

## Apocalypse 751

Chapter 751: I didn't bring money

After the auctioneer announced the price, the hall was weirdly quiet.

Everyone was considering the wheel's pros and cons to decide if they would bid and how much they would bid.

One couldn't deny that the rewards were exceptional. Each one of them was something survivors craved.

But not only did one have to consider the price, but they also had to consider what they would do after they got it.

If they knew the solution, this item would be valuable. If they couldn't, they wouldn't even bid. That was reality.

Cannibal Chain wasn't stupid. If the rewards from this thing were so easily obtained, they wouldn't have auctioned it off.

Look at how they took the Extreme Light Training Platform. They bet you would be tempted, but the item wasn't irreplaceable.

People weren't fools.

The bosses frowned and were deep in thought. The auctioneer didn't disturb them either. He didn't tell them about the five minutes and just waited silently.

He glanced at the wealthiest person, Ye Zhongming, and then he had a shocked look on his face.

He saw that Ye Zhongming didn't even hesitate. Ye Zhongming was really calm and He didn't care at all.

Right, this was the first time he saw such a casual expression from an evolved who faced the wheel for the first time.

Why?

Did he think that the rewards weren't good? Or he wasn't interested in the item?

This made the auctioneer's heart sink.

This young man's two bids earned him more money than he expected. It would be a massive loss if he gave up on this bid.

But the auctioneer couldn't keep everyone interested; he could only pray that others bid higher.

Although he knew that the wheel had a gambling element, for businessmen like Cannibal Chain, it was less attractive than actual crystals.

Seeing the few bosses relax, the auctioneer told the attendant to collect the slips.

Ye Zhongming took the pen and wrote a number. This made the auctioneer who had been observing him to heave a sigh of relief.

Wen Zhong also handed in a bid. He turned to Ye Zhongming and said, You bid again? Do you want to get all the final three items? You will become a public enemy.

Ye Zhongming shrugged, None of you want to spend money.

Wen Zhong was unhappy. Dont want to spend money? They had different numbers of people. How many members did Cloud Peak have?

This will be tough; I didnt write a high price.

Ye Zhongming touched his chin, and he wasnt confident in the price he gave. He regretted writing such a low price.

How much did you bid?

Hearing the regret in Ye Zhongmings voice, Wen Zhong asked with slight interest. He didnt mind winning this boss who had been tossing money about.

2.0675million, haiz, I wrote too little.

Wen Zhong turned his head and looked back at the auction stage. He decided not to bother with this fellow.

The three people checked the slips, and when they saw one, they looked shocked. The people from Sharp Peak Mountain even raised their heads to look at Ji Ruiguang.

Everyone sighed. They guessed that Ji Ruiguang had given a high price, which might even be the final price!

Ji Ruiguang rested on his chair and drank the wine quietly as if it had nothing to do with him.

When all the slips were opened, they said something softly. The auctioneer had a smile on his face, and it was time to announce the winning bid.

Now, let me announce the results of the final item.

He looked around and attracted everyones attention. He said loudly, The winner is Cloud Peak, Ye Zhongming, bid of 2.0675 million level three crystals.

Many people opened their mouths, and they couldnt accept the outcome.

2.0675million?

Did he need to use so much money on something he needed to gamble on? He was so sure he could win? Also, isnt Cloud Peak too high-profile? They bought all three items; they were just looking down on the resistance zone. Right, what is with the weird bidding amount?

Ji Ruiguangs expression was bad. He didnt expect his 2 million bid to fail. He thought that it was definitely going to him.

Ji Ruiguang had decided to buy it the moment the wheel appeared. He had a special way to hide the punishment, greatly increasing the chance of success!

His hesitation was an act!

Who knew that bidding double the base price couldn't succeed? One must understand that the auctioned items were all good, and their prices could be considered in the millions. Bidding 2 million was already a high bid.

Those batches of potions were only 5 million; this price was nearly half of the potions.

But he failed! Moreover, it was just 60 thousand crystals less.

Ji Ruiguang was so furious that he felt dizzy. He didn't look at Ye Zhongming, who had the final victory, but his eyes were filled with killing intent.

Wen Zhong shook his head slightly. He only bid 1.6 million and thought that he could have a shot. But reality told him that he was indeed too stingy.

The auction ended. Ye Zhongming and Wen Zhong went to the back and paid for the items. Moreover, they took the items they won.

To Ye Zhongming, he had gained a lot. The three items could increase his strength by a level.

But on the way back, Wen Zhong asked Ye Zhongming curiously. Why did he add so many weird digits at the back?

Ye Zhongming replied to him like he was looking at an idiot, That was all I had; you do know that I didn't bring any more money.

Wen Zhong, ...

Haiz, Cannibal Chain, and you all are so dirty, you want to deduct a quarter for fees. If this continues, you will lose your image in the long run. Lower the fees next time!

The three from T Zone decided to ignore him today.

Ah Yang brought some people over and took the three items from T Zone. After learning about what happened from Liang Chuyin, they were impressed.

You spent all your money, then how will you earn more?

Liang Chuyin knew that Ye Zhongming had the elimination technique. Such a thing couldn't be hidden from those around him. She also knew his plan, so she was slightly worried when she saw that the crystals were all used to purchase these three things.

Ye Zhongming looked at the platform, Send a notice, everyone can use the golden equipment. Based on the differing fighting levels, 10-100 level three crystals will be charged each hour!

Chapter 752: Self created gold equipment

Ye Zhongming sat on the ground with a silly smile on his face. Beside him was half a bottle of water.

This was his third day here, and he had spent the time studying the 600-700 square meter Exquisite Floating Ball.

With Ye Zhongming's Smith job, after 50 hours of no sleep, Ye Zhongming finally understood what this was.

If the Resistance Zone had obtained this, they would have known how to use it. After all, one of the Exquisite Floating Balls' goals was to serve them. It was an accident for Ye Zhongming to get it.

Although Wen Zhong told him how to use the ball, Ye Zhongming was still wary.

This was a combination of human and wheel technology. It was also something the Resistance Zone made themselves, making Ye Zhongming wary.

He was afraid that people would scam him with it.

Monitoring was a small thing. If he used it in battle and it hurt him instead, it might affect everything. Ye Zhongming wouldnt allow such a thing to happen.

If Le Dayuan had been here, it would have saved some time. But he wasnt, so he had to do it himself.

But this was high-tech, and Ye Zhongming, as someone who hadnt graduated from university, didnt understand it. So he used the most simple but exhausting method.

Strengthening!

He treated this as his own item so he wouldnt fear people leaving tricks inside.

This fellow was bigger than a room, so it was impossible to completely strengthen it. He tried and found that it needed too much mental energy, so he couldnt afford it.

This things size and complexity were not what strengthening could handle.

After ten years in the apocalypse, Ye Zhongming had all the patience and perseverance. He tried it out bit by bit and also used his relationship with Wen Zhong to hire the designer to help. He broke it apart and then strengthened it piece by piece!

That designer was stunned. The reassembled Exquisite Floating Ball actually gave a golden glow!

Strictly speaking, this was created by humans. Without a blueprint, it wouldnt be listed as a wheel item with grading. But this thing turned gold!

This was why Ye Zhongming smiled.

Ye Zhongmings gold equipment included Blood Stepping Boots, Gate of Sacrifice, etc. Now that he had another, he was naturally happy.

Moreover, this golden equipment was different from the others.

Flying was its specialty. It could also float.

Defense 2000!

That number shocked Ye Zhongming.

2000, he had never seen such a number! This was a number that crushed many things.

The Dolls attack was terrifying, but didnt even reach a thousand. So, in terms of numbers, Ye Zhongming didnt have anything to break its defense.

Next were its other abilities, which were turned into data after it became a piece of gold equipment.

Ability 1, Neutral Laser. Fire lasers from its eight holes, four towards the sky and four towards the ground.

Ability 2, Spinning Fortress. The metal on the outside will spin when it is being attacked to help block a portion of the attacks.

Ability 3, Dust Monitoring. Based on the activated energy, the ball can monitor 2000 square kilometers of land. The smallest unit it can capture is one centimeter.

Ability Four, Gravity Crush. When needed, the ball can seal itself and use ten times its body weight to roll over someone. But at the same time, its defense would drop to 1000.

Ability 5, self-structured weapons system. Add weapon systems to it without breaking its core structure and affecting its flight.

Ability 6 (Temporary), Jet Machine Gun attack, 2000 bullets.

Ability 7 (Temporary), Arrow 3 Missile attack, 5 left.

Ability 8, self destruct. When the order is given, self-destruct the core reactor.

Ye Zhongming didn't know if this thing was taken apart before being handed to him, but its abilities seemed decent. It had attack and defense. Moreover, Ye Zhongming liked the self-structured weapon system. It meant that Cloud Peaks crystal weapons could be attached to it.

Of course, Ye Zhongming wasn't a researcher. He still didn't know some of the internal controls, and it would take him some time to get used to them.

The researcher's departure spread to the others, and Liang Chuyin walked in. She saw Ye Zhongming covered in dirt and sitting there; she handed the food to him.

What is going on outside?

Ye Zhongming ate while enjoying her massage.

Wen Zhong came once daily, and he probably has something to tell you. Liang Chuyin observed his reaction and adjusted her strength while reporting what happened in the two days.

The Extreme Light Platform is very popular and hasn't been left empty. In two days, we collected 2500 level three crystals. Those commanders didn't seem interested during the auction, but are so passionate now.

Ye Zhongming smiled, The soldiers' lives are their own. To the commanders, they don't mean much.

Liang Chuyin tilted her head and understood slightly.

After communicating with the outside world, she understood their difference from the outside factions. The Extreme Light Training Platform might be useful here, but outside, no big faction leader would be willing to spend much money to purchase it.

Right, that S Zone interim commander Mu Xinfei came several times, and she seems anxious to meet you. Liang Chuyin paused, She also brought Bai Sisi.

Bai Sisi's performance was too obvious. Liang Chuyin realized that she knew Ye Zhongming and their relationship was not ordinary.

To see that seemingly weak but determined woman, Liang Chuyin felt a sense of danger.

Ye Zhongming felt her hand slow and smiled while drinking. He tapped her bouncy butt, Stop overthinking, have some confidence.

Liang Chuyin bit her lips and hugged his neck.

There is a bed inside the Exquisite Floating Ball, right?

...

### Chapter 753: Accumulation

Sharp Peak Mountain didnt have a difference between night and day, but the few entrances were on guard during the night.

The nights of the apocalypse were far more dangerous than times when there was light.

Today, the entrance was guarded by C Zone warriors.

There was a commotion from far away, and the guards became solemn.

Teams moved in this direction.

The teams werent orderly, but each moved in specific areas. If anything happened, these evolved could spread out within a few seconds.

Each held a uniform weapon of at least grey grade. The weapons were all the same, like their attire.

A person appeared at the entrance, which made the guards nervous. They bowed when they saw who it was.

Commander!

Ji Ruiguang nodded, and he squinted his eyes at the team.

Uncle Ji. Delin walked to Ji Ruiguangs side and shouted. He called him that when no one was listening.

Delin, this operation was very important. I sent C1s three core teams, Broken Blade, Sharp Titan, and Flying Swallow, as well as C2s Cloud Naga, North King, and Shining Capital. Six squads worked together and with the Mechanic Fortress. Most of C Zone is here, so we cant have any losses.

Delin was solemn, Yes!

Our advantage is that we know more than others, but we have to pay a price for that. We have to do more. I dont know what would happen or what others would think of us, but I know we are doing this to end the apocalypse. So that the remaining humans can have a better life.

He looked at the troops past the exit. The few squad leaders were here, and they heard what he said. They stood there solemnly.

If we win, we will get much stronger. If we lose, the C zone will fail to rise. I must remain here, so what happens depends on all of you.

Ji Ruiguang turned around and looked at his subordinates. He raised his voice.

We have to win.

The leaders replied firmly, which gave Ji Ruiguang a satisfied smile.

Then, I hope all of you return victoriously.

Wen Zhong looked at Liang Chuyin in shock. Why did she look shiny today?

Why did the commander find me?

Ye Zhongming respected this partner. Strictly put, this was the first proper ally that Cloud Peak had.

First, we have decided to hunt the level-eight iron giant. We will head out in three days. Make preparations. Guang Yao and his Sky Elephant Squad will follow you.

Ye Zhongming nodded. Since he agreed to work with Wen Zhong, he had to join this battle to be recognized by the entire Resistance zone and learn more about the secrets.

The second thing. You have to be recognized to open a shop in the trading market, so you cant do it now. But I got you a small store; you can start a booth first.

This was better than nothing, so he nodded.

Third, I paid attention to the information you cared about, and there were some similar things. But I am not sure, it is too far away. There is only one region that fits what you said.

Ye Zhongming straightened his back, Where?

Wen Zhong was prepared and passed him a map. He pointed at a region, This place is 300 kilometers from Sharp Peak Mountain.

Ye Zhongming looked at it closely and compared it to his memory. After thinking about it, he felt like there was a high chance that this was the place he was searching for.

Such a high possibility was worth him taking a risk.

Ill take this. Ye Zhongming kept this military use map, which caused Wen Zhong to shake his head helplessly.

As for the teleportation equipment, honestly, no one will be willing to sell it unless you pay a far higher price. I sent people to contact, but they are far away. It would be best if you waited for some time, and the success rate isnt too high. They will rip you off, so you must think carefully.

En, I will see the price first.

The two of them spoke, and Wen Zhong said goodbye. A few minutes later, Mu Xinfei came. She told someone to take note of what was happening here. Bai Sisi also followed her.

Can I speak to you alone first?

Who knew that Bai Sisi would be the first to speak? Even Mu Xinfei was shocked.

Ye Zhongming looked at them and nodded. The two of them stepped into the room and went to the roof.

There was no wind in the mountain, and the light was dim. These two, who were close to each other, stood together after a year and had differing emotions.

I wont ask if you are okay; you look good.

Bai Sisi smiled and then looked at the guy whom she thought she would never see again.

She wanted to pounce into his arms, not caring if he would hug or push her away.

But her pride made her stand there with a slight smile.

You How did you end up with Mu Xinfei?

Ye Zhongming looked away at the city within the mountain.

I remember every word you said. Did you know that the apocalypse was coming? Bai Sisi didnt reply to his question but asked him instead.

He hesitated and nodded.

Bai Sisi pinched her fingers. After the apocalypse started, I Fled outside with some people and met many zombies. I thought I would die, but I met Mu Xinfei and her father. They recognized some of the people I was with, so we followed them. I followed beside her.

Mu Xinfei is here because our S Zone isnt in a good situation. Her father is badly injured The other regions and S Zone dont know what is happening, but they are eyeing Mu Xinfei and her S1. So she isnt in a good state and hopes you can help.

Bai Sisi nodded and looked towards Ye Zhongming. Due to the sharp senses of the evolved, she could even smell the familiar scent on his body.

I beg you to help her. Bai Sisi took a deep breath, like she was afraid Ye Zhongming would reject her. I know that the apocalypse is all about interests. I also know that you are working with T Zone, but I hope that you work with her. She really needs help. As for the conditions, you can give something reasonable, like how it is with T Zone.

Chapter 754: Another way of control part 1

Where is Sisi?

Mu Xinfei was confused when she saw only Ye Zhongming return.

She said that she would head back first.

Ye Zhongming sat down, thinking to himself.

Mu Xinfei guessed what her friend had told Ye Zhongming, and after thinking about it, she told him what she had hoped.

S Zone was in a terrible situation. Because of her fathers injuries, things were unstable internally. The entire S2, even S1, had people tempted. They wanted to break free from S Zone and away from Mu Xinfeis fathers control.

If not for the resistance zones alliance not being easily broken and them not being sure of her fathers injuries, things would have changed in S Zone.

Even then, because of internal disputes and also the eyes of external factions, S Zone was the weakest of the four.

If this situation continues, maybe S Zone will be swallowed by the other three zones! At best, they would be forced to change commanders and made to reorder.

This was what Mu Xinfei wasnt willing to see.

Finding outside help was the best road. Mu Xinfei tried before. This time, in Sharp Peak Mountain, apart from C Zone, S Zone was the one that invited the most outside factions. But reality dealt her a

heavy blow. Two of the factions leaned towards the S2 zone. Mu Xinfei spent a huge amount but received no returns, which worsened her situation. More people in S1 objected to her.

One could say that she was on the edge of losing her job.

If someone else took over, they wouldn't allow the father and daughter who had some influence inside to live.

This was why she was anxious and why Bai Sisi begged him.

Maybe because of Ye Zhongming and Bai Sisi's relationship, maybe because Mu Xinfei had no other choice, she didn't hide her situation and told Ye Zhongming everything.

Ye Zhongming analyzed and knew that she didn't lie to him. Before they negotiated, telling him all of this gave him a chance to increase his price.

How do you want me to help you?

Ye Zhongming looked at Killing Rose and asked.

First, I hope you can help me craft a squad with full silver equipment.

Mu Xinfei looked at Ye Zhongming and bit his teeth, directly telling her what she wanted.

Next, I hope to get your new crystal weapon.

Also, can we form a strategic alliance? To help and take a look out for each other?

Lastly, if possible, can you allow my subordinates to use the Extreme Light Training Platform first? You know I only have one or two squads loyal to me; each warrior is precious, and I don't want them to die.

Ye Zhongming nodded and didn't reply.

He had agreed with Bai Sisi to help Mu Xinfei, but it didn't mean he would unconditionally help her. His help would be beneficial for Cloud Peak.

Ye Zhongming thought about it and said, Your condition is to strengthen the forces in your hands. You even want to pull Cloud Peak into your conflicts with other factions.

Mu Xinfei was stunned. She didn't expect Ye Zhongming not to negotiate and instead started to talk about her conditions. But she didn't deny that he was telling the truth. As long as her forces were strong enough, no one could shake her father and her position.

She didn't think that it was wrong.

Maybe we can change methods. Ye Zhongming said seriously.

Honestly, your conditions are too confident. Ye Zhongming pointed at the core of the problem: Based on what I know, the Mechanic Fortress is in C Zones hands, the four zones share the Exquisite Floating Ball, and the T Zone has the Holy Army Coat. Your S Zone, and you have nothing.

These three are the only things that can compare with Cloud Peaks crystal weapons. But you don't have any of them, and you don't have any elite items. Why should I hand the crystal weapons to you?

Her face was white, and she opened her mouth slightly but didn't make a sound. She knew what the crystal weapons meant, and she also knew that the T Zone worked with Cloud Peak, using the Holy Army Coat as the basis. Her S Zone didn't have anything good enough.

Also, allow me to be direct. Your silver equipment squad is preposterous. My Cloud Peak isn't full silver, so how can I put your squad ahead of mine? Even if I don't equip my people first, Ying City is before you. They have followed me through life and death for months and should be rewarded.

Even!

Ye Zhongming didn't hold back and continued to hit her, Even if there is only one squad that is loyal to you, around five thousand, I don't think that you can afford five thousand sets, 30 thousand silver pieces of equipment!

One silver piece of equipment is worth a four-star potion outside!

The resistance zones crafting job development was far above those of outside factions, but even if you added all their smiths together, they couldn't produce equipment as quickly as Ye Zhongming. Only their intermediate smiths could craft silver equipment, and they did so using weeks as the timeframe.

Look at the strongest C Zone, and you will know. Their Broken Blade squad only had a high proportion of silver equipment; it wasn't a fully silver squad.

The weak S Zone couldn't do that.

Ye Zhongming knew that his huge mental energy and great materials were something the other smiths couldn't achieve. He didn't plan to sell that.

The other two Mu Xinfeis face was ashen white, and didn't give up.

He waved, I don't think there is a need to reply to them as the answer is obvious. I have better partners to form a strategic alliance like T Zone. As for the Extreme Light Training Platform, as long as you can pay, you can use it when we are still in Sharp Peak Mountain.

Mu Xinfeis chest rose and fell. She suppressed her frustration and sadness and tried to speak: I know that these things are only useful for us, but we can use other areas as compensation.

Ye Zhongming looked at her calmly. The contempt in his eyes made her feel helpless. She rested on her chair and lowered her head. Her eyes started to turn red.

She saw Ye Zhongming as her saving grace, but he was going further away from her.

Chapter 754.5- Another way of control part 2

You care too much about the interest exchange. Maybe you think that that would answer to your friend who gave you the chance and help to protect her pride. But sometimes You can change the way you think.

Ye Zhongmings voice entered her mind when she was in despair, waking her up.

Ye Zhongming looked at Mu Xinfei and told her what she wanted to hear.

Actually, there is more than one exchange. Another, is called investment.

Mu Xinfei moved forward and felt like Ye Zhongming was discussing something that could benefit her more.

I cant meet your silver equipment requirement but can help you. Moreover, I can use the materials and blueprints you provide. I will craft. You just have to pay some fees; that would reduce your burden.

Hearing Ye Zhongming say that, her eyes lit up, and she slapped her own leg. She blamed herself for losing her intelligence and not even thinking of such a simple solution.

The Resistance Zones basic structure was formed before the apocalypse. Even after the apocalypse started, only a few survivors were absorbed. The core people were still those from before. These people start to betray you. So, didnt you think about creating a new squad that is fully loyal to you?

New squad? Loyal?

Mu Xinfei was astonished.

She did think about this but pushed it aside. S Zone was in chaos, not to mention a new squad; she couldnt even control her own.

Moreover, was it so simple? Riches! Thousands of potions, tens of thousands of equipment, and weapons. A large amount of job scrolls and skill scrolls Which could be obtained easily?

Even C Zone, which was so rich, had to split up their teams to create a new division and wanted the three zones to help. She was an interim commander about to lose her position, so how could she start her division?

But Ye Zhongming wouldnt say so without a solution. She suppressed her excitement, You, you are saying?

I will help you build such a division. I will provide the potion, equipment, and even job scrolls. You will find suitable people. I think this wouldnt be tough for the resistance zone that has so many people?

Wen Zhong told him these. Each resistance zone brought many ordinary people into their defensive zone. Of course, some were skilled or educated, and some were their families.

After the apocalypse started, these people evolved, but their relatives didnt have a chance to evolve. To date, these humans didnt dare to fight zombies or mutated lifeforms and, thus, didnt evolve.

They also took in more survivors as a workforce, so there were more ordinary people.

It was possible if she selected people from here to build a squad.

Even if these people werent strong enough, she could absorb members from the outside world to complete it.

Ye Zhongming waved, You can move some of your core members into the new division to become leaders; it would help your leadership.

As long as they form, I can let them undergo basic Extreme Light Training Platform training.

But what do you want?

Mu Xinfei didnt lose track and asked quickly.

Ye Zhongming smiled, You cant give me a satisfactory payment, but you just need to agree on a few things. I can consider this an investment. Once you control S Zone, we can then talk about payment.

Mu Xinfei didnt agree and planned to hear his conditions to weigh the pros and cons.

Then tell me your conditions.

Ye Zhongming spread one finger, Firstly, I need professional talents.

Mu Xinfei frowned, Humans arent goods; I must respect their decisions.

Nothing cant be traded in the apocalypse.

Ye Zhongming interrupted her solemnly; he didnt wait for her to say anything and continued, Secondly, I want someone who can design a gun and bullet production line.

Guns were still very useful at the start of the apocalypse. After seeing the resistance zones creating weapons, he considered equipping Cloud Peak with guns. In the recent first two years, guns have helped to reduce casualties.

He could purchase large amounts of guns and bullets, but that was too passive. Thus, he wanted a production line.

Thirdly, if you build a new division, you can recruit in Ying City. Everyone you recruit, I will give a one-star and two-star potion.

Fourthly, before I give you potions to create a division, you must prepay some crystals. Moreover, my potions wont include four-star and above potions.

Fifth, I need a teleportation line between S Zone and Cloud Peak. I also need the rights to set up stores in all S Zone bases!

After saying all that, Ye Zhongming looked at Mu Xinfei, who had closed her eyes, waiting for her to reply.

Interest? What is the interest after all this?

Her hands were shaking. At this moment, she realized how terrifying this guy was. It was as if he had seen a way to control S Zone.

No, he wasnt even hiding it. He was telling her that he was invading the economy of S Zone!

As for investment returns, nothing much. He smiled, Once you control S Zone and become one of the four commanders, then help me purchase Exquisite Floating Balls.

Also, I request Information sharing in the regions that you control!

Chapter 755: Arena

Mu Xinfei was numb when she left; one couldnt tell if she was happy or furious.

But she agreed with Ye Zhongmings request. In future cooperation, she let her assistant and Uncle Bao discuss the specifics with Ye Zhongmings subordinates.

If possible, Mu Xinfei didnt want to agree to his conditions as these seemingly unrelated points made her feel an overbearing presence.

His final goal was to have a huge influence in S Zone. It wasn't a simple interest exchange to help her get through her crisis.

But she knew that she had to agree. She couldn't disagree. She didn't have the right to oppose and couldn't even bargain.

After walking back in a daze, she then completely recovered. At the same time, she mocked herself for being too greedy.

She wanted someone's help but didn't want to pay the price. Where was there such a good thing in this world?

If the trading partner was not Ye Zhongming, whom Bai Sisi went to talk to, and it was someone else, his conditions would be stricter.

He had the crystal weapons and had plenty of people with whom he could partner. Anyone would be in a better situation and give more than her. So what if he wanted to influence your economy?

As for the final effect, both sides would form a true alliance. Wasn't this what she hoped?

After understanding everything, Mu Xinfei gathered her core members to have a meeting. She announced their cooperation with Cloud Peak and started to prepare to build the new division.

Uncle Bao, send seven million level three crystals to Ye Zhongming.

When they heard Mu Xinfei say that, Uncle Bao and the others were shocked.

Little miss, this is most of our savings. You know that after the situation worsened, the few divisions stopped handing over what they earned. Our two divisions' hunts aren't enough to support the entire resistance zone. We have to put in much money of our own. If that is the case, we might go bankrupt.

S Zone had reached a severe stage. If not, Mu Xinfei wouldn't be so anxious. But life had to continue. If she passed all these savings to Cloud Peak, S Zone might not be able to continue running. The many bases needed a sum every month to maintain.

Mu Xinfei was solemn, and she crossed her arms. She said coldly, From next month, remove all our support for squads and bases that don't listen to us. Tell them that we are building a new squad. Moreover, we will upgrade the equipment of our two squads, and we don't have any more things for them.

Uncle Bao and the few leaders from the battle squad she brought looked at each other. Uncle Bao said, Aren't we forcing them to break away from us?

Haven't they already broken away? Mu Xinfei stood up and waved firmly, Tell them that based on our previous agreement, they have to hand over what they earned. If they don't follow it, we will just do what we must.

Little Miss, should we ask the commander?

A leader was worried that the situation would go out of control and hesitated.

No need! She was already at the door, Even if I die, I will die standing up!

Looking coldly at that leader, she said, My father and I are the same.

Ye Zhongming was happy that he agreed with T and S Zones.

He heard people say that when you can't achieve a goal, you either join them or strengthen yourself and exceed them.

Ye Zhongming chose another path: swallow them!

Of course, Ye Zhongming couldn't swallow the entire Resistance Zone. That was also an impossible target in the future, but he could influence them. But this would take a long time, so he could only do it step by step.

There were a few days before they headed out so Ye Zhongming wouldn't sit still and do nothing. After all, they were facing a level-eight mutated lifeform. Even if they had many allies, no one knew what would happen. So, in this limited time, he had to increase the strength of his two thousand.

Mu Xinfei sent him 7 million level-three crystals, so he took them all. At the same time, he discussed with Uncle Bao and brought a batch of great materials from S Zone. After taking half of them for himself, he made the rest into silver equipment for S Zone.

Seeing that Ye Zhongming made so much silver equipment in a day, Uncle Bao finally realized why Mu Xinfei was spending so much. This guy and his faction were unique.

The seven million crystals weren't useful on hand. Ye Zhongming kept two million to power the crystal weapons and planned to turn the rest into three-star evolution potions.

Ye Zhongming locked himself into a room with a level three wheel. He spun it while selling the potions he obtained. Either that or he traded for something valuable, such as materials, guns, bullets, other potions, high-level crystals, and even some valuable scrolls.

As Ye Zhongming had to be the one spinning, before the team set off, Ye Zhongming spun the wheel until he vomited. He only obtained 16 thousand three-star potions before he stopped. It was too dry.

He only spent over 100 thousand level-three crystals. Ye Zhongming didn't expect there to be a time when he got frustrated from spinning the wheel. In his last life, his favorite activity was spinning. In this life, it was becoming a nightmare.

But over ten thousand three-star potions, apart from the five thousand he sent to Mu Xinfei, he still had more than ten thousand. These potions were tossed into the market and attracted much attention. Very quickly, there was news of Cloud Peak making huge purchases. Although they weren't too generous, they traded many times, and the total amount was shocking!

There was even talk within Sharp Peak Mountain.

Cloud Peak could afford to purchase Sharp Peak Mountain!

From that, one could tell how much Cloud Peak had been purchasing.

These actions would stimulate many people, especially those who didn't like Cloud Peak, like C Zone.

A night before he headed out, Ye Zhongming got the news that a few warriors from Cloud Peak had entered the arena with others!

## Chapter 756: Trapped

Each warrior was precious to Ye Zhongming. Moreover, the ones who entered the arena were Ah Yangs brothers.

Only seven of these people remained. That little girl and Big Milk didnt follow the team and were left in Cloud Peak. In the center city and Linhai battle, two of them were sacrificed.

Ah Yang and Big Milks 11-person team had witnessed how cruel the apocalypse was.

But these seven were raised as core members. They were all five-star evolved and also cultivated the Scorching Flame Technique. In Cloud Peak, they could battle the other core members without using job skills.

After two battles, these fellows, who were, on average, younger than 17, had compensated for their weaknesses. They had jobs, some skills, and also gained equipment. They were far stronger.

But the Resistance Zone wasnt weak either. Look at the three pieces of equipment they created and their battle squads strength. They werent weaker than Cloud Peak; they were stronger overall.

To be safe, Ye Zhongming led people to the arena.

This was a place where people in Sharp Peak Mountain settled their disputes.

If it was peacetime, there was no need for a place like this. But after the apocalypse started, people became like Superman: arrogant and hot-tempered. Even within the Resistance Zones, there were many conflicts. Each battle squad, each person, was fighting for their interests.

When they faced issues that they couldnt solve with normal methods, they chose the more direct method that was more suited for the apocalypse to solve the problem.

Fight!

People would show off their strength, and the winner would be in charge. It was simple and direct and saved time.

However, everyone evolved, so they used their jobs and skills when they fought. They would use strong equipment and even battle beasts.

Under such a situation, injuries and deaths were unavoidable.

Once someone died, things would become problematic, and hatred would amass. So, the resistance zone prohibited fighting here.

But when external factions entered Sharp Peak Mountain, the arena became boisterous. It was mostly conflicts between external forces. They didnt come from the same source as the resistance zone, and once there were conflicts, they didnt dare to solve them outside and were afraid of the enforcement forces, so they solved them in the arena.

Moreover, these factions were invited by the various battle squads. The resistance zones rules restricted the battle squads and could not assist, but they could allow the factions to challenge their enemies.

Under such a situation, the arena became popular, and many would enter to battle. Of course, most of the battles had deaths.

As reality was cruel, this place had a gambling aspect. Every time someone entered, people would place bets. Recently, this place looked like an ancient European arena.

Before he was even at the place, Ye Zhongming saw many people dashing there. They received news that there would be a life-and-death battle.

When Ye Zhongming and his group arrived, he was shocked. Based on what he knew, things only happened half an hour ago, but there were a few thousand here! Moreover, the numbers were increasing.

This place was like a football stadium. In the middle was a translucent barrier blocking the entrance. It was a piece of defensive equipment. Those who entered would place a giant stone at the entrance to inject some energy to strengthen this barrier.

Ye Zhongming was followed by Liang Chuyin and Zhao Xingmei, who were all beauties. Along with Xia Bai, who wore a mask, and Ah Yang, whose body gave off killing intent, a few of them attracted attention.

Cloud Peaks recent purchase activities also made them the focus of attention.

Boss! Brother Zhongming!

A few voices spread. Ah Yangs few brothers rang over. Their faces were dark, and killing intent was thick. But when they saw Ye Zhongming, they lowered their heads.

They knew it was wrong to accept the challenge and worried their boss would blame them.

What happened?

Ye Zhongming looked around and saw Zhang Hengzhou smiling coldly at him. He frowned.

They were baited.

After a few of them told him what happened, he understood.

Ye Zhongming gave each person from Cloud Peak ten three-star evolution potions as a reward for them to buy what they wanted. The Cloud Peak warriors were all very rich. Their income was very high as long as it wasnt a large-scale battle where they had to hand their spoils up.

There was a reward this time, so a few of them planned to see if they needed anything in the market.

The market here was higher-class than Ying City, and they quickly found what they wanted. When they were about to buy it, a group charged in to steal it.

They started raising the price. When the seller saw that people were willing to offer more, he broke his promise and planned to sell it to this group.

Cloud Peak members were naturally unhappy, but they suppressed themselves. They discussed and gave a higher price.

It was a bid, so they didnt mind bidding more.

However, the other side raised the bid, and both sides pushed the price twice as much as it had been before.

Finally, Cloud Peak members saw it wouldnt work and gave up.

Those following behind these people mocked them and said a bunch of nasty things. They called them broke and brats. Some even started to insult Liang Chuyin and the others. Even Xia Bais full female battle squad was insulted.

This annoyed the few teens. Their hot-tempered nature from Cloud Peak meant that they would attack those people.

But when they attacked, many resistance zone enforcement forces appeared and said they didnt know the rules. Ultimately, they were being baited and made to agree to fight in the arena.

The matter was obvious. People were targeting Cloud Peak. They targeted those few teens whose evolution levels were decent but very young.

As long as they killed these few five-star evolved, it would be a blow to Cloud Peak.

Ye Zhongming was expressionless, but coldness appeared on his body. Familiar people knew that he was furious.

Before Ye Zhongming could speak, a bunch of people walked over. Two of them were people that he recognized.

Zhang Hengzhou, Zhao Jingchen!

Chapter 757: Gamble part 1

Boss Ye, I didnt expect them to be your men; I apologize.

Zhao Jingchen smiled and apologized to Ye Zhongming, but his expression showed no guilt. Instead, he was just boasting.

Zhang Hengzhou smiled coldly and didnt say anything.

The few brothers were about to charge forward, but Ye Zhongming stopped them.

Things had advanced to this stage, so anything else was a waste of effort. Since they chose these few from Cloud Peak, it meant that they were determined to attack. There was no point in talking anymore.

But, since they decided to have a match and so many people are watching, we cant spoil their excitement. Why not let these subordinates spar?

Ye Zhongming looked behind them. Six muscular guys were standing with their arms crossed. They looked solemnly at Ye Zhongming and Ah Yang.

Then fight.

What else could Ye Zhongming say? He wouldn't even if Zhao Jingchen told them to let things rest.

Cloud Peak wasnt used to being provoked and not fighting back.

When they were weak, they still werent afraid of Soul Merchant or Glory Army. Now that they got stronger, why would they care about your Signal Flag Battle Squad?

Moreover, others didnt know, but he knew that Ah Yangs seven brothers were not ordinary. He would find it problematic even if he faced the seven of them. There was only one six-star evolved, and the rest were five-star, so what gave them the confidence?

All of this doesn't matter; time to fight.

But they weren't planning to start immediately. Zhao Jingchen waved to the right, and someone with sensitive eyes and a sharp nose ran over.

Are you taking this?

Zhao Jingchen smiled and asked.

Of course, my Five Ring Money is in this business.

The guy frowned, and his eyes lit up.

Zhao Jingchen turned to Ye Zhongming, Boss Ye, just watching the match is too boring, why not let's have a small gamble?

Ye Zhongming's eyes flashed. He thought that this was just revenge on Cloud Peak. After all, he clashed with Zhang Hengzhou's battle squad. Some of them died. Since they were on their territory, it was normal for them to find trouble with you.

But when he heard Zhao Jingchen say that, along with Five Ring Money's name, Ye Zhongming knew things weren't too simple.

Five Ring Money was something that Ye Zhongming knew in his last life. They focused on grey matters. Gambling was the most common part. Before Ye Zhongming revived, this organization organized fights between humans, between beasts, between humans and beasts, using the most direct and bloody way to attract attention, to vent pressure and some sick tendencies.

Survivors might not want to face high-level mutated lifeforms alone, but they were willing to spend money to see others fight. This thing had a huge market in the apocalypse.

Ye Zhongming was even dragged to see such gory battles before. A professionally designed atmosphere, good equipment, special participants all stimulated one intensely. Moreover, it would form into an addiction very quickly.

This organization dared to form such competitions and betting rings everywhere, so its faction was naturally huge. At least in his last life, Ye Zhongming knew that his battle squad couldn't offend them. No one in Ying City could. Now that he saw them appear in Sharp Peak Mountain, it proved how big their organization was.

Five Ring Money was actually participating in this, so things weren't so pure. This organization was not so simple to participate in such a random battle.

Ye Zhongming thought about it carefully. He looked at their expressions and thought of one possibility.

These people were targeting Cloud Peak's assets.

That was the only possibility that Ye Zhongming thought about.

Ye Zhongming spent a huge amount of money during the auction. The crystal weapons showed their might outside the city; they purchased battle beast eggs, swept the market

All of this meant one thing to the people.

Cloud Peak was a fat piece of meat!

The provocation at the market, the random battle in the arena, the small gamble, those were all excuses. These people weren't so petty to try to find trouble with you.

They were trying to use this method to force you along with their plan! Ye Zhongming believed these people had something else planned, and they would cause Cloud Peak to bleed. They would swallow Cloud Peak bit by bit.

Money would tempt people. The money that Ye Zhongming and Cloud Peak showed tempted these people.

More and more people appeared, forcing Ye Zhongming to agree. After all, if the boss of a battle squad didn't support his members, it would mean a lack of support, which would also be a blow to Cloud Peak's reputation.

The situation was obvious. Ye Zhongming had to participate in this gamble. They would be able to kill his high-level subordinates and also gain some money. It was okay if Ye Zhongming didn't join; they would then be able to split Cloud Peak's internal situation and hit Ye Zhongming's confidence.

If Boss Ye's men win, I will give you these few things.

Zhao Jingchen saw that they had set it up well, so he took out a few things and handed them to Five Ring Money.

People exclaimed.

There were three scrolls!

Two job advancement scrolls and one greed grade Omnipotent Equipment Upgrade Scroll!

These three small things were extremely valuable!

The job upgrade scrolls were things that people dreamed about since the start of the apocalypse. Its price had always been high, and it was always a market without supply.

The green equipment upgrade scroll meant a piece of green equipment. Its value didn't have to be described.

These three scrolls were things that even people in the resistance zone would fight for.

Ye Zhongming understood why these people weren't afraid that he wouldn't agree. With these three scrolls, how would an ordinary person like Ye Zhongming be tempted?

As long as you were tempted, there was a high chance that this betting ring would form!

What are you interested in?

Ye Zhongming made his mind up.

Did they want to suck his blood? Okay, let's play something huge. But he didn't know if they could afford it!

Zhao Jingchen and Zhang Hengzhou had smiles on their faces. Since Ye Zhongming said that, it meant that he fell into their trap.

I want the Exquisite Floating Ball!

As expected.

Ye Zhongming laughed coldly. These people were targeting what he got in Sharp Peak Mountain.

But they didnt know that it had become a golden piece of equipment; its value was far above these three scrolls.

But Ye Zhongming still agreed.

I heard that Five Ring Money accepts extra bets?

Ye Zhongming said to the person with a sharp mouth.

That person was stunned and instinctively nodded.

They did accept side bets. This was a solo bet between the person and Five Ring Money. Both sides can make such a request as long as the other agrees.

I will use this. Do you want to bet?

Chapter 757.5- Gamble part 2

Ye Zhongming took something out and showed it to him.

Zhang Hengzhou and Zhao Jingchen were stunned, and then a look of greed agreed on their faces.

Ye Zhongming took out the Demon Nurturing Bee Hive.

That was a blue piece of equipment, and it was a level above green. Its value was far above the three scrolls.

Beast Pool type equipment!

That person from Five Rin Money was knowledgeable and saw what type the nest was. His body was shaking.

Even the resistance zone had limited green equipment. The number of blue equipment they had didnt exceed 10.

Will you take it?

Ye Zhongming asked again.

That person bit his teeth, and he tried to calculate.

I need to ask!

He ignored Ye Zhongmings reply and disappeared into the crowd.

His level wasnt enough to decide on such a gamble.

Brother Zhongming The few teens saw things going in a direction they did not expect. They saw their boss take out the Exquisite Floating Ball and Bee Hive as a bet. Even if they were stupid, they knew that things were suspicious.

If they lost, how would they answer to Ye Zhongming, who stepped up for them?

Didnt you bring the blades? Ye ZHongming smiled. He signaled to their bags.

We did, but they have a six-star evolved.

When Ye Zhongming and that person agreed to bet, Ah Yang had been observing their opponents. One of their aura was stable, similar to Liang Chuyin, and the other six-star evolved.

They aren't your match; I will give you some good things; just kill them. Ye Zhongming didn't care. He cheered for them. The moment they heard it, their confidence increased.

Ye Zhongming was an invincible person to them. Since their boss said that they could do it, they definitely could.

A moment later, that person led a cold-looking middle-aged man over, and they walked before Ye Zhongming.

In that short time, the number of people here reached ten thousand. More people heard of the news and came to see it.

We will take it.

He looked at Ye Zhongming and said those four words.

Is Mr Ye satisfied with this?

The guy took out something and showed it to Ye Zhongming.

Ye Zhongming's pupils constricted, and he nodded.

Since that is the case, then let's begin.

The middle-aged guy didn't waste time and organized for both sides to start the match.

Take it.

Ye Zhongming shoved a few things to his subordinates and told them to enter.

Zhao Jingchen told his men to enter.

He discussed this with C Zone for many days, and this was the start. They had to get the first blood. Not only would he get the profits from the Exquisite Floating Ball, but he would also gain the trust of C Zone to Signal Flag Battle Squad and then earn profits.

He prepared many things for his elites and even used a six-star potion.

Apart from his father and him, this was the third six-star evolved.

He believed that with a six-star evolved and five five-star evolved attacking, the seven kids couldn't last for long.

Some famous people started to appear in the arena. Some commanders appeared. Ye Zhongming even saw Guang Yao and Song Tianze. They saw Ye Zhongming and walked over to ask what was happening.

In a while, Mu Xinfei led Bai Sisi and two guards to the arena. They walked to Ye Zhongming's side, which shocked many. They didn't know what S Zone was doing. Only some who had information from S Zone knew the reason.

Seven against six should be okay, right?

But it is kids against adults, so the difference in number can be ignored.

Someone used the White Mirror and saw that someone from Signal Flag is six-star; the rest are five-star. All the kids from Cloud Peak are five-star; they don't stand a chance.

Don't they have the crystal weapons?

That thing is good, but at five and six stars, the damage is not so easy to do. Moreover, the range is short, and as long as you pay attention, it isn't too dangerous. Its value is to kill mutated lifeforms.

Everything is possible. I don't think Cloud Peaks boss is stupid. What did they bet? I heard it was the Exquisite Floating Ball, job upgrade scrolls, and blue equipment. Would he bet if he didn't have confidence?

All gamblers feel like they would win before the outcome comes out.

Stop the nonsense and watch the match!

Ten thousand people discussed. Such a scene was similar to watching a football match.

Seven teens lined up and looked quietly at their six opponents.

If you reincarnate, remember not to come back to earth! The six-star evolved looked coldly and gave the order to attack.

The crowd held their breath and focused on the battle.

It wasn't normal to see five-star evolved battling each other. After all, this was a high level. Over ten five-star evolved fighting was even more rare. Many people came here to learn.

These teens were washed by battle and didn't panic. Looking at the attacks, they retreated in an orderly manner. Their movement was orderly, and they didn't show any chaos.

The crowd exclaimed as they were moving in unison. It was as if they were cut from the same cloth.

Ye Zhongming smiled.

Then, there was even more shock. These seven teens pulled out a weapon from their bags.

Seven blades! Seven green grade blades!

Warblade Sand Dance!

Chapter 758: War Manuscript

Ye Zhongming wasn't unlucky when he crafted Sand Dance. He obtained eight, kept one, and gave the rest to these teens.

There were two reasons for that. First, the other core members had suitable weapons for their jobs and abilities, so switching weapons would bring more cons than pros. The other thing was that these teens would get much stronger after getting Sand Dance.

Many people's expressions changed when these fellows each had a green blade.

The crowd exclaimed. They were shocked by the seven teens' movements and actions, and now that they saw their green weapons, they were even more shocked.

Green weapons. Apart from individuals like the T Zone commanders wearing Holy Army Coats, which were a silver set that would turn into a green set. The others, even the other commanders, would have one or two green equipment, and that was already the top few.

But these seven teens weren't even Cloud Peaks core members, but they each had a green-grade battle blade. This made one very envious and jealous.

Those who bet on Signal Flag Battle Squad with Five Ring Money cursed Cloud Peak. Why did they give these bunch of immature kids such good weapons?

Zhang Hengzhou and Five Ring Money's sharp mouth guy looked at each other and saw the worry in each of their eyes. But that middle-aged man and Zhao Jingchen were still calm.

Damn, are they your sons? Song Tianze was blackmailed by Ye Zhongming before and had been unhappy. But he was impressed with Ye Zhongming and Cloud Peaks ability. He was even more shocked when he saw this. Along with both sides cooperation, his words were more direct. This commander envied these green battle blades.

Ye Zhongming rolled his eyes and ignored him.

Mu Xinfei smiled, and she was in a good mood.

She had drawn the line with those in S Zone. Her future depended on whether this partner was strong or not. The stronger Cloud Peak was, the better her situation. So when she saw Cloud Peaks members with such equipment, she might be even happier than Ye Zhongming.

Bai Sisi looked at the battle with a complicated expression. That boyfriend that paled under her light had become someone who could shock the entire resistance zone without even needing to fight.

The few guys from Signal Flag Battle Squad looked at the green blades and were shocked. They didn't expect their opponent to have such a weapon. But they couldn't retreat. All of them roared and used their strongest attacks.

They were Signal Flag Battle Squad's elites. Two of them fired a bright light at the teen opposite them. At the same time, a yellow figure flew from behind one of their backs. It turned into a dove that dove down. Its body was covered in red flames.

As for the other two, one used a whip, and the head of the whip turned into a venomous black snake. It spat out its tongue and stabbed towards the heart of a teen. The other's body swelled to twice his size, and there was a black whirlpool on his shoulder, which he used to attack.

The one with the strongest aura was the six-star evolved. He opened his mouth, and a small seal appeared. The seal started to grow, and it turned into rock armor that attached to Chi Bans body. His arms and legs became much bigger.

Painful Hit Seal!

Someone recognized the equipment and shouted.

Their attacks stole the attention of everyone and made them forget about the shock from those seven green blades.

But very quickly, people recalled.

The seven teens slashed.

Seven Sand Dance lit up, and the blades grew longer. The light from the slashes connected and formed a beautiful line.

The line wasn't straight; it was curved like a wave. Everyone here was evolved, and they understood that the attack correlated with that of the enemy.

Peng!

The two different energy waves clashed and caused a bright explosion of light.

Both sides retreated.

Zhongming, your few subordinates are a little weird!

Guang Yao focused on the battlefield and suddenly said to Ye Zhongming.

Guang Yao was an expert, and his strength was above that of the commanders. His eyes were sharp. From that short clash, he saw the strength of the seven kids.

These kids can be in such unison, to retreat and attack at the same tempo. Even their attacks can connect; they should have some Team ability?

Mu Xinfei saw it, too, and followed Guang Yaos thinking.

Ye Zhongming didn't hide anything and nodded, War Manuscript, a seven-person one.

This was a small-scale team equipment he got in Linhai. After activating, it could mark the seven people in a manuscript and form a unified team. But it demanded that their weapons were the same and that they understood each other.

Ye Zhongming saw its stats and was impressed.

War Manuscript (7 person), ability 1, team buff. When at least two marked members are present, each person's stats will increase by 2%. Each person's increase will increase it by another 2%.

Ability 2, dragon head strike. The seven people can shift 10% of their stats to one member to deal the strongest blow.

Ability 3, Ability sharing. The members' equipment and skills will connect, increasing their strength by 30%!

This manuscript had three abilities. Like its name, they were all attack-type abilities. But they were all amazing. For example, the first ability. It increased stats by 2% for each member; this meant that if all seven were present, each person's stats could increase by 12%. Along with ability 3's 30% increase, the strength increase was huge.

If these buffs were connected, the person who attacked would gain 60% increased stats from the others. That strike would be something that even Sheng Yuan, who had the highest defense in Cloud Peak, had to dodge.

Chapter 759: Swift victory

The six of them looked at their bodies and saw that their defensive equipment had a faint blade mark.

This was from one hit. Their attacks collapsed from the enemy's blades, and if they didn't retreat quickly, they would have been sliced into two by that weird light.

The few teens used Sand Dances skill--- Sharp Light, which increased sharpness to 300. Along with War Manuscripts 30% increase, just the blade light alone meant 400 sharpness! This was slightly lower than Sisis Doll.

Also, these teens cultivated the Scorching Flame Technique! Maybe they cultivated it for too short, but they couldn't use it directly on their enemies. However, it did buff their skills. In other words, this was an attack with over 400 sharpness!

Such an attack wouldn't be able to be blocked by silver-grade armor. They would have ended in one strike if not for them retreating quickly.

Dont be overconfident!

Zhao Jingchen, who had been calm, couldn't keep his cool anymore and reminded his subordinates.

When the few Signal Flag members heard it, they understood that their boss was telling them to use what they had prepared.

Although they were unwilling and felt like even if they won, they were forced to use a trump card, they were still terrified of those attacks. They didn't care about losing face. They each took out a potion and drank it.

The few of them roared, and their bodies started to change.

Beast form!

Many people stood up from their seats and looked at the six muscular guys in shock.

Half beast transformation.

Guang Yao said. He knew more clearly than the audience.

Half? Ye Zhongming had heard and seen beast form, as it wasn't rare. Some skills, potions, and even equipment had such an ability, but he didn't know what half-beast form was.

Humans studied the beast-form potions from the wheel and then tried to replicate them. Guang Yao explained, The effect isn't good and has huge side effects. The worst was that the user couldn't return to being a human and turned into a monster. He also died in a short time.

Ye Zhongming was shocked. Some beast-form potions were indeed manmade in his last life. Humans and not job users made them. These potions were quite effective. There were side effects, but they could be controlled. Only some suicidal potions would reach that level, but they were also very strong. It would raise the humans body to a very terrifying level.

It seemed like these potions weren't too advanced now, so there was such a situation.

Those in the arena were turning into bear-like creatures. They grew larger, and brown fur appeared on their black skin. Their eyes were bloodstained; sharp fingernails appeared on their arms and legs that pierced through their equipment.

The six of them transformed in a blink. They bent over, and their limbs touched the ground. They roared at the seven teens, and they were so quick that no one could see their bodies.

Just the speed alone wasn't something five-star evolved could reach.

Many people sighed and felt like these seven teens couldn't handle these five-star evolved whose body qualities had increased. The most terrifying part of the beast-form was the increase in strength and speed.

But the truth was, these warriors smashed into a sandstorm!

Sand Dances ability, Sandstorm!

This skill was something that Ye Zhongming loved when he got the blueprint.

A sandstorm would appear around the user, increasing the users body quality and reducing the enemys speed. Moreover, it would cause sustained damage.

One could say that in a battle of the same level evolved, this ability was lethal. Everyone was at the same level, and a drop in agility would affect both attack and defense. Defeat was expected.

This time, as the seven teens had the War Manuscript, the Sandstorm grew much larger and it was much stronger. The six beast-form enemies slowed when they entered.

With the buff, the Sandstorm was the best skill of these seven teens. Although the skill could only increase their body qualities by a little, but the Manuscript increased that buff.

The teens counter-attacked in the storm.

Their job skills fired.

Whirlpool, Flames, ice, water, and a few element skills connected and formed a giant elemental shield that smashed toward the area ahead.

Such a huge shield was impossible to dodge in a sandstorm.

There was a loud explosion that shook the arena. Everyone felt an explosion, which showed how strong both sides were.

The light scattered, and the Signal Flag members who had pounced over aggressively were all on the ground. Their mouths and noses were bleeding. Their beast-form bodies were covered in wounds.

They wanted to use their speed to assassinate them, but they didn't expect that they would face the Sandstorm, which was a counter. Not only did they not succeed, they were injured by their skills.

Many people saw that these seven teens had a group skill; if not, their solo skills wouldn't have caused such an effect.

But their beast-form bodies were still strong. The few stood up, but when they managed to, a blade light shone, and the seven teens were before them.

Cries sent chills down ones spine. Although the six of them reacted, the sharpness of Sand Dance wasn't so easy to block. Four of them had their heads sliced or hearts stabbed.

Ch Ban used his equipment and skill to block a hit but was terrified. He saw that the seven teens second attack was about to arrive. He grabbed his teammate, who was still alive, and tossed it at the teens.

No one expected the enemy to do such a beast-like behavior. One teen couldn't dodge, and he was hit. He fell backward, and his arm was twisted. It was obvious that his bone was broken.

The other teens roared in rage. Each of them did a similar action. They placed their hands on each other's shoulders.

Light connected from the palm to the shoulder and transmitted forward, gathering into the teen's body at the front.

That teen raised Sand Dance and slashed.

A white crescent glow shone from Sand Dance and sliced into Chi Ban, who had taken a step back. This beast form six-star evolved couldn't even react when the light pierced his body. It slashed for a hundred meters before hitting the protective barrier around the arena.

The barrier that had never broken started to break as everyone looked in shock.

Along with it, Chi Ban's body was split into two!

A battle in which both sides had bet heavily ended in Cloud Peaks' crisp victory.

Chapter 760: Job Merge Scroll

Boss, we didn't use this.

The few teens were young, and they couldn't hide their excitement after winning. They searched the few bodies and laughed as they left.

As for them killing someone, everyone was used to it in the apocalypse and wasn't affected by it at all.

They returned those potions that Ye Zhongming gave them. They thought they would use it, but those Signal Flag members were too weak and didn't last long. They lost to just the Sand Dance and War Manuscript.

Ye Zhongming placed them back into his space and told them to heal up.

The arena was filled with noise. People discussed what abilities these teens used for them to be so strong. Especially that final strike, it shattered the barrier of the arena. How did they do it?

Only Ye Zhongming and the seven teens knew it was the Dragon Head Strike.

Buff a partner with 10% of their stats so that he could deal his strongest attack.

Along with the War Manuscript and Sand Dance Warblades buff and the strength of the skill itself, it launched that shocking attack.

Honestly, that was a strike that even Ye Zhongming or Xia Bai wasn't confident in blocking.

When Ye Zhongming looked at him, Five Ring Money's middle-aged man had a cold face, and his throat moved.

He was trying to calm himself down.

This was a huge loss. He started to regret agreeing to this side bet. He saw the Demon Nurturing Bee Hive and took out that thing. He thought that it was an easy win but didn't expect the opponent they picked to be so strong! In such a short time, they killed the half-beast form six-star evolved and five five-star evolved. This was something the middle-aged man thought was impossible.

But it happened.

Take it out.

The influencer didn't have a good temper and stretched her hand.

That sharp mouth man looked at him and hesitated to pass the three scrolls. He pulled his hand back, but Liang Chuyin snatched it.

The Wind Dancers hands were very quick.

Why, you want to go against your word? Ah Yang saw that the middle-aged man didn't make a sound, and his tone became feisty.

The kid struggling to survive in Peace Town was already a core member of Cloud Peak. He squinted his eyes and gave off his aura.

Five Ring Money doesn't have the habit of not paying.

His face flushed red, and he passed the thing to Ye Zhongming before leaving. The sharp-mouthed guy followed closely behind.

Zhang Jingchen and Zhang Hengzhou knew they would be asking for humiliation if they stayed, so they left with their group. They didn't even care about those few corpses.

Congratulations, Zhongming, this thing is really good.

Guang Yao looked at the thing in Ye Zhongming's hand and didn't hide his envy.

Ye Zhongming waved it, and he was emotional.

Something that he could only envy in his last life was actually in his hands.

Elite Job Merging Scroll!

This scroll could merge multiple similar job types into a new, much stronger one. Each scroll was hugely valuable in the apocalypse. As the apocalypse proceeded, it became more expensive, and in the future, it became a thing of legend.

The reason why it was expensive was because it could merge many ordinary jobs into a strong one. This wasn't a simple stacking; it was a case of one plus one being more than two.

Although people had seen how precious this thing was, it wasn't too far into the apocalypse. After all, the Five Ring Money in charge felt like it was worth the same as a piece of blue equipment. But in Ye Zhongming's last life, this thing was the level of a purple piece of equipment.

Not many things could tempt Ye Zhongming; this was definitely one of them.

He opened it and smiled. It could actually merge five jobs!

These scrolls had their pros and cons. The more jobs it merged, the more valuable it was and the stronger the final job would be. This scroll could merge five, and that was a lot.

No wonder it was an elite item!

Ye Zhongming kept the scroll. He had only three attack jobs: Sky Dragon Body Cultivate, Light Seal Blademaster, and Fatal Gun Artist. Using the scroll immediately would be a waste. After all, he lacked two more. He planned to gather five jobs first, which wouldn't take too long.

The crowd scattered. Ye Zhongming, Guang Yao, and Mu Xinfei also left and returned to their own bases. They were prepared for tomorrow's battle.

The seven teens returned victorious, causing the base to cheer. Before they headed out tomorrow, Ye Zhongming told everyone to have a gathering while he returned to his room.

Apart from the scroll, he obtained two job advancement scrolls and a green equipment upgrade scroll. Ye Zhongming kept the former; he would use it after he obtained his new job. Ye Zhongming thought about it and used the green scroll on the Nature staff.

The Kes Charger increased the Treasure Nurturing Gourds efficiency. The Nature Staff went from white to silver. Now, Ye Zhongming could upgrade this equipment, which had followed him from the start to green.

Ye Zhongming found a huge hall and activated Water Bottle Protection to test it. The effect was satisfactory. Its defense increased significantly. Even if he used the Basic Nature gem, the effect was the same level as that of an intermediate gem used when it was white grade. If he used an intermediate gem, one didn't need to describe its strength.

The banquet outside ended, and everyone went to rest. They knew that apart from agreeing to kill the level eight mutated lifeform together, the battle squad had another goal.

The following day, teams exited from Sharp Peak Mountain. The external factions that the four zones invited along with members from the resistance zones, there were more than ten ten-thousand strong battle squads. At the same time, Ye Zhongming got news from Guang Yao that accompanied him that the place he was looking for was confirmed!
