

Apocalypse 791

Chapter 791: Breaking in

“Commander, what should we do?”

Just now, an Exquisite Floating Ball flew to C Zone Battle Squad’s formation and sent them a message to break out towards the other group of trapped reinforcements when they got the signal.

The deputy didn’t know what he meant, so he could only ask Delin.

When the Exquisite Floating Ball landed within the formation, the other surviving commanders rushed over with hope.

Deelin thought about it and didn’t know what was going on. If this was from his own zone, he wouldn’t say anything and just execute it, however... This was information that others had sent him.

“Get ready, hope is still hope, right?”

Delin made his decision in the end.

.....

“Attack from two directions?”

Mu Xinfei frowned and didn’t know what the news meant.

When Cloud Peak’s Exquisite Floating Ball appeared again, Mu Xinfei and the others were delighted. No one who could live would want to die.

But what was this order from Ye Zhongming?

Mu Xinfei understood attacking one direction. That was where C Zone was trapped in. Maybe they should help them or reduce their pressure. But attacking the other direction... Wouldn’t it make the demon monsters think the humans wanted to break out? If it caused a large-scale battle, the outcome would be different.

An Man and Jayce were unhappy with Ye Zhongming not following the chain of command. It made them feel like they had less power than Ye Zhongming but he was the only reinforcements outside so they had no choice.

“Are they charging in?”

Zhao Xingmei’s sudden words shocked everyone.

An Man instinctively shook his head, “Impossible. Why will they do that? For nothing? We know how many people they have. They can restrain some of the monsters, but to fight them head-on, there aren’t enough of them.

Jayce didn’t say anything and just replied with a scoff.

Only Guang Yao touched his chin. He thought about this possibility, “Shouldn’t be; he isn’t such a rash person.”

Zhao Xingmei thought about it, “I will still stand by my point, so everyone get ready.”

Zhao Jingchen laughed coldly, “Even if he is crazy and wants to get in, but are his subordinates crazy and stupid? Will they follow him?”

Zhao Xingmei frowned when she heard that. Whether Ye Zhongming was right or wrong, his intentions were good, and he wanted to save them. All of you don’t understand, but to mock him and say such words, they really did not have a conscience.

“Don’t use your standards to judge others; you will get slapped in the face.” Zhao Xingmei didn’t bother about Zhao Jingchen’s expression and told Ying City to prepare. After a short while, she told Mu Xinfei and Guang Yao, who didn’t understand, “Ye Zhongming represents trust to Ying City. Cloud Peak respects him. Those people would follow him even if it were a mountain of blades or a sea of flames.”

.....

This was the first time Ye Zhongming witnessed the strength of the Mechanic Fortress.

His first thought was that it was a true war machine.

The two monsters didn’t go all out because they wanted to reduce ammo wastage. They didn’t use many of the weapons that used energy and ammo. Even then, the spinning metal pieces that stretched from its body caused many casualties.

There was also wood-chopping-type equipment from the sides that caused blood to splatter.

Wherever the two machines went, they left large amounts of broken limbs in their wake.

Even if the evolved were small Superman, but when they faced such high-tech combinations between human technology and wheel technology, they still felt miniscule.

Only when humans had giant bodies that were the size of these machines would they be able to overcome that fear?

But everyone knew that it was not possible.

The others followed behind the two machines, and their goal was to clear the monsters that got close to the machines from other angles.

Right, the machines were strong, but the demon monsters had strong bodies too. If they attacked the bodies of the machine, they would deal high damage. If that accumulated, the machines might break down. These machines didn’t have to be broken down to stop; as long as they malfunctioned, they wouldn’t be as effective anymore.

These hundred thousand demon monsters had arrived at where their allies were and had mixed together. Even with Ye Zhongming’s eyesight, he couldn’t differentiate them. He could only see more demon monsters surging in this direction. They were facing their vanguard forces.

Ye Zhongming held the sniper rifle, and his bullets were white and grey grade. This combination could kill all the demon monsters three meters and below. He ran beside Liang Chuyin and shoved something into her hands.

“After I leave, once the demon monsters attack, use this if we fail to defend to ensure a few hours of safety.”

Liang Chuyin took it. It was a small crystal ball. She nodded.

“Rainbow Gate has been set. If things get too bad and the defense line collapses, lead Cloud Peak away. As for the others, it will be up to fate. But this is the demon monsters’ territory so they might still spot you even if you teleport. Just head back to Cloud Peak immediately.”

“You...”

“I am okay.”

Ye Zhongming fired and hit a demon monster that wanted to jump onto the Mechanic Fortress, “I will bring Yellow Ball with me; even if we can’t defeat them, we will be able to run.”

“Xia Bai.”

Ye Zhongming called Xia Bai over, “Don’t risk your life. Protect Cloud Peak members first. If you face anything, discuss it with Chuyin and even Zhao Xingmei.”

Ye Zhongming was worried about her. She was too terrifying when she went mad so he had to give her instructions.

“After they get to a safe place, I will find you.”

Ye Zhongming was helpless when he heard that; he could only allow her to do what she wanted.

Ye Zhongming looked at the pictures and knew that time was up. He ordered his subordinates to signal the two surrounded teams and then controlled the Exquisite Floating Ball to fire the last missile to help the team clear the path ahead. He then told the ball to land beside him.

“See you later, guys.”

After boarding the Floating Ball, he flew in a direction.

Chapter 792: Pregnant demon monster

This was the first counterattack Delin did in the last few hours.

The sky was already dark. Thanks to the bright moon, it provided the humans and demon monsters with vision.

When they saw the signal, Dalin and the trapped warriors sensed the abnormal behavior of the demon monsters. They were prepared. The moment the signal rose, they led close to twenty thousand people toward the specified direction.

The sound of battle spread from that side, too. Someone informed them, too.

Everyone had hope. After all, doing something was better than nothing.

But when Delin charged, he turned back to see the formation they had guarded for dozens of hours. Many couldn’t walk.

Breaking out depended on speed and efficiency. If they brought these injured people, they would slow down, so they had no choice but to abandon them.

There were too many injured members. The demon monster attacks caused the warriors to lose limbs or caused their organs to shatter. There were very few with small injuries. Most of them were badly injured. There were more left in the formation than those breaking out. They watched as their allies left, or they climbed arduously in the corpse mountain to try to follow. Some held their weapons tightly and shouted to cover their allies. Some were cursing at these people for abandoning them.

Some couldn't accept abandoning their allies, so they returned to the formation and wanted to die together. But most of them persisted in breaking out. Even if they teared up, they didn't hesitate.

Delin turned and bowed. He didn't know if this would be the destruction of his humanity, but he knew that he would forever remember this moment.

The team broke through the demon monster group, which was suddenly in chaos. They saw their allies and shouted out to them.

The two groups quickly merged together.

The two Exquisite Floating Balls started to fire to blow apart the demon monsters that blocked the two squads. The Mechanic Fortress also fired for a few minutes to clear the path.

Very quickly, both sides met, and some people cheered. The three groups of humans finally got together.

Although they suffered heavy losses, the three sides had 60 thousand people in total. In the night sky, one could only see the dense crowd. Even if they had been surrounded for a long time and sacrificed the most members, C Zone's confidence swelled.

When Ji Ruiguang, An Man, and Delin saw each other, their expressions were very complicated. But at the same time, the few of them, along with Jayce and the female seven-star evolved Zuo Jingxuan, took control of this team. They didn't discuss with anyone or listen to Ye Zhongming's orders to defend on the spot. They decided to... Break out.

This suggestion was rejected by those who listened to Cloud Peak, Ying City, T Zone, and S Zone.

"Guang Yao, Xinfei, it isn't the time to be emotional. Since the demon monsters are in chaos, we should leave. If not, we won't have a chance."

Although Ji Ruiguang immediately denied Ye Zhongming's plan, he wanted these people to leave with him. He couldn't convince those from Cloud Peak or Ying City as they were staunch supporters of Ye Zhongming, but those from the resistance zones should be on the same side.

"I won't go." Guang Yao was expressionless. His gaze was numb, filled with hatred and disbelief. He knew that Wen Zhong had left and knew that his uncle had abandoned him. This feeling of being abandoned was worse than being trapped.

"Guang Yao, the big picture is more important. Commander Wen has his reasons!"

An Man was annoyed that Guang Yao had been standing on Cloud Peak's side, but at this time, he hoped that the commander of the strongest battle squad of T Zone would leave with everyone. After all, although his Sky Elephant Battle Squad wasn't huge, there were a thousand of them. They were a decent-sized force.

“His reasons are to abandon me?” Guang Yao’s rage exploded, but he suppressed it. He took a deep breath, “If all of you can return, tell him we won’t come into contact again.”

“Guang Yao...” Little Xiu tugged his sleeves. She was in a spot and lost. Her brother abandoned not only Guang Yao but also her. But they were still related with blood, and that was something they couldn’t ignore. Little Xiu didn’t know how she was going to face Guang Yao and also Wen Zhong.

“Xinfei, is that your choice, too?”

Mu Xinfei shrugged when she faced Jayce’s annoyed questions, “Compared to some uncles that always want to split S Zone, I am willing to believe the handsome guy that still came to save me when he had only a few hundred people.”

“Goodbye uncles, wish all of you good luck.”

Ji Ruiguang and An Man looked at each other and signaled to Jayce and Zuo Jingxuan. The two seven-star evolved charged towards Guang Yao and Xinfei. But Xia Bai was even quicker, and blocked in front of the two.

Ji Ruiguang planned to hold them hostage so their subordinates would be forced to follow. They would then be forced to fight the demon monsters. But they forgot that Cloud Peak had a seven-star evolved too. Even if Cloud Peak didn’t have a relationship with them, for their own safety, it wouldn’t allow the resistance zone to take them away and weaken their strength.

“We won’t attack, but remember that you owe Cloud Peak things.”

Xia Bai’s meaning was obvious. If both sides had a conflict, there would be deaths. At the same time, she reminded them that things weren’t over.

Zuo Jingxuan, whose eq was low, wanted to attack, but Jayce pulled her back.

Ji Ruiguang looked at her deeply. After five seconds of silence, he said, “Go!”

He led everyone, the two Exquisite Floating Balls and the two Mechanic Fortresses, to break out.

Various skills and guns lit up the night sky. Human and demon monsters' roars could be heard.

Those who remained looked in that direction and their faces were lit up by that light.

At this moment, a few kilometers from the battlefield, Ye Zhongming was walking off the Exquisite Floating Ball. Fifty meters from him was that giant wheel.

It was 20 meters tall and had three colors. Black, yellow, and red that were intersected. It looked like someone had used three colors to dye a wall.

But before he could observe it carefully, his attention was attracted by the three demon monsters sitting below it.

Seeing him come, the three of them had a crafty smile, and they stood up.

Ye Zhongming’s pupils constricted.

They were around four meters. Moreover, the one in the middle... Had a big stomach!

Chapter 793: Close combat

This was the first time Ye Zhongming saw a pregnant demon monster standing in front of him. It was also one that was close to level seven in strength.

This felt weird.

Others might be shocked when they saw such a thing, and at most, they would be terrified. But Ye Zhongming had lived another life, and he knew that their reproduction abilities were strong and loved to capture women to impregnate.

But this was the first time he saw such a high-level pregnant demon monster.

At the same time, many questions appeared in his mind.

Why were three demon monsters left here? Moreover, their levels were so high. Why did they smile when they saw him? Why was the pregnant demon monster still here? Based on human standards, the stomach was so big, so it was about to give birth?

Of course, why were there no rewards on the wheel? There was only a hole to place crystals. Did this wheel only need one crystal?

Many different level crystals were scattered around it. There were more behind it, and they were placed there in piles. There were even some on the wheel itself.

Were the demon monsters spinning the wheel?

The green-skinned monsters were already so intelligent? They eleven broke the rules that mutated lifeforms couldn't spin the wheels?

Ye Zhongming was careful and didn't move forward. He stood before the Exquisite Floating Ball.

He always wanted better things and knew that he had to strengthen himself so that this world wouldn't eliminate him. Only then would he protect his subordinates and himself and get free from being a chess piece.

But he wouldn't force himself to do something dangerous.

He could risk his life, but he wouldn't die for no reason.

Three four-meter tall demon monsters were the same as seven-star evolved. They were far stronger than what he could deal with. Even if he was confident, Yellow Ball and he could at most deal with two. Ye Zhongming knew that he would lose when facing three.

The female in the middle kept touching its tummy. With the other hand, she waved at her two allies. The two of them charged at Ye Zhongming.

The female was the leader?

Ye Zhongming was stunned. Were the demon monsters a female-dominated society?

Also, Ye Zhongming realized a problem. The pregnant demon monster couldn't attack, so he only had to deal with the two others?

His foot that had stepped into the Floating Ball stopped.

Once he felt he had a chance, his desire for this mysterious wheel took over.

The two demon monsters were quick. Fifty meters was covered in the time that he used to think. They got close and attacked from two directions.

Ye Zhongming retreated and whistled. A golden figure appeared from the Exquisite Floating Ball and pounced towards the closest demon monster.

Ye Zhongming called Yellow Ball and decided to fight.

He took Sand Dance from the weapon nurturing space and activated Sandstorm. A sandstorm formed around him. The moment that demon monster entered it, its quick body slowed.

Although it was still fast, but Ye Zhongming could capture its movement.

The body of the demon monster was strong but Ye Zhongming had used modified evolution potions all the way. Battle Contribution medal, Ocean King Crown, Scorching Flame Technique, etc meant that his body was the strongest of the level. Even Xia Bai was weaker than him. Although the level seven demon monster was still stronger than him in the Sandstorm, at least in terms of speed, Ye Zhongming didn't have to fear it.

At the same time, Ye Zhongming's other hand had some purple stuff on it.

The demon monster didn't care about the sandstorm. The sand couldn't break its skin at all. It waved its right hand toward Ye Zhongming. Its sharp nails broke the air and were about to hit the guy.

Ye Zhongming side stepped and sliced Sand Dance into the demon monster's ribs. The hand with the purple stuff spread in front of his chest, and a pistol appeared.

Seeing that its attack failed and the opponent even fought back, the demon monster roared. It pushed with its right leg, and its body leaped into the air. It dodged Ye Zhongming's blade and its left leg struck at Ye Zhongming's neck.

With the demon monster's strength, he would be badly injured if this hit, even with Ye Zhongming's defense.

One had to say that the demon monsters had a natural advantage in controlling their bodies. Even after someone with blades got close to it, it could still move so freely.

It was too late to retract his blade. Ye Zhongming allowed his body to fall in the same direction. At the crucial moment, Ye Zhongming also showed his control of his body. The pistol in his other hand fired.

Triple Flower Essence Blood Bullet fired. Three silver bullets hit the left leg.

Blood splattered and the demon monster roared in anger. One could hear a striking sound, and both of them split up.

Ye Zhongming used the shots to attack its left leg, not a fatal part, as the demon monster didn't give him the chance. His left hand couldn't adjust the angle, and if he wanted to hit it, he could only fire it like that.

The pistol was from someone in the Sharp Mountain Peak base. It was very powerful. Along with silver bullets, even a four-meter-tall demon monster could not stop it. From that, one could tell how strong the Lethal Gun Artist's skills were.

But its legs were the toughest part of its body. Even if the bullets hit and broke its defense, its huge strength and momentum caused it to brush Ye Zhongming's hand, which fired the gun.

The pistol was squished like rubber, and then Ye Zhongming's hand and its left leg smashed into each other.

The demon monster fell backward and took a few steps before it stabilized. Ye Zhongming fell to the ground.

In terms of strength, maybe Ye Zhongming was slightly weaker. But with equipment and skills, this gap wasn't huge. Strength was originally one of his highest stats, anyway.

But the demon monster was still the attacker, so Ye Zhongming was at a disadvantage.

The demon monster was injured, and its eyes turned blood red. Since it was born, no living being could deal so much damage to it. The wound was so deep that you could see the bone. Blood was flowing from it and onto the ground.

It roared. It suppressed the pain in its legs and pounced once again.

Ye Zhongming tossed aside the pistol. He ignored his fingers that were slightly deformed, pushing his hand onto the ground and sending mental energy surging!

Chapter 794: level five Gilded Cannibal Flower

Ye Zhongming couldn't do much after getting the Blood Wood, but he did get some benefits.

For example, the dense amount of Cannibal Plant Seeds.

Ye Zhongming collected some and placed them in his space.

He used them against the demon monsters. Those were the ones that he had scattered on the ground.

Mental energy surged from his left hand and into the ground. The Cannibal Flower seeds started to grow. With the Nurture skill, these plants sprouted and then showed their vicious faces. It took just a few seconds.

Only Ye Zhongming had such mental energy to support this quick Nurture use.

The sudden appearance of many Cannibal Flowers shocked the demon monster. It was about to pounce, but it froze. It looked at the mutated plants that it didn't recognize in confusion.

These 20 Cannibal Flowers stopped growing when they reached two meters tall. Ye Zhongming didn't stop. He slit his wrist and scattered his blood at them. Then, he used Activate.

These Cannibal Flowers, which were purple in color, started to change. Their stalks shone gold, and the stem to the flowers turned gold. It was similar to Yellow Ball's color.

Ye Zhongming didn't hold back on mental energy at the life and death moment. The Cannibal Flowers were filled with energy.

Ye Zhongming received a notification after using the skill.

“Level Five Gilded Cannibal Flower!”

When he came out from the competition death wheel, Ye Zhongming activated the Cannibal Flowers guarding the wheels in the basement. He remembered clearly that they were level four Gilded Cannibal Flowers, which meant that they were a level higher than before!

There were many reasons for that. For example, Ye Zhongming’s Gardener job had leveled. His mental energy increased. He was using the seeds from the Blood Wood. Ye Zhongming didn’t know what the reason was, but it didn’t matter. What was important was that as compared to then, they had one more ability.

“Skill 1, Cannibal: Consume evolved lifeforms to provide the energy that they need.”

“Skill 2, Stem absorption: Absorb blood of evolved to raise their defense.”

“Skill 3, Corrosive Soil Trap: The soil around the Cannibal Flowers will corrode, increasing their movement speed. The trap also has stem absorption ability.”

These were the abilities of the level four Cannibal Flower. Now that it was level five, there was one more skill: Connected Branches.

“Connected Branches, when allies are nearby, their roots will connect to increase each other’s defense and help to spread damage.”

This was a double-edged sword.

If the ability couldn’t kill them all, the Cannibal Flowers would spread the damage evenly. This meant it would be tougher for those facing the Cannibal Flowers.

But if the attack was so strong that it could insta kill all of them, they just had to attack one stem. The other Cannibal Flowers would die. They wouldn’t need to kill them one by one.

Of course, if there were many Cannibal Flowers, this skill meant they were undying.

But no matter what, the increase in the number of abilities meant it was stronger, which was good for Ye Zhongming.

Ye Zhongming ran into the twenty flowers.

That demon monster stared at Ye Zhongming. Both sides started to prepare for the next attack.

.....

Yellow Ball rolled on the ground and got up quickly. It roared and showed its sharp fangs.

After Ye Zhongming’s careful nurturing, Yellow Ball had the ability to challenge things above its level.

Be it the six skills it had at level six or the three Black Solid Set equipment, it might not be the strongest in the beast world, but it was one of the top.

With humans’ evolution level and the time that had passed since the start of the apocalypse, no one could nurture their pets to Yellow Ball’s level. Even if there were, in terms of talent skills, they wouldn’t be able to get six.

This growth and a continuous streak of victory, meant that Yellow Ball inherited Cloud Peak's battle style.

Crazy!

The moment it pounced on the demon monster, Yellow Ball started its crazy attacks. Ye Zhongming's fight was so intense that one's leg was injured and one's hand was injured. He was even made to summon the Cannibal Flower Ocean. To reach this extent in such a short time was shocking.

But on Yellow Ball's side, they had fought three times!

Each time ended in Yellow Ball being knocked aside.

Blood seeped from the corner of its mouth. But Yellow Ball's eyes were filled with crazy fighting intent.

If Ye Zhongming saw it, he would guess what his battle beast was thinking.

Just so-so.

Surround the humans, strong bodies, terrifying presence... Nothing special!

Yellow Ball shook its fur and shook off the dust from it. Its body started to grow at a visible speed.

Body Enlarging Technique! Follow Form!

A talent skill, a set equipment skill. The beast tool enlarged along with Yellow Ball's body. It was around five meters tall now.

It barked towards the demon monster. Its Wind Controlling Spirit Wings flapped in the sky, allowing it to fly. It was already looking down on the demon monster.

Seeing that its opponent grew bigger and could fly, the demon monster didn't want to let it succeed. It moved its body to try to affect Yellow Ball's center of gravity. It then charged from a direction.

Yellow Ball grinned when it saw the demon monster doing that. It was as if it was mocking the opponent. The next moment, Yellow Ball's wings went from a slow flap to frantic flapping. Yellow Ball's body also moved along with it.

It wasn't over. Yellow Ball's entire body spun so quickly that you could see an afterimage.

As it barked, it turned into a drill. A cold light spread out from the figure and hit the demon monster pouncing towards the sky.

Two of the wing's three skills-- Spinning Rotation, Blade Energy!

Chapter 795: Yellow Ball's pride

Beast tools were to serve battle beasts. Although it had skills that could complement the owner, but most of them were abilities that the beast could use themselves.

Yellow Ball had three pieces of the stat. When it was fighting alongside Ye Zhongming, there were some abilities that it couldn't use. Now that it was facing the enemy alone, it had no worries. It activated the abilities of the wings and charged toward the demon monster into the sky.

Flying Rotation allowed the beast to spin at high speeds. The metallic feathers on the wings would protrude and turn into sharp blades. When clashing, they would damage the target and help protect the beast's body.

Energy Blade. There were small energy holes under each piece of the wing. A special energy would spit from the energy holes when activating this skill. They would form sharp blades. It was a two-pronged attack when complemented with the metal feathers from Flying Rotation.

Even if the demon monster controlled its body well, but it was unable to go against gravity. Of course, it wasn't willing to dodge. In its heart, there wasn't any lifeform of the same level with a stronger body.

Both sides clashed. The voice was loud, and even Ye Zhongming and the other demon monsters were shocked.

The two figures paused in mid-air before separating. It was as if the demon monster was smacked by something, it smashed into the ground. The sand that splattered was obvious even under the moonlight.

Yellow Ball flew in the opposite direction. From the trajectory, one could see that it had lost control of its body. Some liquid scattered and landed on the ground.

The pregnant demon monster opened its eyes and looked at Yellow Ball. It placed a palm on her face and looked confused. It didn't understand how this dog could be on the same level as a demon monster.

It then looked at the demon monster, and that look of confusion grew.

That was because her ally didn't get up.

A few dozen seconds later, it struggled to climb up, but its body was hobbling. Its waist was bent, but its head was raised. It looked at the enemy that was finding it hard to control its body.

Under the moonlight, the demon monster's body was covered in fresh blood!

If one was close, one could see that there were many thin wounds on the skin that the demon monsters were proud of. The blood came from these wounds.

The demon monster gave a loud roar at Yellow Ball. The muscles under the green skin started to swell.

Yellow Ball barked in reply. The big dog in the air slowly landed on the ground.

One could now see that Yellow Ball wasn't in a better state. Although it didn't have as many wounds, but there was a bone-deep wound at the back of its front left leg. The blood was from that wound. One side of the wings was also twisted.

Yellow Ball stared at the demon monster. It shook its body, and the wings fell off its body. It actually removed the wings!

Two lifeforms that were very confident in themselves chose to use such a method to continue fighting.

A crafty expression appeared in the demon monster's eyes. It was thinking that this dog was stupid. It gave up its advantage to fight it head-on. A small provocation, and it lost its head.

Yellow Ball looked really prideful. It knew what its opponent was planning, but it didn't care. When it saw how prideful the opponent looked, the big dog removed the beast saddle and the protective shirt.

The pregnant demon monster wasn't as happy as its ally. It stared at Yellow Ball and didn't even look at the situation on Ye Zhongming's side.

It felt uneasy.

The demon monster made a move. It charged without any theatrics. Its claws had left deep wounds after slicing through the dog's armor. Now that the silly fellow removed all its defensive gear, it was confident to stab into its stomach and grab its heart through all the boiling blood!

It was too quick. Just one quick charge, and it clashed with Yellow Ball for the second time.

But before they clashed, Yellow Ball did many things.

The dog's body was covered in a golden liquid at the start. Moreover, the golden liquid started to spread.

Metal lines formed behind it, and they were laid up. Many fist-sized golden balls appeared. It felt like trees bearing fruit.

At that moment, the demon monster knocked into Yellow Ball. Its sharp claws tried to scratch its body. It could even hear the sound of skin being sliced open.

The big dog didn't hold back either. Its front claws and mouth left wounds in the demon monster. But the demon monster believed the big dog wouldn't be its match.

But very quickly, it woke up from the stimulation of the fresh blood and realized that something wasn't right.

It lowered its head and saw its legs wrapped in a golden liquid. The liquid was spreading up, and it was now past its knees.

It was shocked and wanted to retreat but found it hard to move. Even with its strength, it found it hard to move.

The demon monster was terrified. It raised its head and saw Yellow Ball's gaze. That gaze was familiar... Wasn't it the same gaze it had given the dog when the dog removed its wings?

But as compared to its crafty gaze, the dog was mocking it.

The metal balls behind Yellow Ball broke free from the chains, and like little grenades, they exploded at the demon monster that couldn't dodge. They started to hit its body, and it sent chills down one's spine.

There were many metal balls, and they were extremely quick. In a few seconds, all of them hit the demon monster's body. It caused the pregnant demon monster to scream.

After the attack, the demon monster was in a bad state. Its body was twisted, and a big part of its chest was caved in. Its head was covered in blood. Even if it paid the price of both arms being broken, it failed to escape. If not for it opening its mouth, one wouldn't be able to tell which part of its face was which.

The most serious was its left eye. Its eye sockets were blown up and its eye was connected by a tendon and hanging on the left side of its face.

Chapter 796: Another win

The Cannibal Flower at the corner bit the demon monster's arm, but it dodged. It dashed into the Cannibal Flower group and charged at Ye Zhongming.

Although it dodged the first Cannibal Flower as it got deeper, the number of Cannibal Flowers got denser and denser. When it was a few meters from Ye Zhongming, another flower bit its leg.

The demon monster roared furiously and slapped the flower's head. The head split open.

If this were before, this flower would have died. Its head was its strongest weapon but also its weakness. If it was shattered, it meant that it would die.

Although the Level five Gilded Cannibal Flower was strong and defense was much higher, but when facing a level seven demon monster, it was not enough. If it faced the enemy alone, this Cannibal Flower would get instantly killed.

But these twenty Cannibal Flowers had the Connected Branches skill. The damage this plant suffered was spread to the others, meaning it only took 1/20 of the damage. Although its flower split and some liquid flowed, it didn't die.

Using this chance, the other flowers bit the demon monster.

The Cannibal Flowers weren't as strong as the demon monster, but their biting ability was strong. After all, this was their unique skill. The teeth in the flowers were as good as sharp weapons.

The demon monster tried to break free but failed.

The demon monster's strength meant that its explosiveness was shocking.

Apart from one Cannibal Flower's stem that ripped a little, the others were fine.

It wanted to break free from all of them and break them from their waist, but because of the skill, the demon monster was trapped on the spot.

This was a short time.

When the demon monster was dodging the Cannibal Flowers it was moving quickly and changing directions. It wasn't a fool and wouldn't just charge in a straight line. It would aim for the opponent's weakness and the center of gravity to try to catch him off guard.

So even if Ye Zhongming was wary, he couldn't confirm where the demon monster was moving towards.

This thing was too quick.

Ye Zhongming knew this would happen since the start when it glanced at the demon monster.

Thus, he scattered the seeds.

He was finding a chance to slash.

Now, the Cannibal Flowers gave him the chance. Although it was a short opportunity, and the demon monster might break free in the next moment, but it was enough.

He used Thousand Seal Slash.

The bright light shone in the night sky. The moment the light appeared, it slashed toward the trapped Demon monster.

When the blue Sand Dance went all out, the sharpness would increase by 30. Including the base 470 stat after upgrading from green meant that its attack was over 500. This was a terrifying number.

Along with the three seals and the Thousand Seal Slash ability, the demon monster felt danger was getting close to it after using the move.

It struggled. It was facing death and activated its potential. The Cannibal Flowers around it were ripped.

Even Ye Zhongming, who was slashing, was shocked by its explosiveness. It actually broke free from 20 Cannibal Flowers.

The flowers that were born not long ago lost their life force together.

The plan was different from expected. The demon monster had regained its movement slightly sooner than he expected.

That blade might miss because of that point, as the demon monster was too quick.

But when the demon monster was about to move, its body slowed.

Although Ye Zhongming's body wasn't as good as the demon monster's, but it was similar. His job and equipment could make up for the gap, so he wasn't afraid of fighting it one against one.

An instance could decide the outcome of the battle.

For example, the demon monster broke free from the Cannibal Chains, but it paused unexpectedly as its left leg was injured.

Ye Zhongming used more than one method to restrict its movement. Although Ye Zhongming wasn't confident in the effect that it had, at the crucial moment, something small could shift the scales.

The eleven sets of light slashed into the demon monster's body. The bright light exploded, and then everything turned back into darkness.

Ye Zhongming panted. Although this elite-grade job's skills didn't have a cooldown it consumed a lot of stamina and mental energy. Even with the amount of mental energy he had, a stamina fountain, he still had to pant. If it were someone else, they would probably need to rest for a few hours before they could move.

After catching his breath, Ye Zhongming looked towards the demon monster who was still alive.

It lay amongst the flowers, breathing much heavier than Ye Zhongming. Its body twitched. It was a bit different from the first time Ye Zhongming used the skill; it wasn't split in half, instead... Its chest and stomach was slit open.

This blade sliced its chest and also shattered the intestines inside. It might be dead, but because of its tough lifeforce, it was still breathing.

Ye Zhongming walked closer and held the sniper rifle. He armed a white bullet and placed the gun into the demon monster's mouth before pulling the trigger.

On the side, the pregnant demon monster screamed, but it still didn't leave the wheel.

Ye Zhongming was afraid that if he didn't fully kill it, the fellow might come back to life.

He kept the sniper rifle and used his right hand to fix his twisted fingers in his left. He noticed that two of them were broken, and he needed to rest for a few days.

He turned his head and smiled. Yellow Ball's battle was over, but this fellow was in a much worse state. Its body was dyed in blood.

Yellow Ball used the talent skill it got when it reached level six. Gilded Ocean. It also used Laser Bullets and Shadow Stab. It used Gilded Ocean to control the demon monster, the Laser Bullets to attack it, and then Shadow Stab to attack.

Under the series of attacks, although the demon monster broke free, both sides just ended up in a primitive fist fight.

But the demon monster was already badly injured so the final victor was Yellow Ball.

Even if it was a close one!

Chapter 797: War between races

No one knew what happened to Ji Ruiguang, An Man, and the others who chose to break out, but Cloud Peak, Ying City, Mu Xinfei, and Guang Yao faced their toughest test.

Although most demon monsters were led away by that huge army, over 50 thousand demons trapped this group.

When they faced ten times more enemies, S and T Zone members had ugly expressions on their faces.

Through Cloud Peak, they learned how to deduce the levels of these green-skinned monsters who were called demon monsters. Through their height.

They felt okay when they didn't know, but after discovering the trick... They felt really bad.

The average height of these demon monsters was over 2.5 meters. Based on their height-to-level ratio, they were level four and above.

This was just the average height. If you looked, many were over three meters!

Moreover, the Cloud Peak members even said that these demon monsters were stronger than lifeforms of the same level. This situation would get better when humans got stronger but below level six, that situation still held.

They were already at a numbers disadvantage. Now that their own strengths were lacking, many people were not confident.

Their trust in Ye Zhongming wouldn't be as intense as Cloud Peak and Ying City.

But when they saw Cloud Peak's arrangements, they felt a sense of safety. This safety was something they didn't have when they were with those tens of thousands of people.

This was a weird feeling.

Cloud Peak set up the Violent Lightning Turret and Crystal cannons. Some checked the crystal guns while others played with the small battle beasts.

Only then did the Resistance Zone realize that these ice-cold women would finally smile.

“What a bunch of freaks.”

Mu Xinfei muttered before finding Zhao Xingfei to talk. She decided that if she managed to survive, she would select some warriors from Ying City to build a new battle squad. As for Ye Zhongming’s influence in Ying City, she believed she could wipe it away with time. Now that Cloud Peak and her relationship was in the honeymoon period, the collapse of T Zone and Cloud Peak’s friendship meant she was the only zone he would work with. In the short time, she didn’t think that it was bad for Ye Zhongming to have influence in the new battle squad.

But, she looked at the sad Guang Yao. She talked to Zhao Xingmei while pondering about a matter.

The demon monsters’ attacks came quickly. They didn’t probe like before. This time, they went all out from all directions.

The humans didn’t have any advantage on the flat land. Each of them defended the defense line and waited for the other side to attack.

Skills flew, and the ranged attacks began.

They had fewer people, which also meant that they were all elites. As compared to those ordinary evolved that Ye Zhongming had led, they were much stronger. A huge patch of demon monsters fell. Just one look and you could see hundreds that were killed right away.

This shocked Mu Xinfei and Zhao Xingmei. Even Guang Yao, who was feeling numb, turned his eyes.

Only Liang Chuyin and Xia Bai didn’t react. It was as if they had expected everything.

“So many.... Job users?”

There were many job skills. Some people even showed the body characteristics of job users.

Close to half of these 500 people had jobs. This ratio wasn’t just high; it was frighteningly high.

There might be many three or four-star evolved, but that was because there were equally as many mutated lifeforms. Hunting them could get you many demon crystals, and you could then spin the wheel to get the potions.

But there were two ways to get job scrolls. One was from colorful wheels that were bumped into by luck. Even if you saw one, you might not have the courage to spin it as it would explode. The second way would be to kill beasts that protected treasures. But that was also by luck.

So, even if the resistance zone was strong, they didn’t have many job users. In other factions, if their leader and core members had jobs, they would already be considered a strong battle squad.

But Cloud Peak didn’t have many job users in the past, right?

Mu Xinfei and Guang Yao thought about it, and their thoughts were directed. They felt like Cloud Peak had hidden their strength and finally showed it when they were in danger. They were re-evaluating the strength of this squad and that man.

The second wave of ranged attacks began. Guns and crystal weapons were fired.

There weren't many of them, so the defense line was short, and the circle was small, so the attacks were denser. After the ranged methods were used, a huge group of demon monsters were wiped out. Their smelly blood spread in the air.

It was as if they were shocked by the strength of the humans. Their aura weakened. But when the high level demon monsters behind chased them, they started to charge again.

The demon monsters were quick, and there weren't obstacles in their way. After the ranged users attacked three times, the humans and demon monsters finally clashed.

If someone looked at the scenes from above, they would be as shocked as when they saw two elite cavalry squads clashing. Green-skinned monsters and the human defense line clashed, and a blood mist rose. Figure after figure fell.

Such a group battle had no strategy. To shrink the defense region, the humans were next to each other. This meant that the demon monsters had to squeeze, too. They waved their claws while humans used their weapons.

They didn't dodge, they didn't use any techniques, they just attacked. It depended on who died first.

The humans didn't retreat. The moment the first layer died, the second layer took over. The demon monsters didn't retreat either. After they killed the first layer of humans, they would step forward to kill the second layer until they died. These demon monsters were always numb to death.

In the middle of the defense lines were the Violent Lightning Turrets and Crystal Cannons. They were still roaring. Each attack would open a moat to kill a large amount of demon monsters. These had become their nightmare.

When the battle entered its most cruel part, the demon monsters were first to change.

Hundreds of demon monsters started to jump into the human formation. They targetted the cannons and turrets in the center!

Chapter 798: Confusion

"Hold on!"

Mu Xinfei shouted with a sharp voice. She waved towards the back and told her team to protect the Violent Lightning Turret and Crystal Cannon.

Only with these weapons could they threaten the demon monsters. If they lost their support, the human camp would be on the verge of collapse and might even collapse instantly.

These demon monsters planned to wipe the humans out here.

These guards were sent by her father to protect her. The captain hesitated, but after Mu Xinfei shouted at him, he stopped hesitating and charged.

The people in the inner circle started to face these demon monsters that landed from above.

Liang Chuyin and Xia Bai controlled the Violent Lightning Turret and Demon Crystal Cannons. They had the battle contribution badge, and they cared about collecting contribution points. But when they saw these demon monsters jump, they told people to take over and led others to protect these killing weapons.

The monsters that jumped in had very high levels. There were the elites of these 50 thousand demon monsters. Four or five of them had reached level six.

If they freely attacked in the inner circle, even if they didn't crush the cannons, it would cause the humans huge chaos. This was why Liang Chuyin told people to handle them when they entered.

Xia Bai and her each took one, the sisters took one, Ah Yang's seven brothers dealt with one. Guang Yao also handled one of them. Mu Xinfei's guards took the last one.

The other people like Ah Yang, Little Xiu and the experts that Mu Xinfei brought stood in all directions to protect the cannon formation.

Both sides had gone mad.

Ya Tian and Ya Ni were the first to battle the level-six demon monster. They were standing before the cannon formation and a demon monster had landed beside them.

Since following Ye Zhongming, the twins felt really comfortable. Maybe they had such a good life before the apocalypse, but it felt like a lifetime ago after they had gone through hell.

Although Ya Ni had turned into a silver zombie, the set equipment, as well as changes due to Ye Zhongming's huge mental energy and Soul Refining Technique, had brought some changes. She was connected to Ya Tian as well as Ye Zhongming. Especially the former with whom she could communicate.

As such, Ya Tian felt like her sister hadn't left and was still alive in another way.

She loved Cloud Peak and every one of its members.

She hated everyone who wanted to kill those from Cloud Peak.

Seeing a sister who treated her well die in battle, she was furious. After smashing a demon monster to death, she bumped into this problematic fellow. When her sister didn't pay attention, it punched her and sent her flying.

Ya Ni's body was strong, so she shook off her injuries before standing up.

"I hate you!"

"I hate all of you!"

Ya Tian's voice was filled with rage. She tossed the doll on the ground and her body entered the stone state.

The butterfly knot's skill was activated!

Ya Tian entered stone form, and the silver zombie's strength increased by 120%.

At the same time, the doll had turned into a mature female mage wearing a green robe with golden edges!

The princess mage appeared!

Although Ya Tian didn't go berserk and summon the cavalier, her rage exceeded that of the archer, which was why the mage descended on the battlefield.

Ya Ni stood up. Her expressionless eyes were filled with killing intent. She took a few sweets from her apron and tossed them into her mouth.

The apron's ability, Dessert Eater!

She had collected many of these sweets, which would appear randomly after she killed lifeforms, and she finally used them. She ate the strength candy to increase her power, defense, and agility. Seeing the fellow that sent her flying rushing towards her sister, Ya Ni pounced at it.

The silver zombies were known for their bodies. In this aspect, she was not weaker than the demon monster. But because the demon monster was of a higher level than her, which was why she was at a disadvantage previously.

But with the increase in strength and after eating the candy, this older sister didn't fear the level six demon monster. She charged to block that fellow. Even if she was short, she fought toe-to-toe. Outsiders could only see their shadows.

The moment the mage appeared, her majestic features shone an intelligent light. She didn't help the twin just because she was Ya Tian's doll; she saw that the twin didn't need her help.

The mage looked at the battlefield and knew her side was at a disadvantage as there were too many enemies. But this was what she loved.

To turn the tides of battle was much better than crushing the enemy.

She raised her staff and closed her eyes slightly before channeling her skills. With her voice, the gem in the staff lit up the night sky.

This attracted the attention of everyone, including the demon monsters. Everyone felt strength from the light.

S Zone and T Zone people didn't know where this mage came from, but they were impressed by Cloud Peak's strength. Many people headed over to protect the mage as they knew that it would use a strong magic attack.

Demon monsters had strong instincts. When they saw the light, the demon monsters around charged at this mage and wanted to kill her before they killed them.

The attention of the battlefield was split into two sides.

The entire human defense line didn't exist. Most of them were split into small teams to fight. There were so many demon monsters, but few could enter those fighting circles. They could only put pressure on the outside.

The mage finally channeled her skill. She opened her eyes and waved her staff forward. A silver light spread across the battlefield. Under the moonlight, everything looked mysterious.

Many people, including demon monsters, raised their heads. Apart from some enemies who were in an intense fight, the battlefield paused momentarily.

As they watched, the silver sand floated around before rising into the sky and disappearing.

Many thoughts appeared in their minds.

What was going on? So much commotion, and then... They disappeared?

Chapter 799: Fainted

Liang Chuyin whipped the demon monster she was facing. She was very nimble and jumped to the side. She looked at the disappearing silver sand and was so furious that she raised her brows. That summoned being was not reliable at all.

If she faced demon monsters on the same level alone, she was confident that she could kill them without taking any injuries. But she would need some time. This was the advantage that humans with jobs and skills had.

But she was surrounded by enemies, which was why she lost the advantage of the Wind Dancer, which was agility. So she could only use her equipment and skills advantage to whittle them down slowly.

Liang Chuyin thought she had some hope when she saw the huge commotion the princess mage caused. Ye Zhongming told her that some jobs in the apocalypse were strong. One of the strong ones was mages. Although their defense was weak and they went against the norm of being strong in both attack and defense, but their attacks could make everyone tremble. If you reached the top of the job, you could cause the color of the sky to change with just a raise of a hand.

Before Ye Zhongming revived, there was a nine-star evolved who was a mutated job user—Mystery Ripple Mage. After he reached nine stars, he also got a rare space-type job that could allow his body to disappear in battle so that the enemy couldn't locate his position. Rumors had it that he could part mountains and flip the seas.

Ye Zhongming didn't know if it was true or not as he hadn't seen it but even if the rumors were too exaggerated, it showed that this person had some strength.

Strictly speaking, Shengyuan was such a person. His giant shielder job didn't have attack, but its defense was outstanding. Even if he fought things stronger than him, it was difficult for them to break his defense. But his job didn't have a prefix, so it wasn't elite. In his last life, he didn't have the money to raise his job to the highest level, so he didn't perform as well.

But even then, Shengyuan was someone the few bosses relied on in team fights; his position was much higher than Ye Zhongming.

Because Ye Zhongming revealed that information to Liang Chuyin, this was why she anticipated the skill, but the truth made her speechless. Xia Bai didn't bother about matters, so she had to consider what to do next.

She didn't want to use the thing Ye Zhongming gave her. It was a one-time-use item and very precious. It could really save lives, so if it were used, it would disappear.

But... If this situation continued, she might have to use it.

Many demon monsters were terrified previously. After all, the humans had many attacking methods. Their fear of those skills that hit them when they charged was still lingering. Those cannons were still consuming their lives. If anything else happened, it would have a huge effect on them.

But it looked like a false alarm?

Right when everyone felt like the mage didn't control her skill properly, a sharp ring from the sky appeared. Moreover, it was not only one ring—it was many connected rings. It was as if numerous arrows were dropping from the sky.

Many demon monsters and humans who had lowered their heads looked up again.

Suddenly, the demon monsters started to roar. The roar came from a four-meter demon monster hiding in the group.

It had sensed something which was why it gave out such a sound.

The demon monster group was in chaos.

Two seconds later, the silver sand reappeared. But every speck of sand had starlight on them.

“What is that?”

The humans had such questions. Even the demon monsters thought the same way.

The specks of sand landed quickly on the demon monsters on the outer circle.

There wasn't any shocking light or any loud explosion. There weren't any cries from the extreme pain. Even the sky that lit up had gone dark again.

There was only a series of connected piercing sounds.

Also... Groups of demon monsters started to fall.

The cannon formation was slightly higher than the rest of the formation. From there, you could see half the battlefield. The Cloud Peak warriors there had forgot to fire. They were stunned as they looked at the situation outside as that area had turned into a land of death.

The silver sand had pierced the heads and bodies of many demon monsters. As the light disappeared, so did the lifeforce of the demon monsters.

The piercing sound was from the sand shooting into the bodies of the demon monsters.

Any demon monster that was hit by the sand couldn't even struggle before it turned into ash!

Just where they could see, the warriors felt like over five thousand demon monsters were burnt to death by the silver sand.

Reflecting Sand Current!

A multiple-element spell that only high-level mages could use!

The humans cheered. This was the biggest win they had since the fight started!

As long as the Violent Lightning Turret and Crystal Cannons had the support of crystals, they could deal huge damage to demon monsters. But they could only kill a few dozen demon monsters at once. Even then, the evolved felt like they were very strong.

But this skill actually killed a tenth of the demon monsters? That was unbelievable.

The cannons fired for so long, killing around five hundred demon monsters.

Liang Chuyin clenched her fist excitedly.

Although this spell killed the demon monsters on the outskirts and didn't reduce the pressure they were facing, but whatever happened on the battlefield would always have an effect.

It would be fake to say that this didn't affect the demon monsters.

"Continue!"

"Again!"

Many humans shouted excitedly. They saw the hope of beating these demon monsters. Liang Chuyin felt like she could save on the thing that Ye Zhongming gave her.

But some time passed and there was no commotion. Many people who were fighting turned back but very quickly, they heard some words.

"Haiz, the mage fainted."

"Yi, it turned into a doll!"

"It probably ran out of energy."

"As expected it isn't reliable."

Chapter 800: Crystal Nest Barrier

The demon monsters had suffered huge losses since the start of the battle.

The humans used their ranged skills and cannons and caused thousands of them to die.

After they clashed, the humans were stubborn and strong and also caused huge losses. The cannons didn't stop. Each shot would kill dozens of demon monsters.

Each step forward they took, they would pay a huge price.

But they still believed that victory was in front of their eyes. These humans were strong, but there were too few of them. Just half an hour was needed to end this battle.

But after that huge range spell, they were stunned. To them, they didn't understand what had happened.

Why were those shiny things so amazing and quick? They descended from above and burnt a few thousand of them to death?

Those in the inner circle were still okay. Many of them still didn't know what had happened. But those in the outer circle weren't so calm. They were afraid that such things would happen again, and they would be the ones that were turned into ash.

Honestly, they were used to ruling, and this was the first time they realized that their bodies weren't invincible.

This chaos quickly spread throughout the horde, and even those in the inner circle were affected.

The humans took the opportunity to gather and form a new defensive line. Those high-level demon monsters who jumped into the inner circle fled, and the humans killed the remaining.

The battlefield reverted to a similar situation as before.

But the humans didn't feel hopeful because of that. On the contrary, after the momentary joy, they felt more solemn.

In such a short while, over a thousand humans had died!

The battle was intense, and the formation was squeezed into a very small circle. As long as you got injured, your subordinates had no space to save you. So, injuries were the same as death. As the demon monsters pushed forwards, the injured humans would get drowned and they would have no chance to escape.

This was happening even with the cannons and the princess mage. The latter had fainted and turned back into the doll. Two of the cannons had started to malfunction because they had been firing and needed repairs, greatly reducing their firepower.

If the humans' skills were on cooldown, then their strength was waning.

Under such a situation, how could they continue to fight?

Liang Chuyin's heart was bleeding. The team suffered no losses when facing the level eight chain prisoner. But in such a short battle, a few dozen people died. These were elites of Cloud Peak! This was even when everyone was at their peak. The warriors would only get weaker, so how bad would the losses be?

She was clear that Ye Zhongming nurtured Xia Bai's team. If they all died here, it would be a heavy blow.

The demon monsters started to calm down. However, that high-level monster continued to roar and even killed a few hesitant allies.

Both sides knew that the second wave was about to begin.

As expected, the demon monsters surged when it gave the order. They clashed with the defense line. Like the first time, many high-level demon monsters jumped into the human formation. They knew how to break their defense effectively.

Liang Chuyin knew that it was time.

She took out the crystal ball that Ye Zhongming had given her and tossed it towards the sky. She then used her whip to hit the ball.

A light shot out from the crystal ball.

"Don't panic; kill the demon monsters around first!"

The light descended from above like a giant cover, forming a huge circle with the humans in the center. The light started to solidify to form many six-sided crystals, and such crystals formed a giant crystal house.

Allies who were terrified of the phenomenon panicked. Liang Chuyin shouted at them before leading the charge towards the demon monsters who had jumped into the circle.

Most of the humans here were elites. They were stunned for a short moment before they regained calm. They noticed that the crystal houses had protected the humans, and the demon monsters were blocked outside. They only had to kill those within, and they would be safe.

The numbers advantage flipped and the humans had the ascendancy. Even if the demon monsters were strong, they were being surrounded and killed.

Many people sat on the ground when the demon monsters inside were cleared. Even if they were evolved, after fighting an intense, long battle, they were exhausted.

“What is that?”

Mu Xinfei’s arm was injured, and blood dyed her uniform. But she didn’t care. With her six-star strength, it would close in a moment, and it would heal in a couple of days.

She looked at the giant crystal house and asked Liang Chuyin.

“Crystal Nest Barrier.”

Liang Chuyin told the people to move the demon monster corpses to the side while answering Mu Xinfei.

“A one-time use item, immune to all physical attacks and has a strong defense against all other attacks. But it can last for at most five hours. After that, even if it doesn’t get broken through, it would self-destruct.”

Mu Xinfei was impressed by the ability.

Cloud Peak had too many good items. Any one of them could save the world. Sometimes, she even felt like Cloud Peak was the resistance zone that knew the apocalypse was coming. S Zone and her were the new factions.

“Let everyone rest. If Ye Zhongming is not back in five hours, we will have to continue fighting.”

Liang Chuyin didn’t have a smile on her face. The situation was far from that.

.....

He sucked out two large bottles of blood from the two high-level demon monsters and placed them into his space. He was prepared to let Liu Zhenghong study them.

But his attention was on the pregnant demon monster that hadn’t left the wheel. Ye Zhongming had been observing it.

Although Yellow Ball won, it was a tough victory, and it was badly injured. Even if the Spirit Healing Technique was used, he couldn’t heal in such a short time. Ye Zhongming sent it back into the Exquisite Floating Ball to rest.

He slowly walked towards the demon monster. He didn’t see any fear in its eyes. Instead, it looked excited.

When Ye Zhongming was ten meters from it, it suddenly went behind the wheel and pulled out something from the pile of demon crystals... A human woman!
