

## Apocalypse 721

### Chapter 721: White Mirror

Wait!

A voice spread from the party ahead, and a middle-aged guy in silver leather armor walked out.

He raised one hand, and the others lowered their barrels. They were 45 degrees lower but didn't put their guns down.

Before coming here, Zhang Hengzhou planned to kill those who dared to steal things from them.

In the half year that C2 Resistance Zone had absorbed them, he climbed to the deputy leader position. He cherished it. For a person who joined midway, this promotion speed was something to be proud of.

What did he rely on to get to this position? It was a simple formula. Listen to your bosses like you were their grandson and care for your subordinates like a nanny.

The people following him were scattered into the other forces, and he was appointed captain. In half a month, he gained his team's recognition and was then promoted. A month later, he gained more recognition and was then promoted to deputy leader.

Although the division had four deputies and the C2 Resistance Zone wasn't as strong as C1, he had the most power in his division. He always left the good things to his subordinates. This seemingly foolish action made him more famous and helped him get more in the future.

Coming here for the meeting with the Resistance Zone heads was a recognition of his ability.

When he heard that someone had stolen things from his division, he did not get angry; he was silently happy. He knew that this was a chance.

Under his leadership, he wanted to forcefully obtain the prey and suppress the other evolved to benefit his team. This would help solidify his position.

His reputation might even rise in the four reputation zones.

The reputation of a rising star will bring him unimaginable benefits.

But from far away, he saw the team his division was facing and was shocked.

He saw a bunch of silver.

This was not something a normal faction could have. When he got up close, he felt bitter deep down, and he knew that things weren't easy today.

Half of this team was covered in full silver!

His division didn't even have such luxurious equipment.

Zhang Hengzhou thought about it, but he had only heard of bodyguard squads having such equipment.

Who were these people? Why would they appear here?

Compared to the other survivors terrified of Cloud Peaks silver equipment, Zhang Hengzhou was only shocked. After all, the resistance zones had many good items, and he had seen many of them. They could form a full silver squad of 500. If they gathered those core teams, it would be more than 500!

But to say that he would attack such a team was not possible. He didn't have the confidence. If they had a conflict and his 2000 people suffered huge losses, he wouldn't be able to answer to his commander.

Thus, after seeing the team become wary and bloodthirsty against his forces, Zhang Hengzhou decided to stop the situation from worsening.

You Who are you?

Ye Zhongming looked at Zhang Hengzhou and the resistance zone warriors and said solemnly, I am not used to people pointing guns at me.

Zhang Hengzhou frowned and said, If you experience enough, you will get used to it.

If you want others to get used to it, did you think whether or not you are strong enough?

I might not be, but the Resistance Zone is.

The group of cowards that knew the apocalypse was coming but chose to hide?

Mind your words.

I don't need you to remind me about that.

Their words were feisty, and both sides were a spark from exploding.

At this time, a guy whispered something to Zhang Hengzhou. The guy who was in a standstill against Ye Zhongming was shocked.

That guy used a special ability, so even with Ye Zhongming's hearing ability, he didn't hear what he said, but it had to do with him and his side. He felt like this six-star deputy commander was thinking about retreating.

What caused that? Ye Zhongming glanced around the enemy formation.

Keep our spoils!

Ye Zhongming searched while giving the order. He was not planning to give up on these items. If they wanted to fight, then so be it!

Their subordinates started to shift the deer bodies back, and some movement was made on the other side. But because Zhang Hengzhou didn't give an order, so they didn't do much.

Seeing the bodies being kept, Zhang Hengzhou knew there was no need to fight. Unless he wanted to snatch those things back, he just stared viciously at Ye Zhongming before leading his team away.

I thought they were strong, didn't know they were cowards!

The influencer scoffed and gave a mocking glance.

It might seem like her team was being suppressed, but it was because she didn't know what Ye Zhongming planned and didn't want to spoil things by having conflicts with the resistance zone.

But now that Ye Zhongming was here, he was in charge. Even if he told her to attack Sharp Peak, she would.

Zhao Xingmei frowned and didn't understand why that team, which was similar in strength to hers, would leave.

They are afraid of Xia Bai.

Ye Zhongming explained.

He found the reason why they retreated. It was because of an equipment.

There was a famous comic; there was an equipment called Combat Strength Tester that can record one's combat strength value.

Everyone knew about that comic.

The wheel has similar equipment, but it isn't exactly the same. But it could show the survivor's evolution level and even average equipment level. That equipment is called-- White Mirror!

Everyone was shocked, as they didn't expect such a piece of equipment to exist. After learning about it, it wasn't hard to understand why they would retreat. Xia Bai was level seven, which was rare even at the top of the apocalypse. All of them were overlords and true experts.

Although Xia Bai's purple mask's glow was hidden, the White Mirror could show her average equipment level. That was shocking, and that might have been another reason.

They had strong backing, but there was no reason to take on this initial loss.

Everyone returned to camp after learning about the situation. But everyone knew they had offended a division before arriving at the Sharp Peak. This simple meeting was going to have many changes.

Chapter 722: Unfriendly deep down

There was a weird smell in the meeting room. It was a special scent from high-end cigarettes and alcohol.

There were only eight people in this huge room.

They were the leaders of the four resistance zones.

The true leaders.

The top two in charge of C, G, S and T.

They controlled the strongest powers in the apocalypse.

But there was one exception here.

Niece Mufei, are Old Mus injuries so heavy that he can't even join the meeting?

A middle-aged man touched the bald patch on his head and asked.

The others didn't react, but they focused their attention. This was something they wanted to know.

A year had passed since the apocalypse began. All of them evolved quickly, be it zombies or mutated animals and plants. Someone suggested this was because of the evolution wave, and many agreed.

The evolution speed of mutated lifeforms meant that humans' survival space shrunk, and their living environments got worse.

Under such a situation, this Sharp Peak Mountain meeting was very important. Even those who were the furthest away and took a month to get here still rushed over.

One must know that they only sent their deputies for the first few meetings and would have some telecommunication during crucial topics. This showed how much they valued this meeting.

But under such a situation, the S1 Resistance Zones commander didn't appear and sent his daughter. This left much to ponder.

Every resistance zone number 1 was the strongest, and its commander was the core. If anything happened to the core, that resistance zone wouldn't be stable.

The other zone leaders thought about the S1 resistance zones region and resources, and each had their own thoughts.

C2 Resistance Zone was connected to the S1 Resistance Zones territory. If anything happened to the latter, they would have the advantage. So, as the C2 Resistance Zones commander, An Fu was the most eager.

My father is really good but has just recovered, and the long journey is tough. As a daughter, I should help him with his work. What do you think, Uncle An?

Mu Xinfei smiled. But at the depths of her eyes were wariness. She was wary of these people. She felt distant from these people. She, who was now an alcoholic, even felt disgusted by this familiar smell.

If possible, she would rather face those smelly monsters than bicker with these people.

You are filial, but this meeting is really important and might decide the future of mankind. Old Mu not being here makes it tough on all of us.

Mu Xinfei laughed coldly to herself, but on the surface, she still smiled, You can just call my father. He also wants to say hello to all of you uncles.

Hearing Mu Xinfei say that, the others relaxed their ideas. Since they could have a video call, it wouldn't be too serious, even if his injuries weren't fully healed.

Okay, let's talk about the main topic. Let's continue from yesterday. First is C zones plan to build the C4 resistance zone. Is it reasonable? If it forms, will everyone give them support? Second, is it time for us to hunt the Iron Giant that has struck many resistance zone bases?

Let's talk about these two first.

The one who spoke was a really handsome guy. Looking at his face, he should be around 30, but those who knew him knew he was close to 60. He looked like this because of evolution and his job.

Commander Ji Ruiguang, if your C zone wants to build it, then go ahead; we don't care. But you want the other regions to support you? That doesn't make sense?

The one who spoke was a guy beside Mu Xinfei. He was muscular and healthy, and he sat there like a rock. But he was quite short, only around 1.65m, and wasn't even taller than Mu Xinfei.

He was the G1 Resistance Zones commander, Zhang Hetai.

Many people's heads hurt when they faced this guy covered in a cigarette smell. Ji Ruiguang was the same and said, Although we belong to different zones, don't forget that we are from China, and we are one. Now, C Zone is progressing the best, and we can build a fourth division. This is a good thing for China. Everyone taking out some stuff won't hurt us and can also strengthen our overall strength; I don't see why that is wrong.

Ke, C Zone is progressing the best because you took the most resources initially. Let's stop talking about this.

Zhang Hetai, you had to respect me initially when you looked at me and had to greet me.

You also said that this was in the past.

You!

The topic continued from yesterday, but the situation was exactly the same. There was just endless quarreling.

Ji Ruiguang panted. That handsome face looked frustrated, but a part of it was fake. This might not have happened if he had not joined the alliance and made so many zones.

But he knew that even if China didn't have the alliance and didn't have zones, it would still be in such a state.

T1 Resistance Zones Commander Wen didn't join in. He casually smoked while snapping his fingers. Each time, a fire skull would appear and then disappear.

At this point, someone knocked on the door. With the strength of everyone here, they had heard their footsteps.

The two who came were in uniform. One of them walked to a guy beside Ji Ruiguang and whispered. The guy frowned and said a few sentences to Ji Ruiguang. He then said something to the deputy before the deputy left.

The other guy walked to Commander Wen and also said a few words. Commander Wen nodded and waved him out.

The meeting continued as if there was no interruption. The others saw that the two didn't want to say anything, and so they didn't ask. But they decided to fight out after the meeting.

Four hours later, the commanders ended a day's worth of meetings and walked out. Their subordinates came to surround their bosses.

Guang Yao looked at Commander Wen and followed him closely. Seeing that the others were far away, he said anxiously, Commander, why are we allowing C Zone to cause problems for Cloud Peak? Didn't we want to work with them? They are being blocked outside the mountain!

Commander Wen smiled, If they can't even get in, then what rights do they have to work with us?

Chapter 723: Conned

Sharp Peak Mountain was a strategic area. No one expected humans to build such a majestic structure along the mountain range.

It was similar to the ancient walls but was built with the toughest materials.

Ye Zhongming took just one look and knew that this was a combination of modern technology and wheel items. They had someone like an architect or builder who used modern machinery to craft such strong defensive buildings.

Of course, strength was relative. Ye Zhongming had seen numerous such things in his last life. Some of the Ying City camps might not have been as tall and thick as this, but their individual defenses were much better.

Builder-type jobs got more and more popular in the apocalypse.

Cloud Peak had been left here for numerous hours.

They clashed with the resistance zone division yesterday and arrived here at noon. Everyone knew they might face problems, but they didn't expect the problems to come so quickly that they weren't even let in.

After they informed them who they were, there was no movement. Many figures moved about the walls that were pretty much built into the mountain, but no one bothered about this team.

As many survivors came for the meeting, many teams would pass, and they would definitely attract mutated lifeforms. Mutated animals, zombies, and beasts would appear outside of the defenses.

It seemed like the Resistance Zone did this on purpose. They could allow their divisions to hunt and strengthen themselves.

Every day, divisions would head out to hunt and clear the area around. At night, more mutated lifeforms would arrive for them to clear.

Today, no division has come out since the morning. Many mutated lifeforms gathered outside the defenses. At the start, several mutated spiders attacked the defenses and were forced to the side. Next, a horde of zombies picked up the blood scent and came here. They paced around but didn't leave.

When Cloud Peak came, they saw thousands of mutated spiders and ten thousand zombies blocking their path. It was news that the flying job user from Cloud Peak spread back to them.

Brother, what is the meaning of this? Ah Yang stood beside Ye Zhongming and looked at the Sharp Peak Mountains defenses. His tone was filled with unhappiness.

His attitude represented that of the entire team. Cloud Peak and Ying City hadn't been treated like this in a long time. They were ignored for several hours.

Everyone knew that there was another entrance to this place. It was an excuse to say that there were mutated lifeforms there, so they weren't allowed to enter. But the excuse was also a reason, and it would be okay if they used that excuse on them. But they didn't even give that reason. They just ignored them. Cloud Peak warriors were used to being proud, and they couldn't take this.

Ye Zhongming didn't say anything. He waited quietly beside his team and looked at the wall. No one knew what he was thinking.

The resistance zone knew about their position. This hiding was just to prevent the mutated lifeforms below the wall from spotting them.

But before Ye Zhongming received a response, he was plotted against.

A hundred-man squad whose average level was high appeared from a side. They stared them down for some time before leaving swiftly.

!

Liang Chuyin cursed. Not only did this team cause the mutated spiders and zombie horde to spot Cloud Peak, but they even drew a pair of Mountain Horn Beasts from the side!

A pair of level-six beasts!

That team was very mobile and disappeared quickly, leaving Cloud Peak to deal with these mutated lifeforms.

They were surrounded on three sides!

No wonder Liang Chuyin cursed. This was a plot against them; they were simply using others to kill them.

Killing intent flashed in Ye Zhongmings eyes.

Zhongming, what should we do?

Zhao Xingmeis expression changed. She was gentle and submissive to Ye Zhongming, but who was truly like that in the apocalypse? They were all people who killed without blinking!

Seeing that they were being plotted against, rage rose in her heart.

Lead people to block the spiders; my group will deal with the zombie horde. Leave the two Mountain Horn Beasts to me.

Ye Zhongming gave instructions and went to face the two beasts. The others had a close understanding with each other, and they attacked when they heard his words.

His instructions did not seem to make sense as he had appointed the larger Ying City army to deal with the spiders while leaving the bigger horde to Cloud Peak.

But Ye Zhongming knew that in terms of strength, Cloud Peaks 500 could defeat the 1500 from Ying City. Liang Chuyin and the twins skills were more suitable for a group battle.

The sudden fight caused many from the walls to stretch their heads and pay attention. That team that had disappeared was now on the walls. Those were C1 Resistance Zones elite squad. Although Sharp Peak Mountain was built together by the few resistance zones and defended together, it didnt mean they didnt recognize the top squad in the resistance zone.

The few leaders walked to the wall and took off their helmets. They observed the battlefield. One of the younger guys smiled, Who told them to offend our C Zone? Our boss isnt a dumb person.

The others were delighted. A slightly older person said, They are quite pitiful. Their equipment is good; they have a few thousand silver gear. Their team should have a high-level smith.

Pitiful? If they are dead, then their equipment belongs to us! The young man laughed. I realized that you have become naughty!

Everyone changes in this world.

Many people agreed, and the atmosphere was relaxed.

Shut up!

The leader stopped them. They were dressed in full silver. Although they couldnt compare to the T1s Holy Army Coats squad, but they were top few in the entire resistance zone. So they didnt care about the team outside wearing silver equipment.

What happened, captain?

The young man smiled.

First, change your personality. Although it is the apocalypse, behave! The captain scolded his subordinate and pointed outside. " Second, are you so sure that team will lose?

Chapter 724: Real intention

Guang Yao opened the door and saw Little Xiu sitting on the bed reading a fashion magazine.

You are back.

The two of them had confirmed their relationship and lacked a marriage certificate. But those things were useless in the apocalypse. To the outside world, they were a couple.

What happened? Your expression doesnt look good.

Little Xiu tossed the magazine aside and hugged her guy. Her chest under the thin shirt pressed onto his back.

Ye Zhongming is here.

Little Xiu knew that her guy paid attention to Cloud Peak and Ye Zhongming and even respected him when they fought on the same side.

My Brother didnt tell you to receive them?

Logically speaking, since the T1 Resistance Zone invited Ye Zhongming, then Guang Yao, who was most familiar with him, was the most suitable to receive him.

Receive?

Guang Yaos voice rose when he heard that, and his body shook. He walked away from Little Xius embrace and frowned, Not only did the commander not allow me to receive him, but he even allowed those from C Zone to pick on him. We fought a war with Cloud Peak. Which one of them isnt prideful? With what the commander did, how will we be able to cooperate? We might even become enemies!

Little Xiu wasnt as rash as she was in Cloud Port. On the contrary, she was calm. She saw that Guang Yao was emotional, and his tone was rash. She didnt get angry and turned her head to think.

My brother said that?

Of course!

Little Xiu asked and jumped off the bed. She hugged the guys arm and smiled, You are so stubborn-minded.

Guang Yao frowned and looked unhappily at Little Xiu.

Listen to me. Little Xiu pinched Guang Yao, My brother talked about letting Cloud Peak deal with it themselves and needing to confirm their strength. But do you think they need such a test?

Of course not! I can say that they might not be able to deal with a certain zone, but they are much stronger than any division! If they dont have the right to enter, then at least 90% of the teams here would be kicked out.

Little Xiu giggled, So, my brother definitely knows. Dont you think it is weird that he would say that and act like he doesnt care?

Guang Yaos rage reduced, and he started to think about it.

This meeting concerns many things, and the key is each regions protection of its own interests and distribution of resources. The few commanders are all in disagreement, especially those from C Zone. They rely on their strength and have been eyeing our Holy Army Coat for many days.

Hearing Little Xiu say that, Guang Yaos eyes lit up, So the commander is lying? He wants Ye Zhongming to teach them a lesson?

I am unsure of others, but I know my brother; it is most likely the case. Think about it: no matter how much he doesnt like them, we are on the same side, so we cant fight other regions. If we cant attack, we have to take the pressure. It is okay if they have something of the same value as the Holy Army Coats, but do they have it? No? They are here to take things for free. My brother is facing huge pressure.

Little Xius tone was gentle, Now there is such a chance. Although he uses Ye Zhongming and Cloud Peak, they can stir the pot and turn everyones attention. Moreover, they can see Cloud Peaks strength and see that we have such a strong ally outside. We will be able to get more power in future meetings.

Guang Yao was convinced. He knew that Commander Wen should have such thoughts. This was also an excellent way to break the current situation. He probably thought about how to use Ye Zhongming when he had reported to him about Cloud Peak.

But Cloud Peak wont be happy; they will be unhappy about us.

Although he believed Little Xius explanation, Guang Yao was still worried about Ye Zhongmings attitude.

Haiz, are you stupid? What isnt about interests? We just have to give him enough conditions. Would he still care about this? Dont forget that he still likes our Holy Army Coat and has a way to modify it. This gives us big room to cooperate. My silly guy, he also has that Crystal Weapons.

Guang Yao was stunned. He nodded and didnt say anything.

Boss!

A soldier knocked on the door and came in to report, Cloud Peak has started fighting!

Guang Yao and Little Xiu looked at each other and walked out.

Commander Wen laid on his chair beside him was the T2 Resistance Zones commander.

I heard you have been having insomnia, so I brought two bottles of wine. These arent from the wheel but from a famous hotel.

Commander Wen pointed at the two bottles of white wine and said.

That person didnt know whether to laugh or cry, Brother Wen, I am an evolved; I can survive not sleeping for many days; what insomnia?

If not for the insomnia, then for helping you in love. Commander Wen laughed.

The T2 commander rolled his eyes, Do I even need this for that?

I am not sure; I saw many muscular guys being bad at that.

...

Seeing this person he had raised freeze up, Commander Wen laughed. But a few seconds later, it stopped, Once Cloud Peak enters, Guang Yao and you receive them.

The T2 commander looked at Commander Wen and didnt understand.

It wont be friendly, but tell them we can sell the Holy Army Coat. If Ye Zhongming isnt crazy, he will work with us.

Commander Wen lit a cigarette with the flame skull. He took a puff and spat out a green mist.

The video is about to connect; lets look.

The deputies went to switch on a screen. A clear image appeared. It was of Cloud Peak and Ying City warriors battling at the Sharp Peak Mountain.

Wow, a few days and their equipment is much better. Commander Wen shrugged and flicked the ash into the mouth of the flame skull.

The T2 commanders attention was all on the intense battle.

What do you think about Mu Xinfei?

Commander Wen asked, which stunned the T2 commander.

What?

Nothing. Lets continue watching. Commander Wen pointed at the screen.

Chapter 725: Attention grabbing fight

Mu Xinfei, whom Commander Wen mentioned, was rubbing her head in her room. It didnt hurt, but she was tired.

She was sitting with the uncles and was fully focused on every problem and sentence spoken in case she fell into any trap that would cause the S1 Resistance Zone to take a loss. Before her father healed, she had to take responsibility.

A pair of white arms stretched over to press Mu Xinfeis head. A familiar fragrance made her relax.

You have wrinkles already.

Bai Sisi suddenly spoke, which made Mu Xinfei exclaim. She looked into the mirror, and when she stood up, she realized that it wasnt true. She stared at her good friend.

Oi, when did you become so naughty?

Bai Sisi giggled, See, your head doesnt hurt anymore, right?

Mu Xinfei rolled her eyes and tossed her onto the bed. Bai Sisi screamed before fighting back, and the two rolled on the bed.

A few minutes later, they lay there panting. They looked at the metallic ceiling, and there was a sudden silence.

Is there news of that thing? Mu Xinfei turned her body and asked.

Bai Sisi shook her head, I am afraid others will know, so I didnt dare to ask about it. I could only try my luck on the market or the auction house, but I still havent found it.

Mu Xinfei turned back, and her face was filled with disappointment.

Her father was badly injured, and he had been resting for a long time, but to no avail. But this wasnt a solution. If time dragged on, it might get worse. Apart from helping her father attend the meetings here, she wanted to see if she could find a medicine that could remove the corrosive energy on her fathers body.

She had to attend the meetings daily, so she handed this task to Bai Sisi. Unfortunately, there wasnt any progress.

The two girls who werent very old were lost. They dared not imagine what would happen to the resistance zone if anything happened to Mu Xinfeis father.

They collected their emotions and tidied their clothing before heading out. The moment they opened the door, they saw a short guy. It was Commander Zhang Hetai who had clashed with the C zones boss at the meeting.

The guy walked over, and due to his height, he looked up slightly at Mu Xinfei.

His face was solemn.

Have you considered?

Hearing Zhang Hetai asks that, Mu Xinfei said coldly, No matter when you ask, the answer will be the same.

Zhang Hetai frowned, You should know that this is the best way to solidify your position.

This doesnt mean that I need to sacrifice myself, and Mu Xinfei took a deep breath, My father gave me my position. It has nothing to do with you.

The short guy nodded, I hope you are still so tough when the time comes. At that time, your position wouldnt be a wife.

The medical room is the fifth door on the left.

Zhang Hetai crossed his arms and shook his head before disappearing.

Bai Sisi tapped her shoulder, and her good friend gave a bitter smile.

Out of all the commanders, Zhang Hetai was the most certain that Mu Xinfeis father wouldnt recover. She didnt know what made him so certain to force her to marry him. He wanted to use this method to control the S1 Resistance Zone, which added a shadow to her heart.

She was afraid that there were internal issues.

The two women walked towards the restaurant. The food for high-level members was provided. Special rights existed in the apocalypse.

Before they entered, they saw many people walking in that direction and were even jogging over.

Mu Xinfei pulled one of them to ask. That person saw that the person who stopped him was the S1 Resistance Zones interim commander, so he saluted and said, There is an external force fighting in front of the mountain. Many level-six monsters are there, and it is intense! Everyone is heading to the monitors to take a look.

The two of them looked at each other and walked towards the room. They were curious about which team it was who would fight here.

The room was a big hall with over a thousand 40-inch monitors. Everyone could see what was happening outside of the mountain.

On the 100-inch screen at the center was a team that was battling the mutated lifeforms. The battle was intense.

Many Sharp Peak workers were observing. They weren't fighters, which was why they were interested in such videos. They were very excited.

Turn the cameras to the two Mountain Horn Beasts. The two level-six beasts are strong; it should be entertaining.

Someone is holding them back?

The guard on the walls sent back news. Through White Mirror, that person is a six-star evolved. He is the boss of this faction. He is very strong and would stand a chance.

The cameras were pointed in that direction. It showed a human facing two five-meter-tall beasts.

Mu Xinfei was shocked. Thai guy She recalled that night of the apocalypse, that mysterious student who was very young.

He was already a six-star evolved/

Bai Sisi had covered her mouth so she didn't make a sound. Her eyes shook. Through the ice-cold monitor, she looked at that familiar person.

At this moment, all the commanders and leaders were paying attention to this battle squad.

There weren't many tactics when facing mutated lifeforms. Humans that used potions were used to fighting head-on.

This 1500-strong team from Ying City had been through many battles with Cloud Peak. They could maintain shape but were less disciplined than Cloud Peak.

The mutated spiders had the evolutionary advantage. The spider king was a level-six mutated lifeform. There weren't any same level evolved in the Ying City team.

But the human equipment made up for the evolution gap.

From the start, the Ying City battle reached an intense stage.

Zhao Xingmei stood at the center of the team. She held the green Flying Star and aimed it at the spider king, who spat poison.

## Chapter 727: Silver Box

Zhao Xingmei's victory caused many watching around Sharp Peak Mountain to exclaim.

A five-star evolved was actually able to kill the Spider King, which was a level higher. This was unbelievable.

Many people felt chills from the mysterious archery techniques. They tried to put themselves in the shoes, and most realized that they would probably get killed.

This made their evaluation of this team much higher.

Look at that bow; it is green grade. Moreover, her arrows were all colored. The four key arrows that broke the Spider King's defense were all silver grade. Also, her body is covered in silver equipment.

The team captain who had drawn aggro to Cloud Peak squinted his eyes, and he said to his subordinates, Moreover, she showed at least two jobs! Her evolution level isn't the highest, but she is very strong.

The subordinates discussed, and they were very solemn.

But there is no need to think too highly about her. His tone changed: As a ranged user, high attack is a basic. If she can't even do that, then what is the point? She is strong enough to kill a level-six lifeform, but she looks very weak now. She has lost half of her combat strength and won't be able to join the upcoming fights.

The captain pointed at where the Ying City squad and mutated spiders were battling and said, If this woman fought the spider king alone, she would be the one that dies. Ranged jobs are afraid of people getting close. The Spider King could restrict one's movement; it is the counter to ranged jobs. So, everyone thinks that she is strong, but the fact is that she is smart and lucky.

Everyone smiled, and they were more relaxed.

They were elite warriors and naturally weren't afraid of this squad. But if this squad were very strong, then they would have to be careful of them taking revenge after today. This didn't make sense, as there was no reason for that.

Zhao Xingmei killing the Spider King pumped up the morale of the entire Ying City. The biggest threat to them was dead. This was a long wall; the spider horde was in chaos, too, so the humans started to fight back.

On the other side, Cloud Peaks 500 faced at least 8000 zombies. These few hundred people looked like a small boat at the center of a lake.

But none of them showed fear. On the contrary, they were raring to go.

Xia Lei wasn't here, Mo Ye wasn't here, and Ye Zhongming wasn't here. Xia Bai was in charge. But this woman wasn't interested in that. She loved to fight up close, so Liang Chuyin had no choice but to take over the leadership.

But her personality was feisty, and she didn't know about tactics. Seeing the horde pounce over, she didn't know how to save and told everyone to use the crystal weapons.

Use the crystal grenades first. Ranged users use your job skills and then fire the crystal rifles freely! Kill them all!

Liang Chuyins voice rang clearly. Everyone took out the batch of crystal weapons that Xia Lei had sent them.

Many silver crystal grenades were tossed in an orderly manner. These were the second model of crystal grenades that Le Dayuan had handed to Xia Lei, Silver Box!

They were shining silver and, thus, received that name.

Such crystal grenades were split into two models: Silver Box 1 and Silver Box 2. Compared to the first generation, they had a larger range. Le Dayuan had improved the crystal energy efficiency. The crystal guns could also fire more shots than before, and the explosive strength of the grenades had also increased.

They tossed from two directions because the zombies had talent skills and that could avoid their interception and ensure a higher hit rate.

It wasnt loud, but a shocking sizzling spread across the battlefield. Ying City warriors familiar with the sound knew that Cloud Peak had begun their fight.

This time, everyone was using the first model.

The silver shell had a level two white crystal on it.

The evolved were able to toss the crystals anywhere they wanted.

Even if some zombies tried to intercept, the first model exploded when they arrived at specific locations.

The energy swept the area and ripped the bodies of the zombies. They formed a storm wall in front of Cloud Peak.

The explosion of level two demon crystals threatened level three and even higher lifeforms. The stacking of the explosion increased the damage.

The hundreds of zombies at the front fell instantly.

Most of them didnt die, but their bodies were sliced, and they werent able to stand. The zombies behind surged up and stepped on them. Maybe some high-level evolved could rely on their strong bodies and survive, but they wouldnt be able to stand in the upcoming fight.

The second batch of grenades arrived.

This time, they were the second model.

This grenade had two level three demon crystals on it.

It was several times the strength of the first model.

These were the highest-level demon crystals that Cloud Peaks grenades could utilize. Le Dayuan was still studying grenades using level-four crystals. There were prototypes, but the energy was unstable, and he had problems to solve.

Although Liang Chuyin didnt know how to lead, she played a trick during the two attacks. She used the weaker first and the stronger second models to cause the zombie horde to lower their guard.

A few hundred losses was nothing to an 8000-strong horde. This wouldnt attract enough attention.

Thus, when the second model exploded, the zombie horde that didn't care about the first wave stopped. They even stopped growling and were stunned by what was happening before them.

A large patch of zombies at the front was wiped!

Chapter 728: Twilight

Even the Cloud Peak warriors and zombie horde experienced the shock from the silent damage.

This wasn't the first time that Xia Bai's squad used crystal grenades. Previously, they used the weaker black first generation, and now the silver second generation.

They didn't expect the silver grenades to be so strong.

They saw the levels of the horde that had charged at them. There were a few dozen level-five zombies, a few hundred level-four, and more level-three zombies.

These two thousand zombies would take time to clear, even with their current strength.

This was to be expected as humans could not compare to the evolution speed of mutated lifeforms.

But this zombie horde that people would find tough to deal with was ripped to shreds by the second version Silver Box.

How strong was the new generation crystal grenade?

Even Xia Bai, who was always calm, was shocked. If she were in such an explosion, she would suffer from huge injuries.

Xia Bai was a seven-star evolved with defensive gear.

The zombie horde stopped. Although they were crueler to other zombies than their food, they were still hunting humans. They had a common goal and enemy. For so many of them to be killed instantly, their slow brains were stunned.

How did the other zombies that were of similar levels to them suddenly die? They died so quickly.

At the same time, the people in Sharp Peak Mountain exclaimed.

Damn, what is that?

The slightly arrogant young man had his hands on the walls. Half his body was sticking out, and his eyes were opened wide. He looked at them as if he was looking at a ghost.

His attention was originally on the mutated spiders. To him, even a full silver battle squad couldn't deal with close to ten thousand zombies. Those zombies were amazing. To wipe out this horde, they had to send at least three divisions to not suffer huge losses. If they only sent one division, they would suffer huge losses even if they won.

500 against 10 thousand? A zombie must have bitten the commander of Cloud Peak for him to think that way.

But the two explosions caused everyone's attention to go from Zhao Xingmei to this squad. They then saw a bunch of zombie fragments.

This thing is strong! Liang Chuyin exclaimed, telling the warriors to throw the second batch of silver boxes.

The effect this time wasn't as apparent. Firstly, the horde was further away, so their accuracy dropped. Secondly, the horde paid attention to these small things, and many zombies used their skills to block them.

But the explosion still caused over a thousand deaths!

In just a moment, nearly three thousand zombies died, and five hundred lost their ability to fight.

This was more than a third of the horde.

Toss again!

Liang Chuyin's face was red. Seeing that it was effective, she gave the order excitedly.

Sister Liang, it ran out

Ah Yang reminded Liang Chuyin.

They only produced it recently, and even though they rushed production, there weren't many. Xia Lei pretty much brought all of them here.

There were slightly more model one ones, around two thousand, but only a thousand model two. After the two attacks, only a hundred model-two ones remained.

Liang Chuyin was stunned and coughed, Ranged members follow up.

The people in the team with ranged abilities started to strike. The commotion was more than when they attacked with the silver box, but it was far less effective.

The horde started their attacks after the humans had regained their normal attacks.

Inside Sharp Peak Mountain, Commander Wen rested back in his chair. He forgot to control the flame, and the ash landed on the metal ground.

These are the crystal weapons?

Due to the high-end monitoring equipment, although it wasn't the same as watching it live, but he could see most of the situation. He muttered. He squinted his eyes and didn't say anything else, but deep down, he was shocked.

This was very different from what Guang Yao reported!

In Guang Yao's report, the crystal grenades were strong but far less than the guns and cannons. They weren't as powerful, either.

Did Guang Yao lie? Commander Wen didn't believe that. Not only was he a trusted subordinate, but he was also his brother-in-law.

Then, there was only another possibility. Either Cloud Peak didn't have this crystal grenade then, so Guang Yao didn't know about it, or Cloud Peak's skills had broken through, and this was new!

No matter which it was, Commander Wen was shocked and terrified by their development ability.

Not only did they create a new advanced weapon, but they also maintained a high research speed.

One must know that they were a faction formed only in the apocalypse and had no foundations! Science took a few generations to build. While Cloud Peak faced evolution pressure, they studied this and even used their extra demon crystals to produce it on such a scale! This

Commander Wen was in disbelief. If Cloud Peak hadn't created these weapons that consumed large amounts of crystals, then how high would their evolution levels be?

Go and call Guang Yao to lead his division to welcome these people.

Hearing Commander Wen say that, the commander of the T2 Resistance Zone stood up. After two steps, he said, If

If their battle is not over, help them clear the mutated lifeforms. If someone stops you, fight your way out. Ensure we are first to contact them and tell them my words.

The skills landed, and another group of zombies fell. But only a few dozen died. This couldn't compare to the power of the crystal grenades.

Many talent skills flew from the horde and landed on Cloud Peak.

Cloud Peak would summarise and review each battle. Slowly, their battle tactics became clearer, and their distribution of roles became more distinct.

For example, Xia Bais female squad. They entered Cloud Peak at a later time. Due to Soul Merchants pig-raising plan, they only had evolution levels but no job skills or abilities. They were like a blank piece of paper that could be easily taught.

Thus, they became the most coordinated squad in Cloud Peak.

Seeing the skills fly at them, the warriors in charge of defense used their abilities or equipment to protect their allies. After clashing, although there was light, apart from a few injuries, there were no deaths or heavy losses.

These women, who maintained their complete combat strength, raised the new crystal guns and fired at the horde.

The most classic crystal gun series-- Twilight, appeared in front of everyone for the first time!

## Chapter 729: Battle

Strictly speaking, the guns were previously experimental products.

When such technology that should be used in human warfare appeared, Le Dayuan himself was unsure. But when Ye Zhongming passed him the theory and structure, it made him believe.

Moreover, as compared to crystal grenades, the guns were more complex, and it was easier for mistakes to occur.

So, Le Dayuan and his four helpers, along with the few dozen who helped them, were very careful when creating such guns.

The few crystal weapons that were used before were tested in battle, and the data was transmitted back. Le Dayuan was the chief analyst and gained experience from the data.

After completing the Silver Box grenade and beginning production, Le Dayuan and his lab focused on crystal guns. Young Master Yun and the 50 five-star evolved returned with a battle report that helped Le Dayuan create the first generation of Cloud Peak weapons-- Twilight Series Assault Rifle.

As compared to the second generation crystal grenade and the Sky Breaking Series cannons, this Twilight Series assault rifle was late.

But late didnt mean that it was weak or unworthy. On the contrary, with the experience of the grenades and cannons, the guns were more mature.

However, because of production issues, even if he had modified previous guns, he had only completed a hundred guns before Xia Lei headed out.

These hundred guns shocked the people who were still recovering from the shock of the Silver Box crystal grenades.

Balls of black light fired from the hundred Twilight Series rifles. They grew from the initial small speck and turned into black snakes that pounced toward the zombies ahead.

It was quick, and they made a soft sound. The unique sizzling of the crystal weapons was much softer.

These guns that used level-three crystals smashed into the zombie horde 50 meters away.

Right, smash.

The horde couldnt react when the black energy snakes hit the horde.

A huge patch of zombies fell.

Just one shot caused casualties no fewer than the first-generation Silver Box grenades. The strength of these guns shocked many.

Cloud Peak Warriors realized that the biggest change of the Twilight Series Warriors was that the range became longer.

This was a challenging problem to solve. After all, crystal weapons were different from traditional guns. The range was the toughest to solve as the materials used to make the guns couldnt handle the strong energy waves from the crystals.

The shots were much quicker, struck a bigger area, and the attack was more powerful.

This meant that Le Dayuan had a breakthrough in energy efficiency, which was why there were such obvious changes.

This was a good thing for Cloud Peak.

This was regarded as one of mankinds biggest hopes against mutated lifeforms, and it showed its might now. With the other crystal guns, they suppressed the horde 50 steps away.

Many Sharp Peak Mountain members sucked in a deep breath, and they only had one thought.

What were those? Why could they cause so much damage? Why could they cover such a huge area? Why werent the zombies talent skills able to intercept them?

These questions appeared in their minds, but they couldnt get an answer.

After a period of shooting, Cloud Peaks attacks stopped. The crystals in the guns were out of energy, and they didnt have much time to switch crystals in such a combat.

Close combat push forwards! Ranged retreat!

Liang Chuyin gave the order, and Cloud Peaks formation changed. The close combat members stood at the front, and the ranged job users retreated.

Two seconds later, the horde and humans finally clashed.

The crystal guns caused another two thousand deaths. Along with the crystal grenades, only three thousand zombies remained. Although Cloud Peak obtained a huge result quickly, it was still at a disadvantage in terms of numbers.

Many survivors knew that when hunting mutated lifeforms, they usually followed the theory of hunting. Hunting, surrounding, anyway, they had to have the numerical advantage to succeed. If they faced as many mutated lifeforms as them, the best solution was to avoid them.

The horde was still six to seven times that of Cloud Peak, and they could swallow these humans up.

But the truth proved that Cloud Peak was a place that could create miracles.

Liang Chuyin, Silver Zombie, Ah Yang, and his brothers were at the front. Their silver equipment and five to six-star evolution levels helped block the hordes strongest wave. Xia Bai had also jumped into the horde and charged at the level six zombie king.

Huge losses started to appear on both sides.

The horde suffered more losses, but Cloud Peak also started to suffer losses. But that was unavoidable. In a battle where everyone was a superhero, death would happen in an instant.

The crystal weapons were showing off previously, giving people shock and respect about the unknown, then this battle was unforgettable.

Toss!

Liang Chuyin tossed the Ice Dragon Storm, Hail Rain, and Shadow Dance before shouting.

The remaining first-version Silver Boxes were tossed into the horde. The dense horde's backline exploded, and many zombies were blown up.

The crystal grenade attacks didnt stop and were tossed in groups of 200 in all directions to weaken the density of the horde.

Xia Bai held down the three level-six zombies with the zombie king at the helm. She controlled the horde's biggest threat and didnt allow them to attack the Cloud Peak formation.

Everyone was in an intense fight and was risking their lives for victory. But there was one person who was in a daze.

It was Ya Tian.

She looked at a woman lying on the ground. A weird talent skill hit this warrior in the first clash. A stone spike from underground hit her chin, and she died right away.

Ya Tian was sad. She followed the sister and brother that saved her and made friends with many elder sisters and aunties. This dead sister was one of them. She even had a piece of chocolate in her pocket from this sister. There was even a night when this sister hugged her after she had a nightmare.

It was really warm, as if she had returned to her mothers arms.

But now, that feeling had disappeared as this sister was dead.

Ya Tians eyes started to fill with blood. She raised her head slowly and screamed at the horde. At the same time, the doll in her hands gave out a soundwave.

#### Chapter 730: Ya Tian's rage

Sisi can sing!

The soundwave disrupted the mind of the target. Based on ones mental strength, it would cause illusions. This weird singing was transmitted throughout the battlefield. Not only were the zombies affected, but even the spider horde and the Mountain Horn Beasts paused.

Ya Tians target was all the mutated lifeforms, and even Yellow Ball was affected.

Ya Tian, already a five-star evolved, was much more powerful than Linhai. The moment this skill was used, it achieved an obvious effect.

Not many of these mutated lifeforms had developed mental energy.

Ya Tian didnt have high mental energy, but humans had an advantage compared to the zombies. It resulted in many of them freezing.

Fresh blood flowed from her nose and landed on her beautiful, clean clothes.

The mutated lifeforms pausing was good for humans, but it was fatal for the zombies.

In that instance, Ying City and Cloud Peak warriors achieved huge results. Groups of enemies fell in front of them.

Ya Tian ignored the liquid from her nose. She tossed the doll to the side, and the exquisite doll started to change.

Doll Princess Heart was activated!

A beast roar rang, and a winged unicorn mount raised its two front legs and roared towards the sky. A female in white golden armor with a bright red cape sat on its back.

The female cavalier held a two-meter-long spear and a triangular metal shield in the other. It had a golden feathered bow on her back. There was even a white jade staff on the mount!

Ya Tians berserk state-- Princess Cavalier!

Complete State Body Technique user!

Unicorn Beast, Tight Armor, Red Cape!

The moment she appeared, her coolness attracted everyones attention.

Kill them, kill them!

Ya Tian muttered before entering her stone state.

The Butterfly Knots-- Companions Devotion was activated!

The silver zombies strength increased.

What is that?

The small team on the wall exclaimed for the third time.

The first time, they saw the silver box explode, causing groups of zombies to die. They exclaimed because they didn't know what it was.

For the second time, they saw the guns, which caused black lightning to rip the horde into shreds. They exclaimed because they didn't know what it was.

This was the third time. They saw an extremely beautiful female cavalier on the flying unicorn and still didn't know what it was.

After which, their exclamations didn't stop.

That was because the female cavalier entered the battlefield.

She tapped the unicorn, and the beautiful mount flew above the Cloud Peak warriors. It landed in the zombie horde.

The spear started to dance. Thrust, flick, smash, sweep The spear was like a dragon flying in the horde. Each spear would kill a zombie.

The spear on the other side was like a mountain that protected the cavalier and the unicorn, rendering all attacks useless.

Ah!

The cavalier shouted. The spear turned into many spear shadows that thrust ahead.

This was a powerful skill!

The spears disappeared, and the area in front of her was empty.

The unicorn was also attacking. It flapped its wings, and the white feathers were like sharp blades. The zombies it touched were sliced open. As it ran and jumped, its four legs also kicked many zombies. When it faced strong fellows, the unicorn would fire a laser from its horn to pierce the head of the target.

She left corpses in her wake as she charged.

She turned the horse and started to charge.

This time, she had the distance to pick up speed, so her charge was quick as lightning. They turned into a streak of light that sliced through the horde. Any zombies that they touched were split into two!

No one could see how she did it, but the corpses told them she did it.

She charged to and fro, and at least 300 zombies were killed by her.

The Silver Box, Princess Cavaliers attacks, and Cloud Peaks brave fighting killed another thousand zombies, leaving only two thousand!

From the initial ten thousand to two thousand took just half an hour. Close to 80% of this huge horde was wiped out.

The team on the wall, including that calm captain, felt a chill on his spine. He started to break out in cold sweat.

They realized who they had offended!

The addition of the Princess Cavalier raised Cloud Peaks morale. Many core members led the counterattack.

Right, the five hundred of them actually attacked the two-thousand-strong horde.

Moreover, their attacks were swift and sharp.

After a year of training, no one from Cloud Peak feared death. Xia Bais team was also the one least afraid.

These women charged like madmen. Any zombie that appeared before them had to die! They didnt care if they used abilities or how high their evolution levels were; the only thing they had to do was to kill!

Even if all survivors in the apocalypse were brave, they had never seen such a crazy team.

Yellow Ball charged beside Xia Bai and fought a level-six zombie. Liang Chuyin was also here and took the other. Princess Cavalier and Ah Yang started to attack the remaining zombies.

Although the horde still had the advantage, everyone could tell the outcome was decided!

The battle ended when Xia Bai kicked the level-six zombie king, and the Princess Cavaliers spear pierced it.

This was the first time many people saw a horde running.

Ying City Alliance was motivated. They used the chaos from the spider king dying and the pause from the song to occupy the ascendancy. They had forced the spider horde back and were just clearing the remaining ones.

They didnt plan to let any of them go!

Only Ye Zhongming and the Mountain Horn Beast were left.
