

## Arceus 1111

Chapter 1111 Extreme science makes people confused

Vegapunk is very short of money, and each of his researches consumes a huge amount of funds. The fundamental purpose of joining the world government is also to obtain research funds.

Vegapunk himself thinks so, and his avatar naturally has the same idea.

The sea area next to Egherd has always been a restricted area. Unapproved ships will sink directly to the bottom if they approach the sea area. Even the lottery ticket purchased by the previous person was bought on a merchant ship specially approved by the World Government.

One of Lilith's usual tasks is to patrol around Egherd. If she finds a sunken pirate ship, she will take away their treasures and deal with the pirates on board depending on the situation.

Even if the pirate ship that entered here didn't sink to the bottom, Lilith might just \*\*\*\* their treasure directly.

Sakyamuni looked down on Lilith's behavior without the dignity of a scientist, but faced with funding problems, he couldn't convince Lilith at all.

After all, they are all Vegapunk, and their purpose is the same, but the way of doing things is different.

After that person won the first prize, many people on Egherd also wanted to try it, so they bought some lottery tickets from the merchant ship that entered regularly.

However, the range of materials produced by Assier is limited. The last time the employee was close to the research center when delivering food to No. 06 York, that's why the chapter ticket he bought reacted.

These guys are average awards or short runs.

But Lilith is different. As the clone of Vegapunk, Aghard has no restricted area for Lilith, and she can go wherever she wants.

Based on the idea of trying her luck, Lilith also bought a stack of lottery tickets, but every one she scratched was golden.

"I bought ten. That's five billion Baileys. Even with tax deductions, it's still three billion. It's a lot of money."

"Lilith, don't be kidding me, do you still need to calculate this kind of probability problem? No business will let itself lose money.

The probability of the first prize cannot be so high, and it is impossible to put ten cards together in a row. After putting them together, it is unrealistic to be bought by one person even in a dream. "

"That's why I said, there is something wrong with this thing."

Scratching the lottery ticket with her finger, looking at the glowing part, Lilith handed it to No. 04 Pythagoras, representing another clone of wisdom.

"Pythagoras, put the machine in your hand aside and look at this first."

There was a clockwork on top of his head, and Pythagoras, who looked like a giant robot, didn't stop what he was doing, but his head turned 180 degrees directly, and two hands appeared at the ear position, and he took over Lily's hand. Si handed over something.

Then directly put it into an unknown machine, and after a while of inspection and analysis, Shakya on the other side had an extra inspection report in his hand.

"It's not a dye, it's a new type of material that reacts to a certain object, so this color appears."

"The lottery ticket issued by Baishou Fruit seems to be specifically for searching for a certain object, so it can only be this."

Lilith turned her head, not far behind her, a stone slab was being fixed on the test bench.

Not long after, Vegapunk's body also appeared here. Compared with many years ago, the huge head on top of his head has disappeared, replaced by an apple-like antenna.

"You should have received the memory."

"Got it, it's really a special discovery."

Although it is his own avatar, Vegapunk cannot grasp the thinking of the avatar in real time, so the dialogue with Sakyamuni is more like an old friend, and the so-called memory is also part of Vegapunk's ability.

Vegapunk is a brain man who ate the Superman Brain Fruit. The brain has an infinite capacity and a super memory. He will not forget it while accumulating knowledge without an upper limit.

Correspondingly, this ability also has side effects. The more data Vegapunk absorbs, the bigger his brain will be.

Vegapunk's innate genius mind and unlimited brain database make his brain the largest in the world. It is still growing.

Although the separation of the human brain has been achieved through special surgery, Vegapunk can still receive radio waves through the antenna above his head.

At this time, his brain is located inside the eggshell above Egghead Island, called "Punk Records".

The six clones of Vegapunk also share this brain, and their daily experiences and knowledge will be synchronized once through the "Punk Record".

Just now Sakyamuni has performed memory synchronization, and the analysis of him, Lilith and others has been uploaded to the main brain.

"Do you have any plans?"

"Are you planning to? No, since others want to take your things, let them take them away."

"You actually say that, don't you think about the bonus issue? This is the top ten prize in a row, enough for a big project." Lilith on the side is more concerned about the funding issue.

represents evil, her thinking tends to be chaotic, and she does things more freely.

"They will redeem the prize for one prize, but not necessarily for ten prizes. If you look carefully at the rules, they say that there is only one grand prize in each period, leaving too much room for manipulation.

Those who control public opinion will not be afraid of such things. "

"At that time, only one share will be exchanged, and 300 million is also money."

"Enough, Lilith, what about the dignity of a scientist? Give me some backbone."

"I don't want to listen to your nonsense, I'm going to patrol the surrounding sea area, you should study it slowly."

Lilith left here, Pythagoras continued to work, and only Sakyamuni remained standing in front of Vegapunk like an old friend.

"What the \*\*\*\* are you thinking?"

"The more knowledge I have, the more confused I am. The root of the birth of devil fruits, why the ocean hates devil fruits, why the soul has weight, too much knowledge cannot be explained by science.

The existing laws of nature can no longer prove some of my theories, but it is different. "

Vegapunk pointed to the stone slab behind him.

"This thing looks like a stone, but it is not any known substance. I can't even find any elements related to it. Sakyamuni, you should know that the essence of this stone slab is a collection of energy, does it belong to The unknown energy of this world.

Only a fool among fools would use it as a shield, and its owner, the one who created it, is the one I want to see. "

"Leave it alone? Then the world government will not be able to explain it."

Looking at the meaning of Vegapunk, it means that the stone slabs are packed and sent out directly.

"Let's test the defense capabilities of the facilities on the island. I just want to see how far these facilities can go. Now is not the time, and we still need to wait."

According to the analysis of past intelligence and current situation, Vegapunk had certain guesses about what was about to happen, but no one revealed it.

He and the world government are not of the same mind. He is just a money thief. The current situation is more suitable for him.

But as Sakyamuni said, it is not appropriate to do nothing, and a symbolic resistance is always necessary.

He is just an "unarmed" scientist. Facing the invasion of a powerful enemy, he has nothing to do. At that time, he really has to investigate the issue of improper defense by the World Government.

According to the original agreement, the world government could be responsible for protecting his life.

Wano Country didn't know what happened in Eggred, but no one cared. No matter what, no matter who it was, they couldn't stop Shaina's determination to bring back the slate for Arceus.

"Egghead?"

"Master Sacred Beast's order requires you to carry out this mission with us. You have been on vacation since you came to Wano Country. You shouldn't refuse this kind of mission, right?"

"Of course not, Egghead, I haven't been to that place for a long time, do you have an eternal pointer to go there?"

Kuzan still maintained a lazy look, even though Shaina was standing in front of him, he didn't intend to get up, but ate shaved ice with his camel.

Seeing that the shaved ice in the bowl had bottomed out, he waved his hand and made another ice cube. With the cooperation of the camel, the ice cube instantly turned into a bowl of crushed ice, and Kuzan also picked up the berry juice on the ground.

"Your juice here is really good, would you like a bowl?"

"Thank you, I'm not interested. I'll get the Eternal Pointer in two days, just get ready."

"You guys are really supernatural, you can even get the eternal pointer to go there."

Eggred is an experimental island that the world government values very much. The ordinary record pointer is attracted by the magnetic field and there is nothing to do, but the eternal pointer will not easily leak out.

"Hmph, don't you know how many moths there are in the world government? Those guys have nothing to dare to sell."

As the chief of CP9, Spandam can directly sell the video of the destroyed Judicial Island. It is not an exception to do this kind of thing. No one else, even Doflamingo, can rely on the underground world relationship to get what you want.

After conveying Arceus' order in place, Shaina flapped her wings and flew to Jiuli, preparing to notify Zerao to pull out the mission.

"Egghead, who is guarding that place now? Polusalino? Or the two newcomers?"

Looking at the departing Shaina, Kuzan also began to think about the possible situation

Debt settled.jpg

Chapter 1112 The Roaring Whale King transport team has set off

Eggheed's mission is a surprise mission and doesn't require a lot of manpower. Shaina, Zeraora, and Kuzan who just joined, this lineup is already luxurious enough.

The so-called preparations are similar to changing clothes. If it weren't for the lack of a permanent pointer to Aigherd, they could even set off immediately.

"Zeraora, we are ready to go, the Holy Beast has a new mission.

Eggheed has news of the slate, and the Holy Beast ordered us to deal with it.

It is estimated that the Eternal Pointer will be available within two days. You should also prepare for it. There is a possibility of departure at any time, so I won't bother you now. "

Looking at Zeraora who was serving as a training partner for the child, Shaina briefly explained Arceus' order.

"I see, don't worry, I can go anytime."

As he spoke, he blocked Wolf who wanted to sneak attack him, and made him collide with Bebo in mid-air. Practicing one is also practice, and practicing a few more is also practice. To increase the difficulty, Bepo, add Lott and even Pedro were added.

Even if it was 1v5, Zeraola still seemed to be able to handle it with ease, and he didn't even pause practice when communicating with Shaina.

After all, for him, as long as he is serious, there is no difference whether it is Pedro or Worf.

"That's good."

After the task was handed over, Shaina left here. It wasn't until Shaina left that Wolf got up from the ground clutching his stomach.

"Dad, are you so ruthless? Sure enough, sister Yamato is right, dad is a devil"

In view of Kaido, Yamato has misinterpreted the word "father", and she even understood the pirates of the Whitebeard Pirates from a unique perspective.

Those people have such a close relationship with Whitebeard, it must be because Whitebeard is not their biological father.

"If you don't play hard during training, you will suffer on the battlefield, but I have to correct you a mistake. There is still a fundamental difference between my training and Mr. Kaido's. That's it for today, you go to rest first.

Since you think my arrangement is a bit harsh, I will replace it with your mother later. "

Speaking of which, Zeraora planned to clean up, but at the next moment, his legs were suddenly hugged.

Meowna hugged his left leg, and Garrett grabbed his right foot.

"What are you two doing?"

"Dad, think about it, I think it's better for you to come."

"Yes, Lord Zeraora, the Duke is so busy, don't let her worry about such things anymore."

They will be beaten anyway, if they have to choose one, they still choose to let Zeraora come, at least he will not use things like waveguide arrows.

"Don't stand there stupidly! Brother, hurry up and say something!"

Seeing that Worf was still standing aside, Meowna threw a seed at his head, which brought Worf back to his senses.

After thinking about the possible consequences of his words, Worf also decisively joined the team, adding a new pendant to Zeraora's leg.

Things progressed faster than Shaina expected. In just one day, Tezolo got the permanent pointer to Eggred from the members of the world government, and sent it back to Ghost Island by mast express.

Everything is ready, but Shaina and the others did not go to Baiwu's diving port, but came to Jiuli Beach.

A "concave" shadow just appeared on the beach. *novelusb.com*

This is also impossible. Both Shaina and Kuzan are over three meters tall, but Zeraola's growth genes are limited. His current height is 172.5cm, which is much taller than before, but There is still no way to compare with these two.

"Ala, Ala, are you going to fly over? If that's the case, it will be difficult for me. Is there a bicycle here? I am still very fast on a bicycle, and I should be able to keep up with you."

Seeing that there were no boats on the beach, Kuzan didn't think about it for a while, how they wanted to go to Egghead.

Both Zeraora and Shaina have the ability to fly, but he can't.

"Are you planning to tell a bad joke? It's not funny, don't worry, Lord Saint Beast has arranged a special way for us to move."

As soon as the voice fell, bursts of bubbles appeared in the inland sea of Wano Country, and the sea water began to rise. As the waves spread, a whale like a large airship appeared in front of the three of them.

"Does your special movement refer to this whale?"

Special aircraft, steel-clad crows under the command of Beasts, ordinary pirate ships, and even submarines are all within Kuzan's consideration, but he did not expect such a whale.

"This is not an ordinary whale. It should be called the King of the Whale. Let's go, it will take us to Egghead."

The Howling Whale King, the Floating Whale Pokémon, is of the water attribute. It is the largest normal Pokémon known so far, and the smallest Howling Whale King has a body length of more than ten meters when it grows up. It is a well-deserved behemoth.

The lung capacity is extremely large, and one breath is enough for them to carry out long-distance sneaking in the deep sea of three thousand meters.

As for weight, according to unreliable data, the average weight of the Howler Whale King is only 398 kg. If calculated according to this weight and its average size, its density is comparable to that of air, so it has the nickname of air whale.

But obviously, this data is just a miscalculation.

This howler whale king is about 30 meters long, and it is used to carry out the Egherd mission this time. Compared with flying over in the sky with great fanfare, it is more stealthy to advance from the sea.

"moo~"

The Howling Whale King made a slightly ethereal voice, and then opened his mouth wide.

"Hey, hey, it's fine to sit on a whale, does this mean that we want to enter its stomach?"

"Of course, you are a capable person, otherwise, how would you move forward underwater?"

When Kuzan doubted his life, Zeraora and Shaina had already walked into the mouth of the Howling Whale King, and there was an extra camping lamp in Zeraora's hand, which illuminated the mouth of the Howling Whale King. Space.

After a brief hesitation, Kuzan followed in and experienced the feeling of the chosen children in the belly of the giant whale.

With the mouth of the Howler Whale King closed, the camping lamp in Zeraora's hand became the only light source. In order not to burn the Howler Whale King, the flame on Shaina's back had already been extinguished. Neither Shayna nor Jhin will keep lighting the fire.

Kuzan didn't know what he was stepping on, but there was a bump from the soft touch. Even if he couldn't see the outside, Kuzan knew that the whale had already set off.

Chapter 1113 The battle between the same period is really cold

From the outside, after Zeraora and others walked into its stomach, the Howler Whale King retreated to the inner sea, and jumped directly over the defensive wall outside Wano Country after an acceleration.

The round figure drew an arc in mid-air, and the blue fins kept swinging. The Howler Whale King was adjusting his figure in this way.

Although the body looks clumsy and naive, jumping is the forte of the Howler Whale King. This is also their way of fighting. The Shouter Whale King will use the shock wave generated when the body hits the wave to stun the opponent.

After reaching the sea off Wano Country, the Howler Whale King took a deep breath, filled his body with air, and dived into the deep sea.

No matter how rough the waves outside Wano were, they were much gentler in the deep sea after all, and Kuzan inside also felt that the bumps were gradually disappearing, and at the same time, the surroundings fell into silence.

Jeraora would occasionally point out the direction to the Whale King, while Shaina closed her eyes and meditated for a while, and Kuzan finally took out a blindfold and started his nap.

The internal space of the Howling Whale King is very spacious, and even the three of them don't feel stuffy.

**【Yan Xue and Lei Guang are really a familiar combination. 】**

He joined the navy two years later than Sakaski and Polusalino, but with his own ability, Kuzan was considered a jumper, and finally became a monster rookie in the same period as the red dog yellow monkey.

Magma, Flash, Freeze, the abilities of the three natural systems have laid the foundation for an era for the Navy.

Up to now, magma and flashes are no longer, replaced by flames and lightning. In a sense, this is an era that makes him feel familiar.

After a while, the Howler Whale King, which was sailing smoothly, suddenly let out a muffled roar.**NovεLusB.Com**

"Egghead will be here soon, but this place seems to be a bit special. Howler Whale has encountered some trouble."

From the roar of the Howler Whale King, Zeraora heard an unpleasant emotion, and also understood the meaning of the Howler Whale King.

"It's time to prepare for action. It's the same as what was assigned before, Kuzan. This is your first action. Please be serious. Let us see what the general is capable of."

"Ala, ala, I will be very nervous when you say that, but don't worry, as agreed, I will handle the difficult guys, just go find what you need."

While the three were talking, the Howler Whale King also launched its attack.

The purpose of the Howler Whale King moving from underwater was to sneak in, but after approaching Eggred, the Howler Whale King encountered a large number of sea beasts, or sea beasts with strange mechanical devices on their heads.

These sea beasts became interested in the Howler Whale King approaching here, and blocked its way.

The sea area around Eggred is a restricted area, and the sea beast weapons controlled by Vegapunk, sea lions, sea giraffes, sea wolves, and many ferocious sea beasts have surrounded the Howler Whale King who arrived here.

They didn't discover the problem of the Howler Whale King, it's just the biological instinct. Sea beasts also need to eat. The simple-looking prey of the Howler Whale King gave them a good feeling.

噙-

The eyes of the Howling Whale King burst into blue light, and the sea water released a powerful shock wave to the surroundings under its control. The Howling Whale King is not a troop carrier without resistance, it is at least an armed troop carrier.

The waves of the water forced back the surrounding sea beasts, and the Howler Whale King also began to rise up. It had already broken through the outer guard from the deep sea and came to the vicinity of Egghard. It was time to start a formal operation.

The power of the wave of water repulsed all the sea beasts trying to get close to the Howler Whale King, and at the same time triggered the alarm of Egghard. After receiving the alarm, Lilith nearby drove a huge robot to approach here.

"Lilith, what's going on there? Lilith?"

For some unknown reason, Lilith suddenly lost communication, no matter how much Shakyra shouted, she didn't respond. At the same time, the alarm on Egghard also sounded.

Egghead has been transformed by Vegapunk, and a device called "whole island air conditioning" has been integrated into the ground. Through this device, Egghead will always be in a constant temperature state.

But when Lilith lost contact, the temperature of the island also began to drop sharply.

"Low temperature warning?"

Vegapunk guessed that someone would come to look for the slate, but the exact time and who would come were out of his estimation.

"Dr. Vegapunk! There are intruders approaching Egghead, the old man asked me to help you escape!"

Before Sakyamuni knew the situation of the island, where Vegapunk's body was, Zhan Taomaru broke in with a big axe. At this time, he was still the security team leader of Vegapunk. Duty to keep him safe.

"Intruder? Who is it?"

"The former admiral of the Navy headquarters, Kuzan, but there is bad news. Now he can definitely join Hundred Beasts."

Zhan Taowan's tone was not relaxed. The news that Kuzan joined Hundred Beasts was only sporadic.

After being fooled by Yamato, Kuzan entered Ghost Island, but during this time, Kuzan did not have any missions, but instead entered a state of evaporating.

But this time is different. When Kuzan appeared together with Shaina and Zeraora and used his abilities without hesitation, everything was settled. This former general who left the navy has already left. On the pirate road.

Vegapunk didn't say anything, just left here with Zhan Taomaru, and a special task also sent all his clones through the communicator developed by Vegapunk.

"Icetime!"

Except for the part of the area where the Howler Whale King is located, the surrounding sea beasts and giant robots that just surfaced have been turned into ice sculptures, which is why Lilith lost contact.

At this time inside the robot, Lilith's hand was placed on the communication device, but she had no chance to press the button at all.

She had just arrived here, before she even had time to make a contact, she was completely frozen by Kuzan who left the belly of the Whale King.

Neither the special cold-proof clothing nor the outer mechs could provide Lilith with effective defense.

At the same time, the figure of the Howler Whale King dived down again and returned to the safe deep sea. In the sky not far away, the figure of the yellow ape also appeared in midair.

After the Wald incident was dealt with, Fujitora and Green Bull also had more tasks. Among them, the job of guarding Mary Joa had been handed over to Green Bull, and the liberated yellow monkey naturally had more tasks.

He has cooperated with Vegapunk to complete a lot of research, and now that part of Vegapunk's research is coming to an end, the yellow ape was naturally sent over.

Kizaru thought that this would be as easy a task as it was a few years ago. After all, there are very few pirates who intend to go to Eggherd on weekdays.

Even if there were, most of them were lost halfway, and very few people who could approach the island would be wiped out by the sea beast army.

But today, it is destined to be some unusual enemies.

"It's really scary, Yanxue, Lei Guang, why do the big cadres of all beasts appear here at the same time?"

The yellow ape didn't get a response from Shaina and Zeraora. The two figures, one red and one yellow, ignored the existence of the yellow ape and rushed straight to the interior of the island.

"Huh? It's not good to ignore the old man like this."

"I should say this, Polusalino, I don't like the feeling of being ignored."

Huang Yuan's body began to scatter, and he seemed to be elementalized to pursue him, but at this moment, a majestic chill pierced his body, forcing his original plan to be terminated.

"Kuzan, what are you going to do?"

"Didn't you already see it, what I have to do is of course stop you."

"You used to be a navy, is it really good to do this? As a former admiral, it is not a glorious thing to choose to join forces with pirates."

"That kind of thing doesn't matter anymore, but remember to tell Sakaski for me that the battle can be hot or... extremely cold."

Chapter 1114 Burning funds, disappearing signals

"Ice Protruding Cross!"

The moisture in the air condensed into two sharp ice thorns, piercing Polusalino from different directions. After the collision, the ice blocks were not damaged by the impact, but instead formed an ice cross.

Sharp ice spikes protruded from Polusalino's chest, and at first glance, he had strung Polusalino into a gourd.

"Kuzan, you are really heartless, to be so ruthless"

Polusalino in mid-air weakly raised his arms, his eyes full of disbelief.

I can't believe that my former comrades-in-arms are so ruthless, without any nostalgia, and at the same time, there is a trace of regret. *novelusb.com*

"Stop pretending, you like acting so much, you might as well resign."

Looking at Polusalino who was extremely weak and might die at any time, Kuzan's expression didn't fluctuate at all. If he had to say it, the proportion of frost on his face became bigger.

At this time, he had already come in front of Polusalino, and waved his right hand towards Polusalino's face.

"Frozen Time Capsule!"

The sharp freezing air rushed towards Polusalino, and an ice sculpture in the shape of Polusalino soon appeared on the cross, but this ice sculpture was just an empty shell. When Kuzan's ability first started to work, Bolusalino Salinor has already reached a safe area through elementalization.

At the same time that Polusalino disappeared, the ice cross created by Kuzan also began to fall downwards. Ice blocks cannot fly. The reason why Kuzan's pheasant beak and two thorny spears can be suspended in midair is due to the influence of his ability. But it is only a short stay in the air, and it does not last long.

The ice cross was suspended in mid-air just now, and Polusalino's ability supported it, elementalized to avoid damage, pretended to be pierced, and then showed off his acting skills in front of Kuzan.

A large amount of cold current gushed out from Kuzan's feet, and the temperature of the surrounding environment dropped a little again.

The falling cross was frozen again during the fall, and Kuzan stopped at his own

On the tall icicle I made, it was on the same level as Polusalino flying in the air.

"Long time no see, you still look like this, Polusalino."

"To each other, do you know that Sakaski asked someone to get a tattoo some time ago, and you left him with a lot of scars?"

"Compared to my leg, that injury is nothing, right?"

Kuzan lifted up his trouser legs, revealing the prosthetic limbs made of ice underneath. Unlike the body brought about by elementalization, Polusalino could even see the sunlight reflected on the smooth ice legs through his sunglasses.

"Maybe so, but Kuzan, what are you going to do?"

Polusalino's voice was still playful, but Kuzan, who was familiar with him, knew that Polusalino had become serious at this time, and before Kuzan could say anything, Polusalino had already turned into a Became a dazzling spot.

"Eight-foot Qiong Gouyu!"

Intensive laser beams shot around, and Vegapunk's sea beast weapon suffered an indiscriminate disaster. After being frozen by Kuzan, it was now blown into pieces by Polusalino's laser. Even if it can be thawed, it has already been scrapped. .

Under the intensive firepower, the giant robot driven by Lilith was unscathed, and even began to thaw under the high temperature caused by the laser explosion.

It seems that he is not accurate, but in fact Polusalino's attack is very measured. He can accurately beat people into a sieve, or thousands of shots can't even touch the edge. Let me show you what a stroke is.

As the body thawed, the internal facilities of the robot started to operate again, and the cab began to heat up. Lilith, who had been frozen into an ice sculpture, was also free.

"Is that guy Aokiji? Why is he here? It seems that the system of this robot is not perfect enough, it was frozen directly, and it needs to be strengthened later."

From the internal monitor, Lilith had already seen the people fighting outside, and then saw several sea beasts being smashed to pieces by the attack of the yellow ape.

"Hey, hey! Pay attention to me! Those are expenses! You have to reimburse me for the broken ones!"

Vegapunk has always been in a state of shortage of funds. Although he created the six clones, they have their own independent consciousness. Among them, Lilith has the least scruples about rules and regulations because she represents evil.

Among many Vegapunks, she is the one who cares most about money.

After all, the world government is not a pure fool. They give Vegapunk funding in the hope that Vegapunk can research something useful to them.

Pacifists, Mutalisks, that's what they need.

But Vegapunk himself doesn't like to study weapons of mass destruction. His ideal is to create an eternal energy that can be used by all human beings inexhaustibly.

Whether it is the island-wide air conditioner or the food making machine, these are all the products he made during this process. As for the source of funding for these things, they are naturally scraped from the hands of the World Government.

99% of the things made by Kevegapunk cannot be mass-produced due to technical problems, so he can only make them himself, which makes him unable to directly benefit from his own inventions, and the funds are always insufficient.

Lilith robs the nearby pirates every day for financial reasons. Seeing the sea beast weapon completely scrapped by the yellow ape, she feels very distressed.

Lilith's voice reached the ears of Kuzan and Polusalino through the loudspeaker, but none of them took it seriously.

"Kuzan, ice and light seem to be inseparable."

"That kind of thing doesn't matter anymore, you can stay here honestly to catch up with me."

It is difficult to decide the winner among natural ability users, the more powerful the natural ability user is, the more so, but Kuzan's purpose is not to tell the winner, after Shaina and the others finish their business, The operation naturally ended.

"Although I really want to do this, but I can't, Kuzan, since you have made this choice, we are enemies, Bachijing."

Porusalino, who turned into a flash of light, refracted several times in a row, and had no intention of fighting Kuzan at all. His mission is to protect the safety of Vegapunk, and nothing else is important.

For example, Vegapunk's clone Lilith, what a clone will eventually become, Polusalino is not interested at all.

In addition to Kuzan, there are two other equally dangerous guys who have rushed to Eggheed. He has to deal with this matter. Although he doesn't know what the purpose of Beasts is here, as long as he goes against the enemy's thinking Do it right most of the time.

If there is really no other way, then his task...may be to kill Vegapunk. Those who cannot be in the hands of the enemy must not be in the hands of the enemy.

After temporarily getting rid of Kuzan, Kizaru also picked up the phone and planned to notify the headquarters. One Kuzan was enough to keep him busy for a while, and with Shaina and Zeraora, he couldn't handle it alone.

For some reason, his phone bug couldn't receive any signal at all.

"Strange, it didn't work this time to tap the phone bug, why can't I still make calls?"

Porusalino does have a habit of using the black phone bug to contact, but it is more like a personality set for himself. As long as he often uses the wrong phone bug, he can give a reasonable explanation when others cannot contact him.

When necessary, he can still distinguish between ordinary phone bugs and tapped phone bugs, but no matter how many times he tries, what comes from the phone bug's receiver is just a busy tone.

Chapter 1115 Eggherd Observation Experiment

"Ah la la, trouble, I knew that the person guarding here might be Polusalino, so it would be very difficult for me."

It wasn't that Kuzan didn't want to stop the yellow ape, it was because he couldn't keep the yellow ape who wanted to retreat. Shining Fruit had great advantages in flight and speed.

According to Kuzan's understanding of the navy, Sakaski has become a marshal, and it is impossible to station here deliberately.

Before he left the Navy, Polusalino was also transferred out of here due to mission reasons. In Kuzan's view, if Eggherd is stationed, it would be one of three choices.

Although he doesn't know the abilities of Fujitora and Green Bull, he can complete his current task as long as he is not a yellow monkey, but the facts tell him that he has drawn the worst card.

Looking at the leaving yellow ape, Kuzan could only choose to chase after him.

Kuzan can't do it for a long time flight, and there is no problem with sprinting in a short time.

At the same time, Lilith also encountered the same situation when the yellow monkey couldn't get through the phone. Kuzan and Polusalino were not interested in her, and she also wanted to inform the main body of the situation here.

But even the communication on her robot has been completely interrupted. In places that Lilith and Polusalino cannot see, a large number of electromagnetic waves have interrupted the signal of external communication. Now she is in a special magnetic field .

The magnetic field is naturally not produced inexplicably, and the source of all this is Zeraora.

"It's done, the signal on this island has been cut off by me, and the nearby sea area is also the same. The message of the phone bug cannot be transmitted."

"This range.. can your power keep up with the consumption?"

"Don't underestimate me, it's okay to fight for three days and three nights, and it's just electromagnetic waves, the consumption is very small, has the radar responded?"

"Just ahead, Assier's invention has succeeded, and Lord Sacred Beast will be very happy."

On the streets of Eggred, Shaina and Zeraola were not blocked in any way, and the robots on the streets were still transporting things according to the original procedures, while the relatively small number of researchers had long since hid.

"This island is quite interesting, and it is much more advanced than Quinn's technology."

A phantom passed through their bodies. It was a holographic projection generated by a holographic projector made by Vegapunk. Through this machine, he created a fairy tale world that only existed in picture books in Egghead.

It's just that Shayna isn't interested at all.

"It's just a bird of a feather. It's not a good thing. He'd better pray that he doesn't fall into my hands."

It wasn't just Quinn who was in the research institute back then, the leader at that time was Vegapunk, Shaina and Jhin hadn't completely calmed down after beating Quinn for so many years, let alone a Vegapunk who had nothing to do with them. punk.

Genius scientists, leading the world, these have nothing to do with them. For the survivors of Lunaria, their relationship with Vegapunk is very bad.

Whoosh! Whoosh! boom!

Two sounds of piercing through the air sounded, and the sharp laser brushed the sides of the two and hit the building behind.

"Yellow ape? They are all admirals, and the former admiral Kuzan is so wet. Well, I blamed him wrongly."

In the smoke, two robots very similar to Bartholomew Big Bear came out, except that these two bears were dressed like policemen.

Now their hands are facing the direction of Zeraora and Shaina.

This is the Vegapunk version of the pacifist. As the developer of the pacifist, Egghard naturally has the same equipment, and their intelligence is even higher than the naval version.

This is the island's defense mechanism. After determining that there are intruders, the pacifists on the island also launched operations.

It's just that this level of defensiveness doesn't make much sense.

The pacifist's attack comes from the research on the ancestral ape's blood factor, but the frequency of attack is many times slower than that of the ancestral ape. During the time when the pacifist re-targeted, Zeraora had already come to them.

Electricity condensed on his arm, and as the two claw blades swung past, the raised arm of the pacifist made of a special gold shell was chopped off to the ground. *NOVELUSB.COM*

Before the pacifist had any reaction, Zeraora stepped into the air, and with the sound of thunder and lightning, kicked the pacifist's head one after another.

Domineering shattered the shell of the pacifist, and terrifying thunder and lightning poured into the pacifist's body along the line.

Boom!

The pacifists were unable to make any response. They were not living beings, and their heads were not a fatal weakness. However, with the injection of electric current, their bodies began to emit black smoke, and eventually exploded directly after being overloaded.

The huge machine body turned into a huge bomb, and the fragments after the explosion rolled and flew around, finally embedded in the surrounding houses.

The nearby holographic projection device also seemed to be affected, and after a few false shakes, the connection was disconnected.

"Guard No. 1 and Guard No. 2 are all damaged, and the persistence time is less than a minute. There is no need to continue the test. Let Zhan Taowan know, it's time to try those new things."

In a laboratory, No. 03 Vegapunk, Edison, who represents the mind, has been monitoring the battle scenes throughout the process. Currently, he is not satisfied with the defense of the island.

"Pythagoras, communication has not been restored yet?"

Edison looked at Pythagoras, who was busy with machinery, and then asked his own question.

"Internal communication has basically returned to normal, but there is an invisible barrier surrounding this place. It should be something like a magnetic field. Signals cannot be sent out, and external signals cannot be transmitted in."

Pythagoras looked at the instrument in front of him and made his own judgment.

"Then what happened to Lilith?"

"She is in the magnetic field area. If she goes out or comes in, she can communicate, but the equipment on that robot can't detect the magnetic field, and she doesn't know the range, so she can only gamble."

"That's it, by the way, just test the escape device on the island, it's too dangerous to stay here.

You go prepare these, I suddenly have a new inspiration, I have to record it. "

Edison seemed to think of something, and handed all of these to Pythagoras.

"Okay, remember to command operations later, you are more familiar with this aspect."

"I will as soon as possible."

On the other side, Zhan Taomaru, who received the order, also walked out of the room with his ax in hand.

"Go, S-Snake, S-Eagle."

Behind Zhan Taomaru, two figures like children followed Zhan Taomaru out of the room.

Their appearance and childhood Hawkeye are almost carved out of the same mold as Boa Hancock. The biggest difference is that they have dark skin, black wings and burning flames on their backs. Everything is similar to that of Lunali. Asians are the same.

#### Chapter 1116 Seraphim

Seraphim, a humanoid weapon newly developed by the Naval Science Force.

Based on the gene of the first generation of Shichibukai, a brand new weapon born after incorporating the Lunaria gene and the blood factors of different devil fruits.

The current Seraphim has not been officially finalized and is still in the experimental stage. *novel.uSB.coM*

This is a weapon test, a weapon test that will cause very serious consequences.

S-Snake and S-Hawk left the preparation room according to Zhan Taomaru's order.

When making pacifists, Vegapunk made the so-called authority chip, which is used to determine the authority to control them.

Wulaoxing is the owner of the highest control right, Vegapunk and his clone are ranked second, and Zhan Taowan is ranked third.

Vegapunk is still very satisfied with this bodyguard.

Besides not being too tight-lipped at times, Vegapunk can't fault him.

The external pacifists and guard robots have been cleaned up. Shaina and Zeraora just wanted to move on, but they saw a burst of steam from the side, and an unknown object suddenly emerged from the ground.

Accompanied by the sound of gears rubbing, an elevator-like cylindrical building appeared on the ground, and Zhan Taomaru also walked out of it.

"Intruders! This is Eggherd, not where you should come!"

"It's already labeled like this, don't you think it's too late to say this?"

"That's what I said. S-Eagle, S-Snake, kill the intruders!"

After receiving the order from Zhan Taowan, the two Seraphs also moved into action, but as the two of them revealed their true faces, Shaina's pupils suddenly widened.

As a remnant of the Lunaria tribe, seeing the things made with her own racial genes standing in front of her, only anger remained in her heart for a while.

To be precise, the two Chitians used not only the genes of Lunaria, but the genes of her and Jhin.

"Zeraora."

"What's wrong?"

Jeraora noticed the change in Shaina's tone, he hadn't heard such a cold tone for a long time.

The indifference contained killing intent. Since the birth of Zeraora, he had never seen Shaina so angry.

"Here's the radar, I've given you the stuff of the Holy Beast. I'm very angry right now!"

The slate radar was thrown towards Zeraora by Shaina. Before Zeraora could say anything, the color of the flames on Shaina's body changed. The blue flames wrapped her whole body, and she directly entered the blue flame. Flame mode, and that's just the beginning.

The blue flame shot straight into the sky, and under the flames, Shaina's figure was still changing.

The yellow feathers turned black, the claws became sharper, and the flames on the wrists fluttered in the air like wristbands.

After only one meeting, Shaina turned on the Blue Flame Mode and Mega Mode.

The blue flame of itself merged with the red flame of the flame chicken, and the flames at the limbs had turned purple.

"Are you OK?"

"I'm fine, I just can't suppress the fire, leave it to me here, I know how to deal with those things."

"I see."

Looking at the furious Shaina and the two approaching Seraphs, Zeraora already understood the reason.

White hair, brown skin and black wings, the racial characteristics of Seraphim are too obvious, even Zeraora can see the root of these things.

The same appearance as Hawkeye and Hancock destined them not to be Lunarians. Zeraora didn't know how they were born, but she could understand Shaina's inner anger.

With full firepower, she doesn't need to worry about herself at all.

"S-Hawk! Stop Lei Guang! Don't let him go!"

Seeing that Zeraora wanted to leave, Zhanmomaru hurriedly issued a new order. The S-hawk had just started to move, and Shaina had already arrived at his back before he even had time to pull out the same weapon on his back. before.

The flaming flying kick kicked towards S-hawk's head, sensing the danger, S-hawk wanted to dodge it, but Shaina's attack speed exceeded his body's reaction speed.

Boom!

The purple explosion exploded, and Shaina's flaming claws had already kicked S-hawk's head. She was already good at kicking skills, and with the blessing of the flame chicken's power, her kicking skills became even stronger.

The leg strength of the Mega flame chicken is stronger than that of the flame chicken. Because the speed reaches the limit, the feet will rub against the air and burn violently, making the energy in the body more explosive.

The scorching flying kick landed on S-Hawk's neck. The super-high kick speed and attached arrogance made S-Hawk have no time to react, and instantly flew upside down, directly smashing the elevator raised from the ground.

After a successful blow, Shaina didn't have the slightest joy on her face. She didn't hold back her hand just now, and the terrifying force in that blow was enough to defeat most of the enemies.

It can be said that it was good luck that the neck was broken by that kick. It was a terrifying force enough to crush the human body. Even if Bucky came, Shaina could kick him so that he could not reorganize.

However, judging from the force feedback from the legs, the effect of that blow was limited.

A moment later, S-Hawk stood out from the ruins again. Although his neck was tilted, his body functions were still intact. Shaina's expression could even be seen in the blazing flames behind him.

"Really researched something incredible, even this has been reproduced."

That is the defensive posture of the Lunaria people in flame mode, and only this posture can resist the blow with their bodies without using special abilities.

After blocking Shaina's blow, the flame behind S-Hawk went out, and the young body exploded with extremely fast speed. Accompanied by bursts of sonic booms, S-Hawk slashed at Shaina. .

Facing the fierce slash, Shaina just turned sideways to dodge. Looking at the buildings behind her that were cut in half, Shaina still only had anger in her heart.

Extinguish the flames to increase the speed, which is also the ability of the Lunaria people. The more these Seraphs resemble the Lunaria people, the greater Shaina's fire will be.

The scarlet chain was held in her hand, and after a brief change, a scarlet spear appeared in Shaina's hand.

There was a hint of joy in the eyes of S-Hawk. These seraphim inherited part of the thinking of the original body. For example, S-Hawk has his own desire for a strong opponent.

"S-Snake, go help S-Eagle, get rid of this opponent first!"

Zhan Momomaru felt that the S-hawk's battle was not going well, and seeing that Zeraora was no longer able to stop him, he modified his order.

But this sentence also caught Shaina's attention. The moment the red chain came into contact with the S-hawk weapon, it turned into a soft whip, successfully restraining the S-hawk, and then Shaina used it as a chain hammer, He smashed the S-snake mercilessly.

Even if the S-snake inherits Hancock's appearance and the unique star eyes make her unique, Shaina has no intention of pity.

Boom!

With a muffled sound, the foreheads of S-Hawk and S-Snake collided, and then Shaina flicked her wrist. The spikes on the red chain cut S-Hawk's wrist, and the imitation night on her hand was also provoked Fei, caught by Shaina and threw it at Zhan Taowan as a throwing knife.

poof

The long knife pierced Zhan Taomaru's arm and pierced his chest. If it wasn't for his thick fat, the imitation night would be shorter, and this knife would be enough to pierce his heart.

"It's impossible for me to be domineering, but I'm the man with the strongest defense in the world"

"At this level, I dare to say that I have the strongest defense. Stop joking with me. Being able to be pierced by this knife in the palm of my hand already shows the problem. My domineering is stronger than yours.

Give you a chance, tell me, where are the people who made these two things? ! "

Shaina came to Zhan Taowan at a speed that was almost flashing. While his palm was pierced, the animal claws had already locked his neck, and the sharp nails had pierced his skin, ready to break him at any time. throat.

"Ahem. My uncle is the most strict-tongued man in the world. I won't tell you and I don't know where Dr. Vegapunk is now."

Chapter 1117 The whirlpool of hatred

"Really? Then you are useless."

Shaina was about to force her fingers, when a chill came from behind her. Seraph's recovery speed was extremely fast, and she had already recovered at this time, and the S-hawk directly attacked Shaina.

His weapon had been thrown away by Shaina just now. At this time, S-hawk was using his arm as a weapon. His fingers were slightly bent, and the bottom of his fingers had turned into sharp blades.

Five sharp slashes swung at Shaina from behind, but Shaina didn't turn around, but used Zhan Taowan as a weapon, grabbed his neck and threw it to S-hawk behind him.

If it was the real Hawkeye, he would definitely make a wiser choice at this time, but S-hawk is a technological creation after all, the program has been restraining him, and there are many factors that can interfere with his battle.

For example, a person with a high level of authority can overwrite orders issued by a person with a low level of authority. Similarly, if a person with a high level of authority issues an order in advance, the person with a low level of authority can no longer control Seraph

Besides this, orders from people of the same level cannot be overridden.

Besides Wulaoxing and Vegapunk and their avatars, Zhan Taowan is the one with the highest level. Even if the admiral holds the authoritative chip, his authority is not as good as Zhan Taowan.

As the third-ranked manager, Zhan Taowan has certain privileges. For Seraphim, protecting his safety is more important.

Seeing that Zhan Taowan was about to be accidentally injured, S-Hawk quickly chose to stop, and the price of doing so was being knocked down by Zhan Taowan's huge body.

"Ahem. What do you pirates want to do? Do you want to kill Vegapunk? His technology is unique. Killing him will be a huge loss to the entire human race!

He is a person who does research every day, when did he offend you? "

"Offended? That was before, now it's a blood feud, you who don't understand anything, don't blame others there!"

Shaina kicked Zhantamaru again, at this time, the S-hawk below climbed up again, crossing his hands to block Shaina's blow.

At this time, both of his arms have turned into two sharp blades, which is the power of Daz Bowness's fast cutting fruit, and it is also another technological breakthrough on Seraphim - green blood.

Both S-snake and S-hawk can see some special ring-shaped areas, that part of the skin is missing, and some bubbling liquid can be seen below.

Green blood is a special artificial blood that contains the blood factors of superhuman devil fruit ability users, allowing non-ability users to obtain corresponding abilities.

When those capable people are arrested, the navy will extract their blood, and the blood of the capable people will eventually reach the hands of Vegapunk. Through research, he has cracked many secrets of the devil fruit.

The ability to cut fruit quickly is the ability he found suitable for S-hawk among many capable prisoners.

Although Daz Bowness has escaped from prison with Crocodile, he has already contributed enough blood.

"It seems that they value you quite a lot. Will that guy be sad if you die?"

Seraphim's behavior of protecting Zhanmomaru all the time made Shaina aware of some abnormalities, and at the same time changed her attitude towards Zhanmomaru. Since Vegapunk values him, Shaina will kill him.

At the moment Shaina made a decision, Zhan Taomaru suddenly felt a chill behind his back, feeling like he was being watched by a beast. He clenched his battle ax with both hands, and looked at Shay in front of him nervously. Na.

Just when he was on guard, he found that the S-hawk and the S-snake had already moved. Before he had any doubts, there was a pain in his chest, and Shaina, who was in front of him, gradually dissipated.

"The afterimage is wrong, I can clearly feel it with my knowledge"

"It's you who are too slow. What you perceive at the beginning is indeed my body, but it doesn't take much time to kill you, and you can't react.

It stands to reason that you are innocent, but who asked you to be that guy's bodyguard? If you want to blame, blame your life. When you have this relationship with him, you will be involved in this hatred Swirl up.

But you should be honored to die with this weapon. "

The chain gun transformed from the red chain penetrated along the previous wound, and the blue flame entered his body immediately.

At the same time, in Wano Country, Quinn was looking at Hawkins in great perplexity. He didn't understand why he could draw a black lottery inexplicably.

"Amazon Cloud Sword!"

Sharp sword energy cut across from the side, and the yellow monkey who got rid of Kuzan finally rushed back to Aigherd. After seeing the situation here, he hurriedly forced Shaina back.

"Old man. The task of protecting Vegapunk. I leave it to you."

"I'm sorry, Zhan Momomaru."

Huang Yuan's tone was still a little casual, but he was a little more apologetic. He pushed back Shaina's attack, but it was too late. From the scar on Zhan Taowan's chest, he had already felt the fiery pain. energy.

Unless Zhan Taomaru had the same body structure as Blackbeard, he would never be able to survive with his internal organs burned.

The appearance of Huang Yuan did not save Zhan Taowan, the sharpness of the red chain, the increase of blue flame mode + Mega evolution, and the anger in his heart.

After seeing those Seraphs who were similar to those of the same race, Shaina didn't feel any comfort in her heart. This similar appearance to the same race only made her feel disgusted.

Zhan Taowan can be said to have been angered by her. If she hadn't seen Seraph, Shaina's choice would probably have been to leave here with the slate, and would not have chosen to fight at all.

Kazuru didn't know what happened to Shaina, he only knew that his subordinate, Zhan Momomaru, who is now an official navy, had lost his life signs.

"It's scary, life is so fragile, Miss Pirate."

Kizaru unbuttoned his cloak, and under the blowing of the wind, his cloak just covered Zhan Taomaru's body.

S-Eagle and S-Snake are also ready for battle again. They are not normal humans, they don't have such complicated emotions, and they don't understand what revenge is. They just plan to destroy the enemy according to their own procedures.

The situation became 1v3 for a while, Huang Yuan stroked his sunglasses, and then said: "You heard it too, this is the last words of my subordinates, please stay here together."

"If you can do it, you should try it."

"Ice Age!"

The battle hadn't even started yet, but the cold snapped from afar, and Kuzan followed the yellow ape to the place. The S-hawk and S-snake were frozen in an instant, but soon they leaned against their backs. Fire and Lunaria resistance set free.

The battle changed from 1v3 to 2v3 again *NovelUsB.com*

Chapter 1118 Karma and S-Bear

"Hey, isn't the vitality and defense of this thing too strong? Is this what the Naval Science Corps has been studying? It's really scary."

Seeing that the ice saber in his hand left only a white spot on S-Snake's body, Kuzan was slightly shocked.

He didn't know about Seraphim's plan, but he only knew that the Naval Scientific Force had a secret plan, and now it seems that this plan has succeeded.

Just now, S-Snake's defense method is very special, not any special ability, just relying on the defense of the body to block his attack, coupled with the previous means of dissolving his ice, this made Kuzan vaguely feel a little trouble .

Since the war on the top, there have been inexplicably more weapons. Compared with the current Seraph, pacifists and flying dragons are simply miscellaneous soldiers.

click

S-Snake's command at this time is to fight. Although Zhan Taowan is dead, and there is no authoritative chip for commanding Seraphim on Huang Yuan, Vegapunk's clone can also issue some commands remotely.

When there is no one else who can give orders in front of Seraphim, the orders of remote command will not be interfered.

S-Snake kicked Kuzan's ice saber, and the ice saber broke from it in an instant.

The ice book made by Kuzan is not so fragile, and the sharp ice blade is enough to cut off the limbs of ordinary people. The S-snake can directly kick his ice saber against the blade. On the one hand, it is a special physique, on the other hand, it is her abilities.

What fell to the ground was not ice fragments, but gravel. The source of the green blood in her body was Hancock's blood factor. The S-snake not only inherited Hancock's appearance, but even her fruit ability.

"The ability of the Pirate Empress is Hawkeye, right? The science class really made something amazing. Is this a replica of the entire Qiwuhai?"

Vegapunk itself is a bit obsessive-compulsive, trying to make everything exactly the same. S-Snake and S-Hawk look exactly like the young Empress and Hawkeye, and they can recognize them even if they have face blindness.

If you can make two, you can make the third, and the fourth. After a little association with Kuzan, you can think of something.

"Frozen Time Capsule!"

Kuzan, who was talking to himself, didn't stop. Facing the continuously attacking S-snake, Kuzan greeted him with a hugging posture. As the figures staggered, the S-snake turned into an ice sculpture again.

But before he tried to shatter it, S-hawk's slash was approaching from the side.

Hum!

The light of the knife flickered, and the weapon that was picked up before returned to the hands of S-hawk at some point. The terrifying slash forced back Kuzan's next move, and S-hawk waved its wings to block the S-snake .

The flames behind flame blazingly, helping the frozen S-snake to complete the thawing.

Kuzan's ice seal can be roughly divided into two types, one is just a shell sealed on the outside, and this kind of controlling Seraph doesn't care, and the other is completely frozen from the inside to the outside.

Even Seraph is hard to break free after being frozen like that.

"It's dangerous, it's dangerous, something went wrong almost, Aokiji is really tricky, even Seraph is not immune to his ice."

"After all, it is a former general. If it is completely frozen from the inside to the outside in an instant, even the Lunalia tribe will not be able to mobilize the flames of the body, let alone Seraphim is just a child and has not grown up at all."

In the higher experimental layer, Pythagoras wiped the cold sweat from his forehead. The arrival of Kuzan was an accident. Even if the resistance of Lunalia's bloodline is strong, it seems that there is not enough energy to face enemies at this level.

If only S-snakes are used to deal with Kuzan, something may be wrong.

At the same time, Pythagoras also noticed Shaina who was fighting the yellow monkey.

"Shakya, that woman."

"Well, it should be her, the original Lunaria, but how could it be a blue flame. It seems that their bloodline secret is more than that."

In the beginning, the whereabouts of Jhin and Shaina were indeed a mystery. No one knew where they went after the riot.

But as their activities increase, the number of times they are exposed to public view increases.

For those who have heard the legends of the Lunaria, it is not difficult to get clues from their fighting methods, let alone the head of the laboratory.

After Kaido escaped from prison, they disappeared, and with Kaido's rise, Beast also had more such cadres, which can be seen with a little effort. *novel.uSB.coM*

Jin and Shaina's camouflage is more aimed at ordinary people, so as to reduce unnecessary troubles. For the real high-level people, this kind of thing is already a tacit secret.

There are enough samples in the lab, there is no need to specifically target them.

In addition to Shaina and Jhin's own strength, the beasts behind them are also a big problem.

If you deliberately attack them, the price will be too great to attract the backlash of beasts. If you have to do this, based on the current intelligence, it is better to capture Quinn.

When the pay and benefits are not proportional, few people will do this kind of thing.

However, the action against the Lunaria tribe has not been cancelled. There may still be Lunaria tribes in other places. If someone can catch Jhin or Shaina, the world government can also launch a new campaign against this matter. action.

"She's angry."

"Of course I will be angry. Anyone who sees this kind of thing will be angry. This is the so-called karma.

The main body is already in place, and it's time for us to act, let's go, Pythagoras, the action plan has also changed. "

01 Sakyamuni represents integrity and is the one with the highest sense of morality among the avatars.

He doesn't agree with some experiments, but he doesn't object to Ontology participating in these projects for the sake of research.

"It's true, the observed data is enough, there is no need to read it anymore, she is familiar with all the weaknesses of the Lunaria people."

Shakya and Pythagoras entered the elevator with a stone slab next to it, while Edison, Atlas and York took S-Bear to the top floor at this time.

"Punk Records has been separated and the island has been evacuated."

"Very well, it's time for us to retreat, now is not the time to face death, S-Bear, please."

The seraphim in the shape of a big bear took off his gloves, and the pink meat ball looked full of elasticity. With all the personnel in place, S-bear also waved his arms.

Boom-

There was a muffled sound in the air, and the upper area of Eggred disappeared out of thin air. In the farther sky, the disappeared area was already wrapped in bear paw bubbles, and it was flying towards an unknown area at high speed.

S-Snake inherited Hancock's sweet fruit, and similarly, S-Bear inherited Big Bear's meatball fruit. The bug-like ability is exactly the way Vegapunk planned to evacuate.

Chapter 1119 Wings of the sky, the power of the gods

not long ago

"Get out of the way, I'm not interested in fighting you today, I just want to kick that big-headed monster's head."

"Unfortunately, no."

Boom!

"It's getting more and more terrifying. I can't see that you don't intend to fight."

Kizuki hadn't finished saying what he couldn't do, but Shaina's heavy kick had already come in front of him. Even though there was a domineering partition, Kiwi could feel the temperature of the opponent's flame.

Zila

As the future island, Eggred has a large amount of metal structure, even if there is a large amount of metal on the ground, during the collision just now, Shaina's flames scattered on the ground, but the scattered flames are like corrosive liquids, directly Metal plates that melted the ground.

"If you get out of the way, don't you need to fight?"

If the yellow ape does not take the initiative to give up the fight, it will be like a piece of dog skin plaster in the battle, sticking to the body and cannot be shaken off.

It is unrealistic to want to bypass him to do other things.

"My dear subordinate hopes that I will protect Vegapunk well. If this requirement cannot be fulfilled, the subordinate will be sad."

The flashing Amacongyun sword was split into two, and the two swords of the yellow monkey crossed and slashed towards Shaina's neck. However, a red spear directly pierced the light sword of the yellow monkey, and the tip of the spear rubbed against the yellow monkey's head. The cheek was pierced, leaving a bloodstain above.

Huang Yuan just wanted to fight back, but a fatal crisis suddenly flashed in his mind, and he forcibly stopped his movements. Huang Yuan quickly backed away, and at the same time he left the place, a thunderbolt also struck down.

"Why are you back again?"

"Of course I got it back."

The lock of hair on Zeraora's back was currently wrapping around a stone slab, firmly fixing it on her back, which was the skill of returning life.

Originally, that section of hair lacked practical meaning, but under the influence of returning life, this unique structure has become Zeraora's third arm. Due to the length problem, it is even more convenient than the arm under special circumstances.

Time passed very short. It didn't take long to leave from Zeraola and return, and most of it was spent on the road.

Sakyamuni and Pythagoras did not leave with the main body and other clones, but came below with the stone slab left behind.

From seeing the lottery ticket, Vegapunk knew that the other party had a way to track the slate, and of course he would not leave with the slate.

When Sakyamuni and the others appeared with the slate, they encountered Zeraola head-on.

The behavior of Sakyamuni and Pythagoras transporting the slate made Zeraora think that they wanted to transfer the slate, and without giving them a chance to communicate, they directly destroyed the two machines and returned here with the slate.

For the life created by Arceus, the thief who stole the stone tablet is a felony.

"Shaina, I got the item, the task is over, what do you want to do next?"

Vegapunk and Yellow Ape did not guess that Kuzan had joined Hundred Beasts, and followed him to participate in this operation.

Shaina didn't expect Vegapunk to come up with something like Seraphim. If there was no such product, she would have chosen to retreat the moment she got the slate, but now, she really couldn't leave directly.

Before Shaina could make a decision, there was a muffled sound in the sky. Looking at the upper half of Eggred that disappeared, Shaina's expression became extremely ugly.

"Asshole. Run away."

"It seems that your goal cannot be achieved."

Huang Yuan raised a smile on his face, and a more dazzling light burst out from his body.

The successful evacuation of Vegapunk means that he no longer has any worries, and he also intends to fight without any scruples, but the development of the matter once again exceeded the understanding of the yellow monkey.

The stone slab that Zeraora brought back was lifeless, no different from ordinary stones, but when he came to Shaina, the red chain in Shaina's hand changed.

Colorful energy fluctuations surged on the red chain, and under the guidance of this force, the gray and colorless stone slab also showed colorful light.

"Eight-foot Qiong Gouyu!"

Looking at the strange situation in front of him, the yellow monkey had an ominous premonition, and immediately launched an attack on Shaina.

The dense light bullets shot towards Shaina, but they all melted the moment they touched the light curtain, and were completely absorbed by the mysterious light curtain.

【Shaina. 】

"Master Holy Beast?!"

The voice of Arceus suddenly sounded in Shaina's mind, and she instinctively looked around, but Shaina didn't see anything related to Arceus.

"Master Holy Beast, are you here too?"

"No, this is the power of this slate. It is far away from me, but the scarlet chain is the product of my strength. When it is close enough to the slate, then I can also remotely control it."

The more tablets returned, the more perfected Arceus' power was, and when the fifteenth tablet returned to his body, his power was sublimated again.

Now, using the slate and the red chain as the medium, Arceus has achieved long-distance telepathy. Although it has not yet officially returned, this slate has also restored contact with Arceus in advance.

"Master Holy Beast, the stone slab has been found, but I."

【Needless to say, I already know. 】

The convenience of the red chain is to let Arceus know what happened recently.

Since his consciousness came here, he has known part of what happened in Eggred from Shaina's perspective. *nOVELusb.Com*

【If you want to do it, do it, but with your current strength, it is not so easy to catch up. Let me help you with a little favor. 】

The outer seven-colored light curtain shattered, but the rejuvenated stone slab turned into a ball of light, which gradually came to Shaina's back.

As the ball of light came into contact with its body, the majestic energy turned into two beams of light and merged into Shaina's body. The red wings began to grow, and the feathers that were originally similar to birds gradually merged into one, and finally turned into a To the dazzling light wings.

The wingspan of the two wings was several times that of the past. With just two \*\*\*\* of the wings, a terrifying cyclone appeared in the sky above Eggherd, and strong winds began to rush around.

"In times of crisis, holy objects give us strength, and the power of fire opens up the way to the outside world"

This is a word that has been passed down by the Lunalia clan for hundreds of years. It specifically refers to the fact that when the crisis first appeared, the patriarch of the Lunaria clan temporarily obtained the power of the fireball slab, and used that power to defeat the enemy and open the door for the clansmen. a road.

At that time, Arceus was still an egg, and the method of lending power was very rough. Even the Lunaria people could not withstand the erosion of that power for a long time.

But this time is different. After matching, Shaina is enough to temporarily control this power.

【Go ahead, the new wings will guide you, this is part of my power, the power of the sky, now it is yours. 】

"As ordered."

The difference is 2,000 (actually 1,000, I wrote 1,000 more yesterday, and it's good for interest)

Chapter 1120 Blue Sky Slate, Authority of the Sky

"Sure enough, the hardest armor is a lie. This is the power hidden in the stone."

Since leaving Ghost Island, Kuzan's three views have been washed away. The Howler Whale King transport ship is nothing, at most it is a powerful creature, and there can be an island with a complete ecology in the stomach of a Neptune.

Seraphim's research was nothing. Although he was shocked by the power contained in a creature like a child, he had heard some clues about it.

It is nothing more than a bit of technological shock, the ability to reproduce, and clone people, which is somewhat outrageous, but it is still acceptable.

Scientists who have led the world for five hundred years, the series of titles are not a joke.

Compared with the changes in Shaina's body, these are insignificant. With the waving of her wings, a terrifying eye of the wind has formed above the sky.

Due to the previous battles, there were a large number of broken buildings on Eggherd, and now these broken objects were swept up into the sky under the action of the wind.

If it weren't for the knowledge of Shaina's ability, Kuzan would believe that she is the ability user of the nature-type Wind Fruit.

It is the biggest shock that the seemingly ordinary stone can explode with such terrifying power after being integrated into the body.

The reason for the beasts is that Kaido wants to build an indestructible armor, at least until now he has not changed his mind.

The exaggerated hardness of the slate is a *fait accompli*, and even the world government has not found a way to destroy it for a long time.

Using this kind of stone to build armor also has miraculous effects, but the pure hardness is completely different from the current expressiveness.

It's not that the slate is meaningless, but that outsiders don't know its correct usage at all. This is Kuzan's thinking at this time.

**【One piece has such terrifying power, in the hands of all beasts. How many pieces are there? 】**

Thinking about it carefully, the beasts have been looking for these things a long time ago, and even paid a huge price for it. Before, some people thought that Kaido had lost his mind, so he would look for this kind of thing that is nothing but hard.

The facts in front of him told Kuzan that it was just that the Beasts were an era ahead and had already discovered the use of this kind of thing.

Even the navy made a similar deal with them for Hailoushi, and took the initiative to send this destructive weapon to the other party.

As the person involved, Shaina's feelings are more obvious. Since she was born, she has never felt such a powerful force. Is the energy in her body endless? The majestic energy centers on the wings and continuously flows into the limbs.

Gorgeous light spots are constantly falling from the wings, looking like a waterfall falling from the sky from below, it is nothing but the excess energy in the stone slab.

The icicle slabs can temporarily form the core of Regice's body. That's because "pillars" like Regice are special Pokémon. Their bodies are different from humans and can perfectly accommodate this power.

But Shaina is different, and the body of a Lunaria can't bear the full strength of a stone slab.

The patriarch hundreds of years ago gained the power of the fireball slab. While this power made him stronger, it also constantly pushed the limits of his body.

The situation is different now. Arceus, who has fully recovered his strength, can control his slate more carefully.

The power in the stone slab has been kept at the limit of Shaina's tolerance, and the part beyond the body's tolerance has been swayed in the sky through the wings, and finally formed a beautiful and deadly brilliance.

"This is, the power of the sky?"

Shaina looked up at the sky, and she could see the flow of the airflow in her eyes. With just a wave of her hand, the clouds were pinched into the corresponding shape by the airflow according to her intention

The sixteenth piece - the blue sky slate, representing the attribute - flight.

The most impressive thing about the flying slate is the house bird, or the bird who waited in the forest for twenty years until his master was expelled from the protagonist.

But the blue sky slate represents not only the flight and housebirds, but the power of the sky.

Flying is just an appearance, in addition, the power of the sky is fundamental.

The flow of airflow produces wind, and the alternation of hot and cold airflow changes the weather. Wind and weather are the power brought by the blue sky slate.

S-Bear's ability bounced away the upper part of Egghead, but after such a large area was bounced away by the ability of the meatball fruit, traces were left in the sky. Following the changes in the airflow, Shaina We already know where Vegapunk went.

"Those things are not that difficult to deal with. When the flames are extinguished, their defense power will drop significantly. That is an opportunity. After killing those obtrusive things, you can return early, and see you on Onijima."

Since the source of Seraphim's power is the Lunaria, their weaknesses are also obvious.

The exaggerated defense of the Lunaria family is the most difficult part for Seraphim to deal with.

After leaving her promise, Shaina didn't intend to continue entanglement here, but danced her new wings and chased into the distance.

Kiazaru tried to stop Shaina's pace, but when Zeraora returned, his actions were not as smooth as before.

After the most dominant speed is tied, the threat that the yellow monkey can pose has dropped by one level.

"Step aside."

"Unfortunately, no, she is very angry now, you can honestly fight us here."

In a few minutes, the positions of the characters changed, and the yellow ape who had just been entangled with Shaina so that she couldn't leave was completely entangled by Zeraora.

Boom!

The sky also darkened at this moment. Faced with dealing with Seraphim first, then chasing Vegapunk or directly chasing Vegapunk, she chose the latter.**nOveLusb.Com**

Seraphim is just a creation. If the creator is not killed, maybe there will be more disgusting things in the future.

She gave it to Zeraora with confidence. Without the blue flame mode and no special skills, Seraph must give up the defense mode if he wants to deal with Zeraora, otherwise they will not be able to catch Zeraora at all , Can't even do an assist.

Once they give up the defensive mode, Zeraora will definitely seize that opportunity. This is Shaina's trust, and before she leaves, she also created a home field for Zeraora.

The thunderclouds all over the sky were written by Shaina. Under the sky full of thunder, this place has become the most suitable battle venue for Zeraora.

"It really helped a lot."

Boom!

Under the guidance of Zeraora, the thunder and lightning gathered in his body, bathed in the thunder light, every hair on his body was filled with lightning, and the dazzling lightning spear had condensed in his hand.

Sunglasses relieved the dazzling light brought by the thunder and lightning, and the yellow monkey did not continue to say words like "scary", but gathered the most dazzling brilliance so far in the battle

some things to say first

After the blue sky slate, Momonosuke will soon be there. In order to make the future development of the plot more interesting, he will hang up but not immediately.
