

Apocalypse 931

Chapter 931: Barr's Potion

When Ye Zhongming and Xia Lei rushed back, the mutated lifeform army's attacks changed.

They stopped being split into two parts and merged, launching their attacks on Cloud Peak's walls.

This was their best solution now.

There wasn't much they could do against the human warriors on the outside who were attacking them and running. If they sent too few to attack, the humans would counterattack and kill them. After a few hours, not only did the humans suffer from few losses, but many mutated lifeforms were killed. This loss rate was just slightly lower than that of the sieging ones.

If this continued, wouldn't the humans break them apart?

The three-nosed elephant that had become the core of the mutated lifeform army changed its strategy. It was going to launch its final attack on Cloud Peak.

When such a situation appeared, humans didn't find it so simple anymore, as they had to fight the mutated lifeform army head-on.

After so many days of consumption, with the mutated lifeform army numbers dropping, there were still seven digits of beings, and they were still multiple times the number of human warriors.

Little Tiger and the others who led troops out had to attack the backs of the mutated lifeform army. They stopped using their nimble strategy. This fight, which was a battle of attrition, gave all of them a headache.

The only good news was that the few level eight lifeforms were dead, which made the mutated lifeform army harder to control. Many lifeforms left the battlefield.

Of course, this was not much compared to the overall number. But no matter what, it reduced the human's pressure.

But the tough battle continued.

"Who knows how long the villa would be able to last for."

Park Xiuying stood beside Little Tiger and was worried. When Ye Zhongming left, he told them to leave the battlefield. But once the mutated lifeform army attacked the city, they had to enter this kind of battle that they didn't like.

Everyone knew that Cloud Peak focused on elites, and they knew what sacrifices meant.

"Some parts of the walls are broken, and they won't be able to last for long. We can only try to help reduce their pressure!"

Little Tiger was covered in blood. Some were his. He charged at the front and was sneak attacked by a level six mutated snake. His left stomach had a huge wound, and he had to retreat to get healed by Park Xiuying.

Everyone knew that the outcome would be decided soon. The key was how long Cloud Peak could last. If they collapsed when the mutated lifeform was still a million strong, that meant disaster. They might have a chance if they could last a while longer and cause their numbers to drop.

Both sides were fighting to the death, and many lives died each second. Maybe a few hours later, the 1.5 million lifeforms fighting might reduce to a million.

“En?”

Little Tiger heard shouts that were different from the furious shouts when fighting. It was a shout of elation.

Little Tiger and Park Xiuying looked at each other and could see the joy in their eyes. They ran out and saw that Ye Zhongming and Xia Lei had led a team over.

They were delighted to see each other. When he saw the Death King Tree, Little Tiger's expression was even more spectacular.

“So much food, so much food--”

Death King Tree muttered. The people around it didn't know if it referred to the mutated lifeform army or the humans.

“Let's speak later; we must deal with these mutated lifeforms first.”

Ye Zhongming called back all the core members and Posthumous people and drew a simple map on the ground.

Ye Zhongming said to the people, “The three-nosed elephant is here.”

Many people knew that. After all, the aura of a level eight lifeform was obvious in battle. People who had sharp senses could sense it.

“Our core mission is to kill it.”

Everyone was solemn.

They weren't surprised that Ye Zhongming targeted the three-nosed elephant. After all, it was the mutated lifeform army's only brain. If it died, the mutated lifeform army would collapse.

But it wasn't easy to do so. The three-nosed elephant cared about its safety. Mutated lifeforms surrounded it. Moreover, their levels were high too!

It was the most central part of the mutated lifeform army. No matter where you attacked, you had to face many mutated lifeforms.

Cloud Peak might have killed many level eight lifeforms before, but it was because they were given the opportunity to do so. Even if they had the Death King Tree helping, if it faced so many enemies, it would have been ripped into pieces.

“I will solve the problem of getting in. We just need to work together. After killing the elephant, the mutated lifeform army might collapse. We need to follow the plan and not get messy.”

Ye Zhongming started to describe how they would follow him and what to do in the fight. What to do after. What to do if they didn't collapse...

Anyway, he described every situation, and it took half an hour.

Once everyone knew what they had to do, they returned to their teams and prepared for the final fight.

Little Tiger was a member of the group breaking in and stood together with Ye Zhongming and the Death King Tree. The backline commanding was down to Xia Lei.

"Are you ready?"

Ye Zhongming asked, and those in the squad nodded.

"Begin!"

Beside them, Xia Lei and Little Tiger's squad each held a survivor. After hearing Ye Zhongming's orders, they injected something into their bodies and retreated. The entire human force retreated. The mutated lifeform army chased, and those survivors who woke up after the injection engaged with the mutated lifeform army.

The mutation began. Their eyes flushed red, and their bodies swelled. Sharp fingernails appeared on their hands and legs, and even their teeth became sharp.

After swelling, their bodies didn't seem too bloated, but they were very muscular. Their skin were black and covered in a layer of horn-like matter.

The survivors became violent, giving out weird roars at the mutated lifeforms before charging in.

Little Tiger looked at those people turn into black-skinned monsters, and his body shook. He gulped and asked, "Boss, what is that?"

Ye Zhongming squinted his eyes and focused.

"Barr's Potion!"

Chapter 932: Following

Thousands of survivors who were injected with Barr's Potion charged into the mutated lifeform army camp, and that caused a bloodstorm.

These survivors who had turned into monsters were powerful. Most of them were only two to three stars, but after the transformation, they were no weaker than four or five stars. Some four-star evolved had six-star strength when they used the potion.

But this strength had weaknesses. No skills, weapons, jobs, bloodline...

They only had their bodies.

An extremely strong body!

No wonder Xia Lei mentioned that even she found it hard to deal with. When Ye Zhongming witnessed their strength, he had to admit that the strongest one was as strong as him in terms of body qualities.

One must know that although Ye Zhongming was a seven-star evolved, but his body was no weaker than an eight-star. His many skills and equipment helped to improve his body.

That strongest person was actually comparable to him. One could see how strong his body would be.

But... Ye Zhongming sighed. Unfortunately, this wasn't their own strength but forced by the potion. The lifeforms of their future were condensed into a few minutes of explosive strength.

Their lives were destined to disappear after a moment of brilliance.

Ye Zhongming was terrified of Barr's potion, even if it was something Cloud Peak invented.

Right, it was invented by Liu Zhenghong.

Ye Zhongming didn't know if she had invented this potion in her previous life, but its appearance this time was a surprise.

It was a product of a failed experiment, and they had planned to toss it away. However, a researcher analyzed it, and the outcome shocked the calm Liu Zhenghong.

She noticed that this item did not solve the problem of the cells dying and replacing too quickly, but it would also speed up this weakness. Moreover, all the energy in the cells would explode in a short time and even cause a microwave-like effect. Finally, it would cause an explosion.

Moreover, surprisingly, this potion was very stable...

After they secretly tested in on some of their enemies, Liu Zhenghong decided to place this matter and the potions as a top secret. Only Liu Zhenghong, the member who discovered the potion, and Xia Lei knew about it. Even Ye Zhongming only found out when Xia Lei told him about it.

The four of them understood what it would mean for humans once these potions flowed into the market.

It would be a catastrophe worse than the zombie virus.

The potions were used because Cloud Peak was on the edge of destruction. Otherwise, it would have been sealed.

It was called Barr's Potion because Liu Zhenghong felt that this potion was a devil...

A weaker Barr's Potion user was ripped apart by a few mutated lifeforms, but it was as if he felt nothing. His body was still moving. In the next second, the body exploded, blowing the mutated lifeforms up and leaving a deep hole in the ground.

The strength numbed all those who were watching.

Ye Zhongming sighed. After this battle, the secret of Barr's Potion couldn't be kept. This strong potion would be wanted by many, and there might be another storm.

"Follow up, pay attention to your speed, and don't get into the explosion range!"

Ye Zhongming led the assault squad to follow the people into the mutated lifeform army camp. At this point, there were many loud explosions. The potion time wasn't up, so the explosions happened because that person had been killed.

If it was just a few thousand evolved, even if they were all five-star, it wouldn't be simple for them to attack the mutated lifeform army. They might be able to last for some time before all of them get wiped.

If they were all five-star evolved, Ye Zhongming wouldn't have chosen to kill the level-eight elephant with such a method.

But it was different with the Barr's Potion. Even if they died, they would cause a strong explosion. Those few dozen explosions had blown up an empty region in the dense mutated lifeform army.

Moreover, these mutated people only knew how to kill and head forward. They relied on their strong bodies to rip their targets into shreds.

This team was like a blade that sliced into where the three-nosed elephant was.

Ye Zhongming led them, with the cover of other humans, to solve the remaining few mutated lifeforms while following them into the core area.

Explosions continued and became more dense. The closer they got to the center, the more resistance they faced. The higher-level mutated lifeforms started to attack to deal with these monsters. Even if they were killed, they would explode. Even if the high-level mutated lifeforms won easily, they were dragged to hell.

The dense mutated lifeforms also made it easy for these human monsters to kill them. If they exploded, they would kill a huge patch of enemies. When only half of the Barr's Potion squad was left, they could already see the three-nosed elephant.

Their speed gave all the humans confidence and also spread terror into the mutated lifeform army.

The humans actually used these monsters, killing mutated lifeforms at a one to nearly 100 ratios. They were even... getting close to the king!

The three-nosed elephant didn't expect the humans to have such a trump card. When it realized they were targeting it, it started to panic.

It started to give orders to move troops to clear the humans. Because of that, they slowed their attacks on the walls. Many troops retreated and turned to attack the humans on the back.

Mo Ye looked down, and when she saw the three-nosed elephant's actions, she knew that the deciding moment was here. She gave the order...

They opened the gate that was about to fall. The humans in the mountain launched their counterattack.

As the Barr's Potion users couldn't think anymore, some had turned in another direction. But there were still some charging toward the three-nosed elephant. Ye Zhongming stared. Suddenly, some who hadn't died exploded. He knew that it was time for the assault squad to attack.

He led some people to stab the fleeing three-nosed elephant like a blade.

Chapter 933: Real or fake

How could the three-nosed elephant forget about Ye Zhongming, who had killed two level-eight lifeforms?

They thought that as long as the level eight lifeforms didn't fight each other, there was no way they could die. Who knew that they would get killed outside this small town?

Such a killer was charging at it, which made the three-nosed elephant feel something it hadn't felt in a long time-- fear.

It continued to send subordinates to block the human while it ran in a direction. But troops surrounded it, and its movement speed wasn't too quick.

Maybe the level eight lifeform was more obvious. The remaining Barr's potion users stared at it and charged at it. Those high-level lifeforms could do nothing about these human monsters, who would explode even after dying. They wanted to kill them but didn't dare to do too much.

When it was around seven minutes into the operation, the last batch of Barr's Potion users exploded. They were very strong, and the explosions were strong, too. Even Ye Zhongming and the others who kept a distance were affected. They had to stop and block the energy waves from the explosion.

Very quickly, the remnants of the explosion disappeared. Ye Zhongming raised his head and was delighted.

The explosion blew up many high-level lifeforms, including two level-seven ones. They probably relied on their higher levels and were closer to these humans, which is why they were unlucky to die.

This charge messed up the three-nosed elephant's defense. However, many obvious breaches appeared. Ye Zhongming didn't let this chance slip, and he charged.

Although more mutated lifeforms surged to block this team, they were far away. Those lifeforms in the explosion range were either dead or injured, which meant that the humans had a clear path. Secondly, Ye Zhongming's team's level was high, and their movement speed was quick. They had both the distance and speed advantages.

In the blink of an eye, they were a few dozen meters away. This distance was within range of some skills.

The three-nosed elephant probably felt like it couldn't run anymore. It turned. Its body was slightly bigger than an ordinary elephant, and it was very agile when it turned. The white color and three jade-like noses made it look beautiful.

If not for this lifeform's orange crystal on its forehead, people might mistake it for harmless.

But it was still a mutated lifeform and was one with intelligence. Its combat strength couldn't be underestimated either.

One of its three noses raised up, giving a crisp sound. Ye Zhongming saw that a red light ring was scattered from its body and spreading like a ripple.

The beings around it roared!

The assault squad was shocked. They glanced, and their expressions changed.

The nearby mutated lifeforms were provoked, and their eyes turned red. Their bodies even grew slightly bigger.

Those closer to the center of the ripple grew stronger and stronger, and their demon crystals were covered in a layer of red mist.

“Beast Transformation?”

Although Ye Zhongming didn’t know what skill it used, he looked at the changes in those lifeforms and knew it was similar to beast transformation. It could strengthen them for a short amount of time.

Although such skills would have side effects, it wasn’t the time to consider all these. If they couldn’t kill the three-nosed elephant quickly, the assault squad would face huge pressure.

“Quick, quick, quick! Use the ranged skills to delay these fellows; cover me!”

Although the human warriors were attacking from all directions to help the assault squad, Ye Zhongming knew that those people wouldn’t be able to assist them if they were surrounded. They would get killed in a short amount of time!

The moment the three-nosed elephant attacked, it slightly turned the tides. Fortunately, Ye Zhongming was already close to it.

Sand Dance slashed, and he used Thousand Body Blade Slash, slicing the two monsters blocking him into two. That scattered blood over his face. The sniper rifle reappeared, and he fired many shots at the elephant.

Ye Zhongming didn’t plan to kill it with that. That fellow used that skill before retreating. Moreover, it used many mutated lifeforms to block for it.

Ye Zhongming was just clearing his path.

Gun on one hand and blade in the other. With the Earth Elf’s help, none of the mutated lifeforms could tank one hit. The distance between Ye Zhongming and the three-nosed elephant was reduced.

Ten meters!

The three-nosed elephant continued to attack. Another nose rose up, and it gave out another sound. This time, a black light spread, which caused Ye Zhongming to slow down as he feared getting hit.

But the surrounding mutated lifeforms weren’t affected, and they continued to battle.

No effect?

Ye Zhongming, who thought that way, realized things were wrong. He saw the mutated lifeforms that had been killed standing up after that black ripple.

Moreover, similar to the first skill, those closer to the center absorbed more of the energy. Those mutated lifeforms that revived were far stronger.

“Undead summoning?”

Ye Zhongming recalled a strong skill. The three-nosed elephant’s skill was similar to undead summoning.

If these revived mutated lifeforms could last a long time, then it was undead summoning. If they could only last for some time, they weren’t.

Black flames replaced the eyes of a mutated boar that should have been dead, and it charged at Ye Zhongming quickly. Ye Zhongming couldn't retreat and had to slash.

With Flame Sandstorm, this revived boar was slowed and was sliced into two by Ye Zhongming.

In normal situations, even undead lifeforms would have already died.

But the truth was, this undead boar wasn't dead. After splitting its body into two, it stood back up to tangle with Ye Zhongming. It only died after Ye Zhongming sliced it into dozens of pieces. This situation happened with all the undead lifeforms.

This caused Ye Zhongming's heart to sink.

Undead lifeforms weren't as strong as their alive counterparts and were slightly lower because they couldn't use any abilities. But the fact that they couldn't die was very problematic.

Right when Ye Zhongming was finding it problematic, numerous white smoke fired from the walls. The V2 Rocket Launchers fired. These few rockets hit the area in front of the three-nosed elephant. The explosion sent many mutated lifeforms flying. Although it wasn't enough to kill them, it opened a clean path for Ye Zhongming.

Ye Zhongming glanced and saw that Liang Chuyin and Xia Bai had woken up. Their injuries were heavy, so they couldn't join in, but they were helping him with such a method.

Ye Zhongming had to use this good opportunity and continue to move forward.

Five meters!

That distance was enough.

He raised his blade and activated Earth Tremble at the same time!

He couldn't let the elephant escape.

At the same time, it prevented mutated lifeforms from rushing over to obstruct him.

The elephant might be level eight, but it should be an intelligence type. Its attack and defense shouldn't be strong, so Ye Zhongming might be able to kill it quickly and earn Cloud Peak's victory.

When fighting, Ye Zhongming was used to observing his opponent's eyes, which showed emotions and helped him judge the situation.

But when he saw the three-nosed elephant's eyes, he didn't see any intense emotions. There was some fear, some surprise, but more of it was silence... As if it was dead!

Dead?

Ye Zhongming knew what was wrong.

Ye Zhongming didn't slice it and instead hit the giant beast that was pouncing at him.

That beast was level six and was in beast transformation state. But with Ye Zhongming's skill and Earth Tremble's control, it was still sliced into two.

Ye Zhongming wasn't happy as he saw two three-nosed elephants.

One was the one he wanted to attack; the other was ten meters away!

This?

Not only Ye Zhongming but also the other humans were confused and didn't know what was happening.

But Ye Zhongming charged at the second three-nosed elephant!

At the same time, Earth Elf used its remaining energy to create a black earth armor.

Many people didn't understand what Ye Zhongming wanted to do. Was he sure that the three-nosed elephant was the real body? Also, why did he create armor on his body? Even if that elephant was real, there weren't any enemies between them. Why did he use an armor?

The next second, the three-nosed elephant gave the answer.

The first elephant, which was the previous target, was hit by an assault team member.

Right, hit. This elephant was just in his skill range!

Then, it exploded.

Ye Zhongming was hit and was knocked aside. Only then did everyone know what he would make an armor.

But that explosion was too intense, and the entire human army held their breath.

Ye... Would he die?

Chapter 934: Space teleportation

There was momentary silence on the battlefield. Only the smoke from the explosion rose on the mountain.

Many people realized a problem.

The mutated lifeform army would collapse if Ye Zhongming killed the three-nosed elephant. But if he died, wouldn't that mean that the humans would fail?

His sneak attacking the mutated lifeform commander also meant that he was putting himself in danger.

Many Cloud Peak members were shivering. They couldn't imagine what life would be like without their leader.

The explosion from the three-nosed elephant was huge, but its range was small. Only some lifeforms around blew up.

The three-nosed elephant swung its three noses and smiled craftily. It wasn't so easy to kill.

But half a second later, its elephant eyes opened wide, and it retreated quickly.

A blade light slashed through the smoke.

Ye Zhongming appeared in midair and slashed Sand Dance at the three-nosed elephant. Although he didn't look good, his attacks were still sharp.

The humans cheered.

Ye Zongming bit his teeth. He wanted to kill this cute-looking elephant.

This fellow didn't look strong. The beast transformation, undead summoning, and the clone explosion caught people who didn't know it off guard. Who knew that a clone could explode? Was this retribution for using Barr's Potion?

Even if Ye Zhongming survived, he was terrified. That moment was his closest to death since his new life. There was an instance where he felt that nothingness that he experienced before dying.

But fortunately, he was strong in this life.

The specialized black dirt armor was the biggest protection. The defense that consumed the remaining energy was very high. Apart from that, Ye Zhongming's earth armor formed the second layer of protection.

But that wasn't enough. Ye Zhongming had to use Spirit Qilin Pendant's time charge to provide some extra protection.

Even then, Ye Zhongming's armor shattered, and his body was revealed. One could see several bone-deep wounds and blood covering half his body.

There was even a wound on his forehead. One could see his flesh from far away, and it looked terrifying.

Ye Zhongming chose to move forward instead of retreating.

He was planning for the worst.

At most, he would waste the second life and cause it to enter a five-hundred-day cooldown.

Fortunately, he blocked that attack and didn't use his second life.

The three-nosed elephant thought that it would definitely kill that lower-level human, and the truth shocked it. Its movement was chaotic as its explosion had killed its subordinates. It could only face Ye Zhongming's attacks alone.

Fortunately, it saw that the human wasn't in a good state. It just had to hold on for help. The middle nose rose up.

Ye Zhongming didn't dodge. Either he lived, or it died.

Thousand Seal Slash instantly appeared before the three-nosed elephant, giving out its third neigh of the day.

A giant light ring appeared beneath its feet, and light rose from it.

When the ten blade shadows and Sand Dance slashed down, the mutated lifeforms from a part of the battlefield disappeared and appeared within the range of the light ring.

Ye Zhongming's slash landed on those mutated lifeforms.

Blood scattered.

This was... Space teleportation?

The people who were paying attention to the battle were stunned. This level eight lifeform had so many moves. Apart from that clone explosion, the rest were support-type. Even that clone had to be hit by someone.

This space teleportation dragged lifeforms into this circle, which was why they were scattered around. There weren't many between it and Ye Zhongming.

This strike was Ye Zhongming's full-strength hit. Those mutated lifeforms didn't know what was happening before they were sliced into two. Although the blade was weakened, it still slashed forward.

A thin wound appeared between its eyes. It was 20 centimeters long and not too deep, but blood flowed. It flowed down the white skin, and it was very obvious.

The king was injured, which stunned the entire mutated life force army. Then, they went crazy.

Many humans felt unfortunate. If not for those mutated lifeforms appearing, that blade would have been enough to kill the elephant with low defense.

That blade's failure to kill it gave it a chance to make other moves. Its three noses stretched towards three mutated lifeforms around it and stabbed into their bodies. Those three lifeforms started to shrink, and their skin started to dry up. Although they didn't die, their energy disappeared, and even their demon crystal turned grey!

The elephant's body grew bigger, and its two tusks turned silver-like metal. Its snow-white skin also had some flower patterns.

What ability was that?

Ye Zhongming glanced warily, but his attacks didn't stop. He used both Sand Dance and the rifle to kill those mutated lifeforms. Their evolution levels weren't high enough to pose a threat to him.

Ye Zhongming was a human machine, killing all the lifeforms that it teleported over in a short time and facing off against it once again.

At this point, the closest mutated lifeform was a few dozen meters away, led by two level-seven beasts.

Over a dozen meters sounded far, but it was actually really close!

The Death King Tree that was hiding attacked. It had moved nearby underground, and when this elite squad charged, it dug its way up and attacked, giving Ye Zhongming a chance to kill.

But the three-nosed elephant spun and raised its nose, causing Ye Zhongming's Sand Dance and assault rifle to stop as if it were in glue.

A few hundred wind blades appeared above them, striking at Ye Zhongming. Dense centimeter-long sharp stone spikes also appeared on the ground between them.

Chapter 935: Final massacre

An attack skill?

When those abilities appeared, Ye Zhongming thought the three-nosed elephant was holding back and only attacked now. But he realized that things weren't right.

Those three mutated lifeforms that the three-nosed elephant sucked from had shown the three abilities previously.

But, those skills weren't as strong as now!

This elephant actually stole its subordinate's skills!

They just didn't know if that was a permanent or temporary skill steal.

Metal Freeze restricted the Sand dance, the sniper rifle, and all the metal on Ye Zhongming's body. Ye Zhongming kept them in his space and stuck Nature Staff into the ground. He activated Water Bottle Protection. After that, he ignored the stone spikes and charged at the three-nosed elephant.

The wind blades landed on Water Bottle Protection, making loud smacking sounds. The person behind the shield was face-to-face with the elephant.

The three-nosed elephant was terrified but still a level eight king. When it saw Ye Zhongming get close, it thrust its tusks.

There were stone spikes below, but Ye Zhongming didn't care. His Blood Stepping Boots were golden equipment; their defense was high enough to block these attacks. He dodged the tusk and punched the elephant's body.

The three-nosed elephant stumbled before swinging one of its noses towards Ye Zhongming's head. He lowered his body and gave an uppercut to its neck. He then spun around and got behind the elephant to use his kick skill. He kicked its two leg joints and also grabbed its tail to toss him to the side.

This wasn't a fair fight. Even if Ye Zhongming had lost the earth set stats, he had still used modified options for the first four levels. He was buffed with the Ocean King Crown, Battle Contribution Badge, Clear Body, etc. Facing the support-type three-nosed elephant, he was crushing it.

Even if Ye Zhongming was injured and many of his bones were broken, this level-eight white elephant couldn't stand a chance.

The mutated lifeform army surged over, and the humans tried their best to stop them. The entire battlefield clashed with Ye Zhongming and the three-nosed elephant at the center.

The assault squad was now beside Ye Zhongming. They worked with Ye Zhongming to deal with the surrounding mutated lifeforms. The Death King Tree was unstoppable. Although it showed signs of slacking because it didn't use World Nature, it could handle itself and showed everyone its strength.

Blood and limbs flew around the battlefield, and life was being lost.

Ye Zhongming used both his fists and legs and landed them on the three-nosed elephant's body. Although it didn't have many attack or defense skills, but its body was still level eight. As Ye Zhongming punched it, it was still holding on. It wanted to use its tusk to fight back but to no avail.

Seeing that the assault squad was a few meters from him, Ye Zhongming made a choice. He took the chance when the three-nosed elephant fought back to get behind it. He hugged its lower half and roared, raising it up.

The three-nosed elephant cried out in terror while it was smashed into the ground.

The entire ground trembled.

If the three-nosed elephant were dead, with its size, it would weigh around 6-7 tonnes. Even if mutated lifeforms had a higher bone density, it would be 10 tonnes at most. Many high-level evolved or those with strength-type jobs would be able to carry it.

But in such a state, it would take more than ordinary people to be able to carry such a heavy lifeform that was still struggling. Ye Zhongming used this way to flip the white elephant onto the ground.

He jumped onto it and waved his fists at it.

Ye Zhongming was in an agitated state. He had only one thought: smash its head so that the battle would end! Then, More Cloud Peak and Posthumous people would be able to survive.

But when Ye Zhongming realized something, he felt like everything was silent. He looked up and saw that they were stunned as they looked at him, be it humans or mutated lifeforms.

He looked at the three-nosed elephant and saw that the originally beautiful elephant was now covered in flesh and blood. Although it was still alive, it was on the verge of death.

Ye Zhongming knew why they were looking at him like that.

When a group was fighting and, one person stood out as the leader. But after fighting, that person was pressed down by an ordinary-looking person, and his head was about to be smashed. It would give one a visual and mental blow.

But Ye Zhongming knew that this situation couldn't last for long. It would only have an effect at the start. He stood up and dragged the elephant.

Such a scene caused the mutated lifeforms to be silent once again.

Ye Zhongming looked around and dragged it towards Cloud Peak.

At this point, the badly injured Red Hair appeared on the walls. She looked at the mutated lifeforms and gave a sharp roar.

A mental energy storm swept from the walls and covered the entire battlefield. Red Hair fell back to the ground.

The entire mutated lifeform army was in chaos.

The Death King Tree also showed itself and made the loudest voice.

Ye Zhongming heaved a sigh of relief. Fortunately, Red Hair woke up when he most needed her. If not, even if he killed the three-nosed elephant, the assault squad wouldn't be able to get out.

The human's time to clear up the battlefield was here.

It was a massacre.

Chapter 936: Put up where

When Ye Zhongming opened his eyes, he found two soft bodies lying on him. From the scent, he knew that they were Miya and Liang Chuyin.

A gaze landed on his face, which he was also familiar with. It belonged to Xia Bai.

The morning sun shot in from outside.

Ye Zhongming felt much better. He was fine after Park Xiuying's healing and a night of rest. It was just that those broken bones were a problem, and he needed a couple more days.

Seeing him wake up, Xia Bai, who didn't wear a mask, got up to get a water bottle.

Ye Zhongming relaxed his body and used his waist to bounce up from the bed. He didn't awaken the two women who were asleep beside him.

He hugged this unlucky woman and touched her body. Her injuries should be acceptable as they were lighter than his.

Her face was red as she opened the bottle for him to drink. She pointed outside, and the two of them left.

"You are awake! Are you better?"

Xia Lei, Liu Zhenghong, Le Dayuan, and Shengyuan were all there. Xia Lei gave him the seat and stood behind him, helping to massage his shoulders.

If outsiders saw that, their mouths would open wide. Xia Lei actually had such a submissive side. These things would often happen in core member meetings with a few people.

"I am great."

Ye Zhongming said three words, and those in the room knew what he meant. Thus, Xia Lei was the first to speak.

"The battle is still continuing, but it is shifting towards Ying City. Basically, we are chasing them, and they are fleeing. But you also know that those fellows aren't like human soldiers who would fully collapse. Those who flee might flee, but if there is a chance, they will turn around and fight back."

That gave the humans a headache.

If it were a fight between humans, once the commander was killed, once the team collapsed, it would be full-scale destruction. The winning side would only need to pay a small price to gain a huge victory.

But mutated lifeforms were different. You would have to spend a huge effort to kill them. If you weren't careful, they would fight back.

Yesterday, humans gained their biggest gain after Red Hair used Mental Energy Storm. Many mutated lifeforms were affected and went blank, so humans took the chance to kill them. In that moment alone, hundreds of thousands of mutated lifeforms were killed.

But the situation after was chaotic. The mutated lifeforms retreated. The humans chased them in all directions.

"Many survivors are joining in. Although they don't have any good intentions, they are all here to take advantage. They are helping to block the mutated lifeforms. This also gave us time to organize more effective attacks."

Xia Lei looked at Ye Zhongming's wounds and saw that only a long scar remained. The wound under her eyes that Green Flower caused also started to heal after it was washed with Saint Water, but it wasn't as quick as Ye Zhongming's.

"There will be conflicts."

Ye Zhongming squinted his eyes and said.

"Of course." Xia Lei smiled but it wasn't a happy one, just one of disdain.

"I have told the Posthumous people warriors to snatch for them. Those who don't allow it will just be killed."

Ye Zhongming nodded and didn't say anything. He would never be merciful on such issues that concerned Cloud Peak's interests. Cloud Peak found the Posthumous people to work together. They were only able to crush the mutated lifeform army after nearly dying. Now you came to take advantage?

It was okay if it didn't affect Cloud Peak, but if you were fighting them for it, you could go and die.

To be honest, Cloud Peak wasn't afraid of anyone now that the Posthumous people were helping them.

"What about the Death King Tree?"

Ye Zhongming asked. This level eight fellow was not well-behaved, and he was afraid it would cause more trouble.

"It went out to hunt. If Yellow Ball were okay, it would also have gone."

Liu Zhenghong was the one who said that. This gene professor was really nice to Yellow Ball. She felt bad that it had turned into a statue. She told people to lift it into the lab and wanted to study it personally to see if she could recover it.

"I will solve Yellow Ball's matter. There is a solution, just that it is slightly tougher."

The eyes of everyone in the room lit up. Yellow Ball was really popular in Cloud Peak.

"What difficulties? Is there something we can't solve?" Le Dayuan asked. With his current status, he did have the right to say that. The father of crystal weapons was sometimes more useful in Cloud Peak compared to Ye Zhongming.

Ye Zhongming shook his head and didn't say anything. He had to solve Yellow Ball's matter, but not now. The solution was complicated and needed some time. After Cloud Peak's crisis, the Blue Secret Realm war was about to start. They risked their lives to help Cloud Peak, so now, it was time for them to help.

"What about Professor He?" Ye Zhongming asked.

Liu Zhenghong looked at Xia Lei. This woman took a tablet and tapped on it to play some secretive videos. One of which was when Professor He's assistants injected him with the potion.

"He treats this place as a stepping board."

Ye Zhongming pouted. He stared at the screen, and no one knew what he was thinking.

Professor He's arrival was an accident, it was a part of Xia Lei's Flame Tiger Operation. Now, it seemed like he was also making use of Cloud Peak. He had obtained many data and skills he wanted in a short time.

"We need to deal with him soon. I am uneasy with him here."

Liu Zhenghong initially wanted to come into contact with Professor He but after which, she found that he was very practical. But he didn't have the spirit of patience, proving and innovation that a researcher should have. He was just impractical and crazy.

Looking at the videos, he really was an ambitious person.

"We can't kill him first. He is useful, very useful." Ye Zhongming touched his chin and said.

A few of them looked at each other, and no one asked. Since Ye Zhongming said that, he would have a solution.

"You want to trade land with the Posthumous people? Where do you plan to put them up?"

Xia Lei was less trusting of them than Ye Zhongming. She thought back to the agreement and asked.

"34 degrees to 38 degrees north, 126 to 130 degrees east."

Ye Zhongming replied calmly.

Chapter 937: Preparing in advance

The battle continued for another five days before coming to an end. The humans chased the mutated lifeforms far away. If not for new zombie hordes or beast groups appearing, they might have continued chasing for two days.

Of course, their gains were enormous.

The Posthumous warriors followed the orders and brought back all the corpses. The bodies were piled up in front of the villa according to the level for Cloud Peak to handle.

They dug the crystals, dealt with the materials, and sliced the meat. Those bits they didn't want were burnt near the farmland, and their ashes were scattered into the dirt.

Ye Zhongming mentioned that the ashes were great fertilizers. By feeding the ground, they could plant various crops on a large scale.

During the few days of fighting, they clashed with other factions, and there were some small-scale battles. But most of the warriors were Posthumous warriors. They were more united after coming to Earth. When they were hit, they would call for help, and several tribes would work together to fight.

The Posthumous people suffered a few hundred losses over the past few days but wiped out more than ten factions.

Cloud Peak knew about this, but they didn't make a sound. The other factions understood that Ye Zhongming allowed it. Thus, they became more well-behaved. They would pick the small groups that Cloud Peak missed or left aside. Actually, that was already enough for them to earn huge riches.

They had gained too much this time, so they had to calculate their exact earnings, which would take some time. But Ye Zhongming had started to pay out the factions that helped.

This time, Cloud Peak was very generous. Apart from the agreed benefits, he would even give extra rewards. He would give those who needed potions and weapons to those who needed them.

Although the factions suffered huge losses in the battle, the compensation exceeded that by a lot. Some curious people estimated that each squad gained around three to four times more than Cloud Peak promised.

This increased their reputation to another level.

To be able to survive the attacks of two million mutated lifeform troops and turn the tides. Now, they were very generous and stuck to their promise.

Although many factions were independent in the apocalypse, as no one was willing to be managed by others, to a certain extent, a region would have a few stronger factions. The smaller factions would rely on these big factions. They would use each other, and of course, the smaller factions would lose out a little.

In the past, Cloud Peak's management region wasn't small, but they didn't accept other factions. Ying City was already enough to satisfy Cloud Peak as a resource base.

After all, Ye Zhongming often sent things back from outside.

But this time, using this payment chance, Ye Zhongming appeared and silently hinted at accepting people to rely on Cloud Peak. Many factions were tempted.

Such a faction that followed rules, kept promises, and was so strong. They were worth listening to.

Look at those from Ying City. Many of those factions had merged into Cloud Peak and were about to turn into official members. Their evolution potions, weapons, job skills, and scrolls were all free. When they went out to fight, even support potions were distributed. Rumors spread that there was also a golden-grade training device!

Everyone wanted to join such a faction. If they relied on Cloud Peak now, maybe they could officially join after a year or two!

After the news was released, many factions were tempted. After the official conditions were released, those people fully relaxed.

The conditions Cloud Peak provided were much better than those of other places!

You didn't need to pay tax unless you entered Puxing Town to do business. You won't be used as cannon fodder or free labor; everything would be paid. Although you were forced to fight when Cloud Peak needed help, you would be given a fair rate. Once you fought for Cloud Peak, you

could even purchase things like potions at Cloud Peak's official trading area in Puxing Town at a member's price.

How was this a subordinate? They were pretty much just working together.

What did the factions have to do? Provide wheels, evolution lifeforms, outside faction, etc. news, and they would be paid a fair price. Cloud Peak would be given priority to purchase things they wanted to sell, and they would be paid the market rate. It was okay, even if you didn't want to sell it to them.

Also, you had to provide rooms for Cloud Peak forces that passed their territory and would be paid for that.

If you didn't agree to those conditions, you were stupid.

Because of that, many factions stayed in Ying City. Those who were slightly further away noticed that Ying City didn't have space for them, so they set up shop directly outside of Ying City. This helped to increase Cloud Peak's territory.

Very quickly, Ying City and the surrounding region that had emptied because of the mutated lifeform army attack became busy once again. It was even more prosperous than before. After all, apart from the benefits, the threat of mutated lifeforms here had been reduced. One's life was much safer. As for hunting, you just had to go slightly further. It was better than the chance of being killed when sleeping.

People with foresight were all impressed with Cloud Peak. They used a fair agreement to make the area around Cloud Peak prosperous. Ying City again became their barrier, and Puxing Town wouldn't become cold because of the attack. Cloud Peak also further increased their rate of getting money.

Many factions had their own territories in the apocalypse. But apart from those big factions, the smaller factions were just in small bases. After deciding to be under Cloud Peak, they moved near Ying City and started to fulfill their duties.

Cloud Peak also released two missions that paid decently.

One was to provide information about the position and rewards of nearby level five wheels. The second was the position of all lifeforms level six and above.

Such a mission was just a lackey's job. The moment the mission was released, the surrounding factions were shocked.

Was a level five wheel's position and rewards worth a grey piece of equipment? Three-star potion for level six wheel? White equipment for level seven? Three three-star potions for level-eight wheel? Four-star potion for level-nine wheel?

Weren't they just giving free money?

Two hours after the mission was released, someone went to get the rewards. They were people from Ying City previously. They understood the city and reported over a dozen wheels and a strong mutated lifeform's position.

After Cloud Peak sent people to confirm, they distributed the rewards. This person left with a crate of evolution potions and a dozen equipment.

This set a good example. Those who wanted to wait and see immediately went to find wheels. One wheel could only give one reward, and someone else would run off if you were late.

All of a sudden, Cloud Peak was extremely busy.

Liu Zhenghong exited the lab to get some fresh air and went to ask Ye Zhongming about it. Cloud Peak's members would be able to do this if they had time, so why waste the resources?

Ye Zhongming was solemn. He said that one reason was to get the hearts of those people. Another was that, not far in the future, Cloud Peak might have to face the challenge of a level nine expert. They had to prepare in advance.

Chapter 938: Bold people are rich

The outcome of the battle came out three days later.

Ye Zhongming looked at the three full sheets of paper with mixed emotions.

What he was worried about was the losses.

The Posthumous people sent 300 thousand, not including those that were slightly injured and those who could recover; 30 thousand of them were handicapped, with 15 thousand dead.

This meant that nearly 50 thousand of the Posthumous people had lost their ability to fight.

Posthumous people were loyal and courageous and were the best warriors. Sometimes, even Cloud Peak's warriors were respectful of them.

But they had a weakness: They were single-minded when fighting. Their equipment was backward, and they didn't have abilities like those evolved on Earth.

This was the reason why they had such huge losses. The other reason was because there were too many of them.

The second highest losses were the Ying City warriors. There were over ten thousand handicapped and 30 thousand dead—around 45 thousand losses.

Those losses mainly occurred when they were helping Cloud Peak defend. At the start, around 70-80% of those who helped Cloud Peak defend were dead.

Next was Cloud Peak...

He looked at the numbers, and his body hurt.

Seven thousand one hundred twenty died, 650 handicapped, 1161 missing.

The reason why they were listed as missing was because no one had seen those corpses. In truth, they were basically dead. Posthumous people and Ying City's numbers treated those missing as dead.

As for why the number of handicapped was so low, it was because those warriors had a huge sense of belonging. Even if they lost parts of their bodies, they chose to fight to the death. Those who

survived were knocked out and dragged back. Few of them chose to leave the battlefield by themselves.

Although not all the dead were warriors, there were some technical members, logistics, and family, but Cloud Peak didn't have a high population, so this was a heavy blow.

Over half of the other squads were lost besides Xia Lei and Xia Bai's teams. The few that defended in Cloud Peak were basically mostly damaged.

These people were all nurtured by Ye Zhongming, and they were loyal and strong.

Although they had absorbed Guang Yao and some Ying City squads, the Cloud Peak tribe alliance people were all loyal, they still needed some time to blend into Cloud Peak.

Fortunately, the new members had been through this fight and fought alongside the old members. At least their trust in one another would be higher.

Although the losses were huge, Ye Zhongming was sure that after Cloud Peak went through a period of consolidation, the experience from this battle would make those who survived stronger. They would form Cloud Peak's spine to influence those who joined after. As long as they were here, this type of fighting style and loyalty would continue, and Cloud Peak would continue to be strong.

Apart from the losses, the damage to resources and equipment also hurt his heart. After all, those things were obtained with money. Now that they were destroyed, replenishing them would be another huge sum.

He looked at the losses and suppressed his sadness. All that remained was what they gained. He took just one look and was delighted.

He was rich this time.

He was unsure how many mutated lifeforms joined this battle, but there were definitely more than 2 million. Cloud Peak wiped out around 1.2 million. They were unsure how many of the other factions were wiped out, but there were over 200 thousand. The remaining 600 thousand managed to flee.

There was nothing they could do about that. Zombies, mutated plants, animals, and beasts merged to attack them. This was the first time anyone had heard of such a thing to date.

The most obvious thing was the crystals and precious materials. There was also food that was filled with energy.

Turning them into jerky would be enough for Cloud Peak's members for two years.

"The level five and six mutated lifeform corpses have been shifted into the villa for you to handle personally. Levels seven and eight are in Sister Hong's lab, so you can decide how to split."

Xia Lei smiled.

Ye Zhongming nodded and continued to look at the report.

There weren't many level-one crystals, only 40 thousand. After all, the first evolution wave was over, and there weren't too many level-one lifeforms.

There were slightly more level two but only around 90 thousand. The most were level three and four crystals. There were 500 thousand of the former and 400 thousand of the latter. The numbers dropped for level five; there were 70 thousand. There were even fewer level six, only a few thousand.

The numbers ended here. Levels seven and eight crystals were still in the corpses in Liu Zhenghong's lab.

After calculating the number of crystals, it was the results of Flame Tiger Operation. Ye Zhongming took a look and was pleased with the results.

Control of two dungeons, large amounts of materials, which included plant materials that Cloud Peak lacked. There were also weapons, potions, equipment, etc. There were some scrolls, job skills, and bloodlines, which mostly came from the Glory Army and God Hall.

Of course, some things couldn't be listed on the paper. Like the nature gem mines in the dungeons, God Hall's technologies and equipment. The secret on Lu Lan's body, etc, which would show their value in the future.

They might be even more valuable than the crystals and materials they got from this battle.

Cloud Peak's two labs also performed very well. The gene lab's gene soldier skills became more mature, and their basic research had taken shape. The mass production of Barr's potion also proved their scalability.

It was the same on Le Dayuan's side. The research skill of the crystal weapons had soared, and all sorts of ideas appeared. There were over ten research topics. Although they hadn't created as many varieties as the last life, but Ye Zhongming felt the theories were mostly there. They could probably reach the standards of his previous life within two years.

Anyways, Cloud Peak suffered considerable losses in the battle but also gained a lot. These things will help them recover strength quickly.

Very quickly, outsiders would notice that they were stronger. They were living like stubborn cockroaches and were getting much stronger.

"Brother Zhongming!"

Zhongming's thinking was interrupted. He raised his head and saw Canndy running over in panic.

This alchemist was more mature than when she had just joined, but she still looked innocent.

"What happened? The mutated lifeform army is attacking again?" Xia Lei teased her. This fellow was already in the same bed as Little Tiger but was still so easily frightened. If anything happened, Xia Lei would be the first to know as the overall commander.

"That, that, Brother Zhongming, take a look, something happened to the little white elephant!"

Chapter 939: Unexpected

The little white elephant that Candy mentioned was the three-nosed elephant.

This fellow was struggling to survive after being beaten by Ye Zhongming. Many people thought that it couldn't last for long.

Ye Zhongming had indeed beaten it up badly. Its entire face was bloodied and deformed. Numerous parts of it had caved in, and there was white brain juice in some of the wounds.

This fellow was only alive because it was level eight. If it was something else, even a level seven lifeform would have died.

Liu Zhenghong naturally wouldn't let go of this lifeform. She wanted to move it into her lab, but she thought back to the uncertain element Professor He. She then tossed it into a warehouse in the villa. Recently, she would come over to take some blood and slice some skin. There was even once that she took some brain juice from the crack in its head.

Liu Zhenghong even mentioned that she would get Ye Zhongming to turn the two shining tusks into two ivory swords.

Only two people in Cloud Peak would dare to fight with her for things she wanted. They were Ye Zhongming and Le Dayuan. The latter lost that right ever since he got into the same bed as her. So only the boss could change her mind.

But would he go against her for this? Of course not. He would even agree. Thus, the core members that were interested in it could only sigh. The leather jackets, ivory swords, ivory spears, elephant meat, etc., were not in their control.

Although they couldn't get any benefits, there were still people interested in the three-nosed elephant—especially some women like Candy.

This girl wasn't old, and she wasn't on the battlefield because of her job. Cloud Peak protected her and one couldn't see her in fights. Now that the battle ended, she told Little Tiger to let her experience the atmosphere of the battlefield in case she really turned into a strawberry.

She strolled to the three-nosed elephant's side. She was very interested in this level eight lifeform that commanded the mutated lifeform army. She had heard a lot about the boss's fight with this lifeform.

When she saw it, she loved it instantly... Although its head was deformed.

She heard that this fellow's brain juice was sucked away, and it might die at any moment. She had an idea and went to call Park Xiuying to heal it to see if she could help it recover. She wanted to take a photo. Park Xiuying knew that this wasn't up to her, so she asked Liu Zhenghong, who was on the way there, to get some blood.

Liu Zhenghong checked the elephant and knew that this fellow couldn't be saved. The reason why it was still alive was because it was a level eight lifeform. So, she agreed.

At most, they would just knock its head open.

In the next two days, Park Xiuying came to help the elephant with two Gentle Chains.

It was normal at the start. Although the three-nosed elephant looked like it was about to die, after wiping the blood off its head and healing it, the outer injuries had recovered.

Today, Candy, Little Tiger, and Park Xiuying went there to heal it again. Little Tiger helped it up so that Candy could take photos.

Who knew that before they arrived, Little Tiger was sharp and saw a white figure flash outside the warehouse? He knew that something was wrong and chased.

When Candy and Park Xiuying rushed over, they saw Little Tiger and the three-nosed elephant fighting. Candy screamed and went to find Ye Zhongming.

When she rushed over with Ye Zhongming, Xia Lei, and the others, there was a group here. But there were no signs of other fights. They separated the crowd, and a few of them were stunned.

They saw Little Tiger in shock at the side. Opposite him was Park Xiuying, smiling and touching the three-nosed elephant's head. It enjoyed it so much that it would use its nose to rub onto her.

Those scenes made Ye Zhongming want to kill it.

Park Xiuying was heavily protected by Cloud Peak and was only ranked below Liu Zhenghong and Le Dayuan. What if something happened when she was so close to the elephant?

But why didn't this fellow have any violent aura like before? It didn't have any killing intent, either.

Although it didn't do anything, Ye Zhongming still rushed beside Park Xiuying and maintained a distance when he could attack and save her.

The three-nosed elephant was terrified when it saw him. It shrunk its neck and hid behind Park Xiuying, wanting to escape from this person.

That cowardly figure that was over two meters didn't look like a level-eight lifeform at all. It was like a weak cat.

Liu Zhenghong and the others rushed over after hearing the news. She was shocked when she saw it stand up. This fellow looked like it would die a day ago, so why was it alive today? Although there were still wounds on its head and marks of some parts caving in, it was alive.

The only thing was that it didn't look fierce anymore.

"It, why would it..."

Liu Zhenghong pointed at the three-nosed elephant and asked Park Xiuying.

Teacher Park blinked, "I don't know. It sniffed me when it saw me, and this happened."

Everyone looked at each other and didn't get an answer.

"Get it to my lab!" Liu Zhenghong ordered and it was brought to the lab. Ye Zhongming and Park Xiuying followed. The former was afraid that it was just acting cute and was defending against it. The latter was made to go because the three-nosed elephant wouldn't move otherwise.

After half a day of research, Liu Zhenghong and her assistants came to a more reliable guess.

Why was it a guess? Because Liu Zhenghong wasn't sure either.

She felt that the three-nosed elephant was badly injured and had some of its brain taken away, which affected its brain. When it woke up, its intelligence was affected and only reached the infant stage. So, it lost its ferocity and became very gentle.

They had things to come to that conclusion. The brain CT proved that it was missing some parts of its brain.

But why did its injuries heal so quickly? She guessed that this fellow had a self-healing skill, which it didn't use previously as it was too badly injured. After Park Xiuying saved it, it finally could use it.

It should be due to her healing abilities that it treated her so well. The elephant that wasn't intelligent anymore felt that she had saved it, so naturally, it would treat her well.

After learning all the information, Liu Zhenghong and Ye Zhongming looked at Park Xiuying, who rode the three-nosed elephant. This... Cloud Peak was going to have a level eighth battle beast!

Chapter 940: Cloud Peak reorganization

Although the three-nosed elephant's intelligence was affected, no one knew if its strength would be affected. Even then, it would be a huge win if they could get it as a battle beast. As long as its abilities were still there, they could control it and still be very useful.

This was different from the Death King Tree. They were working with it, and their cooperation was built on their interests. Whether the agreement was completed or not, it would mean that the agreement would end.

It would be good if they succeeded, but if they didn't, they might become enemies.

The three-nosed elephant was different. If it became their battle beast, it would increase their strength.

Park Xiuying controlled it to do some actions and gave it some orders. This fellow could accurately complete them and understand what she was saying. But its injuries weren't healed yet, so it couldn't use its skills.

But Ye Zhongming was still worried, even though it could listen to their orders.

Mutated lifeforms that reached level eight were all talented. Who knew if its injuries would heal as time went on? What if it attacked Park Xiuying then?

So, the best way would be to find a beast contact scroll and sign it. That would keep everyone at ease.

That came the problem. Ye Zhongming didn't have such a scroll.

Ye Zhongming would have a way if it were a beast egg. After all, he got Shattered Dream from the Ocean Giant and could hatch the battle beasts to make them recognize a master. But this wasn't useful for the level-eight three-nosed elephant.

The contract scroll had to be of the highest grade, which wouldn't be cheap.

Ye Zhongming thought about it and decided to wait. He wanted to see if there was news of such a scroll in the wheels. It would be good if there were, so he would go spin for it. If not, he could only put out another mission.

Of course, another channel was to ask Cannibal Cannibal Chain to purchase from them. But the price would be high. He wouldn't choose them unless he had no choice.

Before they got news of the advanced beast contract scroll, he could only let Xia Bai stick with Park Xiuying. There weren't mutated lifeforms around, so it wouldn't be Xia Bai's match even if the three-nosed elephant were at full strength.

After settling the elephant, Ye Zhongming went back to do things.

The Posthumous people returned to the Blue Secret Realm. They suffered heavy losses. Although they didn't talk about compensation, Cloud Peak had to show sincerity. Even if they would have losses when helping them defend the imperial city, they still had to do something. After the core members discussed it, they decided to hand them some potions and equipment. How to distribute them was down to the kings.

Young Master Yun returned during this period. Xia Lei sent him to the new district base to contact Jiamming and Da Ming to see if they could absorb them. If not, they could work together. But after Young Master Yun got there, he realized that there was nobody and mutated lifeforms occupied it.

Ye Zhongming found it a waste when he heard it. He hoped that his old friends were okay. He then told Young Master Yun, who was grumbling that he missed the fight, to take a rest.

Before Saint Light Hall attacked the imperial city, Cloud Peak took the chance to rebuild. They were more detailed this time. There were main battle squads, defending squads, and a few functional squads.

There were seven battle squads ranked from one to seven. The captains were Mo Ye, Little Tiger, Liang Chuyin, Guang Yao, Tong Yu, Young Master Yun, and Ah Yang.

Four defending squads numbered one to four. The captains were Xia Bai, Shengyuan, Tang Tian, and Sister Rong.

The few functional squads were the monitoring squad led by Xia Lei, the tribe squad led by Ah Tao, the support squad led by Park Xiuying, and the merchant squad led by Lu Yi. As well as the Cloud Port division led by Little Peng.

The battle squads were in charge of fighting things, including mutated lifeforms and humans. They would be Cloud Peak's sharp blade, and each squad had different numbers, but their strengths were similar. The weaker captains like Tong Hu, Yong Master Yun, and Ah Yang would have support. Tong Hu had Little Li; Yong Master Yun had his relatives and previous subordinates; Ah Yang had his seven brothers.

The defender squads were in charge of base defense. This was also an important mission. Xia Bai's squad was the most eye-catching. She was Ye Zhongming's personal guard squad and was only in charge of Ye Zhongming's safety.

Shengyuan was mainly in charge of protecting the two labs and the safety of Le Dayuan and Liu Zhenghong. One could say that he was as important as Xia Bai. After all, Ye Zhongming was very strong and could keep himself safe. Liu Zhenghong and Le Dayuan were different. Their evolution levels were high, but they weren't combat members.

One could tell how much Ye Zhongming trusted Shengyuan by giving him such an important role.

Tang Tian was in charge of the walls. Sister Rong was in charge of internal safety. Their roles were all very clear.

The functional squads were all newly formed squads.

The monitoring squad was built with Xia Lei's squad as the base to help her manage the villa members. After setting up some rules, they would monitor people to ensure they followed them. They had huge power.

Ah Tao's tribe squad was the former Cloud Peak Tribe Alliance and was composed of Posthumous people. They didn't have a clear role and were more of reserve squads. They would help guard Puxing Town, and during fights, they would be part of the battle squads.

Park Xiuying's support squad was built because Cloud Peak had more support jobs, which had to be managed as one. Their role was to provide potions, medicine, food, etc. Candy also became Teacher Park's deputy.

Lu Yi continued to manage the merchant team. Cloud Peak's caravans were mostly under this team.

Apart from that, there were two special teams. One was Chameleon. Their leadership was in Ye Zhongming's hands, and they were only liable to him. They focused on collecting news, intel analysis, spy work, etc, and were a mysterious organization. After the monitoring squad was built, they weren't in charge of internal matters anymore but would still monitor people in the two labs. The video about Professor He came from them.

The other was the zombie squad, which was split into two parts. One was managed by Red Hair, which included the brainchild. The other was made of the copper and silver zombies that Ye Zhongming had been secretly creating. The twins were in charge of them.

Xia Lei was still managing logistics, with Miya and Big Milk as her helpers.

At this point, Cloud Peak completed an important reorganization. Each team had their role, and the structure was basically complete. A super faction had slowly risen in the east.

When the compensation was done, Ye Zhongming knew it was time to expand.
