

## Apocalypse 761

### Chapter 761: Scheme

Zhongming, our members reported that this place is dangerous. Many mutated lifeforms have gathered, and it is beside a dungeon. Many beasts will break the barrier and appear there. Do you really want to go?

Guang Yao and Ye Zhongming rode their battle beasts in the middle of their teams.

As they feared drawing a beast or zombie horde, the squads took their paths. Cloud Peak and T Zone were together. But Ye Zhongming told Ying City to follow Mu Xinfeis squad.

He gave them a chance to make friends. If Mu Xinfei wanted Ying City members to build her new squad, that was something Ye Zhongming was happy to see. His influence in the S Zone would increase.

To show sincerity, T Zone did what Ye Zhongming wanted. They even used their Exquisite Floating Ball to help him get the most accurate news. They showed the pictures to Ye Zhongming.

But be it Wen Zhong or Guang Yao, they didnt understand why he was investigating that place. Apart from mutated lifeforms, there wasnt anything valuable there.

Ye Zhongming had a mysterious smile and didnt reply, so Guang Yao didnt ask.

He raised his head and saw the golden spot. Guang Yao and the Sky Elephant Battle Squad members were envious.

When the squads split up, Cloud Peak released their Exquisite Floating Ball. Guang Yao and the others noticed that it had turned into a graded piece of equipment and was gold. Everyones mouths opened wide, and they didnt know what to say.

Once again, they were impressed by his strength.

Zhongming, can you help us to upgrade ours?

Guang Yao coughed and was a little embarrassed.

T Zones Exquisite Floating Ball had scouted for information for Ye Zhongming and was on its way here. Guang Yao thought about it but knew there wasnt much hope.

Ye Zhongming touched his chin and didnt reject it immediately. This increased Guang Yaos confidence, and his eyes glowed as he looked at Ye Zhongming.

Ye Zhongming used his last bit of Ghost Metal to modify the Exquisite Floating Ball. He also added large amounts of Drill Ocean Metal, turning it gold-grade. He wouldnt be able to make another, even if he wanted to.

However, the resistance zone had too many resources, so Ye Zhongming wanted everything he saw. But he didnt know what to say. If not, Wen Zhong would con him. He would rather get it from Mu Xinfei in the future.

But since Guang Yao wanted him to modify the ball, this was a good chance.

We are allies; let me be honest; I cant modify it to the same level as mine as I used the materials I had. But

But what? Guang Yao asked.

But I can get it to silver; what do you think?

Guang Yao frowned. Silver was much worse than gold. There was a huge difference.

But he thought about it: silver was better than nothing, right? He must allow others to keep a trump card.

You wont benefit us so easily? Guang Yao looked at him warily and knew that this fellow never took losses. He definitely had conditions.

Ye Zhongming laughed, Look at you, am I so stingy? We are allies; naturally, I modify equipment for my allies.

He was delighted and started to form words to praise him, but his words were like a pail of cold water splashing on his head.

Just give me some of those Airplane Missiles from T Zone.

Guang Yao, ...

Little Xiu, ...

Guang Yao agreed after cursing Ye Zhongming ten thousand times in their hearts. Ye Zhongming would help modify their Exquisite Floating Ball to silver, and T Zone will provide Ye Zhongmings golden ball with ten ammo units.

Moreover, Ye Zhongming agreed to make some equipment for the Sky Elephant Battle Squad. Of course, they had to pay.

They traveled for three days and arrived at the location after ten fights. A resistance zone intel officer found them and reported the Iron Giant's new location. The team walked for half a day and finally saw its building-like body.

Ye Zhongming was shocked.

How was this the Iron Giant? It was the Chain Prisoner!

Intense guns and cannons fired for a few dozen hours, and it didnt stop.

Commander, Titan Battle Squad is asking for help from the south!

A warrior covered in blood fell before Delin and shouted. His throat was hoarse, and his throat cracked. It sounded bad.

Delin had worn a clean armor, and now it was tattered. His eyes were bloodstained, and there was a wound on his neck. It wasnt deep and had closed.

All sides are fighting; I cant send any troops. Tell Xu Lai to hold on! Hold on!

The messenger nodded and ran towards that formation.

Delin panted and looked at the endless monsters. His teeth were bleeding from his hard bites.

He turned toward the high Mechanic Fortress in the middle and shouted into the communication device, Give firepower support to the south; use the five sets of Slicing Laser!

He was the commander of this operation; he couldn't see Titan Battle Squad collapse.

Commander, the Slicing Laser would be gone like this; it is the final firepower of the Fortress. His earphones buzzed as someone from within the fortress talked to him.

He was silent momentarily before he said viciously, Attack!

Five seconds later, five eye-catching circular-shaped lasers flew from the fortress, hitting the area south of Titan Battle Squad. When those green monsters touched them, their bodies were sliced, and their attacks slowed.

But before C Zone could cheer, more monsters appeared. They screamed and charged over.

Commander! We can't get anything! A deputy commander ran to his side and shouted, Bright Capital Battle Squad is gone, North Crown and Cloud Naga Battle Squad are lost, and our C1 zones three battle squads are injured. If we charge, we will collapse! Commander, let's turn and break through! This is a trap, a trap!

Delin's body was shaking. C Zone's six battle squads had gathered, and there were over 70 thousand of them. But in a few dozen hours, at least 30 thousand of them died here. But they still couldn't stop the worsening situation.

Give up? Delin looked at his subordinates fight back and nodded his head. But before he could give an order, he heard the news that their escape path was blocked.

Despair rose in all their hearts.

Defend Request reinforcements from headquarters! The moment Delin said that, he was out of energy and fell to the ground.

He knew that he might die today.

Like the 30 thousand allies that had died before

Chapter 762: Bald head's ball part 1

Sometimes, Ye Zhongming will feel the power of fate circulating around him.

In his last life, he stood before his window when the Chain Prisoner appeared in his city and looked at it from afar. Even from far away, his body went soft from fear. For a few consecutive days, his nightmare was of this 50-meter-tall fellow.

In this life, he challenged his nightmare and gained some Ghost Metal and a few Cannibal Seeds. This was also the first time he was injured in this last life, starting the fate with his few subordinates.

On that day, he met Mu Xinfei. The nine star evolved from his last life, the person who killed the Chain Prisoner.

Now, he bumped into it again, and the killer, Mu Xinfei, was here too.

The Metal Giant of the resistance zone was the Chain Prisoner!

Ye Zhongming understood why Mu Xinfei and the other two nine-star evolved would work together to hunt this fellow. So, the resistance zone had long targeted it.

But in the last life, this operation should have failed. The Chain Prisoner at least lived until Mu Xinfei had evolved to nine-star.

Who knew if his participation today would change things?

Ye Zhongming wasn't confident. Even if the Chain Prisoner was only level-eight, similarly, the humans didn't have any nine-star evolved. No one was eight-star; the highest was only seven-star.

They looked at the Chain Prisoner dragging its three thick legs. Ye Zhongming was worried but excited.

He only obtained some Ghost Metal from this fellow, which helped his job. Half of his equipment reached their current levels because of Ghost Metal. The Cannibal Flowers from that Blood Wood had started growing in Cloud Peak and became an important part of its defense system.

If he could really kill the Chain Prisoner, then the Ghost Metal would be enough for 10-20 years. The Blood Wood would also give him a huge surprise.

Of course, he wouldn't forget about the horn with lightning surging around it--- Horn of Life!

That was a god artifact for plant-type beasts. If he got it, his gardener job would greatly improve. It might even reach the highest grade, like the Elimination Technique.

That one eye was also the main ingredient in crafting Bright Eye Liquid. It was something archers or snipers dreamed of. Their eyesight would greatly increase. Their long-range vision, night vision, etc, would improve.

Others could also eat the meat that could turn ordinary people into evolved, blood that greatly strengthened skin, and other unknown things

This battle was dangerous, but the things he could get were far better than he imagined.

One could say that even if Ye Zhongming knew how dangerous it was, he would gamble everything to kill it.

The external factions invited were nearby. They suffered some losses along the way, but it wasn't a big problem. The commanders were gathered for a meeting.

C2's An Man was in charge, but because Mu Xinfei followed, her status was higher, so the two were both in charge.

An Man was the bald man who asked about Mu Xinfei's body during the meeting. His C2 Resistance Zone was connected with the S Zone; to a certain extent, he was the biggest factor in the instability of the S Zone.

An Man smiled at Mu Xinfei. People who didn't know him would think that he really treated her like a niece.

C Zone and S Zone invited many external factions, four each. G Zone invited two, and T Zone invited one. Along with each resistance zone sending support battle squad, there were nearly 80 thousand. C Zone invited the Signal Flag Battle Squad and Black Cup Battle Squad, S Zone invited Flying Cat Assault Camp, and G Zone invited the Dried Sand Battle Squad, which was above eight thousand. The other factions were between three and eight. Out of the four battle squads from the resistance zones, Mu Xinfei's Ripping Rose was the biggest, with six thousand. The other three were around three thousand.

The least was Ye Zhongmings Cloud Peak. With Ying City Alliance, there were only 1500 of them.

But no one underestimated them. They won nearly ten thousand mutated lifeforms outside the city and bought many things in the camp, showing their riches. A few unassuming members killed the core members of Signal Flag Battle Squad a few days ago. Today, with the four battle zones each bringing an Exquisite Floating Ball, Ye Zhongmings fifth battle shone gold. His ability to upgrade anything in his hands shocked everyone.

Some people didn't believe Ye Zhongming could modify it, but T Zones ball had become silver. That broke their guesses, and many people looked at him with envy.

Having a good relationship with Smiths was something everyone in the apocalypse knew about. Using this chance that they were fighting on the same side, should they try to get close? And then, in the future, ask him to help craft some equipment.

Niece Xinfei, let's design an attack plan?

An Man smiled at Mu Xinfei and touched his bald head. His oily look made one vomit. Mu Xinfei already turned on those who didn't follow her commands, so she didn't bother to treat this mastermind politely. She only nodded coldly.

An Man didn't care and started to plan after taking out a map. Everyone listened, and their expressions changed.

It could be summarised as Mu Xinfeis Battle Squad, the Blistering Tongue Battle Squad she invited that was still under her control, and Cloud Peak was in charge of fighting head-on. The other battle squads would scatter around. They said it was attacking together, but everyone knew they were doing the heavy work; the rest were just supporting. If possible, they would even clear the mutated lifeforms on the outskirts.

Uncle An, do you think I will agree to this plan?

Mu Xinfeis face turned white from rage. Her Ripping Rose had 6 thousand people; Blistering Tongue had five thousand. Along with Ye Zhongmings 1500, they only had 12000 people. This didn't seem little, but honestly, one had to be five-star to block a level-eight lifeforms damage; how many of them were five-star? With Ye Zhongmings help, this number wasn't little, but it wasn't more than a thousand. The ones who could really kill a level eight lifeform were the six-star evolved. Out of these 12 thousand, only a few dozen!

Deal with a level-eight lifeform with a few dozen people? Stop joking.

Although the previous plan wasn't announced, but everyone knew that they would use the five-star evolved to clear the battlefield to stop the surrounding mutated lifeforms. Those above would join in and attack.

Thousands of high-level evolved fighting might kill the level-eight fellow.

Chapter 762.5- Bald head's ball part 2

Now, the plan changed. Everyone frowned when they heard. This An Man was too unreasonable. Everyone came here to help because they wanted to gain recognition of the resistance zone. Even if they didn't become one of them, they wanted a good relationship to have a better life in the apocalypse.

Many people are wary of them now. If they treat S Zone and Cloud Peak like this now, they could do the same to them in the future.

Zhao Xingmei, Blistering Tongues boss, Lu Xiong, and Liang Chuyin smiled coldly. This was the apocalypse; they didn't have to listen to him. If you wanted us to die, should we? Wishful thinking! At most, we would just leave; what could you do to me?

An Man didn't care about her attitude and smiled, Nice, some people have to sacrifice when fighting a stronger lifeform, someone has to be at the front so, putting you as the arrowhead shows that you are the strongest. Everyone knows that your Ripping Rose is the elite squad. It is what Old Mu placed effort on? Also, this brother's Cloud Peak has shown such strength. Crystal weapons, golden Exquisite Floating Ball, all of them are elite weapons. You might think I am selfish, but I am thinking for everyone. Only then can we block this big fellow's attacks so the other people won't get hurt.

His expression became more solemn such that those who wavered started changing their thoughts.

Right, the strongest has to be at the front so that the others can attack. If not, if they could not block it, everything was for nothing.

This made sense.

Mu Xinfei laughed coldly, I would be stupid to believe you.

This time, he didn't treat her nicely. Niece, the big picture is the most important. Don't let your biases affect this operation.

I am also the commander; I disapprove.

Don't forget that your rights are only symbolic. You came here haphazardly, so you were given this title as a form of respect. If not, you are just a brat. Who gives you the right to talk to me? If only your father were here!

Don't think too highly of yourself; without the zone's resources, you will struggle like ordinary people. You might already be the shit of some mutated lifeform.

Problems come from the mouth, Mu Xinfei. You better be careful.

You don't need to teach me.

Both sides were tense, and the smell of gunpowder was in the air.

Most of the time, these things would lead to a conflict.

This bald uncle, have you decided?

A voice interrupted. Everyone saw Ye Zhongming with his arms crossed.

Liang Chuyin laughed without giving An Man any face.

An Man was just someone with a balding problem, he still had hair on both sides and wasn't bald.

Killing intent flashed on his face, and he said solemnly, Yes, this is the final decision, and there won't be any changes.

Seeing Ye Zhongming speak, Mu Xinfei and Guang Yao retreated.

We can be the main force.

One sentence silenced everyone here. Even Mu Xinfei and Guang Yao looked at Ye Zhongming in shock and didn't know what he wanted to do.

Did he want to face it alone? That was a level-eight mutated lifeform! Even if Cloud Peak was strong and had a seven-star evolved, they couldn't win.

After noticing the Iron Giant, the resistance zone tracked it for a long time and knew its strength.

An Man was surprised and didn't know what Ye Zhongming wanted.

We can attack, but I have conditions that you have to agree with; if not, forget it. We will leave this operation.

Many looked at each other and didn't know what Ye Zhongming was planning.

First, when fighting, you must ensure we aren't disturbed. We don't need you to fight the Iron Giant, but we need ranged support. Your Exquisite Floating Balls have to join in, too.

Second, you will attack its legs.

Everyone didn't think much about the conditions. It was more beneficial and safer for them, too.

An Man nodded, Sure.

Ye Zhongming clapped, Third, there will just be two outcomes. Either we don't kill it, and it is injured; second is that we kill it.

In the first situation, no matter what we get, we will keep it. If the second situation happens, I will take 80% of everything.

No!

An Man rejected it immediately.

80%? Won't you get all the good stuff?

Ye Zhongming waved. Then forget it. You can be the main force!

We are risking the chance of being wiped to face a level-eight lifeform while you only fight on the side. 20% for you is already too much. Don't think that you are strong just because you are a commander. Those who listen to you treat you as a commander; those who don't, don't think that you are anything!

Ye Zhongming said coldly and then flashed beside An Man. He roared directly into this bald uncle's face!

Chapter 763: Begin part 1

When Ye Zhongming and Mu Xinfei walked out, An Man was still angry in the tent but agreed with Ye Zhongming's conditions.

Before An Man came here, he had spoken with Zhao Jingchen and Zhang Hengzhou. He wanted to fight back against Cloud Peak to wipe off their humiliation from the arena.

He would push Cloud Peak to be the cannon fodder.

They were a surprising newcomer, so the remaining people could kill the Iron Giant even if they all died.

That was because they also had a trump card

Guang Yao thought about it and nodded to the people in the tent, I will follow them.

He left with Ye Zhongming and Mu Xinfei.

An Man was stunned.

Commander An, these conditions are too strict.

The person who spoke was Zhao Jingchens father, who was in charge of Signal Flag. Zhao Zi Cai. He didnt talk and let An Man decide everything, but he had a different opinion in his heart.

To him, this decision wasnt thorough.

Everything if they didnt kill it, 80% if they did? He only allowed the others to attack its legs?

Doesnt that mean that if Cloud Peak attacked a few times and got a few good things, they could retreat? They would then keep everything, and the rest of the people wouldnt get anything.

As for killing the Iron Giant, Zhao Zicai didnt think Cloud Peak and S Zone could do it. Even with Guang Yaos squad, they couldnt. They had to rely on everyone else.

Right, Commander An, you should have asked us for our opinion.

The person in G Zone was arrogant. If not for Zhang Hetai telling him they would let C Zone lead, they would have opposed it.

Zhang Hengzhous position was much lower than An Man's; they were boss and subordinate, so even if he disagreed, he didnt dare to say anything.

An Man laughed suddenly.

If I dont agree, will he head to the front? An Man smiled coldly, Once we kill the Iron Giant, many things wont be up to him.

The others looked at each other, and they had their own thoughts. No one spoke.

Mu Xinfeis expression collapsed after they walked away and she glanced at Ye Zhongming, Oi, Sisi said that you werent a rash person, why are you willing to stand out today?

She was unhappy when An Man spoke, but when Ye Zhongming spoke, she didnt oppose. But that didnt mean that she agreed.

She had a lack of confidence in defeating the Iron Giant.

Even if they really won, Mu Xinfei felt like they would suffer heavy losses. It might not be worth it.

Although Guang Yao was firmly on Ye Zhongmings side, he didnt have confidence, too, and felt like Ye Zhongming was rash.

Ye Zhongming squinted his eyes and looked at the Chain Prisoner. He heard of rumors but didnt know if they were real, but it was worth a shot.

If you want to kill it, what would you do?

Ye Zhongming asked Mu Xinfei who killed it in his last life.

I? Mu Xinfei shrugged, Use numbers.

Ye Zhongming didnt say anything and focused on the Chain Prisoners body, specifically the black tattoo on its right neck and body.

Commander

The deputys voice was shaking. He had never faced such a situation since he entered the resistance zone.

The tables would turn!

That was the only thought he got when he got the news.

He knew what Broken Blade, Titan, Flying Swallow, Cloud Naga, North Crown, etc. meant to C Zone. If they bumped into the unknown enemy, C Zone would be destroyed. The remaining battle squads were too weak and too small to support a quarter of the resistance zone. At that time

The deputy didnt dare to imagine.

Ji Ruiguang, who was comparatively young, aged a lot when he got the news. With his status, he had to think of much more than his deputy.

The more so, the more he knew how serious this was!

Support?

Ji Ruiguang smiled bitterly. This wasnt peacetime, where planes could arrive on the battlefield in a few dozen minutes. He couldnt send them over in time, even if he had troops. Moreover, he only had one battle squad. Even if they rushed over, they wouldnt be too useful.

Ji Ruiguang started to think about the past. Even if he were in despair, he would have a solution. As long as you knew how to trade and lower your head

But now

Losses are over 40 thousand

Ji Ruiguang muttered.

A dozen hours and half of them were gone. This casualty speed would quicken as time went on. Even if the other side considered the losses and would stop their attacks, this team would last for at most a day. At worst, they could only last for a few hours.

Right, Bright Capital Battle Squad has been wiped, North Crown and Cloud Naga have mostly been wiped out

The deputy wiped the sweat on his forehead. His interests were tied to C Zone. If C Zone fell, he would be finished, so he was anxious. But he was smart. He considered many possibilities and hoped to come up with a solution.

Suddenly, the deputy had an idea. He ignored Ji Ruiguang, pounced on the map on the ground, and made marks on it. His intense actions caused Ji Ruiguang to take a look.

Commander, there might be a way!

The deputy passed the map to Ji Ruiguang, and his voice trembled. We have troops near where our forces are being surrounded!

Ji Ruiguang's back straightened. He looked at the map and knew what was going on; his eyes got brighter.

Right, Sharp Peak Mountains members couldn't rush over but the 80 thousand hunting the Iron Giant were nearby. If they rushed, they could arrive there in a few hours.

They had the Exquisite Floating Ball and could suppress the enemy within an hour!

They could be saved!

Ji Ruiguang jumped and charged to the door.

He knew that he was going to owe a favor.

Chapter 763.5- Begin part 2

Most of the 80 thousand were sent to clear the areas around them. The battlefield on which they would fight the Iron Giant was also cleared.

They wouldn't attack the Iron Giant. The five-star evolved of these few dozen battle squads were the main force in such a battle.

The Iron Giant sat in the wilderness. In one hand was the giant Blood Wood, and the other hand shoved monsters into his mouth.

He didn't care about these ants.

The sharp teeth ripped the tough bodies of the monsters. Fresh blood flowed from their bodies and dyed their chins, as well as the Ghost Metal chains in front of his chest.

The thousands of five-star evolved felt numb.

That level six mutated lifeform couldn't resist at all and became its lunch.

Does that weakness really exist?

Mu Xinfei frowned and asked.

After a few hours of preparation, the attack was about to begin. But Ye Zhongming told the C and T Zone warriors that the weakness was in the black flower tattoos on its neck. That shocked everyone.

Mu Xinfei and Guang Yao didn't believe it.

They monitored the Iron Giant for a long time but had never heard of such a weakness. They didn't believe Ye Zhongming and Cloud Peak understood this fellow more than the resistance zones.

I am just saying that it is possible. Ye Zhongming checked his equipment while looking around.

If that is the case, that would be the best, and we will focus on that. If not, then we will just attack. Get some benefits and retreat. You really want to risk your lives against a level-eight lifeform?

Ye Zhongming set out his requirements with An Man. Honestly, he wouldn't risk his life against the Chain Prisoner.

He could fight a level seven mutated lifeform and even dared to do it alone. But level eight and was also the famous Chain Prisoner. He had no confidence at all.

The reason why it didnt have a name was because it died before it reached level nine.

Hearing Ye Zhongming say that, Mu Xinfei and Guang Yao relaxed.

They could allow the mission to fail but couldnt allow their hard-fought ally to die.

These potions are for all of you; I will give you all a chance to strike. Remember, there is only one chance!

Ye Zhongming called Ah Yangs seven brothers and told them his plan.

Ah Yang, bring people with them. Once you attack, protect them as they retreat.

Ah Yang nodded.

Xingmei, your mission is important. If their attacks work, your attacks must follow up. What we can get after will depend on you.

Ye Zhongming turned towards Zhao Xingmei. The archer was very crucial in his plan.

Dont worry, but how will you reward me if I kill this fellow?

She winked at Ye Zhongming, and that caused the influencer to be wary.

Seeing how angry Liang Chuyin was, Zhao Xingmei laughed.

Ye Zhongming didnt mind Zhao Xingmei teasing him. He looked at Mu Xinfei and Guang Yao and said, We are the main attack, but we are also the secondary attacking force. Be careful.

They acknowledged and split up, entering their positions.

The Chain Prisoner had eaten most of the monsters and chewed their bones.

Maybe because the ants had given off killing intent, its giant eye looked around. It opened its mouth and gave a loud shout.

The voice sounded as high-pitched as a baby.

Ye Zhongming clenched his blade. The Exquisite Floating Ball, which belonged to Cloud Peak, shot flames from the sky. Two small-looking missilesArrow 3were fired.

Their attacks against the Chain Prisoner had begun!

Aooo!

The Chain Prisoner noticed the two missiles and gave out an unknown cry. It stood up and waved the Blood Wood at it.

At the same time, Ye Zhongming rode Yellow Ball and flew into the sky!

The Wind Riding Spirit Wing from the Black Beast Tool set. It allowed Yellow Ball to have the ability to glide.

Hong! Hong!

The Blood Wood found the two missiles and caused them to explode.

The 80 thousand survivors looked nervously at this hunt that would be recorded in the history books.

Flame and smoke affected its vision, but when Ye Zhongming appeared around its head, it didn't notice at all.

Blade light and crystal energy demon gun light shone!

Ye Zhongming wasn't determined to kill it, but he wouldn't give it up if he had a chance.

As Ye Zhongming flew into the sky, everyone else's attacks began.

Mu Xinfei's S Zone was not stable, but they were still elites of mankind. Ripping Rose Battle Squad showed their might, and their attacks even suppressed that of Cloud Peaks Xia Bai's forces.

At the same time, the other battle squads started to attack. Their cooperation didn't collapse at the start. The ranged skills landed on the Chain Prisoner's legs.

Aooo.

The Chain Prisoner gave another weird sound. The Horn of Life shone, and numerous specks of light scattered from the horn. They started to flow like a waterfall, covering its body inside.

These light spots stopped the attacks.

Heavy Life!

The Chain Prisoner used its first skill of the day.

The light seemed slow, but it was actually swift. Ye Zhongming's attacks were stopped, too. The attack and the light clashed and gave off an eye-catching glow.

Such strong defense. This is the strength of a level eight lifeform?

Many people saw the skill and had such a thought.

Armor Breaking!

Ye Zhongming roared. Cloud Peaks squad fired the Armor-Breaking bullet Ye Zhongming had prepared for this operation. Those at the front tossed over 30 green potions at it!

One of Candy's equipment, one of the two recipes, Corrosive Bomb!

Green liquid sprayed on the light spots and sizzled.

Chapter 764: Crazy Attacking Song part 1

When Ye Zhongming was fighting outside, Cloud Peak was still developing well.

Apart from the improvements in crystal weapons, they improved in many other areas.

Among them, Candy, who was just a useless Alchemist, had started to shine.

Ye Zhongming obtained the unique Alchemist equipment Neutral Grasp from the wheel. It was green, and in addition to increasing the success rate, it had two recipes. One of them was the Corrosive Bomb.

As they didn't have enough materials, they could not make it. When Ye Zhongming left, they gathered the materials needed for the two recipes. When Xia Lei met with Ye Zhongming, she brought 50 of each.

Although they were called bombs, their explosive strength wasn't great. They would cause a poisonous mist and a corrosive liquid to splatter.

After testing it out, the mist would kill level one and two lifeforms, but once they evolved to level three, the effect of the poison would be reduced.

But the corrosive liquid was much stronger. They would kill level four lifeforms, and even levels five and six would be affected.

When experimenting, they noticed the biggest effect wasn't their damage but their corrosiveness, especially towards defensive skills and equipment. When the liquid hit Shengyuans skill, it was easily broken.

Ye Zhongming was shocked when he heard it for the first time and looked at this Corrosive Bomb differently.

Ye Zhongming brought this to deal with the Chain Prisoner and hoped it would be effective. He didn't expect to use it immediately.

Cloud Peaks attacks weren't blind. The Armor Breaking Bullets were silver grade and didn't have many. The weapons he got from the resistance zone were modified and were all white grade. They were very strong. They aimed at the joint of the arm that held the Blood Wood.

This was a part of the plan. They could snatch the Blood Wood and leave if they broke that arm.

The whistling sounds of bullets hitting the Heavy Life spots could be heard. Each person shot three times, and 1500 bullets smashed the arm of the Chain Prisoner. Even if it was daytime, the light was very eye-catching.

The corrosive bomb liquid covered the light spots around its legs. A mist spread. No one knew if it was from the bomb itself or if it was a reaction by the Heavy Life.

Ying City, S, and T Zone elites fought together and aimed the parts the Corrosive Bomb attacked. They tried to see if they could break its defense.

The Chain Prisoner destroyed the two missiles and held the Blood Wood before its eyes. It wanted to see if its weapon was damaged. It probably thought that the Heavy Life could protect its body.

Aoo!

It suddenly lowered its head and looked at its legs. The thick mist covered it and it couldn't see clearly. But it felt some pain.

The expressionless beast finally showed a vicious expression.

Ye Zhongming didn't attack. He walked around the Chain Prisoner and tried to attract its attention. Ye Zhongming tested it before. The green Sand Dance sliced the light waterfall. There would be an intense collision, and the light spots would dim. But he wasn't able to break it in a short time.

But it was obvious that the Corrosive Bomb had succeeded.

The Chain Prisoner moved forward and out of the mist. The attacking team shifted along with it.

Only now was everyone able to see clearly that the areas the bomb touched, the light spots had disappeared. Although the area wasn't huge, some attacks passed the gaps and hit its body.

The armor-breaking bullets also hit the light spots and into his joints.

A few drops of blood dripped onto the ground.

The Iron Giant is injured!

The people observing exclaimed. An Man and the others were shocked. A few minutes had passed, and the level eight lifeform was injured. Was Cloud Peak too strong, or was this fellow too weak?

But those fighting weren't so optimistic. They noticed that although two areas of Heavy Life were broken, but the ability was still there.

Every defensive ability was connected. Breaking one area was the same as breaking it all. But Heavy Life was not like that.

The Chain Prisoner was furious that it was injured and started charging towards the crowd. It waved the giant wood and wanted to smack Ye Zhongming, who was being an annoying fly. But Yellow Ball dodged. It then started to attack the attackers on the ground.

The survivors who had stuck to the plan and were far from the Iron Giant dodged and split into a few groups to attack. When one group was attacked, the others started to cover.

Ye Zhongming found a chance to toss a few bottles of Corrosive Bomb on its head. He then ordered Yellow Ball to retreat so the mist wouldn't affect it. At the same time, he fired the demon energy crystal gun at it.

Cloud Peaks attacks finally annoyed it, especially after its head was attacked. It wasn't calm anymore, and after roaring, the ghost metal chains gave out a rattling sound.

Retreat! Retreat!

Ye Zhongming was sensitive to danger, and he was terrified. He shouted for the others to retreat. He also rode Yellow Balls body to descend.

The others listened. They knew that a level eight mutated lifeform wasn't a joke.

The Chain Prisoners body straightened, and the ghost metal chains flew in all directions. Its body turned into a porcupine.

The chains charged at the ants that attacked it.

People started to scream. Some people couldn't dodge the attacks and were hit. Even if they were five-star evolved and wore good defensive equipment but, it was useless. Their bodies were shattered, and they died.

Numerous chains whipped at Ye Zhongming. As he was the nearest to it, the chains were the quickest and strongest. Yellow Ball flew up and down to dodge most of them, but the last chain hit it.

Ye Zhongming activated two skills to fire a few shots to help reduce the force and opened a distance for Yellow Ball to retreat.

The chain only skimmed Yellow Balls bum.

But the two of them were like a kite whose string was cut. They were sent flying. Yellow Ball spat out blood. It flapped its wings, but it was unable to stop that force.

Yellow Ball and Ye Zhongming fell to the ground and left a huge hole.

Many from Cloud Peak were shocked and moved instinctively in that direction.

Chapter 765: Blood Feast

The Chain Prisoners seemingly suicidal action terrified Ye Zhongming.

He felt the intense killing intent from the one eye of the Chain Prisoner.

Retreat! Retreat!

Ye Zhongming told his subordinates to get further away. What happened next might be very terrifying!

The bullets in mid-air froze, and the bullets from the golden and silver Exquisite Floating Balls were emptied.

The Chain Prisoner opened its mouth, and it looked weird. Ye Zhongmings uneasiness grew. He rode on Yellow Ball and started to open the distance between them.

But the others didnt know and were still immersed in the joy of killing a level eight mutated lifeform.

At this level, these mutated lifeforms were covered in treasures. Everyone knew that crystals werent the most valuable part. Their bones, blood, flesh, etc., contained huge energy, which might give humans special abilities.

Aooo!

The Chain Prisoner braved the bullet rain and stuck the giant Blood Wood into the ground. It stood up, and the blood scattered like rain.

These people were stunned when they saw the Chain Prisoner stand up, but they didnt realize anything. Only some higher-level evolved, or people with special abilities were confused and felt a sense of danger.

But the Chain Prisoner launched its most ferocious counterattack before they could do anything!

It held the giant Blood Wood over its head and smashed it onto its horn. The enormous energy circulated the two pieces of equipment that Ye Zhongming craved. A purple color appeared on the wood.

It is bearing fruit?

Many people were shocked. With their eyesight, they saw clearly that a patch of small purple fruits had appeared on the Blood Wood.

Damn!

Ye Zhongming cursed and told Yellow Ball to fly toward where Cloud Peak was!

He recognized what it was.

The Chain Prisoner flicked its wrist, which caused the wood to spin. That purple fruits scattered around.

Although the people didnt know it was, they knew it wasnt anything good. They attacked the little fruits. Surprisingly, the fruits were tough, and very few attacks could break their purple flesh.

When they saw Ye Zhongming diving down, Cloud Peak retreating, and Ying City retreating, Mu Xinfei and Guang Yao realized that things were bad, and they retreated, too.

Those fruits started to land on the ground. The dozen-meter height was nothing to these half-fist-sized purple fruits.

The fruits didnt explode or break apart; they started to Drill into the ground.

What is that?

Mu Xinfei ran to Ye Zhongming and asked.

Ye Zhongming turned to look at the fruits and said solemnly, Cannibal Flowers!

The others didnt understand, but Cloud Peak did. Under Cloud Peaks new walls were Cannibal Flowers, which were even modified ones!

They knew how strong it was.

The others didnt especially the C and G region warriors who had charged forward and those external factions.

They were terrified when they saw the seeds drill into the ground, and some started to retreat. Some hesitated, and as such, their formations were in a mess.

A few seconds later, they paid the price for their actions.

The purple sprouts covered a huge region around the Chain Prisoner. They were growing quickly and were human-sized in just a short time.

Some people tried to attack them in these few seconds, but these flowers were very tough. There were tens of thousands of them. Apart from some people with strong abilities or weapons to slice them, the others didnt have the ability to deal lethal damage.

Then, they attacked.

These terrifying plants opened their huge mouths and revealed their sharp teeth.

Cannibal Flower!

Even people who didnt recognize these things knew what they were. Many people cried in terror, and what followed next were just screams.

Some fled, some resisted, some dodged

The people here were at least four star evolved and above. With their strength, they were average in the apocalypse evolution system. To reach this level at this time, they were indeed very strong.

However, these Cannibal Flowers had no levels, and their attacks were simple. Thus, these evolved felt powerless.

If these giant flowers bit you, you were dead. Their teeth could secrete a nervous system toxin. No matter where they bit, you would lose your ability to resist and be swallowed in a few seconds.

Those attacks and resistance would hit their bodies and damage them. They would even knock out many teeth. But if their heads were sliced, these flowers wouldn't die. It wouldn't even affect their attacks.

The terrifying thing was that defensive skills and equipment weren't very useful. Only silver and above defensive gear could stop their bites.

In the chaos, many skills hit surrounding survivors, causing them to kill each other. It also wiped out the remaining morale.

The humans lasted for less than five minutes before they collapsed.

C and G Zone survivors cried and fled from this death land of purple.

The biting and chewing caused large amounts of blood to flow from their mouths, dripping onto the ground. In the next dozens of seconds, they started to spit things out. They were the corroded equipment and white bones!

Ye Zhongming, Cloud Peak, and S and T Zone barely escaped. They turned and felt fortunate that they escaped.

This is Blood Feast?

Guang Yao looked at the scene and muttered.

Ye Zhongming didn't care. He looked up at the Chain Prisoner because light had started to light up at where the Blood Wood was stuck into the ground.

Chapter 766: Use that plan

Zhao Jingchen and his father escaped from the terrifying Cannibal Flower Ocean. They turned, and their eyes were filled with pain.

They wanted to con Cloud Peak but failed. Not only did they lose three scrolls, but they also lost six core members.

They wanted to use this hunt to compensate for some losses and even take revenge. But in a few minutes, he suffered huge losses.

The father and son duo looked at the remaining troops and were on the verge of cries.

An Mans eyes were opened wide. He panted and clenched his fist.

In this short time, even his C Zone warriors suffered huge losses. What was more infuriating was that when they faced danger, everyone panicked, including those experts.

If they could help those around them, they could save many survivors. They wouldn't have lost a few thousand high-level warriors in just a few minutes.

An Mans heart was bleeding. These people were elites in the resistance zone.

He looked at Cloud Peak, and his expression got worse. These people had fled from the Cannibal Flower range.

An Man felt a sense of defeat for the first time.

At this point, a streak of light shocked him. He raised his head and saw the flowers glowing along with the giant piece of wood in the Iron Giants hands. Slowly, the light connected and formed a giant net.

From those flowers at the edge, the terrifying plants started to wither. From outside to inside, they turned yellow.

Along with them withering, the light disappeared. More accurately, the light was being transmitted to the giant piece of wood.

The Chain Prisoner raised the shining Blood Wood and placed it near its horn. The light started to weaken.

It was using this method to heal its injuries

Mu Xinfei looked at the Chain Prisoners injuries, which healed quickly and said in disbelief. She didnt expect this fellow to have such a skill.

Not only healing its injuries. Ye Zhongming pointed at the demon crystal on its head, It is evolving.

Everyone turned and saw that it had started to turn white.

The level nine crystal was silver!

This fellow was getting towards level nine!

Still fight?

Guang Yao wanted to retreat and turned to ask Ye Zhongming. Chain Prisoners strength caused this T Zone leader to lose confidence.

Ye Zhongming looked at the fellow who gave off a satisfied expression after the full meal and knew that his decision would decide many people's lives.

Both of us still have strength; how can we retreat without trying? Ye Zhongming decided to continue. Mu Xinfei and Guang Yao looked at each other and could only accompany him.

They actually wanted to see what Ye Zhongmings trump card was.

The Chain Prisoner, whose body recovered and evolved level deepened, smiled weirdly. It looked like it was mocking these humans for being weak.

Ye Zhongmings body started to change. Black patterns appeared on his skin, and his eyes turned pitch black.

Hell Envoy Bloodline was activated.

Cloud Peak warriors were solemn. They knew that their boss was going all out.

Be prepared; we are using that plan! Ye Zhongmings voice was ice cold. After saying that, he slapped Yellow Balls body, Friend, lets go!

Yellow Ball barked, and its body grew by several times. The armor grew bigger. The three pieces of equipment had a set ability: Following Form, which could change according to the beast's size.

At the same time, the set equipment turned golden, like it was covered in a layer of metal. This metal spread to Ye Zhongmings body, covering his equipment with golden metal.

This was Shadow, one of the chest plates abilities, to stack its and the beasts defense together and form a buff. At the same time, this defense would help buff the riders defensive equipment.

Yellow Ball used his third talent skill, Golden Ocean Shadow. But it only used half of it to protect its master.

The golden man and dog charged upwards with a strong aura.

After the humans were massacred, Ye Zhongmings forward charge was very eye-catching.

Those around opened their mouths. Shouldnt he retreat? Did Cloud Peak still plan on attacking?

They did.

The Demon Crystal Cannon and Violent Lightning Turret started to roar. This time, the warriors didnt use Armor Piercing Bullets and charged along with their leader.

Aoo!

The Chain Prisoner saw the fly again, but the fly was stronger this time.

Maybe it didnt have enough fun with the humans, so it decided it wanted a full meal. It stepped towards Cloud Peak and waved the Blood Wood in its hands.

Yellow Ball did a beautiful spin to dodge the hit. At the same time, it flew close to the Chain Prisoners body. It activated the Roaring Charge.

It charged forward and increased its masters attack by 10%.

Ye Zhongmings Sand Dance slashed toward the Chain Prisoners head with killing intent and the Light Seal Blademasters job skill.

Many people on the battlefield stared at this attack. Whether or not the battle could continue depended on this strike.

Succeed, and the hunt would continue. Fail, and it was the signal to retreat.

But no one felt like this strike could kill the Iron Giant.

Ye Zhongming himself didnt think so too.

The Chain Prisoner couldnt do anything to this fly with the Blood Wood, but it didnt mean that it didnt have any other solution.

The Ghost Metal Chains surged; this time, it only aimed at Ye Zhongming.

It planned to smash this fly that it hated.

Ye Zhongming smiled.

Sand Dance sliced on one of the chains.

Xia Bai!

Ye Zhongming shouted a name.

The other chains smacked towards the human and beast.

## Chapter 767: Time Charge

What happened stunned many people.

No one felt like they could kill this fellow alone. Even the strongest level seven humans now didn't think they could.

The higher ones evolution level, the bigger the gap between levels. This gap reached its peak when the beasts reached level nine. Ultimately, level nine mutated lifeforms were on a whole new level.

Although this Iron Giant was just level eight, but it was the peak of what humans could discover. Not to mention a six-star evolved charging at it; even if a seven-star evolved came, there was nothing he could do to it.

They could only use numbers to kill it. To accumulate small injuries at one spot to badly injure it and then find a chance to kill it.

But the Iron Giant showed that it didn't fear such tactics. Those terrifying Cannibal Flowers could kill four-star evolved; only five-star evolved had a chance against it. But how many of them were there? Moreover, having a chance didn't mean they could win. How many five-star evolved died?

Even so, why was Cloud Peak launching a crazy attack? The chaotic internal environment of the entire alliance army was the best chance to retreat.

Also, it was okay if they were crazy, but to let their own boss attack, was so unwise. If he died, wouldn't everything be gone?

But everyone had to admit that their courage was worthy of respect. Not everyone could launch such an attack when they faced a level eight lifeform.

In such complicated expressions and gazes, everyone saw a figure descend from above.

Right, descend.

Xia Bai was on the Exquisite Floating Ball and leaped off when she heard the message from the Battle Contribution Badge.

Cloud Peaks seven-star evolved has attacked!

Many people had a deep impression of this woman who wore a mask and gave off a threatening aura. Everyone knew that Xia Bai's appearance meant Cloud Peak was going all out.

Those who wanted to retreat all stopped. They didn't want to miss out on this battle.

Xia Bai retracted her body and only stretched when she approached the Chain Prisoner. The long scythe sliced towards its neck.

There was one of the weaknesses there: the black flower tattoo.

Xia Bai started her attack on this weakness.

In the instance that Xia Bai landed, the Chain Prisoner's metal chains hit Ye Zhongming and Yellow Ball.

Both of them were sent flying.

Finished!

Such a thought appeared in many of their hearts. Everyone saw the strength of those chains. Just one whip was enough to smack a five-star evolved to death. So many chains hitting you would turn you into meat paste.

Mu Xinfei and Guang Yao looked at those scenes, and their expressions changed.

Ye Zhongming was their chosen partner. T Zone was okay, as both sides were using each other. S Zone had made a huge bet on him, and he was... sent flying?

Mu Xinfei was a six-star evolved. She knew the body qualities of such a level. Even if Ye Zhongming was wearing a green piece of equipment and had the beast defense buff on him, he might be unable to block a level eight lifeforms attack.

Would S Zone collapse just like that? Would their gamble fail in such a short time?

Huala! Hong!

This sound shocked many people and even attracted everyones attention away from Xia Bai and Ye Zhongmings bodies.

A Ghost Metal Chain fell to the ground.

Ye Zhongmings strike sliced a chain!

The Cloud Peak warriors who had charged near the Chain Prisoner grabbed the chain and retreated.

Aooo!

The Chain Prisoner opened its eyes wide. It remembered that someone had stolen a chain from it not long ago. That person looked similar to the one it smacked.

Seeing that Cloud Peak didnt panic and stole a chain, Mu Xinfei and Guang Yao realized something. They looked towards Ye Zhongming and saw that although the two of them were injured after stumbling, they stood up. Moreover, they flew forward, and when they were near the Chain Prisoner, he tossed... a seed.

They relaxed. At the same time, they were shocked that Ye Zhongming could block the Chain Prisoners attacks.

This exceeded their understanding. They wouldnt be able to do that if they were in his shoes.

Ye Zhongming couldnt tank so many Ghost Metal Chain strikes. The reason why he was only slightly injured was because of one equipment.

Spirit Qilin Pendant.

A piece of defensive equipment he got from the Competition Death Wheel.

This equipment only had two abilities. One was a Magnetic Field that formed that caused all metal-ranged attacks to deviate.

Another was Time Charge. It would charge when it wasnt activated, and the longer the time, the stronger the defense.

Ye Zhongming hasnt used it much since he got it. It had been charging for a long time. It was a white grade equipment, and the Treasure Nurturing Gourd raised it to silver grade.

Such a long charge formed a sizeable one-time defensive shield. Even the Chain Prisoners attacks were mostly blocked. The remaining energy was blocked by the Black Solid set and Ye Zhongmings own defense.

This was why he was fine. This equipment that was useful to metal attacks is really useful now.

Ye Zhongming was not injured and leaped off Yellow Balls body. He pressed onto the seed he tossed and used Nurture. A green plant broke from the ground and grew taller a giant lotus.

Ah Yangs seven brothers had arrived and stood above the lotus. They placed their hands on the shoulders of the person ahead, and the others poured a red potion into their mouths.

Their bodies turned red, and even their eyes were red. The person at the front raised Sand Dance when it got to the same height as the Chain Prisoner and waved the same strike they used on that six-star evolved in the arena.

#### Chapter 768: Flesh valley

The seven teens used the Basic Berserk Potion.

This was the other recipe that the Neutral Grasp gave.

It was a type of Berserk Potion, like the beast form potion that those few from Signal Flag used in the arena.

But those beast-form potions were man-made, and the technology wasnt mature. It had many side effects. This was a form of wheel technology with a recipe, so although there was a side effect, it wasnt as severe.

The Basic Berserk Potion could increase ones ability by 30%. The side effects would be based on ones evolution level; the feeling of weakness would last a few hours to a few days.

Ye Zhongming was tempted when he saw the few teens in the arena using that strike. He thought of a way to deal with the Chain Prisoner.

To use the states of the War Manuscript along with the Basic Berserk Potion that Xia Lei brought to increase the strength of Dragon Head Strike. He wanted to see if that could kill the Chain Prisoner.

Ye Zhongming admitted he didnt have as strong an attack as that.

Seven people using the potion and increasing their stats by 30%, on this basis, the first ability would also buff each one of them by 12%!

If each persons current ability were 100, it would reach 130 after using the potion. Along with the 12%, it would be 145.6. The Dragon Head Strike focused 10% of each persons stats onto one person. Before the attack, that persons body value would be close to 233!

This meant that that persons stats would have more than doubled before they attacked.

If one included the third ability, the strength would increase by 30%!

One could imagine how terrifying their strike would be.

This did not include the buff of Sand Dance. If one included that, the value would increase further.

Also, dont forget that a few of them learned the Scorching Flame Technique!

Also, don't forget that they had used modified evolution potions to grow to their current level!

With such buffs, the bright slash that left a huge impression on the resistance zones appeared, and they sliced toward the weakness on the neck of the Chain Prisoner.

Before the Dragon Head Strike, Xia Bai's attack had sliced there.

Everything happened quickly, and it took only a few instances to change the situation.

The Chain Prisoner cared most about Xia Bai's landing, but it was distracted by a chain being sliced.

But that was not enough to give Xia Bai the chance to slice into its neck. When Xia Bai was landing, she used her Purple Mask.

Extreme Cold Suppression!

The cold mist reached the Chain Prisoner's face and caused the big fellow to slow down, which gave Xia Bai a chance.

At the same time, it also gave the seven teens a chance.

The chance that Ye Zhongming mentioned had arrived.

Xia Bai didn't even look at the outcome. She jumped off the Chain Prisoner's body and leaped towards the giant lotus. At the same time, a rope flew from her hands to wrap the stem. When she slid towards the ground, the scythe sliced the lotus.

In the air, the Dragon Head Strike hit the black tattoo.

The entire battlefield froze.

Wu!

The Chain Prisoner gave out its loudest cry. The Dragon Head Strike hit its neck, and large amounts of blood splattered.

From the same direction, one could see the white bones and the purplish and green veins.

That was really its weakness!

Xia Bai's strike broke the defense. It might have just broken the skin, but what happened next sliced the skin and gave a bone-deep wound.

This was the biggest victory they had obtained since the start. Although the Chain Prisoner had been in a bad state, its injuries weren't as bad as this.

Three light arrows arrived and shot into this wound.

Zhao Xingmei was sweating. She used her strongest strike and laid on a Yellow Ball that had flown into the sky once again.

The few powerless teens fell from the broken lotus. Liang Chuyin and the others were ready and caught them. The entire Cloud Peak team started to retreat.

They knew that they had just sliced open the Chain Prisoner's neck, and they didn't break it. Even if this were a fatal wound, this huge fellow wouldn't die instantly. Its counterattacks would be ferocious.

As expected, the Chain Prisoner was enraged by its injuries. It was more furious than before when it used the Cannibal Flower Ocean. It touched the wound on its neck and wanted to pull the few arrows out. But its fingers were too thick. The arrows were like hair to it, and it couldn't get it out. Instead, it pushed it deeper. Its body stumbled, and it knelt on the ground.

The humans all felt the intense earthquake beneath their feet.

The Chain Prisoner ignored its wound. It tossed the Blood Wood toward the seven teens. Liang Chuyin and the others dodged, and the crystal cannons and Violent Lightning Turret attacked to try to knock the huge piece of wood aside.

The Blood Wood deviated from the attacks and fell near the team. This was where Ying City and S Zone warriors intersected. At least a dozen people were smashed to death. A few were squashed, and those parts were turned into meat paste. They cried out in pain. The momentum caused the Blood Wood to roll. Any evolved it touched would either be dead or injured. It left a blood valley behind it!

But the nightmare was far from over. That eye lit up as if energy was gathering there. Ye Zhongming shouted in rage for everyone near him to gather while those far away should retreat.

Zi!

A silver light pillar shot from its eye. Along with its head moving, it started to sweep everything in front of it.

Ye Zhongming raised Nature Staff to protect the Cloud Peak warriors around him. As for the others, he couldn't help them. He wasn't even confident that the nature gem and Nature Staff could protect these people.

Where the light pillar passed, anyone who was touched was turned to ash. Water Bottle Protection and the silver light pillar clashed a few seconds later. The entire battlefield gave off an eye-piercing light. Everyone covered their eyes and didn't dare to see what had happened.

The sky was covered in dark clouds. Lightning twisted in the skies and swarmed the dark clouds.

The Life Horn on the Iron Giants forehead not only had support skills!

Chapter 769: Second seven star

The green nature staff and the intermediate water gem caused the Water Bottle Protection's defense to increase significantly.

The Chain Prisoner's light pillar was very powerful. Just a few seconds of sweeping sent chills down one's spine. Anyone hit by the pillar died.

Moreover, it was quick. Current humans couldn't dodge it unless they could teleport.

This was the reason why Ye Zhongming had to use the nature staff.

The pillar and the Water Bottle Protection clashed, giving off an eye-catching light. Everyone felt an intense and unstable energy surging. It might spread out at any moment.

A strong sense of danger caused many people to run outwards, even if they could barely see the path.

Leave!

The attacking survivors started to retreat. If Water Bottle Protection failed, this would help to reduce losses.

Cloud Peak, Ying City, S, and T Zones retreated and left Ye Zhongming in front.

Many peoples faces were ashen white, and they were terrified of the Chain Prisoner.

This was a power that was unimaginable to them.

Ye Zhongming stared at the intermediate-grade water gem. If this was damaged, he needed to switch for another instantly. If not, he might die.

But this was not his only worry. He looked at the sky and knew its next skill would arrive. This fellows skills were all top skills. Ye Zhongming was really impressed by the three nine-star evolved that managed to kill it in his last life.

The dark clouds grew, covering the entire region in a few dozen seconds. Moreover, it didnt look like it was going to stop. Apart from some people racing to get away, the others stopped.

Running was useless, and they couldnt be as quick as the speed at which the clouds were spreading. Why not just defend? After all, this ranged attack couldnt be so strong in every area.

There was a rumble, and the first lightning smashed into the C Zone formation. That lightning was instant, and those hit were turned ash. The people around started to twitch and spit out white foam. Their equipment was destroyed, and they were unconscious. No one knew if they would survive.

One lightning caused twenty deaths!

After this first explosion, more lightning started to rain down. As long as you were within the region, no one could escape.

The bolts of lightning differed in size and length. Their damage also differed, and it was based on luck. Some thin ones would numb the body, but some were like the first lightning. No matter the strength of your equipment, you would get pierced and die immediately.

Cloud Peak warriors who had retreated returned. They defended themselves but had nothing as strong as Water Bottle Protection. Although the lightning and light pillar caused the Water Bottle Protections glow to weaken, but it still didnt shatter and was holding on..

The energy of the water element gem was used, and it shattered. Ye Zhongming quickly switched it out, but one Cloud Peak member was still hit. That silver armor turned into iron water, and her body felt scorching.

But Ye Zhongming was quick, and a new Water Bottle Protection appeared to block the light pillar. As such, that Cloud Peak warrior survived.

Even if they saw death as a release, it didnt feel good to make a trip down to hell and return. This female warrior was sweating profusely.

Ye Zhongming heaved a sigh of relief and knew that this light pillars energy was continuous. The damage wouldnt increase based on the time that you were hit.

Boss, it doesnt seem right!

Ah Yang reminded Ye Zhongming.

Ye Zhongming looked and saw that the Chain Prisoner was panting. The blood from its neck had flowed to the ground.

It was becoming weaker.

Ye Zhongming was delighted and knew this fellow had made a wrong choice.

It was injured, and Ye Zhongming felt like its Horn of Life could heal its injuries. At most, it could use the Cannibal Flower Ocean once again to heal.

But maybe because it had been a long time since anyone had hurt it, rage got to its head. Not only did it toss its Blood Wood, it even used its strong attack skills to vent its anger.

Indeed, the two skills were extremely strong. Not to mention the light pillar from the eye, the black cloud was claiming the lives of survivors here.

But so what? Its injuries weren't getting better and were actually getting worse!

The lightning cloud suddenly scattered, and so did the light pillar. The Chain Prisoner stumbled to its feet and shouted. It ran towards the Blood Wood.

Stop it! Attack! Chuyin, bring the Blood Wood away!

Ye Zhongming shouted and called for Yellow Ball and Xia Baithe two of them and the dog-faced off against it.

The Chain Prisoner wanted to grab its weapon and escape.

It needed time to heal its injuries.

If it were someone else, those two attacks would cause them to collapse, and it would still be the final victor.

But it faced the Nature Staff, who had just turned into a piece of green grade equipment, and also Ye Zhongming, who had an intermediate grade gem. Its two attacks were greatly reduced. Although the lightning cloud was still powerful, it was not enough to cause the Human Alliance army to lose their will to fight.

The terrifying lightning cloud disappeared, and the eye-catching light pillar, too. Ye Zhongming realized that the Chain Prisoner was out of ideas, and this was the best chance to kill it.

But he was not the only person to realize that. A figure charged out from the crowd with a sharp aura.

His pupils constricted.

Seven stars!

Chapter 770: Four Winged Devil

Old Jia attacked!

Joy appeared on the faces of An Man, Zhang Hengzhou, and the others when they saw that person. Their glee covered the awkwardness and tiredness on their faces when lightning hit them.

Why would the Resistance Zone battle the Iron Giant? Were they stupid? No! They had a perfect intel system and the best analyst. Their plans to eradicate level eight lifeforms were so detailed that they could be stacked a few meters tall.

Only because everyone felt it was possible, which was why they tried.

The Resistance Zone was more careful and professional than the other factions in the apocalypse.

Although An Man had to come to an agreement, he didn't plan to follow it. He only wanted Cloud Peak to suffer heavy losses in the battle so that he could benefit.

But C Zone and the resistance zone had their trump card.

Even if they hadn't taken it out.

What couldn't be denied was that Ye Zhongming and Cloud Peak shocked An Man and the others. They really had a way to injure the Chain Prisoner badly. Looking at the situation, if they had some time, they might be able to kill it.

If such a thing happened, would An Man be happy with only 20%?

Even if he agreed, the bosses of C Zone wouldn't.

So An Man planned to go against his word from the start.

Now, he didn't have to take responsibility. Someone with a higher status than him attacked.

Jayce, Resistance Zones seven-star evolved.

Each of the four zones didn't have seven star evolved. More accurately, each zone didn't have a seven-star evolved.

Maybe there would be one soon, but at least now, the resistance zone only had two seven-star evolved; they were both alone and didn't belong to a zone.

The four zones nurtured them. Their resources were piled so that one person could lead the country.

For this, each zone paid a heavy price.

If Ye Zhongming had understood everything about the Resistance Zone, he would have been shocked by their generosity.

Ye Zhongming had only obtained one seven-star potion to date. How did he get it? Using the level seven crystals in the secret realm.

Could he obtain one seven-star potion by himself? Impossible!

It wasn't that Ye Zhongming wasn't strong enough or that he didn't use his advantage; it was because he didn't have so many resources.

How did the Resistance Zone get so many level-seven crystals to obtain the potions? They searched for level seven lifeforms and marked them. They followed and grasped all the information and set a plan to kill it!

One could say that they were killing these beasts around the entire country.

There were definitely losses, but they obtained many level-seven demon crystals. They placed them together to get a seven-star potion.

One could say that these two seven-star evolved were exchanged using bones.

Their level eight mutated lifeform hunt was what they did for the level seven beasts. But they weren't in such a rush because level eight lifeforms were harder to deal with, and this evolution wave wasn't here yet.

With great power came great responsibility. The Resistance Zone knew that the apocalypse was coming, and they had huge amounts of resources, but they also held responsibilities that other factions didn't need to bear.

They had to have the top combat strength.

Before Xia Bai became seven stars, the resistance zone already had seven stars evolved. They were the first to have such strength. Even now, they are the only organization with two seven-star evolved.

No one knew how long it would last; it might be very short, but it was currently like that.

But don't think they would care for other humans just because they had this responsibility. On the contrary, they didn't mind stealing resources if they could.

Now, they wouldn't give up the chance to kill this level-eight lifeform.

So, Jayce, the seven-star evolved who had been hiding in the Resistance Zone camp, appeared. He saw the Chain Prisoners weakness.

Mu Xinfei and Guang Yao were unsure if the seven-star evolved would join in, but they leaned towards no. To them, it was possible for all of them to kill the level eight lifeform, and they didn't need the seven-star evolved to attack.

Now that Jayce had jumped out, their hearts sank.

Mu Xinfei and Wen Zhong didn't get any news of Jayce following. This could mean many things. Jayce might be leaning towards C Zone.

Jayce appeared and showed eye-catching ability. His body transformed in midair. Four giant black wings stretched from his back, and an arm was on the tip of all of them, holding a sharp sword. His own hands held a shield and sword which shone green. The weapons were exquisite, and there were patterns on them. It looked like a set of equipment.

He also wore a silver Holy Army Coat. He had the best equipment in Resistance Zone and even the world.

As he flapped his wings, he flew to the Chain Prisoners height. The four swords swung backward, hidden beneath the wings. The wings then hid his body under them, and he became the shape of a drill.

Light shone from his body. With his wings covering his head, he stretched his sword out. The four thin swords on his body stretched out. After reaching a certain height, he dove towards the Chain Prisoner.

Four Winged Devil Bloodline?

Ye Zhongming recognized his bloodline and was shocked. This was a bloodline with a strong attack and decent defense. Moreover, it was tough to say if this was an explosive or continuous bloodline.

It could show strong combat strength in a short time but it could be maintained for a long time. In his last life, this was one of the top bloodlines.

This seven star evolved was very strong.

This was Ye Zhongmings evaluation.

But in the next second, his expression changed. Along with him were the survivors who were in charge of attacking.

They heard Jayce shouting at them.

Scram! I will kill it!
