

Arceus 1121

Chapter 1121 Our future does not need you

Lightning and flashing, two yellow rays of light collided violently in mid-air, their speed has exceeded the limit of naked eyes to capture, even Kuzan can only perceive their positions with knowledge at this time.

"It's really intense, but if you do this, won't all the tasks fall on me?"

This time, Shaina is the commander of the three-person team's operation. Now the mission goal has changed from finding the slate to killing Seraph.

But Zeraora has been fighting the oracle now.

This is also a matter of no choice. Kuzan can't keep the yellow ape who wants to leave. For the yellow ape, Seraphim is not within his protection range. If he is left alone, the yellow ape will definitely not stay here.

Huang Yuan, who believes in ambiguous justice, always looks foolish on weekdays, but he also has his own fetters.

The death of Zhan Taowan can't just turn the page in a few words. This is not some unbeatable colleague, but his direct subordinate.

Thunderstorms are spreading, with the supplement of thunder and lightning in the sky, Zeraora directly turned on the berserk mode. With the blessing of Nilin, Zeraola's attacks are extremely fierce.

Even if it didn't hit the target directly, the lightning attached near the claw tip paralyzed the part of the yellow ape's body that hadn't been elementalized in time.

These two people won't be able to end it for a while, so he can only deal with the so-called Seraphim.

"The defense will drop when the flame goes out. Try it out."

In the previous battle, Kuzan also found a problem. The physical defense of those S-hawks and S-snakes is very strong. Whether it is ice sabers or domineering fists, it is difficult to have an effect.

However, their resistance to elemental attacks is relatively much lower. If they can successfully achieve freezing, there is still a great chance.

"Ice Age!"

Kuzan's body was covered with frost. At this time, the ground of Eggred had been battered by lightning and lasers, and the land and rocks below had already been exposed to everyone's sight.

Centering on Kuzan's feet, the frost spread on the rocks little by little, the moisture in the soil was frozen, and the already compacted foundation turned into hard frozen soil.

S-Snake felt a chill on her face, she raised her hand to wipe it off, and a hexagonal snowflake appeared on her palm.

The snowflakes melted quickly under the influence of body temperature. This was the first time she saw snow after leaving the cultivation apparatus, and her imperfect thinking became more curious about the world.

The previous thunderclouds still existed, but the thunderstorm in Zeraola did not cause heavy rain, it was simply thunder and lightning falling. At this time, under the influence of Kuzan, unprecedented thunder and snow appeared in Eggred.

And without Akainu's ability to compete, Kuzan's ability quickly affected the entire island, turning it into a world of ice and snow.

"Now, this is also my home field."

Kuzan's body melted into the wind and snow. Accompanied by the extremely cold airflow, Seraphim also felt a strong sense of crisis in his heart.

As the battle in Eggred intensified, Shaina's pursuit continued, and Vegapunk, who escaped with the S-bear, was also conducting a new experiment.

A huge female character with two-tone hair is carrying some heavy objects. This is Vegapunk's No. 05 clone, representing the berserk Atlas.

"Where are we going? Has S-Bear's ability been developed to this point?"

"Not sure, S-Bear is not a bear after all, let alone the entire punk record was filmed, I can only be sure that it landed safely, but I can't guarantee where it landed."

Vegapunk's main body stuck out its tongue and answered the question of its avatar.

"Can't this flight state be interrupted in advance? We can also land on our own. This part of the cyberpunk record already has the ability to fly."

"S-Bear's ability is still the first test, and there is insufficient reference data. I'm not sure how long this power will last."

"Forget about that, there is an unknown object approaching quickly! It is still accelerating, and it will catch up in a minute at most!"

Edison, who was observing the instrument, suddenly discovered a very special situation. It was originally just to monitor the general direction of flight, and planned to operate after the S-bear's ability failed. It was beyond expectations that there were unknown objects chasing behind.

"Is it Polusalino? Only he can catch up with this speed."

"It's not him, Polusalino's phone bug still can't get through. Hold on tight!"

Edison's figure flickered, and he fell directly to the ground. Not only him, Vegapunk and Atlas also failed to stand firm, and the question just now was answered, Shaina's figure appeared again on the monitor screen.

The bubbles created by S-Bear were destroyed by her, and the outer metal shell was also destroyed. When Vegapunk and others stood up again, Shaina had already come in front of them.

When evacuating, Vegapunk and ordinary researchers and handymen took a different path. The part that flew away was only Vegapunk and his clone.

"Vegapunk, I'm here to collect debts."

"A remnant of the Lunaria clan? If I remember correctly, your name should be Shaina. Where is the boy who was with you?"

"Oh, you remember it really clearly, oh, no, after all, I didn't use a pseudonym, maybe I should have a pseudonym back then."

Boom! boom!

Two lasers suddenly shot out from the side. They were laser cannons of the same style as pacifists. Vegapunk is not a non-rebel. When he was still in MADS, he also carried a gun and fought with other people.

Shaina's murderous look doesn't look like she's here for an outing. Being able to chase here from Egghead all the way already shows the anger in her heart.

But the laser cannon hit Shaina but it didn't have any effect. After the smoke passed, Shaina still stood there unscathed.

"It's useless, we used our genes to make those weapons, you should be very clear about our abilities, and now I am even stronger.

But after so many years of absence, you have found quite a few loyal subordinates. "

With a wave of a single wing, Atlas, who had just manipulated the weapon, and Edison, who was reporting the situation, were torn to pieces by the terrifying wind blade. The metal body had no effect, leaving only a piece of metal wreckage in the end.

"Robots? Boring, I thought they were your subordinates just like Zhanmomaru."

When he was still in the laboratory, Vegapunk hadn't produced these clones yet, so Shaina didn't know the situation of these clones, and just regarded them as ordinary robots.

"So you're here to kill me, right?"

"Otherwise? Do you think I came to you for tea?"

"That's really a pity, but I'm about to die, and it's not completely unacceptable to be earlier."

Facing Shaina's death threat, Vegapunk didn't have any fear on his face, only indifference, as if everything was within his expectations.

He chose to escape because he still had things to do, but if there was really nowhere to escape, he could accept the situation.

But this attitude made Shaina very unhappy.

She came for revenge, but the enemy didn't take this kind of revenge seriously at all. Killing a person who is not afraid of death will not vent her anger at all.

"Your bland appearance makes people angry!"

In an instant, Shaina had come to Vegapunk, grabbed him by the neck and picked him up.

Vegapunk's original height was not low, but it was all built on his head. After surgery to separate the head, Vegapunk became a short man.

"Ahem, I know you're angry, but that's just research, it's an order from the World Government.

My research has no personal feelings involved, it is just for science. "

"Whether it is the world government or you, you are all the same thing. Whether it is the person who issued the order or you who executed the order, your fate is the same. I will send them to see you soon."

Shaina grabbed Vegapunk and fell to the ground. Vegapunk's body was not much different from that of ordinary people. The fall made him dizzy, and even the antenna above his head was bent. past.

With the antenna damaged, the entire punk record flickered with electric sparks, as if it was damaged.

"Speaking of which, you need such a thing even to escape, so you must attach great importance to it, right? Then destroying it in front of you, it should be very interesting, right?"

Shaina seemed to have thought of something, and immediately planned to attack the punk record above.

Neither the news of Zhan Taomaru's death nor Shaina's attempt to kill him did not change Vegapunk's mood much, but Shaina's new plan made Vegapunk mess up.

"Wait! All my research materials are recorded there! Even for you, this data is very important, it has great value, and it is not an exaggeration to say that it is the future of mankind.

Take it as a trophy, you can gain a lot from it! ***nOveLUsb.cOm***

"It turned out to be such a precious thing, but unfortunately, I don't need it."

With a flap of wings behind, the wind helped the fire, and the punk record quickly turned into a sea of flames. The punk record, which stored all the memories and knowledge of Vegapunk, fell into a sea of flames in an instant.

Vegapunk is the psychic of the brain fruit, and the punk record is also composed of his separated brain. The ability of the psychic will disappear when the psychic loses consciousness, but the things made by the psychic will not be like this.

According to Vegapunk's research, even if he dies here, this punk record will not disappear, and it and other materials will be passed down forever.

Even the enemy should not refuse such a treasure.

"Do you know what you're doing? These studies."

"I am very clear, I admit that you are an excellent scientist, but when you used us as the experimental subjects to make dirty things like Seraphim, there is an endless hatred between us.

What you want to do is what I want to stop, our future does not need you.

We will create a new world, but everything in this world has nothing to do with Vegapunk. Your research will only be with you, disappearing into the darkness forever, and there will be no time to see the sun again! "

Vegapunk is very capable, and Shayna does not deny this. His honor is also unique in the entire world, and the power of technology makes Egghard unique.

But he committed a taboo. No matter how powerful he is, he will eventually appear insignificant in the face of racial hatred. From the time he led the Seraphim experiment, these were already doomed.

New debt - 3000, see you tomorrow

Chapter 1122 Doctor of the End, York of Desire

The flames are spreading, the punk records are gradually melting into the flames, and everything is exactly the same as the original Punk Hazard.

"Crazy, you are a lunatic! Those are the crystallization of human science! They are the treasures of the world!"

"You still have things you worry about. How does it feel to be helpless while watching all this? Doesn't it feel good to see something you cherish is destroyed? But we have experienced more, and our encounters are more unfortunate than yours Much more!"

No matter what Vegapunk said, Shaina's movements didn't stop in the slightest, and the wind blade accompanied by flames destroyed all the punk records.

Some of the guard robots in Punk Records sensed the danger, and launched an attack on Shaina directly after activation, but in the end it was all in vain. Their efforts only left some metal fragments on the ground.

"You are reckless, and your captain will not agree to such a thing. People like you don't understand its value at all!"

"Are you angry? Very well, your calm expression makes me uncomfortable, but you don't need to worry about that kind of thing. I will bear the consequences of ruining this place. Even if there is punishment, it is my own business."

Shaina knows that her behavior is extreme, and many technologies here can play its value. Under normal circumstances, no matter which force occupies this place, it will not waste this spoils of war.

This is also where Vegapunk is calm.

He didn't live long, and he was already bearish on death. He just wanted the latecomers to continue to develop his technology, so that Vegapunk's technology could continue to be passed on.

His ability is indeed top-notch, even if he doesn't have brain fruit, he is still a top scientist.

Nao Nao fruit brought a huge brain capacity, which made his own ability feel like a fish in water, and he could indulge in his own research. The accumulation of research over the years is the secret treasure he values.

Revolutionary Army, World Government, Navy, Pirates, no matter what force they are, they will not treat these things as nothing, but he happened to meet the survivors of Lunaria.

If Seraphim didn't have this invention, then everything would be easy to say. At most, they would just take away the slate, and they wouldn't do anything superfluous.

Kobegapunk miscalculated the incoming personnel and exposed the existence of Seraphim.

Shayina's decision at this time is not in the best interests, but it is the one that is most in line with her wishes. She is not a robot and has her own emotions.

The man with the world's largest brain, it is said that even after 500 years, no one can match his scientific ability. Shaina doesn't care about this, she just wants to let this guy who uses her own race's genes to do research be in despair and grief disappears.

"I remembered one more thing. Punk Hazard's durability experiment and the manufacture of Seraphim are also indispensable for this part of the data, so how long can you last under my flame? 10 minutes, 1 minute, or .1 second ?

Just right, let me do an experiment to see who is more resistant to temperature, you, me, or this machine! "

The temperature inside the Punk Records began to rise continuously, and the temperature measurement tool had been scrapped long before, and at this time the entire Punk Records had become shaky.

When Shaina broke into it, the bubbles created by the S-bear outside Punk Records had been completely shattered, and Punk Records was still able to fly in the sky relying on its own flying device.

Most of the kinetic energy studied by Vegapunk is based on flames, and his dream includes creating an artificial sun to obtain endless heat.

The flying device is no exception, and ordinary flames cannot affect it.

But now the temperature of the flames created by Shaina has exceeded the upper limit of the power plant's tolerance. After a series of sacrificial explosions, the Punk Records also began to fall to the sea.

"Feel it? The feeling of being hopeless and powerless."

It is said to be a temperature experiment, but Shaina has the power to control the flames, otherwise Vegapunk must be the first to be reduced to ashes, and she has to let Vegapunk see her ideals in vain.

Only under the influence of the high temperature, Vegapunk has lost the power to refute, but there is unwillingness in his eyes.

With the death of Vegapunk, the robots recorded by Punk also fell down one after another.

Accompanied by a series of martyrdom, Shaina could no longer feel any signs of life. Punk recorded that this collection of a large number of technologies crashed in an unknown sea area, a large number of wreckage sank into the water, and only a few things were still floating on the sea.

Shaina stayed above the sea for a long time, and did not leave this sea until all the wreckage was swallowed by the sea.

In the deep sea, the wreckage of a robot began to restart. Its face had been swallowed by the fire, leaving only a mechanical skeleton.

The corners of the mechanized mouth rose, and all this seemed to be what it hoped for.

The complete arm grabbed the metal fragments next to it, and then started a new round of assembly, and soon these wreckage formed a very rough mechanical body.

"It's great that the main body is dead."

According to the punk records, apart from the clones of Edison and Atlas who were completely killed by Shayna, there is another clone - York, No. 06 representing desire, and she is also the most special one among Vegapunk's clones .

She didn't have the slightest grudge against the death of the main body, and even wanted to kill the main body with her own hands.

As the avatar representing "desire", York looks lazy, and his daily tasks are only eating, excreting, and sleeping on behalf of other avatars.

But desires will expand, and being lazy is just an appearance. In fact, York is very selfish and full of conspiracy.

Since going to the holy land of Maryjoa, driven by desire, York wants to enjoy the glory, wealth and endless rights, and finally has the desire to become a Tianlongren, and wants to replace the deity as the only Vegabank.

She is very cunning and low-key, and even Vegapunk herself didn't notice it.

She doesn't care about the life or death of others, she can do whatever it takes to achieve her goal, and she can sacrifice herself appropriately without harming her own life

In the original timeline, York secretly contacted the Five Old Stars and revealed to the government that Vegapunk was studying that period of history.

This kind of report makes it hard for Wulaoxing to believe. In order to confirm the authenticity of the report, the World Government sent CP5 to Eggherd to investigate, but failed to find any evidence.

In order to achieve his goal, York secretly kidnapped CP5 and imprisoned them in the old underground laboratory. Later, he kidnapped CP7 and CP8 dispatched by the government one after another.

After the five old stars finally confirmed that Vegabank had betrayed, they decided to carry out the plan to assassinate Vegabank.

Since Shaina caught up, York began to implement her plan, and she wanted to use Shaina's hand to achieve her goal.

The electric currents recorded by Punk before, and the group of paralyzed robots are all written by her. The purpose is to arouse Shaina's anger and let her completely destroy this place.

After all, York has the memory of Vegapunk, and she knows that Shaina doesn't know the specific situation of Vegapunk's clone.

York knew very well that doing so might affect herself, so before she acted, she tore off her mimic skin and severely damaged her body, making herself look exactly like the broken robot.

In the end, in order to hide the breath, it was directly shut down, and it was not restarted until it sank into the sea.

If she tries to protect her main body like other avatars, she will definitely be destroyed. For her own purposes, she made this gamble.

The price was not small, but she succeeded.

Vegapunk's body was killed, and the punk records that stored a large number of records were destroyed, but she is still there. If the world government still wants Vegapunk's technology, it can only rely on her or Lilith.

They are clones, but they have the same ability as Vegapunk. Although the punk record has been lost and the technical reserve has been greatly lost, with the support of the huge data in the hands of the World Government, York and Lilith can still reproduce many something.

"Very good, so I am the only Vegapunk. No, I have to kill Lilith. As long as she dies, I will be the only one. The only choice is to make a better deal."*nOVelUsb.cOm*

Looking at his broken body, York still decided to find a place to repair himself first, as for Lilith's problem.

Without the punk records, they can't share their memories. As long as they find a way to find Lilith, they can re-plan.

At the same time, at the original site of Eggherd, the fighting continued.

"Tianyu Yatagaraus!"

In the high sky, the shining laser pierced the dark clouds, and the continuous laser was like a light knife, cutting the entire battlefield, but in the dark clouds, Zeraora broke through to the yellow ape bathed in thunder.

"Plasma Electric Blade!"

A variant of Zeraora's exclusive move, Plasma Lightning Fist, the plasma current is attached to the claw blade. With the waving of Zeraora's arm, the electric blade floating outside the body turns into an invisible pulverizer, chewing the yellow ape in front of him. It became a flash of light.

There were many burnt marks on Zeraora's fur, and the yellow ape's suit had also become tattered. Compared with the top battle, this was a serious injury.

"It's getting more and more scary. You were not so scary back then."

"To each other, you were not so serious before. Next time you meet, you won't be so anxious."

"next time?"

Yellow Ape's attention returned to Eggheed, which had already turned into a land of ice and snow.

Seraphim is hard to deal with, but after all, they are just a group of children who have not grown up at all. As a veteran general, after knowing the weakness of Seraphim, Kuzan can still find a plan to deal with Seraph.

And in this thunder snow weather, he can rely on elementalization to evade the indiscriminate attacks of lightning and lasers above, but Seraphim can't. Under the influence of Zeraora and Kizaru's AOE, they finally melted in Kuzan's cold current Made ice sculptures.

Chapter 1123 Favor and Misfortune, The Windy World

Any negligence in the battle between the top powerhouses is fatal. Seraphim's combat experience is not perfect enough. Every experiment is a learning process, and this time they were involved in the battle of three extremely powerful people.

Zeraora's thunderbolt and Kizaru's laser are both extremely fast elemental attacks. During the battle, the two of them can't care about where the extra attacks go. Seraphim will inevitably be attacked.

If they don't switch modes, lightning and lasers will also make their bodies stiff, and Kuzan will take the opportunity to attack. If they want to avoid the two elements of lightning and flash, they have to switch modes. After the defense power drops, Kuzan will also be given a chance.

Lost command, Seraphim, who just came out not long ago, even without much adjustment, still exposed certain shortcomings.

click.

The bodies of S-snake and S-hawk were crushed by Kuzan, but there was no emotion of fear from the faces of the ice sculptures. As biological weapons, the Seraphim at this time had no awareness of the meaning of their existence at all.

Received orders and carried out orders, this is all Seraphim knows. For them, death just means the failure of the mission.

click.

Another sound, Kuzan stepped on the ice that fell on the ground, even Seraph, after being completely frozen, the toughness of the body is no different from that of ice.

After being smashed into shattered ice, even if it is thawed, there is no possibility of recovery.

"Porusalino, it's time to end, I don't want to continue fighting with you."

"You say you don't want to fight, but your actions don't look like it, Kuzan."

"No way, if you still want to fight, then I can only accompany you.

Those weapons have been wiped out, our mission is over, and the person you want to protect is not here, so it won't do you any good to continue dragging on. "

Huang Yuan did not answer Kuzan, but was analyzing the situation. The signal was blocked by Zeraola, and the news could not be transmitted. In terms of Eggherd's position, it is impossible for reinforcements to come to the door by themselves.

The two Seraphs were defeated, and Kuzan has been liberated. If Zeraora's speed can keep up with him, Kuzan will really cause great trouble to him.

Similarly, if he chooses to retreat, Zeraora has the ability to keep up with him and start a fight with him, but Kuzan can't. The gap in fruit ability makes it impossible for Kuzan to fight at high altitude for a long time.

Kiwi could not keep Zeraora who wanted to leave, and Zeraora couldn't keep Kiwi who wanted to retreat.

"Kuzan, you are still the same."

Huang Yuan's eyes shifted to Zhantaowan's position, which is a rare and complete area on Eggherd. At this time, it has been turned into an ice mausoleum by Kuzan's ability, in which Zhantaowan's body is completely preserved.

"But what you have done now has determined that we are enemies."

"Who can say this thing well."

Eggherd fell into silence again, only the blizzard and thunderstorm were telling what happened before. In the end, Kizaru left Eggherd with the body of Senmomaru, and it was meaningless for him to stay alone up.

Zeraora didn't waste time on the yellow monkey, after finding the location of the Howler Whale King, he and Kuzan returned to Wano Country.

Lilith in the surrounding sea area did not return to Eggherd. As the battle continued, she manipulated the robot to go to other bases. She did not know that the information was interrupted, and there were problems with the main body and other clones. At this time, only A Yorkie with a dark heart.

The speed of the Howling Whale King was much slower than that of Shaina who had obtained the power of the blue sky slate, and on the return journey, they did not stay in the belly of the Howling Whale King, but sat on its back, taking the form of an outing. Gesture slowly returns to Wano Country.

Compared to the two of them, Shaina went back to Ghost Island first.

On the roof of Ghost Island, there is a landing terrace specially prepared for cadres who can fly, and there is even a runway for takeoff, which is used for some special personnel who need a run-up to take off smoothly.

As Shaina landed, the blue sky slate originally lodged in her body was also summoned by Arceus, and separated from Shaina's body.

Attracted by this breath, the nearby Pokémon also appeared. The hunting swallowtail curiously circled the blue sky slate, with a trace of awe in its desire, and finally just flew nearby.

It is now three poles in the sun. It was originally the sleeping time of the poisonous mealworms, but they were still guided by this breath, woke up from their deep sleep, and formed two distinct teams with the hunting swallowtails.

Some blue birds landed directly on Shaina's shoulders, and the breath of the blue sky slate remained in her body, which was extremely attractive to flying-type Pokémon.

Some blue cotton birds looked at Shaina curiously in the clouds above, while the little birds on her shoulders were more courageous.

Little Bird Pokémon - Chickadee.

It looks like a round blue bird. It is more like a ball than a bird, but the face and the black hair connecting the chest and abdomen form a mask-like decoration.

It looks like the eyes are big, but in fact it is just an illusion. The white parts around their eyes are not eyes, but patterns. There are patterns that cannot be detected by human eyes, which can make cowardly Pokémon feel intimidated.

These juvenile **** were not recently created by Arceus, but the cubs hatched by the group of steel-clad crows. Although they are extremely powerful in their final form, they are as immature as sparrows in their initial form.

But if you underestimate them because of their appearance, you will suffer. Juvenile **** will use their small body to fly at high speed.

Even if it is an enemy that is several times its size, it dares to challenge. Even if it fails, as long as it is still alive, it will grow rapidly and learn from these experiences and lessons.

By the way, juvenile **** are obsessed with cleanliness and love their feathers very much. If they get dirty, juvenile **** will retaliate, and they also don't like blacksmiths.

The juvenile chickadee's chirping sound reached Shaina's ears, and at the same time, several larger birds flew in front of her, even holding a basket under their paws.

They are the evolutionary blue jays of juvenile tits, and after a while of training, they can become new steel-clad jays.

As the name suggests, the blue jay looks like a blue-and-black crow. It has inherited the white markings around its eyes from the juvenile chickadee period. At the same time, it has become smarter and its claws are more flexible. The blue jay can even use a rope to complete the packing work independently when transporting goods.

Now these blue jays carrying baskets are preparing for the future taxi life, and in a sense they are also child laborers.

"Okay, step aside, I'm going to see Lord Saint Beast."

Shaina is very clear that the affinity of these Pokémon is not because of herself, but because of the remaining breath of the Arceus Slate.

When she successfully entered the ghost island, those Pokémon also flew around the ghost island, but did not enter it.

"Master Holy Beast, I'm here to apologize."

As soon as she came to Arceus, Shaina made it clear that she was here, not to ask for credit, but to apologize.

"Bring back the slate, you did a good job, there is no crime."

"No, this is my selfishness. I destroyed Vegapunk's cherished research records. Those researches and inventions may have many valuable things, but..."

Sorry, I couldn't restrain my anger at that time. Those biological weapons made with the blood of the Lunaria race disgusted me to the extreme. *"NOveluSb.com"*

"It doesn't matter, it's just a mere technology. There is not much difference between having and not having it. The world is very big, and it will not stop because of the lack of a Vegapunk. He is worthless compared to you."

"But."

"No, but, since you want to be punished, then I will punish you to put down your work during this period of time, and let me go and relax honestly. A lot of things are coming to an end, so just be patient and wait."

Speaking of this, Arceus also retracted the blue sky slate into his body, and a strange cyclone appeared out of thin air above Guidao. In Shaina's senses, Arceus at this moment is like the center of the star sea, and behind him is the vast starry sky.

A strange monsoon centered on Ghost Island almost affected most of the new world. Fallen leaves and petals flew in the places where the monsoon passed, forming a strange picture in the sky.

Residents of Dressrosa, New Murloc Island, Cake Island, Sphinx Island, and many other islands have noticed this sudden warm hurricane.

But in Baldigo, the dragon's eyes turned to the source of the wind.

"The world is about to blow up."

The newspaper in his hand was placed on the table by him. The genius scientist Vegapunk died. The news has begun to spread to the world

It will take some time for the news to ferment, and Shaina also wandered aimlessly in Wano Country.

Punishment is to let her rest, but she has nothing to do when she is free. Originally, she wanted to talk to Jhin, but at this time Jhin was wandering outside with Kaido, and there was no one to be found.

This is when a person is in the wrong place at the wrong time and meets the wrong person.

Looking at Shaina in front of him, Quinn looked dull, and turned around to run away. He never expected that Shaina had already returned.

Mingming had called Zeraora before, and Zeraora told him personally that they were still five days away from Ghost Island.

But it hasn't been five minutes since he hung up the phone, and Shaina just appeared in front of him.

Before, Quinn hung up on the phone in a hurry, and hung up the phone without hearing what Zeraora said later. She didn't know that Shaina and Zeraora had already split up.

"Quinn, stop! Why did you run when you saw me? What did you do wrong again?"

"Don't slander me! I haven't been anywhere these days, what can I do!"

"You better not have done it, but now I suddenly have a problem, tell me honestly, do you know about the Vegapunk biological weapon plan, and how much you have participated in!"

Chapter 1124 Quine Metaphysics and Drake Economics

"Biological weapon? What are you talking about? Didn't you go to find a slate for Lord Arceus? How did you get involved in this kind of thing?"

Quin had an ominous premonition, and didn't answer Shaina's question immediately, but wanted to clarify the situation first.

"By the way, I killed that big-headed monster. The new issue of the newspaper hasn't been delivered yet. You'll know when you read it."

"Bighead. Wait, you killed that Vegapunk guy? Didn't you just finish the mission?"

"The one that just ended was Zeraora. We had separated before, and now it's been a day.

Lord Saint Beast lent me some strength, so I came back a little earlier. "

Shaina's answer answered Quinn's doubts, and also made it clear why Shaina returned to Ghost Island so early, but the news of Vegapunk's death still made him a little shocked.

"You just... killed it directly?"

"Yeah, what's the problem? I'll never forget about Punk Hazard in my life, not to mention that **** used our blood to make biological weapons.

At that time, you hadn't left yet, so you don't know anything about this kind of thing, right? "

Shaina's words reminded Quinn of decades ago. At that time, the MADS team was still carrying out its own adventures in the sea, and even the funds were funded by the loan shark leader of the underground world, Du Field.

For Vegapunk, Quinn didn't have much memory. MADS is just a group temporarily united because of interests, and the relationship between them is not close.

The members hardly confront each other, everyone looks down on the other members, and they all think that they are the best one.

And after capturing the Lunaria people.

【The legendary race of gods who can live in any environment, their resistance is really terrible. 】

【If they use their genes to transform people, they should be able to achieve strong results. 】

When Quinn had read the orders of the world government and added the things discussed before, he immediately understood why Shaina directly killed Vegapunk without thinking. She didn't count Vegapunk as a slice. Not bad anymore.

Now, for Quinn, it doesn't matter whether Vegapunk dies or not, what matters is how he can get out.

admit

No, never admit it!

"I haven't heard of it. I don't know what you're talking about. I don't even know what that weapon looks like."

"Lunaria has the characteristics of white hair, brown skin, black wings, and the same flames burning behind us, but looks like Hancock and Hawkeye when they were young, and even inherited some fruit abilities.

Let's be honest, I won't kill you after beating you for so many years. "

In less than one-tenth of a second, Quinn had already captured the key point in Shaina's words. Not killing and not fighting are two concepts. She only said not killing, but not saying not to fight.

Then some horrific pictures appeared in Quinn's mind. In order not to let those pictures come true, in order to prevent Hawkins' black lottery from being realized, Quinn resolutely vetoed this matter.

"You just subconsciously vetoed twice in a row, this is not your character, you are lying."

"I can't understand what nonsense you are talking about, woman. Forget it, I saw it in the experiment record, but I didn't participate in it. Even if Vegapunk succeeded, it was only after I left."

Seeing that Shaina still didn't let go of her doubts despite the continuous vetoes, Quinn also noticed something unusual, which clearly meant that she didn't vent her resentment after killing Vegapunk, and wanted to find someone to continue beating her up.

If he is destined to be unable to get rid of it, he must also clarify that he has not participated in this matter.

If Shaina is made to mistakenly believe that he has also participated in the experiment of biological weapons, he will really be finished.

Was beaten by Jhin in the morning, Shayna in the afternoon, and the Spiny Ammonite probably had to take the opportunity to fire a spiked cannon at night.

"You are lying, I almost believed you."

“.”

"Evidence, how can you prove that you did not participate in this matter."

"You forced me to do this."

"Why, do you want to do it? I don't mind. The short-lived power of the Holy Beast has made me realize a lot of things. You can try it."

Shaina made a fighting stance, but what Quinn said next greatly exceeded her expectations.

"I don't have that ability."

"What did you say?"

"I said that I don't have that ability. Compared with that Vegapunk guy, I'm like a waste. You know my technical level. Even if I want to do it, I don't have the ability to make that kind of thing, so I don't know what it is. I never participated.

If you have to say it, it's me, and I don't have the ability to participate at all.

Even if I want to, I can't help it, let alone I don't want to at all! "

After saying this, Quinn seemed to be exhausted, and his fat body seemed a little weak.

This is something that MADS members are unwilling to admit and have to face. They are inferior to Vegapunk, whether it is knowledge or ability.

What Vegapunk can do, they may not be able to do. Even with the same research ideas, Vegapunk can easily produce a phantom beast fruit that has no difference except the color.

Just because of my own obsessive-compulsive disorder and the environment, I insisted that it was a failure.

If the world government knows that he has really produced the fruit of the phantom beast species, I am afraid that there will be no other research time, and he will be forced to mass-produce those things.

When it comes to Caesar, the ordinary animal fruits are turned into the kind of people who are neither human nor ghost, but he still thinks that it is a successful experiment.

At this time, Quinn is facing his own weakness.

"You are ruthless."

Quinn used perfect reasons to pick himself out, just like ordinary companies shouted wronged when they were suspected of food fraud, and said that they lacked technology and had no ability to use that kind of high-tech additives.

"Wait, where are you going?"

Seeing that Shaina had no intention of doing anything, Quinn became even more panicked.

"Go on vacation, I've wronged you this time."

"You come back, shouldn't you just find a reason and beat me up? What's the matter with you leaving like this?"

"Is there something wrong with you? If you are really itchy, you can go to Weili's gym, and they will welcome your new sandbag."

After speaking, he ignored Quinn and flew directly into the sky against the wind.

Looking at Shaina who was leaving, Quinn pondered for a moment, then took out a phone bug.

"Hello, Hawkins? Go back to Ghost Island immediately, the task? Abandon the task and replace it with someone else. Come back as soon as possible!"

Quinn originally thought that this incident was the black sign in Hawkins' divination, and the justification was just to reduce the degree of misfortune, but unexpectedly, the justification was too much, and Shaina gave up directly.

According to past divination, what didn't happen is not completely over, that is to say, there is another event that is more harmful than this event waiting for him, and that is the catastrophe of his fate.

Worse than Shaina, it's either Yamato or Kaido. According to experience, although Yamato speaks harshly, he really hasn't done much, so only Kaido is left.

Since the ramball Q1.0 experiment, Kaido has not fought against him again. After such a long time, what new tricks Kaido will play again is beyond his estimation.

"Tsk, unfortunately, Sister Shaina didn't do anything."

On the top floor of the Pokémon Center, Yamato put down the binoculars in her hand. She could swear that she was just bored looking at the scenery of the inner sea, and counted the number of carp kings. It was a coincidence that she found Quinn.

The distance was too far, she couldn't hear what Quinn and Shaina were talking about, she just instinctively thought that Shaina would do something, but the result disappointed her a bit.

"I said Sister Derek, why are you here?"

"Come for lunch, the sick meals here are delicious."

Derek held a plate in his hand and regarded this place as a canteen for lunch.

"Didn't foster father give you a black card for unlimited overdraft life?"

"Yes, it's not that there is a fee for meals for the wounded and sick. If I can't swipe that card, I can't afford it." *Novelusb.com*

"But...wasn't yesterday a payday? You didn't treat yourself either."

"Well, after paying the bill, the rest will be spent."

Bringing up her empty wallet, Drake didn't feel any resentment, but was a little proud, and then she took out a stack of scratched-off lottery tickets from her pocket.

For the purpose of promoting the flow of funds, the lottery tickets sold externally are also sold in Wano Country, but here are just ordinary lottery tickets without any additional purpose.

Taking the lottery tickets handed over by Derek, Yamato roughly counted, and finally got a not-so-good result.

"You seem to have lost money."

"It doesn't matter, although I spend more than I earn, I have reaped the joy of winning the lottery."

"But your money is gone."

"Hey, miss, you don't understand this, the human brain will protect the owner, it will take the initiative to forget some unhappy things.

Money always runs out, but happiness is not the same.

After a long time, you will only remember the happiness when you get it, and forget the annoyance when you don't get it. Isn't it very profitable to think so? "

Derek's economic theory always makes people's eyes go dark, not to mention that Mandelfisch, who lives every day, doesn't understand, even Yamato can't figure out how she persisted.

"But... your brain doesn't protect your wallet. When it sees an empty wallet, it will remind you of the pain you have had."

"It doesn't matter, my wallet has never been full, and I don't feel anything when I see it. I don't feel that kind of feeling. Miss, you probably can't understand it."

"Well, it's kind of hard to imagine."

Derek said something Yamato never thought, after all her wallet was never empty.

At this time, there was a sound from the submerged port in another direction. With the rotation of the port chain, the figure of the Shadow Fox appeared on Ghost Island again. Olga, who had gone on vacation before, had returned with Naiqin.

9k, debt liquidation

Chapter 1125 Compatible Ability

"Sister Olga is back too. It's strange. Are you all busy recently? Sister Shaina just came back not long ago. Ulti and Peggy Wan also came back the day before yesterday. Almost half of the senior cadres have nothing to do."

"Well, miss, you haven't read the information recently. It's thanks to the navy. They have been very motivated recently, and our territory has stopped a lot."

"Navy? What did they do?"

Yamato has indeed not read the relevant information during this time, or in other words, she only rushes to supplement the information related to the mission before the mission.

Recently it was her fishing season, so she didn't pay attention to things outside Wano.

"Didn't the Navy switch the positions of the Navy Headquarters and the G1 Branch a while ago? A large part of the pirates who just arrived in the New World were sent back to Advance City before they set sail again."

After living in the new world for a period of time, except for a very few thorns, most people would not choose to challenge the emperor of the sea.

Even if they were not recruited, they had personally experienced the power of the monsters in the sea, and they had no choice but to survive in the cracks when they were unwilling to become other people's younger brothers.

The changeable climate of the New World gave them opportunities. The dangerous sea area and climate prevented some islands from being included in the sea emperor's territory, which gave them room to survive.

Ninety percent of those who dare to challenge are newcomers who have just entered the new world.

There is a gulf between the Four Seas and the first half of the Great Route.

In the four seas, as long as you are ruthless and have a certain number of weapons and manpower, you can dominate one side.

After all, the weapons of the four seas are relatively backward, and those with abilities are very rare.

When you reach the Great Route, this kind of person will be the first to be screened out. You must have both strength and luck, otherwise you will not be able to reach the Chambord Islands at all.

When it comes to the new world, the gap will escalate again.

There are countless ability users here. In addition to weird abilities, domineering is also a more popular move. The natural ability that is almost invincible in the first half of the great route is just a relatively good ability in the new world.

The gap in cognition makes the newcomers not know what is the difference between themselves and the real strong. With all kinds of ambitions and dreams, they often attack the territory of the emperor of the sea.

On weekdays, what the cadres do the most is to kill these troublemakers. Occasionally, if there are a few capable thorns, then a higher-ranking cadre has to be hired.

Pirates will only choose to protect their own territory, but the navy is different, they have the ability to attack pirates in the entire sea area.

The new official took office three fires, but the fire of the new marshal Akainu has not been burned out. After the headquarters entered the new world, Akainu did not blindly declare war with those sea emperors.

He hates pirates, but he is not a brainless fool. That kind of thing is not appropriate, so recently the navy has stepped up its efforts to crack down on the newcomer pirates who have just arrived in the Chambord Islands.

The number of people who caused troubles was reduced from the source, and the workload of the Beasts cadres was naturally reduced.

"They'd better move a little bigger. It would be the best to lure that **** dad over there. I didn't expect my ice substitute plan to fail. I have to think of a new strategy."

"Ice double?"

"It's nothing, don't worry about such details, you can eat your lunch slowly, I'll go first."

As he said that, he turned over the railing skillfully, and walked towards the ghost island under the eyes of passers-by. Not long after Yamato left, a happy egg came to the top floor with a lunch box.

When he found that Yamato was no longer here, he shook his body helplessly. It originally wanted to shake its head, but its body structure is very special. Even if it encounters a vampire, the vampire will have to worry about where the neck of Happy Egg is.

"happy~"

Happy Egg greeted the blue jay flying not far away, then handed the lunch box to the blue jay, and walked to other wards.

At the same time, Naiqin, who had just returned to Ghost Island with Olga, came to Arceus' office, where there was Assier who had been waiting here for a long time.

"Master Arceus. Um. I'm back again."

The day when she handed in her resignation is still vivid in her mind, but she herself returned to Ghost Island. Under Olga's persuasion, she has already made the decision to join the Beasts. She only needs the permission of Arceus or Kaido, and she is officially member now.

Ordinary newcomers need to be assessed, but Naiqin has been working part-time for decades, and the assessment period has passed long ago. The original difference is personal will.

Now that Wald has ended, his last madness also made Naiqin change his mind and re-plan the future.

"Olga has already reported, it is not the first time you have come to Ghost Island, this matter is approved, and there is another matter next.

Acière, you did a great job, the material you worked on worked.

Now I want to make sure of one thing, are you really going to transfer this opportunity to someone else? "

"I'm sure, Lord Arceus, I'm not good at fighting in the first place, and it would be a waste to take the ability you bestowed on me. It's better to give the ability to Naiqin, she is more suitable than me."

"Wait, you can get rewards for your own efforts. This kind of gift is too expensive, I can't take it!"

Listening to the conversation between Arceus and Assier, Naiqin already understood what Assier wanted to do, but this was what Assier's own research results were exchanged for, and she didn't want to just accept it.

"It's okay, you know, I'm just a stronger ordinary person at most, I may not go out a few times a year, giving me ability is a waste.

You often go to Taikoo Island to collect medicinal materials. You have this ability to defend yourself, and you keep saying that you want to give you something, but you can't get it. Now it's just right. "

"Okay, I don't want to ask about your personal feelings, but there's no need to decline here.

As long as there are results, there will be no less things that should be given to you. The reward belongs to Assie, and he has the right to decide. "

Arceus' words ended the refusal of the two, and also confirmed Naiqin as the recipient of this ability.

"It just so happens that there is a very suitable ability here. It should be able to exert a very good effect when combined with your traditional Chinese medicine boxing."no**VELuSB.coM**

Arceus' ability granting is a scene that will make people feel extremely mysterious no matter how many times you see it. With the end of the ability granting, Naiqin also began to try new abilities, and her figure began to transform into a kangaroo.

Pillar Mushroom, a mushroom Pokémon with grass + fighting attributes. The overall image is similar to a kangaroo, and more like a creature evolved from a mushroom. The mushroom-shaped object on the top of the head forms a hat-like decoration.

Naiqin is also a person who studies herbal medicine and integrates it into her physical skills. In terms of attributes, it is inexplicably similar to the bamboo hat mushroom. However, what suits her best is none other than the characteristic of the bamboo hat mushroom-poison therapy.

I have something to do today, please take a leave, owe 4k

Chapter 1126 Poison-healing bamboo hat mushroom and flashing mother monster power

Naiqin's traditional Chinese medicine boxing method relies on herbal medicine. Her physical fitness is not outstanding, but she can rely on the stimulation of medicine to achieve many impossible things, including the incredible thing of rejuvenating in a short period of time.

It's just that there are limitations to this kind of thing, medicine is three-point poison, herbal medicine itself is poison, even if it is a medicine that nourishes the body, as long as the dosage reaches a certain level, it will turn from a good medicine for curing a disease to a deadly poison.

Naiqin neutralized the toxicity of the drug through different drug combinations, but even so, her body has an upper limit of tolerance. If the safe dose is exceeded, Naiqin will not go berserk like Chopper, but it will still trigger very serious consequences.

The characteristic of poison therapy is different. The toxicity brought by herbs is not a special case of metal poisoning. The characteristic of poison therapy can perfectly neutralize the toxicity of herbs.

The effect of poison therapy itself is to turn the loss caused by poisoning into the recovery of physical strength and life, and convert a debuff buff into a gain buff.

In the world of Pokémon, the trainer who owns the hat mushroom will even let the hat mushroom carry the poisonous orb in the battle. The hat mushroom is one of the few Pokémon with poison healing properties. chemical reaction.

The effect of the highly poisonous orb is very simple. It poisons the holder. It is said to be a orb, but it is essentially the crystallization of the poisonous Pokémon's body, or a stone.

The Pokémon that most often produce poisonous orbs are the Smelly Slime family, and their bodies will leave this kind of strange beads due to the accumulation of toxins

When the bamboo hat mushroom uses the highly poisonous orb to enter the highly toxic state to trigger the recovery effect of poison therapy, it uses an alternative way to realize the self-circulation of energy in the body.

She doesn't even need such things as highly poisonous orbs. With the poison treatment package, Naiqin can fight without having to consider the side effects of drugs, and even use more toxic drugs to integrate into her battles, which can be called epic enhancement.

"It's really a long-lost vitality."

Naiqin, who has turned into a bamboo hat, only feels that her limbs are full of strength, which is the special vitality brought to the host by the "animal system". After all, she is already 80 years old, and she is still an old person even if she takes good care of her.

Although both Assier and Olga are over 200 years old, they are special human beings affected by pure gold. Time has been stagnant for more than a hundred years, and the years have not left any traces on them.

Life is fine in normal times, but now Naiqin relies heavily on the secret medicine of "Korea Newcomer" in battle. Only in this way can she temporarily regain her youthful vitality and enter a state of full firepower.

"Master Arceus, thank you for your gift."

The vigorous posture even kneeling down on one knee to salute is much smoother. Naiqin, who is bent over, does not feel the protest of the disc in her waist. This is excellent news for her.

"Just do what you have to do. Your previous room is still reserved. Don't bother me if you have nothing else to do."

Ghost Island has a lot of rooms, not one or two. Under the suggestion of Olga and Assier, this room was naturally reserved.

After the process was over, the three of them left Arceus' room, and then went to the gym on Onijima. Naiqin planned to get acquainted with her new ability.

The best sparring partner here is naturally Olga, but Olga's current level is a bit supermodel for Naiqin.

Olga's melee fighting ability is not strong. This is not strong based on Jack and Jhin as reference objects. For others, her physical skill level is still difficult to surpass. After all, she is also an early student trained by Kaido. .

As long as he is not too wasteful or a person whose body has already been developed, he will be brought up by Kaido from a young age. As long as he does not die, even if he cannot become a strong person, he will not be a weak person, which is enough to have a place in the sea.

Compared to practicing with Olga, Naiqin chose to find a dead target, such as a dynamometer, to try.

Not long after, the three of them had already arrived at the gymnasium on Onijima. They said it was a gymnasium, but it was actually a martial arts arena. Apart from ordinary training equipment, fights between companions were not uncommon.

Beasts have always had a tradition of beating them to death as long as they can't be beaten to death. Because of this trend, the doctors of the Pokémon Center directly opened a consultation desk here, mainly dealing with bruises and sprains.

Most of the battles here are limited to physical games, and the types of injuries are basically limited to a certain range.

"Sister Naiqin, are you back too? Brother Assier has been talking a lot during this time."

"Ahem, don't talk nonsense, you are slandering."

The pirate who was addicted to ironing hadn't noticed them yet, but the doctor sitting next to him noticed the two of them.

Naiqin hadn't officially joined before, but doctors from all over the world admired her herbal medicine and bone-setting techniques.

Naiqin is different from those doctors who have a professional background in various countries. Although the prescription and technique are rough, the effect is excellent.

Especially her bone-setting technique, which was originally decomposed from the boxing technique derived for fighting.

In order to better remove the enemy's joints, Nainin has a very good understanding of the structure of the human body.

Although Assier is a scientific research geek, his own daughter is one of the disasters, so his name is naturally not too small.

As for why the doctor ignored Olga herself, it was because Olga just found a reason to slip away when she came down, leaving enough space for the two of them.

"Yeah, I'm back, but this time I can't leave."

"Then Brother Assier will be happy. By the way, please help me take a look. I'm a little uncertain about the position of his arm."

Assier's interruption didn't stop him. His tone and expression showed that Assier didn't really hate him saying such things. The doctor even joked a few words casually, and entrusted Nainin to help him deal with the situation in front of him. this patient. *novELuSb.cOm*

"This sprain. What did you do?"

"this."

"He came to Ghost Island for the first time, and his spirit was a little high. Seeing that the monsters were very unconvinced, he insisted on competing with the monsters, but ended up taking a **** roll. He was lucky, if it wasn't for the monsters. He had to break it."

Speaking of this, the doctor patted him on the shoulder angrily, causing him to grin in pain, but he didn't dare to refute anything.

For pirates, a doctor is a very important profession. Usually no one will choose to offend a doctor. If they are really injured during a mission, they still have to rely on the doctor's treatment in most cases.

Then the doctor briefly summarized what the pirate had done, which has to refer to the current promotion system within Beasts.

If you want to become a benefactor from an ordinary pirate, the first thing you need to do is to pass the review, and then become a person who can enter the Wano country, which is regarded as entering the team of beasts.

If one's own strength or accumulated achievements cannot do such a thing, one can only stay on the outlying islands. In most cases, one can get an artificial devil fruit.

Being able to enter Wano Country means that the pirate has surpassed most ordinary members and has become a member of the elite. Usually, pirates who have just entered Onishima are always arrogant in their hearts, and people are prone to make mistakes when they are arrogant.

In the training ground, regardless of his companion's obstruction, he chose to fight a duel with a monster next to him.

If it is in normal times, this is nothing, the strange power who likes to fight will not refuse this kind of thing.

He successfully entered the ghost island. In order to show more, he chose a strange force that looked very strong. There are already many defeated monsters lying around this monster force. This is enough to show that this monster force is the best in the monster force group. .

But he didn't notice that there was a light green strange force looking at him all the time.

Light green is a different-colored individual in the monster power, which is commonly known as the flash Pokémon. The most important point is that this monster power is a female, which is commonly known as the flash female monster power.

With a different color, it is an exotic princess in the eyes of Guai Li. Many young Guai Li, even Hao Li and wrist power, want to be favored by this female Wei Li.

In the strange force group, the most muscular, the most powerful, and the most powerful is the most trustworthy one, and will also have the priority to choose a mate.

The easiest way to prove this is to fight.

Those strange powers are the young strange powers who are close to the courtship finals after layers of competition.

At this time, the pirate who chose to challenge was not a simple challenge in the eyes of Wei Li. Coupled with the slightly provocative tone of the pirate, in Wei Li's view, this was the enemy trying to "take his wife".

The genes inherited by the ethnic group make them unable to refuse the enemy's challenge in courtship. Refusing is tantamount to admitting defeat and giving up, so it chose to go all out and use its special skill-hell rollover.

Guai Liben has a housekeeping skill. They use four arms to catch their opponents and strangle them into a complicated shape.

After that, they will roll over on the ground with the enemy. In the process, both sides will be hurt, but the strange power as the user will be much less affected.

It is not impossible to fight with strange power. The fighting king Shiba will conduct unarmed training with his own strange power. Just like his feat of subduing a giant rock snake with his bare hands, it is a part of his life.

But even Shiba, who can be called a humanoid Pokémon and is proficient in many fighting skills, needs to be careful when facing strange forces. The arrogance of the pirate itself ran into the hands of the strange forces who courted him, and eventually he suffered a severe dislocation of his arms the result of.

No one laughed at him. This kind of thing often happens among newcomers on Oni Island.

Including but not limited to being stunned by the electric dragon, kissed by the stinky mud of Alola, being hammered by the giant blacksmith, playing with a knife with the commander of chopping, and touching the burning coal pile on the back of the big charcoal cart.

As of today, the most unlucky pirate was given a loving hug by the bear next to Perona. Compared with that one, the one who wrestled with strange power can only temporarily rank second.

Chapter 1127 Rotom gossip version, Quinn capital version

There will never be a shortage of fun people among pirates. They will record the embarrassing behavior of their companions as a normal chat. If this person dies unfortunately, this event will generally become a way of remembering him.

【Do you still remember that so-and-so? That guy was almost electrocuted to death by Dian Long, but unfortunately he was gone after that battle.】
nOve~~l~~Usb.cOm

Similar topics will always appear. Of course, this kind of fun incident is mostly regarded as a drunken fun incident, and even many cadres are on the list.

Sasagi who was overturned by Boss Kedora, Quinn who was backstabbed by the spiny ammonite, Quinn who was accidentally poisoned by Galar's double bomb gas, and Quinn who was accidentally bitten by a super bad star.

As for why they are all Quinn.

Although the most unlucky one was the pirate who was hugged by Xiong Aizhi, Quinn has always had the largest number. The other cadres are still old calendars when they first joined, but Quinn is constantly refreshing the records.

To some extent, Quinn wanted to put an end to this record, but the one who made this record was not a human being at all, but Rotom. They have a hint of evil taste with the attributes of ghosts, and they took advantage of the position of monitoring Wano Country , left this note.

Since they did not cause any substantial harm, Arceus didn't care about them, but the Rotoms themselves set up a gossip board in the Rotom phone, which was full of similar news.

Even Quinn accepted it later, because he found that this board could indirectly increase his popularity.

"This injury is really serious enough, but it's not a big problem, let me do it."

Touching the opponent's arm, Naiqin adjusted the position of the bones little by little. With screams and crunching sounds, she reattached the dislocated arms.

"Okay, let's go to the Pokémon Center to take a picture. Your bones are definitely not broken, but it doesn't matter if there are any fractures. Drink more milk recently to strengthen it."

After a few clicks, Naiqin made a diagnosis, and then found an instrument to try out her new form.

"Claws can enhance destructive power, and this ability is really convenient."

Naiqin was still a certain distance away from the target in front of her, but her fist still hit the target. At the moment of punching, her arm was extended.

The bamboo hat mushroom is a quick attacker. Although the bamboo hat mushroom is only a Pokémon that lives in warm and humid forests or grasslands and feeds on vegetation, it has a good fighting power.

It has a certain degree of similarity to mushrooms and other fungi, and its body is very light. After approaching the enemy with light steps, the hat mushroom will swing high-speed combos. In addition to the characteristics of the extension of plants, the seemingly short arms will be in the battle. Sudden extension, giving the opponent a surprise attack.

To say something similar, Luffy's rubber machine gun has to be called a pirated version.

But the bamboo hat mushroom can only do this with its arms, and it doesn't have the ability to bounce bullets.

Although it can carry out photosynthesis, it cannot become a sun god.

"The body is a lot lighter, and the jumping ability is stronger, and the tail seems to change the way of fighting."

Traditional Chinese medicine boxing is the foundation of Naiqin's battle, and it will not become invalid due to the change of form. As long as you are familiar with this form, you can even extend more tactics.

The extra tail is also a change. The tail that can be freely controlled can play a miraculous effect in battle, and the tail of the hat mushroom can not only cause damage on the physical level.

Looking at the powder released after the tail flick, Naiqin grabbed it in her hand and planned to analyze the specific effect.

"Asie, I'm going to the laboratory, do you want to come with me?"

"Ah, this... No, I'll go and clean up the house for you. I haven't come back for a long time. It should be dusty inside."

In Arceus' office just now, Assier spoke confidently. There are quite a few people here, but they are all exercising or competing. A few meters around them is considered a special no-man's land.

Under this circumstance, Assier became submissive again, turned around and ran back to the living area.

Naiqin didn't follow immediately, she had to get familiar with this ability first, anyway, there was still plenty of time in the future, and seeing Assier like this, he had to get used to it for a while.

And Naiqin had to register some things and re-apply for her permission on Ghost Island.

Familiar laboratory, familiar metal door, but Naiqin no longer has the authority to this door.

It will take some time to popularize the records again, other places are fine, the Rotom will quickly complete information exchange in the electronic network, only the laboratory is an exception.

The authority owner of the laboratory is Quinn, the security level is the strictest, and the information exchange is the slowest.

Although there is a Rotom device, the Rotom smart measures are to prevent the defensive measures here from accidentally injuring your own people. The update of information must be done by Quinn himself. This is the privilege he wants from Kaido and Arceus. On the one hand, I am the most reliable person.

Looking at the doorbell on the door, Naiqin didn't press it. It's not surprising that Quinxiu's doorbell is outrageous. Who knows if he will modify the doorbell in a daze, so he just waved at the monitor.

Not long after, the door opened, and Quinn also appeared here.

"Long time no see. I just need assistance with an experiment. You are better than me at the analysis and ratio of herbal medicine."

Quinn's latest project is the blue wave ball Q5.0 plan, which also failed before 4.0.

Although Quinn eliminated the berserk factor in the drug, it was overkill.

Lambo ball Q4.0 eventually turned into throat lozenges, which have already entered the sales channel of Baishouguo as a new product.

Naiqin's return is just the right time for him.

"I have no problem, but I want to analyze these powders first. The ability bestowed by Lord Arceus is really amazing."

"Mhahaha, of course, this is something that only one of us can understand, Assie has spent a lot of money this time, you know how to use the laboratory equipment, you can figure it out yourself, I Go see when that Hawkins boy comes back."

In order to get Hawkins back as soon as possible, Quinn even specially applied for the delivery service of Fatty Express. Logically speaking, he should be back soon. He planned to take a look first. The mysterious black sign made him really uneasy.

After Quinn left, Naiqin entered this familiar laboratory again, with silver-white metal walls and technologically-sounding instruments. The laboratory spent a lot of money to build is not inferior to any top laboratory on the sea.

After putting the powder into a special instrument, Naiqin also figured out what it was, nothing else, but a special kind of poisonous spore.

The bamboo hat mushroom is a mushroom Pokémon. Before it evolved, it was no different from a mushroom. Although it has no poisonous attribute, it is not uncommon for a grass-type Pokémon to have poison skills. The bamboo hat mushroom is one of them.

The object on its tail that looks like a tail hammer is actually not tough. It is about the same hardness as the shell of an ordinary plant. It is an object formed after the hardening of poisonous spores during the evolution process.

The appearance of the fruit is just a disguise, and there is no deadly toxin in it, but there is no good end to eating it, and it can make people experience the feeling of vomiting and diarrhea in minutes.

The hole in the canopy of the head and the hammer on the tail can both spread spores in battle, and these spores, which can cause severe diarrhea if eaten, can cause great pain if inhaled into the lungs.

Once stiffened due to this kind of thing, the hat mushroom will have a better chance to attack. Pokémon in nature also pay attention to the weak and the strong. In order to survive, they will not show mercy.

"It seems that the way of fighting needs to be changed. In addition, I have to try the effect of poison therapy. There are enough medicinal materials here. Let's try to prepare some medicines."

Quinn's laboratory still has enough medicines, some of which were cultivated by Naiqin before, and some of them were obtained by Quinn to improve the blue wave ball.

For Naiqin, this is a very rich material library.

Naiqin is still doing her own experiments, but Quinn is counting the time on the roof of Onigashima. With Wano Country as the center, in the territory directly under Beasts, Fatty Express has the title of a one-day delivery. Even Not even the weather of the New World could stop them.

As for the outside of the territory, it will be much slower. There are still many troubles on the sea.

Not long after, a fast dragon flew down from the clouds and landed firmly in front of Quinn. On its back was Hawkins whose hair was blown into a broom.

Quinn wanted an express express. After Kuailong successfully found Hawkins' location, he returned at an extremely fast speed. Hawkins' hair is the evidence.

It takes a long time for him to take care of his long hair on weekdays, so he can keep it soft and smooth. Now that Kuailong has stopped, his long hair is still standing on top of his head like an antenna. What happened on the road.

"Master Quinn, I'm back, what's the matter?"

Regardless of tidying up his hair, Hawkins directly asked Quinn the reason. He and Apu were not promoted quickly, but their status was not low. It was all because of Quinn. If one day Quinn felt that they were useless, the road ahead will not be easy after that.

"It's nothing serious, you can recalculate it for me in person, the black check before made me panic, let me tell you, before."

Before Hawkins was asked to divination again, Quinn recounted what happened before, then suddenly remembered something, and patted Hawkins on the shoulder with a big hand.

"You work hard, kid, I promise you won't treat you badly, but you know a lot of my secrets, if one day I find out that this matter is revealed from your mouth, you have to be careful of your own head."

While making the promise, Quinn also threatened Hawkins, as to why he only threatened Hawkins.

There are only a few moments of other possible insiders, Jhin, Shaina, Yamato, Kaido, the more troublesome they are, he can't afford it.

"I understand, Lord Quinn, please wait a moment."

Tarot cards appeared in his hand, and Hawkins began to practice divination skillfully, and then he saw a very strange divination picture

Chapter 1128 Careful living and the ideal of ninja

The emergency call back was for divination. This kind of thing seemed outrageous, but it was completely within Hawkins' expectations. This was what Quinn asked him to do the most.

Although Quinn called the programmer at three o'clock in the morning and asked the other party to write one for himself, it meant a pile of waste paper codes to others except that he could use it.

But Hawkins didn't complain. After all, the boss didn't just paint the cake, but gave the real thing, but while giving a small reward, he also painted a bigger cake.

Hawkins is already familiar with the meritorious system of beasts, he doesn't think he can get ahead by fortune-telling and divination.

After permutation and combination, the result of card divination appeared in Hawkins' hands again.

"Master Quinn, I have good news and bad news, which one do you want to hear first?"

"Stop playing this trick and say it in the order you want."

Quinn is tired of playing this good and bad trick. Anyway, no matter whether the first news is good or bad, there will definitely be a turning point in the middle.

"Yes, the good news is that your previous catastrophe has actually passed. The bad news is that your next fate will be very rough. As long as you can get through it without incident, you will be safe for a long time.

If you can't get through, the consequences will be more serious than before.

In a way, your bad luck has accumulated. "

Quinn's divination results are half **** and half heaven. Although this 50% probability is the easiest to fool people, Hawkins has never seen such a big contrast. The difference between the positive and negative results is too great.

Black and white are separated, and the extreme black can set off the cleanness of the white. The result of Quinn's divination is such an extremely black and pure white yin-yang fish, the contrast is so dazzling.

"Sure enough. If I knew it earlier, I might as well not explain it and let her beat me up."

"Lord Quinn, with all due respect, even if you were beaten up before, you still can't escape the one who should come."

"Hawkins, did I tell you that this place is full of beasts, and the last thing we believe in is the theory of fate!"

"But Master Quinn, if you don't believe me, why are you looking for me?"

". This uncle wants to prove that the so-called destiny can definitely be broken!"

After speaking, Quinn drove away Hawkins and asked him to tidy his hair and prepare for many times of divination.

The stubbornness just now was Quinn's last insistence. In fact, he had already started thinking about where to take refuge. As long as he figured out whether the crisis came from the outside or inside, he could always find a safe place.

"No, this crisis should not give me an internal and external attack."

Quinn seems to have thought of something terrible. Vegapunk has been killed. Normally, this kind of person is a very important talent for any force.

Now his achievements rely on some of the materials kept by the World Government, and the original timeline relies on the materials in the O'Hara Library, but those materials have existed for a long time. Before the rise of Vegapunk, no one could reproduce them. This speaks volumes about Vegapunk's abilities.

If the ability is not enough, even if all the theoretical formulas are written down, the maker may not be able to create it.

But the beasts killed him. If a force does not need a talent, the most likely is that they already have this talent, and it is stronger.

"Calm down, calm down, this kind of thing is impossible, Lord Arceus has done it himself before, this bad pot will not come back to me again."

Caesar is a person who knows that he may be unlucky and still indulges in pleasure, while Quinn refuses to accept some horrible cognitions and selectively forgets them first. Anyway, according to Hawkins, it will take a while, so just be yourself first Things got better.

Hawkins' task became to stay on standby, and Quinn also returned to the previous laboratory with a little sadness. Before leaving, he still did not forget to give Kuailong a good review, and at the same time left Pokémon Baofin to increase his favorability.

"What's wrong with you, how long has it been, why do you look so worried?"

"It's okay, I'm used to it."

Before Naiqin left Beasts, Quinn hadn't entered the state of divination fascination. Naiqin didn't know that Quinn had evolved a new mode for self-protection.

In Naiqin's impression, Quinn has always been in a special state of reincarnation, slamming the scorpion-unlucky-worrying about the future-no matter how slamming the scorpion-still unlucky.

In this case, she didn't delve into it. Instead, she asked Quinn what he needed help with.

"That's it, the loot captured on Sky Island can change the wave band of the animal-type devil fruit through drugs, so as to display more forms.

It is said that it was studied by a reindeer that ate the human fruit, which made the drug not particularly suitable for humans. It had to be modified and tested. The formula has been obtained, but the ratio is wrong. I tried to increase or decrease some drugs, but it has not worked Effect. "

"It sounds like the creator is talented."

"That's right, it's a bit worse than my uncle, but he's still a genius."

Naiqin ignored Quinn's boast, took the prescription and started her own analysis.

"Have you failed samples? Show me."noVeLusB.Com

"Here, this is Q3.0, forget about Q4.0, that version is completely invalid and has no reference value."

"Didn't you give Faerun a try? He is also an animal that ate the human fruit. Although it is an ancient species, it should have something in common."

Speaking of the human fruit, Naiqin's first reaction was that Faerun, the thousand-year-old dragon who ate the primitive fruit, is a human fruit, and there should be little difference between the ancient species and the modern species.

"I tried it, but it didn't work. It should be that the difference between the Millennium Dragon and the reindeer is too big, and it will only make the eater furious."

"Is that so"

Quinn thought that Naiqin would use an instrument to analyze it, but she made a very dangerous behavior, and saw that she directly ate Q3.0.

"Hey, what are you doing?"

"Experience the power of the medicine."

"What are you thinking? You are a pure benefactor of the ability bestowed by Lord Arceus. How can a mere external object interfere with this ability? You don't have any strange feelings, do you?"

This was the first time a non-capable person took this drug, and Quinn's heartbeat accelerated due to excessive tension.

"No problem, the power characteristic that Lord Arceus gave me is called poison therapy. Biological toxins are useless, but the taste is really not good."

Poison cure is also a special buff for Naiqin, poison cure is not an antidote.

So after taking the medicine, after it takes effect, it will be uncomfortable for a short time, and then this feeling will disappear under the effect of the characteristics.

The descriptions of outsiders can never compare with personal experience, which allows Naiqin to try new drugs very boldly, without worrying about poisoning herself, and even has another idea.

"Why don't I help you test the medicine, although the effect cannot be tested, but the side effects and toxicity can be detected."

"No! Absolutely not!"

Before Naiqin could finish speaking, she was interrupted by Quinn.

The characteristic of poison treatment is indeed a perfect guinea pig, and it will not cause any accidents anyway, but this is a matter of nature. Even if there is no consequence, this is still an experiment, which is tantamount to acting as an experimental subject.

Shaina and Jhin were already sensitive to this word, if they knew that Quinn used his own people as test subjects, the result would be very tragic.

In addition, there is Olga. Originally, he and Olga were in a state of no grievances and no enmity, and Olga was not included in his own unlucky factors. If Naiqin really did this, it would cause Olga join the anti quinn front

The ability of that phantom plus a few thugs with terrifying strength will really kill him. He probably won't know how to die by then, which is also the reason why his heartbeat speeded up before.

In order to prevent possible accidents, Quinn directly put an end to this behavior.

If the experiment failed, he would be muttered at most. He didn't want to increase the hostile forces because of this.

"Okay, just analyze the properties of the medicine, and then help me summarize some prescriptions. Please don't interfere with other things."

Quinn already felt that the misfortune of the future was beckoning to him. This was clearly an example. Before the situation got out of hand, he hurriedly dismissed Naiqin.

"Okay, go and have a look at Assier. He is just a boring gourd in front of you. In fact, there are quite a lot of truths. I will restore your identity information to you later. Goodbye."

Quinn's mechanical arm was directly extended, stood still and pushed Naiqin out, and locked the door from the inside, showing his attitude.

"Strange, I haven't seen you for a while, how come Quinn has become more cautious."

Naiqin didn't know what happened during this period, and didn't know that Yamato had even stated to his face that he was going to take revenge, but he just returned to Ghost Island with a little confusion.

At the same time, in the palace of the Flower City, everything was the same as before, and Kozuki Hiyori also ended his outing this year accompanied by his guards.

What she went to was Dressrosa controlled by Doflamingo. Although she thought that country was weird, she didn't find the problem.

As for whether the people of the Emperor of the Sea will cause any trouble if they travel to the territory of Qibuhai, Doflamingo's answer is no, he can't defeat beasts, he can't get rid of the navy, but he has unprecedented control over Dressrosa powerful.

Combined with the geographical location, most of the affairs around Dressrosa are handled by the G5 branch. Even if someone tries to report, they will be stopped by Virgo halfway.

And the focus of the Navy Headquarters at this time is not on Qiwuhai, and it lacks attention to the territory actually controlled by Qiwuhai.

The most important point is that Doflamingo is not doing anything blatantly now. His identity as a JOKER in the underground world is no secret. The navy and the world government are very clear about what he is doing.

But without tearing his face, the world government will not take any action against him.

"Congratulations, General."

The ostentation in the palace is still online, and after Kozuki Hiyori's attitude changed, this ostentation was even strengthened.

For the servants living in the palace, the return of Kozuki Hiyori means that life will be busy again. They can be lazy when the general is away, but they can't do it when the general is back.

For some people, the return of Guangyue and Sunhe also has different meanings.

After Jhin didn't follow Kozuki Hiyori very much, Koga Ninja took over the tasks in this area. When she was traveling, Koga Ninja naturally followed her, performing her own special tasks.

When Koga Ninja also returned to Wano Country, some people had their own thoughts.

They have already returned to the palace, and the guarding task is naturally handed over to Hotei and Hiyori Miwa. The Koga Ninja just walked in the palace by itself, and the special ear holes captured the surrounding information.

"There is too much movement, and the lurking disguise is too obvious."

A small water shuriken appeared in the hands of Koga Ninja Frog and flew towards the wall beside it. Although it was water, under the influence of Koga Ninja's power, the water shuriken was like solid metal, and a piece of camouflage cloth was lifted off, revealing the black charcoal jade underneath.

"Haven't you given up yet, kid? This path is not suitable for you at all."

Looking at Xiaoyu, Koga Ninja was not surprised, this is not the first time.

A year ago, Xiaoyu seemed to have made some sort of decision to become a powerful ninja.

Different from the alluring female ninja in the original timeline, this time it is just a powerful female ninja, which is the influence of today's Wano country.

When Kozuki Sukiyaki was critically ill, the Heitan family had the idea of rebellion, and then there was the "Avenger" Heitan Orochi.

Combined with a series of changes in Wano Country, and Heitan Orochi diverting a lot of negative emotions, the surname Heitan has become unpopular in Wano Country.

Even though these people have nothing to do with Heitan Orochi, they are just side branches, and they still receive the discriminating eyes of the people around them. In order to survive, they are the first group of people who choose to join the Beasts. After that, he worked as a handyman in the palace.

But a handyman is a handyman after all. If it is in other countries, working as a handyman in the king's palace sounds good, but unlike the country of Wano, the general here has no real power for a long time.

Living in this environment, Xiaoyu also has her own ideas. She wants to change the fate of her family and does not want to continue to engage in this kind of labor work. In the current Wano country, the fastest way is to prove herself by force and join the A group of beasts.

Living in this environment, the general's attendants did not make her feel majestic. The former Jhin brought only fear to outsiders. On the contrary, the elusive and high-status Koga Ninja succeeded in attracting fans here.

As the leader of the Hiwa Royal Court Banzhong, and now the leader of the Koga-ryu Ninja Legion, the Koga Ninja is the highest among the people who can see and touch people who live in the palace.

Neither Jhin nor Drake recruits locals, even if they can meet them, there is nothing they can do. If they can become the disciples recognized by Koga Ninja, for these people, they will reach the sky in one step.

Not to mention anything else, under Wano's special culture, Koga Ninja is already the **** of ninjas.

"Master, please give me a chance, I will prove that I can become an excellent ninja!"

Xiaoyu was not discouraged when she was discovered. This is one of the few opportunities to change her destiny. For the future of herself and her family, she also wants to fight hard once, instead of just following the path of her parents

Debt cleared again

Chapter 1129 Today's headlines - Death of Vegapunk

"Anyone can speak empty words, and they speak better than you. Do you have any extraordinary talents?"

Inspirational declarations can't impress Koga Ninja. If words can change his mind, then the people of Wano Country can blow him three days in a row without repeating a word.

The ninjutsu learned from the Koga Ninja Frog is not a ostentatious use of props, but a real shadow avatar, a substitute, or a special flash of lightning.

Due to the influence of seclusion, Wano Country has special names for many things. The names such as sorcerer and sakura have not completely disappeared with the import of foreign cultures, but have become informal terms.

Those who can receive the ability bestowed by Arceus are the core members of Hundred Beasts. In Wano, apart from a small number of special personnel, only the ninja legion under Koga Ninja and a

small number of members of the Shinsengumi have this qualification. accounted for the majority.**Novelusb.Com**

Compared to those props who hide machine guns in the lute and smoke bombs in the bag, the ability given by Arceus is the real "ninjutsu".

If you want to obtain this ability, you can't get Koga Ninja's approval.

"Talent. I think this should be okay"

"Then do you have any strong background, or extraordinary luck?"

"this."

"Obviously, you don't have any of these. When you can run around the palace within 5 minutes, tell me about it."

Koga Ninja used a very realistic reason to break Xiaoyu's way of taking a shortcut. There is nothing, at least he has to show the energy to work hard.

The palace in the capital of flowers is not small. For a girl less than eight years old, it is very difficult to go around in five minutes. If she can break through herself and do this, then Koga Ninja will not mind. Teach something extra.

"But."

"No but, there is a shortcut, but it is not so easy to walk. If you want to walk on this road, you have to come up with enough proof."

As he spoke, Koga Ninja Frog's fingers became pitch black, and a bubble with a high oil content was secreted from its body surface.

The fingers covered by arrogance became extremely hard, and a lot of sparks were fired under a snap of the fingers, which directly ignited the grease on them, showing how water-type Pokémon play with fire.

For people in the new world, it is not difficult to create sparks after mastering domineering, but this kind of trick is enough to deter children.

"If you can do this kind of thing, I will accept you as a disciple directly. If you can't do it, let me exercise your body, and come to me when you can do it."

"yes!"

Compared to the previous ruthless rejection, Koga Ninja left her with at least one condition this time.

She didn't react. Koga Ninja didn't drive her away several times in succession, and she was willing to tell her so much, which was a kind of test.

Compared with other people of the same age in the palace, Xiaoyu is tougher and more persistent, which arouses the interest of Koga Ninja, after all, his usual life is relatively boring.

After sending Xiaoyu away, Koga Ninwa picked up a newspaper that had just arrived not long ago. Although it was published in Wano, the general news information remained unchanged.

【The regression of human civilization, the death of genius scientist Vegapunk】

As time went by, what happened in Eggred was reported to the top. After the oracle left the magnetic field of Zeraora, the news reached the Navy headquarters.

The navy in the nearby sea area and the CP department of the world government collectively dispatched, and finally found the sea area where the Punk record crashed, and confirmed the death of Vegapunk.

This kind of big news Morgans will inevitably exaggerate. The world government's control over public opinion has been stretched to the extreme. Even if they want to hide news, Morgans will directly reveal it, let alone this kind of news that was originally planned to be announced to the public.

The cognition of Vegapunk in the world is a great scientist. If this kind of person is killed, it can further reflect the notoriety of beasts, but this effect is only valid outside the territory of beasts, and there is no effect in the territory of beasts. So easy to use.

The only person who has a different opinion on this matter is Dr. Koloba from Kokura Island.

"Doctor, what's wrong with you?"

"I was wondering, what the **** did Vegapunk do."

Kloba has a sad face. He is an old friend of Vegapunk. When he was young, he traveled to the sea and had a close friendship with Vegapunk.

In terms of Beast's style in recent years, Keluoba believes that Beast is not a person who wants to destroy everything desperately. What Beast does is more like developing something. The most important thing in O'Hara is the library. file information.

After Beasts took away all the materials, they also took away these scholars and gave them a space to study history. Although this is for mutual benefit, it also means that Beasts will not kill a valuable person inexplicably. people.

【Destroyed once, many years of research were burned by fire. 】

"They have nothing left. It seems that they want to erase the traces of Vegapunk's existence. This is not something that ordinary hatred can do."

Morgans likes to exaggerate publicity, and Keluoba is also aware of this, but judging from the photos, there is nothing left in Egghead, and it has completely turned into an ice sheet.

There are only some fragments floating on the sea in the distance.

"It's a pity. It's a pity."

Keluoba let out a long sigh, and then brought some things to the edge of Sky Island, and began to cherish the memory of this old friend. They had a certain friendship, but that was all, and they were far from desperate for each other.

It wasn't just Klopp who felt emotional about this incident. Although his relationship with Vegapunk was a little better, it was the Navy Headquarters that was more troublesome.

The original G1 branch, now the Navy Headquarters, Huang Yuan has returned here, and the news he brought back also caused an uproar in the Navy Headquarters.

"Porusalino, are you sure?"

The cigar in Akainu's mouth burned quickly until the cigar burned out, and the burning part touched his lips, and Akainu didn't respond. As a magma, he would not be afraid of this heat.

The news of Kuzan joining Beasts has not been announced by the navy, and it is not the case that Beasts does not have ice abilities. Just a frozen island cannot explain it.

"I have seen it with my own eyes and experienced it myself. This kind of thing cannot be faked. Kuzan has already joined Beasts."

Huang Yuan had two Band-Aids on his face, but his clothes hadn't been changed yet. The broken clothes were enough to show how fierce his previous battle was.

"He can be considered to be shooting with all his strength. The power of Seraphim is not bad, but it is not enough. Kuzan has the ability to deal with them."

"The bastard."

Akainu hit the table with his fist, and soon there was a burnt smell. Now he is a little annoyed about keeping his hands back.

Chapter 1130 Version Update - Age of Valkyries

When Akainu's fist was removed from the table, there was already a scorched black handprint left by magma on it. Judging from the several traces nearby, this table would not last long.

He competed for the marshal to show off his skills and lead the navy to calm the sea in his own way, but when he really achieved this position, he found that he was getting angry every day, which was even worse than in the Warring States period.

Although one of the three generals in the Warring States Period liked to fish and the other was lazy, they were still working after all, not to mention there was a model worker like Akainu, and the situation in the sea was relatively stable.

When it comes to himself, not to mention Hai Hai's rampage, the navy has experienced heavy losses, and the world's large conscription has expanded its force, but it is not so easy to restore its original combat power, and the military discipline problem has dropped a lot.

These temporary recruits and promotions are much more difficult to recruit than veterans.

Kuzan's actions at this time are tantamount to stabbing him again. Years of comradeship kept Akakenu from killing him after the victory. Kuzan lost a leg, so he can understand why he hates himself Akainu.

Although this battle is a battle agreed by both parties, people have emotions, and that's okay.

He can also understand the navy that Kuzan left, and if he loses, he also can't accept Kuzan's philosophy, but he never thought that Kuzan turned around and really joined the pirates. Just like the beasts in the sky.

Judging from the results of Kizan's report, Kuzan is not just playing for fun, but for real. No matter what purpose Kuzan has, this behavior of joining the pirates makes Akainu hate it very much.

"This matter is a foregone conclusion. It seems that the previous rumors are true. Sakaski, what are you going to do? Are you going to issue a reward?"

"hold on"

Kuzan's identity is too special. This is not the first defection incident, but in the past he was also a major general. Ding Potian is the giant lieutenant general Sauro, and the reward is nothing.

Kuzan's identity is the highest combat power of the former Navy Headquarters. Such a combat power has too much impact on joining the pirates. Before the Kuzan incident is known to everyone, Akainu does not want it to be publicized.

"That's not the only trouble. That Zeraora's combat power is also gradually increasing. At the same time, there are things that all the beasts are looking for. I saw that after the woman absorbed the stone slab, her whole body's strength was generated. qualitatively changed."

When talking about Shaina's changes, Kizaru had already put down his upturned legs.

"The pair of wings give me the feeling that it contains the entire sky. The attack in the previous war may be their mastery of the power of the slate. If this power can be used on everyone, even Kaido

Sakalski, you have to understand, they have more than one piece. "

"I know this, in addition to this one, there is another one in the previous transaction.

Kaido also took two pieces when he escaped from the laboratory decades ago, and they have at least four pieces in their hands.

They have been searching for this thing at all costs over the years, and it is unknown how many slates they have in hand. "

"It's getting more and more terrifying. This sea is really dangerous. Is there anything else? If not, I'll leave first. I don't need to suggest things like rewards."

"Well, go ahead, by the way, your subordinate can posthumously be named colonel of the headquarters, and relatives are treated at the same level."

Before Kizaki left, Akaken mentioned Zhanmomaru again. It is a common practice for the military rank to be promoted after dying in the line of duty.

"Karp! It's someone related to you again. Can't someone related to you have peace of mind!"

In the senior care department of the Navy Headquarters, Sengoku yelled at Garp as before. Even though he had retreated to the second line, Sengoku still kept his original habit on this matter. He didn't know how many times he yelled at Garp these years.

Son-Monch D. Long, the leader of the Revolutionary Army, the most ferocious criminal in history.

Grandson-Monkey D. Luffy, Pirates, Supernova, Advance City Prison Break, Top War Participants

Personal disciple - Kuzan, former admiral, now defected to join the Beasts Pirates.

Just these three people are enough to drive the average person crazy.

"The old man didn't expect it to be like this. I taught him to act rashly, but I didn't expect him to be so spontaneous."

Seeing the news about Kuzan, Karp also felt some headaches, but at this moment, all the senbei and donuts in front of him were swallowed by Sengoku. After resigning from the position of marshal, Sengoku obviously started to let go Self, and gradually kapu.

If you can't beat the opponent, then join the opponent. At this time, Sengoku is using Garp's method to deal with Garp, and it is very effective.

At the same time, Mary Joya and the Five Old Stars also had a headache over the news.

"Are you sure Vegapunk is dead?"

Wearing a black suit, with white curly hair, a fluffy white beard, a flat hat, and a scar on the left cheek, Wu Laoxing looked at CPO who was reporting the news, and asked solemnly.

"Satan, several teams have already explored the vicinity, and the news is basically true. Unless Vegapunk has some backup, he must be dead."

One of the Five Old Stars, Jay Golucia Satan, is in charge of scientific matters, and is honored as the Valkyrie of Science Defense. He did most of the docking with Vegapunk before, and now Vegapunk is dead. He felt very troubled.

The seraphim that has not been fully completed, and the "Holy Mother's Flame" that was damaged during the war on top, these two things alone are a big trouble.

Kuzan's defection, the mysterious slate, and a series of scattered things that even the five old stars feel a headache.

In addition to the navy and the world government, two people who are closely related to this matter, other people who read the newspaper also have their own ideas.

Kraigana Island, Hawkeye stood on the top of the castle and waited for something. After a while, a fast dragon appeared in front of him, holding something like a courier box in his hand.

After placing the box on the roof, Kuailong took out a Rotom mobile phone from the satchel on his chest with his round arms, and began to check the order information. After confirming that it was correct, Bailey, who was handed over by Hawkeye, left here.

Online payment is still relatively difficult in this sea, so this kind of express delivery business adopts cash on delivery. In order to prevent bad debts, the express delivery business is carried out by a relatively strong Kuailong.

There is also a news bird that appeared on this island with Kuailong. This is a newspaper ordered by Hawkeye and Morgans. In order to understand world intelligence, he deliberately spent more Bailey and bought a special delivery service.

"It's really a convenient invention. It's much more convenient to purchase materials now."

Hawkeye put away the sold version of the Rotom mobile phone, and is very satisfied with the expanded business of Baishou Fruit
