

## Arceus 1041

### [Chapter 1041: A team of souls, black-bellied monsters on Ghost Island](#)

"Can I really do this kind of thing?"

"Why not? You are another me. I still believe in myself. As long as your strength does not meet the admiral or the four emperors, you will basically be unable to do anything to you. Remember, if you can't beat it, run away. There is hope for life." ."

"Kaido" didn't hide his secrets, and he taught everything that should be taught, but the process was a bit tragic.

In this case, Yamato is not worried about the strength of "Yamato". As long as she doesn't try to kill herself, then there will be no major problems.

Logically speaking, with a goal, she would not do anything too stupid.

"If it really doesn't work, you can find a few trustworthy partners. The one with the broken leg and paralyzed face before can be regarded as a trustworthy partner, provided you get along well.

It depends on yourself, and I have nothing to teach you, but I do have a suggestion.

The composition of a team requires people with different personalities, such as a tiger who is strong in the mountains, and a wolf who is good at fighting, and the most suitable one for you at present is the scapegoat.

Some things are not easy to expose, remember to find someone to take the blame. "

In Beasts, the pot culture seems to have become a kind of inheritance, so that Yamato believes that the role of the pot man is an important role.

It is undeniable that Quinn still played a significant role in the development of Beasts.

"Scapegoat??"

"Yes, you are not wanted now. It is much more convenient to be not wanted. If you can maintain it, you should try to maintain it. If you can't do it, find someone to support you. The most important thing in this sea is a pushy fool. gone."

Having said that, Yamato suddenly felt dizzy. Having experienced it once, she understood what was about to happen, so she took off her hairpin and threw it to "Yamato".

"Let's keep it as a souvenir. When we meet again next time, I hope you can find the self of your dreams."

"I will, bye"

Yamato's figure disappeared in front of "Yamato" out of thin air, and only the items she left behind and the memories of the past half a month became the new treasures of "Yamato".

Onijima, Yamato opened his eyes again, the moonlight shone beside her, but what was under her was not the soil, but Shimagumo.

A blue cotton bird landed on top of her head, which also convinced her that she had returned.

"Well, how long have I been away, do you know little one?"

Holding up the green cotton bird, Yamato asked him when he left, but the green cotton bird's answer was very ignorant, as if he didn't understand what she meant.

"It has just hatched for a week, so it probably doesn't understand what you mean."

Pokémon grow extremely fast. Most Pokémon will spend a very short period of time in their infancy, and then start training and growing through their initial form. This green bird is an example.

Although it can fly and talk, its logical thinking ability is still a bit weak, and it doesn't understand what Yamato means by leaving at all.

"Robin? You're still here, how long have I been away?"

After releasing the blue cotton bird, Yamato also saw Robin holding a pile of research materials.

"More than half a month."

"That's right, let me tell you, I went to a very interesting place, where"

"There you saw another self and got into a fight with "Kaido"."

Yamato just wanted to tell about his travel experience, but Robin gave the answer first.

"That's right, my wish has come true. Wait a minute, how do you know this?"

Looking at Robin who was rushing to answer, Yamato suddenly had a bad feeling in his heart.

"After you left, Master Arceus turned on the live broadcast, and it was relayed here from the time you arrived there until you left the ghost island over there.

Don't worry, there aren't many people watching. Except for Lord Arceus, there are only me, Ulti and my brother, and Maria saw it.

Sister Misu seems to have seen it too.

Maybe someone else saw it where I didn't notice it, but I'm sure Lord Quinn didn't see it, he was dancing all the time. "

Yamato's brain began to automatically filter some unimportant topics, and in the end, only one sentence was retained by her.

Kaido saw it.

"That... did you hear what I said?"

"Well, if you mean "Bastard Kaido", then I heard it."

click

Robin rubbed her ears. She felt that she might have been overworked recently, and she heard the sound of stones weathering and breaking, and Yamato's expression became dull following her answer.

"Robin, see you later, no, see you in a long time, I'm going out, don't ask me where I'm going, I don't know."

She regretted a little at first, and forgot to leave some extra luggage for Yamato over there, but now she is very grateful for this decision, and after checking her supplies, she immediately decided to run away immediately.

"As for it? Don't you often call Mr. Kaido a \*\*\*\* in front of him?"

"It's different, and while he's definitely an asshole, there's usually a fight at that point.

Let him find out that I speak ill of him behind his back, this is a chance for him to do something.

I can already imagine what that crazy dad would do.

【Hey, my stupid daughter, let me teach you what is polite. 】

That guy is sure to yell something like that and grab me for a fight. "

After this short trip, Yamato's acting cells seemed to become active, and he imitated Kaido directly in front of Robin.

"Hahaha, it really looks like it."

"Anyway, I'm going to run, see you later."

After confirming that his supplies were sufficient for a period of time, Yamato had already spread his lightning wings, intending to find a suitable shelter, but was interrupted by Robin again.

"Wait, actually there is something I didn't tell you, Mr. Kaido has left Onijima now.

Master Arceus deliberately waited until Kaido-san left Onigashima before bringing you back. "

People on Ghost Island can be divided into two factions. The warlike pirates naturally worship Kaido, but scholars like O'Hara and orphans in the monastery worship Arceus even more.

Especially after seeing a world without Arceus, this belief and respect have also been improved together.

Hearing that Kaido was not here, Yamato immediately let go of his hanging heart.

"Wait, why didn't you say such a crucial thing earlier?!"

"Here, I want to see your panicked expression. I didn't notice it before, but when Lord Arceus rebroadcasted your picture, I found that your expression is quite interesting."

"Robin. You have learned badly too."

Chapter 1042 The price of passing marks

It's not so much that Robin has failed in learning, it's better to say that Robin has awakened. In a sense, her black belly is her essence, but she has been acting alone for a long time, with only Xiaoli by her side.

Even if she has a black belly, a thousand-faced avoidant doesn't feel much.

She spent a lot of time with Yamato when she was a child, and occasionally exposed her potential in this area, but Yamato, who is relatively single-celled, has never discovered this problem.

It wasn't until this moment that she realized that Robin was joking.

"Okay, no kidding, Lord Arceus said before, let you go to him when you come back.

Also, were you serious when you said you were going out with me? If it's just a joke, then I'll start tomorrow. "

"Well, of course I'm going. You wait for me for a while, and I'll see what's going on with foster father. If there is something wrong, then I'm sorry."

In a sense, she has already dove Robin once. According to Yamato's thinking, she should run away after the banquet, but she encountered a force majeure factor - a special summer camp from Arceus.

Robin is still here, looking for information on the one hand, and waiting for Yamato on the other.

"It's okay, if Master Arceus has arrangements, there is no way.

The steel armored crow's eggs are about to hatch, so you can do your work, and I'll check it out. "

As he spoke, Robin sorted out the files, which happened to be the summary of the existing Pokémon in Ghost Island.

The more you observe Pokémon, the more mysterious they are. At this time, on Xiaokong Island, many scholars have been fascinated by this mysterious creature. Taro's zealot scholar.

After moving his body, Yamato jumped directly from the edge of the sky island, which can be regarded as inheriting Kaido's strange hobby.

Unlike Kaido, she didn't punch a hole in the ground. Before landing, Yamato skillfully activated her ability to stabilize her figure, but it still caused quite a lot of waves in the inner sea.

pat pat pat

Because of Yamato, an unfortunate salmon was flopping on the shore, and Peggy Wan picked it up and threw it into his own fish barrel.

"I said Sister Dahe, are you going to make such a big commotion just after you came back?"

Wiping the water off his face, Peggy Wan took back his fishing rod. The bait on the hook had long since disappeared, and the shot just now failed again, but it didn't matter, after all, there were still fish in his bucket. It wasn't caught.

By the way, there is currently only one fish in his bucket.

"Did it bother you to go fishing at night?"

"No, I just got off the rod"

"Xiao Pei! Why are you here? I've been looking for you for five hours!"

“ ”

Peggy Wan's lie was broken, but fortunately, Yamato and Ulti were in front of him, and no one discovered the fact that he was in the air force for five hours.

"Yo, isn't this "Kozuki Oden", you're back too?"

"Don't mention that! Forget about that dark history! Don't force me to use physics to erase your memory!"

Compared with Robin's black belly, Urti's directness is more unbearable to her. God knows how much effort she has put in to make "Yamato" not mention those four words. Ants are crawling on him.

"It's a bit difficult~ Alins, by the way, I even made you a little present."

While speaking, Ulti took out a kimono version of Yamato doll. Although there was no text marked, it was filled with the words "Black History". The main reason was that the doll's eyes were too wise, which made Yamato not know what to say.

"Damn it, if you weren't in "Ghost Island" over there, I would definitely take you out to take pictures!"

"Hmph, I'm not afraid even if you find me, I definitely won't call myself Kozuki Oden.

But don't talk about that, if you come back two days late, Xiaopei and I will go out too. "

The celebration banquet is over, and the pirates will not have a holiday. The turmoil caused by Whitebeard's deathbed declaration has completely fermented at this time, and most of the sea area has become extremely chaotic. There are not many cadres left on Ghost Island. I also have to go out to perform tasks.

"Is this so? Forget it, let's not talk about it. My foster father is looking for me, so I'll go first."

Yamato put away the doll. Although it was a dark history, she was not angry. This kind of joke was still within the scope of her acceptance. If you look carefully, the doll is also quite cute. It is a record of this time from another angle. special experience.

After playing around for a while, Yamato still came to Arceus, feeling the wonderful time without Kaido.

"Thank you foster father, but luckily you sent daddy away, otherwise it would be troublesome."

"Don't be too happy, he will come back, just to give you some space temporarily, I don't care what happens after that."

Arceus could have brought Yamato back a long time ago, but he deliberately delayed it for a few days, allowing her to communicate more fully with another Yamato.

During this period of time, Kaido temporarily gave up Yamato because of boredom, and went out to have fun riding the eight-headed dragon. There were a lot of newcomers on the sea, just enough for him to tease each other. See if there are any talented newcomers.

"It's okay, it's always good to see him later, but father-in-law, what do you want from me?"

"Do you have any insights this time?"

"Well, that old man is really a bastard, if no one cares about him, he will only become more and more crazy.

And the governance of the country is much more troublesome than I thought. Also"

Yamato habitually complained about Kaido first, and then talked about his own insights. Although there is no special insight, he has made some progress, and he barely passed the level of Arceus.

"Father, is there anything else?"

"No more, be careful when you go out, you may encounter danger."

"Don't worry, adoptive father, if you can't beat me, I still know how to run. By the way, I heard that Ace over there seems to be stupid. He was saved, but he was fooled back by a word."

Yamato talked about what she had seen and heard on the road, but she didn't take Arceus' words to heart. She didn't know that this sentence was a hint from Arceus.

Regarding the hint that Kaido may block her halfway, the higher the score she gets from Arceus, the higher the reward she will get. If she gets more from this "trip", Arceus is going to tell him directly She, be careful Kaido.

It's just that she only got a passing grade, so she only got hints.

Judging from Yamato's own situation, she didn't understand what Arceus was implying without triggering a special attack on Kaido.

Chapter 1043 Unexpected insights, insects flying in the sun

"The Wano country without Pokémon is really far behind."

"It's not about the root cause. To put it bluntly, this world is huge, and it will continue to operate as usual without anyone. There are worlds with or without Pokémon, and there are also worlds with more Pokémon."

"Is there more than Wano Country?"

"Of course, there are more than a thousand types of Pokémon known to people in other worlds, and this is just the tip of the iceberg. There are more Pokémon waiting to be discovered in unknown places."

Sitting on the outer edge of the window, looking at the brightly lit Wano Country in the night, Yamato's thoughts were a little heavy.

The lights at night are an example. In the Wano country over there, at night, only sporadic fires can be seen in other areas. The most lively place is the flower street in the city of flowers. Only here will use lanterns to maintain a constant light. state.

The Wano country here is different. After several years of development, Wano country has realized "home appliances to the countryside". Ordinary citizens do not have Rotom appliances, but they still have ordinary appliances.

The number of Electric Shock Monsters has also increased from the initial two to the current seven, which is enough to meet the electricity demand of Wano Country. To be precise, the power generation of one Electric Shock Monster is enough to supply the entire Wano Country. Most of them are for vacations.

The electricity consumption of the entire island cannot be supplied by only one battery.

The process of laying the circuit may seem slow, but in fact it took a lot of effort. At the beginning of Wano Country, let alone electricians, when most people mentioned electricity, the first thing that came to mind was thunder and ninjutsu.

Even now, compared to science, people in Wano country regard it as a blessing from the gods, and even the payment of electricity bills is counted as part of the tribute.

The buildings in Wano Country have also undergone several renovations. Weili and Haoli have helped the construction team here a lot. With them, workers only need to devote their energy to the places that require skills. In terms of brute force, most people It can't be compared with the strange force family at all.

There are only a few dozen types of Pokémon in Wano Country, but these Pokémon alone have brought about great changes in the lives of the people, and almost everyone cannot live without these Pokémon.

More than a thousand kinds of Pokémon. Yamato is very curious about what kind of world that is.

"Haven't you already seen it once? Although the Dragon's Dimension is fictional, it also exists. If you have a chance, you will see more."

"I seem to be missing a lot of things."

Recalling the Pokémon that appeared in the fictional ancient Hezhong area, Yamato suddenly realized something. She had been thinking about how to pass the test, and she seemed to have overlooked some of the most basic things.

"It's not surprising, just pay attention next time, everything there is fake, and you can see the same thing again next time."

"I just didn't notice it because I kept thinking about how to pass the test!"

Yamato found a reason for herself, because from Arceus' tone, she seemed to feel a tone of [It's hopeless, so be it], which wasn't a good impression.

"Have you passed the examination?"

"Ahem, it's too difficult, father-in-law, the assessment you set is too strict, and Lacey Ram can't find a clue."

Said she didn't work hard, she was indeed striving for this goal, Bawangsedu was two points stronger because of this.

Said that she was trying hard, but didn't get much results. Zekrom said that Lacey Ram just stared at her with emotionless eyes most of the time, and then left with a sigh.

On rare occasions, I will talk to her a few words, which is the result of progress.

For a while, she didn't see Lacey Ram at all.

"This is your own question, even if I tell you the answer directly, Lacey Ram will not change his attitude.

There are many kinds of reality, don't be too limited in your own thinking.

Speaking of which, you get along pretty well with your other self, right? "

Reality and ideals are a test of opposites, and external help will have no effect. Only true recognition can fully exert the power of black and white twin dragons.

Using the experience bar as a metaphor, the black energy representing Zekrom has been slowly rising, and occasionally it will soar once.

But the white energy representing Lacey Ram is basically standing still, even if there is an increase, it has never broken through the most basic passing line.

If the trip to "Wono Country" goes well, then Yamato can gain something, so Arceus didn't worry about when she would pass the test, but asked some details again.

"Well, it's not bad, I just feel so pitiful for my other self."

"Confidence in her?"

"Yes, that's me too, I believe that sooner or later she will find her true self, and sooner or later she will be able to realize her ideal.

Even if you are not foster father, I will definitely not listen to the arrangement of that \*\*\*\* old man.

Speaking of adoptive father, truth and ideal should not be separated, right? "

"Let's just figure it out on your own. By the way, I would like to remind you, be careful with acquaintances when you go out."

Arceus found a problem, he didn't directly indicate the content of the test, and with her large and indirect flexible intelligence, she might not even realize what the answer she was supposed to hand in.  
*in.nOveluSb.cOm*

So in the second inquiry, I gave this insight.

When she said this, the deities of Zekrom and Lacey Ram also looked at each other, but then turned their heads away and never looked at each other again.

Ideal and reality are inseparable. This is not a way to increase a single energy bar, but it is an indispensable thing in the last step.

"Acquaintance??"

The reminder Yamato got was upgraded, but the reminder was too general, and Yamato didn't realize what Kaido, who was several floors ahead of her, was thinking, nor did he understand the meaning of Arceus' words.

"Really, foster father, why do you speak like Robin, so mysterious that people can't understand."

"You will understand sooner or later."

The time of chatting always passed quickly. Before he knew it, dawn came again. Yamato moved his body and planned to continue the next move, but before it left, a new voice came from his ear.

【The flowers on Jiuli are also delicious. 】

【Let's go to the laboratory, where the fruit blossom tastes better. 】

【For a change of taste, you will always get tired of eating one. The queen bee promised us to go there yesterday. 】

In the sky, several large butterflies and moths are flying forward, and they are still discussing which flower's nectar is more delicious.

"Father, has a new Pokémon been born?"

"Well, if you go out, take some of them and put them on a nearby island."

Chapter 1044 The evolution chain of thornails, chaotic generations

Over the years, Pokémon have been in a state of expansion, and the carp king is an example. They have become a ubiquitous "native species".

In addition to the four seas and the great sea route, even the inland rivers and lakes also have the carp king, but the more stable the waters, the lower the probability of evolving a Gyarados, and the weaker the overall strength.

Besides the Carp King, Heracross is the second Pokémon released on a large scale. After these years of changes, these Heracrosses also adapted to the environment and began to settle on various islands.

The vitality and adaptability of the insect type have been certified. In this case, the number of Pokémon will continue to increase.

The first choice is still the insects with stronger fecundity, and the speed of their seemingly weak integration into nature is not slow at all.

The large butterflies look very cute, black and gray constitute the main tone of their bodies, and they are different from the compound eyes of ordinary flying insects. Although their eyes are also compound eyes, their water-blue pupils are full of vitality. breath.

The wings on the back are full of yellow lines and lines of different colors. The wings of each butterfly are rare paintings.

Butterfly Pokémon-Hunting Butterfly is a Pokémon that looks cute, but actually has a combative heart that doesn't match its appearance.

The mouthparts curled up on the face are important tools for them to collect nectar and pollen, and they are also weapons for attacking enemies.

Although they have a more aggressive personality, as long as they don't disturb them when they are eating, hunting swallowtails are very easy to get along with Pokémon.

They also have their own greedy side. If it is a wild hunting swallowtail, they will definitely drive away all the three bees in the garden, and then monopolize the garden by themselves.

The previous hunting swallowtail said that he had discussed it with the three bees, just because this is Wano country and Arceus still lives here, so different populations will maintain a relative harmony.

As for Commander Chop and Slash and the great blacksmiths.

In fact, this state is already very harmonious. When these two races meet in the wild, they have to live and die in a tragic situation.

Looking at the flying butterflies, Yamato stretched out an arm, and the two hunting swallowtails also sensed her thoughts and landed directly on her arms.

"Are you a couple?"

"Oh hey~"

A hunting swallowtail with larger red dots on its wings is waving its short arms, which is a group characteristic of hunting swallowtails, and the red pattern on the wings of males is larger.

Before they could say anything, another purple Pokémon also flew over.

Compared to the hunting swallowtail butterfly, its appearance is not in line with conventional aesthetics. There are three black spots in the yellow compound eyes, and there are patterns of threatening natural enemies on the green wings on the back.

Poison Moth Pokémon-Poison Powder Moth, this kind of Pokémon is actually a nocturnal Pokémon. It's just that the monsoon has recently blown outside Wano, and they will appear during the day in order to complete the migration with the help of the wind.

Although the appearance is completely different, the initial form of the poisonous mealworm and the hunting swallowtail is exactly the same, both of which are thornails.

When the level is sufficient, the thornail will randomly evolve into a shield cocoon and a carapace cocoon.

The carapace cocoon will evolve into a hunting butterfly, and the shield cocoon will evolve into a poisonous powder moth. The evolution type is completely random, which is also a major mysterious factor in the evolution of Pokémon.

The poisonous powder moth itself is actually more easy-going than the hunting swallowtail, but they have poisonous properties, and the powder in their bodies contains pathogenic toxins. It is far more troublesome to provoke them than the hunting swallowtail.

After communicating with them briefly, Yamato waved them away, and she had to prepare some things before departure, such as studying the diary.

She still doesn't understand why Mita's diary has such a magical power.

Yamato itself does not have a hobby of writing diaries and navigation logs, but only records some interesting things.

But in Wano Country, there are really people who write diaries.

Juri, Yamato intends to find Setsuna, who is known as the originator of Beasts Diary, to discuss some diary issues. In the entire Beasts Pirates, she is the only one who is persistently writing diaries.

A full box and a drawer of journals are proof.

But here, Yamato saw an unexpected Pokémon.

"That is Regice? Why is it here?"

In Zeraola's home, she saw Regice dormant in a corner. At this time, its aura was restrained, and if it was not carefully perceived, it would only be regarded as a crystal stone.

It stands to reason that Regice has the power of extreme cold in his body, but now that chill has been gathered into the core of his body, even if he touches its appearance, it will not cause any adverse reactions.

"It said that the Lord has not given it any arrangements for the time being, so it will sleep for a few months first, and this place is more comfortable to sleep in.

I don't understand its thinking, it gives me a headache when Meowna and Worf quarrel, but it just likes this place. "

Zeraora didn't understand Regice's logic, and in the end he could only attribute it to Stone's willfulness. *noVELuS*.com

"Where's Miss Setsuna?"

The seniority within Hundred Beasts is very chaotic, and they basically belong to different groups, and no one is concerned about this issue. The titles of "big brother and big sister" abound.

Pirates look at strength rather than age. Although Jack is only 26 years old, many seniors in their 40s and 50s still have to respectfully call him Big Brother Jack, which sometimes means nothing.

Among them, Quinn is an exception. He is the only major cadre in Yamato who calls him uncle.

And this is just because he looks old-fashioned, so to be honest, Quinn has become a relatively senior person in Yamato.

"Zou goes to work, but today she is on vacation, and she should be back later."

Among the kings of Zowu, Mosa is the strongest, Arceus gave him the unique ability to communicate with the elephant owner, and he is also the first person to turn the throne into a job. He takes six days off every week, except Intruders, no one can delay her from get off work.

The person who delays her from get off work. Usually dies very rhythmically.

Not long after, Shu returned to his home on a thousand-year-old dragon.

"It's annoying, those people are really desperate, do you believe it? Someone dared to bomb the elephant owner with a cannon."

As soon as I came back, I immediately complained about the experience just now.

If Roger started the era of great pirates, then now is the era of turmoil. In addition to countless new pirates pouring into the sea, those heavy criminals who escaped from the city of advancement are also troublesome.

Blackbeard is dead, but many prisoners in LV6 are still at large. These guys still have some strength, and after staying in prison for too long, they seem to have forgotten what terror is.

"Then they are really courageous."

"Not only big, but also stupid. They seem to want to find out about Lindbergh, and then use him to make deals with the world government. They don't even think about whether they have the ability."

Chapter 1045 The Mystery of the Diary, The Clown and the Joker

In an instant, there were a lot of things to complain about, and he almost said everything about the previous week.

After Arceus and Kaido returned to Ghost Island, the elephant owner continued to wander around, and Setsuna returned to her daily check-in routine. She may be the only fur family whose working distance is determined by the elephant owner's mood and footsteps.

"A deal with the world government?"

Yamato felt that in the more than half a month since he left, some incredible changes seemed to have taken place in Dahai.

"You haven't read the newspaper recently, have you? It's still the questions about Shichibukai.

Whitebeard's words made the number of pirates increase a lot, so the world government wants to quickly complete Qibuhai.

Originally, a black beard died, and then a pirate named Bucky filled the vacancy, but then Moria of Shichibukai disappeared again, and was finally judged dead, so Shichibukai has another gap. "

This is the time when Yamato left, and new changes took place in Dahai.

Although Jinbei and the Empress are paddling at the top of the war, they are far from touching the bottom line of the world government. Whether it is Hydra Island or Fishman Island, in this environment, they can be regarded as meaningful allies for the navy and the world government. So the positions of the two have not changed.

"Molia, I remember my father didn't kill him, right? My father was quite disappointed at the time."

"Then I don't know. In short, the world government has defined death for him, and Qiwuhai's position has also been cancelled."

The real reason is very simple. Moria has become too decadent. In Wano Country, Kaido shattered his dream.

In the war on the top, Kaido used force to tell Moria that what he had done all these years was useless.

Moria felt that the future was hopeless, and eventually fell into decadence. If Absalom hadn't remained loyal, he might have degenerated into something.

"But what does this have to do with their attack on the elephant owner?"

The size of the elephant owner itself is a very terrifying existence. The elephant owner in the past could not attack others due to that order, but the current elephant owner is a giant monster that has lifted the restriction. If it hits it, the whole sea will be destroyed. Few can stand it.

"The point is not here, it's the fur tribe. The world government seems to have any ideas about the fur tribe. Moreover, Lindbergh himself is a member of the revolutionary army, which is why those guys are brought here."

Jinjincheng is a magical place. It can drive people crazy, and it can also make some people enlightened. The goal of those who attacked Zou was to obtain the identity of Shichibukai. This identity is very convenient in the sea.

One of the quickest ways to become Qiwuhai is to catch a wanted criminal of sufficient weight and prove that he has sufficient ability and deterrent power.

The world government itself has a bounty on the fur tribe, and Lindbergh is also a member of the Revolutionary Army. After these buffs are added together, they naturally attract the attention of these people.

"According to Yang Jisihan, Lindbergh and I belong to a generation of fur people, but his brain has always been very good, and he has made a lot of small inventions. He even made a simple aircraft and flew away from Zou.

By the time he heard the news again, he was already the commander of the Revolutionary Army, and he had already made a name for himself."

Zou does not limit the whereabouts of the clansmen. Pokmus, who joined the BIG MOM Pirates, and Lindbergh of the Revolutionary Army are examples.

Correspondingly, if you join other forces, you have to bear the troubles you cause yourself. This is the rule of Zowu now.

"So...they couldn't find the stronghold of the revolutionary army, so they wanted to attack the hometown of the army commander?"

"That's it, if it wasn't for the purpose of catching a living, the elephant master would have trampled them to death.

That Guy Quinn's monitoring equipment is pretty good, I've already considered preparing a set for Zou, by the way, what's the matter with you coming to see me? "

"It's not a big deal, I just want to study the metaphysics of the diary with you."

"Do you mean that after reading other people's diaries, you will crazily worship others?"

"Hmm, I don't quite understand, he is not the strongest one on board, how can he do such a thing in his diary?"

"It's very simple, the diary I wrote, the protagonist must be me.

Miaona and the two of them also admired me when they peeked at my diary, but when they grew up and saw the outside world, they naturally understood a lot of truths. "

When it comes to the diary, Setsuna herself is extremely experienced. After being a mother for so many years, she has also figured out her own principles of parenting. The situation Yamato described is obviously an example of educational failure.

"It wouldn't be the case if you have more knowledge. Look at Miao Na and Worf and you will understand what it means to be someone beyond others."

"Is it that simple?"

"Yeah, it's that simple, but it depends on the owner of the diary. If he writes a little more exaggeratedly, the impact should be even more serious.

It can't be that some capable person left a curse in the diary. "

"I don't think it's completely impossible. After all, she's quite bewildered."

After getting the answer he wanted, Yamato did not continue to disturb the life of the family, but returned to Xiaokong Island, and packed up the things needed for the trip with Robin, and during this time, the pattern of the sea was also changing. quietly changed.

"Dover, there is a new business coming. Since that war, the demand for both weapons and mercenaries has increased many times."

Torrebol is reporting the latest situation to Doflamingo. After Whitebeard started the era of chaos, the sales of weapons have doubled several times. Even the alliance countries have started to purchase weapons secretly to strengthen the strength of their own troops. armed.

The two major deposits of Hailou Stone Mine and Liquor Iron Mine make the weapons of Wano Kingdom unique, and there is no way for the outside world to reproduce them. As a subordinate dealer and black market intermediary, Doflamingo has recently made a fortune.

"The demand for artificial fruits is also rising. This era is really suitable for us, but."

"What's wrong?"

"Someone competed with us for business. Recently, an organization called Bucky Express popped up in the sea. Although it doesn't sell weapons, it has a huge mercenary group under its command.

The leader is the one who just became Shichibukai-Bucky. "

"Ah, joker and clown? That's really an interesting competition."

"So Dover, what are you going to do?"

Torrepol is waiting for Doflamingo's final decision, and Doflamingo is also struggling.

If it was an ordinary competitor, he would directly take away the opponent's head, but Bucky made him a little confused.

During the top battle, Bucky gave Doflamingo the impression that he was weak. It is a miracle that such a weak pirate did not die there.

In Doflamingo's view, Bucky became Qibuhai because of the escaped prisoners.[novelusb.com](http://novelusb.com)

But he happened to be a brother and brother with Shanks, and he was also a crew member of Roger. The combination of these names made Doflamingo hesitate.

It's short of an update, and I'll make it up tomorrow

Chapter 1046 Death star is shining

"Since this is the case, let that guy do whatever he wants."

"Do you leave him alone?"

"Torrebol, we don't have enough manpower, and compared to mercenaries, arms and artificial fruits are our main source of income. Since he is willing to grab this cake, let him grab it."

Whether it is the human trafficking field in the Chambord Islands or the war mercenaries, they all belong to the business that Doflamingo started in the early days.

At the stage when the Don Quixote family was still developing, he completed his capital accumulation in this way.

When he had the identity of the intermediary between Shichibukai and the underground world, some things were naturally abandoned by him.

Whether it is a human trafficking market or a mercenary business, these have become tasteless in his hands, tasteless to eat, and a pity to discard.

This is also the reason why Doflamingo abandoned the Chambord Islands business without thinking.

The Don Quixote family has only so many people, and the mercenary business that can be carried out is also limited. Compared with today's chaotic sea, the mercenary business is in a state of short supply, enough for more people to share this business.

"But this guy's asking price... is destroying the market."

Baki Express is a newly born organization. Although it is backed by the banner of Shichibukai, this organization is different from other forces.

Whether it's Shichibukai or Sea Emperor, they all defend their reputation with terrifying force, and Bucky's way of defending his reputation is purely relying on his reputation.

If it wasn't for the brainwashing of all the pirates under him, Bucky's own strength would not be able to dominate them.

In this case, Bucky has no way to conduct a fame war to attract business, so he can only use a price war first.

Doflamingo's business was stolen in this way. Originally, the Don Quixote family planned to hit the other side hard, so they raised the price of mercenaries.

As a result, Bucky took advantage of the loophole and used his outrageous name, Qiwuhai's identity and a more suitable price to complete the prying order.

"Torrebol, send someone to talk to him, this matter is still negotiable."

"Dover, do you mean let him unify the price?"

"Not only that, his subordinates are all prisoners who have escaped from prison, and they don't have any good things on them. If he wants to be a mercenary, he must buy weapons, and he has to buy them for a long time.

If the negotiation is successful, the benefits may be even higher. "

The mercenary business couldn't be done in the first place, not only Doflamingo, but Beasts, BIG MOM, and the remnants of Whitebeard are all accepting similar business.

In addition to them, there are also organizations like Germa, and there are countless unknown ones. If Bucky didn't just steal Doflamingo's business, he wouldn't care about such things at all.

If the negotiation is successful, the benefits of selling arms will be more direct and less troublesome, as only the delivery is enough.

A colleague is an enemy. In this sea, the means of resolving an enemy is generally by fist.

Bucky did not plan to be an enemy to Doflamingo because Roger's crew, red-haired brother, Qian Liangdao and a series of nicknames made Doflamingo confused, so he accepted him into the market of the underground world.

But there is a hard condition, they must abide by their unspoken rules, such as the pricing of mercenaries.

The price is not uniform. The mercenary prices of Hundred Beasts and Big Mom are undoubtedly the highest. They have such strength that they can even scare off many people with just the banner.

But Bucky provided a higher quality service at a lower price, which was destroying their mercenary market. If Bucky refused this conversation, then it might not be Doflamingo who came to him next.

"What if he disagrees?"

"Hey, that's interesting. The guy who breaks the rules will either re-establish the rules with his own ability, or be eliminated. I want to see how daring this is."

Crying to take off the head of Whitebeard, not giving the redhead any face, and privately broadcasting the war on top of the war when the live broadcast was cut off in the Warring States Period, these are all Bucky's feats, and Doflamingo also wants to know, why do you watch The weak Bucky dared to do this.

New World, Kale Bali, the new residence of Baki Pirates, and also the headquarters of Baki Express, a pirate dispatch company, Baki's body has been divided into several pieces due to over-excitement.

"What?? You stole the Don Quixote family's business??"

Doflamingo thought it was Bucky's decision that his business was robbed, but in fact, Bucky didn't know about it.

Bucky didn't receive the news until the group of pirates under him finished their first business and brought back the reward.

"Yeah, isn't that what you meant, Captain Bucky?"

"When did I give such an order?!"

"But that's what you said back then, [Baki Express was established today! Go work hard, little ones, and grab the business at all costs! Let this sea know how powerful I am, Mr. Bucky!].

In order to win this business, we have spent a lot of thought.

This operation is considered to be a good name for us, and we have recruited some stronger guys, so that we can find more business, I heard that Beasts and BIG MOM are also there."

"Shut up!! Do you know what you guys are talking about?!"*novElusB.com*

Hearing his younger brother's next plan, Bucky couldn't sit still anymore, his body was still in place, but his head and two hands had already flown over to grab his collar and began to scold him angrily. Under the saliva, his younger brother actually cried up.

"Captain Bucky, don't be moved, this is what I should do.

A big man like you is moved to tears because of such a trivial matter, I will follow you all my life! "

"?"

A question mark appeared on Bucky's face.

He was so emotional just now that he bit his own tongue, and his speech became a little slurred. Coupled with the general hearing problems of his subordinates, he made up some strange words.

As for the tears, he was not hurt, but frightened.

Bucky dared to yell at the redhead because he knew the redhead, but Kaido and Charlotte Lingling Bucky has seen the horror of Kaido in the war on the top. Many years ago, when the Roger Pirates stole the information of the historical text on Cake Island, he also saw the furious Charlotte Lingling. Those two monsters were not at all It's not something he can touch.

Now he doesn't even know how to deal with Doflamingo. If he provokes the two of them again, he can imagine himself being dismembered.

As an ability user of the shattered fruit, it is too easy for him to imitate this state, but it is not certain whether he can restore it when the time comes.

Bucky can't do without these little guys, he depends on them now to gain a foothold here, but their behavior always makes Bucky feel that his death star is shining.

Chapter 1047 Poked the nest of the little magneton

"He was scared."

"It must have been frightened." *NOVELUSB.COM*

"Yeah, after all, what level is Captain Bucky?"

"You guys are enough! Aren't you his old crew! Give him some confidence!"

In the corner of the room, the original members of the Bucky Pirates accurately estimated Bucky's psychology. These veterans knew everything about Bucky.

These people find it hard to understand why Bucky turned into Shichibukai after walking around the castle, and recruited such a group of loyal subordinates.

The only one who refuted them was Mr.3.

But even Mr. 3 only refuted it verbally, but he still agreed with these people's judgment in his heart.

And Bucky is also struggling with a problem, how to make the group of people under him stop that crazy behavior while saving his own face.

He didn't want to see the crusade army of beasts at his door the next morning, or the revenge army of BIG-MOM.

But he just couldn't say it directly. If his character design was destroyed, he might be directly expelled.

Fortunately, at this time, his luck played a role.

"Captain Bucky, the Don Quixote family is here and they want to talk to you"

"You stay here honestly, you all come with me, but you are not allowed to speak or move without my order!"

Ba basically wanted to talk to them alone, but he was afraid that they were here to ask questions, so he finally brought a group of younger brothers over.

Whether it is fighting or as a meat shield, these guys are very easy to use.

In order to make himself look more majestic, he specially made an oversized coat, and used the torn fruit to prop it up inside, making himself look like a little giant.

The negotiation between them was extremely smooth. When he heard that the people sent by Doflamigo were not looking for trouble, but wanted to cooperate, Bucky could hardly hide his inner joy.

During the subsequent negotiations, Bucky didn't even bargain, and directly accepted the price and agreement proposed by Doflamigo.

But after Bucky sent the group of people away, he found that countless eyes had been fixed on him.

【Oops. Could it be that these guys found me out.】

"As expected of you, Captain Bucky, you actually let that joker offer to cooperate. Even he has seen your great future."

"Yeah, I've been in the underground world before, and Doflamigo's status is very high."

".ha?"

Unknowingly, Bucky was lifted to a high place by this group of younger brothers, and entered a state of ecstasy.

The transaction went so smoothly, even Doflamigo felt a little strange, but he didn't go into it, but maintained this state for the time being.

The model they negotiated is that Doflamigo sells arms to Bucky, introduces some businesses for Bucky, and collects intermediary fees from them. Bucky can also find business by himself, but he cannot lower prices or pry orders at will.

Doflamigo originally left a lot of room for flexibility, but Bucky didn't bargain at all.

It is Doflamigo who makes money by doing this business, of course he doesn't care.

If the luck of the whole world is conserved, and one person's good luck is bound to be accompanied by other people's bad luck, then Bucky is probably plundering good luck indiscriminately, which is more incomprehensible than Baccarat's lucky fruit.

As Bucky's luck gradually turned against the sky, some people also began to have bad luck, such as Drake who was struggling with how to enter the Beasts.

He had expected the dangers of the new world, but the horror here still made his voyage dangerous. Before reaching the territory of the beasts, he was almost submerged in natural disasters.

The status of a supernova is equivalent to a "graduation certificate from a prestigious school" for pirates. With this status, it is not difficult to join other pirate groups, but Drake has not found an opportunity to send his resume so far.

Now he has worked so hard to reach the territory of the beasts, but he didn't see anyone, so he plans to implement his plan.

His plan is very simple, destroy this place, draw out the people who are in charge of guarding the island from Beasts, fight to prove their strength, and then join them logically.

"Just here, it shouldn't accidentally hurt too many people"

Looking at the building in front of him, Drake thought about the possible consequences in his heart.

The purpose of the destruction was to attract the enemy, but he didn't want to affect too many people, so he focused on a factory that seemed empty.

"Captain, it's so cold here, there shouldn't be people living here, let's leave, our bodies will freeze if we go on like this."

"Shut up, just wait."

Drake picked up the cross ax at his waist and smashed it at the building in front of him. With a loud bang, Drake smashed a big hole in the wall. At the same time, there were piercing sirens in the factory.

"Get ready, it should be coming."

Drake drew out his weapon and waited for the staff of Hundred Beasts to appear, but it was not human beings who appeared with the siren. A hole was suddenly opened in the roof of the factory, and then dozens of small magnetites flew out directly.

"Captain, what are these things?"

"Probably a security robot, be careful, something is wrong with these guys."

Drake didn't think about life at the first time. The appearance of the little magneto had nothing to do with life in the eyes of outsiders, but he just clenched the weapon in his hand.

Dozens of eyes focused on Drake and the others, and electric currents began to surround their bodies. The electric power of dozens of small magnetites gathered together, and a powerful thunderbolt blasted down.

"Boom!"

"careful!"

Drake turned into a huge Allosaurus and held the thunderbolt above him, but the others didn't have his strength. The thunderbolt exploded a big hole in the ground, and Drake's subordinates were blown to pieces. He fell, and then lost consciousness due to the strong current.

And Scotch also appeared in front of Drake.

"Newcomer, this is Master Kaido's territory. I was ordered to guard this place. Do you know what you are doing?"

"As long as Kaido's subordinates defeat you, they can draw him out, right?"

"hehe."

Scorch's mechanized body let out a mocking laugh, and then said disdainfully:

"If you have the ability, then of course you can do it, but your opponent today is not me, rookie, this guy is your opponent now, get rid of him."

Next, he saw an even more exciting scene. The supernova Hawkins, who was in the same batch as him, appeared in front of him.

"Why are you here?"

"Do you still need to ask, I have already joined them."

Hawkins' words pierced Drake's heart like a sharp sword.

I, a person who wholeheartedly joined the other party to carry out the undercover plan, has just started to implement the plan, but other pirates have already joined the gang. This incident seems to say that all his previous efforts were useless.

Chapter 1048 Nostalgic numberer, Quinn's preference

"What result do you hope to achieve, Lord Scorch?"

"It depends on your ability. Beasts don't need waste. If you are too weak, even if Lord Quinn values your ability, you should not go further. This is the advice of the seniors."

Quin finally lost Hawkins to Scorch, who was a rare Quin faction among the senior cadres due to his special body.

This is determined by his physical characteristics. He basically does not go to the hospital when he is injured, but will be sent to Quinn for overhaul.

So when Hawkins was still in the assessment period, Quinn handed him over to Scorch.

It's just that Scorch is very strange when he speaks. He always rushes the number 18 on his shoulders to other people intentionally or unintentionally, and his clothes are also very special. The hanging part of the shawl just covers the front 1, only revealing The following 8.

As the former No.8 and now No.18, he still misses those glorious single-digit days, but with the growth of the new generation, he has long been unable to compete with those rising new generations, and can only pass It's a way to remember your past.

Quin actually instructed Scorch to not be so strict, and Hawkins would be able to pass at about the same time. After all, what Quinn needs is a crisis forecaster, not some powerful cadre.

It's just that it's impossible for Scourge to tell Hawkins face to face.

Listening to Scotch's words, Hawkins didn't say anything, but just drew out his own tarot card and started divination. At the same time, the straw fruit had also been activated, and he began to look for parasites among Drake's subordinates to divert damage.

This is another purpose of his divination. He rarely uses his own people as substitutes. When the situation permits, his straw substitutes will be lodged in the bodies of the enemy's subordinates.

Skoki didn't urge him either, but was just communicating with the little magneton above. As an ability user in the same evolution chain, he has a higher degree of intimacy with the little magneton.

The place Drake attacked was a power plant, which was also the cafeteria for the little magnetons.

The little magnetites that feed on electricity live in this power plant. They are responsible for checking some circuits on weekdays, and they can also test the power generation quality of the power plant, so Drake's attack will draw them out.

"Don't worry, someone will deal with him. Go and scout if there are other enemies near the island."

Scorch dispelled the little magnetism in the sky, and his own fire control system has locked Drake. If Hawkins is really defeated, he doesn't know how Quinn will treat Hawkins, but he can handle Drake's mission That's his job.

"It's an ancient species. Maybe Master Kaido will be interested, but he broke the outer wall of the power plant. Let him dig mines first."

Looking at Drake who has entered the human-beast form, Scorch is also thinking about the future plan, no matter who wins or loses, it will not have much impact on him.

But for Drake and Hawkins, the moral of the fight is entirely different.

Drake needs to prove his strength, and Hawkins needs to pass the assessment, so they entered the state of going all out from the beginning.

"Your death star is blinking, and my winning rate is as high as 87.6%. You are very unlucky today, draw a card."

This is the in-depth development of Hawkins' ability-drawing cards. With the help of his fruit ability, he can use this random way of drawing cards to affect the psychological behavior, strength, and situation of both the enemy and us within the range.

Hawkins can use this to draw cards that far exceed his own limit ability, and relatively he has to bear high risk costs, such as accidentally drawing negative buffs.

"And I, luckily, am in the chariot."

Hawkins' battle is a face-gaming battle. Once he fails to draw a card, his combat power will plummet. Correspondingly, the enhancement brought to him by booster cards is also very intuitive.

An extremely mysterious force gushed out from the card, and Hawkins' body swelled several times under the influence of this force.

"The appearance of subduing demons."

Hawkins' body was wrapped in straw, and then under the influence of the upright chariot, he directly turned into a muscular scarecrow, which looked more hideous and terrifying than his normal self.

Ten huge spikes smashed towards Drake with Hawkins' swing.

Boom!

Although Drake in the Allosaurus state escaped Hawkins' attack, the sharp giant nails also smashed directly into the ground. This winter island is covered with snow all the year round, and the land has long been frozen by the severe cold. hard.

Under Hawkins' attack, the blown fragments and blades hit Drake.

"You guys are not good at melee combat at all, are you?! X Hunting Ground!"

Drake, who dodged Hawkins' violent blow, crossed his sword and ax and slashed towards Hawkins. Although the blow just now was heavy, it was completely slashed with brute force. In Drake's eyes, it was full of flaws. .

At this time, Hawkins was wide open, and Drake's attack almost cut him in two.

Yes, Drake was trying to kill him from the very beginning. In his opinion, pirates don't care about this kind of thing, and if this can kill each other, then he is the only solution.

He didn't know that if his plan was successful, Quinn might collapse directly and come to his door directly to fight him desperately within a few days.

But he didn't succeed either. A broken scarecrow crawled out of Hawkins' body. Correspondingly, the chest of one of Drake's stunned subordinates was directly turned into pieces.

"Your attack is useless to me, but how many times can your body catch my attack?"

Hawkins slapped Drake with both hands, but was dodged by Drake, and this caused the spikes on Hawkins' hands to pierce his own hand directly.

"You bastard."

Hawkins' ability is far more unsolvable than Drake's. In the previous battle, his fruit completely parasitized Drake.

So the injury on his hand was also transferred to Drake. At this time, several blood holes appeared in Drake's hands out of thin air, and the severe pain almost caused him to throw away the weapon in his hand.

For young people who are not proficient in domineering, Hawkins' fruit ability is even more incomprehensible. With the physique brought by Allosaurus, Drake is not Hawkins' opponent.

Seeing that his hands were injured, Drake simply turned into a huge Allosaurus and bit Hawkins, but this time Hawkins did not use his body to fight against the fangs, but returned to his normal form and threw a tool at Drake. hit a nail.

"Sea Tower Stone?!"noVelusB.com

The nail was very small, but after hitting the shoulder, Drake's body was stunned, and a sense of powerlessness spread from the shoulder to the whole body.

"The lord's preference, the high-purity Hailou stone nails, seems to be very effective. I forgot to mention, from the very beginning, my winning rate has reached 98%."

Chapter 1049 The rebirth of the fire-breathing dragon island, the wild Kaido appeared

While Drake was still taking a detour, Hawkins had entered Beasts in a special way, and gained Quinn's preference.

It's not how powerful he is, it's just that his fortune-telling ability is too suitable for Quinn, so he got some small things from Quinn.

Comparing physical skills, Hawkins is indeed not Drake's opponent, but with the ability of the straw fruit and what Quinn gave him, Hawkins is also an extremely difficult nail in the face of ability users who are not proficient in domineering.

From the moment Drake was attacked by Hawkins with a sea nail, his failure was already doomed. If he found a secluded place, he might still get the nail out, but in the battle, Hawkins He was not given a chance.

"Master Scorch, the invaders have been defeated, what do you plan to do next?"

"Good job, I will report the truth to Lord Quinn, and you don't have to worry about the next thing."

Drake's goal was half achieved. He successfully entered Wano Country, but he entered Wano Country as a prisoner.

This is the preferential treatment of Beasts for supernovas. If they are supernovas who cause trouble, then they will directly get the opportunity to mine in the Rabbit Bowl mining farm.

As for when they can come out, it depends on Kaido's mood.

When he remembered this and planned to recruit new recruits, the prisoners in the Rabbit Bowl mining field would have their own chance, but now Kaido is not in Onigashima at all, and when he will go back, no one knows except Kaido himself.

While the supernova in the new world was working hard for their own future, Yamato and Robin had already arrived at the fire-breathing dragon island and were doing their own research.

Accurately speaking, Robin is the only researcher, and Yamato is only acting as a translator here.

Humans and Pokémon's language intercommunication ability is not perfect, unless Pokémon get along day and night, it is difficult to understand the meaning of their words.

But Dahe is different, the power of Viridian allows her to communicate with any Pokémon, including the charizards on the island.

With the assistance of Yamato, Robin successfully came to the dragon's lair on the island, and saw many newborn Charmanders and unhatched dragon eggs.

Without the help of Yamato, it is absolutely impossible for Robin to enter this area. Before the cubs hatch, the female Charizards are extremely violent, and even the male Charizards may be violently beaten by them.

Even with Yamato leading the way, the charizards still stared at Robin vigilantly, and occasionally sparks could be seen from the corners of their mouths.

"Well, I just said that it is meaningful for you to wait for me for half a month, you can't come here by yourself."

"Indeed, but is it really okay for you to relax so much?"

"What's wrong, look, the egg over there is about to hatch."

The two didn't run around, but just watched quietly in the corner. The power of Viridian also had a limit, and it was the fire-breathing dragons who gave Yamato face for them to enter here. In this case, they naturally didn't will run around.

Besides the two of them, there is also a little lizard who is a little scared.

Logically speaking, its attribute is to restrain fire-breathing dragons, but there are too many fire-breathing dragons here. Water can extinguish fire, and fire can also burn water. If it really angers this group of fire-breathing dragons, its water may be directly evaporated.

If it is unlucky, if there is any water storage spray hidden in this group of fire-breathing dragons, then it will be even more unlucky.

Just in case, it is working hard to reduce its presence, and has even turned on the stealth mode.

An egg with fiery red patterns is wrapped in white light. Under the watchful eyes of several fire-breathing dragons, a newborn little charmander came to this world. The blazing tail flames showed that its body was very healthy and had never passed. How long did it take to start looking at this mysterious world.

"The evolution and birth of Pokémon are always so amazing, no matter how many times you watch it, you won't feel bored."

"After all, it is a life created by the adoptive father. Isn't this reasonable?"noVELuSb.CO

"That's right, well, don't disturb them, let's get out of here first."

The two left the cave and came to the top of the mountain. Looking at the fire-breathing dragon flying in the sky, Robin took out a long scroll, and started sketching after using his ability to summon several arms.

Compared to recording images with a camera, sketching can bring a completely different idea, and it can also help her exercise her ability.

More than a dozen arms draw different pictures at the same time, which is much more complicated than simple fighting.

"Are you going to the kingdom of giants?"

"Well, I plan to go over there to see. The lifespan of giants can reach 300 years, which is three times that of humans. They should have different researches on history, and they may be able to detect new news."

"That's it, I won't go with you. The red hair seems to have a good relationship with that side, but he is not a belligerent type. Recently, the sea is restless. Be careful."

"I have experience, so you don't have to worry about me, you should think about yourself more, Master Arceus will not tell you to be careful of acquaintances for no reason."

Robin has been practicing distraction, so he is chatting with Yamato while drawing.

Yamato really took that sentence to heart, but he had no clue.

Robin did have some guesses, but she didn't dare to say it clearly. Arceus didn't say it directly, which meant that he didn't want to tell Yamato directly.

"Is the adoptive father overly cautious? Does he think there are traitors among my acquaintances?"

"Perhaps Master Arceus meant something else."

"Another meaning."

Yamato seemed to have thought of something, and took out a life card from her bag in a little panic. Seeing the life card beating violently, a haze suddenly appeared in her heart.

"Damn it, I forgot about him! That \*\*\*\* dad is also an acquaintance! Robin, goodbye, I'll slip away first."

"wait"

That life card is exactly Kaido's life card, because Kaido often goes drunk and disappears outside, in order to determine his life and find his trace, all the high-level beasts have his life card.

The closer the target is, the more violent the vibration of the life card will be. The magnitude just now is enough to show that Kaido is near her.

Without even saying a word, Yamato had already disappeared in front of Robin.

"It's more troublesome for you to escape like this."

Robin reluctantly covered his face. If he stayed on Charizard Island, Kaido might still take care of the Charizard family on the island, and control himself so as not to affect their lives.

But Yamato chose to escape. It would be fine if he could get rid of Kaido, but if he couldn't get rid of it and was blocked by Kaido in an open place, it meant that Kaido could make a move without any scruples.

As Robin expected, Yamato left with his front foot, and Kaido blocked him with his back foot

#### [Chapter 1050: sneak attack](#)

"Father, what a coincidence, are you also coming out to gather folk songs?"

After leaving Charizard Island for a while, the high-speed flying Yamato and Kaido met as scheduled.

If it is Kaido's period, if possible, Yamato would like to have this father disappear for decades, and she will definitely hold a grand banquet for it.

In order to evade Kaido, she spared no effort to fly at high speed, but unfortunately she was still a little short.

"Hey, it's a coincidence. You have really grown up these years, and it took me a lot of effort to catch up with you."

In order to catch up with Yamato, Kaido temporarily gave up the eight-headed evil dragon. Although it is a good means of transportation, it is not fast enough. Facing Yamato who is added by thunder and lightning, its shortcomings appear.

Although the Eight-Headed Dragon is huge in size, it doesn't have much advantage in speed, and it can't compete with the two monsters Yamato and Kaido in terms of endurance.

Magic can fight against magic, and supernatural speed can catch up to supernatural speed. Except for the fruits that can move at high speed, such as the sparkling fruit and the thundering fruit, ordinary methods cannot catch up with people who move at supernatural speed.

Ordinary benefactors or bestowers are fine. Their supernatural speed cannot be used for a long time. At most, it is like shaving and carrying out surprise attacks in battle, but Yamato's own ability has broken through this limitation.

In order to successfully block Yamato, Kaido used super speed to pursue after leaving a simple message to the eight evil dragons.

"Really, um, I remembered that my foster father had something to ask me, and told me to hurry back to Ghost Island. I'm going first. Thunder gossip!"

Yamato laughed and wanted to slip away, but when she activated her ability again, she didn't run away, but came to Kaido in a dodge, and Ajan VII smashed Kaido's head.

Kaido can catch up with her once, and he can catch up with her a second time. Before that, he didn't get rid of Kaido so far, and now it's even harder for her to escape in front of Kaido.

At this time, she hated the person who invented the life card very much. The invention of this thing is simply a large-scale persecution of runaway girls.

The excuse to go back to Ghost Island is not easy to use. If Kaido can come to the door, it must be malicious. According to the practice, once Kaido has the idea of fighting, the battle will never disappear without a fight. .

Unable to hide anyway, Yamato simply chose to strike first.

According to gossip, a certain lieutenant general named Garp in the navy would go to Dashan to practice boxing whenever he encountered an opponent who felt difficult, and he would find trouble with the opponent after a few mountains were tied.

Kaido's temperament is unstable now, and fighting depends on his mood. If it can make him frustrated, maybe he will find a place to practice alone.

She remembered that Kaido was going to train with Arceus, as long as Kaido could indulge in the special training, she could rest for a while.

Although that would bring more trouble, Yamato has always had the mentality of muddling along in the face of Kaido. If there must be one suffering from the present and the future, then she chooses the future.

Sneak attack is also part of the tactics, according to her perception, the blow just now should be effective.

It's just that Yamato thought that this sneak attack could hit Kaido's head, but in the end Kaido took up a weapon to block it.

Father's kindness and daughter's filial piety is the normal state of the two. Whether it is Kaido or Yamato, they will not hold back their hands when fighting. It is also the normal state of Yamato when he is an adult.

Because the existence of the skill of keeping the bug seriously affects the practice, so a while ago, Yamato reached an agreement with Kaida to ban the skill of keeping the skill.[novelusb.com](http://novelusb.com)

Kaido is to have fun, and Yamato is to reduce the duration of the battle. If they all use defense, things that could have been completed in one or two days may become four or five days, and there may even be a weird defense-unable-defense situation.

"That's right, the combat thinking is getting more and more flexible."

Yamato's sneak attack did not make Kaido angry, but showed a satisfied smile. He likes recklessness because there are few enemies worthy of his sneak attack, but it would be stupid to be reckless when facing someone stronger than himself.

Sneak attack is a kind of progress in his opinion, and he also feels other powers.

"You have also become proficient in the ability to predict the future. Think about it carefully, it seems that I haven't checked your "homework" for a while."

Yamato herself is a little biased. Her attainment of armed color is higher than that of knowledge color, so the advanced cultivation of knowledge color is also slower, but the blow just now is different.

"How is it possible, I clearly saw it."

"Yes, you have seen it, but I have already seen that you have seen my future, so I made some changes, and you are still far behind.

Based on your current level, it is still not enough. "

The more knowledgeable side will form a kind of cover in prediction, and will not let the battle enter the mode of infinite matryoshka. Now Yamato's level cannot predict Kaido's precise actions, but it can also be seen roughly, but it is not Will be led by the nose.

"Wu Shi Bing Ya!"

"Hot breath!"

The two of them during the flight were originally in the form of humans and beasts. Seeing that Kaido blocked his own attack, Yamato exhaled his breath close to his face.

"Ice Meteor Thunder Fang!"

Yamato swung the stick forward with both hands, and the water vapor in the sky formed a giant iceberg under her control, smashing towards Kaido below.

She knew very well that this little trick could not deal with Kaido. When the iceberg was thrown, the power of lightning had already attached to Ah Jian, and she herself began to accumulate power.

boom!

The dropped iceberg was blown into several pieces, and Kaido had already broken the iceberg and rushed out from below.

"Hehehe, Lao Tzu's decision is indeed correct, and you are a worthy opponent like this! It seems that you have prepared new tricks.

I said at the beginning that this move is for you, you should experience it now, Mo Bo Xun·Dragon God Gossip! "

"Asshole Daddy! You never make the right decision! When I knock you down, you'll understand!"

In mid-air, the battle between the two intensified. If it weren't for Kaido not being able to go into the sea, both of them might be able to fight into the deep sea.

With the passage of time, the battle between the two has shifted from the original battlefield, an island gradually appeared in their field of vision, and the eight-headed dragon successfully caught up with Kaido after a long flight.

"Roar"

Watching Kaido and Yamato fighting, the Eight-Headed Dragon silently flew aside and waited.

Although it has a combative personality, it also knows that it is not qualified to intervene in this battle.

But while waiting boredly, it saw something more interesting. In mid-air, a group of pirates were running desperately.
