

## Apocalypse 771

Chapter 771: Let it go

Your sister!

All the evolved cursed.

You kill it?

Why didnt you appear before? You even hid the fact that you were following the troops? We are risking our lives to injure this fellow and pay a heavy price, and then you appear?

You kill?

Why didnt you appear when the Iron Giant used Cannibal Flower, Eye Light Pillar, and Lightning Cloud? Now that you saw that it was weak and fleeing, and then you want to kill it?

Moreover, you can kill it, but why ask people to scram? Even if you want to take advantage, have some bottom line? Where is your pride?

Cloud Peak and Ying City Alliance were naturally furious. Even Mu Xinfei, Guang Yao, and others felt like they had been slapped in the face.

No matter how their relationship with Cloud Peak would be in the future, at least now, they were from the Resistance Zone. To others, they were all on the same side.

Others might not know, but they did. This seven-star evolved was nurtured by them. This didn't make sense since he was snatching resources from them. The two of them felt like they were smashing stones onto their own feet.

Jayce charged in front of the Chain Prisoner and targeted the weakness on his neck. The sword spun and hit the hand that the Chain Prisoner used to cover the wound.

Blood spurted.

This skill, which should be a bloodline or job skill, broke its skin.

This attack caused everyone to pay attention. C Zone cheered, but S and T Zone were furious.

Since you had such a strong ability, shouldnt you have just appeared at the start? Would everyone need to risk their lives so badly? Maybe they would have won easily.

Two seven-star evolved working together along with all the six and five-star evolved; they could have swept it.

Mutated lifeforms wouldnt use their strongest skills initially, and their habit gave humans a good chance. This Chain Prisoner was the same. If Jayce had joined at the start, maybe the Chain Prisoner wouldnt have released that lightning cloud!

The Chain Prisoner shouted in pain. The Ghost Metal Chains whipped toward Jayce. The soundwave was exceptionally loud. From this distance, Jayce wouldnt be able to dodge.

When Ye Zhongming saw that, he rushed under the Chain Prisoners body.

Jayce, who was wrapped in his wings, knew the attack was arriving. He stopped spinning. The four swords spread from the wings. Along with the spin, the sound of the blade slicing the sky got louder.

The swords were like toothpicks in front of the Chain Prisoner and these chains. Everyone was worried that Jayce was overestimating himself.

But when both sides clashed, the outcome shocked everyone.

Although the chains knocked Jayce away, the chains that touched his swords were sliced. In a short while, Ghost Metal fell from the sky. Ye Zhongming, who was waiting below, picked them up.

This fellow broke its defense and sliced many pieces of Ghost Metal. This infuriated the Chain Prisoner. It opened its mouth and roared at him.

It was so loud that everyone had to cover their ears. Those lower-level ones started to bleed.

Everyone knew that this should be a soundwave attack.

As expected, Jayces spinning body paused, and he shook in the sky.

Using this chance, the Chain Prisoner lined dozens of chains and smacked down like it was hitting a fly!

This seven-star evolved was sent into the ground.

Many people exclaimed. Even Mu Xinfei and Guang Yao were no exception. After all, this was one of the two Resistance Zone evolved. If he died here, it would be a huge loss.

Maybe only Ye Zhongming knew that this fellow should be fine.

Four Winged Devil Bloodline not only increased the user's body qualities and gave him many attack skills, but it also gave him defense.

Jayce dared to challenge the Chain Prisoner because of this defense, which gave him confidence.

Of course, this defense had to do with how long the bloodline could last. The stronger the attack he faced, the shorter the time.

Ye Zhongming laughed coldly. If the Chain Prisoner were so easy to kill, it wouldnt have been able to roam the wilderness and cities until it was nine-star.

Seeing the fly that it damaged being hit, the Chain Prisoner didnt show signs of letting him go. It used its leg to trample the ground.

Attack, attack!

An Mans eyes were about to pop out. His reaction was totally different from before. He was prideful and felt like a level eight lifeform was about to die under his leadership. But now he was filled with terror and afraid that a seven-star evolved was going to die when he was the commander.

Then, his future in the resistance zone would be finished.

The Resistance Zone could allow six-star evolved to die, but not seven-star!

He shouted towards Cloud Peak, Ying City, and S and T Zones.

But everyone ignored him.

If it were before, Mu Xinfei and Guang Yao would have helped, but now that Jayce was kill stealing? He failed, and you wanted us to help? Wishful thinking.

Even if they wanted to help, they wouldnt go now. The Chain Prisoner was stepping on Jayce, and if he was dying, he was probably dead. What was the point?

As for Cloud Peak and Ying City, they hoped for him to die. Help? Stop dreaming!

C, G, and the outside factions started to attack the Chain Prisoner to save Jayce. Although they were attacking, they grumbled to themselves: Who asked you to kill steal? Why did you ask them to scam? Now, you have failed and are getting attacked, and you want people to save you.

Boss, should we help? Ah Yang felt like attacking now would allow them to kill the Chain Prisoner.

Zhao Xingmei, Mu Xinfei, and Guang Yao looked at Ye Zhongming and waited for his decision.

Ye Zhongming weighed the pros and cons and said something surprising.

No, lets let it go.

Chapter 772: Lightning Ocean

Let it go?

Anyone who heard it was shocked.

Everyone risked their lives to kill it, and now they saw hope. You wanted to let it go?

Everyone didnt understand.

Ye Zhongming looked at the intense battle and saw the Chain Prisoner still attacking the crowd. He knew that it was hard to explain, but he had no choice. If not, they would not want to work with him in the future. After all, Cloud Peak didnt suffer losses today, but Ying City Alliance and both Mu Xinfei and Guang Yaos forces had many losses. They would feel that killing the Chain Prisoner was worth it, but letting it go was tough for them to explain to their subordinates.

I met it when the apocalypse started. I also sliced a small piece of the chain.

Ye Zhongming took out some Ghost Metal.

Cloud Peak was collecting these chains, so everyone knew that it was good. Since that was the case, there was no need to hide.

This is a special material and has good stats. It can improve the quality and ability of equipment.

Mu Xinfei and Guang Yao looked at each other and felt they knew Ye Zhongmings secret. Ye Zhongming smiled when he saw that.

His secret wouldnt be an item.

But when I saw it this time, I observed the part of the chain I sliced a year ago, that place Recovered.

This time, even Zhao Xingmei and Liang Chuyin were shocked. So the boss was observing so closely. Moreover, things were weird.

A year ago, be it me or the other survivors, we couldn't force this fellow to use any ability, so we didn't understand much. But this time, when it used these chains to attack, did you notice where they came from?

Everyone looked towards the Chain Prisoner. These chains were smacking the survivors, and anyone who touched them was either injured or dead.

It is from its body

Mu Xinfei muttered.

Right, these chains are from inside it. In a way, we don't understand.

Even after Ye Zhongming confirmed this, he was still shocked.

This fellow's body was just magical.

So you want to raise it to provide this metal for you?

Guang Yao took a close look. He wondered if he should pass it to the Holy Army Coat creator. If he could understand its features like Ye Zhongming did, the Holy Army Coat might get better, and he might create a green set.

Ye Zhongming shook his head, If I have absolute strength to suppress it, I would do that. But it is evolving. It would reach level nine before all of us.

I just want to get a few more chains before it reaches level nine.

Everyone was shocked by his thoughts. This was a level eight lifeform. It wasn't so simple to slice. People had to die! His idea was too bold.

Since their boss said that, Cloud Peak members knew that he had a way. Numerous things proved that Ye Zhongming did what he said.

Also, do you think that this fellow has no other way to fight back? Such a top presence should have eight or at least seven skills. But how many have he used?

Everyone was stunned. They didn't consider that, so they started to count.

There were only five. If Ye Zhongming was right, didn't it mean that it had at least two more skills?

Based on the mutated lifeforms' habit, the skills it used later would be stronger. Then, these two last abilities

Everyone didn't dare to imagine and instinctively retreated.

Even if we can kill him today, we must pay a huge price. So many people have died, so does killing it make up for the losses?

This was where Ye Zhongming was different from the resistance zone. Resistance Zone didn't care about the losses. They did it for honor and pride. That had become a habit.

But Ye Zhongming was different. He focused on elite troops, and each warrior was important. Moreover, he had a way to deal with that fellow, so he wasn't willing to waste more lives.

Even if we kill it, we won't get 80%.

Mu Xinfei frowned, and killing intent flashed on her face. She felt like if they killed the Iron Giant and they went against their word, she wouldn't show them any mercy.

Ye Zhongming shook his head, That seven-star evolved is alive.

Everyone was filled with disbelief. The Chain Prisoner smacked him to the ground and trampled on him, and he wasn't dead?

Ye Zhongming sighed. This was the importance of a good bloodline. The Four Winged Devils defensive skill was strong. These two attacks caused him to suffer huge injuries, but it wasn't fatal. He could sense that the fellow was alive. The reason why he didn't come out was that he hoped that others would fight it first.

Ye Zhongming was filled with disdain against this seven-star evolved.

He was a piece of trash.

The apocalypse didn't lack such people.

Mu Xinfei and Guang Yao were silent. His side wouldn't have the high-level combat advantage if Jayce were still alive. In the context that killing the Iron Giant would cause them to suffer heavy losses, and they would not get 80% of the rewards, Jayce wouldn't agree.

Should they have a battle? They were similar in strength, so heavy losses on both sides weren't the outcome anyone wanted to see.

If they can kill the Iron Giant, that would be good. We will take a part. If they can't, then we will let it go. In a month, we will be far stronger than it is. At that time, we will kill it easily.

Ye Zhongming smiled confidently and then said to Mu Xinfei and Guang Yao, We will take all the benefits. Isn't that better?

The moment he said that, the Chain Prisoner started to go crazy. The Ghost Metal Chains rose into the sky. It clashed with the Horn of Life, and electricity charged the chains. The chains started to dance around it as the currents grew stronger. At a certain time, these chains smashed downwards into the ground.

Lightning Ocean. With the Chain Prisoner at the center, it started to spread in all directions!

## Chapter 773: Communication

Lei Lu rubbed her head, which was about to explode, to return to her senses.

She was An Man's deputy, or rather, his lover.

Although she was evolved and had reached five-star, but she knew that she basically didn't participate in any battles in the apocalypse. She was a flower that was raised in a greenhouse. She was able to get to her level because of An Man.

Whether in life or on the bed, she served this person who was old enough to be her father very well.

She was interested in feeling the atmosphere. An Man couldn't stop her and thus, agreed for her to come. To him, although they were hunting a level eight mutated lifeform, they sent many people. They also had Jayce the secret weapon so they would be safe. So he allowed her to follow.

However, due to safety considerations, she placed her in a place he felt was very safe.

C Zones Exquisite Floating Ball.

It had great invisibility methods and high defense. An Man didnt think that it would face any dangers.

But he was wrong and underestimated the Chain Prisoners ability. Under that terrifying Lightning Cloud, Apart from Cloud Peak and T Zones modified Exquisite Floating Balls, C, G, and S Zones balls were destroyed.

Lei Lu fell to the ground. If not for the good defense and the ball falling because the lightning had damaged the Floating Balls systems, she would have died even if she were a five-star evolved.

She relied on the evolveds strong body to recover some stamina. She looked around in shock and saw corpses and bodies. She had never seen such scenes and felt disgusted.

She wanted to find her allies but only saw their corpses. The others in the wheel didnt have high levels, and most of them were technical workers. Be it the lightning or the fall, they were enough to kill them.

Far away, that big fellow was still battling the humans. Lei Lu saw An Man. She wanted to find him, but some sounds made her stop.

She knew that it was the communication device within the Exquisite Floating Ball.

Was someone contacting them?

Although Lei Lu hadnt experienced battle, she understood the communication device. For some reason, be it the resistance zone or the Sharp Peak Mountain, they would be radio silent. If there was a call, it must be because of something huge.

She hesitated but still walked into the Exquisite Floating Ball. She moved about and picked it up.

A minute later, she ran out in shock.

An Man hadnt fought with all his might in a long time. His job and skills flew towards the Iron Giant like they were free.

He was hoping that Jayce was okay.

If anything happened to Jayce, then killing the level-eight Iron Giant was his only chance to redeem himself.

No matter which it was, he had to kill this fellow.

He led the C Zone members and ordered the others to attack.

But some people decided to retreat. Especially those external factions. They came to get recognition and benefits from the Resistance Zone but didnt want to die. They agreed to hunt the level eight lifeform and were prepared to suffer some losses. But if they were all to die, they wouldnt be willing to do that.

Because Jayce butted in, those who were attacking had stopped and were just watching. Now that Jayce was nearly dead, the remaining people wanted to kill this fellow.

It was weak, and they might be able to kill it, but how much did they have to pay? If they kill it, could the things they get make up for the losses? Also, what if this fellows final attack killed them?

With such thoughts, many factions decided not to help, and many retreated.

At that moment, a lightning ocean spread.

Many arm-sized lightning currents spread in all directions. Any lifeform that touched it would be hit by lightning. Moreover, these currents were too dense, and no one could dodge them. They could only rely on their strength to tank it.

An Man shivered from the lightning. He was near the Iron Giant, where the current was the strongest. He felt really bad, but he had to hold on.

But because of the Iron Giants attacks, the surrounding evolved stopped attacking. Both sides were in a face-off. There were only two outcomes: the Iron Giant using the Lightning Ocean to kill them or the evolved surviving until the Iron Giant ran out of energy.

This lightning ocean was huge and even reached where Ye Zhongming and the others were at. But as they were far away, the lightning wasnt as strong. It couldnt kill three-star evolved and above.

The sizzling sound lasted for three minutes.

Many humans couldnt take it and fell to the ground. Their bodies twitched, and they lost their lives. Many of them tried to flee, but they had to suffer from intense pain. The currents seemed like they had their own minds and would move to attack their targets.

This situation terrified Ye Zhongming. He was impressed that this fellow had many AOE attacks, each one terrifying.

Finally, the Chain Prisoner stopped this ability. Its body was covered in sweat, and the blood from its neck flowed to the ground. It looked at the humans who were still standing and cried out. It turned towards Ye Zhongming. Its weapon was still in his hands.

Seeing Ye Zhongming raise the Staff of Nature, rage and unwillingness appeared in its eyes. In the next second, it ran in another direction.

Everyone was stunned; did it want to flee?

Many people realized and wanted to chase.

But the Horn of Life fired a streak of light that hit the lightning. These streaks of lightning connected and formed a dragon storm. It swept the area and blocked those who wanted to chase it.

The lightning dragon storm also attacked Ye Zhongming and his group. Ye Zhongming could only point at the Iron Giant. A mark only he could see appeared on its head and disappeared along with its giant body.

Chapter 774: Demon Monster appear again

A thick, gory stench spread on the battlefield that couldnt fade.

Corpses were everywhere, and most of them were incomplete. Some were humans, and the rest looked similar to humans, but they were green monsters.

Delin drank a mouth of water to moisturize his throat. He smiled bitterly.

This was the first time he knew that an evolveds throat would go hoarse if he used it too much.

He touched the left of his head, and his ear was gone. A three-meter-tall monster had broken through C Zones defense. Delin faced it, and after killing the monster, which had no abilities at all, he paid the price of it biting off one ear.

Damn, will it have any illness?

Delin mumbled as he looked at the monster whose head was smashed and gave out a disgusting dark green liquid.

The monsters stopped after forcing this attack back, but they didnt retreat. They still surrounded C Zone.

How many casualties are there?

Delin asked the deputy expressionlessly.

The deputy lowered his head and hesitated, Over 45 thousand.

Even if he was mentally prepared, he couldnt help but close his eyes.

Over 60% of them were gone. If not for them being surrounded by such a ratio, they would have collapsed even if they were all evolved.

They were just trapped beasts.

Whether they were able to flee or not, C Zone would suffer a huge blow. They would go from the strongest region to a situation similar to S Zone.

They might be even worse!

Delins gaze was filled with despair but also unmistakable rage.

What was going on with C Zones intel? Why did they make such a mistake with the number of monsters? The information told them that there were just ten thousand. How many were there? 200 thousand? Or three hundred thousand?

Delin wasnt clear, and he didnt have the mood to count. So what if he counted? He was still trapped and waiting for reinforcements that might not come.

Commander, we have sent the distress message, but the headquarters havent reacted.

Delin nodded and said weakly, It is useless. They cant help us as they are too far away. If those monsters let us rest for over an hour, lets try to break out!

The deputy but is teeth. Like Delin, he didnt have high hopes of breaking out.

The survivors were still okay when defending in a formation and could block their attacks. If they tried to break out, the formation would be in chaos. They would be exposed to the monsters that relied on their bodies to fight. They had no advantage and couldnt even outrun them.

Although C Zones warriors had killed at least 50 thousand of them, many remained.

commander

I know. Delin interrupted him and looked at the dense monsters. Lets get as many of us out as possible. It is better than dying here. In a while, Broken Blade will hold up the rear. Let the women go first.

Killing intent flashed in his eyes, and he said, in a lower voice, You lead. If you notice anything wrong, you must Kill the women first, do you understand?

The deputy raised his head in shock and looked at Delin in disbelief.

Why, why?

Delin was annoyed with his deputy and bit his teeth, Can you grow a brain? Didn't you notice that the monsters would grab the women in the team? Can't you think what they are doing?

Why?

Delin slapped his head, Stupid! There are only two possibilities. First, they like to eat women. Second

Reproduction!

The deputy finally understood and replied.

Delin nodded. He only thought about two possibilities.

So, even if they kill all of us, we must not let them get stronger!

The deputy slapped his chest, Understood, I will complete the mission!

Delin nodded and wanted to say something, but he looked over his deputy's shoulder at another subordinate who was running over.

Commander! The headquarters have sent news! the subordinate shouted, with joy on his face. When he got nearby, the soldiers turned.

Delin looked at his expression, and his heartbeat quickened. He thought about a possibility.

How?

They told us to defend. The team hunting the Iron Giant is 50 kilometers west of us. If we hold for a few hours, they will arrive!

The battlefield was silent when they heard the news, and they started cheering!

There was light at the end of the darkness, hope in despair.

If they could live, who would be willing to die?

Delin's face lit up. He laughed. Although he knew that the few hours would be as hard as a lifetime, he had something to look forward to. Although he knew that many more of them would die in the few hours, but Many would survive.

The green monsters were shocked by the cheers and started to retreat. The survivors were delighted and started to laugh. Some even pointed middle fingers at them.

A four-meter-tall monster saw the humans laughing and roared. The monsters replied with cries before they launched their attacks.

Blood and pieces of meat started to fly in mid-air.

The Chain Prisoner escaped, and all that was left was a tattered battlefield. Each faction suffered heavy losses.

Apart from Cloud Peak.

Ye Zhongming brought 500, one died, a few dozen were injured and the rest were fine.

Moreover, Cloud Peak earned the only thing from this battle.

The Blood Wood and many pieces of Ghost Metal.

An Man led a group of people with solemn faces and walked over. They were very aggressive. Cloud Peak lined up, and they were ready for the impending conflict.

At that moment, a woman ran over and shouted toward An Man. Just a few sentences and his expression changed.

Chapter 775: Let's spar

What? What did you say?

Although everyone was on the verge of clashing, after hearing what happened to C Zone, Mu Xinfei and Guang Yao were anxious.

They were still part of the resistance zone and knew this organizations foundations and strength. They didnt expect them to face such a thing and werent willing to see it happen.

At least, it was like this before they split.

Only Cloud Peak and Ying City could keep calm. To them, C Zones death didnt matter.

But Ye Zhongming frowned. That woman wasnt too detailed, but Ye Zhongming heard something shocking from a few parts.

Like Green human-shaped monster.

What did you say? Say it again!

A voice spread from the side. Jayce, whom many people thought was dead, appeared. There were cracks on the Holy Army Coat, and one of his arms was twisted.

Although he had survived the Chain Prisoner, he was severely injured.

Old Jayce, you are fine!

An Man was delighted. Fortunately, the seven-star evolved didnt die. As for the other losses, there would be ways to make up.

Lei Lu stammered as she told the famous seven-star evolved everything.

An Man and Jayce looked at each other, and they could see the disbelief in each others eyes.

The Resistance Zone was the biggest faction in the country, the C Zone was the strongest, and any battle squad was a super faction outside. A few squads worked together and were getting destroyed. They were trapped. They would all die if there werent any reinforcements.

Moreover, from An Mans mouth, everyone knew that the trapped C Zone were all the elites. Even Broken Blade Battle Squad was a part of them.

The others might not know, but those from the resistance zone knew what that meant.

If these battle squads were wiped out, C Zone would be destroyed, and the entire Resistance Zone would also suffer!

This was worse than S Zone splitting. At least S Zones split wouldnt kill so many.

Lei Lu waited, and once everyone woke from their shock, he hinted to An Man. This person in charge spoke with her before he returned with a weird expression.

Broken Blade Battle Squad is in a bad state; Commander Ji hopes that everyone can assist.

He didnt have the confidence and forced those words from his mouth.

Many people gave a mocking smile.

Assist?

He made it sound simple, but could the enemy that trapped C Zone be weak? The various factions were hurt by the Chain Prisoner, so were they going to die or to help?

Also, Mu Xinfei and Guang Yao had a choice. In the past, the resistance zone had the responsibility to help one another. But things were different, not to mention the clash when hunting the Chain Prisoner. Just the reason why C Zone was there was unknown. They had such a huge operation, but the other zones didnt know. They wanted to hide it from them. Since that was the case, why should they help you?

Niece Xinfei, Commander Guang, can we have a few words?

An Man knew that it was time to yield. He was very polite, and after glancing at Jayce, he wanted to speak to Mu Xinfei and Guang Yao alone.

Jayce twisted his arm back. It was dislocated and not broken. Seeing An Mans gaze, he said something. Mu Xinfei and Guang Yao could ignore An Man, but they had to give Jayce some respect.

The few people, along with those from G Zone, gathered and discussed something. Mu Xinfei and Guang Yao were emotional, but things calmed down. After a while, they returned.

We agreed to help. Guang Yao said, he sighed, We belong to the Resistance Zone and C Zone promised many benefits. Commander Wen has agreed.

Ye Zhongming nodded and turned to Mu Xinfei.

Sometimes the temptation is hard to refuse. She shrugged and said in anticipation, Go with us, anyways someone is paying, moreover

Mu Xinfei said softly, Just take a look; if it is too dangerous, we can return.

Guang Yao nodded. Even if the two agreed to help, they didnt plan on dying.

As expected, after An Man and the other factions discussed, he walked to Ye Zhongming. He was bitter as Ji Ruiguang named Cloud Peak as the people he had to convince. But both sides conned each other, so it was awkward to talk about cooperation now.

To improve the atmosphere, An Man said some polite things that made Ye Zhongming smile coldly. He waved, What is the point in saying all that? Cloud Peak and Ying City can go, but it depends on what you can give.

His face turned red, and he sucked in a deep breath, The conditions will definitely satisfy you.

Each warrior will get three hundred level three crystals; those who get handicapped will double. If they die, it will further double.

Each warrior will get a basic stamina potion, basic mental energy potion, and basic healing potion.

The resources this time will be based on the best conditions that the resistance zone can give.

We will make up for the ammo and equipment that you use.

Four-star evolved will get double, five-star triple, six-star five times, seven-star ten times! Commander Ye, you will get 20 times. We will give you 10 thousand level four crystals extra as payment for you.

What I say include Battle Beasts and summoning beings.

An Man panted. He wasn't tired, but he was nervous, I will use the accurate battle recording equipment to record the entire event so it won't be wrong.

Ye Zhongming blinked. These conditions weren't a small sum. Cloud Peak was filled with five-star evolved. Based on what An Man said, the conditions were very good. He even gave Ye Zhongming 20 times the reward and 10 thousand level four crystals.

But this was it? C Zones elites were in danger. Ye Zhongming and C Zone weren't friends, so if he didn't rip them off now, when?

Ye Zhongming touched his fingers and smiled, You have to pay those things first.

An Man thought about his own pocket and agreed.

I heard that your Resistance Zone has something called Mechanic Fortress? I want one.

Hearing Ye Zhongming's words, An Man and Jayce's expression changed. An Man shook his head, and Jayce said viciously, Don't ask for too much!

Ye Zhongming waved, Then forget it!

After saying that, he wanted to lead his men away.

An Man and Jayce looked at each other. An Man suppressed his rage and weighed the matter.

Cloud Peak was too important. Not only did they have a few hundred five-star evolved, but they also had many six-star and the only other seven-star.

If they go, the reinforcements would be much stronger, and they would have more confidence. If they didn't go, the reinforcements strength would reduce by a third!

Thinking about how the elite forces would get wiped, his body shook. He chased up to Ye Zhongming.

Do you have any other condition?

Ye Zhongming smiled innocently, I have a small condition.

He used his hands to signal that it was small and then pointed at Jayce.

Cloud Peak also has a seven-star evolved, let's spar.

## Chapter 776: Colorful Wheel Illusion

A 60-thousand-strong team was moving in the wilderness. Within a few kilometers, there were 20,000 people. The team was in charge of clearing mutated lifeforms that they faced.

This team that came out from Sharp Peak Mountain to wipe out the Iron Giant lost 10,000 people after the battle.

This wasn't a small sum. Ten thousand evolved had spent many potions, scrolls, and effort. All of them died to the ranged attacks of the Iron Giant.

Although each faction only lost a thousand people, but one must know that the number represented a percentage of the faction.

One could say that this battle caused one to suffer huge losses, and they even failed in the hunt.

The only people to gain anything were Cloud Peak and Ye Zhongming.

The Giant Blood Wood that many people carried was the target of jealousy.

Especially Jayce, who was beaten up. He hated those from Cloud Peak. When he glanced at the woman in the mask, he was terrified.

Ye Zhongming's sparring couldn't be rejected. But the outcome was so shocking that many were still in shock.

Xia Bai beat him up!

Xia Bai had attacked once in that battle, so many people didn't care much about this seven-star evolved. Her presence was slightly lower.

But after she fought Jayce, everyone noticed how terrifying she was.

Everyone respected seven-star evolved, but they weren't so fearful of them. After all, they belonged to the same faction. But when Xia Bai attacked, everyone felt chills down their spines.

Many people felt that a seven-star evolved wasn't terrifying, but a crazy seven-star evolved was terrifying.

Cloud Peak's Xia Bai was insane.

Each person knew why Cloud Peak's boss suggested the sparring. He wanted to vent his anger on Jayce for trying to kill steal. But to be honest, no one had high hopes for Xia Bai. After all, Jayce was famous in the Resistance Zone. A four-winged Devil bloodline made him outstanding, and he was pretty much invincible.

But who knew that things were totally different when they started the battle?

Many people analyzed the reasons why Jayce lost. For example, his bloodline was under cooldown, and he wasn't at his strongest state. The Iron Giant had also injured him. The Holy Army Coat was cracked and couldn't be used. They were begging Cloud Peak, so he had to hold back.

But no one could deny that Xia Bai was strong, and she fought without a care for her own life. It was terrifying. No matter what you did, she would attack. She didn't defend and wasn't afraid of being injured. She did everything to kill the enemy.

Jayce faced many restrictions and was unable to go all out. In just a few minutes, Xia Bai smacked him to the ground.

Many people saw a seven-star evolved hug his head and crawl on the ground. This would probably be the only time they saw such a thing.

Ye Zhongming didn't care about how they won. He told Xia Bai to challenge him so that he could vent his anger. Who cares if they have many worries? Moreover, if they had no worries, Ye Zhongming wouldn't have told Xia Bai to attack. They could all attack at once.

So, Jayce took a loss, and Cloud Peak vented their anger.

Maybe only Cloud Peak knew that if not for Jayce, meaning too much for the resistance zone, their boss would have told Xia Bai to kill him.

"Photos are back."

Guang Yao's expression wasn't good when he passed Ye Zhongming a laptop. On it were pictures and videos from the Exquisite Floating Ball.

Ye Zhongming flipped them, and his pupils constricted.

They were demon monsters!

Who knew that he would meet these fellows who terrified mankind in his last life, after a full year?

Although the resistance zone had some information about them, they didn't understand them much. They treated them as ordinary mutated lifeforms. Only when the C Zone was surrounded did they realize how terrifying they were. They only thought that these fellows were strong because there were many of them.

"There are around 300 thousand. This is problematic."

Mu Xinfei walked over. Their S Zone Exquisite Floating Ball was destroyed, so she could only come to get information.

"There should be around 20 thousand from C Zone left, along with the 60 thousand of us, 90 thousand against 300 thousand. It is not possible, but we can protect C Zone to retreat. But the losses... Won't be small."

Mu Xinfei thought about it. She looked around and agreed with Guang Yao's thoughts.

They wouldn't be willing to wipe out the monsters, but they were confident they could open a gap and save people.

Ye Zhongming didn't say anything, but he wasn't as optimistic in his heart.

With his understanding of the demon monsters, they wouldn't let go of prey that was already in their mouths. They would intercept the human reinforcements. Moreover, the ratio of female evolved wasn't as many as guys, but they were still more than during peacetime. This point alone meant that the demon monsters would attack the reinforcements.

Their desire to reproduce was above their desire to consume.

Moreover, the images weren't clear, but they could tell that these demon monsters were very strong. These monsters that grew stronger with size were over two meters on average, which was around level three. Many of them were between two and three meters. Three-meter monsters were already five-star.

One must know that they were stronger than mutated lifeforms of the same level.

Moreover, Ye Zhongming knew that the monsters that could surround the elites of C Zone were very strong. The four-meter monsters were level seven, and no one knew how many there were.

After Mu Xinfei and Guang Yao left, Liang Chuyin looked at the frowning Ye Zhongming and said, "They don't know how dangerous this thing is, but you do. Let's return the things to An Man and leave."

Ye Zhongming shook his head, "Humans are always greedy."

He looked at the team and said, "Although An Man doesn't want to tell us, aren't you curious about why their elite forces went there? Why would they send so many forces if not for a good thing?"

Liang Chuyin nodded. There were huge interests for the resistance zone to send so many people and even risk their foundations.

"Also, Xia Lei told us about Sister Liu's progress, and she mentioned these monsters."

Liang Chuyin was stunned. She didn't care about such things, but she recalled that there was such a thing. Liu Zhenghong had been studying these monsters, and she had made huge progress. She hoped to shift their genes to warriors to deal with the quick aging problem.

"But if we go, our losses..."

Ye Zhongming smiled and held her hand. "Don't worry; before going there, we need to go somewhere. Many good things are waiting for us."

Chapter 777: Colorful Wheel Illusion Part 2 (1)

You are going to leave?

An Man frowned. When he heard the news, he clenched his fists and wanted to punch Ye Zhongming.

He agreed to help C Zone. He raised the conditions, collected the items, and now said he wanted to leave? Did he think that he was watching a drama? He would come back soon?

Jayce was breathing heavily. He wasn't like a seven-star evolved. His eyes were red as he stared at Ye Zhongming and wanted to swallow him alive.

Did he take the beating for nothing?

Even Mu Xinfei and Guang Yaos faces were solemn, and they didn't know what Ye Zhongming was doing.

Ye Zhongming wasn't affected and looked at them, "If things go smoothly, I need just half a day before I meet up with all of you. Just head there and restrict the demon monsters. Remember, don't split up. If not, those monsters will attack you."

You make it sound so simple, restrict? What about those trapped forces? What if the monsters send tens of thousands to attack us and continue attacking those forces?

The person in charge of G Zone was unhappy with their actions. Although he didn't think that Ye Zhongming and Cloud Peak were really afraid, but it added a huge uncertainty to their operation.

After all, this group was very strong, and they also had a seven-star evolved.

Should you reconsider?

Guang Yao tried to persuade. If Ye Zhongming left, he would lose all confidence. He had started to rely on Ye Zhongming and Cloud Peak.

I have to go. This is not only for myself but also for this operation. Ye Zhongming said solemnly, Only then will we have a chance of succeeding.

What do you mean? although An Man was unhappy, he didn't lose his rationality. He heard Ye Zhongming's words and asked.

That is all. Just remember to restrict them on the outside and slice them bit by bit. Don't charge forward to battle them. Even if I am there, we won't be their match.

Ying City will remain with all of you; the Exquisite Floating Ball will also provide air support.

He didn't care about them and led Cloud Peaks 500 warriors to leave in a direction.

Guang Yao touched his chin and thought back to the place that Ye Zhongming told T Zone to help him find. That place was near here.

Ye Zhongming left, so the others had no choice. Fortunately, over a thousand Ying City members and the Exquisite Floating Ball remained. That calmed the uneasiness and rage of many.

The team could only continue towards the unknown.

After leaving, Ye Zhongming led Cloud Peaks warriors to rush. They were at least five-star evolved, so they were quick. In just an hour, they got close to the region.

Ye Zhongming looked around and also at the time and decided to take a rest.

A weird phenomenon might appear; don't panic. Ye Zhongming squatted in the middle. The others surrounded him and listened to his instructions.

If it really appears, some special monsters might appear too. Physical attacks do nothing to them, but job skills, other skills, and crystal weapons can kill them.

The 500 listened. They were used to listening to his orders.

We will split into ten teams, 50 a team. Every time a monster appears, one team will surround and kill it. If it is problematic, just hold it down and wait for help.

Xia Bai, Ah Yang, Chuyin, Yellow Ball, Ya Tian, and Ya Ni, the few of you are reserves. The moment you notice that there is a strong lifeform that the team can't kill, head over to kill them.

Remember, it won't last long. I will try to get the benefits, but the faster I do it, the more monsters there will be. So be careful and coordinate with one another. It might be ten minutes, it might be half an hour. Hold on. Even if you don't kill the enemy, just keep yourself safe.

Might?

Xia Bai noticed a phrase and suddenly asked.

Yes, might. I am not sure; I got this information from some news.

Ye Zhongming replied. He couldn't tell them that he had heard from his last life that something called a Colorful Wheel Illusion would appear here. Many Colorful Wheels would appear, and it would last for 30 minutes.

Rumor had it that a team that came out to hunt met this mysterious thing. As it was so sudden, they were terrified. But quickly, they were shocked by the colorful wheels, so they started to spin it and got the job scrolls.

Of course, opportunity and dangers existed together. They faced attacks from weird energy lifeforms. They were immune to physical attacks, and only skills could kill them.

Based on what those that survived described, those colorful wheels appeared and then disappeared. Many energy bodies would attack if someone obtained the scroll from it before it disappeared. These energy bodies were strong and weird. Half of the dozen-strong team was killed, and only 3-4 people survived.

As the date was easy to remember, this story spread, but the place was uncertain. However, there were detailed descriptions of things around, which Ye Zhongming used to find the place.

Of course, Ye Zhongming also knew that these were things that he heard. Although they were true, but he hadn't found the position. People might have also changed the timeline, so he was unsure. He came here to try his luck.

He was also unsure of the strength of those energy bodies. He hoped that his five-star full silver team could deal with it.

After instructing them, he led the team forward, and they arrived at the rumored place very quickly. He told everyone to prepare, and he started to scout the surroundings.

Zhongming, someone came.

Ye Zhongming was stunned but didn't get annoyed by the interruption. Instead, he felt that things were true, that things did happen here.

He saw a team running over. There was a mutated boar in front of them, which should be their prey. When they saw the team looking at them, they stopped. They were filled with fear and wariness. They discussed with each other before running.

Ye Zhongming pouted. If these people ran over, he would give them some benefits since he stole what they got in his last life. But things were quiet now.

Chapter 777.5- Colorful Wheel Illusion Part 2 (2)

As time passed, the sky suddenly turned dark.

The white sky had no clouds for miles, and the sudden darkness was weird. Suddenly, a giant wheel appeared a few dozen meters from Ye Zhongming. It was illusionary at first but turned physical after a few seconds.

Ye Zhongming ran over. He took a look and saw five regions. One was black, and the rest were colorful regions representing job scrolls.

Ye Zhongming couldn't suppress his smile after seeing that.

Although high-level evolved, all already had jobs, but in truth, not everyone in the apocalypse had one.

Ye Zhongming lived for ten years in his last life and only got to six-star, but he had two jobs. They were ordinary jobs. If not for his being lucky to raise his Marksman job to a high level, he probably wouldn't be able to enter a squad.

With Xia Bais team as an example, Ye Zhongming spent many resources on them so that they could all become five-star evolved and have at least four silver equipment. He also gave them all battle beasts.

Each one of those showed Ye Zhongming's job advantage and his fortune.

He could craft many silver equipment as a Glory Smith and having Ghost Metal. He had the Super Elimination Technique and naturally had large amounts of evolution potions.

But he didn't have a way to get many job scrolls for them. Every faction lacked this. Job scrolls didn't have restrictions, so people who got it would use it for themselves. They didn't consider whether the job was useless or whether they could get job advancement scrolls.

The conclusion was that greed caused a waste of large amounts of resources.

So, the prices of job scrolls were always high, and there was no supply of them.

Even Ye Zhongming obtained job scrolls because he was lucky. Some were from a few big events. If not, his jobs wouldn't be completed.

Thus, when he knew Sharp Peak Mountains position, he planned to come here to try his luck.

Fortunately, he succeeded.

But he immediately noticed that this wheel was different from ordinary colorful wheels. The center of it was a golden star.

What did that mean?

Ye Zhongming didn't understand. But he knew that the formation was limited. Each wheel was also time-limited, so he didn't have time to study the star. He placed demon crystals into the wheel.

The colorful wheels cared about overall energy and not level. He had large amounts of level three crystals, so he used them here.

Very quickly, the wheel was filled with energy. He used the Super Elimination Technique to remove the black region. When the skill worked, he totally relaxed.

The wheel spun and landed on a colorful region. A job scroll rolled out, and he grabbed it.

He didn't look at the skill and placed more crystals to spin a second time.

But the energy bar only reached half before there were sounds from behind. He turned and saw an energy monster the same color as the region he spun appearing behind. It raised its giant hand and smacked down at him.

This attack didn't give off any energy fluctuation. If not for his people reminding him, he might have been hit.

His body flashed to dodge the attack. He waved, and a bright energy fired at the energy body. This fellow was shattered. Its body exploded and turned into energy specks that scattered in the sky.

The Lightning Turret and Crystal Cannon fired, and instantly killed this rare monster.

Ye Zhongming saw that it worked and wanted to continue spinning. But he turned and saw that the wheel was turning translucent. It disappeared.

Your sister! My crystals!

He had placed many level-three crystals!

It appeared again!

Liang Chuyin pointed forward, and Ye Zhongming looked. Two similar wheels appeared a dozen steps from him. The reason why they were similar was because they had differing numbers of regions. One had three; one had six. Moreover, they had golden stars. The three region was a five-sided star, while the six region had two stars.

Was it level? This thought flashed in his head. He ran to the two-starred wheel and started to toss crystals.

When Ye Zhongming was busy, more wheels appeared. There were many of them, and in one period, ten appeared.

Ye Zhongming had only heard of the news and didn't know exactly what would happen. He thought about it and called Xia Bai and Liang Chuyin over. He passed them crystals.

Put it into the wheels, but don't spin it. Wait for me!

They nodded and knew that time was of the essence. They split up to place crystals on the wheels.

Ye Zhongming's wheel was full. He got a scroll, and that energy being appeared again. They still used the crystal cannons to attack, but this time, it spun, and the light on its body dimmed. It was still alive. It got close to Ye Zhongming to attack.

The Violent Lightning Turret didn't dare to fire as he was too close. The first 50-person team charged into the battlefield and surrounded this monster.

Ye Zhongming rushed to spin the other wheel.

Xia Bai had filled it up, so Ye Zhongming went to spin it. But when he returned, his wheel was gone, and those crystals were wasted.

After this repeated, although he gained a few scrolls, there were more energy bodies, and they had lost many crystals.

Ye Zhongming started to understand the pattern. The wheels could be spun once or twice before they disappeared. The time was random. Some would still be there after two spins; some would disappear after three. Some would disappear after one.

Ye Zhongming told the two women to back out. He would select the wheels to spin.

On one side, he spun the wheels, and on the other were Cloud Peak warriors who entered the battlefield. This region started to get busy because of the illusion.

Five stars! Ya Tian shouted. Ye Zhongming saw the wheel with the most stars today. He dashed over.

Chapter 778: 68

Ye Zhongming saw that there were five golden stars at the center of a wheel with only two regions.

He didn't think and started to shove crystals into it. He was afraid that the only five-star wheel to date would disappear.

The sounds of battle continued to get more intense. Ye Zhongming glanced and saw some of the energy bodies being huge. With just a few strikes, they showed strength no weaker than a six-star evolved.

At the same time, he was clear that the more stars in the center of the wheel, the stronger the energy being summoned. A four-star wheel summoned a five-meter monster that looked like a dinosaur. It spat dozens of energy balls that dealt huge injuries to the team around it.

The five-star wheel needed more demon crystals than the other wheels. Ye Zhongming tossed crystals in, and the energy bar didn't fill quickly.

Finally, it was full. He eliminated the black region, and he obtained the job scroll.

He dodged immediately. A dozen-meter giant energy octopus appeared. The moment it appeared, it raised its eight claws at Ye Zhongming, and in the next moment, light pillars fired at him.

At the same time, the crystal cannon at the side fired. This angle wasn't blocked, and it was within range.

Ten minutes had passed, and Ye Zhongming obtained six scrolls, but this was far from enough. He looked at the energy body that was targeting him. He shouted for Xia Bai to deal with it while he spun other wheels.

The gunshots and cannons fired loudly and left an intense light when it hit the body of energy. The team that fled stopped behind a hill, and a few of them used their binoculars to look.

Oh my god, those are the colorful wheels that produce job scrolls! So many!

A 20-year-old guy gulped as he looked at those wheels in envy.

He was one of the stronger members of his team and was already a three-star evolved, but he still hadn't had a job. He wanted one for a long time.

But he didn't have a chance to get such a precious scroll as he couldn't buy it even if he had money. Of course, he didn't have that amount of money.

That group is so strong. Do you see them? They are using silver equipment.

His brother crawled beside him. He had just turned 18 but was already an experienced warrior in the apocalypse.

Brother Dou, what should we do?

The others looked at the young man and didn't know how to handle this.

He thought about it, Old Yang, bring two brothers to inform the boss about this. The others stay here, and let's just have a look.

The guy called Old Yang nodded and led people away.

Twenty minutes passed, and every Cloud Peak member was in battle. Ye Zhongming had obtained 14 scrolls.

But this was far from his expectation but these wheels appeared briefly. It took a long time just to place crystals in.

Seeing that time was about to be up, he decided to gamble.

It was tough to face such a thing; if he just let it go, it would be a waste of his advantage!

Ye Zhongming called ten warriors and gave them enough crystals to put into the wheels for him to spin. When choosing the wheel, he chose those that were close together.

At the same time, he told a few teams to send half of their members to deal with the energy bodies.

Each scroll would draw one energy body. These beings were strong, and physical attacks were useless against them. It was tough to kill them.

They were already struggling in groups of 50 with Xia Bai to help. If more of them appeared, they might have large casualties.

But Ye Zhongming wasn't willing to give up so easily.

So he chose to do such an operation in the last ten minutes.

He knew this was a risk but was willing to try.

As there were more of them, it was quicker to fill the wheels. Ye Zhongming started to spin, and each time, he would protect them from the suddenly appearing energy attacks.

The ten teams were in a tough battle as more of them appeared.

But Ye Zhongming didn't stop. Ye Zhongming told Liang Chuyin, the twins, Xia Bai, Ah Yang, and his seven brothers to each deal with one. He didn't ask them to kill it but just that they stopped affecting the wheel spinning.

Ye Zhongming obtained more scrolls, but the number of energy bodies increased. Battlefields appeared in that small region.

They could only use skills on the energy bodies, but that consumed mental energy and had cooldown. Everyone's skills were in cooldown, and only the crystal weapons could deal damage. If it were another squad, they would have collapsed.

But the Cloud Peak warriors weren't in a good state even then. As there were more energy bodies, some small squads were able to trap them. Ye Zhongming and the ten spinning the wheel were affected.

But everyone knew that this concerned their interests. Most of the job scrolls were used on them, so they bit their teeth and tried their best.

The team behind the hill was already shocked by this battle. They were stunned as they looked at the weapons and skills they had never seen before shining.

This was a battle they couldn't imagine or understand.

The number of energy bodies exceeded 50, and Cloud Peak started to have losses, but he didn't stop. Everyone didn't hope for their boss to stop. Everyone knew about high risk and high reward.

They started to use crystal bombs. Only now did they take out these remaining crystals. They wanted to wait for the energy bodies to reach a certain number.

The sudden explosion achieved some results. Even if the energy bodies didn't die, the energy hit still forced them back.

Half an hour!

The time mentioned in his last life was up. If these wheels didn't disappear, then Ye Zhongming would order them to retreat. If they didn't go, they would suffer huge losses.

Fortunately, all the colorful wheels disappeared, and the sky turned bright again. Those energy bodies disappeared, too.

The Cloud Peak warriors looked at each other and felt fortunate. That short half an hour felt more dangerous than facing the level eight Chain Prisoner.

Ye Zhongming wiped his sweat and clenched his fists excitedly.

He obtained 68 scrolls!

Chapter 779: Replicate (1)

After the battle results were out, no one from Cloud Peak died. But there were over twenty of them that were badly injured.

One had to mention Xia Bai and the core members helping. They, along with a few dozen people, were able to deal with one energy body.

Of course, the most important reason was because of the short time. They only spun a lot in the final ten minutes. Along with their clear strategy, they didn't risk their lives, which was why nobody died.

Although they suffered heavy injuries, none of them lost their arms or legs. This had to do with the attacks of those energy bodies. Their injuries were controlled after using the healing potions they got from C Zone. With the bodies of the evolved, they would heal after some time. It might only need a few days.

This was the advantage of being an evolved. As long as you didn't lose your limbs, your organs weren't affected, and you didn't face anything vicious, as long as you had a breath, you could recover quickly.

After looking after the injured members, Ye Zhongming relaxed. Xia Bai's battle squad were warriors who were the most loyal to him. They were the strongest in Cloud Peak, and he didn't want anything to happen to them.

After the battle, there were the gains that delighted him; he had 68 job scrolls. If he sold them, he would get an enormous sum. Although he wouldn't sell them, it didn't stop him from valuing them that way.

But when he wanted to see those scrolls' jobs, Cloud Peak saw some people walking over.

Many people.

Liang Chuying looked at the two thousand-odd people, hesitating whether to come over. She pouted.

Boss, should I chase them away?

Ah Yang wasn't as violent as Little Tiger. If that fellow were here, he would probably ask if they needed to kill them.

Ye Zhongming looked and suddenly thought about something.

Let them come over.

Ye Zhongming said. Although they didn't understand but, they still sent someone to call them over.

Two thousand against five hundred, but these people were still terrified.

Le Cheng was the boss of the faction that the small party that noticed this place belonged to. The person who reported only said that a full silver team was spinning job wheels that suddenly appeared. He was tempted and brought all the warriors of his squad. He also called a faction that he was close to.

They thought two thousand were enough to face all situations, but their levels were too low. They couldn't tell what their levels were. He was just a four-star evolved, and when he looked, he was terrified.

Any one of them gave off a stronger aura than him. Two thousand? Even if they had another two thousand more, they would only last five minutes.

Thus, when Cloud Peak sent people to ask them over, he didn't think about fighting back and walked over respectfully.

He wanted to run, but he knew that he couldn't escape.

They are all yours? Ye Zhongming looked at the survivors behind Le Cheng and was disappointed. Their levels were similar to the overall level of the apocalypse. They were around two stars. The number of three stars didn't exceed three hundred. There were even several hundred one-star evolved.

Yes. Le Cheng was nervous. Although they had luxurious equipment and didn't look like they would rob them, but what if?

How many survivors are there nearby, based on what you know?

Ye Zhongming thought about it and decided to execute the plan he thought of. As for the effect, he wasn't sure, but they would be useful.

Le Cheng was stunned, and then he replied, This Around 5-6 thousand locals. If you include the few counties, there are at least 50-60 thousand.

How strong are they?

Le Cheng smiled, They are definitely not as strong as your subordinates. They are around my level, but a few battle squads are decent. I heard that they have five-star evolved.

Ye Zhongming looked at Le Cheng. This four-star evolved was doing well. From the angle of an ordinary person, his level wasn't low; he had decent equipment. Although he only had a white bulletproof vest, his other items were grey.

In his last life, this was still someone Ye Zhongming had to look up to at the same period.

Hand me your weapon.

Ah?

Le Cheng was stunned for a long time when he heard Ye Zhongming's words. He had a blade that he got from the wheel, and it was shiny. It was sharp when he sliced zombies, mutated animals, and plants. Those level two and below would get killed in one hit. Those above would still take huge damage. He was able to be the boss because of the blade.

Now that this strong guy wanted it, he really didn't want to give it, but he had no choice. He couldn't defeat him. He bit his teeth and passed the blade to Ye Zhongming.

Those behind were annoyed and thought these people wanted to steal their items.

Ye Zhongming took some materials to enchant the grey blade. In front of two thousand people, he turned it white.

The two thousand people were silent and looked on in disbelief.

They had seen smiths before, but those smiths could not upgrade a piece of equipment to white grade so easily.

Chapter 779.5- Replicate (2)

Ye Zhongming returned it and smiled, I have a mission; I don't know if you are interested? The payment will be these kinds of weapons.

Wa!

The two thousand of them were excited. The payment was white grade equipment? In his group, only a few had white equipment, and they were all leaders and deputy leaders. From that, one could see how rare such equipment were.

Now that they had a chance to obtain such equipment, they were very excited.

Le Cheng stammered and asked, Really, really?

Ye Zhongming nodded, Of course, but there are too few of you; I need more people.

These people replied and basically said that people weren't a problem. They could contact those from the nearby villages and counties.

Okay. Ye Zhongming nodded, But I have to make one thing clear. This mission is dangerous, and we are facing six digits worth of monsters. We have 100 thousand that will fight alongside you.

Only then were they silent. Very dangerous? So many monsters? They were shocked, and even Le Cheng was in terror.

We will do it!

A guy on the side spoke. This was the leader of the faction that was close to Le Cheng.

What isn't dangerous in the apocalypse? At most, we will die. To get good things but not wanting to take risks, where would there be such a good deal? Moreover, aren't there 100 thousand more with us? Why are we afraid?

Many of their eyes lit up when they heard that. Right, weren't they living in danger? They were using white equipment as payment, and of course, they were asking people to risk their lives.

High risk, high reward!

Many people agreed.

Finally, Ye Zhongming agreed that those one and two-star evolved would get an evolution potion. Those three-star evolved would get white equipment and a two-star potion. Four star would get two white equipment. If five-star evolved were willing, they would get three white pieces and a three-star potion.

Ye Zhongming didn't mention six-star as there probably weren't any.

The conditions made them excited. Why were they risking their lives in the wilderness? Wasn't it to evolve? They only needed to fight a war and survive and would be able to evolve. This was a good deal.

They didn't even consider losing.

Then find people. I will wait here for two hours; no matter how many come in two hours, we will head off.

Le Cheng led his subordinates away. Two thousand people to be messengers. Ye Zhongming paid them one level-three crystal as payment, so they were more excited.

Boss, we spent a lot to hire them, but there aren't many benefits.

Ah Yang didn't understand. After all, they were saving C Zone, so they didn't have to spend so much. Fifty thousand people, each would have either equipment or evolution potions. This wasn't a huge sum.

Ye Zhongming looked at the scrolls in his hands and explained, C zone gave us many benefits; we should try a little harder.

Also, although they aren't strong, there are many of them. They would help reduce our pressure. Other people dying is better than us dying.

Ye Zhongming split these scrolls into types. Those with prefixes were on the left, and the ordinary ones were on the right.

Moreover, we are helping C Zone, so why would we spend our own money?

Everyone sat around Ye Zhongming, and they laughed when they heard that. Right, he found reinforcements, so C Zone had to pay up.

But most of their eyes were on the job scrolls.

Most of the 500 didn't have jobs. These scrolls were naturally not enough. Apart from those the boss wanted to keep, 34 people could get them. Who would be the lucky ones?

Ye Zhongming tidied the scrolls up and took something else out.

Sky Boat Book!

Ye Zhongming didnt forget this green equipment he got from Zhao Xingmei. Now, he had a chance to use it in scale.

Zhao Xingmei had been treated well by Ye Zhongming not only because of her strength also because she knew her place. Her giving him this book also was a good point.

Ye Zhongming had lived another life and knew that scrolls were precious. Even if he focused on collecting them, he didnt get many. After all, scrolls were in low supply, and you wouldnt be able to buy one even if you had money.

But things were different with the Sky Boat Book. As long as you had scrolls, this equipment could replicate it. The job and skill scrolls could only be replicated once, but there werent any restrictions for job advancement and skill upgrade scrolls.

But the Sky Boat Book was only green grade, and it could only replicate job scrolls. It could replicate skill scrolls at blue. As for those upgrade and advancement scrolls, it could only do it at gold. Those rarer scrolls would only be possible at purple.

Ye Zhongming had 68 scrolls in his hands and would replicate them. Although he could replicate them once and replicated items couldnt be further replicated, this still meant he would double what he had.

In other words, he didnt get 68 scrolls but 136!

Of course, replication needed crystals and many of them. But things that money couldnt buy were worth it.

Sky Boat Book needed a huge amount of energy but didnt require a certain level of crystals. Like the colorful wheels, Ye Zhongming tossed level three crystals and replicated many scrolls.

Although he was using many crystals, he was still happy.

The others saw the boss holding a book and placing scrolls into it. In a short while, he took two scrolls out. Their eyes opened wide. These women felt like their boss wasnt called Ye Zhongming but Doremon.

The female warriors had spent a long time with him, so he could remember their names and abilities. He followed their unique points and contributions to hand these scrolls out. Apart from keeping 20 for himself, the team had 116 more evolved instantly. This made the number of job users over 200. Close to half of them had jobs.

A year had passed in the apocalypse, and this ratio was terrifying.

He obtained a Job Merge Scroll that needed five jobs. He needed two more main jobs to use it. This scroll was a rare scroll, but the Sky Boat Book wasnt high-grade enough, so it couldnt replicate it.

But Ye Zhongming didnt merge them immediately after finding two more jobs. He considered everything and chose three job scrolls to learn. Now, he had six jobs. He wanted to keep Lethal Gun Artist.

He activated the scroll and didnt confirm it instantly. He looked at the requirements. It needed at least five similar-type jobs. If you had more, you could select one to keep. The other jobs would randomly merge into an elite job. The others would disappear.

Fortunately, he wasn't greedy and didn't learn other jobs, if not it would be a waste.

He took in a deep breath and confirmed to merge it.

Chapter 780: Mountain Body Blade Saint

There was heat surging in his body, which didn't feel good.

Merging several jobs to get a new one wasn't a pleasant process compared to learning a new job.

But at a certain moment, it caused Ye Zhongming's muscles to tense up. The discomfort disappeared, and what replaced it was a huge sense of relaxation.

Ye Zhongming knew that it was completed.

He looked at his new job excitedly. He just took a look and had the urge to take a deep breath.

It was an elite job.

Elite, Body Blade Saint!

The three jobs he learned previously were Flower Cultivation Monk, Bright Blade Master, and Essence Soul Nurturing Maniac, three jobs with prefixes. Out of the 68 scrolls, these were the ones that he felt were decent and suitable for him.

Flower Cultivation Monk was a body cultivation technique that trained his body parts into sharp and tough weapons. It also had a mental-energy ability. A few skills, like Weapon Body, Killing Fist, etc., were very powerful. It was a job that was strong in both attack and defense.

Bright Blade Master was an attack job. Buddha Praying Kill, Spinning Sharp Thrust, Soul Explosion, etc. job skills focused on attacking. It complemented the Flower Cultivation Monk job, and Ye Zhongming felt like they were suited for one another.

As for Soul Nurturing Maniac, Ye Zhongming learned it because he was curious. He hadn't heard of such jobs in his last life. In the introduction, it said that mental energy could be used to nurture weapons. The longer you nurtured it, the more mental energy you had to pay and the stronger the weapon would be. This job was very special. Although there were many skills, each had shocking effects that tempted Ye Zhongming.

With these three jobs, along with Light Seal Blademaster and Sky Dragon Cultivator, Ye Zhongming had five similar jobs. The five merged into a new job, Body Blade Saint.

It had a prefix Mountain, and before, it was the word elite. This job was different from ordinary jobs.

Ye Zhongming excitedly used the ability, and even he was shocked.

Ye Zhongming's Mountain Body Blade Saint had four job skills!

Two of them were passive skills.

One of them was-- Weapon Nurturing.

This should be the skill that the Essence Soul Nurturing Maniac contributed. It would create a nurturing space where the job user could place weapons. They would use mental energy, stamina, and life force to nurture it to raise the weapons stats and strengthen its abilities. One could even upgrade the weapon.

This gave Ye Zhongming a passive skill similar to the Treasure Nurturing Gourd.

Of course, there were many restrictions, and it wouldn't be as simple as the Treasure Nurturing Gourd, where you could upgrade weapons as long as you had enough energy. This skill needed time. You would nurture the weapon day by day and slowly raise its stats.

At the same time, the weapon would follow the user's overall state, such as mental energy, stamina, etc., to decide the number of weapons you could nurture. But it wouldn't exceed three.

Ye Zhongming didn't understand at first but understood it after seeing another skill.

The second passive was Clear Body.

Ye Zhongming didn't know which job this came from. It might be the Sky Dragon body Cultivator or the Flower Cultivating Monk.

This passive was in defense. As the job level increased, the user's body would become a Clear Body. The stronger it was, the better the defense and the quicker your recovery speed would be. This body would fit any skill, meaning it could raise the power of any skill, including job skills.

He thought Weapon Nurturing was a good passive skill; he didn't expect this Clear Body to seem better.

Was this the strength of elite jobs?

The surprise from the passive hadn't disappeared. When Ye Zhongming looked at the two main skills, he knew why the passive could only nurture three weapons.

One of the main skills, Slicing Clouds!

After activating, the user will use qi to attack. The qi from the body would be in physical form. It might be a small bit, a line, or an area. It could be in any shape or form. But the qi had a special point: they were sharp. They could pierce anything.

Ye Zhongming thought about it and felt like it was understandable.

Saying it could pierce everything was probably exaggerated, but it showed how strong this skill's attack was. It should be the strongest skill he has had so far.

He thought about it and imagined many combinations. The Slicing Clouds gave the user a large room to perform.

This ability also had restrictions, and it was the answer to why he could only nurture three weapons.

Slicing Clouds needed a type of equipment to activate.

Gloves.

One in the right and left hand, along with a blade. That was three weapons.

Thus, you could see that the job abilities complemented one another.

But Ye Zhongming didn't have gloves, so he couldn't use this skill. This was a problem.

But gloves weren't rare, and he could find them soon.

Ye Zhongming looked towards the second primary skill, Thousand Seal Blade Slash!

He knew from the name that this was the core ability and should be from the Light Seal Blademaster.

Similar to the Light Seal Blademaster, this seal allowed the user to enchant attacks with seals. There were three upper seals and three lower seals.

Ye Zhongming grasped the three lower seals: metal, mountain, and fire. He hadn't grasped the three upper seals: Light, Star, and Space.

Any seal you grasped could be used on the blade, and your attacks would have the ability from the seal.

Mountain focused on weight, and it gave the ability to suppress. Fire was hot and could burn everything. Metal was sharp and could slice all evil.

The ability of the seal was a branch of this skill. After completing the seal, this skill would show off its real power.

When the user activated the skill, many blade shadows would appear to attack simultaneously. Each had 50% of the main body's attack.

This body was only at Basic Grade, with only ten blade shadows. When it reached intermediate, there would be hundreds. Advanced would have a thousand. As for the highest level, that would be ten thousand!

Moreover, the strength of the shadows would increase along with job level. Each increase would be by 10%, which meant that at the highest level, they would be 80% of the main body.

Think about it: a sky full of blades, and you couldn't dodge at all. Each blade had the power of six seals. What a sight that would be!
