

Apocalypse 901

Chapter 901: Fainted

Black Cell.

This was the name that people in his last life gave this level-eight mutated zombie because it looked very similar to a famous anime, just that the zombie's armor was black.

This zombie was a killing machine. It was very agile and powerful. It had sharp nails and there were diamond-shaped edges at its joints. Its thick tail and sharp tail tip terrified people. These gave him a variety of taps. Moreover, as it had thick armor, its defense was very strong, too.

Apart from that, its talent skills were amazing too. It had all sorts of attacks.

The only weakness was that it wasn't quick. When humans bump into it, it might have a chance to escape.

Black Cell was different from the Pink Ball from God Hall. This was a real self-evolved body.

If one was the same level as it, it was quite difficult for a human evolved to defeat the Black Cell.

Even if Ye Zhongming had become a seven-star evolved, and his equipment and skills far exceeded this level, he would probably only be able to escape.

This fellow was only slightly weaker than the Chain Prisoner.

Before this, Ye Zhongming didn't think about killing this fellow.

If humans wanted to kill level eight lifeforms at this current stage, they would have to be really lucky. As before, when they killed the level eight zombie ape, they had to use the area. Before it got close, they had to use all their attacks on it!

They could only do so because Cloud Peak's attacks, demon crystal weapons, and various defense equipment were the best of the human race!

Even then, they still had to focus fire on the level eight zombie ape, which resulted in other parts of the wall being broken. They paid a heavy price and sacrificed thousands in that battle. Over a quarter of the city's defense equipment was destroyed in that battle, too.

They were in an intense situation, and Ye Zhongming used the Soul Shattering Staff almost instinctively. The warriors on the walls who saw it were stunned.

That pillar of light covered a few hundred meters of distance and even hit Cloud Peak's walls!

Three hundred meters, not to mention the lifeforms around it that were shocked. Anyone who saw it would be shocked.

Moreover, the light was not the most terrifying thing. When it reached the walls, that pillar of light left a huge hole in them!

The streak of light left an empty region between that hole and the Soul Shattering Staff!

Right, any lifeform in the ray's path disappeared apart from that Black Cell.

If the Black Cell disappeared, people might guess that the ray of light had a teleportation effect that teleported the lifeforms away. But if Black Cell was still there, then... Too tragic.

The black armor of this level eight lifeform was covered in holes. Purplish red blood flowed from those holes. In the instance of the attack, the level eight lifeform used his hands to cover its head, which was why it didn't die. But its hands were like spiderwebs. You could see its face from those holes even if it didn't place its hands down.

It was also covered in blood.

Everyone could tell that it was severely injured and was about to die!

What skill was it? It was so strong?

This thought appeared in their minds.

That Black Cell was a level eight mutated lifeform. That was the highest level of all the mutated lifeforms many people knew.

Because they hadn't seen a level nine mutated lifeform, at least humans hadn't seen one and confirmed them.

Even out of the huge mutated lifeform hordes, a level eight presence was rare. It had absolute power over millions of mutated lifeforms.

Such a terrifying fellow was nearly killed by one skill!

Mutated Lifeforms were terrified, and the humans were confused by what had happened.

Hong Xiang was shaking slightly. He knew that Ye Zhongming was strong and that he couldn't defeat him. Ye Zhongming's level increased, which meant that Hong Xiang had no idea of competing with him.

But he didn't think that Ye Zhongming could insta kill him. What happened the last time was because he was careless.

But now... That pillar of light badly injured the level eight Black Cell and the lifeforms behind it. This showed that Ye Zhongming insta killed it without much effort.

Hong Xiang didn't think that his defense could compare to that of this monster whose body was covered in black armor.

While he was stunned, a person flashed. That masked woman dashed. Behind her was the Red Hair monster woman and the golden dog!

That red-haired woman slashed the head of this badly injured monster when she passed the Black Cell. The dog bit the body, and they covered a hundred meters in an instant.

That masked woman was hugging a person; it was Ye Zhongming!

Hong Xiang knew that things weren't right. He couldn't bother so much and just followed them.

The moment they moved, it was as if time had restarted. Cloud Peak cheered while the mutated lifeform army was in chaos.

Although Black Cell was just the zombie's commander and the mutated plants and animals weren't under it, there were over 2 million zombies. There were at least a few hundred thousand around the few of them.

Seeing the commander being killed, the other high-level lifeforms surged at these few people. They wanted to rip them into pieces. So even if Xia Bai and the others were quick, they were surrounded when they were around 50 meters from the hole in the wall.

Both sides were in an intense battle.

When the defending troops saw it, they wouldn't allow their boss to be attacked. Tens of thousands of them charged out from the hole to receive them.

The battle became even more chaotic. The mutated lifeform army was split into two parts. One that surged towards the wall, one that ran backward. An empty region appeared in the middle.

Humans were all fighting for themselves. There wasn't a commander, because... Ye Zhongming had fainted.

Chapter 902: War whirlpool

The team's atmosphere was very depressed.

Thousands of people were being forced to walk. If they resisted, they would be beaten up and even killed.

A woman walked in the front. Her face was ice cold. This was Cloud Peak's second in command, Xia Lei.

The closer she got to Cloud Peak, the colder she felt. Even Park Xiuying didn't dare to speak to her.

But although they were silent, they felt slightly better. They got the news that Cloud Peak had held on.

Now, they were very close to Ying City. Moreover, there was new news from Cloud Peak.

A person appeared in the team and ran to Xia Lei's side. He passed her a note and then ran back into the wilderness. Quickly, no one could see traces of him.

Cloud Peak knew that he was a member of Chameleon. His combat strength might not be high, but he had mysterious job and abilities.

Xia Lei opened the note, and she lit up. The warriors sensed the thick, vengeful intent from her body.

"Show everyone this!"

Xia Lei told someone to read the contents of the note to everyone. The moment the Cloud Peak warriors heard it, they exploded!

Boss was back in Cloud Peak! He brought many warriors, but Cloud Peak was still being attacked!

Cloud Peak launched an attack not long ago, splitting into two battlefields. The battle is really intense.

The news caused Cloud Peak warriors' blood to boil!

But very quickly, the final piece of information was a guess. Even Chameleon members couldn't enter the center of the battle, so this was the intel member's own judgment of the situation.

The deduction was split into two parts. The first was that although Cloud Peak launched a counterattack, the difference in numbers was huge, and they would still be at a disadvantage.

This meant that he didn't think too well about the outcome. Although this was just the intel member's analysis, it meant they weren't too optimistic. Causing their excitement to lessen a little.

But the next part of the information lit them up.

"After Boss killed their strongest zombie, it was as if he was badly injured and is being protected by Xia Bai, retreating towards the city. But they are stopped at the walls. The receiving team is unable to get close. Suggest Park Xiuying to return to Cloud Peak just in case."

What?

Although Ye Zhongming wasn't in Cloud Peak for long periods, it didn't affect his status. Ocean King Wheel battle, Death King Tree battle, Demon monster battle!

Unbelievable battles spread back to Cloud Peak. Each time it was brought up, everyone was amazed. In the apocalypse, where there wasn't any entertainment, this became their biggest enjoyment. Those who joined one battle were welcomed, and when they were free, many would surround them so that they could tell stories.

These were legends of Ye Zhongming. He faced a level eight lifeform alone, killed many strong enemies, faced the biggest human factions, and didn't back down...

These events meant that Ye Zhongming's position not only didn't drop because he left, but it was climbing.

Xia Lei and the others were happy to see that situation and even pushed for it in the dark.

They were anxious when they heard that their boss was injured in battle, and his injuries weren't so small that it needed Park Xiuying to rush back.

The calm team exploded and requested to rush back!

"Quieten down!"

Xia Lei shouted for them to quiet down. Although Xia Lei's power was beneath Ye Zhongming's, his prestige was also strong.

"Little Ling, Meng Meng!"

Two young girls walked out. They were some of the people protecting Park Xiuying.

"Lead Park Xiuying back to Cloud Peak! Remember, you can die, but send Park Xiuying back to the mountain. Do you understand?"

"Understood!"

The two girls weren't unhappy at all and agreed. At the same time, their bodies twisted, and two pairs of wings appeared.

They were rare flying-type job users. This was one of the escape paths for Park Xiuying.

They grabbed an arm each and flew into the sky towards Cloud Peak. With this speed, they could return within half an hour.

“Knock these people out. One person carry two, and let’s travel quickly!”

Xia Lei’s blade landed on the 5 thousand that were held hostage and knocked them out.

The others followed, very quickly, Cloud Peak’s warriors carried two hostages and ran back to Cloud Peak.

.....

If one looked down at Cloud Peak and Ying City from the skies, one would see many huge teams were heading in this direction. These teams were the factions that Ye Zhongming told Yuan Shang to inform.

Their sizes were different, from a few people to a few thousand. They came after receiving Ye Zhongming’s promise of huge rewards.

Of course, they had two plans. If Cloud Peak’s situation weren’t good, they wouldn’t risk their lives and just leave. They wouldn’t even bother to see if there were any spoils. If Cloud Peak had the advantage, they didn’t mind helping and getting the final rewards. However, people with symbolic Cloud Peak features appeared when they got close to Cloud Peak. They organized them to gather at a spot. Once they reach a certain number, a Cloud Peak squad will appear and lead them away to battle the mutated lifeforms with Cloud Peak.

Only then did they know that Cloud Peak’s counterattack had begun. Their small tricks couldn’t be executed, and they could only battle those monsters.

Although their evolution levels weren’t high, there were many of them. Over 20 thousand people gathered here, which increased the strength of the human force. There was also a group of people rushing over.

A war whirlpool with Cloud Peak at the center was forming quickly!

Chapter 903: Mutated army's final attack

Ye Zhongming fainted because he used up all of his mental energy.

Even if Ah Tao and the three-legged man told him how to create and use the soul artifact, he understood too little. Moreover, the former’s understanding of soul artifacts was very low. His peak item had just reached the intermediate stage. Although the three-legged man’s mental energy talent was extraordinary, it was because of his race.

In other words, the three-legged man’s mental energy was strong, and he could know so much because he lived a long time. But he was not good at crafting soul artifacts.

Right, knowing and being good at something were two different things. With his ability, he probably wouldn’t use it in the Blue Secret Realm if he got free. That thing might not be stronger than his current attack.

So Ye Zhongming had no idea if the Basic Smith Heart, etc. Smith skills would affect his creation of a level nine soul artifact. Anyways, he succeeded, and he added 15 marks.

The three-legged man knew it was amazing but didn’t expect it to be this amazing.

All these elements combined meant that when Ye Zhongming used the Soul Shattering Staff, he created a hundreds-meter-long death corridor. It killed level seven lifeforms and badly injured the level eight lifeform. As a result, he used all of his mental energy and went unconscious.

How high was Ye Zhongming's overall mental energy? It wasn't surprising that the damage was so high after he had consumed all of his mental energy.

Of course, it was because things were too sudden. Ye Zhongming just wanted to do a powerful strike, but he didn't consider it. Or rather, he did consider, but he didn't expect to need so much mental energy to activate all 15 marks.

But he fainted. This was tough for Xia Bai, Hong Xiang, Red Hair, and others. The zombie army was stunned, but they were nearly able to make use of it to return to Cloud Peak. But, they were nearly able to.

Two people, a zombie and a dog, were in their strongest states.

Hong Xiang held two weapons: a silver blade and a pair of silver hammers, gifts from Ye Zhongming.

When the zombies surrounded them, they knew he had to go all out. The blade turned into streaks of silver light that sliced the enemies that charged forward.

Although Hong Xiang had just reached level eight, he was still level eight. Ye Zhongming suppressed him because Ye Zhongming had too many skills and tricks.

But the zombies were different. None of them could block one of his attacks.

Xia Bai protected Ye Zhongming with one hand, and she used the scythe with the other. She didn't care about killing the enemy; she didn't want Ye Zhongming to be injured.

At the same time, she used her bloodline and job. Even if she didn't attack, no zombies could get close.

Yellow Ball went berserk. Its body swelled. It was behind Xia Bai to ensure that she wouldn't get attacked. Shadow Forest Stab, activate! The zombies that got close were cleared out. The already level seven dog was weaker than Ye Zhongming in Cloud Peak. Probably even Xia Bai wasn't its match.

Hong Xiang was the arrowhead, and Xia Bai was in the middle. Yellow Ball holding up the rear. Red Hair was nimble, and her position shifted from left to right.

As she controlled those zombies previously, she could not use them again as they consumed too much mental energy. But this half-human half-zombie was still fighting. Her attacks were as strong as the shining Yellow Ball.

Vines stretched from her hands and back. These vines were like life-taking whips that claimed the lives of those zombies. Moreover, Red Hair's hair formed a path beneath her feet; when needed, they would float and attack the enemy with her vines. This made her like a giant porcupine. Any enemy that touched those spikes would lose their lives.

The elite team's combat strength was on full display. Each second, they got closer to Cloud Peak.

The Posthumous people warriors that charged from the walls weren't as successful. Although they cleared ten meters when the zombies weren't paying attention, the hole was too small, and too many

of them came out. Those at the back were blocked within the mountain. Without the firepower support from the walls, they might get pushed back. The zombies might even make their way into the mountain.

Fortunately, the Posthumous people were fierce when they fought. The first batch of warriors blocked the counter from the zombies and formed a defense line. The people at the back could charge up, stabilizing this arc-shaped defense line with the hole at the center.

But that was only it. Those warriors were stuck here and were unable to proceed.

The situation changed when the high level zombies arrived.

Since the war began, only two level eight zombies have arrived. One was the level eight Zombie Ape, which was killed by the ranged attacks. The other was Black Cell, which was killed.

With them here, the zombies around surrounded them. Even if Talking Lady and Red Hair returned, it wouldn't do much because of the level gap. They were stronger.

But without them, some stronger zombies were also killed such that the higher-end of the zombie's strength was severely damaged. But there were too many zombies. There were over ten level seven, hundreds of level six, and numerous level five zombies.

Usually, when the zombie king dies, the remaining high-level zombies select someone to take over. After two level seven zombies led 20 level six zombies over, the elite team stopped. They were a dozen meters from the Posthumous people's defense line.

They were so close that they could see the slightest reactions on their faces.

A level seven zombie led seven level six zombies to tangle with Hong Xiang. The other level seven faced Red Hair. The remaining level six zombies led their subordinates and attacked Xia Bai and Yellow Ball.

Taking revenge and taking over the leadership became a method that all lifeforms would adopt. Zombies were no exception.

Xia Bai shouted. She sliced two zombies, and then Yellow Ball bit her collar and tossed her. She hugged Ye Zhongming and got onto Yellow Ball's back. It barked, and it used Dense Needles. 20-centimeter thick fur fired in all directions and cleared an area.

Yellow Ball's beast tool moved and brought them into the sky.

With Yellow Ball's flying speed, it needed just a few seconds, and it could fly onto the wall.

It didn't use this and waited for the high-level zombies to appear. If not, it was easy for it to be intercepted.

The people on the walls watched as Yellow Ball flew into the sky. They started to provide cover such that it didn't need to worry.

But in the dense zombie horde, another level seven zombie hiding finally showed itself. It was as if it was waiting for this moment. It gave out an ear-piercing screech.

Chapter 903.5- Mutated army's final attack (2)

As it screamed, 50-strength-type zombies stood up. Each one of them held an agility-type zombie. They tossed these little ones toward Yellow Ball.

This wasn't it. In another direction, thousands of zombies in various forms showed off their might. These zombies all had a unique point: They had wings!

At the same time, the empty region in the middle, formed by the humans' attacks, had close to ten thousand similar-type zombies!

These zombies were around two meters long and very muscular. Their skin looked soft, unlike the thin or thick armor that other zombies evolved. It was obvious that they didn't have too high a defense. Moreover, although their legs had degenerated, their upper body was very developed.

The most eye-catching thing was their giant stomachs. Even pregnant ladies who were about to give birth didn't have such big tummies.

It was rare for so many zombies of the same type to be gathered together.

If Ye Zhongming had woken up and seen these mutated lifeforms, he would have known they were Cannon Zombies!

A mutated zombie that spat a special liquid that they accumulated in their bodies.

They were one of the few ranged zombies.

The liquid that these cannon zombies spat was amazing. Firstly, they were very powerful. When fired, they would give out a banging sound, which is why they got their names. The impact of the liquid balls was also very strong, and they could kill.

The liquids themselves were very corrosive. After exposure to the air, they would undergo some chemical reaction, so they weren't easily extinguished.

If they had talent skills when they evolved, it would be shown in terms of the liquid, causing the liquid to have all sorts of abilities. Apart from strength, burn, corrosiveness, they might even have explosions, toxins, weakness, etc.

They were lined up orderly, and all lay on the ground. They aimed their mouths at Yellow Ball and the walls. After taking deep breaths, the first row spat various colored fist-sized balls.

Then the second, the third...

When all the Cannon Zombies fired, the liquid covered the sky between the walls and themselves.

The colors were different because the abilities they contained were different.

Very few people paid attention to another part of the battlefield. But at that moment, there were weird shouts. Many people looked and saw that although they weren't flying forces, many green and white things were standing on a pile of mutated zombie corpses.

Many people recognized them.

Mutated Blood Sucking Flees!

Thousands of them were suppressing their bodies, which told the survivors that they were about to jump.

As expected, the fleas made many jumping sounds when their four limbs curved to the extreme. The fleas flew into the sky and flew towards Cloud Peak's city.

Their jumping abilities were so strong they could leap over the walls and fly into Cloud Peak.

But what terrified the humans weren't these giant fleas. There were over six digits of warriors in the city. If they jumped in, they could cause chaos but couldn't take down Cloud Peak.

The ground behind them started to rumble. Many train-like purplish red bugs charged out. Their bodies were covered in armor that shone in the sunlight. Their bodies were dozens of meters long and had many thick legs under them. One look and one knew that although their bodies were long, they would be extremely quick, too.

What everyone paid attention to were their heads. There were many huge drills. As they moved, one could sense the enormous energy within.

The moment those bugs appeared, they charged towards the walls. The spiral heads started to spin, and the spinning speed picked up. Their eyes and mouths moved along with their heads, making them look weird.

It was obvious that they were about to drill through the walls.

Dense sounds could be heard, and some were ear-piercing. The entire sky turned dark. Tens of thousands of mutated porcupines were in the distance, their heads curled into their bodies. Those meter-long spikes covered Cloud Peak. Each porcupine had dozens of spikes, and they fired one by one. Very quickly, they covered the sky. They were like a dark cloud that shot towards Cloud Peak.

In the mutated animal faction, there was a white elephant the size of an SUV. It grinned with its two exquisite tusks and looked at Cloud Peak. Its head had an orange crystal like that of the Pink Ball.

Not far from the white elephant was a beast covered with thick wings. Its thick neck had four giant heads. One couldn't see its crystal. Only some people on the wall could see a small head between the four giant heads. There was also an orange crystal.

These attacks were a signal. The mutated lifeform army that had started to attack those humans on the outskirts split. Some continued to fight while some turned and headed towards Cloud Peak!

After the humans began an attack due to a misunderstanding, the mutated lifeform army that had been probing also launched its attacks.

The humans, whose morale was sky-high, were stunned.

Chapter 904: Dangerous situation

At this moment, many people knew why those mutated lifeforms were so quiet for those few days.

It seemed like it wasn't because they had lost motivation because the red mist had disappeared. They hadn't given up on Cloud Peak. They wanted to... Have a full meal before leaving. They were channeling energy!

Many smart people would guess that the mutated lifeform might actually retreat if Ye Zhongming didn't bring those support troops. After all, there weren't that many people, and there wasn't enough food for them.

But Cloud Peak sent reinforcements.

The entire Cloud Peak was filled with 200 thousand people. The scent they gave off sent the mutated lifeforms mad.

If they broke into the city, they could have a full meal!

These mutated lifeforms rarely had a chance to see so many human evolved gathered together.

The special thing was that the average human evolution level was similar to theirs and was slightly higher. As food, apart from being delicious, they were nutritious. These mutated lifeforms wouldn't let this chance go.

The longer they gathered, the more attacks they launched. These mutated lifeforms became calmer and craved more food.

They could have their biggest feast since the apocalypse started as long as they took it down. Many lifeforms might evolve and reach higher levels because of that.

The highest mutated lifeform level was level eight. These were rare in the millions or tens of millions of mutated lifeforms. They were at the edge of the highest evolution level. So it was impossible that the mutated lifeforms didn't crave reaching that level.

Ye Zhongming knew about those thoughts. Once a mutated lifeform reached level nine, it would rule an area and form its own territory.

Why did humans give these level-nine lifeforms names? Apart from their strength, it made it convenient to identify them.

For example, Yangos's territory. It was better than calling it the level nine Western Dragon.

A territory was not as simple as having a fixed home. It would have the right to kill and rob lifeforms in its region. Not only could it control the threats in the territory, but it could also plan how to improve its own body and strength towards that higher realm that no lifeforms could reach.

When they reached level nine, many lifeforms first ate the level eight lifeforms in the territory...

Of course, these temptations were just dreams for high-level mutated lifeforms now, but that didn't stop them from craving to reach such a level.

Humans were their best energy source, so they obviously wouldn't give up on a chance to fill their stomachs.

If one observed carefully, humans would notice that the battles between mutated lifeform forces had increased. Before this, these fellows had small squabbles while seiging. The few level eight kings allowed such a situation to happen.

But now, they worked together to crush the city walls.

Accidents did happen. Two level-eight zombie kings were killed. One was dead because of its special body, and the humans could attack it from the walls. Although it nearly broke the walls, it died. The second zombie king died a little randomly.

But the mutated lifeforms had a strict level system. The zombie horde that comprised the highest numbers had many level seven zombie kings to replace the level eight zombie king. This allowed the agreement of the mutated lifeforms to continue.

Thus, after Ye Zhongming appeared and attacked, the mutated lifeform army made a move. They might not be sure of Ye Zhongming's location, but it wouldn't stop them from killing this human while they attacked.

"Protect Yellow Ball!"

Mo Ye's voice became sharp and on the verge of breaking. Everyone could tell that Yellow Ball, Xia Bai, and Ye Zhongming were targets. Without support, even if they protected Ye Zhongming, Xia Bai and Yellow Ball were in a bad situation.

One mustn't think that a level seven evolved was strong. Even the level eight zombie ape was killed under the human's focus fire.

She got to work after shouting that. The giant wood talisman appeared above Yellow Ball. It wasn't to attack anyone but to help them block some attacks.

The wind talisman appeared, too. A wind blade sliced many agility-type zombies about to jump on Yellow Ball's back.

The crystal cannons and ranged skills on the wall were activated. They hoped to kill those little zombies that flew over. They didn't want them to get close to Yellow Ball.

Blood mist exploded in the sky. These little zombies were nimble, but their defenses weren't outstanding. The moment they were hit, they were killed instantly.

Just when those on the walls heaved a sigh of relief, the cannon zombies' liquid cannonballs arrived.

There were many of these liquid blobs, as dense as a storm! They were very quick. Under the cover of the small zombies, they hit Yellow Ball's body while the human attacks were on cooldown.

Those attacks smacked into Yellow Ball's body, giving a thumping sound that sent chills down the spines of people who heard it.

Yellow Ball was caught off guard and was sent tumbling forward. It lost its balance.

Xia Bai, who was holding onto Ye Zhongming with one hand and holding the scythe with the other, also fell downwards due to losing balance.

Anyone who saw those scenes exclaimed.

Many people ignored the cannon zombie attacks, mutated porcupine arrow rain, and moved in that direction. Many people looked over the walls and attacked in hopes of hitting those skills.

The armor started to crack, and there were many spots on it. Some parts of Yellow Ball that weren't protected were even up in flames. These injuries made it cry.

The cannon zombies' attacks were too dense, and there were too many types of attacks, which meant that Yellow Ball couldn't defend against all of them.

The wings flapped, and it tried to stabilize. But it saw Xia Bai falling, so it charged down. It was quickly below Xia Bai so they could fall onto its back.

"Yellow Ball, be careful!"

Mo Ye shouted. The giant wood covered in holes started to fall, smashing the area behind Yellow Ball.

Xia Bai, who was trying to control her body and let the black armor bugs hold her up, took a look. Her eyes, which were always cold, were filled with shock. The pearl on the purple mask representing water lit up, and an extreme cold mist covered the area.

A giant figure was gliding close behind Yellow Ball. There were four giant heads on its bird-like body!

Chapter 905: Edge of death

The one who attacked was the five-headed level eight monster whose crystal was on the small head in the middle.

There weren't many beasts compared to the mutated animals, mutated plants, and zombies, but they were all strong.

Consider the mutated army besieging Cloud Peak. While their numbers were relatively small, less than 10 thousand, their average level was a formidable five. This placed them above the zombies and the mutated plants and animals, highlighting their exceptional strength.

Because of that, they could stand on the same level as the other groups.

The attack of the level eight mutated beast drew the attention of many mutated lifeforms. They wanted to see how strong this bird-shaped beast who was slightly fat and couldn't fly on its own.

Xia Bai's mask was purple grade. It could even threaten level-nine lifeforms. This beast sensed it. One of the four heads opened its mouth and spat out a stone that was wrapped in flames.

Many humans were shocked. Although this beast's head and mouth were huge, the flame-wrapped stone was even larger. How did it spit that?

Moreover, those weren't ordinary flames; the flames were green!

Extreme Cold Suppression smashed the flame rock and gave out a loud explosion. A giant energy current surged in all directions, and with it were small pieces of stone.

Those stones fired in all directions. Be it the walls or the ground, many lifeforms were killed. Rows of humans and mutated lifeforms fell.

Moreover, the people who were hit started to burn with the green flames. Seconds later, their bodies were turned into ash.

Some pieces of stone hit Yellow Ball and that monster. The former had beast tools to block. Although it dealt some damage, it wasn't serious. The energy wave tilted its body slightly. Xia Bai and Ye Zhongming, who should have fallen onto its back, ended up brushing past and falling.

Yellow Ball couldn't let its master land in the dense zombie horde. It ignored everything, opening its mouth to bite the scythe it could barely reach.

But it was the head of the scythe. Yellow Ball's fangs weren't suited to bite such a flat thing, but to prevent its Master from falling, it allowed the scythe to slice into its teeth gaps, allowing it to hang there.

Blood flowed from its mouth and dripped onto Xia Bai's body.

The stones hit the five-headed monster. Its feathers, which were a mix of blue and brown, were perfectly fine. The flames didn't light it up either. The only thing was that frost appeared on the feathers but didn't affect it.

The force of the explosion was the one that forced it several meters back. In this process, this monster's body fell to the ground.

People could tell that although it had wings, it couldn't fly for long. It could fly up to around half the height of the wall. That should be its limit. Its wings were mostly to maintain balance and help it to glide.

Yellow Ball didn't care about the wounds caused by the scythe. It flapped its wings and wanted to fly near the walls. This was when those mutated porcupine arrows arrived. No one knew how many waves it had been. At least 1/3 of the arrows were aimed here.

The arrow rain covered the big ball and the two humans.

Yellow Ball was covered in armor. Ordinary porcupine arrows couldn't do much against it, but some parts were still exposed. Some higher-level porcupines dealt huge damage. Yellow Ball, who couldn't dodge and could only maintain this posture, was hit, and gave out a painful snort.

Xia Bai couldn't move either. She protected Ye Zhongming and tried to lower her head so the spikes would hit her scythe.

She didn't activate the purple tool because she knew the level eight beast would attack after the arrow rain. She had to conserve some mental energy.

Fortunately, she wore some good armor and most arrows were blocked. Some hit it and penetrated her flesh. Fresh blood spurted and flowed down the gaps of the armor. Yellow Ball and her blood mixed, and no one could tell who it was from.

But Xia Bai had underestimated the situation. The moment Yellow Ball flew into the sky, those mutated lifeforms wanted to kill them. In just half a minute, they received the strongest attacks.

But that level eight beast didn't charge as she expected. It saw that Yellow Ball wanted to tank the arrow rain, so its four heads turned, and another head opened its mouth at Yellow Ball.

A white ball flew towards Yellow Ball and hit the rising dog.

When the white ball scattered, everyone noticed that there were 30-centimeter white bugs.

Those bugs were like sharpened pencils. Their heads had sharp spikes. When they landed on Yellow Ball's body, they drilled through the gaps in its armor. They were quick and it was as if the strong beast equipment didn't exist and were easily broken through.

Yellow Ball's lips curled, and its eyes opened wide. Light shone on its body, and it used the Healing Spirit Technique. However, its body still trembled as it was in intense pain.

It was suffering from the pain of the bugs entering its body.

Dense Needles meant that it used its fur so its defense was the lowest now. It wore the beast tool, which could help block slightly. But after the bugs landed, Yellow Ball was helpless.

If it let go, he might be able to deal with it. It could use Gilden Ocean Shadow to fight the bugs.

But it couldn't. It bit the scythe. Due to the pain, it bit down, and the blade stabbed into its gum, which left deep wounds.

Everything happened too quickly, and Xia Bai felt that the situation wasn't good. She turned her head, and a sharp arrow stabbed her neck. Blood spurted. She controlled her muscles to clench that arrow. But blood flowed from the mask, and it was obvious that she was severely injured.

But the level eight beast didn't stop. The third head turned and it spat some other thing!

Chapter 906: Knocking down

That was a black ball of... Souls?

The humans who saw it could only understand it as that.

Because you couldn't describe what that black ball was. It wasn't gas because it looked sticky. It wasn't liquid as there wasn't a liquid-feel. It was not solid as that thing was moving.

People felt like they were souls because it was moving in the sky, and its shape changed. They were like souls trapped in hell and were trying their best to escape.

The more it was like that, the more terrified people were.

Xia Bai had tilted her head, but time wasn't enough. That thing was about to hit Yellow Ball.

Although she didn't know what it would do, which level eight's skill wasn't strong? If Yellow Ball were hit, even if it didn't die, it would definitely fall from the sky.

Many humans tried to attack that ball, but they failed to do anything because of the distance and their accuracy.

Seeing that what they least wanted to see would happen, suddenly, brown spikes appeared in front of Yellow Ball to form a fence that blocked that black ball.

The vines were from Red Hair. She was standing below. The vines around her hands and body shot toward the sky to block that attack.

Red Hair still hadn't recovered. Although Ye Zhongming used Saint Water to bathe her, maybe because the zombie's body was different from humans, the Saint Water wasn't too useful and could only heal her a little.

Red Hair was included in this elite squad; besides her demon crystal and stammering speaking ability, she was no different from humans. She had sharp senses at this level and could use pretty much her level-eight strength.

But even then, it was usually impossible for her to appear in the crucial position at such a moment. However, she managed to do it. This meant she had been paying attention to the situation in the sky, which was why she could help Yellow Ball block it.

But the level eight lifeform's third attack wasn't so simple. The ball cracked, and black matter flowed down the vines, instantly entering Red Hair's body.

Red Hair, who wouldn't make a sound even when she was about to die, gave out a scream that was so sharp that it covered the entire battlefield.

Red Hair was a mental energy and vine-type presence. This scream was filled with her mental energy, so those zombies that tried to attack her suffered.

The heads of the closest few exploded, and flesh covered the sky. Those further away were drunk. Their ears, eyes, mouths, and noses started to bleed. Many of them knelt on the ground, their hands scratching the floor as they were in immense pain.

The other lifeforms on the battlefield were all affected.

Fortunately, the zombies couldn't use the chance to attack her. If not, she wouldn't be able to defend against them and would get killed instantly.

Another close person was Hong Xiang. Red Hair used her mental energy to protect herself. She couldn't control which direction, and thus, Hong Xiang was in attack range.

This level eight king knelt on the ground, and his nose bled. He tried to suppress it but still spat out blood. The corner of his eyes was bleeding, and his body shivered in pain.

But he was a level eight presence and even got stronger on Earth. With his identity, he cultivated some soul technique. Although it wasn't his main technique, he had reached a certain standard after many years. His mental energy wasn't low, which was why Red Hair's attack didn't kill him.

The black things entered Red Hair's body but didn't disappear. They continued to strike from within. She curled up on the ground and rolled. She growled as if that would make her feel better.

Hong Xiang recovered slightly and came to his senses. He opened his bloodstained eyes to look and saw that many zombies had charged to Red Hair's side. He cursed and tossed his blade to slice the two closest. He charged and carried her up with one hand before pulling out a hammer. He shouted and continued to charge towards the broken hole in the wall. He wasn't far from it. Red Hair's scream cleared the zombies in the area so he could easily get to the Posthumous people.

Hong Xiang was slightly frustrated but had no choice but to save Red Hair, who nearly killed him. He knew that she was essential to Ye Zhongming. If he woke up and knew that he let her die, he would turn on him.

The level eight fellow saw that its first three skills were blocked and was finally furious. It had been long since anyone had given it such a big problem.

Its neck spun, and the final head faced Yellow Ball. It opened its mouth, and a thick tongue fired.

It was very thick, the size of a mature guy's body. It was as unimaginable as the giant meteor from before. How did such a head fit such a big tongue?

Like a meat pillar, it smashed towards Yellow Ball.

Xia Bai, who had turned, couldn't let it succeed. The red pearl flashed, and flames floated toward the tongue. There was an explosion, and it turned into a giant fire. Under the sunlight, it was very eye-catching.

The level eight monster shouted for the first time since the start of the battle. The purple mask's flame skill-- Burn had injured it.

Yellow Ball ignored everything and only cared about bringing Xia Bai and Ye Zhongming to the walls. As the battle proceeded, it continued to fly. It just needed a bit more time.

Xia Bai's successful interception had given it that time.

But right when many felt like it was going to succeed, that scorched tongue pierced through the flames. It smacked Yellow Ball's back, causing it, Xia Bai and Ye Zhongming to fall toward the dense zombie horde.

Chapter 907: Human chain

Many people exclaimed.

Faced with such a dense zombie horde, not to mention two badly injured and one unconscious level seven lifeform, even if that level eight beast fell into it, it would lose its skin even if it didn't die.

Why were the zombies still recognized as being on the same level as the mutated plants, animals, and beasts even when two level eight zombie kings died? It was because of their number.

There were too many zombies. They were the strongest on earth now, occupying the largest territory apart from the ocean. As they got stronger, more intelligent zombie kings would appear. Under their leadership, no race could fight against them.

There might have been many mutated plants and animals, but they weren't the same race. So, one race among them was smaller than the zombie horde.

If Yellow Ball fell into them, it would die.

Numerous zombies below were drooling at the three level seven. Many high-level zombies rushed over. It was nearly impossible for them to eat such a person usually.

Mo Ye, Liang Chuyin, and even Liu Zhenghong shouted instinctively.

Unfortunately, they couldn't reach them from the wall. They could only watch as the two humans and dog fell.

The level eight lifeform didn't want its spoils of war to land in their mouths. Its tongue was injured, but it wasn't a small injury. It needed to heal. Thus, it flapped its thick wings and glided towards Yellow Ball.

Yellow Ball's mouth and nose were bleeding profusely. A level eight lifeform's attack wasn't so easy to tank. The beast too on its body was in a bad state, and it was pretty useless. Without the wings to help, it couldn't glide anymore.

But if it fell like that, it, along with Ye Zhongming and Xia Bai, would die. The dog bit into the scythe that had pretty much chiseled its bone. It looked deeply at the unconscious Ye Zhongming. Its body, which had lost control, moved. It used its tail and neck to form a swinging motion.

After it did it, it stopped biting. It barked towards Xia Bai, and then its body fell much quicker.

It knew that this woman understood what it meant.

One couldn't see her expression due to the mask, but when her body's direction changed, she knew what it meant. She released her hand and let go of the scythe. Her body was swung towards the city wall.

The two humans and the one dog separated.

"Quick, quick! Human chain!" Mo Ye was slightly more rational than Liang Chuyin, who had lost her cool. She stared at the area, and when she saw Yellow Ball using such a self-sacrificial method to toss Ye Zhongming and Xia Bai over, she shouted to the people around.

The human chain was just a human rope formed by people holding hands to increase the length.

The people understood immediately, and many stepped forward.

To evolved, such actions weren't difficult. But with the attacks continuing, the soldiers would suffer more losses than before. Holding hands and jumping off the walls meant that they lost their last bit of protection, and there was a high chance that they would die.

This was a dangerous action.

But many Cloud Peak warriors still stepped forward, which made the depressed feelings of those who saw Ye Zhongming in danger feel much better.

"Chuyin, you first! Follow up!"

Every second was important. Mo Ye slapped Liang Chuyin to her senses and tossed her off within two seconds.

Liang Chuyin reacted. She kicked the wall, and her body flew toward Xia Bai and Ye Zhongming.

The moment she flew, another person flew from behind. A hand grabbed her ankle. She didn't use any strength, fearing it would affect her speed. She used his jumping power to glide along with her. Once she showed signs of falling, she would then grab tightly.

The second... Then, the third.

Each one of them was from Xia Bai's team. Everyone, including Xiao Min, joined in.

At the crucial moment when people had to sacrifice themselves, these people showed their loyalty.

If Xia Bai and Ye Zhongming would definitely die if they fell into the zombie horde, then these people who formed the chain had a higher chance of survival, but it was a 10% chance. Even if they succeeded, they would smash into the wall because of the momentum. If lucky, they could hold on still, but the mutated lifeforms would still attack them.

Once they were pulled back up the walls, no one knew how many could survive.

The human chain made of eight people flew out of the wall!

Everyone knew that all humans were watching. They realized that the time that decided Cloud Peak's fate was here.

The mutated lifeform army also noticed what they wanted to do, be it that gliding level eight lifeform or those mutated lifeforms attacking. They crowded over. They couldn't let the piece of meat, which was by their mouths, fly away.

Another contest began.

Liang Chuyin flew in the sky. Her momentum was lost, and she started falling, but she couldn't care. She could only watch as Xia Bai and Ye Zhongming got closer. She waved her whip, and it flew. The whip touched Xia Bai when it stretched to its limit.

The level eight lifeform couldn't reach this height but didn't want to allow the two humans to escape. The small head in the middle rose. There was a mouth that opened, and it roared.

A similar image to it appeared and that multiplied. These images fired at Ye Zhongming and Xia Bai like a cannon and that human chain.

Those mutated porcupine spikes touched those shadows and exploded into dust!

Liang Chuyin shouted, and Xia Bai grabbed the whip.

Liang Chuying didn't pull them as planned. She waited for those on the wall to pull them before she swung Xia Bai and Ye Zhongming.

This swing avoided the image attacks of the level eight lifeform. But she had to be the one to face them.

At the crucial moment, everyone made a sacrifice!

Chapter 908: Hard shock

Xia Bai and Ye Zhongming's bodies finally got close to the wall after two swings from Yellow Ball and Liang Chuyin. Although the mutated army's ranged attacks fired at them, they weren't as intense as the level eight beasts' attacks. Xia Bai used those black bugs to form a cloud before stepping on them. She used that bit of strength to jump onto the walls. Her legs went soft, and she knelt on the ground.

Many people heaved a sigh of relief, meaning the rescue operation had succeeded.

Anyone in Cloud Peak could die except Ye Zhongming.

This person had become the mental pillar of this slowly forming city. If he died, even if Ying City was defended, it would be meaningless.

Ye Zhongming was saved, but Cloud Peak core members were still in danger.

Yellow Ball was falling... The level eight beast was attacking Liang Chuyin.

"Save them! Save them!"

Mo Ye didn't relax when Ye Zhongming was saved. She just glanced at Ye Zhongming before commanding people to save Liang Chuyin and the others.

As for Yellow Ball... There was nothing she could do.

At the same time, Yellow Ball and Liang Chuyin were in their most dangerous moments.

The level eight beast had five heads, four big and one small. Each head had a different attack. Although the last head was small, the demon crystal was on it, and the four big heads surrounded it. It was the core, and its attacks were naturally the strongest.

Many skills descended from the walls to try to stop these images but they were too slow. They were unable to stop the images before they struck the human chain. Only Mo Ye was able to use wind blade to destroy one image.

But it wasn't enough.

Liang Chuyin knew that she was in the most danger. After she swung Xia Bai and Ye Zhongming away, she used the weapon's skill--- Hail Rain.

She hoped that it would delay the attacks.

But the speeds of the dozen images were slightly reduced before they surged at her.

It was obvious that the skill of a silver weapon could not compete with the skill of a level eight lifeform.

Too quick. She didn't have time to react or have many choices.

“Defend!”

Liang Chuyin’s body curled, and she activated the ability of the green armor.

She was wearing the earth armor that Ye Zhongming crafted for her.

She was Ye Zhongming’s woman, and Ye Zhongming loved her. This armor was much better than the Thousand Leaf Phosphor Armor, so of course, she got one soon. If not for the low success rate, he might have wanted to give her a blue piece of armor.

Apart from this armor, the dagger and a bracelet on her wrist were also earth equipment.

She had three pieces of earth equipment.

Which meant that she had set stats.

This was also specially prepared for her. The dagger’s level wasn’t high, and it wasn’t very useful. It existed because Ye Zhongming hadn’t found a better whip and didn’t dare to upgrade the Deep Cold Ripple with fertile soil. If it failed, Liang Chuyin wouldn’t have a weapon.

Earth Containing Battle Armor’s defense value was 600, and the effect of its primary skill used agility and movement speed to double defense. This meant that the defense was 1300. The earth defense equipment and earth set stats buffed one another, meaning this value exceeded 1500!

That was a terrifying number!

The Exquisite Floating Ball, which was a combination of wheel and earth technology only had 2000 defense. That was pretty much the highest defense that humans could grasp now.

Liang Chuyin planned to use this high defense value to tank the level eight monster’s attacks.

Actually, this was her best choice.

She just needed to tank one attack.

The level eight beast attacked, and its aura was scary. Dozens of images flew and occupied a large area. The range was huge, and anything that it touched would explode.

But because of that, these images were side by side.

Which meant that she just had to block once.

The image hit her. The human chain that was swinging in the air broke apart.

There was a loud explosion. Armor fragments flew, and on them were bits of green light.

This explosion damaged and nearly destroyed her armor.

Liang Chuyin flew because of that, and she spat out large mouthfuls of blood. Parts of her body were even twisted.

The level-eight beast’s full-strength strike was so amazing!

But it wasn’t over. Those images left a weird power on her broken armor, and it was corroding her body and made her feel like she was close to death.

Liang Chuyin didn’t hesitate. With her last bit of consciousness, she activated one of the set stats—Earth Gift.

She planned to use it to strengthen her stats, but she couldn't care less now. This ability, with a cooldown of over 1400 hours, was used to repair her equipment and injuries. The most important thing was to remove the debuff.

After she used it, she lost consciousness and fainted.

“Chuyin!”

Many people shouted her name and tried to help her. Although feisty, she was righteous, and with her decent popularity as an influencer, her reputation was good. No one wanted to lose such a friend.

Fortunately, the power from the explosion knocked her towards the wall. She was nearby, and a survivor used a net-like equipment to pick her up.

Liang Chuyin was saved, but apart from the last few on the chain who were pulled up onto the walls, the others were still flying. They weren't lucky. When Liang Chuyin was sent flying, the power affected them, too, and they flew in different directions. Moreover, they touched the edges of those images, and the explosions sent them flying, too.

Several arrows fired from the walls, and long ropes were tied behind them. They pierced through the sky and stabbed into the bodies of those spinning in the air.

Many people exclaimed. They didn't know why Cloud Peak would attack their own people. Only Mo Ye's eyes lit up. She even punched the wall excitedly.

The power from the rope brought those female warriors back onto the walls. Before they smashed onto the ground, they were caught by their allies.

Chapter 909: Yellow Ball, Yellow Ball

Although they didn't know how Liang Chuyin and the others were, they were on the walls.

Yellow Ball had fallen into the zombie horde.

Yellow Ball was still in his enlarged body state. His body was huge. With his momentum and the metal beast tools that it wore, although tattered, it still managed to smash many zombies.

Of course, thanks to the zombies for cushioning its fall; if not, Yellow Ball would have probably died.

But, these zombie bodies weren't flesh and were evolved special parts. These things also stabbed into Yellow Ball's body. Although its bones didn't break, more holes appeared.

Yellow Ball had suffered many attacks previously, from the cannon zombie's liquid to the mutated porcupine's spikes to the attack of the level eight lifeform. Along with this fall, Yellow Ball was already severely injured. It had never been so bad since Glory Army had sneak attacked it.

Yellow Ball knew what it would face to toss its master onto the walls. After falling, it stood up and waved its thick claws, ripping dozens of zombies into pieces. It flapped its giant tail and caused many zombie heads to explode.

But the zombies beside it pounced at it.

When Yellow Ball, Xia Bai, and Ye Zhongming were about to fall here, many zombies charged over, hoping to get some level-seven lifeform meat. Many dense zombies and a portion of the high-level ones were also here.

Yellow Ball attacked, but it was also hit. Various talent skills landed on it. Even though it had a level seven body, it was sent flying.

Large amounts of blood flowed from its body. Its wounds looked terrifying.

Some metal balls flew from his side and cleared the zombies that tried to pounce at it.

The attacks of the level eight zombies were strong, but the attacks of the level seven Yellow Ball were also sharp.

It stood up. The scythe that was in its mouth swung as it moved. After knocking two zombies aside, a huge level-six zombie grabbed it. The giant force caused Yellow Ball to lose control of its body.

It used Shadow Forest Stab. Along with the Firing Bullets, Yellow Ball knocked the zombies aside. That level six zombie's body was pierced, but its head was fine. It continued to hug onto the handle of the scythe. Even if it was weaker than Yellow Ball, it was able to hold on for a short moment.

When one was surrounded, one worried most about losing mobility. Yellow Ball's pause was only for a short few seconds, but more attacks hit it. Yellow Ball's giant body was like a small boat in huge waves. He stumbled before falling once again.

The Cloud Peak warriors on the walls cried out as they saw it. Their weapons and skills continued to attack and they didn't care if they missed or not.

If Ye Zhongming was the mental symbol of Cloud Peak, Liang Chuyin was the popular one; Yellow Ball was a mascot.

Compared to other beasts, apart from being Ye Zhongming's battle beast, Yellow Ball was a beast that you could get close to. That was something that other beasts couldn't compare to.

As Yellow Ball was an evolved dog and was one of the first members of Cloud Peak, it fought alongside Cloud Peak warriors and bled with them. It always charged at the front and helped them block numerous attacks. It had even saved many of their lives.

Cloud Peak saw it as their ally and friend. They were so close to it that they didn't just treat it as a mutated animal.

At the same time, Yellow Ball was always gentle and friendly to them. It would occasionally be playful. Especially towards the babies and kids, it didn't behave like a high-level evolved. Many kids had even ridden it around Cloud Peak.

Some people who had been in Cloud Peak for longer, when Ye Zhongming was forced to hide in Blue Secret Realm after Yangos attacked, remembered how it gave up on its own evolution to defend it.

Why was Cloud Peak so vicious to outsiders but friendly and gentle to their own?

A big part of it was because even Yellow Ball could show such love. As an intelligent human, how could you be colder to your allies than it was?

So, Yellow Ball was their faith and emotional support in their hearts, representing what Cloud Peak was.

Now, this beast was being attacked by numerous zombies. It fell time after time but climbed up again and again. It lasted for a few seconds before being knocked down once more.

Was this majestic dog—the dog that carried kids to play, the dog that disturbed people, the dog that lay on the roads to sunbathe, the dog that would charge at the front to block bullets—going to die here?

Many of their eyes turned red. They used all their strength to attack, even if they knew it was useless.

Outside the city and at the hole in the wall, the two squads that hadn't made any headway roared. The team started to break forward. Although they were slow, they pushed firmly.

They moved towards Yellow Ball.

More skills and crystal cannon attacks landed around it to help reduce its pressure. Its body shone, which was the mark of the Spirit Healing Technique. This dog had to use this method to slow down his loss of lifeforce. The number of times it attacked reduced, and the times it climbed up reduced. There was even less blood that flowed from its wounds.

It wasn't because its wounds had healed but because it was about to bleed out.

“Yellow Ball!”

Many shouted from all parts of the battlefield. The mutated lifeform army, whose attacks had become stronger, felt a giant pressure. The humans were fighting much harder and forcing them back.

But it couldn't change Yellow Ball's situation.

No one could get over there in a short time.

The sky turned dark. That level eight beast had glided near Yellow Ball. Many people closed their eyes. If they had some hope previously that Yellow Ball could escape, now they were in despair.

The appearance of the level eight beast signaled Yellow Ball's death.

“No!”

The always calm Mo Ye screamed. She grabbed the walls, and blood flowed from there. Her giant wood talisman was blocked by the level eight lifeform, and she lost her last bit of ability to help.

Yellow Ball looked at the walls where Ye Zhongming flew. It gave a signature playful smile before lowering its head.

A golden light shone from its body!

Chapter 910.5- Revenge storm

“Yellow Ball isn't dead, but... You will know immediately.” Sadness flashed in his eyes, but that was replaced with rage and hatred. Mo Ye, Liu Zhenghong, and the others who were close to him felt cold when they saw it.

Ye Zhongming was a ruler who controlled the lives of many. This gaze represented fresh blood and heads.

As expected, there was some movement on Yellow Ball's side.

The zombies that were biting on its golden layer had bumped into something terrifying and wanted to retreat. But they were too dense and had buried Yellow Ball such that you couldn't even see any gold.

They bunched up, and not only could they not retreat quickly, but many fell to the ground.

The liquid on the ground exploded.

Close to a hundred meters of metal exploded, turning into fragments that fired into the dense zombie horde.

The people on the walls were stunned and didn't know why it happened.

This Metal Storm was very powerful. No matter your level, the metal pieces sliced into their bodies. The weaker ones were sliced into pieces. Even the higher-level zombies were decapitated and crying on the ground. Even the level eight beast in the sky was hit, and several wounds were left on it!

"What was that!"

Everyone was confused.

Ye Zhongming looked down with a complicated expression, "Revenge Storm!"

.....

The team leaders came to a high-floor ruin in the suburbs of Ying City and looked at Cloud Peak in the distance.

Xia Lei placed her binoculars down and relaxed a little.

The land here was slightly lower, so she had to look up to observe Cloud Peak. But due to the mutated army's attack, it was turned into flat land no matter what was on the path to Cloud Peak. It made things easier to see, which was why Xia Lei could see what was going on in Ying City.

Although she couldn't see very clearly, she realized that the guy who was in danger should have survived it.

As long as Ye Zhongming was safe and Cloud Peak hadn't collapsed, she had nothing to worry about. Her mood recovered to that of a calm and elegant person.

"Sister Lei, why aren't we going back?"

A deputy put the binoculars down. Her evolution level wasn't as high as Xia Lei's, and she couldn't see clearly.

Moreover, there was something she didn't bring up. The team had bumped into people Ye Zhongming had sent to search for them. Even if they didn't return to the mountain, there were tens of thousands of warriors outside whom they could liaise with. If they did so, Cloud Peak's strength would be consolidated.

But Xia Lei shook her head.

Looking at their confused gazes, Xia Lei said, "We have been traveling back in secret, and Chameleon planned our path. This was also a rest point that they had found for us."

Everyone thought about it, and they thought about those people who had fainted and knew that Xia Lei had a plan.

"This attack on Cloud Peak is different from the past. In the past, it was because we had become enemies with them for certain reasons, and we just fought with all we had. If not for Ye Zhongming having tricks up his sleeve to put those people into a secret wheel space, the outcome would just be everyone else dying and one side escaping with a few people."

Everyone nodded. Some were in the competition death wheel space and had a deep impression of it. This was a crucial point in Cloud Peak getting rich and their mark of becoming a top-rate faction.

"But this time, some people learned. They hid in the dark and wanted to use mutated lifeforms to destroy us. Keke, they nearly succeeded, unfortunately..." There was a cold flash in her eyes. Everyone who knew her knew that she wanted to kill. There was going to be blood.

"If you were the mastermind, what do you hope to see?"

She suddenly turned and asked her subordinates."

Many people thought about it and gave suggestions. But that assistant said, "If I planned it, I would hope for both Cloud Peak and these mutated lifeforms to be wiped out."

Xia Lei nodded, "No matter what, people did things with a purpose. Especially in the apocalypse, that missile that caused the red mist would be sold for a really expensive price. Why would people waste it on us?"

"So, the person who did this might hate us or have nothing to do with us. They must be doing so to benefit."

"So how can they benefit?" Xia Lei stood up and led them down the building, "The best situation is for us and the mutated lifeform army to kill each other, and then they can benefit. At worst, we will get wiped, and once the mutated lifeforms eat and leave, the battlefield will be covered in good things. They could pick up so many materials and demon crystals."

No matter the time, war was in one's interest. Although Cloud Peak's battle wasn't a war, there was still a purpose. In the apocalypse, this goal even meant a sum of money that could propel a person to become the strongest expert. Who would do so just for revenge?

"Then, they must be around and waiting for the battle to end." Xia Lei entered the building and searched the rooms that survivors were locked in.

"If we return, we can strengthen the squad on the outside, but it isn't of any value."

“Sister Lei, you are saying... Find this team hiding nearby. Give them a heavy blow?”

The assistant frowned and asked. Only that could explain why she wasn't making a move.

“It is best if we can find them. Even Chameleon can't find where these people are hiding.” Xia Lei shook her head, “So, we can only wait for them to appear themselves.”

“From now on, just wait here quietly and care for these people. No matter what, these people will appear when the crucial moment arrives. If Cloud Peak loses, they will try to pick up the spoils. If we win, they will flee. That would be when we teach them a lesson.”

Everyone understood. But if Cloud Peak was in a bad situation, Xia Lei would do the best thing for them. In that case, it would be tough to find these people if she managed to turn the tide.

Let's hope Cloud Peak wins.
