

Apocalypse 711

Chapter 711: Settling recipe

There weren't many humans remaining on the ground. Many went to the underground city to search for the Death King Tree. Some Ying City Alliance members even asked Ye Zhongming for permission before entering. After all, even if they couldn't find the Death King Tree, there were many valuable things underground, and they could pick up scraps.

But Cloud Peak didn't go; they cleaned up the battlefield instead.

The dried corpses had exploded, so they were useless. However, some of the half-dried corpses had some energy and could be used as materials.

Many dead humans also left some excellent items. Cloud Peak selected those they needed and gave the rest to Ying City and the other survivors who didn't go to the underground city.

They risked their lives to assist Cloud Peak, which won their trust.

Ye Zhongming ordered the collection of four types of items. The first was the pipes the Death King Tree used to control the dried corpses. The second was the Life-Taking Carrots or branches around the city. The third was the flower pieces. The last were the four giant flowers that Ying City Alliance had spotted at the city's four corners.

As for the Death King Tree's main body, Ye Zhongming led his people to break it down.

The body of a level eight lifeform close to reaching level nine was precious. This was one of the most valuable materials that Ye Zhongming had received to date. The only things that could compare to it would be the Ghost Metal, Ocean Drill Metal, and Four Element Power.

Moreover, Ye Zhongming's Gardener job might allow him to gain unexpectedly from the body of the Death King Tree.

Ye Zhongming looked at it for a long time. After he had considered it, he told the rest to split it into two areas.

Zhongming, look at this.

Mo Ye sent people to set up a sentry before walking beside Ye Zhongming. She passed him something. He realized that it was an exquisite sac.

It came from Zhang Dalong; it should be space equipment.

After Mo Ye killed Zhang Dalong, she found what Zhang Dalong was bragging about and carried it with her.

This surprised Ye Zhongming.

Although space equipment was unique equipment that others couldn't open, Ye Zhongming was a smith. In his last life, he heard people talking about space equipment.

If he couldn't open the sac, then it would be useless. So he just tested on it without fear of breaking it.

He strengthened this thing along with his space crystal.

A light flashed, and the two pieces of equipment merged. The space crystal was the main body combined with the space sac.

Ye Zhongming realized that the space inside had increased, and there were more things.

He raised his brows. It seemed like those rumors were true. Smiths could use higher-grade space equipment to merge with lower-grade ones to unlock other peoples space equipment. This was called space unlocking.

It would increase the capacity, making it easier for Ye Zhongming to carry things in the future. He also gained Zhang Dalongs items, which shocked Ye Zhongming.

First were demon crystals. There were two thousand of them; a thousand were from the first three levels; apart from that, there were 600 level four, 200 level five, and 10 level six.

Maybe this wasnt much for someone rich like Ye Zhongming, but this number and their levels were a huge fortune to others.

It seemed like he robbed others. If not, he wouldnt have been able to collect so many alone while still having to evolve.

Apart from demon crystals, there were evolution potions. There werent many, and their levels werent high either. The best were two four-star potions, a dozen three-star potions, and many one- and two-star potions.

Other equipment was also present, but he didnt care about it. He tossed some items on the ground and planned to use them to pay those who helped. He also kept some materials.

There were no job advancement scrolls, skill scrolls, or job scrolls that Ye Zhongming hoped to see. That was normal; if there were any, Zhang Dalong would have used them.

But two things excited Ye Zhongming.

One was the Unsealing Liquid. This was the other way to upgrade a piece of equipment apart from the upgrade scroll. Strictly speaking, this was the most common way.

Zhang Dalongs liquid was of a basic grade and could only work on grey and white equipment.

The second was a recipe. He opened it, and there was one line-- Alli Essence!

Something that Ye Zhongming had never heard of.

He took a close look and knew why Zhang Dalong was here. He also knew that this would be his biggest gain if he didnt bump into anything shocking today.

Alli Essence: After using it, obtain a second life. The second life will have two states. When unactivated, obtain a 10-30% stat buff (based on essence level). After activating, the stats will disappear and help block one fatal attack.

After blocking, it would enter a 500-day cooldown time. This recipe is a one-time use with a 100% success rate.

The so-called fixed recipe meant that it was a blueprint itself. You would place the required materials on it, and it would help merge them all.

They were all one-time use and would disappear after.

Of course, this also meant that the item created would be of top quality.

If he created this essence, it would mean a huge increase in strength, not to mention one more life. The stats alone would make him invincible at his current evolution level.

Ye Zhongming couldn't imagine where Zhang Dalong got this recipe that was of similar value to an eight-star potion.

Moreover, he also had the essence that the recipe needed.

The Death King Tree took the demon crystal and face away, but the part connected to the crystal was still on the main body. Although he didn't know how much energy was left, there should still be a lot.

Ye Zhongming was delighted when he saw the materials that Zhang Dalong had left. He was really a gift giver.

He took out the materials and planned to craft the Alli Essence.

At this point, some subordinates hurried back and gave Ye Zhongming two pieces of news.

Chapter 712: Cleaning up

He looked at many corpses, and he finally confirmed that these people were killed by the Roselle Cedar that he nurtured.

No wonder it was much bigger and stronger when he saw it. When it was waiting for the opportunity, it had started killing here.

Although the Roselle Cedar was of great help to Ye Zhongming at the crucial moment, without it, Ye Zhongming might be facing a level-nine lifeform now.

But Ye Zhongming had never received a request from anything that happened here. The Roselle Cedar didn't even tell him that it had killed so many.

This made Ye Zhongming wary of the Intelligence Mark, which could give mutated plants intermediate intelligence.

Right, intelligence. This phrase not only meant that they could complete his orders perfectly, but it also meant that they had their own minds and would do things independently.

For example Feed.

Ye Zhongming didn't order it not to eat or attack humans; he told it to wait for his orders. But the Death King Tree went out to hunt on its own. This was no different from going against his orders.

It seemed like even when the cooldown on this skill was up, he couldn't use it easily. Even if he did, he had to give it more comprehensive orders to prevent accidents from happening.

The Cannibal Alliance recognized that these people were a family that entered Linhai. Their surnames were Tang, and all of them died here.

Mo Ye asked about and told Ye Zhongming about the situation.

He nodded, Tell the brothers to clear the battlefield. Their items are decent.

The big family that entered Linhai behind the zombie horde and wanted to take advantage was sneak attacked by a mutated plant with weird abilities. Their whole army was wiped out.

The zombies are still here, but as we dont dare to get too close, we cant scout what is inside that tall building.

This was the second news that he got. The zombie horde was in the city; for some reason, they surrounded the ruins of a high building. Some of the zombies had entered, and the rest were outside. They didnt even leave this place during the battle against the Death King Tree.

After learning about this, everyone felt fortunate. If this zombie horde came to start trouble, it would add an unknown sense of danger to the battle.

Monitor them. I want to know the moment they move.

After giving the instructions, Ye Zhongming led people back to where they fought. Cloud Peak had cleared most of it. As the Death King Tree was huge, the materials were piled into many mountains.

Ye Zhongming tossed them into the Gate of Sacrifice.

Ye Zhongming didnt sacrifice the flower pieces, as he was interested in them. He planned to bring them back with the four giant flowers and allow Liu Zhenghong to study them. If he could replicate this thing like a piece of equipment, he would get rich. It was much stronger than Ruan Xiaos Clear Sky Lake. It would at least be a piece of purple equipment.

At this point, the people who went to search for the four big flowers were back and one of them lost members.

After asking, he discovered they had bumped into a team that controlled the flower. Cloud Peak decided to fight for it. Both sides clashed. Cloud Peak lost two members, but they wiped out the other squads, which had a few dozen people.

Ye Zhongming didnt say anything and didnt feel like his people did anything wrong. Strength was king; that was the rule of the apocalypse.

After two hours, those who went to the underground city returned, bringing back news that they had lost the Death King Trees main body. This fellow had escaped.

Ye Zhongming expected this outcome, so he wasnt surprised.

He saw that they brought back branches and materials left by the Death King Tree, so he started his business. He traded equipment and crystals for these things.

Ying City Alliance knew about Ye Zhongmings habit of collecting materials, so they didnt let them go when they found them in the underground city. Now that Ye Zhongming had asked for them, they had sent their materials over.

With them taking the lead, many others followed.

Ye Zhongmings subordinates might have killed dozens to steal their stuff, but when it came to trading, Ye Zhongming and Cloud Peak were very trustworthy. This good reputation would bring them many benefits in the future.

Ruan Xiao was back, and his expression was bad. He wanted to get rich. He did get some things, but they were far fewer than what he expected.

Moreover, when he realized that the level eight Death King Trees body was valuable, it was too late. Cloud Peak had controlled it.

After witnessing Cloud Peaks strength, he wasnt confident in challenging them.

Of course, Ye Zhongming owed him money. Thinking about how he could get rich made him feel much better.

But Ye Zhongming told him they would settle it once they left Linhai.

Although Ye Zhongming had collected some Death King Tree materials in the underground city, that was only a portion. These people collected from the entire underground city. After realizing Cloud Peaks reasonable price, Ye Zhongmings purchasing was very popular.

But Ye Zhongming looked at the situation and decided not to trade here as there were too many people. It would probably take more than a day. Now that there was a ten thousand zombie horde nearby and the hiding Death King Tree, it was too risky. He ordered them to head out of the city first.

The human army followed him out and gathered before Cloud Peaks camp. The trading market was then officially opened.

Of course, it was mainly Cloud Peak purchasing their materials.

There seemed to be a lot, but actually, Cloud Peak didnt spend too much. Cloud Peak got the bodies of the dead evolved. Along with Ye Zhongming crafting some equipment, it was enough to collect all the materials.

Even if it was very busy, the trades took just a day. There was much news that the zombie horde had stopped gathering at the ruins and had started fighting humans to eat them. Cloud Peak took the chance to scout that building and saw that there was the liquid left by the Death King Tree.

Was it useful for zombies? Ye Zhongming was curious, but he did not know the answer.

Once the trade was over, he kept some useful materials before sacrificing the rest.

He looked at the energy level and decided to activate it.

A golden light shot into the sky. Many people knew that this light actually came from Cloud Peak. Many of them were curious and wanted to find out what it was. But naturally, they didnt get any answer.

Once Ye Zhongming was out, Ruan Xiao came to ask for his debts.

Wait, I will go get potions for you. Ye Zhongming smiled and entered Linhai alone once again.

Chapter 713: Explosive Sac

Ruan Xiao asked Ye Zhongming what he meant, but when he saw that Cloud Peaks squad had started to gather, he didnt say what he wanted.

He reflected on Cloud Peaks good reputation and placed his worry down.

Since the boss mentioned that, he shouldnt lie to himself, so he would just wait.

Ye Zhongming entered Linhai and ran in a direction. Cloud Peak monitored the zombie hordes direction so he knew where they were.

Without Life Taking Carrot, without mutated lifeforms, Ye Zhongming could find them in half an hour. They were near to the Death King Tree battlefield. They ate the remaining human corpses.

The horde quickly found Ye Zhongming, as this human didnt plan to hide.

The lowest evolution level here was level three; level four zombies took up half of the horde. There were thousands of level five. Some of Sword Armors core members were level six. Sword Armor itself was a rare level seven lifeform!

There were over ten thousand of them, and their average level was level four. Sword Armors horde had never met a target they couldnt defeat. Death King Tree put them under huge pressure, and as such, they didnt like that plant. Along with the liquid attracting them, they avoided that fight.

The scent of blood after the battle caused them to continue roaming the city to consume this easy-to-get food. Moreover, they had picked up the scent of many alive humans and were rushing over to get a full meal.

This was until they saw that lone human.

With simple intellect and a stable evolution level, the zombie horde didnt charge over immediately when they noticed him. They observed him, especially those high-level zombies who didnt understand this abnormal behavior.

To date, no human dared to provoke them head-on.

Ye Zhongming understood this.

Not to mention himself, even if he led the entire Cloud Peak, he didnt want to deal with this horde. Maybe Cloud Peak could win, but they would lose more than half of their team, including half of the core members.

Ye Zhongming wasnt a fool, and he wouldnt do that.

Cloud Peak had very few warriors here, so he would ignore these terrifying zombies unless he had no choice.

But he obtained something.

He obtained an A Grade box after placing the Death King Trees materials into the Gate of Sacrifice.

Although it was a small one, after getting the Nature Soul Essence previously, he looked forward to what was inside.

He was holding this thing and standing before the hundred-thousand-strong horde.

Although some of them had high levels, they were still zombies. They couldnt resist the urge of human flesh. Moreover, Ye Zhongmings evolution level gave off a greater attraction.

Thus, they charged.

Zombies werent dried corpses. As their evolution levels increased, they became more agile and nimblethey moved like lightning.

Ye Zhongming looked at them for a few seconds before tossing something at them before turning and running.

This thing was eye-catching in the night. It gave off a gentle green light, and it attracted their eyes. They looked towards this thing that was flying toward the horde.

Sword Armor screamed, and it leaped out from the horde. It used its bone wings to strike the item. It felt a lethal threat from above.

Po!

There was a slight sound, like a playful kid bursting a bubble. This thing exploded.

In the next second, a green light expanded and wrapped the zombies inside.

The entire Linhai shook!

Ye Zhongming felt a strong energy wave. He didn't even turn his head and continued to run away with his fastest speed. With his strength, he left an afterimage on the empty Linhai streets.

The ripples stopped, and the energy wave just barely missed Ye Zhongming. He turned to look behind him.

A few meters deep hole appeared where the horde was. The horde was turned into corpse pieces that were spread around the hole. Some zombies that hadn't fully died twitched before their movements stopped.

Ye Zhongming returned to the hole and sighed when he looked at the situation.

It was Too strong!

Explosive Sac!

This was the treasure in the box.

The introduction of this thing was really simple; at first, Ye Zhongming didn't care much about it. He thought that he was unlucky and didn't get anything useful. It only wrote that it was a bomb, and a series of numbers represented its strength.

Ye Zhongming didn't understand and just wanted to give it a try. He intended for it to kill a few thousand of them. He would then draw the horde away, and when he returned, he could get a small fortune.

But when he tossed it out, he felt a sense of danger, so he started to flee. Looking at this giant hole and the shattered buildings around, he knew that running was a wise choice.

A figure stumbled up in the center of the hole. It fell twice, but it still tried to climb up.

Ye Zhongming walked over and saw Sword Armor on the verge of death.

He was once again impressed by the Explosive Sac.

Sword Armor was a famous mutated zombie. Although it was only level seven, its combat strength was really high. Ye Zhongming would find it hard to deal with it alone and probably needed Xia Bai to win without any injuries. The situation wouldn't be very good if he fought this horde.

Fortunately, everything was solved easily.

Moon Edge sliced off its head. This level seven zombie couldn't even use any of its strength and died just like that.

When Cloud Peak warriors followed Ye Zhongming's instructions before he left to find him, they were shocked by the scene.

They saw Hundred thousand demon crystals!

Chapter 714: Gains

Ruan Xiao sighed when he saw Cloud Peak leave.

Cannibal Chain focused on buying and selling information and were very sensitive to everything that happened around them. Moreover, they had many methods of getting information. When Ye Zhongming and Cloud Peak struck, Ruan Xiao sent some scouts.

They weren't scout troops but a piece of high-tech equipment they got from the wheel. It was a fingernail-sized drone with an HD camera that could transmit pictures.

Such equipment wasn't rare, but the ones from the wheel were more functional and better to use.

Using this equipment, Ruan Xiao saw what had happened.

He couldn't keep up with Ye Zhongming, so he didn't see how the guy killed those zombies. But it was probably related to that violent explosion. Ruan Xiao only saw Cloud Peak cleaning up the battlefield.

More accurately, they were just picking up money.

Through the scenes the drone transmitted, Ruan Xiao estimated that Ye Zhongming had killed the horde quickly and that Cloud Peak had obtained at least 100 thousand demon crystals.

Even after a night, this number still appeared in his head. Thinking about it, his heart raced.

That was so much money!

This didn't include the materials themselves. Those things were as valuable as the demon crystals. Even if many were destroyed, more than half remained!

Ruan Xiao envied Ye Zhongming previously, but that envy now had a bit of fear.

He feared him.

As one of the heads of Cannibal Chain, he controlled hundreds of information points and tens of thousands of people. He had a strong caravan. Although he feared many mutated lifeforms, he didn't fear many humans.

He himself was someone that other humans feared.

Doing business and discussing things with Ye Zhongming wasn't the real way he did things. He was actually a cold and cruel person.

But this young man was terrifying.

He could wipe out a hundred-thousand-strong horde in an instant. But what if he used it on humans? Ruan Xiao didn't dare imagine.

Of course, he also thought about many things. Like the crystal weapons, the mysterious golden light, and the huge amount of materials that disappeared.

Those might be one of the secrets behind Ye Zhongming wiping out a hundred thousand zombies.

Ruan Xiao wanted to find out about this secret, but he didn't have the courage. He was afraid that Ye Zhongming would kill him.

This manager decided to make Ye Zhongming the only content in his report next month.

Da Cheng, are you sure Ye Zhongming helped Da Ming and Jia Ming establish their new base?

Yes. Ye Zhongming was a two-star evolved in the new base.

Ruan Xiao nodded and didn't say anything else.

Cloud Peak members were excited.

They loved and admired their boss in the past, but now, many look at Ye Zhongming in awe and worship.

It was no wonder they were like that. Picking up the demon crystals was too shocking. None of them thought there would be a day when they would want to vomit from digging crystals. They bent over a thousand times to pick up the crystals and materials.

But the wheel spinning was why they truly worshipped Ye Zhongming.

His success rate was shockingly high.

The number of potions he got was dazzling, and he collected all the good items from the wheels.

This boss even got candy and honey for the girls in the squad and got cigarettes and alcohol for the guys.

That was a level three wheel. He didn't want potions and got these instead. Too rich, too luxurious!

But He didn't care!

Cloud Peaks morale exploded.

In his heart, Ye Zhongming was counting the gains.

First was the Death King Trees main body. This was the highest value. He had used some as the blueprint to make wooden armor, which was silver grade. There were some materials from the zombie horde that were also good stuff.

Next were the Life Brain and flower parts. Ye Zhongming didn't know how to use them yet, so he could only return to Cloud Peak and get Liu Zhenghong to study them. Maybe there would be some surprises.

Next was the Alli Essence and the Nature Soul Essence he had already consumed. These two increased his strength. He tried it on Xia Bai. Without using any ability, he fully suppressed this seven-star evolved. Xia Bai couldn't fight back at all.

Apart from those, he got whatever Liu Zhenghong needed. Maybe these will bring the biggest value in the future. Once the gene warrior technique is mature, Cloud Peak will become a super faction.

The best were the 100,000 crystals he spun for potions and the items from the wheel. He paid Ruan Xiao a portion, and the rest helped Cloud Peak strengthen.

These were only items. Ye Zhongming gained many other things, too. Hundreds of people and the treant expressed their intentions to join Cloud Peak. Ye Zhongming agreed, but they had to start

from the bottom. They had to obtain trust and pass tests before they could join officially. Ye Zhongming believed these people would cherish their freedom and become a part of Cloud Peak.

The twins and their set equipment gave Cloud Peak another pair of core members. The sisters were sleeping on a car he bought from Cannibal Chain, and when they woke up, they would become five-star evolved.

All in all, he gained a lot.

Of course, there were losses, too.

Cloud Peak lost over a hundred people. Among them, 30 were four-star, and four five-star evolved died. These losses made his heart hurt.

The crystals used for the demon crystal weapons and the weapons themselves, which were damaged, were another sum. Adding in the lost equipment, Ye Zhongming felt emotional. War really costs a lot of money.

The three beauties want to see you. Mo Ye pulled Ye Zhongming and pointed being.

Ye Zhongming returned to his senses and smiled. He knew that many other things were waiting for him since the Linhai trip was over.

Chapter 715: Evolution potion trading

Zhao Xingmei, Mei Na, and Gan Lan wanted to meet Ye Zhongming. Naturally, there was a difference in their closeness at this point. Although Mei Na and Gan Lan went through life and death with Ye Zhongming in Linhai, they couldn't compare to Zhao Xingmei, who was the top in the Ying City Alliance.

So, the first person Ye Zhongming met was the boss of the Star Beauty Company.

Zhao Xingmei made a proposal. It sounded simple, but it was quite complicated: to have full-scale cooperation with Ye Zhongming.

In the past, Ying City Alliance was closely connected to Cloud Peak and was a strategic partner. Of course, Cloud Peak had a higher status, and Ying City even had to pay Cloud Peak taxes.

However, Cloud Peak and Ye Zhongming didn't sell strategic resources to Ying City.

For example, green weapons, mature crystal weapons, evolution potions, etc.

These were what made Cloud Peak stronger than other factions.

Ying City Alliance followed Cloud Peak to Cloud Port and went through the center city battle. They followed them to Linhai and went through the Death King Tree battle. They saw Cloud Peak warriors go from two stars to four and five stars. They even heard that Ye Zhongming had obtained huge amounts of potions this time!

They were obviously envious.

Although they improved significantly, especially regarding weapons, they were much better than when they had left Ying City. Their evolution levels increased, but the gap increased compared to Cloud Peak.

This visible gap was enraging.

Zhao Xingmei met with Ying City and reached a consensus. They decided to discuss this with Ye Zhongming to see if he could release some strategic resources to them. They were willing to pay for it and could even do some things for Cloud Peak.

Of course, they had to discuss the specifics with Ye Zhongming. They only had one goal: for him to sell to them.

Ye Zhongming thought about it when he heard it.

Firstly, green equipment definitely couldnt be sold now. Silver equipment was limited. Cloud Peak didnt have many of those; many warriors hadnt even obtained theirs. The materials were rare, and he couldnt provide them on a large scale.

He didnt plan to release crystal weapons on a large scale. It wasnt that he didnt trust them, but if such a thing were used in Ying City Alliance, things would spread. After seeing the Holy Army Coat, Ye Zhongming knew that there were many capable people in the world, and they might break it down. After all, the crystal weapons were in the basic stage, and the materials werent too complex. The basic stage was easily dissected and studied compared to his last life.

These two things couldnt be sold; rather, he couldnt sell too many. Thus, only the potions could be sold.

Apart from keeping some demon crystals for the crystal weapons, the rest were turned into evolution potions. He obtained 2000 three-star potions, 1000 four-star potions, 200 five-star potions, and one six-star potion. Apart from the six-star potion that he gave to Cannibal Chain and some others, he had many potions on hand.

He estimated the number he had to leave for Cloud Peak and opened his mouth.

Evolution potions then.

Zhao Xingmeis eyes lit up. She initially wanted the potions, and seeing Ye Zhongming bring this up, she smiled.

As he had the Super Elimination Technique, he had a 100% success rate on the three-star potions. The cost was just ten three-star crystals. Although his rate on the level four wheel wasnt so overpowered, but he would get one every 30 crystals.

As for five stars, he didnt plan to sell those.

I can provide you with three-star and four-star potions. There arent that many, and the price Ye Zhongming thought about it: 30 three-star crystals for the three-star potion and 60 for the four-star potion.

Normally, the price of potions is capped at 100 crystals. Each person sells their potions at a different price. Some people can spin 2-3 times to get one bottle, so they sell it at a cheaper price. Some can spin many times and not get any, so they are willing to spend 100 crystals to get one.

Of course, the evolution potion business would change as survivor levels increased. The potion representing the average level would be the most expensive. Lower-level ones would be cheaper, and the higher-level ones would be slightly more expensive.

Unless one were very lucky and could meet someone willing to sell for cheap, if not, no one would sell as cheaply as Ye Zhongming.

Thirty crystals for the three-star potion! Even if someone was lucky, that was the rate he would hit. However, the four-star potions were more expensive than was normal. Higher crystals were more expensive. 60 was enough to make calm people fight to purchase it. If they went to spin themselves, 60 might not even get a potion. Since that was the case, then why not just buy one?

This price was very sincere.

Zhao Xingmei was in charge of a company during peacetime and was the leader of a big faction once the apocalypse started. Shock appeared on her face.

She was finally sure the guy had a special ability to spin wheels that could save many crystals!

This is the price for all of you. He shook his finger and believed this woman could understand his meaning.

She nodded and turned to call the top 20 leaders in. She repeated Ye Zhongming's words, and their eyes lit up.

Although there weren't five- and six-star potions as they hoped, three and four-star were enough to increase their average level.

Firstly, I am selling them to you. I don't care if you give them to your subordinates or sell them to them, but you can't sell them to outsiders. If I find out, I won't show mercy.

Everyone nodded and promised that they wouldn't do that.

Ye Zhongming took out 500 three-star potions and 200 four-star potions and split them for them. Those who couldn't afford it would give their spots to those who needed more. Very quickly, the potions were all purchased. Ye Zhongming had 15000 more level three crystals and 1200 level four crystals.

Ye Zhongming looked at the profits and felt he could expand the sales at a suitable moment.

Of course, after getting the potions at this price, Ying City members had to do things for Ye Zhongming.

Chapter 716: Beast tool

Mei Na and Gan Lan were nervous when they walked in.

They weren't at the dark river, where they didn't know who Ye Zhongming was. Then, they could talk to him with a superior attitude.

Now that they witnessed his strength and saw his strong team, it was impossible for the two of them not to be afraid.

Lin Xing bullied them in Linhai, and now, they were afraid that Ye Zhongming was an animal and that he would rape them. They wouldn't be able to fight back this time.

Although Cloud Peak had a few high-quality girls, who would complain about too many girls in the apocalypse?

They came to say goodbye to Ye Zhongming with nervousness.

They found many reasons and said many, but they were all about finding that guy and asking what happened. They were also afraid that Ye Zhongming didn't release them.

Of course, they wanted to buy equipment, too.

They traded with Cloud Peak yesterday, but honestly, they had high foresight. They saw what Cloud Peak wore and weren't interested in basic equipment.

The apocalypse was tough, but they also knew that this was to ensure their safety in the future.

Ye Zhongming looked at them reluctantly.

This made them panic.

What was going on? Was this fellow really interested in them? If that was the case, then They couldn't resist.

Ye Zhongming naturally didn't have such thoughts. He thought about it and decided to talk to them about it. More accurately, he wanted to talk to Gan Lan.

If, I am saying if. Ye Zhongming looked at them and then turned to Gan Lan, If you don't have a good place to go to in the future, you can come to Cloud Peak>

They heard the tone and relaxed. Although he intended for them to stay, he wasn't forcing them, which was good. It seemed that although this guy thought with his lower body like other guys, he was a noble person.

Seeing them nod, Ye Zhongming smiled, Don't overthink. Be it your looks, body, or strength, it isn't enough for me to say what I just said.

Mei Na and Gan Lan looked at each other and were unhappy.

What do you mean? You weren't interested in me?

They forgot what they were wary of previously.

If you can find something called Worry Forgetting Liquid, or a high-level witch can help you to wash off your fire element job or skill, then you can come to Cloud Peak. After going through tests, I can develop you into a good assassin. Of course, if you can't find that and continue with your fire element job and skill, then take it that I didn't say anything. Don't come to Cloud Peak because To be honest, you are not strong enough for my team.

Gan Lan opened her mouth slightly and didn't expect Ye Zhongming to say that It was too straightforward and hurtful!

Even if she was slightly weaker, he shouldn't be so uninterested.

You!

Gan Lan's face turned red, nearly reaching the color of her hair. But Ye Zhongming waved, I am just interested in your Rhythm Observation Ability; don't overthink.

He took out two five-star potions.

If you have 60 level-five crystals each, I can sell you this.

He added, It is still because of your skill.

The two of them looked at the potion and nearly lost control of themselves.

If they could get to five stars before they left, the future path would be much better.

The two of them stared at the potion.

Ye Zhongming sighed and knew that they probably didn't have that much.

100? As long as you have 100 level-five crystals, you can take it.

The two of them were still silent.

Ye Zhongming shook his head. He loved talents. He met the strongest Assassin skill, so he didn't want to miss out. Even if he was just leaving a good impression, he might be able to nurture a world-famous killer in the future. But it didn't mean he was a fool who could give them two potions for free. He would rather give up on that thought than do such a thing.

Seeing that they didn't even have 100 crystals, he could only shrug regretfully and retract the potion.

Wait!

Gan Lan stood up, and her chest bounced up and down while she was thinking.

Don't say you can use your body or whatever; I am uninterested.

Ye Zhongming squinted his eyes and said coldly. To him, the bodies of these two people, who were only acquaintances to him, weren't worth a five-star potion.

I will use something to trade!

Gan Lan's voice was loud, which caused Xia Bai to give her a warning glance.

Ye Zhongming had planned to chase them away. What could they have at their levels?

This! Gan Lan took something out of her big bag.

Ye Zhongming glanced, and his attitude became serious immediately.

He picked up this saddle-like thing, and information spread into his mind.

Stable Beast Saddle!

One of the five Black Solid Beast Tool set equipment!

Ability 1: Strengthen, increase the beast's speed +30, defense +30, stamina +50.

Ability 2: Riding like wind. When the beast's owner rides the saddle, beast agility +50.

Ability 3, roaring charge. When the master rides the beast into battle, activate the skill and gain a charging ability. Attack increased by 10%.

Gan Lan took out a beast equipment, which was a set equipment!

Although it was only a piece of white equipment, but its stats and abilities were decent. Moreover, if you collected all five, it would have an even better set stat!

The thing Ye Zhongming cared about was that with this thing, he would have a mount. Yellow Ball was big and tall and fit the conditions of being a mount.

With a mount, it would make traveling quick. No matter how fast humans were, they were still slower than mutated lifeforms.

After all, we didn't have that many legs.

As for the white grade problem, it didn't matter to Ye Zhongming. The Treasure Nurturing Gourd could increase its level.

Ye Zhongming really felt like this woman had something good. She was also very sharp. She looked at Yellow Ball and knew what could tempt him.

Ye Zhongming placed it aside and pushed one potion.

This thing is only worth one potion.

Gan Lan was helpless and could only look towards the person who had become her friend again. This was the only thing she had to tempt the guy.

Mei Na bit her teeth and took out something from her bag.

Chapter 717: Charger

Kes Charger!

Another white piece of equipment, and it was a special piece of equipment.

Ye Zhongming looked at this half-a-meter-wide thing. It was indeed the equipment that he had seen and used in his last life.

This was a piece of charging equipment. The prefix was Kes, which represented the type. It either described the function, strength, effect, or energy source.

Kes Charger, energy type: Water element energy, used on: All energy equipment except for fire element.

Charge energy equipment, and you can fill it up with energy quickly and reduce its cooldown time. The speed is 15P/hour. Energy charging speed is 30P/hour.

Kes Chargers energy limit, 90P.

These were still units that Ye Zhongming had no understanding of, but it wasn't important. The important thing was that this thing was helpful for him.

The energy equipment referred to things like the Treasure Nurturing Gourd, Water and Fire Pot etc energy equipment. Usually, he charged these equipment with broken equipment or other abilities. Only then could he fill them up so that he could use their abilities.

Apart from these, energy equipment could be charged by such chargers to achieve a similar effect.

The charging equipment was similar to electronic chargers.

Although they weren't essential, they were very useful. They helped to save energy, time and reduce restrictions.

Using the Treasure Nurturing Gourd as an example, this treasure could repair and upgrade equipment. But it needed energy to complete such tasks. Usually, Ye Zhongming could only collect low-level and useless equipment for it to eat. He could only slowly amass energy to repair or upgrade the equipment inside.

As a result, although the gourd was good, but it took a long time, and if it lacked energy, the progress would stop.

Since Ye Zhongming got the gourd, there were times in the city center and Linhai when it stopped working due to a lack of energy.

But things were different with the charger. Ye Zhongming could first charge this equipment. There were many ways; they just had to be water. For example, water element skills or job users. For example, water element potions. For example, water gems etc. He could even replenish energy by putting it in water, just that it wouldn't be too effective.

After the charger was filled, he could charge the gourd. With 15P an hour speed. As he didn't test it before, he didn't know how long it would take to fill it up but it was definitely quicker than normal charging.

Naturally, due to the restrictions of the charger, he couldn't use it on the pot as it needed fire element energy. This charger couldn't provide fire energy.

Ye Zhongming looked at the stats and was impressed by this. If he got it, the effectiveness of the gourd would increase by a fold.

This thing works, take it.

He passed the other potion to Mei Na.

If this was ten years later, this charger could be traded for a six-star potion from a big faction. The value it created was far more than an evolution potion. But at the current stage, a five-star evolution potion was enough.

Mei Na and Gan Lan had received a good education. They had high hopes for this item and knew that the future price would be far more than a five-star potion. But they knew that a five-star potion was precious at the current stage, where the average level was two and three stars. Although they were reluctant, they still took the charger out.

The two of them thanked Ye Zhongming before leaving. Mo Ye, who could hear everything, walked back in and smiled, You think so highly of Gan Lan?

Mo Ye knew how they managed to follow Ye Zhongming. It was too much to call them shameless, but Ye Zhongming didn't invite them. For him to ask Gan Lan to head to Cloud Peak was already outstanding.

Ye Zhongming shook his head, I just don't want that skill to go to waste. If it is used well, you could assassinate stronger people. It is very useful to hunt enemies or high-level mutated lifeforms. Unfortunately, she has a fire element ability.

Five days later, Ye Zhongming brought the team to meet up with Xia Lei, who had rushed over from Cloud Peak.

Why are you here?

Ye Zhongming was shocked when he saw Xia Lei. She should be in Cloud Peak. If she was here, then what would happen with Cloud Peak?

I was thinking about you. She teased him and saw many people around, so she stopped. She replied, Sister Lius experiment is at a bottleneck, so she has little to do and can replace me. Moreover, everything is running smoothly. Young Master Yun brought back 50 more five-star evolved, and Red Hair would often appear in Cloud Peak. Don't worry.

Cloud Peak was their core base. The crystal weapon research and gene warrior lab were there, and they couldn't allow anything to happen to it.

Xia Lei brought 300 people, and these were the ones who had been through the Cloud Peak Protection Battle. Ye Zhongming passed the four-star potions down to allow those who weren't at four-star to evolve. As for five-star potions, it needed them to contribute. If not, it would be unfair to those who fought with him in the center city and Linhai.

Xia Lei was here. Mo Ye, Park Xiuying, and Little Tiger were here too, so most core members were here. Everyone had a meeting, and decided for Ye Zhongming to lead Xia Bai's team to the Sharp Peak Meeting. The others accompanied the equipment and potions back to Cloud Peak. They didn't need many from Ying City following, so only 1500 elites remained. The rest went back with Xia Lei.

Out of the core members, of course, Xia Bai followed. Liang Chuyin, Ah Yang, and his few brothers, Ya Tian and Ya Ni, also followed. Their high-level combat strength was very decent. After all, they weren't going there to fight. The others, including the treant and those Linhai warriors that planned to join Cloud Peak, followed Xia Lei back to Cloud Peak to strengthen the defense there.

Ye Zhongming also told a small team to bring some potions and equipment to Cloud Port to pass them to Little Peng to strengthen the base.

Things were distributed. Xia Lei remained and spent the night with Ye Zhongming before leaving the next day. Ye Zhongming led the 2000 strong team toward Sharp Peak.

Chapter 718: Parasite

The speed of a two thousand-person team and a twenty thousand-person team was definitely different. As compared to before, they were more than twice as quick.

But Sharp Peak Mountain was still quite far away. The nights were very dangerous, and they couldn't travel at night. They also had to avoid some cities. Ye Zhongming estimated the time and knew he had spent too much time in Linhai and would be late.

Although he wouldn't be too late, that was a fact.

Should he rush there himself? He ignored that thought instantly. Not only would it be dangerous, but his safety would be a problem even if he got there. No one knew whether or not they would attack him if they saw that he was alone.

Since he would be late, he didn't rush and did many things along the way.

He stopped using the Treasure Nurturing god. He fed many pieces of equipment into it and then upgraded the Kes Charger to silver grade. This equipment's energy limit reached 200p, and its speed reached 30p/hour. Its charging speed also reached 60p/hour.

Obviously, the greatest increase was in its charging and energy-transmitting speeds.

Ye Zhongming found a few people with water element skills and told them to use a few attacks on the charger. The empty energy bar started to change.

He placed it in water. There were changes, but they weren't obvious. He probably had to place it in a lake or ocean.

He had no choice but to sacrifice a few basic-grade nature gems to fill this 200p charger.

He then used it to charge the Treasure Nurturing Gourd. After a few hours, Ye Zhongming whistled in excitement.

With the charger's accurate energy units, Ye Zhongming knew how much energy the gourd had when it absorbed the broken equipment. After injecting 200p of energy, Ye Zhongming upgraded the stable Beast Saddle to silver grade. He also repaired a dozen pieces of silver equipment that had been damaged during the battle.

If this happened previously, he would have taken over a month to complete all of that.

He used a few more water gems and upgraded the Water and Fire Pot to silver grade.

He couldn't use the charger on it, but he could use the gourd on it.

Ye Zhongming placed the pot and found people with water and fire stats to light it up and make soup. He used this silver pot to stew the level-five mutated lifeform meat they hunted in the day. The fragrance was on another level, and it was tempting.

Although he didn't have a recipe and he didn't have job users like chefs or foodies, he could increase the basic stats of the food by 20%. In the future, if they continue to eat it, their strength will increase unknowingly.

Ye Zhongming thought back to the Life Grain. He had nurtured it for some time. That thing was much more challenging to raise than the Roselle Cedar. He injected large amounts of mental energy but no obvious changes. After this, he was in battle, so the plan was stopped. If he was free, he should nurture it more. Once the grain matured, it could increase the strength of his skills.

A pot of soup was not enough. Although the pot was big, but to an evolved whose appetite had increased, it only fed a few people. He made many pots, allowing a few hundred people to get food. They could only take turns to decide who ate the next time.

Everyone wasn't a fool. They looked at the silver equipment and knew the food made from it would be good.

Ying City followed Ye Zhongming, so he couldn't treat them too badly.

Ye Zhongming ate and spent time in the tent studying the Death King Trees body and the flowers. He had an idea. Now that he has grasped grafting skills, couldn't he merge plants to form different effects and special abilities?

Apart from crafting equipment, he had been studying this. He hoped to be able to equip the 1500 from Ying City with a piece of silver equipment. Moreover, he also wanted to gain some understanding of grafting ability.

The curtain flicked, and Liang Chuyin walked in. She sat next to Ye Zhongming and crossed her arms.

What happened?

Liang Chuyin frowned. What happened? Her big chest rose up and down. This guy was so stupid; his head was made of rock.

I am sleeping here tonight.

Liang Chuyin rested on him, and her intentions were very obvious.

Ye Zhongming smiled, You couldnt do it that day. Are you blaming me for it?

Liang Chuyins relationship journey was filled with problems. She was interested in him first, but then Xia Lei, Xia Bai, and Miya took the lead. She had a chance with him this time, and he didnt reject her, but her body didnt allow it. Those scenes were Quite sad.

The body of evolved was special so those few days passed quickly. She saw that Ye Zhongming didnt say anything, so she sent herself to his bed.

I dont care; I am not listening to you. She pouted. In truth, she liked him so much. She hugged him, and her lips searched for his.

Ye Zhongming didnt hold back; his hands enjoyed her warm and smooth body.

But in the next second, he stopped. The influencer scoffed and told him to continue. Not only did he stop, but he also hugged her and rolled to a side.

Ah!

Liang Chuyin could only shout instinctively before realizing that something had happened. She used her leg to hook her clothes before rolling to the side. She knew that she had to remove all worries for Ye Zhongming now.

A sharp tentacle rose from where the two were hugging. If not for Ye Zhongmings reactions, they would be hit.

More such tentacles appeared in the tent. Ye Zhongming moved left and right and barely dodged.

While dodging, he pulled out Moon Edge to fight back. But after these tentacles tried a few times and failed, they retracted and disappeared.

At the same time, there were two screams. Ye Zhongming and Liang Chuyin, who had worn her clothes, rushed out.

Two Ying City bodies were lying twisted on the ground. Their flesh and blood were sucked dry.

The people who were standing around had stressed looks on their faces. They had seen such corpses before.

It was what happened after Life-Taking Carrots killed you.

They realized something. The Death King Tree was nearby.

Chapter 719: Kill stealing

Mornings in the apocalypse were very silent, making one feel like they were the only ones left.

At the same time, the first sun and fresh air made one look forward.

At this moment, one could feel hope for the apocalypse.

People in the camp werent asleep. The sneak attack from the Death King Tree made everyone nervous.

Although everyone saw the Death King Tree being injured, shedding its skin and running with its dimmed demon crystal, its sneak attack made everyone realize that an injured level-eight lifeform was still level-eight!

Last night, after being attacked, everyone searched for it. They even dug down, but they couldn't see any signs.

Sneak attacks Ye Zhongming, killing someone and disappearing.

A silent and quick strike!

The relaxed team was instantly nervous.

Zhao Xingmei led Ying City Alliances 1500. As the top of Ying City, she wanted to return to Ying City, but Ye Zhongming knew that he would have to network during the event. He was a university student during peacetime and wasn't good with this. Lu Yi, who was in charge of relations, wasn't here, and Mo Ye and Xia Lei brought people back to Cloud Peak. Ah Yang and Ya Tian weren't mature. The influencer was hot-tempered and would fight when she was unhappy. As for Xia Bai, Ye Zhongming didn't even consider her.

So, only Zhao Xingmei, who had led a company during peacetime, had the ability. She was the best choice, so she remained and led this team of 1500, whose average level was level three.

The others are searching for the Death King Tree while you are studying wood here.

Zhao Xingmei saw Ye Zhongming sitting on a stone, studying the Death King Tree's body, and smiled.

It is useless; they won't be able to find it.

Ye Zhongming waved and kept the part in his space. He jumped off the stone and told Ah Yang and the others to pack up and prepare to leave.

You don't look worried at all.

Ye Zhongming looked at the team pack up and the confused Zhao Xingmei; he explained, Why do we have to worry about a Death King Tree that can only sneak attack us?

Zhao Xingmei was smart and understood immediately.

If the Death King Tree were half recovered, it wouldn't bother to hide. It would just attack and take revenge. Now that it was sneak attacking, it was obviously injured. It didn't dare to appear in front of them. Since that was the case, they didn't have to worry much.

The two who were killed last night were those who ran far out to head to the toilet. The Death King Tree could only sneak attack such survivors, which meant it was far from recovered.

Let's go. Get more materials, and each person's silver equipment goal will be reached.

Final goal?

... Final goal is two per person.

Zhao Xingmei was delighted. These were free, and 1500 Ying City people could get two. Only Ye Zhongming was rich enough to do that.

Of course, it wasn't for free. Based on the agreement, they were going to risk their lives.

There was something he didn't tell them as he was afraid they would relax. Cloud Peak had dug the few tentacles that sneak attacked Liang Chuyin and him. Those tentacles were already broken off from the main body and weren't as sharp as before.

Ye Zhongming tossed them into the Gate of Sacrifice and guessed that Death King Tree didnt know why its new branches would break off. It was gambling when it sneak attacked.

It seemed like the Death King Tree wasnt in a good state.

But Ye Zhongming was curious. Why was it asking for trouble since it wasnt in a good state? For pride? It wouldnt be so stupid, right?

After spending another ten days, Sharp Peak was nearby.

Sharp Peak was at a strategic location. It was where two mountain ranges connected. A famous plain connected the two, and it was the core economic region. If this were the warring states period, people would fight for it.

Ye Zhongming looked at the journey and knew he had to speed up. He would arrive at the mountain at night, but the night was not the battlefield of humans. So he probably wouldnt be able to enter. Ye Zhongming decided to rest in the afternoon and head out in the morning to arrive in the afternoon.

As it was still early, many went out to hunt. But the groups werent less than 200. This was to prevent the Death King Tree, who had disappeared for ten days, from reappearing.

Cloud Peaks warriors remained in the camp to protect Ye Zhongming. Ying City was in charge of food.

The Death King Trees shadow covered the team all this while. Liang Chuyin didnt dare be too close to Ye Zhongming. It made her hot-tempered, so she went for a walk with Zhao Xingmei.

Walking in the apocalypse meant that she went to kill.

The accident occurred then.

Ye Zhongming placed Ya Tian, who was sleeping on his legs, into the arms of the silver zombie sister when he heard rushed footsteps.

He frowned and stood up. He walked out and saw Ah Yangs frenzied expression.

What happened?

Brother Ye, Sister Chuyin, and Sister Xingmei are fighting!

In the apocalypse, fights between survivors were normal. Most conflicts would have deaths. This was unimaginable during peacetime but common in the apocalypse.

Each person was hot-tempered and craved blood. They vented their emotions, which, along with their strong bodies, made their tempers bad.

But for Ah Yang to inform Ye Zhongming meant that the matter wasnt small. It concerned his woman. He waved his hand and told Ah Yang to lead. At the same time, he told him to explain the situation.

Ye Zhongming was shocked when he heard what happened.

The ones that have a conflict with us are from the Resistance Zone?

En. Ah Yang was sure, Their uniform guns and discipline, it is definitely them.

Do you know the reason?

Because Kill stealing.

Chapter 720: Tense

Three Horned Deer was a rare mutated animal. It was rare, not in amount, but because it was a herbivore.

The apocalypse was where even chickens and ducks ate humans. Finding a mutated plant or animal that didn't eat survivors was too rare.

What survivors craved was that the deers lived in groups. They didn't attack. With the apocalypse, mutated plants were everywhere, which was why such mutated lifeforms didn't lack food. This resulted in their evolution levels being very high.

Apart from providing demon crystals, their horns, skin, and bones were great materials. Their meat was famous for being tender and also provided much energy.

This lifeform was prepared for survivors.

In the ten years of his last life, the deer was probably the only lifeform hunted to extinction.

A year into the apocalypse, humans noticed these were moving demon crystal sources and started to hunt them.

Zhao Xingmei and Liang Chuyin led a Ying City team and found hundreds of them around ten kilometers away from the camp. Their average level was level four; a dozen had reached level five.

If one counted the demon crystals and materials, they were a sizeable fortune for any faction.,

The two beauties naturally wouldn't let them go and followed them closely.

But there were only 200 warriors from Ying City. Even if they didn't have strong attacks, it was tough to hunt them. They dashed and evolved at the same level couldn't keep up. If they attacked, they could, at most, kill a few dozen. Thus, Zhao Xingmei called the nearby teams.

While they waited, a foreign team appeared from the side and started to attack the deers. They shot guns throughout. With the sneak attack, dozens of deer were killed.

The others started to flee towards the Ying City squad.

The prey they noticed first was being stolen. They naturally wouldn't give up on this chance. Zhao Xingmei and Liang Chuyin led Ying City members and started to hunt these mutated animals.

They had spent half a month with Ye Zhongming. Ying City members gained many benefits. Each had at least a silver piece of equipment, and more than half had two. They also ate food from the Water and Fire Pot, and their bodies became stronger. Along with their skills and tactics improving after the few battles and the fact that they weren't afraid of dying, another group of deers died.

Although they were herbivores, it didn't mean they wouldn't kill when anxious. These deers were being stopped, so they started to fight back against those from Ying City.

Those from Ying City weren't the elites from Cloud Peak. Even if Ye Zhongming took care of them, they weren't strong enough to kill these deers quickly, and the situation became anxious.

After picking up their spoils, the team that shot the deers moved to the side. They weren't going to snatch, but they wouldn't help. They were just looking on the side.

Things were sudden, and Ying City was forced to fight. They might have collapsed if not for their good equipment and Liang Chuyin being a six-star evolved.

Fortunately, they managed to hold on. Ying City's other 200-person squad rushed over and killed these few dozen deers.

If things ended like this, both sides would return safely with their gains.

But when clearing the battlefield, the other squad got close and even looked like they wanted to attack. They started to fight with the injured Ying City squad for items.

How could they take that?

Both sides clashed.

Fortunately, they were still rational. Both sides had similar numbers, and they could tell the other side wasn't weak. If they went all out, both teams might collapse.

So, after a few minutes of fighting, they stopped, and each side called out for help.

In such a short while, both sides had a few dozen corpses.

This grievance was huge.

Both sides were still tense when Ye Zhongming got here. If not for the 30 corpses on the ground reminding them to be calm, they would have already fought.

Ye Zhongming looked at the human corpses piled together with the mutated animal corpses and frowned. He touched his chin and said, Carry our members back and burn them.

A few dozen soldiers started to move the bodies of their allies.

The people on the other side saw and made the same choice.

Using the chance, Ye Zhongming looked at the other side. As Ah Yang said, they wore the same uniform and had the same equipment. They didn't panic. Such a style was unique to the resistance zone.

But, after a year of chaos, their aura was cruel and bloodthirsty. This was no different from other survivor squads.

There was the sound of engines. Ye Zhongming raised his head and saw 20 cars driving over. A thousand people jumped from above, and they were all holding guns. They surrounded Ye Zhongming and his thousand men in a semi-circle and aimed their weapons at them.

Ye Zhongming, who was thinking about how to solve the issue, frowned.

He came here for the meeting. He wanted to know things he couldn't discover in his last life. If the negotiations were good, he might even get things that Cloud Peak lacked—for example, their guns. In the next three years, these were better than cold weapons to deal with groups of mutated lifeforms and when defending.

So even when he saw his side's corpses, he controlled himself and didn't want to clash with them. He had many enemies, and there was no point in offending these people who looked like one of the biggest factions in the apocalypse. If not, he wouldn't have cared who these people were. In the past,

he killed anyone ahead of him, be it Glory Army of Soul Merchant. These people were slightly stronger than those.

But what was the meaning of them pointing their guns? They wanted to fight? Nature Staff appeared in Ye Zhongmings hands.

Was he afraid of them with Water Bottle Protection?

Seeing the weapon suddenly appear, the warriors behind him received a clear signal a strong killing aura spread in the sky.
