

Seeing how Surging Motion performed so badly previously when they met dried corpses, Ye Zhongming knew that if he didn't do anything, this group that he had gathered together would break down.

Bring them and follow me. Ye Zhongming signaled to Ya Tian.

I will clear an area. Follow us, okay? Ye Zhongming said to the group, I know that you are afraid, but fear can't solve anything. The Death King Tree has gone mad, and it will eat everyone here to evolve to level nine. Apart from charging out, there is no other way to live. We have to risk everything!

I will be at the front, anyone who wants to live, follow me!

He led the twins and the zombies he created to charge up.

When he reached the surface, he saw tens of thousands of dried corpses around the hole.

He jumped on a meter-tall piece of ruins and took a look. Many dried corpses were gathering. If his team couldn't move quickly, they would be trapped if they got surrounded.

There was no other way but to fight. Ye Zhongming jumped off and joined the chaotic battle.

When Ye Zhongming risked his life to survive, a caravan used their mobility to get nearby. A young man stood on the roof and looked around with his binoculars.

Suddenly, something appeared in his sight, and he looked closely before shouting.

Boss, I noticed many dried corpses. They are gathering! Some survivors are trapped there. Yi, why is there a big hole?

Other situations around.

A calm voice spread from inside.

The young man looked around before aiming the binoculars back at the center of Linhai.

Boss, I won't be responsible for what I say next. The young man swallowed his saliva, I think that the Death King Tree's target is this bunch of humans.

Chapter 687: Sky Star Beetle part 1

You

The people at the front of the party shouted, but the caravan didn't seem to be stopping.

Ye Zhongming's eyes turned red.

It was difficult for the team to maintain such a state under the huge pressure of the dried corpses. If a third faction interfered, the team would collapse, and the equipment would be damaged. Liu Zhenghong's research would be obstructed and fail to break through.

This meant Cloud Peak would lose a fierce weapon like the crystal weapons! Look at the status of crystal weapons now and think about how they would lose elite warriors. Ye Zhongming's eyes turned red.

He tried his best and took the risk alone in Linhai. It was okay with Death King Tree plotted against him after all; it was a level eight lifeform and controlled many dried corpses. Who knew how many weird skills it had? The one attack skill it had was also very strong.

But what was happening with this caravan? Did they have enemies here? Did they want to rob them? Or were they just trying to take advantage?

Ye Zhongming might not have had many ways to deal with the dried corpses, but he did have many ways to kill survivors.

The Demon Nurturing Bee Hive appeared, and the Needle Birds flew at the caravan.

The needle birds weren't a big threat to the dried corpses as their poison wasn't lethal, but not to humans. If they got hit in core areas or were poisoned, they would die. At worst, they would lose their ability to fight.

Ye Zhongming didn't care who was stopping him; he would kill the person who was blocking him.

The Needle Bird King was already a level-six lifeform, with many level-five needle birds, the majority of which were level four. The moment they appeared, Ye Zhongming's group was shocked.

There are so many mutated lifeforms with an average level of four! What was their average level? At most three!

Which means that these flying lifeforms were at a higher level than them! They thought back to how strong Ye Zhongming was, and everyone realized that Ye Zhongming alone could kill all of them.

An ear-piercing braking sound spread from the front!

The guy inside had seen the flying beasts.

Cloud Peaks boss! Please stop. We are from Cannibal Chain and have cooperated with your subordinates!

A guy's voice spread. A water barrier appeared above the caravan to block the Needle Birds, but considering how fast it dissipated, it would probably only last a few seconds.

Cannibal Chain? Came to an agreement? Thinking about how his subordinates had entered Linhai, Ye Zhongming hesitated before calling the Needle Birds back.

In the driver's seat, Ruan Xiao looked at the flying beasts returning to the green equipment and sighed in relief.

He was prepared to crush this battle squad even if Ye Zhongming was inside!

The faction that analyzed the Feasting Day the most wasn't these squads trapped in Linhai but Cannibal Chain.

They relied on intel collection and sales and provided services as intermediaries. They were interested in anything that could produce value.

In Linhai, the treasure of the Feasting Day was something that the Cannibal Chain wouldn't give up on. They had scouted this place hundreds of times and also went around to find news.

Why were there so many survivors this time, and why did they know the exact time of Feasting Day? It was because many of them received information about Linhai and the Feasting Day.

Cannibal Chain was the one who spread the news.

They wanted the treasure this time.

The legend of the Life Brain was too attractive, and Ruan Xiao himself was greedy.

For this feasting day, to achieve his goal, he spread the news to attract more people to Linhai. His wishes were for them to be the cannon fodder so that they could fight the Death King Tree, and he could benefit.

Working with the Ying City Alliance was just a lie. Some of the news he gave them was also fake, intended to misdirect them to fight with the Death King Tree.

They had given Ye Zhongming a high evaluation, but he analyzed it. If Ye Zhongming was alone, his subordinates and he could deal with him.

Thus, he got excited when he was sure the Death King Tree was chasing Ye Zhongming. He even felt like things were too simple. He ordered the caravan to drive over. His eyes locked on the black bag that Ye Zhongming carried.

Ruan Xiao knew there was a high chance that the Life Brain was inside. If not, the tree wouldn't be so emotional to chase him.

But although his wishes were good, reality was cruel.

Ye Zhongming summoned many high-level flying beasts with a wave of his hand, the strongest of which was on the same level as Ruan Xiao.

The mutated beasts alone were enough to trouble Cannibal Chain, much less Ye Zhongming, who looked like he was going to kill them.

Ruan Xiao knew he couldn't kill Ye Zhongming under such a situation. Even if he couldn't defeat Cannibal Chain, he could retreat. If he failed to kill him, even if he got the Life Brain, Ruan Xiao would not be confident in facing the guy who would lead Ying City to take revenge.

Then, everything would be meaningless.

Ruan Xiao wasn't a stubborn old man with a clear merchant's mind. He would change his thoughts when he realized things weren't going well.

One had to say that he was a person that could adapt.

Since he couldn't defeat them, then he shall work together. It wasn't much. If he had a chance, he could still change sides.

Your men and ours entered Linhai and didn't use this direction. I will bring you to meet with them! Ruan Xiao jumped out of the car and raised his hands as he walked over.

I am a partner, and your subordinates will agree, " Ruan Xiao said, then looked at the dried corpses still attacking them and the Death King Tree rushing over. He said solemnly, But I think you need my help now!

He waved to the back. Hundreds of warriors jumped out of the caravan, all holding guns. They started to fire at the dried corpses.

To show you my sincerity, Boss Ye, I am willing to help you deal with that fellow for free. But you would have to pay the next time.

Ruan Xiao smiled and took out a small box. He opened it calmly, and a dozen finger-sized bugs flew out. They had long feelers that were a mix of white and black and wore bright black armor.

The enemy of trees-- Sky Star Beetle!

Chapter 687.5- Sky Star Beetle part 2

Before the dried corpses gathered in scale, they couldn't cause much of a threat to Ye Zhongming.

But he needed to clear some space so that the team could charge up. This was different from other fights.

He crafted one more Moon Edge and sliced the dried corpses around. He was then able to take a few steps.

Moreover, dried corpses would push back at places he wasn't attacking, forcing him to attack those at the side.

Initially, this situation was still good when the twins were beside him. But when they had to expand the room, the situation got worse.

He used several job skills and reduced the dried corpses around.

At this time, the team started to jump out of the hole, but the area they cleared was around a hundred square meters. This space was not enough.

Fortunately, the treant and his dried corpses climbed up to help reduce the pressure.

He observed the path ahead and decided to make some changes.

He sent some information to the silver zombie and gathered the iron zombies together.

As the twins could control the iron zombies, they gathered quickly and started charging in one direction.

The Dried corpses led by the treant and some warriors filled the gaps they left.

With a few strong evolved as the anchors, the team entered a defensive state. Only the twins and their iron zombie horde were attacking.

They charged around the dried corpses and, after a certain distance, moved toward Ye Zhongming.

The dried corpses weren't too strong. Once the iron zombies stirred them up, they started to show chaos. Some went to surround them to try to destroy them, while some continued to charge at Ye Zhongming and the others. This reduced the strength of their attacks.

Ye Zhongming felt the pressure was reduced and started to lead them to a counterattack. They began to pincer and wipe out many dried corpses.

This allowed them to clear more space.

But Ye Zhongming knew that this wouldn't solve the root cause. He was just using the death of iron zombies to trade for more space.

Seeing that most of them were up, he led them to flee in a specified direction.

The battle hadn't stopped, and the team continued to kill dried corpses. However, more of them came, and the pressure increased.

The dried corpses couldn't do much to this team yet as Ye Zhongming, the twins, and the treant were there. The defensive line looked like it was on the verge of collapse, but it didn't.

Life-Taking Carrot appeared!

The people at the back panicked. Those vines had climbed out and were chasing them.

The dried corpses have finished gathering there!

Mei Na pointed out that tens of thousands of dried corpses were there, and they were moving toward the front of the team.

Ye Zhongming frowned, and he knew that the Death King Tree was in control. His target of getting out was easily guessed, so the Death King Tree was prepared.

Right when he was thinking about the Death King Tree, that fellow seemed like it wanted to show its presence. It screamed, and the vines at the back stopped. The roots stretched to the bottom of that hole and absorbed the green liquid. The leaves started to wrap and become thin and long tubes that stabbed the brains of the dried corpses nearby.

Through the vines, the sticky liquid was being injected into their bodies.

Everyone looked on in shock as those dried bodies turned green and their aura strengthened. Some of them started to change and had weapons appear.

Death King Tree used a method humans couldn't understand to create two thousand strengthened dried corpses.

The vines that completed all this shriveled. Those strengthened, dried corpses roared before charging at him.

I Block! The treant struggled to speak. He controlled the dried corpses to face off against them. The treant could tell that his dried corpses weren't as strong as Ye Zhongming's zombies. Be it his current position or to test those strengthened dried corpses out, his dried corpses were more suited to fight them.

The two groups clashed. There was no blood and no screams, just the sound of limbs flying.

After Ye Zhongming and the twins wiped out many of his dried corpses, the remaining ones were quite strong just that there weren't too many. Although they didn't collapse, they suffered more losses than the strengthened, dried corpse side.

Ye Zhongming took a look and knew that the treant's subordinates wouldn't hold on for long.

The sky dimmed, and he saw a green mist when he raised his head. His heart sank.

Although it wasn't as thick as underground, this was the channeling of World Nature.

The Death King Tree would use this skill again to prevent him from leaving.

Ye Zhongming had experienced this before, and some wounds weren't healed.

This team would die here if the skill were half as strong as before.

When he was worried, a caravan appeared and headed right for them.

Chapter 688: Doing something in the meantime

There was still a huge team that hadn't entered Linhai.

Zhao Xingmei, Bai Feng, and the other Ying City leaders stood outside the city and looked at the figure who was going crazy.

Everyone knew that the figure that seemed small to them here was huge and probably around a hundred meters tall.

Putting it more objectively, it was around 30 stories in height!

This height was gigantic for humans.

Even a dumb person would know it was the Death King Tree, and that fellow was going crazy in the city.

Cloud Peak informed them before they left and told them to assist them from the outside. But everyone knew that was because it was too risky to head in, and even Cloud Peak themselves weren't confident.

Moreover, these higher-ups knew it had been some time since Ye Zhongming entered Linhai. He hadn't come out. Cloud Peak entered to search for him. Naturally, they wouldn't allow others to interfere in this matter. After all, Cloud Peak was Cloud Peak, and Ying City was Ying City. Even if both sides worked well with each other, they weren't the same faction, and although their interests were linked, there were still reasons for that.

These bosses didn't think much about Cloud Peak's lack of trust in them, and they felt like it was normal. After all, everyone worked together because of Ye Zhongming. If anything happened to him, they would have to reconsider their relationship.

Now, everyone had a tough choice to make.

Should they enter Linhai, take a huge risk, and even be prepared to risk their lives to fight that fellow to search for and probably save Ye Zhongming?

Or should they stay here? On the surface, they were listening to Cloud Peak's instructions, but in truth, they were just standing aside when that guy needed their help.

Boss Bai, what do you think this time?

Zhao Xingmei squinted her beautiful eyes and saw Bai Feng, who had his arms crossed. At the same time, she looked at the other faction bosses.

When looking at the Death King Tree, Bai Feng was in a daze, and only after a short while did he say, I am going to enter.

Why are you so decisive this time?

Zhao Xingmei looked at Linhai and casually asked.

Although the other bosses didn't say anything, they still listened closely. These two factions were the strongest, and their leaders' decisions affected them.

Because I have fallen behind.

Bai Feng's tone was a little sad.

Zhao Xingmei was stunned by that sudden sentence, but she understood what he meant.

Cloud Peak's core member evolution level had reached five stars. Bai Feng and the other Ying City bosses were only five-star.

In other words, if Bai Feng and the others joined Cloud Peak, they wouldn't be core members. They would, at most, be team captains.

This difference forced him, originally the top in Ying City, to lower his head.

We get many benefits by following Boss Ye. Look at our equipment, it is far better than before. We also gained a lot of demon crystals, and many people have evolved because of that.

But we aren't from Cloud Peak. The core things won't come to us.

Bai Feng took out Cloud Peaks first-generation demon crystal gun and shook it, I am not being jealous or angry. On the contrary, I am envious. If we were in their position, we would do far worse than them.

Have you all noticed? We are already used to getting benefits behind them. Although we will risk our lives, we aren't facing real danger. Many people have already forgotten what it was like to be unable to fall asleep because it is just too safe being with Cloud Peak.

Bai Feng laughed self-mockingly, But they are moving too quickly, and I can't catch up.

This is a chance to help them when they need us. After this, we can speak terms with Boss Ye. Although we have to risk our lives, there is no free lunch, right?

So, I want to take the gamble. If it works, I will request to purchase evolution potions from Boss Ye. I hope to purchase all of Renxing Battle Squads potions from Boss Ye if possible.

Bai Feng didn't say everything he planned, but that was nearly it. The only thing he hid was that after spending all this time, Bai Feng guessed that Ye Zhongming had a way to raise the success rate of the wheel. If not, he wouldn't have been able to get so many potions.

Since that was the case, purchasing potions from Cloud Peak would be simpler, and they might even get a discount. Even if it wasn't huge, but it was still a sizeable saving.

But Bai Feng knew that Cloud Peak and Ye Zhongming wouldn't give him all that for no reason. He needed a chance, and this was the perfect opportunity if he entered Linhai now to help them.

He said so much to persuade these people, especially Zhao Xingmei, to act with him. This would make things safer, and their chances of succeeding would greatly increase.

As expected, many people were tempted after hearing Bai Feng say so much.

I think Boss Bai is right. Zhao Xingmei adjusted her collar, I am really jealous of those few women in Cloud Peak. Look at what they use and wear, and look at what we use and wear. The gap is huge. Aren't they forcing me to be a mistress?

After that joke, a look of determination and seriousness appeared on her face.

A mistress still has to work hard in this day and age!

The Ying City Alliance entered Linhai half an hour after the Death King Tree appeared!

Sky Star Beetle can secrete a very strong poison that can cause the mutated plants to wither and die. We tested. One of these small things can cause a level four plant to die right away and cause a level five plant to wither. Level six plants will numb and enter a confused state.

Although we hadn't used it on level seven plants, it should be effective. Ruan Xiao released these unassuming level-one mutated lifeforms. They flew into the sky toward the Death King Tree.

The Death King Tree should be level eight; I can't ensure these ten would kill it, but to cause it some pain, bad feelings would be possible.

At this time, the Cannibal Chain firepower on the main battlefield was being shone. Their accurate shooting and abundant ammo suppressed the dried corpses away. This gave Ye Zhongming's team some breathing room.

He looked at the twins and smiled at Ye Zhongming, The problem is here. When this big fellow is in a negative state, Bss Ye, what do you want to do?

Continue to flee Or take the chance to do something big?

Chapter 689: Surrounded

The green gas from World Nature became thicker and thicker, covering a large part of Linhai. When many fleeing survivors looked into the sky, they didnt know what it was.

That water barrier was five intensity. If needed, I can adjust it to 78 at most.

Ye Zhongming was stunned when he heard Ruan Xiao say that.

This Cannibal Chain leaders point was obvious. He knew the green mist was the Death King Trees attack skill. From Ye Zhongmings slight expression change, he also guessed his fear of the green gas.

This observation skill and judgment made Ye Zhongming wary.

Clear Sky Lake, it is my strong defensive equipment. I hope it helps you.

Ye Zhongming rolled his eyes and felt uncomfortable at how this Cannibal Chain boss was speaking.

But he started to think quickly. He evaluated the difference between the barrier at level five intensity and the one being attacked by the Needle Birds at 78 intensity.

This concerned whether or not it could block the Death King Trees World Nature.

It needs at least gold grade. Is your equipment strong enough?

Ye Zhongming pointed at the gas while looking at Ruan Xiao.

His expression changed, and he nodded, It would be taxing, but it should be possible, but

You know that I am a businessman.

As the dried corpses around were cleared, they had space to talk. The team around started to rest and prepare for the next operation.

Since you are a merchant, then we can talk about anything?

As long as the price can tempt me, I can even pick up the soap for you.

Then, three points!

The two of them spoke quickly. Ye Zhongming raised three fingers, One, my subordinates will come over.

It isnt hard to inform them. Ruan Xiao nodded. This wasnt a problem for him.

Two, your Clear Sky Lake needs to listen to my orders even if it gets destroyed in the end.

That requirement was quite strict. He frowned and hesitated on how to reply.

The reason why I am still here is because you have this equipment.

He didnt have to say much and felt like it was enough for Ruan Xiao to decide.

Okay!

He was biting his teeth as he agreed. This was his best equipment, and it took up half of what he had.

But the price I want won't be low.

Ruan Xiao was gritting his teeth as he said.

Ye Zhongming shrugged, Three, many people came to Linhai, right? Convince them to work with me.

Ruan Xiao had expected the first two points, but this third one was unexpected. He also didn't understand.

Work together? What do you mean? He was hiring them to risk their lives for him in such a situation. He would pay them money. Even so, things won't be easy. Everyone craved treasures so they would feel like they could be lucky. As long as such a mentality existed, getting them to work together would be hard. Even if they agreed, you wouldn't know if it was real or fake.

Not only that, but the payment was also a problem. The price would definitely be high today. To an extent, he was giving people a chance to extort him. Didn't Ruan Xiao do the same after realizing he couldn't deal with Ye Zhongming?

Also, Ruan Xiao didn't understand. Even if Cannibal Chain used their familiar methods to connect the evolved here together, what did Ye Zhongming want to do? With so many people, he had to pay a high price, so what would he get in return?

But if that were the case, Cannibal Chain would definitely get many more benefits.

I agree!

Ruan Xiao was the Southeast Region manager of Cannibal Chain, one of the five heads, and he was decisive.

Use flames!

He hadn't discussed the price with Ye Zhongming. He took the Message Fireworks that he got from a wheel. He wrote a few words on the smooth empty area, and a moment later, a bright-colored flame lit in the sky. It also formed a few words Cloud Peak, come here. Ye.

One four-star potion. Ruan Xiao said.

Ye Zhongming pouted, This money was easily earned.

To have such a thing when you need it is an ability in itself. Ruan Xiao replied

The Death King Tree continued to rush over. Any buildings in front of it would collapse from its branches. Many dried corpses and a Life-Taking Carrot appeared in front of everyone. Each time they appeared, they got closer.

I can send people to contact the others, but the price Ruan Xiao saw that Ye Zhongming was silent. He smiled and asked Ye Zhongming what price he could give.

If there are more than 200 warriors, you will get six bottles of four-star potion. If it doesn't reach 200, then three bottles. If there are over five hundred, I will give 12 bottles. If there are over a thousand, one five-star evolution potion!

Ye Zhongming told Ruan Xiao, I will give them to you directly. You decide what you give the others.

Wow, very generous, but I like it. Ruan Xiao smiled brightly. He saw a huge opportunity here as the middleman.

After the battle, I will also pay the factions based on the number of sacrificed evolved and their levels.

As for your Clear Sky Lake, it should be an energy equipment, right? Although I don't know what its energy source is, two five-star evolution potions. One for using it and one for damaging it. If it is destroyed, I will pay you one six-star potion.

No, this is gold equipment; it is the top equipment in the entire apocalypse. Is it only worth one six-star potion?

Ruan Xiao knew this price was reasonable but couldn't say that to Ye Zhongming. He had to raise the payment.

Ye Zhongming blinked, Manager Ruan, actually, you made a mistake.

Ruan Xiao was stunned, and he frowned, What mistake?

You revealed your best item too early. And I can actually snatch it.

I admit that maybe I can't do anything to you, but you might not be strong enough to snatch my things.

Ruan Xiao smiled, but his gaze was ice cold.

What about with them? Ye Zhongming raised his chin. Ruan Xiao turned around and saw a squad in full silver equipment appear in his vision. Although they were a distance away, they were rushing over. At the front was a majestic golden dog! It was Cloud Peak that was called over by the fireworks!

I have to thank you. Ye Zhongming smiled.

Ruan Xiao felt frustrated and only nodded after a while.

Then I will contact the others; Boss Ye, wait here. Ruan Xiao adjusted his mood and prepared to leave. He took two steps before turning around.

Why is Boss Ye contacting so many people?

Ye Zhongming pointed at the Death King Tree, To surround it.

Ruan Xiao stumbled.

Chapter 690: The enemy noticed

Yellow Ball cried a little and pounced at Ye Zhongming. It stretched its tongue and wanted to lick its Master.

As usual, Ye Zhongming pushed its head to the side. This huge fellow could only wag its tail to show that it was still the Masters good dog.

Shortly behind Yellow Ball was Liang Chuyin, who had the Wind Dancer job and had reached six-star evolved. The influencers eyes were red. She stopped beside Ye Zhongming. She looked around and saw that there were no issues before relaxing. She kicked Yellow Ball aside before hugging him and kissing him.

After this short process, they had a friendly but close conversation.

Influencer, this isnt your style.

This has always been my style; I was afraid you would be sacred.

Then I wont be scared now?

Who cares? If I am not more proactive now, you will go through too many hands!

Is it even okay for you to speak to me like that?

Who even cares? After this ends, you better climb into my bed. If not, you can forget about climbing into anyone elses.

...

Anyways, if you dont do it with me, I will do it with you!

Her face turned red. She moved to the side, leaving Ye Zhongming coughing there.

Next was Xia Bai. She wore a mask, and no one could see her expression. She probably wouldnt have any expression in front of so many. She just looked at him before standing behind him. She was loyal and followed her responsibility. But Ye Zhongming could sense that she was unhappy that he didnt bring her in. But due to her absolute loyalty to him, she just didnt mention it.

Next were Littel Tiger, Tong Hu, Ah Yang, etc, who asked if he was fine.

Ye Zhongmign greeted all of them. He smiled at Mo Ye, who was at the back of the group. Previously, he was only 10% confident, but suddenly, he was 30% confident.

It felt fantastic that his group was beside him!

Cloud Peaks appearance shocked the Linhai people.

First, there was that level six battle beast that everyone would pay attention to. Then, there was Xia Bais thick killing intent, which everyone knew was not someone to be trifled with.

Some people here had seen Linhais strongest Lin Xing before. This persons aura was strong, too, but they had never felt such killing intent. Many guessed what this level of this woman who wore a mask and held a scythe was.

After the initial shock, it was Cloud Peaks eye-catching silver equipment.

All of them had silver equipment, each with at least three pieces. Those at the front were core members, and some had more than six pieces!

What kind of concept was that? In other words, the number of silver equipment they had was probably many times what those in Linhai had now.

Some of the core members had green equipment, and some even had sets, which Linhai had never seen before.

Ye Zhongming had already given them a deep impression previously that had reached the level of Lin Xing.

But when they saw his subordinates, they realized that he was not only strong himself, his subordinates were strong too. Lin Xing's men couldn't compare to them; the equipment alone was very different!

Many people noticed that there were over three digits worth of five-star evolved!

If you added the entire Linhai together, there wouldn't have been this many!

Five-star evolved were faction leaders in Linhai but they were just team captains here.

This difference was huge!

A battle squad was stronger than an entire city. This sudden reality was something many people couldn't accept.

This was Ye Zhongming's support? They weren't just strong; they were pretty much overpowered.

Yang Yixi, Mei Na, and Gan Lan looked at one another and saw the shock in each other's eyes. They couldn't imagine what kind of status Ye Zhongming had outside. But now, it was a good thing for them. With their help, their chance of leaving greatly increased.

The treant was excited. After all, he had agreed to head to his faction to see Liu Zhenghong. Naturally, it would be better if his battle squad was strong.

Boss, what is the plan?

Little Tiger was anxious and asked Ye Zhongming what he wanted to do. The entire Linhai was in chaos, and Cloud Peak was excited.

They loved to fight.

Send people to move these equipment outside. These are what Sister Liu wants, so we must treat them seriously.

Ye Zhongming said it to Mo Ye. She nodded and sent a team to ship these out.

No matter what, they had to protect these. As long as these were protected, their mission in Linhai was completed.

Ye Zhongming didn't follow. Most of the dried corpses wouldn't target that group, so they would be relatively safe.

The others, follow me To kill it!

Ye Zhongming looked towards the Death King Tree.

Zhang Dalong stood up, and his mouth was covered in blood.

Hundreds of corpses surrounded him in the center.

Since the Death King Tree emerged, those people and big families were drawn away. Zhang Dalong had been searching for human evolved.

He needed to replenish energy to maintain his transformed state.

His job was very strong, and he was satisfied with it.

This was until he met Ye Zhongming and Cloud Peak. He failed in the battle and was forced to leave and find a new way.

The world wouldn't push you to a corner. After he killed a protector beast, he gained a new bloodline that increased his strength!

But this bloodline had a long cooldown that could be reduced by eating human meat. After activating it, you could use blood to extend the time and increase the power. This power would slowly dissipate. To maintain it, you had to eat people.

He finished those subordinates from the jail.

He also gained other things like a recipe that didn't need the specific job. It recorded a way to have a second life. Moreover, both lives could stack strength. It was Aery Essence Water!

The core material was the essence vein of a plant, where the crystal was connected to the main body. The higher the level, the better the water's effect.

Zhang Dalong targeted the Death King Tree.

But before he could make a move, he needed to eat more people and get more energy.

A firework lit up the sky, and his eyes opened wide!

Cloud Peak? Ye?
