

Apocalypse 741

Chapter 741: Ye Zhongming's item

If you have something to auction, you can register it, and there will be professionals who will judge it. If they think it is okay, you can auction it off, and they will give a rough price. If you can accept it, then it would be listed as the base price.

Wen Zhong pointed to the side and led Ye Zhongming over. They saw six to seven windows. Half of them had people speaking to workers at the counter, and they held all sorts of items. But most people returned with disappointment. The items they brought didn't meet the standards of the auction.

Wen Zhong brought Guang Yao and Little Xiu to a counter, and Guang Yao passed a box. Wen Zhong handed it to two people who greeted him. Those two knew about his identity.

The people opened the box and were stunned. Even Ye Zhongming and Liang Chuyin were shocked.

It was a silver Holy Army Coat set!

You didn't expect me to auction this, right? Wen Zhong smiled, No choice; I need to let others benefit.

Ye Zhongming understood what he meant. He knew that Wen Zhong was under pressure. While the Holy Army Coat made him stronger, others in the alliance targeted it. He was using this way to reduce the pressure on him. Although it was not a solution, it was a temporary reprieve.

I know you are rich and purchased all the beast eggs, but let this set go. If you bid for it, they will think I am playing them.

Ye Zhongming nodded and expressed that he understood.

What about you? Do you have something to auction?

Ye Zhongming walked to the counter and spread his palm at Xia Bai. She passed a beast that was half the size of her palm.

Little Xiu's eyes lit up.

This fellow was too cute. Not only was its fur beautiful, but it looked dumb. It was sleeping and snoring softly.

Sir, what? What is this?

The two people weren't professionals at evaluating battle beasts, so they asked. Wen Zhong listened in on the side.

The baby of a level seven beast.

The two of them were excited.

Mutated lifeform children had a high chance of becoming as strong as their parents. The other probability was that they would be slightly weaker.

At worst, this level seven child would be a level five beast. Nurturing it would mean that you were raising a loyal level-five companion.

Moreover, this was a baby and not an unhatched egg. This was something that everyone wanted.

Can you please wait? I will inform the expert.

One of them spoke to Ye Zhongming and ran to find someone.

Why didnt you tell me about this? I could trade a set with you.

Wen Zhong was tempted and wanted to get this pet. He was confident he could get it to level six. If he was lucky, it would be level seven, and if there were a chance, it would be level eight.

Ye Zhongming coughed. He saw the person observing the cute fellow and said to Wen Zhong, This is a mental energy type lifeform; its function is very simple. Simply put, its use is When you cant sleep, it can sing you a tune.

Wen Zhong glanced at him like he was looking at a conman.

Ye Zhongming planned to con someone with this. After this fellow hatched, Ye Zhongming recognized it. This high-level pet was known as the most rubbish beast.

It had no attack, but its body was bright. It had no speed or power and didnt know how to fight. It was a herbivore and was born to be weak. Even mutated lifeforms that were much weaker than it would bully them.

Its only ability was to give out a beautiful sound to help one fall asleep.

This meant this beast was useless apart from being nice to look at and listen to.

Many people were conned by this, but few knew about it in this life. Ye Zhongming wouldnt give up the chance to con people.

He didnt mind conning everyone here apart from T Zone.

Of course, it could produce a high-level demon crystal, so he had to earn at least a few folds of that price.

Little Xiu loved it, but she stared at him when she heard him say it. After all, all resources in the apocalypse were used to improve your strength. Even if she was Wen Zhongs sister, she wasnt rich enough to raise a useless pet.

That person brought another two over, and they evaluated the small thing. They finally confirmed its high-level bloodline and gave a reasonable price.

Ye Zhongming agreed. It was a huge win; he would earn even more if he auctioned it.

Ye Zhongming passed a box. Wen Zhong took a look, and there was a note. His eyes were sharp, and his body shook when he saw what was written.

Sir, are you sure? How do you prove it? The guys eyes lit up, but then he became a little suspicious.

Commander Wen can guarantee for me.

Wen Zhong rolled his eyes, but he still nodded.

Since that is the case, then okay.

They thought about it and gave a price to which Ye Zhongming agreed.

The two of them walked out, and Wen Zhong finally asked, You have so many?

Ye Zhongming nodded, Yes.

Wen Zhong felt like he couldn't look at Ye Zhongming like a normal person. This person was more like someone who had a resistance zone than himself.

The two of them walked side by side. As they entered from a side of the hall, they had walked half of the hall. They saw a group of people walking in from the main entrance. Ye Zhongming squinted his eyes and laughed coldly to himself. Enemies were really fated to meet.

Chapter 742: Finally meeting

The small group also saw Ye Zhongming and Wen Zhong. Their walking speed slowed.

Zhang Hengzhou stood in the second row of the group and looked at Ye Zhongming solemnly.

He didn't have a good time these two days.

Ye Zhongming and his Cloud Peaks battle outside made them the focus of Sharp Peak Mountain. Many news about them spread. You had fallen behind if one didn't talk about them when they met.

After Cloud Peak entered, news spread that they were T Zones only invited team. That made them even more famous.

He tossed a considerable sum to purchase all the beast eggs, making them famous and wealthy.

One could say that Ye Zhongming and Cloud Peak were the main topics in Sharp Peak Mountain, and his shine covered that of the meeting.

Their appearance gave them a fresh new topic, but Zhang Hengzhou felt his face burn when he heard the names.

Why would Ye Zhongming get blocked outside the mountain? Why did so many mutated lifeforms attack them? Those answers were like slaps to his face.

Someone had fought for monsters with them, and someone drew the monsters to them.

Who was it? C Zones Zhang Hengzhou.

He offended this squad and didn't let them in. He set a trap for them, and they managed to fight their way in in the end!

Zhang Hengzhou didn't realize that from kill stealing to taking revenge outside the city, he was the one offending Cloud Peak and Ye Zhongming. He knew that he had lost his face and was being trampled. The issue of the new commander for the new zone was being hidden in shadow by this issue.

He felt this guy who was close by was the reason for that.

What is going on?

Sensing that everyone had slowed, a young man in the first row smiled and asked.

The equally handsome guy beside him replied, Ye Zhongming, Cloud Peak.

The guy looked at Ye Zhongming with interest. When he saw Xia Bai, he scoffed. At the same time, he asked the person who had told him who these people were and received a nod in reply.

His eyes glowed.

Commander Wen, hello. The guy who said Ye Zhongmings name walked forward and stretched his hand.

Wen Zhong smiled and shook it, Delin, you have gotten stronger. The Broken Blade Squads commander is strong.

Delin smiled, Commander Wen always teases me; I am not as strong as Brother Guang Yao and Tianze.

The two of them exchanged a few casual greetings and didnt bother to introduce themselves to those around them. Delin led his group into the auction hall.

Delin, C Zones strongest division Broken Blades commander. Six-star evolved. C Zone commander Ji Ruiguangs best helper. Right, they were the ones who drew the zombies and beasts to attack you.

Ye Zhongming nodded.

C Zone has the most high-level smiths in the entire resistance zone, so its equipment is the best. As its strongest division, Broken Blade is all silver.

The young guy in the middle is the outside faction that C Zone invited Signal Flag Divisions boss, Zhao Shengs son, Zhao Jingchen. He is their top expert, and he is as strong as Delin.

Ye Zhongming knew that Wen Zhong was telling him useful information, which he memorized in his heart. These people might become opponents soon.

He felt like Zhao Jingchen was weird, but he didnt know why.

They entered the hall. Be it Ye Zhongming, Liang Chuyin, or Zhao Xingmei, they felt like they were in a different era.

The bright light, grand hall, tables with white cloth, clean floor, wine, and fresh flowers on the table

All of this brought them back to peacetime. But the bodies of people walking around glowed to remind everyone that the outside was still the cruel apocalypse.

Wen Zhong was the commander of one of the four resistance zones, so his status was the highest. He was arranged to be at the middle table in the front row. Ye Zhongming and his group sat beside him. Very quickly, people placed fruits and drinks on the table, and there were even high-grade cigars.

Ye Zhongming looked coldly.

Delins group was to the right. Both sides would make eye contact, but they would then turn away.

At this level, they wouldnt mock or curse each other.

After all, that was too low-class.

Many people were here for the auction, and the seats were all full. Only the table beside Wen Zhong was empty; no one knew who it was for.

The auctioneer was arranging the items, which were already behind the curtains.

There was some movement from outside, but it wasn't loud, which is why they didn't turn. Even the arrival of the C Zone commander wasn't worth their turning.

Greetings spread from all corners. These people had sharp ears and heard they were talking about Mu Xinfei.

So the beauty is here, no wonder. Wen Zhong drank the wine. Maybe as he felt it wasn't nice, he placed it down. He lit a cigar before nodding. He flicked, and a fire skeleton appeared in his hands.

Ye Zhongming glanced at the skull, but his attention was behind him.

Mu Xinfei was here, then

He noticed that he felt empty.

Seeing him tense up, Liang Chuyin looked at him curiously, but she didn't ask. She held his arm tightly.

A sweet female voice spread from behind.

Uncle Wen, you are here, this is the famous Ye Zhongming right?

Wen Zhong and Ye Zhongming got up and turned. One beautiful face like a flower and one ashen white face entered their eyes.

Chapter 743: Black Solid reappears

Now beginning the auction of the 5th item, please take a look.

The first four items were completed, but Ye Zhongming didn't care much.

His apocalypse life meant that his mind wouldn't blank when he saw Bai Sisi, but it badly affected his emotions.

After Mu Xinfei found his base and made noise, Ye Zhongming knew he would see the woman with whom he had spent two lives. It was just a matter of time.

But when he saw her, he couldn't maintain his calm state.

He knew that some things had changed. His revival meant that things were different from his last life. For example, the people around him, like Mo Ye, Liang Chuyin, Xia Lei, Little Tiger, Park Xiuying. In the last life, they were probably dead. They might be alive, but that would be in another way.

But Ye Zhongming didn't know them in his last life, so he wasn't too affected. But Bai Sisi was different.

In his last life, he saw what happened to her. But things changed in this life.

That afternoon, the start of the apocalypse appeared in his mind. He tried to keep her, but she turned her face and was shiftier.

Suddenly, he found it hard to suppress his complicated emotions.

He could see people glancing over. He recalled the panic on Bai Sisi's face, but he didn't know how to face her.

You know her?

There was a gentle voice. Ye Zhongming raised his head and saw Liang Chuyin. It wasn't surprising that she could guess it. Bai Sisi's panicked expression was too obvious.

En.

Good taste.

En?

Focus on the auction.

The influencer raised her chin and looked proudly forward, but her arms grabbed him tightly.

It was in the past.

Ye Zhongming's heart hurt, and he tapped her hand. Her body became soft.

He turned around, and the auction for the fifth item was over. His gaze became firm.

It is time for the sixth item; please look.

The auctioneer removed the golden cloth from the silver plate a beautiful woman was carrying to reveal two stones.

Two stat stones, brown one is an earth element, and white is wind.

Ye Zhongming straightened his body. The items were two nature gems, which were also two elements that he didn't have.

Moreover, they were both intermediate grades!

This was a good thing for him as he had the nature staff.

As all of you see, the stat stones are of decent quality and are useful for people with relevant skills or jobs.

The base price is 300 level-three crystals or similar value potions.

As the apocalypse didn't have a standardized currency, trades were based on crystals and potions. They set the price based on the crystals they needed. However, in such a competitive auction, they would use the crystals of the average level as the base currency.

Humans were moving towards three stars; level three crystals were the most valuable.

Ye Zhongming felt like the price was okay. After all, they were intermediate-grade gems, so he raised his hand.

As he was the first to bid, he bid the base price. Each time someone raised their hand, it was another 50 crystals.

Many people raised their hands very quickly, and the price reached 500.

This price was nearly there. For example, Ye Zhongming would lose three three-star potions for one use of the nature staff, which was a very high price.

He raised his hand and raised it to 550.

The auctioneer wanted to mention that he had increased the bid, but someone beside raised his hand and increased the price to 600.

It was that handsome guy called Zhao Jingchen.

Ye Zhongming raised it, and the other side did, too.

700!

He raised for the fourth time and so did Zhao Jingchen.

800!

Targeting me? Ye Zhongming took a look before bidding 850. The other side bid 900.

Young and arrogant.

Wen Zhong scoffed coldly and was unhappy with Zhao Jingchen. At the same time, he felt sad for the top expert of Signal Flag Squad.

The others might not know, but at least today, Wen Zhong knew how rich Ye Zhongming was. The item he auctioned was the level-seven pet and

Ye Zhongming didn't raise his hand; instead, he reached out five fingers, representing an increase of five times. He bid 1150 crystals.

People discussed and saw that the two tables were going against each other.

Zhao Jingchen smiled and raised it to 1200!

Ye Zhongming raised it to 1500, and people around exclaimed.

15 level three potions. This was enough for full white equipment! Were the two gems worth that?

Zhao Jingchen hesitated but still raised his hand.

Ye Zhongming waved and expressed that he would give it up.

Zhao Jingchen was expressionless and even nodded to Ye Zhongming. But no one knew what he was feeling.

This was the first high wave of the auction. Thus, when he introduced the seventh item, his voice was louder than before.

The item is special, and two are being auctioned together: the 8th and 9th items. They are two special pieces of equipment. Right, someone has guessed. It is equipment for battle beasts; it is also a set of equipment. Please take a look.

The golden cloth was removed, and there were two white-grade beast tools. One was beast armor, and the other was a pile of metal wings!

Ah!

Liang Chuyin exclaimed. She had seen these things before. More accurately, she had seen the set. It was on Yellow Balls back!

Black Solid Beast Tool!

The beast set he got from Gan Lan was made of five pieces of equipment. Ye Zhongming didn't expect to complete the set. After all, unless they were equipment like the Holy Army Coat that was crafted as a set, if not, the pieces of equipment would be all over the world.

But who knew that after such a short time, he would bump into them in the auction, two at once!

If he didn't take them down, he would be sorry to Yellow Ball.

Two together, starting price 2000 level three demon crystals.

After a simple explanation of the equipment, the auctioneer said the base price.

Ye Zhongming didn't bother to hide his love and desire for the equipment and bid 3000 level-three demon crystals!

Chapter 744: 250 thousand crystals part 1

The price of some things wasn't based on their looks. One had to look at their potential.

If Ye Zhongming didn't have the saddle, the set equipment would still be good, and he would still fight for it. But he would look at the price before deciding whether to bid and how much to bid.

Only after understanding these problems would he join in.

But things were different now. He had a piece; if he missed out, he might never encounter these again. He wouldn't let them go, even if they were expensive!

Moreover, he had the Treasure Nurturing Gourd and the Smith Job. These two white things could turn into silver, and their futures were limitless. Missing out would be sorry to Yellow Ball and also to himself.

Even if Ye Zhongming had brought Cloud Peak to unimaginable levels now, the 500 core members dared to enter the Resistance Zone camp, but his desire for power hadn't stopped and was getting more intense.

Wen Zhong's hesitation to reveal things was like a dark cloud covering his head. He was guessing what this strong leader didn't dare say.

If he ran out of crystals, he could kill mutated lifeforms. But he didn't plan to miss out on such suitable equipment.

The bid increased by 1000. Even the faction bosses and division commanders were shocked. Ye Zhongming was bold, but he seemed like a fool with a lot of money.

The auctioneer looked at Ye Zhongming with joy. He did this before the apocalypse and had seen many rich people. But in the apocalypse, everyone wanted demon crystals, so it was rare for people to bid so generously.

Even Bai Sisi, who tried to control herself not to look over, glanced over in concern.

Maybe the way he bid showed others his desire to get these two pieces. No one continued to bid.

Until That Zhang Jingchen raised his hand.

3500!

Although he wasn't as bold as Ye Zhongming to raise the bid by a thousand but, after their last clash, he was just targeting him.

Ye Zhongming upped it by another 500!

Everyone was interested in the beast tool, but not much. If possible, they would rather spend resources on themselves to raise their own strength.

Of course, only a year had passed, and most people didn't have battle beasts.

Zhang Jingchen bid 4500.

Does your dad know that you are spending money like this?

Since he decided to work with Ye Zhongming and Cloud Peak, Wen Zhong was determined. He turned to warn Zhang Jingchen. Although he knew Ye Zhongming was rich, he didn't need to waste it. He didn't mind being more direct. That could also win Ye Zhongming's trust.

I am in charge, uncle.

Zhang Jingchen smiled and acted as if he didn't understand Wen Zhong's words.

Ye Zhongming casually bid 5000.

This price made many division commanders shake their heads. Two white pieces of equipment, and they were just beast tools. If he wasn't a fool, then what was he?

Even Zhao Jingchen paused. He looked over and wanted to confirm if Ye Zhongming really wanted it or if he was just raising the price to scam him.

If he bids, then give up. 5000 level three crystals, that is 50 three-star potions. You can arm an average squad. Two white equipment isn't worth that.

Wen Zhong persuaded Ye Zhongming to give up. There was no need to battle for no reason.

Commander Wen, if it is two silver equipment, is it worth that price?

Ye Zhongming said softly to Wen Zhong, who had earned his good feelings.

Silver?

Wen Zhong thought, If it is for humans, then yes, but this is a beast tool

What if I already have one of the set equipment?

When he heard that, Wen Zhong's eyes lit up, and he understood why Ye Zhongming was bidding so intensely. If he obtained the two pieces of equipment, he could raise them to silver and complete three parts of the set. The introduction said that it was a five-piece set. Three pieces should give one set stat. If that was the case, it was naturally worth more than 5000.

Wen Zhong didn't say anything else.

Zhao Jingchen thought about it before bidding 5500. Ye Zhongming raised it to 6000 immediately.

6500. He wanted to battle to the end.

Ye Zhongming was annoyed and bid 8000 immediately.

People started to discuss. 8000 was 80 three-star potions. That would be several four-star potions. Four stars evolved; such a person would be a division captain.

Zhao Jingchen didn't expect Ye Zhongming to raise the price so much. He was silent for some time but raised his hand when the auctioneer started to count down. 8500.

Ye Zhongming replied instantly.

10000.

That price was crazy. 10000 that could trade for a five-star potion. Five-star potion, the deputy commanders of some divisions and even some weaker commanders were five-star!

This person was crazy to use a five-star potion to trade for two white beast tools.

Even if he knew that this was very useful for Ye Zhongming, but Wen Zhong, Guang Yao, and Little Xiu were still shocked. They felt like Ye Zhongming didn't care about money.

Zhao Jingchen was stunned. He looked seriously at Ye Zhongming before giving up.

The two tools were obtained for 10000. This was the highest bid so far.

Ye Zhongming was not a fool to pay 10000 level-three crystals. He would use 100 three-star potions. These potions were just a thousand crystals to him. With the Super Elimination Technique, he spent a tenth of the price, half the base price!

With this secret move, Ye Zhongming wasn't afraid of others competing with him.

Chapter 744.5- 250 thousand crystals

The auction continued.

Ye Zhongming wasn't interested in these items, but he would stir trouble when Zhao Jingchen wanted something. He was rich anyway, and the actual price was low. He wasn't afraid of Zhao Jingchen conning him and raised the price.

People raised the price to make trouble, but Ye Zhongming bought everything Zhao Jingchen or C Zone wanted.

After a few times, the people at the table were furious.

But Ye Zhongming followed the rules that the highest bidder won. He could also afford it. He tossed three-star potions like they were free and didn't even blink.

The people behind were stunned. Those competitive people calculated. Ye Zhongming had spent 40 thousand level-three crystals to compete with C Zone, which was close to 400 potions.

These potions were enough to form a new faction!

Mu Xinfeng's eyes lit up. She felt like her decision to come here was correct. This young man was strong and also had a thick wallet! Working with such a person would help S Zone get out or even solve their current problems!

She grabbed the cold hands of her distracted friend and said, Sisi, do you see this? Your boyfriend's current status is different. Don't worry about the past. You have to get him back; you have an advantage. You have foundations of love!

Bai Sisi bit her lips. Her face was still ashen white. She looked at Mu Xinfei and said, with a dry voice, I left because of reality, but will I go back now because of that? Xinfei, I know you need his strength. I can help you communicate with him, but I won't use our past. I won't try to get back with him. Let me have some honor even if it is not worth it.

Mu Xinfei was stunned. With how much she understood her friend, she knew that Bai Sisi had made her mind up. She opened her mouth slightly and felt like her friend was slightly foreign.

She turned and looked towards the stage before sighing.

In the apocalypse where everything could be sold, you still wanted to keep some honor in front of love that might still exist?

Haven't you still not sold yourself for resistance zone matters? Do you want me to betray myself? I'd rather die if that is the case.

Foolish!

Maybe.

But I like it.

Mu Xinfei grabbed Bai Sisi's hand and gave her an apologetic gaze. Bai Sisi understood and smiled.

The two of them calmed down.

Very quickly, the auction arrived at Ye Zhongming's pet. The moment the thing appeared, it caused an uproar!

The child of a level seven beast. Its strength definitely couldn't be underestimated. Moreover, it was so cute, and it was suitable for women.

The female survivors glowed. Even Little Xiu and Liang Chuyin couldn't help but look over dotingly. As for Xia Bai, this thing was probably not worth a single strand of Ye Zhongming's hair.

The auctioneer passionately described the appraisal result, and it caused an uproar in the crowd.

These divisions were very rich, and they could easily nurture a pet. They might need just a year to get the help of a level six or level seven beast. This was an absolute increase in strength.

If they were lucky, it might even reach level eight!

Level eight!

That level was enough to make everyone go mad!

After the base price of 20,000 level three crystals was announced, the price soared and doubled quickly. It started to slow when it reached 40 thousand, but a few factions followed.

50 60 70

The price came to 70 thousand. Everyone wasn't fools, and they calculated the exchange rate. The price soared to 100 thousand!

150 thousand!

A voice rang from behind, and everyone turned their heads. A short guy who gave off a strong aura walked over. His green vest and pants were sweaty as he had just worked out. The moment he came in, a very thick masculine smell spread.

Everyone recognized him as the G1 Resistance Zone commander, Zhang Hetai!

The ambitious guy wanted to marry Mu Xinfei to control S Zone!

The moment he bid, the divisions behind were silent, especially those from G Zone who didn't dare compete with their boss. The other divisions were also worried. They were deciding whether or not it was worth it to offend one of the four heads for a small pet.

200 thousand!

There was an uproar!

This price was that of one or even two six-star potions. They were betting that this pet could reach level seven!

Zhang Hetai crossed his arms. He was short but looked like a giant when he walked to the front. He looked at this cute pet, opening its innocent eyes, and nodded.

220 thousand, Delin, if you continue to fight with me for this, we should spar in the arena.

C Zones strongest division was the one that bid 200 thousand. It was the strongest C Zone person present, the Broken Blade Division Commander Delin.

Delin looked at the unreasonable Zhang Hetai and rolled his eyes.

If Ji Ruiguang were here, he wouldn't be afraid of him. But Delin ranked lower than Zhang Hetai, and he was weaker. He was really afraid that this shameless person would fight him.

Zhang Hetai even dared to threaten the commander of the Broken Blade Division. The other people didn't ask for trouble, and nobody spoke up.

240 thousand!

Zhang Hetai turned viciously and saw Wen Zhong casually smoking. Wen Zhong also smiled at him.

Old Wen, what is the meaning of this?

The highest bidder wins! This I am interested.

Zhang Hetai dared to argue with Delin as he suppressed him. But Wen Zhong had a similar status and strength, so his threats wouldn't work.

250 thousand! Old Wen, don't be too much.

Wen Zhong shrugged and didn't say a word. He looked at Ye Zhongming with shifty eyes, and his message was obvious.

You should thank me for raising the price for you!

The level seven scam of a pet was sold for 250 thousand level three demon crystals!

Chapter 745: Stunning auction item part 1

If Ye Zhongming's high bid for the Black Solid Set was a small peak, then Zhang Hetai spending 250 thousand crystals for this was a true peak.

As the Resistance Zone knew what would happen, it grasped huge amounts of resources. After a year, it had many experts and high-level warriors alone; each zone had six digits. It obtained numerous benefits.

Ye Zhongming knew the price wouldn't be so high if they held an auction outside. The survivors mostly fought to survive and tried to raise their strength. Even the faction leaders wouldn't have 250 thousand level three crystals to buy a baby pet that they needed time and resources to raise.

Of course, Ye Zhongming was one of those who could. His crystals and potions were far above that number. But he probably wouldn't make such a high bid if a level seven pet appeared.

I didn't bring that much money; take it from G Zone.

Zhang Hetai said with an overbearing tone. He held the baby and left.

The auctioneer didn't object. He was not only the auctioneer but also the manager of Cannibal Chain. He wasn't afraid that Zhang Hetai would refuse to pay as a quarter of the price was a service fee. 10% of which was Cannibal Chain's commission. The remaining 15% was to the four resistance zones that provided the venue.

15% of 250 thousand, which was 37500. This was the combined income for the four resistance zones. Even if they deducted the 9000 that Zhang Hetai would get, the other three zones would get 30 thousand. If Zhang Hetai wanted to refuse payment, he would not only hurt the interests of Cannibal Chain but also affect the other three resistance zones. As long as he wasn't stupid, he would definitely pay.

The people exclaimed, and the excitement didn't fade. They saw that Zhang Hetai didn't walk out; he came to S Zone's table and openly handed the level seven baby pet to Mu Xinfei!

Wa---

Cheers swept the venue, and the eyes of many lit up.

G Zone's commander, S Zone's interim commander, something was about to happen between them!

Those who were in for the fun were in for the fun, but those leaders started to think.

Zhang Hetai expressed his love to Mu Xinfei, but was that only? Was there something going on? For example Both zones working together?

Thinking about G and S Zones joining hands, many people got anxious.

This Zhang Hetai is ambitious. Wen Zhong looked coldly, and his eyes glowed. No one knew what he was thinking.

But one thing was for such. C and T Zones didn't want that to happen. Even many from S Zone didn't want to be related to Zhang Hetai.

Everyone quieted down and paid attention to Mu Xinfei. Although this looked like a simple gift, it represented whether or not S Zone would work with G Zone!

If she accepted it, this would have huge repercussions.

Ye Zhongming was watching the fun. In his memory, he had heard of Killing Rose but not of this guy.

Mu Xinfei was calm, but she was cursing deep down.

She had rejected Zhang Hetai many times and thought he understood what she meant as a zone commander and would stop. After all, he cared about his pride.

Who knew that he used such a way to force her to decide? She had to decide in front of everybody.

This was just bullying her.

Think carefully; your reply concerns both our zones futures. Good or bad, there is no third possibility.

Zhang Hetai said with a low voice. Besides Mu Xinfei, only Bai Sisi and Uncle Bao, who were close, could hear it. Their expressions changed.

He was threatening her.

I'm sorry, Commander Zhang. This cute fellow is too precious; I cannot accept it.

Mu Xinfei smiled sweetly and used a loud voice so that everyone could hear.

Were her intentions obvious? No need! She was rejecting him! It was a clear rejection.

Zhang Hetai retracted his hand and nodded. He didnt say anything and walked out of the hall. The other G Zone people looked at each other and left a few members as observers before they left.

Mu Xinfei scoffed coldly and sat down like she had done something simple. But in her heart, she was filled with grievances.

She knew she had offended Zhang Hetai and worsened S Zones situation. If this spreads, many people will blame her for not knowing her place and worsening their development.

The pressure would swarm at her!

Mu Xinfei looked at the other table, at that calm guy. She decided that she would talk to him no matter what.

This was the only thing she could think about that could help her.

For a drowning person, every piece of wood could save their lives. Ye Zhongming was the piece of wood for her.

The auction resumed shortly, but the few items werent chased much. This was due to the quality and rarity of the items, but it also had to do with what had happened previously.

Until the Holy Army Coat appeared.

This thing was famous in the resistance zone and was as famous as crystal weapons in Ying City.

Moreover, this was the highest silver grade to date; a full set was as good as a green set.

The few resistance zones had been forcing T Zone to hand over the creator of the Holy Army Coat or set a contract. This showed how much they cared about this equipment.

But Wen Zhong hadnt loosened up until date.

Naturally, the competition would be more intense than the pet.

After all, this set greatly increased strength when worn, and you could even fight people a level stronger than you with it.

The price climbed quickly and exceeded 250 thousand. Mu Xinfei and C Zones Delin were the two competing sides.

Zhao Jingchen was C Zones guest, but even if he was rich, he couldnt compete and didnt dare to compete with C Zone.

When the price reached 350 thousand, both sides were careful when they bid. After all, the Holy Army Coat didnt come from the wheel, and each set differed. The strength of the set decided the price. But before they saw it, they were gambling on its stats.

But no matter what, this was the first set that flowed out. Although both sides were careful, neither wanted to give up on it.

Finally, Mu Xinfei, who had a higher status and was richer, obtained it with 430 thousand. It refreshed the highest bid amount in this auction.

Ye Zhongming was impressed. Even the weak S Zone was rich. The foundations of the Resistance Zone were different from ordinary factions.

If Wen Zhong had not told Ye Zhongming not to bid, he would have been tempted. But it seemed like before he sold his second item, he might not defeat a zone in terms of price.

Chapter 745.5- Stunning auction item part 2

After the Holy Army Coat sale, Ye Zhongming started to get nervous.

This nervousness wasnt fear but anticipation. It was time for his second item.

The next product is special, and he also has special payment terms, so please consider these before bidding.

The auctioneer carried a small box. The people below were confused about what would be in it. They stretched their necks to take a look.

The auctioneer opened the box and took out a normal note.

People started to discuss and didnt know what Cannibal Chain was doing.

What I say next would be the item, so listen carefully.

One-star potion

The first sentence caused people to be stunned, and then they burst out laughing.

Where was this place? It was the resistance zone. This was the Sharp Peak Mountain, which the four resistance zones built together. Even the cleaners were one-star evolved! There was a level seven beasts baby previously and high-grade items like Holy Army Coat. Someone actually sell a one-star potion?

Since Cannibal Chain dared to allow such an item and even placed it behind the Holy Army Coat, this famous intel organization didnt seem very good.

But his words froze their smiles on their faces.

... 5000 bottles.

What?

Many people looked around. 5000 one-star potions? Did they hear wrongly?

As if he knew how confused everyone was, the auctioneer repeated.

5000 one-star potions.

Hua!

A shockwave ran through the venue.

5000 one-star potions. What was going on? Mass one-star potion sale. Did the four resistance zones even have so many added together?

Even if the price of one-star potions had reached the lowest in history, there were so many. Five thousand bottles were a huge sum.

This item was good, but it was low-class. It might attract the resistance zone that wanted to recruit ordinary people.

4000 two-star potions.

Pu! Cough!

Many people spat the liquid in their mouths, and many who were smoking choked.

How many?

4000 two-star potions?

What was going on? Did this seller focus on low-grade potions? Did he plan to create his faction but thought differently and was now selling those potions?

5000 one-star and 4000 two-stars. This seller was strong.

People started to discuss these potions. They weren't the most shocking today, but they were a good topic. Many people guessed what these potions were used for before and why they were being auctioned here.

Wen Zhong looked at Ye Zhongming in confusion. Why did he have so many potions, and why didn't he use them?

Three-star potions

The auctioneer paused, and the venue was silent.

There were Three-star potions? These were the currency that the auction used today. They were being auctioned off?

Three thousand bottles.

Chaos, the entire place was in chaos.

What was going on? 5000 one-star, 4000 two-star, 3000 three-star potions. Who could have so many evolution potions? The first two weren't much, as the evolution potions from this level weren't

that valuable. But 3000 three-star potions. How much money was that? Three hundred thousand level three crystals! Zhang Hetai only spent 250 thousand to buy that level-seven battle pets baby.

No wonder this item was after the Holy Army Coat. The real value of these potions was higher than a set of Holy Army Coat.

For example, if 5000 people used the one-star potions, 4000 used the two-star potions, and then 3000 used the three-star potion, you would have 3000 three-star evolved, 1000 two-star evolved, and 1000 one-star evolved. It was enough to kill a five-star evolved wearing a Holy Army Coat. He would get surrounded and killed if a six-star evolved didnt have an aoe skill.

This was a special item!

But what happened next shocked everyone.

1000 four-star potions.

Weng!

The scene was out of control. A person from C Zone and some G Zone observers ran out to inform their commanders. A batch of potions that could affect the battle zones strength had appeared.

1000 four-star potions!

This Was too terrifying!

Could the resistance zone take these potions out? They might be able to gather the one to three-star potions if they had time, but 1000 four-star potions were tough. The divisions used up more than this amount, but it differed from taking it out at once.

These potions were enough to build a medium-sized faction from scratch!

C Zone was building a new division, and these potions were most useful to them. Even if Delin was here, he was not confident of winning the other zones.

He knew that all the battle zones would compete for this.

The Auctioneer said something that stunned everyone.

Five star potion

Chapter 746.5- New record part 2

While Commander Wen was thinking, the auction began.

Base price, 4 million level three crystals!

Wa---

The shock nearly raised the roof of the hall.

Although most people knew that the base price wouldnt be low, but they didnt expect it to be so high.

Moreover, they couldnt use normal trading ratios to judge these batches of potions as the added value was much more.

What people cared most about was the convenience. A year had passed, and even the knowledgeable four zones had not seen so many potions at once. To a super faction, as long as they took it, they would get much stronger. It would cause a series of effects, and they would get many more benefits.

The next thing would be that they were bidding using depreciating currency. The four and five-star potions were being sold for level three crystals, which was rare. Usually, no one would do that.

The few resistance zone leaders frowned. They evaluated the price and knew that it was very reasonable. The problem was that they couldn't take out so many level-three crystals.

But they weren't stubborn people and had many solutions.

The moment the base price was announced, people started to discuss it, but no one made a bid. After a minute, another faction boss in the third row raised his hand and bid 4 million.

As if he had opened Pandora's box, bids started to jump out like little demons. Actually, most people were just here for the fun. They knew that before the few leaders spoke, it wasn't serious.

But even then, the price reached 4.3 million in a short few minutes.

4.5 million, I want it!

Zhang Hetai waved, and everyone became silent. Be it those who were adding to the fun or those who really wanted the potions, no one spoke. They knew that the real battle had begun.

4.6m. Mu Xinfei followed up.

Zhang Hetai's overbearing attitude could work for others, but it was useless to the few leaders.

4.7! Wen Zhong thought about it and made a bid. He then stared at Ye Zhongming. Although he guessed Ye Zhongming's thoughts, it was an open scam, and he had no choice but to jump in. That didn't feel good.

Let's make it quick, 5 million!

Zhang Hetai wore a jacket, but this bidding made him feel hot. He tossed it to his deputy. He didn't look in front and looked towards the other tables.

This price caused a moment of silence as it was close to their ideal price.

It is actually a good thing for such an item to appear on our internal auction.

Ji Ruiguang's words broke the silence. The few leaders heard it and stopped bidding. They understood what this C Zone boss meant.

They were on the same side, and the auctioneer definitely wasn't from the resistance zone. If they increased the bid, wouldn't it benefit this outsider?

Zhang Hetai and Mu Xinfei kept silent, knowing that Ji Ruiguang would give them a solution to accept. Actually, the two of them knew that they were going to use this price to take these potions and split them.

This was the best solution for the strongest C Zone, as they could obtain some potions while ensuring they remained the strongest.

Although the other zones weren't happy, they were unwilling to continue bidding. They could accept the possibility of getting potions at a cheaper price while maintaining the current status.

Ji Ruiguang was cheating.

Ye Zhongming looked calmly at Wen Zhong.

Wen Zhong scoffed and didn't do anything.

I will help you modify a set.

Two.

Okay, but that thing has a success rate. You can watch from the side when I am doing it.

Deal.

The two of them quickly discussed something others couldn't understand. When everyone thought the bidding stopped at 5mil, he raised his hand.

5.5m.

Oh---

Someone exclaimed. Everyone heard Ji Ruiguang's words; the few zones should have agreed; why did T Zone jump out?

Mu Xinfei, Zhang Hetai, and Ji Ruiguang turned to Wen Zhong.

What was he doing?

If one of you can give a higher price, I will agree with Commander Ji. If not, this batch of potions is mine.

Ji Ruiguang's eyes turned red, and he was enraged.

5.8. This C Zone boss bid for the first and last time today.

Wen Zhong shrugged toward Ye Zhongming, telling him that he couldn't dodge his trap, but he could only make use of him until this point.

Ye Zhongming considered the 5.8m price. Although it was less than he expected, he could accept it.

Finally, Ye Zhongming's special item was sold for 5.8m!

Of course, Ji Ruiguang wouldn't take it all, and the four zones would split it. But how they would split it depended. Ji Ruiguang paid first, but Ye Zhongming would pass the potions to Wen Zhong. This could prevent Ji Ruiguang from taking it all and ensure that they were in charge. At that time, Ye Zhongming wouldn't believe that they would split it evenly with the other two zones.

This was his trap. While earning money, he wanted to increase the conflict of the zones and make them hate each other!

This would make his life more interesting and make T Zone work with him instead of worrying about them betraying him one day.

Wen Zhong saw the potions and didn't initially realize what Ye Zhongming planned. But once the auction started, he realized it all, which was why he respected and helped him.

He knew that T Zone and Cloud Peaks relationship would seem unbreakable to others after this.

After the peak, the auctioneer gave everyone time to digest before saying slowly.

This will be the final item and the true auction. The final three items will not be open bids but secret bids.

Chapter 746: New record part 1

300 bottles.

Half of the people present were stunned when the auctioneer said those words. The people sitting in the seven tables of the first two rows were the strongest of the divisions and outside factions that were strong enough. Those words rang in their heads.

300 five-star potions!

300.

How many people joined the auction? Around four hundred!

How many of them were five-star evolved?

Most of them!

Who were these people?

The bosses of outside factions, the deputy commanders of divisions, higher-ups of the resistance zone, the higher-ups of Sharp Mountain Peak

The elites were the ones that were able to sit in this place!

Most of these elites were five-star evolved.

Why didnt the resistance zone dare to fight Ye Zhongming for his signature weapons? Apart from T Zone protecting him and Xia Bais seven-star evolveds threat, there was another important thing. He had a full 500 five-star evolved squad!

To swallow such a faction, you would lose your teeth even if you managed to eat them up. The Resistance Zone wouldnt do such a thing where they suffered considerable losses to get small wins.

Now, on the auction table were 300 five-star potions. After using them, they could have 300 more elites!

If the one-star to four-star potions impacted everyone like a wave, this was like a tsunami.

The zones had so many five-star evolved, even more than that. The C Zone was about to create c4. It would be a lie if they said they didnt have 300 five-star evolved. Their Broken Blade Division already had that many five-star evolved.

But could they take 300 five-star potions out?

No!

If they had so many potions, they would have just used them. Five-star potions werent common. It would take months to get 300 five-star potions for the entire C Zone. In truth, if they had such a potion, they would use it instantly and wouldnt keep that many.

Thus, the concept of these 300 potions became clear.

Huge sum!

A super sum!

This was a super sum of money for any faction.

After a few dozen seconds of silence, the hall exploded.

Who was it? Who was so rich to be able to sell so many potions at once? Who was it? They didn't use it for themselves and sold it instead.

Many people spoke excitedly to those around them, but they themselves didn't know what they were saying.

They only knew one thing: whoever got these potions would become much stronger.

If C Zone got it, their C4 Zone would form overnight. They just needed to patch things up, and they would be as strong as other zones! Their position at the top of the four resistance zones would get firmer, and no one would touch them quickly.

If it were G Zone or T Zone, they would overtake C Zone and become the top zone. They might not be much stronger, but they would be slightly stronger.

If S Zone got it, not only would their problems be solved, but Mu Xingfei would also be able to attract a group of loyal people. Even if her father stepped down, she could take charge.

As for outside factions, they wanted to get the potions and even craved them more than the resistance zones. But they were poorer and probably couldn't defeat the resistance zone.

Let me add, these items are special, and the buyers' request is special. All the payment must be made in crystals; no potions are accepted.

The auctioneer saw that everyone had digested the shock of the items and had quietened down. Only then did he announce Ye Zhongming's request.

No evolution potions but crystals, this was what he wanted. This was also the reason why he would auction these potions.

He only wanted one thing: to earn the price gap!

Super Elimination Technique was the only reason why he sold the potions!

One star to three-star, his technique was a sure hit. His base price was just ten crystals. As for the four and five-star potions, he had a one-in-three chance of hitting. Thirty crystals, and he could get a bottle.

Earning this gap was where his profits came from.

He would sell the potions he earned to get crystals to spin again, allowing him to obtain several times more potions.

In other places, even if he had the potions, it would be tough for him to sell. There were many rich people in this place who could share the price. Although he would lose some to fees he would still earn a lot. It looked like he had lost 300 potions, but one spin, and he could get 600 or even more.

Before the auctioneer said the base price, there were footsteps from outside. Zhang Hetai was back, and there were six people behind him.

The moment he entered, Ji Ruiguang brought people in, too. To these evolved it took just a few minutes to get from one end of the base to the other.

The bosses of the four zones were here, making the atmosphere more tense. Everyone knew that they were about to face an intense competition.

The workers added a table at the front for Zhang Hetai and G Zone to sit. Ji Ruiguang sat with Delin.

This C Zone commander even glanced at Ye Zhongming, but he was expressionless. Who knew what he was thinking?

Kid, you are a bringer of chaos.

Wen Zhong whispered to Ye Zhongming. His right hand flashed, and the fire skeleton scattered.

Ye Zhongming smiled and didn't say anything.

Commander Wen sighed and officially saw Ye Zhongming as someone on his level instead of a young leader of a new faction.

Wen Zhong guessed that the outcome would be This outcome was something that Ye Zhongming expected. This young guy was really cunning.

Chapter 747: Exquisite Floating Ball

The excitement from the 5.8m price hadn't disappeared when the final item appeared.

Many people came for these three items.

First, let me introduce these three. Some of you might have heard about the first. Right, it is The Exquisite Floating Ball.

There was some reaction, but it wasn't very big. That was because most of them knew this would appear in advance.

I won't introduce it exactly as the few leaders should be clearer about it than me. This Exquisite Floating Ball is a two-degree ball with very good functions. The base price is 300 thousand level-three crystals. You will have five minutes to think about it. Please write the price and hand it to our attendants.

This was the first time he heard the Exquisite Crystal Ball, so he asked Wen Zhong what it was.

It is a high-tech item, and it has many functions.

Wen Zhong described its function to Ye Zhongming, and his eyes lit up.

This was a combination of wheel items and earth technology. The model was designed by a very famous university during peacetime as the items from the wheel got increasingly high level, Smiths, Alchemists, Smelter, etc job appeared. People coincidentally created this model, which many people didn't care much about, and it formed one of the three top weapons of the resistance zone: the Exquisite Floating Ball.

The other two were the Holy Army Coat and Mechanic Fortress.

This was a medium-sized flying tool that reached around a thousand meters. It scouted, measured, attacked, and carried small items.

Moreover, as the wheels technology was being added, this ball had invisibility. It was difficult for flying mutated lifeforms to notice, making it more practical. This was something the few zones craved to have.

However, as the research team was based here and the four zones paid to support them, they were wary of each other. Thus, they had to bid for the items. Half of the price would also be given to the team for research use.

Due to the time constraint, Wen Zhong wasn't too detailed, but the few functions he revealed made Ye Zhongming decide to bid.

Having this thing would be like having a pair of eyes. It could also make up for Cloud Peaks weakness in the skies.

Ye Zhongming was planning to develop flying beasts to fill this area. Xia Bais squad had hundreds of beast babies that could fly, but they would take them to nurture. It couldn't compare to the speed of just purchasing an Exquisite Floating Ball.

How much was this sold last time?

Ye Zhongming knew that he couldn't fill whatever price he wanted. The base price was just a gauge; he needed to know the previous value to judge what others would bid.

Wen Zhong hesitated. He saw that Ye Zhongming liked the ball, but he wanted it too. If Ye Zhongming had participated, this person who had officially become filthy rich would have become a direct competitor. The Zone might lose in the bid.

But thinking about how both sides were working together, he still told him. The four resistance zones had bought this equipment before but paid differently. In terms of level three crystals, it was around 500-600 thousand.

Ye Zhongming understood and asked about what the degrees meant, and Wen Zhong told him the answer.

Five minutes passed quickly, and the workers collected bids from those who wanted to bid. Ye Zhongming thought about it and wrote a price.

To ensure fairness, the auctioneer invited a high-level Sharp Peak Mountain worker and one of those in charge of the design to monitor. They opened the notes and matched the prices.

After seeing all the notes, the three took out one note together and passed it to the auctioneer.

I will announce the bid price. The auctioneer looked around and then showed everyone the note: Cloud Peak, Ye Zhongming, bid, 1.05 million level three crystals.

Everyone exclaimed, but Wen Zhong cursed him for wasting money. Ye Zhongming laughed when he heard that. Since he decided he wanted this, he would naturally be willing to spend. He was even afraid of someone being as rich as him, so he bid an additional 50 thousand.

Zhang Hetai, Mu Xinfei, and Ji Ruiguang looked over with differing expressions.

Mu Xinfei wasn't unhappy and was even happy. To her, if she couldn't get it, then Ye Zhongming getting it was the best outcome.

Ji Ruiguang frowned and was disgusted by this young man, who definitely wouldn't be friendly to C Zone.

As for Zhang Hetai, he had a cold smile. He didn't hide his displeasure towards Ye Zhongming and even had some killing intent.

You are messing up the market; you will become the public enemy.

Ye Zhongming didn't care and waved, In this day and age, money is king.

Wen Zhong, Guang Yao, and Little Xiu heard those words. Even Zhao Xingmei and Liang Chuyin were speechless.

A worker said some words to Ye Zhongming, and he expressed that he would use what he earned from the auction.

The two remaining items are prepared by Cannibal Chain. We hope to surprise all of you.

The first, Extreme Light Training Platform.

When he said that, the few workers carried a metal room the size of half an ordinary room. Its metallic and high technology feel attracted everyone's attention.

Everyone knows that the evolution potion can only push our body's stats up, but it can't give us battle experience. We are rookies with good bodies, but we can't use our strength in battle. More of it is a battle of evolution level, equipment, and numbers.

All of you are faction leaders, and you should understand the losses caused by your inability to use the strength that you have. But if you don't want such regret, you need evolved to battle and gain more experience. But these losses cannot be avoided.

Chapter 748: Want or not

This Extreme Light Training Platform can help to solve the problem. You just have to put various mutated lifeforms in, and the training platform will record their abilities and data to form a training segment. Evolved can enter to train and fight these mutated lifeforms in a very realistic environment.

Please note that you can select the mutated lifeform levels. This means that even if you placed a level one mutated lifeform on the platform to train, when the evolved uses it, he can select level nine!

This thing might be problematic to use as you need to capture mutated lifeforms, but it is very useful. It can allow evolved to gain experience. Think about it: Wouldn't their losses be reduced in future battles when your warriors pass the strict training and have experience? Wouldn't that save on evolution potions, equipment, and scrolls?

The auctioneer purposely paused before continuing, I know everyone has many questions. You can ask me, and I will reply individually to help you understand the equipment and sell this for a higher price for Cannibal Chain.

Someone laughed in reply to the auctioneer's humor.

Is this thing tough enough? Would a high-level mutated lifeform just destroy it?

The people at the back asked.

The auctioneer smiled, Dont worry, we placed a level-seven beast in, and it was in there for half a day. Even after it got exhausted, it didnt make its way out. The internal parts of the platform were also perfectly fine.

Many people exclaimed.

Even the strongest evolved now didnt dare to take a level-seven monsters full-strength attack.

How real is it?

Mu Xinfei spoke. Such battles were risky. It could make warriors get used to things and thus make judgment mistakes during real fights. Such a situation wouldnt help them and would instead hurt them.

This core problem made the auctioneer solemn.

I can use Cannibal Chains honor to promise it is very realistic. Moreover, the strength and skill replications are all correct! Dont forget, it came from the wheel; humans cant make such a thing.

Mu Xinfei nodded and was satisfied with the reply.

How many mutated lifeforms can it record? After recording, what would happen to the mutated lifeforms?

Zhang Hetai asked, and it was obvious that he cared a lot about the equipment.

After recording, the mutated lifeform would enter a coma. The auctioneer replied to the second question before answering the first.

We dont know the upper limit, but we can only say a lot. There are over 100 mutated lifeform data inside. This is an added gift from us. Moreover, these mutated lifeform data only filled 1/10000 of the data space! I estimate that it can record a few million lifeforms.

Zhang Hetai nodded. He sat back down, and he was shocked.

This was one of the few auctions that the alliance meetings had, and he hadnt expected such a good item.

The auctioneer replied to some questions, and his explanations were clear.

Energy source?

Ji Ruiguang asked.

This thing wouldnt be free, and some energy ran it. If the source were demon crystals, if the consumption were huge, the training costs would be expensive. This was a core problem. The C Zone commander showed his sharp foresight.

The auctioneer gave a simple reply, Sunlight.

He walked to the side of the platform and pointed at a screen, This is the energy bar. We tested. After filling with energy, it can train people for over 50 hours. Of course, the energy consumption

would be higher when recording mutated lifeform energy. For example, when recording that level-seven lifeforms energy, it consumed of the energy.

Seeing that there weren't any more questions, the auctioneer walked back to the stage and said, Golden grade equipment, base price 1 million!

Many people sucked in a cold breath.

Too expensive!

One must know that the Holy Army Coat only sold for 430 thousand. If not for Ye Zhongming stirring trouble, the Floating Ball would be sold for 500 thousand. Didn't you see the level seven pet baby was only 200 thousand?

Who knew that the Cannibal Chains item had a million base price?

Was this better than a set of Holy Army Coat and Exquisite Floating Ball?

This was just a training simulator.

Many people who wanted to bid hesitated.

Still five minutes. Please bid after.

The auctioneer told the workers, and they walked to each table, waiting for their bids.

The auctioneer was nervous. He increased the price himself, and it was initially only 500 thousand. But when he saw the batch of evolution potions, he decided to raise the price of the final two items. At least one of these people could buy these items. He had been in this job for a long time and had a good grasp of psychology. That person would be excited after earning a huge amount and couldn't control his spending. He was betting that the person would spend on his two items.

At most, it would just go without a bid!

The four resistance zone leaders considered it. The platform's value was high to them, as they had many subordinates. However, the price was higher than expected, and they wanted to see if it was worth it.

To these bosses, human life was the least valuable thing. It would be good if fewer people died and they could save on evolution potions. But if this were too expensive, it would affect their evolution and strength.

Ye Zhongming had to consider that, too.

So, only 7-8 people bid when they submitted the final bid.

Ye Zhongming bid, too, but he didn't bid high like the auctioneer thought. He just gave a price he felt was reasonable.

The auctioneer and the other two continued to look at the slips; they took one out.

Let me announce the winning bid of the Extreme Light Training Platform

Chapter 749: One step board

Cloud Peak, Ye Zhongming, bid of 1.42 billion level three crystals.

Oh---

The crowd exclaimed once more, because of the price and also because of the person that got the equipment.

Usually, in an auction with three prizes, these three items wouldn't end up with the same person. After all, there were many strong factions, and none was far stronger than the rest.

But now that two of the three were obtained by one side, this situation was surprising.

Moreover, this price wasn't much higher than the base price, and whether the price was reasonable depended on the true value of the thing.

Was it good? Definitely! Was it worth so much? Many people didn't think so!

The money could be used to equip a medium-sized team, and the benefits in the short term would be much better than increasing people's experience. Moreover, these factions were best at using their advantage to snowball, so this machine was too expensive and wasn't suitable for them. To the few bosses, 1.2 was the max.

Who knew that a fool would buy it for 1.4million? Did he have too much money?

This time, the few bosses looked at Ye Zhongming with a more complicated expression. They felt he was a fool, but could a fool be so rich? So who was the fool? They were lost.

Ye Zhongming was surprised himself. He followed the development path and habits of Cloud Peak and felt like they were useful. So he gave a reasonable price. As for the 20 thousand, it was just to disgust people.

Who knew that he would hit?

Of course, he could give this price because Cloud Peak decided to train elites. He couldn't have large numbers of people like the resistance zones, and weren't animals like Soul Merchant able to capture humans and use them as pigs?

Ye Zhongming could only slowly develop his faction and survive among the mutated lifeforms and huge factions. Every warrior loyal to him and Cloud Peak was precious, and he didn't have the right to waste them.

Especially after having the two labs. Cloud Peak needed more trustworthy people to protect in case their core things got leaked. Apart from Ye Zhongming's past life experience, this was the only thing he had to battle the other factions.

Cloud Peak's warriors were all the same people. The core members were those who started with him. There were two groups of warriors: those who were under the most pressure when Ye Zhongming entered the Secret Realm and the ones he saved from Soul Merchant, who were primarily female.

They were loyal. Who knew how much effort it would take for new joiners to reach that loyalty level?

Under such a situation, the old warriors were better, and the training platform could achieve that.

Still, the old rules, the price would be deducted from his earnings. He calculated. Half of the money he earned was gone, with one more item left.

The auction entered the final round, and everyone paid attention. They looked forward to seeing whether this auction would offer more surprises.

The auctioneer suppressed his excitement about the bidding amount today and announced the final item.

The final item is One Step Wheel!

The two beautiful female attendants pushed a square table, on which was a golden piece of cloth. It wasn't high just a meter tall but it looked like a circular item.

The auctioneer took off the cloth and revealed the item.

Everyone exclaimed.

The people at the front saw the most clearly. They also moved forward, and some even stood up in disbelief.

Even Ye Zhongming had his mouth agape and didn't know how to describe his feelings.

He thought that wheels couldn't move and it would just appear in a fixed position. People would obtain items and abilities from the wheel and build bases around it.

Like ancient rivers, the wheel nurtured humans.

This was the concept that many people believed in.

But it was broken.

A small wheel was on the platform; more importantly, it could move!

Everyone can see that this is a wheel, a Very special wheel.

The auctioneer's tone was complicated. Even if he knew this thing existed, he was still emotional when he saw it.

Strictly put, it is an equipment as it has a level. A purple light shone.

It is a purple equipment, the highest grade we know so far.

Grey, white, silver, green, blue, gold, purple. These were the grades humans knew now, and purple was the highest.

It is special because of the few points. The auctioneer started to describe the equipment wheel.

First, this small wheel can be spun, and you can draw prizes. This is the same as normal wheels, so you can gain things from it.

The difference from normal wheels is that the prizes can only be drawn once. Once you drew an item, the thing would disappear.

Thirdly, the One Step Wheel only has eight choices: four are rewards, four are punishment.

Fourth, the wheel needs level seven crystals!

Chapter 750: Heaven on the left, hell on the right

The people here were at least captains. They looked at the wheel and heard the auctioneer's explanation, and they roughly understood its use.

It was a wheel; the difference was that it could move. In other words, you could bring it away and spin it when you wish.

The level seven crystal requirement made one tough-tied, but the eight regions on the wheel attracted the most attention.

Ye Zhongming did the same as the others and stared at the eight regions.

The auctioneer mentioned four rewards and four punishments, which made Ye Zhongming salivate.

The most eye-catching reward was the potion in the middle.

Seven-star evolution potion!

The stronger one was, the more they craved this potion.

A year had passed, and the average human evolution level was two stars, moving towards three stars. What about the elites? They were four and five stars!

The humans standing at the top of the human pyramid were all six-star.

Wen Zhong, Ji Ruiguang, Zhang Hetai, Mu Xinfei, etc were all at that level.

They were the bosses of the resistance zone, and they controlled the entire zones resources. Although they didnt use everything on themselves, they leaned towards supporting themselves.

But they still hadnt reached seven-star.

Did the resistance zone have a seven-star? Yes. But there was only a handful of them to threaten high-level mutated lifeforms and other countries resistance zones. As well as to do some special missions.

Why were there so few seven stars? Because of the lack of crystals.

Based on the rate, 100 crystals could get the potion of the same level. To get a seven-star potion, these bosses had to kill 100 level seven lifeforms.

Even if the mutated lifeforms were evolving fast, very few reached level seven.

Moreover, there werent many solo mutated lifeforms. These solo lifeforms were very powerful, or the rest lived together. It was tough to kill a level-seven mutated lifeform.

They had to find, hunt, and suffer from the low chance in the wheel.

No one could find so many level seven crystals like Ye Zhongming.

As for this wheel, it had a level seven potion and only had eight regions. The success rate was 12.5%, 2.5% higher than normal wheels.

This small success rate increase might save 10-20 crystals.

Just this point alone made these bosses interested.

The second reward was a scroll. It shone brightly, and it definitely wasnt an ordinary item!

Before getting it, no one knew what it was.

The third reward was a book equipment, which made Ye Zhongming think about the Sky Boat Book. But this book was better as it gave off a golden light.

The last reward was also a piece of equipment, moreover Purple!

An exquisite full-body light armor that tempted everyone.

This was the only equipment Ye Zhongming had seen up until date that could compare to the outer appearance of the Ocean King Crown.

A seven-star potion, a precious scroll, a special book, and purple defensive equipment.

Each one of them was worth a huge amount!

No wonder this thing was the final auction piece! It was different.

Many people were tempted after seeing the items. They started to guess what the uses of the scroll and books were. They even wanted to guess how high the defense of the armor was.

But the first row had calmed down, and they looked at the punishment.

The moment they saw it, they smiled bitterly.

The first punishment made the commanders helpless. It was the diagram of a level-eight monster. A level eight monster would battle you if one was unlucky and drew this. If the strongest human was only level six, one could imagine how much damage this level eight would do.

The second punishment made them feel numb. It was a talisman called cursed talisman. There were some curses on it. Everyone saw that it was a Soul Absorbing Curse; if it were activated, ones soul would be absorbed.

This was bad as without mental energy, one couldnt use job skills and job. No matter your level, your strength would drop by 80%. Even if you were a body cultivator, you needed mental energy when using skills.

Moreover, what made the bosses speechless was that this curse would land on the person who used the rewards of the wheel instead of the one who spun it.

This Meant that the bosses couldnt find a scapegoat to spin the wheel.

The third punishment was glanced across as another unavoidable crisis--- Two Extreme Hit.

Extreme cold and extreme magma.

When you hit this, two extremes will appear around the user; he could only live if he survived.

But with how terrible the wheel was, this thing differed from regular ice and magma!

The final punishment was more direct. Similar to the colored wheels, it would explode, but it was All the rewards exploding!

The moment you hit this punishment, the reward and the wheel would all explode, and the damage would be terrifying.

If you used the seven-star potion and spun this punishment, you would definitely die. Little Xiu trembled when she saw the punishment and felt that this wheel was too vicious.

The others felt the same way when they heard it.

At this point, everyone understood why Cannibal Chain auctioned the wheel and also understood why it got its name.

Heaven on the left, hell on the right.

This was the best description of the wheel.

What does your Cannibal Chain mean? Can this thing be used? Delin frowned and looked at the auctioneer with animosity.

But he didnt care and smiled, If it is the same as the wheels outside, then I wouldnt have brought it here, right?

Everyone knows what the apocalypse is like. Isnt it just a gamble? It is so dangerous outside, and we already gamble. Isnt it worth it to gamble on this wheel that is even higher-class, where we get even better things? If everyone thought about it, they could think of many ways to spin the wheel, right?

Hearing the auctioneers words, many people were deep in thought.

If they could find someone willing to sacrifice, it was worth a gamble. If they got it right, then it was a win. If they failed, then

Okay, the base price is also 1 million level three crystals!
